HLA-DRB1*15:01:01:22 Genomic Plasmid Vector	PHLAG82539773	Plasmid vector containing HLA-DRB1*15:01:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:01:22 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:01:01:23 Genomic Plasmid Vector	PHLAG82539774	Plasmid vector containing HLA-DRB1*15:01:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:01:23 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:01:24 Genomic Plasmid Vector	PHLAG82539775	Plasmid vector containing HLA-DRB1*15:01:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:01:24 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:01:25 Genomic Plasmid Vector	PHLAG82539776	Plasmid vector containing HLA-DRB1*15:01:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:01:25 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:01:26 Genomic Plasmid Vector	PHLAG82539777	Plasmid vector containing HLA-DRB1*15:01:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:01:26 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:01:27 Genomic Plasmid Vector	PHLAG82539778	Plasmid vector containing HLA-DRB1*15:01:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:01:27 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:01:28 Genomic Plasmid Vector	PHLAG82539779	Plasmid vector containing HLA-DRB1*15:01:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:01:28 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:01:29 Genomic Plasmid Vector	PHLAG82539780	Plasmid vector containing HLA-DRB1*15:01:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:01:29 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:01:30 Genomic Plasmid Vector	PHLAG82539781	Plasmid vector containing HLA-DRB1*15:01:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:01:30 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:01:01:31 Genomic Plasmid Vector	PHLAG8253978 2	Plasmid vector containing HLA-DRB1*15:01:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:01:31 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:01:32Q Genomic Plasmid Vector	PHLAG8253978 3	Plasmid vector containing HLA-DRB1*15:01:01:32Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:01:32Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:01:32Q protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:01:33 Genomic Plasmid Vector	PHLAG8253978 4	Plasmid vector containing HLA-DRB1*15:01:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:01:33 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:02 Genomic Plasmid Vector	PHLAG8253978 5	Plasmid vector containing HLA-DRB1*15:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:03 Genomic Plasmid Vector	PHLAG8253978 6	Plasmid vector containing HLA-DRB1*15:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:04 Genomic Plasmid Vector	PHLAG8253978 7	Plasmid vector containing HLA-DRB1*15:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:04 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:05 Genomic Plasmid Vector	PHLAG8253978 8	Plasmid vector containing HLA-DRB1*15:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:05 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:06 Genomic Plasmid Vector	PHLAG8253978 9	Plasmid vector containing HLA-DRB1*15:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:06 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:01:07 Genomic Plasmid Vector	PHLAG82539790	Plasmid vector containing HLA-DRB1*15:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:07 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:08:01 Genomic Plasmid Vector	PHLAG82539791	Plasmid vector containing HLA-DRB1*15:01:08:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:08:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:08:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:08:02 Genomic Plasmid Vector	PHLAG82539792	Plasmid vector containing HLA-DRB1*15:01:08:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:08:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:08:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:09 Genomic Plasmid Vector	PHLAG82539793	Plasmid vector containing HLA-DRB1*15:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:09 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:10 Genomic Plasmid Vector	PHLAG82539794	Plasmid vector containing HLA-DRB1*15:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:10 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:11 Genomic Plasmid Vector	PHLAG82539795	Plasmid vector containing HLA-DRB1*15:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:11 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:12 Genomic Plasmid Vector	PHLAG82539796	Plasmid vector containing HLA-DRB1*15:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:12 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:13 Genomic Plasmid Vector	PHLAG82539797	Plasmid vector containing HLA-DRB1*15:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:13 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:14 Genomic Plasmid Vector	PHLAG82539798	Plasmid vector containing HLA-DRB1*15:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:14 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:01:15 Genomic Plasmid Vector	PHLAG82539799	Plasmid vector containing HLA-DRB1*15:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:15 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:16 Genomic Plasmid Vector	PHLAG82539800	Plasmid vector containing HLA-DRB1*15:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:16 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:17 Genomic Plasmid Vector	PHLAG82539801	Plasmid vector containing HLA-DRB1*15:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:17 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:18 Genomic Plasmid Vector	PHLAG82539802	Plasmid vector containing HLA-DRB1*15:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:18 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:19 Genomic Plasmid Vector	PHLAG82539803	Plasmid vector containing HLA-DRB1*15:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:19 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:20 Genomic Plasmid Vector	PHLAG82539804	Plasmid vector containing HLA-DRB1*15:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:20 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:21 Genomic Plasmid Vector	PHLAG82539805	Plasmid vector containing HLA-DRB1*15:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:21 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:22 Genomic Plasmid Vector	PHLAG82539806	Plasmid vector containing HLA-DRB1*15:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:22 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:23 Genomic Plasmid Vector	PHLAG82539807	Plasmid vector containing HLA-DRB1*15:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:23 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:01:24 Genomic Plasmid Vector	PHLAG82539808	Plasmid vector containing HLA-DRB1*15:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:24 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:25 Genomic Plasmid Vector	PHLAG82539809	Plasmid vector containing HLA-DRB1*15:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:25 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:26 Genomic Plasmid Vector	PHLAG825398110	Plasmid vector containing HLA-DRB1*15:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:26 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:27 Genomic Plasmid Vector	PHLAG825398111	Plasmid vector containing HLA-DRB1*15:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:27 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:28 Genomic Plasmid Vector	PHLAG825398112	Plasmid vector containing HLA-DRB1*15:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:28 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:29 Genomic Plasmid Vector	PHLAG825398113	Plasmid vector containing HLA-DRB1*15:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:29 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:30 Genomic Plasmid Vector	PHLAG825398114	Plasmid vector containing HLA-DRB1*15:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:30 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:31 Genomic Plasmid Vector	PHLAG825398115	Plasmid vector containing HLA-DRB1*15:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:31 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:32 Genomic Plasmid Vector	PHLAG825398116	Plasmid vector containing HLA-DRB1*15:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:32 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:01:33 Genomic Plasmid Vector	PHLAG82539817	Plasmid vector containing HLA-DRB1*15:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:33 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:34 Genomic Plasmid Vector	PHLAG82539818	Plasmid vector containing HLA-DRB1*15:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:34 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:35 Genomic Plasmid Vector	PHLAG82539819	Plasmid vector containing HLA-DRB1*15:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:35 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:36 Genomic Plasmid Vector	PHLAG82539820	Plasmid vector containing HLA-DRB1*15:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:36 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:37 Genomic Plasmid Vector	PHLAG82539821	Plasmid vector containing HLA-DRB1*15:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:37 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:38 Genomic Plasmid Vector	PHLAG82539822	Plasmid vector containing HLA-DRB1*15:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:38 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:39 Genomic Plasmid Vector	PHLAG82539823	Plasmid vector containing HLA-DRB1*15:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:39 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:40 Genomic Plasmid Vector	PHLAG82539824	Plasmid vector containing HLA-DRB1*15:01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:40 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:41 Genomic Plasmid Vector	PHLAG82539825	Plasmid vector containing HLA-DRB1*15:01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:41 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:01:42 Genomic Plasmid Vector	PHLAG82539826	Plasmid vector containing HLA-DRB1*15:01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:42 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:43 Genomic Plasmid Vector	PHLAG82539827	Plasmid vector containing HLA-DRB1*15:01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:43 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:44 Genomic Plasmid Vector	PHLAG82539828	Plasmid vector containing HLA-DRB1*15:01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:44 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:45 Genomic Plasmid Vector	PHLAG82539829	Plasmid vector containing HLA-DRB1*15:01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:45 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:46 Genomic Plasmid Vector	PHLAG82539830	Plasmid vector containing HLA-DRB1*15:01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:46 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:47 Genomic Plasmid Vector	PHLAG82539831	Plasmid vector containing HLA-DRB1*15:01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:47 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:48 Genomic Plasmid Vector	PHLAG82539832	Plasmid vector containing HLA-DRB1*15:01:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:48 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:49 Genomic Plasmid Vector	PHLAG82539833	Plasmid vector containing HLA-DRB1*15:01:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:49 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:50 Genomic Plasmid Vector	PHLAG82539834	Plasmid vector containing HLA-DRB1*15:01:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:50 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:01:51 Genomic Plasmid Vector	PHLAG82539835	Plasmid vector containing HLA-DRB1*15:01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:51 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:52 Genomic Plasmid Vector	PHLAG82539836	Plasmid vector containing HLA-DRB1*15:01:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:52 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:01:53 Genomic Plasmid Vector	PHLAG82539837	Plasmid vector containing HLA-DRB1*15:01:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:01:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:01:53 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:01:01 Genomic Plasmid Vector	PHLAG82539838	Plasmid vector containing HLA-DRB1*15:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:01:02 Genomic Plasmid Vector	PHLAG82539839	Plasmid vector containing HLA-DRB1*15:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:01:03 Genomic Plasmid Vector	PHLAG82539840	Plasmid vector containing HLA-DRB1*15:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:01:04 Genomic Plasmid Vector	PHLAG82539841	Plasmid vector containing HLA-DRB1*15:02:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:01:04 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:01:05 Genomic Plasmid Vector	PHLAG82539842	Plasmid vector containing HLA-DRB1*15:02:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:01:05 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:02:01:06 Genomic Plasmid Vector	PHLAG82539843	Plasmid vector containing HLA-DRB1*15:02:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:01:06 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:01:07 Genomic Plasmid Vector	PHLAG82539844	Plasmid vector containing HLA-DRB1*15:02:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:01:07 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:01:08 Genomic Plasmid Vector	PHLAG82539845	Plasmid vector containing HLA-DRB1*15:02:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:01:08 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:02:01 Genomic Plasmid Vector	PHLAG82539846	Plasmid vector containing HLA-DRB1*15:02:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:02:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:02:02 Genomic Plasmid Vector	PHLAG82539847	Plasmid vector containing HLA-DRB1*15:02:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:02:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:02:03 Genomic Plasmid Vector	PHLAG82539848	Plasmid vector containing HLA-DRB1*15:02:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:02:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:03 Genomic Plasmid Vector	PHLAG82539849	Plasmid vector containing HLA-DRB1*15:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:04 Genomic Plasmid Vector	PHLAG82539850	Plasmid vector containing HLA-DRB1*15:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:04 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:02:05 Genomic Plasmid Vector	PHLAG82539851	Plasmid vector containing HLA-DRB1*15:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:05 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:06 Genomic Plasmid Vector	PHLAG82539852	Plasmid vector containing HLA-DRB1*15:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:06 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:07 Genomic Plasmid Vector	PHLAG82539853	Plasmid vector containing HLA-DRB1*15:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:07 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:08 Genomic Plasmid Vector	PHLAG82539854	Plasmid vector containing HLA-DRB1*15:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:08 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:09 Genomic Plasmid Vector	PHLAG82539855	Plasmid vector containing HLA-DRB1*15:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:09 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:10 Genomic Plasmid Vector	PHLAG82539856	Plasmid vector containing HLA-DRB1*15:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:10 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:11 Genomic Plasmid Vector	PHLAG82539857	Plasmid vector containing HLA-DRB1*15:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:11 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:12 Genomic Plasmid Vector	PHLAG82539858	Plasmid vector containing HLA-DRB1*15:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:12 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:13 Genomic Plasmid Vector	PHLAG82539859	Plasmid vector containing HLA-DRB1*15:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:13 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:02:14 Genomic Plasmid Vector	PHLAG82539860	Plasmid vector containing HLA-DRB1*15:02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:14 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:15 Genomic Plasmid Vector	PHLAG82539861	Plasmid vector containing HLA-DRB1*15:02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:15 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:16 Genomic Plasmid Vector	PHLAG82539862	Plasmid vector containing HLA-DRB1*15:02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:16 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:17 Genomic Plasmid Vector	PHLAG82539863	Plasmid vector containing HLA-DRB1*15:02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:17 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:18 Genomic Plasmid Vector	PHLAG82539864	Plasmid vector containing HLA-DRB1*15:02:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:18 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:19 Genomic Plasmid Vector	PHLAG82539865	Plasmid vector containing HLA-DRB1*15:02:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:19 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:02:20 Genomic Plasmid Vector	PHLAG82539866	Plasmid vector containing HLA-DRB1*15:02:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:02:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:02:20 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:03:01:01 Genomic Plasmid Vector	PHLAG82539867	Plasmid vector containing HLA-DRB1*15:03:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:03:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:03:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:03:01:02 Genomic Plasmid Vector	PHLAG82539868	Plasmid vector containing HLA-DRB1*15:03:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:03:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:03:01:02 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:03:01:03 Genomic Plasmid Vector	PHLAG82539869	Plasmid vector containing HLA-DRB1*15:03:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:03:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:03:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:03:01:04 Genomic Plasmid Vector	PHLAG82539870	Plasmid vector containing HLA-DRB1*15:03:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:03:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:03:01:04 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:03:02 Genomic Plasmid Vector	PHLAG82539871	Plasmid vector containing HLA-DRB1*15:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:03:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:03:03 Genomic Plasmid Vector	PHLAG82539872	Plasmid vector containing HLA-DRB1*15:03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:03:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:03:04 Genomic Plasmid Vector	PHLAG82539873	Plasmid vector containing HLA-DRB1*15:03:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:03:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:03:04 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:03:05 Genomic Plasmid Vector	PHLAG82539874	Plasmid vector containing HLA-DRB1*15:03:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:03:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:03:05 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:03:06 Genomic Plasmid Vector	PHLAG82539875	Plasmid vector containing HLA-DRB1*15:03:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:03:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:03:06 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:04 Genomic Plasmid Vector	PHLAG82539876	Plasmid vector containing HLA-DRB1*15:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:04 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:05 Genomic Plasmid Vector	PHLAG82539877	Plasmid vector containing HLA-DRB1*15:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:05 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:06:01 Genomic Plasmid Vector	PHLAG82539878	Plasmid vector containing HLA-DRB1*15:06:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:06:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:06:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:06:02 Genomic Plasmid Vector	PHLAG82539879	Plasmid vector containing HLA-DRB1*15:06:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:06:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:06:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:06:03 Genomic Plasmid Vector	PHLAG82539880	Plasmid vector containing HLA-DRB1*15:06:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:06:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:06:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:06:04 Genomic Plasmid Vector	PHLAG82539881	Plasmid vector containing HLA-DRB1*15:06:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:06:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:06:04 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:07:01 Genomic Plasmid Vector	PHLAG82539882	Plasmid vector containing HLA-DRB1*15:07:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:07:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:07:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:07:02 Genomic Plasmid Vector	PHLAG82539883	Plasmid vector containing HLA-DRB1*15:07:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:07:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:07:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:07:03 Genomic Plasmid Vector	PHLAG82539884	Plasmid vector containing HLA-DRB1*15:07:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:07:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:07:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:08 Genomic Plasmid Vector	PHLAG82539885	Plasmid vector containing HLA-DRB1*15:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:08 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:09 Genomic Plasmid Vector	PHLAG82539886	Plasmid vector containing HLA-DRB1*15:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:09 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:10 Genomic Plasmid Vector	PHLAG82539887	Plasmid vector containing HLA-DRB1*15:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:10 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:100 Genomic Plasmid Vector	PHLAG82539888	Plasmid vector containing HLA-DRB1*15:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:100 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:101 Genomic Plasmid Vector	PHLAG82539889	Plasmid vector containing HLA-DRB1*15:101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:101 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:102 Genomic Plasmid Vector	PHLAG82539890	Plasmid vector containing HLA-DRB1*15:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:102 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:103 Genomic Plasmid Vector	PHLAG82539891	Plasmid vector containing HLA-DRB1*15:103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:103 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:104:01 Genomic Plasmid Vector	PHLAG82539892	Plasmid vector containing HLA-DRB1*15:104:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:104:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:104:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:104:02 Genomic Plasmid Vector	PHLAG82539893	Plasmid vector containing HLA-DRB1*15:104:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:104:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:104:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:104:03 Genomic Plasmid Vector	PHLAG82539894	Plasmid vector containing HLA-DRB1*15:104:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:104:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:104:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:105:01 Genomic Plasmid Vector	PHLAG82539895	Plasmid vector containing HLA-DRB1*15:105:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:105:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:105:01 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:105:02 Genomic Plasmid Vector	PHLAG82539896	Plasmid vector containing HLA-DRB1*15:105:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:105:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:105:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:106 Genomic Plasmid Vector	PHLAG82539897	Plasmid vector containing HLA-DRB1*15:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:106 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:107 Genomic Plasmid Vector	PHLAG82539898	Plasmid vector containing HLA-DRB1*15:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:107 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:108 Genomic Plasmid Vector	PHLAG82539899	Plasmid vector containing HLA-DRB1*15:108 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:108 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:108 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:109 Genomic Plasmid Vector	PHLAG82539900	Plasmid vector containing HLA-DRB1*15:109 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:109 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:109 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:11:01 Genomic Plasmid Vector	PHLAG82539901	Plasmid vector containing HLA-DRB1*15:11:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:11:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:11:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:11:02 Genomic Plasmid Vector	PHLAG82539902	Plasmid vector containing HLA-DRB1*15:11:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:11:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:11:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:110 Genomic Plasmid Vector	PHLAG82539903	Plasmid vector containing HLA-DRB1*15:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:110 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:111 Genomic Plasmid Vector	PHLAG82539904	Plasmid vector containing HLA-DRB1*15:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:111 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:112 Genomic Plasmid Vector	PHLAG82539905	Plasmid vector containing HLA-DRB1*15:112 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:112 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:112 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:113N Genomic Plasmid Vector	PHLAG82539906	Plasmid vector containing HLA-DRB1*15:113N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:113N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:113N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:114 Genomic Plasmid Vector	PHLAG82539907	Plasmid vector containing HLA-DRB1*15:114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:114 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:115N Genomic Plasmid Vector	PHLAG82539908	Plasmid vector containing HLA-DRB1*15:115N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:115N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:115N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:116 Genomic Plasmid Vector	PHLAG82539909	Plasmid vector containing HLA-DRB1*15:116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:116 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:117 Genomic Plasmid Vector	PHLAG82539910	Plasmid vector containing HLA-DRB1*15:117 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:117 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:117 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:118:01 Genomic Plasmid Vector	PHLAG82539911	Plasmid vector containing HLA-DRB1*15:118:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:118:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:118:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:118:02 Genomic Plasmid Vector	PHLAG82539912	Plasmid vector containing HLA-DRB1*15:118:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:118:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:118:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:119 Genomic Plasmid Vector	PHLAG82539913	Plasmid vector containing HLA-DRB1*15:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:119 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:12 Genomic Plasmid Vector	PHLAG82539914	Plasmid vector containing HLA-DRB1*15:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:12 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:120 Genomic Plasmid Vector	PHLAG82539915	Plasmid vector containing HLA-DRB1*15:120 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:120 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:120 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:121 Genomic Plasmid Vector	PHLAG82539916	Plasmid vector containing HLA-DRB1*15:121 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:121 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:121 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:122 Genomic Plasmid Vector	PHLAG82539917	Plasmid vector containing HLA-DRB1*15:122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:122 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:123 Genomic Plasmid Vector	PHLAG82539918	Plasmid vector containing HLA-DRB1*15:123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:123 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:124 Genomic Plasmid Vector	PHLAG82539919	Plasmid vector containing HLA-DRB1*15:124 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:124 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:124 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:125 Genomic Plasmid Vector	PHLAG82539920	Plasmid vector containing HLA-DRB1*15:125 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:125 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:125 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:126 Genomic Plasmid Vector	PHLAG82539921	Plasmid vector containing HLA-DRB1*15:126 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:126 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:126 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:127 Genomic Plasmid Vector	PHLAG82539922	Plasmid vector containing HLA-DRB1*15:127 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:127 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:127 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:128 Genomic Plasmid Vector	PHLAG82539923	Plasmid vector containing HLA-DRB1*15:128 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:128 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:128 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:129N Genomic Plasmid Vector	PHLAG82539924	Plasmid vector containing HLA-DRB1*15:129N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:129N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:129N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:130 Genomic Plasmid Vector	PHLAG82539925	Plasmid vector containing HLA-DRB1*15:130 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:130 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:130 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:131 Genomic Plasmid Vector	PHLAG82539926	Plasmid vector containing HLA-DRB1*15:131 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:131 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:131 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:132 Genomic Plasmid Vector	PHLAG82539927	Plasmid vector containing HLA-DRB1*15:132 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:132 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:132 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:133 Genomic Plasmid Vector	PHLAG82539928	Plasmid vector containing HLA-DRB1*15:133 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:133 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:133 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:134N Genomic Plasmid Vector	PHLAG82539929	Plasmid vector containing HLA-DRB1*15:134N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:134N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:134N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:135 Genomic Plasmid Vector	PHLAG82539930	Plasmid vector containing HLA-DRB1*15:135 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:135 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:135 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:136 Genomic Plasmid Vector	PHLAG82539931	Plasmid vector containing HLA-DRB1*15:136 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:136 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:136 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:137N Genomic Plasmid Vector	PHLAG82539932	Plasmid vector containing HLA-DRB1*15:137N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:137N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:137N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:138N Genomic Plasmid Vector	PHLAG82539933	Plasmid vector containing HLA-DRB1*15:138N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:138N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:138N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:139 Genomic Plasmid Vector	PHLAG82539934	Plasmid vector containing HLA-DRB1*15:139 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:139 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:139 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:13Q Genomic Plasmid Vector	PHLAG82539935	Plasmid vector containing HLA-DRB1*15:13Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:13Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:13Q protein under different cellular conditions.	Inquiry
HLA-DRB1*15:14 Genomic Plasmid Vector	PHLAG82539936	Plasmid vector containing HLA-DRB1*15:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:14 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:140 Genomic Plasmid Vector	PHLAG82539937	Plasmid vector containing HLA-DRB1*15:140 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:140 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:140 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:141 Genomic Plasmid Vector	PHLAG82539938	Plasmid vector containing HLA-DRB1*15:141 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:141 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:141 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:142 Genomic Plasmid Vector	PHLAG82539939	Plasmid vector containing HLA-DRB1*15:142 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:142 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:142 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:143 Genomic Plasmid Vector	PHLAG82539940	Plasmid vector containing HLA-DRB1*15:143 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:143 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:143 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:144 Genomic Plasmid Vector	PHLAG82539941	Plasmid vector containing HLA-DRB1*15:144 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:144 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:144 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:145 Genomic Plasmid Vector	PHLAG82539942	Plasmid vector containing HLA-DRB1*15:145 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:145 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:145 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:146 Genomic Plasmid Vector	PHLAG82539943	Plasmid vector containing HLA-DRB1*15:146 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:146 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:146 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:147 Genomic Plasmid Vector	PHLAG82539944	Plasmid vector containing HLA-DRB1*15:147 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:147 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:147 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:148N Genomic Plasmid Vector	PHLAG82539945	Plasmid vector containing HLA-DRB1*15:148N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:148N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:148N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:149 Genomic Plasmid Vector	PHLAG82539946	Plasmid vector containing HLA-DRB1*15:149 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:149 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:149 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:15:01 Genomic Plasmid Vector	PHLAG82539947	Plasmid vector containing HLA-DRB1*15:15:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:15:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:15:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:15:02 Genomic Plasmid Vector	PHLAG82539948	Plasmid vector containing HLA-DRB1*15:15:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:15:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:15:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:15:03 Genomic Plasmid Vector	PHLAG82539949	Plasmid vector containing HLA-DRB1*15:15:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:15:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:15:03 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:150 Genomic Plasmid Vector	PHLAG82539950	Plasmid vector containing HLA-DRB1*15:150 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:150 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:150 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:151 Genomic Plasmid Vector	PHLAG82539951	Plasmid vector containing HLA-DRB1*15:151 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:151 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:151 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:152 Genomic Plasmid Vector	PHLAG82539952	Plasmid vector containing HLA-DRB1*15:152 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:152 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:152 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:153 Genomic Plasmid Vector	PHLAG82539953	Plasmid vector containing HLA-DRB1*15:153 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:153 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:153 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:154N Genomic Plasmid Vector	PHLAG82539954	Plasmid vector containing HLA-DRB1*15:154N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:154N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:154N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:155 Genomic Plasmid Vector	PHLAG82539955	Plasmid vector containing HLA-DRB1*15:155 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:155 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:155 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:156 Genomic Plasmid Vector	PHLAG82539956	Plasmid vector containing HLA-DRB1*15:156 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:156 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:156 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:157 Genomic Plasmid Vector	PHLAG82539957	Plasmid vector containing HLA-DRB1*15:157 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:157 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:157 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:158 Genomic Plasmid Vector	PHLAG82539958	Plasmid vector containing HLA-DRB1*15:158 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:158 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:158 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:159N Genomic Plasmid Vector	PHLAG82539959	Plasmid vector containing HLA-DRB1*15:159N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:159N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:159N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:16 Genomic Plasmid Vector	PHLAG825399960	Plasmid vector containing HLA-DRB1*15:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:16 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:160 Genomic Plasmid Vector	PHLAG825399961	Plasmid vector containing HLA-DRB1*15:160 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:160 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:160 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:161 Genomic Plasmid Vector	PHLAG825399962	Plasmid vector containing HLA-DRB1*15:161 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:161 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:161 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:162 Genomic Plasmid Vector	PHLAG825399963	Plasmid vector containing HLA-DRB1*15:162 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:162 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:162 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:163N Genomic Plasmid Vector	PHLAG825399964	Plasmid vector containing HLA-DRB1*15:163N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:163N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:163N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:164Q Genomic Plasmid Vector	PHLAG825399965	Plasmid vector containing HLA-DRB1*15:164Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:164Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:164Q protein under different cellular conditions.	Inquiry
HLA-DRB1*15:165 Genomic Plasmid Vector	PHLAG825399966	Plasmid vector containing HLA-DRB1*15:165 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:165 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:165 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:166 Genomic Plasmid Vector	PHLAG825399967	Plasmid vector containing HLA-DRB1*15:166 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:166 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:166 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:167 Genomic Plasmid Vector	PHLAG82539968	Plasmid vector containing HLA-DRB1*15:167 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:167 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:167 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:168 Genomic Plasmid Vector	PHLAG82539969	Plasmid vector containing HLA-DRB1*15:168 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:168 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:168 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:169 Genomic Plasmid Vector	PHLAG82539970	Plasmid vector containing HLA-DRB1*15:169 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:169 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:169 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:170 Genomic Plasmid Vector	PHLAG82539971	Plasmid vector containing HLA-DRB1*15:170 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:170 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:170 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:171:01 Genomic Plasmid Vector	PHLAG82539972	Plasmid vector containing HLA-DRB1*15:171:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:171:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:171:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:171:02 Genomic Plasmid Vector	PHLAG82539973	Plasmid vector containing HLA-DRB1*15:171:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:171:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:171:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:172:01 Genomic Plasmid Vector	PHLAG82539974	Plasmid vector containing HLA-DRB1*15:172:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:172:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:172:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:172:02 Genomic Plasmid Vector	PHLAG82539975	Plasmid vector containing HLA-DRB1*15:172:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:172:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:172:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:173 Genomic Plasmid Vector	PHLAG82539976	Plasmid vector containing HLA-DRB1*15:173 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:173 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:173 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:174 Genomic Plasmid Vector	PHLAG82539977	Plasmid vector containing HLA-DRB1*15:174 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:174 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:174 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:175 Genomic Plasmid Vector	PHLAG82539978	Plasmid vector containing HLA-DRB1*15:175 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:175 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:175 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:176N Genomic Plasmid Vector	PHLAG82539979	Plasmid vector containing HLA-DRB1*15:176N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:176N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:176N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:177 Genomic Plasmid Vector	PHLAG82539980	Plasmid vector containing HLA-DRB1*15:177 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:177 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:177 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:178 Genomic Plasmid Vector	PHLAG82539981	Plasmid vector containing HLA-DRB1*15:178 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:178 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:178 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:179 Genomic Plasmid Vector	PHLAG82539982	Plasmid vector containing HLA-DRB1*15:179 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:179 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:179 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:17N Genomic Plasmid Vector	PHLAG82539983	Plasmid vector containing HLA-DRB1*15:17N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:17N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:17N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:18 Genomic Plasmid Vector	PHLAG82539984	Plasmid vector containing HLA-DRB1*15:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:18 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:180N Genomic Plasmid Vector	PHLAG82539985	Plasmid vector containing HLA-DRB1*15:180N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:180N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:180N protein under different cellular conditions.	Inquiry

HLA-DRB1*15:181 Genomic Plasmid Vector	PHLAG82539986	Plasmid vector containing HLA-DRB1*15:181 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:181 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:181 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:182 Genomic Plasmid Vector	PHLAG82539987	Plasmid vector containing HLA-DRB1*15:182 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:182 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:182 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:183N Genomic Plasmid Vector	PHLAG82539988	Plasmid vector containing HLA-DRB1*15:183N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:183N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:183N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:184 Genomic Plasmid Vector	PHLAG82539989	Plasmid vector containing HLA-DRB1*15:184 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:184 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:184 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:185 Genomic Plasmid Vector	PHLAG82539990	Plasmid vector containing HLA-DRB1*15:185 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:185 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:185 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:186 Genomic Plasmid Vector	PHLAG82539991	Plasmid vector containing HLA-DRB1*15:186 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:186 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:186 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:187 Genomic Plasmid Vector	PHLAG82539992	Plasmid vector containing HLA-DRB1*15:187 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:187 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:187 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:188:01:01 Genomic Plasmid Vector	PHLAG82539993	Plasmid vector containing HLA-DRB1*15:188:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:188:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:188:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:188:01:02 Genomic Plasmid Vector	PHLAG82539994	Plasmid vector containing HLA-DRB1*15:188:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:188:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:188:01:02 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:189 Genomic Plasmid Vector	PHLAG82539995	Plasmid vector containing HLA-DRB1*15:189 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:189 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:189 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:19 Genomic Plasmid Vector	PHLAG82539996	Plasmid vector containing HLA-DRB1*15:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:19 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:190 Genomic Plasmid Vector	PHLAG82539997	Plasmid vector containing HLA-DRB1*15:190 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:190 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:190 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:191 Genomic Plasmid Vector	PHLAG82539998	Plasmid vector containing HLA-DRB1*15:191 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:191 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:191 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:192 Genomic Plasmid Vector	PHLAG82539999	Plasmid vector containing HLA-DRB1*15:192 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:192 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:192 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:193 Genomic Plasmid Vector	PHLAG825400000	Plasmid vector containing HLA-DRB1*15:193 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:193 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:193 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:194 Genomic Plasmid Vector	PHLAG825400001	Plasmid vector containing HLA-DRB1*15:194 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:194 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:194 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:195 Genomic Plasmid Vector	PHLAG825400002	Plasmid vector containing HLA-DRB1*15:195 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:195 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:195 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:196 Genomic Plasmid Vector	PHLAG825400003	Plasmid vector containing HLA-DRB1*15:196 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:196 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:196 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:197 Genomic Plasmid Vector	PHLAG82540004	Plasmid vector containing HLA-DRB1*15:197 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:197 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:197 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:198 Genomic Plasmid Vector	PHLAG82540005	Plasmid vector containing HLA-DRB1*15:198 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:198 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:198 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:199 Genomic Plasmid Vector	PHLAG82540006	Plasmid vector containing HLA-DRB1*15:199 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:199 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:199 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:20 Genomic Plasmid Vector	PHLAG82540007	Plasmid vector containing HLA-DRB1*15:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:20 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:200:01:01N Genomic Plasmid Vector	PHLAG82540008	Plasmid vector containing HLA-DRB1*15:200:01:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:200:01:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:200:01:01N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:200:01:02N Genomic Plasmid Vector	PHLAG82540009	Plasmid vector containing HLA-DRB1*15:200:01:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:200:01:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:200:01:02N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:201 Genomic Plasmid Vector	PHLAG82540010	Plasmid vector containing HLA-DRB1*15:201 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:201 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:201 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:202 Genomic Plasmid Vector	PHLAG82540011	Plasmid vector containing HLA-DRB1*15:202 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:202 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:202 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:203Q Genomic Plasmid Vector	PHLAG82540012	Plasmid vector containing HLA-DRB1*15:203Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:203Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:203Q protein under different cellular conditions.	Inquiry

HLA-DRB1*15:204 Genomic Plasmid Vector	PHLAG82540013	Plasmid vector containing HLA-DRB1*15:204 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:204 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:204 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:205 Genomic Plasmid Vector	PHLAG82540014	Plasmid vector containing HLA-DRB1*15:205 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:205 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:205 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:206 Genomic Plasmid Vector	PHLAG82540015	Plasmid vector containing HLA-DRB1*15:206 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:206 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:206 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:207N Genomic Plasmid Vector	PHLAG82540016	Plasmid vector containing HLA-DRB1*15:207N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:207N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:207N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:208 Genomic Plasmid Vector	PHLAG82540017	Plasmid vector containing HLA-DRB1*15:208 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:208 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:208 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:209N Genomic Plasmid Vector	PHLAG82540018	Plasmid vector containing HLA-DRB1*15:209N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:209N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:209N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:21 Genomic Plasmid Vector	PHLAG82540019	Plasmid vector containing HLA-DRB1*15:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:21 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:210 Genomic Plasmid Vector	PHLAG82540020	Plasmid vector containing HLA-DRB1*15:210 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:210 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:210 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:211 Genomic Plasmid Vector	PHLAG82540021	Plasmid vector containing HLA-DRB1*15:211 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:211 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:211 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:212 Genomic Plasmid Vector	PHLAG82540022	Plasmid vector containing HLA-DRB1*15:212 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:212 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:212 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:213 Genomic Plasmid Vector	PHLAG82540023	Plasmid vector containing HLA-DRB1*15:213 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:213 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:213 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:214 Genomic Plasmid Vector	PHLAG82540024	Plasmid vector containing HLA-DRB1*15:214 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:214 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:214 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:215 Genomic Plasmid Vector	PHLAG82540025	Plasmid vector containing HLA-DRB1*15:215 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:215 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:215 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:216 Genomic Plasmid Vector	PHLAG82540026	Plasmid vector containing HLA-DRB1*15:216 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:216 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:216 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:217N Genomic Plasmid Vector	PHLAG82540027	Plasmid vector containing HLA-DRB1*15:217N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:217N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:217N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:218 Genomic Plasmid Vector	PHLAG82540028	Plasmid vector containing HLA-DRB1*15:218 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:218 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:218 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:219 Genomic Plasmid Vector	PHLAG82540029	Plasmid vector containing HLA-DRB1*15:219 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:219 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:219 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:22 Genomic Plasmid Vector	PHLAG82540030	Plasmid vector containing HLA-DRB1*15:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:22 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:220 Genomic Plasmid Vector	PHLAG82540031	Plasmid vector containing HLA-DRB1*15:220 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:220 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:220 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:221 Genomic Plasmid Vector	PHLAG82540032	Plasmid vector containing HLA-DRB1*15:221 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:221 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:221 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:222 Genomic Plasmid Vector	PHLAG82540033	Plasmid vector containing HLA-DRB1*15:222 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:222 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:222 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:223 Genomic Plasmid Vector	PHLAG82540034	Plasmid vector containing HLA-DRB1*15:223 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:223 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:223 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:224 Genomic Plasmid Vector	PHLAG82540035	Plasmid vector containing HLA-DRB1*15:224 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:224 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:224 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:225 Genomic Plasmid Vector	PHLAG82540036	Plasmid vector containing HLA-DRB1*15:225 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:225 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:225 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:226 Genomic Plasmid Vector	PHLAG82540037	Plasmid vector containing HLA-DRB1*15:226 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:226 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:226 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:227 Genomic Plasmid Vector	PHLAG82540038	Plasmid vector containing HLA-DRB1*15:227 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:227 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:227 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:228 Genomic Plasmid Vector	PHLAG82540039	Plasmid vector containing HLA-DRB1*15:228 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:228 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:228 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:229 Genomic Plasmid Vector	PHLAG82540040	Plasmid vector containing HLA-DRB1*15:229 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:229 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:229 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:23 Genomic Plasmid Vector	PHLAG82540041	Plasmid vector containing HLA-DRB1*15:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:23 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:230 Genomic Plasmid Vector	PHLAG82540042	Plasmid vector containing HLA-DRB1*15:230 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:230 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:230 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:231N Genomic Plasmid Vector	PHLAG82540043	Plasmid vector containing HLA-DRB1*15:231N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:231N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:231N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:232 Genomic Plasmid Vector	PHLAG82540044	Plasmid vector containing HLA-DRB1*15:232 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:232 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:232 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:233 Genomic Plasmid Vector	PHLAG82540045	Plasmid vector containing HLA-DRB1*15:233 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:233 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:233 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:234 Genomic Plasmid Vector	PHLAG82540046	Plasmid vector containing HLA-DRB1*15:234 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:234 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:234 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:235 Genomic Plasmid Vector	PHLAG82540047	Plasmid vector containing HLA-DRB1*15:235 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:235 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:235 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:236N Genomic Plasmid Vector	PHLAG82540048	Plasmid vector containing HLA-DRB1*15:236N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:236N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:236N protein under different cellular conditions.	Inquiry

HLA-DRB1*15:237 Genomic Plasmid Vector	PHLAG82540049	Plasmid vector containing HLA-DRB1*15:237 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:237 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:237 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:238 Genomic Plasmid Vector	PHLAG82540050	Plasmid vector containing HLA-DRB1*15:238 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:238 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:238 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:239 Genomic Plasmid Vector	PHLAG82540051	Plasmid vector containing HLA-DRB1*15:239 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:239 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:239 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:24 Genomic Plasmid Vector	PHLAG82540052	Plasmid vector containing HLA-DRB1*15:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:24 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:240 Genomic Plasmid Vector	PHLAG82540053	Plasmid vector containing HLA-DRB1*15:240 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:240 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:240 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:25 Genomic Plasmid Vector	PHLAG82540054	Plasmid vector containing HLA-DRB1*15:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:25 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:26 Genomic Plasmid Vector	PHLAG82540055	Plasmid vector containing HLA-DRB1*15:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:26 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:27 Genomic Plasmid Vector	PHLAG82540056	Plasmid vector containing HLA-DRB1*15:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:27 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:28 Genomic Plasmid Vector	PHLAG82540057	Plasmid vector containing HLA-DRB1*15:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:28 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:29 Genomic Plasmid Vector	PHLAG82540058	Plasmid vector containing HLA-DRB1*15:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:29 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:30 Genomic Plasmid Vector	PHLAG82540059	Plasmid vector containing HLA-DRB1*15:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:30 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:31:01 Genomic Plasmid Vector	PHLAG82540060	Plasmid vector containing HLA-DRB1*15:31:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:31:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:31:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:31:02 Genomic Plasmid Vector	PHLAG82540061	Plasmid vector containing HLA-DRB1*15:31:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:31:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:31:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:32 Genomic Plasmid Vector	PHLAG82540062	Plasmid vector containing HLA-DRB1*15:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:32 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:33 Genomic Plasmid Vector	PHLAG82540063	Plasmid vector containing HLA-DRB1*15:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:33 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:34 Genomic Plasmid Vector	PHLAG82540064	Plasmid vector containing HLA-DRB1*15:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:34 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:35 Genomic Plasmid Vector	PHLAG82540065	Plasmid vector containing HLA-DRB1*15:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:35 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:36 Genomic Plasmid Vector	PHLAG82540066	Plasmid vector containing HLA-DRB1*15:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:36 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:37:01 Genomic Plasmid Vector	PHLAG82540067	Plasmid vector containing HLA-DRB1*15:37:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:37:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:37:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:37:02 Genomic Plasmid Vector	PHLAG82540068	Plasmid vector containing HLA-DRB1*15:37:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:37:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:37:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:38:01 Genomic Plasmid Vector	PHLAG82540069	Plasmid vector containing HLA-DRB1*15:38:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:38:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:38:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:38:02 Genomic Plasmid Vector	PHLAG82540070	Plasmid vector containing HLA-DRB1*15:38:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:38:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:38:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:39 Genomic Plasmid Vector	PHLAG82540071	Plasmid vector containing HLA-DRB1*15:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:39 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:40 Genomic Plasmid Vector	PHLAG82540072	Plasmid vector containing HLA-DRB1*15:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:40 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:41 Genomic Plasmid Vector	PHLAG82540073	Plasmid vector containing HLA-DRB1*15:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:41 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:42 Genomic Plasmid Vector	PHLAG82540074	Plasmid vector containing HLA-DRB1*15:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:42 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:43 Genomic Plasmid Vector	PHLAG82540075	Plasmid vector containing HLA-DRB1*15:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:43 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:44 Genomic Plasmid Vector	PHLAG82540076	Plasmid vector containing HLA-DRB1*15:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:44 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:45 Genomic Plasmid Vector	PHLAG82540077	Plasmid vector containing HLA-DRB1*15:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:45 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:46 Genomic Plasmid Vector	PHLAG82540078	Plasmid vector containing HLA-DRB1*15:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:46 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:47 Genomic Plasmid Vector	PHLAG82540079	Plasmid vector containing HLA-DRB1*15:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:47 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:48 Genomic Plasmid Vector	PHLAG82540080	Plasmid vector containing HLA-DRB1*15:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:48 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:49 Genomic Plasmid Vector	PHLAG82540081	Plasmid vector containing HLA-DRB1*15:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:49 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:50N Genomic Plasmid Vector	PHLAG82540082	Plasmid vector containing HLA-DRB1*15:50N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:50N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:50N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:51 Genomic Plasmid Vector	PHLAG82540083	Plasmid vector containing HLA-DRB1*15:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:51 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:52 Genomic Plasmid Vector	PHLAG82540084	Plasmid vector containing HLA-DRB1*15:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:52 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:53 Genomic Plasmid Vector	PHLAG82540085	Plasmid vector containing HLA-DRB1*15:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:53 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:54 Genomic Plasmid Vector	PHLAG82540086	Plasmid vector containing HLA-DRB1*15:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:54 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:55 Genomic Plasmid Vector	PHLAG82540087	Plasmid vector containing HLA-DRB1*15:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:55 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:56 Genomic Plasmid Vector	PHLAG82540088	Plasmid vector containing HLA-DRB1*15:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:56 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:57:01 Genomic Plasmid Vector	PHLAG82540089	Plasmid vector containing HLA-DRB1*15:57:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:57:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:57:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:57:02 Genomic Plasmid Vector	PHLAG82540090	Plasmid vector containing HLA-DRB1*15:57:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:57:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:57:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:58 Genomic Plasmid Vector	PHLAG82540091	Plasmid vector containing HLA-DRB1*15:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:58 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:59 Genomic Plasmid Vector	PHLAG82540092	Plasmid vector containing HLA-DRB1*15:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:59 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:60 Genomic Plasmid Vector	PHLAG82540093	Plasmid vector containing HLA-DRB1*15:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:60 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:61 Genomic Plasmid Vector	PHLAG82540094	Plasmid vector containing HLA-DRB1*15:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:61 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:62 Genomic Plasmid Vector	PHLAG82540095	Plasmid vector containing HLA-DRB1*15:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:62 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:63 Genomic Plasmid Vector	PHLAG82540096	Plasmid vector containing HLA-DRB1*15:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:63 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:64 Genomic Plasmid Vector	PHLAG82540097	Plasmid vector containing HLA-DRB1*15:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:64 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:65 Genomic Plasmid Vector	PHLAG82540098	Plasmid vector containing HLA-DRB1*15:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:65 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:66:01 Genomic Plasmid Vector	PHLAG82540099	Plasmid vector containing HLA-DRB1*15:66:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:66:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:66:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:66:02 Genomic Plasmid Vector	PHLAG825401000	Plasmid vector containing HLA-DRB1*15:66:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:66:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:66:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:67 Genomic Plasmid Vector	PHLAG825401001	Plasmid vector containing HLA-DRB1*15:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:67 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:68 Genomic Plasmid Vector	PHLAG825401002	Plasmid vector containing HLA-DRB1*15:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:68 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:69 Genomic Plasmid Vector	PHLAG82540103	Plasmid vector containing HLA-DRB1*15:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:69 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:70 Genomic Plasmid Vector	PHLAG82540104	Plasmid vector containing HLA-DRB1*15:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:70 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:71 Genomic Plasmid Vector	PHLAG82540105	Plasmid vector containing HLA-DRB1*15:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:71 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:72 Genomic Plasmid Vector	PHLAG82540106	Plasmid vector containing HLA-DRB1*15:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:72 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:73 Genomic Plasmid Vector	PHLAG82540107	Plasmid vector containing HLA-DRB1*15:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:73 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:74 Genomic Plasmid Vector	PHLAG82540108	Plasmid vector containing HLA-DRB1*15:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:74 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:75 Genomic Plasmid Vector	PHLAG82540109	Plasmid vector containing HLA-DRB1*15:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:75 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:76 Genomic Plasmid Vector	PHLAG82540110	Plasmid vector containing HLA-DRB1*15:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:76 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:77 Genomic Plasmid Vector	PHLAG82540111	Plasmid vector containing HLA-DRB1*15:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:77 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:78 Genomic Plasmid Vector	PHLAG82540112	Plasmid vector containing HLA-DRB1*15:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:78 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:79 Genomic Plasmid Vector	PHLAG82540113	Plasmid vector containing HLA-DRB1*15:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:79 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:80N Genomic Plasmid Vector	PHLAG82540114	Plasmid vector containing HLA-DRB1*15:80N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:80N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:80N protein under different cellular conditions.	Inquiry
HLA-DRB1*15:81 Genomic Plasmid Vector	PHLAG82540115	Plasmid vector containing HLA-DRB1*15:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:81 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:82 Genomic Plasmid Vector	PHLAG82540116	Plasmid vector containing HLA-DRB1*15:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:82 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:83 Genomic Plasmid Vector	PHLAG82540117	Plasmid vector containing HLA-DRB1*15:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:83 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:84 Genomic Plasmid Vector	PHLAG82540118	Plasmid vector containing HLA-DRB1*15:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:84 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:85 Genomic Plasmid Vector	PHLAG82540119	Plasmid vector containing HLA-DRB1*15:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:85 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:86 Genomic Plasmid Vector	PHLAG82540120	Plasmid vector containing HLA-DRB1*15:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:86 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:87 Genomic Plasmid Vector	PHLAG82540121	Plasmid vector containing HLA-DRB1*15:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:87 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:88 Genomic Plasmid Vector	PHLAG82540122	Plasmid vector containing HLA-DRB1*15:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:88 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:89 Genomic Plasmid Vector	PHLAG82540123	Plasmid vector containing HLA-DRB1*15:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:89 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:90 Genomic Plasmid Vector	PHLAG82540124	Plasmid vector containing HLA-DRB1*15:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:90 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:91 Genomic Plasmid Vector	PHLAG82540125	Plasmid vector containing HLA-DRB1*15:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:91 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:92 Genomic Plasmid Vector	PHLAG82540126	Plasmid vector containing HLA-DRB1*15:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:92 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:93 Genomic Plasmid Vector	PHLAG82540127	Plasmid vector containing HLA-DRB1*15:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:93 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:94 Genomic Plasmid Vector	PHLAG82540128	Plasmid vector containing HLA-DRB1*15:94 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:94 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:94 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:95 Genomic Plasmid Vector	PHLAG82540129	Plasmid vector containing HLA-DRB1*15:95 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:95 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:95 protein under different cellular conditions.	Inquiry

HLA-DRB1*15:96 Genomic Plasmid Vector	PHLAG82540130	Plasmid vector containing HLA-DRB1*15:96 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:96 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:96 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:97 Genomic Plasmid Vector	PHLAG82540131	Plasmid vector containing HLA-DRB1*15:97 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:97 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:97 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:98 Genomic Plasmid Vector	PHLAG82540132	Plasmid vector containing HLA-DRB1*15:98 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:98 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:98 protein under different cellular conditions.	Inquiry
HLA-DRB1*15:99 Genomic Plasmid Vector	PHLAG82540133	Plasmid vector containing HLA-DRB1*15:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*15:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*15:99 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:01:01 Genomic Plasmid Vector	PHLAG82540134	Plasmid vector containing HLA-DRB1*16:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:01:02 Genomic Plasmid Vector	PHLAG82540135	Plasmid vector containing HLA-DRB1*16:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:01:03 Genomic Plasmid Vector	PHLAG82540136	Plasmid vector containing HLA-DRB1*16:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:01:04 Genomic Plasmid Vector	PHLAG82540137	Plasmid vector containing HLA-DRB1*16:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:01:04 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:01:02 Genomic Plasmid Vector	PHLAG82540138	Plasmid vector containing HLA-DRB1*16:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:03 Genomic Plasmid Vector	PHLAG82540139	Plasmid vector containing HLA-DRB1*16:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:04 Genomic Plasmid Vector	PHLAG82540140	Plasmid vector containing HLA-DRB1*16:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:04 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:05 Genomic Plasmid Vector	PHLAG82540141	Plasmid vector containing HLA-DRB1*16:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:05 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:06 Genomic Plasmid Vector	PHLAG82540142	Plasmid vector containing HLA-DRB1*16:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:06 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:07 Genomic Plasmid Vector	PHLAG82540143	Plasmid vector containing HLA-DRB1*16:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:07 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:08 Genomic Plasmid Vector	PHLAG82540144	Plasmid vector containing HLA-DRB1*16:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:08 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:09 Genomic Plasmid Vector	PHLAG82540145	Plasmid vector containing HLA-DRB1*16:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:09 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:10 Genomic Plasmid Vector	PHLAG82540146	Plasmid vector containing HLA-DRB1*16:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:10 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:01:11 Genomic Plasmid Vector	PHLAG82540147	Plasmid vector containing HLA-DRB1*16:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:11 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:12 Genomic Plasmid Vector	PHLAG82540148	Plasmid vector containing HLA-DRB1*16:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:12 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:13 Genomic Plasmid Vector	PHLAG82540149	Plasmid vector containing HLA-DRB1*16:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:13 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:14 Genomic Plasmid Vector	PHLAG825401510	Plasmid vector containing HLA-DRB1*16:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:14 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:15 Genomic Plasmid Vector	PHLAG825401511	Plasmid vector containing HLA-DRB1*16:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:15 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:16 Genomic Plasmid Vector	PHLAG825401512	Plasmid vector containing HLA-DRB1*16:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:16 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:17 Genomic Plasmid Vector	PHLAG825401513	Plasmid vector containing HLA-DRB1*16:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:17 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:18 Genomic Plasmid Vector	PHLAG825401514	Plasmid vector containing HLA-DRB1*16:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:18 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:01:19 Genomic Plasmid Vector	PHLAG825401515	Plasmid vector containing HLA-DRB1*16:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:01:19 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:02:01:01 Genomic Plasmid Vector	PHLAG82540156	Plasmid vector containing HLA-DRB1*16:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:01:02 Genomic Plasmid Vector	PHLAG82540157	Plasmid vector containing HLA-DRB1*16:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:01:03 Genomic Plasmid Vector	PHLAG82540158	Plasmid vector containing HLA-DRB1*16:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:01:04 Genomic Plasmid Vector	PHLAG82540159	Plasmid vector containing HLA-DRB1*16:02:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:01:04 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:01:05 Genomic Plasmid Vector	PHLAG82540160	Plasmid vector containing HLA-DRB1*16:02:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:01:05 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:01:06 Genomic Plasmid Vector	PHLAG82540161	Plasmid vector containing HLA-DRB1*16:02:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:01:06 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:02 Genomic Plasmid Vector	PHLAG82540162	Plasmid vector containing HLA-DRB1*16:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:03 Genomic Plasmid Vector	PHLAG82540163	Plasmid vector containing HLA-DRB1*16:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:03 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:02:04 Genomic Plasmid Vector	PHLAG82540164	Plasmid vector containing HLA-DRB1*16:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:04 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:05 Genomic Plasmid Vector	PHLAG82540165	Plasmid vector containing HLA-DRB1*16:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:05 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:06 Genomic Plasmid Vector	PHLAG82540166	Plasmid vector containing HLA-DRB1*16:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:06 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:07 Genomic Plasmid Vector	PHLAG82540167	Plasmid vector containing HLA-DRB1*16:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:07 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:08 Genomic Plasmid Vector	PHLAG82540168	Plasmid vector containing HLA-DRB1*16:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:08 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:09 Genomic Plasmid Vector	PHLAG82540169	Plasmid vector containing HLA-DRB1*16:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:09 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:10 Genomic Plasmid Vector	PHLAG82540170	Plasmid vector containing HLA-DRB1*16:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:10 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:11 Genomic Plasmid Vector	PHLAG82540171	Plasmid vector containing HLA-DRB1*16:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:11 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:02:12 Genomic Plasmid Vector	PHLAG82540172	Plasmid vector containing HLA-DRB1*16:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:12 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:02:13 Genomic Plasmid Vector	PHLAG82540173	Plasmid vector containing HLA-DRB1*16:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:02:13 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:03 Genomic Plasmid Vector	PHLAG82540174	Plasmid vector containing HLA-DRB1*16:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:03 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:04:01 Genomic Plasmid Vector	PHLAG82540175	Plasmid vector containing HLA-DRB1*16:04:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:04:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:04:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:04:02 Genomic Plasmid Vector	PHLAG82540176	Plasmid vector containing HLA-DRB1*16:04:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:04:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:04:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:05:01 Genomic Plasmid Vector	PHLAG82540177	Plasmid vector containing HLA-DRB1*16:05:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:05:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:05:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:05:02 Genomic Plasmid Vector	PHLAG82540178	Plasmid vector containing HLA-DRB1*16:05:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:05:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:05:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:07 Genomic Plasmid Vector	PHLAG82540179	Plasmid vector containing HLA-DRB1*16:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:07 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:08 Genomic Plasmid Vector	PHLAG82540180	Plasmid vector containing HLA-DRB1*16:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:08 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:09:01 Genomic Plasmid Vector	PHLAG82540181	Plasmid vector containing HLA-DRB1*16:09:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:09:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:09:01 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:09:02 Genomic Plasmid Vector	PHLAG82540182	Plasmid vector containing HLA-DRB1*16:09:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:09:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:09:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:10:01 Genomic Plasmid Vector	PHLAG82540183	Plasmid vector containing HLA-DRB1*16:10:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:10:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:10:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:10:02 Genomic Plasmid Vector	PHLAG82540184	Plasmid vector containing HLA-DRB1*16:10:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:10:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:10:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:11 Genomic Plasmid Vector	PHLAG82540185	Plasmid vector containing HLA-DRB1*16:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:11 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:12 Genomic Plasmid Vector	PHLAG82540186	Plasmid vector containing HLA-DRB1*16:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:12 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:13N Genomic Plasmid Vector	PHLAG82540187	Plasmid vector containing HLA-DRB1*16:13N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:13N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:13N protein under different cellular conditions.	Inquiry
HLA-DRB1*16:14 Genomic Plasmid Vector	PHLAG82540188	Plasmid vector containing HLA-DRB1*16:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:14 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:15 Genomic Plasmid Vector	PHLAG82540189	Plasmid vector containing HLA-DRB1*16:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:15 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:16 Genomic Plasmid Vector	PHLAG82540190	Plasmid vector containing HLA-DRB1*16:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:16 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:17 Genomic Plasmid Vector	PHLAG82540191	Plasmid vector containing HLA-DRB1*16:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:17 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:18 Genomic Plasmid Vector	PHLAG82540192	Plasmid vector containing HLA-DRB1*16:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:18 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:19 Genomic Plasmid Vector	PHLAG82540193	Plasmid vector containing HLA-DRB1*16:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:19 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:20 Genomic Plasmid Vector	PHLAG82540194	Plasmid vector containing HLA-DRB1*16:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:20 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:21N Genomic Plasmid Vector	PHLAG82540195	Plasmid vector containing HLA-DRB1*16:21N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:21N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:21N protein under different cellular conditions.	Inquiry
HLA-DRB1*16:22 Genomic Plasmid Vector	PHLAG82540196	Plasmid vector containing HLA-DRB1*16:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:22 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:23 Genomic Plasmid Vector	PHLAG82540197	Plasmid vector containing HLA-DRB1*16:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:23 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:24 Genomic Plasmid Vector	PHLAG82540198	Plasmid vector containing HLA-DRB1*16:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:24 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:25 Genomic Plasmid Vector	PHLAG82540199	Plasmid vector containing HLA-DRB1*16:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:25 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:26 Genomic Plasmid Vector	PHLAG82540200	Plasmid vector containing HLA-DRB1*16:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:26 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:27 Genomic Plasmid Vector	PHLAG82540201	Plasmid vector containing HLA-DRB1*16:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:27 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:28 Genomic Plasmid Vector	PHLAG82540202	Plasmid vector containing HLA-DRB1*16:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:28 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:29 Genomic Plasmid Vector	PHLAG82540203	Plasmid vector containing HLA-DRB1*16:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:29 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:30 Genomic Plasmid Vector	PHLAG82540204	Plasmid vector containing HLA-DRB1*16:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:30 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:31 Genomic Plasmid Vector	PHLAG82540205	Plasmid vector containing HLA-DRB1*16:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:31 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:32 Genomic Plasmid Vector	PHLAG82540206	Plasmid vector containing HLA-DRB1*16:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:32 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:33 Genomic Plasmid Vector	PHLAG82540207	Plasmid vector containing HLA-DRB1*16:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:33 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:34 Genomic Plasmid Vector	PHLAG82540208	Plasmid vector containing HLA-DRB1*16:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:34 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:35 Genomic Plasmid Vector	PHLAG82540209	Plasmid vector containing HLA-DRB1*16:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:35 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:36 Genomic Plasmid Vector	PHLAG82540210	Plasmid vector containing HLA-DRB1*16:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:36 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:37 Genomic Plasmid Vector	PHLAG82540211	Plasmid vector containing HLA-DRB1*16:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:37 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:38:01 Genomic Plasmid Vector	PHLAG82540212	Plasmid vector containing HLA-DRB1*16:38:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:38:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:38:01 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:38:02 Genomic Plasmid Vector	PHLAG82540213	Plasmid vector containing HLA-DRB1*16:38:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:38:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:38:02 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:39 Genomic Plasmid Vector	PHLAG82540214	Plasmid vector containing HLA-DRB1*16:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:39 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:40 Genomic Plasmid Vector	PHLAG82540215	Plasmid vector containing HLA-DRB1*16:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:40 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:41N Genomic Plasmid Vector	PHLAG82540216	Plasmid vector containing HLA-DRB1*16:41N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:41N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:41N protein under different cellular conditions.	Inquiry
HLA-DRB1*16:42 Genomic Plasmid Vector	PHLAG82540217	Plasmid vector containing HLA-DRB1*16:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:42 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:43 Genomic Plasmid Vector	PHLAG82540218	Plasmid vector containing HLA-DRB1*16:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:43 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:44 Genomic Plasmid Vector	PHLAG82540219	Plasmid vector containing HLA-DRB1*16:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:44 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:45 Genomic Plasmid Vector	PHLAG82540220	Plasmid vector containing HLA-DRB1*16:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:45 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:46 Genomic Plasmid Vector	PHLAG82540221	Plasmid vector containing HLA-DRB1*16:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:46 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:47 Genomic Plasmid Vector	PHLAG82540222	Plasmid vector containing HLA-DRB1*16:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:47 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:48 Genomic Plasmid Vector	PHLAG82540223	Plasmid vector containing HLA-DRB1*16:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:48 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:49 Genomic Plasmid Vector	PHLAG82540224	Plasmid vector containing HLA-DRB1*16:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:49 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:50 Genomic Plasmid Vector	PHLAG82540225	Plasmid vector containing HLA-DRB1*16:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:50 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:51 Genomic Plasmid Vector	PHLAG82540226	Plasmid vector containing HLA-DRB1*16:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:51 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:52 Genomic Plasmid Vector	PHLAG82540227	Plasmid vector containing HLA-DRB1*16:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:52 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:53 Genomic Plasmid Vector	PHLAG82540228	Plasmid vector containing HLA-DRB1*16:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:53 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:54 Genomic Plasmid Vector	PHLAG82540229	Plasmid vector containing HLA-DRB1*16:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:54 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:55N Genomic Plasmid Vector	PHLAG82540230	Plasmid vector containing HLA-DRB1*16:55N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:55N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:55N protein under different cellular conditions.	Inquiry
HLA-DRB1*16:56 Genomic Plasmid Vector	PHLAG82540231	Plasmid vector containing HLA-DRB1*16:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:56 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:57 Genomic Plasmid Vector	PHLAG82540232	Plasmid vector containing HLA-DRB1*16:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:57 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:58 Genomic Plasmid Vector	PHLAG82540233	Plasmid vector containing HLA-DRB1*16:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:58 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:59Q Genomic Plasmid Vector	PHLAG82540234	Plasmid vector containing HLA-DRB1*16:59Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:59Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:59Q protein under different cellular conditions.	Inquiry
HLA-DRB1*16:60 Genomic Plasmid Vector	PHLAG82540235	Plasmid vector containing HLA-DRB1*16:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:60 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:61 Genomic Plasmid Vector	PHLAG82540236	Plasmid vector containing HLA-DRB1*16:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:61 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:62N Genomic Plasmid Vector	PHLAG82540237	Plasmid vector containing HLA-DRB1*16:62N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:62N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:62N protein under different cellular conditions.	Inquiry
HLA-DRB1*16:63N Genomic Plasmid Vector	PHLAG82540238	Plasmid vector containing HLA-DRB1*16:63N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:63N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:63N protein under different cellular conditions.	Inquiry
HLA-DRB1*16:64 Genomic Plasmid Vector	PHLAG82540239	Plasmid vector containing HLA-DRB1*16:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:64 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:65 Genomic Plasmid Vector	PHLAG82540240	Plasmid vector containing HLA-DRB1*16:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:65 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:66 Genomic Plasmid Vector	PHLAG82540241	Plasmid vector containing HLA-DRB1*16:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:66 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:67 Genomic Plasmid Vector	PHLAG82540242	Plasmid vector containing HLA-DRB1*16:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:67 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:68 Genomic Plasmid Vector	PHLAG82540243	Plasmid vector containing HLA-DRB1*16:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:68 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:69 Genomic Plasmid Vector	PHLAG82540244	Plasmid vector containing HLA-DRB1*16:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:69 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:70N Genomic Plasmid Vector	PHLAG82540245	Plasmid vector containing HLA-DRB1*16:70N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:70N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:70N protein under different cellular conditions.	Inquiry
HLA-DRB1*16:71 Genomic Plasmid Vector	PHLAG82540246	Plasmid vector containing HLA-DRB1*16:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:71 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:72 Genomic Plasmid Vector	PHLAG82540247	Plasmid vector containing HLA-DRB1*16:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:72 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:73 Genomic Plasmid Vector	PHLAG82540248	Plasmid vector containing HLA-DRB1*16:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:73 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:74 Genomic Plasmid Vector	PHLAG82540249	Plasmid vector containing HLA-DRB1*16:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:74 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:75 Genomic Plasmid Vector	PHLAG82540250	Plasmid vector containing HLA-DRB1*16:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:75 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:76 Genomic Plasmid Vector	PHLAG82540251	Plasmid vector containing HLA-DRB1*16:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:76 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:77N Genomic Plasmid Vector	PHLAG82540252	Plasmid vector containing HLA-DRB1*16:77N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:77N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:77N protein under different cellular conditions.	Inquiry
HLA-DRB1*16:78 Genomic Plasmid Vector	PHLAG82540253	Plasmid vector containing HLA-DRB1*16:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:78 protein under different cellular conditions.	Inquiry

HLA-DRB1*16:79 Genomic Plasmid Vector	PHLAG82540254	Plasmid vector containing HLA-DRB1*16:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:79 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:80 Genomic Plasmid Vector	PHLAG82540255	Plasmid vector containing HLA-DRB1*16:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:80 protein under different cellular conditions.	Inquiry
HLA-DRB1*16:81 Genomic Plasmid Vector	PHLAG82540256	Plasmid vector containing HLA-DRB1*16:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*16:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*16:81 protein under different cellular conditions.	Inquiry
HLA-DRB1*1606 Genomic Plasmid Vector	PHLAG82540257	Plasmid vector containing HLA-DRB1*1606 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB1*1606 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB1*1606 protein under different cellular conditions.	Inquiry
HLA-DRB2*01:01 Genomic Plasmid Vector	PHLAG82540258	Plasmid vector containing HLA-DRB2*01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB2*01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB2*01:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:02:01 Genomic Plasmid Vector	PHLAG82540259	Plasmid vector containing HLA-DRB3*01:01:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:02:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:02:02 Genomic Plasmid Vector	PHLAG82540260	Plasmid vector containing HLA-DRB3*01:01:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:02:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:02:03 Genomic Plasmid Vector	PHLAG82540261	Plasmid vector containing HLA-DRB3*01:01:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:02:03 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:01:02:04 Genomic Plasmid Vector	PHLAG82540262	Plasmid vector containing HLA-DRB3*01:01:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:02:04 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:02:05 Genomic Plasmid Vector	PHLAG82540263	Plasmid vector containing HLA-DRB3*01:01:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:02:05 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:02:06 Genomic Plasmid Vector	PHLAG82540264	Plasmid vector containing HLA-DRB3*01:01:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:02:06 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:02:07 Genomic Plasmid Vector	PHLAG82540265	Plasmid vector containing HLA-DRB3*01:01:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:02:07 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:02:08 Genomic Plasmid Vector	PHLAG82540266	Plasmid vector containing HLA-DRB3*01:01:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:02:08 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:02:09 Genomic Plasmid Vector	PHLAG82540267	Plasmid vector containing HLA-DRB3*01:01:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:02:09 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:03 Genomic Plasmid Vector	PHLAG82540268	Plasmid vector containing HLA-DRB3*01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:04 Genomic Plasmid Vector	PHLAG82540269	Plasmid vector containing HLA-DRB3*01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:04 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:01:05 Genomic Plasmid Vector	PHLAG82540270	Plasmid vector containing HLA-DRB3*01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:05 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:06 Genomic Plasmid Vector	PHLAG82540271	Plasmid vector containing HLA-DRB3*01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:06 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:07 Genomic Plasmid Vector	PHLAG82540272	Plasmid vector containing HLA-DRB3*01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:07 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:08 Genomic Plasmid Vector	PHLAG82540273	Plasmid vector containing HLA-DRB3*01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:08 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:09 Genomic Plasmid Vector	PHLAG82540274	Plasmid vector containing HLA-DRB3*01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:09 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:10 Genomic Plasmid Vector	PHLAG82540275	Plasmid vector containing HLA-DRB3*01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:10 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:11 Genomic Plasmid Vector	PHLAG82540276	Plasmid vector containing HLA-DRB3*01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:11 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:12 Genomic Plasmid Vector	PHLAG82540277	Plasmid vector containing HLA-DRB3*01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:12 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:13 Genomic Plasmid Vector	PHLAG82540278	Plasmid vector containing HLA-DRB3*01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:13 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:01:14 Genomic Plasmid Vector	PHLAG82540279	Plasmid vector containing HLA-DRB3*01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:14 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:15 Genomic Plasmid Vector	PHLAG82540280	Plasmid vector containing HLA-DRB3*01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:15 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:16 Genomic Plasmid Vector	PHLAG82540281	Plasmid vector containing HLA-DRB3*01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:16 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:17 Genomic Plasmid Vector	PHLAG82540282	Plasmid vector containing HLA-DRB3*01:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:17 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:18 Genomic Plasmid Vector	PHLAG82540283	Plasmid vector containing HLA-DRB3*01:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:18 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:19 Genomic Plasmid Vector	PHLAG82540284	Plasmid vector containing HLA-DRB3*01:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:19 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:20 Genomic Plasmid Vector	PHLAG82540285	Plasmid vector containing HLA-DRB3*01:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:20 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:21 Genomic Plasmid Vector	PHLAG82540286	Plasmid vector containing HLA-DRB3*01:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:21 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:22 Genomic Plasmid Vector	PHLAG82540287	Plasmid vector containing HLA-DRB3*01:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:22 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:01:23 Genomic Plasmid Vector	PHLAG82540288	Plasmid vector containing HLA-DRB3*01:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:23 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:01:24 Genomic Plasmid Vector	PHLAG82540289	Plasmid vector containing HLA-DRB3*01:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:01:24 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:02 Genomic Plasmid Vector	PHLAG82540290	Plasmid vector containing HLA-DRB3*01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:03 Genomic Plasmid Vector	PHLAG82540291	Plasmid vector containing HLA-DRB3*01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:03 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:04 Genomic Plasmid Vector	PHLAG82540292	Plasmid vector containing HLA-DRB3*01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:04 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:05 Genomic Plasmid Vector	PHLAG82540293	Plasmid vector containing HLA-DRB3*01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:05 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:06 Genomic Plasmid Vector	PHLAG82540294	Plasmid vector containing HLA-DRB3*01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:06 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:07 Genomic Plasmid Vector	PHLAG82540295	Plasmid vector containing HLA-DRB3*01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:07 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:08 Genomic Plasmid Vector	PHLAG82540296	Plasmid vector containing HLA-DRB3*01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:08 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:09 Genomic Plasmid Vector	PHLAG82540297	Plasmid vector containing HLA-DRB3*01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:09 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:10 Genomic Plasmid Vector	PHLAG82540298	Plasmid vector containing HLA-DRB3*01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:10 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:100 Genomic Plasmid Vector	PHLAG82540299	Plasmid vector containing HLA-DRB3*01:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:100 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:101 Genomic Plasmid Vector	PHLAG825403000	Plasmid vector containing HLA-DRB3*01:101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:101 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:102 Genomic Plasmid Vector	PHLAG825403001	Plasmid vector containing HLA-DRB3*01:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:102 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:103 Genomic Plasmid Vector	PHLAG825403002	Plasmid vector containing HLA-DRB3*01:103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:103 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:104 Genomic Plasmid Vector	PHLAG825403003	Plasmid vector containing HLA-DRB3*01:104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:104 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:105N Genomic Plasmid Vector	PHLAG825403004	Plasmid vector containing HLA-DRB3*01:105N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:105N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:105N protein under different cellular conditions.	Inquiry
HLA-DRB3*01:106 Genomic Plasmid Vector	PHLAG825403005	Plasmid vector containing HLA-DRB3*01:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:106 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:107 Genomic Plasmid Vector	PHLAG82540306	Plasmid vector containing HLA-DRB3*01:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:107 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:108 Genomic Plasmid Vector	PHLAG82540307	Plasmid vector containing HLA-DRB3*01:108 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:108 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:108 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:109 Genomic Plasmid Vector	PHLAG82540308	Plasmid vector containing HLA-DRB3*01:109 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:109 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:109 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:11 Genomic Plasmid Vector	PHLAG82540309	Plasmid vector containing HLA-DRB3*01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:11 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:110 Genomic Plasmid Vector	PHLAG82540310	Plasmid vector containing HLA-DRB3*01:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:110 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:111 Genomic Plasmid Vector	PHLAG82540311	Plasmid vector containing HLA-DRB3*01:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:111 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:112 Genomic Plasmid Vector	PHLAG82540312	Plasmid vector containing HLA-DRB3*01:112 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:112 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:112 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:113 Genomic Plasmid Vector	PHLAG82540313	Plasmid vector containing HLA-DRB3*01:113 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:113 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:113 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:114 Genomic Plasmid Vector	PHLAG82540314	Plasmid vector containing HLA-DRB3*01:114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:114 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:115 Genomic Plasmid Vector	PHLAG82540315	Plasmid vector containing HLA-DRB3*01:115 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:115 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:115 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:116 Genomic Plasmid Vector	PHLAG82540316	Plasmid vector containing HLA-DRB3*01:116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:116 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:117N Genomic Plasmid Vector	PHLAG82540317	Plasmid vector containing HLA-DRB3*01:117N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:117N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:117N protein under different cellular conditions.	Inquiry
HLA-DRB3*01:118 Genomic Plasmid Vector	PHLAG82540318	Plasmid vector containing HLA-DRB3*01:118 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:118 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:118 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:119 Genomic Plasmid Vector	PHLAG82540319	Plasmid vector containing HLA-DRB3*01:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:119 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:12 Genomic Plasmid Vector	PHLAG82540320	Plasmid vector containing HLA-DRB3*01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:12 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:120 Genomic Plasmid Vector	PHLAG82540321	Plasmid vector containing HLA-DRB3*01:120 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:120 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:120 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:121 Genomic Plasmid Vector	PHLAG82540322	Plasmid vector containing HLA-DRB3*01:121 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:121 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:121 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:122 Genomic Plasmid Vector	PHLAG82540323	Plasmid vector containing HLA-DRB3*01:122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:122 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:123 Genomic Plasmid Vector	PHLAG82540324	Plasmid vector containing HLA-DRB3*01:123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:123 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:124 Genomic Plasmid Vector	PHLAG82540325	Plasmid vector containing HLA-DRB3*01:124 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:124 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:124 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:125 Genomic Plasmid Vector	PHLAG82540326	Plasmid vector containing HLA-DRB3*01:125 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:125 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:125 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:126 Genomic Plasmid Vector	PHLAG82540327	Plasmid vector containing HLA-DRB3*01:126 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:126 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:126 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:127 Genomic Plasmid Vector	PHLAG82540328	Plasmid vector containing HLA-DRB3*01:127 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:127 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:127 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:128 Genomic Plasmid Vector	PHLAG82540329	Plasmid vector containing HLA-DRB3*01:128 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:128 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:128 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:129 Genomic Plasmid Vector	PHLAG82540330	Plasmid vector containing HLA-DRB3*01:129 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:129 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:129 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:13 Genomic Plasmid Vector	PHLAG82540331	Plasmid vector containing HLA-DRB3*01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:13 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:130 Genomic Plasmid Vector	PHLAG82540332	Plasmid vector containing HLA-DRB3*01:130 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:130 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:130 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:131 Genomic Plasmid Vector	PHLAG82540333	Plasmid vector containing HLA-DRB3*01:131 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:131 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:131 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:132N Genomic Plasmid Vector	PHLAG82540334	Plasmid vector containing HLA-DRB3*01:132N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:132N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:132N protein under different cellular conditions.	Inquiry
HLA-DRB3*01:133N Genomic Plasmid Vector	PHLAG82540335	Plasmid vector containing HLA-DRB3*01:133N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:133N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:133N protein under different cellular conditions.	Inquiry
HLA-DRB3*01:134:01:01 Genomic Plasmid Vector	PHLAG82540336	Plasmid vector containing HLA-DRB3*01:134:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:134:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:134:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:134:01:02 Genomic Plasmid Vector	PHLAG82540337	Plasmid vector containing HLA-DRB3*01:134:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:134:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:134:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:135 Genomic Plasmid Vector	PHLAG82540338	Plasmid vector containing HLA-DRB3*01:135 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:135 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:135 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:136 Genomic Plasmid Vector	PHLAG82540339	Plasmid vector containing HLA-DRB3*01:136 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:136 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:136 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:137:01:01 Genomic Plasmid Vector	PHLAG82540340	Plasmid vector containing HLA-DRB3*01:137:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:137:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:137:01:01 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:137:01:02 Genomic Plasmid Vector	PHLAG82540341	Plasmid vector containing HLA-DRB3*01:137:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:137:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:137:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:138:01:01 Genomic Plasmid Vector	PHLAG82540342	Plasmid vector containing HLA-DRB3*01:138:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:138:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:138:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:138:01:02 Genomic Plasmid Vector	PHLAG82540343	Plasmid vector containing HLA-DRB3*01:138:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:138:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:138:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:138:01:03 Genomic Plasmid Vector	PHLAG82540344	Plasmid vector containing HLA-DRB3*01:138:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:138:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:138:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:139 Genomic Plasmid Vector	PHLAG82540345	Plasmid vector containing HLA-DRB3*01:139 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:139 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:139 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:14 Genomic Plasmid Vector	PHLAG82540346	Plasmid vector containing HLA-DRB3*01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:14 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:140 Genomic Plasmid Vector	PHLAG82540347	Plasmid vector containing HLA-DRB3*01:140 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:140 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:140 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:141 Genomic Plasmid Vector	PHLAG82540348	Plasmid vector containing HLA-DRB3*01:141 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:141 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:141 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:142 Genomic Plasmid Vector	PHLAG82540349	Plasmid vector containing HLA-DRB3*01:142 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:142 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:142 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:143N Genomic Plasmid Vector	PHLAG82540350	Plasmid vector containing HLA-DRB3*01:143N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:143N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:143N protein under different cellular conditions.	Inquiry
HLA-DRB3*01:144 Genomic Plasmid Vector	PHLAG82540351	Plasmid vector containing HLA-DRB3*01:144 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:144 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:144 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:145 Genomic Plasmid Vector	PHLAG82540352	Plasmid vector containing HLA-DRB3*01:145 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:145 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:145 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:146 Genomic Plasmid Vector	PHLAG82540353	Plasmid vector containing HLA-DRB3*01:146 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:146 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:146 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:147:01:01 Genomic Plasmid Vector	PHLAG82540354	Plasmid vector containing HLA-DRB3*01:147:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:147:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:147:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:147:01:02 Genomic Plasmid Vector	PHLAG82540355	Plasmid vector containing HLA-DRB3*01:147:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:147:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:147:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:15 Genomic Plasmid Vector	PHLAG82540356	Plasmid vector containing HLA-DRB3*01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:15 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:16 Genomic Plasmid Vector	PHLAG82540357	Plasmid vector containing HLA-DRB3*01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:16 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:17 Genomic Plasmid Vector	PHLAG82540358	Plasmid vector containing HLA-DRB3*01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:17 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:18 Genomic Plasmid Vector	PHLAG82540359	Plasmid vector containing HLA-DRB3*01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:18 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:19 Genomic Plasmid Vector	PHLAG82540360	Plasmid vector containing HLA-DRB3*01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:19 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:20 Genomic Plasmid Vector	PHLAG82540361	Plasmid vector containing HLA-DRB3*01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:20 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:21 Genomic Plasmid Vector	PHLAG82540362	Plasmid vector containing HLA-DRB3*01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:21 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:22 Genomic Plasmid Vector	PHLAG82540363	Plasmid vector containing HLA-DRB3*01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:22 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:23 Genomic Plasmid Vector	PHLAG82540364	Plasmid vector containing HLA-DRB3*01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:23 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:24 Genomic Plasmid Vector	PHLAG82540365	Plasmid vector containing HLA-DRB3*01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:24 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:25 Genomic Plasmid Vector	PHLAG82540366	Plasmid vector containing HLA-DRB3*01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:25 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:26N Genomic Plasmid Vector	PHLAG82540367	Plasmid vector containing HLA-DRB3*01:26N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:26N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:26N protein under different cellular conditions.	Inquiry
HLA-DRB3*01:27 Genomic Plasmid Vector	PHLAG82540368	Plasmid vector containing HLA-DRB3*01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:27 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:28 Genomic Plasmid Vector	PHLAG82540369	Plasmid vector containing HLA-DRB3*01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:28 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:29 Genomic Plasmid Vector	PHLAG82540370	Plasmid vector containing HLA-DRB3*01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:29 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:30 Genomic Plasmid Vector	PHLAG82540371	Plasmid vector containing HLA-DRB3*01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:30 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:31 Genomic Plasmid Vector	PHLAG82540372	Plasmid vector containing HLA-DRB3*01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:31 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:32 Genomic Plasmid Vector	PHLAG82540373	Plasmid vector containing HLA-DRB3*01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:32 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:33 Genomic Plasmid Vector	PHLAG82540374	Plasmid vector containing HLA-DRB3*01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:33 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:34 Genomic Plasmid Vector	PHLAG82540375	Plasmid vector containing HLA-DRB3*01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:34 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:35 Genomic Plasmid Vector	PHLAG82540376	Plasmid vector containing HLA-DRB3*01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:35 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:36 Genomic Plasmid Vector	PHLAG82540377	Plasmid vector containing HLA-DRB3*01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:36 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:37 Genomic Plasmid Vector	PHLAG82540378	Plasmid vector containing HLA-DRB3*01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:37 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:38 Genomic Plasmid Vector	PHLAG82540379	Plasmid vector containing HLA-DRB3*01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:38 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:39 Genomic Plasmid Vector	PHLAG82540380	Plasmid vector containing HLA-DRB3*01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:39 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:40:01N Genomic Plasmid Vector	PHLAG82540381	Plasmid vector containing HLA-DRB3*01:40:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:40:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:40:01N protein under different cellular conditions.	Inquiry
HLA-DRB3*01:40:02N Genomic Plasmid Vector	PHLAG82540382	Plasmid vector containing HLA-DRB3*01:40:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:40:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:40:02N protein under different cellular conditions.	Inquiry
HLA-DRB3*01:41 Genomic Plasmid Vector	PHLAG82540383	Plasmid vector containing HLA-DRB3*01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:41 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:42 Genomic Plasmid Vector	PHLAG82540384	Plasmid vector containing HLA-DRB3*01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:42 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:43 Genomic Plasmid Vector	PHLAG82540385	Plasmid vector containing HLA-DRB3*01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:43 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:44 Genomic Plasmid Vector	PHLAG82540386	Plasmid vector containing HLA-DRB3*01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:44 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:45 Genomic Plasmid Vector	PHLAG82540387	Plasmid vector containing HLA-DRB3*01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:45 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:46 Genomic Plasmid Vector	PHLAG82540388	Plasmid vector containing HLA-DRB3*01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:46 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:47 Genomic Plasmid Vector	PHLAG82540389	Plasmid vector containing HLA-DRB3*01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:47 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:48 Genomic Plasmid Vector	PHLAG82540390	Plasmid vector containing HLA-DRB3*01:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:48 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:49 Genomic Plasmid Vector	PHLAG82540391	Plasmid vector containing HLA-DRB3*01:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:49 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:50 Genomic Plasmid Vector	PHLAG82540392	Plasmid vector containing HLA-DRB3*01:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:50 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:51 Genomic Plasmid Vector	PHLAG82540393	Plasmid vector containing HLA-DRB3*01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:51 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:52 Genomic Plasmid Vector	PHLAG82540394	Plasmid vector containing HLA-DRB3*01:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:52 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:53 Genomic Plasmid Vector	PHLAG82540395	Plasmid vector containing HLA-DRB3*01:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:53 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:54 Genomic Plasmid Vector	PHLAG82540396	Plasmid vector containing HLA-DRB3*01:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:54 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:55 Genomic Plasmid Vector	PHLAG82540397	Plasmid vector containing HLA-DRB3*01:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:55 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:56 Genomic Plasmid Vector	PHLAG82540398	Plasmid vector containing HLA-DRB3*01:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:56 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:57 Genomic Plasmid Vector	PHLAG82540399	Plasmid vector containing HLA-DRB3*01:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:57 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:58 Genomic Plasmid Vector	PHLAG825404000	Plasmid vector containing HLA-DRB3*01:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:58 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:59 Genomic Plasmid Vector	PHLAG825404001	Plasmid vector containing HLA-DRB3*01:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:59 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:60 Genomic Plasmid Vector	PHLAG825404002	Plasmid vector containing HLA-DRB3*01:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:60 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:61 Genomic Plasmid Vector	PHLAG82540403	Plasmid vector containing HLA-DRB3*01:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:61 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:62:01:01 Genomic Plasmid Vector	PHLAG82540404	Plasmid vector containing HLA-DRB3*01:62:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:62:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:62:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:62:01:02 Genomic Plasmid Vector	PHLAG82540405	Plasmid vector containing HLA-DRB3*01:62:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:62:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:62:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:63 Genomic Plasmid Vector	PHLAG82540406	Plasmid vector containing HLA-DRB3*01:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:63 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:64 Genomic Plasmid Vector	PHLAG82540407	Plasmid vector containing HLA-DRB3*01:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:64 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:65 Genomic Plasmid Vector	PHLAG82540408	Plasmid vector containing HLA-DRB3*01:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:65 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:66 Genomic Plasmid Vector	PHLAG82540409	Plasmid vector containing HLA-DRB3*01:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:66 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:67 Genomic Plasmid Vector	PHLAG82540410	Plasmid vector containing HLA-DRB3*01:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:67 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:68 Genomic Plasmid Vector	PHLAG82540411	Plasmid vector containing HLA-DRB3*01:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:68 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:69 Genomic Plasmid Vector	PHLAG82540412	Plasmid vector containing HLA-DRB3*01:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:69 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:70 Genomic Plasmid Vector	PHLAG82540413	Plasmid vector containing HLA-DRB3*01:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:70 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:71 Genomic Plasmid Vector	PHLAG82540414	Plasmid vector containing HLA-DRB3*01:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:71 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:72 Genomic Plasmid Vector	PHLAG82540415	Plasmid vector containing HLA-DRB3*01:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:72 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:73N Genomic Plasmid Vector	PHLAG82540416	Plasmid vector containing HLA-DRB3*01:73N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:73N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:73N protein under different cellular conditions.	Inquiry
HLA-DRB3*01:74 Genomic Plasmid Vector	PHLAG82540417	Plasmid vector containing HLA-DRB3*01:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:74 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:75 Genomic Plasmid Vector	PHLAG82540418	Plasmid vector containing HLA-DRB3*01:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:75 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:77N Genomic Plasmid Vector	PHLAG82540419	Plasmid vector containing HLA-DRB3*01:77N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:77N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:77N protein under different cellular conditions.	Inquiry
HLA-DRB3*01:78 Genomic Plasmid Vector	PHLAG82540420	Plasmid vector containing HLA-DRB3*01:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:78 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:79 Genomic Plasmid Vector	PHLAG82540421	Plasmid vector containing HLA-DRB3*01:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:79 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:80 Genomic Plasmid Vector	PHLAG82540422	Plasmid vector containing HLA-DRB3*01:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:80 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:81N Genomic Plasmid Vector	PHLAG82540423	Plasmid vector containing HLA-DRB3*01:81N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:81N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:81N protein under different cellular conditions.	Inquiry
HLA-DRB3*01:82 Genomic Plasmid Vector	PHLAG82540424	Plasmid vector containing HLA-DRB3*01:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:82 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:83 Genomic Plasmid Vector	PHLAG82540425	Plasmid vector containing HLA-DRB3*01:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:83 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:84 Genomic Plasmid Vector	PHLAG82540426	Plasmid vector containing HLA-DRB3*01:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:84 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:85 Genomic Plasmid Vector	PHLAG82540427	Plasmid vector containing HLA-DRB3*01:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:85 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:86 Genomic Plasmid Vector	PHLAG82540428	Plasmid vector containing HLA-DRB3*01:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:86 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:87 Genomic Plasmid Vector	PHLAG82540429	Plasmid vector containing HLA-DRB3*01:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:87 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:88 Genomic Plasmid Vector	PHLAG82540430	Plasmid vector containing HLA-DRB3*01:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:88 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:89 Genomic Plasmid Vector	PHLAG82540431	Plasmid vector containing HLA-DRB3*01:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:89 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:90 Genomic Plasmid Vector	PHLAG82540432	Plasmid vector containing HLA-DRB3*01:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:90 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:91 Genomic Plasmid Vector	PHLAG82540433	Plasmid vector containing HLA-DRB3*01:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:91 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:92 Genomic Plasmid Vector	PHLAG82540434	Plasmid vector containing HLA-DRB3*01:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:92 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:93 Genomic Plasmid Vector	PHLAG82540435	Plasmid vector containing HLA-DRB3*01:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:93 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:94 Genomic Plasmid Vector	PHLAG82540436	Plasmid vector containing HLA-DRB3*01:94 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:94 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:94 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:95 Genomic Plasmid Vector	PHLAG82540437	Plasmid vector containing HLA-DRB3*01:95 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:95 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:95 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:96 Genomic Plasmid Vector	PHLAG82540438	Plasmid vector containing HLA-DRB3*01:96 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:96 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:96 protein under different cellular conditions.	Inquiry

HLA-DRB3*01:97N Genomic Plasmid Vector	PHLAG82540439	Plasmid vector containing HLA-DRB3*01:97N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:97N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:97N protein under different cellular conditions.	Inquiry
HLA-DRB3*01:98 Genomic Plasmid Vector	PHLAG82540440	Plasmid vector containing HLA-DRB3*01:98 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:98 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:98 protein under different cellular conditions.	Inquiry
HLA-DRB3*01:99 Genomic Plasmid Vector	PHLAG82540441	Plasmid vector containing HLA-DRB3*01:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*01:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*01:99 protein under different cellular conditions.	Inquiry
HLA-DRB3*010101 Genomic Plasmid Vector	PHLAG82540442	Plasmid vector containing HLA-DRB3*010101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*010101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*010101 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:01 Genomic Plasmid Vector	PHLAG82540443	Plasmid vector containing HLA-DRB3*02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:01 Genomic Plasmid Vector	PHLAG82540444	Plasmid vector containing HLA-DRB3*02:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:02 Genomic Plasmid Vector	PHLAG82540445	Plasmid vector containing HLA-DRB3*02:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:03 Genomic Plasmid Vector	PHLAG82540446	Plasmid vector containing HLA-DRB3*02:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:03 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:02:01:04 Genomic Plasmid Vector	PHLAG82540447	Plasmid vector containing HLA-DRB3*02:02:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:04 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:05 Genomic Plasmid Vector	PHLAG82540448	Plasmid vector containing HLA-DRB3*02:02:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:05 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:06 Genomic Plasmid Vector	PHLAG82540449	Plasmid vector containing HLA-DRB3*02:02:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:06 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:07 Genomic Plasmid Vector	PHLAG825404510	Plasmid vector containing HLA-DRB3*02:02:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:07 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:09 Genomic Plasmid Vector	PHLAG825404511	Plasmid vector containing HLA-DRB3*02:02:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:09 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:10 Genomic Plasmid Vector	PHLAG825404512	Plasmid vector containing HLA-DRB3*02:02:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:10 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:11 Genomic Plasmid Vector	PHLAG825404513	Plasmid vector containing HLA-DRB3*02:02:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:11 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:12 Genomic Plasmid Vector	PHLAG825404514	Plasmid vector containing HLA-DRB3*02:02:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:12 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:02:01:13 Genomic Plasmid Vector	PHLAG82540455	Plasmid vector containing HLA-DRB3*02:02:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:13 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:14 Genomic Plasmid Vector	PHLAG82540456	Plasmid vector containing HLA-DRB3*02:02:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:14 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:15 Genomic Plasmid Vector	PHLAG82540457	Plasmid vector containing HLA-DRB3*02:02:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:15 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:16 Genomic Plasmid Vector	PHLAG82540458	Plasmid vector containing HLA-DRB3*02:02:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:16 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:17 Genomic Plasmid Vector	PHLAG82540459	Plasmid vector containing HLA-DRB3*02:02:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:17 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:18 Genomic Plasmid Vector	PHLAG82540460	Plasmid vector containing HLA-DRB3*02:02:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:18 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:19 Genomic Plasmid Vector	PHLAG82540461	Plasmid vector containing HLA-DRB3*02:02:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:19 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:20 Genomic Plasmid Vector	PHLAG82540462	Plasmid vector containing HLA-DRB3*02:02:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:20 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:02:01:21 Genomic Plasmid Vector	PHLAG82540463	Plasmid vector containing HLA-DRB3*02:02:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:21 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:22 Genomic Plasmid Vector	PHLAG82540464	Plasmid vector containing HLA-DRB3*02:02:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:22 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:23 Genomic Plasmid Vector	PHLAG82540465	Plasmid vector containing HLA-DRB3*02:02:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:23 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:24 Genomic Plasmid Vector	PHLAG82540466	Plasmid vector containing HLA-DRB3*02:02:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:24 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:25 Genomic Plasmid Vector	PHLAG82540467	Plasmid vector containing HLA-DRB3*02:02:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:25 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:26 Genomic Plasmid Vector	PHLAG82540468	Plasmid vector containing HLA-DRB3*02:02:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:26 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:27 Genomic Plasmid Vector	PHLAG82540469	Plasmid vector containing HLA-DRB3*02:02:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:27 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:28 Genomic Plasmid Vector	PHLAG82540470	Plasmid vector containing HLA-DRB3*02:02:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:28 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:02:01:29 Genomic Plasmid Vector	PHLAG82540471	Plasmid vector containing HLA-DRB3*02:02:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:29 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:30 Genomic Plasmid Vector	PHLAG82540472	Plasmid vector containing HLA-DRB3*02:02:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:30 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:01:31 Genomic Plasmid Vector	PHLAG82540473	Plasmid vector containing HLA-DRB3*02:02:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:01:31 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:02 Genomic Plasmid Vector	PHLAG82540474	Plasmid vector containing HLA-DRB3*02:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:03 Genomic Plasmid Vector	PHLAG82540475	Plasmid vector containing HLA-DRB3*02:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:03 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:04 Genomic Plasmid Vector	PHLAG82540476	Plasmid vector containing HLA-DRB3*02:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:04 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:05 Genomic Plasmid Vector	PHLAG82540477	Plasmid vector containing HLA-DRB3*02:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:05 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:06 Genomic Plasmid Vector	PHLAG82540478	Plasmid vector containing HLA-DRB3*02:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:06 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:02:07 Genomic Plasmid Vector	PHLAG82540479	Plasmid vector containing HLA-DRB3*02:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:07 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:08 Genomic Plasmid Vector	PHLAG82540480	Plasmid vector containing HLA-DRB3*02:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:08 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:09 Genomic Plasmid Vector	PHLAG82540481	Plasmid vector containing HLA-DRB3*02:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:09 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:10 Genomic Plasmid Vector	PHLAG82540482	Plasmid vector containing HLA-DRB3*02:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:10 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:11 Genomic Plasmid Vector	PHLAG82540483	Plasmid vector containing HLA-DRB3*02:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:11 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:12 Genomic Plasmid Vector	PHLAG82540484	Plasmid vector containing HLA-DRB3*02:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:12 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:13 Genomic Plasmid Vector	PHLAG82540485	Plasmid vector containing HLA-DRB3*02:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:13 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:14 Genomic Plasmid Vector	PHLAG82540486	Plasmid vector containing HLA-DRB3*02:02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:14 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:15 Genomic Plasmid Vector	PHLAG82540487	Plasmid vector containing HLA-DRB3*02:02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:15 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:02:16 Genomic Plasmid Vector	PHLAG82540488	Plasmid vector containing HLA-DRB3*02:02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:16 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:17 Genomic Plasmid Vector	PHLAG82540489	Plasmid vector containing HLA-DRB3*02:02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:17 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:18 Genomic Plasmid Vector	PHLAG82540490	Plasmid vector containing HLA-DRB3*02:02:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:18 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:19 Genomic Plasmid Vector	PHLAG82540491	Plasmid vector containing HLA-DRB3*02:02:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:19 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:20 Genomic Plasmid Vector	PHLAG82540492	Plasmid vector containing HLA-DRB3*02:02:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:20 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:21 Genomic Plasmid Vector	PHLAG82540493	Plasmid vector containing HLA-DRB3*02:02:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:21 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:22 Genomic Plasmid Vector	PHLAG82540494	Plasmid vector containing HLA-DRB3*02:02:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:22 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:23 Genomic Plasmid Vector	PHLAG82540495	Plasmid vector containing HLA-DRB3*02:02:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:23 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:24 Genomic Plasmid Vector	PHLAG82540496	Plasmid vector containing HLA-DRB3*02:02:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:24 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:02:25 Genomic Plasmid Vector	PHLAG82540497	Plasmid vector containing HLA-DRB3*02:02:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:25 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:26 Genomic Plasmid Vector	PHLAG82540498	Plasmid vector containing HLA-DRB3*02:02:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:26 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:27 Genomic Plasmid Vector	PHLAG82540499	Plasmid vector containing HLA-DRB3*02:02:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:27 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:28 Genomic Plasmid Vector	PHLAG825405000	Plasmid vector containing HLA-DRB3*02:02:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:28 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:29 Genomic Plasmid Vector	PHLAG825405001	Plasmid vector containing HLA-DRB3*02:02:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:29 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:30 Genomic Plasmid Vector	PHLAG825405002	Plasmid vector containing HLA-DRB3*02:02:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:30 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:31 Genomic Plasmid Vector	PHLAG825405003	Plasmid vector containing HLA-DRB3*02:02:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:31 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:32 Genomic Plasmid Vector	PHLAG825405004	Plasmid vector containing HLA-DRB3*02:02:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:32 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:33 Genomic Plasmid Vector	PHLAG825405005	Plasmid vector containing HLA-DRB3*02:02:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:33 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:02:34 Genomic Plasmid Vector	PHLAG82540506	Plasmid vector containing HLA-DRB3*02:02:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:34 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:35 Genomic Plasmid Vector	PHLAG82540507	Plasmid vector containing HLA-DRB3*02:02:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:35 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:36 Genomic Plasmid Vector	PHLAG82540508	Plasmid vector containing HLA-DRB3*02:02:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:36 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:37 Genomic Plasmid Vector	PHLAG82540509	Plasmid vector containing HLA-DRB3*02:02:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:37 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:38 Genomic Plasmid Vector	PHLAG82540510	Plasmid vector containing HLA-DRB3*02:02:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:38 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:39 Genomic Plasmid Vector	PHLAG82540511	Plasmid vector containing HLA-DRB3*02:02:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:39 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:40 Genomic Plasmid Vector	PHLAG82540512	Plasmid vector containing HLA-DRB3*02:02:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:40 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:41 Genomic Plasmid Vector	PHLAG82540513	Plasmid vector containing HLA-DRB3*02:02:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:41 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:42 Genomic Plasmid Vector	PHLAG82540514	Plasmid vector containing HLA-DRB3*02:02:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:42 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:02:43 Genomic Plasmid Vector	PHLAG82540515	Plasmid vector containing HLA-DRB3*02:02:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:43 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:44 Genomic Plasmid Vector	PHLAG82540516	Plasmid vector containing HLA-DRB3*02:02:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:44 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:45 Genomic Plasmid Vector	PHLAG82540517	Plasmid vector containing HLA-DRB3*02:02:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:45 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:46 Genomic Plasmid Vector	PHLAG82540518	Plasmid vector containing HLA-DRB3*02:02:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:46 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:47 Genomic Plasmid Vector	PHLAG82540519	Plasmid vector containing HLA-DRB3*02:02:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:47 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:48 Genomic Plasmid Vector	PHLAG82540520	Plasmid vector containing HLA-DRB3*02:02:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:48 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:49 Genomic Plasmid Vector	PHLAG82540521	Plasmid vector containing HLA-DRB3*02:02:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:49 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:50 Genomic Plasmid Vector	PHLAG82540522	Plasmid vector containing HLA-DRB3*02:02:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:50 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:51 Genomic Plasmid Vector	PHLAG82540523	Plasmid vector containing HLA-DRB3*02:02:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:51 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:02:52 Genomic Plasmid Vector	PHLAG82540524	Plasmid vector containing HLA-DRB3*02:02:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:52 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:53 Genomic Plasmid Vector	PHLAG82540525	Plasmid vector containing HLA-DRB3*02:02:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:53 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:02:54 Genomic Plasmid Vector	PHLAG82540526	Plasmid vector containing HLA-DRB3*02:02:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:02:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:02:54 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:03 Genomic Plasmid Vector	PHLAG82540527	Plasmid vector containing HLA-DRB3*02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:03 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:04 Genomic Plasmid Vector	PHLAG82540528	Plasmid vector containing HLA-DRB3*02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:04 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:05:01 Genomic Plasmid Vector	PHLAG82540529	Plasmid vector containing HLA-DRB3*02:05:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:05:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:05:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:05:02 Genomic Plasmid Vector	PHLAG82540530	Plasmid vector containing HLA-DRB3*02:05:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:05:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:05:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:06 Genomic Plasmid Vector	PHLAG82540531	Plasmid vector containing HLA-DRB3*02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:06 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:07 Genomic Plasmid Vector	PHLAG82540532	Plasmid vector containing HLA-DRB3*02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:07 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:08 Genomic Plasmid Vector	PHLAG82540533	Plasmid vector containing HLA-DRB3*02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:08 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:09 Genomic Plasmid Vector	PHLAG82540534	Plasmid vector containing HLA-DRB3*02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:09 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:10 Genomic Plasmid Vector	PHLAG82540535	Plasmid vector containing HLA-DRB3*02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:10 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:100 Genomic Plasmid Vector	PHLAG82540536	Plasmid vector containing HLA-DRB3*02:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:100 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:101 Genomic Plasmid Vector	PHLAG82540537	Plasmid vector containing HLA-DRB3*02:101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:101 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:102 Genomic Plasmid Vector	PHLAG82540538	Plasmid vector containing HLA-DRB3*02:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:102 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:103 Genomic Plasmid Vector	PHLAG82540539	Plasmid vector containing HLA-DRB3*02:103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:103 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:104 Genomic Plasmid Vector	PHLAG82540540	Plasmid vector containing HLA-DRB3*02:104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:104 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:105 Genomic Plasmid Vector	PHLAG82540541	Plasmid vector containing HLA-DRB3*02:105 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:105 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:105 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:106 Genomic Plasmid Vector	PHLAG82540542	Plasmid vector containing HLA-DRB3*02:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:106 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:107 Genomic Plasmid Vector	PHLAG82540543	Plasmid vector containing HLA-DRB3*02:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:107 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:108 Genomic Plasmid Vector	PHLAG82540544	Plasmid vector containing HLA-DRB3*02:108 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:108 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:108 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:109N Genomic Plasmid Vector	PHLAG82540545	Plasmid vector containing HLA-DRB3*02:109N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:109N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:109N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:11 Genomic Plasmid Vector	PHLAG82540546	Plasmid vector containing HLA-DRB3*02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:11 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:110 Genomic Plasmid Vector	PHLAG82540547	Plasmid vector containing HLA-DRB3*02:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:110 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:111 Genomic Plasmid Vector	PHLAG82540548	Plasmid vector containing HLA-DRB3*02:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:111 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:112 Genomic Plasmid Vector	PHLAG82540549	Plasmid vector containing HLA-DRB3*02:112 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:112 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:112 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:113 Genomic Plasmid Vector	PHLAG82540550	Plasmid vector containing HLA-DRB3*02:113 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:113 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:113 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:114 Genomic Plasmid Vector	PHLAG82540551	Plasmid vector containing HLA-DRB3*02:114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:114 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:115 Genomic Plasmid Vector	PHLAG82540552	Plasmid vector containing HLA-DRB3*02:115 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:115 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:115 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:116 Genomic Plasmid Vector	PHLAG82540553	Plasmid vector containing HLA-DRB3*02:116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:116 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:117 Genomic Plasmid Vector	PHLAG82540554	Plasmid vector containing HLA-DRB3*02:117 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:117 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:117 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:118 Genomic Plasmid Vector	PHLAG82540555	Plasmid vector containing HLA-DRB3*02:118 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:118 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:118 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:119 Genomic Plasmid Vector	PHLAG82540556	Plasmid vector containing HLA-DRB3*02:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:119 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:12 Genomic Plasmid Vector	PHLAG82540557	Plasmid vector containing HLA-DRB3*02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:12 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:120 Genomic Plasmid Vector	PHLAG82540558	Plasmid vector containing HLA-DRB3*02:120 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:120 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:120 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:121N Genomic Plasmid Vector	PHLAG82540559	Plasmid vector containing HLA-DRB3*02:121N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:121N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:121N protein under different cellular conditions.	Inquiry

HLA-DRB3*02:122 Genomic Plasmid Vector	PHLAG82540560	Plasmid vector containing HLA-DRB3*02:122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:122 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:123 Genomic Plasmid Vector	PHLAG82540561	Plasmid vector containing HLA-DRB3*02:123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:123 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:124 Genomic Plasmid Vector	PHLAG82540562	Plasmid vector containing HLA-DRB3*02:124 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:124 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:124 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:125N Genomic Plasmid Vector	PHLAG82540563	Plasmid vector containing HLA-DRB3*02:125N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:125N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:125N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:126 Genomic Plasmid Vector	PHLAG82540564	Plasmid vector containing HLA-DRB3*02:126 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:126 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:126 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:127 Genomic Plasmid Vector	PHLAG82540565	Plasmid vector containing HLA-DRB3*02:127 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:127 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:127 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:128 Genomic Plasmid Vector	PHLAG82540566	Plasmid vector containing HLA-DRB3*02:128 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:128 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:128 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:129 Genomic Plasmid Vector	PHLAG82540567	Plasmid vector containing HLA-DRB3*02:129 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:129 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:129 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:13 Genomic Plasmid Vector	PHLAG82540568	Plasmid vector containing HLA-DRB3*02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:13 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:130 Genomic Plasmid Vector	PHLAG82540569	Plasmid vector containing HLA-DRB3*02:130 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:130 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:130 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:131 Genomic Plasmid Vector	PHLAG82540570	Plasmid vector containing HLA-DRB3*02:131 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:131 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:131 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:132 Genomic Plasmid Vector	PHLAG82540571	Plasmid vector containing HLA-DRB3*02:132 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:132 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:132 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:133 Genomic Plasmid Vector	PHLAG82540572	Plasmid vector containing HLA-DRB3*02:133 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:133 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:133 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:134 Genomic Plasmid Vector	PHLAG82540573	Plasmid vector containing HLA-DRB3*02:134 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:134 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:134 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:135 Genomic Plasmid Vector	PHLAG82540574	Plasmid vector containing HLA-DRB3*02:135 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:135 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:135 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:136 Genomic Plasmid Vector	PHLAG82540575	Plasmid vector containing HLA-DRB3*02:136 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:136 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:136 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:137N Genomic Plasmid Vector	PHLAG82540576	Plasmid vector containing HLA-DRB3*02:137N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:137N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:137N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:138 Genomic Plasmid Vector	PHLAG82540577	Plasmid vector containing HLA-DRB3*02:138 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:138 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:138 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:139 Genomic Plasmid Vector	PHLAG82540578	Plasmid vector containing HLA-DRB3*02:139 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:139 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:139 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:14 Genomic Plasmid Vector	PHLAG82540579	Plasmid vector containing HLA-DRB3*02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:14 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:140 Genomic Plasmid Vector	PHLAG82540580	Plasmid vector containing HLA-DRB3*02:140 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:140 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:140 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:141 Genomic Plasmid Vector	PHLAG82540581	Plasmid vector containing HLA-DRB3*02:141 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:141 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:141 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:142 Genomic Plasmid Vector	PHLAG82540582	Plasmid vector containing HLA-DRB3*02:142 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:142 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:142 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:143 Genomic Plasmid Vector	PHLAG82540583	Plasmid vector containing HLA-DRB3*02:143 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:143 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:143 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:144 Genomic Plasmid Vector	PHLAG82540584	Plasmid vector containing HLA-DRB3*02:144 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:144 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:144 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:145N Genomic Plasmid Vector	PHLAG82540585	Plasmid vector containing HLA-DRB3*02:145N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:145N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:145N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:146 Genomic Plasmid Vector	PHLAG82540586	Plasmid vector containing HLA-DRB3*02:146 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:146 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:146 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:147 Genomic Plasmid Vector	PHLAG82540587	Plasmid vector containing HLA-DRB3*02:147 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:147 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:147 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:148 Genomic Plasmid Vector	PHLAG82540588	Plasmid vector containing HLA-DRB3*02:148 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:148 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:148 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:149 Genomic Plasmid Vector	PHLAG82540589	Plasmid vector containing HLA-DRB3*02:149 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:149 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:149 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:15 Genomic Plasmid Vector	PHLAG82540590	Plasmid vector containing HLA-DRB3*02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:15 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:150 Genomic Plasmid Vector	PHLAG82540591	Plasmid vector containing HLA-DRB3*02:150 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:150 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:150 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:151 Genomic Plasmid Vector	PHLAG82540592	Plasmid vector containing HLA-DRB3*02:151 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:151 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:151 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:152 Genomic Plasmid Vector	PHLAG82540593	Plasmid vector containing HLA-DRB3*02:152 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:152 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:152 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:153 Genomic Plasmid Vector	PHLAG82540594	Plasmid vector containing HLA-DRB3*02:153 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:153 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:153 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:154 Genomic Plasmid Vector	PHLAG82540595	Plasmid vector containing HLA-DRB3*02:154 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:154 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:154 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:155 Genomic Plasmid Vector	PHLAG82540596	Plasmid vector containing HLA-DRB3*02:155 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:155 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:155 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:156 Genomic Plasmid Vector	PHLAG82540597	Plasmid vector containing HLA-DRB3*02:156 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:156 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:156 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:157 Genomic Plasmid Vector	PHLAG82540598	Plasmid vector containing HLA-DRB3*02:157 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:157 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:157 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:158 Genomic Plasmid Vector	PHLAG82540599	Plasmid vector containing HLA-DRB3*02:158 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:158 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:158 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:159 Genomic Plasmid Vector	PHLAG82540600	Plasmid vector containing HLA-DRB3*02:159 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:159 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:159 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:16 Genomic Plasmid Vector	PHLAG82540601	Plasmid vector containing HLA-DRB3*02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:16 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:160 Genomic Plasmid Vector	PHLAG82540602	Plasmid vector containing HLA-DRB3*02:160 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:160 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:160 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:161 Genomic Plasmid Vector	PHLAG82540603	Plasmid vector containing HLA-DRB3*02:161 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:161 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:161 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:162 Genomic Plasmid Vector	PHLAG82540604	Plasmid vector containing HLA-DRB3*02:162 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:162 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:162 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:163 Genomic Plasmid Vector	PHLAG82540605	Plasmid vector containing HLA-DRB3*02:163 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:163 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:163 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:164 Genomic Plasmid Vector	PHLAG82540606	Plasmid vector containing HLA-DRB3*02:164 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:164 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:164 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:165N Genomic Plasmid Vector	PHLAG82540607	Plasmid vector containing HLA-DRB3*02:165N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:165N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:165N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:166 Genomic Plasmid Vector	PHLAG82540608	Plasmid vector containing HLA-DRB3*02:166 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:166 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:166 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:167 Genomic Plasmid Vector	PHLAG82540609	Plasmid vector containing HLA-DRB3*02:167 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:167 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:167 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:168 Genomic Plasmid Vector	PHLAG82540610	Plasmid vector containing HLA-DRB3*02:168 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:168 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:168 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:169 Genomic Plasmid Vector	PHLAG82540611	Plasmid vector containing HLA-DRB3*02:169 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:169 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:169 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:17 Genomic Plasmid Vector	PHLAG82540612	Plasmid vector containing HLA-DRB3*02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:17 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:170 Genomic Plasmid Vector	PHLAG82540613	Plasmid vector containing HLA-DRB3*02:170 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:170 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:170 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:171 Genomic Plasmid Vector	PHLAG82540614	Plasmid vector containing HLA-DRB3*02:171 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:171 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:171 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:172 Genomic Plasmid Vector	PHLAG82540615	Plasmid vector containing HLA-DRB3*02:172 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:172 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:172 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:173:01 Genomic Plasmid Vector	PHLAG82540616	Plasmid vector containing HLA-DRB3*02:173:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:173:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:173:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:173:02 Genomic Plasmid Vector	PHLAG82540617	Plasmid vector containing HLA-DRB3*02:173:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:173:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:173:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:174 Genomic Plasmid Vector	PHLAG82540618	Plasmid vector containing HLA-DRB3*02:174 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:174 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:174 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:175 Genomic Plasmid Vector	PHLAG82540619	Plasmid vector containing HLA-DRB3*02:175 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:175 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:175 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:176 Genomic Plasmid Vector	PHLAG82540620	Plasmid vector containing HLA-DRB3*02:176 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:176 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:176 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:177 Genomic Plasmid Vector	PHLAG82540621	Plasmid vector containing HLA-DRB3*02:177 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:177 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:177 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:178 Genomic Plasmid Vector	PHLAG82540622	Plasmid vector containing HLA-DRB3*02:178 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:178 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:178 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:179N Genomic Plasmid Vector	PHLAG82540623	Plasmid vector containing HLA-DRB3*02:179N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:179N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:179N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:18 Genomic Plasmid Vector	PHLAG82540624	Plasmid vector containing HLA-DRB3*02:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:18 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:180 Genomic Plasmid Vector	PHLAG82540625	Plasmid vector containing HLA-DRB3*02:180 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:180 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:180 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:181 Genomic Plasmid Vector	PHLAG82540626	Plasmid vector containing HLA-DRB3*02:181 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:181 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:181 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:182 Genomic Plasmid Vector	PHLAG82540627	Plasmid vector containing HLA-DRB3*02:182 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:182 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:182 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:183 Genomic Plasmid Vector	PHLAG82540628	Plasmid vector containing HLA-DRB3*02:183 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:183 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:183 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:184 Genomic Plasmid Vector	PHLAG82540629	Plasmid vector containing HLA-DRB3*02:184 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:184 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:184 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:185 Genomic Plasmid Vector	PHLAG82540630	Plasmid vector containing HLA-DRB3*02:185 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:185 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:185 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:186 Genomic Plasmid Vector	PHLAG82540631	Plasmid vector containing HLA-DRB3*02:186 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:186 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:186 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:187N Genomic Plasmid Vector	PHLAG82540632	Plasmid vector containing HLA-DRB3*02:187N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:187N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:187N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:188 Genomic Plasmid Vector	PHLAG82540633	Plasmid vector containing HLA-DRB3*02:188 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:188 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:188 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:189 Genomic Plasmid Vector	PHLAG82540634	Plasmid vector containing HLA-DRB3*02:189 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:189 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:189 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:19 Genomic Plasmid Vector	PHLAG82540635	Plasmid vector containing HLA-DRB3*02:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:19 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:190 Genomic Plasmid Vector	PHLAG82540636	Plasmid vector containing HLA-DRB3*02:190 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:190 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:190 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:191 Genomic Plasmid Vector	PHLAG82540637	Plasmid vector containing HLA-DRB3*02:191 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:191 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:191 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:192 Genomic Plasmid Vector	PHLAG82540638	Plasmid vector containing HLA-DRB3*02:192 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:192 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:192 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:193 Genomic Plasmid Vector	PHLAG82540639	Plasmid vector containing HLA-DRB3*02:193 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:193 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:193 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:194 Genomic Plasmid Vector	PHLAG82540640	Plasmid vector containing HLA-DRB3*02:194 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:194 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:194 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:195 Genomic Plasmid Vector	PHLAG82540641	Plasmid vector containing HLA-DRB3*02:195 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:195 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:195 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:196 Genomic Plasmid Vector	PHLAG82540642	Plasmid vector containing HLA-DRB3*02:196 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:196 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:196 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:197 Genomic Plasmid Vector	PHLAG82540643	Plasmid vector containing HLA-DRB3*02:197 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:197 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:197 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:198 Genomic Plasmid Vector	PHLAG82540644	Plasmid vector containing HLA-DRB3*02:198 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:198 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:198 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:199 Genomic Plasmid Vector	PHLAG82540645	Plasmid vector containing HLA-DRB3*02:199 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:199 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:199 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:20 Genomic Plasmid Vector	PHLAG82540646	Plasmid vector containing HLA-DRB3*02:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:20 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:200 Genomic Plasmid Vector	PHLAG82540647	Plasmid vector containing HLA-DRB3*02:200 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:200 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:200 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:201 Genomic Plasmid Vector	PHLAG82540648	Plasmid vector containing HLA-DRB3*02:201 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:201 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:201 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:202 Genomic Plasmid Vector	PHLAG82540649	Plasmid vector containing HLA-DRB3*02:202 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:202 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:202 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:203 Genomic Plasmid Vector	PHLAG82540650	Plasmid vector containing HLA-DRB3*02:203 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:203 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:203 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:204 Genomic Plasmid Vector	PHLAG82540651	Plasmid vector containing HLA-DRB3*02:204 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:204 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:204 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:205 Genomic Plasmid Vector	PHLAG82540652	Plasmid vector containing HLA-DRB3*02:205 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:205 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:205 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:206N Genomic Plasmid Vector	PHLAG82540653	Plasmid vector containing HLA-DRB3*02:206N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:206N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:206N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:207 Genomic Plasmid Vector	PHLAG82540654	Plasmid vector containing HLA-DRB3*02:207 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:207 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:207 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:208 Genomic Plasmid Vector	PHLAG82540655	Plasmid vector containing HLA-DRB3*02:208 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:208 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:208 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:209 Genomic Plasmid Vector	PHLAG82540656	Plasmid vector containing HLA-DRB3*02:209 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:209 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:209 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:21 Genomic Plasmid Vector	PHLAG82540657	Plasmid vector containing HLA-DRB3*02:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:21 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:210Q Genomic Plasmid Vector	PHLAG82540658	Plasmid vector containing HLA-DRB3*02:210Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:210Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:210Q protein under different cellular conditions.	Inquiry

HLA-DRB3*02:211 Genomic Plasmid Vector	PHLAG82540659	Plasmid vector containing HLA-DRB3*02:211 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:211 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:211 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:212 Genomic Plasmid Vector	PHLAG82540660	Plasmid vector containing HLA-DRB3*02:212 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:212 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:212 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:213 Genomic Plasmid Vector	PHLAG82540661	Plasmid vector containing HLA-DRB3*02:213 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:213 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:213 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:214N Genomic Plasmid Vector	PHLAG82540662	Plasmid vector containing HLA-DRB3*02:214N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:214N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:214N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:215 Genomic Plasmid Vector	PHLAG82540663	Plasmid vector containing HLA-DRB3*02:215 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:215 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:215 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:216 Genomic Plasmid Vector	PHLAG82540664	Plasmid vector containing HLA-DRB3*02:216 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:216 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:216 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:217 Genomic Plasmid Vector	PHLAG82540665	Plasmid vector containing HLA-DRB3*02:217 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:217 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:217 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:218 Genomic Plasmid Vector	PHLAG82540666	Plasmid vector containing HLA-DRB3*02:218 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:218 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:218 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:219 Genomic Plasmid Vector	PHLAG82540667	Plasmid vector containing HLA-DRB3*02:219 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:219 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:219 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:22:01 Genomic Plasmid Vector	PHLAG82540668	Plasmid vector containing HLA-DRB3*02:22:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:22:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:22:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:22:02 Genomic Plasmid Vector	PHLAG82540669	Plasmid vector containing HLA-DRB3*02:22:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:22:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:22:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:220 Genomic Plasmid Vector	PHLAG82540670	Plasmid vector containing HLA-DRB3*02:220 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:220 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:220 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:221 Genomic Plasmid Vector	PHLAG82540671	Plasmid vector containing HLA-DRB3*02:221 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:221 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:221 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:222N Genomic Plasmid Vector	PHLAG82540672	Plasmid vector containing HLA-DRB3*02:222N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:222N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:222N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:223 Genomic Plasmid Vector	PHLAG82540673	Plasmid vector containing HLA-DRB3*02:223 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:223 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:223 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:224 Genomic Plasmid Vector	PHLAG82540674	Plasmid vector containing HLA-DRB3*02:224 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:224 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:224 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:225 Genomic Plasmid Vector	PHLAG82540675	Plasmid vector containing HLA-DRB3*02:225 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:225 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:225 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:226N Genomic Plasmid Vector	PHLAG82540676	Plasmid vector containing HLA-DRB3*02:226N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:226N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:226N protein under different cellular conditions.	Inquiry

HLA-DRB3*02:227 Genomic Plasmid Vector	PHLAG82540677	Plasmid vector containing HLA-DRB3*02:227 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:227 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:227 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:228 Genomic Plasmid Vector	PHLAG82540678	Plasmid vector containing HLA-DRB3*02:228 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:228 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:228 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:229 Genomic Plasmid Vector	PHLAG82540679	Plasmid vector containing HLA-DRB3*02:229 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:229 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:229 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:23 Genomic Plasmid Vector	PHLAG825406810	Plasmid vector containing HLA-DRB3*02:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:23 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:230 Genomic Plasmid Vector	PHLAG825406811	Plasmid vector containing HLA-DRB3*02:230 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:230 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:230 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:231 Genomic Plasmid Vector	PHLAG825406812	Plasmid vector containing HLA-DRB3*02:231 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:231 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:231 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:232 Genomic Plasmid Vector	PHLAG825406813	Plasmid vector containing HLA-DRB3*02:232 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:232 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:232 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:233 Genomic Plasmid Vector	PHLAG825406814	Plasmid vector containing HLA-DRB3*02:233 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:233 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:233 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:234 Genomic Plasmid Vector	PHLAG825406815	Plasmid vector containing HLA-DRB3*02:234 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:234 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:234 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:235 Genomic Plasmid Vector	PHLAG82540686	Plasmid vector containing HLA-DRB3*02:235 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:235 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:235 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:236:01:01 Genomic Plasmid Vector	PHLAG82540687	Plasmid vector containing HLA-DRB3*02:236:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:236:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:236:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:236:01:02 Genomic Plasmid Vector	PHLAG82540688	Plasmid vector containing HLA-DRB3*02:236:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:236:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:236:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:237:01:01 Genomic Plasmid Vector	PHLAG82540689	Plasmid vector containing HLA-DRB3*02:237:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:237:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:237:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:237:01:02 Genomic Plasmid Vector	PHLAG82540690	Plasmid vector containing HLA-DRB3*02:237:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:237:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:237:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:24 Genomic Plasmid Vector	PHLAG82540691	Plasmid vector containing HLA-DRB3*02:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:24 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:25 Genomic Plasmid Vector	PHLAG82540692	Plasmid vector containing HLA-DRB3*02:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:25 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:26 Genomic Plasmid Vector	PHLAG82540693	Plasmid vector containing HLA-DRB3*02:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:26 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:27 Genomic Plasmid Vector	PHLAG82540694	Plasmid vector containing HLA-DRB3*02:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:27 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:28 Genomic Plasmid Vector	PHLAG82540695	Plasmid vector containing HLA-DRB3*02:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:28 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:29N Genomic Plasmid Vector	PHLAG82540696	Plasmid vector containing HLA-DRB3*02:29N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:29N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:29N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:30 Genomic Plasmid Vector	PHLAG82540697	Plasmid vector containing HLA-DRB3*02:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:30 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:31:01 Genomic Plasmid Vector	PHLAG82540698	Plasmid vector containing HLA-DRB3*02:31:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:31:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:31:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:31:02 Genomic Plasmid Vector	PHLAG82540699	Plasmid vector containing HLA-DRB3*02:31:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:31:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:31:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:32:01:01 Genomic Plasmid Vector	PHLAG825407000	Plasmid vector containing HLA-DRB3*02:32:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:32:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:32:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:32:01:02 Genomic Plasmid Vector	PHLAG825407001	Plasmid vector containing HLA-DRB3*02:32:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:32:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:32:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:33 Genomic Plasmid Vector	PHLAG825407002	Plasmid vector containing HLA-DRB3*02:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:33 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:34 Genomic Plasmid Vector	PHLAG82540703	Plasmid vector containing HLA-DRB3*02:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:34 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:35 Genomic Plasmid Vector	PHLAG82540704	Plasmid vector containing HLA-DRB3*02:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:35 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:36 Genomic Plasmid Vector	PHLAG82540705	Plasmid vector containing HLA-DRB3*02:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:36 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:37 Genomic Plasmid Vector	PHLAG82540706	Plasmid vector containing HLA-DRB3*02:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:37 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:38 Genomic Plasmid Vector	PHLAG82540707	Plasmid vector containing HLA-DRB3*02:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:38 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:39 Genomic Plasmid Vector	PHLAG82540708	Plasmid vector containing HLA-DRB3*02:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:39 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:40 Genomic Plasmid Vector	PHLAG82540709	Plasmid vector containing HLA-DRB3*02:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:40 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:41 Genomic Plasmid Vector	PHLAG82540710	Plasmid vector containing HLA-DRB3*02:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:41 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:42 Genomic Plasmid Vector	PHLAG82540711	Plasmid vector containing HLA-DRB3*02:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:42 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:43 Genomic Plasmid Vector	PHLAG82540712	Plasmid vector containing HLA-DRB3*02:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:43 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:44 Genomic Plasmid Vector	PHLAG82540713	Plasmid vector containing HLA-DRB3*02:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:44 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:45 Genomic Plasmid Vector	PHLAG82540714	Plasmid vector containing HLA-DRB3*02:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:45 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:46 Genomic Plasmid Vector	PHLAG82540715	Plasmid vector containing HLA-DRB3*02:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:46 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:47 Genomic Plasmid Vector	PHLAG82540716	Plasmid vector containing HLA-DRB3*02:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:47 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:48 Genomic Plasmid Vector	PHLAG82540717	Plasmid vector containing HLA-DRB3*02:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:48 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:49 Genomic Plasmid Vector	PHLAG82540718	Plasmid vector containing HLA-DRB3*02:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:49 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:50 Genomic Plasmid Vector	PHLAG82540719	Plasmid vector containing HLA-DRB3*02:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:50 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:51 Genomic Plasmid Vector	PHLAG82540720	Plasmid vector containing HLA-DRB3*02:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:51 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:52 Genomic Plasmid Vector	PHLAG82540721	Plasmid vector containing HLA-DRB3*02:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:52 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:53 Genomic Plasmid Vector	PHLAG82540722	Plasmid vector containing HLA-DRB3*02:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:53 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:54 Genomic Plasmid Vector	PHLAG82540723	Plasmid vector containing HLA-DRB3*02:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:54 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:55N Genomic Plasmid Vector	PHLAG82540724	Plasmid vector containing HLA-DRB3*02:55N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:55N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:55N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:56 Genomic Plasmid Vector	PHLAG82540725	Plasmid vector containing HLA-DRB3*02:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:56 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:57 Genomic Plasmid Vector	PHLAG82540726	Plasmid vector containing HLA-DRB3*02:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:57 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:58 Genomic Plasmid Vector	PHLAG82540727	Plasmid vector containing HLA-DRB3*02:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:58 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:59 Genomic Plasmid Vector	PHLAG82540728	Plasmid vector containing HLA-DRB3*02:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:59 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:60 Genomic Plasmid Vector	PHLAG82540729	Plasmid vector containing HLA-DRB3*02:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:60 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:61Q Genomic Plasmid Vector	PHLAG82540730	Plasmid vector containing HLA-DRB3*02:61Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:61Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:61Q protein under different cellular conditions.	Inquiry
HLA-DRB3*02:62 Genomic Plasmid Vector	PHLAG82540731	Plasmid vector containing HLA-DRB3*02:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:62 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:63 Genomic Plasmid Vector	PHLAG82540732	Plasmid vector containing HLA-DRB3*02:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:63 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:64 Genomic Plasmid Vector	PHLAG82540733	Plasmid vector containing HLA-DRB3*02:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:64 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:65 Genomic Plasmid Vector	PHLAG82540734	Plasmid vector containing HLA-DRB3*02:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:65 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:66 Genomic Plasmid Vector	PHLAG82540735	Plasmid vector containing HLA-DRB3*02:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:66 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:67N Genomic Plasmid Vector	PHLAG82540736	Plasmid vector containing HLA-DRB3*02:67N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:67N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:67N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:68 Genomic Plasmid Vector	PHLAG82540737	Plasmid vector containing HLA-DRB3*02:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:68 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:69 Genomic Plasmid Vector	PHLAG82540738	Plasmid vector containing HLA-DRB3*02:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:69 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:70 Genomic Plasmid Vector	PHLAG82540739	Plasmid vector containing HLA-DRB3*02:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:70 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:71 Genomic Plasmid Vector	PHLAG82540740	Plasmid vector containing HLA-DRB3*02:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:71 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:72 Genomic Plasmid Vector	PHLAG82540741	Plasmid vector containing HLA-DRB3*02:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:72 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:73 Genomic Plasmid Vector	PHLAG82540742	Plasmid vector containing HLA-DRB3*02:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:73 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:74 Genomic Plasmid Vector	PHLAG82540743	Plasmid vector containing HLA-DRB3*02:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:74 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:75 Genomic Plasmid Vector	PHLAG82540744	Plasmid vector containing HLA-DRB3*02:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:75 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:76 Genomic Plasmid Vector	PHLAG82540745	Plasmid vector containing HLA-DRB3*02:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:76 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:77 Genomic Plasmid Vector	PHLAG82540746	Plasmid vector containing HLA-DRB3*02:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:77 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:78 Genomic Plasmid Vector	PHLAG82540747	Plasmid vector containing HLA-DRB3*02:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:78 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:79 Genomic Plasmid Vector	PHLAG82540748	Plasmid vector containing HLA-DRB3*02:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:79 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:80:01N Genomic Plasmid Vector	PHLAG82540749	Plasmid vector containing HLA-DRB3*02:80:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:80:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:80:01N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:80:02N Genomic Plasmid Vector	PHLAG82540750	Plasmid vector containing HLA-DRB3*02:80:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:80:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:80:02N protein under different cellular conditions.	Inquiry
HLA-DRB3*02:81 Genomic Plasmid Vector	PHLAG82540751	Plasmid vector containing HLA-DRB3*02:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:81 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:82 Genomic Plasmid Vector	PHLAG82540752	Plasmid vector containing HLA-DRB3*02:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:82 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:83 Genomic Plasmid Vector	PHLAG82540753	Plasmid vector containing HLA-DRB3*02:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:83 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:84 Genomic Plasmid Vector	PHLAG82540754	Plasmid vector containing HLA-DRB3*02:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:84 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:85 Genomic Plasmid Vector	PHLAG82540755	Plasmid vector containing HLA-DRB3*02:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:85 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:86 Genomic Plasmid Vector	PHLAG82540756	Plasmid vector containing HLA-DRB3*02:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:86 protein under different cellular conditions.	Inquiry

HLA-DRB3*02:87 Genomic Plasmid Vector	PHLAG82540757	Plasmid vector containing HLA-DRB3*02:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:87 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:88 Genomic Plasmid Vector	PHLAG82540758	Plasmid vector containing HLA-DRB3*02:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:88 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:89 Genomic Plasmid Vector	PHLAG82540759	Plasmid vector containing HLA-DRB3*02:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:89 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:90 Genomic Plasmid Vector	PHLAG82540760	Plasmid vector containing HLA-DRB3*02:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:90 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:91 Genomic Plasmid Vector	PHLAG82540761	Plasmid vector containing HLA-DRB3*02:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:91 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:92 Genomic Plasmid Vector	PHLAG82540762	Plasmid vector containing HLA-DRB3*02:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:92 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:93 Genomic Plasmid Vector	PHLAG82540763	Plasmid vector containing HLA-DRB3*02:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:93 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:94 Genomic Plasmid Vector	PHLAG82540764	Plasmid vector containing HLA-DRB3*02:94 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:94 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:94 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:95N Genomic Plasmid Vector	PHLAG82540765	Plasmid vector containing HLA-DRB3*02:95N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:95N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:95N protein under different cellular conditions.	Inquiry

HLA-DRB3*02:96 Genomic Plasmid Vector	PHLAG82540766	Plasmid vector containing HLA-DRB3*02:96 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:96 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:96 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:97 Genomic Plasmid Vector	PHLAG82540767	Plasmid vector containing HLA-DRB3*02:97 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:97 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:97 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:98 Genomic Plasmid Vector	PHLAG82540768	Plasmid vector containing HLA-DRB3*02:98 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:98 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:98 protein under different cellular conditions.	Inquiry
HLA-DRB3*02:99 Genomic Plasmid Vector	PHLAG82540769	Plasmid vector containing HLA-DRB3*02:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*02:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*02:99 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:01:01 Genomic Plasmid Vector	PHLAG82540770	Plasmid vector containing HLA-DRB3*03:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:01:02 Genomic Plasmid Vector	PHLAG82540771	Plasmid vector containing HLA-DRB3*03:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:01:03 Genomic Plasmid Vector	PHLAG82540772	Plasmid vector containing HLA-DRB3*03:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:01:04 Genomic Plasmid Vector	PHLAG82540773	Plasmid vector containing HLA-DRB3*03:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:01:04 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:01:01:05 Genomic Plasmid Vector	PHLAG82540774	Plasmid vector containing HLA-DRB3*03:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:01:05 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:01:06 Genomic Plasmid Vector	PHLAG82540775	Plasmid vector containing HLA-DRB3*03:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:01:06 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:01:07 Genomic Plasmid Vector	PHLAG82540776	Plasmid vector containing HLA-DRB3*03:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:01:07 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:01:08 Genomic Plasmid Vector	PHLAG82540777	Plasmid vector containing HLA-DRB3*03:01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:01:08 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:01:09 Genomic Plasmid Vector	PHLAG82540778	Plasmid vector containing HLA-DRB3*03:01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:01:09 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:01:10 Genomic Plasmid Vector	PHLAG82540779	Plasmid vector containing HLA-DRB3*03:01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:01:10 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:02 Genomic Plasmid Vector	PHLAG82540780	Plasmid vector containing HLA-DRB3*03:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:03:01 Genomic Plasmid Vector	PHLAG82540781	Plasmid vector containing HLA-DRB3*03:01:03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:03:01 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:01:03:02 Genomic Plasmid Vector	PHLAG82540782	Plasmid vector containing HLA-DRB3*03:01:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:03:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:03:03 Genomic Plasmid Vector	PHLAG82540783	Plasmid vector containing HLA-DRB3*03:01:03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:03:03 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:04 Genomic Plasmid Vector	PHLAG82540784	Plasmid vector containing HLA-DRB3*03:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:04 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:05 Genomic Plasmid Vector	PHLAG82540785	Plasmid vector containing HLA-DRB3*03:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:05 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:06 Genomic Plasmid Vector	PHLAG82540786	Plasmid vector containing HLA-DRB3*03:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:06 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:07 Genomic Plasmid Vector	PHLAG82540787	Plasmid vector containing HLA-DRB3*03:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:07 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:08 Genomic Plasmid Vector	PHLAG82540788	Plasmid vector containing HLA-DRB3*03:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:08 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:09 Genomic Plasmid Vector	PHLAG82540789	Plasmid vector containing HLA-DRB3*03:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:09 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:10 Genomic Plasmid Vector	PHLAG82540790	Plasmid vector containing HLA-DRB3*03:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:10 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:01:11 Genomic Plasmid Vector	PHLAG82540791	Plasmid vector containing HLA-DRB3*03:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:11 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:12 Genomic Plasmid Vector	PHLAG82540792	Plasmid vector containing HLA-DRB3*03:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:12 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:13 Genomic Plasmid Vector	PHLAG82540793	Plasmid vector containing HLA-DRB3*03:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:13 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:14 Genomic Plasmid Vector	PHLAG82540794	Plasmid vector containing HLA-DRB3*03:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:14 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:15 Genomic Plasmid Vector	PHLAG82540795	Plasmid vector containing HLA-DRB3*03:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:15 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:16 Genomic Plasmid Vector	PHLAG82540796	Plasmid vector containing HLA-DRB3*03:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:16 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:17:01 Genomic Plasmid Vector	PHLAG82540797	Plasmid vector containing HLA-DRB3*03:01:17:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:17:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:17:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:17:02 Genomic Plasmid Vector	PHLAG82540798	Plasmid vector containing HLA-DRB3*03:01:17:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:17:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:17:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:18 Genomic Plasmid Vector	PHLAG82540799	Plasmid vector containing HLA-DRB3*03:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:18 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:01:19 Genomic Plasmid Vector	PHLAG82540800	Plasmid vector containing HLA-DRB3*03:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:19 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:20 Genomic Plasmid Vector	PHLAG82540801	Plasmid vector containing HLA-DRB3*03:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:20 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:01:21 Genomic Plasmid Vector	PHLAG82540802	Plasmid vector containing HLA-DRB3*03:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:01:21 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:02 Genomic Plasmid Vector	PHLAG82540803	Plasmid vector containing HLA-DRB3*03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:03 Genomic Plasmid Vector	PHLAG82540804	Plasmid vector containing HLA-DRB3*03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:03 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:04:01 Genomic Plasmid Vector	PHLAG82540805	Plasmid vector containing HLA-DRB3*03:04:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:04:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:04:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:04:02 Genomic Plasmid Vector	PHLAG82540806	Plasmid vector containing HLA-DRB3*03:04:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:04:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:04:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:05 Genomic Plasmid Vector	PHLAG82540807	Plasmid vector containing HLA-DRB3*03:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:05 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:06 Genomic Plasmid Vector	PHLAG82540808	Plasmid vector containing HLA-DRB3*03:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:06 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:07 Genomic Plasmid Vector	PHLAG82540809	Plasmid vector containing HLA-DRB3*03:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:07 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:08 Genomic Plasmid Vector	PHLAG82540810	Plasmid vector containing HLA-DRB3*03:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:08 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:09 Genomic Plasmid Vector	PHLAG82540811	Plasmid vector containing HLA-DRB3*03:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:09 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:10 Genomic Plasmid Vector	PHLAG82540812	Plasmid vector containing HLA-DRB3*03:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:10 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:11 Genomic Plasmid Vector	PHLAG82540813	Plasmid vector containing HLA-DRB3*03:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:11 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:12 Genomic Plasmid Vector	PHLAG82540814	Plasmid vector containing HLA-DRB3*03:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:12 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:13 Genomic Plasmid Vector	PHLAG82540815	Plasmid vector containing HLA-DRB3*03:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:13 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:14 Genomic Plasmid Vector	PHLAG82540816	Plasmid vector containing HLA-DRB3*03:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:14 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:15 Genomic Plasmid Vector	PHLAG82540817	Plasmid vector containing HLA-DRB3*03:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:15 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:16 Genomic Plasmid Vector	PHLAG82540818	Plasmid vector containing HLA-DRB3*03:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:16 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:17 Genomic Plasmid Vector	PHLAG82540819	Plasmid vector containing HLA-DRB3*03:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:17 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:18 Genomic Plasmid Vector	PHLAG82540820	Plasmid vector containing HLA-DRB3*03:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:18 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:19 Genomic Plasmid Vector	PHLAG82540821	Plasmid vector containing HLA-DRB3*03:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:19 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:20 Genomic Plasmid Vector	PHLAG82540822	Plasmid vector containing HLA-DRB3*03:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:20 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:21 Genomic Plasmid Vector	PHLAG82540823	Plasmid vector containing HLA-DRB3*03:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:21 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:22:01 Genomic Plasmid Vector	PHLAG82540824	Plasmid vector containing HLA-DRB3*03:22:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:22:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:22:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:22:02 Genomic Plasmid Vector	PHLAG82540825	Plasmid vector containing HLA-DRB3*03:22:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:22:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:22:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:23 Genomic Plasmid Vector	PHLAG82540826	Plasmid vector containing HLA-DRB3*03:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:23 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:24 Genomic Plasmid Vector	PHLAG82540827	Plasmid vector containing HLA-DRB3*03:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:24 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:25 Genomic Plasmid Vector	PHLAG82540828	Plasmid vector containing HLA-DRB3*03:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:25 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:26 Genomic Plasmid Vector	PHLAG82540829	Plasmid vector containing HLA-DRB3*03:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:26 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:27 Genomic Plasmid Vector	PHLAG82540830	Plasmid vector containing HLA-DRB3*03:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:27 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:28 Genomic Plasmid Vector	PHLAG82540831	Plasmid vector containing HLA-DRB3*03:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:28 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:29 Genomic Plasmid Vector	PHLAG82540832	Plasmid vector containing HLA-DRB3*03:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:29 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:30N Genomic Plasmid Vector	PHLAG82540833	Plasmid vector containing HLA-DRB3*03:30N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:30N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:30N protein under different cellular conditions.	Inquiry
HLA-DRB3*03:31 Genomic Plasmid Vector	PHLAG82540834	Plasmid vector containing HLA-DRB3*03:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:31 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:32 Genomic Plasmid Vector	PHLAG82540835	Plasmid vector containing HLA-DRB3*03:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:32 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:33 Genomic Plasmid Vector	PHLAG82540836	Plasmid vector containing HLA-DRB3*03:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:33 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:34 Genomic Plasmid Vector	PHLAG82540837	Plasmid vector containing HLA-DRB3*03:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:34 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:35 Genomic Plasmid Vector	PHLAG82540838	Plasmid vector containing HLA-DRB3*03:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:35 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:36 Genomic Plasmid Vector	PHLAG82540839	Plasmid vector containing HLA-DRB3*03:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:36 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:37 Genomic Plasmid Vector	PHLAG82540840	Plasmid vector containing HLA-DRB3*03:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:37 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:38 Genomic Plasmid Vector	PHLAG82540841	Plasmid vector containing HLA-DRB3*03:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:38 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:39 Genomic Plasmid Vector	PHLAG82540842	Plasmid vector containing HLA-DRB3*03:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:39 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:40 Genomic Plasmid Vector	PHLAG82540843	Plasmid vector containing HLA-DRB3*03:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:40 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:41 Genomic Plasmid Vector	PHLAG82540844	Plasmid vector containing HLA-DRB3*03:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:41 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:42 Genomic Plasmid Vector	PHLAG82540845	Plasmid vector containing HLA-DRB3*03:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:42 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:43 Genomic Plasmid Vector	PHLAG82540846	Plasmid vector containing HLA-DRB3*03:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:43 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:44 Genomic Plasmid Vector	PHLAG82540847	Plasmid vector containing HLA-DRB3*03:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:44 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:45 Genomic Plasmid Vector	PHLAG82540848	Plasmid vector containing HLA-DRB3*03:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:45 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:46 Genomic Plasmid Vector	PHLAG82540849	Plasmid vector containing HLA-DRB3*03:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:46 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:47 Genomic Plasmid Vector	PHLAG82540850	Plasmid vector containing HLA-DRB3*03:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:47 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:48 Genomic Plasmid Vector	PHLAG82540851	Plasmid vector containing HLA-DRB3*03:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:48 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:49 Genomic Plasmid Vector	PHLAG82540852	Plasmid vector containing HLA-DRB3*03:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:49 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:50 Genomic Plasmid Vector	PHLAG82540853	Plasmid vector containing HLA-DRB3*03:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:50 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:51 Genomic Plasmid Vector	PHLAG82540854	Plasmid vector containing HLA-DRB3*03:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:51 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:52 Genomic Plasmid Vector	PHLAG82540855	Plasmid vector containing HLA-DRB3*03:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:52 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:53 Genomic Plasmid Vector	PHLAG82540856	Plasmid vector containing HLA-DRB3*03:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:53 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:54 Genomic Plasmid Vector	PHLAG82540857	Plasmid vector containing HLA-DRB3*03:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:54 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:55 Genomic Plasmid Vector	PHLAG82540858	Plasmid vector containing HLA-DRB3*03:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:55 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:56 Genomic Plasmid Vector	PHLAG82540859	Plasmid vector containing HLA-DRB3*03:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:56 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:57Q Genomic Plasmid Vector	PHLAG82540860	Plasmid vector containing HLA-DRB3*03:57Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:57Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:57Q protein under different cellular conditions.	Inquiry
HLA-DRB3*03:58 Genomic Plasmid Vector	PHLAG82540861	Plasmid vector containing HLA-DRB3*03:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:58 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:59 Genomic Plasmid Vector	PHLAG82540862	Plasmid vector containing HLA-DRB3*03:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:59 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:60 Genomic Plasmid Vector	PHLAG82540863	Plasmid vector containing HLA-DRB3*03:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:60 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:61 Genomic Plasmid Vector	PHLAG82540864	Plasmid vector containing HLA-DRB3*03:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:61 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:62 Genomic Plasmid Vector	PHLAG82540865	Plasmid vector containing HLA-DRB3*03:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:62 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:63 Genomic Plasmid Vector	PHLAG82540866	Plasmid vector containing HLA-DRB3*03:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:63 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:64 Genomic Plasmid Vector	PHLAG82540867	Plasmid vector containing HLA-DRB3*03:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:64 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:65 Genomic Plasmid Vector	PHLAG82540868	Plasmid vector containing HLA-DRB3*03:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:65 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:66 Genomic Plasmid Vector	PHLAG82540869	Plasmid vector containing HLA-DRB3*03:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:66 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:67 Genomic Plasmid Vector	PHLAG82540870	Plasmid vector containing HLA-DRB3*03:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:67 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:68 Genomic Plasmid Vector	PHLAG82540871	Plasmid vector containing HLA-DRB3*03:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:68 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:69 Genomic Plasmid Vector	PHLAG82540872	Plasmid vector containing HLA-DRB3*03:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:69 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:70 Genomic Plasmid Vector	PHLAG82540873	Plasmid vector containing HLA-DRB3*03:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:70 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:71 Genomic Plasmid Vector	PHLAG82540874	Plasmid vector containing HLA-DRB3*03:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:71 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:72 Genomic Plasmid Vector	PHLAG82540875	Plasmid vector containing HLA-DRB3*03:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:72 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:73 Genomic Plasmid Vector	PHLAG82540876	Plasmid vector containing HLA-DRB3*03:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:73 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:74 Genomic Plasmid Vector	PHLAG82540877	Plasmid vector containing HLA-DRB3*03:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:74 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:75 Genomic Plasmid Vector	PHLAG82540878	Plasmid vector containing HLA-DRB3*03:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:75 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:76 Genomic Plasmid Vector	PHLAG82540879	Plasmid vector containing HLA-DRB3*03:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:76 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:77 Genomic Plasmid Vector	PHLAG82540880	Plasmid vector containing HLA-DRB3*03:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:77 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:78 Genomic Plasmid Vector	PHLAG82540881	Plasmid vector containing HLA-DRB3*03:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:78 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:79:01 Genomic Plasmid Vector	PHLAG82540882	Plasmid vector containing HLA-DRB3*03:79:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:79:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:79:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:79:02 Genomic Plasmid Vector	PHLAG82540883	Plasmid vector containing HLA-DRB3*03:79:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:79:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:79:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:79:03 Genomic Plasmid Vector	PHLAG82540884	Plasmid vector containing HLA-DRB3*03:79:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:79:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:79:03 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:80:01:01 Genomic Plasmid Vector	PHLAG82540885	Plasmid vector containing HLA-DRB3*03:80:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:80:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:80:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:80:01:02 Genomic Plasmid Vector	PHLAG82540886	Plasmid vector containing HLA-DRB3*03:80:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:80:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:80:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:80:02:01 Genomic Plasmid Vector	PHLAG82540887	Plasmid vector containing HLA-DRB3*03:80:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:80:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:80:02:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:80:02:02 Genomic Plasmid Vector	PHLAG82540888	Plasmid vector containing HLA-DRB3*03:80:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:80:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:80:02:02 protein under different cellular conditions.	Inquiry

HLA-DRB3*03:81:01:01 Genomic Plasmid Vector	PHLAG82540889	Plasmid vector containing HLA-DRB3*03:81:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:81:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:81:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:81:01:02 Genomic Plasmid Vector	PHLAG82540890	Plasmid vector containing HLA-DRB3*03:81:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:81:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:81:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:82 Genomic Plasmid Vector	PHLAG82540891	Plasmid vector containing HLA-DRB3*03:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:82 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:83 Genomic Plasmid Vector	PHLAG82540892	Plasmid vector containing HLA-DRB3*03:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:83 protein under different cellular conditions.	Inquiry
HLA-DRB3*03:84 Genomic Plasmid Vector	PHLAG82540893	Plasmid vector containing HLA-DRB3*03:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB3*03:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB3*03:84 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:01:01 Genomic Plasmid Vector	PHLAG82540894	Plasmid vector containing HLA-DRB4*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:01:03 Genomic Plasmid Vector	PHLAG82540895	Plasmid vector containing HLA-DRB4*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:01:04 Genomic Plasmid Vector	PHLAG82540896	Plasmid vector containing HLA-DRB4*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:01:04 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:01:01:05 Genomic Plasmid Vector	PHLAG82540897	Plasmid vector containing HLA-DRB4*01:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:01:05 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:01:06 Genomic Plasmid Vector	PHLAG82540898	Plasmid vector containing HLA-DRB4*01:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:01:06 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:01:07 Genomic Plasmid Vector	PHLAG82540899	Plasmid vector containing HLA-DRB4*01:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:01:07 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:02 Genomic Plasmid Vector	PHLAG825409000	Plasmid vector containing HLA-DRB4*01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:03 Genomic Plasmid Vector	PHLAG825409001	Plasmid vector containing HLA-DRB4*01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:04 Genomic Plasmid Vector	PHLAG825409002	Plasmid vector containing HLA-DRB4*01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:04 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:05 Genomic Plasmid Vector	PHLAG825409003	Plasmid vector containing HLA-DRB4*01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:05 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:06 Genomic Plasmid Vector	PHLAG825409004	Plasmid vector containing HLA-DRB4*01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:06 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:01:07 Genomic Plasmid Vector	PHLAG82540905	Plasmid vector containing HLA-DRB4*01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:07 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:08 Genomic Plasmid Vector	PHLAG82540906	Plasmid vector containing HLA-DRB4*01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:08 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:09 Genomic Plasmid Vector	PHLAG82540907	Plasmid vector containing HLA-DRB4*01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:09 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:10 Genomic Plasmid Vector	PHLAG82540908	Plasmid vector containing HLA-DRB4*01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:10 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:11 Genomic Plasmid Vector	PHLAG82540909	Plasmid vector containing HLA-DRB4*01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:11 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:12 Genomic Plasmid Vector	PHLAG82540910	Plasmid vector containing HLA-DRB4*01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:12 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:13 Genomic Plasmid Vector	PHLAG82540911	Plasmid vector containing HLA-DRB4*01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:13 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:14 Genomic Plasmid Vector	PHLAG82540912	Plasmid vector containing HLA-DRB4*01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:14 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:01:15 Genomic Plasmid Vector	PHLAG82540913	Plasmid vector containing HLA-DRB4*01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:15 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:01:16 Genomic Plasmid Vector	PHLAG82540914	Plasmid vector containing HLA-DRB4*01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:01:16 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:02:01:01 Genomic Plasmid Vector	PHLAG82540915	Plasmid vector containing HLA-DRB4*01:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:02:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:02:01:02 Genomic Plasmid Vector	PHLAG82540916	Plasmid vector containing HLA-DRB4*01:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:02:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:01 Genomic Plasmid Vector	PHLAG82540917	Plasmid vector containing HLA-DRB4*01:03:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:02N Genomic Plasmid Vector	PHLAG82540918	Plasmid vector containing HLA-DRB4*01:03:01:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:02N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:03 Genomic Plasmid Vector	PHLAG82540919	Plasmid vector containing HLA-DRB4*01:03:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:04 Genomic Plasmid Vector	PHLAG82540920	Plasmid vector containing HLA-DRB4*01:03:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:04 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:05 Genomic Plasmid Vector	PHLAG82540921	Plasmid vector containing HLA-DRB4*01:03:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:05 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:03:01:06 Genomic Plasmid Vector	PHLAG82540922	Plasmid vector containing HLA-DRB4*01:03:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:06 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:07 Genomic Plasmid Vector	PHLAG82540923	Plasmid vector containing HLA-DRB4*01:03:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:07 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:08 Genomic Plasmid Vector	PHLAG82540924	Plasmid vector containing HLA-DRB4*01:03:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:08 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:09 Genomic Plasmid Vector	PHLAG82540925	Plasmid vector containing HLA-DRB4*01:03:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:09 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:10 Genomic Plasmid Vector	PHLAG82540926	Plasmid vector containing HLA-DRB4*01:03:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:10 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:11 Genomic Plasmid Vector	PHLAG82540927	Plasmid vector containing HLA-DRB4*01:03:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:11 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:12 Genomic Plasmid Vector	PHLAG82540928	Plasmid vector containing HLA-DRB4*01:03:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:12 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:13N Genomic Plasmid Vector	PHLAG82540929	Plasmid vector containing HLA-DRB4*01:03:01:13N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:13N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:13N protein under different cellular conditions.	Inquiry

HLA-DRB4*01:03:01:14 Genomic Plasmid Vector	PHLAG82540930	Plasmid vector containing HLA-DRB4*01:03:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:14 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:15 Genomic Plasmid Vector	PHLAG82540931	Plasmid vector containing HLA-DRB4*01:03:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:15 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:16 Genomic Plasmid Vector	PHLAG82540932	Plasmid vector containing HLA-DRB4*01:03:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:16 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:17 Genomic Plasmid Vector	PHLAG82540933	Plasmid vector containing HLA-DRB4*01:03:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:17 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:18 Genomic Plasmid Vector	PHLAG82540934	Plasmid vector containing HLA-DRB4*01:03:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:18 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:19 Genomic Plasmid Vector	PHLAG82540935	Plasmid vector containing HLA-DRB4*01:03:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:19 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:20 Genomic Plasmid Vector	PHLAG82540936	Plasmid vector containing HLA-DRB4*01:03:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:20 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:21 Genomic Plasmid Vector	PHLAG82540937	Plasmid vector containing HLA-DRB4*01:03:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:21 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:03:01:22 Genomic Plasmid Vector	PHLAG82540938	Plasmid vector containing HLA-DRB4*01:03:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:22 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:23 Genomic Plasmid Vector	PHLAG82540939	Plasmid vector containing HLA-DRB4*01:03:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:23 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:24 Genomic Plasmid Vector	PHLAG82540940	Plasmid vector containing HLA-DRB4*01:03:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:24 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:25 Genomic Plasmid Vector	PHLAG82540941	Plasmid vector containing HLA-DRB4*01:03:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:25 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:26N Genomic Plasmid Vector	PHLAG82540942	Plasmid vector containing HLA-DRB4*01:03:01:26N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:26N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:26N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:27 Genomic Plasmid Vector	PHLAG82540943	Plasmid vector containing HLA-DRB4*01:03:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:27 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:28N Genomic Plasmid Vector	PHLAG82540944	Plasmid vector containing HLA-DRB4*01:03:01:28N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:28N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:28N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:29 Genomic Plasmid Vector	PHLAG82540945	Plasmid vector containing HLA-DRB4*01:03:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:29 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:03:01:30 Genomic Plasmid Vector	PHLAG82540946	Plasmid vector containing HLA-DRB4*01:03:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:30 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:01:31 Genomic Plasmid Vector	PHLAG82540947	Plasmid vector containing HLA-DRB4*01:03:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:01:31 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:02:01 Genomic Plasmid Vector	PHLAG82540948	Plasmid vector containing HLA-DRB4*01:03:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:02:01 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:02:02 Genomic Plasmid Vector	PHLAG82540949	Plasmid vector containing HLA-DRB4*01:03:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:02:02 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:02:03 Genomic Plasmid Vector	PHLAG82540950	Plasmid vector containing HLA-DRB4*01:03:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:02:03 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:02:04 Genomic Plasmid Vector	PHLAG82540951	Plasmid vector containing HLA-DRB4*01:03:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:02:04 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:02:05 Genomic Plasmid Vector	PHLAG82540952	Plasmid vector containing HLA-DRB4*01:03:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:02:05 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:02:06 Genomic Plasmid Vector	PHLAG82540953	Plasmid vector containing HLA-DRB4*01:03:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:02:06 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:03:02:07 Genomic Plasmid Vector	PHLAG82540954	Plasmid vector containing HLA-DRB4*01:03:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:02:07 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:02:08 Genomic Plasmid Vector	PHLAG82540955	Plasmid vector containing HLA-DRB4*01:03:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:02:08 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:02:09 Genomic Plasmid Vector	PHLAG82540956	Plasmid vector containing HLA-DRB4*01:03:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:02:09 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:02:10 Genomic Plasmid Vector	PHLAG82540957	Plasmid vector containing HLA-DRB4*01:03:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:02:10 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:03 Genomic Plasmid Vector	PHLAG82540958	Plasmid vector containing HLA-DRB4*01:03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:03 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:04 Genomic Plasmid Vector	PHLAG82540959	Plasmid vector containing HLA-DRB4*01:03:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:04 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:05 Genomic Plasmid Vector	PHLAG82540960	Plasmid vector containing HLA-DRB4*01:03:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:05 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:06 Genomic Plasmid Vector	PHLAG82540961	Plasmid vector containing HLA-DRB4*01:03:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:06 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:03:07 Genomic Plasmid Vector	PHLAG82540962	Plasmid vector containing HLA-DRB4*01:03:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:07 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:08 Genomic Plasmid Vector	PHLAG82540963	Plasmid vector containing HLA-DRB4*01:03:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:08 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:09 Genomic Plasmid Vector	PHLAG82540964	Plasmid vector containing HLA-DRB4*01:03:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:09 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:10 Genomic Plasmid Vector	PHLAG82540965	Plasmid vector containing HLA-DRB4*01:03:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:10 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:11 Genomic Plasmid Vector	PHLAG82540966	Plasmid vector containing HLA-DRB4*01:03:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:11 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:12 Genomic Plasmid Vector	PHLAG82540967	Plasmid vector containing HLA-DRB4*01:03:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:12 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:13 Genomic Plasmid Vector	PHLAG82540968	Plasmid vector containing HLA-DRB4*01:03:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:13 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:14 Genomic Plasmid Vector	PHLAG82540969	Plasmid vector containing HLA-DRB4*01:03:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:14 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:15 Genomic Plasmid Vector	PHLAG82540970	Plasmid vector containing HLA-DRB4*01:03:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:15 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:03:16 Genomic Plasmid Vector	PHLAG82540971	Plasmid vector containing HLA-DRB4*01:03:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:16 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:17 Genomic Plasmid Vector	PHLAG82540972	Plasmid vector containing HLA-DRB4*01:03:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:17 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:18 Genomic Plasmid Vector	PHLAG82540973	Plasmid vector containing HLA-DRB4*01:03:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:18 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:19 Genomic Plasmid Vector	PHLAG82540974	Plasmid vector containing HLA-DRB4*01:03:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:19 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:20 Genomic Plasmid Vector	PHLAG82540975	Plasmid vector containing HLA-DRB4*01:03:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:20 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:21 Genomic Plasmid Vector	PHLAG82540976	Plasmid vector containing HLA-DRB4*01:03:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:21 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:22 Genomic Plasmid Vector	PHLAG82540977	Plasmid vector containing HLA-DRB4*01:03:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:22 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:23 Genomic Plasmid Vector	PHLAG82540978	Plasmid vector containing HLA-DRB4*01:03:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:23 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:24 Genomic Plasmid Vector	PHLAG82540979	Plasmid vector containing HLA-DRB4*01:03:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:24 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:03:25 Genomic Plasmid Vector	PHLAG82540980	Plasmid vector containing HLA-DRB4*01:03:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:25 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:26 Genomic Plasmid Vector	PHLAG82540981	Plasmid vector containing HLA-DRB4*01:03:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:26 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:27 Genomic Plasmid Vector	PHLAG82540982	Plasmid vector containing HLA-DRB4*01:03:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:27 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:28 Genomic Plasmid Vector	PHLAG82540983	Plasmid vector containing HLA-DRB4*01:03:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:28 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:29 Genomic Plasmid Vector	PHLAG82540984	Plasmid vector containing HLA-DRB4*01:03:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:29 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:30 Genomic Plasmid Vector	PHLAG82540985	Plasmid vector containing HLA-DRB4*01:03:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:30 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:31 Genomic Plasmid Vector	PHLAG82540986	Plasmid vector containing HLA-DRB4*01:03:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:31 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:32 Genomic Plasmid Vector	PHLAG82540987	Plasmid vector containing HLA-DRB4*01:03:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:32 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:33 Genomic Plasmid Vector	PHLAG82540988	Plasmid vector containing HLA-DRB4*01:03:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:33 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:03:34 Genomic Plasmid Vector	PHLAG82540989	Plasmid vector containing HLA-DRB4*01:03:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:34 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:35 Genomic Plasmid Vector	PHLAG82540990	Plasmid vector containing HLA-DRB4*01:03:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:35 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:36 Genomic Plasmid Vector	PHLAG82540991	Plasmid vector containing HLA-DRB4*01:03:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:36 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:37 Genomic Plasmid Vector	PHLAG82540992	Plasmid vector containing HLA-DRB4*01:03:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:37 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:38 Genomic Plasmid Vector	PHLAG82540993	Plasmid vector containing HLA-DRB4*01:03:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:38 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:39 Genomic Plasmid Vector	PHLAG82540994	Plasmid vector containing HLA-DRB4*01:03:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:39 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:40 Genomic Plasmid Vector	PHLAG82540995	Plasmid vector containing HLA-DRB4*01:03:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:40 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:41N Genomic Plasmid Vector	PHLAG82540996	Plasmid vector containing HLA-DRB4*01:03:41N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:41N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:41N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:42 Genomic Plasmid Vector	PHLAG82540997	Plasmid vector containing HLA-DRB4*01:03:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:42 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:03:43 Genomic Plasmid Vector	PHLAG82540998	Plasmid vector containing HLA-DRB4*01:03:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:43 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:44 Genomic Plasmid Vector	PHLAG82540999	Plasmid vector containing HLA-DRB4*01:03:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:44 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:45 Genomic Plasmid Vector	PHLAG825410000	Plasmid vector containing HLA-DRB4*01:03:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:45 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:46 Genomic Plasmid Vector	PHLAG825410001	Plasmid vector containing HLA-DRB4*01:03:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:46 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:03:47 Genomic Plasmid Vector	PHLAG825410002	Plasmid vector containing HLA-DRB4*01:03:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:03:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:03:47 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:04 Genomic Plasmid Vector	PHLAG825410003	Plasmid vector containing HLA-DRB4*01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:04 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:05 Genomic Plasmid Vector	PHLAG825410004	Plasmid vector containing HLA-DRB4*01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:05 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:06 Genomic Plasmid Vector	PHLAG825410005	Plasmid vector containing HLA-DRB4*01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:06 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:07:01 Genomic Plasmid Vector	PHLAG825410006	Plasmid vector containing HLA-DRB4*01:07:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:07:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:07:01 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:07:02 Genomic Plasmid Vector	PHLAG82541007	Plasmid vector containing HLA-DRB4*01:07:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:07:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:07:02 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:08 Genomic Plasmid Vector	PHLAG82541008	Plasmid vector containing HLA-DRB4*01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:08 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:09 Genomic Plasmid Vector	PHLAG82541009	Plasmid vector containing HLA-DRB4*01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:09 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:10 Genomic Plasmid Vector	PHLAG82541010	Plasmid vector containing HLA-DRB4*01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:10 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:100 Genomic Plasmid Vector	PHLAG82541011	Plasmid vector containing HLA-DRB4*01:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:100 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:101 Genomic Plasmid Vector	PHLAG82541012	Plasmid vector containing HLA-DRB4*01:101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:101 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:102 Genomic Plasmid Vector	PHLAG82541013	Plasmid vector containing HLA-DRB4*01:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:102 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:103 Genomic Plasmid Vector	PHLAG82541014	Plasmid vector containing HLA-DRB4*01:103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:103 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:104 Genomic Plasmid Vector	PHLAG82541015	Plasmid vector containing HLA-DRB4*01:104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:104 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:105 Genomic Plasmid Vector	PHLAG82541016	Plasmid vector containing HLA-DRB4*01:105 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:105 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:105 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:106 Genomic Plasmid Vector	PHLAG82541017	Plasmid vector containing HLA-DRB4*01:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:106 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:107 Genomic Plasmid Vector	PHLAG82541018	Plasmid vector containing HLA-DRB4*01:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:107 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:108N Genomic Plasmid Vector	PHLAG82541019	Plasmid vector containing HLA-DRB4*01:108N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:108N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:108N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:109 Genomic Plasmid Vector	PHLAG82541020	Plasmid vector containing HLA-DRB4*01:109 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:109 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:109 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:11 Genomic Plasmid Vector	PHLAG82541021	Plasmid vector containing HLA-DRB4*01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:11 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:110 Genomic Plasmid Vector	PHLAG82541022	Plasmid vector containing HLA-DRB4*01:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:110 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:111 Genomic Plasmid Vector	PHLAG82541023	Plasmid vector containing HLA-DRB4*01:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:111 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:112 Genomic Plasmid Vector	PHLAG82541024	Plasmid vector containing HLA-DRB4*01:112 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:112 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:112 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:113N Genomic Plasmid Vector	PHLAG82541025	Plasmid vector containing HLA-DRB4*01:113N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:113N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:113N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:114 Genomic Plasmid Vector	PHLAG82541026	Plasmid vector containing HLA-DRB4*01:114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:114 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:115N Genomic Plasmid Vector	PHLAG82541027	Plasmid vector containing HLA-DRB4*01:115N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:115N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:115N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:116 Genomic Plasmid Vector	PHLAG82541028	Plasmid vector containing HLA-DRB4*01:116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:116 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:117 Genomic Plasmid Vector	PHLAG82541029	Plasmid vector containing HLA-DRB4*01:117 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:117 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:117 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:118 Genomic Plasmid Vector	PHLAG82541030	Plasmid vector containing HLA-DRB4*01:118 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:118 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:118 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:119 Genomic Plasmid Vector	PHLAG82541031	Plasmid vector containing HLA-DRB4*01:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:119 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:12 Genomic Plasmid Vector	PHLAG82541032	Plasmid vector containing HLA-DRB4*01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:12 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:120 Genomic Plasmid Vector	PHLAG82541033	Plasmid vector containing HLA-DRB4*01:120 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:120 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:120 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:121N Genomic Plasmid Vector	PHLAG82541034	Plasmid vector containing HLA-DRB4*01:121N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:121N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:121N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:122 Genomic Plasmid Vector	PHLAG82541035	Plasmid vector containing HLA-DRB4*01:122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:122 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:123 Genomic Plasmid Vector	PHLAG82541036	Plasmid vector containing HLA-DRB4*01:123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:123 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:124 Genomic Plasmid Vector	PHLAG82541037	Plasmid vector containing HLA-DRB4*01:124 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:124 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:124 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:125 Genomic Plasmid Vector	PHLAG82541038	Plasmid vector containing HLA-DRB4*01:125 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:125 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:125 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:126 Genomic Plasmid Vector	PHLAG82541039	Plasmid vector containing HLA-DRB4*01:126 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:126 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:126 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:127 Genomic Plasmid Vector	PHLAG82541040	Plasmid vector containing HLA-DRB4*01:127 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:127 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:127 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:128N Genomic Plasmid Vector	PHLAG82541041	Plasmid vector containing HLA-DRB4*01:128N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:128N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:128N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:129 Genomic Plasmid Vector	PHLAG82541042	Plasmid vector containing HLA-DRB4*01:129 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:129 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:129 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:13 Genomic Plasmid Vector	PHLAG82541043	Plasmid vector containing HLA-DRB4*01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:13 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:130 Genomic Plasmid Vector	PHLAG82541044	Plasmid vector containing HLA-DRB4*01:130 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:130 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:130 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:131 Genomic Plasmid Vector	PHLAG82541045	Plasmid vector containing HLA-DRB4*01:131 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:131 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:131 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:132 Genomic Plasmid Vector	PHLAG82541046	Plasmid vector containing HLA-DRB4*01:132 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:132 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:132 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:133 Genomic Plasmid Vector	PHLAG82541047	Plasmid vector containing HLA-DRB4*01:133 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:133 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:133 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:134 Genomic Plasmid Vector	PHLAG82541048	Plasmid vector containing HLA-DRB4*01:134 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:134 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:134 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:135 Genomic Plasmid Vector	PHLAG82541049	Plasmid vector containing HLA-DRB4*01:135 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:135 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:135 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:136 Genomic Plasmid Vector	PHLAG82541050	Plasmid vector containing HLA-DRB4*01:136 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:136 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:136 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:137 Genomic Plasmid Vector	PHLAG82541051	Plasmid vector containing HLA-DRB4*01:137 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:137 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:137 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:138 Genomic Plasmid Vector	PHLAG82541052	Plasmid vector containing HLA-DRB4*01:138 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:138 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:138 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:139 Genomic Plasmid Vector	PHLAG82541053	Plasmid vector containing HLA-DRB4*01:139 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:139 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:139 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:140 Genomic Plasmid Vector	PHLAG82541054	Plasmid vector containing HLA-DRB4*01:140 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:140 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:140 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:141 Genomic Plasmid Vector	PHLAG82541055	Plasmid vector containing HLA-DRB4*01:141 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:141 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:141 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:142 Genomic Plasmid Vector	PHLAG82541056	Plasmid vector containing HLA-DRB4*01:142 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:142 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:142 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:143 Genomic Plasmid Vector	PHLAG82541057	Plasmid vector containing HLA-DRB4*01:143 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:143 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:143 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:144 Genomic Plasmid Vector	PHLAG82541058	Plasmid vector containing HLA-DRB4*01:144 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:144 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:144 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:145N Genomic Plasmid Vector	PHLAG82541059	Plasmid vector containing HLA-DRB4*01:145N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:145N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:145N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:146 Genomic Plasmid Vector	PHLAG82541060	Plasmid vector containing HLA-DRB4*01:146 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:146 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:146 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:147 Genomic Plasmid Vector	PHLAG82541061	Plasmid vector containing HLA-DRB4*01:147 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:147 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:147 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:148 Genomic Plasmid Vector	PHLAG82541062	Plasmid vector containing HLA-DRB4*01:148 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:148 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:148 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:149N Genomic Plasmid Vector	PHLAG82541063	Plasmid vector containing HLA-DRB4*01:149N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:149N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:149N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:14N Genomic Plasmid Vector	PHLAG82541064	Plasmid vector containing HLA-DRB4*01:14N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:14N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:14N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:15 Genomic Plasmid Vector	PHLAG82541065	Plasmid vector containing HLA-DRB4*01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:15 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:150 Genomic Plasmid Vector	PHLAG82541066	Plasmid vector containing HLA-DRB4*01:150 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:150 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:150 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:151 Genomic Plasmid Vector	PHLAG82541067	Plasmid vector containing HLA-DRB4*01:151 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:151 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:151 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:152 Genomic Plasmid Vector	PHLAG82541068	Plasmid vector containing HLA-DRB4*01:152 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:152 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:152 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:153 Genomic Plasmid Vector	PHLAG82541069	Plasmid vector containing HLA-DRB4*01:153 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:153 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:153 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:154 Genomic Plasmid Vector	PHLAG82541070	Plasmid vector containing HLA-DRB4*01:154 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:154 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:154 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:155 Genomic Plasmid Vector	PHLAG82541071	Plasmid vector containing HLA-DRB4*01:155 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:155 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:155 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:156 Genomic Plasmid Vector	PHLAG82541072	Plasmid vector containing HLA-DRB4*01:156 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:156 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:156 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:157 Genomic Plasmid Vector	PHLAG82541073	Plasmid vector containing HLA-DRB4*01:157 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:157 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:157 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:158 Genomic Plasmid Vector	PHLAG82541074	Plasmid vector containing HLA-DRB4*01:158 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:158 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:158 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:159N Genomic Plasmid Vector	PHLAG82541075	Plasmid vector containing HLA-DRB4*01:159N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:159N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:159N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:160 Genomic Plasmid Vector	PHLAG82541076	Plasmid vector containing HLA-DRB4*01:160 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:160 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:160 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:161 Genomic Plasmid Vector	PHLAG82541077	Plasmid vector containing HLA-DRB4*01:161 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:161 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:161 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:162N Genomic Plasmid Vector	PHLAG82541078	Plasmid vector containing HLA-DRB4*01:162N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:162N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:162N protein under different cellular conditions.	Inquiry

HLA-DRB4*01:163 Genomic Plasmid Vector	PHLAG82541079	Plasmid vector containing HLA-DRB4*01:163 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:163 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:163 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:164 Genomic Plasmid Vector	PHLAG825410 80	Plasmid vector containing HLA-DRB4*01:164 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:164 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:164 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:165N Genomic Plasmid Vector	PHLAG825410 81	Plasmid vector containing HLA-DRB4*01:165N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:165N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:165N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:166 Genomic Plasmid Vector	PHLAG825410 82	Plasmid vector containing HLA-DRB4*01:166 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:166 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:166 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:167 Genomic Plasmid Vector	PHLAG825410 83	Plasmid vector containing HLA-DRB4*01:167 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:167 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:167 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:168 Genomic Plasmid Vector	PHLAG825410 84	Plasmid vector containing HLA-DRB4*01:168 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:168 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:168 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:169 Genomic Plasmid Vector	PHLAG825410 85	Plasmid vector containing HLA-DRB4*01:169 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:169 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:169 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:16N Genomic Plasmid Vector	PHLAG825410 86	Plasmid vector containing HLA-DRB4*01:16N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:16N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:16N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:17 Genomic Plasmid Vector	PHLAG825410 87	Plasmid vector containing HLA-DRB4*01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:17 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:170 Genomic Plasmid Vector	PHLAG82541088	Plasmid vector containing HLA-DRB4*01:170 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:170 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:170 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:171 Genomic Plasmid Vector	PHLAG82541089	Plasmid vector containing HLA-DRB4*01:171 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:171 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:171 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:172 Genomic Plasmid Vector	PHLAG82541090	Plasmid vector containing HLA-DRB4*01:172 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:172 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:172 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:173 Genomic Plasmid Vector	PHLAG82541091	Plasmid vector containing HLA-DRB4*01:173 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:173 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:173 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:174 Genomic Plasmid Vector	PHLAG82541092	Plasmid vector containing HLA-DRB4*01:174 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:174 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:174 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:175 Genomic Plasmid Vector	PHLAG82541093	Plasmid vector containing HLA-DRB4*01:175 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:175 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:175 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:176 Genomic Plasmid Vector	PHLAG82541094	Plasmid vector containing HLA-DRB4*01:176 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:176 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:176 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:177 Genomic Plasmid Vector	PHLAG82541095	Plasmid vector containing HLA-DRB4*01:177 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:177 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:177 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:178 Genomic Plasmid Vector	PHLAG82541096	Plasmid vector containing HLA-DRB4*01:178 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:178 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:178 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:179 Genomic Plasmid Vector	PHLAG82541097	Plasmid vector containing HLA-DRB4*01:179 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:179 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:179 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:18 Genomic Plasmid Vector	PHLAG82541098	Plasmid vector containing HLA-DRB4*01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:18 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:180 Genomic Plasmid Vector	PHLAG82541099	Plasmid vector containing HLA-DRB4*01:180 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:180 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:180 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:181 Genomic Plasmid Vector	PHLAG825411000	Plasmid vector containing HLA-DRB4*01:181 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:181 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:181 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:182 Genomic Plasmid Vector	PHLAG825411001	Plasmid vector containing HLA-DRB4*01:182 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:182 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:182 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:183 Genomic Plasmid Vector	PHLAG825411002	Plasmid vector containing HLA-DRB4*01:183 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:183 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:183 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:184 Genomic Plasmid Vector	PHLAG825411003	Plasmid vector containing HLA-DRB4*01:184 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:184 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:184 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:185 Genomic Plasmid Vector	PHLAG825411004	Plasmid vector containing HLA-DRB4*01:185 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:185 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:185 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:186 Genomic Plasmid Vector	PHLAG825411005	Plasmid vector containing HLA-DRB4*01:186 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:186 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:186 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:187 Genomic Plasmid Vector	PHLAG82541106	Plasmid vector containing HLA-DRB4*01:187 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:187 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:187 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:188 Genomic Plasmid Vector	PHLAG82541107	Plasmid vector containing HLA-DRB4*01:188 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:188 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:188 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:189 Genomic Plasmid Vector	PHLAG82541108	Plasmid vector containing HLA-DRB4*01:189 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:189 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:189 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:19 Genomic Plasmid Vector	PHLAG82541109	Plasmid vector containing HLA-DRB4*01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:19 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:190:01:01 Genomic Plasmid Vector	PHLAG82541110	Plasmid vector containing HLA-DRB4*01:190:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:190:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:190:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:190:01:02 Genomic Plasmid Vector	PHLAG82541111	Plasmid vector containing HLA-DRB4*01:190:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:190:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:190:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:191 Genomic Plasmid Vector	PHLAG82541112	Plasmid vector containing HLA-DRB4*01:191 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:191 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:191 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:192N Genomic Plasmid Vector	PHLAG82541113	Plasmid vector containing HLA-DRB4*01:192N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:192N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:192N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:193 Genomic Plasmid Vector	PHLAG82541114	Plasmid vector containing HLA-DRB4*01:193 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:193 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:193 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:194N Genomic Plasmid Vector	PHLAG82541115	Plasmid vector containing HLA-DRB4*01:194N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:194N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:194N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:195 Genomic Plasmid Vector	PHLAG82541116	Plasmid vector containing HLA-DRB4*01:195 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:195 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:195 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:196 Genomic Plasmid Vector	PHLAG82541117	Plasmid vector containing HLA-DRB4*01:196 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:196 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:196 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:197 Genomic Plasmid Vector	PHLAG82541118	Plasmid vector containing HLA-DRB4*01:197 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:197 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:197 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:198 Genomic Plasmid Vector	PHLAG82541119	Plasmid vector containing HLA-DRB4*01:198 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:198 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:198 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:199N Genomic Plasmid Vector	PHLAG82541120	Plasmid vector containing HLA-DRB4*01:199N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:199N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:199N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:20 Genomic Plasmid Vector	PHLAG82541121	Plasmid vector containing HLA-DRB4*01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:20 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:200 Genomic Plasmid Vector	PHLAG82541122	Plasmid vector containing HLA-DRB4*01:200 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:200 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:200 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:201 Genomic Plasmid Vector	PHLAG82541123	Plasmid vector containing HLA-DRB4*01:201 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:201 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:201 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:202 Genomic Plasmid Vector	PHLAG82541124	Plasmid vector containing HLA-DRB4*01:202 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:202 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:202 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:203N Genomic Plasmid Vector	PHLAG82541125	Plasmid vector containing HLA-DRB4*01:203N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:203N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:203N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:204 Genomic Plasmid Vector	PHLAG82541126	Plasmid vector containing HLA-DRB4*01:204 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:204 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:204 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:205 Genomic Plasmid Vector	PHLAG82541127	Plasmid vector containing HLA-DRB4*01:205 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:205 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:205 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:206 Genomic Plasmid Vector	PHLAG82541128	Plasmid vector containing HLA-DRB4*01:206 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:206 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:206 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:207 Genomic Plasmid Vector	PHLAG82541129	Plasmid vector containing HLA-DRB4*01:207 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:207 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:207 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:208 Genomic Plasmid Vector	PHLAG82541130	Plasmid vector containing HLA-DRB4*01:208 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:208 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:208 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:209 Genomic Plasmid Vector	PHLAG82541131	Plasmid vector containing HLA-DRB4*01:209 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:209 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:209 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:21 Genomic Plasmid Vector	PHLAG82541132	Plasmid vector containing HLA-DRB4*01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:21 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:210 Genomic Plasmid Vector	PHLAG82541133	Plasmid vector containing HLA-DRB4*01:210 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:210 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:210 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:211 Genomic Plasmid Vector	PHLAG82541134	Plasmid vector containing HLA-DRB4*01:211 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:211 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:211 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:212N Genomic Plasmid Vector	PHLAG82541135	Plasmid vector containing HLA-DRB4*01:212N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:212N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:212N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:213:01:01 Genomic Plasmid Vector	PHLAG82541136	Plasmid vector containing HLA-DRB4*01:213:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:213:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:213:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:213:01:02 Genomic Plasmid Vector	PHLAG82541137	Plasmid vector containing HLA-DRB4*01:213:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:213:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:213:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:22 Genomic Plasmid Vector	PHLAG82541138	Plasmid vector containing HLA-DRB4*01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:22 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:23 Genomic Plasmid Vector	PHLAG82541139	Plasmid vector containing HLA-DRB4*01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:23 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:24 Genomic Plasmid Vector	PHLAG82541140	Plasmid vector containing HLA-DRB4*01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:24 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:25 Genomic Plasmid Vector	PHLAG82541141	Plasmid vector containing HLA-DRB4*01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:25 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:26 Genomic Plasmid Vector	PHLAG82541142	Plasmid vector containing HLA-DRB4*01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:26 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:27 Genomic Plasmid Vector	PHLAG82541143	Plasmid vector containing HLA-DRB4*01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:27 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:28 Genomic Plasmid Vector	PHLAG82541144	Plasmid vector containing HLA-DRB4*01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:28 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:29 Genomic Plasmid Vector	PHLAG82541145	Plasmid vector containing HLA-DRB4*01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:29 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:30 Genomic Plasmid Vector	PHLAG82541146	Plasmid vector containing HLA-DRB4*01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:30 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:31 Genomic Plasmid Vector	PHLAG82541147	Plasmid vector containing HLA-DRB4*01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:31 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:32 Genomic Plasmid Vector	PHLAG82541148	Plasmid vector containing HLA-DRB4*01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:32 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:33 Genomic Plasmid Vector	PHLAG82541149	Plasmid vector containing HLA-DRB4*01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:33 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:34 Genomic Plasmid Vector	PHLAG82541150	Plasmid vector containing HLA-DRB4*01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:34 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:35 Genomic Plasmid Vector	PHLAG82541151	Plasmid vector containing HLA-DRB4*01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:35 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:36 Genomic Plasmid Vector	PHLAG82541152	Plasmid vector containing HLA-DRB4*01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:36 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:37 Genomic Plasmid Vector	PHLAG82541153	Plasmid vector containing HLA-DRB4*01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:37 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:38N Genomic Plasmid Vector	PHLAG82541154	Plasmid vector containing HLA-DRB4*01:38N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:38N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:38N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:39 Genomic Plasmid Vector	PHLAG82541155	Plasmid vector containing HLA-DRB4*01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:39 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:40 Genomic Plasmid Vector	PHLAG82541156	Plasmid vector containing HLA-DRB4*01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:40 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:41 Genomic Plasmid Vector	PHLAG82541157	Plasmid vector containing HLA-DRB4*01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:41 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:42 Genomic Plasmid Vector	PHLAG82541158	Plasmid vector containing HLA-DRB4*01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:42 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:43 Genomic Plasmid Vector	PHLAG82541159	Plasmid vector containing HLA-DRB4*01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:43 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:44 Genomic Plasmid Vector	PHLAG82541160	Plasmid vector containing HLA-DRB4*01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:44 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:45 Genomic Plasmid Vector	PHLAG82541161	Plasmid vector containing HLA-DRB4*01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:45 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:46 Genomic Plasmid Vector	PHLAG82541162	Plasmid vector containing HLA-DRB4*01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:46 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:47 Genomic Plasmid Vector	PHLAG82541163	Plasmid vector containing HLA-DRB4*01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:47 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:48 Genomic Plasmid Vector	PHLAG82541164	Plasmid vector containing HLA-DRB4*01:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:48 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:49 Genomic Plasmid Vector	PHLAG82541165	Plasmid vector containing HLA-DRB4*01:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:49 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:50 Genomic Plasmid Vector	PHLAG82541166	Plasmid vector containing HLA-DRB4*01:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:50 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:51 Genomic Plasmid Vector	PHLAG82541167	Plasmid vector containing HLA-DRB4*01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:51 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:52 Genomic Plasmid Vector	PHLAG82541168	Plasmid vector containing HLA-DRB4*01:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:52 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:53 Genomic Plasmid Vector	PHLAG82541169	Plasmid vector containing HLA-DRB4*01:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:53 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:54:01N Genomic Plasmid Vector	PHLAG82541170	Plasmid vector containing HLA-DRB4*01:54:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:54:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:54:01N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:54:02N Genomic Plasmid Vector	PHLAG82541171	Plasmid vector containing HLA-DRB4*01:54:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:54:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:54:02N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:55 Genomic Plasmid Vector	PHLAG82541172	Plasmid vector containing HLA-DRB4*01:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:55 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:56N Genomic Plasmid Vector	PHLAG82541173	Plasmid vector containing HLA-DRB4*01:56N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:56N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:56N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:57N Genomic Plasmid Vector	PHLAG82541174	Plasmid vector containing HLA-DRB4*01:57N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:57N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:57N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:58 Genomic Plasmid Vector	PHLAG82541175	Plasmid vector containing HLA-DRB4*01:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:58 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:59 Genomic Plasmid Vector	PHLAG82541176	Plasmid vector containing HLA-DRB4*01:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:59 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:60 Genomic Plasmid Vector	PHLAG82541177	Plasmid vector containing HLA-DRB4*01:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:60 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:61:01N Genomic Plasmid Vector	PHLAG82541178	Plasmid vector containing HLA-DRB4*01:61:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:61:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:61:01N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:61:02N Genomic Plasmid Vector	PHLAG82541179	Plasmid vector containing HLA-DRB4*01:61:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:61:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:61:02N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:62 Genomic Plasmid Vector	PHLAG82541180	Plasmid vector containing HLA-DRB4*01:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:62 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:63 Genomic Plasmid Vector	PHLAG82541181	Plasmid vector containing HLA-DRB4*01:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:63 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:64 Genomic Plasmid Vector	PHLAG82541182	Plasmid vector containing HLA-DRB4*01:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:64 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:65N Genomic Plasmid Vector	PHLAG82541183	Plasmid vector containing HLA-DRB4*01:65N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:65N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:65N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:66 Genomic Plasmid Vector	PHLAG82541184	Plasmid vector containing HLA-DRB4*01:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:66 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:67 Genomic Plasmid Vector	PHLAG82541185	Plasmid vector containing HLA-DRB4*01:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:67 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:68 Genomic Plasmid Vector	PHLAG82541186	Plasmid vector containing HLA-DRB4*01:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:68 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:69 Genomic Plasmid Vector	PHLAG82541187	Plasmid vector containing HLA-DRB4*01:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:69 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:70 Genomic Plasmid Vector	PHLAG82541188	Plasmid vector containing HLA-DRB4*01:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:70 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:71N Genomic Plasmid Vector	PHLAG82541189	Plasmid vector containing HLA-DRB4*01:71N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:71N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:71N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:72:01 Genomic Plasmid Vector	PHLAG82541190	Plasmid vector containing HLA-DRB4*01:72:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:72:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:72:01 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:72:02 Genomic Plasmid Vector	PHLAG82541191	Plasmid vector containing HLA-DRB4*01:72:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:72:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:72:02 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:73 Genomic Plasmid Vector	PHLAG82541192	Plasmid vector containing HLA-DRB4*01:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:73 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:74 Genomic Plasmid Vector	PHLAG82541193	Plasmid vector containing HLA-DRB4*01:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:74 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:75 Genomic Plasmid Vector	PHLAG82541194	Plasmid vector containing HLA-DRB4*01:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:75 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:76:01 Genomic Plasmid Vector	PHLAG82541195	Plasmid vector containing HLA-DRB4*01:76:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:76:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:76:01 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:76:02 Genomic Plasmid Vector	PHLAG82541196	Plasmid vector containing HLA-DRB4*01:76:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:76:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:76:02 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:77 Genomic Plasmid Vector	PHLAG82541197	Plasmid vector containing HLA-DRB4*01:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:77 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:78 Genomic Plasmid Vector	PHLAG82541198	Plasmid vector containing HLA-DRB4*01:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:78 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:79 Genomic Plasmid Vector	PHLAG82541199	Plasmid vector containing HLA-DRB4*01:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:79 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:80N Genomic Plasmid Vector	PHLAG82541200	Plasmid vector containing HLA-DRB4*01:80N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:80N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:80N protein under different cellular conditions.	Inquiry
HLA-DRB4*01:81 Genomic Plasmid Vector	PHLAG82541201	Plasmid vector containing HLA-DRB4*01:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:81 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:82 Genomic Plasmid Vector	PHLAG82541202	Plasmid vector containing HLA-DRB4*01:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:82 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:83 Genomic Plasmid Vector	PHLAG82541203	Plasmid vector containing HLA-DRB4*01:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:83 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:84N Genomic Plasmid Vector	PHLAG82541204	Plasmid vector containing HLA-DRB4*01:84N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:84N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:84N protein under different cellular conditions.	Inquiry

HLA-DRB4*01:85 Genomic Plasmid Vector	PHLAG82541205	Plasmid vector containing HLA-DRB4*01:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:85 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:86 Genomic Plasmid Vector	PHLAG82541206	Plasmid vector containing HLA-DRB4*01:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:86 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:87 Genomic Plasmid Vector	PHLAG82541207	Plasmid vector containing HLA-DRB4*01:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:87 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:88 Genomic Plasmid Vector	PHLAG82541208	Plasmid vector containing HLA-DRB4*01:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:88 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:89 Genomic Plasmid Vector	PHLAG82541209	Plasmid vector containing HLA-DRB4*01:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:89 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:90 Genomic Plasmid Vector	PHLAG825412110	Plasmid vector containing HLA-DRB4*01:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:90 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:91 Genomic Plasmid Vector	PHLAG825412111	Plasmid vector containing HLA-DRB4*01:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:91 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:92 Genomic Plasmid Vector	PHLAG825412112	Plasmid vector containing HLA-DRB4*01:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:92 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:93 Genomic Plasmid Vector	PHLAG825412113	Plasmid vector containing HLA-DRB4*01:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:93 protein under different cellular conditions.	Inquiry

HLA-DRB4*01:94 Genomic Plasmid Vector	PHLAG82541214	Plasmid vector containing HLA-DRB4*01:94 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:94 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:94 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:95 Genomic Plasmid Vector	PHLAG82541215	Plasmid vector containing HLA-DRB4*01:95 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:95 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:95 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:96 Genomic Plasmid Vector	PHLAG82541216	Plasmid vector containing HLA-DRB4*01:96 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:96 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:96 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:97 Genomic Plasmid Vector	PHLAG82541217	Plasmid vector containing HLA-DRB4*01:97 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:97 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:97 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:98 Genomic Plasmid Vector	PHLAG82541218	Plasmid vector containing HLA-DRB4*01:98 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:98 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:98 protein under different cellular conditions.	Inquiry
HLA-DRB4*01:99 Genomic Plasmid Vector	PHLAG82541219	Plasmid vector containing HLA-DRB4*01:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*01:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*01:99 protein under different cellular conditions.	Inquiry
HLA-DRB4*0101102N Genomic Plasmid Vector	PHLAG82541220	Plasmid vector containing HLA-DRB4*0101102N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*0101102N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*0101102N protein under different cellular conditions.	Inquiry
HLA-DRB4*02:01N Genomic Plasmid Vector	PHLAG82541221	Plasmid vector containing HLA-DRB4*02:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*02:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*02:01N protein under different cellular conditions.	Inquiry
HLA-DRB4*03:01N Genomic Plasmid Vector	PHLAG82541222	Plasmid vector containing HLA-DRB4*03:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB4*03:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB4*03:01N protein under different cellular conditions.	Inquiry

HLA-DRB5*01:01:01:01 Genomic Plasmid Vector	PHLAG82541223	Plasmid vector containing HLA-DRB5*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:02 Genomic Plasmid Vector	PHLAG82541224	Plasmid vector containing HLA-DRB5*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:03 Genomic Plasmid Vector	PHLAG82541225	Plasmid vector containing HLA-DRB5*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:04 Genomic Plasmid Vector	PHLAG82541226	Plasmid vector containing HLA-DRB5*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:04 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:05 Genomic Plasmid Vector	PHLAG82541227	Plasmid vector containing HLA-DRB5*01:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:05 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:06 Genomic Plasmid Vector	PHLAG82541228	Plasmid vector containing HLA-DRB5*01:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:06 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:07 Genomic Plasmid Vector	PHLAG82541229	Plasmid vector containing HLA-DRB5*01:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:07 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:08 Genomic Plasmid Vector	PHLAG82541230	Plasmid vector containing HLA-DRB5*01:01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:08 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:01:01:09 Genomic Plasmid Vector	PHLAG82541231	Plasmid vector containing HLA-DRB5*01:01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:09 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:10 Genomic Plasmid Vector	PHLAG82541232	Plasmid vector containing HLA-DRB5*01:01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:10 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:11 Genomic Plasmid Vector	PHLAG82541233	Plasmid vector containing HLA-DRB5*01:01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:11 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:12 Genomic Plasmid Vector	PHLAG82541234	Plasmid vector containing HLA-DRB5*01:01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:12 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:13 Genomic Plasmid Vector	PHLAG82541235	Plasmid vector containing HLA-DRB5*01:01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:13 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:14 Genomic Plasmid Vector	PHLAG82541236	Plasmid vector containing HLA-DRB5*01:01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:14 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:15 Genomic Plasmid Vector	PHLAG82541237	Plasmid vector containing HLA-DRB5*01:01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:15 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:01:16 Genomic Plasmid Vector	PHLAG82541238	Plasmid vector containing HLA-DRB5*01:01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:16 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:01:01:17 Genomic Plasmid Vector	PHLAG82541239	Plasmid vector containing HLA-DRB5*01:01:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:01:17 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:02 Genomic Plasmid Vector	PHLAG82541240	Plasmid vector containing HLA-DRB5*01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:03 Genomic Plasmid Vector	PHLAG82541241	Plasmid vector containing HLA-DRB5*01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:04 Genomic Plasmid Vector	PHLAG82541242	Plasmid vector containing HLA-DRB5*01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:04 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:05 Genomic Plasmid Vector	PHLAG82541243	Plasmid vector containing HLA-DRB5*01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:05 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:06 Genomic Plasmid Vector	PHLAG82541244	Plasmid vector containing HLA-DRB5*01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:06 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:07 Genomic Plasmid Vector	PHLAG82541245	Plasmid vector containing HLA-DRB5*01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:07 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:08 Genomic Plasmid Vector	PHLAG82541246	Plasmid vector containing HLA-DRB5*01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:08 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:09 Genomic Plasmid Vector	PHLAG82541247	Plasmid vector containing HLA-DRB5*01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:09 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:01:10 Genomic Plasmid Vector	PHLAG82541248	Plasmid vector containing HLA-DRB5*01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:10 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:11 Genomic Plasmid Vector	PHLAG82541249	Plasmid vector containing HLA-DRB5*01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:11 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:12 Genomic Plasmid Vector	PHLAG82541250	Plasmid vector containing HLA-DRB5*01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:12 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:13 Genomic Plasmid Vector	PHLAG82541251	Plasmid vector containing HLA-DRB5*01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:13 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:14 Genomic Plasmid Vector	PHLAG82541252	Plasmid vector containing HLA-DRB5*01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:14 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:15 Genomic Plasmid Vector	PHLAG82541253	Plasmid vector containing HLA-DRB5*01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:15 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:01:16 Genomic Plasmid Vector	PHLAG82541254	Plasmid vector containing HLA-DRB5*01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:01:16 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:02:01:01 Genomic Plasmid Vector	PHLAG82541255	Plasmid vector containing HLA-DRB5*01:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:02:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:02:01:02 Genomic Plasmid Vector	PHLAG82541256	Plasmid vector containing HLA-DRB5*01:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:02:01:02 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:02:01:03 Genomic Plasmid Vector	PHLAG82541257	Plasmid vector containing HLA-DRB5*01:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:02:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:02:01:04 Genomic Plasmid Vector	PHLAG82541258	Plasmid vector containing HLA-DRB5*01:02:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:02:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:02:01:04 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:02:01:05 Genomic Plasmid Vector	PHLAG82541259	Plasmid vector containing HLA-DRB5*01:02:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:02:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:02:01:05 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:02:02 Genomic Plasmid Vector	PHLAG825412600	Plasmid vector containing HLA-DRB5*01:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:02:02 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:02:03 Genomic Plasmid Vector	PHLAG825412601	Plasmid vector containing HLA-DRB5*01:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:02:03 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:02:04 Genomic Plasmid Vector	PHLAG825412602	Plasmid vector containing HLA-DRB5*01:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:02:04 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:02:05 Genomic Plasmid Vector	PHLAG825412603	Plasmid vector containing HLA-DRB5*01:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:02:05 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:02:06 Genomic Plasmid Vector	PHLAG825412604	Plasmid vector containing HLA-DRB5*01:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:02:06 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:03 Genomic Plasmid Vector	PHLAG82541265	Plasmid vector containing HLA-DRB5*01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:03 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:04 Genomic Plasmid Vector	PHLAG82541266	Plasmid vector containing HLA-DRB5*01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:04 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:05 Genomic Plasmid Vector	PHLAG82541267	Plasmid vector containing HLA-DRB5*01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:05 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:06 Genomic Plasmid Vector	PHLAG82541268	Plasmid vector containing HLA-DRB5*01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:06 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:07 Genomic Plasmid Vector	PHLAG82541269	Plasmid vector containing HLA-DRB5*01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:07 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:08:01N Genomic Plasmid Vector	PHLAG82541270	Plasmid vector containing HLA-DRB5*01:08:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:08:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:08:01N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:08:02N Genomic Plasmid Vector	PHLAG82541271	Plasmid vector containing HLA-DRB5*01:08:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:08:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:08:02N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:09 Genomic Plasmid Vector	PHLAG82541272	Plasmid vector containing HLA-DRB5*01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:09 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:100 Genomic Plasmid Vector	PHLAG82541273	Plasmid vector containing HLA-DRB5*01:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:100 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:101N Genomic Plasmid Vector	PHLAG82541274	Plasmid vector containing HLA-DRB5*01:101N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:101N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:101N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:102 Genomic Plasmid Vector	PHLAG82541275	Plasmid vector containing HLA-DRB5*01:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:102 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:103 Genomic Plasmid Vector	PHLAG82541276	Plasmid vector containing HLA-DRB5*01:103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:103 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:104 Genomic Plasmid Vector	PHLAG82541277	Plasmid vector containing HLA-DRB5*01:104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:104 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:105:01 Genomic Plasmid Vector	PHLAG82541278	Plasmid vector containing HLA-DRB5*01:105:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:105:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:105:01 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:105:02 Genomic Plasmid Vector	PHLAG82541279	Plasmid vector containing HLA-DRB5*01:105:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:105:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:105:02 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:106 Genomic Plasmid Vector	PHLAG82541280	Plasmid vector containing HLA-DRB5*01:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:106 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:107 Genomic Plasmid Vector	PHLAG82541281	Plasmid vector containing HLA-DRB5*01:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:107 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:108 Genomic Plasmid Vector	PHLAG82541282	Plasmid vector containing HLA-DRB5*01:108 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:108 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:108 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:109 Genomic Plasmid Vector	PHLAG82541283	Plasmid vector containing HLA-DRB5*01:109 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:109 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:109 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:10N Genomic Plasmid Vector	PHLAG82541284	Plasmid vector containing HLA-DRB5*01:10N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:10N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:10N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:11 Genomic Plasmid Vector	PHLAG82541285	Plasmid vector containing HLA-DRB5*01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:11 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:110 Genomic Plasmid Vector	PHLAG82541286	Plasmid vector containing HLA-DRB5*01:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:110 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:111 Genomic Plasmid Vector	PHLAG82541287	Plasmid vector containing HLA-DRB5*01:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:111 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:112 Genomic Plasmid Vector	PHLAG82541288	Plasmid vector containing HLA-DRB5*01:112 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:112 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:112 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:113 Genomic Plasmid Vector	PHLAG82541289	Plasmid vector containing HLA-DRB5*01:113 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:113 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:113 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:114 Genomic Plasmid Vector	PHLAG82541290	Plasmid vector containing HLA-DRB5*01:114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:114 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:115 Genomic Plasmid Vector	PHLAG82541291	Plasmid vector containing HLA-DRB5*01:115 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:115 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:115 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:116 Genomic Plasmid Vector	PHLAG82541292	Plasmid vector containing HLA-DRB5*01:116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:116 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:117 Genomic Plasmid Vector	PHLAG82541293	Plasmid vector containing HLA-DRB5*01:117 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:117 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:117 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:118 Genomic Plasmid Vector	PHLAG82541294	Plasmid vector containing HLA-DRB5*01:118 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:118 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:118 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:119 Genomic Plasmid Vector	PHLAG82541295	Plasmid vector containing HLA-DRB5*01:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:119 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:12 Genomic Plasmid Vector	PHLAG82541296	Plasmid vector containing HLA-DRB5*01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:12 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:120N Genomic Plasmid Vector	PHLAG82541297	Plasmid vector containing HLA-DRB5*01:120N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:120N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:120N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:121N Genomic Plasmid Vector	PHLAG82541298	Plasmid vector containing HLA-DRB5*01:121N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:121N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:121N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:122 Genomic Plasmid Vector	PHLAG82541299	Plasmid vector containing HLA-DRB5*01:122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:122 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:123 Genomic Plasmid Vector	PHLAG82541300	Plasmid vector containing HLA-DRB5*01:123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:123 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:124 Genomic Plasmid Vector	PHLAG82541301	Plasmid vector containing HLA-DRB5*01:124 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:124 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:124 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:125N Genomic Plasmid Vector	PHLAG82541302	Plasmid vector containing HLA-DRB5*01:125N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:125N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:125N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:126 Genomic Plasmid Vector	PHLAG82541303	Plasmid vector containing HLA-DRB5*01:126 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:126 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:126 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:127N Genomic Plasmid Vector	PHLAG82541304	Plasmid vector containing HLA-DRB5*01:127N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:127N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:127N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:128 Genomic Plasmid Vector	PHLAG82541305	Plasmid vector containing HLA-DRB5*01:128 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:128 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:128 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:129 Genomic Plasmid Vector	PHLAG82541306	Plasmid vector containing HLA-DRB5*01:129 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:129 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:129 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:13 Genomic Plasmid Vector	PHLAG82541307	Plasmid vector containing HLA-DRB5*01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:13 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:130 Genomic Plasmid Vector	PHLAG82541308	Plasmid vector containing HLA-DRB5*01:130 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:130 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:130 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:131N Genomic Plasmid Vector	PHLAG82541309	Plasmid vector containing HLA-DRB5*01:131N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:131N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:131N protein under different cellular conditions.	Inquiry

HLA-DRB5*01:132 Genomic Plasmid Vector	PHLAG82541310	Plasmid vector containing HLA-DRB5*01:132 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:132 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:132 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:133 Genomic Plasmid Vector	PHLAG82541311	Plasmid vector containing HLA-DRB5*01:133 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:133 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:133 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:134N Genomic Plasmid Vector	PHLAG82541312	Plasmid vector containing HLA-DRB5*01:134N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:134N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:134N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:135 Genomic Plasmid Vector	PHLAG82541313	Plasmid vector containing HLA-DRB5*01:135 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:135 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:135 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:136 Genomic Plasmid Vector	PHLAG82541314	Plasmid vector containing HLA-DRB5*01:136 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:136 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:136 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:137 Genomic Plasmid Vector	PHLAG82541315	Plasmid vector containing HLA-DRB5*01:137 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:137 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:137 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:138 Genomic Plasmid Vector	PHLAG82541316	Plasmid vector containing HLA-DRB5*01:138 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:138 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:138 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:139 Genomic Plasmid Vector	PHLAG82541317	Plasmid vector containing HLA-DRB5*01:139 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:139 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:139 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:14 Genomic Plasmid Vector	PHLAG82541318	Plasmid vector containing HLA-DRB5*01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:14 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:140 Genomic Plasmid Vector	PHLAG82541319	Plasmid vector containing HLA-DRB5*01:140 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:140 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:140 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:141 Genomic Plasmid Vector	PHLAG825413220	Plasmid vector containing HLA-DRB5*01:141 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:141 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:141 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:142 Genomic Plasmid Vector	PHLAG825413221	Plasmid vector containing HLA-DRB5*01:142 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:142 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:142 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:143 Genomic Plasmid Vector	PHLAG825413222	Plasmid vector containing HLA-DRB5*01:143 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:143 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:143 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:144N Genomic Plasmid Vector	PHLAG825413223	Plasmid vector containing HLA-DRB5*01:144N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:144N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:144N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:145N Genomic Plasmid Vector	PHLAG825413224	Plasmid vector containing HLA-DRB5*01:145N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:145N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:145N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:146 Genomic Plasmid Vector	PHLAG825413225	Plasmid vector containing HLA-DRB5*01:146 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:146 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:146 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:147 Genomic Plasmid Vector	PHLAG825413226	Plasmid vector containing HLA-DRB5*01:147 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:147 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:147 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:148 Genomic Plasmid Vector	PHLAG825413227	Plasmid vector containing HLA-DRB5*01:148 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:148 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:148 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:149 Genomic Plasmid Vector	PHLAG82541328	Plasmid vector containing HLA-DRB5*01:149 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:149 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:149 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:15 Genomic Plasmid Vector	PHLAG82541329	Plasmid vector containing HLA-DRB5*01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:15 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:150 Genomic Plasmid Vector	PHLAG82541330	Plasmid vector containing HLA-DRB5*01:150 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:150 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:150 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:151 Genomic Plasmid Vector	PHLAG82541331	Plasmid vector containing HLA-DRB5*01:151 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:151 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:151 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:152 Genomic Plasmid Vector	PHLAG82541332	Plasmid vector containing HLA-DRB5*01:152 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:152 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:152 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:153 Genomic Plasmid Vector	PHLAG82541333	Plasmid vector containing HLA-DRB5*01:153 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:153 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:153 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:154 Genomic Plasmid Vector	PHLAG82541334	Plasmid vector containing HLA-DRB5*01:154 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:154 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:154 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:155 Genomic Plasmid Vector	PHLAG82541335	Plasmid vector containing HLA-DRB5*01:155 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:155 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:155 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:156 Genomic Plasmid Vector	PHLAG82541336	Plasmid vector containing HLA-DRB5*01:156 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:156 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:156 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:157:01:01 Genomic Plasmid Vector	PHLAG82541337	Plasmid vector containing HLA-DRB5*01:157:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:157:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:157:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:157:01:02 Genomic Plasmid Vector	PHLAG82541338	Plasmid vector containing HLA-DRB5*01:157:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:157:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:157:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:16 Genomic Plasmid Vector	PHLAG82541339	Plasmid vector containing HLA-DRB5*01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:16 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:17 Genomic Plasmid Vector	PHLAG825413410	Plasmid vector containing HLA-DRB5*01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:17 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:18 Genomic Plasmid Vector	PHLAG825413411	Plasmid vector containing HLA-DRB5*01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:18 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:19 Genomic Plasmid Vector	PHLAG825413412	Plasmid vector containing HLA-DRB5*01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:19 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:20 Genomic Plasmid Vector	PHLAG825413413	Plasmid vector containing HLA-DRB5*01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:20 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:21 Genomic Plasmid Vector	PHLAG825413414	Plasmid vector containing HLA-DRB5*01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:21 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:22:01 Genomic Plasmid Vector	PHLAG825413415	Plasmid vector containing HLA-DRB5*01:22:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:22:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:22:01 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:22:02 Genomic Plasmid Vector	PHLAG82541346	Plasmid vector containing HLA-DRB5*01:22:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:22:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:22:02 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:23 Genomic Plasmid Vector	PHLAG82541347	Plasmid vector containing HLA-DRB5*01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:23 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:24 Genomic Plasmid Vector	PHLAG82541348	Plasmid vector containing HLA-DRB5*01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:24 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:25 Genomic Plasmid Vector	PHLAG82541349	Plasmid vector containing HLA-DRB5*01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:25 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:26 Genomic Plasmid Vector	PHLAG82541350	Plasmid vector containing HLA-DRB5*01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:26 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:27N Genomic Plasmid Vector	PHLAG82541351	Plasmid vector containing HLA-DRB5*01:27N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:27N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:27N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:28 Genomic Plasmid Vector	PHLAG82541352	Plasmid vector containing HLA-DRB5*01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:28 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:29 Genomic Plasmid Vector	PHLAG82541353	Plasmid vector containing HLA-DRB5*01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:29 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:30 Genomic Plasmid Vector	PHLAG82541354	Plasmid vector containing HLA-DRB5*01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:30 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:31 Genomic Plasmid Vector	PHLAG82541355	Plasmid vector containing HLA-DRB5*01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:31 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:32 Genomic Plasmid Vector	PHLAG82541356	Plasmid vector containing HLA-DRB5*01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:32 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:33 Genomic Plasmid Vector	PHLAG82541357	Plasmid vector containing HLA-DRB5*01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:33 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:34 Genomic Plasmid Vector	PHLAG82541358	Plasmid vector containing HLA-DRB5*01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:34 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:35 Genomic Plasmid Vector	PHLAG82541359	Plasmid vector containing HLA-DRB5*01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:35 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:36 Genomic Plasmid Vector	PHLAG825413600	Plasmid vector containing HLA-DRB5*01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:36 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:37 Genomic Plasmid Vector	PHLAG825413601	Plasmid vector containing HLA-DRB5*01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:37 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:38 Genomic Plasmid Vector	PHLAG825413602	Plasmid vector containing HLA-DRB5*01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:38 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:39 Genomic Plasmid Vector	PHLAG825413603	Plasmid vector containing HLA-DRB5*01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:39 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:40 Genomic Plasmid Vector	PHLAG82541364	Plasmid vector containing HLA-DRB5*01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:40 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:41 Genomic Plasmid Vector	PHLAG82541365	Plasmid vector containing HLA-DRB5*01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:41 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:42 Genomic Plasmid Vector	PHLAG82541366	Plasmid vector containing HLA-DRB5*01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:42 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:43 Genomic Plasmid Vector	PHLAG82541367	Plasmid vector containing HLA-DRB5*01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:43 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:44 Genomic Plasmid Vector	PHLAG82541368	Plasmid vector containing HLA-DRB5*01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:44 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:45 Genomic Plasmid Vector	PHLAG82541369	Plasmid vector containing HLA-DRB5*01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:45 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:46 Genomic Plasmid Vector	PHLAG82541370	Plasmid vector containing HLA-DRB5*01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:46 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:47 Genomic Plasmid Vector	PHLAG82541371	Plasmid vector containing HLA-DRB5*01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:47 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:48N Genomic Plasmid Vector	PHLAG82541372	Plasmid vector containing HLA-DRB5*01:48N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:48N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:48N protein under different cellular conditions.	Inquiry

HLA-DRB5*01:49N Genomic Plasmid Vector	PHLAG82541373	Plasmid vector containing HLA-DRB5*01:49N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:49N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:49N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:50 Genomic Plasmid Vector	PHLAG82541374	Plasmid vector containing HLA-DRB5*01:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:50 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:51 Genomic Plasmid Vector	PHLAG82541375	Plasmid vector containing HLA-DRB5*01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:51 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:52N Genomic Plasmid Vector	PHLAG82541376	Plasmid vector containing HLA-DRB5*01:52N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:52N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:52N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:53N Genomic Plasmid Vector	PHLAG82541377	Plasmid vector containing HLA-DRB5*01:53N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:53N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:53N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:54 Genomic Plasmid Vector	PHLAG82541378	Plasmid vector containing HLA-DRB5*01:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:54 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:55 Genomic Plasmid Vector	PHLAG82541379	Plasmid vector containing HLA-DRB5*01:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:55 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:56 Genomic Plasmid Vector	PHLAG82541380	Plasmid vector containing HLA-DRB5*01:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:56 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:57 Genomic Plasmid Vector	PHLAG82541381	Plasmid vector containing HLA-DRB5*01:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:57 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:58N Genomic Plasmid Vector	PHLAG82541382	Plasmid vector containing HLA-DRB5*01:58N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:58N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:58N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:59 Genomic Plasmid Vector	PHLAG82541383	Plasmid vector containing HLA-DRB5*01:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:59 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:60 Genomic Plasmid Vector	PHLAG82541384	Plasmid vector containing HLA-DRB5*01:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:60 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:61 Genomic Plasmid Vector	PHLAG82541385	Plasmid vector containing HLA-DRB5*01:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:61 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:62 Genomic Plasmid Vector	PHLAG82541386	Plasmid vector containing HLA-DRB5*01:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:62 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:63:01 Genomic Plasmid Vector	PHLAG82541387	Plasmid vector containing HLA-DRB5*01:63:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:63:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:63:01 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:63:02 Genomic Plasmid Vector	PHLAG82541388	Plasmid vector containing HLA-DRB5*01:63:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:63:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:63:02 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:64 Genomic Plasmid Vector	PHLAG82541389	Plasmid vector containing HLA-DRB5*01:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:64 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:65 Genomic Plasmid Vector	PHLAG82541390	Plasmid vector containing HLA-DRB5*01:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:65 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:66 Genomic Plasmid Vector	PHLAG82541391	Plasmid vector containing HLA-DRB5*01:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:66 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:67N Genomic Plasmid Vector	PHLAG82541392	Plasmid vector containing HLA-DRB5*01:67N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:67N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:67N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:68N Genomic Plasmid Vector	PHLAG82541393	Plasmid vector containing HLA-DRB5*01:68N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:68N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:68N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:69 Genomic Plasmid Vector	PHLAG82541394	Plasmid vector containing HLA-DRB5*01:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:69 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:70 Genomic Plasmid Vector	PHLAG82541395	Plasmid vector containing HLA-DRB5*01:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:70 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:71N Genomic Plasmid Vector	PHLAG82541396	Plasmid vector containing HLA-DRB5*01:71N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:71N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:71N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:72 Genomic Plasmid Vector	PHLAG82541397	Plasmid vector containing HLA-DRB5*01:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:72 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:73 Genomic Plasmid Vector	PHLAG82541398	Plasmid vector containing HLA-DRB5*01:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:73 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:74 Genomic Plasmid Vector	PHLAG82541399	Plasmid vector containing HLA-DRB5*01:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:74 protein under different cellular conditions.	Inquiry

HLA-DRB5*01:75 Genomic Plasmid Vector	PHLAG82541400	Plasmid vector containing HLA-DRB5*01:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:75 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:76 Genomic Plasmid Vector	PHLAG82541401	Plasmid vector containing HLA-DRB5*01:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:76 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:77 Genomic Plasmid Vector	PHLAG82541402	Plasmid vector containing HLA-DRB5*01:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:77 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:78 Genomic Plasmid Vector	PHLAG82541403	Plasmid vector containing HLA-DRB5*01:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:78 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:79Q Genomic Plasmid Vector	PHLAG82541404	Plasmid vector containing HLA-DRB5*01:79Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:79Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:79Q protein under different cellular conditions.	Inquiry
HLA-DRB5*01:80 Genomic Plasmid Vector	PHLAG82541405	Plasmid vector containing HLA-DRB5*01:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:80 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:81N Genomic Plasmid Vector	PHLAG82541406	Plasmid vector containing HLA-DRB5*01:81N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:81N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:81N protein under different cellular conditions.	Inquiry
HLA-DRB5*01:82 Genomic Plasmid Vector	PHLAG82541407	Plasmid vector containing HLA-DRB5*01:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:82 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:83N Genomic Plasmid Vector	PHLAG82541408	Plasmid vector containing HLA-DRB5*01:83N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:83N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:83N protein under different cellular conditions.	Inquiry

HLA-DRB5*01:84 Genomic Plasmid Vector	PHLAG82541409	Plasmid vector containing HLA-DRB5*01:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:84 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:85 Genomic Plasmid Vector	PHLAG825414110	Plasmid vector containing HLA-DRB5*01:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:85 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:86 Genomic Plasmid Vector	PHLAG825414111	Plasmid vector containing HLA-DRB5*01:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:86 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:87 Genomic Plasmid Vector	PHLAG825414112	Plasmid vector containing HLA-DRB5*01:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:87 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:88 Genomic Plasmid Vector	PHLAG825414113	Plasmid vector containing HLA-DRB5*01:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:88 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:89 Genomic Plasmid Vector	PHLAG825414114	Plasmid vector containing HLA-DRB5*01:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:89 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:90 Genomic Plasmid Vector	PHLAG825414115	Plasmid vector containing HLA-DRB5*01:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:90 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:91 Genomic Plasmid Vector	PHLAG825414116	Plasmid vector containing HLA-DRB5*01:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:91 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:92N Genomic Plasmid Vector	PHLAG825414117	Plasmid vector containing HLA-DRB5*01:92N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:92N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:92N protein under different cellular conditions.	Inquiry

HLA-DRB5*01:93 Genomic Plasmid Vector	PHLAG82541418	Plasmid vector containing HLA-DRB5*01:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:93 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:94 Genomic Plasmid Vector	PHLAG82541419	Plasmid vector containing HLA-DRB5*01:94 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:94 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:94 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:95 Genomic Plasmid Vector	PHLAG82541420	Plasmid vector containing HLA-DRB5*01:95 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:95 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:95 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:96 Genomic Plasmid Vector	PHLAG82541421	Plasmid vector containing HLA-DRB5*01:96 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:96 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:96 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:97 Genomic Plasmid Vector	PHLAG82541422	Plasmid vector containing HLA-DRB5*01:97 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:97 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:97 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:98 Genomic Plasmid Vector	PHLAG82541423	Plasmid vector containing HLA-DRB5*01:98 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:98 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:98 protein under different cellular conditions.	Inquiry
HLA-DRB5*01:99 Genomic Plasmid Vector	PHLAG82541424	Plasmid vector containing HLA-DRB5*01:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*01:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*01:99 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:02:01:01 Genomic Plasmid Vector	PHLAG82541425	Plasmid vector containing HLA-DRB5*02:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:02:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:02:01:02 Genomic Plasmid Vector	PHLAG82541426	Plasmid vector containing HLA-DRB5*02:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:02:01:02 protein under different cellular conditions.	Inquiry

HLA-DRB5*02:02:02 Genomic Plasmid Vector	PHLAG82541427	Plasmid vector containing HLA-DRB5*02:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:02:02 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:02:03 Genomic Plasmid Vector	PHLAG82541428	Plasmid vector containing HLA-DRB5*02:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:02:03 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:02:04 Genomic Plasmid Vector	PHLAG82541429	Plasmid vector containing HLA-DRB5*02:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:02:04 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:02:05 Genomic Plasmid Vector	PHLAG82541430	Plasmid vector containing HLA-DRB5*02:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:02:05 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:03 Genomic Plasmid Vector	PHLAG82541431	Plasmid vector containing HLA-DRB5*02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:03 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:04 Genomic Plasmid Vector	PHLAG82541432	Plasmid vector containing HLA-DRB5*02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:04 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:05 Genomic Plasmid Vector	PHLAG82541433	Plasmid vector containing HLA-DRB5*02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:05 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:06 Genomic Plasmid Vector	PHLAG82541434	Plasmid vector containing HLA-DRB5*02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:06 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:07 Genomic Plasmid Vector	PHLAG82541435	Plasmid vector containing HLA-DRB5*02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:07 protein under different cellular conditions.	Inquiry

HLA-DRB5*02:08 Genomic Plasmid Vector	PHLAG82541436	Plasmid vector containing HLA-DRB5*02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:08 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:09 Genomic Plasmid Vector	PHLAG82541437	Plasmid vector containing HLA-DRB5*02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:09 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:10 Genomic Plasmid Vector	PHLAG82541438	Plasmid vector containing HLA-DRB5*02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:10 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:11 Genomic Plasmid Vector	PHLAG82541439	Plasmid vector containing HLA-DRB5*02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:11 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:12 Genomic Plasmid Vector	PHLAG82541440	Plasmid vector containing HLA-DRB5*02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:12 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:13 Genomic Plasmid Vector	PHLAG82541441	Plasmid vector containing HLA-DRB5*02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:13 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:14 Genomic Plasmid Vector	PHLAG82541442	Plasmid vector containing HLA-DRB5*02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:14 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:15 Genomic Plasmid Vector	PHLAG82541443	Plasmid vector containing HLA-DRB5*02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:15 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:16 Genomic Plasmid Vector	PHLAG82541444	Plasmid vector containing HLA-DRB5*02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:16 protein under different cellular conditions.	Inquiry

HLA-DRB5*02:17 Genomic Plasmid Vector	PHLAG82541445	Plasmid vector containing HLA-DRB5*02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:17 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:18 Genomic Plasmid Vector	PHLAG82541446	Plasmid vector containing HLA-DRB5*02:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:18 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:19N Genomic Plasmid Vector	PHLAG82541447	Plasmid vector containing HLA-DRB5*02:19N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:19N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:19N protein under different cellular conditions.	Inquiry
HLA-DRB5*02:20 Genomic Plasmid Vector	PHLAG82541448	Plasmid vector containing HLA-DRB5*02:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:20 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:21:01 Genomic Plasmid Vector	PHLAG82541449	Plasmid vector containing HLA-DRB5*02:21:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:21:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:21:01 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:21:02 Genomic Plasmid Vector	PHLAG82541450	Plasmid vector containing HLA-DRB5*02:21:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:21:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:21:02 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:22 Genomic Plasmid Vector	PHLAG82541451	Plasmid vector containing HLA-DRB5*02:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:22 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:23 Genomic Plasmid Vector	PHLAG82541452	Plasmid vector containing HLA-DRB5*02:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:23 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:24 Genomic Plasmid Vector	PHLAG82541453	Plasmid vector containing HLA-DRB5*02:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:24 protein under different cellular conditions.	Inquiry

HLA-DRB5*02:25N Genomic Plasmid Vector	PHLAG82541454	Plasmid vector containing HLA-DRB5*02:25N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:25N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:25N protein under different cellular conditions.	Inquiry
HLA-DRB5*02:26N Genomic Plasmid Vector	PHLAG82541455	Plasmid vector containing HLA-DRB5*02:26N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:26N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:26N protein under different cellular conditions.	Inquiry
HLA-DRB5*02:27 Genomic Plasmid Vector	PHLAG82541456	Plasmid vector containing HLA-DRB5*02:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:27 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:28 Genomic Plasmid Vector	PHLAG82541457	Plasmid vector containing HLA-DRB5*02:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:28 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:29 Genomic Plasmid Vector	PHLAG82541458	Plasmid vector containing HLA-DRB5*02:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:29 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:30 Genomic Plasmid Vector	PHLAG82541459	Plasmid vector containing HLA-DRB5*02:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:30 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:31 Genomic Plasmid Vector	PHLAG82541460	Plasmid vector containing HLA-DRB5*02:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:31 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:32 Genomic Plasmid Vector	PHLAG82541461	Plasmid vector containing HLA-DRB5*02:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:32 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:33 Genomic Plasmid Vector	PHLAG82541462	Plasmid vector containing HLA-DRB5*02:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:33 protein under different cellular conditions.	Inquiry

HLA-DRB5*02:34 Genomic Plasmid Vector	PHLAG82541463	Plasmid vector containing HLA-DRB5*02:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:34 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:35 Genomic Plasmid Vector	PHLAG82541464	Plasmid vector containing HLA-DRB5*02:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:35 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:36 Genomic Plasmid Vector	PHLAG82541465	Plasmid vector containing HLA-DRB5*02:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:36 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:37 Genomic Plasmid Vector	PHLAG82541466	Plasmid vector containing HLA-DRB5*02:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:37 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:38 Genomic Plasmid Vector	PHLAG82541467	Plasmid vector containing HLA-DRB5*02:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:38 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:39 Genomic Plasmid Vector	PHLAG82541468	Plasmid vector containing HLA-DRB5*02:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:39 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:40N Genomic Plasmid Vector	PHLAG82541469	Plasmid vector containing HLA-DRB5*02:40N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:40N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:40N protein under different cellular conditions.	Inquiry
HLA-DRB5*02:41 Genomic Plasmid Vector	PHLAG82541470	Plasmid vector containing HLA-DRB5*02:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:41 protein under different cellular conditions.	Inquiry
HLA-DRB5*02:42 Genomic Plasmid Vector	PHLAG82541471	Plasmid vector containing HLA-DRB5*02:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:42 protein under different cellular conditions.	Inquiry

HLA-DRB5*02:43N Genomic Plasmid Vector	PHLAG82541472	Plasmid vector containing HLA-DRB5*02:43N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:43N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:43N protein under different cellular conditions.	Inquiry
HLA-DRB5*02:44 Genomic Plasmid Vector	PHLAG82541473	Plasmid vector containing HLA-DRB5*02:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*02:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*02:44 protein under different cellular conditions.	Inquiry
HLA-DRB5*0201 Genomic Plasmid Vector	PHLAG82541474	Plasmid vector containing HLA-DRB5*0201 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB5*0201 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB5*0201 protein under different cellular conditions.	Inquiry
HLA-DRB6*01:01 Genomic Plasmid Vector	PHLAG82541475	Plasmid vector containing HLA-DRB6*01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB6*01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB6*01:01 protein under different cellular conditions.	Inquiry
HLA-DRB6*02:01:01:01 Genomic Plasmid Vector	PHLAG82541476	Plasmid vector containing HLA-DRB6*02:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB6*02:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB6*02:01:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB6*02:01:01:02 Genomic Plasmid Vector	PHLAG82541477	Plasmid vector containing HLA-DRB6*02:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB6*02:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB6*02:01:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB6*02:02 Genomic Plasmid Vector	PHLAG82541478	Plasmid vector containing HLA-DRB6*02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB6*02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB6*02:02 protein under different cellular conditions.	Inquiry
HLA-DRB7*01:01:01 Genomic Plasmid Vector	PHLAG82541479	Plasmid vector containing HLA-DRB7*01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB7*01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB7*01:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB7*01:01:02 Genomic Plasmid Vector	PHLAG82541480	Plasmid vector containing HLA-DRB7*01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB7*01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB7*01:01:02 protein under different cellular conditions.	Inquiry

HLA-DRB8*01:01 Genomic Plasmid Vector	PHLAG82541481	Plasmid vector containing HLA-DRB8*01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB8*01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB8*01:01 protein under different cellular conditions.	Inquiry
HLA-DRB9*01:01:01:01 Genomic Plasmid Vector	PHLAG82541482	Plasmid vector containing HLA-DRB9*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB9*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB9*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB9*01:01:01:02 Genomic Plasmid Vector	PHLAG82541483	Plasmid vector containing HLA-DRB9*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB9*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB9*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB9*01:01:01:03 Genomic Plasmid Vector	PHLAG82541484	Plasmid vector containing HLA-DRB9*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB9*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB9*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-DRB9*01:01:02 Genomic Plasmid Vector	PHLAG82541485	Plasmid vector containing HLA-DRB9*01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB9*01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB9*01:01:02 protein under different cellular conditions.	Inquiry
HLA-DRB9*01:02:01:01 Genomic Plasmid Vector	PHLAG82541486	Plasmid vector containing HLA-DRB9*01:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB9*01:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB9*01:02:01:01 protein under different cellular conditions.	Inquiry
HLA-DRB9*01:02:01:02 Genomic Plasmid Vector	PHLAG82541487	Plasmid vector containing HLA-DRB9*01:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-DRB9*01:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-DRB9*01:02:01:02 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:01 Genomic Plasmid Vector	PHLAG82541488	Plasmid vector containing HLA-E*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:01 protein under different cellular conditions.	Inquiry

HLA-E*01:01:01:02 Genomic Plasmid Vector	PHLAG82541489	Plasmid vector containing HLA-E*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:03 Genomic Plasmid Vector	PHLAG82541490	Plasmid vector containing HLA-E*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:04 Genomic Plasmid Vector	PHLAG82541491	Plasmid vector containing HLA-E*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:04 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:05 Genomic Plasmid Vector	PHLAG82541492	Plasmid vector containing HLA-E*01:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:05 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:06 Genomic Plasmid Vector	PHLAG82541493	Plasmid vector containing HLA-E*01:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:06 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:07 Genomic Plasmid Vector	PHLAG82541494	Plasmid vector containing HLA-E*01:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:07 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:08 Genomic Plasmid Vector	PHLAG82541495	Plasmid vector containing HLA-E*01:01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:08 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:09 Genomic Plasmid Vector	PHLAG82541496	Plasmid vector containing HLA-E*01:01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:09 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:10 Genomic Plasmid Vector	PHLAG82541497	Plasmid vector containing HLA-E*01:01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:10 protein under different cellular conditions.	Inquiry

HLA-E*01:01:01:11 Genomic Plasmid Vector	PHLAG82541498	Plasmid vector containing HLA-E*01:01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:11 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:12 Genomic Plasmid Vector	PHLAG82541499	Plasmid vector containing HLA-E*01:01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:12 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:13 Genomic Plasmid Vector	PHLAG825415000	Plasmid vector containing HLA-E*01:01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:13 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:14 Genomic Plasmid Vector	PHLAG825415001	Plasmid vector containing HLA-E*01:01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:14 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:15 Genomic Plasmid Vector	PHLAG825415002	Plasmid vector containing HLA-E*01:01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:15 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:16 Genomic Plasmid Vector	PHLAG825415003	Plasmid vector containing HLA-E*01:01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:16 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:17 Genomic Plasmid Vector	PHLAG825415004	Plasmid vector containing HLA-E*01:01:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:17 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:18 Genomic Plasmid Vector	PHLAG825415005	Plasmid vector containing HLA-E*01:01:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:18 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:19 Genomic Plasmid Vector	PHLAG825415006	Plasmid vector containing HLA-E*01:01:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:19 protein under different cellular conditions.	Inquiry

HLA-E*01:01:01:20 Genomic Plasmid Vector	PHLAG82541507	Plasmid vector containing HLA-E*01:01:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:20 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:21 Genomic Plasmid Vector	PHLAG82541508	Plasmid vector containing HLA-E*01:01:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:21 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:22 Genomic Plasmid Vector	PHLAG82541509	Plasmid vector containing HLA-E*01:01:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:22 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:23 Genomic Plasmid Vector	PHLAG825415110	Plasmid vector containing HLA-E*01:01:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:23 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:24 Genomic Plasmid Vector	PHLAG825415111	Plasmid vector containing HLA-E*01:01:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:24 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:25 Genomic Plasmid Vector	PHLAG825415112	Plasmid vector containing HLA-E*01:01:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:25 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:26 Genomic Plasmid Vector	PHLAG825415113	Plasmid vector containing HLA-E*01:01:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:26 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:27 Genomic Plasmid Vector	PHLAG825415114	Plasmid vector containing HLA-E*01:01:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:27 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:28 Genomic Plasmid Vector	PHLAG825415115	Plasmid vector containing HLA-E*01:01:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:28 protein under different cellular conditions.	Inquiry

HLA-E*01:01:01:29 Genomic Plasmid Vector	PHLAG82541516	Plasmid vector containing HLA-E*01:01:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:29 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:30 Genomic Plasmid Vector	PHLAG82541517	Plasmid vector containing HLA-E*01:01:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:30 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:31 Genomic Plasmid Vector	PHLAG82541518	Plasmid vector containing HLA-E*01:01:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:31 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:32 Genomic Plasmid Vector	PHLAG82541519	Plasmid vector containing HLA-E*01:01:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:32 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:33 Genomic Plasmid Vector	PHLAG82541520	Plasmid vector containing HLA-E*01:01:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:33 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:34 Genomic Plasmid Vector	PHLAG82541521	Plasmid vector containing HLA-E*01:01:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:34 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:35 Genomic Plasmid Vector	PHLAG82541522	Plasmid vector containing HLA-E*01:01:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:35 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:36 Genomic Plasmid Vector	PHLAG82541523	Plasmid vector containing HLA-E*01:01:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:36 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:37 Genomic Plasmid Vector	PHLAG82541524	Plasmid vector containing HLA-E*01:01:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:37 protein under different cellular conditions.	Inquiry

HLA-E*01:01:01:38 Genomic Plasmid Vector	PHLAG82541525	Plasmid vector containing HLA-E*01:01:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:38 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:39 Genomic Plasmid Vector	PHLAG82541526	Plasmid vector containing HLA-E*01:01:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:39 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:40 Genomic Plasmid Vector	PHLAG82541527	Plasmid vector containing HLA-E*01:01:01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:40 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:41 Genomic Plasmid Vector	PHLAG82541528	Plasmid vector containing HLA-E*01:01:01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:41 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:42 Genomic Plasmid Vector	PHLAG82541529	Plasmid vector containing HLA-E*01:01:01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:42 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:43 Genomic Plasmid Vector	PHLAG82541530	Plasmid vector containing HLA-E*01:01:01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:43 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:44 Genomic Plasmid Vector	PHLAG82541531	Plasmid vector containing HLA-E*01:01:01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:44 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:45 Genomic Plasmid Vector	PHLAG82541532	Plasmid vector containing HLA-E*01:01:01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:45 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:46 Genomic Plasmid Vector	PHLAG82541533	Plasmid vector containing HLA-E*01:01:01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:46 protein under different cellular conditions.	Inquiry

HLA-E*01:01:01:47 Genomic Plasmid Vector	PHLAG82541534	Plasmid vector containing HLA-E*01:01:01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:47 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:48 Genomic Plasmid Vector	PHLAG82541535	Plasmid vector containing HLA-E*01:01:01:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:48 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:49 Genomic Plasmid Vector	PHLAG82541536	Plasmid vector containing HLA-E*01:01:01:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:49 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:50 Genomic Plasmid Vector	PHLAG82541537	Plasmid vector containing HLA-E*01:01:01:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:50 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:51 Genomic Plasmid Vector	PHLAG82541538	Plasmid vector containing HLA-E*01:01:01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:51 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:52 Genomic Plasmid Vector	PHLAG82541539	Plasmid vector containing HLA-E*01:01:01:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:52 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:53 Genomic Plasmid Vector	PHLAG82541540	Plasmid vector containing HLA-E*01:01:01:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:53 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:54 Genomic Plasmid Vector	PHLAG82541541	Plasmid vector containing HLA-E*01:01:01:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:54 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:55 Genomic Plasmid Vector	PHLAG82541542	Plasmid vector containing HLA-E*01:01:01:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:55 protein under different cellular conditions.	Inquiry

HLA-E*01:01:01:56 Genomic Plasmid Vector	PHLAG82541543	Plasmid vector containing HLA-E*01:01:01:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:56 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:57 Genomic Plasmid Vector	PHLAG82541544	Plasmid vector containing HLA-E*01:01:01:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:57 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:58 Genomic Plasmid Vector	PHLAG82541545	Plasmid vector containing HLA-E*01:01:01:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:58 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:59 Genomic Plasmid Vector	PHLAG82541546	Plasmid vector containing HLA-E*01:01:01:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:59 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:60 Genomic Plasmid Vector	PHLAG82541547	Plasmid vector containing HLA-E*01:01:01:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:60 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:61 Genomic Plasmid Vector	PHLAG82541548	Plasmid vector containing HLA-E*01:01:01:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:61 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:62 Genomic Plasmid Vector	PHLAG82541549	Plasmid vector containing HLA-E*01:01:01:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:62 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:63 Genomic Plasmid Vector	PHLAG82541550	Plasmid vector containing HLA-E*01:01:01:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:63 protein under different cellular conditions.	Inquiry
HLA-E*01:01:01:64 Genomic Plasmid Vector	PHLAG82541551	Plasmid vector containing HLA-E*01:01:01:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:64 protein under different cellular conditions.	Inquiry

HLA-E*01:01:01:65 Genomic Plasmid Vector	PHLAG82541552	Plasmid vector containing HLA-E*01:01:01:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:01:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:01:65 protein under different cellular conditions.	Inquiry
HLA-E*01:01:02 Genomic Plasmid Vector	PHLAG82541553	Plasmid vector containing HLA-E*01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:02 protein under different cellular conditions.	Inquiry
HLA-E*01:01:03 Genomic Plasmid Vector	PHLAG82541554	Plasmid vector containing HLA-E*01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:03 protein under different cellular conditions.	Inquiry
HLA-E*01:01:04 Genomic Plasmid Vector	PHLAG82541555	Plasmid vector containing HLA-E*01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:04 protein under different cellular conditions.	Inquiry
HLA-E*01:01:05 Genomic Plasmid Vector	PHLAG82541556	Plasmid vector containing HLA-E*01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:05 protein under different cellular conditions.	Inquiry
HLA-E*01:01:06 Genomic Plasmid Vector	PHLAG82541557	Plasmid vector containing HLA-E*01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:06 protein under different cellular conditions.	Inquiry
HLA-E*01:01:07 Genomic Plasmid Vector	PHLAG82541558	Plasmid vector containing HLA-E*01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:07 protein under different cellular conditions.	Inquiry
HLA-E*01:01:08 Genomic Plasmid Vector	PHLAG82541559	Plasmid vector containing HLA-E*01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:08 protein under different cellular conditions.	Inquiry
HLA-E*01:01:09 Genomic Plasmid Vector	PHLAG82541560	Plasmid vector containing HLA-E*01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:09 protein under different cellular conditions.	Inquiry

HLA-E*01:01:10 Genomic Plasmid Vector	PHLAG82541561	Plasmid vector containing HLA-E*01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:10 protein under different cellular conditions.	Inquiry
HLA-E*01:01:11 Genomic Plasmid Vector	PHLAG82541562	Plasmid vector containing HLA-E*01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:11 protein under different cellular conditions.	Inquiry
HLA-E*01:01:12 Genomic Plasmid Vector	PHLAG82541563	Plasmid vector containing HLA-E*01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:12 protein under different cellular conditions.	Inquiry
HLA-E*01:01:13 Genomic Plasmid Vector	PHLAG82541564	Plasmid vector containing HLA-E*01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:13 protein under different cellular conditions.	Inquiry
HLA-E*01:01:14 Genomic Plasmid Vector	PHLAG82541565	Plasmid vector containing HLA-E*01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:14 protein under different cellular conditions.	Inquiry
HLA-E*01:01:15 Genomic Plasmid Vector	PHLAG82541566	Plasmid vector containing HLA-E*01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:15 protein under different cellular conditions.	Inquiry
HLA-E*01:01:16 Genomic Plasmid Vector	PHLAG82541567	Plasmid vector containing HLA-E*01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:16 protein under different cellular conditions.	Inquiry
HLA-E*01:01:17 Genomic Plasmid Vector	PHLAG82541568	Plasmid vector containing HLA-E*01:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:17 protein under different cellular conditions.	Inquiry
HLA-E*01:01:18:01 Genomic Plasmid Vector	PHLAG82541569	Plasmid vector containing HLA-E*01:01:18:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:18:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:18:01 protein under different cellular conditions.	Inquiry

HLA-E*01:01:18:02 Genomic Plasmid Vector	PHLAG82541570	Plasmid vector containing HLA-E*01:01:18:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:18:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:18:02 protein under different cellular conditions.	Inquiry
HLA-E*01:01:19 Genomic Plasmid Vector	PHLAG82541571	Plasmid vector containing HLA-E*01:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:19 protein under different cellular conditions.	Inquiry
HLA-E*01:01:20 Genomic Plasmid Vector	PHLAG82541572	Plasmid vector containing HLA-E*01:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:20 protein under different cellular conditions.	Inquiry
HLA-E*01:01:21 Genomic Plasmid Vector	PHLAG82541573	Plasmid vector containing HLA-E*01:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:21 protein under different cellular conditions.	Inquiry
HLA-E*01:01:22 Genomic Plasmid Vector	PHLAG82541574	Plasmid vector containing HLA-E*01:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:22 protein under different cellular conditions.	Inquiry
HLA-E*01:01:23 Genomic Plasmid Vector	PHLAG82541575	Plasmid vector containing HLA-E*01:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:23 protein under different cellular conditions.	Inquiry
HLA-E*01:01:24 Genomic Plasmid Vector	PHLAG82541576	Plasmid vector containing HLA-E*01:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:24 protein under different cellular conditions.	Inquiry
HLA-E*01:01:25 Genomic Plasmid Vector	PHLAG82541577	Plasmid vector containing HLA-E*01:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:25 protein under different cellular conditions.	Inquiry
HLA-E*01:01:26 Genomic Plasmid Vector	PHLAG82541578	Plasmid vector containing HLA-E*01:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:26 protein under different cellular conditions.	Inquiry

HLA-E*01:01:27 Genomic Plasmid Vector	PHLAG82541579	Plasmid vector containing HLA-E*01:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:27 protein under different cellular conditions.	Inquiry
HLA-E*01:01:28 Genomic Plasmid Vector	PHLAG825415 80	Plasmid vector containing HLA-E*01:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:28 protein under different cellular conditions.	Inquiry
HLA-E*01:01:29 Genomic Plasmid Vector	PHLAG825415 81	Plasmid vector containing HLA-E*01:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:29 protein under different cellular conditions.	Inquiry
HLA-E*01:01:30 Genomic Plasmid Vector	PHLAG825415 82	Plasmid vector containing HLA-E*01:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:30 protein under different cellular conditions.	Inquiry
HLA-E*01:01:31 Genomic Plasmid Vector	PHLAG825415 83	Plasmid vector containing HLA-E*01:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:31 protein under different cellular conditions.	Inquiry
HLA-E*01:01:32 Genomic Plasmid Vector	PHLAG825415 84	Plasmid vector containing HLA-E*01:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:32 protein under different cellular conditions.	Inquiry
HLA-E*01:01:33 Genomic Plasmid Vector	PHLAG825415 85	Plasmid vector containing HLA-E*01:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:33 protein under different cellular conditions.	Inquiry
HLA-E*01:01:34 Genomic Plasmid Vector	PHLAG825415 86	Plasmid vector containing HLA-E*01:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:34 protein under different cellular conditions.	Inquiry
HLA-E*01:01:35 Genomic Plasmid Vector	PHLAG825415 87	Plasmid vector containing HLA-E*01:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:35 protein under different cellular conditions.	Inquiry

HLA-E*01:01:36 Genomic Plasmid Vector	PHLAG82541588	Plasmid vector containing HLA-E*01:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:36 protein under different cellular conditions.	Inquiry
HLA-E*01:01:37 Genomic Plasmid Vector	PHLAG82541589	Plasmid vector containing HLA-E*01:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:37 protein under different cellular conditions.	Inquiry
HLA-E*01:01:38 Genomic Plasmid Vector	PHLAG82541590	Plasmid vector containing HLA-E*01:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:38 protein under different cellular conditions.	Inquiry
HLA-E*01:01:39 Genomic Plasmid Vector	PHLAG82541591	Plasmid vector containing HLA-E*01:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:39 protein under different cellular conditions.	Inquiry
HLA-E*01:01:40 Genomic Plasmid Vector	PHLAG82541592	Plasmid vector containing HLA-E*01:01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:40 protein under different cellular conditions.	Inquiry
HLA-E*01:01:41 Genomic Plasmid Vector	PHLAG82541593	Plasmid vector containing HLA-E*01:01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:41 protein under different cellular conditions.	Inquiry
HLA-E*01:01:42 Genomic Plasmid Vector	PHLAG82541594	Plasmid vector containing HLA-E*01:01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:42 protein under different cellular conditions.	Inquiry
HLA-E*01:01:43 Genomic Plasmid Vector	PHLAG82541595	Plasmid vector containing HLA-E*01:01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:43 protein under different cellular conditions.	Inquiry
HLA-E*01:01:44 Genomic Plasmid Vector	PHLAG82541596	Plasmid vector containing HLA-E*01:01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:44 protein under different cellular conditions.	Inquiry

HLA-E*01:01:45 Genomic Plasmid Vector	PHLAG82541597	Plasmid vector containing HLA-E*01:01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:45 protein under different cellular conditions.	Inquiry
HLA-E*01:01:46 Genomic Plasmid Vector	PHLAG82541598	Plasmid vector containing HLA-E*01:01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:46 protein under different cellular conditions.	Inquiry
HLA-E*01:01:47 Genomic Plasmid Vector	PHLAG82541599	Plasmid vector containing HLA-E*01:01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:01:47 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:01 Genomic Plasmid Vector	PHLAG825416000	Plasmid vector containing HLA-E*01:03:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:01 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:02 Genomic Plasmid Vector	PHLAG825416001	Plasmid vector containing HLA-E*01:03:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:02 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:03 Genomic Plasmid Vector	PHLAG825416002	Plasmid vector containing HLA-E*01:03:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:03 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:04 Genomic Plasmid Vector	PHLAG825416003	Plasmid vector containing HLA-E*01:03:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:04 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:05 Genomic Plasmid Vector	PHLAG825416004	Plasmid vector containing HLA-E*01:03:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:05 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:06 Genomic Plasmid Vector	PHLAG825416005	Plasmid vector containing HLA-E*01:03:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:06 protein under different cellular conditions.	Inquiry

HLA-E*01:03:01:07 Genomic Plasmid Vector	PHLAG82541606	Plasmid vector containing HLA-E*01:03:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:07 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:08 Genomic Plasmid Vector	PHLAG82541607	Plasmid vector containing HLA-E*01:03:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:08 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:09 Genomic Plasmid Vector	PHLAG82541608	Plasmid vector containing HLA-E*01:03:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:09 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:10 Genomic Plasmid Vector	PHLAG82541609	Plasmid vector containing HLA-E*01:03:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:10 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:11 Genomic Plasmid Vector	PHLAG82541610	Plasmid vector containing HLA-E*01:03:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:11 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:12 Genomic Plasmid Vector	PHLAG82541611	Plasmid vector containing HLA-E*01:03:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:12 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:13 Genomic Plasmid Vector	PHLAG82541612	Plasmid vector containing HLA-E*01:03:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:13 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:14 Genomic Plasmid Vector	PHLAG82541613	Plasmid vector containing HLA-E*01:03:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:14 protein under different cellular conditions.	Inquiry
HLA-E*01:03:01:15 Genomic Plasmid Vector	PHLAG82541614	Plasmid vector containing HLA-E*01:03:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:15 protein under different cellular conditions.	Inquiry

HLA-E*01:03:01:16 Genomic Plasmid Vector	PHLAG82541615	Plasmid vector containing HLA-E*01:03:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:01:16 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:01 Genomic Plasmid Vector	PHLAG82541616	Plasmid vector containing HLA-E*01:03:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:01 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:02 Genomic Plasmid Vector	PHLAG82541617	Plasmid vector containing HLA-E*01:03:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:02 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:03 Genomic Plasmid Vector	PHLAG82541618	Plasmid vector containing HLA-E*01:03:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:03 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:04 Genomic Plasmid Vector	PHLAG82541619	Plasmid vector containing HLA-E*01:03:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:04 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:05 Genomic Plasmid Vector	PHLAG82541620	Plasmid vector containing HLA-E*01:03:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:05 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:06 Genomic Plasmid Vector	PHLAG82541621	Plasmid vector containing HLA-E*01:03:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:06 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:07 Genomic Plasmid Vector	PHLAG82541622	Plasmid vector containing HLA-E*01:03:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:07 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:08 Genomic Plasmid Vector	PHLAG82541623	Plasmid vector containing HLA-E*01:03:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:08 protein under different cellular conditions.	Inquiry

HLA-E*01:03:02:09 Genomic Plasmid Vector	PHLAG82541624	Plasmid vector containing HLA-E*01:03:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:09 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:10 Genomic Plasmid Vector	PHLAG82541625	Plasmid vector containing HLA-E*01:03:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:10 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:11 Genomic Plasmid Vector	PHLAG82541626	Plasmid vector containing HLA-E*01:03:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:11 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:12 Genomic Plasmid Vector	PHLAG82541627	Plasmid vector containing HLA-E*01:03:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:12 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:13 Genomic Plasmid Vector	PHLAG82541628	Plasmid vector containing HLA-E*01:03:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:13 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:14 Genomic Plasmid Vector	PHLAG82541629	Plasmid vector containing HLA-E*01:03:02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:14 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:15 Genomic Plasmid Vector	PHLAG82541630	Plasmid vector containing HLA-E*01:03:02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:15 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:16 Genomic Plasmid Vector	PHLAG82541631	Plasmid vector containing HLA-E*01:03:02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:16 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:17 Genomic Plasmid Vector	PHLAG82541632	Plasmid vector containing HLA-E*01:03:02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:17 protein under different cellular conditions.	Inquiry

HLA-E*01:03:02:18 Genomic Plasmid Vector	PHLAG82541633	Plasmid vector containing HLA-E*01:03:02:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:18 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:19 Genomic Plasmid Vector	PHLAG82541634	Plasmid vector containing HLA-E*01:03:02:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:19 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:20 Genomic Plasmid Vector	PHLAG82541635	Plasmid vector containing HLA-E*01:03:02:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:20 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:21 Genomic Plasmid Vector	PHLAG82541636	Plasmid vector containing HLA-E*01:03:02:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:21 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:22 Genomic Plasmid Vector	PHLAG82541637	Plasmid vector containing HLA-E*01:03:02:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:22 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:23 Genomic Plasmid Vector	PHLAG82541638	Plasmid vector containing HLA-E*01:03:02:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:23 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:24 Genomic Plasmid Vector	PHLAG82541639	Plasmid vector containing HLA-E*01:03:02:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:24 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:25 Genomic Plasmid Vector	PHLAG82541640	Plasmid vector containing HLA-E*01:03:02:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:25 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:26 Genomic Plasmid Vector	PHLAG82541641	Plasmid vector containing HLA-E*01:03:02:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:26 protein under different cellular conditions.	Inquiry

HLA-E*01:03:02:27 Genomic Plasmid Vector	PHLAG82541642	Plasmid vector containing HLA-E*01:03:02:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:27 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:28 Genomic Plasmid Vector	PHLAG82541643	Plasmid vector containing HLA-E*01:03:02:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:28 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:29 Genomic Plasmid Vector	PHLAG82541644	Plasmid vector containing HLA-E*01:03:02:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:29 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:30 Genomic Plasmid Vector	PHLAG82541645	Plasmid vector containing HLA-E*01:03:02:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:30 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:31 Genomic Plasmid Vector	PHLAG82541646	Plasmid vector containing HLA-E*01:03:02:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:31 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:32 Genomic Plasmid Vector	PHLAG82541647	Plasmid vector containing HLA-E*01:03:02:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:32 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:33 Genomic Plasmid Vector	PHLAG82541648	Plasmid vector containing HLA-E*01:03:02:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:33 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:34 Genomic Plasmid Vector	PHLAG82541649	Plasmid vector containing HLA-E*01:03:02:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:34 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:35 Genomic Plasmid Vector	PHLAG82541650	Plasmid vector containing HLA-E*01:03:02:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:35 protein under different cellular conditions.	Inquiry

HLA-E*01:03:02:36 Genomic Plasmid Vector	PHLAG82541651	Plasmid vector containing HLA-E*01:03:02:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:36 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:37 Genomic Plasmid Vector	PHLAG82541652	Plasmid vector containing HLA-E*01:03:02:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:37 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:38 Genomic Plasmid Vector	PHLAG82541653	Plasmid vector containing HLA-E*01:03:02:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:38 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:39 Genomic Plasmid Vector	PHLAG82541654	Plasmid vector containing HLA-E*01:03:02:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:39 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:40 Genomic Plasmid Vector	PHLAG82541655	Plasmid vector containing HLA-E*01:03:02:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:40 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:41 Genomic Plasmid Vector	PHLAG82541656	Plasmid vector containing HLA-E*01:03:02:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:41 protein under different cellular conditions.	Inquiry
HLA-E*01:03:02:42 Genomic Plasmid Vector	PHLAG82541657	Plasmid vector containing HLA-E*01:03:02:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:02:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:02:42 protein under different cellular conditions.	Inquiry
HLA-E*01:03:03 Genomic Plasmid Vector	PHLAG82541658	Plasmid vector containing HLA-E*01:03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:03 protein under different cellular conditions.	Inquiry
HLA-E*01:03:04 Genomic Plasmid Vector	PHLAG82541659	Plasmid vector containing HLA-E*01:03:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:04 protein under different cellular conditions.	Inquiry

HLA-E*01:03:05:01 Genomic Plasmid Vector	PHLAG82541660	Plasmid vector containing HLA-E*01:03:05:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:05:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:05:01 protein under different cellular conditions.	Inquiry
HLA-E*01:03:05:02 Genomic Plasmid Vector	PHLAG82541661	Plasmid vector containing HLA-E*01:03:05:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:05:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:05:02 protein under different cellular conditions.	Inquiry
HLA-E*01:03:05:03 Genomic Plasmid Vector	PHLAG82541662	Plasmid vector containing HLA-E*01:03:05:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:05:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:05:03 protein under different cellular conditions.	Inquiry
HLA-E*01:03:05:04 Genomic Plasmid Vector	PHLAG82541663	Plasmid vector containing HLA-E*01:03:05:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:05:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:05:04 protein under different cellular conditions.	Inquiry
HLA-E*01:03:06 Genomic Plasmid Vector	PHLAG82541664	Plasmid vector containing HLA-E*01:03:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:06 protein under different cellular conditions.	Inquiry
HLA-E*01:03:07 Genomic Plasmid Vector	PHLAG82541665	Plasmid vector containing HLA-E*01:03:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:07 protein under different cellular conditions.	Inquiry
HLA-E*01:03:08 Genomic Plasmid Vector	PHLAG82541666	Plasmid vector containing HLA-E*01:03:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:08 protein under different cellular conditions.	Inquiry
HLA-E*01:03:09 Genomic Plasmid Vector	PHLAG82541667	Plasmid vector containing HLA-E*01:03:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:09 protein under different cellular conditions.	Inquiry
HLA-E*01:03:10 Genomic Plasmid Vector	PHLAG82541668	Plasmid vector containing HLA-E*01:03:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:10 protein under different cellular conditions.	Inquiry

HLA-E*01:03:11 Genomic Plasmid Vector	PHLAG82541669	Plasmid vector containing HLA-E*01:03:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:11 protein under different cellular conditions.	Inquiry
HLA-E*01:03:12 Genomic Plasmid Vector	PHLAG82541670	Plasmid vector containing HLA-E*01:03:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:12 protein under different cellular conditions.	Inquiry
HLA-E*01:03:13 Genomic Plasmid Vector	PHLAG82541671	Plasmid vector containing HLA-E*01:03:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:13 protein under different cellular conditions.	Inquiry
HLA-E*01:03:14 Genomic Plasmid Vector	PHLAG82541672	Plasmid vector containing HLA-E*01:03:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:14 protein under different cellular conditions.	Inquiry
HLA-E*01:03:15 Genomic Plasmid Vector	PHLAG82541673	Plasmid vector containing HLA-E*01:03:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:15 protein under different cellular conditions.	Inquiry
HLA-E*01:03:16 Genomic Plasmid Vector	PHLAG82541674	Plasmid vector containing HLA-E*01:03:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:16 protein under different cellular conditions.	Inquiry
HLA-E*01:03:17 Genomic Plasmid Vector	PHLAG82541675	Plasmid vector containing HLA-E*01:03:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:17 protein under different cellular conditions.	Inquiry
HLA-E*01:03:18 Genomic Plasmid Vector	PHLAG82541676	Plasmid vector containing HLA-E*01:03:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:18 protein under different cellular conditions.	Inquiry
HLA-E*01:03:19 Genomic Plasmid Vector	PHLAG82541677	Plasmid vector containing HLA-E*01:03:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:19 protein under different cellular conditions.	Inquiry

HLA-E*01:03:20 Genomic Plasmid Vector	PHLAG82541678	Plasmid vector containing HLA-E*01:03:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:20 protein under different cellular conditions.	Inquiry
HLA-E*01:03:21 Genomic Plasmid Vector	PHLAG82541679	Plasmid vector containing HLA-E*01:03:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:21 protein under different cellular conditions.	Inquiry
HLA-E*01:03:22 Genomic Plasmid Vector	PHLAG825416810	Plasmid vector containing HLA-E*01:03:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:22 protein under different cellular conditions.	Inquiry
HLA-E*01:03:23 Genomic Plasmid Vector	PHLAG825416811	Plasmid vector containing HLA-E*01:03:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:23 protein under different cellular conditions.	Inquiry
HLA-E*01:03:24 Genomic Plasmid Vector	PHLAG825416812	Plasmid vector containing HLA-E*01:03:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:24 protein under different cellular conditions.	Inquiry
HLA-E*01:03:25 Genomic Plasmid Vector	PHLAG825416813	Plasmid vector containing HLA-E*01:03:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:25 protein under different cellular conditions.	Inquiry
HLA-E*01:03:26 Genomic Plasmid Vector	PHLAG825416814	Plasmid vector containing HLA-E*01:03:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:26 protein under different cellular conditions.	Inquiry
HLA-E*01:03:27 Genomic Plasmid Vector	PHLAG825416815	Plasmid vector containing HLA-E*01:03:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:27 protein under different cellular conditions.	Inquiry
HLA-E*01:03:28 Genomic Plasmid Vector	PHLAG825416816	Plasmid vector containing HLA-E*01:03:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:28 protein under different cellular conditions.	Inquiry

HLA-E*01:03:29 Genomic Plasmid Vector	PHLAG82541687	Plasmid vector containing HLA-E*01:03:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:29 protein under different cellular conditions.	Inquiry
HLA-E*01:03:30 Genomic Plasmid Vector	PHLAG82541688	Plasmid vector containing HLA-E*01:03:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:30 protein under different cellular conditions.	Inquiry
HLA-E*01:03:31 Genomic Plasmid Vector	PHLAG82541689	Plasmid vector containing HLA-E*01:03:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:31 protein under different cellular conditions.	Inquiry
HLA-E*01:03:32 Genomic Plasmid Vector	PHLAG825416910	Plasmid vector containing HLA-E*01:03:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:32 protein under different cellular conditions.	Inquiry
HLA-E*01:03:33 Genomic Plasmid Vector	PHLAG825416911	Plasmid vector containing HLA-E*01:03:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:33 protein under different cellular conditions.	Inquiry
HLA-E*01:03:34 Genomic Plasmid Vector	PHLAG825416912	Plasmid vector containing HLA-E*01:03:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:34 protein under different cellular conditions.	Inquiry
HLA-E*01:03:35 Genomic Plasmid Vector	PHLAG825416913	Plasmid vector containing HLA-E*01:03:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:35 protein under different cellular conditions.	Inquiry
HLA-E*01:03:36 Genomic Plasmid Vector	PHLAG825416914	Plasmid vector containing HLA-E*01:03:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:36 protein under different cellular conditions.	Inquiry
HLA-E*01:03:37 Genomic Plasmid Vector	PHLAG825416915	Plasmid vector containing HLA-E*01:03:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:37 protein under different cellular conditions.	Inquiry

HLA-E*01:03:38 Genomic Plasmid Vector	PHLAG82541696	Plasmid vector containing HLA-E*01:03:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:38 protein under different cellular conditions.	Inquiry
HLA-E*01:03:39 Genomic Plasmid Vector	PHLAG82541697	Plasmid vector containing HLA-E*01:03:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:39 protein under different cellular conditions.	Inquiry
HLA-E*01:03:40 Genomic Plasmid Vector	PHLAG82541698	Plasmid vector containing HLA-E*01:03:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:40 protein under different cellular conditions.	Inquiry
HLA-E*01:03:41 Genomic Plasmid Vector	PHLAG82541699	Plasmid vector containing HLA-E*01:03:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:41 protein under different cellular conditions.	Inquiry
HLA-E*01:03:42 Genomic Plasmid Vector	PHLAG825417000	Plasmid vector containing HLA-E*01:03:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:03:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:03:42 protein under different cellular conditions.	Inquiry
HLA-E*01:04 Genomic Plasmid Vector	PHLAG825417001	Plasmid vector containing HLA-E*01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:04 protein under different cellular conditions.	Inquiry
HLA-E*01:05:01 Genomic Plasmid Vector	PHLAG825417002	Plasmid vector containing HLA-E*01:05:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:05:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:05:01 protein under different cellular conditions.	Inquiry
HLA-E*01:05:02 Genomic Plasmid Vector	PHLAG825417003	Plasmid vector containing HLA-E*01:05:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:05:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:05:02 protein under different cellular conditions.	Inquiry
HLA-E*01:06:01:01 Genomic Plasmid Vector	PHLAG825417004	Plasmid vector containing HLA-E*01:06:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:06:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:06:01:01 protein under different cellular conditions.	Inquiry

HLA-E*01:06:01:02 Genomic Plasmid Vector	PHLAG82541705	Plasmid vector containing HLA-E*01:06:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:06:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:06:01:02 protein under different cellular conditions.	Inquiry
HLA-E*01:06:02 Genomic Plasmid Vector	PHLAG82541706	Plasmid vector containing HLA-E*01:06:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:06:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:06:02 protein under different cellular conditions.	Inquiry
HLA-E*01:06:03 Genomic Plasmid Vector	PHLAG82541707	Plasmid vector containing HLA-E*01:06:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:06:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:06:03 protein under different cellular conditions.	Inquiry
HLA-E*01:06:04 Genomic Plasmid Vector	PHLAG82541708	Plasmid vector containing HLA-E*01:06:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:06:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:06:04 protein under different cellular conditions.	Inquiry
HLA-E*01:06:05 Genomic Plasmid Vector	PHLAG82541709	Plasmid vector containing HLA-E*01:06:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:06:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:06:05 protein under different cellular conditions.	Inquiry
HLA-E*01:06:06 Genomic Plasmid Vector	PHLAG825417110	Plasmid vector containing HLA-E*01:06:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:06:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:06:06 protein under different cellular conditions.	Inquiry
HLA-E*01:07 Genomic Plasmid Vector	PHLAG825417111	Plasmid vector containing HLA-E*01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:07 protein under different cellular conditions.	Inquiry
HLA-E*01:08:01N Genomic Plasmid Vector	PHLAG825417112	Plasmid vector containing HLA-E*01:08:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:08:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:08:01N protein under different cellular conditions.	Inquiry
HLA-E*01:08:02N Genomic Plasmid Vector	PHLAG825417113	Plasmid vector containing HLA-E*01:08:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:08:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:08:02N protein under different cellular conditions.	Inquiry

HLA-E*01:09:01:01 Genomic Plasmid Vector	PHLAG82541714	Plasmid vector containing HLA-E*01:09:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:09:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:09:01:01 protein under different cellular conditions.	Inquiry
HLA-E*01:09:01:02 Genomic Plasmid Vector	PHLAG82541715	Plasmid vector containing HLA-E*01:09:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:09:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:09:01:02 protein under different cellular conditions.	Inquiry
HLA-E*01:10:01:01 Genomic Plasmid Vector	PHLAG82541716	Plasmid vector containing HLA-E*01:10:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:10:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:10:01:01 protein under different cellular conditions.	Inquiry
HLA-E*01:10:01:02 Genomic Plasmid Vector	PHLAG82541717	Plasmid vector containing HLA-E*01:10:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:10:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:10:01:02 protein under different cellular conditions.	Inquiry
HLA-E*01:100 Genomic Plasmid Vector	PHLAG82541718	Plasmid vector containing HLA-E*01:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:100 protein under different cellular conditions.	Inquiry
HLA-E*01:101 Genomic Plasmid Vector	PHLAG82541719	Plasmid vector containing HLA-E*01:101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:101 protein under different cellular conditions.	Inquiry
HLA-E*01:102 Genomic Plasmid Vector	PHLAG82541720	Plasmid vector containing HLA-E*01:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:102 protein under different cellular conditions.	Inquiry
HLA-E*01:103 Genomic Plasmid Vector	PHLAG82541721	Plasmid vector containing HLA-E*01:103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:103 protein under different cellular conditions.	Inquiry
HLA-E*01:104 Genomic Plasmid Vector	PHLAG82541722	Plasmid vector containing HLA-E*01:104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:104 protein under different cellular conditions.	Inquiry

HLA-E*01:105 Genomic Plasmid Vector	PHLAG82541723	Plasmid vector containing HLA-E*01:105 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:105 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:105 protein under different cellular conditions.	Inquiry
HLA-E*01:106 Genomic Plasmid Vector	PHLAG82541724	Plasmid vector containing HLA-E*01:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:106 protein under different cellular conditions.	Inquiry
HLA-E*01:107 Genomic Plasmid Vector	PHLAG82541725	Plasmid vector containing HLA-E*01:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:107 protein under different cellular conditions.	Inquiry
HLA-E*01:108 Genomic Plasmid Vector	PHLAG82541726	Plasmid vector containing HLA-E*01:108 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:108 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:108 protein under different cellular conditions.	Inquiry
HLA-E*01:109 Genomic Plasmid Vector	PHLAG82541727	Plasmid vector containing HLA-E*01:109 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:109 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:109 protein under different cellular conditions.	Inquiry
HLA-E*01:11 Genomic Plasmid Vector	PHLAG82541728	Plasmid vector containing HLA-E*01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:11 protein under different cellular conditions.	Inquiry
HLA-E*01:110 Genomic Plasmid Vector	PHLAG82541729	Plasmid vector containing HLA-E*01:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:110 protein under different cellular conditions.	Inquiry
HLA-E*01:111 Genomic Plasmid Vector	PHLAG82541730	Plasmid vector containing HLA-E*01:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:111 protein under different cellular conditions.	Inquiry
HLA-E*01:112 Genomic Plasmid Vector	PHLAG82541731	Plasmid vector containing HLA-E*01:112 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:112 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:112 protein under different cellular conditions.	Inquiry

HLA-E*01:113 Genomic Plasmid Vector	PHLAG825417312	Plasmid vector containing HLA-E*01:113 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:113 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:113 protein under different cellular conditions.	Inquiry
HLA-E*01:114 Genomic Plasmid Vector	PHLAG825417313	Plasmid vector containing HLA-E*01:114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:114 protein under different cellular conditions.	Inquiry
HLA-E*01:115 Genomic Plasmid Vector	PHLAG825417314	Plasmid vector containing HLA-E*01:115 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:115 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:115 protein under different cellular conditions.	Inquiry
HLA-E*01:116 Genomic Plasmid Vector	PHLAG825417315	Plasmid vector containing HLA-E*01:116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:116 protein under different cellular conditions.	Inquiry
HLA-E*01:117N Genomic Plasmid Vector	PHLAG825417316	Plasmid vector containing HLA-E*01:117N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:117N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:117N protein under different cellular conditions.	Inquiry
HLA-E*01:118 Genomic Plasmid Vector	PHLAG825417317	Plasmid vector containing HLA-E*01:118 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:118 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:118 protein under different cellular conditions.	Inquiry
HLA-E*01:119 Genomic Plasmid Vector	PHLAG825417318	Plasmid vector containing HLA-E*01:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:119 protein under different cellular conditions.	Inquiry
HLA-E*01:12:01:01 Genomic Plasmid Vector	PHLAG825417319	Plasmid vector containing HLA-E*01:12:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:12:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:12:01:01 protein under different cellular conditions.	Inquiry
HLA-E*01:12:01:02 Genomic Plasmid Vector	PHLAG825417320	Plasmid vector containing HLA-E*01:12:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:12:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:12:01:02 protein under different cellular conditions.	Inquiry

HLA-E*01:120 Genomic Plasmid Vector	PHLAG82541741	Plasmid vector containing HLA-E*01:120 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:120 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:120 protein under different cellular conditions.	Inquiry
HLA-E*01:121 Genomic Plasmid Vector	PHLAG82541742	Plasmid vector containing HLA-E*01:121 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:121 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:121 protein under different cellular conditions.	Inquiry
HLA-E*01:122 Genomic Plasmid Vector	PHLAG82541743	Plasmid vector containing HLA-E*01:122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:122 protein under different cellular conditions.	Inquiry
HLA-E*01:123 Genomic Plasmid Vector	PHLAG82541744	Plasmid vector containing HLA-E*01:123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:123 protein under different cellular conditions.	Inquiry
HLA-E*01:124 Genomic Plasmid Vector	PHLAG82541745	Plasmid vector containing HLA-E*01:124 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:124 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:124 protein under different cellular conditions.	Inquiry
HLA-E*01:125 Genomic Plasmid Vector	PHLAG82541746	Plasmid vector containing HLA-E*01:125 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:125 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:125 protein under different cellular conditions.	Inquiry
HLA-E*01:126N Genomic Plasmid Vector	PHLAG82541747	Plasmid vector containing HLA-E*01:126N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:126N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:126N protein under different cellular conditions.	Inquiry
HLA-E*01:127 Genomic Plasmid Vector	PHLAG82541748	Plasmid vector containing HLA-E*01:127 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:127 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:127 protein under different cellular conditions.	Inquiry
HLA-E*01:128 Genomic Plasmid Vector	PHLAG82541749	Plasmid vector containing HLA-E*01:128 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:128 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:128 protein under different cellular conditions.	Inquiry

HLA-E*01:129 Genomic Plasmid Vector	PHLAG82541750	Plasmid vector containing HLA-E*01:129 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:129 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:129 protein under different cellular conditions.	Inquiry
HLA-E*01:13 Genomic Plasmid Vector	PHLAG82541751	Plasmid vector containing HLA-E*01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:13 protein under different cellular conditions.	Inquiry
HLA-E*01:130 Genomic Plasmid Vector	PHLAG82541752	Plasmid vector containing HLA-E*01:130 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:130 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:130 protein under different cellular conditions.	Inquiry
HLA-E*01:131 Genomic Plasmid Vector	PHLAG82541753	Plasmid vector containing HLA-E*01:131 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:131 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:131 protein under different cellular conditions.	Inquiry
HLA-E*01:132 Genomic Plasmid Vector	PHLAG82541754	Plasmid vector containing HLA-E*01:132 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:132 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:132 protein under different cellular conditions.	Inquiry
HLA-E*01:133 Genomic Plasmid Vector	PHLAG82541755	Plasmid vector containing HLA-E*01:133 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:133 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:133 protein under different cellular conditions.	Inquiry
HLA-E*01:134 Genomic Plasmid Vector	PHLAG82541756	Plasmid vector containing HLA-E*01:134 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:134 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:134 protein under different cellular conditions.	Inquiry
HLA-E*01:135 Genomic Plasmid Vector	PHLAG82541757	Plasmid vector containing HLA-E*01:135 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:135 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:135 protein under different cellular conditions.	Inquiry
HLA-E*01:136 Genomic Plasmid Vector	PHLAG82541758	Plasmid vector containing HLA-E*01:136 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:136 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:136 protein under different cellular conditions.	Inquiry

HLA-E*01:137 Genomic Plasmid Vector	PHLAG82541759	Plasmid vector containing HLA-E*01:137 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:137 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:137 protein under different cellular conditions.	Inquiry
HLA-E*01:138 Genomic Plasmid Vector	PHLAG825417610	Plasmid vector containing HLA-E*01:138 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:138 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:138 protein under different cellular conditions.	Inquiry
HLA-E*01:139N Genomic Plasmid Vector	PHLAG825417611	Plasmid vector containing HLA-E*01:139N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:139N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:139N protein under different cellular conditions.	Inquiry
HLA-E*01:14 Genomic Plasmid Vector	PHLAG825417612	Plasmid vector containing HLA-E*01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:14 protein under different cellular conditions.	Inquiry
HLA-E*01:140 Genomic Plasmid Vector	PHLAG825417613	Plasmid vector containing HLA-E*01:140 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:140 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:140 protein under different cellular conditions.	Inquiry
HLA-E*01:141N Genomic Plasmid Vector	PHLAG825417614	Plasmid vector containing HLA-E*01:141N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:141N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:141N protein under different cellular conditions.	Inquiry
HLA-E*01:142 Genomic Plasmid Vector	PHLAG825417615	Plasmid vector containing HLA-E*01:142 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:142 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:142 protein under different cellular conditions.	Inquiry
HLA-E*01:143 Genomic Plasmid Vector	PHLAG825417616	Plasmid vector containing HLA-E*01:143 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:143 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:143 protein under different cellular conditions.	Inquiry
HLA-E*01:144 Genomic Plasmid Vector	PHLAG825417617	Plasmid vector containing HLA-E*01:144 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:144 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:144 protein under different cellular conditions.	Inquiry

HLA-E*01:145 Genomic Plasmid Vector	PHLAG82541768	Plasmid vector containing HLA-E*01:145 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:145 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:145 protein under different cellular conditions.	Inquiry
HLA-E*01:146 Genomic Plasmid Vector	PHLAG82541769	Plasmid vector containing HLA-E*01:146 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:146 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:146 protein under different cellular conditions.	Inquiry
HLA-E*01:147 Genomic Plasmid Vector	PHLAG82541770	Plasmid vector containing HLA-E*01:147 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:147 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:147 protein under different cellular conditions.	Inquiry
HLA-E*01:148 Genomic Plasmid Vector	PHLAG82541771	Plasmid vector containing HLA-E*01:148 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:148 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:148 protein under different cellular conditions.	Inquiry
HLA-E*01:149 Genomic Plasmid Vector	PHLAG82541772	Plasmid vector containing HLA-E*01:149 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:149 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:149 protein under different cellular conditions.	Inquiry
HLA-E*01:15 Genomic Plasmid Vector	PHLAG82541773	Plasmid vector containing HLA-E*01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:15 protein under different cellular conditions.	Inquiry
HLA-E*01:150 Genomic Plasmid Vector	PHLAG82541774	Plasmid vector containing HLA-E*01:150 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:150 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:150 protein under different cellular conditions.	Inquiry
HLA-E*01:151 Genomic Plasmid Vector	PHLAG82541775	Plasmid vector containing HLA-E*01:151 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:151 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:151 protein under different cellular conditions.	Inquiry
HLA-E*01:152 Genomic Plasmid Vector	PHLAG82541776	Plasmid vector containing HLA-E*01:152 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:152 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:152 protein under different cellular conditions.	Inquiry

HLA-E*01:153 Genomic Plasmid Vector	PHLAG82541777	Plasmid vector containing HLA-E*01:153 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:153 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:153 protein under different cellular conditions.	Inquiry
HLA-E*01:154 Genomic Plasmid Vector	PHLAG82541778	Plasmid vector containing HLA-E*01:154 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:154 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:154 protein under different cellular conditions.	Inquiry
HLA-E*01:16:01 Genomic Plasmid Vector	PHLAG82541779	Plasmid vector containing HLA-E*01:16:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:16:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:16:01 protein under different cellular conditions.	Inquiry
HLA-E*01:16:02 Genomic Plasmid Vector	PHLAG82541780	Plasmid vector containing HLA-E*01:16:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:16:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:16:02 protein under different cellular conditions.	Inquiry
HLA-E*01:17 Genomic Plasmid Vector	PHLAG82541781	Plasmid vector containing HLA-E*01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:17 protein under different cellular conditions.	Inquiry
HLA-E*01:18 Genomic Plasmid Vector	PHLAG82541782	Plasmid vector containing HLA-E*01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:18 protein under different cellular conditions.	Inquiry
HLA-E*01:19 Genomic Plasmid Vector	PHLAG82541783	Plasmid vector containing HLA-E*01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:19 protein under different cellular conditions.	Inquiry
HLA-E*01:20 Genomic Plasmid Vector	PHLAG82541784	Plasmid vector containing HLA-E*01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:20 protein under different cellular conditions.	Inquiry
HLA-E*01:21:01N Genomic Plasmid Vector	PHLAG82541785	Plasmid vector containing HLA-E*01:21:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:21:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:21:01N protein under different cellular conditions.	Inquiry

HLA-E*01:21:02N Genomic Plasmid Vector	PHLAG82541786	Plasmid vector containing HLA-E*01:21:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:21:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:21:02N protein under different cellular conditions.	Inquiry
HLA-E*01:22 Genomic Plasmid Vector	PHLAG82541787	Plasmid vector containing HLA-E*01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:22 protein under different cellular conditions.	Inquiry
HLA-E*01:23 Genomic Plasmid Vector	PHLAG82541788	Plasmid vector containing HLA-E*01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:23 protein under different cellular conditions.	Inquiry
HLA-E*01:24 Genomic Plasmid Vector	PHLAG82541789	Plasmid vector containing HLA-E*01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:24 protein under different cellular conditions.	Inquiry
HLA-E*01:25N Genomic Plasmid Vector	PHLAG82541790	Plasmid vector containing HLA-E*01:25N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:25N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:25N protein under different cellular conditions.	Inquiry
HLA-E*01:26 Genomic Plasmid Vector	PHLAG82541791	Plasmid vector containing HLA-E*01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:26 protein under different cellular conditions.	Inquiry
HLA-E*01:27 Genomic Plasmid Vector	PHLAG82541792	Plasmid vector containing HLA-E*01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:27 protein under different cellular conditions.	Inquiry
HLA-E*01:28 Genomic Plasmid Vector	PHLAG82541793	Plasmid vector containing HLA-E*01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:28 protein under different cellular conditions.	Inquiry
HLA-E*01:29 Genomic Plasmid Vector	PHLAG82541794	Plasmid vector containing HLA-E*01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:29 protein under different cellular conditions.	Inquiry

HLA-E*01:30 Genomic Plasmid Vector	PHLAG82541795	Plasmid vector containing HLA-E*01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:30 protein under different cellular conditions.	Inquiry
HLA-E*01:31 Genomic Plasmid Vector	PHLAG82541796	Plasmid vector containing HLA-E*01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:31 protein under different cellular conditions.	Inquiry
HLA-E*01:32:01 Genomic Plasmid Vector	PHLAG82541797	Plasmid vector containing HLA-E*01:32:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:32:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:32:01 protein under different cellular conditions.	Inquiry
HLA-E*01:32:02 Genomic Plasmid Vector	PHLAG82541798	Plasmid vector containing HLA-E*01:32:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:32:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:32:02 protein under different cellular conditions.	Inquiry
HLA-E*01:33 Genomic Plasmid Vector	PHLAG82541799	Plasmid vector containing HLA-E*01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:33 protein under different cellular conditions.	Inquiry
HLA-E*01:34 Genomic Plasmid Vector	PHLAG825418000	Plasmid vector containing HLA-E*01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:34 protein under different cellular conditions.	Inquiry
HLA-E*01:35 Genomic Plasmid Vector	PHLAG825418001	Plasmid vector containing HLA-E*01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:35 protein under different cellular conditions.	Inquiry
HLA-E*01:36 Genomic Plasmid Vector	PHLAG825418002	Plasmid vector containing HLA-E*01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:36 protein under different cellular conditions.	Inquiry
HLA-E*01:37 Genomic Plasmid Vector	PHLAG825418003	Plasmid vector containing HLA-E*01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:37 protein under different cellular conditions.	Inquiry

HLA-E*01:38 Genomic Plasmid Vector	PHLAG82541804	Plasmid vector containing HLA-E*01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:38 protein under different cellular conditions.	Inquiry
HLA-E*01:39 Genomic Plasmid Vector	PHLAG82541805	Plasmid vector containing HLA-E*01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:39 protein under different cellular conditions.	Inquiry
HLA-E*01:40:01 Genomic Plasmid Vector	PHLAG82541806	Plasmid vector containing HLA-E*01:40:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:40:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:40:01 protein under different cellular conditions.	Inquiry
HLA-E*01:40:02 Genomic Plasmid Vector	PHLAG82541807	Plasmid vector containing HLA-E*01:40:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:40:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:40:02 protein under different cellular conditions.	Inquiry
HLA-E*01:41:01:01 Genomic Plasmid Vector	PHLAG82541808	Plasmid vector containing HLA-E*01:41:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:41:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:41:01:01 protein under different cellular conditions.	Inquiry
HLA-E*01:41:01:02 Genomic Plasmid Vector	PHLAG82541809	Plasmid vector containing HLA-E*01:41:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:41:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:41:01:02 protein under different cellular conditions.	Inquiry
HLA-E*01:42 Genomic Plasmid Vector	PHLAG825418110	Plasmid vector containing HLA-E*01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:42 protein under different cellular conditions.	Inquiry
HLA-E*01:43 Genomic Plasmid Vector	PHLAG825418111	Plasmid vector containing HLA-E*01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:43 protein under different cellular conditions.	Inquiry
HLA-E*01:44 Genomic Plasmid Vector	PHLAG825418112	Plasmid vector containing HLA-E*01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:44 protein under different cellular conditions.	Inquiry

HLA-E*01:45 Genomic Plasmid Vector	PHLAG82541813	Plasmid vector containing HLA-E*01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:45 protein under different cellular conditions.	Inquiry
HLA-E*01:46 Genomic Plasmid Vector	PHLAG82541814	Plasmid vector containing HLA-E*01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:46 protein under different cellular conditions.	Inquiry
HLA-E*01:47 Genomic Plasmid Vector	PHLAG82541815	Plasmid vector containing HLA-E*01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:47 protein under different cellular conditions.	Inquiry
HLA-E*01:48 Genomic Plasmid Vector	PHLAG82541816	Plasmid vector containing HLA-E*01:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:48 protein under different cellular conditions.	Inquiry
HLA-E*01:49 Genomic Plasmid Vector	PHLAG82541817	Plasmid vector containing HLA-E*01:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:49 protein under different cellular conditions.	Inquiry
HLA-E*01:50 Genomic Plasmid Vector	PHLAG82541818	Plasmid vector containing HLA-E*01:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:50 protein under different cellular conditions.	Inquiry
HLA-E*01:51 Genomic Plasmid Vector	PHLAG82541819	Plasmid vector containing HLA-E*01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:51 protein under different cellular conditions.	Inquiry
HLA-E*01:52 Genomic Plasmid Vector	PHLAG82541820	Plasmid vector containing HLA-E*01:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:52 protein under different cellular conditions.	Inquiry
HLA-E*01:53 Genomic Plasmid Vector	PHLAG82541821	Plasmid vector containing HLA-E*01:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:53 protein under different cellular conditions.	Inquiry

HLA-E*01:54:01 Genomic Plasmid Vector	PHLAG82541822	Plasmid vector containing HLA-E*01:54:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:54:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:54:01 protein under different cellular conditions.	Inquiry
HLA-E*01:54:02 Genomic Plasmid Vector	PHLAG82541823	Plasmid vector containing HLA-E*01:54:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:54:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:54:02 protein under different cellular conditions.	Inquiry
HLA-E*01:55N Genomic Plasmid Vector	PHLAG82541824	Plasmid vector containing HLA-E*01:55N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:55N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:55N protein under different cellular conditions.	Inquiry
HLA-E*01:56 Genomic Plasmid Vector	PHLAG82541825	Plasmid vector containing HLA-E*01:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:56 protein under different cellular conditions.	Inquiry
HLA-E*01:57 Genomic Plasmid Vector	PHLAG82541826	Plasmid vector containing HLA-E*01:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:57 protein under different cellular conditions.	Inquiry
HLA-E*01:58 Genomic Plasmid Vector	PHLAG82541827	Plasmid vector containing HLA-E*01:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:58 protein under different cellular conditions.	Inquiry
HLA-E*01:59 Genomic Plasmid Vector	PHLAG82541828	Plasmid vector containing HLA-E*01:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:59 protein under different cellular conditions.	Inquiry
HLA-E*01:60 Genomic Plasmid Vector	PHLAG82541829	Plasmid vector containing HLA-E*01:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:60 protein under different cellular conditions.	Inquiry
HLA-E*01:61 Genomic Plasmid Vector	PHLAG82541830	Plasmid vector containing HLA-E*01:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:61 protein under different cellular conditions.	Inquiry

HLA-E*01:62 Genomic Plasmid Vector	PHLAG82541831	Plasmid vector containing HLA-E*01:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:62 protein under different cellular conditions.	Inquiry
HLA-E*01:63 Genomic Plasmid Vector	PHLAG82541832	Plasmid vector containing HLA-E*01:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:63 protein under different cellular conditions.	Inquiry
HLA-E*01:64 Genomic Plasmid Vector	PHLAG82541833	Plasmid vector containing HLA-E*01:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:64 protein under different cellular conditions.	Inquiry
HLA-E*01:65 Genomic Plasmid Vector	PHLAG82541834	Plasmid vector containing HLA-E*01:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:65 protein under different cellular conditions.	Inquiry
HLA-E*01:66 Genomic Plasmid Vector	PHLAG82541835	Plasmid vector containing HLA-E*01:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:66 protein under different cellular conditions.	Inquiry
HLA-E*01:67 Genomic Plasmid Vector	PHLAG82541836	Plasmid vector containing HLA-E*01:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:67 protein under different cellular conditions.	Inquiry
HLA-E*01:68Q Genomic Plasmid Vector	PHLAG82541837	Plasmid vector containing HLA-E*01:68Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:68Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:68Q protein under different cellular conditions.	Inquiry
HLA-E*01:69 Genomic Plasmid Vector	PHLAG82541838	Plasmid vector containing HLA-E*01:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:69 protein under different cellular conditions.	Inquiry
HLA-E*01:70 Genomic Plasmid Vector	PHLAG82541839	Plasmid vector containing HLA-E*01:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:70 protein under different cellular conditions.	Inquiry

HLA-E*01:71 Genomic Plasmid Vector	PHLAG82541840	Plasmid vector containing HLA-E*01:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:71 protein under different cellular conditions.	Inquiry
HLA-E*01:72:01:01 Genomic Plasmid Vector	PHLAG82541841	Plasmid vector containing HLA-E*01:72:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:72:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:72:01:01 protein under different cellular conditions.	Inquiry
HLA-E*01:72:01:02 Genomic Plasmid Vector	PHLAG82541842	Plasmid vector containing HLA-E*01:72:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:72:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:72:01:02 protein under different cellular conditions.	Inquiry
HLA-E*01:73 Genomic Plasmid Vector	PHLAG82541843	Plasmid vector containing HLA-E*01:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:73 protein under different cellular conditions.	Inquiry
HLA-E*01:74 Genomic Plasmid Vector	PHLAG82541844	Plasmid vector containing HLA-E*01:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:74 protein under different cellular conditions.	Inquiry
HLA-E*01:75 Genomic Plasmid Vector	PHLAG82541845	Plasmid vector containing HLA-E*01:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:75 protein under different cellular conditions.	Inquiry
HLA-E*01:76 Genomic Plasmid Vector	PHLAG82541846	Plasmid vector containing HLA-E*01:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:76 protein under different cellular conditions.	Inquiry
HLA-E*01:77 Genomic Plasmid Vector	PHLAG82541847	Plasmid vector containing HLA-E*01:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:77 protein under different cellular conditions.	Inquiry
HLA-E*01:78 Genomic Plasmid Vector	PHLAG82541848	Plasmid vector containing HLA-E*01:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:78 protein under different cellular conditions.	Inquiry

HLA-E*01:79 Genomic Plasmid Vector	PHLAG82541849	Plasmid vector containing HLA-E*01:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:79 protein under different cellular conditions.	Inquiry
HLA-E*01:80 Genomic Plasmid Vector	PHLAG82541850	Plasmid vector containing HLA-E*01:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:80 protein under different cellular conditions.	Inquiry
HLA-E*01:81 Genomic Plasmid Vector	PHLAG82541851	Plasmid vector containing HLA-E*01:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:81 protein under different cellular conditions.	Inquiry
HLA-E*01:82 Genomic Plasmid Vector	PHLAG82541852	Plasmid vector containing HLA-E*01:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:82 protein under different cellular conditions.	Inquiry
HLA-E*01:83 Genomic Plasmid Vector	PHLAG82541853	Plasmid vector containing HLA-E*01:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:83 protein under different cellular conditions.	Inquiry
HLA-E*01:84 Genomic Plasmid Vector	PHLAG82541854	Plasmid vector containing HLA-E*01:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:84 protein under different cellular conditions.	Inquiry
HLA-E*01:85 Genomic Plasmid Vector	PHLAG82541855	Plasmid vector containing HLA-E*01:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:85 protein under different cellular conditions.	Inquiry
HLA-E*01:86 Genomic Plasmid Vector	PHLAG82541856	Plasmid vector containing HLA-E*01:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:86 protein under different cellular conditions.	Inquiry
HLA-E*01:87 Genomic Plasmid Vector	PHLAG82541857	Plasmid vector containing HLA-E*01:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:87 protein under different cellular conditions.	Inquiry

HLA-E*01:88 Genomic Plasmid Vector	PHLAG82541858	Plasmid vector containing HLA-E*01:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:88 protein under different cellular conditions.	Inquiry
HLA-E*01:89 Genomic Plasmid Vector	PHLAG82541859	Plasmid vector containing HLA-E*01:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:89 protein under different cellular conditions.	Inquiry
HLA-E*01:90 Genomic Plasmid Vector	PHLAG82541860	Plasmid vector containing HLA-E*01:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:90 protein under different cellular conditions.	Inquiry
HLA-E*01:91N Genomic Plasmid Vector	PHLAG82541861	Plasmid vector containing HLA-E*01:91N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:91N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:91N protein under different cellular conditions.	Inquiry
HLA-E*01:92 Genomic Plasmid Vector	PHLAG82541862	Plasmid vector containing HLA-E*01:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:92 protein under different cellular conditions.	Inquiry
HLA-E*01:93 Genomic Plasmid Vector	PHLAG82541863	Plasmid vector containing HLA-E*01:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:93 protein under different cellular conditions.	Inquiry
HLA-E*01:94 Genomic Plasmid Vector	PHLAG82541864	Plasmid vector containing HLA-E*01:94 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:94 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:94 protein under different cellular conditions.	Inquiry
HLA-E*01:95 Genomic Plasmid Vector	PHLAG82541865	Plasmid vector containing HLA-E*01:95 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:95 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:95 protein under different cellular conditions.	Inquiry
HLA-E*01:96 Genomic Plasmid Vector	PHLAG82541866	Plasmid vector containing HLA-E*01:96 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:96 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:96 protein under different cellular conditions.	Inquiry

HLA-E*01:97 Genomic Plasmid Vector	PHLAG82541867	Plasmid vector containing HLA-E*01:97 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:97 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:97 protein under different cellular conditions.	Inquiry
HLA-E*01:98 Genomic Plasmid Vector	PHLAG82541868	Plasmid vector containing HLA-E*01:98 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:98 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:98 protein under different cellular conditions.	Inquiry
HLA-E*01:99 Genomic Plasmid Vector	PHLAG82541869	Plasmid vector containing HLA-E*01:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*01:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*01:99 protein under different cellular conditions.	Inquiry
HLA-E*0102 Genomic Plasmid Vector	PHLAG82541870	Plasmid vector containing HLA-E*0102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-E*0102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-E*0102 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:01 Genomic Plasmid Vector	PHLAG82541871	Plasmid vector containing HLA-F*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:02 Genomic Plasmid Vector	PHLAG82541872	Plasmid vector containing HLA-F*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:03 Genomic Plasmid Vector	PHLAG82541873	Plasmid vector containing HLA-F*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:04 Genomic Plasmid Vector	PHLAG82541874	Plasmid vector containing HLA-F*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:04 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:05 Genomic Plasmid Vector	PHLAG82541875	Plasmid vector containing HLA-F*01:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:05 protein under different cellular conditions.	Inquiry

HLA-F*01:01:01:06 Genomic Plasmid Vector	PHLAG82541876	Plasmid vector containing HLA-F*01:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:06 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:07 Genomic Plasmid Vector	PHLAG82541877	Plasmid vector containing HLA-F*01:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:07 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:08 Genomic Plasmid Vector	PHLAG82541878	Plasmid vector containing HLA-F*01:01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:08 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:09 Genomic Plasmid Vector	PHLAG82541879	Plasmid vector containing HLA-F*01:01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:09 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:10 Genomic Plasmid Vector	PHLAG825418880	Plasmid vector containing HLA-F*01:01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:10 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:11 Genomic Plasmid Vector	PHLAG825418881	Plasmid vector containing HLA-F*01:01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:11 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:12 Genomic Plasmid Vector	PHLAG825418882	Plasmid vector containing HLA-F*01:01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:12 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:13 Genomic Plasmid Vector	PHLAG825418883	Plasmid vector containing HLA-F*01:01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:13 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:14 Genomic Plasmid Vector	PHLAG825418884	Plasmid vector containing HLA-F*01:01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:14 protein under different cellular conditions.	Inquiry

HLA-F*01:01:01:15 Genomic Plasmid Vector	PHLAG82541885	Plasmid vector containing HLA-F*01:01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:15 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:16 Genomic Plasmid Vector	PHLAG82541886	Plasmid vector containing HLA-F*01:01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:16 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:17 Genomic Plasmid Vector	PHLAG82541887	Plasmid vector containing HLA-F*01:01:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:17 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:18 Genomic Plasmid Vector	PHLAG82541888	Plasmid vector containing HLA-F*01:01:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:18 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:19 Genomic Plasmid Vector	PHLAG82541889	Plasmid vector containing HLA-F*01:01:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:19 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:20 Genomic Plasmid Vector	PHLAG82541890	Plasmid vector containing HLA-F*01:01:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:20 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:21 Genomic Plasmid Vector	PHLAG82541891	Plasmid vector containing HLA-F*01:01:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:21 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:22 Genomic Plasmid Vector	PHLAG82541892	Plasmid vector containing HLA-F*01:01:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:22 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:23 Genomic Plasmid Vector	PHLAG82541893	Plasmid vector containing HLA-F*01:01:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:23 protein under different cellular conditions.	Inquiry

HLA-F*01:01:01:24 Genomic Plasmid Vector	PHLAG82541894	Plasmid vector containing HLA-F*01:01:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:24 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:25 Genomic Plasmid Vector	PHLAG82541895	Plasmid vector containing HLA-F*01:01:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:25 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:26 Genomic Plasmid Vector	PHLAG82541896	Plasmid vector containing HLA-F*01:01:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:26 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:27 Genomic Plasmid Vector	PHLAG82541897	Plasmid vector containing HLA-F*01:01:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:27 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:28 Genomic Plasmid Vector	PHLAG82541898	Plasmid vector containing HLA-F*01:01:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:28 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:29 Genomic Plasmid Vector	PHLAG82541899	Plasmid vector containing HLA-F*01:01:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:29 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:30 Genomic Plasmid Vector	PHLAG825419000	Plasmid vector containing HLA-F*01:01:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:30 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:31 Genomic Plasmid Vector	PHLAG825419001	Plasmid vector containing HLA-F*01:01:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:31 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:32 Genomic Plasmid Vector	PHLAG825419002	Plasmid vector containing HLA-F*01:01:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:32 protein under different cellular conditions.	Inquiry

HLA-F*01:01:01:33 Genomic Plasmid Vector	PHLAG82541903	Plasmid vector containing HLA-F*01:01:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:33 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:34 Genomic Plasmid Vector	PHLAG82541904	Plasmid vector containing HLA-F*01:01:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:34 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:35 Genomic Plasmid Vector	PHLAG82541905	Plasmid vector containing HLA-F*01:01:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:35 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:36 Genomic Plasmid Vector	PHLAG82541906	Plasmid vector containing HLA-F*01:01:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:36 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:37 Genomic Plasmid Vector	PHLAG82541907	Plasmid vector containing HLA-F*01:01:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:37 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:38 Genomic Plasmid Vector	PHLAG82541908	Plasmid vector containing HLA-F*01:01:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:38 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:39 Genomic Plasmid Vector	PHLAG82541909	Plasmid vector containing HLA-F*01:01:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:39 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:40 Genomic Plasmid Vector	PHLAG82541910	Plasmid vector containing HLA-F*01:01:01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:40 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:41 Genomic Plasmid Vector	PHLAG82541911	Plasmid vector containing HLA-F*01:01:01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:41 protein under different cellular conditions.	Inquiry

HLA-F*01:01:01:42 Genomic Plasmid Vector	PHLAG82541912	Plasmid vector containing HLA-F*01:01:01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:42 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:43 Genomic Plasmid Vector	PHLAG82541913	Plasmid vector containing HLA-F*01:01:01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:43 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:44 Genomic Plasmid Vector	PHLAG82541914	Plasmid vector containing HLA-F*01:01:01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:44 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:45 Genomic Plasmid Vector	PHLAG82541915	Plasmid vector containing HLA-F*01:01:01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:45 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:46 Genomic Plasmid Vector	PHLAG82541916	Plasmid vector containing HLA-F*01:01:01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:46 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:47 Genomic Plasmid Vector	PHLAG82541917	Plasmid vector containing HLA-F*01:01:01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:47 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:48 Genomic Plasmid Vector	PHLAG82541918	Plasmid vector containing HLA-F*01:01:01:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:48 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:49 Genomic Plasmid Vector	PHLAG82541919	Plasmid vector containing HLA-F*01:01:01:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:49 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:50 Genomic Plasmid Vector	PHLAG82541920	Plasmid vector containing HLA-F*01:01:01:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:50 protein under different cellular conditions.	Inquiry

HLA-F*01:01:01:51 Genomic Plasmid Vector	PHLAG82541921	Plasmid vector containing HLA-F*01:01:01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:51 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:52 Genomic Plasmid Vector	PHLAG82541922	Plasmid vector containing HLA-F*01:01:01:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:52 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:53 Genomic Plasmid Vector	PHLAG82541923	Plasmid vector containing HLA-F*01:01:01:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:53 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:54 Genomic Plasmid Vector	PHLAG82541924	Plasmid vector containing HLA-F*01:01:01:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:54 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:55 Genomic Plasmid Vector	PHLAG82541925	Plasmid vector containing HLA-F*01:01:01:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:55 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:56 Genomic Plasmid Vector	PHLAG82541926	Plasmid vector containing HLA-F*01:01:01:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:56 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:57 Genomic Plasmid Vector	PHLAG82541927	Plasmid vector containing HLA-F*01:01:01:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:57 protein under different cellular conditions.	Inquiry
HLA-F*01:01:01:58 Genomic Plasmid Vector	PHLAG82541928	Plasmid vector containing HLA-F*01:01:01:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:01:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:01:58 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:01 Genomic Plasmid Vector	PHLAG82541929	Plasmid vector containing HLA-F*01:01:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:01 protein under different cellular conditions.	Inquiry

HLA-F*01:01:02:02 Genomic Plasmid Vector	PHLAG82541930	Plasmid vector containing HLA-F*01:01:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:02 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:03 Genomic Plasmid Vector	PHLAG82541931	Plasmid vector containing HLA-F*01:01:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:03 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:04 Genomic Plasmid Vector	PHLAG82541932	Plasmid vector containing HLA-F*01:01:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:04 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:05 Genomic Plasmid Vector	PHLAG82541933	Plasmid vector containing HLA-F*01:01:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:05 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:06 Genomic Plasmid Vector	PHLAG82541934	Plasmid vector containing HLA-F*01:01:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:06 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:07 Genomic Plasmid Vector	PHLAG82541935	Plasmid vector containing HLA-F*01:01:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:07 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:08 Genomic Plasmid Vector	PHLAG82541936	Plasmid vector containing HLA-F*01:01:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:08 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:09 Genomic Plasmid Vector	PHLAG82541937	Plasmid vector containing HLA-F*01:01:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:09 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:10 Genomic Plasmid Vector	PHLAG82541938	Plasmid vector containing HLA-F*01:01:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:10 protein under different cellular conditions.	Inquiry

HLA-F*01:01:02:11 Genomic Plasmid Vector	PHLAG82541939	Plasmid vector containing HLA-F*01:01:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:11 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:12 Genomic Plasmid Vector	PHLAG82541940	Plasmid vector containing HLA-F*01:01:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:12 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:13 Genomic Plasmid Vector	PHLAG82541941	Plasmid vector containing HLA-F*01:01:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:13 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:14 Genomic Plasmid Vector	PHLAG82541942	Plasmid vector containing HLA-F*01:01:02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:14 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:15 Genomic Plasmid Vector	PHLAG82541943	Plasmid vector containing HLA-F*01:01:02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:15 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:16 Genomic Plasmid Vector	PHLAG82541944	Plasmid vector containing HLA-F*01:01:02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:16 protein under different cellular conditions.	Inquiry
HLA-F*01:01:02:17 Genomic Plasmid Vector	PHLAG82541945	Plasmid vector containing HLA-F*01:01:02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:02:17 protein under different cellular conditions.	Inquiry
HLA-F*01:01:03:01 Genomic Plasmid Vector	PHLAG82541946	Plasmid vector containing HLA-F*01:01:03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:03:01 protein under different cellular conditions.	Inquiry
HLA-F*01:01:03:02 Genomic Plasmid Vector	PHLAG82541947	Plasmid vector containing HLA-F*01:01:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:03:02 protein under different cellular conditions.	Inquiry

HLA-F*01:01:03:03 Genomic Plasmid Vector	PHLAG82541948	Plasmid vector containing HLA-F*01:01:03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:03:03 protein under different cellular conditions.	Inquiry
HLA-F*01:01:03:04 Genomic Plasmid Vector	PHLAG82541949	Plasmid vector containing HLA-F*01:01:03:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:03:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:03:04 protein under different cellular conditions.	Inquiry
HLA-F*01:01:04 Genomic Plasmid Vector	PHLAG82541950	Plasmid vector containing HLA-F*01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:04 protein under different cellular conditions.	Inquiry
HLA-F*01:01:05 Genomic Plasmid Vector	PHLAG82541951	Plasmid vector containing HLA-F*01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:05 protein under different cellular conditions.	Inquiry
HLA-F*01:01:06 Genomic Plasmid Vector	PHLAG82541952	Plasmid vector containing HLA-F*01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:06 protein under different cellular conditions.	Inquiry
HLA-F*01:01:07 Genomic Plasmid Vector	PHLAG82541953	Plasmid vector containing HLA-F*01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:07 protein under different cellular conditions.	Inquiry
HLA-F*01:01:08 Genomic Plasmid Vector	PHLAG82541954	Plasmid vector containing HLA-F*01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:08 protein under different cellular conditions.	Inquiry
HLA-F*01:01:09 Genomic Plasmid Vector	PHLAG82541955	Plasmid vector containing HLA-F*01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:09 protein under different cellular conditions.	Inquiry
HLA-F*01:01:10 Genomic Plasmid Vector	PHLAG82541956	Plasmid vector containing HLA-F*01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:10 protein under different cellular conditions.	Inquiry

HLA-F*01:01:11 Genomic Plasmid Vector	PHLAG82541957	Plasmid vector containing HLA-F*01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:11 protein under different cellular conditions.	Inquiry
HLA-F*01:01:12 Genomic Plasmid Vector	PHLAG82541958	Plasmid vector containing HLA-F*01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:01:12 protein under different cellular conditions.	Inquiry
HLA-F*01:02:01:01 Genomic Plasmid Vector	PHLAG82541959	Plasmid vector containing HLA-F*01:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:02:01:01 protein under different cellular conditions.	Inquiry
HLA-F*01:02:01:02 Genomic Plasmid Vector	PHLAG825419610	Plasmid vector containing HLA-F*01:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:02:01:02 protein under different cellular conditions.	Inquiry
HLA-F*01:03:01:01 Genomic Plasmid Vector	PHLAG825419611	Plasmid vector containing HLA-F*01:03:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:03:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:03:01:01 protein under different cellular conditions.	Inquiry
HLA-F*01:03:01:02 Genomic Plasmid Vector	PHLAG825419612	Plasmid vector containing HLA-F*01:03:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:03:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:03:01:02 protein under different cellular conditions.	Inquiry
HLA-F*01:03:01:03 Genomic Plasmid Vector	PHLAG825419613	Plasmid vector containing HLA-F*01:03:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:03:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:03:01:03 protein under different cellular conditions.	Inquiry
HLA-F*01:03:01:04 Genomic Plasmid Vector	PHLAG825419614	Plasmid vector containing HLA-F*01:03:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:03:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:03:01:04 protein under different cellular conditions.	Inquiry
HLA-F*01:03:01:05 Genomic Plasmid Vector	PHLAG825419615	Plasmid vector containing HLA-F*01:03:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:03:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:03:01:05 protein under different cellular conditions.	Inquiry

HLA-F*01:03:01:06 Genomic Plasmid Vector	PHLAG82541966	Plasmid vector containing HLA-F*01:03:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:03:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:03:01:06 protein under different cellular conditions.	Inquiry
HLA-F*01:03:02 Genomic Plasmid Vector	PHLAG82541967	Plasmid vector containing HLA-F*01:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:03:02 protein under different cellular conditions.	Inquiry
HLA-F*01:04:01:01 Genomic Plasmid Vector	PHLAG82541968	Plasmid vector containing HLA-F*01:04:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:04:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:04:01:01 protein under different cellular conditions.	Inquiry
HLA-F*01:04:01:02 Genomic Plasmid Vector	PHLAG82541969	Plasmid vector containing HLA-F*01:04:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:04:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:04:01:02 protein under different cellular conditions.	Inquiry
HLA-F*01:05:01:01 Genomic Plasmid Vector	PHLAG82541970	Plasmid vector containing HLA-F*01:05:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:05:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:05:01:01 protein under different cellular conditions.	Inquiry
HLA-F*01:05:01:02 Genomic Plasmid Vector	PHLAG82541971	Plasmid vector containing HLA-F*01:05:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:05:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:05:01:02 protein under different cellular conditions.	Inquiry
HLA-F*01:06 Genomic Plasmid Vector	PHLAG82541972	Plasmid vector containing HLA-F*01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:06 protein under different cellular conditions.	Inquiry
HLA-F*01:07 Genomic Plasmid Vector	PHLAG82541973	Plasmid vector containing HLA-F*01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:07 protein under different cellular conditions.	Inquiry
HLA-F*01:08 Genomic Plasmid Vector	PHLAG82541974	Plasmid vector containing HLA-F*01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:08 protein under different cellular conditions.	Inquiry

HLA-F*01:09 Genomic Plasmid Vector	PHLAG82541975	Plasmid vector containing HLA-F*01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:09 protein under different cellular conditions.	Inquiry
HLA-F*01:10 Genomic Plasmid Vector	PHLAG82541976	Plasmid vector containing HLA-F*01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:10 protein under different cellular conditions.	Inquiry
HLA-F*01:11 Genomic Plasmid Vector	PHLAG82541977	Plasmid vector containing HLA-F*01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:11 protein under different cellular conditions.	Inquiry
HLA-F*01:12 Genomic Plasmid Vector	PHLAG82541978	Plasmid vector containing HLA-F*01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:12 protein under different cellular conditions.	Inquiry
HLA-F*01:13N Genomic Plasmid Vector	PHLAG82541979	Plasmid vector containing HLA-F*01:13N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:13N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:13N protein under different cellular conditions.	Inquiry
HLA-F*01:14:01:01N Genomic Plasmid Vector	PHLAG82541980	Plasmid vector containing HLA-F*01:14:01:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:14:01:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:14:01:01N protein under different cellular conditions.	Inquiry
HLA-F*01:14:01:02N Genomic Plasmid Vector	PHLAG82541981	Plasmid vector containing HLA-F*01:14:01:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:14:01:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:14:01:02N protein under different cellular conditions.	Inquiry
HLA-F*01:15 Genomic Plasmid Vector	PHLAG82541982	Plasmid vector containing HLA-F*01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:15 protein under different cellular conditions.	Inquiry
HLA-F*01:16 Genomic Plasmid Vector	PHLAG82541983	Plasmid vector containing HLA-F*01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:16 protein under different cellular conditions.	Inquiry

HLA-F*01:17 Genomic Plasmid Vector	PHLAG82541984	Plasmid vector containing HLA-F*01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:17 protein under different cellular conditions.	Inquiry
HLA-F*01:18 Genomic Plasmid Vector	PHLAG82541985	Plasmid vector containing HLA-F*01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:18 protein under different cellular conditions.	Inquiry
HLA-F*01:19 Genomic Plasmid Vector	PHLAG82541986	Plasmid vector containing HLA-F*01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:19 protein under different cellular conditions.	Inquiry
HLA-F*01:20 Genomic Plasmid Vector	PHLAG82541987	Plasmid vector containing HLA-F*01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:20 protein under different cellular conditions.	Inquiry
HLA-F*01:21 Genomic Plasmid Vector	PHLAG82541988	Plasmid vector containing HLA-F*01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:21 protein under different cellular conditions.	Inquiry
HLA-F*01:22 Genomic Plasmid Vector	PHLAG82541989	Plasmid vector containing HLA-F*01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:22 protein under different cellular conditions.	Inquiry
HLA-F*01:23 Genomic Plasmid Vector	PHLAG82541990	Plasmid vector containing HLA-F*01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:23 protein under different cellular conditions.	Inquiry
HLA-F*01:24 Genomic Plasmid Vector	PHLAG82541991	Plasmid vector containing HLA-F*01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:24 protein under different cellular conditions.	Inquiry
HLA-F*01:25 Genomic Plasmid Vector	PHLAG82541992	Plasmid vector containing HLA-F*01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:25 protein under different cellular conditions.	Inquiry

HLA-F*01:26 Genomic Plasmid Vector	PHLAG82541993	Plasmid vector containing HLA-F*01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:26 protein under different cellular conditions.	Inquiry
HLA-F*01:27 Genomic Plasmid Vector	PHLAG82541994	Plasmid vector containing HLA-F*01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:27 protein under different cellular conditions.	Inquiry
HLA-F*01:28 Genomic Plasmid Vector	PHLAG82541995	Plasmid vector containing HLA-F*01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:28 protein under different cellular conditions.	Inquiry
HLA-F*01:29 Genomic Plasmid Vector	PHLAG82541996	Plasmid vector containing HLA-F*01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-F*01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-F*01:29 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:01 Genomic Plasmid Vector	PHLAG82541997	Plasmid vector containing HLA-G*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:02 Genomic Plasmid Vector	PHLAG82541998	Plasmid vector containing HLA-G*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:03 Genomic Plasmid Vector	PHLAG82541999	Plasmid vector containing HLA-G*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:04 Genomic Plasmid Vector	PHLAG82542000	Plasmid vector containing HLA-G*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:04 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:05 Genomic Plasmid Vector	PHLAG82542001	Plasmid vector containing HLA-G*01:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:05 protein under different cellular conditions.	Inquiry

HLA-G*01:01:01:06 Genomic Plasmid Vector	PHLAG82542002	Plasmid vector containing HLA-G*01:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:06 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:07 Genomic Plasmid Vector	PHLAG82542003	Plasmid vector containing HLA-G*01:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:07 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:08 Genomic Plasmid Vector	PHLAG82542004	Plasmid vector containing HLA-G*01:01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:08 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:09 Genomic Plasmid Vector	PHLAG82542005	Plasmid vector containing HLA-G*01:01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:09 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:10 Genomic Plasmid Vector	PHLAG82542006	Plasmid vector containing HLA-G*01:01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:10 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:11 Genomic Plasmid Vector	PHLAG82542007	Plasmid vector containing HLA-G*01:01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:11 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:12 Genomic Plasmid Vector	PHLAG82542008	Plasmid vector containing HLA-G*01:01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:12 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:13 Genomic Plasmid Vector	PHLAG82542009	Plasmid vector containing HLA-G*01:01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:13 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:14Q Genomic Plasmid Vector	PHLAG82542010	Plasmid vector containing HLA-G*01:01:01:14Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:14Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:14Q protein under different cellular conditions.	Inquiry

HLA-G*01:01:01:15 Genomic Plasmid Vector	PHLAG82542011	Plasmid vector containing HLA-G*01:01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:15 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:16 Genomic Plasmid Vector	PHLAG82542012	Plasmid vector containing HLA-G*01:01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:16 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:17 Genomic Plasmid Vector	PHLAG82542013	Plasmid vector containing HLA-G*01:01:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:17 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:18 Genomic Plasmid Vector	PHLAG82542014	Plasmid vector containing HLA-G*01:01:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:18 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:19 Genomic Plasmid Vector	PHLAG82542015	Plasmid vector containing HLA-G*01:01:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:19 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:20 Genomic Plasmid Vector	PHLAG82542016	Plasmid vector containing HLA-G*01:01:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:20 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:21 Genomic Plasmid Vector	PHLAG82542017	Plasmid vector containing HLA-G*01:01:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:21 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:22 Genomic Plasmid Vector	PHLAG82542018	Plasmid vector containing HLA-G*01:01:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:22 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:23 Genomic Plasmid Vector	PHLAG82542019	Plasmid vector containing HLA-G*01:01:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:23 protein under different cellular conditions.	Inquiry

HLA-G*01:01:01:24 Genomic Plasmid Vector	PHLAG82542020	Plasmid vector containing HLA-G*01:01:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:24 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:25 Genomic Plasmid Vector	PHLAG82542021	Plasmid vector containing HLA-G*01:01:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:25 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:26 Genomic Plasmid Vector	PHLAG82542022	Plasmid vector containing HLA-G*01:01:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:26 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:27 Genomic Plasmid Vector	PHLAG82542023	Plasmid vector containing HLA-G*01:01:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:27 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:28 Genomic Plasmid Vector	PHLAG82542024	Plasmid vector containing HLA-G*01:01:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:28 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:29 Genomic Plasmid Vector	PHLAG82542025	Plasmid vector containing HLA-G*01:01:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:29 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:30 Genomic Plasmid Vector	PHLAG82542026	Plasmid vector containing HLA-G*01:01:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:30 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:31 Genomic Plasmid Vector	PHLAG82542027	Plasmid vector containing HLA-G*01:01:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:31 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:32 Genomic Plasmid Vector	PHLAG82542028	Plasmid vector containing HLA-G*01:01:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:32 protein under different cellular conditions.	Inquiry

HLA-G*01:01:01:33 Genomic Plasmid Vector	PHLAG82542029	Plasmid vector containing HLA-G*01:01:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:33 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:34 Genomic Plasmid Vector	PHLAG825420330	Plasmid vector containing HLA-G*01:01:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:34 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:35 Genomic Plasmid Vector	PHLAG825420331	Plasmid vector containing HLA-G*01:01:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:35 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:36 Genomic Plasmid Vector	PHLAG825420332	Plasmid vector containing HLA-G*01:01:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:36 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:37 Genomic Plasmid Vector	PHLAG825420333	Plasmid vector containing HLA-G*01:01:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:37 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:38 Genomic Plasmid Vector	PHLAG825420334	Plasmid vector containing HLA-G*01:01:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:38 protein under different cellular conditions.	Inquiry
HLA-G*01:01:01:39 Genomic Plasmid Vector	PHLAG825420335	Plasmid vector containing HLA-G*01:01:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:01:39 protein under different cellular conditions.	Inquiry
HLA-G*01:01:02:01 Genomic Plasmid Vector	PHLAG825420336	Plasmid vector containing HLA-G*01:01:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:01 protein under different cellular conditions.	Inquiry
HLA-G*01:01:02:02 Genomic Plasmid Vector	PHLAG825420337	Plasmid vector containing HLA-G*01:01:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:02 protein under different cellular conditions.	Inquiry

HLA-G*01:01:02:03 Genomic Plasmid Vector	PHLAG82542038	Plasmid vector containing HLA-G*01:01:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:03 protein under different cellular conditions.	Inquiry
HLA-G*01:01:02:04 Genomic Plasmid Vector	PHLAG82542039	Plasmid vector containing HLA-G*01:01:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:04 protein under different cellular conditions.	Inquiry
HLA-G*01:01:02:05Q Genomic Plasmid Vector	PHLAG82542040	Plasmid vector containing HLA-G*01:01:02:05Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:05Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:05Q protein under different cellular conditions.	Inquiry
HLA-G*01:01:02:06 Genomic Plasmid Vector	PHLAG82542041	Plasmid vector containing HLA-G*01:01:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:06 protein under different cellular conditions.	Inquiry
HLA-G*01:01:02:07 Genomic Plasmid Vector	PHLAG82542042	Plasmid vector containing HLA-G*01:01:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:07 protein under different cellular conditions.	Inquiry
HLA-G*01:01:02:08 Genomic Plasmid Vector	PHLAG82542043	Plasmid vector containing HLA-G*01:01:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:08 protein under different cellular conditions.	Inquiry
HLA-G*01:01:02:09 Genomic Plasmid Vector	PHLAG82542044	Plasmid vector containing HLA-G*01:01:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:09 protein under different cellular conditions.	Inquiry
HLA-G*01:01:02:10 Genomic Plasmid Vector	PHLAG82542045	Plasmid vector containing HLA-G*01:01:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:10 protein under different cellular conditions.	Inquiry
HLA-G*01:01:02:11 Genomic Plasmid Vector	PHLAG82542046	Plasmid vector containing HLA-G*01:01:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:11 protein under different cellular conditions.	Inquiry

HLA-G*01:01:02:12 Genomic Plasmid Vector	PHLAG82542047	Plasmid vector containing HLA-G*01:01:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:12 protein under different cellular conditions.	Inquiry
HLA-G*01:01:02:13 Genomic Plasmid Vector	PHLAG82542048	Plasmid vector containing HLA-G*01:01:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:13 protein under different cellular conditions.	Inquiry
HLA-G*01:01:02:14 Genomic Plasmid Vector	PHLAG82542049	Plasmid vector containing HLA-G*01:01:02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:02:14 protein under different cellular conditions.	Inquiry
HLA-G*01:01:03:01 Genomic Plasmid Vector	PHLAG82542050	Plasmid vector containing HLA-G*01:01:03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:03:01 protein under different cellular conditions.	Inquiry
HLA-G*01:01:03:02 Genomic Plasmid Vector	PHLAG82542051	Plasmid vector containing HLA-G*01:01:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:03:02 protein under different cellular conditions.	Inquiry
HLA-G*01:01:03:03 Genomic Plasmid Vector	PHLAG82542052	Plasmid vector containing HLA-G*01:01:03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:03:03 protein under different cellular conditions.	Inquiry
HLA-G*01:01:03:04 Genomic Plasmid Vector	PHLAG82542053	Plasmid vector containing HLA-G*01:01:03:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:03:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:03:04 protein under different cellular conditions.	Inquiry
HLA-G*01:01:03:05 Genomic Plasmid Vector	PHLAG82542054	Plasmid vector containing HLA-G*01:01:03:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:03:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:03:05 protein under different cellular conditions.	Inquiry
HLA-G*01:01:03:06 Genomic Plasmid Vector	PHLAG82542055	Plasmid vector containing HLA-G*01:01:03:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:03:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:03:06 protein under different cellular conditions.	Inquiry

HLA-G*01:01:04 Genomic Plasmid Vector	PHLAG82542056	Plasmid vector containing HLA-G*01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:04 protein under different cellular conditions.	Inquiry
HLA-G*01:01:05 Genomic Plasmid Vector	PHLAG82542057	Plasmid vector containing HLA-G*01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:05 protein under different cellular conditions.	Inquiry
HLA-G*01:01:06 Genomic Plasmid Vector	PHLAG82542058	Plasmid vector containing HLA-G*01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:06 protein under different cellular conditions.	Inquiry
HLA-G*01:01:07 Genomic Plasmid Vector	PHLAG82542059	Plasmid vector containing HLA-G*01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:07 protein under different cellular conditions.	Inquiry
HLA-G*01:01:08 Genomic Plasmid Vector	PHLAG82542060	Plasmid vector containing HLA-G*01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:08 protein under different cellular conditions.	Inquiry
HLA-G*01:01:09:01 Genomic Plasmid Vector	PHLAG82542061	Plasmid vector containing HLA-G*01:01:09:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:09:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:09:01 protein under different cellular conditions.	Inquiry
HLA-G*01:01:09:02 Genomic Plasmid Vector	PHLAG82542062	Plasmid vector containing HLA-G*01:01:09:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:09:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:09:02 protein under different cellular conditions.	Inquiry
HLA-G*01:01:11 Genomic Plasmid Vector	PHLAG82542063	Plasmid vector containing HLA-G*01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:11 protein under different cellular conditions.	Inquiry
HLA-G*01:01:12 Genomic Plasmid Vector	PHLAG82542064	Plasmid vector containing HLA-G*01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:12 protein under different cellular conditions.	Inquiry

HLA-G*01:01:13 Genomic Plasmid Vector	PHLAG82542065	Plasmid vector containing HLA-G*01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:13 protein under different cellular conditions.	Inquiry
HLA-G*01:01:14 Genomic Plasmid Vector	PHLAG82542066	Plasmid vector containing HLA-G*01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:14 protein under different cellular conditions.	Inquiry
HLA-G*01:01:15:01 Genomic Plasmid Vector	PHLAG82542067	Plasmid vector containing HLA-G*01:01:15:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:15:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:15:01 protein under different cellular conditions.	Inquiry
HLA-G*01:01:15:02 Genomic Plasmid Vector	PHLAG82542068	Plasmid vector containing HLA-G*01:01:15:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:15:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:15:02 protein under different cellular conditions.	Inquiry
HLA-G*01:01:16 Genomic Plasmid Vector	PHLAG82542069	Plasmid vector containing HLA-G*01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:16 protein under different cellular conditions.	Inquiry
HLA-G*01:01:17 Genomic Plasmid Vector	PHLAG82542070	Plasmid vector containing HLA-G*01:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:17 protein under different cellular conditions.	Inquiry
HLA-G*01:01:18 Genomic Plasmid Vector	PHLAG82542071	Plasmid vector containing HLA-G*01:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:18 protein under different cellular conditions.	Inquiry
HLA-G*01:01:19 Genomic Plasmid Vector	PHLAG82542072	Plasmid vector containing HLA-G*01:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:19 protein under different cellular conditions.	Inquiry
HLA-G*01:01:20 Genomic Plasmid Vector	PHLAG82542073	Plasmid vector containing HLA-G*01:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:20 protein under different cellular conditions.	Inquiry

HLA-G*01:01:21 Genomic Plasmid Vector	PHLAG82542074	Plasmid vector containing HLA-G*01:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:21 protein under different cellular conditions.	Inquiry
HLA-G*01:01:22:01 Genomic Plasmid Vector	PHLAG82542075	Plasmid vector containing HLA-G*01:01:22:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:22:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:22:01 protein under different cellular conditions.	Inquiry
HLA-G*01:01:22:02 Genomic Plasmid Vector	PHLAG82542076	Plasmid vector containing HLA-G*01:01:22:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:22:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:22:02 protein under different cellular conditions.	Inquiry
HLA-G*01:01:22:03 Genomic Plasmid Vector	PHLAG82542077	Plasmid vector containing HLA-G*01:01:22:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:22:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:22:03 protein under different cellular conditions.	Inquiry
HLA-G*01:01:22:04 Genomic Plasmid Vector	PHLAG82542078	Plasmid vector containing HLA-G*01:01:22:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:22:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:22:04 protein under different cellular conditions.	Inquiry
HLA-G*01:01:22:05 Genomic Plasmid Vector	PHLAG82542079	Plasmid vector containing HLA-G*01:01:22:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:22:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:22:05 protein under different cellular conditions.	Inquiry
HLA-G*01:01:22:06 Genomic Plasmid Vector	PHLAG82542080	Plasmid vector containing HLA-G*01:01:22:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:22:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:22:06 protein under different cellular conditions.	Inquiry
HLA-G*01:01:23 Genomic Plasmid Vector	PHLAG82542081	Plasmid vector containing HLA-G*01:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:23 protein under different cellular conditions.	Inquiry
HLA-G*01:01:24 Genomic Plasmid Vector	PHLAG82542082	Plasmid vector containing HLA-G*01:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:24 protein under different cellular conditions.	Inquiry

HLA-G*01:01:25 Genomic Plasmid Vector	PHLAG82542083	Plasmid vector containing HLA-G*01:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:25 protein under different cellular conditions.	Inquiry
HLA-G*01:01:26 Genomic Plasmid Vector	PHLAG82542084	Plasmid vector containing HLA-G*01:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:26 protein under different cellular conditions.	Inquiry
HLA-G*01:01:27 Genomic Plasmid Vector	PHLAG82542085	Plasmid vector containing HLA-G*01:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:27 protein under different cellular conditions.	Inquiry
HLA-G*01:01:28 Genomic Plasmid Vector	PHLAG82542086	Plasmid vector containing HLA-G*01:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:28 protein under different cellular conditions.	Inquiry
HLA-G*01:01:29 Genomic Plasmid Vector	PHLAG82542087	Plasmid vector containing HLA-G*01:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:29 protein under different cellular conditions.	Inquiry
HLA-G*01:01:30:01 Genomic Plasmid Vector	PHLAG82542088	Plasmid vector containing HLA-G*01:01:30:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:30:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:30:01 protein under different cellular conditions.	Inquiry
HLA-G*01:01:30:02 Genomic Plasmid Vector	PHLAG82542089	Plasmid vector containing HLA-G*01:01:30:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:30:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:30:02 protein under different cellular conditions.	Inquiry
HLA-G*01:01:31 Genomic Plasmid Vector	PHLAG82542090	Plasmid vector containing HLA-G*01:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:31 protein under different cellular conditions.	Inquiry
HLA-G*01:01:32 Genomic Plasmid Vector	PHLAG82542091	Plasmid vector containing HLA-G*01:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:32 protein under different cellular conditions.	Inquiry

HLA-G*01:01:33 Genomic Plasmid Vector	PHLAG82542092	Plasmid vector containing HLA-G*01:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:33 protein under different cellular conditions.	Inquiry
HLA-G*01:01:34 Genomic Plasmid Vector	PHLAG82542093	Plasmid vector containing HLA-G*01:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:34 protein under different cellular conditions.	Inquiry
HLA-G*01:01:35 Genomic Plasmid Vector	PHLAG82542094	Plasmid vector containing HLA-G*01:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:01:35 protein under different cellular conditions.	Inquiry
HLA-G*01:02 Genomic Plasmid Vector	PHLAG82542095	Plasmid vector containing HLA-G*01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:02 protein under different cellular conditions.	Inquiry
HLA-G*01:03:01:01 Genomic Plasmid Vector	PHLAG82542096	Plasmid vector containing HLA-G*01:03:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:03:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:03:01:01 protein under different cellular conditions.	Inquiry
HLA-G*01:03:01:02 Genomic Plasmid Vector	PHLAG82542097	Plasmid vector containing HLA-G*01:03:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:03:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:03:01:02 protein under different cellular conditions.	Inquiry
HLA-G*01:04:01:01 Genomic Plasmid Vector	PHLAG82542098	Plasmid vector containing HLA-G*01:04:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:01:01 protein under different cellular conditions.	Inquiry
HLA-G*01:04:01:02 Genomic Plasmid Vector	PHLAG82542099	Plasmid vector containing HLA-G*01:04:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:01:02 protein under different cellular conditions.	Inquiry
HLA-G*01:04:01:03 Genomic Plasmid Vector	PHLAG825421000	Plasmid vector containing HLA-G*01:04:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:01:03 protein under different cellular conditions.	Inquiry

HLA-G*01:04:01:04Q Genomic Plasmid Vector	PHLAG82542101	Plasmid vector containing HLA-G*01:04:01:04Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:01:04Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:01:04Q protein under different cellular conditions.	Inquiry
HLA-G*01:04:01:05 Genomic Plasmid Vector	PHLAG82542102	Plasmid vector containing HLA-G*01:04:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:01:05 protein under different cellular conditions.	Inquiry
HLA-G*01:04:01:06 Genomic Plasmid Vector	PHLAG82542103	Plasmid vector containing HLA-G*01:04:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:01:06 protein under different cellular conditions.	Inquiry
HLA-G*01:04:01:07 Genomic Plasmid Vector	PHLAG82542104	Plasmid vector containing HLA-G*01:04:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:01:07 protein under different cellular conditions.	Inquiry
HLA-G*01:04:01:08 Genomic Plasmid Vector	PHLAG82542105	Plasmid vector containing HLA-G*01:04:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:01:08 protein under different cellular conditions.	Inquiry
HLA-G*01:04:01:09 Genomic Plasmid Vector	PHLAG82542106	Plasmid vector containing HLA-G*01:04:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:01:09 protein under different cellular conditions.	Inquiry
HLA-G*01:04:01:10 Genomic Plasmid Vector	PHLAG82542107	Plasmid vector containing HLA-G*01:04:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:01:10 protein under different cellular conditions.	Inquiry
HLA-G*01:04:02 Genomic Plasmid Vector	PHLAG82542108	Plasmid vector containing HLA-G*01:04:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:02 protein under different cellular conditions.	Inquiry
HLA-G*01:04:03 Genomic Plasmid Vector	PHLAG82542109	Plasmid vector containing HLA-G*01:04:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:03 protein under different cellular conditions.	Inquiry

HLA-G*01:04:04:01 Genomic Plasmid Vector	PHLAG82542110	Plasmid vector containing HLA-G*01:04:04:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:04:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:04:01 protein under different cellular conditions.	Inquiry
HLA-G*01:04:04:02 Genomic Plasmid Vector	PHLAG82542111	Plasmid vector containing HLA-G*01:04:04:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:04:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:04:02 protein under different cellular conditions.	Inquiry
HLA-G*01:04:05 Genomic Plasmid Vector	PHLAG82542112	Plasmid vector containing HLA-G*01:04:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:05 protein under different cellular conditions.	Inquiry
HLA-G*01:04:06 Genomic Plasmid Vector	PHLAG82542113	Plasmid vector containing HLA-G*01:04:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:06 protein under different cellular conditions.	Inquiry
HLA-G*01:04:07 Genomic Plasmid Vector	PHLAG82542114	Plasmid vector containing HLA-G*01:04:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:07 protein under different cellular conditions.	Inquiry
HLA-G*01:04:08 Genomic Plasmid Vector	PHLAG82542115	Plasmid vector containing HLA-G*01:04:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:08 protein under different cellular conditions.	Inquiry
HLA-G*01:04:09 Genomic Plasmid Vector	PHLAG82542116	Plasmid vector containing HLA-G*01:04:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:09 protein under different cellular conditions.	Inquiry
HLA-G*01:04:10 Genomic Plasmid Vector	PHLAG82542117	Plasmid vector containing HLA-G*01:04:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:10 protein under different cellular conditions.	Inquiry
HLA-G*01:04:11 Genomic Plasmid Vector	PHLAG82542118	Plasmid vector containing HLA-G*01:04:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:04:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:04:11 protein under different cellular conditions.	Inquiry

HLA-G*01:05:01N Genomic Plasmid Vector	PHLAG82542119	Plasmid vector containing HLA-G*01:05:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:05:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:05:01N protein under different cellular conditions.	Inquiry
HLA-G*01:05:02N Genomic Plasmid Vector	PHLAG82542120	Plasmid vector containing HLA-G*01:05:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:05:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:05:02N protein under different cellular conditions.	Inquiry
HLA-G*01:06:01:01 Genomic Plasmid Vector	PHLAG82542121	Plasmid vector containing HLA-G*01:06:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:06:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:06:01:01 protein under different cellular conditions.	Inquiry
HLA-G*01:06:01:02 Genomic Plasmid Vector	PHLAG82542122	Plasmid vector containing HLA-G*01:06:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:06:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:06:01:02 protein under different cellular conditions.	Inquiry
HLA-G*01:06:01:03 Genomic Plasmid Vector	PHLAG82542123	Plasmid vector containing HLA-G*01:06:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:06:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:06:01:03 protein under different cellular conditions.	Inquiry
HLA-G*01:06:02 Genomic Plasmid Vector	PHLAG82542124	Plasmid vector containing HLA-G*01:06:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:06:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:06:02 protein under different cellular conditions.	Inquiry
HLA-G*01:07 Genomic Plasmid Vector	PHLAG82542125	Plasmid vector containing HLA-G*01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:07 protein under different cellular conditions.	Inquiry
HLA-G*01:08:01 Genomic Plasmid Vector	PHLAG82542126	Plasmid vector containing HLA-G*01:08:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:08:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:08:01 protein under different cellular conditions.	Inquiry
HLA-G*01:08:02 Genomic Plasmid Vector	PHLAG82542127	Plasmid vector containing HLA-G*01:08:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:08:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:08:02 protein under different cellular conditions.	Inquiry

HLA-G*01:09 Genomic Plasmid Vector	PHLAG82542128	Plasmid vector containing HLA-G*01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:09 protein under different cellular conditions.	Inquiry
HLA-G*01:10 Genomic Plasmid Vector	PHLAG82542129	Plasmid vector containing HLA-G*01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:10 protein under different cellular conditions.	Inquiry
HLA-G*01:11 Genomic Plasmid Vector	PHLAG82542130	Plasmid vector containing HLA-G*01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:11 protein under different cellular conditions.	Inquiry
HLA-G*01:12 Genomic Plasmid Vector	PHLAG82542131	Plasmid vector containing HLA-G*01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:12 protein under different cellular conditions.	Inquiry
HLA-G*01:13N Genomic Plasmid Vector	PHLAG82542132	Plasmid vector containing HLA-G*01:13N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:13N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:13N protein under different cellular conditions.	Inquiry
HLA-G*01:14 Genomic Plasmid Vector	PHLAG82542133	Plasmid vector containing HLA-G*01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:14 protein under different cellular conditions.	Inquiry
HLA-G*01:15 Genomic Plasmid Vector	PHLAG82542134	Plasmid vector containing HLA-G*01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:15 protein under different cellular conditions.	Inquiry
HLA-G*01:16 Genomic Plasmid Vector	PHLAG82542135	Plasmid vector containing HLA-G*01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:16 protein under different cellular conditions.	Inquiry
HLA-G*01:17 Genomic Plasmid Vector	PHLAG82542136	Plasmid vector containing HLA-G*01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:17 protein under different cellular conditions.	Inquiry

HLA-G*01:18 Genomic Plasmid Vector	PHLAG82542137	Plasmid vector containing HLA-G*01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:18 protein under different cellular conditions.	Inquiry
HLA-G*01:19 Genomic Plasmid Vector	PHLAG82542138	Plasmid vector containing HLA-G*01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:19 protein under different cellular conditions.	Inquiry
HLA-G*01:20 Genomic Plasmid Vector	PHLAG82542139	Plasmid vector containing HLA-G*01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:20 protein under different cellular conditions.	Inquiry
HLA-G*01:21N Genomic Plasmid Vector	PHLAG82542140	Plasmid vector containing HLA-G*01:21N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:21N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:21N protein under different cellular conditions.	Inquiry
HLA-G*01:22 Genomic Plasmid Vector	PHLAG82542141	Plasmid vector containing HLA-G*01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:22 protein under different cellular conditions.	Inquiry
HLA-G*01:23 Genomic Plasmid Vector	PHLAG82542142	Plasmid vector containing HLA-G*01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:23 protein under different cellular conditions.	Inquiry
HLA-G*01:24:01 Genomic Plasmid Vector	PHLAG82542143	Plasmid vector containing HLA-G*01:24:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:24:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:24:01 protein under different cellular conditions.	Inquiry
HLA-G*01:24:02 Genomic Plasmid Vector	PHLAG82542144	Plasmid vector containing HLA-G*01:24:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:24:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:24:02 protein under different cellular conditions.	Inquiry
HLA-G*01:25N Genomic Plasmid Vector	PHLAG82542145	Plasmid vector containing HLA-G*01:25N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:25N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:25N protein under different cellular conditions.	Inquiry

HLA-G*01:26 Genomic Plasmid Vector	PHLAG82542146	Plasmid vector containing HLA-G*01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:26 protein under different cellular conditions.	Inquiry
HLA-G*01:27 Genomic Plasmid Vector	PHLAG82542147	Plasmid vector containing HLA-G*01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:27 protein under different cellular conditions.	Inquiry
HLA-G*01:28N Genomic Plasmid Vector	PHLAG82542148	Plasmid vector containing HLA-G*01:28N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:28N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:28N protein under different cellular conditions.	Inquiry
HLA-G*01:29 Genomic Plasmid Vector	PHLAG82542149	Plasmid vector containing HLA-G*01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:29 protein under different cellular conditions.	Inquiry
HLA-G*01:30 Genomic Plasmid Vector	PHLAG82542150	Plasmid vector containing HLA-G*01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:30 protein under different cellular conditions.	Inquiry
HLA-G*01:31 Genomic Plasmid Vector	PHLAG82542151	Plasmid vector containing HLA-G*01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:31 protein under different cellular conditions.	Inquiry
HLA-G*01:32 Genomic Plasmid Vector	PHLAG82542152	Plasmid vector containing HLA-G*01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:32 protein under different cellular conditions.	Inquiry
HLA-G*01:33 Genomic Plasmid Vector	PHLAG82542153	Plasmid vector containing HLA-G*01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:33 protein under different cellular conditions.	Inquiry
HLA-G*01:34 Genomic Plasmid Vector	PHLAG82542154	Plasmid vector containing HLA-G*01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:34 protein under different cellular conditions.	Inquiry

HLA-G*01:35 Genomic Plasmid Vector	PHLAG82542155	Plasmid vector containing HLA-G*01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:35 protein under different cellular conditions.	Inquiry
HLA-G*01:36Q Genomic Plasmid Vector	PHLAG82542156	Plasmid vector containing HLA-G*01:36Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:36Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:36Q protein under different cellular conditions.	Inquiry
HLA-G*01:37 Genomic Plasmid Vector	PHLAG82542157	Plasmid vector containing HLA-G*01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:37 protein under different cellular conditions.	Inquiry
HLA-G*01:38Q Genomic Plasmid Vector	PHLAG82542158	Plasmid vector containing HLA-G*01:38Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:38Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:38Q protein under different cellular conditions.	Inquiry
HLA-G*01:39 Genomic Plasmid Vector	PHLAG82542159	Plasmid vector containing HLA-G*01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:39 protein under different cellular conditions.	Inquiry
HLA-G*01:40 Genomic Plasmid Vector	PHLAG82542160	Plasmid vector containing HLA-G*01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:40 protein under different cellular conditions.	Inquiry
HLA-G*01:41 Genomic Plasmid Vector	PHLAG82542161	Plasmid vector containing HLA-G*01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:41 protein under different cellular conditions.	Inquiry
HLA-G*01:42 Genomic Plasmid Vector	PHLAG82542162	Plasmid vector containing HLA-G*01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:42 protein under different cellular conditions.	Inquiry
HLA-G*01:43 Genomic Plasmid Vector	PHLAG82542163	Plasmid vector containing HLA-G*01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:43 protein under different cellular conditions.	Inquiry

HLA-G*01:44 Genomic Plasmid Vector	PHLAG82542164	Plasmid vector containing HLA-G*01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:44 protein under different cellular conditions.	Inquiry
HLA-G*01:45 Genomic Plasmid Vector	PHLAG82542165	Plasmid vector containing HLA-G*01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:45 protein under different cellular conditions.	Inquiry
HLA-G*01:46 Genomic Plasmid Vector	PHLAG82542166	Plasmid vector containing HLA-G*01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:46 protein under different cellular conditions.	Inquiry
HLA-G*01:47 Genomic Plasmid Vector	PHLAG82542167	Plasmid vector containing HLA-G*01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:47 protein under different cellular conditions.	Inquiry
HLA-G*01:48 Genomic Plasmid Vector	PHLAG82542168	Plasmid vector containing HLA-G*01:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:48 protein under different cellular conditions.	Inquiry
HLA-G*01:49 Genomic Plasmid Vector	PHLAG82542169	Plasmid vector containing HLA-G*01:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:49 protein under different cellular conditions.	Inquiry
HLA-G*01:50Q Genomic Plasmid Vector	PHLAG825421710	Plasmid vector containing HLA-G*01:50Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:50Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:50Q protein under different cellular conditions.	Inquiry
HLA-G*01:51 Genomic Plasmid Vector	PHLAG825421711	Plasmid vector containing HLA-G*01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:51 protein under different cellular conditions.	Inquiry
HLA-G*01:52 Genomic Plasmid Vector	PHLAG825421712	Plasmid vector containing HLA-G*01:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:52 protein under different cellular conditions.	Inquiry

HLA-G*01:53 Genomic Plasmid Vector	PHLAG82542173	Plasmid vector containing HLA-G*01:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:53 protein under different cellular conditions.	Inquiry
HLA-G*01:54 Genomic Plasmid Vector	PHLAG82542174	Plasmid vector containing HLA-G*01:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:54 protein under different cellular conditions.	Inquiry
HLA-G*01:55 Genomic Plasmid Vector	PHLAG82542175	Plasmid vector containing HLA-G*01:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:55 protein under different cellular conditions.	Inquiry
HLA-G*01:56 Genomic Plasmid Vector	PHLAG82542176	Plasmid vector containing HLA-G*01:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:56 protein under different cellular conditions.	Inquiry
HLA-G*01:57 Genomic Plasmid Vector	PHLAG82542177	Plasmid vector containing HLA-G*01:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:57 protein under different cellular conditions.	Inquiry
HLA-G*01:58 Genomic Plasmid Vector	PHLAG82542178	Plasmid vector containing HLA-G*01:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:58 protein under different cellular conditions.	Inquiry
HLA-G*01:59 Genomic Plasmid Vector	PHLAG82542179	Plasmid vector containing HLA-G*01:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:59 protein under different cellular conditions.	Inquiry
HLA-G*01:60 Genomic Plasmid Vector	PHLAG82542180	Plasmid vector containing HLA-G*01:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:60 protein under different cellular conditions.	Inquiry
HLA-G*01:61 Genomic Plasmid Vector	PHLAG82542181	Plasmid vector containing HLA-G*01:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:61 protein under different cellular conditions.	Inquiry

HLA-G*01:62 Genomic Plasmid Vector	PHLAG82542182	Plasmid vector containing HLA-G*01:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:62 protein under different cellular conditions.	Inquiry
HLA-G*01:63 Genomic Plasmid Vector	PHLAG82542183	Plasmid vector containing HLA-G*01:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*01:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*01:63 protein under different cellular conditions.	Inquiry
HLA-G*010110 Genomic Plasmid Vector	PHLAG82542184	Plasmid vector containing HLA-G*010110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-G*010110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-G*010110 protein under different cellular conditions.	Inquiry
HLA-H*01:01:01:01 Genomic Plasmid Vector	PHLAG82542185	Plasmid vector containing HLA-H*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-H*01:01:01:02 Genomic Plasmid Vector	PHLAG82542186	Plasmid vector containing HLA-H*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-H*01:01:01:03 Genomic Plasmid Vector	PHLAG82542187	Plasmid vector containing HLA-H*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-H*01:01:01:04 Genomic Plasmid Vector	PHLAG82542188	Plasmid vector containing HLA-H*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:01:01:04 protein under different cellular conditions.	Inquiry
HLA-H*01:01:01:05 Genomic Plasmid Vector	PHLAG82542189	Plasmid vector containing HLA-H*01:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:01:01:05 protein under different cellular conditions.	Inquiry
HLA-H*01:01:01:06 Genomic Plasmid Vector	PHLAG82542190	Plasmid vector containing HLA-H*01:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:01:01:06 protein under different cellular conditions.	Inquiry

HLA-H*01:01:01:07 Genomic Plasmid Vector	PHLAG82542191	Plasmid vector containing HLA-H*01:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:01:01:07 protein under different cellular conditions.	Inquiry
HLA-H*01:01:01:08 Genomic Plasmid Vector	PHLAG82542192	Plasmid vector containing HLA-H*01:01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:01:01:08 protein under different cellular conditions.	Inquiry
HLA-H*01:01:01:09 Genomic Plasmid Vector	PHLAG82542193	Plasmid vector containing HLA-H*01:01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:01:01:09 protein under different cellular conditions.	Inquiry
HLA-H*01:01:02 Genomic Plasmid Vector	PHLAG82542194	Plasmid vector containing HLA-H*01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:01:02 protein under different cellular conditions.	Inquiry
HLA-H*01:01:03 Genomic Plasmid Vector	PHLAG82542195	Plasmid vector containing HLA-H*01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:01:03 protein under different cellular conditions.	Inquiry
HLA-H*01:01:04 Genomic Plasmid Vector	PHLAG82542196	Plasmid vector containing HLA-H*01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:01:04 protein under different cellular conditions.	Inquiry
HLA-H*01:02:01:01 Genomic Plasmid Vector	PHLAG82542197	Plasmid vector containing HLA-H*01:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:02:01:01 protein under different cellular conditions.	Inquiry
HLA-H*01:02:01:02 Genomic Plasmid Vector	PHLAG82542198	Plasmid vector containing HLA-H*01:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:02:01:02 protein under different cellular conditions.	Inquiry
HLA-H*01:02:01:03 Genomic Plasmid Vector	PHLAG82542199	Plasmid vector containing HLA-H*01:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:02:01:03 protein under different cellular conditions.	Inquiry

HLA-H*01:02:01:04 Genomic Plasmid Vector	PHLAG82542200	Plasmid vector containing HLA-H*01:02:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:02:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:02:01:04 protein under different cellular conditions.	Inquiry
HLA-H*01:02:01:05 Genomic Plasmid Vector	PHLAG82542201	Plasmid vector containing HLA-H*01:02:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:02:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:02:01:05 protein under different cellular conditions.	Inquiry
HLA-H*01:02:01:06 Genomic Plasmid Vector	PHLAG82542202	Plasmid vector containing HLA-H*01:02:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:02:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:02:01:06 protein under different cellular conditions.	Inquiry
HLA-H*01:03:01:01 Genomic Plasmid Vector	PHLAG82542203	Plasmid vector containing HLA-H*01:03:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:03:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:03:01:01 protein under different cellular conditions.	Inquiry
HLA-H*01:03:01:02 Genomic Plasmid Vector	PHLAG82542204	Plasmid vector containing HLA-H*01:03:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:03:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:03:01:02 protein under different cellular conditions.	Inquiry
HLA-H*01:03:01:03 Genomic Plasmid Vector	PHLAG82542205	Plasmid vector containing HLA-H*01:03:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:03:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:03:01:03 protein under different cellular conditions.	Inquiry
HLA-H*01:04 Genomic Plasmid Vector	PHLAG82542206	Plasmid vector containing HLA-H*01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:04 protein under different cellular conditions.	Inquiry
HLA-H*01:05 Genomic Plasmid Vector	PHLAG82542207	Plasmid vector containing HLA-H*01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:05 protein under different cellular conditions.	Inquiry
HLA-H*01:06:01:01 Genomic Plasmid Vector	PHLAG82542208	Plasmid vector containing HLA-H*01:06:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:06:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:06:01:01 protein under different cellular conditions.	Inquiry

HLA-H*01:06:01:02 Genomic Plasmid Vector	PHLAG82542209	Plasmid vector containing HLA-H*01:06:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:06:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:06:01:02 protein under different cellular conditions.	Inquiry
HLA-H*01:07 Genomic Plasmid Vector	PHLAG82542210	Plasmid vector containing HLA-H*01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:07 protein under different cellular conditions.	Inquiry
HLA-H*01:08 Genomic Plasmid Vector	PHLAG82542211	Plasmid vector containing HLA-H*01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:08 protein under different cellular conditions.	Inquiry
HLA-H*01:09 Genomic Plasmid Vector	PHLAG82542212	Plasmid vector containing HLA-H*01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:09 protein under different cellular conditions.	Inquiry
HLA-H*01:10 Genomic Plasmid Vector	PHLAG82542213	Plasmid vector containing HLA-H*01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:10 protein under different cellular conditions.	Inquiry
HLA-H*01:11 Genomic Plasmid Vector	PHLAG82542214	Plasmid vector containing HLA-H*01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:11 protein under different cellular conditions.	Inquiry
HLA-H*01:12 Genomic Plasmid Vector	PHLAG82542215	Plasmid vector containing HLA-H*01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:12 protein under different cellular conditions.	Inquiry
HLA-H*01:13 Genomic Plasmid Vector	PHLAG82542216	Plasmid vector containing HLA-H*01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*01:13 protein under different cellular conditions.	Inquiry
HLA-H*02:01:01:01 Genomic Plasmid Vector	PHLAG82542217	Plasmid vector containing HLA-H*02:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:01:01:01 protein under different cellular conditions.	Inquiry

HLA-H*02:01:01:02 Genomic Plasmid Vector	PHLAG82542218	Plasmid vector containing HLA-H*02:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:01:01:02 protein under different cellular conditions.	Inquiry
HLA-H*02:01:01:03 Genomic Plasmid Vector	PHLAG82542219	Plasmid vector containing HLA-H*02:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:01:01:03 protein under different cellular conditions.	Inquiry
HLA-H*02:01:01:04 Genomic Plasmid Vector	PHLAG82542220	Plasmid vector containing HLA-H*02:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:01:01:04 protein under different cellular conditions.	Inquiry
HLA-H*02:01:01:05 Genomic Plasmid Vector	PHLAG82542221	Plasmid vector containing HLA-H*02:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:01:01:05 protein under different cellular conditions.	Inquiry
HLA-H*02:01:02 Genomic Plasmid Vector	PHLAG82542222	Plasmid vector containing HLA-H*02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:01:02 protein under different cellular conditions.	Inquiry
HLA-H*02:02:01:01 Genomic Plasmid Vector	PHLAG82542223	Plasmid vector containing HLA-H*02:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:02:01:01 protein under different cellular conditions.	Inquiry
HLA-H*02:02:01:02 Genomic Plasmid Vector	PHLAG82542224	Plasmid vector containing HLA-H*02:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:02:01:02 protein under different cellular conditions.	Inquiry
HLA-H*02:02:02 Genomic Plasmid Vector	PHLAG82542225	Plasmid vector containing HLA-H*02:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:02:02 protein under different cellular conditions.	Inquiry
HLA-H*02:03:01 Genomic Plasmid Vector	PHLAG82542226	Plasmid vector containing HLA-H*02:03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:03:01 protein under different cellular conditions.	Inquiry

HLA-H*02:03:02:01 Genomic Plasmid Vector	PHLAG82542227	Plasmid vector containing HLA-H*02:03:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:03:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:03:02:01 protein under different cellular conditions.	Inquiry
HLA-H*02:03:02:02 Genomic Plasmid Vector	PHLAG82542228	Plasmid vector containing HLA-H*02:03:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:03:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:03:02:02 protein under different cellular conditions.	Inquiry
HLA-H*02:04:01 Genomic Plasmid Vector	PHLAG82542229	Plasmid vector containing HLA-H*02:04:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:04:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:04:01 protein under different cellular conditions.	Inquiry
HLA-H*02:04:02 Genomic Plasmid Vector	PHLAG82542230	Plasmid vector containing HLA-H*02:04:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:04:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:04:02 protein under different cellular conditions.	Inquiry
HLA-H*02:04:03 Genomic Plasmid Vector	PHLAG82542231	Plasmid vector containing HLA-H*02:04:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:04:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:04:03 protein under different cellular conditions.	Inquiry
HLA-H*02:05:01:01 Genomic Plasmid Vector	PHLAG82542232	Plasmid vector containing HLA-H*02:05:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:05:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:05:01:01 protein under different cellular conditions.	Inquiry
HLA-H*02:05:01:02 Genomic Plasmid Vector	PHLAG82542233	Plasmid vector containing HLA-H*02:05:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:05:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:05:01:02 protein under different cellular conditions.	Inquiry
HLA-H*02:05:01:03 Genomic Plasmid Vector	PHLAG82542234	Plasmid vector containing HLA-H*02:05:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:05:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:05:01:03 protein under different cellular conditions.	Inquiry
HLA-H*02:05:01:04 Genomic Plasmid Vector	PHLAG82542235	Plasmid vector containing HLA-H*02:05:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:05:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:05:01:04 protein under different cellular conditions.	Inquiry

HLA-H*02:06 Genomic Plasmid Vector	PHLAG82542236	Plasmid vector containing HLA-H*02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:06 protein under different cellular conditions.	Inquiry
HLA-H*02:07:01:01 Genomic Plasmid Vector	PHLAG82542237	Plasmid vector containing HLA-H*02:07:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:07:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:07:01:01 protein under different cellular conditions.	Inquiry
HLA-H*02:07:01:02 Genomic Plasmid Vector	PHLAG82542238	Plasmid vector containing HLA-H*02:07:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:07:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:07:01:02 protein under different cellular conditions.	Inquiry
HLA-H*02:07:02 Genomic Plasmid Vector	PHLAG82542239	Plasmid vector containing HLA-H*02:07:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:07:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:07:02 protein under different cellular conditions.	Inquiry
HLA-H*02:08:01:01 Genomic Plasmid Vector	PHLAG82542240	Plasmid vector containing HLA-H*02:08:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:08:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:08:01:01 protein under different cellular conditions.	Inquiry
HLA-H*02:08:01:02 Genomic Plasmid Vector	PHLAG82542241	Plasmid vector containing HLA-H*02:08:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:08:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:08:01:02 protein under different cellular conditions.	Inquiry
HLA-H*02:08:01:03 Genomic Plasmid Vector	PHLAG82542242	Plasmid vector containing HLA-H*02:08:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:08:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:08:01:03 protein under different cellular conditions.	Inquiry
HLA-H*02:09 Genomic Plasmid Vector	PHLAG82542243	Plasmid vector containing HLA-H*02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:09 protein under different cellular conditions.	Inquiry
HLA-H*02:10:01:01 Genomic Plasmid Vector	PHLAG82542244	Plasmid vector containing HLA-H*02:10:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:10:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:10:01:01 protein under different cellular conditions.	Inquiry

HLA-H*02:10:01:02 Genomic Plasmid Vector	PHLAG82542245	Plasmid vector containing HLA-H*02:10:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:10:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:10:01:02 protein under different cellular conditions.	Inquiry
HLA-H*02:11:01:01 Genomic Plasmid Vector	PHLAG82542246	Plasmid vector containing HLA-H*02:11:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:11:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:11:01:01 protein under different cellular conditions.	Inquiry
HLA-H*02:11:01:02 Genomic Plasmid Vector	PHLAG82542247	Plasmid vector containing HLA-H*02:11:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:11:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:11:01:02 protein under different cellular conditions.	Inquiry
HLA-H*02:12 Genomic Plasmid Vector	PHLAG82542248	Plasmid vector containing HLA-H*02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:12 protein under different cellular conditions.	Inquiry
HLA-H*02:13 Genomic Plasmid Vector	PHLAG82542249	Plasmid vector containing HLA-H*02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:13 protein under different cellular conditions.	Inquiry
HLA-H*02:14 Genomic Plasmid Vector	PHLAG82542250	Plasmid vector containing HLA-H*02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:14 protein under different cellular conditions.	Inquiry
HLA-H*02:15 Genomic Plasmid Vector	PHLAG82542251	Plasmid vector containing HLA-H*02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:15 protein under different cellular conditions.	Inquiry
HLA-H*02:16 Genomic Plasmid Vector	PHLAG82542252	Plasmid vector containing HLA-H*02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:16 protein under different cellular conditions.	Inquiry
HLA-H*02:17 Genomic Plasmid Vector	PHLAG82542253	Plasmid vector containing HLA-H*02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:17 protein under different cellular conditions.	Inquiry

HLA-H*02:18 Genomic Plasmid Vector	PHLAG82542254	Plasmid vector containing HLA-H*02:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:18 protein under different cellular conditions.	Inquiry
HLA-H*02:19:01:01 Genomic Plasmid Vector	PHLAG82542255	Plasmid vector containing HLA-H*02:19:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:19:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:19:01:01 protein under different cellular conditions.	Inquiry
HLA-H*02:19:01:02 Genomic Plasmid Vector	PHLAG82542256	Plasmid vector containing HLA-H*02:19:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:19:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:19:01:02 protein under different cellular conditions.	Inquiry
HLA-H*02:20 Genomic Plasmid Vector	PHLAG82542257	Plasmid vector containing HLA-H*02:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:20 protein under different cellular conditions.	Inquiry
HLA-H*02:21 Genomic Plasmid Vector	PHLAG82542258	Plasmid vector containing HLA-H*02:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:21 protein under different cellular conditions.	Inquiry
HLA-H*02:22 Genomic Plasmid Vector	PHLAG82542259	Plasmid vector containing HLA-H*02:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:22 protein under different cellular conditions.	Inquiry
HLA-H*02:23 Genomic Plasmid Vector	PHLAG82542260	Plasmid vector containing HLA-H*02:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:23 protein under different cellular conditions.	Inquiry
HLA-H*02:24 Genomic Plasmid Vector	PHLAG82542261	Plasmid vector containing HLA-H*02:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:24 protein under different cellular conditions.	Inquiry
HLA-H*02:25:01:01 Genomic Plasmid Vector	PHLAG82542262	Plasmid vector containing HLA-H*02:25:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:25:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:25:01:01 protein under different cellular conditions.	Inquiry

HLA-H*02:25:01:02 Genomic Plasmid Vector	PHLAG82542263	Plasmid vector containing HLA-H*02:25:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:25:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:25:01:02 protein under different cellular conditions.	Inquiry
HLA-H*02:26 Genomic Plasmid Vector	PHLAG82542264	Plasmid vector containing HLA-H*02:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:26 protein under different cellular conditions.	Inquiry
HLA-H*02:27 Genomic Plasmid Vector	PHLAG82542265	Plasmid vector containing HLA-H*02:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:27 protein under different cellular conditions.	Inquiry
HLA-H*02:28 Genomic Plasmid Vector	PHLAG82542266	Plasmid vector containing HLA-H*02:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:28 protein under different cellular conditions.	Inquiry
HLA-H*02:29 Genomic Plasmid Vector	PHLAG82542267	Plasmid vector containing HLA-H*02:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:29 protein under different cellular conditions.	Inquiry
HLA-H*02:30 Genomic Plasmid Vector	PHLAG82542268	Plasmid vector containing HLA-H*02:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:30 protein under different cellular conditions.	Inquiry
HLA-H*02:31 Genomic Plasmid Vector	PHLAG82542269	Plasmid vector containing HLA-H*02:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*02:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*02:31 protein under different cellular conditions.	Inquiry
HLA-H*03:01 Genomic Plasmid Vector	PHLAG82542270	Plasmid vector containing HLA-H*03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-H*03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-H*03:01 protein under different cellular conditions.	Inquiry
HLA-HFE*001:01:01 Genomic Plasmid Vector	PHLAG82542271	Plasmid vector containing HLA-HFE*001:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-HFE*001:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-HFE*001:01:01 protein under different cellular conditions.	Inquiry

HLA-HFE*001:01:02 Genomic Plasmid Vector	PHLAG82542272	Plasmid vector containing HLA-HFE*001:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-HFE*001:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-HFE*001:01:02 protein under different cellular conditions.	Inquiry
HLA-HFE*001:01:03 Genomic Plasmid Vector	PHLAG82542273	Plasmid vector containing HLA-HFE*001:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-HFE*001:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-HFE*001:01:03 protein under different cellular conditions.	Inquiry
HLA-HFE*002 Genomic Plasmid Vector	PHLAG82542274	Plasmid vector containing HLA-HFE*002 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-HFE*002 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-HFE*002 protein under different cellular conditions.	Inquiry
HLA-HFE*003 Genomic Plasmid Vector	PHLAG82542275	Plasmid vector containing HLA-HFE*003 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-HFE*003 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-HFE*003 protein under different cellular conditions.	Inquiry
HLA-HFE*004 Genomic Plasmid Vector	PHLAG82542276	Plasmid vector containing HLA-HFE*004 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-HFE*004 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-HFE*004 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:01 Genomic Plasmid Vector	PHLAG82542277	Plasmid vector containing HLA-J*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:02 Genomic Plasmid Vector	PHLAG82542278	Plasmid vector containing HLA-J*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:03 Genomic Plasmid Vector	PHLAG82542279	Plasmid vector containing HLA-J*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:04 Genomic Plasmid Vector	PHLAG82542280	Plasmid vector containing HLA-J*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:04 protein under different cellular conditions.	Inquiry

HLA-J*01:01:01:05 Genomic Plasmid Vector	PHLAG82542281	Plasmid vector containing HLA-J*01:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:05 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:06 Genomic Plasmid Vector	PHLAG82542282	Plasmid vector containing HLA-J*01:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:06 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:07 Genomic Plasmid Vector	PHLAG82542283	Plasmid vector containing HLA-J*01:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:07 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:08 Genomic Plasmid Vector	PHLAG82542284	Plasmid vector containing HLA-J*01:01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:08 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:09 Genomic Plasmid Vector	PHLAG82542285	Plasmid vector containing HLA-J*01:01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:09 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:10 Genomic Plasmid Vector	PHLAG82542286	Plasmid vector containing HLA-J*01:01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:10 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:11 Genomic Plasmid Vector	PHLAG82542287	Plasmid vector containing HLA-J*01:01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:11 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:12 Genomic Plasmid Vector	PHLAG82542288	Plasmid vector containing HLA-J*01:01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:12 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:13 Genomic Plasmid Vector	PHLAG82542289	Plasmid vector containing HLA-J*01:01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:13 protein under different cellular conditions.	Inquiry

HLA-J*01:01:01:14 Genomic Plasmid Vector	PHLAG82542290	Plasmid vector containing HLA-J*01:01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:14 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:15 Genomic Plasmid Vector	PHLAG82542291	Plasmid vector containing HLA-J*01:01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:15 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:16 Genomic Plasmid Vector	PHLAG82542292	Plasmid vector containing HLA-J*01:01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:16 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:17 Genomic Plasmid Vector	PHLAG82542293	Plasmid vector containing HLA-J*01:01:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:17 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:18 Genomic Plasmid Vector	PHLAG82542294	Plasmid vector containing HLA-J*01:01:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:18 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:19 Genomic Plasmid Vector	PHLAG82542295	Plasmid vector containing HLA-J*01:01:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:19 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:20 Genomic Plasmid Vector	PHLAG82542296	Plasmid vector containing HLA-J*01:01:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:20 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:21 Genomic Plasmid Vector	PHLAG82542297	Plasmid vector containing HLA-J*01:01:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:21 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:22 Genomic Plasmid Vector	PHLAG82542298	Plasmid vector containing HLA-J*01:01:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:22 protein under different cellular conditions.	Inquiry

HLA-J*01:01:01:23 Genomic Plasmid Vector	PHLAG82542299	Plasmid vector containing HLA-J*01:01:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:23 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:24 Genomic Plasmid Vector	PHLAG825423000	Plasmid vector containing HLA-J*01:01:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:24 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:25 Genomic Plasmid Vector	PHLAG825423001	Plasmid vector containing HLA-J*01:01:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:25 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:26 Genomic Plasmid Vector	PHLAG825423002	Plasmid vector containing HLA-J*01:01:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:26 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:27 Genomic Plasmid Vector	PHLAG825423003	Plasmid vector containing HLA-J*01:01:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:27 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:28 Genomic Plasmid Vector	PHLAG825423004	Plasmid vector containing HLA-J*01:01:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:28 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:29 Genomic Plasmid Vector	PHLAG825423005	Plasmid vector containing HLA-J*01:01:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:29 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:30 Genomic Plasmid Vector	PHLAG825423006	Plasmid vector containing HLA-J*01:01:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:30 protein under different cellular conditions.	Inquiry
HLA-J*01:01:01:31 Genomic Plasmid Vector	PHLAG825423007	Plasmid vector containing HLA-J*01:01:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:31 protein under different cellular conditions.	Inquiry

HLA-J*01:01:01:32 Genomic Plasmid Vector	PHLAG82542308	Plasmid vector containing HLA-J*01:01:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*01:01:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*01:01:01:32 protein under different cellular conditions.	Inquiry
HLA-J*02:01 Genomic Plasmid Vector	PHLAG82542309	Plasmid vector containing HLA-J*02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-J*02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-J*02:01 protein under different cellular conditions.	Inquiry
HLA-K*01:01:01:01 Genomic Plasmid Vector	PHLAG82542310	Plasmid vector containing HLA-K*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-K*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-K*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-K*01:01:01:02 Genomic Plasmid Vector	PHLAG82542311	Plasmid vector containing HLA-K*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-K*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-K*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-K*01:01:01:03 Genomic Plasmid Vector	PHLAG82542312	Plasmid vector containing HLA-K*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-K*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-K*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-K*01:01:01:04 Genomic Plasmid Vector	PHLAG82542313	Plasmid vector containing HLA-K*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-K*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-K*01:01:01:04 protein under different cellular conditions.	Inquiry
HLA-K*01:02 Genomic Plasmid Vector	PHLAG82542314	Plasmid vector containing HLA-K*01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-K*01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-K*01:02 protein under different cellular conditions.	Inquiry
HLA-K*01:03 Genomic Plasmid Vector	PHLAG82542315	Plasmid vector containing HLA-K*01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-K*01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-K*01:03 protein under different cellular conditions.	Inquiry
HLA-K*01:04 Genomic Plasmid Vector	PHLAG82542316	Plasmid vector containing HLA-K*01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-K*01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-K*01:04 protein under different cellular conditions.	Inquiry

HLA-L*01:01:01:01 Genomic Plasmid Vector	PHLAG82542317	Plasmid vector containing HLA-L*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-L*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-L*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-L*01:01:01:02 Genomic Plasmid Vector	PHLAG82542318	Plasmid vector containing HLA-L*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-L*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-L*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-L*01:01:01:03 Genomic Plasmid Vector	PHLAG82542319	Plasmid vector containing HLA-L*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-L*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-L*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-L*01:01:02 Genomic Plasmid Vector	PHLAG82542320	Plasmid vector containing HLA-L*01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-L*01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-L*01:01:02 protein under different cellular conditions.	Inquiry
HLA-L*01:02 Genomic Plasmid Vector	PHLAG82542321	Plasmid vector containing HLA-L*01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-L*01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-L*01:02 protein under different cellular conditions.	Inquiry
HLA-L*01:03 Genomic Plasmid Vector	PHLAG82542322	Plasmid vector containing HLA-L*01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-L*01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-L*01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*001:01:01 Genomic Plasmid Vector	PHLAG82542323	Plasmid vector containing HLA-MICA*001:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*001:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*001:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*001:01:02 Genomic Plasmid Vector	PHLAG82542324	Plasmid vector containing HLA-MICA*001:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*001:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*001:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*001:02 Genomic Plasmid Vector	PHLAG82542325	Plasmid vector containing HLA-MICA*001:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*001:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*001:02 protein under different cellular conditions.	Inquiry

HLA-MICA*002:01:01 Genomic Plasmid Vector	PHLAG82542326	Plasmid vector containing HLA-MICA*002:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:02 Genomic Plasmid Vector	PHLAG82542327	Plasmid vector containing HLA-MICA*002:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:03 Genomic Plasmid Vector	PHLAG82542328	Plasmid vector containing HLA-MICA*002:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:04 Genomic Plasmid Vector	PHLAG82542329	Plasmid vector containing HLA-MICA*002:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:04 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:05 Genomic Plasmid Vector	PHLAG82542330	Plasmid vector containing HLA-MICA*002:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:05 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:06 Genomic Plasmid Vector	PHLAG82542331	Plasmid vector containing HLA-MICA*002:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:06 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:07 Genomic Plasmid Vector	PHLAG82542332	Plasmid vector containing HLA-MICA*002:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:07 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:08 Genomic Plasmid Vector	PHLAG82542333	Plasmid vector containing HLA-MICA*002:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:08 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:09 Genomic Plasmid Vector	PHLAG82542334	Plasmid vector containing HLA-MICA*002:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:09 protein under different cellular conditions.	Inquiry

HLA-MICA*002:01:10 Genomic Plasmid Vector	PHLAG82542335	Plasmid vector containing HLA-MICA*002:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:10 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:11 Genomic Plasmid Vector	PHLAG82542336	Plasmid vector containing HLA-MICA*002:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:11 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:12 Genomic Plasmid Vector	PHLAG82542337	Plasmid vector containing HLA-MICA*002:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:12 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:13Q Genomic Plasmid Vector	PHLAG82542338	Plasmid vector containing HLA-MICA*002:01:13Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:13Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:13Q protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:14 Genomic Plasmid Vector	PHLAG82542339	Plasmid vector containing HLA-MICA*002:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:14 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:15 Genomic Plasmid Vector	PHLAG82542340	Plasmid vector containing HLA-MICA*002:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:15 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:16 Genomic Plasmid Vector	PHLAG82542341	Plasmid vector containing HLA-MICA*002:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:16 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:17 Genomic Plasmid Vector	PHLAG82542342	Plasmid vector containing HLA-MICA*002:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:17 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:18 Genomic Plasmid Vector	PHLAG82542343	Plasmid vector containing HLA-MICA*002:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:18 protein under different cellular conditions.	Inquiry

HLA-MICA*002:01:19 Genomic Plasmid Vector	PHLAG82542344	Plasmid vector containing HLA-MICA*002:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:19 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:20 Genomic Plasmid Vector	PHLAG82542345	Plasmid vector containing HLA-MICA*002:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:20 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:21 Genomic Plasmid Vector	PHLAG82542346	Plasmid vector containing HLA-MICA*002:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:21 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:22 Genomic Plasmid Vector	PHLAG82542347	Plasmid vector containing HLA-MICA*002:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:22 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:23 Genomic Plasmid Vector	PHLAG82542348	Plasmid vector containing HLA-MICA*002:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:23 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:24 Genomic Plasmid Vector	PHLAG82542349	Plasmid vector containing HLA-MICA*002:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:24 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:25 Genomic Plasmid Vector	PHLAG825423500	Plasmid vector containing HLA-MICA*002:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:25 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:26 Genomic Plasmid Vector	PHLAG825423501	Plasmid vector containing HLA-MICA*002:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:26 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:27 Genomic Plasmid Vector	PHLAG825423502	Plasmid vector containing HLA-MICA*002:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:27 protein under different cellular conditions.	Inquiry

HLA-MICA*002:01:28 Genomic Plasmid Vector	PHLAG82542353	Plasmid vector containing HLA-MICA*002:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:28 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:29 Genomic Plasmid Vector	PHLAG82542354	Plasmid vector containing HLA-MICA*002:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:29 protein under different cellular conditions.	Inquiry
HLA-MICA*002:01:30 Genomic Plasmid Vector	PHLAG82542355	Plasmid vector containing HLA-MICA*002:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:01:30 protein under different cellular conditions.	Inquiry
HLA-MICA*002:02 Genomic Plasmid Vector	PHLAG82542356	Plasmid vector containing HLA-MICA*002:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:02 protein under different cellular conditions.	Inquiry
HLA-MICA*002:03 Genomic Plasmid Vector	PHLAG82542357	Plasmid vector containing HLA-MICA*002:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:03 protein under different cellular conditions.	Inquiry
HLA-MICA*002:04 Genomic Plasmid Vector	PHLAG82542358	Plasmid vector containing HLA-MICA*002:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:04 protein under different cellular conditions.	Inquiry
HLA-MICA*002:05 Genomic Plasmid Vector	PHLAG82542359	Plasmid vector containing HLA-MICA*002:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:05 protein under different cellular conditions.	Inquiry
HLA-MICA*002:06 Genomic Plasmid Vector	PHLAG82542360	Plasmid vector containing HLA-MICA*002:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:06 protein under different cellular conditions.	Inquiry
HLA-MICA*002:07 Genomic Plasmid Vector	PHLAG82542361	Plasmid vector containing HLA-MICA*002:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:07 protein under different cellular conditions.	Inquiry

HLA-MICA*002:08 Genomic Plasmid Vector	PHLAG82542362	Plasmid vector containing HLA-MICA*002:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:08 protein under different cellular conditions.	Inquiry
HLA-MICA*002:09 Genomic Plasmid Vector	PHLAG82542363	Plasmid vector containing HLA-MICA*002:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:09 protein under different cellular conditions.	Inquiry
HLA-MICA*002:10 Genomic Plasmid Vector	PHLAG82542364	Plasmid vector containing HLA-MICA*002:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:10 protein under different cellular conditions.	Inquiry
HLA-MICA*002:11 Genomic Plasmid Vector	PHLAG82542365	Plasmid vector containing HLA-MICA*002:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:11 protein under different cellular conditions.	Inquiry
HLA-MICA*002:12 Genomic Plasmid Vector	PHLAG82542366	Plasmid vector containing HLA-MICA*002:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:12 protein under different cellular conditions.	Inquiry
HLA-MICA*002:13 Genomic Plasmid Vector	PHLAG82542367	Plasmid vector containing HLA-MICA*002:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:13 protein under different cellular conditions.	Inquiry
HLA-MICA*002:14 Genomic Plasmid Vector	PHLAG82542368	Plasmid vector containing HLA-MICA*002:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*002:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*002:14 protein under different cellular conditions.	Inquiry
HLA-MICA*003 Genomic Plasmid Vector	PHLAG82542369	Plasmid vector containing HLA-MICA*003 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*003 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*003 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:01 Genomic Plasmid Vector	PHLAG82542370	Plasmid vector containing HLA-MICA*004:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:01 protein under different cellular conditions.	Inquiry

HLA-MICA*004:01:02 Genomic Plasmid Vector	PHLAG82542371	Plasmid vector containing HLA-MICA*004:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:03 Genomic Plasmid Vector	PHLAG82542372	Plasmid vector containing HLA-MICA*004:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:04 Genomic Plasmid Vector	PHLAG82542373	Plasmid vector containing HLA-MICA*004:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:04 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:05 Genomic Plasmid Vector	PHLAG82542374	Plasmid vector containing HLA-MICA*004:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:05 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:06 Genomic Plasmid Vector	PHLAG82542375	Plasmid vector containing HLA-MICA*004:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:06 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:07 Genomic Plasmid Vector	PHLAG82542376	Plasmid vector containing HLA-MICA*004:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:07 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:08 Genomic Plasmid Vector	PHLAG82542377	Plasmid vector containing HLA-MICA*004:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:08 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:09 Genomic Plasmid Vector	PHLAG82542378	Plasmid vector containing HLA-MICA*004:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:09 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:10 Genomic Plasmid Vector	PHLAG82542379	Plasmid vector containing HLA-MICA*004:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:10 protein under different cellular conditions.	Inquiry

HLA-MICA*004:01:11 Genomic Plasmid Vector	PHLAG82542380	Plasmid vector containing HLA-MICA*004:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:11 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:12 Genomic Plasmid Vector	PHLAG82542381	Plasmid vector containing HLA-MICA*004:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:12 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:13 Genomic Plasmid Vector	PHLAG82542382	Plasmid vector containing HLA-MICA*004:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:13 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:14 Genomic Plasmid Vector	PHLAG82542383	Plasmid vector containing HLA-MICA*004:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:14 protein under different cellular conditions.	Inquiry
HLA-MICA*004:01:15 Genomic Plasmid Vector	PHLAG82542384	Plasmid vector containing HLA-MICA*004:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:01:15 protein under different cellular conditions.	Inquiry
HLA-MICA*004:02 Genomic Plasmid Vector	PHLAG82542385	Plasmid vector containing HLA-MICA*004:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:02 protein under different cellular conditions.	Inquiry
HLA-MICA*004:03 Genomic Plasmid Vector	PHLAG82542386	Plasmid vector containing HLA-MICA*004:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:03 protein under different cellular conditions.	Inquiry
HLA-MICA*004:04 Genomic Plasmid Vector	PHLAG82542387	Plasmid vector containing HLA-MICA*004:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*004:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*004:04 protein under different cellular conditions.	Inquiry
HLA-MICA*005 Genomic Plasmid Vector	PHLAG82542388	Plasmid vector containing HLA-MICA*005 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*005 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*005 protein under different cellular conditions.	Inquiry

HLA-MICA*006 Genomic Plasmid Vector	PHLAG82542389	Plasmid vector containing HLA-MICA*006 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*006 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*006 protein under different cellular conditions.	Inquiry
HLA-MICA*007:01:01 Genomic Plasmid Vector	PHLAG82542390	Plasmid vector containing HLA-MICA*007:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*007:01:02 Genomic Plasmid Vector	PHLAG82542391	Plasmid vector containing HLA-MICA*007:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*007:01:03 Genomic Plasmid Vector	PHLAG82542392	Plasmid vector containing HLA-MICA*007:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*007:01:04 Genomic Plasmid Vector	PHLAG82542393	Plasmid vector containing HLA-MICA*007:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:01:04 protein under different cellular conditions.	Inquiry
HLA-MICA*007:01:05 Genomic Plasmid Vector	PHLAG82542394	Plasmid vector containing HLA-MICA*007:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:01:05 protein under different cellular conditions.	Inquiry
HLA-MICA*007:01:06 Genomic Plasmid Vector	PHLAG82542395	Plasmid vector containing HLA-MICA*007:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:01:06 protein under different cellular conditions.	Inquiry
HLA-MICA*007:01:07 Genomic Plasmid Vector	PHLAG82542396	Plasmid vector containing HLA-MICA*007:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:01:07 protein under different cellular conditions.	Inquiry
HLA-MICA*007:01:08 Genomic Plasmid Vector	PHLAG82542397	Plasmid vector containing HLA-MICA*007:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:01:08 protein under different cellular conditions.	Inquiry

HLA-MICA*007:01:09 Genomic Plasmid Vector	PHLAG82542398	Plasmid vector containing HLA-MICA*007:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:01:09 protein under different cellular conditions.	Inquiry
HLA-MICA*007:01:10 Genomic Plasmid Vector	PHLAG82542399	Plasmid vector containing HLA-MICA*007:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:01:10 protein under different cellular conditions.	Inquiry
HLA-MICA*007:01:11 Genomic Plasmid Vector	PHLAG825424000	Plasmid vector containing HLA-MICA*007:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:01:11 protein under different cellular conditions.	Inquiry
HLA-MICA*007:02 Genomic Plasmid Vector	PHLAG825424001	Plasmid vector containing HLA-MICA*007:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:02 protein under different cellular conditions.	Inquiry
HLA-MICA*007:03 Genomic Plasmid Vector	PHLAG825424002	Plasmid vector containing HLA-MICA*007:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:03 protein under different cellular conditions.	Inquiry
HLA-MICA*007:04 Genomic Plasmid Vector	PHLAG825424003	Plasmid vector containing HLA-MICA*007:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:04 protein under different cellular conditions.	Inquiry
HLA-MICA*007:05 Genomic Plasmid Vector	PHLAG825424004	Plasmid vector containing HLA-MICA*007:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:05 protein under different cellular conditions.	Inquiry
HLA-MICA*007:06:01 Genomic Plasmid Vector	PHLAG825424005	Plasmid vector containing HLA-MICA*007:06:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:06:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:06:01 protein under different cellular conditions.	Inquiry
HLA-MICA*007:06:02 Genomic Plasmid Vector	PHLAG825424006	Plasmid vector containing HLA-MICA*007:06:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:06:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:06:02 protein under different cellular conditions.	Inquiry

HLA-MICA*007:07 Genomic Plasmid Vector	PHLAG82542407	Plasmid vector containing HLA-MICA*007:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:07 protein under different cellular conditions.	Inquiry
HLA-MICA*007:08 Genomic Plasmid Vector	PHLAG82542408	Plasmid vector containing HLA-MICA*007:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:08 protein under different cellular conditions.	Inquiry
HLA-MICA*007:09 Genomic Plasmid Vector	PHLAG82542409	Plasmid vector containing HLA-MICA*007:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:09 protein under different cellular conditions.	Inquiry
HLA-MICA*007:10 Genomic Plasmid Vector	PHLAG82542410	Plasmid vector containing HLA-MICA*007:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*007:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*007:10 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:01 Genomic Plasmid Vector	PHLAG82542411	Plasmid vector containing HLA-MICA*008:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:02 Genomic Plasmid Vector	PHLAG82542412	Plasmid vector containing HLA-MICA*008:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:03 Genomic Plasmid Vector	PHLAG82542413	Plasmid vector containing HLA-MICA*008:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:04 Genomic Plasmid Vector	PHLAG82542414	Plasmid vector containing HLA-MICA*008:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:04 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:05 Genomic Plasmid Vector	PHLAG82542415	Plasmid vector containing HLA-MICA*008:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:05 protein under different cellular conditions.	Inquiry

HLA-MICA*008:01:06 Genomic Plasmid Vector	PHLAG82542416	Plasmid vector containing HLA-MICA*008:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:06 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:07 Genomic Plasmid Vector	PHLAG82542417	Plasmid vector containing HLA-MICA*008:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:07 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:08 Genomic Plasmid Vector	PHLAG82542418	Plasmid vector containing HLA-MICA*008:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:08 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:09 Genomic Plasmid Vector	PHLAG82542419	Plasmid vector containing HLA-MICA*008:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:09 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:10 Genomic Plasmid Vector	PHLAG82542420	Plasmid vector containing HLA-MICA*008:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:10 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:11 Genomic Plasmid Vector	PHLAG82542421	Plasmid vector containing HLA-MICA*008:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:11 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:12 Genomic Plasmid Vector	PHLAG82542422	Plasmid vector containing HLA-MICA*008:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:12 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:13 Genomic Plasmid Vector	PHLAG82542423	Plasmid vector containing HLA-MICA*008:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:13 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:14 Genomic Plasmid Vector	PHLAG82542424	Plasmid vector containing HLA-MICA*008:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:14 protein under different cellular conditions.	Inquiry

HLA-MICA*008:01:15 Genomic Plasmid Vector	PHLAG82542425	Plasmid vector containing HLA-MICA*008:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:15 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:16 Genomic Plasmid Vector	PHLAG82542426	Plasmid vector containing HLA-MICA*008:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:16 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:17 Genomic Plasmid Vector	PHLAG82542427	Plasmid vector containing HLA-MICA*008:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:17 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:18 Genomic Plasmid Vector	PHLAG82542428	Plasmid vector containing HLA-MICA*008:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:18 protein under different cellular conditions.	Inquiry
HLA-MICA*008:01:19 Genomic Plasmid Vector	PHLAG82542429	Plasmid vector containing HLA-MICA*008:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:01:19 protein under different cellular conditions.	Inquiry
HLA-MICA*008:02 Genomic Plasmid Vector	PHLAG82542430	Plasmid vector containing HLA-MICA*008:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:02 protein under different cellular conditions.	Inquiry
HLA-MICA*008:03 Genomic Plasmid Vector	PHLAG82542431	Plasmid vector containing HLA-MICA*008:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:03 protein under different cellular conditions.	Inquiry
HLA-MICA*008:04:01 Genomic Plasmid Vector	PHLAG82542432	Plasmid vector containing HLA-MICA*008:04:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:04:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:04:01 protein under different cellular conditions.	Inquiry
HLA-MICA*008:04:02 Genomic Plasmid Vector	PHLAG82542433	Plasmid vector containing HLA-MICA*008:04:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:04:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:04:02 protein under different cellular conditions.	Inquiry

HLA-MICA*008:04:03 Genomic Plasmid Vector	PHLAG82542434	Plasmid vector containing HLA-MICA*008:04:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:04:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:04:03 protein under different cellular conditions.	Inquiry
HLA-MICA*008:04:04 Genomic Plasmid Vector	PHLAG82542435	Plasmid vector containing HLA-MICA*008:04:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:04:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:04:04 protein under different cellular conditions.	Inquiry
HLA-MICA*008:04:05 Genomic Plasmid Vector	PHLAG82542436	Plasmid vector containing HLA-MICA*008:04:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:04:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:04:05 protein under different cellular conditions.	Inquiry
HLA-MICA*008:04:06 Genomic Plasmid Vector	PHLAG82542437	Plasmid vector containing HLA-MICA*008:04:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:04:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:04:06 protein under different cellular conditions.	Inquiry
HLA-MICA*008:04:07 Genomic Plasmid Vector	PHLAG82542438	Plasmid vector containing HLA-MICA*008:04:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:04:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:04:07 protein under different cellular conditions.	Inquiry
HLA-MICA*008:04:08 Genomic Plasmid Vector	PHLAG82542439	Plasmid vector containing HLA-MICA*008:04:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:04:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:04:08 protein under different cellular conditions.	Inquiry
HLA-MICA*008:04:09 Genomic Plasmid Vector	PHLAG82542440	Plasmid vector containing HLA-MICA*008:04:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:04:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:04:09 protein under different cellular conditions.	Inquiry
HLA-MICA*008:04:10 Genomic Plasmid Vector	PHLAG82542441	Plasmid vector containing HLA-MICA*008:04:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:04:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:04:10 protein under different cellular conditions.	Inquiry
HLA-MICA*008:04:11 Genomic Plasmid Vector	PHLAG82542442	Plasmid vector containing HLA-MICA*008:04:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:04:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:04:11 protein under different cellular conditions.	Inquiry

HLA-MICA*008:04:12 Genomic Plasmid Vector	PHLAG82542443	Plasmid vector containing HLA-MICA*008:04:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:04:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:04:12 protein under different cellular conditions.	Inquiry
HLA-MICA*008:05 Genomic Plasmid Vector	PHLAG82542444	Plasmid vector containing HLA-MICA*008:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:05 protein under different cellular conditions.	Inquiry
HLA-MICA*008:06 Genomic Plasmid Vector	PHLAG82542445	Plasmid vector containing HLA-MICA*008:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:06 protein under different cellular conditions.	Inquiry
HLA-MICA*008:07 Genomic Plasmid Vector	PHLAG82542446	Plasmid vector containing HLA-MICA*008:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:07 protein under different cellular conditions.	Inquiry
HLA-MICA*008:08 Genomic Plasmid Vector	PHLAG82542447	Plasmid vector containing HLA-MICA*008:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:08 protein under different cellular conditions.	Inquiry
HLA-MICA*008:09 Genomic Plasmid Vector	PHLAG82542448	Plasmid vector containing HLA-MICA*008:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:09 protein under different cellular conditions.	Inquiry
HLA-MICA*008:10 Genomic Plasmid Vector	PHLAG82542449	Plasmid vector containing HLA-MICA*008:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:10 protein under different cellular conditions.	Inquiry
HLA-MICA*008:11 Genomic Plasmid Vector	PHLAG82542450	Plasmid vector containing HLA-MICA*008:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:11 protein under different cellular conditions.	Inquiry
HLA-MICA*008:12 Genomic Plasmid Vector	PHLAG82542451	Plasmid vector containing HLA-MICA*008:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:12 protein under different cellular conditions.	Inquiry

HLA-MICA*008:13:01 Genomic Plasmid Vector	PHLAG82542452	Plasmid vector containing HLA-MICA*008:13:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:13:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:13:01 protein under different cellular conditions.	Inquiry
HLA-MICA*008:13:02 Genomic Plasmid Vector	PHLAG82542453	Plasmid vector containing HLA-MICA*008:13:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:13:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:13:02 protein under different cellular conditions.	Inquiry
HLA-MICA*008:14 Genomic Plasmid Vector	PHLAG82542454	Plasmid vector containing HLA-MICA*008:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:14 protein under different cellular conditions.	Inquiry
HLA-MICA*008:15 Genomic Plasmid Vector	PHLAG82542455	Plasmid vector containing HLA-MICA*008:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:15 protein under different cellular conditions.	Inquiry
HLA-MICA*008:16 Genomic Plasmid Vector	PHLAG82542456	Plasmid vector containing HLA-MICA*008:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:16 protein under different cellular conditions.	Inquiry
HLA-MICA*008:17 Genomic Plasmid Vector	PHLAG82542457	Plasmid vector containing HLA-MICA*008:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:17 protein under different cellular conditions.	Inquiry
HLA-MICA*008:18 Genomic Plasmid Vector	PHLAG82542458	Plasmid vector containing HLA-MICA*008:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:18 protein under different cellular conditions.	Inquiry
HLA-MICA*008:19 Genomic Plasmid Vector	PHLAG82542459	Plasmid vector containing HLA-MICA*008:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:19 protein under different cellular conditions.	Inquiry
HLA-MICA*008:20 Genomic Plasmid Vector	PHLAG82542460	Plasmid vector containing HLA-MICA*008:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:20 protein under different cellular conditions.	Inquiry

HLA-MICA*008:21 Genomic Plasmid Vector	PHLAG82542461	Plasmid vector containing HLA-MICA*008:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:21 protein under different cellular conditions.	Inquiry
HLA-MICA*008:22 Genomic Plasmid Vector	PHLAG82542462	Plasmid vector containing HLA-MICA*008:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:22 protein under different cellular conditions.	Inquiry
HLA-MICA*008:23:01 Genomic Plasmid Vector	PHLAG82542463	Plasmid vector containing HLA-MICA*008:23:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:23:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:23:01 protein under different cellular conditions.	Inquiry
HLA-MICA*008:23:02 Genomic Plasmid Vector	PHLAG82542464	Plasmid vector containing HLA-MICA*008:23:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:23:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:23:02 protein under different cellular conditions.	Inquiry
HLA-MICA*008:24 Genomic Plasmid Vector	PHLAG82542465	Plasmid vector containing HLA-MICA*008:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:24 protein under different cellular conditions.	Inquiry
HLA-MICA*008:25 Genomic Plasmid Vector	PHLAG82542466	Plasmid vector containing HLA-MICA*008:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:25 protein under different cellular conditions.	Inquiry
HLA-MICA*008:26 Genomic Plasmid Vector	PHLAG82542467	Plasmid vector containing HLA-MICA*008:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:26 protein under different cellular conditions.	Inquiry
HLA-MICA*008:27 Genomic Plasmid Vector	PHLAG82542468	Plasmid vector containing HLA-MICA*008:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:27 protein under different cellular conditions.	Inquiry
HLA-MICA*008:28 Genomic Plasmid Vector	PHLAG82542469	Plasmid vector containing HLA-MICA*008:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:28 protein under different cellular conditions.	Inquiry

HLA-MICA*008:29 Genomic Plasmid Vector	PHLAG82542470	Plasmid vector containing HLA-MICA*008:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:29 protein under different cellular conditions.	Inquiry
HLA-MICA*008:30 Genomic Plasmid Vector	PHLAG82542471	Plasmid vector containing HLA-MICA*008:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:30 protein under different cellular conditions.	Inquiry
HLA-MICA*008:31 Genomic Plasmid Vector	PHLAG82542472	Plasmid vector containing HLA-MICA*008:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:31 protein under different cellular conditions.	Inquiry
HLA-MICA*008:32 Genomic Plasmid Vector	PHLAG82542473	Plasmid vector containing HLA-MICA*008:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:32 protein under different cellular conditions.	Inquiry
HLA-MICA*008:33 Genomic Plasmid Vector	PHLAG82542474	Plasmid vector containing HLA-MICA*008:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*008:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*008:33 protein under different cellular conditions.	Inquiry
HLA-MICA*009:01:01 Genomic Plasmid Vector	PHLAG82542475	Plasmid vector containing HLA-MICA*009:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*009:01:02 Genomic Plasmid Vector	PHLAG82542476	Plasmid vector containing HLA-MICA*009:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*009:01:03 Genomic Plasmid Vector	PHLAG82542477	Plasmid vector containing HLA-MICA*009:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*009:01:04 Genomic Plasmid Vector	PHLAG82542478	Plasmid vector containing HLA-MICA*009:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:04 protein under different cellular conditions.	Inquiry

HLA-MICA*009:01:05 Genomic Plasmid Vector	PHLAG82542479	Plasmid vector containing HLA-MICA*009:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:05 protein under different cellular conditions.	Inquiry
HLA-MICA*009:01:06 Genomic Plasmid Vector	PHLAG82542480	Plasmid vector containing HLA-MICA*009:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:06 protein under different cellular conditions.	Inquiry
HLA-MICA*009:01:07 Genomic Plasmid Vector	PHLAG82542481	Plasmid vector containing HLA-MICA*009:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:07 protein under different cellular conditions.	Inquiry
HLA-MICA*009:01:08 Genomic Plasmid Vector	PHLAG82542482	Plasmid vector containing HLA-MICA*009:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:08 protein under different cellular conditions.	Inquiry
HLA-MICA*009:01:09 Genomic Plasmid Vector	PHLAG82542483	Plasmid vector containing HLA-MICA*009:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:09 protein under different cellular conditions.	Inquiry
HLA-MICA*009:01:10 Genomic Plasmid Vector	PHLAG82542484	Plasmid vector containing HLA-MICA*009:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:10 protein under different cellular conditions.	Inquiry
HLA-MICA*009:01:11 Genomic Plasmid Vector	PHLAG82542485	Plasmid vector containing HLA-MICA*009:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:11 protein under different cellular conditions.	Inquiry
HLA-MICA*009:01:12 Genomic Plasmid Vector	PHLAG82542486	Plasmid vector containing HLA-MICA*009:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:12 protein under different cellular conditions.	Inquiry
HLA-MICA*009:01:13 Genomic Plasmid Vector	PHLAG82542487	Plasmid vector containing HLA-MICA*009:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:13 protein under different cellular conditions.	Inquiry

HLA-MICA*009:01:14 Genomic Plasmid Vector	PHLAG82542488	Plasmid vector containing HLA-MICA*009:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:01:14 protein under different cellular conditions.	Inquiry
HLA-MICA*009:02:01 Genomic Plasmid Vector	PHLAG82542489	Plasmid vector containing HLA-MICA*009:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:02:01 protein under different cellular conditions.	Inquiry
HLA-MICA*009:02:02 Genomic Plasmid Vector	PHLAG82542490	Plasmid vector containing HLA-MICA*009:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:02:02 protein under different cellular conditions.	Inquiry
HLA-MICA*009:02:03 Genomic Plasmid Vector	PHLAG82542491	Plasmid vector containing HLA-MICA*009:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:02:03 protein under different cellular conditions.	Inquiry
HLA-MICA*009:02:04 Genomic Plasmid Vector	PHLAG82542492	Plasmid vector containing HLA-MICA*009:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:02:04 protein under different cellular conditions.	Inquiry
HLA-MICA*009:02:05 Genomic Plasmid Vector	PHLAG82542493	Plasmid vector containing HLA-MICA*009:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:02:05 protein under different cellular conditions.	Inquiry
HLA-MICA*009:02:06 Genomic Plasmid Vector	PHLAG82542494	Plasmid vector containing HLA-MICA*009:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:02:06 protein under different cellular conditions.	Inquiry
HLA-MICA*009:02:07 Genomic Plasmid Vector	PHLAG82542495	Plasmid vector containing HLA-MICA*009:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:02:07 protein under different cellular conditions.	Inquiry
HLA-MICA*009:03:01 Genomic Plasmid Vector	PHLAG82542496	Plasmid vector containing HLA-MICA*009:03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:03:01 protein under different cellular conditions.	Inquiry

HLA-MICA*009:03:02 Genomic Plasmid Vector	PHLAG82542497	Plasmid vector containing HLA-MICA*009:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:03:02 protein under different cellular conditions.	Inquiry
HLA-MICA*009:04 Genomic Plasmid Vector	PHLAG82542498	Plasmid vector containing HLA-MICA*009:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:04 protein under different cellular conditions.	Inquiry
HLA-MICA*009:05 Genomic Plasmid Vector	PHLAG82542499	Plasmid vector containing HLA-MICA*009:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:05 protein under different cellular conditions.	Inquiry
HLA-MICA*009:06 Genomic Plasmid Vector	PHLAG825425000	Plasmid vector containing HLA-MICA*009:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:06 protein under different cellular conditions.	Inquiry
HLA-MICA*009:07 Genomic Plasmid Vector	PHLAG825425001	Plasmid vector containing HLA-MICA*009:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:07 protein under different cellular conditions.	Inquiry
HLA-MICA*009:08 Genomic Plasmid Vector	PHLAG825425002	Plasmid vector containing HLA-MICA*009:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*009:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*009:08 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:01 Genomic Plasmid Vector	PHLAG825425003	Plasmid vector containing HLA-MICA*010:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:02 Genomic Plasmid Vector	PHLAG825425004	Plasmid vector containing HLA-MICA*010:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:03 Genomic Plasmid Vector	PHLAG825425005	Plasmid vector containing HLA-MICA*010:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:03 protein under different cellular conditions.	Inquiry

HLA-MICA*010:01:04 Genomic Plasmid Vector	PHLAG82542506	Plasmid vector containing HLA-MICA*010:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:04 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:05 Genomic Plasmid Vector	PHLAG82542507	Plasmid vector containing HLA-MICA*010:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:05 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:06 Genomic Plasmid Vector	PHLAG82542508	Plasmid vector containing HLA-MICA*010:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:06 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:07 Genomic Plasmid Vector	PHLAG82542509	Plasmid vector containing HLA-MICA*010:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:07 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:08 Genomic Plasmid Vector	PHLAG82542510	Plasmid vector containing HLA-MICA*010:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:08 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:09 Genomic Plasmid Vector	PHLAG82542511	Plasmid vector containing HLA-MICA*010:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:09 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:10 Genomic Plasmid Vector	PHLAG82542512	Plasmid vector containing HLA-MICA*010:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:10 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:11 Genomic Plasmid Vector	PHLAG82542513	Plasmid vector containing HLA-MICA*010:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:11 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:12 Genomic Plasmid Vector	PHLAG82542514	Plasmid vector containing HLA-MICA*010:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:12 protein under different cellular conditions.	Inquiry

HLA-MICA*010:01:13 Genomic Plasmid Vector	PHLAG82542515	Plasmid vector containing HLA-MICA*010:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:13 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:14 Genomic Plasmid Vector	PHLAG82542516	Plasmid vector containing HLA-MICA*010:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:14 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:15 Genomic Plasmid Vector	PHLAG82542517	Plasmid vector containing HLA-MICA*010:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:15 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:16 Genomic Plasmid Vector	PHLAG82542518	Plasmid vector containing HLA-MICA*010:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:16 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:17 Genomic Plasmid Vector	PHLAG82542519	Plasmid vector containing HLA-MICA*010:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:17 protein under different cellular conditions.	Inquiry
HLA-MICA*010:01:18 Genomic Plasmid Vector	PHLAG82542520	Plasmid vector containing HLA-MICA*010:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:01:18 protein under different cellular conditions.	Inquiry
HLA-MICA*010:02:01 Genomic Plasmid Vector	PHLAG82542521	Plasmid vector containing HLA-MICA*010:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:02:01 protein under different cellular conditions.	Inquiry
HLA-MICA*010:02:02 Genomic Plasmid Vector	PHLAG82542522	Plasmid vector containing HLA-MICA*010:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:02:02 protein under different cellular conditions.	Inquiry
HLA-MICA*010:03 Genomic Plasmid Vector	PHLAG82542523	Plasmid vector containing HLA-MICA*010:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:03 protein under different cellular conditions.	Inquiry

HLA-MICA*010:04 Genomic Plasmid Vector	PHLAG82542524	Plasmid vector containing HLA-MICA*010:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:04 protein under different cellular conditions.	Inquiry
HLA-MICA*010:05 Genomic Plasmid Vector	PHLAG82542525	Plasmid vector containing HLA-MICA*010:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:05 protein under different cellular conditions.	Inquiry
HLA-MICA*010:06 Genomic Plasmid Vector	PHLAG82542526	Plasmid vector containing HLA-MICA*010:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:06 protein under different cellular conditions.	Inquiry
HLA-MICA*010:07 Genomic Plasmid Vector	PHLAG82542527	Plasmid vector containing HLA-MICA*010:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:07 protein under different cellular conditions.	Inquiry
HLA-MICA*010:08 Genomic Plasmid Vector	PHLAG82542528	Plasmid vector containing HLA-MICA*010:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:08 protein under different cellular conditions.	Inquiry
HLA-MICA*010:09 Genomic Plasmid Vector	PHLAG82542529	Plasmid vector containing HLA-MICA*010:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:09 protein under different cellular conditions.	Inquiry
HLA-MICA*010:10 Genomic Plasmid Vector	PHLAG82542530	Plasmid vector containing HLA-MICA*010:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:10 protein under different cellular conditions.	Inquiry
HLA-MICA*010:11 Genomic Plasmid Vector	PHLAG82542531	Plasmid vector containing HLA-MICA*010:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*010:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*010:11 protein under different cellular conditions.	Inquiry
HLA-MICA*011:01:01 Genomic Plasmid Vector	PHLAG82542532	Plasmid vector containing HLA-MICA*011:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*011:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*011:01:01 protein under different cellular conditions.	Inquiry

HLA-MICA*011:01:02 Genomic Plasmid Vector	PHLAG82542533	Plasmid vector containing HLA-MICA*011:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*011:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*011:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*011:01:03 Genomic Plasmid Vector	PHLAG82542534	Plasmid vector containing HLA-MICA*011:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*011:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*011:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*011:01:04Q Genomic Plasmid Vector	PHLAG82542535	Plasmid vector containing HLA-MICA*011:01:04Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*011:01:04Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*011:01:04Q protein under different cellular conditions.	Inquiry
HLA-MICA*011:01:05 Genomic Plasmid Vector	PHLAG82542536	Plasmid vector containing HLA-MICA*011:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*011:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*011:01:05 protein under different cellular conditions.	Inquiry
HLA-MICA*011:01:06 Genomic Plasmid Vector	PHLAG82542537	Plasmid vector containing HLA-MICA*011:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*011:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*011:01:06 protein under different cellular conditions.	Inquiry
HLA-MICA*011:01:07 Genomic Plasmid Vector	PHLAG82542538	Plasmid vector containing HLA-MICA*011:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*011:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*011:01:07 protein under different cellular conditions.	Inquiry
HLA-MICA*011:01:08 Genomic Plasmid Vector	PHLAG82542539	Plasmid vector containing HLA-MICA*011:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*011:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*011:01:08 protein under different cellular conditions.	Inquiry
HLA-MICA*011:01:09 Genomic Plasmid Vector	PHLAG82542540	Plasmid vector containing HLA-MICA*011:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*011:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*011:01:09 protein under different cellular conditions.	Inquiry
HLA-MICA*012:01:01 Genomic Plasmid Vector	PHLAG82542541	Plasmid vector containing HLA-MICA*012:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:01:01 protein under different cellular conditions.	Inquiry

HLA-MICA*012:01:02 Genomic Plasmid Vector	PHLAG82542542	Plasmid vector containing HLA-MICA*012:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*012:01:03 Genomic Plasmid Vector	PHLAG82542543	Plasmid vector containing HLA-MICA*012:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*012:01:04 Genomic Plasmid Vector	PHLAG82542544	Plasmid vector containing HLA-MICA*012:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:01:04 protein under different cellular conditions.	Inquiry
HLA-MICA*012:01:05 Genomic Plasmid Vector	PHLAG82542545	Plasmid vector containing HLA-MICA*012:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:01:05 protein under different cellular conditions.	Inquiry
HLA-MICA*012:01:06 Genomic Plasmid Vector	PHLAG82542546	Plasmid vector containing HLA-MICA*012:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:01:06 protein under different cellular conditions.	Inquiry
HLA-MICA*012:01:07 Genomic Plasmid Vector	PHLAG82542547	Plasmid vector containing HLA-MICA*012:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:01:07 protein under different cellular conditions.	Inquiry
HLA-MICA*012:01:08 Genomic Plasmid Vector	PHLAG82542548	Plasmid vector containing HLA-MICA*012:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:01:08 protein under different cellular conditions.	Inquiry
HLA-MICA*012:02 Genomic Plasmid Vector	PHLAG82542549	Plasmid vector containing HLA-MICA*012:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:02 protein under different cellular conditions.	Inquiry
HLA-MICA*012:03 Genomic Plasmid Vector	PHLAG82542550	Plasmid vector containing HLA-MICA*012:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:03 protein under different cellular conditions.	Inquiry

HLA-MICA*012:04 Genomic Plasmid Vector	PHLAG82542551	Plasmid vector containing HLA-MICA*012:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:04 protein under different cellular conditions.	Inquiry
HLA-MICA*012:05 Genomic Plasmid Vector	PHLAG82542552	Plasmid vector containing HLA-MICA*012:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:05 protein under different cellular conditions.	Inquiry
HLA-MICA*012:06 Genomic Plasmid Vector	PHLAG82542553	Plasmid vector containing HLA-MICA*012:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:06 protein under different cellular conditions.	Inquiry
HLA-MICA*012:07 Genomic Plasmid Vector	PHLAG82542554	Plasmid vector containing HLA-MICA*012:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:07 protein under different cellular conditions.	Inquiry
HLA-MICA*012:08 Genomic Plasmid Vector	PHLAG82542555	Plasmid vector containing HLA-MICA*012:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*012:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*012:08 protein under different cellular conditions.	Inquiry
HLA-MICA*013 Genomic Plasmid Vector	PHLAG82542556	Plasmid vector containing HLA-MICA*013 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*013 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*013 protein under different cellular conditions.	Inquiry
HLA-MICA*014 Genomic Plasmid Vector	PHLAG82542557	Plasmid vector containing HLA-MICA*014 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*014 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*014 protein under different cellular conditions.	Inquiry
HLA-MICA*015:01 Genomic Plasmid Vector	PHLAG82542558	Plasmid vector containing HLA-MICA*015:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*015:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*015:01 protein under different cellular conditions.	Inquiry
HLA-MICA*015:02 Genomic Plasmid Vector	PHLAG82542559	Plasmid vector containing HLA-MICA*015:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*015:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*015:02 protein under different cellular conditions.	Inquiry

HLA-MICA*016:01:01 Genomic Plasmid Vector	PHLAG82542560	Plasmid vector containing HLA-MICA*016:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*016:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*016:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*016:01:02 Genomic Plasmid Vector	PHLAG82542561	Plasmid vector containing HLA-MICA*016:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*016:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*016:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*016:01:03 Genomic Plasmid Vector	PHLAG82542562	Plasmid vector containing HLA-MICA*016:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*016:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*016:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*016:02 Genomic Plasmid Vector	PHLAG82542563	Plasmid vector containing HLA-MICA*016:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*016:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*016:02 protein under different cellular conditions.	Inquiry
HLA-MICA*016:03 Genomic Plasmid Vector	PHLAG82542564	Plasmid vector containing HLA-MICA*016:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*016:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*016:03 protein under different cellular conditions.	Inquiry
HLA-MICA*017:01 Genomic Plasmid Vector	PHLAG82542565	Plasmid vector containing HLA-MICA*017:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*017:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*017:01 protein under different cellular conditions.	Inquiry
HLA-MICA*017:02 Genomic Plasmid Vector	PHLAG82542566	Plasmid vector containing HLA-MICA*017:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*017:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*017:02 protein under different cellular conditions.	Inquiry
HLA-MICA*017:03 Genomic Plasmid Vector	PHLAG82542567	Plasmid vector containing HLA-MICA*017:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*017:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*017:03 protein under different cellular conditions.	Inquiry
HLA-MICA*017:04 Genomic Plasmid Vector	PHLAG82542568	Plasmid vector containing HLA-MICA*017:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*017:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*017:04 protein under different cellular conditions.	Inquiry

HLA-MICA*018:01:01 Genomic Plasmid Vector	PHLAG82542569	Plasmid vector containing HLA-MICA*018:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*018:01:02 Genomic Plasmid Vector	PHLAG82542570	Plasmid vector containing HLA-MICA*018:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*018:01:03 Genomic Plasmid Vector	PHLAG82542571	Plasmid vector containing HLA-MICA*018:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*018:01:04 Genomic Plasmid Vector	PHLAG82542572	Plasmid vector containing HLA-MICA*018:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:04 protein under different cellular conditions.	Inquiry
HLA-MICA*018:01:05 Genomic Plasmid Vector	PHLAG82542573	Plasmid vector containing HLA-MICA*018:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:05 protein under different cellular conditions.	Inquiry
HLA-MICA*018:01:06 Genomic Plasmid Vector	PHLAG82542574	Plasmid vector containing HLA-MICA*018:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:06 protein under different cellular conditions.	Inquiry
HLA-MICA*018:01:07 Genomic Plasmid Vector	PHLAG82542575	Plasmid vector containing HLA-MICA*018:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:07 protein under different cellular conditions.	Inquiry
HLA-MICA*018:01:08 Genomic Plasmid Vector	PHLAG82542576	Plasmid vector containing HLA-MICA*018:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:08 protein under different cellular conditions.	Inquiry
HLA-MICA*018:01:09 Genomic Plasmid Vector	PHLAG82542577	Plasmid vector containing HLA-MICA*018:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:09 protein under different cellular conditions.	Inquiry

HLA-MICA*018:01:10 Genomic Plasmid Vector	PHLAG82542578	Plasmid vector containing HLA-MICA*018:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:10 protein under different cellular conditions.	Inquiry
HLA-MICA*018:01:11 Genomic Plasmid Vector	PHLAG82542579	Plasmid vector containing HLA-MICA*018:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:11 protein under different cellular conditions.	Inquiry
HLA-MICA*018:01:12 Genomic Plasmid Vector	PHLAG82542580	Plasmid vector containing HLA-MICA*018:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:12 protein under different cellular conditions.	Inquiry
HLA-MICA*018:01:13 Genomic Plasmid Vector	PHLAG82542581	Plasmid vector containing HLA-MICA*018:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:01:13 protein under different cellular conditions.	Inquiry
HLA-MICA*018:02 Genomic Plasmid Vector	PHLAG82542582	Plasmid vector containing HLA-MICA*018:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:02 protein under different cellular conditions.	Inquiry
HLA-MICA*018:03 Genomic Plasmid Vector	PHLAG82542583	Plasmid vector containing HLA-MICA*018:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*018:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*018:03 protein under different cellular conditions.	Inquiry
HLA-MICA*019:01:01 Genomic Plasmid Vector	PHLAG82542584	Plasmid vector containing HLA-MICA*019:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*019:01:02 Genomic Plasmid Vector	PHLAG82542585	Plasmid vector containing HLA-MICA*019:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*019:01:03 Genomic Plasmid Vector	PHLAG82542586	Plasmid vector containing HLA-MICA*019:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:01:03 protein under different cellular conditions.	Inquiry

HLA-MICA*019:01:04 Genomic Plasmid Vector	PHLAG82542587	Plasmid vector containing HLA-MICA*019:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:01:04 protein under different cellular conditions.	Inquiry
HLA-MICA*019:01:05 Genomic Plasmid Vector	PHLAG82542588	Plasmid vector containing HLA-MICA*019:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:01:05 protein under different cellular conditions.	Inquiry
HLA-MICA*019:01:06 Genomic Plasmid Vector	PHLAG82542589	Plasmid vector containing HLA-MICA*019:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:01:06 protein under different cellular conditions.	Inquiry
HLA-MICA*019:01:07 Genomic Plasmid Vector	PHLAG82542590	Plasmid vector containing HLA-MICA*019:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:01:07 protein under different cellular conditions.	Inquiry
HLA-MICA*019:01:08 Genomic Plasmid Vector	PHLAG82542591	Plasmid vector containing HLA-MICA*019:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:01:08 protein under different cellular conditions.	Inquiry
HLA-MICA*019:01:09 Genomic Plasmid Vector	PHLAG82542592	Plasmid vector containing HLA-MICA*019:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:01:09 protein under different cellular conditions.	Inquiry
HLA-MICA*019:01:10 Genomic Plasmid Vector	PHLAG82542593	Plasmid vector containing HLA-MICA*019:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:01:10 protein under different cellular conditions.	Inquiry
HLA-MICA*019:01:11 Genomic Plasmid Vector	PHLAG82542594	Plasmid vector containing HLA-MICA*019:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:01:11 protein under different cellular conditions.	Inquiry
HLA-MICA*019:02 Genomic Plasmid Vector	PHLAG82542595	Plasmid vector containing HLA-MICA*019:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:02 protein under different cellular conditions.	Inquiry

HLA-MICA*019:03 Genomic Plasmid Vector	PHLAG82542596	Plasmid vector containing HLA-MICA*019:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*019:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*019:03 protein under different cellular conditions.	Inquiry
HLA-MICA*020 Genomic Plasmid Vector	PHLAG82542597	Plasmid vector containing HLA-MICA*020 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*020 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*020 protein under different cellular conditions.	Inquiry
HLA-MICA*021 Genomic Plasmid Vector	PHLAG82542598	Plasmid vector containing HLA-MICA*021 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*021 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*021 protein under different cellular conditions.	Inquiry
HLA-MICA*022:01:01 Genomic Plasmid Vector	PHLAG82542599	Plasmid vector containing HLA-MICA*022:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*022:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*022:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*022:01:02 Genomic Plasmid Vector	PHLAG82542600	Plasmid vector containing HLA-MICA*022:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*022:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*022:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*023 Genomic Plasmid Vector	PHLAG82542601	Plasmid vector containing HLA-MICA*023 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*023 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*023 protein under different cellular conditions.	Inquiry
HLA-MICA*024 Genomic Plasmid Vector	PHLAG82542602	Plasmid vector containing HLA-MICA*024 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*024 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*024 protein under different cellular conditions.	Inquiry
HLA-MICA*025 Genomic Plasmid Vector	PHLAG82542603	Plasmid vector containing HLA-MICA*025 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*025 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*025 protein under different cellular conditions.	Inquiry
HLA-MICA*026 Genomic Plasmid Vector	PHLAG82542604	Plasmid vector containing HLA-MICA*026 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*026 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*026 protein under different cellular conditions.	Inquiry

HLA-MICA*027:01:01 Genomic Plasmid Vector	PHLAG82542605	Plasmid vector containing HLA-MICA*027:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*027:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*027:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*027:01:02 Genomic Plasmid Vector	PHLAG82542606	Plasmid vector containing HLA-MICA*027:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*027:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*027:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*027:01:03 Genomic Plasmid Vector	PHLAG82542607	Plasmid vector containing HLA-MICA*027:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*027:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*027:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*027:02 Genomic Plasmid Vector	PHLAG82542608	Plasmid vector containing HLA-MICA*027:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*027:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*027:02 protein under different cellular conditions.	Inquiry
HLA-MICA*028 Genomic Plasmid Vector	PHLAG82542609	Plasmid vector containing HLA-MICA*028 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*028 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*028 protein under different cellular conditions.	Inquiry
HLA-MICA*029:01:01 Genomic Plasmid Vector	PHLAG82542610	Plasmid vector containing HLA-MICA*029:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*029:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*029:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*029:01:02 Genomic Plasmid Vector	PHLAG82542611	Plasmid vector containing HLA-MICA*029:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*029:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*029:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*029:02 Genomic Plasmid Vector	PHLAG82542612	Plasmid vector containing HLA-MICA*029:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*029:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*029:02 protein under different cellular conditions.	Inquiry
HLA-MICA*029:03 Genomic Plasmid Vector	PHLAG82542613	Plasmid vector containing HLA-MICA*029:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*029:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*029:03 protein under different cellular conditions.	Inquiry

HLA-MICA*030 Genomic Plasmid Vector	PHLAG82542614	Plasmid vector containing HLA-MICA*030 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*030 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*030 protein under different cellular conditions.	Inquiry
HLA-MICA*031 Genomic Plasmid Vector	PHLAG82542615	Plasmid vector containing HLA-MICA*031 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*031 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*031 protein under different cellular conditions.	Inquiry
HLA-MICA*032 Genomic Plasmid Vector	PHLAG82542616	Plasmid vector containing HLA-MICA*032 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*032 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*032 protein under different cellular conditions.	Inquiry
HLA-MICA*033:01:01 Genomic Plasmid Vector	PHLAG82542617	Plasmid vector containing HLA-MICA*033:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*033:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*033:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*033:01:02 Genomic Plasmid Vector	PHLAG82542618	Plasmid vector containing HLA-MICA*033:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*033:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*033:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*034 Genomic Plasmid Vector	PHLAG82542619	Plasmid vector containing HLA-MICA*034 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*034 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*034 protein under different cellular conditions.	Inquiry
HLA-MICA*035 Genomic Plasmid Vector	PHLAG82542620	Plasmid vector containing HLA-MICA*035 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*035 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*035 protein under different cellular conditions.	Inquiry
HLA-MICA*036 Genomic Plasmid Vector	PHLAG82542621	Plasmid vector containing HLA-MICA*036 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*036 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*036 protein under different cellular conditions.	Inquiry
HLA-MICA*037 Genomic Plasmid Vector	PHLAG82542622	Plasmid vector containing HLA-MICA*037 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*037 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*037 protein under different cellular conditions.	Inquiry

HLA-MICA*038 Genomic Plasmid Vector	PHLAG82542623	Plasmid vector containing HLA-MICA*038 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*038 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*038 protein under different cellular conditions.	Inquiry
HLA-MICA*039 Genomic Plasmid Vector	PHLAG82542624	Plasmid vector containing HLA-MICA*039 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*039 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*039 protein under different cellular conditions.	Inquiry
HLA-MICA*040 Genomic Plasmid Vector	PHLAG82542625	Plasmid vector containing HLA-MICA*040 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*040 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*040 protein under different cellular conditions.	Inquiry
HLA-MICA*041 Genomic Plasmid Vector	PHLAG82542626	Plasmid vector containing HLA-MICA*041 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*041 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*041 protein under different cellular conditions.	Inquiry
HLA-MICA*042 Genomic Plasmid Vector	PHLAG82542627	Plasmid vector containing HLA-MICA*042 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*042 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*042 protein under different cellular conditions.	Inquiry
HLA-MICA*043 Genomic Plasmid Vector	PHLAG82542628	Plasmid vector containing HLA-MICA*043 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*043 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*043 protein under different cellular conditions.	Inquiry
HLA-MICA*044 Genomic Plasmid Vector	PHLAG82542629	Plasmid vector containing HLA-MICA*044 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*044 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*044 protein under different cellular conditions.	Inquiry
HLA-MICA*045:01:01 Genomic Plasmid Vector	PHLAG82542630	Plasmid vector containing HLA-MICA*045:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*045:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*045:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*045:01:02 Genomic Plasmid Vector	PHLAG82542631	Plasmid vector containing HLA-MICA*045:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*045:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*045:01:02 protein under different cellular conditions.	Inquiry

HLA-MICA*045:01:03 Genomic Plasmid Vector	PHLAG82542632	Plasmid vector containing HLA-MICA*045:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*045:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*045:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*046 Genomic Plasmid Vector	PHLAG82542633	Plasmid vector containing HLA-MICA*046 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*046 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*046 protein under different cellular conditions.	Inquiry
HLA-MICA*047 Genomic Plasmid Vector	PHLAG82542634	Plasmid vector containing HLA-MICA*047 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*047 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*047 protein under different cellular conditions.	Inquiry
HLA-MICA*048 Genomic Plasmid Vector	PHLAG82542635	Plasmid vector containing HLA-MICA*048 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*048 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*048 protein under different cellular conditions.	Inquiry
HLA-MICA*049:01:01 Genomic Plasmid Vector	PHLAG82542636	Plasmid vector containing HLA-MICA*049:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*049:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*049:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*049:01:02 Genomic Plasmid Vector	PHLAG82542637	Plasmid vector containing HLA-MICA*049:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*049:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*049:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*049:02 Genomic Plasmid Vector	PHLAG82542638	Plasmid vector containing HLA-MICA*049:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*049:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*049:02 protein under different cellular conditions.	Inquiry
HLA-MICA*050 Genomic Plasmid Vector	PHLAG82542639	Plasmid vector containing HLA-MICA*050 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*050 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*050 protein under different cellular conditions.	Inquiry
HLA-MICA*051 Genomic Plasmid Vector	PHLAG82542640	Plasmid vector containing HLA-MICA*051 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*051 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*051 protein under different cellular conditions.	Inquiry

HLA-MICA*052 Genomic Plasmid Vector	PHLAG82542641	Plasmid vector containing HLA-MICA*052 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*052 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*052 protein under different cellular conditions.	Inquiry
HLA-MICA*053:01:01 Genomic Plasmid Vector	PHLAG82542642	Plasmid vector containing HLA-MICA*053:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*053:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*053:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*053:01:02 Genomic Plasmid Vector	PHLAG82542643	Plasmid vector containing HLA-MICA*053:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*053:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*053:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*053:01:03 Genomic Plasmid Vector	PHLAG82542644	Plasmid vector containing HLA-MICA*053:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*053:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*053:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*053:01:04 Genomic Plasmid Vector	PHLAG82542645	Plasmid vector containing HLA-MICA*053:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*053:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*053:01:04 protein under different cellular conditions.	Inquiry
HLA-MICA*053:01:05 Genomic Plasmid Vector	PHLAG82542646	Plasmid vector containing HLA-MICA*053:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*053:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*053:01:05 protein under different cellular conditions.	Inquiry
HLA-MICA*054 Genomic Plasmid Vector	PHLAG82542647	Plasmid vector containing HLA-MICA*054 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*054 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*054 protein under different cellular conditions.	Inquiry
HLA-MICA*055 Genomic Plasmid Vector	PHLAG82542648	Plasmid vector containing HLA-MICA*055 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*055 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*055 protein under different cellular conditions.	Inquiry
HLA-MICA*056 Genomic Plasmid Vector	PHLAG82542649	Plasmid vector containing HLA-MICA*056 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*056 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*056 protein under different cellular conditions.	Inquiry

HLA-MICA*057:01:01 Genomic Plasmid Vector	PHLAG82542650	Plasmid vector containing HLA-MICA*057:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*057:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*057:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*057:01:02 Genomic Plasmid Vector	PHLAG82542651	Plasmid vector containing HLA-MICA*057:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*057:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*057:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*057:01:03 Genomic Plasmid Vector	PHLAG82542652	Plasmid vector containing HLA-MICA*057:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*057:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*057:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*057:01:04 Genomic Plasmid Vector	PHLAG82542653	Plasmid vector containing HLA-MICA*057:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*057:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*057:01:04 protein under different cellular conditions.	Inquiry
HLA-MICA*058 Genomic Plasmid Vector	PHLAG82542654	Plasmid vector containing HLA-MICA*058 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*058 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*058 protein under different cellular conditions.	Inquiry
HLA-MICA*059 Genomic Plasmid Vector	PHLAG82542655	Plasmid vector containing HLA-MICA*059 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*059 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*059 protein under different cellular conditions.	Inquiry
HLA-MICA*060 Genomic Plasmid Vector	PHLAG82542656	Plasmid vector containing HLA-MICA*060 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*060 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*060 protein under different cellular conditions.	Inquiry
HLA-MICA*061 Genomic Plasmid Vector	PHLAG82542657	Plasmid vector containing HLA-MICA*061 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*061 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*061 protein under different cellular conditions.	Inquiry
HLA-MICA*062:01:01 Genomic Plasmid Vector	PHLAG82542658	Plasmid vector containing HLA-MICA*062:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*062:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*062:01:01 protein under different cellular conditions.	Inquiry

HLA-MICA*062:01:02 Genomic Plasmid Vector	PHLAG82542659	Plasmid vector containing HLA-MICA*062:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*062:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*062:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*063N Genomic Plasmid Vector	PHLAG825426660	Plasmid vector containing HLA-MICA*063N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*063N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*063N protein under different cellular conditions.	Inquiry
HLA-MICA*064N Genomic Plasmid Vector	PHLAG825426661	Plasmid vector containing HLA-MICA*064N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*064N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*064N protein under different cellular conditions.	Inquiry
HLA-MICA*065 Genomic Plasmid Vector	PHLAG825426662	Plasmid vector containing HLA-MICA*065 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*065 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*065 protein under different cellular conditions.	Inquiry
HLA-MICA*066 Genomic Plasmid Vector	PHLAG825426663	Plasmid vector containing HLA-MICA*066 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*066 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*066 protein under different cellular conditions.	Inquiry
HLA-MICA*067 Genomic Plasmid Vector	PHLAG825426664	Plasmid vector containing HLA-MICA*067 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*067 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*067 protein under different cellular conditions.	Inquiry
HLA-MICA*068:01:01 Genomic Plasmid Vector	PHLAG825426665	Plasmid vector containing HLA-MICA*068:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*068:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*068:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*068:01:02 Genomic Plasmid Vector	PHLAG825426666	Plasmid vector containing HLA-MICA*068:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*068:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*068:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*068:02 Genomic Plasmid Vector	PHLAG825426667	Plasmid vector containing HLA-MICA*068:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*068:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*068:02 protein under different cellular conditions.	Inquiry

HLA-MICA*069 Genomic Plasmid Vector	PHLAG82542668	Plasmid vector containing HLA-MICA*069 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*069 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*069 protein under different cellular conditions.	Inquiry
HLA-MICA*070 Genomic Plasmid Vector	PHLAG82542669	Plasmid vector containing HLA-MICA*070 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*070 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*070 protein under different cellular conditions.	Inquiry
HLA-MICA*071 Genomic Plasmid Vector	PHLAG82542670	Plasmid vector containing HLA-MICA*071 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*071 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*071 protein under different cellular conditions.	Inquiry
HLA-MICA*072:01:01 Genomic Plasmid Vector	PHLAG82542671	Plasmid vector containing HLA-MICA*072:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*072:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*072:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*072:01:02 Genomic Plasmid Vector	PHLAG82542672	Plasmid vector containing HLA-MICA*072:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*072:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*072:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*072:01:03 Genomic Plasmid Vector	PHLAG82542673	Plasmid vector containing HLA-MICA*072:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*072:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*072:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*073 Genomic Plasmid Vector	PHLAG82542674	Plasmid vector containing HLA-MICA*073 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*073 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*073 protein under different cellular conditions.	Inquiry
HLA-MICA*074 Genomic Plasmid Vector	PHLAG82542675	Plasmid vector containing HLA-MICA*074 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*074 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*074 protein under different cellular conditions.	Inquiry
HLA-MICA*075 Genomic Plasmid Vector	PHLAG82542676	Plasmid vector containing HLA-MICA*075 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*075 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*075 protein under different cellular conditions.	Inquiry

HLA-MICA*076 Genomic Plasmid Vector	PHLAG82542677	Plasmid vector containing HLA-MICA*076 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*076 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*076 protein under different cellular conditions.	Inquiry
HLA-MICA*077 Genomic Plasmid Vector	PHLAG82542678	Plasmid vector containing HLA-MICA*077 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*077 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*077 protein under different cellular conditions.	Inquiry
HLA-MICA*078 Genomic Plasmid Vector	PHLAG82542679	Plasmid vector containing HLA-MICA*078 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*078 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*078 protein under different cellular conditions.	Inquiry
HLA-MICA*079 Genomic Plasmid Vector	PHLAG82542680	Plasmid vector containing HLA-MICA*079 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*079 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*079 protein under different cellular conditions.	Inquiry
HLA-MICA*080 Genomic Plasmid Vector	PHLAG82542681	Plasmid vector containing HLA-MICA*080 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*080 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*080 protein under different cellular conditions.	Inquiry
HLA-MICA*081 Genomic Plasmid Vector	PHLAG82542682	Plasmid vector containing HLA-MICA*081 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*081 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*081 protein under different cellular conditions.	Inquiry
HLA-MICA*082 Genomic Plasmid Vector	PHLAG82542683	Plasmid vector containing HLA-MICA*082 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*082 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*082 protein under different cellular conditions.	Inquiry
HLA-MICA*083 Genomic Plasmid Vector	PHLAG82542684	Plasmid vector containing HLA-MICA*083 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*083 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*083 protein under different cellular conditions.	Inquiry
HLA-MICA*084 Genomic Plasmid Vector	PHLAG82542685	Plasmid vector containing HLA-MICA*084 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*084 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*084 protein under different cellular conditions.	Inquiry

HLA-MICA*085 Genomic Plasmid Vector	PHLAG82542686	Plasmid vector containing HLA-MICA*085 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*085 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*085 protein under different cellular conditions.	Inquiry
HLA-MICA*086 Genomic Plasmid Vector	PHLAG82542687	Plasmid vector containing HLA-MICA*086 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*086 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*086 protein under different cellular conditions.	Inquiry
HLA-MICA*087 Genomic Plasmid Vector	PHLAG82542688	Plasmid vector containing HLA-MICA*087 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*087 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*087 protein under different cellular conditions.	Inquiry
HLA-MICA*088N Genomic Plasmid Vector	PHLAG82542689	Plasmid vector containing HLA-MICA*088N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*088N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*088N protein under different cellular conditions.	Inquiry
HLA-MICA*089 Genomic Plasmid Vector	PHLAG82542690	Plasmid vector containing HLA-MICA*089 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*089 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*089 protein under different cellular conditions.	Inquiry
HLA-MICA*090 Genomic Plasmid Vector	PHLAG82542691	Plasmid vector containing HLA-MICA*090 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*090 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*090 protein under different cellular conditions.	Inquiry
HLA-MICA*091 Genomic Plasmid Vector	PHLAG82542692	Plasmid vector containing HLA-MICA*091 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*091 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*091 protein under different cellular conditions.	Inquiry
HLA-MICA*092 Genomic Plasmid Vector	PHLAG82542693	Plasmid vector containing HLA-MICA*092 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*092 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*092 protein under different cellular conditions.	Inquiry
HLA-MICA*093 Genomic Plasmid Vector	PHLAG82542694	Plasmid vector containing HLA-MICA*093 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*093 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*093 protein under different cellular conditions.	Inquiry

HLA-MICA*094 Genomic Plasmid Vector	PHLAG82542695	Plasmid vector containing HLA-MICA*094 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*094 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*094 protein under different cellular conditions.	Inquiry
HLA-MICA*095 Genomic Plasmid Vector	PHLAG82542696	Plasmid vector containing HLA-MICA*095 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*095 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*095 protein under different cellular conditions.	Inquiry
HLA-MICA*096N Genomic Plasmid Vector	PHLAG82542697	Plasmid vector containing HLA-MICA*096N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*096N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*096N protein under different cellular conditions.	Inquiry
HLA-MICA*097 Genomic Plasmid Vector	PHLAG82542698	Plasmid vector containing HLA-MICA*097 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*097 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*097 protein under different cellular conditions.	Inquiry
HLA-MICA*098:01 Genomic Plasmid Vector	PHLAG82542699	Plasmid vector containing HLA-MICA*098:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*098:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*098:01 protein under different cellular conditions.	Inquiry
HLA-MICA*098:02 Genomic Plasmid Vector	PHLAG825427000	Plasmid vector containing HLA-MICA*098:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*098:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*098:02 protein under different cellular conditions.	Inquiry
HLA-MICA*099:01:01 Genomic Plasmid Vector	PHLAG825427001	Plasmid vector containing HLA-MICA*099:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*099:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*099:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*099:01:02 Genomic Plasmid Vector	PHLAG825427002	Plasmid vector containing HLA-MICA*099:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*099:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*099:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*100 Genomic Plasmid Vector	PHLAG825427003	Plasmid vector containing HLA-MICA*100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*100 protein under different cellular conditions.	Inquiry

HLA-MICA*101 Genomic Plasmid Vector	PHLAG82542704	Plasmid vector containing HLA-MICA*101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*101 protein under different cellular conditions.	Inquiry
HLA-MICA*102 Genomic Plasmid Vector	PHLAG82542705	Plasmid vector containing HLA-MICA*102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*102 protein under different cellular conditions.	Inquiry
HLA-MICA*103 Genomic Plasmid Vector	PHLAG82542706	Plasmid vector containing HLA-MICA*103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*103 protein under different cellular conditions.	Inquiry
HLA-MICA*104 Genomic Plasmid Vector	PHLAG82542707	Plasmid vector containing HLA-MICA*104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*104 protein under different cellular conditions.	Inquiry
HLA-MICA*105Q Genomic Plasmid Vector	PHLAG82542708	Plasmid vector containing HLA-MICA*105Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*105Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*105Q protein under different cellular conditions.	Inquiry
HLA-MICA*106 Genomic Plasmid Vector	PHLAG82542709	Plasmid vector containing HLA-MICA*106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*106 protein under different cellular conditions.	Inquiry
HLA-MICA*107N Genomic Plasmid Vector	PHLAG82542710	Plasmid vector containing HLA-MICA*107N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*107N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*107N protein under different cellular conditions.	Inquiry
HLA-MICA*108 Genomic Plasmid Vector	PHLAG82542711	Plasmid vector containing HLA-MICA*108 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*108 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*108 protein under different cellular conditions.	Inquiry
HLA-MICA*109 Genomic Plasmid Vector	PHLAG82542712	Plasmid vector containing HLA-MICA*109 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*109 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*109 protein under different cellular conditions.	Inquiry

HLA-MICA*110 Genomic Plasmid Vector	PHLAG82542713	Plasmid vector containing HLA-MICA*110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*110 protein under different cellular conditions.	Inquiry
HLA-MICA*111:01 Genomic Plasmid Vector	PHLAG82542714	Plasmid vector containing HLA-MICA*111:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*111:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*111:01 protein under different cellular conditions.	Inquiry
HLA-MICA*111:02 Genomic Plasmid Vector	PHLAG82542715	Plasmid vector containing HLA-MICA*111:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*111:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*111:02 protein under different cellular conditions.	Inquiry
HLA-MICA*112:01:01 Genomic Plasmid Vector	PHLAG82542716	Plasmid vector containing HLA-MICA*112:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*112:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*112:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*112:01:02 Genomic Plasmid Vector	PHLAG82542717	Plasmid vector containing HLA-MICA*112:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*112:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*112:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*112:01:03 Genomic Plasmid Vector	PHLAG82542718	Plasmid vector containing HLA-MICA*112:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*112:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*112:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*112:01:04 Genomic Plasmid Vector	PHLAG82542719	Plasmid vector containing HLA-MICA*112:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*112:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*112:01:04 protein under different cellular conditions.	Inquiry
HLA-MICA*112:01:05 Genomic Plasmid Vector	PHLAG82542720	Plasmid vector containing HLA-MICA*112:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*112:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*112:01:05 protein under different cellular conditions.	Inquiry
HLA-MICA*112:02 Genomic Plasmid Vector	PHLAG82542721	Plasmid vector containing HLA-MICA*112:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*112:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*112:02 protein under different cellular conditions.	Inquiry

HLA-MICA*113 Genomic Plasmid Vector	PHLAG825427212	Plasmid vector containing HLA-MICA*113 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*113 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*113 protein under different cellular conditions.	Inquiry
HLA-MICA*114 Genomic Plasmid Vector	PHLAG825427213	Plasmid vector containing HLA-MICA*114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*114 protein under different cellular conditions.	Inquiry
HLA-MICA*115 Genomic Plasmid Vector	PHLAG825427214	Plasmid vector containing HLA-MICA*115 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*115 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*115 protein under different cellular conditions.	Inquiry
HLA-MICA*116 Genomic Plasmid Vector	PHLAG825427215	Plasmid vector containing HLA-MICA*116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*116 protein under different cellular conditions.	Inquiry
HLA-MICA*117 Genomic Plasmid Vector	PHLAG825427216	Plasmid vector containing HLA-MICA*117 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*117 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*117 protein under different cellular conditions.	Inquiry
HLA-MICA*118 Genomic Plasmid Vector	PHLAG825427217	Plasmid vector containing HLA-MICA*118 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*118 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*118 protein under different cellular conditions.	Inquiry
HLA-MICA*119:01:01 Genomic Plasmid Vector	PHLAG825427218	Plasmid vector containing HLA-MICA*119:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*119:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*119:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*119:01:02 Genomic Plasmid Vector	PHLAG825427219	Plasmid vector containing HLA-MICA*119:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*119:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*119:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*120 Genomic Plasmid Vector	PHLAG825427310	Plasmid vector containing HLA-MICA*120 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*120 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*120 protein under different cellular conditions.	Inquiry

HLA-MICA*121 Genomic Plasmid Vector	PHLAG8254273 1	Plasmid vector containing HLA-MICA*121 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*121 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*121 protein under different cellular conditions.	Inquiry
HLA-MICA*122 Genomic Plasmid Vector	PHLAG8254273 2	Plasmid vector containing HLA-MICA*122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*122 protein under different cellular conditions.	Inquiry
HLA-MICA*123 Genomic Plasmid Vector	PHLAG8254273 3	Plasmid vector containing HLA-MICA*123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*123 protein under different cellular conditions.	Inquiry
HLA-MICA*124:01:01 Genomic Plasmid Vector	PHLAG8254273 4	Plasmid vector containing HLA-MICA*124:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*124:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*124:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*124:01:02 Genomic Plasmid Vector	PHLAG8254273 5	Plasmid vector containing HLA-MICA*124:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*124:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*124:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*125 Genomic Plasmid Vector	PHLAG8254273 6	Plasmid vector containing HLA-MICA*125 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*125 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*125 protein under different cellular conditions.	Inquiry
HLA-MICA*126 Genomic Plasmid Vector	PHLAG8254273 7	Plasmid vector containing HLA-MICA*126 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*126 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*126 protein under different cellular conditions.	Inquiry
HLA-MICA*127 Genomic Plasmid Vector	PHLAG8254273 8	Plasmid vector containing HLA-MICA*127 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*127 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*127 protein under different cellular conditions.	Inquiry
HLA-MICA*128 Genomic Plasmid Vector	PHLAG8254273 9	Plasmid vector containing HLA-MICA*128 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*128 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*128 protein under different cellular conditions.	Inquiry

HLA-MICA*129 Genomic Plasmid Vector	PHLAG82542740	Plasmid vector containing HLA-MICA*129 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*129 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*129 protein under different cellular conditions.	Inquiry
HLA-MICA*130:01 Genomic Plasmid Vector	PHLAG82542741	Plasmid vector containing HLA-MICA*130:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*130:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*130:01 protein under different cellular conditions.	Inquiry
HLA-MICA*130:02 Genomic Plasmid Vector	PHLAG82542742	Plasmid vector containing HLA-MICA*130:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*130:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*130:02 protein under different cellular conditions.	Inquiry
HLA-MICA*131 Genomic Plasmid Vector	PHLAG82542743	Plasmid vector containing HLA-MICA*131 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*131 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*131 protein under different cellular conditions.	Inquiry
HLA-MICA*132 Genomic Plasmid Vector	PHLAG82542744	Plasmid vector containing HLA-MICA*132 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*132 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*132 protein under different cellular conditions.	Inquiry
HLA-MICA*133 Genomic Plasmid Vector	PHLAG82542745	Plasmid vector containing HLA-MICA*133 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*133 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*133 protein under different cellular conditions.	Inquiry
HLA-MICA*134 Genomic Plasmid Vector	PHLAG82542746	Plasmid vector containing HLA-MICA*134 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*134 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*134 protein under different cellular conditions.	Inquiry
HLA-MICA*135 Genomic Plasmid Vector	PHLAG82542747	Plasmid vector containing HLA-MICA*135 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*135 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*135 protein under different cellular conditions.	Inquiry
HLA-MICA*136 Genomic Plasmid Vector	PHLAG82542748	Plasmid vector containing HLA-MICA*136 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*136 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*136 protein under different cellular conditions.	Inquiry

HLA-MICA*137:01:01 Genomic Plasmid Vector	PHLAG82542749	Plasmid vector containing HLA-MICA*137:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*137:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*137:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*137:01:02 Genomic Plasmid Vector	PHLAG82542750	Plasmid vector containing HLA-MICA*137:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*137:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*137:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*138 Genomic Plasmid Vector	PHLAG82542751	Plasmid vector containing HLA-MICA*138 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*138 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*138 protein under different cellular conditions.	Inquiry
HLA-MICA*139 Genomic Plasmid Vector	PHLAG82542752	Plasmid vector containing HLA-MICA*139 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*139 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*139 protein under different cellular conditions.	Inquiry
HLA-MICA*140 Genomic Plasmid Vector	PHLAG82542753	Plasmid vector containing HLA-MICA*140 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*140 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*140 protein under different cellular conditions.	Inquiry
HLA-MICA*141 Genomic Plasmid Vector	PHLAG82542754	Plasmid vector containing HLA-MICA*141 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*141 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*141 protein under different cellular conditions.	Inquiry
HLA-MICA*142:01:01 Genomic Plasmid Vector	PHLAG82542755	Plasmid vector containing HLA-MICA*142:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*142:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*142:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*142:01:02 Genomic Plasmid Vector	PHLAG82542756	Plasmid vector containing HLA-MICA*142:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*142:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*142:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*143 Genomic Plasmid Vector	PHLAG82542757	Plasmid vector containing HLA-MICA*143 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*143 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*143 protein under different cellular conditions.	Inquiry

HLA-MICA*144 Genomic Plasmid Vector	PHLAG82542758	Plasmid vector containing HLA-MICA*144 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*144 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*144 protein under different cellular conditions.	Inquiry
HLA-MICA*145 Genomic Plasmid Vector	PHLAG82542759	Plasmid vector containing HLA-MICA*145 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*145 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*145 protein under different cellular conditions.	Inquiry
HLA-MICA*146 Genomic Plasmid Vector	PHLAG82542760	Plasmid vector containing HLA-MICA*146 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*146 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*146 protein under different cellular conditions.	Inquiry
HLA-MICA*147 Genomic Plasmid Vector	PHLAG82542761	Plasmid vector containing HLA-MICA*147 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*147 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*147 protein under different cellular conditions.	Inquiry
HLA-MICA*148 Genomic Plasmid Vector	PHLAG82542762	Plasmid vector containing HLA-MICA*148 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*148 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*148 protein under different cellular conditions.	Inquiry
HLA-MICA*149 Genomic Plasmid Vector	PHLAG82542763	Plasmid vector containing HLA-MICA*149 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*149 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*149 protein under different cellular conditions.	Inquiry
HLA-MICA*150 Genomic Plasmid Vector	PHLAG82542764	Plasmid vector containing HLA-MICA*150 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*150 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*150 protein under different cellular conditions.	Inquiry
HLA-MICA*151:01:01 Genomic Plasmid Vector	PHLAG82542765	Plasmid vector containing HLA-MICA*151:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*151:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*151:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*151:01:02 Genomic Plasmid Vector	PHLAG82542766	Plasmid vector containing HLA-MICA*151:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*151:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*151:01:02 protein under different cellular conditions.	Inquiry

HLA-MICA*151:01:03 Genomic Plasmid Vector	PHLAG82542767	Plasmid vector containing HLA-MICA*151:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*151:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*151:01:03 protein under different cellular conditions.	Inquiry
HLA-MICA*152 Genomic Plasmid Vector	PHLAG82542768	Plasmid vector containing HLA-MICA*152 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*152 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*152 protein under different cellular conditions.	Inquiry
HLA-MICA*153 Genomic Plasmid Vector	PHLAG82542769	Plasmid vector containing HLA-MICA*153 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*153 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*153 protein under different cellular conditions.	Inquiry
HLA-MICA*154 Genomic Plasmid Vector	PHLAG82542770	Plasmid vector containing HLA-MICA*154 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*154 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*154 protein under different cellular conditions.	Inquiry
HLA-MICA*155 Genomic Plasmid Vector	PHLAG82542771	Plasmid vector containing HLA-MICA*155 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*155 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*155 protein under different cellular conditions.	Inquiry
HLA-MICA*156 Genomic Plasmid Vector	PHLAG82542772	Plasmid vector containing HLA-MICA*156 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*156 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*156 protein under different cellular conditions.	Inquiry
HLA-MICA*157 Genomic Plasmid Vector	PHLAG82542773	Plasmid vector containing HLA-MICA*157 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*157 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*157 protein under different cellular conditions.	Inquiry
HLA-MICA*158 Genomic Plasmid Vector	PHLAG82542774	Plasmid vector containing HLA-MICA*158 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*158 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*158 protein under different cellular conditions.	Inquiry
HLA-MICA*159 Genomic Plasmid Vector	PHLAG82542775	Plasmid vector containing HLA-MICA*159 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*159 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*159 protein under different cellular conditions.	Inquiry

HLA-MICA*160 Genomic Plasmid Vector	PHLAG82542776	Plasmid vector containing HLA-MICA*160 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*160 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*160 protein under different cellular conditions.	Inquiry
HLA-MICA*161 Genomic Plasmid Vector	PHLAG82542777	Plasmid vector containing HLA-MICA*161 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*161 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*161 protein under different cellular conditions.	Inquiry
HLA-MICA*162 Genomic Plasmid Vector	PHLAG82542778	Plasmid vector containing HLA-MICA*162 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*162 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*162 protein under different cellular conditions.	Inquiry
HLA-MICA*163 Genomic Plasmid Vector	PHLAG82542779	Plasmid vector containing HLA-MICA*163 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*163 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*163 protein under different cellular conditions.	Inquiry
HLA-MICA*164 Genomic Plasmid Vector	PHLAG82542780	Plasmid vector containing HLA-MICA*164 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*164 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*164 protein under different cellular conditions.	Inquiry
HLA-MICA*165 Genomic Plasmid Vector	PHLAG82542781	Plasmid vector containing HLA-MICA*165 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*165 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*165 protein under different cellular conditions.	Inquiry
HLA-MICA*166:01:01 Genomic Plasmid Vector	PHLAG82542782	Plasmid vector containing HLA-MICA*166:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*166:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*166:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*166:01:02 Genomic Plasmid Vector	PHLAG82542783	Plasmid vector containing HLA-MICA*166:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*166:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*166:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*166:01:03 Genomic Plasmid Vector	PHLAG82542784	Plasmid vector containing HLA-MICA*166:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*166:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*166:01:03 protein under different cellular conditions.	Inquiry

HLA-MICA*167 Genomic Plasmid Vector	PHLAG82542785	Plasmid vector containing HLA-MICA*167 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*167 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*167 protein under different cellular conditions.	Inquiry
HLA-MICA*168:01:01 Genomic Plasmid Vector	PHLAG82542786	Plasmid vector containing HLA-MICA*168:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*168:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*168:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*168:01:02 Genomic Plasmid Vector	PHLAG82542787	Plasmid vector containing HLA-MICA*168:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*168:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*168:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*169 Genomic Plasmid Vector	PHLAG82542788	Plasmid vector containing HLA-MICA*169 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*169 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*169 protein under different cellular conditions.	Inquiry
HLA-MICA*170 Genomic Plasmid Vector	PHLAG82542789	Plasmid vector containing HLA-MICA*170 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*170 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*170 protein under different cellular conditions.	Inquiry
HLA-MICA*171Q Genomic Plasmid Vector	PHLAG82542790	Plasmid vector containing HLA-MICA*171Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*171Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*171Q protein under different cellular conditions.	Inquiry
HLA-MICA*172 Genomic Plasmid Vector	PHLAG82542791	Plasmid vector containing HLA-MICA*172 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*172 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*172 protein under different cellular conditions.	Inquiry
HLA-MICA*173 Genomic Plasmid Vector	PHLAG82542792	Plasmid vector containing HLA-MICA*173 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*173 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*173 protein under different cellular conditions.	Inquiry
HLA-MICA*174 Genomic Plasmid Vector	PHLAG82542793	Plasmid vector containing HLA-MICA*174 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*174 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*174 protein under different cellular conditions.	Inquiry

HLA-MICA*175 Genomic Plasmid Vector	PHLAG82542794	Plasmid vector containing HLA-MICA*175 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*175 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*175 protein under different cellular conditions.	Inquiry
HLA-MICA*176 Genomic Plasmid Vector	PHLAG82542795	Plasmid vector containing HLA-MICA*176 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*176 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*176 protein under different cellular conditions.	Inquiry
HLA-MICA*177 Genomic Plasmid Vector	PHLAG82542796	Plasmid vector containing HLA-MICA*177 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*177 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*177 protein under different cellular conditions.	Inquiry
HLA-MICA*178 Genomic Plasmid Vector	PHLAG82542797	Plasmid vector containing HLA-MICA*178 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*178 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*178 protein under different cellular conditions.	Inquiry
HLA-MICA*179 Genomic Plasmid Vector	PHLAG82542798	Plasmid vector containing HLA-MICA*179 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*179 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*179 protein under different cellular conditions.	Inquiry
HLA-MICA*180 Genomic Plasmid Vector	PHLAG82542799	Plasmid vector containing HLA-MICA*180 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*180 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*180 protein under different cellular conditions.	Inquiry
HLA-MICA*181 Genomic Plasmid Vector	PHLAG825428000	Plasmid vector containing HLA-MICA*181 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*181 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*181 protein under different cellular conditions.	Inquiry
HLA-MICA*182 Genomic Plasmid Vector	PHLAG825428001	Plasmid vector containing HLA-MICA*182 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*182 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*182 protein under different cellular conditions.	Inquiry
HLA-MICA*183 Genomic Plasmid Vector	PHLAG825428002	Plasmid vector containing HLA-MICA*183 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*183 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*183 protein under different cellular conditions.	Inquiry

HLA-MICA*184 Genomic Plasmid Vector	PHLAG82542803	Plasmid vector containing HLA-MICA*184 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*184 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*184 protein under different cellular conditions.	Inquiry
HLA-MICA*185 Genomic Plasmid Vector	PHLAG82542804	Plasmid vector containing HLA-MICA*185 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*185 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*185 protein under different cellular conditions.	Inquiry
HLA-MICA*186 Genomic Plasmid Vector	PHLAG82542805	Plasmid vector containing HLA-MICA*186 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*186 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*186 protein under different cellular conditions.	Inquiry
HLA-MICA*187 Genomic Plasmid Vector	PHLAG82542806	Plasmid vector containing HLA-MICA*187 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*187 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*187 protein under different cellular conditions.	Inquiry
HLA-MICA*188 Genomic Plasmid Vector	PHLAG82542807	Plasmid vector containing HLA-MICA*188 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*188 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*188 protein under different cellular conditions.	Inquiry
HLA-MICA*189 Genomic Plasmid Vector	PHLAG82542808	Plasmid vector containing HLA-MICA*189 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*189 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*189 protein under different cellular conditions.	Inquiry
HLA-MICA*190 Genomic Plasmid Vector	PHLAG82542809	Plasmid vector containing HLA-MICA*190 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*190 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*190 protein under different cellular conditions.	Inquiry
HLA-MICA*191 Genomic Plasmid Vector	PHLAG82542810	Plasmid vector containing HLA-MICA*191 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*191 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*191 protein under different cellular conditions.	Inquiry
HLA-MICA*192 Genomic Plasmid Vector	PHLAG82542811	Plasmid vector containing HLA-MICA*192 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*192 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*192 protein under different cellular conditions.	Inquiry

HLA-MICA*193 Genomic Plasmid Vector	PHLAG82542812	Plasmid vector containing HLA-MICA*193 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*193 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*193 protein under different cellular conditions.	Inquiry
HLA-MICA*194 Genomic Plasmid Vector	PHLAG82542813	Plasmid vector containing HLA-MICA*194 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*194 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*194 protein under different cellular conditions.	Inquiry
HLA-MICA*195N Genomic Plasmid Vector	PHLAG82542814	Plasmid vector containing HLA-MICA*195N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*195N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*195N protein under different cellular conditions.	Inquiry
HLA-MICA*196 Genomic Plasmid Vector	PHLAG82542815	Plasmid vector containing HLA-MICA*196 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*196 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*196 protein under different cellular conditions.	Inquiry
HLA-MICA*197 Genomic Plasmid Vector	PHLAG82542816	Plasmid vector containing HLA-MICA*197 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*197 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*197 protein under different cellular conditions.	Inquiry
HLA-MICA*198 Genomic Plasmid Vector	PHLAG82542817	Plasmid vector containing HLA-MICA*198 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*198 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*198 protein under different cellular conditions.	Inquiry
HLA-MICA*199 Genomic Plasmid Vector	PHLAG82542818	Plasmid vector containing HLA-MICA*199 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*199 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*199 protein under different cellular conditions.	Inquiry
HLA-MICA*200 Genomic Plasmid Vector	PHLAG82542819	Plasmid vector containing HLA-MICA*200 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*200 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*200 protein under different cellular conditions.	Inquiry
HLA-MICA*201 Genomic Plasmid Vector	PHLAG82542820	Plasmid vector containing HLA-MICA*201 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*201 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*201 protein under different cellular conditions.	Inquiry

HLA-MICA*202 Genomic Plasmid Vector	PHLAG82542821	Plasmid vector containing HLA-MICA*202 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*202 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*202 protein under different cellular conditions.	Inquiry
HLA-MICA*203 Genomic Plasmid Vector	PHLAG82542822	Plasmid vector containing HLA-MICA*203 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*203 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*203 protein under different cellular conditions.	Inquiry
HLA-MICA*204 Genomic Plasmid Vector	PHLAG82542823	Plasmid vector containing HLA-MICA*204 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*204 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*204 protein under different cellular conditions.	Inquiry
HLA-MICA*205 Genomic Plasmid Vector	PHLAG82542824	Plasmid vector containing HLA-MICA*205 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*205 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*205 protein under different cellular conditions.	Inquiry
HLA-MICA*206 Genomic Plasmid Vector	PHLAG82542825	Plasmid vector containing HLA-MICA*206 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*206 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*206 protein under different cellular conditions.	Inquiry
HLA-MICA*207 Genomic Plasmid Vector	PHLAG82542826	Plasmid vector containing HLA-MICA*207 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*207 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*207 protein under different cellular conditions.	Inquiry
HLA-MICA*208:01:01 Genomic Plasmid Vector	PHLAG82542827	Plasmid vector containing HLA-MICA*208:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*208:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*208:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*208:01:02 Genomic Plasmid Vector	PHLAG82542828	Plasmid vector containing HLA-MICA*208:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*208:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*208:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*208:01:03 Genomic Plasmid Vector	PHLAG82542829	Plasmid vector containing HLA-MICA*208:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*208:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*208:01:03 protein under different cellular conditions.	Inquiry

HLA-MICA*208:01:04 Genomic Plasmid Vector	PHLAG82542830	Plasmid vector containing HLA-MICA*208:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*208:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*208:01:04 protein under different cellular conditions.	Inquiry
HLA-MICA*209 Genomic Plasmid Vector	PHLAG82542831	Plasmid vector containing HLA-MICA*209 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*209 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*209 protein under different cellular conditions.	Inquiry
HLA-MICA*210 Genomic Plasmid Vector	PHLAG82542832	Plasmid vector containing HLA-MICA*210 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*210 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*210 protein under different cellular conditions.	Inquiry
HLA-MICA*211 Genomic Plasmid Vector	PHLAG82542833	Plasmid vector containing HLA-MICA*211 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*211 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*211 protein under different cellular conditions.	Inquiry
HLA-MICA*212 Genomic Plasmid Vector	PHLAG82542834	Plasmid vector containing HLA-MICA*212 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*212 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*212 protein under different cellular conditions.	Inquiry
HLA-MICA*213 Genomic Plasmid Vector	PHLAG82542835	Plasmid vector containing HLA-MICA*213 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*213 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*213 protein under different cellular conditions.	Inquiry
HLA-MICA*214 Genomic Plasmid Vector	PHLAG82542836	Plasmid vector containing HLA-MICA*214 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*214 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*214 protein under different cellular conditions.	Inquiry
HLA-MICA*215 Genomic Plasmid Vector	PHLAG82542837	Plasmid vector containing HLA-MICA*215 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*215 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*215 protein under different cellular conditions.	Inquiry
HLA-MICA*216:01:01 Genomic Plasmid Vector	PHLAG82542838	Plasmid vector containing HLA-MICA*216:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*216:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*216:01:01 protein under different cellular conditions.	Inquiry

HLA-MICA*216:01:02 Genomic Plasmid Vector	PHLAG82542839	Plasmid vector containing HLA-MICA*216:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*216:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*216:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*217 Genomic Plasmid Vector	PHLAG825428440	Plasmid vector containing HLA-MICA*217 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*217 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*217 protein under different cellular conditions.	Inquiry
HLA-MICA*218 Genomic Plasmid Vector	PHLAG825428441	Plasmid vector containing HLA-MICA*218 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*218 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*218 protein under different cellular conditions.	Inquiry
HLA-MICA*219 Genomic Plasmid Vector	PHLAG825428442	Plasmid vector containing HLA-MICA*219 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*219 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*219 protein under different cellular conditions.	Inquiry
HLA-MICA*220 Genomic Plasmid Vector	PHLAG825428443	Plasmid vector containing HLA-MICA*220 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*220 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*220 protein under different cellular conditions.	Inquiry
HLA-MICA*221 Genomic Plasmid Vector	PHLAG825428444	Plasmid vector containing HLA-MICA*221 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*221 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*221 protein under different cellular conditions.	Inquiry
HLA-MICA*222N Genomic Plasmid Vector	PHLAG825428445	Plasmid vector containing HLA-MICA*222N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*222N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*222N protein under different cellular conditions.	Inquiry
HLA-MICA*223 Genomic Plasmid Vector	PHLAG825428446	Plasmid vector containing HLA-MICA*223 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*223 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*223 protein under different cellular conditions.	Inquiry
HLA-MICA*224 Genomic Plasmid Vector	PHLAG825428447	Plasmid vector containing HLA-MICA*224 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*224 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*224 protein under different cellular conditions.	Inquiry

HLA-MICA*225 Genomic Plasmid Vector	PHLAG82542848	Plasmid vector containing HLA-MICA*225 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*225 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*225 protein under different cellular conditions.	Inquiry
HLA-MICA*226 Genomic Plasmid Vector	PHLAG82542849	Plasmid vector containing HLA-MICA*226 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*226 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*226 protein under different cellular conditions.	Inquiry
HLA-MICA*227 Genomic Plasmid Vector	PHLAG82542850	Plasmid vector containing HLA-MICA*227 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*227 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*227 protein under different cellular conditions.	Inquiry
HLA-MICA*228 Genomic Plasmid Vector	PHLAG82542851	Plasmid vector containing HLA-MICA*228 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*228 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*228 protein under different cellular conditions.	Inquiry
HLA-MICA*229 Genomic Plasmid Vector	PHLAG82542852	Plasmid vector containing HLA-MICA*229 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*229 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*229 protein under different cellular conditions.	Inquiry
HLA-MICA*230 Genomic Plasmid Vector	PHLAG82542853	Plasmid vector containing HLA-MICA*230 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*230 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*230 protein under different cellular conditions.	Inquiry
HLA-MICA*231 Genomic Plasmid Vector	PHLAG82542854	Plasmid vector containing HLA-MICA*231 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*231 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*231 protein under different cellular conditions.	Inquiry
HLA-MICA*232 Genomic Plasmid Vector	PHLAG82542855	Plasmid vector containing HLA-MICA*232 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*232 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*232 protein under different cellular conditions.	Inquiry
HLA-MICA*233 Genomic Plasmid Vector	PHLAG82542856	Plasmid vector containing HLA-MICA*233 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*233 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*233 protein under different cellular conditions.	Inquiry

HLA-MICA*234 Genomic Plasmid Vector	PHLAG82542857	Plasmid vector containing HLA-MICA*234 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*234 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*234 protein under different cellular conditions.	Inquiry
HLA-MICA*235 Genomic Plasmid Vector	PHLAG82542858	Plasmid vector containing HLA-MICA*235 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*235 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*235 protein under different cellular conditions.	Inquiry
HLA-MICA*236:01:01 Genomic Plasmid Vector	PHLAG82542859	Plasmid vector containing HLA-MICA*236:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*236:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*236:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*236:01:02 Genomic Plasmid Vector	PHLAG82542860	Plasmid vector containing HLA-MICA*236:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*236:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*236:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*237 Genomic Plasmid Vector	PHLAG82542861	Plasmid vector containing HLA-MICA*237 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*237 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*237 protein under different cellular conditions.	Inquiry
HLA-MICA*238 Genomic Plasmid Vector	PHLAG82542862	Plasmid vector containing HLA-MICA*238 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*238 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*238 protein under different cellular conditions.	Inquiry
HLA-MICA*239 Genomic Plasmid Vector	PHLAG82542863	Plasmid vector containing HLA-MICA*239 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*239 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*239 protein under different cellular conditions.	Inquiry
HLA-MICA*240 Genomic Plasmid Vector	PHLAG82542864	Plasmid vector containing HLA-MICA*240 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*240 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*240 protein under different cellular conditions.	Inquiry
HLA-MICA*241 Genomic Plasmid Vector	PHLAG82542865	Plasmid vector containing HLA-MICA*241 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*241 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*241 protein under different cellular conditions.	Inquiry

HLA-MICA*242 Genomic Plasmid Vector	PHLAG82542866	Plasmid vector containing HLA-MICA*242 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*242 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*242 protein under different cellular conditions.	Inquiry
HLA-MICA*243 Genomic Plasmid Vector	PHLAG82542867	Plasmid vector containing HLA-MICA*243 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*243 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*243 protein under different cellular conditions.	Inquiry
HLA-MICA*244 Genomic Plasmid Vector	PHLAG82542868	Plasmid vector containing HLA-MICA*244 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*244 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*244 protein under different cellular conditions.	Inquiry
HLA-MICA*245 Genomic Plasmid Vector	PHLAG82542869	Plasmid vector containing HLA-MICA*245 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*245 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*245 protein under different cellular conditions.	Inquiry
HLA-MICA*246 Genomic Plasmid Vector	PHLAG82542870	Plasmid vector containing HLA-MICA*246 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*246 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*246 protein under different cellular conditions.	Inquiry
HLA-MICA*247 Genomic Plasmid Vector	PHLAG82542871	Plasmid vector containing HLA-MICA*247 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*247 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*247 protein under different cellular conditions.	Inquiry
HLA-MICA*248 Genomic Plasmid Vector	PHLAG82542872	Plasmid vector containing HLA-MICA*248 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*248 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*248 protein under different cellular conditions.	Inquiry
HLA-MICA*249 Genomic Plasmid Vector	PHLAG82542873	Plasmid vector containing HLA-MICA*249 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*249 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*249 protein under different cellular conditions.	Inquiry
HLA-MICA*250:01:01 Genomic Plasmid Vector	PHLAG82542874	Plasmid vector containing HLA-MICA*250:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*250:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*250:01:01 protein under different cellular conditions.	Inquiry

HLA-MICA*250:01:02 Genomic Plasmid Vector	PHLAG82542875	Plasmid vector containing HLA-MICA*250:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*250:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*250:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*251 Genomic Plasmid Vector	PHLAG82542876	Plasmid vector containing HLA-MICA*251 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*251 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*251 protein under different cellular conditions.	Inquiry
HLA-MICA*252:01:01 Genomic Plasmid Vector	PHLAG82542877	Plasmid vector containing HLA-MICA*252:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*252:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*252:01:01 protein under different cellular conditions.	Inquiry
HLA-MICA*252:01:02 Genomic Plasmid Vector	PHLAG82542878	Plasmid vector containing HLA-MICA*252:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*252:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*252:01:02 protein under different cellular conditions.	Inquiry
HLA-MICA*253 Genomic Plasmid Vector	PHLAG82542879	Plasmid vector containing HLA-MICA*253 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*253 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*253 protein under different cellular conditions.	Inquiry
HLA-MICA*254 Genomic Plasmid Vector	PHLAG82542880	Plasmid vector containing HLA-MICA*254 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*254 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*254 protein under different cellular conditions.	Inquiry
HLA-MICA*255 Genomic Plasmid Vector	PHLAG82542881	Plasmid vector containing HLA-MICA*255 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*255 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*255 protein under different cellular conditions.	Inquiry
HLA-MICA*256 Genomic Plasmid Vector	PHLAG82542882	Plasmid vector containing HLA-MICA*256 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*256 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*256 protein under different cellular conditions.	Inquiry
HLA-MICA*257 Genomic Plasmid Vector	PHLAG82542883	Plasmid vector containing HLA-MICA*257 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*257 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*257 protein under different cellular conditions.	Inquiry

HLA-MICA*258 Genomic Plasmid Vector	PHLAG82542884	Plasmid vector containing HLA-MICA*258 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*258 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*258 protein under different cellular conditions.	Inquiry
HLA-MICA*259 Genomic Plasmid Vector	PHLAG82542885	Plasmid vector containing HLA-MICA*259 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*259 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*259 protein under different cellular conditions.	Inquiry
HLA-MICA*260 Genomic Plasmid Vector	PHLAG82542886	Plasmid vector containing HLA-MICA*260 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*260 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*260 protein under different cellular conditions.	Inquiry
HLA-MICA*261 Genomic Plasmid Vector	PHLAG82542887	Plasmid vector containing HLA-MICA*261 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*261 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*261 protein under different cellular conditions.	Inquiry
HLA-MICA*262 Genomic Plasmid Vector	PHLAG82542888	Plasmid vector containing HLA-MICA*262 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*262 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*262 protein under different cellular conditions.	Inquiry
HLA-MICA*263 Genomic Plasmid Vector	PHLAG82542889	Plasmid vector containing HLA-MICA*263 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*263 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*263 protein under different cellular conditions.	Inquiry
HLA-MICA*264 Genomic Plasmid Vector	PHLAG82542890	Plasmid vector containing HLA-MICA*264 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*264 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*264 protein under different cellular conditions.	Inquiry
HLA-MICA*265 Genomic Plasmid Vector	PHLAG82542891	Plasmid vector containing HLA-MICA*265 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*265 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*265 protein under different cellular conditions.	Inquiry
HLA-MICA*266 Genomic Plasmid Vector	PHLAG82542892	Plasmid vector containing HLA-MICA*266 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*266 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*266 protein under different cellular conditions.	Inquiry

HLA-MICA*267 Genomic Plasmid Vector	PHLAG82542893	Plasmid vector containing HLA-MICA*267 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*267 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*267 protein under different cellular conditions.	Inquiry
HLA-MICA*268 Genomic Plasmid Vector	PHLAG82542894	Plasmid vector containing HLA-MICA*268 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*268 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*268 protein under different cellular conditions.	Inquiry
HLA-MICA*269 Genomic Plasmid Vector	PHLAG82542895	Plasmid vector containing HLA-MICA*269 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*269 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*269 protein under different cellular conditions.	Inquiry
HLA-MICA*270 Genomic Plasmid Vector	PHLAG82542896	Plasmid vector containing HLA-MICA*270 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*270 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*270 protein under different cellular conditions.	Inquiry
HLA-MICA*271 Genomic Plasmid Vector	PHLAG82542897	Plasmid vector containing HLA-MICA*271 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*271 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*271 protein under different cellular conditions.	Inquiry
HLA-MICA*272 Genomic Plasmid Vector	PHLAG82542898	Plasmid vector containing HLA-MICA*272 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*272 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*272 protein under different cellular conditions.	Inquiry
HLA-MICA*273 Genomic Plasmid Vector	PHLAG82542899	Plasmid vector containing HLA-MICA*273 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*273 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*273 protein under different cellular conditions.	Inquiry
HLA-MICA*274 Genomic Plasmid Vector	PHLAG82542900	Plasmid vector containing HLA-MICA*274 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*274 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*274 protein under different cellular conditions.	Inquiry
HLA-MICA*275 Genomic Plasmid Vector	PHLAG82542901	Plasmid vector containing HLA-MICA*275 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*275 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*275 protein under different cellular conditions.	Inquiry

HLA-MICA*276 Genomic Plasmid Vector	PHLAG82542902	Plasmid vector containing HLA-MICA*276 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*276 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*276 protein under different cellular conditions.	Inquiry
HLA-MICA*277 Genomic Plasmid Vector	PHLAG82542903	Plasmid vector containing HLA-MICA*277 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*277 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*277 protein under different cellular conditions.	Inquiry
HLA-MICA*278 Genomic Plasmid Vector	PHLAG82542904	Plasmid vector containing HLA-MICA*278 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*278 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*278 protein under different cellular conditions.	Inquiry
HLA-MICA*279 Genomic Plasmid Vector	PHLAG82542905	Plasmid vector containing HLA-MICA*279 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*279 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*279 protein under different cellular conditions.	Inquiry
HLA-MICA*280 Genomic Plasmid Vector	PHLAG82542906	Plasmid vector containing HLA-MICA*280 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*280 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*280 protein under different cellular conditions.	Inquiry
HLA-MICA*281 Genomic Plasmid Vector	PHLAG82542907	Plasmid vector containing HLA-MICA*281 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*281 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*281 protein under different cellular conditions.	Inquiry
HLA-MICA*282 Genomic Plasmid Vector	PHLAG82542908	Plasmid vector containing HLA-MICA*282 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*282 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*282 protein under different cellular conditions.	Inquiry
HLA-MICA*283 Genomic Plasmid Vector	PHLAG82542909	Plasmid vector containing HLA-MICA*283 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*283 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*283 protein under different cellular conditions.	Inquiry
HLA-MICA*284 Genomic Plasmid Vector	PHLAG82542910	Plasmid vector containing HLA-MICA*284 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*284 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*284 protein under different cellular conditions.	Inquiry

HLA-MICA*285 Genomic Plasmid Vector	PHLAG825429111	Plasmid vector containing HLA-MICA*285 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*285 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*285 protein under different cellular conditions.	Inquiry
HLA-MICA*286N Genomic Plasmid Vector	PHLAG825429112	Plasmid vector containing HLA-MICA*286N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*286N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*286N protein under different cellular conditions.	Inquiry
HLA-MICA*287 Genomic Plasmid Vector	PHLAG825429113	Plasmid vector containing HLA-MICA*287 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*287 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*287 protein under different cellular conditions.	Inquiry
HLA-MICA*288 Genomic Plasmid Vector	PHLAG825429114	Plasmid vector containing HLA-MICA*288 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*288 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*288 protein under different cellular conditions.	Inquiry
HLA-MICA*289 Genomic Plasmid Vector	PHLAG825429115	Plasmid vector containing HLA-MICA*289 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*289 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*289 protein under different cellular conditions.	Inquiry
HLA-MICA*290 Genomic Plasmid Vector	PHLAG825429116	Plasmid vector containing HLA-MICA*290 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*290 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*290 protein under different cellular conditions.	Inquiry
HLA-MICA*291 Genomic Plasmid Vector	PHLAG825429117	Plasmid vector containing HLA-MICA*291 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*291 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*291 protein under different cellular conditions.	Inquiry
HLA-MICA*292 Genomic Plasmid Vector	PHLAG825429118	Plasmid vector containing HLA-MICA*292 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*292 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*292 protein under different cellular conditions.	Inquiry
HLA-MICA*293N Genomic Plasmid Vector	PHLAG825429119	Plasmid vector containing HLA-MICA*293N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*293N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*293N protein under different cellular conditions.	Inquiry

HLA-MICA*294 Genomic Plasmid Vector	PHLAG82542920	Plasmid vector containing HLA-MICA*294 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICA*294 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICA*294 protein under different cellular conditions.	Inquiry
HLA-MICB*001 Genomic Plasmid Vector	PHLAG82542921	Plasmid vector containing HLA-MICB*001 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*001 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*001 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:01 Genomic Plasmid Vector	PHLAG82542922	Plasmid vector containing HLA-MICB*002:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:02 Genomic Plasmid Vector	PHLAG82542923	Plasmid vector containing HLA-MICB*002:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:02 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:03 Genomic Plasmid Vector	PHLAG82542924	Plasmid vector containing HLA-MICB*002:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:03 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:04 Genomic Plasmid Vector	PHLAG82542925	Plasmid vector containing HLA-MICB*002:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:04 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:05 Genomic Plasmid Vector	PHLAG82542926	Plasmid vector containing HLA-MICB*002:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:05 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:06 Genomic Plasmid Vector	PHLAG82542927	Plasmid vector containing HLA-MICB*002:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:06 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:07 Genomic Plasmid Vector	PHLAG82542928	Plasmid vector containing HLA-MICB*002:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:07 protein under different cellular conditions.	Inquiry

HLA-MICB*002:01:08 Genomic Plasmid Vector	PHLAG82542929	Plasmid vector containing HLA-MICB*002:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:08 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:09 Genomic Plasmid Vector	PHLAG82542930	Plasmid vector containing HLA-MICB*002:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:09 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:10 Genomic Plasmid Vector	PHLAG82542931	Plasmid vector containing HLA-MICB*002:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:10 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:11 Genomic Plasmid Vector	PHLAG82542932	Plasmid vector containing HLA-MICB*002:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:11 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:12 Genomic Plasmid Vector	PHLAG82542933	Plasmid vector containing HLA-MICB*002:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:12 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:13 Genomic Plasmid Vector	PHLAG82542934	Plasmid vector containing HLA-MICB*002:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:13 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:14 Genomic Plasmid Vector	PHLAG82542935	Plasmid vector containing HLA-MICB*002:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:14 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:15 Genomic Plasmid Vector	PHLAG82542936	Plasmid vector containing HLA-MICB*002:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:15 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:16 Genomic Plasmid Vector	PHLAG82542937	Plasmid vector containing HLA-MICB*002:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:16 protein under different cellular conditions.	Inquiry

HLA-MICB*002:01:17 Genomic Plasmid Vector	PHLAG82542938	Plasmid vector containing HLA-MICB*002:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:17 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:18 Genomic Plasmid Vector	PHLAG82542939	Plasmid vector containing HLA-MICB*002:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:18 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:19 Genomic Plasmid Vector	PHLAG82542940	Plasmid vector containing HLA-MICB*002:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:19 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:20 Genomic Plasmid Vector	PHLAG82542941	Plasmid vector containing HLA-MICB*002:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:20 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:21 Genomic Plasmid Vector	PHLAG82542942	Plasmid vector containing HLA-MICB*002:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:21 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:22 Genomic Plasmid Vector	PHLAG82542943	Plasmid vector containing HLA-MICB*002:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:22 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:23 Genomic Plasmid Vector	PHLAG82542944	Plasmid vector containing HLA-MICB*002:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:23 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:24 Genomic Plasmid Vector	PHLAG82542945	Plasmid vector containing HLA-MICB*002:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:24 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:25 Genomic Plasmid Vector	PHLAG82542946	Plasmid vector containing HLA-MICB*002:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:25 protein under different cellular conditions.	Inquiry

HLA-MICB*002:01:26 Genomic Plasmid Vector	PHLAG82542947	Plasmid vector containing HLA-MICB*002:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:26 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:27 Genomic Plasmid Vector	PHLAG82542948	Plasmid vector containing HLA-MICB*002:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:27 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:28 Genomic Plasmid Vector	PHLAG82542949	Plasmid vector containing HLA-MICB*002:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:28 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:29 Genomic Plasmid Vector	PHLAG82542950	Plasmid vector containing HLA-MICB*002:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:29 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:30 Genomic Plasmid Vector	PHLAG82542951	Plasmid vector containing HLA-MICB*002:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:30 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:31 Genomic Plasmid Vector	PHLAG82542952	Plasmid vector containing HLA-MICB*002:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:31 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:32 Genomic Plasmid Vector	PHLAG82542953	Plasmid vector containing HLA-MICB*002:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:32 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:33 Genomic Plasmid Vector	PHLAG82542954	Plasmid vector containing HLA-MICB*002:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:33 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:34 Genomic Plasmid Vector	PHLAG82542955	Plasmid vector containing HLA-MICB*002:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:34 protein under different cellular conditions.	Inquiry

HLA-MICB*002:01:35 Genomic Plasmid Vector	PHLAG82542956	Plasmid vector containing HLA-MICB*002:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:35 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:36 Genomic Plasmid Vector	PHLAG82542957	Plasmid vector containing HLA-MICB*002:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:36 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:37 Genomic Plasmid Vector	PHLAG82542958	Plasmid vector containing HLA-MICB*002:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:37 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:38 Genomic Plasmid Vector	PHLAG82542959	Plasmid vector containing HLA-MICB*002:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:38 protein under different cellular conditions.	Inquiry
HLA-MICB*002:01:39 Genomic Plasmid Vector	PHLAG82542960	Plasmid vector containing HLA-MICB*002:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:01:39 protein under different cellular conditions.	Inquiry
HLA-MICB*002:02:01 Genomic Plasmid Vector	PHLAG82542961	Plasmid vector containing HLA-MICB*002:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:02:01 protein under different cellular conditions.	Inquiry
HLA-MICB*002:02:02 Genomic Plasmid Vector	PHLAG82542962	Plasmid vector containing HLA-MICB*002:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:02:02 protein under different cellular conditions.	Inquiry
HLA-MICB*002:03 Genomic Plasmid Vector	PHLAG82542963	Plasmid vector containing HLA-MICB*002:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:03 protein under different cellular conditions.	Inquiry
HLA-MICB*002:04 Genomic Plasmid Vector	PHLAG82542964	Plasmid vector containing HLA-MICB*002:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:04 protein under different cellular conditions.	Inquiry

HLA-MICB*002:05 Genomic Plasmid Vector	PHLAG82542965	Plasmid vector containing HLA-MICB*002:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:05 protein under different cellular conditions.	Inquiry
HLA-MICB*002:06 Genomic Plasmid Vector	PHLAG82542966	Plasmid vector containing HLA-MICB*002:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*002:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*002:06 protein under different cellular conditions.	Inquiry
HLA-MICB*003:01:01 Genomic Plasmid Vector	PHLAG82542967	Plasmid vector containing HLA-MICB*003:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*003:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*003:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*003:01:02 Genomic Plasmid Vector	PHLAG82542968	Plasmid vector containing HLA-MICB*003:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*003:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*003:01:02 protein under different cellular conditions.	Inquiry
HLA-MICB*003:01:03 Genomic Plasmid Vector	PHLAG82542969	Plasmid vector containing HLA-MICB*003:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*003:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*003:01:03 protein under different cellular conditions.	Inquiry
HLA-MICB*003:01:04 Genomic Plasmid Vector	PHLAG82542970	Plasmid vector containing HLA-MICB*003:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*003:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*003:01:04 protein under different cellular conditions.	Inquiry
HLA-MICB*003:01:05 Genomic Plasmid Vector	PHLAG82542971	Plasmid vector containing HLA-MICB*003:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*003:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*003:01:05 protein under different cellular conditions.	Inquiry
HLA-MICB*003:01:06 Genomic Plasmid Vector	PHLAG82542972	Plasmid vector containing HLA-MICB*003:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*003:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*003:01:06 protein under different cellular conditions.	Inquiry
HLA-MICB*003:01:07 Genomic Plasmid Vector	PHLAG82542973	Plasmid vector containing HLA-MICB*003:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*003:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*003:01:07 protein under different cellular conditions.	Inquiry

HLA-MICB*003:01:08 Genomic Plasmid Vector	PHLAG82542974	Plasmid vector containing HLA-MICB*003:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*003:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*003:01:08 protein under different cellular conditions.	Inquiry
HLA-MICB*003:01:09 Genomic Plasmid Vector	PHLAG82542975	Plasmid vector containing HLA-MICB*003:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*003:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*003:01:09 protein under different cellular conditions.	Inquiry
HLA-MICB*003:01:10 Genomic Plasmid Vector	PHLAG82542976	Plasmid vector containing HLA-MICB*003:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*003:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*003:01:10 protein under different cellular conditions.	Inquiry
HLA-MICB*003:01:11 Genomic Plasmid Vector	PHLAG82542977	Plasmid vector containing HLA-MICB*003:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*003:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*003:01:11 protein under different cellular conditions.	Inquiry
HLA-MICB*003:01:12 Genomic Plasmid Vector	PHLAG82542978	Plasmid vector containing HLA-MICB*003:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*003:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*003:01:12 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:01 Genomic Plasmid Vector	PHLAG82542979	Plasmid vector containing HLA-MICB*004:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:02 Genomic Plasmid Vector	PHLAG82542980	Plasmid vector containing HLA-MICB*004:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:02 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:03 Genomic Plasmid Vector	PHLAG82542981	Plasmid vector containing HLA-MICB*004:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:03 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:04 Genomic Plasmid Vector	PHLAG82542982	Plasmid vector containing HLA-MICB*004:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:04 protein under different cellular conditions.	Inquiry

HLA-MICB*004:01:05 Genomic Plasmid Vector	PHLAG82542983	Plasmid vector containing HLA-MICB*004:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:05 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:06 Genomic Plasmid Vector	PHLAG82542984	Plasmid vector containing HLA-MICB*004:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:06 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:07 Genomic Plasmid Vector	PHLAG82542985	Plasmid vector containing HLA-MICB*004:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:07 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:08 Genomic Plasmid Vector	PHLAG82542986	Plasmid vector containing HLA-MICB*004:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:08 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:09 Genomic Plasmid Vector	PHLAG82542987	Plasmid vector containing HLA-MICB*004:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:09 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:10 Genomic Plasmid Vector	PHLAG82542988	Plasmid vector containing HLA-MICB*004:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:10 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:11 Genomic Plasmid Vector	PHLAG82542989	Plasmid vector containing HLA-MICB*004:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:11 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:12 Genomic Plasmid Vector	PHLAG82542990	Plasmid vector containing HLA-MICB*004:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:12 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:13 Genomic Plasmid Vector	PHLAG82542991	Plasmid vector containing HLA-MICB*004:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:13 protein under different cellular conditions.	Inquiry

HLA-MICB*004:01:14 Genomic Plasmid Vector	PHLAG82542992	Plasmid vector containing HLA-MICB*004:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:14 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:15 Genomic Plasmid Vector	PHLAG82542993	Plasmid vector containing HLA-MICB*004:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:15 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:16 Genomic Plasmid Vector	PHLAG82542994	Plasmid vector containing HLA-MICB*004:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:16 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:17 Genomic Plasmid Vector	PHLAG82542995	Plasmid vector containing HLA-MICB*004:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:17 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:18 Genomic Plasmid Vector	PHLAG82542996	Plasmid vector containing HLA-MICB*004:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:18 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:19 Genomic Plasmid Vector	PHLAG82542997	Plasmid vector containing HLA-MICB*004:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:19 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:20 Genomic Plasmid Vector	PHLAG82542998	Plasmid vector containing HLA-MICB*004:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:20 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:21 Genomic Plasmid Vector	PHLAG82542999	Plasmid vector containing HLA-MICB*004:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:21 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:22 Genomic Plasmid Vector	PHLAG825430000	Plasmid vector containing HLA-MICB*004:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:22 protein under different cellular conditions.	Inquiry

HLA-MICB*004:01:23 Genomic Plasmid Vector	PHLAG82543001	Plasmid vector containing HLA-MICB*004:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:23 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:24 Genomic Plasmid Vector	PHLAG82543002	Plasmid vector containing HLA-MICB*004:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:24 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:25 Genomic Plasmid Vector	PHLAG82543003	Plasmid vector containing HLA-MICB*004:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:25 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:26 Genomic Plasmid Vector	PHLAG82543004	Plasmid vector containing HLA-MICB*004:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:26 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:27 Genomic Plasmid Vector	PHLAG82543005	Plasmid vector containing HLA-MICB*004:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:27 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:28 Genomic Plasmid Vector	PHLAG82543006	Plasmid vector containing HLA-MICB*004:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:28 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:29 Genomic Plasmid Vector	PHLAG82543007	Plasmid vector containing HLA-MICB*004:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:29 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:30 Genomic Plasmid Vector	PHLAG82543008	Plasmid vector containing HLA-MICB*004:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:30 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:31 Genomic Plasmid Vector	PHLAG82543009	Plasmid vector containing HLA-MICB*004:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:31 protein under different cellular conditions.	Inquiry

HLA-MICB*004:01:32 Genomic Plasmid Vector	PHLAG82543010	Plasmid vector containing HLA-MICB*004:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:32 protein under different cellular conditions.	Inquiry
HLA-MICB*004:01:33 Genomic Plasmid Vector	PHLAG82543011	Plasmid vector containing HLA-MICB*004:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:01:33 protein under different cellular conditions.	Inquiry
HLA-MICB*004:02 Genomic Plasmid Vector	PHLAG82543012	Plasmid vector containing HLA-MICB*004:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:02 protein under different cellular conditions.	Inquiry
HLA-MICB*004:03 Genomic Plasmid Vector	PHLAG82543013	Plasmid vector containing HLA-MICB*004:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*004:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*004:03 protein under different cellular conditions.	Inquiry
HLA-MICB*005:01:01 Genomic Plasmid Vector	PHLAG82543014	Plasmid vector containing HLA-MICB*005:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*005:01:02 Genomic Plasmid Vector	PHLAG82543015	Plasmid vector containing HLA-MICB*005:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:01:02 protein under different cellular conditions.	Inquiry
HLA-MICB*005:01:03 Genomic Plasmid Vector	PHLAG82543016	Plasmid vector containing HLA-MICB*005:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:01:03 protein under different cellular conditions.	Inquiry
HLA-MICB*005:01:04 Genomic Plasmid Vector	PHLAG82543017	Plasmid vector containing HLA-MICB*005:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:01:04 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:01 Genomic Plasmid Vector	PHLAG82543018	Plasmid vector containing HLA-MICB*005:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:01 protein under different cellular conditions.	Inquiry

HLA-MICB*005:02:02 Genomic Plasmid Vector	PHLAG82543019	Plasmid vector containing HLA-MICB*005:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:02 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:03 Genomic Plasmid Vector	PHLAG82543020	Plasmid vector containing HLA-MICB*005:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:03 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:04 Genomic Plasmid Vector	PHLAG82543021	Plasmid vector containing HLA-MICB*005:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:04 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:05 Genomic Plasmid Vector	PHLAG82543022	Plasmid vector containing HLA-MICB*005:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:05 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:06 Genomic Plasmid Vector	PHLAG82543023	Plasmid vector containing HLA-MICB*005:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:06 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:07 Genomic Plasmid Vector	PHLAG82543024	Plasmid vector containing HLA-MICB*005:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:07 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:08 Genomic Plasmid Vector	PHLAG82543025	Plasmid vector containing HLA-MICB*005:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:08 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:09 Genomic Plasmid Vector	PHLAG82543026	Plasmid vector containing HLA-MICB*005:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:09 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:10 Genomic Plasmid Vector	PHLAG82543027	Plasmid vector containing HLA-MICB*005:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:10 protein under different cellular conditions.	Inquiry

HLA-MICB*005:02:11 Genomic Plasmid Vector	PHLAG82543028	Plasmid vector containing HLA-MICB*005:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:11 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:12 Genomic Plasmid Vector	PHLAG82543029	Plasmid vector containing HLA-MICB*005:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:12 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:13 Genomic Plasmid Vector	PHLAG82543030	Plasmid vector containing HLA-MICB*005:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:13 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:14 Genomic Plasmid Vector	PHLAG82543031	Plasmid vector containing HLA-MICB*005:02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:14 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:15 Genomic Plasmid Vector	PHLAG82543032	Plasmid vector containing HLA-MICB*005:02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:15 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:16 Genomic Plasmid Vector	PHLAG82543033	Plasmid vector containing HLA-MICB*005:02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:16 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:17 Genomic Plasmid Vector	PHLAG82543034	Plasmid vector containing HLA-MICB*005:02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:17 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:18 Genomic Plasmid Vector	PHLAG82543035	Plasmid vector containing HLA-MICB*005:02:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:18 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:19 Genomic Plasmid Vector	PHLAG82543036	Plasmid vector containing HLA-MICB*005:02:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:19 protein under different cellular conditions.	Inquiry

HLA-MICB*005:02:20 Genomic Plasmid Vector	PHLAG82543037	Plasmid vector containing HLA-MICB*005:02:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:20 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:21 Genomic Plasmid Vector	PHLAG82543038	Plasmid vector containing HLA-MICB*005:02:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:21 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:22 Genomic Plasmid Vector	PHLAG82543039	Plasmid vector containing HLA-MICB*005:02:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:22 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:23 Genomic Plasmid Vector	PHLAG82543040	Plasmid vector containing HLA-MICB*005:02:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:23 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:24 Genomic Plasmid Vector	PHLAG82543041	Plasmid vector containing HLA-MICB*005:02:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:24 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:25 Genomic Plasmid Vector	PHLAG82543042	Plasmid vector containing HLA-MICB*005:02:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:25 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:26 Genomic Plasmid Vector	PHLAG82543043	Plasmid vector containing HLA-MICB*005:02:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:26 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:27 Genomic Plasmid Vector	PHLAG82543044	Plasmid vector containing HLA-MICB*005:02:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:27 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:28 Genomic Plasmid Vector	PHLAG82543045	Plasmid vector containing HLA-MICB*005:02:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:28 protein under different cellular conditions.	Inquiry

HLA-MICB*005:02:29 Genomic Plasmid Vector	PHLAG82543046	Plasmid vector containing HLA-MICB*005:02:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:29 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:30 Genomic Plasmid Vector	PHLAG82543047	Plasmid vector containing HLA-MICB*005:02:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:30 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:31 Genomic Plasmid Vector	PHLAG82543048	Plasmid vector containing HLA-MICB*005:02:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:31 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:32 Genomic Plasmid Vector	PHLAG82543049	Plasmid vector containing HLA-MICB*005:02:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:32 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:33 Genomic Plasmid Vector	PHLAG82543050	Plasmid vector containing HLA-MICB*005:02:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:33 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:34 Genomic Plasmid Vector	PHLAG82543051	Plasmid vector containing HLA-MICB*005:02:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:34 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:35 Genomic Plasmid Vector	PHLAG82543052	Plasmid vector containing HLA-MICB*005:02:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:35 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:36 Genomic Plasmid Vector	PHLAG82543053	Plasmid vector containing HLA-MICB*005:02:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:36 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:37 Genomic Plasmid Vector	PHLAG82543054	Plasmid vector containing HLA-MICB*005:02:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:37 protein under different cellular conditions.	Inquiry

HLA-MICB*005:02:38 Genomic Plasmid Vector	PHLAG82543055	Plasmid vector containing HLA-MICB*005:02:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:38 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:39 Genomic Plasmid Vector	PHLAG82543056	Plasmid vector containing HLA-MICB*005:02:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:39 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:40 Genomic Plasmid Vector	PHLAG82543057	Plasmid vector containing HLA-MICB*005:02:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:40 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:41 Genomic Plasmid Vector	PHLAG82543058	Plasmid vector containing HLA-MICB*005:02:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:41 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:42 Genomic Plasmid Vector	PHLAG82543059	Plasmid vector containing HLA-MICB*005:02:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:42 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:43 Genomic Plasmid Vector	PHLAG82543060	Plasmid vector containing HLA-MICB*005:02:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:43 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:44 Genomic Plasmid Vector	PHLAG82543061	Plasmid vector containing HLA-MICB*005:02:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:44 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:45 Genomic Plasmid Vector	PHLAG82543062	Plasmid vector containing HLA-MICB*005:02:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:45 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:46 Genomic Plasmid Vector	PHLAG82543063	Plasmid vector containing HLA-MICB*005:02:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:46 protein under different cellular conditions.	Inquiry

HLA-MICB*005:02:47 Genomic Plasmid Vector	PHLAG82543064	Plasmid vector containing HLA-MICB*005:02:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:47 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:48 Genomic Plasmid Vector	PHLAG82543065	Plasmid vector containing HLA-MICB*005:02:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:48 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:49 Genomic Plasmid Vector	PHLAG82543066	Plasmid vector containing HLA-MICB*005:02:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:49 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:50 Genomic Plasmid Vector	PHLAG82543067	Plasmid vector containing HLA-MICB*005:02:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:50 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:51 Genomic Plasmid Vector	PHLAG82543068	Plasmid vector containing HLA-MICB*005:02:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:51 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:52 Genomic Plasmid Vector	PHLAG82543069	Plasmid vector containing HLA-MICB*005:02:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:52 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:53 Genomic Plasmid Vector	PHLAG82543070	Plasmid vector containing HLA-MICB*005:02:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:53 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:54 Genomic Plasmid Vector	PHLAG82543071	Plasmid vector containing HLA-MICB*005:02:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:54 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:55 Genomic Plasmid Vector	PHLAG82543072	Plasmid vector containing HLA-MICB*005:02:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:55 protein under different cellular conditions.	Inquiry

HLA-MICB*005:02:56 Genomic Plasmid Vector	PHLAG82543073	Plasmid vector containing HLA-MICB*005:02:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:56 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:57 Genomic Plasmid Vector	PHLAG82543074	Plasmid vector containing HLA-MICB*005:02:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:57 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:58 Genomic Plasmid Vector	PHLAG82543075	Plasmid vector containing HLA-MICB*005:02:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:58 protein under different cellular conditions.	Inquiry
HLA-MICB*005:02:59 Genomic Plasmid Vector	PHLAG82543076	Plasmid vector containing HLA-MICB*005:02:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:02:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:02:59 protein under different cellular conditions.	Inquiry
HLA-MICB*005:03:01 Genomic Plasmid Vector	PHLAG82543077	Plasmid vector containing HLA-MICB*005:03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:03:01 protein under different cellular conditions.	Inquiry
HLA-MICB*005:03:02 Genomic Plasmid Vector	PHLAG82543078	Plasmid vector containing HLA-MICB*005:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:03:02 protein under different cellular conditions.	Inquiry
HLA-MICB*005:03:03 Genomic Plasmid Vector	PHLAG82543079	Plasmid vector containing HLA-MICB*005:03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:03:03 protein under different cellular conditions.	Inquiry
HLA-MICB*005:03:04 Genomic Plasmid Vector	PHLAG82543080	Plasmid vector containing HLA-MICB*005:03:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:03:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:03:04 protein under different cellular conditions.	Inquiry
HLA-MICB*005:03:05 Genomic Plasmid Vector	PHLAG82543081	Plasmid vector containing HLA-MICB*005:03:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:03:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:03:05 protein under different cellular conditions.	Inquiry

HLA-MICB*005:03:06 Genomic Plasmid Vector	PHLAG82543082	Plasmid vector containing HLA-MICB*005:03:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:03:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:03:06 protein under different cellular conditions.	Inquiry
HLA-MICB*005:03:07 Genomic Plasmid Vector	PHLAG82543083	Plasmid vector containing HLA-MICB*005:03:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:03:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:03:07 protein under different cellular conditions.	Inquiry
HLA-MICB*005:03:08 Genomic Plasmid Vector	PHLAG82543084	Plasmid vector containing HLA-MICB*005:03:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:03:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:03:08 protein under different cellular conditions.	Inquiry
HLA-MICB*005:03:09 Genomic Plasmid Vector	PHLAG82543085	Plasmid vector containing HLA-MICB*005:03:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:03:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:03:09 protein under different cellular conditions.	Inquiry
HLA-MICB*005:04 Genomic Plasmid Vector	PHLAG82543086	Plasmid vector containing HLA-MICB*005:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:04 protein under different cellular conditions.	Inquiry
HLA-MICB*005:05 Genomic Plasmid Vector	PHLAG82543087	Plasmid vector containing HLA-MICB*005:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:05 protein under different cellular conditions.	Inquiry
HLA-MICB*005:06:01 Genomic Plasmid Vector	PHLAG82543088	Plasmid vector containing HLA-MICB*005:06:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:06:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:06:01 protein under different cellular conditions.	Inquiry
HLA-MICB*005:06:02 Genomic Plasmid Vector	PHLAG82543089	Plasmid vector containing HLA-MICB*005:06:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:06:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:06:02 protein under different cellular conditions.	Inquiry
HLA-MICB*005:06:03 Genomic Plasmid Vector	PHLAG82543090	Plasmid vector containing HLA-MICB*005:06:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:06:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:06:03 protein under different cellular conditions.	Inquiry

HLA-MICB*005:07:01 Genomic Plasmid Vector	PHLAG82543091	Plasmid vector containing HLA-MICB*005:07:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:07:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:07:01 protein under different cellular conditions.	Inquiry
HLA-MICB*005:07:02 Genomic Plasmid Vector	PHLAG82543092	Plasmid vector containing HLA-MICB*005:07:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:07:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:07:02 protein under different cellular conditions.	Inquiry
HLA-MICB*005:08:01 Genomic Plasmid Vector	PHLAG82543093	Plasmid vector containing HLA-MICB*005:08:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:08:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:08:01 protein under different cellular conditions.	Inquiry
HLA-MICB*005:08:02 Genomic Plasmid Vector	PHLAG82543094	Plasmid vector containing HLA-MICB*005:08:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:08:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:08:02 protein under different cellular conditions.	Inquiry
HLA-MICB*005:09 Genomic Plasmid Vector	PHLAG82543095	Plasmid vector containing HLA-MICB*005:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:09 protein under different cellular conditions.	Inquiry
HLA-MICB*005:10 Genomic Plasmid Vector	PHLAG82543096	Plasmid vector containing HLA-MICB*005:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:10 protein under different cellular conditions.	Inquiry
HLA-MICB*005:11 Genomic Plasmid Vector	PHLAG82543097	Plasmid vector containing HLA-MICB*005:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:11 protein under different cellular conditions.	Inquiry
HLA-MICB*005:12 Genomic Plasmid Vector	PHLAG82543098	Plasmid vector containing HLA-MICB*005:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:12 protein under different cellular conditions.	Inquiry
HLA-MICB*005:13 Genomic Plasmid Vector	PHLAG82543099	Plasmid vector containing HLA-MICB*005:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:13 protein under different cellular conditions.	Inquiry

HLA-MICB*005:14 Genomic Plasmid Vector	PHLAG82543100	Plasmid vector containing HLA-MICB*005:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:14 protein under different cellular conditions.	Inquiry
HLA-MICB*005:15 Genomic Plasmid Vector	PHLAG82543101	Plasmid vector containing HLA-MICB*005:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:15 protein under different cellular conditions.	Inquiry
HLA-MICB*005:16 Genomic Plasmid Vector	PHLAG82543102	Plasmid vector containing HLA-MICB*005:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*005:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*005:16 protein under different cellular conditions.	Inquiry
HLA-MICB*006:01:01 Genomic Plasmid Vector	PHLAG82543103	Plasmid vector containing HLA-MICB*006:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*006:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*006:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*006:01:02 Genomic Plasmid Vector	PHLAG82543104	Plasmid vector containing HLA-MICB*006:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*006:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*006:01:02 protein under different cellular conditions.	Inquiry
HLA-MICB*007 Genomic Plasmid Vector	PHLAG82543105	Plasmid vector containing HLA-MICB*007 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*007 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*007 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:01 Genomic Plasmid Vector	PHLAG82543106	Plasmid vector containing HLA-MICB*008:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:02 Genomic Plasmid Vector	PHLAG82543107	Plasmid vector containing HLA-MICB*008:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:02 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:03 Genomic Plasmid Vector	PHLAG82543108	Plasmid vector containing HLA-MICB*008:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:03 protein under different cellular conditions.	Inquiry

HLA-MICB*008:01:04 Genomic Plasmid Vector	PHLAG82543109	Plasmid vector containing HLA-MICB*008:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:04 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:05 Genomic Plasmid Vector	PHLAG82543110	Plasmid vector containing HLA-MICB*008:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:05 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:06 Genomic Plasmid Vector	PHLAG82543111	Plasmid vector containing HLA-MICB*008:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:06 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:07 Genomic Plasmid Vector	PHLAG82543112	Plasmid vector containing HLA-MICB*008:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:07 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:08 Genomic Plasmid Vector	PHLAG82543113	Plasmid vector containing HLA-MICB*008:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:08 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:09 Genomic Plasmid Vector	PHLAG82543114	Plasmid vector containing HLA-MICB*008:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:09 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:10 Genomic Plasmid Vector	PHLAG82543115	Plasmid vector containing HLA-MICB*008:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:10 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:11 Genomic Plasmid Vector	PHLAG82543116	Plasmid vector containing HLA-MICB*008:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:11 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:12 Genomic Plasmid Vector	PHLAG82543117	Plasmid vector containing HLA-MICB*008:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:12 protein under different cellular conditions.	Inquiry

HLA-MICB*008:01:13 Genomic Plasmid Vector	PHLAG82543118	Plasmid vector containing HLA-MICB*008:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:13 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:14 Genomic Plasmid Vector	PHLAG82543119	Plasmid vector containing HLA-MICB*008:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:14 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:15 Genomic Plasmid Vector	PHLAG82543120	Plasmid vector containing HLA-MICB*008:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:15 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:16 Genomic Plasmid Vector	PHLAG82543121	Plasmid vector containing HLA-MICB*008:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:16 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:17 Genomic Plasmid Vector	PHLAG82543122	Plasmid vector containing HLA-MICB*008:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:17 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:18 Genomic Plasmid Vector	PHLAG82543123	Plasmid vector containing HLA-MICB*008:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:18 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:19 Genomic Plasmid Vector	PHLAG82543124	Plasmid vector containing HLA-MICB*008:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:19 protein under different cellular conditions.	Inquiry
HLA-MICB*008:01:20 Genomic Plasmid Vector	PHLAG82543125	Plasmid vector containing HLA-MICB*008:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*008:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*008:01:20 protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:01N Genomic Plasmid Vector	PHLAG82543126	Plasmid vector containing HLA-MICB*009:01:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:01N protein under different cellular conditions.	Inquiry

HLA-MICB*009:01:02N Genomic Plasmid Vector	PHLAG82543127	Plasmid vector containing HLA-MICB*009:01:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:02N protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:03N Genomic Plasmid Vector	PHLAG82543128	Plasmid vector containing HLA-MICB*009:01:03N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:03N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:03N protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:04N Genomic Plasmid Vector	PHLAG82543129	Plasmid vector containing HLA-MICB*009:01:04N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:04N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:04N protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:05N Genomic Plasmid Vector	PHLAG82543130	Plasmid vector containing HLA-MICB*009:01:05N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:05N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:05N protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:06N Genomic Plasmid Vector	PHLAG82543131	Plasmid vector containing HLA-MICB*009:01:06N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:06N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:06N protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:07N Genomic Plasmid Vector	PHLAG82543132	Plasmid vector containing HLA-MICB*009:01:07N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:07N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:07N protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:08N Genomic Plasmid Vector	PHLAG82543133	Plasmid vector containing HLA-MICB*009:01:08N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:08N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:08N protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:09N Genomic Plasmid Vector	PHLAG82543134	Plasmid vector containing HLA-MICB*009:01:09N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:09N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:09N protein under different cellular conditions.	Inquiry

HLA-MICB*009:01:10N Genomic Plasmid Vector	PHLAG82543135	Plasmid vector containing HLA-MICB*009:01:10N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:10N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:10N protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:11N Genomic Plasmid Vector	PHLAG82543136	Plasmid vector containing HLA-MICB*009:01:11N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:11N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:11N protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:12N Genomic Plasmid Vector	PHLAG82543137	Plasmid vector containing HLA-MICB*009:01:12N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:12N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:12N protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:13N Genomic Plasmid Vector	PHLAG82543138	Plasmid vector containing HLA-MICB*009:01:13N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:13N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:13N protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:14N Genomic Plasmid Vector	PHLAG82543139	Plasmid vector containing HLA-MICB*009:01:14N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:14N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:14N protein under different cellular conditions.	Inquiry
HLA-MICB*009:01:15N Genomic Plasmid Vector	PHLAG82543140	Plasmid vector containing HLA-MICB*009:01:15N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*009:01:15N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*009:01:15N protein under different cellular conditions.	Inquiry
HLA-MICB*010 Genomic Plasmid Vector	PHLAG82543141	Plasmid vector containing HLA-MICB*010 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*010 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*010 protein under different cellular conditions.	Inquiry
HLA-MICB*011 Genomic Plasmid Vector	PHLAG82543142	Plasmid vector containing HLA-MICB*011 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*011 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*011 protein under different cellular conditions.	Inquiry

HLA-MICB*012 Genomic Plasmid Vector	PHLAG82543143	Plasmid vector containing HLA-MICB*012 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*012 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*012 protein under different cellular conditions.	Inquiry
HLA-MICB*013:01:01 Genomic Plasmid Vector	PHLAG82543144	Plasmid vector containing HLA-MICB*013:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*013:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*013:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*013:01:02 Genomic Plasmid Vector	PHLAG82543145	Plasmid vector containing HLA-MICB*013:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*013:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*013:01:02 protein under different cellular conditions.	Inquiry
HLA-MICB*013:01:03 Genomic Plasmid Vector	PHLAG82543146	Plasmid vector containing HLA-MICB*013:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*013:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*013:01:03 protein under different cellular conditions.	Inquiry
HLA-MICB*013:01:04 Genomic Plasmid Vector	PHLAG82543147	Plasmid vector containing HLA-MICB*013:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*013:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*013:01:04 protein under different cellular conditions.	Inquiry
HLA-MICB*013:01:05 Genomic Plasmid Vector	PHLAG82543148	Plasmid vector containing HLA-MICB*013:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*013:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*013:01:05 protein under different cellular conditions.	Inquiry
HLA-MICB*013:01:06 Genomic Plasmid Vector	PHLAG82543149	Plasmid vector containing HLA-MICB*013:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*013:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*013:01:06 protein under different cellular conditions.	Inquiry
HLA-MICB*014:01:01 Genomic Plasmid Vector	PHLAG82543150	Plasmid vector containing HLA-MICB*014:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*014:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*014:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*014:01:02 Genomic Plasmid Vector	PHLAG82543151	Plasmid vector containing HLA-MICB*014:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*014:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*014:01:02 protein under different cellular conditions.	Inquiry

HLA-MICB*014:01:03 Genomic Plasmid Vector	PHLAG82543152	Plasmid vector containing HLA-MICB*014:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*014:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*014:01:03 protein under different cellular conditions.	Inquiry
HLA-MICB*014:01:04 Genomic Plasmid Vector	PHLAG82543153	Plasmid vector containing HLA-MICB*014:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*014:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*014:01:04 protein under different cellular conditions.	Inquiry
HLA-MICB*014:01:05 Genomic Plasmid Vector	PHLAG82543154	Plasmid vector containing HLA-MICB*014:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*014:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*014:01:05 protein under different cellular conditions.	Inquiry
HLA-MICB*014:01:06 Genomic Plasmid Vector	PHLAG82543155	Plasmid vector containing HLA-MICB*014:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*014:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*014:01:06 protein under different cellular conditions.	Inquiry
HLA-MICB*014:01:07 Genomic Plasmid Vector	PHLAG82543156	Plasmid vector containing HLA-MICB*014:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*014:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*014:01:07 protein under different cellular conditions.	Inquiry
HLA-MICB*014:01:08 Genomic Plasmid Vector	PHLAG82543157	Plasmid vector containing HLA-MICB*014:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*014:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*014:01:08 protein under different cellular conditions.	Inquiry
HLA-MICB*014:01:09 Genomic Plasmid Vector	PHLAG82543158	Plasmid vector containing HLA-MICB*014:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*014:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*014:01:09 protein under different cellular conditions.	Inquiry
HLA-MICB*014:02 Genomic Plasmid Vector	PHLAG82543159	Plasmid vector containing HLA-MICB*014:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*014:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*014:02 protein under different cellular conditions.	Inquiry
HLA-MICB*014:03 Genomic Plasmid Vector	PHLAG82543160	Plasmid vector containing HLA-MICB*014:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*014:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*014:03 protein under different cellular conditions.	Inquiry

HLA-MICB*015 Genomic Plasmid Vector	PHLAG82543161	Plasmid vector containing HLA-MICB*015 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*015 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*015 protein under different cellular conditions.	Inquiry
HLA-MICB*016 Genomic Plasmid Vector	PHLAG82543162	Plasmid vector containing HLA-MICB*016 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*016 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*016 protein under different cellular conditions.	Inquiry
HLA-MICB*017 Genomic Plasmid Vector	PHLAG82543163	Plasmid vector containing HLA-MICB*017 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*017 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*017 protein under different cellular conditions.	Inquiry
HLA-MICB*018:01:01 Genomic Plasmid Vector	PHLAG82543164	Plasmid vector containing HLA-MICB*018:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*018:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*018:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*018:01:02 Genomic Plasmid Vector	PHLAG82543165	Plasmid vector containing HLA-MICB*018:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*018:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*018:01:02 protein under different cellular conditions.	Inquiry
HLA-MICB*018:01:03 Genomic Plasmid Vector	PHLAG82543166	Plasmid vector containing HLA-MICB*018:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*018:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*018:01:03 protein under different cellular conditions.	Inquiry
HLA-MICB*019:01:01 Genomic Plasmid Vector	PHLAG82543167	Plasmid vector containing HLA-MICB*019:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*019:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*019:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*019:01:02 Genomic Plasmid Vector	PHLAG82543168	Plasmid vector containing HLA-MICB*019:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*019:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*019:01:02 protein under different cellular conditions.	Inquiry
HLA-MICB*019:01:03 Genomic Plasmid Vector	PHLAG82543169	Plasmid vector containing HLA-MICB*019:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*019:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*019:01:03 protein under different cellular conditions.	Inquiry

HLA-MICB*019:01:04 Genomic Plasmid Vector	PHLAG8254317 0	Plasmid vector containing HLA-MICB*019:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*019:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*019:01:04 protein under different cellular conditions.	Inquiry
HLA-MICB*019:01:05 Genomic Plasmid Vector	PHLAG8254317 1	Plasmid vector containing HLA-MICB*019:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*019:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*019:01:05 protein under different cellular conditions.	Inquiry
HLA-MICB*019:01:06 Genomic Plasmid Vector	PHLAG8254317 2	Plasmid vector containing HLA-MICB*019:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*019:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*019:01:06 protein under different cellular conditions.	Inquiry
HLA-MICB*019:01:07 Genomic Plasmid Vector	PHLAG8254317 3	Plasmid vector containing HLA-MICB*019:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*019:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*019:01:07 protein under different cellular conditions.	Inquiry
HLA-MICB*019:01:08 Genomic Plasmid Vector	PHLAG8254317 4	Plasmid vector containing HLA-MICB*019:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*019:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*019:01:08 protein under different cellular conditions.	Inquiry
HLA-MICB*020:01:01 Genomic Plasmid Vector	PHLAG8254317 5	Plasmid vector containing HLA-MICB*020:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*020:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*020:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*020:01:02 Genomic Plasmid Vector	PHLAG8254317 6	Plasmid vector containing HLA-MICB*020:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*020:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*020:01:02 protein under different cellular conditions.	Inquiry
HLA-MICB*020:01:03 Genomic Plasmid Vector	PHLAG8254317 7	Plasmid vector containing HLA-MICB*020:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*020:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*020:01:03 protein under different cellular conditions.	Inquiry
HLA-MICB*021:01:01N Genomic Plasmid Vector	PHLAG8254317 8	Plasmid vector containing HLA-MICB*021:01:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*021:01:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*021:01:01N protein under different cellular conditions.	Inquiry

HLA-MICB*021:01:02N Genomic Plasmid Vector	PHLAG82543179	Plasmid vector containing HLA-MICB*021:01:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*021:01:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*021:01:02N protein under different cellular conditions.	Inquiry
HLA-MICB*021:01:03N Genomic Plasmid Vector	PHLAG82543180	Plasmid vector containing HLA-MICB*021:01:03N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*021:01:03N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*021:01:03N protein under different cellular conditions.	Inquiry
HLA-MICB*021:01:04N Genomic Plasmid Vector	PHLAG82543181	Plasmid vector containing HLA-MICB*021:01:04N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*021:01:04N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*021:01:04N protein under different cellular conditions.	Inquiry
HLA-MICB*021:01:05N Genomic Plasmid Vector	PHLAG82543182	Plasmid vector containing HLA-MICB*021:01:05N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*021:01:05N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*021:01:05N protein under different cellular conditions.	Inquiry
HLA-MICB*021:01:06N Genomic Plasmid Vector	PHLAG82543183	Plasmid vector containing HLA-MICB*021:01:06N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*021:01:06N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*021:01:06N protein under different cellular conditions.	Inquiry
HLA-MICB*021:01:07N Genomic Plasmid Vector	PHLAG82543184	Plasmid vector containing HLA-MICB*021:01:07N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*021:01:07N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*021:01:07N protein under different cellular conditions.	Inquiry
HLA-MICB*022 Genomic Plasmid Vector	PHLAG82543185	Plasmid vector containing HLA-MICB*022 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*022 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*022 protein under different cellular conditions.	Inquiry
HLA-MICB*023 Genomic Plasmid Vector	PHLAG82543186	Plasmid vector containing HLA-MICB*023 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*023 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*023 protein under different cellular conditions.	Inquiry

HLA-MICB*024:01:01 Genomic Plasmid Vector	PHLAG82543187	Plasmid vector containing HLA-MICB*024:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*024:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*024:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*024:01:02 Genomic Plasmid Vector	PHLAG82543188	Plasmid vector containing HLA-MICB*024:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*024:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*024:01:02 protein under different cellular conditions.	Inquiry
HLA-MICB*024:01:03 Genomic Plasmid Vector	PHLAG82543189	Plasmid vector containing HLA-MICB*024:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*024:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*024:01:03 protein under different cellular conditions.	Inquiry
HLA-MICB*024:01:04 Genomic Plasmid Vector	PHLAG82543190	Plasmid vector containing HLA-MICB*024:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*024:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*024:01:04 protein under different cellular conditions.	Inquiry
HLA-MICB*024:01:05 Genomic Plasmid Vector	PHLAG82543191	Plasmid vector containing HLA-MICB*024:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*024:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*024:01:05 protein under different cellular conditions.	Inquiry
HLA-MICB*024:01:06 Genomic Plasmid Vector	PHLAG82543192	Plasmid vector containing HLA-MICB*024:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*024:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*024:01:06 protein under different cellular conditions.	Inquiry
HLA-MICB*025:01:01 Genomic Plasmid Vector	PHLAG82543193	Plasmid vector containing HLA-MICB*025:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*025:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*025:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*025:01:02 Genomic Plasmid Vector	PHLAG82543194	Plasmid vector containing HLA-MICB*025:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*025:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*025:01:02 protein under different cellular conditions.	Inquiry
HLA-MICB*025:01:03 Genomic Plasmid Vector	PHLAG82543195	Plasmid vector containing HLA-MICB*025:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*025:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*025:01:03 protein under different cellular conditions.	Inquiry

HLA-MICB*025:01:04 Genomic Plasmid Vector	PHLAG82543196	Plasmid vector containing HLA-MICB*025:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*025:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*025:01:04 protein under different cellular conditions.	Inquiry
HLA-MICB*025:01:05 Genomic Plasmid Vector	PHLAG82543197	Plasmid vector containing HLA-MICB*025:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*025:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*025:01:05 protein under different cellular conditions.	Inquiry
HLA-MICB*026 Genomic Plasmid Vector	PHLAG82543198	Plasmid vector containing HLA-MICB*026 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*026 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*026 protein under different cellular conditions.	Inquiry
HLA-MICB*027 Genomic Plasmid Vector	PHLAG82543199	Plasmid vector containing HLA-MICB*027 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*027 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*027 protein under different cellular conditions.	Inquiry
HLA-MICB*028 Genomic Plasmid Vector	PHLAG825432000	Plasmid vector containing HLA-MICB*028 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*028 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*028 protein under different cellular conditions.	Inquiry
HLA-MICB*029 Genomic Plasmid Vector	PHLAG825432001	Plasmid vector containing HLA-MICB*029 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*029 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*029 protein under different cellular conditions.	Inquiry
HLA-MICB*030 Genomic Plasmid Vector	PHLAG825432002	Plasmid vector containing HLA-MICB*030 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*030 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*030 protein under different cellular conditions.	Inquiry
HLA-MICB*031:01:01 Genomic Plasmid Vector	PHLAG825432003	Plasmid vector containing HLA-MICB*031:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*031:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*031:01:01 protein under different cellular conditions.	Inquiry
HLA-MICB*031:01:02 Genomic Plasmid Vector	PHLAG825432004	Plasmid vector containing HLA-MICB*031:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*031:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*031:01:02 protein under different cellular conditions.	Inquiry

HLA-MICB*031:01:03 Genomic Plasmid Vector	PHLAG82543205	Plasmid vector containing HLA-MICB*031:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*031:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*031:01:03 protein under different cellular conditions.	Inquiry
HLA-MICB*031:01:04 Genomic Plasmid Vector	PHLAG82543206	Plasmid vector containing HLA-MICB*031:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*031:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*031:01:04 protein under different cellular conditions.	Inquiry
HLA-MICB*031:01:05 Genomic Plasmid Vector	PHLAG82543207	Plasmid vector containing HLA-MICB*031:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*031:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*031:01:05 protein under different cellular conditions.	Inquiry
HLA-MICB*031:01:06 Genomic Plasmid Vector	PHLAG82543208	Plasmid vector containing HLA-MICB*031:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*031:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*031:01:06 protein under different cellular conditions.	Inquiry
HLA-MICB*032 Genomic Plasmid Vector	PHLAG82543209	Plasmid vector containing HLA-MICB*032 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*032 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*032 protein under different cellular conditions.	Inquiry
HLA-MICB*033 Genomic Plasmid Vector	PHLAG825432110	Plasmid vector containing HLA-MICB*033 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*033 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*033 protein under different cellular conditions.	Inquiry
HLA-MICB*034 Genomic Plasmid Vector	PHLAG825432111	Plasmid vector containing HLA-MICB*034 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*034 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*034 protein under different cellular conditions.	Inquiry
HLA-MICB*035 Genomic Plasmid Vector	PHLAG825432112	Plasmid vector containing HLA-MICB*035 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*035 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*035 protein under different cellular conditions.	Inquiry
HLA-MICB*036 Genomic Plasmid Vector	PHLAG825432113	Plasmid vector containing HLA-MICB*036 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*036 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*036 protein under different cellular conditions.	Inquiry

HLA-MICB*037 Genomic Plasmid Vector	PHLAG82543214	Plasmid vector containing HLA-MICB*037 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*037 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*037 protein under different cellular conditions.	Inquiry
HLA-MICB*038 Genomic Plasmid Vector	PHLAG82543215	Plasmid vector containing HLA-MICB*038 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*038 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*038 protein under different cellular conditions.	Inquiry
HLA-MICB*039 Genomic Plasmid Vector	PHLAG82543216	Plasmid vector containing HLA-MICB*039 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*039 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*039 protein under different cellular conditions.	Inquiry
HLA-MICB*040 Genomic Plasmid Vector	PHLAG82543217	Plasmid vector containing HLA-MICB*040 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*040 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*040 protein under different cellular conditions.	Inquiry
HLA-MICB*041N Genomic Plasmid Vector	PHLAG82543218	Plasmid vector containing HLA-MICB*041N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*041N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*041N protein under different cellular conditions.	Inquiry
HLA-MICB*042 Genomic Plasmid Vector	PHLAG82543219	Plasmid vector containing HLA-MICB*042 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*042 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*042 protein under different cellular conditions.	Inquiry
HLA-MICB*043N Genomic Plasmid Vector	PHLAG82543220	Plasmid vector containing HLA-MICB*043N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*043N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*043N protein under different cellular conditions.	Inquiry
HLA-MICB*044 Genomic Plasmid Vector	PHLAG82543221	Plasmid vector containing HLA-MICB*044 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*044 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*044 protein under different cellular conditions.	Inquiry
HLA-MICB*045N Genomic Plasmid Vector	PHLAG82543222	Plasmid vector containing HLA-MICB*045N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*045N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*045N protein under different cellular conditions.	Inquiry

HLA-MICB*046 Genomic Plasmid Vector	PHLAG82543223	Plasmid vector containing HLA-MICB*046 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*046 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*046 protein under different cellular conditions.	Inquiry
HLA-MICB*047 Genomic Plasmid Vector	PHLAG82543224	Plasmid vector containing HLA-MICB*047 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*047 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*047 protein under different cellular conditions.	Inquiry
HLA-MICB*048 Genomic Plasmid Vector	PHLAG82543225	Plasmid vector containing HLA-MICB*048 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*048 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*048 protein under different cellular conditions.	Inquiry
HLA-MICB*049 Genomic Plasmid Vector	PHLAG82543226	Plasmid vector containing HLA-MICB*049 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*049 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*049 protein under different cellular conditions.	Inquiry
HLA-MICB*050 Genomic Plasmid Vector	PHLAG82543227	Plasmid vector containing HLA-MICB*050 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*050 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*050 protein under different cellular conditions.	Inquiry
HLA-MICB*051 Genomic Plasmid Vector	PHLAG82543228	Plasmid vector containing HLA-MICB*051 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*051 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*051 protein under different cellular conditions.	Inquiry
HLA-MICB*052 Genomic Plasmid Vector	PHLAG82543229	Plasmid vector containing HLA-MICB*052 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*052 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*052 protein under different cellular conditions.	Inquiry
HLA-MICB*053 Genomic Plasmid Vector	PHLAG82543230	Plasmid vector containing HLA-MICB*053 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*053 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*053 protein under different cellular conditions.	Inquiry
HLA-MICB*054 Genomic Plasmid Vector	PHLAG82543231	Plasmid vector containing HLA-MICB*054 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*054 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*054 protein under different cellular conditions.	Inquiry

HLA-MICB*055 Genomic Plasmid Vector	PHLAG825432312	Plasmid vector containing HLA-MICB*055 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*055 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*055 protein under different cellular conditions.	Inquiry
HLA-MICB*056 Genomic Plasmid Vector	PHLAG825432313	Plasmid vector containing HLA-MICB*056 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*056 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*056 protein under different cellular conditions.	Inquiry
HLA-MICB*057 Genomic Plasmid Vector	PHLAG825432314	Plasmid vector containing HLA-MICB*057 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*057 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*057 protein under different cellular conditions.	Inquiry
HLA-MICB*058 Genomic Plasmid Vector	PHLAG825432315	Plasmid vector containing HLA-MICB*058 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*058 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*058 protein under different cellular conditions.	Inquiry
HLA-MICB*059 Genomic Plasmid Vector	PHLAG825432316	Plasmid vector containing HLA-MICB*059 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-MICB*059 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-MICB*059 protein under different cellular conditions.	Inquiry
HLA-N*01:01:01:01 Genomic Plasmid Vector	PHLAG825432317	Plasmid vector containing HLA-N*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-N*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-N*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-N*01:01:01:02 Genomic Plasmid Vector	PHLAG825432318	Plasmid vector containing HLA-N*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-N*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-N*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-N*01:01:01:03 Genomic Plasmid Vector	PHLAG825432319	Plasmid vector containing HLA-N*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-N*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-N*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-N*01:01:01:04 Genomic Plasmid Vector	PHLAG825432320	Plasmid vector containing HLA-N*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-N*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-N*01:01:01:04 protein under different cellular conditions.	Inquiry

HLA-N*01:01:01:05 Genomic Plasmid Vector	PHLAG82543241	Plasmid vector containing HLA-N*01:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-N*01:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-N*01:01:01:05 protein under different cellular conditions.	Inquiry
HLA-P*01:01:01:01 Genomic Plasmid Vector	PHLAG82543242	Plasmid vector containing HLA-P*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-P*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-P*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-P*01:01:01:02 Genomic Plasmid Vector	PHLAG82543243	Plasmid vector containing HLA-P*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-P*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-P*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-P*01:02 Genomic Plasmid Vector	PHLAG82543244	Plasmid vector containing HLA-P*01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-P*01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-P*01:02 protein under different cellular conditions.	Inquiry
HLA-P*02:01:01:01 Genomic Plasmid Vector	PHLAG82543245	Plasmid vector containing HLA-P*02:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-P*02:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-P*02:01:01:01 protein under different cellular conditions.	Inquiry
HLA-P*02:01:01:02 Genomic Plasmid Vector	PHLAG82543246	Plasmid vector containing HLA-P*02:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-P*02:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-P*02:01:01:02 protein under different cellular conditions.	Inquiry
HLA-R*01:01:01:01 Genomic Plasmid Vector	PHLAG82543247	Plasmid vector containing HLA-R*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-R*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-R*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-R*01:01:01:02 Genomic Plasmid Vector	PHLAG82543248	Plasmid vector containing HLA-R*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-R*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-R*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-S*01:01:01:01 Genomic Plasmid Vector	PHLAG82543249	Plasmid vector containing HLA-S*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-S*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-S*01:01:01:01 protein under different cellular conditions.	Inquiry

HLA-S*01:01:01:02 Genomic Plasmid Vector	PHLAG82543250	Plasmid vector containing HLA-S*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-S*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-S*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-S*01:02:01:01 Genomic Plasmid Vector	PHLAG82543251	Plasmid vector containing HLA-S*01:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-S*01:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-S*01:02:01:01 protein under different cellular conditions.	Inquiry
HLA-S*01:02:01:02 Genomic Plasmid Vector	PHLAG82543252	Plasmid vector containing HLA-S*01:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-S*01:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-S*01:02:01:02 protein under different cellular conditions.	Inquiry
HLA-S*01:02:01:03 Genomic Plasmid Vector	PHLAG82543253	Plasmid vector containing HLA-S*01:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-S*01:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-S*01:02:01:03 protein under different cellular conditions.	Inquiry
HLA-S*01:03 Genomic Plasmid Vector	PHLAG82543254	Plasmid vector containing HLA-S*01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-S*01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-S*01:03 protein under different cellular conditions.	Inquiry
HLA-S*01:04 Genomic Plasmid Vector	PHLAG82543255	Plasmid vector containing HLA-S*01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-S*01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-S*01:04 protein under different cellular conditions.	Inquiry
HLA-T*01:01:01:01 Genomic Plasmid Vector	PHLAG82543256	Plasmid vector containing HLA-T*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-T*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-T*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-T*01:01:01:02 Genomic Plasmid Vector	PHLAG82543257	Plasmid vector containing HLA-T*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-T*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-T*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-T*01:01:01:03 Genomic Plasmid Vector	PHLAG82543258	Plasmid vector containing HLA-T*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-T*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-T*01:01:01:03 protein under different cellular conditions.	Inquiry

HLA-T*01:01:01:04 Genomic Plasmid Vector	PHLAG82543259	Plasmid vector containing HLA-T*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-T*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-T*01:01:01:04 protein under different cellular conditions.	Inquiry
HLA-T*01:01:01:05 Genomic Plasmid Vector	PHLAG82543260	Plasmid vector containing HLA-T*01:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-T*01:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-T*01:01:01:05 protein under different cellular conditions.	Inquiry
HLA-T*02:01:01:01 Genomic Plasmid Vector	PHLAG82543261	Plasmid vector containing HLA-T*02:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-T*02:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-T*02:01:01:01 protein under different cellular conditions.	Inquiry
HLA-T*02:01:01:02 Genomic Plasmid Vector	PHLAG82543262	Plasmid vector containing HLA-T*02:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-T*02:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-T*02:01:01:02 protein under different cellular conditions.	Inquiry
HLA-T*03:01:01:01 Genomic Plasmid Vector	PHLAG82543263	Plasmid vector containing HLA-T*03:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-T*03:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-T*03:01:01:01 protein under different cellular conditions.	Inquiry
HLA-T*03:01:01:02 Genomic Plasmid Vector	PHLAG82543264	Plasmid vector containing HLA-T*03:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-T*03:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-T*03:01:01:02 protein under different cellular conditions.	Inquiry
HLA-TAP1*01:01:01:01 Genomic Plasmid Vector	PHLAG82543265	Plasmid vector containing HLA-TAP1*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:01:01:01 protein under different cellular	Inquiry
HLA-TAP1*01:01:01:02 Genomic Plasmid Vector	PHLAG82543266	Plasmid vector containing HLA-TAP1*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:01:01:02 protein under different cellular	Inquiry
HLA-TAP1*01:01:01:03 Genomic Plasmid Vector	PHLAG82543267	Plasmid vector containing HLA-TAP1*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:01:01:03 protein under different cellular	Inquiry

HLA-TAP1*01:01:01:04 Genomic Plasmid Vector	PHLAG82543268	Plasmid vector containing HLA-TAP1*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:01:01:04 protein under different cellular	Inquiry
HLA-TAP1*01:01:01:05 Genomic Plasmid Vector	PHLAG82543269	Plasmid vector containing HLA-TAP1*01:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:01:01:05 protein under different cellular	Inquiry
HLA-TAP1*01:01:01:06 Genomic Plasmid Vector	PHLAG82543270	Plasmid vector containing HLA-TAP1*01:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:01:01:06 protein under different cellular	Inquiry
HLA-TAP1*01:01:02 Genomic Plasmid Vector	PHLAG82543271	Plasmid vector containing HLA-TAP1*01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:01:02 protein under different cellular conditions.	Inquiry
HLA-TAP1*01:02N Genomic Plasmid Vector	PHLAG82543272	Plasmid vector containing HLA-TAP1*01:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:02N protein under different cellular conditions.	Inquiry
HLA-TAP1*01:03 Genomic Plasmid Vector	PHLAG82543273	Plasmid vector containing HLA-TAP1*01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:03 protein under different cellular conditions.	Inquiry
HLA-TAP1*01:04 Genomic Plasmid Vector	PHLAG82543274	Plasmid vector containing HLA-TAP1*01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:04 protein under different cellular conditions.	Inquiry
HLA-TAP1*01:05 Genomic Plasmid Vector	PHLAG82543275	Plasmid vector containing HLA-TAP1*01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:05 protein under different cellular conditions.	Inquiry
HLA-TAP1*01:06 Genomic Plasmid Vector	PHLAG82543276	Plasmid vector containing HLA-TAP1*01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:06 protein under different cellular conditions.	Inquiry

HLA-TAP1*01:07 Genomic Plasmid Vector	PHLAG82543277	Plasmid vector containing HLA-TAP1*01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*01:07 protein under different cellular conditions.	Inquiry
HLA-TAP1*02:01:01 Genomic Plasmid Vector	PHLAG82543278	Plasmid vector containing HLA-TAP1*02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*02:01:01 protein under different cellular conditions.	Inquiry
HLA-TAP1*02:01:02 Genomic Plasmid Vector	PHLAG82543279	Plasmid vector containing HLA-TAP1*02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*02:01:02 protein under different cellular conditions.	Inquiry
HLA-TAP1*03:01 Genomic Plasmid Vector	PHLAG82543280	Plasmid vector containing HLA-TAP1*03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*03:01 protein under different cellular conditions.	Inquiry
HLA-TAP1*04:01 Genomic Plasmid Vector	PHLAG82543281	Plasmid vector containing HLA-TAP1*04:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*04:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*04:01 protein under different cellular conditions.	Inquiry
HLA-TAP1*05:01 Genomic Plasmid Vector	PHLAG82543282	Plasmid vector containing HLA-TAP1*05:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*05:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*05:01 protein under different cellular conditions.	Inquiry
HLA-TAP1*06:01 Genomic Plasmid Vector	PHLAG82543283	Plasmid vector containing HLA-TAP1*06:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP1*06:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP1*06:01 protein under different cellular conditions.	Inquiry
HLA-TAP2*01:01:01 Genomic Plasmid Vector	PHLAG82543284	Plasmid vector containing HLA-TAP2*01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:01 protein under different cellular conditions.	Inquiry
HLA-TAP2*01:01:02:01 Genomic Plasmid Vector	PHLAG82543285	Plasmid vector containing HLA-TAP2*01:01:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:02:01 protein under different cellular	Inquiry

HLA-TAP2*01:01:02:02 Genomic Plasmid Vector	PHLAG82543286	Plasmid vector containing HLA-TAP2*01:01:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:02:02 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:01 Genomic Plasmid Vector	PHLAG82543287	Plasmid vector containing HLA-TAP2*01:01:03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:01 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:02 Genomic Plasmid Vector	PHLAG82543288	Plasmid vector containing HLA-TAP2*01:01:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:02 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:03 Genomic Plasmid Vector	PHLAG82543289	Plasmid vector containing HLA-TAP2*01:01:03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:03 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:04 Genomic Plasmid Vector	PHLAG82543290	Plasmid vector containing HLA-TAP2*01:01:03:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:04 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:05 Genomic Plasmid Vector	PHLAG82543291	Plasmid vector containing HLA-TAP2*01:01:03:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:05 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:06 Genomic Plasmid Vector	PHLAG82543292	Plasmid vector containing HLA-TAP2*01:01:03:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:06 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:07 Genomic Plasmid Vector	PHLAG82543293	Plasmid vector containing HLA-TAP2*01:01:03:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:07 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:08 Genomic Plasmid Vector	PHLAG82543294	Plasmid vector containing HLA-TAP2*01:01:03:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:08 protein under different cellular	Inquiry

HLA-TAP2*01:01:03:09 Genomic Plasmid Vector	PHLAG82543295	Plasmid vector containing HLA-TAP2*01:01:03:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:09 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:10 Genomic Plasmid Vector	PHLAG82543296	Plasmid vector containing HLA-TAP2*01:01:03:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:10 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:11 Genomic Plasmid Vector	PHLAG82543297	Plasmid vector containing HLA-TAP2*01:01:03:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:11 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:12 Genomic Plasmid Vector	PHLAG82543298	Plasmid vector containing HLA-TAP2*01:01:03:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:12 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:13 Genomic Plasmid Vector	PHLAG82543299	Plasmid vector containing HLA-TAP2*01:01:03:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:13 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:14 Genomic Plasmid Vector	PHLAG82543300	Plasmid vector containing HLA-TAP2*01:01:03:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:14 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:15 Genomic Plasmid Vector	PHLAG82543301	Plasmid vector containing HLA-TAP2*01:01:03:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:15 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:16 Genomic Plasmid Vector	PHLAG82543302	Plasmid vector containing HLA-TAP2*01:01:03:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:16 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:17 Genomic Plasmid Vector	PHLAG82543303	Plasmid vector containing HLA-TAP2*01:01:03:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:17 protein under different cellular	Inquiry

HLA-TAP2*01:01:03:18 Genomic Plasmid Vector	PHLAG82543304	Plasmid vector containing HLA-TAP2*01:01:03:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:18 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:19 Genomic Plasmid Vector	PHLAG82543305	Plasmid vector containing HLA-TAP2*01:01:03:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:19 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:20 Genomic Plasmid Vector	PHLAG82543306	Plasmid vector containing HLA-TAP2*01:01:03:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:20 protein under different cellular	Inquiry
HLA-TAP2*01:01:03:21 Genomic Plasmid Vector	PHLAG82543307	Plasmid vector containing HLA-TAP2*01:01:03:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:03:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:03:21 protein under different cellular	Inquiry
HLA-TAP2*01:01:04 Genomic Plasmid Vector	PHLAG82543308	Plasmid vector containing HLA-TAP2*01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:04 protein under different cellular conditions.	Inquiry
HLA-TAP2*01:01:05:01 Genomic Plasmid Vector	PHLAG82543309	Plasmid vector containing HLA-TAP2*01:01:05:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:05:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:05:01 protein under different cellular	Inquiry
HLA-TAP2*01:01:05:02 Genomic Plasmid Vector	PHLAG82543310	Plasmid vector containing HLA-TAP2*01:01:05:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:05:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:05:02 protein under different cellular	Inquiry
HLA-TAP2*01:01:05:03 Genomic Plasmid Vector	PHLAG82543311	Plasmid vector containing HLA-TAP2*01:01:05:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:05:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:05:03 protein under different cellular	Inquiry
HLA-TAP2*01:01:05:04 Genomic Plasmid Vector	PHLAG82543312	Plasmid vector containing HLA-TAP2*01:01:05:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:05:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:05:04 protein under different cellular	Inquiry

HLA-TAP2*01:01:05:05 Genomic Plasmid Vector	PHLAG82543313	Plasmid vector containing HLA-TAP2*01:01:05:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:05:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:05:05 protein under different cellular	Inquiry
HLA-TAP2*01:01:05:06 Genomic Plasmid Vector	PHLAG82543314	Plasmid vector containing HLA-TAP2*01:01:05:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:05:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:05:06 protein under different cellular	Inquiry
HLA-TAP2*01:01:05:07 Genomic Plasmid Vector	PHLAG82543315	Plasmid vector containing HLA-TAP2*01:01:05:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:05:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:05:07 protein under different cellular	Inquiry
HLA-TAP2*01:01:05:08 Genomic Plasmid Vector	PHLAG82543316	Plasmid vector containing HLA-TAP2*01:01:05:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:05:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:05:08 protein under different cellular	Inquiry
HLA-TAP2*01:01:05:09 Genomic Plasmid Vector	PHLAG82543317	Plasmid vector containing HLA-TAP2*01:01:05:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:05:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:05:09 protein under different cellular	Inquiry
HLA-TAP2*01:01:05:10 Genomic Plasmid Vector	PHLAG82543318	Plasmid vector containing HLA-TAP2*01:01:05:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:05:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:05:10 protein under different cellular	Inquiry
HLA-TAP2*01:01:05:11 Genomic Plasmid Vector	PHLAG82543319	Plasmid vector containing HLA-TAP2*01:01:05:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:05:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:05:11 protein under different cellular	Inquiry
HLA-TAP2*01:01:05:12 Genomic Plasmid Vector	PHLAG82543320	Plasmid vector containing HLA-TAP2*01:01:05:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:05:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:05:12 protein under different cellular	Inquiry
HLA-TAP2*01:01:06 Genomic Plasmid Vector	PHLAG82543321	Plasmid vector containing HLA-TAP2*01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:06 protein under different cellular conditions.	Inquiry

HLA-TAP2*01:01:07:01 Genomic Plasmid Vector	PHLAG825433322	Plasmid vector containing HLA-TAP2*01:01:07:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:07:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:07:01 protein under different cellular	Inquiry
HLA-TAP2*01:01:07:02 Genomic Plasmid Vector	PHLAG825433323	Plasmid vector containing HLA-TAP2*01:01:07:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:07:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:07:02 protein under different cellular	Inquiry
HLA-TAP2*01:01:07:03 Genomic Plasmid Vector	PHLAG825433324	Plasmid vector containing HLA-TAP2*01:01:07:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:07:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:07:03 protein under different cellular	Inquiry
HLA-TAP2*01:01:07:04 Genomic Plasmid Vector	PHLAG825433325	Plasmid vector containing HLA-TAP2*01:01:07:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:07:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:07:04 protein under different cellular	Inquiry
HLA-TAP2*01:01:07:05 Genomic Plasmid Vector	PHLAG825433326	Plasmid vector containing HLA-TAP2*01:01:07:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:07:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:07:05 protein under different cellular	Inquiry
HLA-TAP2*01:01:07:06 Genomic Plasmid Vector	PHLAG825433327	Plasmid vector containing HLA-TAP2*01:01:07:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:07:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:07:06 protein under different cellular	Inquiry
HLA-TAP2*01:01:07:07 Genomic Plasmid Vector	PHLAG825433328	Plasmid vector containing HLA-TAP2*01:01:07:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:07:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:07:07 protein under different cellular	Inquiry
HLA-TAP2*01:01:07:08 Genomic Plasmid Vector	PHLAG825433329	Plasmid vector containing HLA-TAP2*01:01:07:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:07:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:07:08 protein under different cellular	Inquiry
HLA-TAP2*01:01:07:09 Genomic Plasmid Vector	PHLAG825433330	Plasmid vector containing HLA-TAP2*01:01:07:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:07:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:07:09 protein under different cellular	Inquiry

HLA-TAP2*01:01:07:10 Genomic Plasmid Vector	PHLAG82543331	Plasmid vector containing HLA-TAP2*01:01:07:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:07:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:07:10 protein under different cellular	Inquiry
HLA-TAP2*01:01:07:11 Genomic Plasmid Vector	PHLAG82543332	Plasmid vector containing HLA-TAP2*01:01:07:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:07:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:07:11 protein under different cellular	Inquiry
HLA-TAP2*01:01:07:12 Genomic Plasmid Vector	PHLAG82543333	Plasmid vector containing HLA-TAP2*01:01:07:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:07:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:07:12 protein under different cellular	Inquiry
HLA-TAP2*01:01:08 Genomic Plasmid Vector	PHLAG82543334	Plasmid vector containing HLA-TAP2*01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:01:08 protein under different cellular conditions.	Inquiry
HLA-TAP2*01:02:01 Genomic Plasmid Vector	PHLAG82543335	Plasmid vector containing HLA-TAP2*01:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:02:01 protein under different cellular conditions.	Inquiry
HLA-TAP2*01:02:02 Genomic Plasmid Vector	PHLAG82543336	Plasmid vector containing HLA-TAP2*01:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:02:02 protein under different cellular conditions.	Inquiry
HLA-TAP2*01:03:01 Genomic Plasmid Vector	PHLAG82543337	Plasmid vector containing HLA-TAP2*01:03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:03:01 protein under different cellular conditions.	Inquiry
HLA-TAP2*01:03:02:01 Genomic Plasmid Vector	PHLAG82543338	Plasmid vector containing HLA-TAP2*01:03:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:03:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:03:02:01 protein under different cellular	Inquiry
HLA-TAP2*01:03:02:02 Genomic Plasmid Vector	PHLAG82543339	Plasmid vector containing HLA-TAP2*01:03:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:03:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:03:02:02 protein under different cellular	Inquiry

HLA-TAP2*01:03:02:03 Genomic Plasmid Vector	PHLAG82543340	Plasmid vector containing HLA-TAP2*01:03:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:03:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:03:02:03 protein under different cellular	Inquiry
HLA-TAP2*01:03:02:04 Genomic Plasmid Vector	PHLAG82543341	Plasmid vector containing HLA-TAP2*01:03:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:03:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:03:02:04 protein under different cellular	Inquiry
HLA-TAP2*01:03:02:05 Genomic Plasmid Vector	PHLAG82543342	Plasmid vector containing HLA-TAP2*01:03:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:03:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:03:02:05 protein under different cellular	Inquiry
HLA-TAP2*01:03:02:06 Genomic Plasmid Vector	PHLAG82543343	Plasmid vector containing HLA-TAP2*01:03:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:03:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:03:02:06 protein under different cellular	Inquiry
HLA-TAP2*01:03:02:07 Genomic Plasmid Vector	PHLAG82543344	Plasmid vector containing HLA-TAP2*01:03:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:03:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:03:02:07 protein under different cellular	Inquiry
HLA-TAP2*01:03:02:08 Genomic Plasmid Vector	PHLAG82543345	Plasmid vector containing HLA-TAP2*01:03:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:03:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:03:02:08 protein under different cellular	Inquiry
HLA-TAP2*01:03:03 Genomic Plasmid Vector	PHLAG82543346	Plasmid vector containing HLA-TAP2*01:03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:03:03 protein under different cellular conditions.	Inquiry
HLA-TAP2*01:03:04 Genomic Plasmid Vector	PHLAG82543347	Plasmid vector containing HLA-TAP2*01:03:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:03:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:03:04 protein under different cellular conditions.	Inquiry
HLA-TAP2*01:04:01:01 Genomic Plasmid Vector	PHLAG82543348	Plasmid vector containing HLA-TAP2*01:04:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:04:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:04:01:01 protein under different cellular	Inquiry

HLA-TAP2*01:04:01:02 Genomic Plasmid Vector	PHLAG82543349	Plasmid vector containing HLA-TAP2*01:04:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:04:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:04:01:02 protein under different cellular	Inquiry
HLA-TAP2*01:04:01:03 Genomic Plasmid Vector	PHLAG82543350	Plasmid vector containing HLA-TAP2*01:04:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:04:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:04:01:03 protein under different cellular	Inquiry
HLA-TAP2*01:04:01:04 Genomic Plasmid Vector	PHLAG82543351	Plasmid vector containing HLA-TAP2*01:04:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:04:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:04:01:04 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:01 Genomic Plasmid Vector	PHLAG82543352	Plasmid vector containing HLA-TAP2*01:05:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:01 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:02 Genomic Plasmid Vector	PHLAG82543353	Plasmid vector containing HLA-TAP2*01:05:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:02 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:03 Genomic Plasmid Vector	PHLAG82543354	Plasmid vector containing HLA-TAP2*01:05:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:03 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:04 Genomic Plasmid Vector	PHLAG82543355	Plasmid vector containing HLA-TAP2*01:05:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:04 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:05 Genomic Plasmid Vector	PHLAG82543356	Plasmid vector containing HLA-TAP2*01:05:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:05 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:06 Genomic Plasmid Vector	PHLAG82543357	Plasmid vector containing HLA-TAP2*01:05:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:06 protein under different cellular	Inquiry

HLA-TAP2*01:05:01:07 Genomic Plasmid Vector	PHLAG82543358	Plasmid vector containing HLA-TAP2*01:05:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:07 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:08 Genomic Plasmid Vector	PHLAG82543359	Plasmid vector containing HLA-TAP2*01:05:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:08 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:09 Genomic Plasmid Vector	PHLAG82543360	Plasmid vector containing HLA-TAP2*01:05:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:09 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:10 Genomic Plasmid Vector	PHLAG82543361	Plasmid vector containing HLA-TAP2*01:05:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:10 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:11 Genomic Plasmid Vector	PHLAG82543362	Plasmid vector containing HLA-TAP2*01:05:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:11 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:12 Genomic Plasmid Vector	PHLAG82543363	Plasmid vector containing HLA-TAP2*01:05:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:12 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:13 Genomic Plasmid Vector	PHLAG82543364	Plasmid vector containing HLA-TAP2*01:05:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:13 protein under different cellular	Inquiry
HLA-TAP2*01:05:01:14 Genomic Plasmid Vector	PHLAG82543365	Plasmid vector containing HLA-TAP2*01:05:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:01:14 protein under different cellular	Inquiry
HLA-TAP2*01:05:02 Genomic Plasmid Vector	PHLAG82543366	Plasmid vector containing HLA-TAP2*01:05:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:05:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:05:02 protein under different cellular conditions.	Inquiry

HLA-TAP2*01:06 Genomic Plasmid Vector	PHLAG82543367	Plasmid vector containing HLA-TAP2*01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:06 protein under different cellular conditions.	Inquiry
HLA-TAP2*01:07 Genomic Plasmid Vector	PHLAG82543368	Plasmid vector containing HLA-TAP2*01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:07 protein under different cellular conditions.	Inquiry
HLA-TAP2*01:08 Genomic Plasmid Vector	PHLAG82543369	Plasmid vector containing HLA-TAP2*01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*01:08 protein under different cellular conditions.	Inquiry
HLA-TAP2*02:01:01 Genomic Plasmid Vector	PHLAG82543370	Plasmid vector containing HLA-TAP2*02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:01 protein under different cellular conditions.	Inquiry
HLA-TAP2*02:01:02:01 Genomic Plasmid Vector	PHLAG82543371	Plasmid vector containing HLA-TAP2*02:01:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:02:01 protein under different cellular	Inquiry
HLA-TAP2*02:01:02:02 Genomic Plasmid Vector	PHLAG82543372	Plasmid vector containing HLA-TAP2*02:01:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:02:02 protein under different cellular	Inquiry
HLA-TAP2*02:01:02:03 Genomic Plasmid Vector	PHLAG82543373	Plasmid vector containing HLA-TAP2*02:01:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:02:03 protein under different cellular	Inquiry
HLA-TAP2*02:01:02:04 Genomic Plasmid Vector	PHLAG82543374	Plasmid vector containing HLA-TAP2*02:01:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:02:04 protein under different cellular	Inquiry
HLA-TAP2*02:01:02:05 Genomic Plasmid Vector	PHLAG82543375	Plasmid vector containing HLA-TAP2*02:01:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:02:05 protein under different cellular	Inquiry

HLA-TAP2*02:01:02:06 Genomic Plasmid Vector	PHLAG82543376	Plasmid vector containing HLA-TAP2*02:01:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:02:06 protein under different cellular	Inquiry
HLA-TAP2*02:01:02:07 Genomic Plasmid Vector	PHLAG82543377	Plasmid vector containing HLA-TAP2*02:01:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:02:07 protein under different cellular	Inquiry
HLA-TAP2*02:01:03:01 Genomic Plasmid Vector	PHLAG82543378	Plasmid vector containing HLA-TAP2*02:01:03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:03:01 protein under different cellular	Inquiry
HLA-TAP2*02:01:03:02 Genomic Plasmid Vector	PHLAG82543379	Plasmid vector containing HLA-TAP2*02:01:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:03:02 protein under different cellular	Inquiry
HLA-TAP2*02:01:03:03 Genomic Plasmid Vector	PHLAG82543380	Plasmid vector containing HLA-TAP2*02:01:03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:03:03 protein under different cellular	Inquiry
HLA-TAP2*02:01:03:04 Genomic Plasmid Vector	PHLAG82543381	Plasmid vector containing HLA-TAP2*02:01:03:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:03:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:03:04 protein under different cellular	Inquiry
HLA-TAP2*02:01:03:05 Genomic Plasmid Vector	PHLAG82543382	Plasmid vector containing HLA-TAP2*02:01:03:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:03:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:03:05 protein under different cellular	Inquiry
HLA-TAP2*02:01:03:06 Genomic Plasmid Vector	PHLAG82543383	Plasmid vector containing HLA-TAP2*02:01:03:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:03:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:03:06 protein under different cellular	Inquiry
HLA-TAP2*02:01:03:07 Genomic Plasmid Vector	PHLAG82543384	Plasmid vector containing HLA-TAP2*02:01:03:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:03:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:03:07 protein under different cellular	Inquiry

HLA-TAP2*02:01:04 Genomic Plasmid Vector	PHLAG82543385	Plasmid vector containing HLA-TAP2*02:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:01:04 protein under different cellular conditions.	Inquiry
HLA-TAP2*02:02 Genomic Plasmid Vector	PHLAG82543386	Plasmid vector containing HLA-TAP2*02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:02 protein under different cellular conditions.	Inquiry
HLA-TAP2*02:03 Genomic Plasmid Vector	PHLAG82543387	Plasmid vector containing HLA-TAP2*02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:03 protein under different cellular conditions.	Inquiry
HLA-TAP2*02:04 Genomic Plasmid Vector	PHLAG82543388	Plasmid vector containing HLA-TAP2*02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:04 protein under different cellular conditions.	Inquiry
HLA-TAP2*02:05 Genomic Plasmid Vector	PHLAG82543389	Plasmid vector containing HLA-TAP2*02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-TAP2*02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-TAP2*02:05 protein under different cellular conditions.	Inquiry
HLA-U*01:01:01:01 Genomic Plasmid Vector	PHLAG82543390	Plasmid vector containing HLA-U*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-U*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-U*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-U*01:01:01:02 Genomic Plasmid Vector	PHLAG82543391	Plasmid vector containing HLA-U*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-U*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-U*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-U*01:02 Genomic Plasmid Vector	PHLAG82543392	Plasmid vector containing HLA-U*01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-U*01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-U*01:02 protein under different cellular conditions.	Inquiry
HLA-U*01:03 Genomic Plasmid Vector	PHLAG82543393	Plasmid vector containing HLA-U*01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-U*01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-U*01:03 protein under different cellular conditions.	Inquiry

HLA-U*01:04 Genomic Plasmid Vector	PHLAG82543394	Plasmid vector containing HLA-U*01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-U*01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-U*01:04 protein under different cellular conditions.	Inquiry
HLA-U*01:05 Genomic Plasmid Vector	PHLAG82543395	Plasmid vector containing HLA-U*01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-U*01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-U*01:05 protein under different cellular conditions.	Inquiry
HLA-U*01:06 Genomic Plasmid Vector	PHLAG82543396	Plasmid vector containing HLA-U*01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-U*01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-U*01:06 protein under different cellular conditions.	Inquiry
HLA-V*01:01:01:01 Genomic Plasmid Vector	PHLAG82543397	Plasmid vector containing HLA-V*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-V*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-V*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-V*01:01:01:02 Genomic Plasmid Vector	PHLAG82543398	Plasmid vector containing HLA-V*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-V*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-V*01:01:01:02 protein under different cellular conditions.	Inquiry
HLA-V*01:01:01:03 Genomic Plasmid Vector	PHLAG82543399	Plasmid vector containing HLA-V*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-V*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-V*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-V*01:01:01:04 Genomic Plasmid Vector	PHLAG825434000	Plasmid vector containing HLA-V*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-V*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-V*01:01:01:04 protein under different cellular conditions.	Inquiry
HLA-W*01:01:01:01 Genomic Plasmid Vector	PHLAG825434001	Plasmid vector containing HLA-W*01:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*01:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*01:01:01:01 protein under different cellular conditions.	Inquiry
HLA-W*01:01:01:02 Genomic Plasmid Vector	PHLAG825434002	Plasmid vector containing HLA-W*01:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*01:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*01:01:01:02 protein under different cellular conditions.	Inquiry

HLA-W*01:01:01:03 Genomic Plasmid Vector	PHLAG82543403	Plasmid vector containing HLA-W*01:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*01:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*01:01:01:03 protein under different cellular conditions.	Inquiry
HLA-W*01:01:01:04 Genomic Plasmid Vector	PHLAG82543404	Plasmid vector containing HLA-W*01:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*01:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*01:01:01:04 protein under different cellular conditions.	Inquiry
HLA-W*01:01:01:05 Genomic Plasmid Vector	PHLAG82543405	Plasmid vector containing HLA-W*01:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*01:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*01:01:01:05 protein under different cellular conditions.	Inquiry
HLA-W*01:01:01:06 Genomic Plasmid Vector	PHLAG82543406	Plasmid vector containing HLA-W*01:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*01:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*01:01:01:06 protein under different cellular conditions.	Inquiry
HLA-W*01:01:01:07 Genomic Plasmid Vector	PHLAG82543407	Plasmid vector containing HLA-W*01:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*01:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*01:01:01:07 protein under different cellular conditions.	Inquiry
HLA-W*02:01 Genomic Plasmid Vector	PHLAG82543408	Plasmid vector containing HLA-W*02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*02:01 protein under different cellular conditions.	Inquiry
HLA-W*03:01:01:01 Genomic Plasmid Vector	PHLAG82543409	Plasmid vector containing HLA-W*03:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*03:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*03:01:01:01 protein under different cellular conditions.	Inquiry
HLA-W*03:01:01:02 Genomic Plasmid Vector	PHLAG82543410	Plasmid vector containing HLA-W*03:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*03:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*03:01:01:02 protein under different cellular conditions.	Inquiry
HLA-W*04:01 Genomic Plasmid Vector	PHLAG82543411	Plasmid vector containing HLA-W*04:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*04:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*04:01 protein under different cellular conditions.	Inquiry

HLA-W*05:01 Genomic Plasmid Vector	PHLAG8254341 2	Plasmid vector containing HLA-W*05:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*05:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*05:01 protein under different cellular conditions.	Inquiry
HLA-W*05:02 Genomic Plasmid Vector	PHLAG8254341 3	Plasmid vector containing HLA-W*05:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-W*05:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-W*05:02 protein under different cellular conditions.	Inquiry
HLA-Y*01:01 Genomic Plasmid Vector	PHLAG8254341 4	Plasmid vector containing HLA-Y*01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-Y*01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-Y*01:01 protein under different cellular conditions.	Inquiry
HLA-Y*02:01 Genomic Plasmid Vector	PHLAG8254341 5	Plasmid vector containing HLA-Y*02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-Y*02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-Y*02:01 protein under different cellular conditions.	Inquiry
HLA-Y*03:01 Genomic Plasmid Vector	PHLAG8254341 6	Plasmid vector containing HLA-Y*03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-Y*03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-Y*03:01 protein under different cellular conditions.	Inquiry
