HLA-B*18:18:01:02 Genomic Plasmid Vector	PHLAG82512035	Plasmid vector containing HLA-B*18:18:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:18:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:18:01:02 protein under different cellular conditions.	Inquiry
HLA-B*18:180 Genomic Plasmid Vector	PHLAG82512036	Plasmid vector containing HLA-B*18:180 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:180 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:180 protein under different cellular conditions.	Inquiry
HLA-B*18:181 Genomic Plasmid Vector	PHLAG82512037	Plasmid vector containing HLA-B*18:181 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:181 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:181 protein under different cellular conditions.	Inquiry
HLA-B*18:182N Genomic Plasmid Vector	PHLAG82512038	Plasmid vector containing HLA-B*18:182N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:182N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:182N protein under different cellular conditions.	Inquiry
HLA-B*18:183 Genomic Plasmid Vector	PHLAG82512039	Plasmid vector containing HLA-B*18:183 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:183 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:183 protein under different cellular conditions.	Inquiry
HLA-B*18:184 Genomic Plasmid Vector	PHLAG82512040	Plasmid vector containing HLA-B*18:184 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:184 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:184 protein under different cellular conditions.	Inquiry
HLA-B*18:185 Genomic Plasmid Vector	PHLAG82512041	Plasmid vector containing HLA-B*18:185 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:185 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:185 protein under different cellular conditions.	Inquiry

HLA-B*18:186 Genomic Plasmid Vector	PHLAG82512042	Plasmid vector containing HLA-B*18:186 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:186 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:186 protein under different cellular conditions.	Inquiry
HLA-B*18:187 Genomic Plasmid Vector	PHLAG82512043	Plasmid vector containing HLA-B*18:187 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:187 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:187 protein under different cellular conditions.	Inquiry
HLA-B*18:188 Genomic Plasmid Vector	PHLAG82512044	Plasmid vector containing HLA-B*18:188 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:188 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:188 protein under different cellular conditions.	Inquiry
HLA-B*18:189 Genomic Plasmid Vector	PHLAG82512045	Plasmid vector containing HLA-B*18:189 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:189 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:189 protein under different cellular conditions.	Inquiry
HLA-B*18:19 Genomic Plasmid Vector	PHLAG82512046	Plasmid vector containing HLA-B*18:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:19 protein under different cellular conditions.	Inquiry
HLA-B*18:190 Genomic Plasmid Vector	PHLAG82512047	Plasmid vector containing HLA-B*18:190 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:190 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:190 protein under different cellular conditions.	Inquiry
HLA-B*18:191 Genomic Plasmid Vector	PHLAG82512048	Plasmid vector containing HLA-B*18:191 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:191 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:191 protein under different cellular conditions.	Inquiry
HLA-B*18:192 Genomic Plasmid Vector	PHLAG82512049	Plasmid vector containing HLA-B*18:192 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:192 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:192 protein under different cellular conditions.	Inquiry
HLA-B*18:193 Genomic Plasmid Vector	PHLAG82512050	Plasmid vector containing HLA-B*18:193 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:193 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:193 protein under different cellular conditions.	Inquiry

HLA-B*18:194:01:01 Genomic Plasmid Vector	PHLAG82512051	Plasmid vector containing HLA-B*18:194:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:194:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:194:01:01 protein under different cellular conditions.	Inquiry
HLA-B*18:194:01:02 Genomic Plasmid Vector	PHLAG82512052	Plasmid vector containing HLA-B*18:194:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:194:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:194:01:02 protein under different cellular conditions.	Inquiry
HLA-B*18:195 Genomic Plasmid Vector	PHLAG82512053	Plasmid vector containing HLA-B*18:195 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:195 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:195 protein under different cellular conditions.	Inquiry
HLA-B*18:196 Genomic Plasmid Vector	PHLAG82512054	Plasmid vector containing HLA-B*18:196 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:196 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:196 protein under different cellular conditions.	Inquiry
HLA-B*18:197 Genomic Plasmid Vector	PHLAG82512055	Plasmid vector containing HLA-B*18:197 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:197 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:197 protein under different cellular conditions.	Inquiry
HLA-B*18:198 Genomic Plasmid Vector	PHLAG82512056	Plasmid vector containing HLA-B*18:198 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:198 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:198 protein under different cellular conditions.	Inquiry
HLA-B*18:199 Genomic Plasmid Vector	PHLAG82512057	Plasmid vector containing HLA-B*18:199 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:199 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:199 protein under different cellular conditions.	Inquiry
HLA-B*18:20 Genomic Plasmid Vector	PHLAG82512058	Plasmid vector containing HLA-B*18:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:20 protein under different cellular conditions.	Inquiry
HLA-B*18:200 Genomic Plasmid Vector	PHLAG82512059	Plasmid vector containing HLA-B*18:200 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:200 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:200 protein under different cellular conditions.	Inquiry

HLA-B*18:201 Genomic Plasmid Vector	PHLAG82512060	Plasmid vector containing HLA-B*18:201 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:201 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:201 protein under different cellular conditions.	Inquiry
HLA-B*18:202 Genomic Plasmid Vector	PHLAG82512061	Plasmid vector containing HLA-B*18:202 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:202 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:202 protein under different cellular conditions.	Inquiry
HLA-B*18:203 Genomic Plasmid Vector	PHLAG82512062	Plasmid vector containing HLA-B*18:203 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:203 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:203 protein under different cellular conditions.	Inquiry
HLA-B*18:204 Genomic Plasmid Vector	PHLAG82512063	Plasmid vector containing HLA-B*18:204 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:204 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:204 protein under different cellular conditions.	Inquiry
HLA-B*18:205 Genomic Plasmid Vector	PHLAG82512064	Plasmid vector containing HLA-B*18:205 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:205 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:205 protein under different cellular conditions.	Inquiry
HLA-B*18:206 Genomic Plasmid Vector	PHLAG82512065	Plasmid vector containing HLA-B*18:206 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:206 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:206 protein under different cellular conditions.	Inquiry
HLA-B*18:207 Genomic Plasmid Vector	PHLAG82512066	Plasmid vector containing HLA-B*18:207 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:207 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:207 protein under different cellular conditions.	Inquiry
HLA-B*18:208 Genomic Plasmid Vector	PHLAG82512067	Plasmid vector containing HLA-B*18:208 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:208 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:208 protein under different cellular conditions.	Inquiry
HLA-B*18:209 Genomic Plasmid Vector	PHLAG82512068	Plasmid vector containing HLA-B*18:209 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:209 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:209 protein under different cellular conditions.	Inquiry

HLA-B*18:21 Genomic Plasmid Vector	PHLAG82512069	Plasmid vector containing HLA-B*18:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:21 protein under different cellular conditions.	Inquiry
HLA-B*18:210 Genomic Plasmid Vector	PHLAG82512070	Plasmid vector containing HLA-B*18:210 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:210 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:210 protein under different cellular conditions.	Inquiry
HLA-B*18:211 Genomic Plasmid Vector	PHLAG82512071	Plasmid vector containing HLA-B*18:211 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:211 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:211 protein under different cellular conditions.	Inquiry
HLA-B*18:212 Genomic Plasmid Vector	PHLAG82512072	Plasmid vector containing HLA-B*18:212 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:212 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:212 protein under different cellular conditions.	Inquiry
HLA-B*18:213 Genomic Plasmid Vector	PHLAG82512073	Plasmid vector containing HLA-B*18:213 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:213 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:213 protein under different cellular conditions.	Inquiry
HLA-B*18:214 Genomic Plasmid Vector	PHLAG82512074	Plasmid vector containing HLA-B*18:214 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:214 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:214 protein under different cellular conditions.	Inquiry
HLA-B*18:215 Genomic Plasmid Vector	PHLAG82512075	Plasmid vector containing HLA-B*18:215 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:215 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:215 protein under different cellular conditions.	Inquiry
HLA-B*18:216 Genomic Plasmid Vector	PHLAG82512076	Plasmid vector containing HLA-B*18:216 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:216 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:216 protein under different cellular conditions.	Inquiry
HLA-B*18:217 Genomic Plasmid Vector	PHLAG82512077	Plasmid vector containing HLA-B*18:217 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:217 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:217 protein under different cellular conditions.	Inquiry

HLA-B*18:218 Genomic Plasmid Vector	PHLAG82512078	Plasmid vector containing HLA-B*18:218 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:218 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:218 protein under different cellular conditions.	Inquiry
HLA-B*18:219 Genomic Plasmid Vector	PHLAG82512079	Plasmid vector containing HLA-B*18:219 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:219 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:219 protein under different cellular conditions.	Inquiry
HLA-B*18:22 Genomic Plasmid Vector	PHLAG82512080	Plasmid vector containing HLA-B*18:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:22 protein under different cellular conditions.	Inquiry
HLA-B*18:220 Genomic Plasmid Vector	PHLAG82512081	Plasmid vector containing HLA-B*18:220 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:220 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:220 protein under different cellular conditions.	Inquiry
HLA-B*18:221 Genomic Plasmid Vector	PHLAG82512082	Plasmid vector containing HLA-B*18:221 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:221 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:221 protein under different cellular conditions.	Inquiry
HLA-B*18:222 Genomic Plasmid Vector	PHLAG82512083	Plasmid vector containing HLA-B*18:222 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:222 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:222 protein under different cellular conditions.	Inquiry
HLA-B*18:223 Genomic Plasmid Vector	PHLAG82512084	Plasmid vector containing HLA-B*18:223 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:223 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:223 protein under different cellular conditions.	Inquiry
HLA-B*18:224 Genomic Plasmid Vector	PHLAG82512085	Plasmid vector containing HLA-B*18:224 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:224 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:224 protein under different cellular conditions.	Inquiry
HLA-B*18:225 Genomic Plasmid Vector	PHLAG82512086	Plasmid vector containing HLA-B*18:225 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:225 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:225 protein under different cellular conditions.	Inquiry

HLA-B*18:226 Genomic Plasmid Vector	PHLAG82512087	Plasmid vector containing HLA-B*18:226 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:226 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:226 protein under different cellular conditions.	Inquiry
HLA-B*18:227 Genomic Plasmid Vector	PHLAG82512088	Plasmid vector containing HLA-B*18:227 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:227 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:227 protein under different cellular conditions.	Inquiry
HLA-B*18:228 Genomic Plasmid Vector	PHLAG82512089	Plasmid vector containing HLA-B*18:228 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:228 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:228 protein under different cellular conditions.	Inquiry
HLA-B*18:229 Genomic Plasmid Vector	PHLAG82512090	Plasmid vector containing HLA-B*18:229 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:229 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:229 protein under different cellular conditions.	Inquiry
HLA-B*18:230 Genomic Plasmid Vector	PHLAG82512091	Plasmid vector containing HLA-B*18:230 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:230 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:230 protein under different cellular conditions.	Inquiry
HLA-B*18:231Q Genomic Plasmid Vector	PHLAG82512092	Plasmid vector containing HLA-B*18:231Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:231Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:231Q protein under different cellular conditions.	Inquiry
HLA-B*18:232 Genomic Plasmid Vector	PHLAG82512093	Plasmid vector containing HLA-B*18:232 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:232 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:232 protein under different cellular conditions.	Inquiry
HLA-B*18:233 Genomic Plasmid Vector	PHLAG82512094	Plasmid vector containing HLA-B*18:233 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:233 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:233 protein under different cellular conditions.	Inquiry
HLA-B*18:234 Genomic Plasmid Vector	PHLAG82512095	Plasmid vector containing HLA-B*18:234 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:234 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:234 protein under different cellular conditions.	Inquiry

HLA-B*18:235 Genomic Plasmid Vector	PHLAG82512096	Plasmid vector containing HLA-B*18:235 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:235 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:235 protein under different cellular conditions.	Inquiry
HLA-B*18:236 Genomic Plasmid Vector	PHLAG82512097	Plasmid vector containing HLA-B*18:236 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:236 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:236 protein under different cellular conditions.	Inquiry
HLA-B*18:237 Genomic Plasmid Vector	PHLAG82512098	Plasmid vector containing HLA-B*18:237 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:237 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:237 protein under different cellular conditions.	Inquiry
HLA-B*18:238 Genomic Plasmid Vector	PHLAG82512099	Plasmid vector containing HLA-B*18:238 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:238 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:238 protein under different cellular conditions.	Inquiry
HLA-B*18:239 Genomic Plasmid Vector	PHLAG82512100	Plasmid vector containing HLA-B*18:239 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:239 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:239 protein under different cellular conditions.	Inquiry
HLA-B*18:23N Genomic Plasmid Vector	PHLAG82512101	Plasmid vector containing HLA-B*18:23N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:23N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:23N protein under different cellular conditions.	Inquiry
HLA-B*18:24 Genomic Plasmid Vector	PHLAG82512102	Plasmid vector containing HLA-B*18:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:24 protein under different cellular conditions.	Inquiry
HLA-B*18:240 Genomic Plasmid Vector	PHLAG82512103	Plasmid vector containing HLA-B*18:240 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:240 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:240 protein under different cellular conditions.	Inquiry
HLA-B*18:241 Genomic Plasmid Vector	PHLAG82512104	Plasmid vector containing HLA-B*18:241 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:241 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:241 protein under different cellular conditions.	Inquiry

HLA-B*18:242 Genomic Plasmid Vector	PHLAG82512105	Plasmid vector containing HLA-B*18:242 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:242 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:242 protein under different cellular conditions.	Inquiry
HLA-B*18:243 Genomic Plasmid Vector	PHLAG82512106	Plasmid vector containing HLA-B*18:243 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:243 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:243 protein under different cellular conditions.	Inquiry
HLA-B*18:244 Genomic Plasmid Vector	PHLAG82512107	Plasmid vector containing HLA-B*18:244 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:244 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:244 protein under different cellular conditions.	Inquiry
HLA-B*18:245N Genomic Plasmid Vector	PHLAG82512108	Plasmid vector containing HLA-B*18:245N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:245N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:245N protein under different cellular conditions.	Inquiry
HLA-B*18:246 Genomic Plasmid Vector	PHLAG82512109	Plasmid vector containing HLA-B*18:246 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:246 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:246 protein under different cellular conditions.	Inquiry
HLA-B*18:247 Genomic Plasmid Vector	PHLAG82512110	Plasmid vector containing HLA-B*18:247 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:247 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:247 protein under different cellular conditions.	Inquiry
HLA-B*18:248N Genomic Plasmid Vector	PHLAG82512111	Plasmid vector containing HLA-B*18:248N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:248N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:248N protein under different cellular conditions.	Inquiry
HLA-B*18:249 Genomic Plasmid Vector	PHLAG82512112	Plasmid vector containing HLA-B*18:249 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:249 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:249 protein under different cellular conditions.	Inquiry
HLA-B*18:25 Genomic Plasmid Vector	PHLAG82512113	Plasmid vector containing HLA-B*18:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:25 protein under different cellular conditions.	Inquiry

HLA-B*18:250 Genomic Plasmid Vector	PHLAG8251211 4	Plasmid vector containing HLA-B*18:250 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:250 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:250 protein under different cellular conditions.	Inquiry
HLA-B*18:251 Genomic Plasmid Vector	PHLAG8251211 5	Plasmid vector containing HLA-B*18:251 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:251 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:251 protein under different cellular conditions.	Inquiry
HLA-B*18:252 Genomic Plasmid Vector	PHLAG8251211 6	Plasmid vector containing HLA-B*18:252 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:252 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:252 protein under different cellular conditions.	Inquiry
HLA-B*18:253 Genomic Plasmid Vector	PHLAG8251211 7	Plasmid vector containing HLA-B*18:253 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:253 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:253 protein under different cellular conditions.	Inquiry
HLA-B*18:254 Genomic Plasmid Vector	PHLAG8251211 8	Plasmid vector containing HLA-B*18:254 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:254 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:254 protein under different cellular conditions.	Inquiry
HLA-B*18:255 Genomic Plasmid Vector	PHLAG8251211 9	Plasmid vector containing HLA-B*18:255 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:255 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:255 protein under different cellular conditions.	Inquiry
HLA-B*18:256 Genomic Plasmid Vector	PHLAG8251212 0	Plasmid vector containing HLA-B*18:256 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:256 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:256 protein under different cellular conditions.	Inquiry
HLA-B*18:257 Genomic Plasmid Vector	PHLAG8251212 1	Plasmid vector containing HLA-B*18:257 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:257 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:257 protein under different cellular conditions.	Inquiry
HLA-B*18:258N Genomic Plasmid Vector	PHLAG8251212 2	Plasmid vector containing HLA-B*18:258N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:258N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:258N protein under different cellular conditions.	Inquiry

HLA-B*18:259 Genomic Plasmid Vector	PHLAG82512123	Plasmid vector containing HLA-B*18:259 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:259 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:259 protein under different cellular conditions.	Inquiry
HLA-B*18:26 Genomic Plasmid Vector	PHLAG82512124	Plasmid vector containing HLA-B*18:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:26 protein under different cellular conditions.	Inquiry
HLA-B*18:260 Genomic Plasmid Vector	PHLAG82512125	Plasmid vector containing HLA-B*18:260 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:260 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:260 protein under different cellular conditions.	Inquiry
HLA-B*18:261 Genomic Plasmid Vector	PHLAG82512126	Plasmid vector containing HLA-B*18:261 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:261 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:261 protein under different cellular conditions.	Inquiry
HLA-B*18:262 Genomic Plasmid Vector	PHLAG82512127	Plasmid vector containing HLA-B*18:262 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:262 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:262 protein under different cellular conditions.	Inquiry
HLA-B*18:27 Genomic Plasmid Vector	PHLAG82512128	Plasmid vector containing HLA-B*18:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:27 protein under different cellular conditions.	Inquiry
HLA-B*18:28 Genomic Plasmid Vector	PHLAG82512129	Plasmid vector containing HLA-B*18:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:28 protein under different cellular conditions.	Inquiry
HLA-B*18:29 Genomic Plasmid Vector	PHLAG82512130	Plasmid vector containing HLA-B*18:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:29 protein under different cellular conditions.	Inquiry
HLA-B*18:30 Genomic Plasmid Vector	PHLAG82512131	Plasmid vector containing HLA-B*18:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:30 protein under different cellular conditions.	Inquiry

HLA-B*18:31 Genomic Plasmid Vector	PHLAG82512132	Plasmid vector containing HLA-B*18:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:31 protein under different cellular conditions.	Inquiry
HLA-B*18:32 Genomic Plasmid Vector	PHLAG82512133	Plasmid vector containing HLA-B*18:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:32 protein under different cellular conditions.	Inquiry
HLA-B*18:33 Genomic Plasmid Vector	PHLAG82512134	Plasmid vector containing HLA-B*18:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:33 protein under different cellular conditions.	Inquiry
HLA-B*18:34 Genomic Plasmid Vector	PHLAG82512135	Plasmid vector containing HLA-B*18:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:34 protein under different cellular conditions.	Inquiry
HLA-B*18:35 Genomic Plasmid Vector	PHLAG82512136	Plasmid vector containing HLA-B*18:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:35 protein under different cellular conditions.	Inquiry
HLA-B*18:36 Genomic Plasmid Vector	PHLAG82512137	Plasmid vector containing HLA-B*18:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:36 protein under different cellular conditions.	Inquiry
HLA-B*18:37:01 Genomic Plasmid Vector	PHLAG82512138	Plasmid vector containing HLA-B*18:37:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:37:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:37:01 protein under different cellular conditions.	Inquiry
HLA-B*18:37:02 Genomic Plasmid Vector	PHLAG82512139	Plasmid vector containing HLA-B*18:37:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:37:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:37:02 protein under different cellular conditions.	Inquiry
HLA-B*18:37:03 Genomic Plasmid Vector	PHLAG82512140	Plasmid vector containing HLA-B*18:37:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:37:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:37:03 protein under different cellular conditions.	Inquiry

HLA-B*18:38 Genomic Plasmid Vector	PHLAG82512141	Plasmid vector containing HLA-B*18:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:38 protein under different cellular conditions.	Inquiry
HLA-B*18:39 Genomic Plasmid Vector	PHLAG82512142	Plasmid vector containing HLA-B*18:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:39 protein under different cellular conditions.	Inquiry
HLA-B*18:40 Genomic Plasmid Vector	PHLAG82512143	Plasmid vector containing HLA-B*18:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:40 protein under different cellular conditions.	Inquiry
HLA-B*18:41 Genomic Plasmid Vector	PHLAG82512144	Plasmid vector containing HLA-B*18:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:41 protein under different cellular conditions.	Inquiry
HLA-B*18:42 Genomic Plasmid Vector	PHLAG82512145	Plasmid vector containing HLA-B*18:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:42 protein under different cellular conditions.	Inquiry
HLA-B*18:43 Genomic Plasmid Vector	PHLAG82512146	Plasmid vector containing HLA-B*18:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:43 protein under different cellular conditions.	Inquiry
HLA-B*18:44:01 Genomic Plasmid Vector	PHLAG82512147	Plasmid vector containing HLA-B*18:44:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:44:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:44:01 protein under different cellular conditions.	Inquiry
HLA-B*18:44:02 Genomic Plasmid Vector	PHLAG82512148	Plasmid vector containing HLA-B*18:44:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:44:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:44:02 protein under different cellular conditions.	Inquiry
HLA-B*18:45 Genomic Plasmid Vector	PHLAG82512149	Plasmid vector containing HLA-B*18:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:45 protein under different cellular conditions.	Inquiry

HLA-B*18:46 Genomic Plasmid Vector	PHLAG82512150	Plasmid vector containing HLA-B*18:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:46 protein under different cellular conditions.	Inquiry
HLA-B*18:47 Genomic Plasmid Vector	PHLAG82512151	Plasmid vector containing HLA-B*18:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:47 protein under different cellular conditions.	Inquiry
HLA-B*18:48 Genomic Plasmid Vector	PHLAG82512152	Plasmid vector containing HLA-B*18:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:48 protein under different cellular conditions.	Inquiry
HLA-B*18:49 Genomic Plasmid Vector	PHLAG82512153	Plasmid vector containing HLA-B*18:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:49 protein under different cellular conditions.	Inquiry
HLA-B*18:50 Genomic Plasmid Vector	PHLAG82512154	Plasmid vector containing HLA-B*18:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:50 protein under different cellular conditions.	Inquiry
HLA-B*18:51 Genomic Plasmid Vector	PHLAG82512155	Plasmid vector containing HLA-B*18:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:51 protein under different cellular conditions.	Inquiry
HLA-B*18:52 Genomic Plasmid Vector	PHLAG82512156	Plasmid vector containing HLA-B*18:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:52 protein under different cellular conditions.	Inquiry
HLA-B*18:53 Genomic Plasmid Vector	PHLAG82512157	Plasmid vector containing HLA-B*18:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:53 protein under different cellular conditions.	Inquiry
HLA-B*18:54 Genomic Plasmid Vector	PHLAG82512158	Plasmid vector containing HLA-B*18:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:54 protein under different cellular conditions.	Inquiry

HLA-B*18:55 Genomic Plasmid Vector	PHLAG82512159	Plasmid vector containing HLA-B*18:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:55 protein under different cellular conditions.	Inquiry
HLA-B*18:56 Genomic Plasmid Vector	PHLAG825121610	Plasmid vector containing HLA-B*18:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:56 protein under different cellular conditions.	Inquiry
HLA-B*18:57:01 Genomic Plasmid Vector	PHLAG825121611	Plasmid vector containing HLA-B*18:57:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:57:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:57:01 protein under different cellular conditions.	Inquiry
HLA-B*18:57:02 Genomic Plasmid Vector	PHLAG825121612	Plasmid vector containing HLA-B*18:57:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:57:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:57:02 protein under different cellular conditions.	Inquiry
HLA-B*18:58 Genomic Plasmid Vector	PHLAG825121613	Plasmid vector containing HLA-B*18:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:58 protein under different cellular conditions.	Inquiry
HLA-B*18:59 Genomic Plasmid Vector	PHLAG825121614	Plasmid vector containing HLA-B*18:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:59 protein under different cellular conditions.	Inquiry
HLA-B*18:60 Genomic Plasmid Vector	PHLAG825121615	Plasmid vector containing HLA-B*18:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:60 protein under different cellular conditions.	Inquiry
HLA-B*18:61 Genomic Plasmid Vector	PHLAG825121616	Plasmid vector containing HLA-B*18:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:61 protein under different cellular conditions.	Inquiry
HLA-B*18:62 Genomic Plasmid Vector	PHLAG825121617	Plasmid vector containing HLA-B*18:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:62 protein under different cellular conditions.	Inquiry

HLA-B*18:63 Genomic Plasmid Vector	PHLAG82512168	Plasmid vector containing HLA-B*18:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:63 protein under different cellular conditions.	Inquiry
HLA-B*18:64 Genomic Plasmid Vector	PHLAG82512169	Plasmid vector containing HLA-B*18:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:64 protein under different cellular conditions.	Inquiry
HLA-B*18:65 Genomic Plasmid Vector	PHLAG82512170	Plasmid vector containing HLA-B*18:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:65 protein under different cellular conditions.	Inquiry
HLA-B*18:66 Genomic Plasmid Vector	PHLAG82512171	Plasmid vector containing HLA-B*18:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:66 protein under different cellular conditions.	Inquiry
HLA-B*18:67 Genomic Plasmid Vector	PHLAG82512172	Plasmid vector containing HLA-B*18:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:67 protein under different cellular conditions.	Inquiry
HLA-B*18:68 Genomic Plasmid Vector	PHLAG82512173	Plasmid vector containing HLA-B*18:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:68 protein under different cellular conditions.	Inquiry
HLA-B*18:69 Genomic Plasmid Vector	PHLAG82512174	Plasmid vector containing HLA-B*18:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:69 protein under different cellular conditions.	Inquiry
HLA-B*18:70 Genomic Plasmid Vector	PHLAG82512175	Plasmid vector containing HLA-B*18:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:70 protein under different cellular conditions.	Inquiry
HLA-B*18:71 Genomic Plasmid Vector	PHLAG82512176	Plasmid vector containing HLA-B*18:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:71 protein under different cellular conditions.	Inquiry

HLA-B*18:72:01 Genomic Plasmid Vector	PHLAG82512177	Plasmid vector containing HLA-B*18:72:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:72:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:72:01 protein under different cellular conditions.	Inquiry
HLA-B*18:72:02 Genomic Plasmid Vector	PHLAG82512178	Plasmid vector containing HLA-B*18:72:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:72:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:72:02 protein under different cellular conditions.	Inquiry
HLA-B*18:72:03 Genomic Plasmid Vector	PHLAG82512179	Plasmid vector containing HLA-B*18:72:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:72:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:72:03 protein under different cellular conditions.	Inquiry
HLA-B*18:73 Genomic Plasmid Vector	PHLAG82512180	Plasmid vector containing HLA-B*18:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:73 protein under different cellular conditions.	Inquiry
HLA-B*18:74N Genomic Plasmid Vector	PHLAG82512181	Plasmid vector containing HLA-B*18:74N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:74N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:74N protein under different cellular conditions.	Inquiry
HLA-B*18:75 Genomic Plasmid Vector	PHLAG82512182	Plasmid vector containing HLA-B*18:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:75 protein under different cellular conditions.	Inquiry
HLA-B*18:76 Genomic Plasmid Vector	PHLAG82512183	Plasmid vector containing HLA-B*18:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:76 protein under different cellular conditions.	Inquiry
HLA-B*18:77 Genomic Plasmid Vector	PHLAG82512184	Plasmid vector containing HLA-B*18:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:77 protein under different cellular conditions.	Inquiry
HLA-B*18:78 Genomic Plasmid Vector	PHLAG82512185	Plasmid vector containing HLA-B*18:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:78 protein under different cellular conditions.	Inquiry

HLA-B*18:79 Genomic Plasmid Vector	PHLAG82512186	Plasmid vector containing HLA-B*18:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:79 protein under different cellular conditions.	Inquiry
HLA-B*18:80 Genomic Plasmid Vector	PHLAG82512187	Plasmid vector containing HLA-B*18:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:80 protein under different cellular conditions.	Inquiry
HLA-B*18:81 Genomic Plasmid Vector	PHLAG82512188	Plasmid vector containing HLA-B*18:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:81 protein under different cellular conditions.	Inquiry
HLA-B*18:82 Genomic Plasmid Vector	PHLAG82512189	Plasmid vector containing HLA-B*18:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:82 protein under different cellular conditions.	Inquiry
HLA-B*18:83 Genomic Plasmid Vector	PHLAG82512190	Plasmid vector containing HLA-B*18:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:83 protein under different cellular conditions.	Inquiry
HLA-B*18:84 Genomic Plasmid Vector	PHLAG82512191	Plasmid vector containing HLA-B*18:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:84 protein under different cellular conditions.	Inquiry
HLA-B*18:85 Genomic Plasmid Vector	PHLAG82512192	Plasmid vector containing HLA-B*18:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:85 protein under different cellular conditions.	Inquiry
HLA-B*18:86 Genomic Plasmid Vector	PHLAG82512193	Plasmid vector containing HLA-B*18:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:86 protein under different cellular conditions.	Inquiry
HLA-B*18:87 Genomic Plasmid Vector	PHLAG82512194	Plasmid vector containing HLA-B*18:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:87 protein under different cellular conditions.	Inquiry

HLA-B*18:88 Genomic Plasmid Vector	PHLAG82512195	Plasmid vector containing HLA-B*18:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:88 protein under different cellular conditions.	Inquiry
HLA-B*18:89 Genomic Plasmid Vector	PHLAG82512196	Plasmid vector containing HLA-B*18:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:89 protein under different cellular conditions.	Inquiry
HLA-B*18:90 Genomic Plasmid Vector	PHLAG82512197	Plasmid vector containing HLA-B*18:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:90 protein under different cellular conditions.	Inquiry
HLA-B*18:91 Genomic Plasmid Vector	PHLAG82512198	Plasmid vector containing HLA-B*18:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:91 protein under different cellular conditions.	Inquiry
HLA-B*18:92 Genomic Plasmid Vector	PHLAG82512199	Plasmid vector containing HLA-B*18:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:92 protein under different cellular conditions.	Inquiry
HLA-B*18:93 Genomic Plasmid Vector	PHLAG822512200	Plasmid vector containing HLA-B*18:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:93 protein under different cellular conditions.	Inquiry
HLA-B*18:94N Genomic Plasmid Vector	PHLAG822512201	Plasmid vector containing HLA-B*18:94N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:94N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:94N protein under different cellular conditions.	Inquiry
HLA-B*18:95 Genomic Plasmid Vector	PHLAG822512202	Plasmid vector containing HLA-B*18:95 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:95 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:95 protein under different cellular conditions.	Inquiry
HLA-B*18:96 Genomic Plasmid Vector	PHLAG822512203	Plasmid vector containing HLA-B*18:96 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:96 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:96 protein under different cellular conditions.	Inquiry

HLA-B*18:97 Genomic Plasmid Vector	PHLAG82512204	Plasmid vector containing HLA-B*18:97 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:97 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:97 protein under different cellular conditions.	Inquiry
HLA-B*18:98:01 Genomic Plasmid Vector	PHLAG82512205	Plasmid vector containing HLA-B*18:98:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:98:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:98:01 protein under different cellular conditions.	Inquiry
HLA-B*18:98:02 Genomic Plasmid Vector	PHLAG82512206	Plasmid vector containing HLA-B*18:98:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:98:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:98:02 protein under different cellular conditions.	Inquiry
HLA-B*18:99 Genomic Plasmid Vector	PHLAG82512207	Plasmid vector containing HLA-B*18:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*18:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*18:99 protein under different cellular conditions.	Inquiry
HLA-B*1816 Genomic Plasmid Vector	PHLAG82512208	Plasmid vector containing HLA-B*1816 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*1816 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*1816 protein under different cellular conditions.	Inquiry
HLA-B*27:01 Genomic Plasmid Vector	PHLAG82512209	Plasmid vector containing HLA-B*27:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:01 protein under different cellular conditions.	Inquiry
HLA-B*27:02:01:01 Genomic Plasmid Vector	PHLAG825122110	Plasmid vector containing HLA-B*27:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:01:01 protein under different cellular conditions.	Inquiry
HLA-B*27:02:01:02 Genomic Plasmid Vector	PHLAG825122111	Plasmid vector containing HLA-B*27:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:01:02 protein under different cellular conditions.	Inquiry
HLA-B*27:02:01:03 Genomic Plasmid Vector	PHLAG825122112	Plasmid vector containing HLA-B*27:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:01:03 protein under different cellular conditions.	Inquiry

HLA-B*27:02:01:04 Genomic Plasmid Vector	PHLAG82512213	Plasmid vector containing HLA-B*27:02:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:01:04 protein under different cellular conditions.	Inquiry
HLA-B*27:02:01:05 Genomic Plasmid Vector	PHLAG82512214	Plasmid vector containing HLA-B*27:02:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:01:05 protein under different cellular conditions.	Inquiry
HLA-B*27:02:01:06 Genomic Plasmid Vector	PHLAG82512215	Plasmid vector containing HLA-B*27:02:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:01:06 protein under different cellular conditions.	Inquiry
HLA-B*27:02:01:07 Genomic Plasmid Vector	PHLAG82512216	Plasmid vector containing HLA-B*27:02:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:01:07 protein under different cellular conditions.	Inquiry
HLA-B*27:02:01:08 Genomic Plasmid Vector	PHLAG82512217	Plasmid vector containing HLA-B*27:02:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:01:08 protein under different cellular conditions.	Inquiry
HLA-B*27:02:01:09 Genomic Plasmid Vector	PHLAG82512218	Plasmid vector containing HLA-B*27:02:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:01:09 protein under different cellular conditions.	Inquiry
HLA-B*27:02:02 Genomic Plasmid Vector	PHLAG82512219	Plasmid vector containing HLA-B*27:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:02 protein under different cellular conditions.	Inquiry
HLA-B*27:02:03 Genomic Plasmid Vector	PHLAG82512220	Plasmid vector containing HLA-B*27:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:03 protein under different cellular conditions.	Inquiry
HLA-B*27:02:04 Genomic Plasmid Vector	PHLAG82512221	Plasmid vector containing HLA-B*27:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:04 protein under different cellular conditions.	Inquiry

HLA-B*27:02:05 Genomic Plasmid Vector	PHLAG82512222	Plasmid vector containing HLA-B*27:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:05 protein under different cellular conditions.	Inquiry
HLA-B*27:02:06 Genomic Plasmid Vector	PHLAG82512223	Plasmid vector containing HLA-B*27:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:06 protein under different cellular conditions.	Inquiry
HLA-B*27:02:07 Genomic Plasmid Vector	PHLAG82512224	Plasmid vector containing HLA-B*27:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:07 protein under different cellular conditions.	Inquiry
HLA-B*27:02:08 Genomic Plasmid Vector	PHLAG82512225	Plasmid vector containing HLA-B*27:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:02:08 protein under different cellular conditions.	Inquiry
HLA-B*27:03 Genomic Plasmid Vector	PHLAG82512226	Plasmid vector containing HLA-B*27:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:03 protein under different cellular conditions.	Inquiry
HLA-B*27:04:01 Genomic Plasmid Vector	PHLAG82512227	Plasmid vector containing HLA-B*27:04:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:04:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:04:01 protein under different cellular conditions.	Inquiry
HLA-B*27:04:02 Genomic Plasmid Vector	PHLAG82512228	Plasmid vector containing HLA-B*27:04:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:04:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:04:02 protein under different cellular conditions.	Inquiry
HLA-B*27:04:03 Genomic Plasmid Vector	PHLAG82512229	Plasmid vector containing HLA-B*27:04:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:04:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:04:03 protein under different cellular conditions.	Inquiry
HLA-B*27:04:04 Genomic Plasmid Vector	PHLAG82512230	Plasmid vector containing HLA-B*27:04:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:04:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:04:04 protein under different cellular conditions.	Inquiry

HLA-B*27:04:05 Genomic Plasmid Vector	PHLAG82512231	Plasmid vector containing HLA-B*27:04:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:04:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:04:05 protein under different cellular conditions.	Inquiry
HLA-B*27:04:06 Genomic Plasmid Vector	PHLAG82512232	Plasmid vector containing HLA-B*27:04:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:04:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:04:06 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:01 Genomic Plasmid Vector	PHLAG82512233	Plasmid vector containing HLA-B*27:05:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:01 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:02 Genomic Plasmid Vector	PHLAG82512234	Plasmid vector containing HLA-B*27:05:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:02 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:03 Genomic Plasmid Vector	PHLAG82512235	Plasmid vector containing HLA-B*27:05:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:03 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:04Q Genomic Plasmid Vector	PHLAG82512236	Plasmid vector containing HLA-B*27:05:02:04Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:04Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:04Q protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:05 Genomic Plasmid Vector	PHLAG82512237	Plasmid vector containing HLA-B*27:05:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:05 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:06 Genomic Plasmid Vector	PHLAG82512238	Plasmid vector containing HLA-B*27:05:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:06 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:07 Genomic Plasmid Vector	PHLAG82512239	Plasmid vector containing HLA-B*27:05:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:07 protein under different cellular conditions.	Inquiry

HLA-B*27:05:02:08 Genomic Plasmid Vector	PHLAG82512240	Plasmid vector containing HLA-B*27:05:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:08 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:09 Genomic Plasmid Vector	PHLAG82512241	Plasmid vector containing HLA-B*27:05:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:09 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:10 Genomic Plasmid Vector	PHLAG82512242	Plasmid vector containing HLA-B*27:05:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:10 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:11 Genomic Plasmid Vector	PHLAG82512243	Plasmid vector containing HLA-B*27:05:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:11 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:12 Genomic Plasmid Vector	PHLAG82512244	Plasmid vector containing HLA-B*27:05:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:12 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:13 Genomic Plasmid Vector	PHLAG82512245	Plasmid vector containing HLA-B*27:05:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:13 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:14 Genomic Plasmid Vector	PHLAG82512246	Plasmid vector containing HLA-B*27:05:02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:14 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:15 Genomic Plasmid Vector	PHLAG82512247	Plasmid vector containing HLA-B*27:05:02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:15 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:16 Genomic Plasmid Vector	PHLAG82512248	Plasmid vector containing HLA-B*27:05:02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:16 protein under different cellular conditions.	Inquiry

HLA-B*27:05:02:17 Genomic Plasmid Vector	PHLAG82512249	Plasmid vector containing HLA-B*27:05:02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:17 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:18 Genomic Plasmid Vector	PHLAG82512250	Plasmid vector containing HLA-B*27:05:02:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:18 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:19 Genomic Plasmid Vector	PHLAG82512251	Plasmid vector containing HLA-B*27:05:02:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:19 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:20 Genomic Plasmid Vector	PHLAG82512252	Plasmid vector containing HLA-B*27:05:02:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:20 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:21 Genomic Plasmid Vector	PHLAG82512253	Plasmid vector containing HLA-B*27:05:02:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:21 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:22 Genomic Plasmid Vector	PHLAG82512254	Plasmid vector containing HLA-B*27:05:02:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:22 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:23 Genomic Plasmid Vector	PHLAG82512255	Plasmid vector containing HLA-B*27:05:02:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:23 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:24 Genomic Plasmid Vector	PHLAG82512256	Plasmid vector containing HLA-B*27:05:02:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:24 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:25 Genomic Plasmid Vector	PHLAG82512257	Plasmid vector containing HLA-B*27:05:02:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:25 protein under different cellular conditions.	Inquiry

HLA-B*27:05:02:26 Genomic Plasmid Vector	PHLAG82512258	Plasmid vector containing HLA-B*27:05:02:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:26 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:27 Genomic Plasmid Vector	PHLAG82512259	Plasmid vector containing HLA-B*27:05:02:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:27 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:28 Genomic Plasmid Vector	PHLAG82512260	Plasmid vector containing HLA-B*27:05:02:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:28 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:29 Genomic Plasmid Vector	PHLAG82512261	Plasmid vector containing HLA-B*27:05:02:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:29 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:30 Genomic Plasmid Vector	PHLAG82512262	Plasmid vector containing HLA-B*27:05:02:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:30 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:31 Genomic Plasmid Vector	PHLAG82512263	Plasmid vector containing HLA-B*27:05:02:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:31 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:32 Genomic Plasmid Vector	PHLAG82512264	Plasmid vector containing HLA-B*27:05:02:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:32 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:33 Genomic Plasmid Vector	PHLAG82512265	Plasmid vector containing HLA-B*27:05:02:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:33 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:34 Genomic Plasmid Vector	PHLAG82512266	Plasmid vector containing HLA-B*27:05:02:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:34 protein under different cellular conditions.	Inquiry

HLA-B*27:05:02:35 Genomic Plasmid Vector	PHLAG82512267	Plasmid vector containing HLA-B*27:05:02:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:35 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:36 Genomic Plasmid Vector	PHLAG82512268	Plasmid vector containing HLA-B*27:05:02:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:36 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:37 Genomic Plasmid Vector	PHLAG82512269	Plasmid vector containing HLA-B*27:05:02:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:37 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:38 Genomic Plasmid Vector	PHLAG825122710	Plasmid vector containing HLA-B*27:05:02:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:38 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:39 Genomic Plasmid Vector	PHLAG825122711	Plasmid vector containing HLA-B*27:05:02:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:39 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:40 Genomic Plasmid Vector	PHLAG825122712	Plasmid vector containing HLA-B*27:05:02:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:40 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:41 Genomic Plasmid Vector	PHLAG825122713	Plasmid vector containing HLA-B*27:05:02:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:41 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:42 Genomic Plasmid Vector	PHLAG825122714	Plasmid vector containing HLA-B*27:05:02:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:42 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:43 Genomic Plasmid Vector	PHLAG825122715	Plasmid vector containing HLA-B*27:05:02:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:43 protein under different cellular conditions.	Inquiry

HLA-B*27:05:02:44 Genomic Plasmid Vector	PHLAG82512276	Plasmid vector containing HLA-B*27:05:02:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:44 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:45 Genomic Plasmid Vector	PHLAG82512277	Plasmid vector containing HLA-B*27:05:02:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:45 protein under different cellular conditions.	Inquiry
HLA-B*27:05:02:46 Genomic Plasmid Vector	PHLAG82512278	Plasmid vector containing HLA-B*27:05:02:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:02:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:02:46 protein under different cellular conditions.	Inquiry
HLA-B*27:05:03 Genomic Plasmid Vector	PHLAG82512279	Plasmid vector containing HLA-B*27:05:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:03 protein under different cellular conditions.	Inquiry
HLA-B*27:05:04 Genomic Plasmid Vector	PHLAG82512280	Plasmid vector containing HLA-B*27:05:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:04 protein under different cellular conditions.	Inquiry
HLA-B*27:05:05 Genomic Plasmid Vector	PHLAG82512281	Plasmid vector containing HLA-B*27:05:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:05 protein under different cellular conditions.	Inquiry
HLA-B*27:05:06 Genomic Plasmid Vector	PHLAG82512282	Plasmid vector containing HLA-B*27:05:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:06 protein under different cellular conditions.	Inquiry
HLA-B*27:05:07 Genomic Plasmid Vector	PHLAG82512283	Plasmid vector containing HLA-B*27:05:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:07 protein under different cellular conditions.	Inquiry
HLA-B*27:05:08 Genomic Plasmid Vector	PHLAG82512284	Plasmid vector containing HLA-B*27:05:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:08 protein under different cellular conditions.	Inquiry

HLA-B*27:05:09 Genomic Plasmid Vector	PHLAG82512285	Plasmid vector containing HLA-B*27:05:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:09 protein under different cellular conditions.	Inquiry
HLA-B*27:05:10 Genomic Plasmid Vector	PHLAG82512286	Plasmid vector containing HLA-B*27:05:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:10 protein under different cellular conditions.	Inquiry
HLA-B*27:05:11 Genomic Plasmid Vector	PHLAG82512287	Plasmid vector containing HLA-B*27:05:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:11 protein under different cellular conditions.	Inquiry
HLA-B*27:05:12 Genomic Plasmid Vector	PHLAG82512288	Plasmid vector containing HLA-B*27:05:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:12 protein under different cellular conditions.	Inquiry
HLA-B*27:05:13 Genomic Plasmid Vector	PHLAG82512289	Plasmid vector containing HLA-B*27:05:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:13 protein under different cellular conditions.	Inquiry
HLA-B*27:05:14 Genomic Plasmid Vector	PHLAG82512290	Plasmid vector containing HLA-B*27:05:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:14 protein under different cellular conditions.	Inquiry
HLA-B*27:05:15 Genomic Plasmid Vector	PHLAG82512291	Plasmid vector containing HLA-B*27:05:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:15 protein under different cellular conditions.	Inquiry
HLA-B*27:05:16 Genomic Plasmid Vector	PHLAG82512292	Plasmid vector containing HLA-B*27:05:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:16 protein under different cellular conditions.	Inquiry
HLA-B*27:05:17 Genomic Plasmid Vector	PHLAG82512293	Plasmid vector containing HLA-B*27:05:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:17 protein under different cellular conditions.	Inquiry

HLA-B*27:05:18:01 Genomic Plasmid Vector	PHLAG82512294	Plasmid vector containing HLA-B*27:05:18:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:18:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:18:01 protein under different cellular conditions.	Inquiry
HLA-B*27:05:18:02 Genomic Plasmid Vector	PHLAG82512295	Plasmid vector containing HLA-B*27:05:18:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:18:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:18:02 protein under different cellular conditions.	Inquiry
HLA-B*27:05:19 Genomic Plasmid Vector	PHLAG82512296	Plasmid vector containing HLA-B*27:05:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:19 protein under different cellular conditions.	Inquiry
HLA-B*27:05:20 Genomic Plasmid Vector	PHLAG82512297	Plasmid vector containing HLA-B*27:05:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:20 protein under different cellular conditions.	Inquiry
HLA-B*27:05:21 Genomic Plasmid Vector	PHLAG82512298	Plasmid vector containing HLA-B*27:05:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:21 protein under different cellular conditions.	Inquiry
HLA-B*27:05:22 Genomic Plasmid Vector	PHLAG82512299	Plasmid vector containing HLA-B*27:05:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:22 protein under different cellular conditions.	Inquiry
HLA-B*27:05:23 Genomic Plasmid Vector	PHLAG82512300	Plasmid vector containing HLA-B*27:05:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:23 protein under different cellular conditions.	Inquiry
HLA-B*27:05:24 Genomic Plasmid Vector	PHLAG82512301	Plasmid vector containing HLA-B*27:05:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:24 protein under different cellular conditions.	Inquiry
HLA-B*27:05:25 Genomic Plasmid Vector	PHLAG82512302	Plasmid vector containing HLA-B*27:05:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:25 protein under different cellular conditions.	Inquiry

HLA-B*27:05:26 Genomic Plasmid Vector	PHLAG82512303	Plasmid vector containing HLA-B*27:05:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:26 protein under different cellular conditions.	Inquiry
HLA-B*27:05:27 Genomic Plasmid Vector	PHLAG82512304	Plasmid vector containing HLA-B*27:05:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:27 protein under different cellular conditions.	Inquiry
HLA-B*27:05:28 Genomic Plasmid Vector	PHLAG82512305	Plasmid vector containing HLA-B*27:05:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:28 protein under different cellular conditions.	Inquiry
HLA-B*27:05:29 Genomic Plasmid Vector	PHLAG82512306	Plasmid vector containing HLA-B*27:05:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:29 protein under different cellular conditions.	Inquiry
HLA-B*27:05:30 Genomic Plasmid Vector	PHLAG82512307	Plasmid vector containing HLA-B*27:05:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:30 protein under different cellular conditions.	Inquiry
HLA-B*27:05:31 Genomic Plasmid Vector	PHLAG82512308	Plasmid vector containing HLA-B*27:05:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:31 protein under different cellular conditions.	Inquiry
HLA-B*27:05:32 Genomic Plasmid Vector	PHLAG82512309	Plasmid vector containing HLA-B*27:05:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:32 protein under different cellular conditions.	Inquiry
HLA-B*27:05:33 Genomic Plasmid Vector	PHLAG825123110	Plasmid vector containing HLA-B*27:05:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:33 protein under different cellular conditions.	Inquiry
HLA-B*27:05:34 Genomic Plasmid Vector	PHLAG825123111	Plasmid vector containing HLA-B*27:05:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:34 protein under different cellular conditions.	Inquiry

HLA-B*27:05:35 Genomic Plasmid Vector	PHLAG82512312	Plasmid vector containing HLA-B*27:05:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:35 protein under different cellular conditions.	Inquiry
HLA-B*27:05:36 Genomic Plasmid Vector	PHLAG82512313	Plasmid vector containing HLA-B*27:05:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:36 protein under different cellular conditions.	Inquiry
HLA-B*27:05:37 Genomic Plasmid Vector	PHLAG82512314	Plasmid vector containing HLA-B*27:05:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:37 protein under different cellular conditions.	Inquiry
HLA-B*27:05:38 Genomic Plasmid Vector	PHLAG82512315	Plasmid vector containing HLA-B*27:05:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:38 protein under different cellular conditions.	Inquiry
HLA-B*27:05:39 Genomic Plasmid Vector	PHLAG82512316	Plasmid vector containing HLA-B*27:05:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:39 protein under different cellular conditions.	Inquiry
HLA-B*27:05:40 Genomic Plasmid Vector	PHLAG82512317	Plasmid vector containing HLA-B*27:05:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:40 protein under different cellular conditions.	Inquiry
HLA-B*27:05:41 Genomic Plasmid Vector	PHLAG82512318	Plasmid vector containing HLA-B*27:05:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:41 protein under different cellular conditions.	Inquiry
HLA-B*27:05:42 Genomic Plasmid Vector	PHLAG82512319	Plasmid vector containing HLA-B*27:05:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:42 protein under different cellular conditions.	Inquiry
HLA-B*27:05:43 Genomic Plasmid Vector	PHLAG82512320	Plasmid vector containing HLA-B*27:05:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:43 protein under different cellular conditions.	Inquiry

HLA-B*27:05:44 Genomic Plasmid Vector	PHLAG82512321	Plasmid vector containing HLA-B*27:05:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:44 protein under different cellular conditions.	Inquiry
HLA-B*27:05:45 Genomic Plasmid Vector	PHLAG82512322	Plasmid vector containing HLA-B*27:05:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:45 protein under different cellular conditions.	Inquiry
HLA-B*27:05:46 Genomic Plasmid Vector	PHLAG82512323	Plasmid vector containing HLA-B*27:05:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:46 protein under different cellular conditions.	Inquiry
HLA-B*27:05:47 Genomic Plasmid Vector	PHLAG82512324	Plasmid vector containing HLA-B*27:05:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:47 protein under different cellular conditions.	Inquiry
HLA-B*27:05:48 Genomic Plasmid Vector	PHLAG82512325	Plasmid vector containing HLA-B*27:05:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:48 protein under different cellular conditions.	Inquiry
HLA-B*27:05:49 Genomic Plasmid Vector	PHLAG82512326	Plasmid vector containing HLA-B*27:05:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:49 protein under different cellular conditions.	Inquiry
HLA-B*27:05:50 Genomic Plasmid Vector	PHLAG82512327	Plasmid vector containing HLA-B*27:05:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:50 protein under different cellular conditions.	Inquiry
HLA-B*27:05:51 Genomic Plasmid Vector	PHLAG82512328	Plasmid vector containing HLA-B*27:05:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:51 protein under different cellular conditions.	Inquiry
HLA-B*27:05:52 Genomic Plasmid Vector	PHLAG82512329	Plasmid vector containing HLA-B*27:05:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:52 protein under different cellular conditions.	Inquiry

HLA-B*27:05:53 Genomic Plasmid Vector	PHLAG82512330	Plasmid vector containing HLA-B*27:05:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:53 protein under different cellular conditions.	Inquiry
HLA-B*27:05:54 Genomic Plasmid Vector	PHLAG82512331	Plasmid vector containing HLA-B*27:05:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:54 protein under different cellular conditions.	Inquiry
HLA-B*27:05:55 Genomic Plasmid Vector	PHLAG82512332	Plasmid vector containing HLA-B*27:05:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:55 protein under different cellular conditions.	Inquiry
HLA-B*27:05:56 Genomic Plasmid Vector	PHLAG82512333	Plasmid vector containing HLA-B*27:05:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:56 protein under different cellular conditions.	Inquiry
HLA-B*27:05:57 Genomic Plasmid Vector	PHLAG82512334	Plasmid vector containing HLA-B*27:05:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:57 protein under different cellular conditions.	Inquiry
HLA-B*27:05:58 Genomic Plasmid Vector	PHLAG82512335	Plasmid vector containing HLA-B*27:05:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:58 protein under different cellular conditions.	Inquiry
HLA-B*27:05:59 Genomic Plasmid Vector	PHLAG82512336	Plasmid vector containing HLA-B*27:05:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:59 protein under different cellular conditions.	Inquiry
HLA-B*27:05:60 Genomic Plasmid Vector	PHLAG82512337	Plasmid vector containing HLA-B*27:05:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:60 protein under different cellular conditions.	Inquiry
HLA-B*27:05:61 Genomic Plasmid Vector	PHLAG82512338	Plasmid vector containing HLA-B*27:05:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:61 protein under different cellular conditions.	Inquiry

HLA-B*27:05:62 Genomic Plasmid Vector	PHLAG82512339	Plasmid vector containing HLA-B*27:05:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:62 protein under different cellular conditions.	Inquiry
HLA-B*27:05:63 Genomic Plasmid Vector	PHLAG825123440	Plasmid vector containing HLA-B*27:05:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:63 protein under different cellular conditions.	Inquiry
HLA-B*27:05:64 Genomic Plasmid Vector	PHLAG825123441	Plasmid vector containing HLA-B*27:05:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:64 protein under different cellular conditions.	Inquiry
HLA-B*27:05:65 Genomic Plasmid Vector	PHLAG825123442	Plasmid vector containing HLA-B*27:05:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:05:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:05:65 protein under different cellular conditions.	Inquiry
HLA-B*27:06:01:01 Genomic Plasmid Vector	PHLAG825123443	Plasmid vector containing HLA-B*27:06:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:06:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:06:01:01 protein under different cellular conditions.	Inquiry
HLA-B*27:06:01:02 Genomic Plasmid Vector	PHLAG825123444	Plasmid vector containing HLA-B*27:06:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:06:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:06:01:02 protein under different cellular conditions.	Inquiry
HLA-B*27:06:02 Genomic Plasmid Vector	PHLAG825123445	Plasmid vector containing HLA-B*27:06:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:06:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:06:02 protein under different cellular conditions.	Inquiry
HLA-B*27:07:01 Genomic Plasmid Vector	PHLAG825123446	Plasmid vector containing HLA-B*27:07:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:07:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:07:01 protein under different cellular conditions.	Inquiry
HLA-B*27:07:02 Genomic Plasmid Vector	PHLAG825123447	Plasmid vector containing HLA-B*27:07:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:07:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:07:02 protein under different cellular conditions.	Inquiry

HLA-B*27:07:03 Genomic Plasmid Vector	PHLAG82512348	Plasmid vector containing HLA-B*27:07:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:07:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:07:03 protein under different cellular conditions.	Inquiry
HLA-B*27:07:04 Genomic Plasmid Vector	PHLAG82512349	Plasmid vector containing HLA-B*27:07:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:07:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:07:04 protein under different cellular conditions.	Inquiry
HLA-B*27:07:05 Genomic Plasmid Vector	PHLAG82512350	Plasmid vector containing HLA-B*27:07:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:07:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:07:05 protein under different cellular conditions.	Inquiry
HLA-B*27:07:06 Genomic Plasmid Vector	PHLAG82512351	Plasmid vector containing HLA-B*27:07:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:07:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:07:06 protein under different cellular conditions.	Inquiry
HLA-B*27:07:07 Genomic Plasmid Vector	PHLAG82512352	Plasmid vector containing HLA-B*27:07:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:07:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:07:07 protein under different cellular conditions.	Inquiry
HLA-B*27:08 Genomic Plasmid Vector	PHLAG82512353	Plasmid vector containing HLA-B*27:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:08 protein under different cellular conditions.	Inquiry
HLA-B*27:09 Genomic Plasmid Vector	PHLAG82512354	Plasmid vector containing HLA-B*27:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:09 protein under different cellular conditions.	Inquiry
HLA-B*27:10 Genomic Plasmid Vector	PHLAG82512355	Plasmid vector containing HLA-B*27:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:10 protein under different cellular conditions.	Inquiry
HLA-B*27:100 Genomic Plasmid Vector	PHLAG82512356	Plasmid vector containing HLA-B*27:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:100 protein under different cellular conditions.	Inquiry

HLA-B*27:101 Genomic Plasmid Vector	PHLAG82512357	Plasmid vector containing HLA-B*27:101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:101 protein under different cellular conditions.	Inquiry
HLA-B*27:102 Genomic Plasmid Vector	PHLAG82512358	Plasmid vector containing HLA-B*27:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:102 protein under different cellular conditions.	Inquiry
HLA-B*27:103 Genomic Plasmid Vector	PHLAG82512359	Plasmid vector containing HLA-B*27:103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:103 protein under different cellular conditions.	Inquiry
HLA-B*27:104 Genomic Plasmid Vector	PHLAG82512360	Plasmid vector containing HLA-B*27:104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:104 protein under different cellular conditions.	Inquiry
HLA-B*27:105 Genomic Plasmid Vector	PHLAG82512361	Plasmid vector containing HLA-B*27:105 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:105 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:105 protein under different cellular conditions.	Inquiry
HLA-B*27:106 Genomic Plasmid Vector	PHLAG82512362	Plasmid vector containing HLA-B*27:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:106 protein under different cellular conditions.	Inquiry
HLA-B*27:107 Genomic Plasmid Vector	PHLAG82512363	Plasmid vector containing HLA-B*27:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:107 protein under different cellular conditions.	Inquiry
HLA-B*27:108 Genomic Plasmid Vector	PHLAG82512364	Plasmid vector containing HLA-B*27:108 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:108 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:108 protein under different cellular conditions.	Inquiry
HLA-B*27:109 Genomic Plasmid Vector	PHLAG82512365	Plasmid vector containing HLA-B*27:109 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:109 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:109 protein under different cellular conditions.	Inquiry

HLA-B*27:11 Genomic Plasmid Vector	PHLAG82512366	Plasmid vector containing HLA-B*27:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:11 protein under different cellular conditions.	Inquiry
HLA-B*27:110 Genomic Plasmid Vector	PHLAG82512367	Plasmid vector containing HLA-B*27:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:110 protein under different cellular conditions.	Inquiry
HLA-B*27:111 Genomic Plasmid Vector	PHLAG82512368	Plasmid vector containing HLA-B*27:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:111 protein under different cellular conditions.	Inquiry
HLA-B*27:112 Genomic Plasmid Vector	PHLAG82512369	Plasmid vector containing HLA-B*27:112 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:112 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:112 protein under different cellular conditions.	Inquiry
HLA-B*27:113 Genomic Plasmid Vector	PHLAG82512370	Plasmid vector containing HLA-B*27:113 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:113 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:113 protein under different cellular conditions.	Inquiry
HLA-B*27:114 Genomic Plasmid Vector	PHLAG82512371	Plasmid vector containing HLA-B*27:114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:114 protein under different cellular conditions.	Inquiry
HLA-B*27:115 Genomic Plasmid Vector	PHLAG82512372	Plasmid vector containing HLA-B*27:115 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:115 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:115 protein under different cellular conditions.	Inquiry
HLA-B*27:116 Genomic Plasmid Vector	PHLAG82512373	Plasmid vector containing HLA-B*27:116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:116 protein under different cellular conditions.	Inquiry
HLA-B*27:117 Genomic Plasmid Vector	PHLAG82512374	Plasmid vector containing HLA-B*27:117 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:117 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:117 protein under different cellular conditions.	Inquiry

HLA-B*27:118 Genomic Plasmid Vector	PHLAG82512375	Plasmid vector containing HLA-B*27:118 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:118 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:118 protein under different cellular conditions.	Inquiry
HLA-B*27:119 Genomic Plasmid Vector	PHLAG82512376	Plasmid vector containing HLA-B*27:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:119 protein under different cellular conditions.	Inquiry
HLA-B*27:12:01:01 Genomic Plasmid Vector	PHLAG82512377	Plasmid vector containing HLA-B*27:12:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:12:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:12:01:01 protein under different cellular conditions.	Inquiry
HLA-B*27:12:01:02 Genomic Plasmid Vector	PHLAG82512378	Plasmid vector containing HLA-B*27:12:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:12:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:12:01:02 protein under different cellular conditions.	Inquiry
HLA-B*27:12:01:03 Genomic Plasmid Vector	PHLAG82512379	Plasmid vector containing HLA-B*27:12:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:12:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:12:01:03 protein under different cellular conditions.	Inquiry
HLA-B*27:120 Genomic Plasmid Vector	PHLAG825123800	Plasmid vector containing HLA-B*27:120 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:120 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:120 protein under different cellular conditions.	Inquiry
HLA-B*27:121 Genomic Plasmid Vector	PHLAG825123801	Plasmid vector containing HLA-B*27:121 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:121 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:121 protein under different cellular conditions.	Inquiry
HLA-B*27:122 Genomic Plasmid Vector	PHLAG825123802	Plasmid vector containing HLA-B*27:122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:122 protein under different cellular conditions.	Inquiry
HLA-B*27:123 Genomic Plasmid Vector	PHLAG825123803	Plasmid vector containing HLA-B*27:123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:123 protein under different cellular conditions.	Inquiry

HLA-B*27:124 Genomic Plasmid Vector	PHLAG82512384	Plasmid vector containing HLA-B*27:124 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:124 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:124 protein under different cellular conditions.	Inquiry
HLA-B*27:125 Genomic Plasmid Vector	PHLAG82512385	Plasmid vector containing HLA-B*27:125 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:125 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:125 protein under different cellular conditions.	Inquiry
HLA-B*27:126 Genomic Plasmid Vector	PHLAG82512386	Plasmid vector containing HLA-B*27:126 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:126 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:126 protein under different cellular conditions.	Inquiry
HLA-B*27:127 Genomic Plasmid Vector	PHLAG82512387	Plasmid vector containing HLA-B*27:127 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:127 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:127 protein under different cellular conditions.	Inquiry
HLA-B*27:128 Genomic Plasmid Vector	PHLAG82512388	Plasmid vector containing HLA-B*27:128 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:128 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:128 protein under different cellular conditions.	Inquiry
HLA-B*27:129 Genomic Plasmid Vector	PHLAG82512389	Plasmid vector containing HLA-B*27:129 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:129 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:129 protein under different cellular conditions.	Inquiry
HLA-B*27:13:01 Genomic Plasmid Vector	PHLAG82512390	Plasmid vector containing HLA-B*27:13:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:13:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:13:01 protein under different cellular conditions.	Inquiry
HLA-B*27:13:02 Genomic Plasmid Vector	PHLAG82512391	Plasmid vector containing HLA-B*27:13:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:13:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:13:02 protein under different cellular conditions.	Inquiry
HLA-B*27:130 Genomic Plasmid Vector	PHLAG82512392	Plasmid vector containing HLA-B*27:130 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:130 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:130 protein under different cellular conditions.	Inquiry

HLA-B*27:131 Genomic Plasmid Vector	PHLAG82512393	Plasmid vector containing HLA-B*27:131 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:131 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:131 protein under different cellular conditions.	Inquiry
HLA-B*27:132 Genomic Plasmid Vector	PHLAG82512394	Plasmid vector containing HLA-B*27:132 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:132 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:132 protein under different cellular conditions.	Inquiry
HLA-B*27:133 Genomic Plasmid Vector	PHLAG82512395	Plasmid vector containing HLA-B*27:133 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:133 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:133 protein under different cellular conditions.	Inquiry
HLA-B*27:134 Genomic Plasmid Vector	PHLAG82512396	Plasmid vector containing HLA-B*27:134 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:134 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:134 protein under different cellular conditions.	Inquiry
HLA-B*27:135 Genomic Plasmid Vector	PHLAG82512397	Plasmid vector containing HLA-B*27:135 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:135 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:135 protein under different cellular conditions.	Inquiry
HLA-B*27:136 Genomic Plasmid Vector	PHLAG82512398	Plasmid vector containing HLA-B*27:136 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:136 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:136 protein under different cellular conditions.	Inquiry
HLA-B*27:137 Genomic Plasmid Vector	PHLAG82512399	Plasmid vector containing HLA-B*27:137 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:137 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:137 protein under different cellular conditions.	Inquiry
HLA-B*27:138 Genomic Plasmid Vector	PHLAG825124000	Plasmid vector containing HLA-B*27:138 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:138 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:138 protein under different cellular conditions.	Inquiry
HLA-B*27:139 Genomic Plasmid Vector	PHLAG825124001	Plasmid vector containing HLA-B*27:139 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:139 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:139 protein under different cellular conditions.	Inquiry

HLA-B*27:14 Genomic Plasmid Vector	PHLAG82512402	Plasmid vector containing HLA-B*27:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:14 protein under different cellular conditions.	Inquiry
HLA-B*27:140 Genomic Plasmid Vector	PHLAG82512403	Plasmid vector containing HLA-B*27:140 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:140 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:140 protein under different cellular conditions.	Inquiry
HLA-B*27:141 Genomic Plasmid Vector	PHLAG82512404	Plasmid vector containing HLA-B*27:141 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:141 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:141 protein under different cellular conditions.	Inquiry
HLA-B*27:142 Genomic Plasmid Vector	PHLAG82512405	Plasmid vector containing HLA-B*27:142 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:142 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:142 protein under different cellular conditions.	Inquiry
HLA-B*27:143 Genomic Plasmid Vector	PHLAG82512406	Plasmid vector containing HLA-B*27:143 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:143 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:143 protein under different cellular conditions.	Inquiry
HLA-B*27:144:01 Genomic Plasmid Vector	PHLAG82512407	Plasmid vector containing HLA-B*27:144:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:144:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:144:01 protein under different cellular conditions.	Inquiry
HLA-B*27:144:02 Genomic Plasmid Vector	PHLAG82512408	Plasmid vector containing HLA-B*27:144:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:144:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:144:02 protein under different cellular conditions.	Inquiry
HLA-B*27:145 Genomic Plasmid Vector	PHLAG82512409	Plasmid vector containing HLA-B*27:145 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:145 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:145 protein under different cellular conditions.	Inquiry
HLA-B*27:146 Genomic Plasmid Vector	PHLAG82512410	Plasmid vector containing HLA-B*27:146 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:146 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:146 protein under different cellular conditions.	Inquiry

HLA-B*27:147 Genomic Plasmid Vector	PHLAG82512411	Plasmid vector containing HLA-B*27:147 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:147 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:147 protein under different cellular conditions.	Inquiry
HLA-B*27:148 Genomic Plasmid Vector	PHLAG82512412	Plasmid vector containing HLA-B*27:148 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:148 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:148 protein under different cellular conditions.	Inquiry
HLA-B*27:149 Genomic Plasmid Vector	PHLAG82512413	Plasmid vector containing HLA-B*27:149 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:149 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:149 protein under different cellular conditions.	Inquiry
HLA-B*27:15 Genomic Plasmid Vector	PHLAG82512414	Plasmid vector containing HLA-B*27:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:15 protein under different cellular conditions.	Inquiry
HLA-B*27:150 Genomic Plasmid Vector	PHLAG82512415	Plasmid vector containing HLA-B*27:150 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:150 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:150 protein under different cellular conditions.	Inquiry
HLA-B*27:151 Genomic Plasmid Vector	PHLAG82512416	Plasmid vector containing HLA-B*27:151 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:151 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:151 protein under different cellular conditions.	Inquiry
HLA-B*27:152 Genomic Plasmid Vector	PHLAG82512417	Plasmid vector containing HLA-B*27:152 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:152 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:152 protein under different cellular conditions.	Inquiry
HLA-B*27:153 Genomic Plasmid Vector	PHLAG82512418	Plasmid vector containing HLA-B*27:153 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:153 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:153 protein under different cellular conditions.	Inquiry
HLA-B*27:154 Genomic Plasmid Vector	PHLAG82512419	Plasmid vector containing HLA-B*27:154 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:154 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:154 protein under different cellular conditions.	Inquiry

HLA-B*27:155 Genomic Plasmid Vector	PHLAG825124210	Plasmid vector containing HLA-B*27:155 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:155 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:155 protein under different cellular conditions.	Inquiry
HLA-B*27:156 Genomic Plasmid Vector	PHLAG825124211	Plasmid vector containing HLA-B*27:156 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:156 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:156 protein under different cellular conditions.	Inquiry
HLA-B*27:157 Genomic Plasmid Vector	PHLAG825124212	Plasmid vector containing HLA-B*27:157 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:157 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:157 protein under different cellular conditions.	Inquiry
HLA-B*27:158 Genomic Plasmid Vector	PHLAG825124213	Plasmid vector containing HLA-B*27:158 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:158 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:158 protein under different cellular conditions.	Inquiry
HLA-B*27:159 Genomic Plasmid Vector	PHLAG825124214	Plasmid vector containing HLA-B*27:159 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:159 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:159 protein under different cellular conditions.	Inquiry
HLA-B*27:16 Genomic Plasmid Vector	PHLAG825124215	Plasmid vector containing HLA-B*27:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:16 protein under different cellular conditions.	Inquiry
HLA-B*27:160 Genomic Plasmid Vector	PHLAG825124216	Plasmid vector containing HLA-B*27:160 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:160 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:160 protein under different cellular conditions.	Inquiry
HLA-B*27:161 Genomic Plasmid Vector	PHLAG825124217	Plasmid vector containing HLA-B*27:161 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:161 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:161 protein under different cellular conditions.	Inquiry
HLA-B*27:162 Genomic Plasmid Vector	PHLAG825124218	Plasmid vector containing HLA-B*27:162 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:162 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:162 protein under different cellular conditions.	Inquiry

HLA-B*27:163 Genomic Plasmid Vector	PHLAG82512429	Plasmid vector containing HLA-B*27:163 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:163 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:163 protein under different cellular conditions.	Inquiry
HLA-B*27:164 Genomic Plasmid Vector	PHLAG825124330	Plasmid vector containing HLA-B*27:164 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:164 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:164 protein under different cellular conditions.	Inquiry
HLA-B*27:165 Genomic Plasmid Vector	PHLAG825124331	Plasmid vector containing HLA-B*27:165 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:165 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:165 protein under different cellular conditions.	Inquiry
HLA-B*27:166 Genomic Plasmid Vector	PHLAG825124332	Plasmid vector containing HLA-B*27:166 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:166 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:166 protein under different cellular conditions.	Inquiry
HLA-B*27:167 Genomic Plasmid Vector	PHLAG825124333	Plasmid vector containing HLA-B*27:167 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:167 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:167 protein under different cellular conditions.	Inquiry
HLA-B*27:168 Genomic Plasmid Vector	PHLAG825124334	Plasmid vector containing HLA-B*27:168 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:168 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:168 protein under different cellular conditions.	Inquiry
HLA-B*27:169 Genomic Plasmid Vector	PHLAG825124335	Plasmid vector containing HLA-B*27:169 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:169 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:169 protein under different cellular conditions.	Inquiry
HLA-B*27:17 Genomic Plasmid Vector	PHLAG825124336	Plasmid vector containing HLA-B*27:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:17 protein under different cellular conditions.	Inquiry
HLA-B*27:170 Genomic Plasmid Vector	PHLAG825124337	Plasmid vector containing HLA-B*27:170 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:170 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:170 protein under different cellular conditions.	Inquiry

HLA-B*27:171 Genomic Plasmid Vector	PHLAG82512438	Plasmid vector containing HLA-B*27:171 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:171 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:171 protein under different cellular conditions.	Inquiry
HLA-B*27:172 Genomic Plasmid Vector	PHLAG82512439	Plasmid vector containing HLA-B*27:172 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:172 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:172 protein under different cellular conditions.	Inquiry
HLA-B*27:173 Genomic Plasmid Vector	PHLAG82512440	Plasmid vector containing HLA-B*27:173 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:173 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:173 protein under different cellular conditions.	Inquiry
HLA-B*27:174 Genomic Plasmid Vector	PHLAG82512441	Plasmid vector containing HLA-B*27:174 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:174 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:174 protein under different cellular conditions.	Inquiry
HLA-B*27:175 Genomic Plasmid Vector	PHLAG82512442	Plasmid vector containing HLA-B*27:175 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:175 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:175 protein under different cellular conditions.	Inquiry
HLA-B*27:176N Genomic Plasmid Vector	PHLAG82512443	Plasmid vector containing HLA-B*27:176N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:176N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:176N protein under different cellular conditions.	Inquiry
HLA-B*27:177 Genomic Plasmid Vector	PHLAG82512444	Plasmid vector containing HLA-B*27:177 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:177 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:177 protein under different cellular conditions.	Inquiry
HLA-B*27:178:01 Genomic Plasmid Vector	PHLAG82512445	Plasmid vector containing HLA-B*27:178:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:178:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:178:01 protein under different cellular conditions.	Inquiry
HLA-B*27:178:02 Genomic Plasmid Vector	PHLAG82512446	Plasmid vector containing HLA-B*27:178:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:178:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:178:02 protein under different cellular conditions.	Inquiry

HLA-B*27:179 Genomic Plasmid Vector	PHLAG82512447	Plasmid vector containing HLA-B*27:179 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:179 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:179 protein under different cellular conditions.	Inquiry
HLA-B*27:18 Genomic Plasmid Vector	PHLAG82512448	Plasmid vector containing HLA-B*27:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:18 protein under different cellular conditions.	Inquiry
HLA-B*27:180 Genomic Plasmid Vector	PHLAG82512449	Plasmid vector containing HLA-B*27:180 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:180 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:180 protein under different cellular conditions.	Inquiry
HLA-B*27:181 Genomic Plasmid Vector	PHLAG82512450	Plasmid vector containing HLA-B*27:181 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:181 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:181 protein under different cellular conditions.	Inquiry
HLA-B*27:182 Genomic Plasmid Vector	PHLAG82512451	Plasmid vector containing HLA-B*27:182 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:182 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:182 protein under different cellular conditions.	Inquiry
HLA-B*27:183 Genomic Plasmid Vector	PHLAG82512452	Plasmid vector containing HLA-B*27:183 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:183 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:183 protein under different cellular conditions.	Inquiry
HLA-B*27:184 Genomic Plasmid Vector	PHLAG82512453	Plasmid vector containing HLA-B*27:184 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:184 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:184 protein under different cellular conditions.	Inquiry
HLA-B*27:185Q Genomic Plasmid Vector	PHLAG82512454	Plasmid vector containing HLA-B*27:185Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:185Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:185Q protein under different cellular conditions.	Inquiry
HLA-B*27:186 Genomic Plasmid Vector	PHLAG82512455	Plasmid vector containing HLA-B*27:186 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:186 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:186 protein under different cellular conditions.	Inquiry

HLA-B*27:187 Genomic Plasmid Vector	PHLAG82512456	Plasmid vector containing HLA-B*27:187 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:187 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:187 protein under different cellular conditions.	Inquiry
HLA-B*27:188 Genomic Plasmid Vector	PHLAG82512457	Plasmid vector containing HLA-B*27:188 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:188 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:188 protein under different cellular conditions.	Inquiry
HLA-B*27:189 Genomic Plasmid Vector	PHLAG82512458	Plasmid vector containing HLA-B*27:189 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:189 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:189 protein under different cellular conditions.	Inquiry
HLA-B*27:19:01:01 Genomic Plasmid Vector	PHLAG82512459	Plasmid vector containing HLA-B*27:19:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:19:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:19:01:01 protein under different cellular conditions.	Inquiry
HLA-B*27:19:01:02 Genomic Plasmid Vector	PHLAG82512460	Plasmid vector containing HLA-B*27:19:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:19:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:19:01:02 protein under different cellular conditions.	Inquiry
HLA-B*27:19:02 Genomic Plasmid Vector	PHLAG82512461	Plasmid vector containing HLA-B*27:19:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:19:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:19:02 protein under different cellular conditions.	Inquiry
HLA-B*27:190 Genomic Plasmid Vector	PHLAG82512462	Plasmid vector containing HLA-B*27:190 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:190 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:190 protein under different cellular conditions.	Inquiry
HLA-B*27:191 Genomic Plasmid Vector	PHLAG82512463	Plasmid vector containing HLA-B*27:191 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:191 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:191 protein under different cellular conditions.	Inquiry
HLA-B*27:192 Genomic Plasmid Vector	PHLAG82512464	Plasmid vector containing HLA-B*27:192 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:192 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:192 protein under different cellular conditions.	Inquiry

HLA-B*27:193 Genomic Plasmid Vector	PHLAG82512465	Plasmid vector containing HLA-B*27:193 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:193 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:193 protein under different cellular conditions.	Inquiry
HLA-B*27:194 Genomic Plasmid Vector	PHLAG82512466	Plasmid vector containing HLA-B*27:194 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:194 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:194 protein under different cellular conditions.	Inquiry
HLA-B*27:195 Genomic Plasmid Vector	PHLAG82512467	Plasmid vector containing HLA-B*27:195 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:195 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:195 protein under different cellular conditions.	Inquiry
HLA-B*27:196 Genomic Plasmid Vector	PHLAG82512468	Plasmid vector containing HLA-B*27:196 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:196 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:196 protein under different cellular conditions.	Inquiry
HLA-B*27:197 Genomic Plasmid Vector	PHLAG82512469	Plasmid vector containing HLA-B*27:197 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:197 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:197 protein under different cellular conditions.	Inquiry
HLA-B*27:198 Genomic Plasmid Vector	PHLAG82512470	Plasmid vector containing HLA-B*27:198 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:198 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:198 protein under different cellular conditions.	Inquiry
HLA-B*27:199 Genomic Plasmid Vector	PHLAG82512471	Plasmid vector containing HLA-B*27:199 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:199 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:199 protein under different cellular conditions.	Inquiry
HLA-B*27:20 Genomic Plasmid Vector	PHLAG82512472	Plasmid vector containing HLA-B*27:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:20 protein under different cellular conditions.	Inquiry
HLA-B*27:200 Genomic Plasmid Vector	PHLAG82512473	Plasmid vector containing HLA-B*27:200 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:200 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:200 protein under different cellular conditions.	Inquiry

HLA-B*27:201 Genomic Plasmid Vector	PHLAG82512474	Plasmid vector containing HLA-B*27:201 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:201 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:201 protein under different cellular conditions.	Inquiry
HLA-B*27:202 Genomic Plasmid Vector	PHLAG82512475	Plasmid vector containing HLA-B*27:202 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:202 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:202 protein under different cellular conditions.	Inquiry
HLA-B*27:203 Genomic Plasmid Vector	PHLAG82512476	Plasmid vector containing HLA-B*27:203 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:203 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:203 protein under different cellular conditions.	Inquiry
HLA-B*27:204:01:01 Genomic Plasmid Vector	PHLAG82512477	Plasmid vector containing HLA-B*27:204:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:204:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:204:01:01 protein under different cellular conditions.	Inquiry
HLA-B*27:204:01:02 Genomic Plasmid Vector	PHLAG82512478	Plasmid vector containing HLA-B*27:204:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:204:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:204:01:02 protein under different cellular conditions.	Inquiry
HLA-B*27:205 Genomic Plasmid Vector	PHLAG82512479	Plasmid vector containing HLA-B*27:205 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:205 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:205 protein under different cellular conditions.	Inquiry
HLA-B*27:206 Genomic Plasmid Vector	PHLAG82512480	Plasmid vector containing HLA-B*27:206 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:206 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:206 protein under different cellular conditions.	Inquiry
HLA-B*27:207 Genomic Plasmid Vector	PHLAG82512481	Plasmid vector containing HLA-B*27:207 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:207 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:207 protein under different cellular conditions.	Inquiry
HLA-B*27:208 Genomic Plasmid Vector	PHLAG82512482	Plasmid vector containing HLA-B*27:208 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:208 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:208 protein under different cellular conditions.	Inquiry

HLA-B*27:209 Genomic Plasmid Vector	PHLAG82512483	Plasmid vector containing HLA-B*27:209 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:209 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:209 protein under different cellular conditions.	Inquiry
HLA-B*27:21:01 Genomic Plasmid Vector	PHLAG82512484	Plasmid vector containing HLA-B*27:21:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:21:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:21:01 protein under different cellular conditions.	Inquiry
HLA-B*27:21:02 Genomic Plasmid Vector	PHLAG82512485	Plasmid vector containing HLA-B*27:21:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:21:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:21:02 protein under different cellular conditions.	Inquiry
HLA-B*27:210 Genomic Plasmid Vector	PHLAG82512486	Plasmid vector containing HLA-B*27:210 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:210 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:210 protein under different cellular conditions.	Inquiry
HLA-B*27:211 Genomic Plasmid Vector	PHLAG82512487	Plasmid vector containing HLA-B*27:211 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:211 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:211 protein under different cellular conditions.	Inquiry
HLA-B*27:212N Genomic Plasmid Vector	PHLAG82512488	Plasmid vector containing HLA-B*27:212N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:212N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:212N protein under different cellular conditions.	Inquiry
HLA-B*27:213 Genomic Plasmid Vector	PHLAG82512489	Plasmid vector containing HLA-B*27:213 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:213 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:213 protein under different cellular conditions.	Inquiry
HLA-B*27:214 Genomic Plasmid Vector	PHLAG82512490	Plasmid vector containing HLA-B*27:214 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:214 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:214 protein under different cellular conditions.	Inquiry
HLA-B*27:215N Genomic Plasmid Vector	PHLAG82512491	Plasmid vector containing HLA-B*27:215N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:215N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:215N protein under different cellular conditions.	Inquiry

HLA-B*27:216 Genomic Plasmid Vector	PHLAG82512492	Plasmid vector containing HLA-B*27:216 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:216 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:216 protein under different cellular conditions.	Inquiry
HLA-B*27:217 Genomic Plasmid Vector	PHLAG82512493	Plasmid vector containing HLA-B*27:217 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:217 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:217 protein under different cellular conditions.	Inquiry
HLA-B*27:218 Genomic Plasmid Vector	PHLAG82512494	Plasmid vector containing HLA-B*27:218 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:218 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:218 protein under different cellular conditions.	Inquiry
HLA-B*27:219 Genomic Plasmid Vector	PHLAG82512495	Plasmid vector containing HLA-B*27:219 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:219 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:219 protein under different cellular conditions.	Inquiry
HLA-B*27:220 Genomic Plasmid Vector	PHLAG82512496	Plasmid vector containing HLA-B*27:220 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:220 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:220 protein under different cellular conditions.	Inquiry
HLA-B*27:221 Genomic Plasmid Vector	PHLAG82512497	Plasmid vector containing HLA-B*27:221 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:221 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:221 protein under different cellular conditions.	Inquiry
HLA-B*27:222 Genomic Plasmid Vector	PHLAG82512498	Plasmid vector containing HLA-B*27:222 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:222 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:222 protein under different cellular conditions.	Inquiry
HLA-B*27:223N Genomic Plasmid Vector	PHLAG82512499	Plasmid vector containing HLA-B*27:223N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:223N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:223N protein under different cellular conditions.	Inquiry
HLA-B*27:224 Genomic Plasmid Vector	PHLAG825125000	Plasmid vector containing HLA-B*27:224 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:224 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:224 protein under different cellular conditions.	Inquiry

HLA-B*27:225N Genomic Plasmid Vector	PHLAG82512501	Plasmid vector containing HLA-B*27:225N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:225N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:225N protein under different cellular conditions.	Inquiry
HLA-B*27:226 Genomic Plasmid Vector	PHLAG82512502	Plasmid vector containing HLA-B*27:226 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:226 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:226 protein under different cellular conditions.	Inquiry
HLA-B*27:227 Genomic Plasmid Vector	PHLAG82512503	Plasmid vector containing HLA-B*27:227 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:227 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:227 protein under different cellular conditions.	Inquiry
HLA-B*27:228 Genomic Plasmid Vector	PHLAG82512504	Plasmid vector containing HLA-B*27:228 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:228 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:228 protein under different cellular conditions.	Inquiry
HLA-B*27:229 Genomic Plasmid Vector	PHLAG82512505	Plasmid vector containing HLA-B*27:229 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:229 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:229 protein under different cellular conditions.	Inquiry
HLA-B*27:23 Genomic Plasmid Vector	PHLAG82512506	Plasmid vector containing HLA-B*27:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:23 protein under different cellular conditions.	Inquiry
HLA-B*27:230 Genomic Plasmid Vector	PHLAG82512507	Plasmid vector containing HLA-B*27:230 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:230 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:230 protein under different cellular conditions.	Inquiry
HLA-B*27:231 Genomic Plasmid Vector	PHLAG82512508	Plasmid vector containing HLA-B*27:231 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:231 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:231 protein under different cellular conditions.	Inquiry
HLA-B*27:232 Genomic Plasmid Vector	PHLAG82512509	Plasmid vector containing HLA-B*27:232 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:232 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:232 protein under different cellular conditions.	Inquiry

HLA-B*27:233 Genomic Plasmid Vector	PHLAG82512510	Plasmid vector containing HLA-B*27:233 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:233 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:233 protein under different cellular conditions.	Inquiry
HLA-B*27:234 Genomic Plasmid Vector	PHLAG82512511	Plasmid vector containing HLA-B*27:234 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:234 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:234 protein under different cellular conditions.	Inquiry
HLA-B*27:235 Genomic Plasmid Vector	PHLAG82512512	Plasmid vector containing HLA-B*27:235 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:235 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:235 protein under different cellular conditions.	Inquiry
HLA-B*27:236 Genomic Plasmid Vector	PHLAG82512513	Plasmid vector containing HLA-B*27:236 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:236 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:236 protein under different cellular conditions.	Inquiry
HLA-B*27:237 Genomic Plasmid Vector	PHLAG82512514	Plasmid vector containing HLA-B*27:237 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:237 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:237 protein under different cellular conditions.	Inquiry
HLA-B*27:238 Genomic Plasmid Vector	PHLAG82512515	Plasmid vector containing HLA-B*27:238 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:238 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:238 protein under different cellular conditions.	Inquiry
HLA-B*27:239 Genomic Plasmid Vector	PHLAG82512516	Plasmid vector containing HLA-B*27:239 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:239 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:239 protein under different cellular conditions.	Inquiry
HLA-B*27:24 Genomic Plasmid Vector	PHLAG82512517	Plasmid vector containing HLA-B*27:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:24 protein under different cellular conditions.	Inquiry
HLA-B*27:240 Genomic Plasmid Vector	PHLAG82512518	Plasmid vector containing HLA-B*27:240 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:240 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:240 protein under different cellular conditions.	Inquiry

HLA-B*27:241 Genomic Plasmid Vector	PHLAG82512519	Plasmid vector containing HLA-B*27:241 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:241 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:241 protein under different cellular conditions.	Inquiry
HLA-B*27:242 Genomic Plasmid Vector	PHLAG825125220	Plasmid vector containing HLA-B*27:242 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:242 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:242 protein under different cellular conditions.	Inquiry
HLA-B*27:243N Genomic Plasmid Vector	PHLAG825125221	Plasmid vector containing HLA-B*27:243N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:243N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:243N protein under different cellular conditions.	Inquiry
HLA-B*27:244 Genomic Plasmid Vector	PHLAG825125222	Plasmid vector containing HLA-B*27:244 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:244 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:244 protein under different cellular conditions.	Inquiry
HLA-B*27:245 Genomic Plasmid Vector	PHLAG825125223	Plasmid vector containing HLA-B*27:245 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:245 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:245 protein under different cellular conditions.	Inquiry
HLA-B*27:246N Genomic Plasmid Vector	PHLAG825125224	Plasmid vector containing HLA-B*27:246N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:246N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:246N protein under different cellular conditions.	Inquiry
HLA-B*27:247 Genomic Plasmid Vector	PHLAG825125225	Plasmid vector containing HLA-B*27:247 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:247 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:247 protein under different cellular conditions.	Inquiry
HLA-B*27:248 Genomic Plasmid Vector	PHLAG825125226	Plasmid vector containing HLA-B*27:248 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:248 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:248 protein under different cellular conditions.	Inquiry
HLA-B*27:249 Genomic Plasmid Vector	PHLAG825125227	Plasmid vector containing HLA-B*27:249 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:249 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:249 protein under different cellular conditions.	Inquiry

HLA-B*27:25 Genomic Plasmid Vector	PHLAG82512528	Plasmid vector containing HLA-B*27:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:25 protein under different cellular conditions.	Inquiry
HLA-B*27:250 Genomic Plasmid Vector	PHLAG82512529	Plasmid vector containing HLA-B*27:250 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:250 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:250 protein under different cellular conditions.	Inquiry
HLA-B*27:251 Genomic Plasmid Vector	PHLAG82512530	Plasmid vector containing HLA-B*27:251 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:251 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:251 protein under different cellular conditions.	Inquiry
HLA-B*27:252 Genomic Plasmid Vector	PHLAG82512531	Plasmid vector containing HLA-B*27:252 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:252 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:252 protein under different cellular conditions.	Inquiry
HLA-B*27:253Q Genomic Plasmid Vector	PHLAG82512532	Plasmid vector containing HLA-B*27:253Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:253Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:253Q protein under different cellular conditions.	Inquiry
HLA-B*27:254N Genomic Plasmid Vector	PHLAG82512533	Plasmid vector containing HLA-B*27:254N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:254N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:254N protein under different cellular conditions.	Inquiry
HLA-B*27:255 Genomic Plasmid Vector	PHLAG82512534	Plasmid vector containing HLA-B*27:255 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:255 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:255 protein under different cellular conditions.	Inquiry
HLA-B*27:256 Genomic Plasmid Vector	PHLAG82512535	Plasmid vector containing HLA-B*27:256 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:256 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:256 protein under different cellular conditions.	Inquiry
HLA-B*27:257 Genomic Plasmid Vector	PHLAG82512536	Plasmid vector containing HLA-B*27:257 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:257 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:257 protein under different cellular conditions.	Inquiry

HLA-B*27:258 Genomic Plasmid Vector	PHLAG82512537	Plasmid vector containing HLA-B*27:258 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:258 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:258 protein under different cellular conditions.	Inquiry
HLA-B*27:259 Genomic Plasmid Vector	PHLAG82512538	Plasmid vector containing HLA-B*27:259 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:259 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:259 protein under different cellular conditions.	Inquiry
HLA-B*27:26 Genomic Plasmid Vector	PHLAG82512539	Plasmid vector containing HLA-B*27:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:26 protein under different cellular conditions.	Inquiry
HLA-B*27:260 Genomic Plasmid Vector	PHLAG82512540	Plasmid vector containing HLA-B*27:260 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:260 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:260 protein under different cellular conditions.	Inquiry
HLA-B*27:261N Genomic Plasmid Vector	PHLAG82512541	Plasmid vector containing HLA-B*27:261N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:261N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:261N protein under different cellular conditions.	Inquiry
HLA-B*27:262 Genomic Plasmid Vector	PHLAG82512542	Plasmid vector containing HLA-B*27:262 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:262 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:262 protein under different cellular conditions.	Inquiry
HLA-B*27:263N Genomic Plasmid Vector	PHLAG82512543	Plasmid vector containing HLA-B*27:263N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:263N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:263N protein under different cellular conditions.	Inquiry
HLA-B*27:264 Genomic Plasmid Vector	PHLAG82512544	Plasmid vector containing HLA-B*27:264 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:264 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:264 protein under different cellular conditions.	Inquiry
HLA-B*27:265 Genomic Plasmid Vector	PHLAG82512545	Plasmid vector containing HLA-B*27:265 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:265 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:265 protein under different cellular conditions.	Inquiry

HLA-B*27:266 Genomic Plasmid Vector	PHLAG82512546	Plasmid vector containing HLA-B*27:266 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:266 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:266 protein under different cellular conditions.	Inquiry
HLA-B*27:267 Genomic Plasmid Vector	PHLAG82512547	Plasmid vector containing HLA-B*27:267 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:267 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:267 protein under different cellular conditions.	Inquiry
HLA-B*27:268 Genomic Plasmid Vector	PHLAG82512548	Plasmid vector containing HLA-B*27:268 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:268 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:268 protein under different cellular conditions.	Inquiry
HLA-B*27:269 Genomic Plasmid Vector	PHLAG82512549	Plasmid vector containing HLA-B*27:269 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:269 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:269 protein under different cellular conditions.	Inquiry
HLA-B*27:27 Genomic Plasmid Vector	PHLAG82512550	Plasmid vector containing HLA-B*27:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:27 protein under different cellular conditions.	Inquiry
HLA-B*27:270 Genomic Plasmid Vector	PHLAG82512551	Plasmid vector containing HLA-B*27:270 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:270 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:270 protein under different cellular conditions.	Inquiry
HLA-B*27:271 Genomic Plasmid Vector	PHLAG82512552	Plasmid vector containing HLA-B*27:271 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:271 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:271 protein under different cellular conditions.	Inquiry
HLA-B*27:272 Genomic Plasmid Vector	PHLAG82512553	Plasmid vector containing HLA-B*27:272 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:272 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:272 protein under different cellular conditions.	Inquiry
HLA-B*27:273 Genomic Plasmid Vector	PHLAG82512554	Plasmid vector containing HLA-B*27:273 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:273 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:273 protein under different cellular conditions.	Inquiry

HLA-B*27:274 Genomic Plasmid Vector	PHLAG82512555	Plasmid vector containing HLA-B*27:274 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:274 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:274 protein under different cellular conditions.	Inquiry
HLA-B*27:275 Genomic Plasmid Vector	PHLAG82512556	Plasmid vector containing HLA-B*27:275 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:275 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:275 protein under different cellular conditions.	Inquiry
HLA-B*27:276 Genomic Plasmid Vector	PHLAG82512557	Plasmid vector containing HLA-B*27:276 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:276 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:276 protein under different cellular conditions.	Inquiry
HLA-B*27:277 Genomic Plasmid Vector	PHLAG82512558	Plasmid vector containing HLA-B*27:277 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:277 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:277 protein under different cellular conditions.	Inquiry
HLA-B*27:278 Genomic Plasmid Vector	PHLAG82512559	Plasmid vector containing HLA-B*27:278 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:278 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:278 protein under different cellular conditions.	Inquiry
HLA-B*27:279 Genomic Plasmid Vector	PHLAG82512560	Plasmid vector containing HLA-B*27:279 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:279 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:279 protein under different cellular conditions.	Inquiry
HLA-B*27:28 Genomic Plasmid Vector	PHLAG82512561	Plasmid vector containing HLA-B*27:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:28 protein under different cellular conditions.	Inquiry
HLA-B*27:280 Genomic Plasmid Vector	PHLAG82512562	Plasmid vector containing HLA-B*27:280 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:280 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:280 protein under different cellular conditions.	Inquiry
HLA-B*27:281 Genomic Plasmid Vector	PHLAG82512563	Plasmid vector containing HLA-B*27:281 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:281 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:281 protein under different cellular conditions.	Inquiry

HLA-B*27:282 Genomic Plasmid Vector	PHLAG82512564	Plasmid vector containing HLA-B*27:282 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:282 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:282 protein under different cellular conditions.	Inquiry
HLA-B*27:283 Genomic Plasmid Vector	PHLAG82512565	Plasmid vector containing HLA-B*27:283 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:283 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:283 protein under different cellular conditions.	Inquiry
HLA-B*27:284 Genomic Plasmid Vector	PHLAG82512566	Plasmid vector containing HLA-B*27:284 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:284 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:284 protein under different cellular conditions.	Inquiry
HLA-B*27:285 Genomic Plasmid Vector	PHLAG82512567	Plasmid vector containing HLA-B*27:285 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:285 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:285 protein under different cellular conditions.	Inquiry
HLA-B*27:286 Genomic Plasmid Vector	PHLAG82512568	Plasmid vector containing HLA-B*27:286 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:286 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:286 protein under different cellular conditions.	Inquiry
HLA-B*27:287N Genomic Plasmid Vector	PHLAG82512569	Plasmid vector containing HLA-B*27:287N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:287N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:287N protein under different cellular conditions.	Inquiry
HLA-B*27:288 Genomic Plasmid Vector	PHLAG82512570	Plasmid vector containing HLA-B*27:288 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:288 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:288 protein under different cellular conditions.	Inquiry
HLA-B*27:289 Genomic Plasmid Vector	PHLAG82512571	Plasmid vector containing HLA-B*27:289 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:289 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:289 protein under different cellular conditions.	Inquiry
HLA-B*27:29 Genomic Plasmid Vector	PHLAG82512572	Plasmid vector containing HLA-B*27:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:29 protein under different cellular conditions.	Inquiry

HLA-B*27:290 Genomic Plasmid Vector	PHLAG82512573	Plasmid vector containing HLA-B*27:290 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:290 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:290 protein under different cellular conditions.	Inquiry
HLA-B*27:291 Genomic Plasmid Vector	PHLAG82512574	Plasmid vector containing HLA-B*27:291 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:291 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:291 protein under different cellular conditions.	Inquiry
HLA-B*27:292 Genomic Plasmid Vector	PHLAG82512575	Plasmid vector containing HLA-B*27:292 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:292 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:292 protein under different cellular conditions.	Inquiry
HLA-B*27:293 Genomic Plasmid Vector	PHLAG82512576	Plasmid vector containing HLA-B*27:293 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:293 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:293 protein under different cellular conditions.	Inquiry
HLA-B*27:294 Genomic Plasmid Vector	PHLAG82512577	Plasmid vector containing HLA-B*27:294 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:294 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:294 protein under different cellular conditions.	Inquiry
HLA-B*27:295 Genomic Plasmid Vector	PHLAG82512578	Plasmid vector containing HLA-B*27:295 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:295 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:295 protein under different cellular conditions.	Inquiry
HLA-B*27:296 Genomic Plasmid Vector	PHLAG82512579	Plasmid vector containing HLA-B*27:296 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:296 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:296 protein under different cellular conditions.	Inquiry
HLA-B*27:297 Genomic Plasmid Vector	PHLAG825125810	Plasmid vector containing HLA-B*27:297 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:297 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:297 protein under different cellular conditions.	Inquiry
HLA-B*27:30 Genomic Plasmid Vector	PHLAG825125811	Plasmid vector containing HLA-B*27:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:30 protein under different cellular conditions.	Inquiry

HLA-B*27:31 Genomic Plasmid Vector	PHLAG82512582	Plasmid vector containing HLA-B*27:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:31 protein under different cellular conditions.	Inquiry
HLA-B*27:32 Genomic Plasmid Vector	PHLAG82512583	Plasmid vector containing HLA-B*27:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:32 protein under different cellular conditions.	Inquiry
HLA-B*27:33 Genomic Plasmid Vector	PHLAG82512584	Plasmid vector containing HLA-B*27:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:33 protein under different cellular conditions.	Inquiry
HLA-B*27:34 Genomic Plasmid Vector	PHLAG82512585	Plasmid vector containing HLA-B*27:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:34 protein under different cellular conditions.	Inquiry
HLA-B*27:35 Genomic Plasmid Vector	PHLAG82512586	Plasmid vector containing HLA-B*27:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:35 protein under different cellular conditions.	Inquiry
HLA-B*27:36 Genomic Plasmid Vector	PHLAG82512587	Plasmid vector containing HLA-B*27:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:36 protein under different cellular conditions.	Inquiry
HLA-B*27:37 Genomic Plasmid Vector	PHLAG82512588	Plasmid vector containing HLA-B*27:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:37 protein under different cellular conditions.	Inquiry
HLA-B*27:38 Genomic Plasmid Vector	PHLAG82512589	Plasmid vector containing HLA-B*27:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:38 protein under different cellular conditions.	Inquiry
HLA-B*27:39 Genomic Plasmid Vector	PHLAG82512590	Plasmid vector containing HLA-B*27:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:39 protein under different cellular conditions.	Inquiry

HLA-B*27:40 Genomic Plasmid Vector	PHLAG82512591	Plasmid vector containing HLA-B*27:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:40 protein under different cellular conditions.	Inquiry
HLA-B*27:41 Genomic Plasmid Vector	PHLAG82512592	Plasmid vector containing HLA-B*27:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:41 protein under different cellular conditions.	Inquiry
HLA-B*27:42 Genomic Plasmid Vector	PHLAG82512593	Plasmid vector containing HLA-B*27:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:42 protein under different cellular conditions.	Inquiry
HLA-B*27:43 Genomic Plasmid Vector	PHLAG82512594	Plasmid vector containing HLA-B*27:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:43 protein under different cellular conditions.	Inquiry
HLA-B*27:44 Genomic Plasmid Vector	PHLAG82512595	Plasmid vector containing HLA-B*27:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:44 protein under different cellular conditions.	Inquiry
HLA-B*27:45 Genomic Plasmid Vector	PHLAG82512596	Plasmid vector containing HLA-B*27:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:45 protein under different cellular conditions.	Inquiry
HLA-B*27:46 Genomic Plasmid Vector	PHLAG82512597	Plasmid vector containing HLA-B*27:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:46 protein under different cellular conditions.	Inquiry
HLA-B*27:47 Genomic Plasmid Vector	PHLAG82512598	Plasmid vector containing HLA-B*27:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:47 protein under different cellular conditions.	Inquiry
HLA-B*27:48 Genomic Plasmid Vector	PHLAG82512599	Plasmid vector containing HLA-B*27:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:48 protein under different cellular conditions.	Inquiry

HLA-B*27:49 Genomic Plasmid Vector	PHLAG82512600	Plasmid vector containing HLA-B*27:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:49 protein under different cellular conditions.	Inquiry
HLA-B*27:50:01 Genomic Plasmid Vector	PHLAG82512601	Plasmid vector containing HLA-B*27:50:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:50:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:50:01 protein under different cellular conditions.	Inquiry
HLA-B*27:50:02 Genomic Plasmid Vector	PHLAG82512602	Plasmid vector containing HLA-B*27:50:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:50:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:50:02 protein under different cellular conditions.	Inquiry
HLA-B*27:51 Genomic Plasmid Vector	PHLAG82512603	Plasmid vector containing HLA-B*27:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:51 protein under different cellular conditions.	Inquiry
HLA-B*27:52 Genomic Plasmid Vector	PHLAG82512604	Plasmid vector containing HLA-B*27:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:52 protein under different cellular conditions.	Inquiry
HLA-B*27:53 Genomic Plasmid Vector	PHLAG82512605	Plasmid vector containing HLA-B*27:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:53 protein under different cellular conditions.	Inquiry
HLA-B*27:54 Genomic Plasmid Vector	PHLAG82512606	Plasmid vector containing HLA-B*27:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:54 protein under different cellular conditions.	Inquiry
HLA-B*27:55 Genomic Plasmid Vector	PHLAG82512607	Plasmid vector containing HLA-B*27:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:55 protein under different cellular conditions.	Inquiry
HLA-B*27:56 Genomic Plasmid Vector	PHLAG82512608	Plasmid vector containing HLA-B*27:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:56 protein under different cellular conditions.	Inquiry

HLA-B*27:57 Genomic Plasmid Vector	PHLAG82512609	Plasmid vector containing HLA-B*27:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:57 protein under different cellular conditions.	Inquiry
HLA-B*27:58 Genomic Plasmid Vector	PHLAG825126110	Plasmid vector containing HLA-B*27:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:58 protein under different cellular conditions.	Inquiry
HLA-B*27:59N Genomic Plasmid Vector	PHLAG825126111	Plasmid vector containing HLA-B*27:59N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:59N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:59N protein under different cellular conditions.	Inquiry
HLA-B*27:60 Genomic Plasmid Vector	PHLAG825126112	Plasmid vector containing HLA-B*27:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:60 protein under different cellular conditions.	Inquiry
HLA-B*27:61 Genomic Plasmid Vector	PHLAG825126113	Plasmid vector containing HLA-B*27:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:61 protein under different cellular conditions.	Inquiry
HLA-B*27:62 Genomic Plasmid Vector	PHLAG825126114	Plasmid vector containing HLA-B*27:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:62 protein under different cellular conditions.	Inquiry
HLA-B*27:63 Genomic Plasmid Vector	PHLAG825126115	Plasmid vector containing HLA-B*27:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:63 protein under different cellular conditions.	Inquiry
HLA-B*27:64N Genomic Plasmid Vector	PHLAG825126116	Plasmid vector containing HLA-B*27:64N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:64N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:64N protein under different cellular conditions.	Inquiry
HLA-B*27:65N Genomic Plasmid Vector	PHLAG825126117	Plasmid vector containing HLA-B*27:65N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:65N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:65N protein under different cellular conditions.	Inquiry

HLA-B*27:66N Genomic Plasmid Vector	PHLAG82512618	Plasmid vector containing HLA-B*27:66N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:66N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:66N protein under different cellular conditions.	Inquiry
HLA-B*27:67 Genomic Plasmid Vector	PHLAG82512619	Plasmid vector containing HLA-B*27:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:67 protein under different cellular conditions.	Inquiry
HLA-B*27:68 Genomic Plasmid Vector	PHLAG825126220	Plasmid vector containing HLA-B*27:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:68 protein under different cellular conditions.	Inquiry
HLA-B*27:69 Genomic Plasmid Vector	PHLAG825126221	Plasmid vector containing HLA-B*27:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:69 protein under different cellular conditions.	Inquiry
HLA-B*27:70 Genomic Plasmid Vector	PHLAG825126222	Plasmid vector containing HLA-B*27:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:70 protein under different cellular conditions.	Inquiry
HLA-B*27:71 Genomic Plasmid Vector	PHLAG825126223	Plasmid vector containing HLA-B*27:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:71 protein under different cellular conditions.	Inquiry
HLA-B*27:72 Genomic Plasmid Vector	PHLAG825126224	Plasmid vector containing HLA-B*27:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:72 protein under different cellular conditions.	Inquiry
HLA-B*27:73 Genomic Plasmid Vector	PHLAG825126225	Plasmid vector containing HLA-B*27:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:73 protein under different cellular conditions.	Inquiry
HLA-B*27:74 Genomic Plasmid Vector	PHLAG825126226	Plasmid vector containing HLA-B*27:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:74 protein under different cellular conditions.	Inquiry

HLA-B*27:75 Genomic Plasmid Vector	PHLAG82512627	Plasmid vector containing HLA-B*27:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:75 protein under different cellular conditions.	Inquiry
HLA-B*27:76 Genomic Plasmid Vector	PHLAG82512628	Plasmid vector containing HLA-B*27:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:76 protein under different cellular conditions.	Inquiry
HLA-B*27:77 Genomic Plasmid Vector	PHLAG82512629	Plasmid vector containing HLA-B*27:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:77 protein under different cellular conditions.	Inquiry
HLA-B*27:78 Genomic Plasmid Vector	PHLAG82512630	Plasmid vector containing HLA-B*27:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:78 protein under different cellular conditions.	Inquiry
HLA-B*27:79 Genomic Plasmid Vector	PHLAG82512631	Plasmid vector containing HLA-B*27:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:79 protein under different cellular conditions.	Inquiry
HLA-B*27:80 Genomic Plasmid Vector	PHLAG82512632	Plasmid vector containing HLA-B*27:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:80 protein under different cellular conditions.	Inquiry
HLA-B*27:81 Genomic Plasmid Vector	PHLAG82512633	Plasmid vector containing HLA-B*27:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:81 protein under different cellular conditions.	Inquiry
HLA-B*27:82 Genomic Plasmid Vector	PHLAG82512634	Plasmid vector containing HLA-B*27:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:82 protein under different cellular conditions.	Inquiry
HLA-B*27:83 Genomic Plasmid Vector	PHLAG82512635	Plasmid vector containing HLA-B*27:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:83 protein under different cellular conditions.	Inquiry

HLA-B*27:84 Genomic Plasmid Vector	PHLAG82512636	Plasmid vector containing HLA-B*27:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:84 protein under different cellular conditions.	Inquiry
HLA-B*27:85 Genomic Plasmid Vector	PHLAG82512637	Plasmid vector containing HLA-B*27:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:85 protein under different cellular conditions.	Inquiry
HLA-B*27:86 Genomic Plasmid Vector	PHLAG82512638	Plasmid vector containing HLA-B*27:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:86 protein under different cellular conditions.	Inquiry
HLA-B*27:87 Genomic Plasmid Vector	PHLAG82512639	Plasmid vector containing HLA-B*27:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:87 protein under different cellular conditions.	Inquiry
HLA-B*27:88 Genomic Plasmid Vector	PHLAG82512640	Plasmid vector containing HLA-B*27:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:88 protein under different cellular conditions.	Inquiry
HLA-B*27:89 Genomic Plasmid Vector	PHLAG82512641	Plasmid vector containing HLA-B*27:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:89 protein under different cellular conditions.	Inquiry
HLA-B*27:90:01 Genomic Plasmid Vector	PHLAG82512642	Plasmid vector containing HLA-B*27:90:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:90:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:90:01 protein under different cellular conditions.	Inquiry
HLA-B*27:90:02 Genomic Plasmid Vector	PHLAG82512643	Plasmid vector containing HLA-B*27:90:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:90:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:90:02 protein under different cellular conditions.	Inquiry
HLA-B*27:90:03 Genomic Plasmid Vector	PHLAG82512644	Plasmid vector containing HLA-B*27:90:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:90:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:90:03 protein under different cellular conditions.	Inquiry

HLA-B*27:90:04 Genomic Plasmid Vector	PHLAG82512645	Plasmid vector containing HLA-B*27:90:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:90:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:90:04 protein under different cellular conditions.	Inquiry
HLA-B*27:91 Genomic Plasmid Vector	PHLAG82512646	Plasmid vector containing HLA-B*27:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:91 protein under different cellular conditions.	Inquiry
HLA-B*27:92 Genomic Plasmid Vector	PHLAG82512647	Plasmid vector containing HLA-B*27:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:92 protein under different cellular conditions.	Inquiry
HLA-B*27:93 Genomic Plasmid Vector	PHLAG82512648	Plasmid vector containing HLA-B*27:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:93 protein under different cellular conditions.	Inquiry
HLA-B*27:94N Genomic Plasmid Vector	PHLAG82512649	Plasmid vector containing HLA-B*27:94N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:94N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:94N protein under different cellular conditions.	Inquiry
HLA-B*27:95 Genomic Plasmid Vector	PHLAG82512650	Plasmid vector containing HLA-B*27:95 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:95 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:95 protein under different cellular conditions.	Inquiry
HLA-B*27:96:01 Genomic Plasmid Vector	PHLAG82512651	Plasmid vector containing HLA-B*27:96:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:96:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:96:01 protein under different cellular conditions.	Inquiry
HLA-B*27:96:02 Genomic Plasmid Vector	PHLAG82512652	Plasmid vector containing HLA-B*27:96:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:96:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:96:02 protein under different cellular conditions.	Inquiry
HLA-B*27:97 Genomic Plasmid Vector	PHLAG82512653	Plasmid vector containing HLA-B*27:97 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:97 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:97 protein under different cellular conditions.	Inquiry

HLA-B*27:98 Genomic Plasmid Vector	PHLAG82512654	Plasmid vector containing HLA-B*27:98 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:98 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:98 protein under different cellular conditions.	Inquiry
HLA-B*27:99 Genomic Plasmid Vector	PHLAG82512655	Plasmid vector containing HLA-B*27:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27:99 protein under different cellular conditions.	Inquiry
HLA-B*27051 Genomic Plasmid Vector	PHLAG82512656	Plasmid vector containing HLA-B*27051 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*27051 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*27051 protein under different cellular conditions.	Inquiry
HLA-B*2722 Genomic Plasmid Vector	PHLAG82512657	Plasmid vector containing HLA-B*2722 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*2722 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*2722 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:01 Genomic Plasmid Vector	PHLAG82512658	Plasmid vector containing HLA-B*35:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:02 Genomic Plasmid Vector	PHLAG82512659	Plasmid vector containing HLA-B*35:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:03 Genomic Plasmid Vector	PHLAG82512660	Plasmid vector containing HLA-B*35:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:03 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:04 Genomic Plasmid Vector	PHLAG82512661	Plasmid vector containing HLA-B*35:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:04 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:05 Genomic Plasmid Vector	PHLAG82512662	Plasmid vector containing HLA-B*35:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:05 protein under different cellular conditions.	Inquiry

HLA-B*35:01:01:06 Genomic Plasmid Vector	PHLAG82512663	Plasmid vector containing HLA-B*35:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:06 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:07 Genomic Plasmid Vector	PHLAG82512664	Plasmid vector containing HLA-B*35:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:07 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:08 Genomic Plasmid Vector	PHLAG82512665	Plasmid vector containing HLA-B*35:01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:08 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:09 Genomic Plasmid Vector	PHLAG82512666	Plasmid vector containing HLA-B*35:01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:09 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:10 Genomic Plasmid Vector	PHLAG82512667	Plasmid vector containing HLA-B*35:01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:10 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:11 Genomic Plasmid Vector	PHLAG82512668	Plasmid vector containing HLA-B*35:01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:11 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:12 Genomic Plasmid Vector	PHLAG82512669	Plasmid vector containing HLA-B*35:01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:12 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:13 Genomic Plasmid Vector	PHLAG82512670	Plasmid vector containing HLA-B*35:01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:13 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:14 Genomic Plasmid Vector	PHLAG82512671	Plasmid vector containing HLA-B*35:01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:14 protein under different cellular conditions.	Inquiry

HLA-B*35:01:01:15 Genomic Plasmid Vector	PHLAG82512672	Plasmid vector containing HLA-B*35:01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:15 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:16 Genomic Plasmid Vector	PHLAG82512673	Plasmid vector containing HLA-B*35:01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:16 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:17 Genomic Plasmid Vector	PHLAG82512674	Plasmid vector containing HLA-B*35:01:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:17 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:18 Genomic Plasmid Vector	PHLAG82512675	Plasmid vector containing HLA-B*35:01:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:18 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:19 Genomic Plasmid Vector	PHLAG82512676	Plasmid vector containing HLA-B*35:01:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:19 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:20 Genomic Plasmid Vector	PHLAG82512677	Plasmid vector containing HLA-B*35:01:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:20 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:21 Genomic Plasmid Vector	PHLAG82512678	Plasmid vector containing HLA-B*35:01:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:21 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:22 Genomic Plasmid Vector	PHLAG82512679	Plasmid vector containing HLA-B*35:01:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:22 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:23 Genomic Plasmid Vector	PHLAG825126780	Plasmid vector containing HLA-B*35:01:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:23 protein under different cellular conditions.	Inquiry

HLA-B*35:01:01:24 Genomic Plasmid Vector	PHLAG82512681	Plasmid vector containing HLA-B*35:01:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:24 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:25 Genomic Plasmid Vector	PHLAG82512682	Plasmid vector containing HLA-B*35:01:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:25 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:26 Genomic Plasmid Vector	PHLAG82512683	Plasmid vector containing HLA-B*35:01:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:26 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:27 Genomic Plasmid Vector	PHLAG82512684	Plasmid vector containing HLA-B*35:01:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:27 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:28 Genomic Plasmid Vector	PHLAG82512685	Plasmid vector containing HLA-B*35:01:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:28 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:29 Genomic Plasmid Vector	PHLAG82512686	Plasmid vector containing HLA-B*35:01:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:29 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:30 Genomic Plasmid Vector	PHLAG82512687	Plasmid vector containing HLA-B*35:01:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:30 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:31 Genomic Plasmid Vector	PHLAG82512688	Plasmid vector containing HLA-B*35:01:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:31 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:32 Genomic Plasmid Vector	PHLAG82512689	Plasmid vector containing HLA-B*35:01:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:32 protein under different cellular conditions.	Inquiry

HLA-B*35:01:01:33 Genomic Plasmid Vector	PHLAG82512690	Plasmid vector containing HLA-B*35:01:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:33 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:34 Genomic Plasmid Vector	PHLAG82512691	Plasmid vector containing HLA-B*35:01:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:34 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:35 Genomic Plasmid Vector	PHLAG82512692	Plasmid vector containing HLA-B*35:01:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:35 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:36 Genomic Plasmid Vector	PHLAG82512693	Plasmid vector containing HLA-B*35:01:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:36 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:37 Genomic Plasmid Vector	PHLAG82512694	Plasmid vector containing HLA-B*35:01:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:37 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:38 Genomic Plasmid Vector	PHLAG82512695	Plasmid vector containing HLA-B*35:01:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:38 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:39 Genomic Plasmid Vector	PHLAG82512696	Plasmid vector containing HLA-B*35:01:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:39 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:40 Genomic Plasmid Vector	PHLAG82512697	Plasmid vector containing HLA-B*35:01:01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:40 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:41 Genomic Plasmid Vector	PHLAG82512698	Plasmid vector containing HLA-B*35:01:01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:41 protein under different cellular conditions.	Inquiry

HLA-B*35:01:01:42 Genomic Plasmid Vector	PHLAG82512699	Plasmid vector containing HLA-B*35:01:01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:42 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:43 Genomic Plasmid Vector	PHLAG82512700	Plasmid vector containing HLA-B*35:01:01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:43 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:44 Genomic Plasmid Vector	PHLAG82512701	Plasmid vector containing HLA-B*35:01:01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:44 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:45 Genomic Plasmid Vector	PHLAG82512702	Plasmid vector containing HLA-B*35:01:01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:45 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:46 Genomic Plasmid Vector	PHLAG82512703	Plasmid vector containing HLA-B*35:01:01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:46 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:47 Genomic Plasmid Vector	PHLAG82512704	Plasmid vector containing HLA-B*35:01:01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:47 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:48 Genomic Plasmid Vector	PHLAG82512705	Plasmid vector containing HLA-B*35:01:01:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:48 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:49 Genomic Plasmid Vector	PHLAG82512706	Plasmid vector containing HLA-B*35:01:01:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:49 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:50 Genomic Plasmid Vector	PHLAG82512707	Plasmid vector containing HLA-B*35:01:01:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:50 protein under different cellular conditions.	Inquiry

HLA-B*35:01:01:51 Genomic Plasmid Vector	PHLAG82512708	Plasmid vector containing HLA-B*35:01:01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:51 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:52 Genomic Plasmid Vector	PHLAG82512709	Plasmid vector containing HLA-B*35:01:01:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:52 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:53 Genomic Plasmid Vector	PHLAG825127110	Plasmid vector containing HLA-B*35:01:01:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:53 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:54 Genomic Plasmid Vector	PHLAG825127111	Plasmid vector containing HLA-B*35:01:01:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:54 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:55 Genomic Plasmid Vector	PHLAG825127112	Plasmid vector containing HLA-B*35:01:01:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:55 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:56 Genomic Plasmid Vector	PHLAG825127113	Plasmid vector containing HLA-B*35:01:01:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:56 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:57 Genomic Plasmid Vector	PHLAG825127114	Plasmid vector containing HLA-B*35:01:01:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:57 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:58 Genomic Plasmid Vector	PHLAG825127115	Plasmid vector containing HLA-B*35:01:01:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:58 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:59 Genomic Plasmid Vector	PHLAG825127116	Plasmid vector containing HLA-B*35:01:01:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:59 protein under different cellular conditions.	Inquiry

HLA-B*35:01:01:60 Genomic Plasmid Vector	PHLAG82512717	Plasmid vector containing HLA-B*35:01:01:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:60 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:61 Genomic Plasmid Vector	PHLAG82512718	Plasmid vector containing HLA-B*35:01:01:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:61 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:62 Genomic Plasmid Vector	PHLAG82512719	Plasmid vector containing HLA-B*35:01:01:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:62 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:63 Genomic Plasmid Vector	PHLAG825127220	Plasmid vector containing HLA-B*35:01:01:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:63 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:64 Genomic Plasmid Vector	PHLAG825127221	Plasmid vector containing HLA-B*35:01:01:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:64 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:65 Genomic Plasmid Vector	PHLAG825127222	Plasmid vector containing HLA-B*35:01:01:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:65 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:66 Genomic Plasmid Vector	PHLAG825127223	Plasmid vector containing HLA-B*35:01:01:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:66 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:67 Genomic Plasmid Vector	PHLAG825127224	Plasmid vector containing HLA-B*35:01:01:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:67 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:68 Genomic Plasmid Vector	PHLAG825127225	Plasmid vector containing HLA-B*35:01:01:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:68 protein under different cellular conditions.	Inquiry

HLA-B*35:01:01:69 Genomic Plasmid Vector	PHLAG82512726	Plasmid vector containing HLA-B*35:01:01:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:69 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:70 Genomic Plasmid Vector	PHLAG82512727	Plasmid vector containing HLA-B*35:01:01:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:70 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:71 Genomic Plasmid Vector	PHLAG82512728	Plasmid vector containing HLA-B*35:01:01:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:71 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:72 Genomic Plasmid Vector	PHLAG82512729	Plasmid vector containing HLA-B*35:01:01:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:72 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:73 Genomic Plasmid Vector	PHLAG82512730	Plasmid vector containing HLA-B*35:01:01:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:73 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:74 Genomic Plasmid Vector	PHLAG82512731	Plasmid vector containing HLA-B*35:01:01:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:74 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:75 Genomic Plasmid Vector	PHLAG82512732	Plasmid vector containing HLA-B*35:01:01:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:75 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:76 Genomic Plasmid Vector	PHLAG82512733	Plasmid vector containing HLA-B*35:01:01:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:76 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:77 Genomic Plasmid Vector	PHLAG82512734	Plasmid vector containing HLA-B*35:01:01:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:77 protein under different cellular conditions.	Inquiry

HLA-B*35:01:01:78 Genomic Plasmid Vector	PHLAG82512735	Plasmid vector containing HLA-B*35:01:01:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:78 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:79 Genomic Plasmid Vector	PHLAG82512736	Plasmid vector containing HLA-B*35:01:01:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:79 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:80 Genomic Plasmid Vector	PHLAG82512737	Plasmid vector containing HLA-B*35:01:01:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:80 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:81 Genomic Plasmid Vector	PHLAG82512738	Plasmid vector containing HLA-B*35:01:01:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:81 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:82 Genomic Plasmid Vector	PHLAG82512739	Plasmid vector containing HLA-B*35:01:01:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:82 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:83 Genomic Plasmid Vector	PHLAG82512740	Plasmid vector containing HLA-B*35:01:01:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:83 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:84 Genomic Plasmid Vector	PHLAG82512741	Plasmid vector containing HLA-B*35:01:01:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:84 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:85 Genomic Plasmid Vector	PHLAG82512742	Plasmid vector containing HLA-B*35:01:01:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:85 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:86 Genomic Plasmid Vector	PHLAG82512743	Plasmid vector containing HLA-B*35:01:01:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:86 protein under different cellular conditions.	Inquiry

HLA-B*35:01:01:87 Genomic Plasmid Vector	PHLAG82512744	Plasmid vector containing HLA-B*35:01:01:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:87 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:88 Genomic Plasmid Vector	PHLAG82512745	Plasmid vector containing HLA-B*35:01:01:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:88 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:89 Genomic Plasmid Vector	PHLAG82512746	Plasmid vector containing HLA-B*35:01:01:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:89 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:90 Genomic Plasmid Vector	PHLAG82512747	Plasmid vector containing HLA-B*35:01:01:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:90 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:91 Genomic Plasmid Vector	PHLAG82512748	Plasmid vector containing HLA-B*35:01:01:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:91 protein under different cellular conditions.	Inquiry
HLA-B*35:01:01:92 Genomic Plasmid Vector	PHLAG82512749	Plasmid vector containing HLA-B*35:01:01:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:01:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:01:92 protein under different cellular conditions.	Inquiry
HLA-B*35:01:02 Genomic Plasmid Vector	PHLAG825127500	Plasmid vector containing HLA-B*35:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:01:03 Genomic Plasmid Vector	PHLAG825127501	Plasmid vector containing HLA-B*35:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:03 protein under different cellular conditions.	Inquiry
HLA-B*35:01:04 Genomic Plasmid Vector	PHLAG825127502	Plasmid vector containing HLA-B*35:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:04 protein under different cellular conditions.	Inquiry

HLA-B*35:01:05 Genomic Plasmid Vector	PHLAG82512753	Plasmid vector containing HLA-B*35:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:05 protein under different cellular conditions.	Inquiry
HLA-B*35:01:06 Genomic Plasmid Vector	PHLAG82512754	Plasmid vector containing HLA-B*35:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:06 protein under different cellular conditions.	Inquiry
HLA-B*35:01:07 Genomic Plasmid Vector	PHLAG82512755	Plasmid vector containing HLA-B*35:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:07 protein under different cellular conditions.	Inquiry
HLA-B*35:01:08 Genomic Plasmid Vector	PHLAG82512756	Plasmid vector containing HLA-B*35:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:08 protein under different cellular conditions.	Inquiry
HLA-B*35:01:09 Genomic Plasmid Vector	PHLAG82512757	Plasmid vector containing HLA-B*35:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:09 protein under different cellular conditions.	Inquiry
HLA-B*35:01:10 Genomic Plasmid Vector	PHLAG82512758	Plasmid vector containing HLA-B*35:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:10 protein under different cellular conditions.	Inquiry
HLA-B*35:01:11 Genomic Plasmid Vector	PHLAG82512759	Plasmid vector containing HLA-B*35:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:11 protein under different cellular conditions.	Inquiry
HLA-B*35:01:12 Genomic Plasmid Vector	PHLAG82512760	Plasmid vector containing HLA-B*35:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:12 protein under different cellular conditions.	Inquiry
HLA-B*35:01:13 Genomic Plasmid Vector	PHLAG82512761	Plasmid vector containing HLA-B*35:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:13 protein under different cellular conditions.	Inquiry

HLA-B*35:01:14 Genomic Plasmid Vector	PHLAG82512762	Plasmid vector containing HLA-B*35:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:14 protein under different cellular conditions.	Inquiry
HLA-B*35:01:15 Genomic Plasmid Vector	PHLAG82512763	Plasmid vector containing HLA-B*35:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:15 protein under different cellular conditions.	Inquiry
HLA-B*35:01:16 Genomic Plasmid Vector	PHLAG82512764	Plasmid vector containing HLA-B*35:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:16 protein under different cellular conditions.	Inquiry
HLA-B*35:01:17 Genomic Plasmid Vector	PHLAG82512765	Plasmid vector containing HLA-B*35:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:17 protein under different cellular conditions.	Inquiry
HLA-B*35:01:18 Genomic Plasmid Vector	PHLAG82512766	Plasmid vector containing HLA-B*35:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:18 protein under different cellular conditions.	Inquiry
HLA-B*35:01:19 Genomic Plasmid Vector	PHLAG82512767	Plasmid vector containing HLA-B*35:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:19 protein under different cellular conditions.	Inquiry
HLA-B*35:01:20 Genomic Plasmid Vector	PHLAG82512768	Plasmid vector containing HLA-B*35:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:20 protein under different cellular conditions.	Inquiry
HLA-B*35:01:21 Genomic Plasmid Vector	PHLAG82512769	Plasmid vector containing HLA-B*35:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:21 protein under different cellular conditions.	Inquiry
HLA-B*35:01:22 Genomic Plasmid Vector	PHLAG82512770	Plasmid vector containing HLA-B*35:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:22 protein under different cellular conditions.	Inquiry

HLA-B*35:01:23 Genomic Plasmid Vector	PHLAG82512771	Plasmid vector containing HLA-B*35:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:23 protein under different cellular conditions.	Inquiry
HLA-B*35:01:24 Genomic Plasmid Vector	PHLAG82512772	Plasmid vector containing HLA-B*35:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:24 protein under different cellular conditions.	Inquiry
HLA-B*35:01:25 Genomic Plasmid Vector	PHLAG82512773	Plasmid vector containing HLA-B*35:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:25 protein under different cellular conditions.	Inquiry
HLA-B*35:01:26 Genomic Plasmid Vector	PHLAG82512774	Plasmid vector containing HLA-B*35:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:26 protein under different cellular conditions.	Inquiry
HLA-B*35:01:27 Genomic Plasmid Vector	PHLAG82512775	Plasmid vector containing HLA-B*35:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:27 protein under different cellular conditions.	Inquiry
HLA-B*35:01:28 Genomic Plasmid Vector	PHLAG82512776	Plasmid vector containing HLA-B*35:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:28 protein under different cellular conditions.	Inquiry
HLA-B*35:01:29 Genomic Plasmid Vector	PHLAG82512777	Plasmid vector containing HLA-B*35:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:29 protein under different cellular conditions.	Inquiry
HLA-B*35:01:30 Genomic Plasmid Vector	PHLAG82512778	Plasmid vector containing HLA-B*35:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:30 protein under different cellular conditions.	Inquiry
HLA-B*35:01:31 Genomic Plasmid Vector	PHLAG82512779	Plasmid vector containing HLA-B*35:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:31 protein under different cellular conditions.	Inquiry

HLA-B*35:01:32 Genomic Plasmid Vector	PHLAG82512780	Plasmid vector containing HLA-B*35:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:32 protein under different cellular conditions.	Inquiry
HLA-B*35:01:33 Genomic Plasmid Vector	PHLAG82512781	Plasmid vector containing HLA-B*35:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:33 protein under different cellular conditions.	Inquiry
HLA-B*35:01:34 Genomic Plasmid Vector	PHLAG82512782	Plasmid vector containing HLA-B*35:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:34 protein under different cellular conditions.	Inquiry
HLA-B*35:01:35 Genomic Plasmid Vector	PHLAG82512783	Plasmid vector containing HLA-B*35:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:35 protein under different cellular conditions.	Inquiry
HLA-B*35:01:36 Genomic Plasmid Vector	PHLAG82512784	Plasmid vector containing HLA-B*35:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:36 protein under different cellular conditions.	Inquiry
HLA-B*35:01:37 Genomic Plasmid Vector	PHLAG82512785	Plasmid vector containing HLA-B*35:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:37 protein under different cellular conditions.	Inquiry
HLA-B*35:01:38 Genomic Plasmid Vector	PHLAG82512786	Plasmid vector containing HLA-B*35:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:38 protein under different cellular conditions.	Inquiry
HLA-B*35:01:39 Genomic Plasmid Vector	PHLAG82512787	Plasmid vector containing HLA-B*35:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:39 protein under different cellular conditions.	Inquiry
HLA-B*35:01:40 Genomic Plasmid Vector	PHLAG82512788	Plasmid vector containing HLA-B*35:01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:40 protein under different cellular conditions.	Inquiry

HLA-B*35:01:41 Genomic Plasmid Vector	PHLAG82512789	Plasmid vector containing HLA-B*35:01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:41 protein under different cellular conditions.	Inquiry
HLA-B*35:01:42 Genomic Plasmid Vector	PHLAG825127900	Plasmid vector containing HLA-B*35:01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:42 protein under different cellular conditions.	Inquiry
HLA-B*35:01:43 Genomic Plasmid Vector	PHLAG825127911	Plasmid vector containing HLA-B*35:01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:43 protein under different cellular conditions.	Inquiry
HLA-B*35:01:44 Genomic Plasmid Vector	PHLAG825127922	Plasmid vector containing HLA-B*35:01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:44 protein under different cellular conditions.	Inquiry
HLA-B*35:01:45 Genomic Plasmid Vector	PHLAG825127933	Plasmid vector containing HLA-B*35:01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:45 protein under different cellular conditions.	Inquiry
HLA-B*35:01:46 Genomic Plasmid Vector	PHLAG825127944	Plasmid vector containing HLA-B*35:01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:46 protein under different cellular conditions.	Inquiry
HLA-B*35:01:47 Genomic Plasmid Vector	PHLAG825127955	Plasmid vector containing HLA-B*35:01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:47 protein under different cellular conditions.	Inquiry
HLA-B*35:01:48 Genomic Plasmid Vector	PHLAG825127966	Plasmid vector containing HLA-B*35:01:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:48 protein under different cellular conditions.	Inquiry
HLA-B*35:01:49 Genomic Plasmid Vector	PHLAG825127977	Plasmid vector containing HLA-B*35:01:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:49 protein under different cellular conditions.	Inquiry

HLA-B*35:01:50 Genomic Plasmid Vector	PHLAG82512798	Plasmid vector containing HLA-B*35:01:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:50 protein under different cellular conditions.	Inquiry
HLA-B*35:01:51 Genomic Plasmid Vector	PHLAG82512799	Plasmid vector containing HLA-B*35:01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:51 protein under different cellular conditions.	Inquiry
HLA-B*35:01:52 Genomic Plasmid Vector	PHLAG825128000	Plasmid vector containing HLA-B*35:01:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:52 protein under different cellular conditions.	Inquiry
HLA-B*35:01:53 Genomic Plasmid Vector	PHLAG825128001	Plasmid vector containing HLA-B*35:01:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:53 protein under different cellular conditions.	Inquiry
HLA-B*35:01:54 Genomic Plasmid Vector	PHLAG825128002	Plasmid vector containing HLA-B*35:01:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:54 protein under different cellular conditions.	Inquiry
HLA-B*35:01:55 Genomic Plasmid Vector	PHLAG825128003	Plasmid vector containing HLA-B*35:01:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:55 protein under different cellular conditions.	Inquiry
HLA-B*35:01:56 Genomic Plasmid Vector	PHLAG825128004	Plasmid vector containing HLA-B*35:01:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:56 protein under different cellular conditions.	Inquiry
HLA-B*35:01:57 Genomic Plasmid Vector	PHLAG825128005	Plasmid vector containing HLA-B*35:01:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:57 protein under different cellular conditions.	Inquiry
HLA-B*35:01:58 Genomic Plasmid Vector	PHLAG825128006	Plasmid vector containing HLA-B*35:01:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:58 protein under different cellular conditions.	Inquiry

HLA-B*35:01:59 Genomic Plasmid Vector	PHLAG82512807	Plasmid vector containing HLA-B*35:01:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:59 protein under different cellular conditions.	Inquiry
HLA-B*35:01:60 Genomic Plasmid Vector	PHLAG82512808	Plasmid vector containing HLA-B*35:01:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:60 protein under different cellular conditions.	Inquiry
HLA-B*35:01:62 Genomic Plasmid Vector	PHLAG82512809	Plasmid vector containing HLA-B*35:01:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:62 protein under different cellular conditions.	Inquiry
HLA-B*35:01:63 Genomic Plasmid Vector	PHLAG825128110	Plasmid vector containing HLA-B*35:01:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:63 protein under different cellular conditions.	Inquiry
HLA-B*35:01:64 Genomic Plasmid Vector	PHLAG825128111	Plasmid vector containing HLA-B*35:01:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:64 protein under different cellular conditions.	Inquiry
HLA-B*35:01:65 Genomic Plasmid Vector	PHLAG825128112	Plasmid vector containing HLA-B*35:01:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:65 protein under different cellular conditions.	Inquiry
HLA-B*35:01:66 Genomic Plasmid Vector	PHLAG825128113	Plasmid vector containing HLA-B*35:01:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:66 protein under different cellular conditions.	Inquiry
HLA-B*35:01:67 Genomic Plasmid Vector	PHLAG825128114	Plasmid vector containing HLA-B*35:01:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:67 protein under different cellular conditions.	Inquiry
HLA-B*35:01:68 Genomic Plasmid Vector	PHLAG825128115	Plasmid vector containing HLA-B*35:01:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:68 protein under different cellular conditions.	Inquiry

HLA-B*35:01:69 Genomic Plasmid Vector	PHLAG82512816	Plasmid vector containing HLA-B*35:01:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:69 protein under different cellular conditions.	Inquiry
HLA-B*35:01:70 Genomic Plasmid Vector	PHLAG82512817	Plasmid vector containing HLA-B*35:01:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:70 protein under different cellular conditions.	Inquiry
HLA-B*35:01:71 Genomic Plasmid Vector	PHLAG82512818	Plasmid vector containing HLA-B*35:01:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:71 protein under different cellular conditions.	Inquiry
HLA-B*35:01:72 Genomic Plasmid Vector	PHLAG82512819	Plasmid vector containing HLA-B*35:01:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:72 protein under different cellular conditions.	Inquiry
HLA-B*35:01:73 Genomic Plasmid Vector	PHLAG82512820	Plasmid vector containing HLA-B*35:01:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:73 protein under different cellular conditions.	Inquiry
HLA-B*35:01:74 Genomic Plasmid Vector	PHLAG82512821	Plasmid vector containing HLA-B*35:01:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:74 protein under different cellular conditions.	Inquiry
HLA-B*35:01:75 Genomic Plasmid Vector	PHLAG82512822	Plasmid vector containing HLA-B*35:01:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:75 protein under different cellular conditions.	Inquiry
HLA-B*35:01:76 Genomic Plasmid Vector	PHLAG82512823	Plasmid vector containing HLA-B*35:01:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:76 protein under different cellular conditions.	Inquiry
HLA-B*35:01:77 Genomic Plasmid Vector	PHLAG82512824	Plasmid vector containing HLA-B*35:01:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:77 protein under different cellular conditions.	Inquiry

HLA-B*35:01:78 Genomic Plasmid Vector	PHLAG82512825	Plasmid vector containing HLA-B*35:01:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:78 protein under different cellular conditions.	Inquiry
HLA-B*35:01:79 Genomic Plasmid Vector	PHLAG82512826	Plasmid vector containing HLA-B*35:01:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:79 protein under different cellular conditions.	Inquiry
HLA-B*35:01:80 Genomic Plasmid Vector	PHLAG82512827	Plasmid vector containing HLA-B*35:01:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:80 protein under different cellular conditions.	Inquiry
HLA-B*35:01:81 Genomic Plasmid Vector	PHLAG82512828	Plasmid vector containing HLA-B*35:01:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:81 protein under different cellular conditions.	Inquiry
HLA-B*35:01:82 Genomic Plasmid Vector	PHLAG82512829	Plasmid vector containing HLA-B*35:01:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:82 protein under different cellular conditions.	Inquiry
HLA-B*35:01:83 Genomic Plasmid Vector	PHLAG82512830	Plasmid vector containing HLA-B*35:01:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:83 protein under different cellular conditions.	Inquiry
HLA-B*35:01:84 Genomic Plasmid Vector	PHLAG82512831	Plasmid vector containing HLA-B*35:01:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:01:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:01:84 protein under different cellular conditions.	Inquiry
HLA-B*35:02:01:01 Genomic Plasmid Vector	PHLAG82512832	Plasmid vector containing HLA-B*35:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:02:01:02 Genomic Plasmid Vector	PHLAG82512833	Plasmid vector containing HLA-B*35:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:01:02 protein under different cellular conditions.	Inquiry

HLA-B*35:02:01:03 Genomic Plasmid Vector	PHLAG82512834	Plasmid vector containing HLA-B*35:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:01:03 protein under different cellular conditions.	Inquiry
HLA-B*35:02:01:04 Genomic Plasmid Vector	PHLAG82512835	Plasmid vector containing HLA-B*35:02:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:01:04 protein under different cellular conditions.	Inquiry
HLA-B*35:02:01:05 Genomic Plasmid Vector	PHLAG82512836	Plasmid vector containing HLA-B*35:02:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:01:05 protein under different cellular conditions.	Inquiry
HLA-B*35:02:01:06 Genomic Plasmid Vector	PHLAG82512837	Plasmid vector containing HLA-B*35:02:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:01:06 protein under different cellular conditions.	Inquiry
HLA-B*35:02:01:07 Genomic Plasmid Vector	PHLAG82512838	Plasmid vector containing HLA-B*35:02:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:01:07 protein under different cellular conditions.	Inquiry
HLA-B*35:02:01:08 Genomic Plasmid Vector	PHLAG82512839	Plasmid vector containing HLA-B*35:02:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:01:08 protein under different cellular conditions.	Inquiry
HLA-B*35:02:01:09 Genomic Plasmid Vector	PHLAG82512840	Plasmid vector containing HLA-B*35:02:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:01:09 protein under different cellular conditions.	Inquiry
HLA-B*35:02:01:10 Genomic Plasmid Vector	PHLAG82512841	Plasmid vector containing HLA-B*35:02:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:01:10 protein under different cellular conditions.	Inquiry
HLA-B*35:02:02 Genomic Plasmid Vector	PHLAG82512842	Plasmid vector containing HLA-B*35:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:02 protein under different cellular conditions.	Inquiry

HLA-B*35:02:03 Genomic Plasmid Vector	PHLAG82512843	Plasmid vector containing HLA-B*35:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:03 protein under different cellular conditions.	Inquiry
HLA-B*35:02:04 Genomic Plasmid Vector	PHLAG82512844	Plasmid vector containing HLA-B*35:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:04 protein under different cellular conditions.	Inquiry
HLA-B*35:02:05 Genomic Plasmid Vector	PHLAG82512845	Plasmid vector containing HLA-B*35:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:05 protein under different cellular conditions.	Inquiry
HLA-B*35:02:06 Genomic Plasmid Vector	PHLAG82512846	Plasmid vector containing HLA-B*35:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:06 protein under different cellular conditions.	Inquiry
HLA-B*35:02:07 Genomic Plasmid Vector	PHLAG82512847	Plasmid vector containing HLA-B*35:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:07 protein under different cellular conditions.	Inquiry
HLA-B*35:02:08 Genomic Plasmid Vector	PHLAG82512848	Plasmid vector containing HLA-B*35:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:08 protein under different cellular conditions.	Inquiry
HLA-B*35:02:09 Genomic Plasmid Vector	PHLAG82512849	Plasmid vector containing HLA-B*35:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:09 protein under different cellular conditions.	Inquiry
HLA-B*35:02:10 Genomic Plasmid Vector	PHLAG825128510	Plasmid vector containing HLA-B*35:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:10 protein under different cellular conditions.	Inquiry
HLA-B*35:02:11 Genomic Plasmid Vector	PHLAG825128511	Plasmid vector containing HLA-B*35:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:11 protein under different cellular conditions.	Inquiry

HLA-B*35:02:12 Genomic Plasmid Vector	PHLAG82512852	Plasmid vector containing HLA-B*35:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:12 protein under different cellular conditions.	Inquiry
HLA-B*35:02:13 Genomic Plasmid Vector	PHLAG82512853	Plasmid vector containing HLA-B*35:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:13 protein under different cellular conditions.	Inquiry
HLA-B*35:02:14 Genomic Plasmid Vector	PHLAG82512854	Plasmid vector containing HLA-B*35:02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:14 protein under different cellular conditions.	Inquiry
HLA-B*35:02:15 Genomic Plasmid Vector	PHLAG82512855	Plasmid vector containing HLA-B*35:02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:15 protein under different cellular conditions.	Inquiry
HLA-B*35:02:16 Genomic Plasmid Vector	PHLAG82512856	Plasmid vector containing HLA-B*35:02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:16 protein under different cellular conditions.	Inquiry
HLA-B*35:02:17 Genomic Plasmid Vector	PHLAG82512857	Plasmid vector containing HLA-B*35:02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:17 protein under different cellular conditions.	Inquiry
HLA-B*35:02:18 Genomic Plasmid Vector	PHLAG82512858	Plasmid vector containing HLA-B*35:02:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:18 protein under different cellular conditions.	Inquiry
HLA-B*35:02:19 Genomic Plasmid Vector	PHLAG82512859	Plasmid vector containing HLA-B*35:02:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:19 protein under different cellular conditions.	Inquiry
HLA-B*35:02:20 Genomic Plasmid Vector	PHLAG82512860	Plasmid vector containing HLA-B*35:02:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:20 protein under different cellular conditions.	Inquiry

HLA-B*35:02:21 Genomic Plasmid Vector	PHLAG82512861	Plasmid vector containing HLA-B*35:02:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:21 protein under different cellular conditions.	Inquiry
HLA-B*35:02:22 Genomic Plasmid Vector	PHLAG82512862	Plasmid vector containing HLA-B*35:02:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:22 protein under different cellular conditions.	Inquiry
HLA-B*35:02:23 Genomic Plasmid Vector	PHLAG82512863	Plasmid vector containing HLA-B*35:02:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:23 protein under different cellular conditions.	Inquiry
HLA-B*35:02:24 Genomic Plasmid Vector	PHLAG82512864	Plasmid vector containing HLA-B*35:02:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:02:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:02:24 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:01 Genomic Plasmid Vector	PHLAG82512865	Plasmid vector containing HLA-B*35:03:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:02 Genomic Plasmid Vector	PHLAG82512866	Plasmid vector containing HLA-B*35:03:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:03 Genomic Plasmid Vector	PHLAG82512867	Plasmid vector containing HLA-B*35:03:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:03 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:04 Genomic Plasmid Vector	PHLAG82512868	Plasmid vector containing HLA-B*35:03:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:04 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:05 Genomic Plasmid Vector	PHLAG82512869	Plasmid vector containing HLA-B*35:03:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:05 protein under different cellular conditions.	Inquiry

HLA-B*35:03:01:06 Genomic Plasmid Vector	PHLAG82512870	Plasmid vector containing HLA-B*35:03:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:06 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:07 Genomic Plasmid Vector	PHLAG82512871	Plasmid vector containing HLA-B*35:03:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:07 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:08 Genomic Plasmid Vector	PHLAG82512872	Plasmid vector containing HLA-B*35:03:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:08 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:09 Genomic Plasmid Vector	PHLAG82512873	Plasmid vector containing HLA-B*35:03:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:09 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:10 Genomic Plasmid Vector	PHLAG82512874	Plasmid vector containing HLA-B*35:03:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:10 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:11 Genomic Plasmid Vector	PHLAG82512875	Plasmid vector containing HLA-B*35:03:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:11 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:12 Genomic Plasmid Vector	PHLAG82512876	Plasmid vector containing HLA-B*35:03:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:12 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:13 Genomic Plasmid Vector	PHLAG82512877	Plasmid vector containing HLA-B*35:03:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:13 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:14 Genomic Plasmid Vector	PHLAG82512878	Plasmid vector containing HLA-B*35:03:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:14 protein under different cellular conditions.	Inquiry

HLA-B*35:03:01:15 Genomic Plasmid Vector	PHLAG82512879	Plasmid vector containing HLA-B*35:03:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:15 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:16 Genomic Plasmid Vector	PHLAG825128880	Plasmid vector containing HLA-B*35:03:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:16 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:17 Genomic Plasmid Vector	PHLAG825128881	Plasmid vector containing HLA-B*35:03:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:17 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:18 Genomic Plasmid Vector	PHLAG825128882	Plasmid vector containing HLA-B*35:03:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:18 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:19 Genomic Plasmid Vector	PHLAG825128883	Plasmid vector containing HLA-B*35:03:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:19 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:20 Genomic Plasmid Vector	PHLAG825128884	Plasmid vector containing HLA-B*35:03:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:20 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:21 Genomic Plasmid Vector	PHLAG825128885	Plasmid vector containing HLA-B*35:03:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:21 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:22 Genomic Plasmid Vector	PHLAG825128886	Plasmid vector containing HLA-B*35:03:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:22 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:23 Genomic Plasmid Vector	PHLAG825128887	Plasmid vector containing HLA-B*35:03:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:23 protein under different cellular conditions.	Inquiry

HLA-B*35:03:01:24 Genomic Plasmid Vector	PHLAG82512888	Plasmid vector containing HLA-B*35:03:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:24 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:25 Genomic Plasmid Vector	PHLAG82512889	Plasmid vector containing HLA-B*35:03:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:25 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:26 Genomic Plasmid Vector	PHLAG825128910	Plasmid vector containing HLA-B*35:03:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:26 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:27 Genomic Plasmid Vector	PHLAG825128911	Plasmid vector containing HLA-B*35:03:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:27 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:28 Genomic Plasmid Vector	PHLAG825128912	Plasmid vector containing HLA-B*35:03:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:28 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:29 Genomic Plasmid Vector	PHLAG825128913	Plasmid vector containing HLA-B*35:03:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:29 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:30 Genomic Plasmid Vector	PHLAG825128914	Plasmid vector containing HLA-B*35:03:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:30 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:31 Genomic Plasmid Vector	PHLAG825128915	Plasmid vector containing HLA-B*35:03:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:31 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:32 Genomic Plasmid Vector	PHLAG825128916	Plasmid vector containing HLA-B*35:03:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:32 protein under different cellular conditions.	Inquiry

HLA-B*35:03:01:33 Genomic Plasmid Vector	PHLAG82512897	Plasmid vector containing HLA-B*35:03:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:33 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:34 Genomic Plasmid Vector	PHLAG82512898	Plasmid vector containing HLA-B*35:03:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:34 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:35 Genomic Plasmid Vector	PHLAG82512899	Plasmid vector containing HLA-B*35:03:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:35 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:36 Genomic Plasmid Vector	PHLAG825129000	Plasmid vector containing HLA-B*35:03:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:36 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:37 Genomic Plasmid Vector	PHLAG825129001	Plasmid vector containing HLA-B*35:03:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:37 protein under different cellular conditions.	Inquiry
HLA-B*35:03:01:38 Genomic Plasmid Vector	PHLAG825129002	Plasmid vector containing HLA-B*35:03:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:01:38 protein under different cellular conditions.	Inquiry
HLA-B*35:03:02 Genomic Plasmid Vector	PHLAG825129003	Plasmid vector containing HLA-B*35:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:02 protein under different cellular conditions.	Inquiry
HLA-B*35:03:03 Genomic Plasmid Vector	PHLAG825129004	Plasmid vector containing HLA-B*35:03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:03 protein under different cellular conditions.	Inquiry
HLA-B*35:03:04 Genomic Plasmid Vector	PHLAG825129005	Plasmid vector containing HLA-B*35:03:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:04 protein under different cellular conditions.	Inquiry

HLA-B*35:03:05 Genomic Plasmid Vector	PHLAG82512906	Plasmid vector containing HLA-B*35:03:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:05 protein under different cellular conditions.	Inquiry
HLA-B*35:03:06 Genomic Plasmid Vector	PHLAG82512907	Plasmid vector containing HLA-B*35:03:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:06 protein under different cellular conditions.	Inquiry
HLA-B*35:03:07 Genomic Plasmid Vector	PHLAG82512908	Plasmid vector containing HLA-B*35:03:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:07 protein under different cellular conditions.	Inquiry
HLA-B*35:03:08 Genomic Plasmid Vector	PHLAG82512909	Plasmid vector containing HLA-B*35:03:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:08 protein under different cellular conditions.	Inquiry
HLA-B*35:03:09 Genomic Plasmid Vector	PHLAG82512910	Plasmid vector containing HLA-B*35:03:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:09 protein under different cellular conditions.	Inquiry
HLA-B*35:03:10 Genomic Plasmid Vector	PHLAG82512911	Plasmid vector containing HLA-B*35:03:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:10 protein under different cellular conditions.	Inquiry
HLA-B*35:03:11 Genomic Plasmid Vector	PHLAG82512912	Plasmid vector containing HLA-B*35:03:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:11 protein under different cellular conditions.	Inquiry
HLA-B*35:03:12 Genomic Plasmid Vector	PHLAG82512913	Plasmid vector containing HLA-B*35:03:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:12 protein under different cellular conditions.	Inquiry
HLA-B*35:03:13 Genomic Plasmid Vector	PHLAG82512914	Plasmid vector containing HLA-B*35:03:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:13 protein under different cellular conditions.	Inquiry

HLA-B*35:03:14 Genomic Plasmid Vector	PHLAG82512915	Plasmid vector containing HLA-B*35:03:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:14 protein under different cellular conditions.	Inquiry
HLA-B*35:03:15 Genomic Plasmid Vector	PHLAG82512916	Plasmid vector containing HLA-B*35:03:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:15 protein under different cellular conditions.	Inquiry
HLA-B*35:03:16 Genomic Plasmid Vector	PHLAG82512917	Plasmid vector containing HLA-B*35:03:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:16 protein under different cellular conditions.	Inquiry
HLA-B*35:03:17 Genomic Plasmid Vector	PHLAG82512918	Plasmid vector containing HLA-B*35:03:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:17 protein under different cellular conditions.	Inquiry
HLA-B*35:03:18 Genomic Plasmid Vector	PHLAG82512919	Plasmid vector containing HLA-B*35:03:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:18 protein under different cellular conditions.	Inquiry
HLA-B*35:03:19 Genomic Plasmid Vector	PHLAG82512920	Plasmid vector containing HLA-B*35:03:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:19 protein under different cellular conditions.	Inquiry
HLA-B*35:03:20 Genomic Plasmid Vector	PHLAG82512921	Plasmid vector containing HLA-B*35:03:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:20 protein under different cellular conditions.	Inquiry
HLA-B*35:03:21 Genomic Plasmid Vector	PHLAG82512922	Plasmid vector containing HLA-B*35:03:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:21 protein under different cellular conditions.	Inquiry
HLA-B*35:03:22 Genomic Plasmid Vector	PHLAG82512923	Plasmid vector containing HLA-B*35:03:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:22 protein under different cellular conditions.	Inquiry

HLA-B*35:03:23 Genomic Plasmid Vector	PHLAG82512924	Plasmid vector containing HLA-B*35:03:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:23 protein under different cellular conditions.	Inquiry
HLA-B*35:03:24 Genomic Plasmid Vector	PHLAG82512925	Plasmid vector containing HLA-B*35:03:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:24 protein under different cellular conditions.	Inquiry
HLA-B*35:03:25 Genomic Plasmid Vector	PHLAG82512926	Plasmid vector containing HLA-B*35:03:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:25 protein under different cellular conditions.	Inquiry
HLA-B*35:03:26 Genomic Plasmid Vector	PHLAG82512927	Plasmid vector containing HLA-B*35:03:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:26 protein under different cellular conditions.	Inquiry
HLA-B*35:03:27 Genomic Plasmid Vector	PHLAG82512928	Plasmid vector containing HLA-B*35:03:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:27 protein under different cellular conditions.	Inquiry
HLA-B*35:03:28 Genomic Plasmid Vector	PHLAG82512929	Plasmid vector containing HLA-B*35:03:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:28 protein under different cellular conditions.	Inquiry
HLA-B*35:03:29 Genomic Plasmid Vector	PHLAG82512930	Plasmid vector containing HLA-B*35:03:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:29 protein under different cellular conditions.	Inquiry
HLA-B*35:03:30 Genomic Plasmid Vector	PHLAG82512931	Plasmid vector containing HLA-B*35:03:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:30 protein under different cellular conditions.	Inquiry
HLA-B*35:03:31 Genomic Plasmid Vector	PHLAG82512932	Plasmid vector containing HLA-B*35:03:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:31 protein under different cellular conditions.	Inquiry

HLA-B*35:03:32 Genomic Plasmid Vector	PHLAG82512933	Plasmid vector containing HLA-B*35:03:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:32 protein under different cellular conditions.	Inquiry
HLA-B*35:03:33 Genomic Plasmid Vector	PHLAG82512934	Plasmid vector containing HLA-B*35:03:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:33 protein under different cellular conditions.	Inquiry
HLA-B*35:03:34 Genomic Plasmid Vector	PHLAG82512935	Plasmid vector containing HLA-B*35:03:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:34 protein under different cellular conditions.	Inquiry
HLA-B*35:03:35 Genomic Plasmid Vector	PHLAG82512936	Plasmid vector containing HLA-B*35:03:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:35 protein under different cellular conditions.	Inquiry
HLA-B*35:03:36 Genomic Plasmid Vector	PHLAG82512937	Plasmid vector containing HLA-B*35:03:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:36 protein under different cellular conditions.	Inquiry
HLA-B*35:03:37 Genomic Plasmid Vector	PHLAG82512938	Plasmid vector containing HLA-B*35:03:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:37 protein under different cellular conditions.	Inquiry
HLA-B*35:03:38 Genomic Plasmid Vector	PHLAG82512939	Plasmid vector containing HLA-B*35:03:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:38 protein under different cellular conditions.	Inquiry
HLA-B*35:03:39 Genomic Plasmid Vector	PHLAG825129400	Plasmid vector containing HLA-B*35:03:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:39 protein under different cellular conditions.	Inquiry
HLA-B*35:03:40 Genomic Plasmid Vector	PHLAG825129401	Plasmid vector containing HLA-B*35:03:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:40 protein under different cellular conditions.	Inquiry

HLA-B*35:03:41 Genomic Plasmid Vector	PHLAG82512942	Plasmid vector containing HLA-B*35:03:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:41 protein under different cellular conditions.	Inquiry
HLA-B*35:03:42 Genomic Plasmid Vector	PHLAG82512943	Plasmid vector containing HLA-B*35:03:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:42 protein under different cellular conditions.	Inquiry
HLA-B*35:03:43 Genomic Plasmid Vector	PHLAG82512944	Plasmid vector containing HLA-B*35:03:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:43 protein under different cellular conditions.	Inquiry
HLA-B*35:03:44 Genomic Plasmid Vector	PHLAG82512945	Plasmid vector containing HLA-B*35:03:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:44 protein under different cellular conditions.	Inquiry
HLA-B*35:03:45 Genomic Plasmid Vector	PHLAG82512946	Plasmid vector containing HLA-B*35:03:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:45 protein under different cellular conditions.	Inquiry
HLA-B*35:03:46 Genomic Plasmid Vector	PHLAG82512947	Plasmid vector containing HLA-B*35:03:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:03:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:03:46 protein under different cellular conditions.	Inquiry
HLA-B*35:04:01:01 Genomic Plasmid Vector	PHLAG82512948	Plasmid vector containing HLA-B*35:04:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:04:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:04:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:04:01:02 Genomic Plasmid Vector	PHLAG82512949	Plasmid vector containing HLA-B*35:04:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:04:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:04:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:04:02 Genomic Plasmid Vector	PHLAG82512950	Plasmid vector containing HLA-B*35:04:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:04:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:04:02 protein under different cellular conditions.	Inquiry

HLA-B*35:04:03 Genomic Plasmid Vector	PHLAG82512951	Plasmid vector containing HLA-B*35:04:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:04:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:04:03 protein under different cellular conditions.	Inquiry
HLA-B*35:05:01:01 Genomic Plasmid Vector	PHLAG82512952	Plasmid vector containing HLA-B*35:05:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:05:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:05:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:05:01:02 Genomic Plasmid Vector	PHLAG82512953	Plasmid vector containing HLA-B*35:05:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:05:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:05:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:05:01:03 Genomic Plasmid Vector	PHLAG82512954	Plasmid vector containing HLA-B*35:05:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:05:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:05:01:03 protein under different cellular conditions.	Inquiry
HLA-B*35:05:01:04 Genomic Plasmid Vector	PHLAG82512955	Plasmid vector containing HLA-B*35:05:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:05:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:05:01:04 protein under different cellular conditions.	Inquiry
HLA-B*35:05:01:05 Genomic Plasmid Vector	PHLAG82512956	Plasmid vector containing HLA-B*35:05:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:05:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:05:01:05 protein under different cellular conditions.	Inquiry
HLA-B*35:05:01:06 Genomic Plasmid Vector	PHLAG82512957	Plasmid vector containing HLA-B*35:05:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:05:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:05:01:06 protein under different cellular conditions.	Inquiry
HLA-B*35:05:02 Genomic Plasmid Vector	PHLAG82512958	Plasmid vector containing HLA-B*35:05:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:05:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:05:02 protein under different cellular conditions.	Inquiry
HLA-B*35:05:03 Genomic Plasmid Vector	PHLAG82512959	Plasmid vector containing HLA-B*35:05:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:05:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:05:03 protein under different cellular conditions.	Inquiry

HLA-B*35:05:04 Genomic Plasmid Vector	PHLAG82512960	Plasmid vector containing HLA-B*35:05:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:05:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:05:04 protein under different cellular conditions.	Inquiry
HLA-B*35:05:05 Genomic Plasmid Vector	PHLAG82512961	Plasmid vector containing HLA-B*35:05:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:05:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:05:05 protein under different cellular conditions.	Inquiry
HLA-B*35:05:06 Genomic Plasmid Vector	PHLAG82512962	Plasmid vector containing HLA-B*35:05:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:05:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:05:06 protein under different cellular conditions.	Inquiry
HLA-B*35:05:07 Genomic Plasmid Vector	PHLAG82512963	Plasmid vector containing HLA-B*35:05:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:05:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:05:07 protein under different cellular conditions.	Inquiry
HLA-B*35:06 Genomic Plasmid Vector	PHLAG82512964	Plasmid vector containing HLA-B*35:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:06 protein under different cellular conditions.	Inquiry
HLA-B*35:07 Genomic Plasmid Vector	PHLAG82512965	Plasmid vector containing HLA-B*35:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:07 protein under different cellular conditions.	Inquiry
HLA-B*35:08:01:01 Genomic Plasmid Vector	PHLAG82512966	Plasmid vector containing HLA-B*35:08:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:08:01:02 Genomic Plasmid Vector	PHLAG82512967	Plasmid vector containing HLA-B*35:08:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:08:01:03 Genomic Plasmid Vector	PHLAG82512968	Plasmid vector containing HLA-B*35:08:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:03 protein under different cellular conditions.	Inquiry

HLA-B*35:08:01:04 Genomic Plasmid Vector	PHLAG82512969	Plasmid vector containing HLA-B*35:08:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:04 protein under different cellular conditions.	Inquiry
HLA-B*35:08:01:05 Genomic Plasmid Vector	PHLAG82512970	Plasmid vector containing HLA-B*35:08:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:05 protein under different cellular conditions.	Inquiry
HLA-B*35:08:01:06 Genomic Plasmid Vector	PHLAG82512971	Plasmid vector containing HLA-B*35:08:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:06 protein under different cellular conditions.	Inquiry
HLA-B*35:08:01:07 Genomic Plasmid Vector	PHLAG82512972	Plasmid vector containing HLA-B*35:08:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:07 protein under different cellular conditions.	Inquiry
HLA-B*35:08:01:08 Genomic Plasmid Vector	PHLAG82512973	Plasmid vector containing HLA-B*35:08:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:08 protein under different cellular conditions.	Inquiry
HLA-B*35:08:01:09 Genomic Plasmid Vector	PHLAG82512974	Plasmid vector containing HLA-B*35:08:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:09 protein under different cellular conditions.	Inquiry
HLA-B*35:08:01:10 Genomic Plasmid Vector	PHLAG82512975	Plasmid vector containing HLA-B*35:08:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:10 protein under different cellular conditions.	Inquiry
HLA-B*35:08:01:11 Genomic Plasmid Vector	PHLAG82512976	Plasmid vector containing HLA-B*35:08:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:11 protein under different cellular conditions.	Inquiry
HLA-B*35:08:01:12 Genomic Plasmid Vector	PHLAG82512977	Plasmid vector containing HLA-B*35:08:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:12 protein under different cellular conditions.	Inquiry

HLA-B*35:08:01:13 Genomic Plasmid Vector	PHLAG82512978	Plasmid vector containing HLA-B*35:08:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:13 protein under different cellular conditions.	Inquiry
HLA-B*35:08:01:14 Genomic Plasmid Vector	PHLAG82512979	Plasmid vector containing HLA-B*35:08:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:01:14 protein under different cellular conditions.	Inquiry
HLA-B*35:08:02 Genomic Plasmid Vector	PHLAG82512980	Plasmid vector containing HLA-B*35:08:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:02 protein under different cellular conditions.	Inquiry
HLA-B*35:08:03 Genomic Plasmid Vector	PHLAG82512981	Plasmid vector containing HLA-B*35:08:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:03 protein under different cellular conditions.	Inquiry
HLA-B*35:08:04 Genomic Plasmid Vector	PHLAG82512982	Plasmid vector containing HLA-B*35:08:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:04 protein under different cellular conditions.	Inquiry
HLA-B*35:08:05 Genomic Plasmid Vector	PHLAG82512983	Plasmid vector containing HLA-B*35:08:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:05 protein under different cellular conditions.	Inquiry
HLA-B*35:08:06 Genomic Plasmid Vector	PHLAG82512984	Plasmid vector containing HLA-B*35:08:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:06 protein under different cellular conditions.	Inquiry
HLA-B*35:08:07 Genomic Plasmid Vector	PHLAG82512985	Plasmid vector containing HLA-B*35:08:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:07 protein under different cellular conditions.	Inquiry
HLA-B*35:08:08 Genomic Plasmid Vector	PHLAG82512986	Plasmid vector containing HLA-B*35:08:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:08 protein under different cellular conditions.	Inquiry

HLA-B*35:08:09 Genomic Plasmid Vector	PHLAG82512987	Plasmid vector containing HLA-B*35:08:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:09 protein under different cellular conditions.	Inquiry
HLA-B*35:08:10 Genomic Plasmid Vector	PHLAG82512988	Plasmid vector containing HLA-B*35:08:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:10 protein under different cellular conditions.	Inquiry
HLA-B*35:08:11 Genomic Plasmid Vector	PHLAG82512989	Plasmid vector containing HLA-B*35:08:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:11 protein under different cellular conditions.	Inquiry
HLA-B*35:08:12 Genomic Plasmid Vector	PHLAG82512990	Plasmid vector containing HLA-B*35:08:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:12 protein under different cellular conditions.	Inquiry
HLA-B*35:08:13 Genomic Plasmid Vector	PHLAG82512991	Plasmid vector containing HLA-B*35:08:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:13 protein under different cellular conditions.	Inquiry
HLA-B*35:08:14 Genomic Plasmid Vector	PHLAG82512992	Plasmid vector containing HLA-B*35:08:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:14 protein under different cellular conditions.	Inquiry
HLA-B*35:08:15 Genomic Plasmid Vector	PHLAG82512993	Plasmid vector containing HLA-B*35:08:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:15 protein under different cellular conditions.	Inquiry
HLA-B*35:08:16 Genomic Plasmid Vector	PHLAG82512994	Plasmid vector containing HLA-B*35:08:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:16 protein under different cellular conditions.	Inquiry
HLA-B*35:08:17 Genomic Plasmid Vector	PHLAG82512995	Plasmid vector containing HLA-B*35:08:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:08:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:08:17 protein under different cellular conditions.	Inquiry

HLA-B*35:09:01:01 Genomic Plasmid Vector	PHLAG82512996	Plasmid vector containing HLA-B*35:09:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:09:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:09:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:09:01:02 Genomic Plasmid Vector	PHLAG82512997	Plasmid vector containing HLA-B*35:09:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:09:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:09:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:09:02 Genomic Plasmid Vector	PHLAG82512998	Plasmid vector containing HLA-B*35:09:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:09:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:09:02 protein under different cellular conditions.	Inquiry
HLA-B*35:09:03 Genomic Plasmid Vector	PHLAG82512999	Plasmid vector containing HLA-B*35:09:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:09:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:09:03 protein under different cellular conditions.	Inquiry
HLA-B*35:09:04 Genomic Plasmid Vector	PHLAG825130000	Plasmid vector containing HLA-B*35:09:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:09:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:09:04 protein under different cellular conditions.	Inquiry
HLA-B*35:10 Genomic Plasmid Vector	PHLAG825130001	Plasmid vector containing HLA-B*35:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:10 protein under different cellular conditions.	Inquiry
HLA-B*35:100 Genomic Plasmid Vector	PHLAG825130002	Plasmid vector containing HLA-B*35:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:100 protein under different cellular conditions.	Inquiry
HLA-B*35:101:01 Genomic Plasmid Vector	PHLAG825130003	Plasmid vector containing HLA-B*35:101:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:101:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:101:01 protein under different cellular conditions.	Inquiry
HLA-B*35:101:02 Genomic Plasmid Vector	PHLAG825130004	Plasmid vector containing HLA-B*35:101:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:101:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:101:02 protein under different cellular conditions.	Inquiry

HLA-B*35:102 Genomic Plasmid Vector	PHLAG82513005	Plasmid vector containing HLA-B*35:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:102 protein under different cellular conditions.	Inquiry
HLA-B*35:103 Genomic Plasmid Vector	PHLAG82513006	Plasmid vector containing HLA-B*35:103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:103 protein under different cellular conditions.	Inquiry
HLA-B*35:104 Genomic Plasmid Vector	PHLAG82513007	Plasmid vector containing HLA-B*35:104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:104 protein under different cellular conditions.	Inquiry
HLA-B*35:105 Genomic Plasmid Vector	PHLAG82513008	Plasmid vector containing HLA-B*35:105 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:105 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:105 protein under different cellular conditions.	Inquiry
HLA-B*35:106 Genomic Plasmid Vector	PHLAG82513009	Plasmid vector containing HLA-B*35:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:106 protein under different cellular conditions.	Inquiry
HLA-B*35:107 Genomic Plasmid Vector	PHLAG82513010	Plasmid vector containing HLA-B*35:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:107 protein under different cellular conditions.	Inquiry
HLA-B*35:108:01 Genomic Plasmid Vector	PHLAG82513011	Plasmid vector containing HLA-B*35:108:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:108:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:108:01 protein under different cellular conditions.	Inquiry
HLA-B*35:108:02 Genomic Plasmid Vector	PHLAG82513012	Plasmid vector containing HLA-B*35:108:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:108:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:108:02 protein under different cellular conditions.	Inquiry
HLA-B*35:109 Genomic Plasmid Vector	PHLAG82513013	Plasmid vector containing HLA-B*35:109 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:109 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:109 protein under different cellular conditions.	Inquiry

HLA-B*35:11:01 Genomic Plasmid Vector	PHLAG82513014	Plasmid vector containing HLA-B*35:11:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:11:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:11:01 protein under different cellular conditions.	Inquiry
HLA-B*35:11:02 Genomic Plasmid Vector	PHLAG82513015	Plasmid vector containing HLA-B*35:11:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:11:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:11:02 protein under different cellular conditions.	Inquiry
HLA-B*35:11:03 Genomic Plasmid Vector	PHLAG82513016	Plasmid vector containing HLA-B*35:11:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:11:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:11:03 protein under different cellular conditions.	Inquiry
HLA-B*35:11:04 Genomic Plasmid Vector	PHLAG82513017	Plasmid vector containing HLA-B*35:11:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:11:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:11:04 protein under different cellular conditions.	Inquiry
HLA-B*35:110 Genomic Plasmid Vector	PHLAG82513018	Plasmid vector containing HLA-B*35:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:110 protein under different cellular conditions.	Inquiry
HLA-B*35:111 Genomic Plasmid Vector	PHLAG82513019	Plasmid vector containing HLA-B*35:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:111 protein under different cellular conditions.	Inquiry
HLA-B*35:112:01 Genomic Plasmid Vector	PHLAG82513020	Plasmid vector containing HLA-B*35:112:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:112:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:112:01 protein under different cellular conditions.	Inquiry
HLA-B*35:112:02 Genomic Plasmid Vector	PHLAG82513021	Plasmid vector containing HLA-B*35:112:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:112:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:112:02 protein under different cellular conditions.	Inquiry
HLA-B*35:113 Genomic Plasmid Vector	PHLAG82513022	Plasmid vector containing HLA-B*35:113 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:113 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:113 protein under different cellular conditions.	Inquiry

HLA-B*35:114 Genomic Plasmid Vector	PHLAG82513023	Plasmid vector containing HLA-B*35:114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:114 protein under different cellular conditions.	Inquiry
HLA-B*35:115 Genomic Plasmid Vector	PHLAG82513024	Plasmid vector containing HLA-B*35:115 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:115 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:115 protein under different cellular conditions.	Inquiry
HLA-B*35:116 Genomic Plasmid Vector	PHLAG82513025	Plasmid vector containing HLA-B*35:116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:116 protein under different cellular conditions.	Inquiry
HLA-B*35:117 Genomic Plasmid Vector	PHLAG82513026	Plasmid vector containing HLA-B*35:117 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:117 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:117 protein under different cellular conditions.	Inquiry
HLA-B*35:118 Genomic Plasmid Vector	PHLAG82513027	Plasmid vector containing HLA-B*35:118 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:118 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:118 protein under different cellular conditions.	Inquiry
HLA-B*35:119 Genomic Plasmid Vector	PHLAG82513028	Plasmid vector containing HLA-B*35:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:119 protein under different cellular conditions.	Inquiry
HLA-B*35:12:01:01 Genomic Plasmid Vector	PHLAG82513029	Plasmid vector containing HLA-B*35:12:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:12:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:12:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:12:01:02 Genomic Plasmid Vector	PHLAG82513030	Plasmid vector containing HLA-B*35:12:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:12:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:12:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:12:01:03 Genomic Plasmid Vector	PHLAG82513031	Plasmid vector containing HLA-B*35:12:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:12:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:12:01:03 protein under different cellular conditions.	Inquiry

HLA-B*35:12:01:04 Genomic Plasmid Vector	PHLAG82513032	Plasmid vector containing HLA-B*35:12:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:12:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:12:01:04 protein under different cellular conditions.	Inquiry
HLA-B*35:12:02 Genomic Plasmid Vector	PHLAG82513033	Plasmid vector containing HLA-B*35:12:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:12:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:12:02 protein under different cellular conditions.	Inquiry
HLA-B*35:12:03 Genomic Plasmid Vector	PHLAG82513034	Plasmid vector containing HLA-B*35:12:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:12:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:12:03 protein under different cellular conditions.	Inquiry
HLA-B*35:12:04 Genomic Plasmid Vector	PHLAG82513035	Plasmid vector containing HLA-B*35:12:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:12:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:12:04 protein under different cellular conditions.	Inquiry
HLA-B*35:120 Genomic Plasmid Vector	PHLAG82513036	Plasmid vector containing HLA-B*35:120 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:120 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:120 protein under different cellular conditions.	Inquiry
HLA-B*35:121 Genomic Plasmid Vector	PHLAG82513037	Plasmid vector containing HLA-B*35:121 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:121 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:121 protein under different cellular conditions.	Inquiry
HLA-B*35:122 Genomic Plasmid Vector	PHLAG82513038	Plasmid vector containing HLA-B*35:122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:122 protein under different cellular conditions.	Inquiry
HLA-B*35:123 Genomic Plasmid Vector	PHLAG82513039	Plasmid vector containing HLA-B*35:123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:123 protein under different cellular conditions.	Inquiry
HLA-B*35:124 Genomic Plasmid Vector	PHLAG82513040	Plasmid vector containing HLA-B*35:124 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:124 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:124 protein under different cellular conditions.	Inquiry

HLA-B*35:125 Genomic Plasmid Vector	PHLAG82513041	Plasmid vector containing HLA-B*35:125 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:125 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:125 protein under different cellular conditions.	Inquiry
HLA-B*35:126 Genomic Plasmid Vector	PHLAG82513042	Plasmid vector containing HLA-B*35:126 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:126 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:126 protein under different cellular conditions.	Inquiry
HLA-B*35:127 Genomic Plasmid Vector	PHLAG82513043	Plasmid vector containing HLA-B*35:127 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:127 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:127 protein under different cellular conditions.	Inquiry
HLA-B*35:128 Genomic Plasmid Vector	PHLAG82513044	Plasmid vector containing HLA-B*35:128 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:128 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:128 protein under different cellular conditions.	Inquiry
HLA-B*35:129N Genomic Plasmid Vector	PHLAG82513045	Plasmid vector containing HLA-B*35:129N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:129N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:129N protein under different cellular conditions.	Inquiry
HLA-B*35:13:01 Genomic Plasmid Vector	PHLAG82513046	Plasmid vector containing HLA-B*35:13:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:13:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:13:01 protein under different cellular conditions.	Inquiry
HLA-B*35:13:02 Genomic Plasmid Vector	PHLAG82513047	Plasmid vector containing HLA-B*35:13:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:13:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:13:02 protein under different cellular conditions.	Inquiry
HLA-B*35:13:03 Genomic Plasmid Vector	PHLAG82513048	Plasmid vector containing HLA-B*35:13:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:13:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:13:03 protein under different cellular conditions.	Inquiry
HLA-B*35:130N Genomic Plasmid Vector	PHLAG82513049	Plasmid vector containing HLA-B*35:130N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:130N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:130N protein under different cellular conditions.	Inquiry

HLA-B*35:131:01 Genomic Plasmid Vector	PHLAG82513050	Plasmid vector containing HLA-B*35:131:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:131:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:131:01 protein under different cellular conditions.	Inquiry
HLA-B*35:131:02 Genomic Plasmid Vector	PHLAG82513051	Plasmid vector containing HLA-B*35:131:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:131:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:131:02 protein under different cellular conditions.	Inquiry
HLA-B*35:132 Genomic Plasmid Vector	PHLAG82513052	Plasmid vector containing HLA-B*35:132 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:132 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:132 protein under different cellular conditions.	Inquiry
HLA-B*35:133 Genomic Plasmid Vector	PHLAG82513053	Plasmid vector containing HLA-B*35:133 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:133 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:133 protein under different cellular conditions.	Inquiry
HLA-B*35:134N Genomic Plasmid Vector	PHLAG82513054	Plasmid vector containing HLA-B*35:134N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:134N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:134N protein under different cellular conditions.	Inquiry
HLA-B*35:135 Genomic Plasmid Vector	PHLAG82513055	Plasmid vector containing HLA-B*35:135 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:135 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:135 protein under different cellular conditions.	Inquiry
HLA-B*35:136 Genomic Plasmid Vector	PHLAG82513056	Plasmid vector containing HLA-B*35:136 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:136 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:136 protein under different cellular conditions.	Inquiry
HLA-B*35:137 Genomic Plasmid Vector	PHLAG82513057	Plasmid vector containing HLA-B*35:137 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:137 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:137 protein under different cellular conditions.	Inquiry
HLA-B*35:138 Genomic Plasmid Vector	PHLAG82513058	Plasmid vector containing HLA-B*35:138 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:138 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:138 protein under different cellular conditions.	Inquiry

HLA-B*35:139 Genomic Plasmid Vector	PHLAG82513059	Plasmid vector containing HLA-B*35:139 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:139 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:139 protein under different cellular conditions.	Inquiry
HLA-B*35:14:01 Genomic Plasmid Vector	PHLAG825130600	Plasmid vector containing HLA-B*35:14:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:14:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:14:01 protein under different cellular conditions.	Inquiry
HLA-B*35:14:02 Genomic Plasmid Vector	PHLAG825130601	Plasmid vector containing HLA-B*35:14:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:14:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:14:02 protein under different cellular conditions.	Inquiry
HLA-B*35:14:03 Genomic Plasmid Vector	PHLAG825130602	Plasmid vector containing HLA-B*35:14:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:14:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:14:03 protein under different cellular conditions.	Inquiry
HLA-B*35:140 Genomic Plasmid Vector	PHLAG825130603	Plasmid vector containing HLA-B*35:140 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:140 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:140 protein under different cellular conditions.	Inquiry
HLA-B*35:141 Genomic Plasmid Vector	PHLAG825130604	Plasmid vector containing HLA-B*35:141 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:141 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:141 protein under different cellular conditions.	Inquiry
HLA-B*35:142 Genomic Plasmid Vector	PHLAG825130605	Plasmid vector containing HLA-B*35:142 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:142 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:142 protein under different cellular conditions.	Inquiry
HLA-B*35:143 Genomic Plasmid Vector	PHLAG825130606	Plasmid vector containing HLA-B*35:143 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:143 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:143 protein under different cellular conditions.	Inquiry
HLA-B*35:144 Genomic Plasmid Vector	PHLAG825130607	Plasmid vector containing HLA-B*35:144 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:144 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:144 protein under different cellular conditions.	Inquiry

HLA-B*35:145N Genomic Plasmid Vector	PHLAG82513068	Plasmid vector containing HLA-B*35:145N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:145N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:145N protein under different cellular conditions.	Inquiry
HLA-B*35:146 Genomic Plasmid Vector	PHLAG82513069	Plasmid vector containing HLA-B*35:146 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:146 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:146 protein under different cellular conditions.	Inquiry
HLA-B*35:147 Genomic Plasmid Vector	PHLAG82513070	Plasmid vector containing HLA-B*35:147 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:147 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:147 protein under different cellular conditions.	Inquiry
HLA-B*35:148 Genomic Plasmid Vector	PHLAG82513071	Plasmid vector containing HLA-B*35:148 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:148 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:148 protein under different cellular conditions.	Inquiry
HLA-B*35:149 Genomic Plasmid Vector	PHLAG82513072	Plasmid vector containing HLA-B*35:149 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:149 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:149 protein under different cellular conditions.	Inquiry
HLA-B*35:15:01 Genomic Plasmid Vector	PHLAG82513073	Plasmid vector containing HLA-B*35:15:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:15:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:15:01 protein under different cellular conditions.	Inquiry
HLA-B*35:15:02 Genomic Plasmid Vector	PHLAG82513074	Plasmid vector containing HLA-B*35:15:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:15:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:15:02 protein under different cellular conditions.	Inquiry
HLA-B*35:150:01 Genomic Plasmid Vector	PHLAG82513075	Plasmid vector containing HLA-B*35:150:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:150:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:150:01 protein under different cellular conditions.	Inquiry
HLA-B*35:150:02 Genomic Plasmid Vector	PHLAG82513076	Plasmid vector containing HLA-B*35:150:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:150:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:150:02 protein under different cellular conditions.	Inquiry

HLA-B*35:151:01 Genomic Plasmid Vector	PHLAG82513077	Plasmid vector containing HLA-B*35:151:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:151:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:151:01 protein under different cellular conditions.	Inquiry
HLA-B*35:151:02 Genomic Plasmid Vector	PHLAG82513078	Plasmid vector containing HLA-B*35:151:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:151:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:151:02 protein under different cellular conditions.	Inquiry
HLA-B*35:152 Genomic Plasmid Vector	PHLAG82513079	Plasmid vector containing HLA-B*35:152 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:152 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:152 protein under different cellular conditions.	Inquiry
HLA-B*35:153 Genomic Plasmid Vector	PHLAG825130810	Plasmid vector containing HLA-B*35:153 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:153 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:153 protein under different cellular conditions.	Inquiry
HLA-B*35:154 Genomic Plasmid Vector	PHLAG825130811	Plasmid vector containing HLA-B*35:154 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:154 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:154 protein under different cellular conditions.	Inquiry
HLA-B*35:155 Genomic Plasmid Vector	PHLAG825130812	Plasmid vector containing HLA-B*35:155 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:155 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:155 protein under different cellular conditions.	Inquiry
HLA-B*35:156 Genomic Plasmid Vector	PHLAG825130813	Plasmid vector containing HLA-B*35:156 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:156 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:156 protein under different cellular conditions.	Inquiry
HLA-B*35:157 Genomic Plasmid Vector	PHLAG825130814	Plasmid vector containing HLA-B*35:157 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:157 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:157 protein under different cellular conditions.	Inquiry
HLA-B*35:158 Genomic Plasmid Vector	PHLAG825130815	Plasmid vector containing HLA-B*35:158 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:158 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:158 protein under different cellular conditions.	Inquiry

HLA-B*35:159 Genomic Plasmid Vector	PHLAG82513086	Plasmid vector containing HLA-B*35:159 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:159 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:159 protein under different cellular conditions.	Inquiry
HLA-B*35:16 Genomic Plasmid Vector	PHLAG82513087	Plasmid vector containing HLA-B*35:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:16 protein under different cellular conditions.	Inquiry
HLA-B*35:160 Genomic Plasmid Vector	PHLAG82513088	Plasmid vector containing HLA-B*35:160 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:160 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:160 protein under different cellular conditions.	Inquiry
HLA-B*35:161 Genomic Plasmid Vector	PHLAG82513089	Plasmid vector containing HLA-B*35:161 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:161 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:161 protein under different cellular conditions.	Inquiry
HLA-B*35:162 Genomic Plasmid Vector	PHLAG82513090	Plasmid vector containing HLA-B*35:162 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:162 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:162 protein under different cellular conditions.	Inquiry
HLA-B*35:163 Genomic Plasmid Vector	PHLAG82513091	Plasmid vector containing HLA-B*35:163 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:163 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:163 protein under different cellular conditions.	Inquiry
HLA-B*35:164 Genomic Plasmid Vector	PHLAG82513092	Plasmid vector containing HLA-B*35:164 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:164 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:164 protein under different cellular conditions.	Inquiry
HLA-B*35:165N Genomic Plasmid Vector	PHLAG82513093	Plasmid vector containing HLA-B*35:165N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:165N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:165N protein under different cellular conditions.	Inquiry
HLA-B*35:166 Genomic Plasmid Vector	PHLAG82513094	Plasmid vector containing HLA-B*35:166 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:166 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:166 protein under different cellular conditions.	Inquiry

HLA-B*35:167 Genomic Plasmid Vector	PHLAG82513095	Plasmid vector containing HLA-B*35:167 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:167 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:167 protein under different cellular conditions.	Inquiry
HLA-B*35:168 Genomic Plasmid Vector	PHLAG82513096	Plasmid vector containing HLA-B*35:168 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:168 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:168 protein under different cellular conditions.	Inquiry
HLA-B*35:169 Genomic Plasmid Vector	PHLAG82513097	Plasmid vector containing HLA-B*35:169 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:169 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:169 protein under different cellular conditions.	Inquiry
HLA-B*35:17:01:01 Genomic Plasmid Vector	PHLAG82513098	Plasmid vector containing HLA-B*35:17:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:17:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:17:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:17:01:02 Genomic Plasmid Vector	PHLAG82513099	Plasmid vector containing HLA-B*35:17:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:17:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:17:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:17:01:03 Genomic Plasmid Vector	PHLAG825131000	Plasmid vector containing HLA-B*35:17:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:17:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:17:01:03 protein under different cellular conditions.	Inquiry
HLA-B*35:17:02 Genomic Plasmid Vector	PHLAG825131001	Plasmid vector containing HLA-B*35:17:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:17:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:17:02 protein under different cellular conditions.	Inquiry
HLA-B*35:17:03 Genomic Plasmid Vector	PHLAG825131002	Plasmid vector containing HLA-B*35:17:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:17:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:17:03 protein under different cellular conditions.	Inquiry
HLA-B*35:17:04 Genomic Plasmid Vector	PHLAG825131003	Plasmid vector containing HLA-B*35:17:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:17:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:17:04 protein under different cellular conditions.	Inquiry

HLA-B*35:17:05 Genomic Plasmid Vector	PHLAG82513104	Plasmid vector containing HLA-B*35:17:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:17:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:17:05 protein under different cellular conditions.	Inquiry
HLA-B*35:170 Genomic Plasmid Vector	PHLAG82513105	Plasmid vector containing HLA-B*35:170 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:170 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:170 protein under different cellular conditions.	Inquiry
HLA-B*35:171 Genomic Plasmid Vector	PHLAG82513106	Plasmid vector containing HLA-B*35:171 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:171 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:171 protein under different cellular conditions.	Inquiry
HLA-B*35:172 Genomic Plasmid Vector	PHLAG82513107	Plasmid vector containing HLA-B*35:172 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:172 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:172 protein under different cellular conditions.	Inquiry
HLA-B*35:173:01N Genomic Plasmid Vector	PHLAG82513108	Plasmid vector containing HLA-B*35:173:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:173:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:173:01N protein under different cellular conditions.	Inquiry
HLA-B*35:173:02N Genomic Plasmid Vector	PHLAG82513109	Plasmid vector containing HLA-B*35:173:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:173:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:173:02N protein under different cellular conditions.	Inquiry
HLA-B*35:174 Genomic Plasmid Vector	PHLAG82513110	Plasmid vector containing HLA-B*35:174 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:174 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:174 protein under different cellular conditions.	Inquiry
HLA-B*35:175 Genomic Plasmid Vector	PHLAG82513111	Plasmid vector containing HLA-B*35:175 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:175 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:175 protein under different cellular conditions.	Inquiry
HLA-B*35:176 Genomic Plasmid Vector	PHLAG82513112	Plasmid vector containing HLA-B*35:176 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:176 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:176 protein under different cellular conditions.	Inquiry

HLA-B*35:177 Genomic Plasmid Vector	PHLAG82513113	Plasmid vector containing HLA-B*35:177 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:177 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:177 protein under different cellular conditions.	Inquiry
HLA-B*35:178 Genomic Plasmid Vector	PHLAG82513114	Plasmid vector containing HLA-B*35:178 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:178 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:178 protein under different cellular conditions.	Inquiry
HLA-B*35:179 Genomic Plasmid Vector	PHLAG82513115	Plasmid vector containing HLA-B*35:179 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:179 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:179 protein under different cellular conditions.	Inquiry
HLA-B*35:18 Genomic Plasmid Vector	PHLAG82513116	Plasmid vector containing HLA-B*35:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:18 protein under different cellular conditions.	Inquiry
HLA-B*35:180 Genomic Plasmid Vector	PHLAG82513117	Plasmid vector containing HLA-B*35:180 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:180 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:180 protein under different cellular conditions.	Inquiry
HLA-B*35:181 Genomic Plasmid Vector	PHLAG82513118	Plasmid vector containing HLA-B*35:181 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:181 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:181 protein under different cellular conditions.	Inquiry
HLA-B*35:182 Genomic Plasmid Vector	PHLAG82513119	Plasmid vector containing HLA-B*35:182 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:182 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:182 protein under different cellular conditions.	Inquiry
HLA-B*35:183 Genomic Plasmid Vector	PHLAG82513120	Plasmid vector containing HLA-B*35:183 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:183 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:183 protein under different cellular conditions.	Inquiry
HLA-B*35:184 Genomic Plasmid Vector	PHLAG82513121	Plasmid vector containing HLA-B*35:184 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:184 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:184 protein under different cellular conditions.	Inquiry

HLA-B*35:185 Genomic Plasmid Vector	PHLAG8251312 2	Plasmid vector containing HLA-B*35:185 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:185 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:185 protein under different cellular conditions.	Inquiry
HLA-B*35:186 Genomic Plasmid Vector	PHLAG8251312 3	Plasmid vector containing HLA-B*35:186 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:186 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:186 protein under different cellular conditions.	Inquiry
HLA-B*35:187 Genomic Plasmid Vector	PHLAG8251312 4	Plasmid vector containing HLA-B*35:187 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:187 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:187 protein under different cellular conditions.	Inquiry
HLA-B*35:188 Genomic Plasmid Vector	PHLAG8251312 5	Plasmid vector containing HLA-B*35:188 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:188 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:188 protein under different cellular conditions.	Inquiry
HLA-B*35:189 Genomic Plasmid Vector	PHLAG8251312 6	Plasmid vector containing HLA-B*35:189 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:189 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:189 protein under different cellular conditions.	Inquiry
HLA-B*35:19 Genomic Plasmid Vector	PHLAG8251312 7	Plasmid vector containing HLA-B*35:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:19 protein under different cellular conditions.	Inquiry
HLA-B*35:190 Genomic Plasmid Vector	PHLAG8251312 8	Plasmid vector containing HLA-B*35:190 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:190 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:190 protein under different cellular conditions.	Inquiry
HLA-B*35:191 Genomic Plasmid Vector	PHLAG8251312 9	Plasmid vector containing HLA-B*35:191 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:191 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:191 protein under different cellular conditions.	Inquiry
HLA-B*35:192 Genomic Plasmid Vector	PHLAG8251313 0	Plasmid vector containing HLA-B*35:192 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:192 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:192 protein under different cellular conditions.	Inquiry

HLA-B*35:193 Genomic Plasmid Vector	PHLAG82513131	Plasmid vector containing HLA-B*35:193 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:193 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:193 protein under different cellular conditions.	Inquiry
HLA-B*35:194 Genomic Plasmid Vector	PHLAG82513132	Plasmid vector containing HLA-B*35:194 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:194 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:194 protein under different cellular conditions.	Inquiry
HLA-B*35:195 Genomic Plasmid Vector	PHLAG82513133	Plasmid vector containing HLA-B*35:195 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:195 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:195 protein under different cellular conditions.	Inquiry
HLA-B*35:196 Genomic Plasmid Vector	PHLAG82513134	Plasmid vector containing HLA-B*35:196 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:196 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:196 protein under different cellular conditions.	Inquiry
HLA-B*35:197 Genomic Plasmid Vector	PHLAG82513135	Plasmid vector containing HLA-B*35:197 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:197 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:197 protein under different cellular conditions.	Inquiry
HLA-B*35:198 Genomic Plasmid Vector	PHLAG82513136	Plasmid vector containing HLA-B*35:198 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:198 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:198 protein under different cellular conditions.	Inquiry
HLA-B*35:199 Genomic Plasmid Vector	PHLAG82513137	Plasmid vector containing HLA-B*35:199 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:199 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:199 protein under different cellular conditions.	Inquiry
HLA-B*35:20:01 Genomic Plasmid Vector	PHLAG82513138	Plasmid vector containing HLA-B*35:20:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:20:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:20:01 protein under different cellular conditions.	Inquiry
HLA-B*35:20:02 Genomic Plasmid Vector	PHLAG82513139	Plasmid vector containing HLA-B*35:20:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:20:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:20:02 protein under different cellular conditions.	Inquiry

HLA-B*35:20:03 Genomic Plasmid Vector	PHLAG82513140	Plasmid vector containing HLA-B*35:20:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:20:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:20:03 protein under different cellular conditions.	Inquiry
HLA-B*35:200 Genomic Plasmid Vector	PHLAG82513141	Plasmid vector containing HLA-B*35:200 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:200 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:200 protein under different cellular conditions.	Inquiry
HLA-B*35:201 Genomic Plasmid Vector	PHLAG82513142	Plasmid vector containing HLA-B*35:201 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:201 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:201 protein under different cellular conditions.	Inquiry
HLA-B*35:202 Genomic Plasmid Vector	PHLAG82513143	Plasmid vector containing HLA-B*35:202 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:202 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:202 protein under different cellular conditions.	Inquiry
HLA-B*35:203 Genomic Plasmid Vector	PHLAG82513144	Plasmid vector containing HLA-B*35:203 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:203 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:203 protein under different cellular conditions.	Inquiry
HLA-B*35:204 Genomic Plasmid Vector	PHLAG82513145	Plasmid vector containing HLA-B*35:204 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:204 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:204 protein under different cellular conditions.	Inquiry
HLA-B*35:205:01 Genomic Plasmid Vector	PHLAG82513146	Plasmid vector containing HLA-B*35:205:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:205:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:205:01 protein under different cellular conditions.	Inquiry
HLA-B*35:205:02 Genomic Plasmid Vector	PHLAG82513147	Plasmid vector containing HLA-B*35:205:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:205:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:205:02 protein under different cellular conditions.	Inquiry
HLA-B*35:205:03 Genomic Plasmid Vector	PHLAG82513148	Plasmid vector containing HLA-B*35:205:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:205:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:205:03 protein under different cellular conditions.	Inquiry

HLA-B*35:206 Genomic Plasmid Vector	PHLAG82513149	Plasmid vector containing HLA-B*35:206 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:206 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:206 protein under different cellular conditions.	Inquiry
HLA-B*35:207 Genomic Plasmid Vector	PHLAG825131510	Plasmid vector containing HLA-B*35:207 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:207 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:207 protein under different cellular conditions.	Inquiry
HLA-B*35:208:01 Genomic Plasmid Vector	PHLAG825131511	Plasmid vector containing HLA-B*35:208:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:208:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:208:01 protein under different cellular conditions.	Inquiry
HLA-B*35:208:02 Genomic Plasmid Vector	PHLAG825131512	Plasmid vector containing HLA-B*35:208:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:208:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:208:02 protein under different cellular conditions.	Inquiry
HLA-B*35:209 Genomic Plasmid Vector	PHLAG825131513	Plasmid vector containing HLA-B*35:209 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:209 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:209 protein under different cellular conditions.	Inquiry
HLA-B*35:21 Genomic Plasmid Vector	PHLAG825131514	Plasmid vector containing HLA-B*35:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:21 protein under different cellular conditions.	Inquiry
HLA-B*35:210 Genomic Plasmid Vector	PHLAG825131515	Plasmid vector containing HLA-B*35:210 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:210 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:210 protein under different cellular conditions.	Inquiry
HLA-B*35:211 Genomic Plasmid Vector	PHLAG825131516	Plasmid vector containing HLA-B*35:211 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:211 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:211 protein under different cellular conditions.	Inquiry
HLA-B*35:212 Genomic Plasmid Vector	PHLAG825131517	Plasmid vector containing HLA-B*35:212 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:212 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:212 protein under different cellular conditions.	Inquiry

HLA-B*35:213 Genomic Plasmid Vector	PHLAG82513158	Plasmid vector containing HLA-B*35:213 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:213 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:213 protein under different cellular conditions.	Inquiry
HLA-B*35:214 Genomic Plasmid Vector	PHLAG82513159	Plasmid vector containing HLA-B*35:214 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:214 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:214 protein under different cellular conditions.	Inquiry
HLA-B*35:215:01 Genomic Plasmid Vector	PHLAG825131610	Plasmid vector containing HLA-B*35:215:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:215:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:215:01 protein under different cellular conditions.	Inquiry
HLA-B*35:215:02 Genomic Plasmid Vector	PHLAG825131611	Plasmid vector containing HLA-B*35:215:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:215:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:215:02 protein under different cellular conditions.	Inquiry
HLA-B*35:216N Genomic Plasmid Vector	PHLAG825131612	Plasmid vector containing HLA-B*35:216N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:216N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:216N protein under different cellular conditions.	Inquiry
HLA-B*35:217 Genomic Plasmid Vector	PHLAG825131613	Plasmid vector containing HLA-B*35:217 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:217 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:217 protein under different cellular conditions.	Inquiry
HLA-B*35:218 Genomic Plasmid Vector	PHLAG825131614	Plasmid vector containing HLA-B*35:218 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:218 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:218 protein under different cellular conditions.	Inquiry
HLA-B*35:219 Genomic Plasmid Vector	PHLAG825131615	Plasmid vector containing HLA-B*35:219 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:219 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:219 protein under different cellular conditions.	Inquiry
HLA-B*35:22:01:01 Genomic Plasmid Vector	PHLAG825131616	Plasmid vector containing HLA-B*35:22:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:22:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:22:01:01 protein under different cellular conditions.	Inquiry

HLA-B*35:22:01:02 Genomic Plasmid Vector	PHLAG82513167	Plasmid vector containing HLA-B*35:22:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:22:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:22:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:220 Genomic Plasmid Vector	PHLAG82513168	Plasmid vector containing HLA-B*35:220 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:220 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:220 protein under different cellular conditions.	Inquiry
HLA-B*35:221 Genomic Plasmid Vector	PHLAG82513169	Plasmid vector containing HLA-B*35:221 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:221 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:221 protein under different cellular conditions.	Inquiry
HLA-B*35:222 Genomic Plasmid Vector	PHLAG82513170	Plasmid vector containing HLA-B*35:222 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:222 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:222 protein under different cellular conditions.	Inquiry
HLA-B*35:223 Genomic Plasmid Vector	PHLAG82513171	Plasmid vector containing HLA-B*35:223 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:223 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:223 protein under different cellular conditions.	Inquiry
HLA-B*35:224 Genomic Plasmid Vector	PHLAG82513172	Plasmid vector containing HLA-B*35:224 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:224 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:224 protein under different cellular conditions.	Inquiry
HLA-B*35:225 Genomic Plasmid Vector	PHLAG82513173	Plasmid vector containing HLA-B*35:225 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:225 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:225 protein under different cellular conditions.	Inquiry
HLA-B*35:226 Genomic Plasmid Vector	PHLAG82513174	Plasmid vector containing HLA-B*35:226 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:226 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:226 protein under different cellular conditions.	Inquiry
HLA-B*35:227 Genomic Plasmid Vector	PHLAG82513175	Plasmid vector containing HLA-B*35:227 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:227 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:227 protein under different cellular conditions.	Inquiry

HLA-B*35:228 Genomic Plasmid Vector	PHLAG82513176	Plasmid vector containing HLA-B*35:228 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:228 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:228 protein under different cellular conditions.	Inquiry
HLA-B*35:229 Genomic Plasmid Vector	PHLAG82513177	Plasmid vector containing HLA-B*35:229 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:229 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:229 protein under different cellular conditions.	Inquiry
HLA-B*35:23 Genomic Plasmid Vector	PHLAG82513178	Plasmid vector containing HLA-B*35:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:23 protein under different cellular conditions.	Inquiry
HLA-B*35:230 Genomic Plasmid Vector	PHLAG82513179	Plasmid vector containing HLA-B*35:230 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:230 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:230 protein under different cellular conditions.	Inquiry
HLA-B*35:231 Genomic Plasmid Vector	PHLAG82513180	Plasmid vector containing HLA-B*35:231 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:231 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:231 protein under different cellular conditions.	Inquiry
HLA-B*35:232 Genomic Plasmid Vector	PHLAG82513181	Plasmid vector containing HLA-B*35:232 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:232 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:232 protein under different cellular conditions.	Inquiry
HLA-B*35:233 Genomic Plasmid Vector	PHLAG82513182	Plasmid vector containing HLA-B*35:233 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:233 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:233 protein under different cellular conditions.	Inquiry
HLA-B*35:234 Genomic Plasmid Vector	PHLAG82513183	Plasmid vector containing HLA-B*35:234 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:234 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:234 protein under different cellular conditions.	Inquiry
HLA-B*35:235 Genomic Plasmid Vector	PHLAG82513184	Plasmid vector containing HLA-B*35:235 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:235 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:235 protein under different cellular conditions.	Inquiry

HLA-B*35:236 Genomic Plasmid Vector	PHLAG82513185	Plasmid vector containing HLA-B*35:236 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:236 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:236 protein under different cellular conditions.	Inquiry
HLA-B*35:237 Genomic Plasmid Vector	PHLAG82513186	Plasmid vector containing HLA-B*35:237 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:237 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:237 protein under different cellular conditions.	Inquiry
HLA-B*35:238 Genomic Plasmid Vector	PHLAG82513187	Plasmid vector containing HLA-B*35:238 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:238 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:238 protein under different cellular conditions.	Inquiry
HLA-B*35:239 Genomic Plasmid Vector	PHLAG82513188	Plasmid vector containing HLA-B*35:239 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:239 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:239 protein under different cellular conditions.	Inquiry
HLA-B*35:24:01 Genomic Plasmid Vector	PHLAG82513189	Plasmid vector containing HLA-B*35:24:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:24:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:24:01 protein under different cellular conditions.	Inquiry
HLA-B*35:24:02 Genomic Plasmid Vector	PHLAG82513190	Plasmid vector containing HLA-B*35:24:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:24:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:24:02 protein under different cellular conditions.	Inquiry
HLA-B*35:240 Genomic Plasmid Vector	PHLAG82513191	Plasmid vector containing HLA-B*35:240 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:240 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:240 protein under different cellular conditions.	Inquiry
HLA-B*35:241 Genomic Plasmid Vector	PHLAG82513192	Plasmid vector containing HLA-B*35:241 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:241 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:241 protein under different cellular conditions.	Inquiry
HLA-B*35:242 Genomic Plasmid Vector	PHLAG82513193	Plasmid vector containing HLA-B*35:242 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:242 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:242 protein under different cellular conditions.	Inquiry

HLA-B*35:243 Genomic Plasmid Vector	PHLAG82513194	Plasmid vector containing HLA-B*35:243 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:243 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:243 protein under different cellular conditions.	Inquiry
HLA-B*35:244 Genomic Plasmid Vector	PHLAG82513195	Plasmid vector containing HLA-B*35:244 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:244 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:244 protein under different cellular conditions.	Inquiry
HLA-B*35:245 Genomic Plasmid Vector	PHLAG82513196	Plasmid vector containing HLA-B*35:245 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:245 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:245 protein under different cellular conditions.	Inquiry
HLA-B*35:246 Genomic Plasmid Vector	PHLAG82513197	Plasmid vector containing HLA-B*35:246 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:246 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:246 protein under different cellular conditions.	Inquiry
HLA-B*35:247:01 Genomic Plasmid Vector	PHLAG82513198	Plasmid vector containing HLA-B*35:247:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:247:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:247:01 protein under different cellular conditions.	Inquiry
HLA-B*35:247:02 Genomic Plasmid Vector	PHLAG82513199	Plasmid vector containing HLA-B*35:247:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:247:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:247:02 protein under different cellular conditions.	Inquiry
HLA-B*35:248 Genomic Plasmid Vector	PHLAG825132000	Plasmid vector containing HLA-B*35:248 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:248 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:248 protein under different cellular conditions.	Inquiry
HLA-B*35:249 Genomic Plasmid Vector	PHLAG825132001	Plasmid vector containing HLA-B*35:249 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:249 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:249 protein under different cellular conditions.	Inquiry
HLA-B*35:25 Genomic Plasmid Vector	PHLAG825132002	Plasmid vector containing HLA-B*35:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:25 protein under different cellular conditions.	Inquiry

HLA-B*35:250 Genomic Plasmid Vector	PHLAG82513203	Plasmid vector containing HLA-B*35:250 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:250 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:250 protein under different cellular conditions.	Inquiry
HLA-B*35:251:01 Genomic Plasmid Vector	PHLAG82513204	Plasmid vector containing HLA-B*35:251:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:251:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:251:01 protein under different cellular conditions.	Inquiry
HLA-B*35:251:02 Genomic Plasmid Vector	PHLAG82513205	Plasmid vector containing HLA-B*35:251:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:251:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:251:02 protein under different cellular conditions.	Inquiry
HLA-B*35:252 Genomic Plasmid Vector	PHLAG82513206	Plasmid vector containing HLA-B*35:252 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:252 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:252 protein under different cellular conditions.	Inquiry
HLA-B*35:253 Genomic Plasmid Vector	PHLAG82513207	Plasmid vector containing HLA-B*35:253 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:253 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:253 protein under different cellular conditions.	Inquiry
HLA-B*35:254 Genomic Plasmid Vector	PHLAG82513208	Plasmid vector containing HLA-B*35:254 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:254 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:254 protein under different cellular conditions.	Inquiry
HLA-B*35:255 Genomic Plasmid Vector	PHLAG82513209	Plasmid vector containing HLA-B*35:255 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:255 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:255 protein under different cellular conditions.	Inquiry
HLA-B*35:256 Genomic Plasmid Vector	PHLAG825132110	Plasmid vector containing HLA-B*35:256 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:256 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:256 protein under different cellular conditions.	Inquiry
HLA-B*35:257 Genomic Plasmid Vector	PHLAG825132111	Plasmid vector containing HLA-B*35:257 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:257 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:257 protein under different cellular conditions.	Inquiry

HLA-B*35:258 Genomic Plasmid Vector	PHLAG82513212	Plasmid vector containing HLA-B*35:258 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:258 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:258 protein under different cellular conditions.	Inquiry
HLA-B*35:259 Genomic Plasmid Vector	PHLAG82513213	Plasmid vector containing HLA-B*35:259 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:259 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:259 protein under different cellular conditions.	Inquiry
HLA-B*35:26 Genomic Plasmid Vector	PHLAG82513214	Plasmid vector containing HLA-B*35:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:26 protein under different cellular conditions.	Inquiry
HLA-B*35:260 Genomic Plasmid Vector	PHLAG82513215	Plasmid vector containing HLA-B*35:260 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:260 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:260 protein under different cellular conditions.	Inquiry
HLA-B*35:261 Genomic Plasmid Vector	PHLAG82513216	Plasmid vector containing HLA-B*35:261 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:261 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:261 protein under different cellular conditions.	Inquiry
HLA-B*35:262 Genomic Plasmid Vector	PHLAG82513217	Plasmid vector containing HLA-B*35:262 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:262 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:262 protein under different cellular conditions.	Inquiry
HLA-B*35:263 Genomic Plasmid Vector	PHLAG82513218	Plasmid vector containing HLA-B*35:263 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:263 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:263 protein under different cellular conditions.	Inquiry
HLA-B*35:264 Genomic Plasmid Vector	PHLAG82513219	Plasmid vector containing HLA-B*35:264 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:264 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:264 protein under different cellular conditions.	Inquiry
HLA-B*35:265 Genomic Plasmid Vector	PHLAG82513220	Plasmid vector containing HLA-B*35:265 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:265 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:265 protein under different cellular conditions.	Inquiry

HLA-B*35:266 Genomic Plasmid Vector	PHLAG82513221	Plasmid vector containing HLA-B*35:266 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:266 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:266 protein under different cellular conditions.	Inquiry
HLA-B*35:267 Genomic Plasmid Vector	PHLAG82513222	Plasmid vector containing HLA-B*35:267 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:267 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:267 protein under different cellular conditions.	Inquiry
HLA-B*35:268 Genomic Plasmid Vector	PHLAG82513223	Plasmid vector containing HLA-B*35:268 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:268 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:268 protein under different cellular conditions.	Inquiry
HLA-B*35:269 Genomic Plasmid Vector	PHLAG82513224	Plasmid vector containing HLA-B*35:269 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:269 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:269 protein under different cellular conditions.	Inquiry
HLA-B*35:27 Genomic Plasmid Vector	PHLAG82513225	Plasmid vector containing HLA-B*35:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:27 protein under different cellular conditions.	Inquiry
HLA-B*35:270 Genomic Plasmid Vector	PHLAG82513226	Plasmid vector containing HLA-B*35:270 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:270 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:270 protein under different cellular conditions.	Inquiry
HLA-B*35:271 Genomic Plasmid Vector	PHLAG82513227	Plasmid vector containing HLA-B*35:271 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:271 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:271 protein under different cellular conditions.	Inquiry
HLA-B*35:272 Genomic Plasmid Vector	PHLAG82513228	Plasmid vector containing HLA-B*35:272 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:272 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:272 protein under different cellular conditions.	Inquiry
HLA-B*35:273 Genomic Plasmid Vector	PHLAG82513229	Plasmid vector containing HLA-B*35:273 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:273 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:273 protein under different cellular conditions.	Inquiry

HLA-B*35:274 Genomic Plasmid Vector	PHLAG825132330	Plasmid vector containing HLA-B*35:274 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:274 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:274 protein under different cellular conditions.	Inquiry
HLA-B*35:275 Genomic Plasmid Vector	PHLAG825132331	Plasmid vector containing HLA-B*35:275 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:275 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:275 protein under different cellular conditions.	Inquiry
HLA-B*35:276 Genomic Plasmid Vector	PHLAG825132332	Plasmid vector containing HLA-B*35:276 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:276 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:276 protein under different cellular conditions.	Inquiry
HLA-B*35:277 Genomic Plasmid Vector	PHLAG825132333	Plasmid vector containing HLA-B*35:277 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:277 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:277 protein under different cellular conditions.	Inquiry
HLA-B*35:278 Genomic Plasmid Vector	PHLAG825132334	Plasmid vector containing HLA-B*35:278 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:278 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:278 protein under different cellular conditions.	Inquiry
HLA-B*35:279 Genomic Plasmid Vector	PHLAG825132335	Plasmid vector containing HLA-B*35:279 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:279 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:279 protein under different cellular conditions.	Inquiry
HLA-B*35:28:01:01 Genomic Plasmid Vector	PHLAG825132336	Plasmid vector containing HLA-B*35:28:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:28:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:28:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:28:01:02 Genomic Plasmid Vector	PHLAG825132337	Plasmid vector containing HLA-B*35:28:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:28:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:28:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:28:01:03 Genomic Plasmid Vector	PHLAG825132338	Plasmid vector containing HLA-B*35:28:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:28:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:28:01:03 protein under different cellular conditions.	Inquiry

HLA-B*35:280 Genomic Plasmid Vector	PHLAG82513239	Plasmid vector containing HLA-B*35:280 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:280 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:280 protein under different cellular conditions.	Inquiry
HLA-B*35:281 Genomic Plasmid Vector	PHLAG825132400	Plasmid vector containing HLA-B*35:281 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:281 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:281 protein under different cellular conditions.	Inquiry
HLA-B*35:282 Genomic Plasmid Vector	PHLAG825132401	Plasmid vector containing HLA-B*35:282 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:282 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:282 protein under different cellular conditions.	Inquiry
HLA-B*35:283 Genomic Plasmid Vector	PHLAG825132402	Plasmid vector containing HLA-B*35:283 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:283 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:283 protein under different cellular conditions.	Inquiry
HLA-B*35:284 Genomic Plasmid Vector	PHLAG825132403	Plasmid vector containing HLA-B*35:284 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:284 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:284 protein under different cellular conditions.	Inquiry
HLA-B*35:285 Genomic Plasmid Vector	PHLAG825132404	Plasmid vector containing HLA-B*35:285 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:285 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:285 protein under different cellular conditions.	Inquiry
HLA-B*35:286 Genomic Plasmid Vector	PHLAG825132405	Plasmid vector containing HLA-B*35:286 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:286 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:286 protein under different cellular conditions.	Inquiry
HLA-B*35:287 Genomic Plasmid Vector	PHLAG825132406	Plasmid vector containing HLA-B*35:287 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:287 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:287 protein under different cellular conditions.	Inquiry
HLA-B*35:288 Genomic Plasmid Vector	PHLAG825132407	Plasmid vector containing HLA-B*35:288 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:288 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:288 protein under different cellular conditions.	Inquiry

HLA-B*35:289 Genomic Plasmid Vector	PHLAG82513248	Plasmid vector containing HLA-B*35:289 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:289 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:289 protein under different cellular conditions.	Inquiry
HLA-B*35:29:01 Genomic Plasmid Vector	PHLAG82513249	Plasmid vector containing HLA-B*35:29:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:29:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:29:01 protein under different cellular conditions.	Inquiry
HLA-B*35:29:02 Genomic Plasmid Vector	PHLAG82513250	Plasmid vector containing HLA-B*35:29:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:29:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:29:02 protein under different cellular conditions.	Inquiry
HLA-B*35:29:03 Genomic Plasmid Vector	PHLAG82513251	Plasmid vector containing HLA-B*35:29:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:29:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:29:03 protein under different cellular conditions.	Inquiry
HLA-B*35:290 Genomic Plasmid Vector	PHLAG82513252	Plasmid vector containing HLA-B*35:290 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:290 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:290 protein under different cellular conditions.	Inquiry
HLA-B*35:291 Genomic Plasmid Vector	PHLAG82513253	Plasmid vector containing HLA-B*35:291 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:291 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:291 protein under different cellular conditions.	Inquiry
HLA-B*35:292 Genomic Plasmid Vector	PHLAG82513254	Plasmid vector containing HLA-B*35:292 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:292 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:292 protein under different cellular conditions.	Inquiry
HLA-B*35:293 Genomic Plasmid Vector	PHLAG82513255	Plasmid vector containing HLA-B*35:293 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:293 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:293 protein under different cellular conditions.	Inquiry
HLA-B*35:294 Genomic Plasmid Vector	PHLAG82513256	Plasmid vector containing HLA-B*35:294 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:294 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:294 protein under different cellular conditions.	Inquiry

HLA-B*35:295 Genomic Plasmid Vector	PHLAG82513257	Plasmid vector containing HLA-B*35:295 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:295 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:295 protein under different cellular conditions.	Inquiry
HLA-B*35:296 Genomic Plasmid Vector	PHLAG82513258	Plasmid vector containing HLA-B*35:296 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:296 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:296 protein under different cellular conditions.	Inquiry
HLA-B*35:297 Genomic Plasmid Vector	PHLAG82513259	Plasmid vector containing HLA-B*35:297 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:297 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:297 protein under different cellular conditions.	Inquiry
HLA-B*35:298 Genomic Plasmid Vector	PHLAG82513260	Plasmid vector containing HLA-B*35:298 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:298 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:298 protein under different cellular conditions.	Inquiry
HLA-B*35:299 Genomic Plasmid Vector	PHLAG82513261	Plasmid vector containing HLA-B*35:299 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:299 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:299 protein under different cellular conditions.	Inquiry
HLA-B*35:30:01:01 Genomic Plasmid Vector	PHLAG82513262	Plasmid vector containing HLA-B*35:30:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:30:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:30:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:30:01:02 Genomic Plasmid Vector	PHLAG82513263	Plasmid vector containing HLA-B*35:30:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:30:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:30:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:300 Genomic Plasmid Vector	PHLAG82513264	Plasmid vector containing HLA-B*35:300 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:300 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:300 protein under different cellular conditions.	Inquiry
HLA-B*35:301 Genomic Plasmid Vector	PHLAG82513265	Plasmid vector containing HLA-B*35:301 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:301 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:301 protein under different cellular conditions.	Inquiry

HLA-B*35:302 Genomic Plasmid Vector	PHLAG82513266	Plasmid vector containing HLA-B*35:302 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:302 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:302 protein under different cellular conditions.	Inquiry
HLA-B*35:303 Genomic Plasmid Vector	PHLAG82513267	Plasmid vector containing HLA-B*35:303 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:303 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:303 protein under different cellular conditions.	Inquiry
HLA-B*35:304 Genomic Plasmid Vector	PHLAG82513268	Plasmid vector containing HLA-B*35:304 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:304 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:304 protein under different cellular conditions.	Inquiry
HLA-B*35:305 Genomic Plasmid Vector	PHLAG82513269	Plasmid vector containing HLA-B*35:305 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:305 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:305 protein under different cellular conditions.	Inquiry
HLA-B*35:306 Genomic Plasmid Vector	PHLAG82513270	Plasmid vector containing HLA-B*35:306 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:306 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:306 protein under different cellular conditions.	Inquiry
HLA-B*35:307 Genomic Plasmid Vector	PHLAG82513271	Plasmid vector containing HLA-B*35:307 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:307 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:307 protein under different cellular conditions.	Inquiry
HLA-B*35:308 Genomic Plasmid Vector	PHLAG82513272	Plasmid vector containing HLA-B*35:308 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:308 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:308 protein under different cellular conditions.	Inquiry
HLA-B*35:309 Genomic Plasmid Vector	PHLAG82513273	Plasmid vector containing HLA-B*35:309 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:309 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:309 protein under different cellular conditions.	Inquiry
HLA-B*35:31:01:01 Genomic Plasmid Vector	PHLAG82513274	Plasmid vector containing HLA-B*35:31:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:31:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:31:01:01 protein under different cellular conditions.	Inquiry

HLA-B*35:31:01:02 Genomic Plasmid Vector	PHLAG82513275	Plasmid vector containing HLA-B*35:31:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:31:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:31:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:310 Genomic Plasmid Vector	PHLAG82513276	Plasmid vector containing HLA-B*35:310 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:310 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:310 protein under different cellular conditions.	Inquiry
HLA-B*35:311 Genomic Plasmid Vector	PHLAG82513277	Plasmid vector containing HLA-B*35:311 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:311 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:311 protein under different cellular conditions.	Inquiry
HLA-B*35:312 Genomic Plasmid Vector	PHLAG82513278	Plasmid vector containing HLA-B*35:312 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:312 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:312 protein under different cellular conditions.	Inquiry
HLA-B*35:313 Genomic Plasmid Vector	PHLAG82513279	Plasmid vector containing HLA-B*35:313 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:313 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:313 protein under different cellular conditions.	Inquiry
HLA-B*35:314 Genomic Plasmid Vector	PHLAG82513280	Plasmid vector containing HLA-B*35:314 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:314 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:314 protein under different cellular conditions.	Inquiry
HLA-B*35:315 Genomic Plasmid Vector	PHLAG82513281	Plasmid vector containing HLA-B*35:315 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:315 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:315 protein under different cellular conditions.	Inquiry
HLA-B*35:316 Genomic Plasmid Vector	PHLAG82513282	Plasmid vector containing HLA-B*35:316 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:316 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:316 protein under different cellular conditions.	Inquiry
HLA-B*35:317 Genomic Plasmid Vector	PHLAG82513283	Plasmid vector containing HLA-B*35:317 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:317 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:317 protein under different cellular conditions.	Inquiry

HLA-B*35:318 Genomic Plasmid Vector	PHLAG82513284	Plasmid vector containing HLA-B*35:318 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:318 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:318 protein under different cellular conditions.	Inquiry
HLA-B*35:319 Genomic Plasmid Vector	PHLAG82513285	Plasmid vector containing HLA-B*35:319 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:319 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:319 protein under different cellular conditions.	Inquiry
HLA-B*35:32:01 Genomic Plasmid Vector	PHLAG82513286	Plasmid vector containing HLA-B*35:32:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:32:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:32:01 protein under different cellular conditions.	Inquiry
HLA-B*35:32:02 Genomic Plasmid Vector	PHLAG82513287	Plasmid vector containing HLA-B*35:32:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:32:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:32:02 protein under different cellular conditions.	Inquiry
HLA-B*35:32:03 Genomic Plasmid Vector	PHLAG82513288	Plasmid vector containing HLA-B*35:32:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:32:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:32:03 protein under different cellular conditions.	Inquiry
HLA-B*35:320 Genomic Plasmid Vector	PHLAG82513289	Plasmid vector containing HLA-B*35:320 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:320 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:320 protein under different cellular conditions.	Inquiry
HLA-B*35:321 Genomic Plasmid Vector	PHLAG82513290	Plasmid vector containing HLA-B*35:321 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:321 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:321 protein under different cellular conditions.	Inquiry
HLA-B*35:322 Genomic Plasmid Vector	PHLAG82513291	Plasmid vector containing HLA-B*35:322 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:322 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:322 protein under different cellular conditions.	Inquiry
HLA-B*35:323:01 Genomic Plasmid Vector	PHLAG82513292	Plasmid vector containing HLA-B*35:323:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:323:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:323:01 protein under different cellular conditions.	Inquiry

HLA-B*35:323:02 Genomic Plasmid Vector	PHLAG82513293	Plasmid vector containing HLA-B*35:323:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:323:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:323:02 protein under different cellular conditions.	Inquiry
HLA-B*35:324 Genomic Plasmid Vector	PHLAG82513294	Plasmid vector containing HLA-B*35:324 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:324 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:324 protein under different cellular conditions.	Inquiry
HLA-B*35:325 Genomic Plasmid Vector	PHLAG82513295	Plasmid vector containing HLA-B*35:325 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:325 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:325 protein under different cellular conditions.	Inquiry
HLA-B*35:326 Genomic Plasmid Vector	PHLAG82513296	Plasmid vector containing HLA-B*35:326 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:326 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:326 protein under different cellular conditions.	Inquiry
HLA-B*35:327 Genomic Plasmid Vector	PHLAG82513297	Plasmid vector containing HLA-B*35:327 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:327 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:327 protein under different cellular conditions.	Inquiry
HLA-B*35:328 Genomic Plasmid Vector	PHLAG82513298	Plasmid vector containing HLA-B*35:328 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:328 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:328 protein under different cellular conditions.	Inquiry
HLA-B*35:329 Genomic Plasmid Vector	PHLAG82513299	Plasmid vector containing HLA-B*35:329 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:329 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:329 protein under different cellular conditions.	Inquiry
HLA-B*35:33 Genomic Plasmid Vector	PHLAG825133300	Plasmid vector containing HLA-B*35:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:33 protein under different cellular conditions.	Inquiry
HLA-B*35:330 Genomic Plasmid Vector	PHLAG825133301	Plasmid vector containing HLA-B*35:330 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:330 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:330 protein under different cellular conditions.	Inquiry

HLA-B*35:331 Genomic Plasmid Vector	PHLAG82513302	Plasmid vector containing HLA-B*35:331 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:331 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:331 protein under different cellular conditions.	Inquiry
HLA-B*35:332 Genomic Plasmid Vector	PHLAG82513303	Plasmid vector containing HLA-B*35:332 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:332 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:332 protein under different cellular conditions.	Inquiry
HLA-B*35:333Q Genomic Plasmid Vector	PHLAG82513304	Plasmid vector containing HLA-B*35:333Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:333Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:333Q protein under different cellular conditions.	Inquiry
HLA-B*35:334 Genomic Plasmid Vector	PHLAG82513305	Plasmid vector containing HLA-B*35:334 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:334 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:334 protein under different cellular conditions.	Inquiry
HLA-B*35:335 Genomic Plasmid Vector	PHLAG82513306	Plasmid vector containing HLA-B*35:335 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:335 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:335 protein under different cellular conditions.	Inquiry
HLA-B*35:336 Genomic Plasmid Vector	PHLAG82513307	Plasmid vector containing HLA-B*35:336 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:336 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:336 protein under different cellular conditions.	Inquiry
HLA-B*35:337:01 Genomic Plasmid Vector	PHLAG82513308	Plasmid vector containing HLA-B*35:337:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:337:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:337:01 protein under different cellular conditions.	Inquiry
HLA-B*35:337:02 Genomic Plasmid Vector	PHLAG82513309	Plasmid vector containing HLA-B*35:337:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:337:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:337:02 protein under different cellular conditions.	Inquiry
HLA-B*35:338 Genomic Plasmid Vector	PHLAG82513310	Plasmid vector containing HLA-B*35:338 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:338 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:338 protein under different cellular conditions.	Inquiry

HLA-B*35:339 Genomic Plasmid Vector	PHLAG82513311	Plasmid vector containing HLA-B*35:339 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:339 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:339 protein under different cellular conditions.	Inquiry
HLA-B*35:34 Genomic Plasmid Vector	PHLAG82513312	Plasmid vector containing HLA-B*35:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:34 protein under different cellular conditions.	Inquiry
HLA-B*35:340 Genomic Plasmid Vector	PHLAG82513313	Plasmid vector containing HLA-B*35:340 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:340 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:340 protein under different cellular conditions.	Inquiry
HLA-B*35:341 Genomic Plasmid Vector	PHLAG82513314	Plasmid vector containing HLA-B*35:341 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:341 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:341 protein under different cellular conditions.	Inquiry
HLA-B*35:342 Genomic Plasmid Vector	PHLAG82513315	Plasmid vector containing HLA-B*35:342 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:342 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:342 protein under different cellular conditions.	Inquiry
HLA-B*35:343 Genomic Plasmid Vector	PHLAG82513316	Plasmid vector containing HLA-B*35:343 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:343 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:343 protein under different cellular conditions.	Inquiry
HLA-B*35:344 Genomic Plasmid Vector	PHLAG82513317	Plasmid vector containing HLA-B*35:344 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:344 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:344 protein under different cellular conditions.	Inquiry
HLA-B*35:345 Genomic Plasmid Vector	PHLAG82513318	Plasmid vector containing HLA-B*35:345 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:345 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:345 protein under different cellular conditions.	Inquiry
HLA-B*35:346 Genomic Plasmid Vector	PHLAG82513319	Plasmid vector containing HLA-B*35:346 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:346 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:346 protein under different cellular conditions.	Inquiry

HLA-B*35:347 Genomic Plasmid Vector	PHLAG82513320	Plasmid vector containing HLA-B*35:347 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:347 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:347 protein under different cellular conditions.	Inquiry
HLA-B*35:348 Genomic Plasmid Vector	PHLAG82513321	Plasmid vector containing HLA-B*35:348 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:348 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:348 protein under different cellular conditions.	Inquiry
HLA-B*35:349 Genomic Plasmid Vector	PHLAG82513322	Plasmid vector containing HLA-B*35:349 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:349 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:349 protein under different cellular conditions.	Inquiry
HLA-B*35:35 Genomic Plasmid Vector	PHLAG82513323	Plasmid vector containing HLA-B*35:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:35 protein under different cellular conditions.	Inquiry
HLA-B*35:350 Genomic Plasmid Vector	PHLAG82513324	Plasmid vector containing HLA-B*35:350 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:350 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:350 protein under different cellular conditions.	Inquiry
HLA-B*35:351 Genomic Plasmid Vector	PHLAG82513325	Plasmid vector containing HLA-B*35:351 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:351 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:351 protein under different cellular conditions.	Inquiry
HLA-B*35:352 Genomic Plasmid Vector	PHLAG82513326	Plasmid vector containing HLA-B*35:352 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:352 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:352 protein under different cellular conditions.	Inquiry
HLA-B*35:353 Genomic Plasmid Vector	PHLAG82513327	Plasmid vector containing HLA-B*35:353 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:353 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:353 protein under different cellular conditions.	Inquiry
HLA-B*35:354 Genomic Plasmid Vector	PHLAG82513328	Plasmid vector containing HLA-B*35:354 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:354 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:354 protein under different cellular conditions.	Inquiry

HLA-B*35:355 Genomic Plasmid Vector	PHLAG82513329	Plasmid vector containing HLA-B*35:355 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:355 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:355 protein under different cellular conditions.	Inquiry
HLA-B*35:356 Genomic Plasmid Vector	PHLAG825133330	Plasmid vector containing HLA-B*35:356 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:356 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:356 protein under different cellular conditions.	Inquiry
HLA-B*35:357 Genomic Plasmid Vector	PHLAG825133331	Plasmid vector containing HLA-B*35:357 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:357 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:357 protein under different cellular conditions.	Inquiry
HLA-B*35:358 Genomic Plasmid Vector	PHLAG825133332	Plasmid vector containing HLA-B*35:358 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:358 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:358 protein under different cellular conditions.	Inquiry
HLA-B*35:359 Genomic Plasmid Vector	PHLAG825133333	Plasmid vector containing HLA-B*35:359 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:359 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:359 protein under different cellular conditions.	Inquiry
HLA-B*35:36 Genomic Plasmid Vector	PHLAG825133334	Plasmid vector containing HLA-B*35:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:36 protein under different cellular conditions.	Inquiry
HLA-B*35:360 Genomic Plasmid Vector	PHLAG825133335	Plasmid vector containing HLA-B*35:360 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:360 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:360 protein under different cellular conditions.	Inquiry
HLA-B*35:361 Genomic Plasmid Vector	PHLAG825133336	Plasmid vector containing HLA-B*35:361 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:361 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:361 protein under different cellular conditions.	Inquiry
HLA-B*35:362 Genomic Plasmid Vector	PHLAG825133337	Plasmid vector containing HLA-B*35:362 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:362 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:362 protein under different cellular conditions.	Inquiry

HLA-B*35:363 Genomic Plasmid Vector	PHLAG82513338	Plasmid vector containing HLA-B*35:363 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:363 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:363 protein under different cellular conditions.	Inquiry
HLA-B*35:364 Genomic Plasmid Vector	PHLAG82513339	Plasmid vector containing HLA-B*35:364 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:364 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:364 protein under different cellular conditions.	Inquiry
HLA-B*35:365 Genomic Plasmid Vector	PHLAG825133340	Plasmid vector containing HLA-B*35:365 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:365 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:365 protein under different cellular conditions.	Inquiry
HLA-B*35:366 Genomic Plasmid Vector	PHLAG825133341	Plasmid vector containing HLA-B*35:366 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:366 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:366 protein under different cellular conditions.	Inquiry
HLA-B*35:367:01 Genomic Plasmid Vector	PHLAG825133342	Plasmid vector containing HLA-B*35:367:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:367:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:367:01 protein under different cellular conditions.	Inquiry
HLA-B*35:367:02 Genomic Plasmid Vector	PHLAG825133343	Plasmid vector containing HLA-B*35:367:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:367:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:367:02 protein under different cellular conditions.	Inquiry
HLA-B*35:368 Genomic Plasmid Vector	PHLAG825133344	Plasmid vector containing HLA-B*35:368 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:368 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:368 protein under different cellular conditions.	Inquiry
HLA-B*35:369 Genomic Plasmid Vector	PHLAG825133345	Plasmid vector containing HLA-B*35:369 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:369 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:369 protein under different cellular conditions.	Inquiry
HLA-B*35:37 Genomic Plasmid Vector	PHLAG825133346	Plasmid vector containing HLA-B*35:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:37 protein under different cellular conditions.	Inquiry

HLA-B*35:370 Genomic Plasmid Vector	PHLAG82513347	Plasmid vector containing HLA-B*35:370 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:370 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:370 protein under different cellular conditions.	Inquiry
HLA-B*35:371 Genomic Plasmid Vector	PHLAG82513348	Plasmid vector containing HLA-B*35:371 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:371 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:371 protein under different cellular conditions.	Inquiry
HLA-B*35:372 Genomic Plasmid Vector	PHLAG82513349	Plasmid vector containing HLA-B*35:372 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:372 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:372 protein under different cellular conditions.	Inquiry
HLA-B*35:373 Genomic Plasmid Vector	PHLAG825133350	Plasmid vector containing HLA-B*35:373 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:373 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:373 protein under different cellular conditions.	Inquiry
HLA-B*35:374 Genomic Plasmid Vector	PHLAG825133351	Plasmid vector containing HLA-B*35:374 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:374 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:374 protein under different cellular conditions.	Inquiry
HLA-B*35:375 Genomic Plasmid Vector	PHLAG825133352	Plasmid vector containing HLA-B*35:375 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:375 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:375 protein under different cellular conditions.	Inquiry
HLA-B*35:376 Genomic Plasmid Vector	PHLAG825133353	Plasmid vector containing HLA-B*35:376 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:376 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:376 protein under different cellular conditions.	Inquiry
HLA-B*35:377 Genomic Plasmid Vector	PHLAG825133354	Plasmid vector containing HLA-B*35:377 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:377 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:377 protein under different cellular conditions.	Inquiry
HLA-B*35:378 Genomic Plasmid Vector	PHLAG825133355	Plasmid vector containing HLA-B*35:378 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:378 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:378 protein under different cellular conditions.	Inquiry

HLA-B*35:379 Genomic Plasmid Vector	PHLAG82513356	Plasmid vector containing HLA-B*35:379 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:379 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:379 protein under different cellular conditions.	Inquiry
HLA-B*35:38 Genomic Plasmid Vector	PHLAG82513357	Plasmid vector containing HLA-B*35:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:38 protein under different cellular conditions.	Inquiry
HLA-B*35:380:01:01 Genomic Plasmid Vector	PHLAG82513358	Plasmid vector containing HLA-B*35:380:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:380:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:380:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:380:01:02 Genomic Plasmid Vector	PHLAG82513359	Plasmid vector containing HLA-B*35:380:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:380:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:380:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:381N Genomic Plasmid Vector	PHLAG82513360	Plasmid vector containing HLA-B*35:381N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:381N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:381N protein under different cellular conditions.	Inquiry
HLA-B*35:382 Genomic Plasmid Vector	PHLAG82513361	Plasmid vector containing HLA-B*35:382 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:382 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:382 protein under different cellular conditions.	Inquiry
HLA-B*35:383 Genomic Plasmid Vector	PHLAG82513362	Plasmid vector containing HLA-B*35:383 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:383 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:383 protein under different cellular conditions.	Inquiry
HLA-B*35:384 Genomic Plasmid Vector	PHLAG82513363	Plasmid vector containing HLA-B*35:384 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:384 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:384 protein under different cellular conditions.	Inquiry
HLA-B*35:385 Genomic Plasmid Vector	PHLAG82513364	Plasmid vector containing HLA-B*35:385 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:385 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:385 protein under different cellular conditions.	Inquiry

HLA-B*35:386 Genomic Plasmid Vector	PHLAG82513365	Plasmid vector containing HLA-B*35:386 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:386 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:386 protein under different cellular conditions.	Inquiry
HLA-B*35:387 Genomic Plasmid Vector	PHLAG82513366	Plasmid vector containing HLA-B*35:387 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:387 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:387 protein under different cellular conditions.	Inquiry
HLA-B*35:388 Genomic Plasmid Vector	PHLAG82513367	Plasmid vector containing HLA-B*35:388 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:388 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:388 protein under different cellular conditions.	Inquiry
HLA-B*35:389 Genomic Plasmid Vector	PHLAG82513368	Plasmid vector containing HLA-B*35:389 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:389 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:389 protein under different cellular conditions.	Inquiry
HLA-B*35:39 Genomic Plasmid Vector	PHLAG82513369	Plasmid vector containing HLA-B*35:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:39 protein under different cellular conditions.	Inquiry
HLA-B*35:390N Genomic Plasmid Vector	PHLAG82513370	Plasmid vector containing HLA-B*35:390N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:390N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:390N protein under different cellular conditions.	Inquiry
HLA-B*35:391 Genomic Plasmid Vector	PHLAG82513371	Plasmid vector containing HLA-B*35:391 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:391 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:391 protein under different cellular conditions.	Inquiry
HLA-B*35:392 Genomic Plasmid Vector	PHLAG82513372	Plasmid vector containing HLA-B*35:392 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:392 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:392 protein under different cellular conditions.	Inquiry
HLA-B*35:393 Genomic Plasmid Vector	PHLAG82513373	Plasmid vector containing HLA-B*35:393 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:393 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:393 protein under different cellular conditions.	Inquiry

HLA-B*35:394 Genomic Plasmid Vector	PHLAG82513374	Plasmid vector containing HLA-B*35:394 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:394 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:394 protein under different cellular conditions.	Inquiry
HLA-B*35:395 Genomic Plasmid Vector	PHLAG82513375	Plasmid vector containing HLA-B*35:395 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:395 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:395 protein under different cellular conditions.	Inquiry
HLA-B*35:396 Genomic Plasmid Vector	PHLAG82513376	Plasmid vector containing HLA-B*35:396 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:396 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:396 protein under different cellular conditions.	Inquiry
HLA-B*35:397 Genomic Plasmid Vector	PHLAG82513377	Plasmid vector containing HLA-B*35:397 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:397 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:397 protein under different cellular conditions.	Inquiry
HLA-B*35:398 Genomic Plasmid Vector	PHLAG82513378	Plasmid vector containing HLA-B*35:398 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:398 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:398 protein under different cellular conditions.	Inquiry
HLA-B*35:399 Genomic Plasmid Vector	PHLAG82513379	Plasmid vector containing HLA-B*35:399 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:399 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:399 protein under different cellular conditions.	Inquiry
HLA-B*35:400 Genomic Plasmid Vector	PHLAG82513380	Plasmid vector containing HLA-B*35:400 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:400 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:400 protein under different cellular conditions.	Inquiry
HLA-B*35:401 Genomic Plasmid Vector	PHLAG82513381	Plasmid vector containing HLA-B*35:401 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:401 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:401 protein under different cellular conditions.	Inquiry
HLA-B*35:402 Genomic Plasmid Vector	PHLAG82513382	Plasmid vector containing HLA-B*35:402 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:402 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:402 protein under different cellular conditions.	Inquiry

HLA-B*35:403 Genomic Plasmid Vector	PHLAG82513383	Plasmid vector containing HLA-B*35:403 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:403 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:403 protein under different cellular conditions.	Inquiry
HLA-B*35:404 Genomic Plasmid Vector	PHLAG82513384	Plasmid vector containing HLA-B*35:404 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:404 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:404 protein under different cellular conditions.	Inquiry
HLA-B*35:405 Genomic Plasmid Vector	PHLAG82513385	Plasmid vector containing HLA-B*35:405 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:405 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:405 protein under different cellular conditions.	Inquiry
HLA-B*35:406 Genomic Plasmid Vector	PHLAG82513386	Plasmid vector containing HLA-B*35:406 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:406 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:406 protein under different cellular conditions.	Inquiry
HLA-B*35:407 Genomic Plasmid Vector	PHLAG82513387	Plasmid vector containing HLA-B*35:407 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:407 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:407 protein under different cellular conditions.	Inquiry
HLA-B*35:408 Genomic Plasmid Vector	PHLAG82513388	Plasmid vector containing HLA-B*35:408 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:408 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:408 protein under different cellular conditions.	Inquiry
HLA-B*35:409 Genomic Plasmid Vector	PHLAG82513389	Plasmid vector containing HLA-B*35:409 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:409 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:409 protein under different cellular conditions.	Inquiry
HLA-B*35:40N Genomic Plasmid Vector	PHLAG82513390	Plasmid vector containing HLA-B*35:40N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:40N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:40N protein under different cellular conditions.	Inquiry
HLA-B*35:41 Genomic Plasmid Vector	PHLAG82513391	Plasmid vector containing HLA-B*35:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:41 protein under different cellular conditions.	Inquiry

HLA-B*35:410 Genomic Plasmid Vector	PHLAG82513392	Plasmid vector containing HLA-B*35:410 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:410 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:410 protein under different cellular conditions.	Inquiry
HLA-B*35:411 Genomic Plasmid Vector	PHLAG82513393	Plasmid vector containing HLA-B*35:411 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:411 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:411 protein under different cellular conditions.	Inquiry
HLA-B*35:412 Genomic Plasmid Vector	PHLAG82513394	Plasmid vector containing HLA-B*35:412 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:412 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:412 protein under different cellular conditions.	Inquiry
HLA-B*35:413 Genomic Plasmid Vector	PHLAG82513395	Plasmid vector containing HLA-B*35:413 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:413 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:413 protein under different cellular conditions.	Inquiry
HLA-B*35:414 Genomic Plasmid Vector	PHLAG82513396	Plasmid vector containing HLA-B*35:414 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:414 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:414 protein under different cellular conditions.	Inquiry
HLA-B*35:415 Genomic Plasmid Vector	PHLAG82513397	Plasmid vector containing HLA-B*35:415 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:415 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:415 protein under different cellular conditions.	Inquiry
HLA-B*35:416 Genomic Plasmid Vector	PHLAG82513398	Plasmid vector containing HLA-B*35:416 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:416 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:416 protein under different cellular conditions.	Inquiry
HLA-B*35:417 Genomic Plasmid Vector	PHLAG82513399	Plasmid vector containing HLA-B*35:417 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:417 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:417 protein under different cellular conditions.	Inquiry
HLA-B*35:418 Genomic Plasmid Vector	PHLAG825134000	Plasmid vector containing HLA-B*35:418 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:418 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:418 protein under different cellular conditions.	Inquiry

HLA-B*35:419 Genomic Plasmid Vector	PHLAG82513401	Plasmid vector containing HLA-B*35:419 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:419 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:419 protein under different cellular conditions.	Inquiry
HLA-B*35:42:01 Genomic Plasmid Vector	PHLAG82513402	Plasmid vector containing HLA-B*35:42:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:42:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:42:01 protein under different cellular conditions.	Inquiry
HLA-B*35:42:02 Genomic Plasmid Vector	PHLAG82513403	Plasmid vector containing HLA-B*35:42:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:42:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:42:02 protein under different cellular conditions.	Inquiry
HLA-B*35:42:03 Genomic Plasmid Vector	PHLAG82513404	Plasmid vector containing HLA-B*35:42:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:42:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:42:03 protein under different cellular conditions.	Inquiry
HLA-B*35:420 Genomic Plasmid Vector	PHLAG82513405	Plasmid vector containing HLA-B*35:420 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:420 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:420 protein under different cellular conditions.	Inquiry
HLA-B*35:421 Genomic Plasmid Vector	PHLAG82513406	Plasmid vector containing HLA-B*35:421 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:421 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:421 protein under different cellular conditions.	Inquiry
HLA-B*35:422 Genomic Plasmid Vector	PHLAG82513407	Plasmid vector containing HLA-B*35:422 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:422 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:422 protein under different cellular conditions.	Inquiry
HLA-B*35:423 Genomic Plasmid Vector	PHLAG82513408	Plasmid vector containing HLA-B*35:423 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:423 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:423 protein under different cellular conditions.	Inquiry
HLA-B*35:424 Genomic Plasmid Vector	PHLAG82513409	Plasmid vector containing HLA-B*35:424 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:424 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:424 protein under different cellular conditions.	Inquiry

HLA-B*35:425 Genomic Plasmid Vector	PHLAG82513410	Plasmid vector containing HLA-B*35:425 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:425 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:425 protein under different cellular conditions.	Inquiry
HLA-B*35:426 Genomic Plasmid Vector	PHLAG82513411	Plasmid vector containing HLA-B*35:426 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:426 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:426 protein under different cellular conditions.	Inquiry
HLA-B*35:427N Genomic Plasmid Vector	PHLAG82513412	Plasmid vector containing HLA-B*35:427N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:427N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:427N protein under different cellular conditions.	Inquiry
HLA-B*35:428Q Genomic Plasmid Vector	PHLAG82513413	Plasmid vector containing HLA-B*35:428Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:428Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:428Q protein under different cellular conditions.	Inquiry
HLA-B*35:429 Genomic Plasmid Vector	PHLAG82513414	Plasmid vector containing HLA-B*35:429 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:429 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:429 protein under different cellular conditions.	Inquiry
HLA-B*35:43:01 Genomic Plasmid Vector	PHLAG82513415	Plasmid vector containing HLA-B*35:43:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:43:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:43:01 protein under different cellular conditions.	Inquiry
HLA-B*35:43:02 Genomic Plasmid Vector	PHLAG82513416	Plasmid vector containing HLA-B*35:43:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:43:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:43:02 protein under different cellular conditions.	Inquiry
HLA-B*35:43:03 Genomic Plasmid Vector	PHLAG82513417	Plasmid vector containing HLA-B*35:43:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:43:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:43:03 protein under different cellular conditions.	Inquiry
HLA-B*35:43:04 Genomic Plasmid Vector	PHLAG82513418	Plasmid vector containing HLA-B*35:43:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:43:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:43:04 protein under different cellular conditions.	Inquiry

HLA-B*35:430N Genomic Plasmid Vector	PHLAG82513419	Plasmid vector containing HLA-B*35:430N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:430N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:430N protein under different cellular conditions.	Inquiry
HLA-B*35:431 Genomic Plasmid Vector	PHLAG825134220	Plasmid vector containing HLA-B*35:431 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:431 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:431 protein under different cellular conditions.	Inquiry
HLA-B*35:432 Genomic Plasmid Vector	PHLAG825134221	Plasmid vector containing HLA-B*35:432 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:432 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:432 protein under different cellular conditions.	Inquiry
HLA-B*35:433 Genomic Plasmid Vector	PHLAG825134222	Plasmid vector containing HLA-B*35:433 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:433 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:433 protein under different cellular conditions.	Inquiry
HLA-B*35:434 Genomic Plasmid Vector	PHLAG825134223	Plasmid vector containing HLA-B*35:434 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:434 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:434 protein under different cellular conditions.	Inquiry
HLA-B*35:435:01 Genomic Plasmid Vector	PHLAG825134224	Plasmid vector containing HLA-B*35:435:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:435:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:435:01 protein under different cellular conditions.	Inquiry
HLA-B*35:435:02 Genomic Plasmid Vector	PHLAG825134225	Plasmid vector containing HLA-B*35:435:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:435:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:435:02 protein under different cellular conditions.	Inquiry
HLA-B*35:436 Genomic Plasmid Vector	PHLAG825134226	Plasmid vector containing HLA-B*35:436 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:436 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:436 protein under different cellular conditions.	Inquiry
HLA-B*35:437 Genomic Plasmid Vector	PHLAG825134227	Plasmid vector containing HLA-B*35:437 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:437 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:437 protein under different cellular conditions.	Inquiry

HLA-B*35:438 Genomic Plasmid Vector	PHLAG82513428	Plasmid vector containing HLA-B*35:438 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:438 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:438 protein under different cellular conditions.	Inquiry
HLA-B*35:439:01:01 Genomic Plasmid Vector	PHLAG82513429	Plasmid vector containing HLA-B*35:439:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:439:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:439:01:01 protein under different cellular conditions.	Inquiry
HLA-B*35:439:01:02 Genomic Plasmid Vector	PHLAG82513430	Plasmid vector containing HLA-B*35:439:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:439:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:439:01:02 protein under different cellular conditions.	Inquiry
HLA-B*35:44 Genomic Plasmid Vector	PHLAG82513431	Plasmid vector containing HLA-B*35:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:44 protein under different cellular conditions.	Inquiry
HLA-B*35:440 Genomic Plasmid Vector	PHLAG82513432	Plasmid vector containing HLA-B*35:440 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:440 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:440 protein under different cellular conditions.	Inquiry
HLA-B*35:441 Genomic Plasmid Vector	PHLAG82513433	Plasmid vector containing HLA-B*35:441 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:441 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:441 protein under different cellular conditions.	Inquiry
HLA-B*35:442 Genomic Plasmid Vector	PHLAG82513434	Plasmid vector containing HLA-B*35:442 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:442 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:442 protein under different cellular conditions.	Inquiry
HLA-B*35:443 Genomic Plasmid Vector	PHLAG82513435	Plasmid vector containing HLA-B*35:443 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:443 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:443 protein under different cellular conditions.	Inquiry
HLA-B*35:444 Genomic Plasmid Vector	PHLAG82513436	Plasmid vector containing HLA-B*35:444 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:444 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:444 protein under different cellular conditions.	Inquiry

HLA-B*35:445 Genomic Plasmid Vector	PHLAG82513437	Plasmid vector containing HLA-B*35:445 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:445 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:445 protein under different cellular conditions.	Inquiry
HLA-B*35:446 Genomic Plasmid Vector	PHLAG82513438	Plasmid vector containing HLA-B*35:446 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:446 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:446 protein under different cellular conditions.	Inquiry
HLA-B*35:447 Genomic Plasmid Vector	PHLAG82513439	Plasmid vector containing HLA-B*35:447 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:447 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:447 protein under different cellular conditions.	Inquiry
HLA-B*35:448N Genomic Plasmid Vector	PHLAG82513440	Plasmid vector containing HLA-B*35:448N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:448N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:448N protein under different cellular conditions.	Inquiry
HLA-B*35:449 Genomic Plasmid Vector	PHLAG82513441	Plasmid vector containing HLA-B*35:449 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:449 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:449 protein under different cellular conditions.	Inquiry
HLA-B*35:45 Genomic Plasmid Vector	PHLAG82513442	Plasmid vector containing HLA-B*35:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:45 protein under different cellular conditions.	Inquiry
HLA-B*35:450 Genomic Plasmid Vector	PHLAG82513443	Plasmid vector containing HLA-B*35:450 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:450 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:450 protein under different cellular conditions.	Inquiry
HLA-B*35:451 Genomic Plasmid Vector	PHLAG82513444	Plasmid vector containing HLA-B*35:451 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:451 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:451 protein under different cellular conditions.	Inquiry
HLA-B*35:452 Genomic Plasmid Vector	PHLAG82513445	Plasmid vector containing HLA-B*35:452 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:452 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:452 protein under different cellular conditions.	Inquiry

HLA-B*35:453N Genomic Plasmid Vector	PHLAG82513446	Plasmid vector containing HLA-B*35:453N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:453N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:453N protein under different cellular conditions.	Inquiry
HLA-B*35:454 Genomic Plasmid Vector	PHLAG82513447	Plasmid vector containing HLA-B*35:454 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:454 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:454 protein under different cellular conditions.	Inquiry
HLA-B*35:455 Genomic Plasmid Vector	PHLAG82513448	Plasmid vector containing HLA-B*35:455 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:455 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:455 protein under different cellular conditions.	Inquiry
HLA-B*35:456N Genomic Plasmid Vector	PHLAG82513449	Plasmid vector containing HLA-B*35:456N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:456N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:456N protein under different cellular conditions.	Inquiry
HLA-B*35:457 Genomic Plasmid Vector	PHLAG82513450	Plasmid vector containing HLA-B*35:457 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:457 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:457 protein under different cellular conditions.	Inquiry
HLA-B*35:458 Genomic Plasmid Vector	PHLAG82513451	Plasmid vector containing HLA-B*35:458 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:458 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:458 protein under different cellular conditions.	Inquiry
HLA-B*35:459N Genomic Plasmid Vector	PHLAG82513452	Plasmid vector containing HLA-B*35:459N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:459N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:459N protein under different cellular conditions.	Inquiry
HLA-B*35:46 Genomic Plasmid Vector	PHLAG82513453	Plasmid vector containing HLA-B*35:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:46 protein under different cellular conditions.	Inquiry
HLA-B*35:460Q Genomic Plasmid Vector	PHLAG82513454	Plasmid vector containing HLA-B*35:460Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:460Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:460Q protein under different cellular conditions.	Inquiry

HLA-B*35:461N Genomic Plasmid Vector	PHLAG82513455	Plasmid vector containing HLA-B*35:461N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:461N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:461N protein under different cellular conditions.	Inquiry
HLA-B*35:462 Genomic Plasmid Vector	PHLAG82513456	Plasmid vector containing HLA-B*35:462 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:462 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:462 protein under different cellular conditions.	Inquiry
HLA-B*35:463 Genomic Plasmid Vector	PHLAG82513457	Plasmid vector containing HLA-B*35:463 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:463 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:463 protein under different cellular conditions.	Inquiry
HLA-B*35:464 Genomic Plasmid Vector	PHLAG82513458	Plasmid vector containing HLA-B*35:464 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:464 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:464 protein under different cellular conditions.	Inquiry
HLA-B*35:465 Genomic Plasmid Vector	PHLAG82513459	Plasmid vector containing HLA-B*35:465 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:465 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:465 protein under different cellular conditions.	Inquiry
HLA-B*35:466 Genomic Plasmid Vector	PHLAG82513460	Plasmid vector containing HLA-B*35:466 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:466 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:466 protein under different cellular conditions.	Inquiry
HLA-B*35:467 Genomic Plasmid Vector	PHLAG82513461	Plasmid vector containing HLA-B*35:467 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:467 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:467 protein under different cellular conditions.	Inquiry
HLA-B*35:468 Genomic Plasmid Vector	PHLAG82513462	Plasmid vector containing HLA-B*35:468 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:468 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:468 protein under different cellular conditions.	Inquiry
HLA-B*35:469 Genomic Plasmid Vector	PHLAG82513463	Plasmid vector containing HLA-B*35:469 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:469 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:469 protein under different cellular conditions.	Inquiry

HLA-B*35:47 Genomic Plasmid Vector	PHLAG82513464	Plasmid vector containing HLA-B*35:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:47 protein under different cellular conditions.	Inquiry
HLA-B*35:470 Genomic Plasmid Vector	PHLAG82513465	Plasmid vector containing HLA-B*35:470 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:470 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:470 protein under different cellular conditions.	Inquiry
HLA-B*35:471 Genomic Plasmid Vector	PHLAG82513466	Plasmid vector containing HLA-B*35:471 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:471 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:471 protein under different cellular conditions.	Inquiry
HLA-B*35:472 Genomic Plasmid Vector	PHLAG82513467	Plasmid vector containing HLA-B*35:472 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:472 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:472 protein under different cellular conditions.	Inquiry
HLA-B*35:473 Genomic Plasmid Vector	PHLAG82513468	Plasmid vector containing HLA-B*35:473 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:473 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:473 protein under different cellular conditions.	Inquiry
HLA-B*35:474 Genomic Plasmid Vector	PHLAG82513469	Plasmid vector containing HLA-B*35:474 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:474 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:474 protein under different cellular conditions.	Inquiry
HLA-B*35:475 Genomic Plasmid Vector	PHLAG82513470	Plasmid vector containing HLA-B*35:475 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:475 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:475 protein under different cellular conditions.	Inquiry
HLA-B*35:476 Genomic Plasmid Vector	PHLAG82513471	Plasmid vector containing HLA-B*35:476 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:476 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:476 protein under different cellular conditions.	Inquiry
HLA-B*35:477 Genomic Plasmid Vector	PHLAG82513472	Plasmid vector containing HLA-B*35:477 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:477 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:477 protein under different cellular conditions.	Inquiry

HLA-B*35:478 Genomic Plasmid Vector	PHLAG82513473	Plasmid vector containing HLA-B*35:478 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:478 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:478 protein under different cellular conditions.	Inquiry
HLA-B*35:479 Genomic Plasmid Vector	PHLAG82513474	Plasmid vector containing HLA-B*35:479 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:479 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:479 protein under different cellular conditions.	Inquiry
HLA-B*35:48 Genomic Plasmid Vector	PHLAG82513475	Plasmid vector containing HLA-B*35:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:48 protein under different cellular conditions.	Inquiry
HLA-B*35:480 Genomic Plasmid Vector	PHLAG82513476	Plasmid vector containing HLA-B*35:480 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:480 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:480 protein under different cellular conditions.	Inquiry
HLA-B*35:481 Genomic Plasmid Vector	PHLAG82513477	Plasmid vector containing HLA-B*35:481 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:481 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:481 protein under different cellular conditions.	Inquiry
HLA-B*35:482 Genomic Plasmid Vector	PHLAG82513478	Plasmid vector containing HLA-B*35:482 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:482 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:482 protein under different cellular conditions.	Inquiry
HLA-B*35:483 Genomic Plasmid Vector	PHLAG82513479	Plasmid vector containing HLA-B*35:483 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:483 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:483 protein under different cellular conditions.	Inquiry
HLA-B*35:484:01 Genomic Plasmid Vector	PHLAG825134880	Plasmid vector containing HLA-B*35:484:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:484:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:484:01 protein under different cellular conditions.	Inquiry
HLA-B*35:484:02 Genomic Plasmid Vector	PHLAG825134881	Plasmid vector containing HLA-B*35:484:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:484:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:484:02 protein under different cellular conditions.	Inquiry

HLA-B*35:485 Genomic Plasmid Vector	PHLAG82513482	Plasmid vector containing HLA-B*35:485 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:485 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:485 protein under different cellular conditions.	Inquiry
HLA-B*35:486 Genomic Plasmid Vector	PHLAG82513483	Plasmid vector containing HLA-B*35:486 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:486 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:486 protein under different cellular conditions.	Inquiry
HLA-B*35:487 Genomic Plasmid Vector	PHLAG82513484	Plasmid vector containing HLA-B*35:487 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:487 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:487 protein under different cellular conditions.	Inquiry
HLA-B*35:488 Genomic Plasmid Vector	PHLAG82513485	Plasmid vector containing HLA-B*35:488 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:488 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:488 protein under different cellular conditions.	Inquiry
HLA-B*35:489 Genomic Plasmid Vector	PHLAG82513486	Plasmid vector containing HLA-B*35:489 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:489 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:489 protein under different cellular conditions.	Inquiry
HLA-B*35:49:01 Genomic Plasmid Vector	PHLAG82513487	Plasmid vector containing HLA-B*35:49:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:49:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:49:01 protein under different cellular conditions.	Inquiry
HLA-B*35:49:02 Genomic Plasmid Vector	PHLAG82513488	Plasmid vector containing HLA-B*35:49:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:49:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:49:02 protein under different cellular conditions.	Inquiry
HLA-B*35:49:03 Genomic Plasmid Vector	PHLAG82513489	Plasmid vector containing HLA-B*35:49:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:49:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:49:03 protein under different cellular conditions.	Inquiry
HLA-B*35:490 Genomic Plasmid Vector	PHLAG82513490	Plasmid vector containing HLA-B*35:490 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:490 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:490 protein under different cellular conditions.	Inquiry

HLA-B*35:491 Genomic Plasmid Vector	PHLAG82513491	Plasmid vector containing HLA-B*35:491 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:491 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:491 protein under different cellular conditions.	Inquiry
HLA-B*35:492 Genomic Plasmid Vector	PHLAG82513492	Plasmid vector containing HLA-B*35:492 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:492 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:492 protein under different cellular conditions.	Inquiry
HLA-B*35:493 Genomic Plasmid Vector	PHLAG82513493	Plasmid vector containing HLA-B*35:493 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:493 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:493 protein under different cellular conditions.	Inquiry
HLA-B*35:494 Genomic Plasmid Vector	PHLAG82513494	Plasmid vector containing HLA-B*35:494 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:494 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:494 protein under different cellular conditions.	Inquiry
HLA-B*35:495 Genomic Plasmid Vector	PHLAG82513495	Plasmid vector containing HLA-B*35:495 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:495 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:495 protein under different cellular conditions.	Inquiry
HLA-B*35:496 Genomic Plasmid Vector	PHLAG82513496	Plasmid vector containing HLA-B*35:496 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:496 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:496 protein under different cellular conditions.	Inquiry
HLA-B*35:497 Genomic Plasmid Vector	PHLAG82513497	Plasmid vector containing HLA-B*35:497 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:497 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:497 protein under different cellular conditions.	Inquiry
HLA-B*35:498 Genomic Plasmid Vector	PHLAG82513498	Plasmid vector containing HLA-B*35:498 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:498 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:498 protein under different cellular conditions.	Inquiry
HLA-B*35:499 Genomic Plasmid Vector	PHLAG82513499	Plasmid vector containing HLA-B*35:499 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:499 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:499 protein under different cellular conditions.	Inquiry

HLA-B*35:50 Genomic Plasmid Vector	PHLAG82513500	Plasmid vector containing HLA-B*35:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:50 protein under different cellular conditions.	Inquiry
HLA-B*35:500 Genomic Plasmid Vector	PHLAG82513501	Plasmid vector containing HLA-B*35:500 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:500 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:500 protein under different cellular conditions.	Inquiry
HLA-B*35:501 Genomic Plasmid Vector	PHLAG82513502	Plasmid vector containing HLA-B*35:501 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:501 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:501 protein under different cellular conditions.	Inquiry
HLA-B*35:502 Genomic Plasmid Vector	PHLAG82513503	Plasmid vector containing HLA-B*35:502 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:502 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:502 protein under different cellular conditions.	Inquiry
HLA-B*35:503 Genomic Plasmid Vector	PHLAG82513504	Plasmid vector containing HLA-B*35:503 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:503 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:503 protein under different cellular conditions.	Inquiry
HLA-B*35:504 Genomic Plasmid Vector	PHLAG82513505	Plasmid vector containing HLA-B*35:504 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:504 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:504 protein under different cellular conditions.	Inquiry
HLA-B*35:505 Genomic Plasmid Vector	PHLAG82513506	Plasmid vector containing HLA-B*35:505 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:505 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:505 protein under different cellular conditions.	Inquiry
HLA-B*35:506 Genomic Plasmid Vector	PHLAG82513507	Plasmid vector containing HLA-B*35:506 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:506 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:506 protein under different cellular conditions.	Inquiry
HLA-B*35:507N Genomic Plasmid Vector	PHLAG82513508	Plasmid vector containing HLA-B*35:507N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:507N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:507N protein under different cellular conditions.	Inquiry

HLA-B*35:508N Genomic Plasmid Vector	PHLAG82513509	Plasmid vector containing HLA-B*35:508N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:508N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:508N protein under different cellular conditions.	Inquiry
HLA-B*35:509 Genomic Plasmid Vector	PHLAG825135110	Plasmid vector containing HLA-B*35:509 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:509 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:509 protein under different cellular conditions.	Inquiry
HLA-B*35:51:01 Genomic Plasmid Vector	PHLAG825135111	Plasmid vector containing HLA-B*35:51:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:51:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:51:01 protein under different cellular conditions.	Inquiry
HLA-B*35:51:02 Genomic Plasmid Vector	PHLAG825135112	Plasmid vector containing HLA-B*35:51:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:51:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:51:02 protein under different cellular conditions.	Inquiry
HLA-B*35:510 Genomic Plasmid Vector	PHLAG825135113	Plasmid vector containing HLA-B*35:510 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:510 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:510 protein under different cellular conditions.	Inquiry
HLA-B*35:511 Genomic Plasmid Vector	PHLAG825135114	Plasmid vector containing HLA-B*35:511 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:511 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:511 protein under different cellular conditions.	Inquiry
HLA-B*35:512 Genomic Plasmid Vector	PHLAG825135115	Plasmid vector containing HLA-B*35:512 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:512 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:512 protein under different cellular conditions.	Inquiry
HLA-B*35:513N Genomic Plasmid Vector	PHLAG825135116	Plasmid vector containing HLA-B*35:513N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:513N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:513N protein under different cellular conditions.	Inquiry
HLA-B*35:514:01 Genomic Plasmid Vector	PHLAG825135117	Plasmid vector containing HLA-B*35:514:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:514:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:514:01 protein under different cellular conditions.	Inquiry

HLA-B*35:514:02 Genomic Plasmid Vector	PHLAG82513518	Plasmid vector containing HLA-B*35:514:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:514:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:514:02 protein under different cellular conditions.	Inquiry
HLA-B*35:515 Genomic Plasmid Vector	PHLAG82513519	Plasmid vector containing HLA-B*35:515 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:515 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:515 protein under different cellular conditions.	Inquiry
HLA-B*35:516 Genomic Plasmid Vector	PHLAG82513520	Plasmid vector containing HLA-B*35:516 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:516 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:516 protein under different cellular conditions.	Inquiry
HLA-B*35:517 Genomic Plasmid Vector	PHLAG82513521	Plasmid vector containing HLA-B*35:517 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:517 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:517 protein under different cellular conditions.	Inquiry
HLA-B*35:518 Genomic Plasmid Vector	PHLAG82513522	Plasmid vector containing HLA-B*35:518 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:518 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:518 protein under different cellular conditions.	Inquiry
HLA-B*35:519 Genomic Plasmid Vector	PHLAG82513523	Plasmid vector containing HLA-B*35:519 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:519 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:519 protein under different cellular conditions.	Inquiry
HLA-B*35:52 Genomic Plasmid Vector	PHLAG82513524	Plasmid vector containing HLA-B*35:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:52 protein under different cellular conditions.	Inquiry
HLA-B*35:520 Genomic Plasmid Vector	PHLAG82513525	Plasmid vector containing HLA-B*35:520 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:520 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:520 protein under different cellular conditions.	Inquiry
HLA-B*35:521 Genomic Plasmid Vector	PHLAG82513526	Plasmid vector containing HLA-B*35:521 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:521 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:521 protein under different cellular conditions.	Inquiry

HLA-B*35:522 Genomic Plasmid Vector	PHLAG82513527	Plasmid vector containing HLA-B*35:522 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:522 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:522 protein under different cellular conditions.	Inquiry
HLA-B*35:523 Genomic Plasmid Vector	PHLAG82513528	Plasmid vector containing HLA-B*35:523 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:523 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:523 protein under different cellular conditions.	Inquiry
HLA-B*35:524 Genomic Plasmid Vector	PHLAG82513529	Plasmid vector containing HLA-B*35:524 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:524 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:524 protein under different cellular conditions.	Inquiry
HLA-B*35:525 Genomic Plasmid Vector	PHLAG82513530	Plasmid vector containing HLA-B*35:525 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:525 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:525 protein under different cellular conditions.	Inquiry
HLA-B*35:526 Genomic Plasmid Vector	PHLAG82513531	Plasmid vector containing HLA-B*35:526 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:526 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:526 protein under different cellular conditions.	Inquiry
HLA-B*35:527 Genomic Plasmid Vector	PHLAG82513532	Plasmid vector containing HLA-B*35:527 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:527 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:527 protein under different cellular conditions.	Inquiry
HLA-B*35:528 Genomic Plasmid Vector	PHLAG82513533	Plasmid vector containing HLA-B*35:528 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:528 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:528 protein under different cellular conditions.	Inquiry
HLA-B*35:529 Genomic Plasmid Vector	PHLAG82513534	Plasmid vector containing HLA-B*35:529 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:529 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:529 protein under different cellular conditions.	Inquiry
HLA-B*35:530 Genomic Plasmid Vector	PHLAG82513535	Plasmid vector containing HLA-B*35:530 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:530 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:530 protein under different cellular conditions.	Inquiry

HLA-B*35:531 Genomic Plasmid Vector	PHLAG82513536	Plasmid vector containing HLA-B*35:531 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:531 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:531 protein under different cellular conditions.	Inquiry
HLA-B*35:532 Genomic Plasmid Vector	PHLAG82513537	Plasmid vector containing HLA-B*35:532 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:532 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:532 protein under different cellular conditions.	Inquiry
HLA-B*35:533 Genomic Plasmid Vector	PHLAG82513538	Plasmid vector containing HLA-B*35:533 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:533 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:533 protein under different cellular conditions.	Inquiry
HLA-B*35:534 Genomic Plasmid Vector	PHLAG82513539	Plasmid vector containing HLA-B*35:534 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:534 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:534 protein under different cellular conditions.	Inquiry
HLA-B*35:535 Genomic Plasmid Vector	PHLAG82513540	Plasmid vector containing HLA-B*35:535 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:535 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:535 protein under different cellular conditions.	Inquiry
HLA-B*35:536 Genomic Plasmid Vector	PHLAG82513541	Plasmid vector containing HLA-B*35:536 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:536 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:536 protein under different cellular conditions.	Inquiry
HLA-B*35:537 Genomic Plasmid Vector	PHLAG82513542	Plasmid vector containing HLA-B*35:537 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:537 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:537 protein under different cellular conditions.	Inquiry
HLA-B*35:538 Genomic Plasmid Vector	PHLAG82513543	Plasmid vector containing HLA-B*35:538 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:538 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:538 protein under different cellular conditions.	Inquiry
HLA-B*35:539 Genomic Plasmid Vector	PHLAG82513544	Plasmid vector containing HLA-B*35:539 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:539 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:539 protein under different cellular conditions.	Inquiry

HLA-B*35:53N Genomic Plasmid Vector	PHLAG82513545	Plasmid vector containing HLA-B*35:53N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:53N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:53N protein under different cellular conditions.	Inquiry
HLA-B*35:54 Genomic Plasmid Vector	PHLAG82513546	Plasmid vector containing HLA-B*35:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:54 protein under different cellular conditions.	Inquiry
HLA-B*35:540 Genomic Plasmid Vector	PHLAG82513547	Plasmid vector containing HLA-B*35:540 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:540 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:540 protein under different cellular conditions.	Inquiry
HLA-B*35:541 Genomic Plasmid Vector	PHLAG82513548	Plasmid vector containing HLA-B*35:541 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:541 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:541 protein under different cellular conditions.	Inquiry
HLA-B*35:542N Genomic Plasmid Vector	PHLAG82513549	Plasmid vector containing HLA-B*35:542N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:542N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:542N protein under different cellular conditions.	Inquiry
HLA-B*35:543 Genomic Plasmid Vector	PHLAG82513550	Plasmid vector containing HLA-B*35:543 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:543 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:543 protein under different cellular conditions.	Inquiry
HLA-B*35:544 Genomic Plasmid Vector	PHLAG82513551	Plasmid vector containing HLA-B*35:544 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:544 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:544 protein under different cellular conditions.	Inquiry
HLA-B*35:545 Genomic Plasmid Vector	PHLAG82513552	Plasmid vector containing HLA-B*35:545 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:545 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:545 protein under different cellular conditions.	Inquiry
HLA-B*35:546 Genomic Plasmid Vector	PHLAG82513553	Plasmid vector containing HLA-B*35:546 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:546 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:546 protein under different cellular conditions.	Inquiry

HLA-B*35:547 Genomic Plasmid Vector	PHLAG82513554	Plasmid vector containing HLA-B*35:547 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:547 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:547 protein under different cellular conditions.	Inquiry
HLA-B*35:548 Genomic Plasmid Vector	PHLAG82513555	Plasmid vector containing HLA-B*35:548 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:548 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:548 protein under different cellular conditions.	Inquiry
HLA-B*35:549 Genomic Plasmid Vector	PHLAG82513556	Plasmid vector containing HLA-B*35:549 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:549 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:549 protein under different cellular conditions.	Inquiry
HLA-B*35:55 Genomic Plasmid Vector	PHLAG82513557	Plasmid vector containing HLA-B*35:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:55 protein under different cellular conditions.	Inquiry
HLA-B*35:550 Genomic Plasmid Vector	PHLAG82513558	Plasmid vector containing HLA-B*35:550 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:550 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:550 protein under different cellular conditions.	Inquiry
HLA-B*35:551N Genomic Plasmid Vector	PHLAG82513559	Plasmid vector containing HLA-B*35:551N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:551N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:551N protein under different cellular conditions.	Inquiry
HLA-B*35:552 Genomic Plasmid Vector	PHLAG82513560	Plasmid vector containing HLA-B*35:552 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:552 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:552 protein under different cellular conditions.	Inquiry
HLA-B*35:553 Genomic Plasmid Vector	PHLAG82513561	Plasmid vector containing HLA-B*35:553 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:553 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:553 protein under different cellular conditions.	Inquiry
HLA-B*35:554 Genomic Plasmid Vector	PHLAG82513562	Plasmid vector containing HLA-B*35:554 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:554 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:554 protein under different cellular conditions.	Inquiry

HLA-B*35:555 Genomic Plasmid Vector	PHLAG82513563	Plasmid vector containing HLA-B*35:555 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:555 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:555 protein under different cellular conditions.	Inquiry
HLA-B*35:556Q Genomic Plasmid Vector	PHLAG82513564	Plasmid vector containing HLA-B*35:556Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:556Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:556Q protein under different cellular conditions.	Inquiry
HLA-B*35:557 Genomic Plasmid Vector	PHLAG82513565	Plasmid vector containing HLA-B*35:557 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:557 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:557 protein under different cellular conditions.	Inquiry
HLA-B*35:558 Genomic Plasmid Vector	PHLAG82513566	Plasmid vector containing HLA-B*35:558 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:558 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:558 protein under different cellular conditions.	Inquiry
HLA-B*35:559 Genomic Plasmid Vector	PHLAG82513567	Plasmid vector containing HLA-B*35:559 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:559 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:559 protein under different cellular conditions.	Inquiry
HLA-B*35:56 Genomic Plasmid Vector	PHLAG82513568	Plasmid vector containing HLA-B*35:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:56 protein under different cellular conditions.	Inquiry
HLA-B*35:560 Genomic Plasmid Vector	PHLAG82513569	Plasmid vector containing HLA-B*35:560 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:560 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:560 protein under different cellular conditions.	Inquiry
HLA-B*35:561 Genomic Plasmid Vector	PHLAG82513570	Plasmid vector containing HLA-B*35:561 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:561 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:561 protein under different cellular conditions.	Inquiry
HLA-B*35:562 Genomic Plasmid Vector	PHLAG82513571	Plasmid vector containing HLA-B*35:562 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:562 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:562 protein under different cellular conditions.	Inquiry

HLA-B*35:563 Genomic Plasmid Vector	PHLAG82513572	Plasmid vector containing HLA-B*35:563 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:563 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:563 protein under different cellular conditions.	Inquiry
HLA-B*35:564 Genomic Plasmid Vector	PHLAG82513573	Plasmid vector containing HLA-B*35:564 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:564 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:564 protein under different cellular conditions.	Inquiry
HLA-B*35:565 Genomic Plasmid Vector	PHLAG82513574	Plasmid vector containing HLA-B*35:565 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:565 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:565 protein under different cellular conditions.	Inquiry
HLA-B*35:566 Genomic Plasmid Vector	PHLAG82513575	Plasmid vector containing HLA-B*35:566 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:566 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:566 protein under different cellular conditions.	Inquiry
HLA-B*35:567 Genomic Plasmid Vector	PHLAG82513576	Plasmid vector containing HLA-B*35:567 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:567 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:567 protein under different cellular conditions.	Inquiry
HLA-B*35:568 Genomic Plasmid Vector	PHLAG82513577	Plasmid vector containing HLA-B*35:568 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:568 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:568 protein under different cellular conditions.	Inquiry
HLA-B*35:569 Genomic Plasmid Vector	PHLAG82513578	Plasmid vector containing HLA-B*35:569 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:569 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:569 protein under different cellular conditions.	Inquiry
HLA-B*35:57 Genomic Plasmid Vector	PHLAG82513579	Plasmid vector containing HLA-B*35:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:57 protein under different cellular conditions.	Inquiry
HLA-B*35:570 Genomic Plasmid Vector	PHLAG82513580	Plasmid vector containing HLA-B*35:570 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:570 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:570 protein under different cellular conditions.	Inquiry

HLA-B*35:571 Genomic Plasmid Vector	PHLAG82513581	Plasmid vector containing HLA-B*35:571 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:571 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:571 protein under different cellular conditions.	Inquiry
HLA-B*35:572 Genomic Plasmid Vector	PHLAG82513582	Plasmid vector containing HLA-B*35:572 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:572 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:572 protein under different cellular conditions.	Inquiry
HLA-B*35:573 Genomic Plasmid Vector	PHLAG82513583	Plasmid vector containing HLA-B*35:573 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:573 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:573 protein under different cellular conditions.	Inquiry
HLA-B*35:574N Genomic Plasmid Vector	PHLAG82513584	Plasmid vector containing HLA-B*35:574N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:574N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:574N protein under different cellular conditions.	Inquiry
HLA-B*35:575 Genomic Plasmid Vector	PHLAG82513585	Plasmid vector containing HLA-B*35:575 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:575 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:575 protein under different cellular conditions.	Inquiry
HLA-B*35:576 Genomic Plasmid Vector	PHLAG82513586	Plasmid vector containing HLA-B*35:576 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:576 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:576 protein under different cellular conditions.	Inquiry
HLA-B*35:577 Genomic Plasmid Vector	PHLAG82513587	Plasmid vector containing HLA-B*35:577 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:577 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:577 protein under different cellular conditions.	Inquiry
HLA-B*35:578 Genomic Plasmid Vector	PHLAG82513588	Plasmid vector containing HLA-B*35:578 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:578 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:578 protein under different cellular conditions.	Inquiry
HLA-B*35:579 Genomic Plasmid Vector	PHLAG82513589	Plasmid vector containing HLA-B*35:579 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:579 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:579 protein under different cellular conditions.	Inquiry

HLA-B*35:58 Genomic Plasmid Vector	PHLAG82513590	Plasmid vector containing HLA-B*35:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:58 protein under different cellular conditions.	Inquiry
HLA-B*35:580 Genomic Plasmid Vector	PHLAG82513591	Plasmid vector containing HLA-B*35:580 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:580 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:580 protein under different cellular conditions.	Inquiry
HLA-B*35:581 Genomic Plasmid Vector	PHLAG82513592	Plasmid vector containing HLA-B*35:581 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:581 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:581 protein under different cellular conditions.	Inquiry
HLA-B*35:582 Genomic Plasmid Vector	PHLAG82513593	Plasmid vector containing HLA-B*35:582 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:582 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:582 protein under different cellular conditions.	Inquiry
HLA-B*35:583 Genomic Plasmid Vector	PHLAG82513594	Plasmid vector containing HLA-B*35:583 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:583 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:583 protein under different cellular conditions.	Inquiry
HLA-B*35:584 Genomic Plasmid Vector	PHLAG82513595	Plasmid vector containing HLA-B*35:584 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:584 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:584 protein under different cellular conditions.	Inquiry
HLA-B*35:585 Genomic Plasmid Vector	PHLAG82513596	Plasmid vector containing HLA-B*35:585 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:585 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:585 protein under different cellular conditions.	Inquiry
HLA-B*35:586 Genomic Plasmid Vector	PHLAG82513597	Plasmid vector containing HLA-B*35:586 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:586 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:586 protein under different cellular conditions.	Inquiry
HLA-B*35:587 Genomic Plasmid Vector	PHLAG82513598	Plasmid vector containing HLA-B*35:587 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:587 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:587 protein under different cellular conditions.	Inquiry

HLA-B*35:588 Genomic Plasmid Vector	PHLAG82513599	Plasmid vector containing HLA-B*35:588 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:588 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:588 protein under different cellular conditions.	Inquiry
HLA-B*35:589 Genomic Plasmid Vector	PHLAG825136000	Plasmid vector containing HLA-B*35:589 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:589 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:589 protein under different cellular conditions.	Inquiry
HLA-B*35:59:01 Genomic Plasmid Vector	PHLAG825136001	Plasmid vector containing HLA-B*35:59:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:59:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:59:01 protein under different cellular conditions.	Inquiry
HLA-B*35:59:02 Genomic Plasmid Vector	PHLAG825136002	Plasmid vector containing HLA-B*35:59:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:59:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:59:02 protein under different cellular conditions.	Inquiry
HLA-B*35:590 Genomic Plasmid Vector	PHLAG825136003	Plasmid vector containing HLA-B*35:590 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:590 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:590 protein under different cellular conditions.	Inquiry
HLA-B*35:591 Genomic Plasmid Vector	PHLAG825136004	Plasmid vector containing HLA-B*35:591 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:591 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:591 protein under different cellular conditions.	Inquiry
HLA-B*35:592 Genomic Plasmid Vector	PHLAG825136005	Plasmid vector containing HLA-B*35:592 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:592 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:592 protein under different cellular conditions.	Inquiry
HLA-B*35:593 Genomic Plasmid Vector	PHLAG825136006	Plasmid vector containing HLA-B*35:593 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:593 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:593 protein under different cellular conditions.	Inquiry
HLA-B*35:594 Genomic Plasmid Vector	PHLAG825136007	Plasmid vector containing HLA-B*35:594 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:594 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:594 protein under different cellular conditions.	Inquiry

HLA-B*35:595 Genomic Plasmid Vector	PHLAG82513608	Plasmid vector containing HLA-B*35:595 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:595 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:595 protein under different cellular conditions.	Inquiry
HLA-B*35:596 Genomic Plasmid Vector	PHLAG82513609	Plasmid vector containing HLA-B*35:596 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:596 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:596 protein under different cellular conditions.	Inquiry
HLA-B*35:597N Genomic Plasmid Vector	PHLAG825136110	Plasmid vector containing HLA-B*35:597N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:597N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:597N protein under different cellular conditions.	Inquiry
HLA-B*35:598 Genomic Plasmid Vector	PHLAG825136111	Plasmid vector containing HLA-B*35:598 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:598 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:598 protein under different cellular conditions.	Inquiry
HLA-B*35:599 Genomic Plasmid Vector	PHLAG825136112	Plasmid vector containing HLA-B*35:599 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:599 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:599 protein under different cellular conditions.	Inquiry
HLA-B*35:60 Genomic Plasmid Vector	PHLAG825136113	Plasmid vector containing HLA-B*35:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:60 protein under different cellular conditions.	Inquiry
HLA-B*35:600 Genomic Plasmid Vector	PHLAG825136114	Plasmid vector containing HLA-B*35:600 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:600 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:600 protein under different cellular conditions.	Inquiry
HLA-B*35:601N Genomic Plasmid Vector	PHLAG825136115	Plasmid vector containing HLA-B*35:601N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:601N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:601N protein under different cellular conditions.	Inquiry
HLA-B*35:602 Genomic Plasmid Vector	PHLAG825136116	Plasmid vector containing HLA-B*35:602 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:602 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:602 protein under different cellular conditions.	Inquiry

HLA-B*35:603 Genomic Plasmid Vector	PHLAG82513617	Plasmid vector containing HLA-B*35:603 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:603 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:603 protein under different cellular conditions.	Inquiry
HLA-B*35:604 Genomic Plasmid Vector	PHLAG82513618	Plasmid vector containing HLA-B*35:604 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:604 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:604 protein under different cellular conditions.	Inquiry
HLA-B*35:605 Genomic Plasmid Vector	PHLAG82513619	Plasmid vector containing HLA-B*35:605 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:605 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:605 protein under different cellular conditions.	Inquiry
HLA-B*35:606 Genomic Plasmid Vector	PHLAG82513620	Plasmid vector containing HLA-B*35:606 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:606 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:606 protein under different cellular conditions.	Inquiry
HLA-B*35:607 Genomic Plasmid Vector	PHLAG82513621	Plasmid vector containing HLA-B*35:607 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:607 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:607 protein under different cellular conditions.	Inquiry
HLA-B*35:608 Genomic Plasmid Vector	PHLAG82513622	Plasmid vector containing HLA-B*35:608 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:608 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:608 protein under different cellular conditions.	Inquiry
HLA-B*35:609N Genomic Plasmid Vector	PHLAG82513623	Plasmid vector containing HLA-B*35:609N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:609N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:609N protein under different cellular conditions.	Inquiry
HLA-B*35:61:01 Genomic Plasmid Vector	PHLAG82513624	Plasmid vector containing HLA-B*35:61:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:61:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:61:01 protein under different cellular conditions.	Inquiry
HLA-B*35:61:02 Genomic Plasmid Vector	PHLAG82513625	Plasmid vector containing HLA-B*35:61:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:61:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:61:02 protein under different cellular conditions.	Inquiry

HLA-B*35:610 Genomic Plasmid Vector	PHLAG82513626	Plasmid vector containing HLA-B*35:610 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:610 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:610 protein under different cellular conditions.	Inquiry
HLA-B*35:611 Genomic Plasmid Vector	PHLAG82513627	Plasmid vector containing HLA-B*35:611 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:611 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:611 protein under different cellular conditions.	Inquiry
HLA-B*35:612 Genomic Plasmid Vector	PHLAG82513628	Plasmid vector containing HLA-B*35:612 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:612 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:612 protein under different cellular conditions.	Inquiry
HLA-B*35:613 Genomic Plasmid Vector	PHLAG82513629	Plasmid vector containing HLA-B*35:613 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:613 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:613 protein under different cellular conditions.	Inquiry
HLA-B*35:614 Genomic Plasmid Vector	PHLAG82513630	Plasmid vector containing HLA-B*35:614 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:614 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:614 protein under different cellular conditions.	Inquiry
HLA-B*35:615 Genomic Plasmid Vector	PHLAG82513631	Plasmid vector containing HLA-B*35:615 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:615 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:615 protein under different cellular conditions.	Inquiry
HLA-B*35:616 Genomic Plasmid Vector	PHLAG82513632	Plasmid vector containing HLA-B*35:616 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:616 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:616 protein under different cellular conditions.	Inquiry
HLA-B*35:617 Genomic Plasmid Vector	PHLAG82513633	Plasmid vector containing HLA-B*35:617 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:617 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:617 protein under different cellular conditions.	Inquiry
HLA-B*35:618 Genomic Plasmid Vector	PHLAG82513634	Plasmid vector containing HLA-B*35:618 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:618 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:618 protein under different cellular conditions.	Inquiry

HLA-B*35:619 Genomic Plasmid Vector	PHLAG82513635	Plasmid vector containing HLA-B*35:619 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:619 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:619 protein under different cellular conditions.	Inquiry
HLA-B*35:62 Genomic Plasmid Vector	PHLAG82513636	Plasmid vector containing HLA-B*35:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:62 protein under different cellular conditions.	Inquiry
HLA-B*35:620 Genomic Plasmid Vector	PHLAG82513637	Plasmid vector containing HLA-B*35:620 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:620 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:620 protein under different cellular conditions.	Inquiry
HLA-B*35:621 Genomic Plasmid Vector	PHLAG82513638	Plasmid vector containing HLA-B*35:621 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:621 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:621 protein under different cellular conditions.	Inquiry
HLA-B*35:622 Genomic Plasmid Vector	PHLAG82513639	Plasmid vector containing HLA-B*35:622 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:622 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:622 protein under different cellular conditions.	Inquiry
HLA-B*35:623 Genomic Plasmid Vector	PHLAG82513640	Plasmid vector containing HLA-B*35:623 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:623 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:623 protein under different cellular conditions.	Inquiry
HLA-B*35:624 Genomic Plasmid Vector	PHLAG82513641	Plasmid vector containing HLA-B*35:624 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:624 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:624 protein under different cellular conditions.	Inquiry
HLA-B*35:625 Genomic Plasmid Vector	PHLAG82513642	Plasmid vector containing HLA-B*35:625 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:625 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:625 protein under different cellular conditions.	Inquiry
HLA-B*35:626 Genomic Plasmid Vector	PHLAG82513643	Plasmid vector containing HLA-B*35:626 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:626 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:626 protein under different cellular conditions.	Inquiry

HLA-B*35:627 Genomic Plasmid Vector	PHLAG82513644	Plasmid vector containing HLA-B*35:627 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:627 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:627 protein under different cellular conditions.	Inquiry
HLA-B*35:628 Genomic Plasmid Vector	PHLAG82513645	Plasmid vector containing HLA-B*35:628 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:628 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:628 protein under different cellular conditions.	Inquiry
HLA-B*35:629N Genomic Plasmid Vector	PHLAG82513646	Plasmid vector containing HLA-B*35:629N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:629N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:629N protein under different cellular conditions.	Inquiry
HLA-B*35:63 Genomic Plasmid Vector	PHLAG82513647	Plasmid vector containing HLA-B*35:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:63 protein under different cellular conditions.	Inquiry
HLA-B*35:630 Genomic Plasmid Vector	PHLAG82513648	Plasmid vector containing HLA-B*35:630 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:630 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:630 protein under different cellular conditions.	Inquiry
HLA-B*35:631 Genomic Plasmid Vector	PHLAG82513649	Plasmid vector containing HLA-B*35:631 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:631 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:631 protein under different cellular conditions.	Inquiry
HLA-B*35:632 Genomic Plasmid Vector	PHLAG82513650	Plasmid vector containing HLA-B*35:632 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:632 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:632 protein under different cellular conditions.	Inquiry
HLA-B*35:633 Genomic Plasmid Vector	PHLAG82513651	Plasmid vector containing HLA-B*35:633 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:633 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:633 protein under different cellular conditions.	Inquiry
HLA-B*35:634 Genomic Plasmid Vector	PHLAG82513652	Plasmid vector containing HLA-B*35:634 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:634 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:634 protein under different cellular conditions.	Inquiry

HLA-B*35:635 Genomic Plasmid Vector	PHLAG82513653	Plasmid vector containing HLA-B*35:635 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:635 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:635 protein under different cellular conditions.	Inquiry
HLA-B*35:636N Genomic Plasmid Vector	PHLAG82513654	Plasmid vector containing HLA-B*35:636N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:636N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:636N protein under different cellular conditions.	Inquiry
HLA-B*35:637 Genomic Plasmid Vector	PHLAG82513655	Plasmid vector containing HLA-B*35:637 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:637 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:637 protein under different cellular conditions.	Inquiry
HLA-B*35:638 Genomic Plasmid Vector	PHLAG82513656	Plasmid vector containing HLA-B*35:638 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:638 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:638 protein under different cellular conditions.	Inquiry
HLA-B*35:639 Genomic Plasmid Vector	PHLAG82513657	Plasmid vector containing HLA-B*35:639 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:639 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:639 protein under different cellular conditions.	Inquiry
HLA-B*35:64:01 Genomic Plasmid Vector	PHLAG82513658	Plasmid vector containing HLA-B*35:64:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:64:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:64:01 protein under different cellular conditions.	Inquiry
HLA-B*35:64:02 Genomic Plasmid Vector	PHLAG82513659	Plasmid vector containing HLA-B*35:64:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:64:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:64:02 protein under different cellular conditions.	Inquiry
HLA-B*35:640 Genomic Plasmid Vector	PHLAG82513660	Plasmid vector containing HLA-B*35:640 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:640 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:640 protein under different cellular conditions.	Inquiry
HLA-B*35:641 Genomic Plasmid Vector	PHLAG82513661	Plasmid vector containing HLA-B*35:641 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:641 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:641 protein under different cellular conditions.	Inquiry

HLA-B*35:642 Genomic Plasmid Vector	PHLAG82513662	Plasmid vector containing HLA-B*35:642 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:642 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:642 protein under different cellular conditions.	Inquiry
HLA-B*35:643 Genomic Plasmid Vector	PHLAG82513663	Plasmid vector containing HLA-B*35:643 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:643 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:643 protein under different cellular conditions.	Inquiry
HLA-B*35:644 Genomic Plasmid Vector	PHLAG82513664	Plasmid vector containing HLA-B*35:644 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:644 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:644 protein under different cellular conditions.	Inquiry
HLA-B*35:645 Genomic Plasmid Vector	PHLAG82513665	Plasmid vector containing HLA-B*35:645 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:645 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:645 protein under different cellular conditions.	Inquiry
HLA-B*35:646 Genomic Plasmid Vector	PHLAG82513666	Plasmid vector containing HLA-B*35:646 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:646 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:646 protein under different cellular conditions.	Inquiry
HLA-B*35:647 Genomic Plasmid Vector	PHLAG82513667	Plasmid vector containing HLA-B*35:647 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:647 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:647 protein under different cellular conditions.	Inquiry
HLA-B*35:648 Genomic Plasmid Vector	PHLAG82513668	Plasmid vector containing HLA-B*35:648 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:648 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:648 protein under different cellular conditions.	Inquiry
HLA-B*35:649 Genomic Plasmid Vector	PHLAG82513669	Plasmid vector containing HLA-B*35:649 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:649 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:649 protein under different cellular conditions.	Inquiry
HLA-B*35:650 Genomic Plasmid Vector	PHLAG82513670	Plasmid vector containing HLA-B*35:650 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:650 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:650 protein under different cellular conditions.	Inquiry

HLA-B*35:651 Genomic Plasmid Vector	PHLAG82513671	Plasmid vector containing HLA-B*35:651 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:651 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:651 protein under different cellular conditions.	Inquiry
HLA-B*35:65Q Genomic Plasmid Vector	PHLAG82513672	Plasmid vector containing HLA-B*35:65Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:65Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:65Q protein under different cellular conditions.	Inquiry
HLA-B*35:66 Genomic Plasmid Vector	PHLAG82513673	Plasmid vector containing HLA-B*35:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:66 protein under different cellular conditions.	Inquiry
HLA-B*35:67 Genomic Plasmid Vector	PHLAG82513674	Plasmid vector containing HLA-B*35:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:67 protein under different cellular conditions.	Inquiry
HLA-B*35:68:01 Genomic Plasmid Vector	PHLAG82513675	Plasmid vector containing HLA-B*35:68:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:68:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:68:01 protein under different cellular conditions.	Inquiry
HLA-B*35:68:02 Genomic Plasmid Vector	PHLAG82513676	Plasmid vector containing HLA-B*35:68:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:68:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:68:02 protein under different cellular conditions.	Inquiry
HLA-B*35:69 Genomic Plasmid Vector	PHLAG82513677	Plasmid vector containing HLA-B*35:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:69 protein under different cellular conditions.	Inquiry
HLA-B*35:70 Genomic Plasmid Vector	PHLAG82513678	Plasmid vector containing HLA-B*35:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:70 protein under different cellular conditions.	Inquiry
HLA-B*35:71 Genomic Plasmid Vector	PHLAG82513679	Plasmid vector containing HLA-B*35:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:71 protein under different cellular conditions.	Inquiry

HLA-B*35:72 Genomic Plasmid Vector	PHLAG82513680	Plasmid vector containing HLA-B*35:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:72 protein under different cellular conditions.	Inquiry
HLA-B*35:74 Genomic Plasmid Vector	PHLAG82513681	Plasmid vector containing HLA-B*35:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:74 protein under different cellular conditions.	Inquiry
HLA-B*35:75 Genomic Plasmid Vector	PHLAG82513682	Plasmid vector containing HLA-B*35:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:75 protein under different cellular conditions.	Inquiry
HLA-B*35:76 Genomic Plasmid Vector	PHLAG82513683	Plasmid vector containing HLA-B*35:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:76 protein under different cellular conditions.	Inquiry
HLA-B*35:77 Genomic Plasmid Vector	PHLAG82513684	Plasmid vector containing HLA-B*35:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:77 protein under different cellular conditions.	Inquiry
HLA-B*35:78 Genomic Plasmid Vector	PHLAG82513685	Plasmid vector containing HLA-B*35:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:78 protein under different cellular conditions.	Inquiry
HLA-B*35:79 Genomic Plasmid Vector	PHLAG82513686	Plasmid vector containing HLA-B*35:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:79 protein under different cellular conditions.	Inquiry
HLA-B*35:80 Genomic Plasmid Vector	PHLAG82513687	Plasmid vector containing HLA-B*35:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:80 protein under different cellular conditions.	Inquiry
HLA-B*35:81 Genomic Plasmid Vector	PHLAG82513688	Plasmid vector containing HLA-B*35:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:81 protein under different cellular conditions.	Inquiry

HLA-B*35:82:01 Genomic Plasmid Vector	PHLAG82513689	Plasmid vector containing HLA-B*35:82:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:82:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:82:01 protein under different cellular conditions.	Inquiry
HLA-B*35:82:02 Genomic Plasmid Vector	PHLAG82513690	Plasmid vector containing HLA-B*35:82:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:82:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:82:02 protein under different cellular conditions.	Inquiry
HLA-B*35:83 Genomic Plasmid Vector	PHLAG82513691	Plasmid vector containing HLA-B*35:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:83 protein under different cellular conditions.	Inquiry
HLA-B*35:84 Genomic Plasmid Vector	PHLAG82513692	Plasmid vector containing HLA-B*35:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:84 protein under different cellular conditions.	Inquiry
HLA-B*35:85 Genomic Plasmid Vector	PHLAG82513693	Plasmid vector containing HLA-B*35:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:85 protein under different cellular conditions.	Inquiry
HLA-B*35:86 Genomic Plasmid Vector	PHLAG82513694	Plasmid vector containing HLA-B*35:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:86 protein under different cellular conditions.	Inquiry
HLA-B*35:87 Genomic Plasmid Vector	PHLAG82513695	Plasmid vector containing HLA-B*35:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:87 protein under different cellular conditions.	Inquiry
HLA-B*35:88 Genomic Plasmid Vector	PHLAG82513696	Plasmid vector containing HLA-B*35:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:88 protein under different cellular conditions.	Inquiry
HLA-B*35:89 Genomic Plasmid Vector	PHLAG82513697	Plasmid vector containing HLA-B*35:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:89 protein under different cellular conditions.	Inquiry

HLA-B*35:90 Genomic Plasmid Vector	PHLAG82513698	Plasmid vector containing HLA-B*35:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:90 protein under different cellular conditions.	Inquiry
HLA-B*35:91 Genomic Plasmid Vector	PHLAG82513699	Plasmid vector containing HLA-B*35:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:91 protein under different cellular conditions.	Inquiry
HLA-B*35:92 Genomic Plasmid Vector	PHLAG825137000	Plasmid vector containing HLA-B*35:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:92 protein under different cellular conditions.	Inquiry
HLA-B*35:93 Genomic Plasmid Vector	PHLAG825137001	Plasmid vector containing HLA-B*35:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:93 protein under different cellular conditions.	Inquiry
HLA-B*35:94 Genomic Plasmid Vector	PHLAG825137002	Plasmid vector containing HLA-B*35:94 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:94 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:94 protein under different cellular conditions.	Inquiry
HLA-B*35:95 Genomic Plasmid Vector	PHLAG825137003	Plasmid vector containing HLA-B*35:95 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:95 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:95 protein under different cellular conditions.	Inquiry
HLA-B*35:96 Genomic Plasmid Vector	PHLAG825137004	Plasmid vector containing HLA-B*35:96 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:96 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:96 protein under different cellular conditions.	Inquiry
HLA-B*35:97 Genomic Plasmid Vector	PHLAG825137005	Plasmid vector containing HLA-B*35:97 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:97 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:97 protein under different cellular conditions.	Inquiry
HLA-B*35:98 Genomic Plasmid Vector	PHLAG825137006	Plasmid vector containing HLA-B*35:98 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:98 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:98 protein under different cellular conditions.	Inquiry

HLA-B*35:99 Genomic Plasmid Vector	PHLAG82513707	Plasmid vector containing HLA-B*35:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*35:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*35:99 protein under different cellular conditions.	Inquiry
HLA-B*3573 Genomic Plasmid Vector	PHLAG82513708	Plasmid vector containing HLA-B*3573 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*3573 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*3573 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:01 Genomic Plasmid Vector	PHLAG82513709	Plasmid vector containing HLA-B*37:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:01 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:02 Genomic Plasmid Vector	PHLAG825137110	Plasmid vector containing HLA-B*37:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:02 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:03 Genomic Plasmid Vector	PHLAG825137111	Plasmid vector containing HLA-B*37:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:03 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:04 Genomic Plasmid Vector	PHLAG825137112	Plasmid vector containing HLA-B*37:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:04 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:05 Genomic Plasmid Vector	PHLAG825137113	Plasmid vector containing HLA-B*37:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:05 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:06 Genomic Plasmid Vector	PHLAG825137114	Plasmid vector containing HLA-B*37:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:06 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:07 Genomic Plasmid Vector	PHLAG825137115	Plasmid vector containing HLA-B*37:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:07 protein under different cellular conditions.	Inquiry

HLA-B*37:01:01:08 Genomic Plasmid Vector	PHLAG82513716	Plasmid vector containing HLA-B*37:01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:08 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:09 Genomic Plasmid Vector	PHLAG82513717	Plasmid vector containing HLA-B*37:01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:09 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:10 Genomic Plasmid Vector	PHLAG82513718	Plasmid vector containing HLA-B*37:01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:10 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:11 Genomic Plasmid Vector	PHLAG82513719	Plasmid vector containing HLA-B*37:01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:11 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:12 Genomic Plasmid Vector	PHLAG82513720	Plasmid vector containing HLA-B*37:01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:12 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:13 Genomic Plasmid Vector	PHLAG82513721	Plasmid vector containing HLA-B*37:01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:13 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:14 Genomic Plasmid Vector	PHLAG82513722	Plasmid vector containing HLA-B*37:01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:14 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:15 Genomic Plasmid Vector	PHLAG82513723	Plasmid vector containing HLA-B*37:01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:15 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:16 Genomic Plasmid Vector	PHLAG82513724	Plasmid vector containing HLA-B*37:01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:16 protein under different cellular conditions.	Inquiry

HLA-B*37:01:01:17 Genomic Plasmid Vector	PHLAG82513725	Plasmid vector containing HLA-B*37:01:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:17 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:18 Genomic Plasmid Vector	PHLAG82513726	Plasmid vector containing HLA-B*37:01:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:18 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:19 Genomic Plasmid Vector	PHLAG82513727	Plasmid vector containing HLA-B*37:01:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:19 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:20 Genomic Plasmid Vector	PHLAG82513728	Plasmid vector containing HLA-B*37:01:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:20 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:21 Genomic Plasmid Vector	PHLAG82513729	Plasmid vector containing HLA-B*37:01:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:21 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:22 Genomic Plasmid Vector	PHLAG82513730	Plasmid vector containing HLA-B*37:01:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:22 protein under different cellular conditions.	Inquiry
HLA-B*37:01:01:23 Genomic Plasmid Vector	PHLAG82513731	Plasmid vector containing HLA-B*37:01:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:01:23 protein under different cellular conditions.	Inquiry
HLA-B*37:01:02 Genomic Plasmid Vector	PHLAG82513732	Plasmid vector containing HLA-B*37:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:02 protein under different cellular conditions.	Inquiry
HLA-B*37:01:03 Genomic Plasmid Vector	PHLAG82513733	Plasmid vector containing HLA-B*37:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:03 protein under different cellular conditions.	Inquiry

HLA-B*37:01:04 Genomic Plasmid Vector	PHLAG82513734	Plasmid vector containing HLA-B*37:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:04 protein under different cellular conditions.	Inquiry
HLA-B*37:01:05 Genomic Plasmid Vector	PHLAG82513735	Plasmid vector containing HLA-B*37:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:05 protein under different cellular conditions.	Inquiry
HLA-B*37:01:06 Genomic Plasmid Vector	PHLAG82513736	Plasmid vector containing HLA-B*37:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:06 protein under different cellular conditions.	Inquiry
HLA-B*37:01:07 Genomic Plasmid Vector	PHLAG82513737	Plasmid vector containing HLA-B*37:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:07 protein under different cellular conditions.	Inquiry
HLA-B*37:01:08 Genomic Plasmid Vector	PHLAG82513738	Plasmid vector containing HLA-B*37:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:08 protein under different cellular conditions.	Inquiry
HLA-B*37:01:09 Genomic Plasmid Vector	PHLAG82513739	Plasmid vector containing HLA-B*37:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:09 protein under different cellular conditions.	Inquiry
HLA-B*37:01:10 Genomic Plasmid Vector	PHLAG82513740	Plasmid vector containing HLA-B*37:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:10 protein under different cellular conditions.	Inquiry
HLA-B*37:01:11 Genomic Plasmid Vector	PHLAG82513741	Plasmid vector containing HLA-B*37:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:11 protein under different cellular conditions.	Inquiry
HLA-B*37:01:12 Genomic Plasmid Vector	PHLAG82513742	Plasmid vector containing HLA-B*37:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:12 protein under different cellular conditions.	Inquiry

HLA-B*37:01:13 Genomic Plasmid Vector	PHLAG82513743	Plasmid vector containing HLA-B*37:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:13 protein under different cellular conditions.	Inquiry
HLA-B*37:01:14 Genomic Plasmid Vector	PHLAG82513744	Plasmid vector containing HLA-B*37:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:14 protein under different cellular conditions.	Inquiry
HLA-B*37:01:15 Genomic Plasmid Vector	PHLAG82513745	Plasmid vector containing HLA-B*37:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:15 protein under different cellular conditions.	Inquiry
HLA-B*37:01:16 Genomic Plasmid Vector	PHLAG82513746	Plasmid vector containing HLA-B*37:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:16 protein under different cellular conditions.	Inquiry
HLA-B*37:01:17 Genomic Plasmid Vector	PHLAG82513747	Plasmid vector containing HLA-B*37:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:17 protein under different cellular conditions.	Inquiry
HLA-B*37:01:18 Genomic Plasmid Vector	PHLAG82513748	Plasmid vector containing HLA-B*37:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:18 protein under different cellular conditions.	Inquiry
HLA-B*37:01:19 Genomic Plasmid Vector	PHLAG82513749	Plasmid vector containing HLA-B*37:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:19 protein under different cellular conditions.	Inquiry
HLA-B*37:01:20 Genomic Plasmid Vector	PHLAG82513750	Plasmid vector containing HLA-B*37:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:20 protein under different cellular conditions.	Inquiry
HLA-B*37:01:21 Genomic Plasmid Vector	PHLAG82513751	Plasmid vector containing HLA-B*37:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:21 protein under different cellular conditions.	Inquiry

HLA-B*37:01:22 Genomic Plasmid Vector	PHLAG82513752	Plasmid vector containing HLA-B*37:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:22 protein under different cellular conditions.	Inquiry
HLA-B*37:01:23 Genomic Plasmid Vector	PHLAG82513753	Plasmid vector containing HLA-B*37:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:23 protein under different cellular conditions.	Inquiry
HLA-B*37:01:24 Genomic Plasmid Vector	PHLAG82513754	Plasmid vector containing HLA-B*37:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:24 protein under different cellular conditions.	Inquiry
HLA-B*37:01:25 Genomic Plasmid Vector	PHLAG82513755	Plasmid vector containing HLA-B*37:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:25 protein under different cellular conditions.	Inquiry
HLA-B*37:01:26 Genomic Plasmid Vector	PHLAG82513756	Plasmid vector containing HLA-B*37:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:26 protein under different cellular conditions.	Inquiry
HLA-B*37:01:27 Genomic Plasmid Vector	PHLAG82513757	Plasmid vector containing HLA-B*37:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:27 protein under different cellular conditions.	Inquiry
HLA-B*37:01:28 Genomic Plasmid Vector	PHLAG82513758	Plasmid vector containing HLA-B*37:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:28 protein under different cellular conditions.	Inquiry
HLA-B*37:01:29 Genomic Plasmid Vector	PHLAG82513759	Plasmid vector containing HLA-B*37:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:29 protein under different cellular conditions.	Inquiry
HLA-B*37:01:30 Genomic Plasmid Vector	PHLAG82513760	Plasmid vector containing HLA-B*37:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:30 protein under different cellular conditions.	Inquiry

HLA-B*37:01:31 Genomic Plasmid Vector	PHLAG82513761	Plasmid vector containing HLA-B*37:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:31 protein under different cellular conditions.	Inquiry
HLA-B*37:01:32 Genomic Plasmid Vector	PHLAG82513762	Plasmid vector containing HLA-B*37:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:32 protein under different cellular conditions.	Inquiry
HLA-B*37:01:33 Genomic Plasmid Vector	PHLAG82513763	Plasmid vector containing HLA-B*37:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:33 protein under different cellular conditions.	Inquiry
HLA-B*37:01:34 Genomic Plasmid Vector	PHLAG82513764	Plasmid vector containing HLA-B*37:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:34 protein under different cellular conditions.	Inquiry
HLA-B*37:01:35 Genomic Plasmid Vector	PHLAG82513765	Plasmid vector containing HLA-B*37:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:35 protein under different cellular conditions.	Inquiry
HLA-B*37:01:36 Genomic Plasmid Vector	PHLAG82513766	Plasmid vector containing HLA-B*37:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:01:36 protein under different cellular conditions.	Inquiry
HLA-B*37:02 Genomic Plasmid Vector	PHLAG82513767	Plasmid vector containing HLA-B*37:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:02 protein under different cellular conditions.	Inquiry
HLA-B*37:03N Genomic Plasmid Vector	PHLAG82513768	Plasmid vector containing HLA-B*37:03N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:03N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:03N protein under different cellular conditions.	Inquiry
HLA-B*37:04:01 Genomic Plasmid Vector	PHLAG82513769	Plasmid vector containing HLA-B*37:04:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:04:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:04:01 protein under different cellular conditions.	Inquiry

HLA-B*37:04:02 Genomic Plasmid Vector	PHLAG82513770	Plasmid vector containing HLA-B*37:04:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:04:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:04:02 protein under different cellular conditions.	Inquiry
HLA-B*37:05 Genomic Plasmid Vector	PHLAG82513771	Plasmid vector containing HLA-B*37:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:05 protein under different cellular conditions.	Inquiry
HLA-B*37:06:01 Genomic Plasmid Vector	PHLAG82513772	Plasmid vector containing HLA-B*37:06:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:06:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:06:01 protein under different cellular conditions.	Inquiry
HLA-B*37:06:02 Genomic Plasmid Vector	PHLAG82513773	Plasmid vector containing HLA-B*37:06:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:06:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:06:02 protein under different cellular conditions.	Inquiry
HLA-B*37:07 Genomic Plasmid Vector	PHLAG82513774	Plasmid vector containing HLA-B*37:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:07 protein under different cellular conditions.	Inquiry
HLA-B*37:08 Genomic Plasmid Vector	PHLAG82513775	Plasmid vector containing HLA-B*37:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:08 protein under different cellular conditions.	Inquiry
HLA-B*37:09 Genomic Plasmid Vector	PHLAG82513776	Plasmid vector containing HLA-B*37:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:09 protein under different cellular conditions.	Inquiry
HLA-B*37:10 Genomic Plasmid Vector	PHLAG82513777	Plasmid vector containing HLA-B*37:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:10 protein under different cellular conditions.	Inquiry
HLA-B*37:100 Genomic Plasmid Vector	PHLAG82513778	Plasmid vector containing HLA-B*37:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:100 protein under different cellular conditions.	Inquiry

HLA-B*37:101 Genomic Plasmid Vector	PHLAG82513779	Plasmid vector containing HLA-B*37:101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:101 protein under different cellular conditions.	Inquiry
HLA-B*37:102 Genomic Plasmid Vector	PHLAG825137780	Plasmid vector containing HLA-B*37:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:102 protein under different cellular conditions.	Inquiry
HLA-B*37:103 Genomic Plasmid Vector	PHLAG825137781	Plasmid vector containing HLA-B*37:103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:103 protein under different cellular conditions.	Inquiry
HLA-B*37:104 Genomic Plasmid Vector	PHLAG825137782	Plasmid vector containing HLA-B*37:104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:104 protein under different cellular conditions.	Inquiry
HLA-B*37:105 Genomic Plasmid Vector	PHLAG825137783	Plasmid vector containing HLA-B*37:105 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:105 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:105 protein under different cellular conditions.	Inquiry
HLA-B*37:106 Genomic Plasmid Vector	PHLAG825137784	Plasmid vector containing HLA-B*37:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:106 protein under different cellular conditions.	Inquiry
HLA-B*37:107 Genomic Plasmid Vector	PHLAG825137785	Plasmid vector containing HLA-B*37:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:107 protein under different cellular conditions.	Inquiry
HLA-B*37:108 Genomic Plasmid Vector	PHLAG825137786	Plasmid vector containing HLA-B*37:108 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:108 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:108 protein under different cellular conditions.	Inquiry
HLA-B*37:109N Genomic Plasmid Vector	PHLAG825137787	Plasmid vector containing HLA-B*37:109N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:109N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:109N protein under different cellular conditions.	Inquiry

HLA-B*37:11 Genomic Plasmid Vector	PHLAG82513788	Plasmid vector containing HLA-B*37:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:11 protein under different cellular conditions.	Inquiry
HLA-B*37:110 Genomic Plasmid Vector	PHLAG82513789	Plasmid vector containing HLA-B*37:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:110 protein under different cellular conditions.	Inquiry
HLA-B*37:111 Genomic Plasmid Vector	PHLAG82513790	Plasmid vector containing HLA-B*37:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:111 protein under different cellular conditions.	Inquiry
HLA-B*37:112N Genomic Plasmid Vector	PHLAG82513791	Plasmid vector containing HLA-B*37:112N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:112N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:112N protein under different cellular conditions.	Inquiry
HLA-B*37:113 Genomic Plasmid Vector	PHLAG82513792	Plasmid vector containing HLA-B*37:113 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:113 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:113 protein under different cellular conditions.	Inquiry
HLA-B*37:114 Genomic Plasmid Vector	PHLAG82513793	Plasmid vector containing HLA-B*37:114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:114 protein under different cellular conditions.	Inquiry
HLA-B*37:115 Genomic Plasmid Vector	PHLAG82513794	Plasmid vector containing HLA-B*37:115 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:115 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:115 protein under different cellular conditions.	Inquiry
HLA-B*37:116 Genomic Plasmid Vector	PHLAG82513795	Plasmid vector containing HLA-B*37:116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:116 protein under different cellular conditions.	Inquiry
HLA-B*37:117 Genomic Plasmid Vector	PHLAG82513796	Plasmid vector containing HLA-B*37:117 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:117 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:117 protein under different cellular conditions.	Inquiry

HLA-B*37:118 Genomic Plasmid Vector	PHLAG82513797	Plasmid vector containing HLA-B*37:118 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:118 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:118 protein under different cellular conditions.	Inquiry
HLA-B*37:119 Genomic Plasmid Vector	PHLAG82513798	Plasmid vector containing HLA-B*37:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:119 protein under different cellular conditions.	Inquiry
HLA-B*37:12 Genomic Plasmid Vector	PHLAG82513799	Plasmid vector containing HLA-B*37:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:12 protein under different cellular conditions.	Inquiry
HLA-B*37:120N Genomic Plasmid Vector	PHLAG825138000	Plasmid vector containing HLA-B*37:120N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:120N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:120N protein under different cellular conditions.	Inquiry
HLA-B*37:13 Genomic Plasmid Vector	PHLAG825138001	Plasmid vector containing HLA-B*37:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:13 protein under different cellular conditions.	Inquiry
HLA-B*37:14 Genomic Plasmid Vector	PHLAG825138002	Plasmid vector containing HLA-B*37:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:14 protein under different cellular conditions.	Inquiry
HLA-B*37:15 Genomic Plasmid Vector	PHLAG825138003	Plasmid vector containing HLA-B*37:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:15 protein under different cellular conditions.	Inquiry
HLA-B*37:16Q Genomic Plasmid Vector	PHLAG825138004	Plasmid vector containing HLA-B*37:16Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:16Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:16Q protein under different cellular conditions.	Inquiry
HLA-B*37:17 Genomic Plasmid Vector	PHLAG825138005	Plasmid vector containing HLA-B*37:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:17 protein under different cellular conditions.	Inquiry

HLA-B*37:18 Genomic Plasmid Vector	PHLAG82513806	Plasmid vector containing HLA-B*37:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:18 protein under different cellular conditions.	Inquiry
HLA-B*37:19:01 Genomic Plasmid Vector	PHLAG82513807	Plasmid vector containing HLA-B*37:19:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:19:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:19:01 protein under different cellular conditions.	Inquiry
HLA-B*37:19:02 Genomic Plasmid Vector	PHLAG82513808	Plasmid vector containing HLA-B*37:19:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:19:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:19:02 protein under different cellular conditions.	Inquiry
HLA-B*37:20 Genomic Plasmid Vector	PHLAG82513809	Plasmid vector containing HLA-B*37:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:20 protein under different cellular conditions.	Inquiry
HLA-B*37:21 Genomic Plasmid Vector	PHLAG82513810	Plasmid vector containing HLA-B*37:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:21 protein under different cellular conditions.	Inquiry
HLA-B*37:22:01 Genomic Plasmid Vector	PHLAG82513811	Plasmid vector containing HLA-B*37:22:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:22:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:22:01 protein under different cellular conditions.	Inquiry
HLA-B*37:22:02 Genomic Plasmid Vector	PHLAG82513812	Plasmid vector containing HLA-B*37:22:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:22:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:22:02 protein under different cellular conditions.	Inquiry
HLA-B*37:22:03 Genomic Plasmid Vector	PHLAG82513813	Plasmid vector containing HLA-B*37:22:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:22:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:22:03 protein under different cellular conditions.	Inquiry
HLA-B*37:23 Genomic Plasmid Vector	PHLAG82513814	Plasmid vector containing HLA-B*37:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:23 protein under different cellular conditions.	Inquiry

HLA-B*37:24 Genomic Plasmid Vector	PHLAG82513815	Plasmid vector containing HLA-B*37:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:24 protein under different cellular conditions.	Inquiry
HLA-B*37:25 Genomic Plasmid Vector	PHLAG82513816	Plasmid vector containing HLA-B*37:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:25 protein under different cellular conditions.	Inquiry
HLA-B*37:26 Genomic Plasmid Vector	PHLAG82513817	Plasmid vector containing HLA-B*37:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:26 protein under different cellular conditions.	Inquiry
HLA-B*37:27 Genomic Plasmid Vector	PHLAG82513818	Plasmid vector containing HLA-B*37:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:27 protein under different cellular conditions.	Inquiry
HLA-B*37:28 Genomic Plasmid Vector	PHLAG82513819	Plasmid vector containing HLA-B*37:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:28 protein under different cellular conditions.	Inquiry
HLA-B*37:29 Genomic Plasmid Vector	PHLAG82513820	Plasmid vector containing HLA-B*37:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:29 protein under different cellular conditions.	Inquiry
HLA-B*37:30N Genomic Plasmid Vector	PHLAG82513821	Plasmid vector containing HLA-B*37:30N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:30N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:30N protein under different cellular conditions.	Inquiry
HLA-B*37:31 Genomic Plasmid Vector	PHLAG82513822	Plasmid vector containing HLA-B*37:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:31 protein under different cellular conditions.	Inquiry
HLA-B*37:32 Genomic Plasmid Vector	PHLAG82513823	Plasmid vector containing HLA-B*37:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:32 protein under different cellular conditions.	Inquiry

HLA-B*37:33N Genomic Plasmid Vector	PHLAG82513824	Plasmid vector containing HLA-B*37:33N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:33N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:33N protein under different cellular conditions.	Inquiry
HLA-B*37:34 Genomic Plasmid Vector	PHLAG82513825	Plasmid vector containing HLA-B*37:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:34 protein under different cellular conditions.	Inquiry
HLA-B*37:35 Genomic Plasmid Vector	PHLAG82513826	Plasmid vector containing HLA-B*37:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:35 protein under different cellular conditions.	Inquiry
HLA-B*37:36 Genomic Plasmid Vector	PHLAG82513827	Plasmid vector containing HLA-B*37:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:36 protein under different cellular conditions.	Inquiry
HLA-B*37:37 Genomic Plasmid Vector	PHLAG82513828	Plasmid vector containing HLA-B*37:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:37 protein under different cellular conditions.	Inquiry
HLA-B*37:38 Genomic Plasmid Vector	PHLAG82513829	Plasmid vector containing HLA-B*37:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:38 protein under different cellular conditions.	Inquiry
HLA-B*37:39 Genomic Plasmid Vector	PHLAG82513830	Plasmid vector containing HLA-B*37:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:39 protein under different cellular conditions.	Inquiry
HLA-B*37:40 Genomic Plasmid Vector	PHLAG82513831	Plasmid vector containing HLA-B*37:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:40 protein under different cellular conditions.	Inquiry
HLA-B*37:41 Genomic Plasmid Vector	PHLAG82513832	Plasmid vector containing HLA-B*37:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:41 protein under different cellular conditions.	Inquiry

HLA-B*37:42N Genomic Plasmid Vector	PHLAG82513833	Plasmid vector containing HLA-B*37:42N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:42N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:42N protein under different cellular conditions.	Inquiry
HLA-B*37:43 Genomic Plasmid Vector	PHLAG82513834	Plasmid vector containing HLA-B*37:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:43 protein under different cellular conditions.	Inquiry
HLA-B*37:44 Genomic Plasmid Vector	PHLAG82513835	Plasmid vector containing HLA-B*37:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:44 protein under different cellular conditions.	Inquiry
HLA-B*37:45 Genomic Plasmid Vector	PHLAG82513836	Plasmid vector containing HLA-B*37:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:45 protein under different cellular conditions.	Inquiry
HLA-B*37:46 Genomic Plasmid Vector	PHLAG82513837	Plasmid vector containing HLA-B*37:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:46 protein under different cellular conditions.	Inquiry
HLA-B*37:47 Genomic Plasmid Vector	PHLAG82513838	Plasmid vector containing HLA-B*37:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:47 protein under different cellular conditions.	Inquiry
HLA-B*37:48 Genomic Plasmid Vector	PHLAG82513839	Plasmid vector containing HLA-B*37:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:48 protein under different cellular conditions.	Inquiry
HLA-B*37:49 Genomic Plasmid Vector	PHLAG82513840	Plasmid vector containing HLA-B*37:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:49 protein under different cellular conditions.	Inquiry
HLA-B*37:50 Genomic Plasmid Vector	PHLAG82513841	Plasmid vector containing HLA-B*37:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:50 protein under different cellular conditions.	Inquiry

HLA-B*37:51 Genomic Plasmid Vector	PHLAG82513842	Plasmid vector containing HLA-B*37:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:51 protein under different cellular conditions.	Inquiry
HLA-B*37:52 Genomic Plasmid Vector	PHLAG82513843	Plasmid vector containing HLA-B*37:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:52 protein under different cellular conditions.	Inquiry
HLA-B*37:53 Genomic Plasmid Vector	PHLAG82513844	Plasmid vector containing HLA-B*37:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:53 protein under different cellular conditions.	Inquiry
HLA-B*37:54 Genomic Plasmid Vector	PHLAG82513845	Plasmid vector containing HLA-B*37:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:54 protein under different cellular conditions.	Inquiry
HLA-B*37:55 Genomic Plasmid Vector	PHLAG82513846	Plasmid vector containing HLA-B*37:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:55 protein under different cellular conditions.	Inquiry
HLA-B*37:56 Genomic Plasmid Vector	PHLAG82513847	Plasmid vector containing HLA-B*37:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:56 protein under different cellular conditions.	Inquiry
HLA-B*37:57 Genomic Plasmid Vector	PHLAG82513848	Plasmid vector containing HLA-B*37:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:57 protein under different cellular conditions.	Inquiry
HLA-B*37:58 Genomic Plasmid Vector	PHLAG82513849	Plasmid vector containing HLA-B*37:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:58 protein under different cellular conditions.	Inquiry
HLA-B*37:59 Genomic Plasmid Vector	PHLAG82513850	Plasmid vector containing HLA-B*37:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:59 protein under different cellular conditions.	Inquiry

HLA-B*37:60 Genomic Plasmid Vector	PHLAG82513851	Plasmid vector containing HLA-B*37:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:60 protein under different cellular conditions.	Inquiry
HLA-B*37:61 Genomic Plasmid Vector	PHLAG82513852	Plasmid vector containing HLA-B*37:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:61 protein under different cellular conditions.	Inquiry
HLA-B*37:62 Genomic Plasmid Vector	PHLAG82513853	Plasmid vector containing HLA-B*37:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:62 protein under different cellular conditions.	Inquiry
HLA-B*37:63 Genomic Plasmid Vector	PHLAG82513854	Plasmid vector containing HLA-B*37:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:63 protein under different cellular conditions.	Inquiry
HLA-B*37:64 Genomic Plasmid Vector	PHLAG82513855	Plasmid vector containing HLA-B*37:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:64 protein under different cellular conditions.	Inquiry
HLA-B*37:65 Genomic Plasmid Vector	PHLAG82513856	Plasmid vector containing HLA-B*37:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:65 protein under different cellular conditions.	Inquiry
HLA-B*37:66 Genomic Plasmid Vector	PHLAG82513857	Plasmid vector containing HLA-B*37:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:66 protein under different cellular conditions.	Inquiry
HLA-B*37:67 Genomic Plasmid Vector	PHLAG82513858	Plasmid vector containing HLA-B*37:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:67 protein under different cellular conditions.	Inquiry
HLA-B*37:68 Genomic Plasmid Vector	PHLAG82513859	Plasmid vector containing HLA-B*37:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:68 protein under different cellular conditions.	Inquiry

HLA-B*37:69 Genomic Plasmid Vector	PHLAG82513860	Plasmid vector containing HLA-B*37:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:69 protein under different cellular conditions.	Inquiry
HLA-B*37:70 Genomic Plasmid Vector	PHLAG82513861	Plasmid vector containing HLA-B*37:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:70 protein under different cellular conditions.	Inquiry
HLA-B*37:71 Genomic Plasmid Vector	PHLAG82513862	Plasmid vector containing HLA-B*37:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:71 protein under different cellular conditions.	Inquiry
HLA-B*37:72 Genomic Plasmid Vector	PHLAG82513863	Plasmid vector containing HLA-B*37:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:72 protein under different cellular conditions.	Inquiry
HLA-B*37:73 Genomic Plasmid Vector	PHLAG82513864	Plasmid vector containing HLA-B*37:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:73 protein under different cellular conditions.	Inquiry
HLA-B*37:74 Genomic Plasmid Vector	PHLAG82513865	Plasmid vector containing HLA-B*37:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:74 protein under different cellular conditions.	Inquiry
HLA-B*37:75 Genomic Plasmid Vector	PHLAG82513866	Plasmid vector containing HLA-B*37:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:75 protein under different cellular conditions.	Inquiry
HLA-B*37:76 Genomic Plasmid Vector	PHLAG82513867	Plasmid vector containing HLA-B*37:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:76 protein under different cellular conditions.	Inquiry
HLA-B*37:77 Genomic Plasmid Vector	PHLAG82513868	Plasmid vector containing HLA-B*37:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:77 protein under different cellular conditions.	Inquiry

HLA-B*37:78 Genomic Plasmid Vector	PHLAG82513869	Plasmid vector containing HLA-B*37:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:78 protein under different cellular conditions.	Inquiry
HLA-B*37:79N Genomic Plasmid Vector	PHLAG825138700	Plasmid vector containing HLA-B*37:79N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:79N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:79N protein under different cellular conditions.	Inquiry
HLA-B*37:80 Genomic Plasmid Vector	PHLAG825138711	Plasmid vector containing HLA-B*37:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:80 protein under different cellular conditions.	Inquiry
HLA-B*37:81 Genomic Plasmid Vector	PHLAG825138722	Plasmid vector containing HLA-B*37:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:81 protein under different cellular conditions.	Inquiry
HLA-B*37:82N Genomic Plasmid Vector	PHLAG825138733	Plasmid vector containing HLA-B*37:82N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:82N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:82N protein under different cellular conditions.	Inquiry
HLA-B*37:83 Genomic Plasmid Vector	PHLAG825138744	Plasmid vector containing HLA-B*37:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:83 protein under different cellular conditions.	Inquiry
HLA-B*37:84 Genomic Plasmid Vector	PHLAG825138755	Plasmid vector containing HLA-B*37:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:84 protein under different cellular conditions.	Inquiry
HLA-B*37:85 Genomic Plasmid Vector	PHLAG825138766	Plasmid vector containing HLA-B*37:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:85 protein under different cellular conditions.	Inquiry
HLA-B*37:86N Genomic Plasmid Vector	PHLAG825138777	Plasmid vector containing HLA-B*37:86N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:86N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:86N protein under different cellular conditions.	Inquiry

HLA-B*37:87 Genomic Plasmid Vector	PHLAG82513878	Plasmid vector containing HLA-B*37:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:87 protein under different cellular conditions.	Inquiry
HLA-B*37:88 Genomic Plasmid Vector	PHLAG82513879	Plasmid vector containing HLA-B*37:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:88 protein under different cellular conditions.	Inquiry
HLA-B*37:89 Genomic Plasmid Vector	PHLAG82513880	Plasmid vector containing HLA-B*37:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:89 protein under different cellular conditions.	Inquiry
HLA-B*37:90 Genomic Plasmid Vector	PHLAG82513881	Plasmid vector containing HLA-B*37:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:90 protein under different cellular conditions.	Inquiry
HLA-B*37:91:01 Genomic Plasmid Vector	PHLAG82513882	Plasmid vector containing HLA-B*37:91:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:91:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:91:01 protein under different cellular conditions.	Inquiry
HLA-B*37:91:02 Genomic Plasmid Vector	PHLAG82513883	Plasmid vector containing HLA-B*37:91:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:91:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:91:02 protein under different cellular conditions.	Inquiry
HLA-B*37:92N Genomic Plasmid Vector	PHLAG82513884	Plasmid vector containing HLA-B*37:92N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:92N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:92N protein under different cellular conditions.	Inquiry
HLA-B*37:93 Genomic Plasmid Vector	PHLAG82513885	Plasmid vector containing HLA-B*37:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:93 protein under different cellular conditions.	Inquiry
HLA-B*37:94 Genomic Plasmid Vector	PHLAG82513886	Plasmid vector containing HLA-B*37:94 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:94 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:94 protein under different cellular conditions.	Inquiry

HLA-B*37:95 Genomic Plasmid Vector	PHLAG82513887	Plasmid vector containing HLA-B*37:95 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:95 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:95 protein under different cellular conditions.	Inquiry
HLA-B*37:96 Genomic Plasmid Vector	PHLAG82513888	Plasmid vector containing HLA-B*37:96 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:96 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:96 protein under different cellular conditions.	Inquiry
HLA-B*37:97 Genomic Plasmid Vector	PHLAG82513889	Plasmid vector containing HLA-B*37:97 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:97 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:97 protein under different cellular conditions.	Inquiry
HLA-B*37:98 Genomic Plasmid Vector	PHLAG82513890	Plasmid vector containing HLA-B*37:98 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:98 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:98 protein under different cellular conditions.	Inquiry
HLA-B*37:99 Genomic Plasmid Vector	PHLAG82513891	Plasmid vector containing HLA-B*37:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*37:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*37:99 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:01 Genomic Plasmid Vector	PHLAG82513892	Plasmid vector containing HLA-B*38:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:01 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:02 Genomic Plasmid Vector	PHLAG82513893	Plasmid vector containing HLA-B*38:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:02 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:03Q Genomic Plasmid Vector	PHLAG82513894	Plasmid vector containing HLA-B*38:01:01:03Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:03Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:03Q protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:04 Genomic Plasmid Vector	PHLAG82513895	Plasmid vector containing HLA-B*38:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:04 protein under different cellular conditions.	Inquiry

HLA-B*38:01:01:05 Genomic Plasmid Vector	PHLAG82513896	Plasmid vector containing HLA-B*38:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:05 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:06 Genomic Plasmid Vector	PHLAG82513897	Plasmid vector containing HLA-B*38:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:06 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:07 Genomic Plasmid Vector	PHLAG82513898	Plasmid vector containing HLA-B*38:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:07 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:08 Genomic Plasmid Vector	PHLAG82513899	Plasmid vector containing HLA-B*38:01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:08 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:09 Genomic Plasmid Vector	PHLAG825139000	Plasmid vector containing HLA-B*38:01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:09 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:10 Genomic Plasmid Vector	PHLAG825139001	Plasmid vector containing HLA-B*38:01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:10 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:11 Genomic Plasmid Vector	PHLAG825139002	Plasmid vector containing HLA-B*38:01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:11 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:12 Genomic Plasmid Vector	PHLAG825139003	Plasmid vector containing HLA-B*38:01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:12 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:13 Genomic Plasmid Vector	PHLAG825139004	Plasmid vector containing HLA-B*38:01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:13 protein under different cellular conditions.	Inquiry

HLA-B*38:01:01:14 Genomic Plasmid Vector	PHLAG82513905	Plasmid vector containing HLA-B*38:01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:14 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:15 Genomic Plasmid Vector	PHLAG82513906	Plasmid vector containing HLA-B*38:01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:15 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:16 Genomic Plasmid Vector	PHLAG82513907	Plasmid vector containing HLA-B*38:01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:16 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:17 Genomic Plasmid Vector	PHLAG82513908	Plasmid vector containing HLA-B*38:01:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:17 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:18 Genomic Plasmid Vector	PHLAG82513909	Plasmid vector containing HLA-B*38:01:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:18 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:19 Genomic Plasmid Vector	PHLAG82513910	Plasmid vector containing HLA-B*38:01:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:19 protein under different cellular conditions.	Inquiry
HLA-B*38:01:01:20 Genomic Plasmid Vector	PHLAG82513911	Plasmid vector containing HLA-B*38:01:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:01:20 protein under different cellular conditions.	Inquiry
HLA-B*38:01:02 Genomic Plasmid Vector	PHLAG82513912	Plasmid vector containing HLA-B*38:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:02 protein under different cellular conditions.	Inquiry
HLA-B*38:01:03 Genomic Plasmid Vector	PHLAG82513913	Plasmid vector containing HLA-B*38:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:03 protein under different cellular conditions.	Inquiry

HLA-B*38:01:04 Genomic Plasmid Vector	PHLAG82513914	Plasmid vector containing HLA-B*38:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:04 protein under different cellular conditions.	Inquiry
HLA-B*38:01:05 Genomic Plasmid Vector	PHLAG82513915	Plasmid vector containing HLA-B*38:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:05 protein under different cellular conditions.	Inquiry
HLA-B*38:01:06 Genomic Plasmid Vector	PHLAG82513916	Plasmid vector containing HLA-B*38:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:06 protein under different cellular conditions.	Inquiry
HLA-B*38:01:07 Genomic Plasmid Vector	PHLAG82513917	Plasmid vector containing HLA-B*38:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:07 protein under different cellular conditions.	Inquiry
HLA-B*38:01:08 Genomic Plasmid Vector	PHLAG82513918	Plasmid vector containing HLA-B*38:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:08 protein under different cellular conditions.	Inquiry
HLA-B*38:01:09 Genomic Plasmid Vector	PHLAG82513919	Plasmid vector containing HLA-B*38:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:09 protein under different cellular conditions.	Inquiry
HLA-B*38:01:10 Genomic Plasmid Vector	PHLAG82513920	Plasmid vector containing HLA-B*38:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:10 protein under different cellular conditions.	Inquiry
HLA-B*38:01:11 Genomic Plasmid Vector	PHLAG82513921	Plasmid vector containing HLA-B*38:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:11 protein under different cellular conditions.	Inquiry
HLA-B*38:01:12 Genomic Plasmid Vector	PHLAG82513922	Plasmid vector containing HLA-B*38:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:12 protein under different cellular conditions.	Inquiry

HLA-B*38:01:13 Genomic Plasmid Vector	PHLAG82513923	Plasmid vector containing HLA-B*38:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:13 protein under different cellular conditions.	Inquiry
HLA-B*38:01:14 Genomic Plasmid Vector	PHLAG82513924	Plasmid vector containing HLA-B*38:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:14 protein under different cellular conditions.	Inquiry
HLA-B*38:01:15 Genomic Plasmid Vector	PHLAG82513925	Plasmid vector containing HLA-B*38:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:15 protein under different cellular conditions.	Inquiry
HLA-B*38:01:16 Genomic Plasmid Vector	PHLAG82513926	Plasmid vector containing HLA-B*38:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:16 protein under different cellular conditions.	Inquiry
HLA-B*38:01:17 Genomic Plasmid Vector	PHLAG82513927	Plasmid vector containing HLA-B*38:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:17 protein under different cellular conditions.	Inquiry
HLA-B*38:01:18 Genomic Plasmid Vector	PHLAG82513928	Plasmid vector containing HLA-B*38:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:18 protein under different cellular conditions.	Inquiry
HLA-B*38:01:19 Genomic Plasmid Vector	PHLAG82513929	Plasmid vector containing HLA-B*38:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:19 protein under different cellular conditions.	Inquiry
HLA-B*38:01:20 Genomic Plasmid Vector	PHLAG82513930	Plasmid vector containing HLA-B*38:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:20 protein under different cellular conditions.	Inquiry
HLA-B*38:01:21 Genomic Plasmid Vector	PHLAG82513931	Plasmid vector containing HLA-B*38:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:21 protein under different cellular conditions.	Inquiry

HLA-B*38:01:22 Genomic Plasmid Vector	PHLAG82513932	Plasmid vector containing HLA-B*38:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:22 protein under different cellular conditions.	Inquiry
HLA-B*38:01:23 Genomic Plasmid Vector	PHLAG82513933	Plasmid vector containing HLA-B*38:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:23 protein under different cellular conditions.	Inquiry
HLA-B*38:01:24 Genomic Plasmid Vector	PHLAG82513934	Plasmid vector containing HLA-B*38:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:24 protein under different cellular conditions.	Inquiry
HLA-B*38:01:25 Genomic Plasmid Vector	PHLAG82513935	Plasmid vector containing HLA-B*38:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:25 protein under different cellular conditions.	Inquiry
HLA-B*38:01:26 Genomic Plasmid Vector	PHLAG82513936	Plasmid vector containing HLA-B*38:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:01:26 protein under different cellular conditions.	Inquiry
HLA-B*38:02:01:01 Genomic Plasmid Vector	PHLAG82513937	Plasmid vector containing HLA-B*38:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:01:01 protein under different cellular conditions.	Inquiry
HLA-B*38:02:01:02 Genomic Plasmid Vector	PHLAG82513938	Plasmid vector containing HLA-B*38:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:01:02 protein under different cellular conditions.	Inquiry
HLA-B*38:02:01:03 Genomic Plasmid Vector	PHLAG82513939	Plasmid vector containing HLA-B*38:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:01:03 protein under different cellular conditions.	Inquiry
HLA-B*38:02:01:04 Genomic Plasmid Vector	PHLAG82513940	Plasmid vector containing HLA-B*38:02:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:01:04 protein under different cellular conditions.	Inquiry

HLA-B*38:02:01:05 Genomic Plasmid Vector	PHLAG82513941	Plasmid vector containing HLA-B*38:02:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:01:05 protein under different cellular conditions.	Inquiry
HLA-B*38:02:01:06 Genomic Plasmid Vector	PHLAG82513942	Plasmid vector containing HLA-B*38:02:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:01:06 protein under different cellular conditions.	Inquiry
HLA-B*38:02:02:01 Genomic Plasmid Vector	PHLAG82513943	Plasmid vector containing HLA-B*38:02:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:02:01 protein under different cellular conditions.	Inquiry
HLA-B*38:02:02:02 Genomic Plasmid Vector	PHLAG82513944	Plasmid vector containing HLA-B*38:02:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:02:02 protein under different cellular conditions.	Inquiry
HLA-B*38:02:03 Genomic Plasmid Vector	PHLAG82513945	Plasmid vector containing HLA-B*38:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:03 protein under different cellular conditions.	Inquiry
HLA-B*38:02:04 Genomic Plasmid Vector	PHLAG82513946	Plasmid vector containing HLA-B*38:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:04 protein under different cellular conditions.	Inquiry
HLA-B*38:02:05 Genomic Plasmid Vector	PHLAG82513947	Plasmid vector containing HLA-B*38:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:05 protein under different cellular conditions.	Inquiry
HLA-B*38:02:06 Genomic Plasmid Vector	PHLAG82513948	Plasmid vector containing HLA-B*38:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:06 protein under different cellular conditions.	Inquiry
HLA-B*38:02:07 Genomic Plasmid Vector	PHLAG82513949	Plasmid vector containing HLA-B*38:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:07 protein under different cellular conditions.	Inquiry

HLA-B*38:02:08 Genomic Plasmid Vector	PHLAG82513950	Plasmid vector containing HLA-B*38:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:08 protein under different cellular conditions.	Inquiry
HLA-B*38:02:09 Genomic Plasmid Vector	PHLAG82513951	Plasmid vector containing HLA-B*38:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:09 protein under different cellular conditions.	Inquiry
HLA-B*38:02:10 Genomic Plasmid Vector	PHLAG82513952	Plasmid vector containing HLA-B*38:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:10 protein under different cellular conditions.	Inquiry
HLA-B*38:02:11 Genomic Plasmid Vector	PHLAG82513953	Plasmid vector containing HLA-B*38:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:11 protein under different cellular conditions.	Inquiry
HLA-B*38:02:12 Genomic Plasmid Vector	PHLAG82513954	Plasmid vector containing HLA-B*38:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:12 protein under different cellular conditions.	Inquiry
HLA-B*38:02:13 Genomic Plasmid Vector	PHLAG82513955	Plasmid vector containing HLA-B*38:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:13 protein under different cellular conditions.	Inquiry
HLA-B*38:02:14 Genomic Plasmid Vector	PHLAG82513956	Plasmid vector containing HLA-B*38:02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:14 protein under different cellular conditions.	Inquiry
HLA-B*38:02:15 Genomic Plasmid Vector	PHLAG82513957	Plasmid vector containing HLA-B*38:02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:02:15 protein under different cellular conditions.	Inquiry
HLA-B*38:03 Genomic Plasmid Vector	PHLAG82513958	Plasmid vector containing HLA-B*38:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:03 protein under different cellular conditions.	Inquiry

HLA-B*38:04 Genomic Plasmid Vector	PHLAG82513959	Plasmid vector containing HLA-B*38:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:04 protein under different cellular conditions.	Inquiry
HLA-B*38:05 Genomic Plasmid Vector	PHLAG825139960	Plasmid vector containing HLA-B*38:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:05 protein under different cellular conditions.	Inquiry
HLA-B*38:06 Genomic Plasmid Vector	PHLAG825139961	Plasmid vector containing HLA-B*38:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:06 protein under different cellular conditions.	Inquiry
HLA-B*38:07 Genomic Plasmid Vector	PHLAG825139962	Plasmid vector containing HLA-B*38:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:07 protein under different cellular conditions.	Inquiry
HLA-B*38:08 Genomic Plasmid Vector	PHLAG825139963	Plasmid vector containing HLA-B*38:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:08 protein under different cellular conditions.	Inquiry
HLA-B*38:09 Genomic Plasmid Vector	PHLAG825139964	Plasmid vector containing HLA-B*38:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:09 protein under different cellular conditions.	Inquiry
HLA-B*38:10 Genomic Plasmid Vector	PHLAG825139965	Plasmid vector containing HLA-B*38:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:10 protein under different cellular conditions.	Inquiry
HLA-B*38:100 Genomic Plasmid Vector	PHLAG825139966	Plasmid vector containing HLA-B*38:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:100 protein under different cellular conditions.	Inquiry
HLA-B*38:101 Genomic Plasmid Vector	PHLAG825139967	Plasmid vector containing HLA-B*38:101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:101 protein under different cellular conditions.	Inquiry

HLA-B*38:102 Genomic Plasmid Vector	PHLAG82513968	Plasmid vector containing HLA-B*38:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:102 protein under different cellular conditions.	Inquiry
HLA-B*38:103N Genomic Plasmid Vector	PHLAG82513969	Plasmid vector containing HLA-B*38:103N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:103N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:103N protein under different cellular conditions.	Inquiry
HLA-B*38:104 Genomic Plasmid Vector	PHLAG82513970	Plasmid vector containing HLA-B*38:104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:104 protein under different cellular conditions.	Inquiry
HLA-B*38:105 Genomic Plasmid Vector	PHLAG82513971	Plasmid vector containing HLA-B*38:105 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:105 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:105 protein under different cellular conditions.	Inquiry
HLA-B*38:106 Genomic Plasmid Vector	PHLAG82513972	Plasmid vector containing HLA-B*38:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:106 protein under different cellular conditions.	Inquiry
HLA-B*38:107 Genomic Plasmid Vector	PHLAG82513973	Plasmid vector containing HLA-B*38:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:107 protein under different cellular conditions.	Inquiry
HLA-B*38:108 Genomic Plasmid Vector	PHLAG82513974	Plasmid vector containing HLA-B*38:108 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:108 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:108 protein under different cellular conditions.	Inquiry
HLA-B*38:109 Genomic Plasmid Vector	PHLAG82513975	Plasmid vector containing HLA-B*38:109 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:109 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:109 protein under different cellular conditions.	Inquiry
HLA-B*38:11 Genomic Plasmid Vector	PHLAG82513976	Plasmid vector containing HLA-B*38:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:11 protein under different cellular conditions.	Inquiry

HLA-B*38:110 Genomic Plasmid Vector	PHLAG82513977	Plasmid vector containing HLA-B*38:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:110 protein under different cellular conditions.	Inquiry
HLA-B*38:111 Genomic Plasmid Vector	PHLAG82513978	Plasmid vector containing HLA-B*38:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:111 protein under different cellular conditions.	Inquiry
HLA-B*38:112 Genomic Plasmid Vector	PHLAG82513979	Plasmid vector containing HLA-B*38:112 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:112 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:112 protein under different cellular conditions.	Inquiry
HLA-B*38:113N Genomic Plasmid Vector	PHLAG82513980	Plasmid vector containing HLA-B*38:113N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:113N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:113N protein under different cellular conditions.	Inquiry
HLA-B*38:114 Genomic Plasmid Vector	PHLAG82513981	Plasmid vector containing HLA-B*38:114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:114 protein under different cellular conditions.	Inquiry
HLA-B*38:115 Genomic Plasmid Vector	PHLAG82513982	Plasmid vector containing HLA-B*38:115 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:115 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:115 protein under different cellular conditions.	Inquiry
HLA-B*38:116 Genomic Plasmid Vector	PHLAG82513983	Plasmid vector containing HLA-B*38:116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:116 protein under different cellular conditions.	Inquiry
HLA-B*38:117 Genomic Plasmid Vector	PHLAG82513984	Plasmid vector containing HLA-B*38:117 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:117 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:117 protein under different cellular conditions.	Inquiry
HLA-B*38:118 Genomic Plasmid Vector	PHLAG82513985	Plasmid vector containing HLA-B*38:118 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:118 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:118 protein under different cellular conditions.	Inquiry

HLA-B*38:119 Genomic Plasmid Vector	PHLAG82513986	Plasmid vector containing HLA-B*38:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:119 protein under different cellular conditions.	Inquiry
HLA-B*38:12 Genomic Plasmid Vector	PHLAG82513987	Plasmid vector containing HLA-B*38:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:12 protein under different cellular conditions.	Inquiry
HLA-B*38:120 Genomic Plasmid Vector	PHLAG82513988	Plasmid vector containing HLA-B*38:120 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:120 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:120 protein under different cellular conditions.	Inquiry
HLA-B*38:121 Genomic Plasmid Vector	PHLAG82513989	Plasmid vector containing HLA-B*38:121 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:121 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:121 protein under different cellular conditions.	Inquiry
HLA-B*38:122 Genomic Plasmid Vector	PHLAG82513990	Plasmid vector containing HLA-B*38:122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:122 protein under different cellular conditions.	Inquiry
HLA-B*38:123 Genomic Plasmid Vector	PHLAG82513991	Plasmid vector containing HLA-B*38:123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:123 protein under different cellular conditions.	Inquiry
HLA-B*38:124 Genomic Plasmid Vector	PHLAG82513992	Plasmid vector containing HLA-B*38:124 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:124 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:124 protein under different cellular conditions.	Inquiry
HLA-B*38:125 Genomic Plasmid Vector	PHLAG82513993	Plasmid vector containing HLA-B*38:125 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:125 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:125 protein under different cellular conditions.	Inquiry
HLA-B*38:126 Genomic Plasmid Vector	PHLAG82513994	Plasmid vector containing HLA-B*38:126 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:126 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:126 protein under different cellular conditions.	Inquiry

HLA-B*38:127 Genomic Plasmid Vector	PHLAG82513995	Plasmid vector containing HLA-B*38:127 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:127 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:127 protein under different cellular conditions.	Inquiry
HLA-B*38:13 Genomic Plasmid Vector	PHLAG82513996	Plasmid vector containing HLA-B*38:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:13 protein under different cellular conditions.	Inquiry
HLA-B*38:14 Genomic Plasmid Vector	PHLAG82513997	Plasmid vector containing HLA-B*38:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:14 protein under different cellular conditions.	Inquiry
HLA-B*38:15 Genomic Plasmid Vector	PHLAG82513998	Plasmid vector containing HLA-B*38:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:15 protein under different cellular conditions.	Inquiry
HLA-B*38:156 Genomic Plasmid Vector	PHLAG82513999	Plasmid vector containing HLA-B*38:156 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:156 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:156 protein under different cellular conditions.	Inquiry
HLA-B*38:157 Genomic Plasmid Vector	PHLAG825140000	Plasmid vector containing HLA-B*38:157 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:157 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:157 protein under different cellular conditions.	Inquiry
HLA-B*38:158 Genomic Plasmid Vector	PHLAG825140001	Plasmid vector containing HLA-B*38:158 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:158 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:158 protein under different cellular conditions.	Inquiry
HLA-B*38:159 Genomic Plasmid Vector	PHLAG825140002	Plasmid vector containing HLA-B*38:159 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:159 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:159 protein under different cellular conditions.	Inquiry
HLA-B*38:16 Genomic Plasmid Vector	PHLAG825140003	Plasmid vector containing HLA-B*38:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:16 protein under different cellular conditions.	Inquiry

HLA-B*38:160 Genomic Plasmid Vector	PHLAG82514004	Plasmid vector containing HLA-B*38:160 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:160 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:160 protein under different cellular conditions.	Inquiry
HLA-B*38:161 Genomic Plasmid Vector	PHLAG82514005	Plasmid vector containing HLA-B*38:161 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:161 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:161 protein under different cellular conditions.	Inquiry
HLA-B*38:162 Genomic Plasmid Vector	PHLAG82514006	Plasmid vector containing HLA-B*38:162 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:162 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:162 protein under different cellular conditions.	Inquiry
HLA-B*38:163 Genomic Plasmid Vector	PHLAG82514007	Plasmid vector containing HLA-B*38:163 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:163 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:163 protein under different cellular conditions.	Inquiry
HLA-B*38:164 Genomic Plasmid Vector	PHLAG82514008	Plasmid vector containing HLA-B*38:164 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:164 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:164 protein under different cellular conditions.	Inquiry
HLA-B*38:165N Genomic Plasmid Vector	PHLAG82514009	Plasmid vector containing HLA-B*38:165N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:165N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:165N protein under different cellular conditions.	Inquiry
HLA-B*38:166 Genomic Plasmid Vector	PHLAG82514010	Plasmid vector containing HLA-B*38:166 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:166 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:166 protein under different cellular conditions.	Inquiry
HLA-B*38:167 Genomic Plasmid Vector	PHLAG82514011	Plasmid vector containing HLA-B*38:167 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:167 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:167 protein under different cellular conditions.	Inquiry
HLA-B*38:168 Genomic Plasmid Vector	PHLAG82514012	Plasmid vector containing HLA-B*38:168 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:168 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:168 protein under different cellular conditions.	Inquiry

HLA-B*38:169 Genomic Plasmid Vector	PHLAG82514013	Plasmid vector containing HLA-B*38:169 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:169 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:169 protein under different cellular conditions.	Inquiry
HLA-B*38:17 Genomic Plasmid Vector	PHLAG82514014	Plasmid vector containing HLA-B*38:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:17 protein under different cellular conditions.	Inquiry
HLA-B*38:170 Genomic Plasmid Vector	PHLAG82514015	Plasmid vector containing HLA-B*38:170 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:170 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:170 protein under different cellular conditions.	Inquiry
HLA-B*38:171 Genomic Plasmid Vector	PHLAG82514016	Plasmid vector containing HLA-B*38:171 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:171 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:171 protein under different cellular conditions.	Inquiry
HLA-B*38:172 Genomic Plasmid Vector	PHLAG82514017	Plasmid vector containing HLA-B*38:172 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:172 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:172 protein under different cellular conditions.	Inquiry
HLA-B*38:173Q Genomic Plasmid Vector	PHLAG82514018	Plasmid vector containing HLA-B*38:173Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:173Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:173Q protein under different cellular conditions.	Inquiry
HLA-B*38:18 Genomic Plasmid Vector	PHLAG82514019	Plasmid vector containing HLA-B*38:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:18 protein under different cellular conditions.	Inquiry
HLA-B*38:19 Genomic Plasmid Vector	PHLAG82514020	Plasmid vector containing HLA-B*38:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:19 protein under different cellular conditions.	Inquiry
HLA-B*38:20:01 Genomic Plasmid Vector	PHLAG82514021	Plasmid vector containing HLA-B*38:20:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:20:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:20:01 protein under different cellular conditions.	Inquiry

HLA-B*38:20:02 Genomic Plasmid Vector	PHLAG82514022	Plasmid vector containing HLA-B*38:20:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:20:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:20:02 protein under different cellular conditions.	Inquiry
HLA-B*38:21 Genomic Plasmid Vector	PHLAG82514023	Plasmid vector containing HLA-B*38:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:21 protein under different cellular conditions.	Inquiry
HLA-B*38:22 Genomic Plasmid Vector	PHLAG82514024	Plasmid vector containing HLA-B*38:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:22 protein under different cellular conditions.	Inquiry
HLA-B*38:23 Genomic Plasmid Vector	PHLAG82514025	Plasmid vector containing HLA-B*38:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:23 protein under different cellular conditions.	Inquiry
HLA-B*38:24 Genomic Plasmid Vector	PHLAG82514026	Plasmid vector containing HLA-B*38:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:24 protein under different cellular conditions.	Inquiry
HLA-B*38:25 Genomic Plasmid Vector	PHLAG82514027	Plasmid vector containing HLA-B*38:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:25 protein under different cellular conditions.	Inquiry
HLA-B*38:26 Genomic Plasmid Vector	PHLAG82514028	Plasmid vector containing HLA-B*38:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:26 protein under different cellular conditions.	Inquiry
HLA-B*38:27 Genomic Plasmid Vector	PHLAG82514029	Plasmid vector containing HLA-B*38:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:27 protein under different cellular conditions.	Inquiry
HLA-B*38:28 Genomic Plasmid Vector	PHLAG82514030	Plasmid vector containing HLA-B*38:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:28 protein under different cellular conditions.	Inquiry

HLA-B*38:29 Genomic Plasmid Vector	PHLAG82514031	Plasmid vector containing HLA-B*38:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:29 protein under different cellular conditions.	Inquiry
HLA-B*38:30 Genomic Plasmid Vector	PHLAG82514032	Plasmid vector containing HLA-B*38:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:30 protein under different cellular conditions.	Inquiry
HLA-B*38:31 Genomic Plasmid Vector	PHLAG82514033	Plasmid vector containing HLA-B*38:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:31 protein under different cellular conditions.	Inquiry
HLA-B*38:32 Genomic Plasmid Vector	PHLAG82514034	Plasmid vector containing HLA-B*38:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:32 protein under different cellular conditions.	Inquiry
HLA-B*38:33 Genomic Plasmid Vector	PHLAG82514035	Plasmid vector containing HLA-B*38:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:33 protein under different cellular conditions.	Inquiry
HLA-B*38:34N Genomic Plasmid Vector	PHLAG82514036	Plasmid vector containing HLA-B*38:34N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:34N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:34N protein under different cellular conditions.	Inquiry
HLA-B*38:35 Genomic Plasmid Vector	PHLAG82514037	Plasmid vector containing HLA-B*38:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:35 protein under different cellular conditions.	Inquiry
HLA-B*38:36 Genomic Plasmid Vector	PHLAG82514038	Plasmid vector containing HLA-B*38:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:36 protein under different cellular conditions.	Inquiry
HLA-B*38:37 Genomic Plasmid Vector	PHLAG82514039	Plasmid vector containing HLA-B*38:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:37 protein under different cellular conditions.	Inquiry

HLA-B*38:38 Genomic Plasmid Vector	PHLAG82514040	Plasmid vector containing HLA-B*38:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:38 protein under different cellular conditions.	Inquiry
HLA-B*38:39 Genomic Plasmid Vector	PHLAG82514041	Plasmid vector containing HLA-B*38:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:39 protein under different cellular conditions.	Inquiry
HLA-B*38:40 Genomic Plasmid Vector	PHLAG82514042	Plasmid vector containing HLA-B*38:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:40 protein under different cellular conditions.	Inquiry
HLA-B*38:41 Genomic Plasmid Vector	PHLAG82514043	Plasmid vector containing HLA-B*38:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:41 protein under different cellular conditions.	Inquiry
HLA-B*38:42 Genomic Plasmid Vector	PHLAG82514044	Plasmid vector containing HLA-B*38:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:42 protein under different cellular conditions.	Inquiry
HLA-B*38:43 Genomic Plasmid Vector	PHLAG82514045	Plasmid vector containing HLA-B*38:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:43 protein under different cellular conditions.	Inquiry
HLA-B*38:44 Genomic Plasmid Vector	PHLAG82514046	Plasmid vector containing HLA-B*38:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:44 protein under different cellular conditions.	Inquiry
HLA-B*38:45 Genomic Plasmid Vector	PHLAG82514047	Plasmid vector containing HLA-B*38:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:45 protein under different cellular conditions.	Inquiry
HLA-B*38:46 Genomic Plasmid Vector	PHLAG82514048	Plasmid vector containing HLA-B*38:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:46 protein under different cellular conditions.	Inquiry

HLA-B*38:47 Genomic Plasmid Vector	PHLAG82514049	Plasmid vector containing HLA-B*38:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:47 protein under different cellular conditions.	Inquiry
HLA-B*38:48 Genomic Plasmid Vector	PHLAG825140500	Plasmid vector containing HLA-B*38:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:48 protein under different cellular conditions.	Inquiry
HLA-B*38:49 Genomic Plasmid Vector	PHLAG825140501	Plasmid vector containing HLA-B*38:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:49 protein under different cellular conditions.	Inquiry
HLA-B*38:50 Genomic Plasmid Vector	PHLAG825140502	Plasmid vector containing HLA-B*38:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:50 protein under different cellular conditions.	Inquiry
HLA-B*38:51 Genomic Plasmid Vector	PHLAG825140503	Plasmid vector containing HLA-B*38:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:51 protein under different cellular conditions.	Inquiry
HLA-B*38:52 Genomic Plasmid Vector	PHLAG825140504	Plasmid vector containing HLA-B*38:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:52 protein under different cellular conditions.	Inquiry
HLA-B*38:53 Genomic Plasmid Vector	PHLAG825140505	Plasmid vector containing HLA-B*38:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:53 protein under different cellular conditions.	Inquiry
HLA-B*38:54 Genomic Plasmid Vector	PHLAG825140506	Plasmid vector containing HLA-B*38:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:54 protein under different cellular conditions.	Inquiry
HLA-B*38:55Q Genomic Plasmid Vector	PHLAG825140507	Plasmid vector containing HLA-B*38:55Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:55Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:55Q protein under different cellular conditions.	Inquiry

HLA-B*38:56 Genomic Plasmid Vector	PHLAG82514058	Plasmid vector containing HLA-B*38:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:56 protein under different cellular conditions.	Inquiry
HLA-B*38:57 Genomic Plasmid Vector	PHLAG82514059	Plasmid vector containing HLA-B*38:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:57 protein under different cellular conditions.	Inquiry
HLA-B*38:58 Genomic Plasmid Vector	PHLAG82514060	Plasmid vector containing HLA-B*38:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:58 protein under different cellular conditions.	Inquiry
HLA-B*38:59 Genomic Plasmid Vector	PHLAG82514061	Plasmid vector containing HLA-B*38:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:59 protein under different cellular conditions.	Inquiry
HLA-B*38:60 Genomic Plasmid Vector	PHLAG82514062	Plasmid vector containing HLA-B*38:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:60 protein under different cellular conditions.	Inquiry
HLA-B*38:61 Genomic Plasmid Vector	PHLAG82514063	Plasmid vector containing HLA-B*38:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:61 protein under different cellular conditions.	Inquiry
HLA-B*38:62 Genomic Plasmid Vector	PHLAG82514064	Plasmid vector containing HLA-B*38:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:62 protein under different cellular conditions.	Inquiry
HLA-B*38:63 Genomic Plasmid Vector	PHLAG82514065	Plasmid vector containing HLA-B*38:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:63 protein under different cellular conditions.	Inquiry
HLA-B*38:64 Genomic Plasmid Vector	PHLAG82514066	Plasmid vector containing HLA-B*38:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:64 protein under different cellular conditions.	Inquiry

HLA-B*38:65 Genomic Plasmid Vector	PHLAG82514067	Plasmid vector containing HLA-B*38:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:65 protein under different cellular conditions.	Inquiry
HLA-B*38:66 Genomic Plasmid Vector	PHLAG82514068	Plasmid vector containing HLA-B*38:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:66 protein under different cellular conditions.	Inquiry
HLA-B*38:67 Genomic Plasmid Vector	PHLAG82514069	Plasmid vector containing HLA-B*38:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:67 protein under different cellular conditions.	Inquiry
HLA-B*38:68L Genomic Plasmid Vector	PHLAG82514070	Plasmid vector containing HLA-B*38:68L genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:68L allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:68L protein under different cellular conditions.	Inquiry
HLA-B*38:69 Genomic Plasmid Vector	PHLAG82514071	Plasmid vector containing HLA-B*38:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:69 protein under different cellular conditions.	Inquiry
HLA-B*38:70 Genomic Plasmid Vector	PHLAG82514072	Plasmid vector containing HLA-B*38:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:70 protein under different cellular conditions.	Inquiry
HLA-B*38:71 Genomic Plasmid Vector	PHLAG82514073	Plasmid vector containing HLA-B*38:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:71 protein under different cellular conditions.	Inquiry
HLA-B*38:72 Genomic Plasmid Vector	PHLAG82514074	Plasmid vector containing HLA-B*38:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:72 protein under different cellular conditions.	Inquiry
HLA-B*38:73 Genomic Plasmid Vector	PHLAG82514075	Plasmid vector containing HLA-B*38:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:73 protein under different cellular conditions.	Inquiry

HLA-B*38:74 Genomic Plasmid Vector	PHLAG82514076	Plasmid vector containing HLA-B*38:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:74 protein under different cellular conditions.	Inquiry
HLA-B*38:75 Genomic Plasmid Vector	PHLAG82514077	Plasmid vector containing HLA-B*38:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:75 protein under different cellular conditions.	Inquiry
HLA-B*38:76 Genomic Plasmid Vector	PHLAG82514078	Plasmid vector containing HLA-B*38:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:76 protein under different cellular conditions.	Inquiry
HLA-B*38:77 Genomic Plasmid Vector	PHLAG82514079	Plasmid vector containing HLA-B*38:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:77 protein under different cellular conditions.	Inquiry
HLA-B*38:78 Genomic Plasmid Vector	PHLAG82514080	Plasmid vector containing HLA-B*38:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:78 protein under different cellular conditions.	Inquiry
HLA-B*38:79 Genomic Plasmid Vector	PHLAG82514081	Plasmid vector containing HLA-B*38:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:79 protein under different cellular conditions.	Inquiry
HLA-B*38:80N Genomic Plasmid Vector	PHLAG82514082	Plasmid vector containing HLA-B*38:80N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:80N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:80N protein under different cellular conditions.	Inquiry
HLA-B*38:81 Genomic Plasmid Vector	PHLAG82514083	Plasmid vector containing HLA-B*38:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:81 protein under different cellular conditions.	Inquiry
HLA-B*38:82 Genomic Plasmid Vector	PHLAG82514084	Plasmid vector containing HLA-B*38:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:82 protein under different cellular conditions.	Inquiry

HLA-B*38:83N Genomic Plasmid Vector	PHLAG82514085	Plasmid vector containing HLA-B*38:83N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:83N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:83N protein under different cellular conditions.	Inquiry
HLA-B*38:84 Genomic Plasmid Vector	PHLAG82514086	Plasmid vector containing HLA-B*38:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:84 protein under different cellular conditions.	Inquiry
HLA-B*38:85 Genomic Plasmid Vector	PHLAG82514087	Plasmid vector containing HLA-B*38:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:85 protein under different cellular conditions.	Inquiry
HLA-B*38:86 Genomic Plasmid Vector	PHLAG82514088	Plasmid vector containing HLA-B*38:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:86 protein under different cellular conditions.	Inquiry
HLA-B*38:87 Genomic Plasmid Vector	PHLAG82514089	Plasmid vector containing HLA-B*38:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:87 protein under different cellular conditions.	Inquiry
HLA-B*38:88 Genomic Plasmid Vector	PHLAG82514090	Plasmid vector containing HLA-B*38:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:88 protein under different cellular conditions.	Inquiry
HLA-B*38:89 Genomic Plasmid Vector	PHLAG82514091	Plasmid vector containing HLA-B*38:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:89 protein under different cellular conditions.	Inquiry
HLA-B*38:90 Genomic Plasmid Vector	PHLAG82514092	Plasmid vector containing HLA-B*38:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:90 protein under different cellular conditions.	Inquiry
HLA-B*38:91 Genomic Plasmid Vector	PHLAG82514093	Plasmid vector containing HLA-B*38:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:91 protein under different cellular conditions.	Inquiry

HLA-B*38:92 Genomic Plasmid Vector	PHLAG82514094	Plasmid vector containing HLA-B*38:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:92 protein under different cellular conditions.	Inquiry
HLA-B*38:93 Genomic Plasmid Vector	PHLAG82514095	Plasmid vector containing HLA-B*38:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:93 protein under different cellular conditions.	Inquiry
HLA-B*38:94 Genomic Plasmid Vector	PHLAG82514096	Plasmid vector containing HLA-B*38:94 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:94 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:94 protein under different cellular conditions.	Inquiry
HLA-B*38:95 Genomic Plasmid Vector	PHLAG82514097	Plasmid vector containing HLA-B*38:95 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:95 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:95 protein under different cellular conditions.	Inquiry
HLA-B*38:96 Genomic Plasmid Vector	PHLAG82514098	Plasmid vector containing HLA-B*38:96 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:96 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:96 protein under different cellular conditions.	Inquiry
HLA-B*38:97 Genomic Plasmid Vector	PHLAG82514099	Plasmid vector containing HLA-B*38:97 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:97 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:97 protein under different cellular conditions.	Inquiry
HLA-B*38:98 Genomic Plasmid Vector	PHLAG825141000	Plasmid vector containing HLA-B*38:98 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:98 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:98 protein under different cellular conditions.	Inquiry
HLA-B*38:99 Genomic Plasmid Vector	PHLAG825141001	Plasmid vector containing HLA-B*38:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*38:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*38:99 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:01 Genomic Plasmid Vector	PHLAG825141002	Plasmid vector containing HLA-B*39:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:01 protein under different cellular conditions.	Inquiry

HLA-B*39:01:01:02L Genomic Plasmid Vector	PHLAG82514103	Plasmid vector containing HLA-B*39:01:01:02L genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:02L allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:02L protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:03 Genomic Plasmid Vector	PHLAG82514104	Plasmid vector containing HLA-B*39:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:03 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:04 Genomic Plasmid Vector	PHLAG82514105	Plasmid vector containing HLA-B*39:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:04 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:05 Genomic Plasmid Vector	PHLAG82514106	Plasmid vector containing HLA-B*39:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:05 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:06 Genomic Plasmid Vector	PHLAG82514107	Plasmid vector containing HLA-B*39:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:06 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:07 Genomic Plasmid Vector	PHLAG82514108	Plasmid vector containing HLA-B*39:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:07 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:08 Genomic Plasmid Vector	PHLAG82514109	Plasmid vector containing HLA-B*39:01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:08 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:09 Genomic Plasmid Vector	PHLAG825141110	Plasmid vector containing HLA-B*39:01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:09 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:10 Genomic Plasmid Vector	PHLAG825141111	Plasmid vector containing HLA-B*39:01:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:10 protein under different cellular conditions.	Inquiry

HLA-B*39:01:01:11 Genomic Plasmid Vector	PHLAG82514112	Plasmid vector containing HLA-B*39:01:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:11 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:12 Genomic Plasmid Vector	PHLAG82514113	Plasmid vector containing HLA-B*39:01:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:12 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:13 Genomic Plasmid Vector	PHLAG82514114	Plasmid vector containing HLA-B*39:01:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:13 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:14 Genomic Plasmid Vector	PHLAG82514115	Plasmid vector containing HLA-B*39:01:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:14 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:15 Genomic Plasmid Vector	PHLAG82514116	Plasmid vector containing HLA-B*39:01:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:15 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:16 Genomic Plasmid Vector	PHLAG82514117	Plasmid vector containing HLA-B*39:01:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:16 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:17 Genomic Plasmid Vector	PHLAG82514118	Plasmid vector containing HLA-B*39:01:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:17 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:18 Genomic Plasmid Vector	PHLAG82514119	Plasmid vector containing HLA-B*39:01:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:18 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:19 Genomic Plasmid Vector	PHLAG82514120	Plasmid vector containing HLA-B*39:01:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:19 protein under different cellular conditions.	Inquiry

HLA-B*39:01:01:20 Genomic Plasmid Vector	PHLAG82514121	Plasmid vector containing HLA-B*39:01:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:20 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:21 Genomic Plasmid Vector	PHLAG82514122	Plasmid vector containing HLA-B*39:01:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:21 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:22 Genomic Plasmid Vector	PHLAG82514123	Plasmid vector containing HLA-B*39:01:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:22 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:23 Genomic Plasmid Vector	PHLAG82514124	Plasmid vector containing HLA-B*39:01:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:23 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:24 Genomic Plasmid Vector	PHLAG82514125	Plasmid vector containing HLA-B*39:01:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:24 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:25 Genomic Plasmid Vector	PHLAG82514126	Plasmid vector containing HLA-B*39:01:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:25 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:26 Genomic Plasmid Vector	PHLAG82514127	Plasmid vector containing HLA-B*39:01:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:26 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:27 Genomic Plasmid Vector	PHLAG82514128	Plasmid vector containing HLA-B*39:01:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:27 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:28 Genomic Plasmid Vector	PHLAG82514129	Plasmid vector containing HLA-B*39:01:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:28 protein under different cellular conditions.	Inquiry

HLA-B*39:01:01:29 Genomic Plasmid Vector	PHLAG82514130	Plasmid vector containing HLA-B*39:01:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:29 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:30 Genomic Plasmid Vector	PHLAG82514131	Plasmid vector containing HLA-B*39:01:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:30 protein under different cellular conditions.	Inquiry
HLA-B*39:01:01:31 Genomic Plasmid Vector	PHLAG82514132	Plasmid vector containing HLA-B*39:01:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:01:31 protein under different cellular conditions.	Inquiry
HLA-B*39:01:03:01 Genomic Plasmid Vector	PHLAG82514133	Plasmid vector containing HLA-B*39:01:03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:03:01 protein under different cellular conditions.	Inquiry
HLA-B*39:01:03:02 Genomic Plasmid Vector	PHLAG82514134	Plasmid vector containing HLA-B*39:01:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:03:02 protein under different cellular conditions.	Inquiry
HLA-B*39:01:04 Genomic Plasmid Vector	PHLAG82514135	Plasmid vector containing HLA-B*39:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:04 protein under different cellular conditions.	Inquiry
HLA-B*39:01:05 Genomic Plasmid Vector	PHLAG82514136	Plasmid vector containing HLA-B*39:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:05 protein under different cellular conditions.	Inquiry
HLA-B*39:01:06 Genomic Plasmid Vector	PHLAG82514137	Plasmid vector containing HLA-B*39:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:06 protein under different cellular conditions.	Inquiry
HLA-B*39:01:07 Genomic Plasmid Vector	PHLAG82514138	Plasmid vector containing HLA-B*39:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:07 protein under different cellular conditions.	Inquiry

HLA-B*39:01:08 Genomic Plasmid Vector	PHLAG82514139	Plasmid vector containing HLA-B*39:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:08 protein under different cellular conditions.	Inquiry
HLA-B*39:01:09 Genomic Plasmid Vector	PHLAG825141410	Plasmid vector containing HLA-B*39:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:09 protein under different cellular conditions.	Inquiry
HLA-B*39:01:10 Genomic Plasmid Vector	PHLAG825141411	Plasmid vector containing HLA-B*39:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:10 protein under different cellular conditions.	Inquiry
HLA-B*39:01:11 Genomic Plasmid Vector	PHLAG825141412	Plasmid vector containing HLA-B*39:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:11 protein under different cellular conditions.	Inquiry
HLA-B*39:01:12 Genomic Plasmid Vector	PHLAG825141413	Plasmid vector containing HLA-B*39:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:12 protein under different cellular conditions.	Inquiry
HLA-B*39:01:13 Genomic Plasmid Vector	PHLAG825141414	Plasmid vector containing HLA-B*39:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:13 protein under different cellular conditions.	Inquiry
HLA-B*39:01:14 Genomic Plasmid Vector	PHLAG825141415	Plasmid vector containing HLA-B*39:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:14 protein under different cellular conditions.	Inquiry
HLA-B*39:01:15 Genomic Plasmid Vector	PHLAG825141416	Plasmid vector containing HLA-B*39:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:15 protein under different cellular conditions.	Inquiry
HLA-B*39:01:16 Genomic Plasmid Vector	PHLAG825141417	Plasmid vector containing HLA-B*39:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:16 protein under different cellular conditions.	Inquiry

HLA-B*39:01:17 Genomic Plasmid Vector	PHLAG82514148	Plasmid vector containing HLA-B*39:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:17 protein under different cellular conditions.	Inquiry
HLA-B*39:01:18 Genomic Plasmid Vector	PHLAG82514149	Plasmid vector containing HLA-B*39:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:18 protein under different cellular conditions.	Inquiry
HLA-B*39:01:19 Genomic Plasmid Vector	PHLAG825141510	Plasmid vector containing HLA-B*39:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:19 protein under different cellular conditions.	Inquiry
HLA-B*39:01:20 Genomic Plasmid Vector	PHLAG825141511	Plasmid vector containing HLA-B*39:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:20 protein under different cellular conditions.	Inquiry
HLA-B*39:01:21 Genomic Plasmid Vector	PHLAG825141512	Plasmid vector containing HLA-B*39:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:21 protein under different cellular conditions.	Inquiry
HLA-B*39:01:22 Genomic Plasmid Vector	PHLAG825141513	Plasmid vector containing HLA-B*39:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:22 protein under different cellular conditions.	Inquiry
HLA-B*39:01:23 Genomic Plasmid Vector	PHLAG825141514	Plasmid vector containing HLA-B*39:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:23 protein under different cellular conditions.	Inquiry
HLA-B*39:01:24 Genomic Plasmid Vector	PHLAG825141515	Plasmid vector containing HLA-B*39:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:24 protein under different cellular conditions.	Inquiry
HLA-B*39:01:25 Genomic Plasmid Vector	PHLAG825141516	Plasmid vector containing HLA-B*39:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:25 protein under different cellular conditions.	Inquiry

HLA-B*39:01:26 Genomic Plasmid Vector	PHLAG82514157	Plasmid vector containing HLA-B*39:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:26 protein under different cellular conditions.	Inquiry
HLA-B*39:01:27 Genomic Plasmid Vector	PHLAG82514158	Plasmid vector containing HLA-B*39:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:27 protein under different cellular conditions.	Inquiry
HLA-B*39:01:28 Genomic Plasmid Vector	PHLAG82514159	Plasmid vector containing HLA-B*39:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:28 protein under different cellular conditions.	Inquiry
HLA-B*39:01:29 Genomic Plasmid Vector	PHLAG82514160	Plasmid vector containing HLA-B*39:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:29 protein under different cellular conditions.	Inquiry
HLA-B*39:01:30 Genomic Plasmid Vector	PHLAG82514161	Plasmid vector containing HLA-B*39:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:30 protein under different cellular conditions.	Inquiry
HLA-B*39:01:31 Genomic Plasmid Vector	PHLAG82514162	Plasmid vector containing HLA-B*39:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:31 protein under different cellular conditions.	Inquiry
HLA-B*39:01:32 Genomic Plasmid Vector	PHLAG82514163	Plasmid vector containing HLA-B*39:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:32 protein under different cellular conditions.	Inquiry
HLA-B*39:01:33 Genomic Plasmid Vector	PHLAG82514164	Plasmid vector containing HLA-B*39:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:33 protein under different cellular conditions.	Inquiry
HLA-B*39:01:34 Genomic Plasmid Vector	PHLAG82514165	Plasmid vector containing HLA-B*39:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:34 protein under different cellular conditions.	Inquiry

HLA-B*39:01:35 Genomic Plasmid Vector	PHLAG82514166	Plasmid vector containing HLA-B*39:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:35 protein under different cellular conditions.	Inquiry
HLA-B*39:01:36 Genomic Plasmid Vector	PHLAG82514167	Plasmid vector containing HLA-B*39:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:36 protein under different cellular conditions.	Inquiry
HLA-B*39:01:37 Genomic Plasmid Vector	PHLAG82514168	Plasmid vector containing HLA-B*39:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:37 protein under different cellular conditions.	Inquiry
HLA-B*39:01:38 Genomic Plasmid Vector	PHLAG82514169	Plasmid vector containing HLA-B*39:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:38 protein under different cellular conditions.	Inquiry
HLA-B*39:01:39 Genomic Plasmid Vector	PHLAG82514170	Plasmid vector containing HLA-B*39:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:39 protein under different cellular conditions.	Inquiry
HLA-B*39:01:40 Genomic Plasmid Vector	PHLAG82514171	Plasmid vector containing HLA-B*39:01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:40 protein under different cellular conditions.	Inquiry
HLA-B*39:01:41 Genomic Plasmid Vector	PHLAG82514172	Plasmid vector containing HLA-B*39:01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:41 protein under different cellular conditions.	Inquiry
HLA-B*39:01:42 Genomic Plasmid Vector	PHLAG82514173	Plasmid vector containing HLA-B*39:01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:42 protein under different cellular conditions.	Inquiry
HLA-B*39:01:43 Genomic Plasmid Vector	PHLAG82514174	Plasmid vector containing HLA-B*39:01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:01:43 protein under different cellular conditions.	Inquiry

HLA-B*39:02:01:01 Genomic Plasmid Vector	PHLAG82514175	Plasmid vector containing HLA-B*39:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:02:01:01 protein under different cellular conditions.	Inquiry
HLA-B*39:02:01:02 Genomic Plasmid Vector	PHLAG82514176	Plasmid vector containing HLA-B*39:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:02:01:02 protein under different cellular conditions.	Inquiry
HLA-B*39:02:02:01 Genomic Plasmid Vector	PHLAG82514177	Plasmid vector containing HLA-B*39:02:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:02:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:02:02:01 protein under different cellular conditions.	Inquiry
HLA-B*39:02:02:02 Genomic Plasmid Vector	PHLAG82514178	Plasmid vector containing HLA-B*39:02:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:02:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:02:02:02 protein under different cellular conditions.	Inquiry
HLA-B*39:02:02:03 Genomic Plasmid Vector	PHLAG82514179	Plasmid vector containing HLA-B*39:02:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:02:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:02:02:03 protein under different cellular conditions.	Inquiry
HLA-B*39:02:02:04 Genomic Plasmid Vector	PHLAG82514180	Plasmid vector containing HLA-B*39:02:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:02:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:02:02:04 protein under different cellular conditions.	Inquiry
HLA-B*39:02:03 Genomic Plasmid Vector	PHLAG82514181	Plasmid vector containing HLA-B*39:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:02:03 protein under different cellular conditions.	Inquiry
HLA-B*39:03:01:01 Genomic Plasmid Vector	PHLAG82514182	Plasmid vector containing HLA-B*39:03:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:03:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:03:01:01 protein under different cellular conditions.	Inquiry
HLA-B*39:03:01:02 Genomic Plasmid Vector	PHLAG82514183	Plasmid vector containing HLA-B*39:03:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:03:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:03:01:02 protein under different cellular conditions.	Inquiry

HLA-B*39:03:01:03 Genomic Plasmid Vector	PHLAG82514184	Plasmid vector containing HLA-B*39:03:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:03:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:03:01:03 protein under different cellular conditions.	Inquiry
HLA-B*39:03:02 Genomic Plasmid Vector	PHLAG82514185	Plasmid vector containing HLA-B*39:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:03:02 protein under different cellular conditions.	Inquiry
HLA-B*39:04 Genomic Plasmid Vector	PHLAG82514186	Plasmid vector containing HLA-B*39:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:04 protein under different cellular conditions.	Inquiry
HLA-B*39:05:01:01 Genomic Plasmid Vector	PHLAG82514187	Plasmid vector containing HLA-B*39:05:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:05:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:05:01:01 protein under different cellular conditions.	Inquiry
HLA-B*39:05:01:02 Genomic Plasmid Vector	PHLAG82514188	Plasmid vector containing HLA-B*39:05:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:05:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:05:01:02 protein under different cellular conditions.	Inquiry
HLA-B*39:05:01:03 Genomic Plasmid Vector	PHLAG82514189	Plasmid vector containing HLA-B*39:05:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:05:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:05:01:03 protein under different cellular conditions.	Inquiry
HLA-B*39:05:01:04 Genomic Plasmid Vector	PHLAG82514190	Plasmid vector containing HLA-B*39:05:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:05:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:05:01:04 protein under different cellular conditions.	Inquiry
HLA-B*39:05:01:05 Genomic Plasmid Vector	PHLAG82514191	Plasmid vector containing HLA-B*39:05:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:05:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:05:01:05 protein under different cellular conditions.	Inquiry
HLA-B*39:05:02 Genomic Plasmid Vector	PHLAG82514192	Plasmid vector containing HLA-B*39:05:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:05:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:05:02 protein under different cellular conditions.	Inquiry

HLA-B*39:05:03 Genomic Plasmid Vector	PHLAG82514193	Plasmid vector containing HLA-B*39:05:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:05:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:05:03 protein under different cellular conditions.	Inquiry
HLA-B*39:05:04 Genomic Plasmid Vector	PHLAG82514194	Plasmid vector containing HLA-B*39:05:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:05:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:05:04 protein under different cellular conditions.	Inquiry
HLA-B*39:05:05 Genomic Plasmid Vector	PHLAG82514195	Plasmid vector containing HLA-B*39:05:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:05:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:05:05 protein under different cellular conditions.	Inquiry
HLA-B*39:06:01:01 Genomic Plasmid Vector	PHLAG82514196	Plasmid vector containing HLA-B*39:06:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:01:01 protein under different cellular conditions.	Inquiry
HLA-B*39:06:01:02 Genomic Plasmid Vector	PHLAG82514197	Plasmid vector containing HLA-B*39:06:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:01:02 protein under different cellular conditions.	Inquiry
HLA-B*39:06:02:01 Genomic Plasmid Vector	PHLAG82514198	Plasmid vector containing HLA-B*39:06:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:02:01 protein under different cellular conditions.	Inquiry
HLA-B*39:06:02:02 Genomic Plasmid Vector	PHLAG82514199	Plasmid vector containing HLA-B*39:06:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:02:02 protein under different cellular conditions.	Inquiry
HLA-B*39:06:02:03 Genomic Plasmid Vector	PHLAG825142000	Plasmid vector containing HLA-B*39:06:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:02:03 protein under different cellular conditions.	Inquiry
HLA-B*39:06:02:04 Genomic Plasmid Vector	PHLAG825142001	Plasmid vector containing HLA-B*39:06:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:02:04 protein under different cellular conditions.	Inquiry

HLA-B*39:06:02:05 Genomic Plasmid Vector	PHLAG82514202	Plasmid vector containing HLA-B*39:06:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:02:05 protein under different cellular conditions.	Inquiry
HLA-B*39:06:02:06 Genomic Plasmid Vector	PHLAG82514203	Plasmid vector containing HLA-B*39:06:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:02:06 protein under different cellular conditions.	Inquiry
HLA-B*39:06:02:07 Genomic Plasmid Vector	PHLAG82514204	Plasmid vector containing HLA-B*39:06:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:02:07 protein under different cellular conditions.	Inquiry
HLA-B*39:06:02:08 Genomic Plasmid Vector	PHLAG82514205	Plasmid vector containing HLA-B*39:06:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:02:08 protein under different cellular conditions.	Inquiry
HLA-B*39:06:02:09 Genomic Plasmid Vector	PHLAG82514206	Plasmid vector containing HLA-B*39:06:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:02:09 protein under different cellular conditions.	Inquiry
HLA-B*39:06:02:10 Genomic Plasmid Vector	PHLAG82514207	Plasmid vector containing HLA-B*39:06:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:02:10 protein under different cellular conditions.	Inquiry
HLA-B*39:06:03 Genomic Plasmid Vector	PHLAG82514208	Plasmid vector containing HLA-B*39:06:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:03 protein under different cellular conditions.	Inquiry
HLA-B*39:06:04 Genomic Plasmid Vector	PHLAG82514209	Plasmid vector containing HLA-B*39:06:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:04 protein under different cellular conditions.	Inquiry
HLA-B*39:06:05 Genomic Plasmid Vector	PHLAG82514210	Plasmid vector containing HLA-B*39:06:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:05 protein under different cellular conditions.	Inquiry

HLA-B*39:06:06 Genomic Plasmid Vector	PHLAG82514211	Plasmid vector containing HLA-B*39:06:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:06 protein under different cellular conditions.	Inquiry
HLA-B*39:06:07 Genomic Plasmid Vector	PHLAG82514212	Plasmid vector containing HLA-B*39:06:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:07 protein under different cellular conditions.	Inquiry
HLA-B*39:06:08 Genomic Plasmid Vector	PHLAG82514213	Plasmid vector containing HLA-B*39:06:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:08 protein under different cellular conditions.	Inquiry
HLA-B*39:06:09 Genomic Plasmid Vector	PHLAG82514214	Plasmid vector containing HLA-B*39:06:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:06:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:06:09 protein under different cellular conditions.	Inquiry
HLA-B*39:07 Genomic Plasmid Vector	PHLAG82514215	Plasmid vector containing HLA-B*39:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:07 protein under different cellular conditions.	Inquiry
HLA-B*39:08 Genomic Plasmid Vector	PHLAG82514216	Plasmid vector containing HLA-B*39:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:08 protein under different cellular conditions.	Inquiry
HLA-B*39:09:01:01 Genomic Plasmid Vector	PHLAG82514217	Plasmid vector containing HLA-B*39:09:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:09:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:09:01:01 protein under different cellular conditions.	Inquiry
HLA-B*39:09:01:02 Genomic Plasmid Vector	PHLAG82514218	Plasmid vector containing HLA-B*39:09:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:09:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:09:01:02 protein under different cellular conditions.	Inquiry
HLA-B*39:09:01:03 Genomic Plasmid Vector	PHLAG82514219	Plasmid vector containing HLA-B*39:09:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:09:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:09:01:03 protein under different cellular conditions.	Inquiry

HLA-B*39:09:01:04 Genomic Plasmid Vector	PHLAG82514220	Plasmid vector containing HLA-B*39:09:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:09:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:09:01:04 protein under different cellular conditions.	Inquiry
HLA-B*39:09:01:05 Genomic Plasmid Vector	PHLAG82514221	Plasmid vector containing HLA-B*39:09:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:09:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:09:01:05 protein under different cellular conditions.	Inquiry
HLA-B*39:09:01:06 Genomic Plasmid Vector	PHLAG82514222	Plasmid vector containing HLA-B*39:09:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:09:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:09:01:06 protein under different cellular conditions.	Inquiry
HLA-B*39:09:01:07 Genomic Plasmid Vector	PHLAG82514223	Plasmid vector containing HLA-B*39:09:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:09:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:09:01:07 protein under different cellular conditions.	Inquiry
HLA-B*39:09:02 Genomic Plasmid Vector	PHLAG82514224	Plasmid vector containing HLA-B*39:09:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:09:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:09:02 protein under different cellular conditions.	Inquiry
HLA-B*39:09:03 Genomic Plasmid Vector	PHLAG82514225	Plasmid vector containing HLA-B*39:09:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:09:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:09:03 protein under different cellular conditions.	Inquiry
HLA-B*39:09:04 Genomic Plasmid Vector	PHLAG82514226	Plasmid vector containing HLA-B*39:09:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:09:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:09:04 protein under different cellular conditions.	Inquiry
HLA-B*39:09:05 Genomic Plasmid Vector	PHLAG82514227	Plasmid vector containing HLA-B*39:09:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:09:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:09:05 protein under different cellular conditions.	Inquiry
HLA-B*39:09:06 Genomic Plasmid Vector	PHLAG82514228	Plasmid vector containing HLA-B*39:09:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:09:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:09:06 protein under different cellular conditions.	Inquiry

HLA-B*39:10:01 Genomic Plasmid Vector	PHLAG82514229	Plasmid vector containing HLA-B*39:10:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:10:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:10:01 protein under different cellular conditions.	Inquiry
HLA-B*39:10:02 Genomic Plasmid Vector	PHLAG825142310	Plasmid vector containing HLA-B*39:10:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:10:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:10:02 protein under different cellular conditions.	Inquiry
HLA-B*39:10:03 Genomic Plasmid Vector	PHLAG825142311	Plasmid vector containing HLA-B*39:10:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:10:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:10:03 protein under different cellular conditions.	Inquiry
HLA-B*39:100 Genomic Plasmid Vector	PHLAG825142312	Plasmid vector containing HLA-B*39:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:100 protein under different cellular conditions.	Inquiry
HLA-B*39:101 Genomic Plasmid Vector	PHLAG825142313	Plasmid vector containing HLA-B*39:101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:101 protein under different cellular conditions.	Inquiry
HLA-B*39:102 Genomic Plasmid Vector	PHLAG825142314	Plasmid vector containing HLA-B*39:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:102 protein under different cellular conditions.	Inquiry
HLA-B*39:103 Genomic Plasmid Vector	PHLAG825142315	Plasmid vector containing HLA-B*39:103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:103 protein under different cellular conditions.	Inquiry
HLA-B*39:104 Genomic Plasmid Vector	PHLAG825142316	Plasmid vector containing HLA-B*39:104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:104 protein under different cellular conditions.	Inquiry
HLA-B*39:105 Genomic Plasmid Vector	PHLAG825142317	Plasmid vector containing HLA-B*39:105 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:105 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:105 protein under different cellular conditions.	Inquiry

HLA-B*39:106 Genomic Plasmid Vector	PHLAG82514238	Plasmid vector containing HLA-B*39:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:106 protein under different cellular conditions.	Inquiry
HLA-B*39:107 Genomic Plasmid Vector	PHLAG82514239	Plasmid vector containing HLA-B*39:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:107 protein under different cellular conditions.	Inquiry
HLA-B*39:108 Genomic Plasmid Vector	PHLAG82514240	Plasmid vector containing HLA-B*39:108 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:108 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:108 protein under different cellular conditions.	Inquiry
HLA-B*39:109 Genomic Plasmid Vector	PHLAG82514241	Plasmid vector containing HLA-B*39:109 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:109 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:109 protein under different cellular conditions.	Inquiry
HLA-B*39:11 Genomic Plasmid Vector	PHLAG82514242	Plasmid vector containing HLA-B*39:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:11 protein under different cellular conditions.	Inquiry
HLA-B*39:110 Genomic Plasmid Vector	PHLAG82514243	Plasmid vector containing HLA-B*39:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:110 protein under different cellular conditions.	Inquiry
HLA-B*39:111 Genomic Plasmid Vector	PHLAG82514244	Plasmid vector containing HLA-B*39:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:111 protein under different cellular conditions.	Inquiry
HLA-B*39:112 Genomic Plasmid Vector	PHLAG82514245	Plasmid vector containing HLA-B*39:112 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:112 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:112 protein under different cellular conditions.	Inquiry
HLA-B*39:113 Genomic Plasmid Vector	PHLAG82514246	Plasmid vector containing HLA-B*39:113 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:113 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:113 protein under different cellular conditions.	Inquiry

HLA-B*39:114 Genomic Plasmid Vector	PHLAG82514247	Plasmid vector containing HLA-B*39:114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:114 protein under different cellular conditions.	Inquiry
HLA-B*39:115 Genomic Plasmid Vector	PHLAG82514248	Plasmid vector containing HLA-B*39:115 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:115 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:115 protein under different cellular conditions.	Inquiry
HLA-B*39:116N Genomic Plasmid Vector	PHLAG82514249	Plasmid vector containing HLA-B*39:116N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:116N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:116N protein under different cellular conditions.	Inquiry
HLA-B*39:117 Genomic Plasmid Vector	PHLAG82514250	Plasmid vector containing HLA-B*39:117 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:117 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:117 protein under different cellular conditions.	Inquiry
HLA-B*39:118 Genomic Plasmid Vector	PHLAG82514251	Plasmid vector containing HLA-B*39:118 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:118 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:118 protein under different cellular conditions.	Inquiry
HLA-B*39:119 Genomic Plasmid Vector	PHLAG82514252	Plasmid vector containing HLA-B*39:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:119 protein under different cellular conditions.	Inquiry
HLA-B*39:12:01:01 Genomic Plasmid Vector	PHLAG82514253	Plasmid vector containing HLA-B*39:12:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:12:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:12:01:01 protein under different cellular conditions.	Inquiry
HLA-B*39:12:01:02 Genomic Plasmid Vector	PHLAG82514254	Plasmid vector containing HLA-B*39:12:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:12:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:12:01:02 protein under different cellular conditions.	Inquiry
HLA-B*39:120 Genomic Plasmid Vector	PHLAG82514255	Plasmid vector containing HLA-B*39:120 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:120 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:120 protein under different cellular conditions.	Inquiry

HLA-B*39:121 Genomic Plasmid Vector	PHLAG82514256	Plasmid vector containing HLA-B*39:121 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:121 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:121 protein under different cellular conditions.	Inquiry
HLA-B*39:122 Genomic Plasmid Vector	PHLAG82514257	Plasmid vector containing HLA-B*39:122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:122 protein under different cellular conditions.	Inquiry
HLA-B*39:123 Genomic Plasmid Vector	PHLAG82514258	Plasmid vector containing HLA-B*39:123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:123 protein under different cellular conditions.	Inquiry
HLA-B*39:124 Genomic Plasmid Vector	PHLAG82514259	Plasmid vector containing HLA-B*39:124 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:124 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:124 protein under different cellular conditions.	Inquiry
HLA-B*39:125 Genomic Plasmid Vector	PHLAG82514260	Plasmid vector containing HLA-B*39:125 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:125 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:125 protein under different cellular conditions.	Inquiry
HLA-B*39:126 Genomic Plasmid Vector	PHLAG82514261	Plasmid vector containing HLA-B*39:126 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:126 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:126 protein under different cellular conditions.	Inquiry
HLA-B*39:127 Genomic Plasmid Vector	PHLAG82514262	Plasmid vector containing HLA-B*39:127 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:127 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:127 protein under different cellular conditions.	Inquiry
HLA-B*39:128 Genomic Plasmid Vector	PHLAG82514263	Plasmid vector containing HLA-B*39:128 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:128 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:128 protein under different cellular conditions.	Inquiry
HLA-B*39:129 Genomic Plasmid Vector	PHLAG82514264	Plasmid vector containing HLA-B*39:129 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:129 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:129 protein under different cellular conditions.	Inquiry

HLA-B*39:13:01 Genomic Plasmid Vector	PHLAG82514265	Plasmid vector containing HLA-B*39:13:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:13:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:13:01 protein under different cellular conditions.	Inquiry
HLA-B*39:13:02 Genomic Plasmid Vector	PHLAG82514266	Plasmid vector containing HLA-B*39:13:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:13:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:13:02 protein under different cellular conditions.	Inquiry
HLA-B*39:13:03 Genomic Plasmid Vector	PHLAG82514267	Plasmid vector containing HLA-B*39:13:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:13:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:13:03 protein under different cellular conditions.	Inquiry
HLA-B*39:130 Genomic Plasmid Vector	PHLAG82514268	Plasmid vector containing HLA-B*39:130 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:130 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:130 protein under different cellular conditions.	Inquiry
HLA-B*39:131 Genomic Plasmid Vector	PHLAG82514269	Plasmid vector containing HLA-B*39:131 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:131 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:131 protein under different cellular conditions.	Inquiry
HLA-B*39:132 Genomic Plasmid Vector	PHLAG82514270	Plasmid vector containing HLA-B*39:132 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:132 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:132 protein under different cellular conditions.	Inquiry
HLA-B*39:133N Genomic Plasmid Vector	PHLAG82514271	Plasmid vector containing HLA-B*39:133N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:133N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:133N protein under different cellular conditions.	Inquiry
HLA-B*39:134 Genomic Plasmid Vector	PHLAG82514272	Plasmid vector containing HLA-B*39:134 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:134 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:134 protein under different cellular conditions.	Inquiry
HLA-B*39:135 Genomic Plasmid Vector	PHLAG82514273	Plasmid vector containing HLA-B*39:135 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:135 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:135 protein under different cellular conditions.	Inquiry

HLA-B*39:136 Genomic Plasmid Vector	PHLAG82514274	Plasmid vector containing HLA-B*39:136 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:136 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:136 protein under different cellular conditions.	Inquiry
HLA-B*39:137 Genomic Plasmid Vector	PHLAG82514275	Plasmid vector containing HLA-B*39:137 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:137 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:137 protein under different cellular conditions.	Inquiry
HLA-B*39:138 Genomic Plasmid Vector	PHLAG82514276	Plasmid vector containing HLA-B*39:138 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:138 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:138 protein under different cellular conditions.	Inquiry
HLA-B*39:139N Genomic Plasmid Vector	PHLAG82514277	Plasmid vector containing HLA-B*39:139N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:139N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:139N protein under different cellular conditions.	Inquiry
HLA-B*39:14:01:01 Genomic Plasmid Vector	PHLAG82514278	Plasmid vector containing HLA-B*39:14:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:14:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:14:01:01 protein under different cellular conditions.	Inquiry
HLA-B*39:14:01:02 Genomic Plasmid Vector	PHLAG82514279	Plasmid vector containing HLA-B*39:14:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:14:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:14:01:02 protein under different cellular conditions.	Inquiry
HLA-B*39:14:01:03 Genomic Plasmid Vector	PHLAG82514280	Plasmid vector containing HLA-B*39:14:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:14:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:14:01:03 protein under different cellular conditions.	Inquiry
HLA-B*39:140 Genomic Plasmid Vector	PHLAG82514281	Plasmid vector containing HLA-B*39:140 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:140 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:140 protein under different cellular conditions.	Inquiry
HLA-B*39:141 Genomic Plasmid Vector	PHLAG82514282	Plasmid vector containing HLA-B*39:141 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:141 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:141 protein under different cellular conditions.	Inquiry

HLA-B*39:142N Genomic Plasmid Vector	PHLAG82514283	Plasmid vector containing HLA-B*39:142N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:142N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:142N protein under different cellular conditions.	Inquiry
HLA-B*39:143 Genomic Plasmid Vector	PHLAG82514284	Plasmid vector containing HLA-B*39:143 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:143 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:143 protein under different cellular conditions.	Inquiry
HLA-B*39:144 Genomic Plasmid Vector	PHLAG82514285	Plasmid vector containing HLA-B*39:144 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:144 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:144 protein under different cellular conditions.	Inquiry
HLA-B*39:145 Genomic Plasmid Vector	PHLAG82514286	Plasmid vector containing HLA-B*39:145 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:145 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:145 protein under different cellular conditions.	Inquiry
HLA-B*39:146N Genomic Plasmid Vector	PHLAG82514287	Plasmid vector containing HLA-B*39:146N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:146N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:146N protein under different cellular conditions.	Inquiry
HLA-B*39:147N Genomic Plasmid Vector	PHLAG82514288	Plasmid vector containing HLA-B*39:147N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:147N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:147N protein under different cellular conditions.	Inquiry
HLA-B*39:148 Genomic Plasmid Vector	PHLAG82514289	Plasmid vector containing HLA-B*39:148 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:148 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:148 protein under different cellular conditions.	Inquiry
HLA-B*39:149 Genomic Plasmid Vector	PHLAG82514290	Plasmid vector containing HLA-B*39:149 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:149 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:149 protein under different cellular conditions.	Inquiry
HLA-B*39:15 Genomic Plasmid Vector	PHLAG82514291	Plasmid vector containing HLA-B*39:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:15 protein under different cellular conditions.	Inquiry

HLA-B*39:150Q Genomic Plasmid Vector	PHLAG82514292	Plasmid vector containing HLA-B*39:150Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:150Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:150Q protein under different cellular conditions.	Inquiry
HLA-B*39:151 Genomic Plasmid Vector	PHLAG82514293	Plasmid vector containing HLA-B*39:151 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:151 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:151 protein under different cellular conditions.	Inquiry
HLA-B*39:152 Genomic Plasmid Vector	PHLAG82514294	Plasmid vector containing HLA-B*39:152 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:152 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:152 protein under different cellular conditions.	Inquiry
HLA-B*39:153 Genomic Plasmid Vector	PHLAG82514295	Plasmid vector containing HLA-B*39:153 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:153 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:153 protein under different cellular conditions.	Inquiry
HLA-B*39:154 Genomic Plasmid Vector	PHLAG82514296	Plasmid vector containing HLA-B*39:154 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:154 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:154 protein under different cellular conditions.	Inquiry
HLA-B*39:155 Genomic Plasmid Vector	PHLAG82514297	Plasmid vector containing HLA-B*39:155 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:155 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:155 protein under different cellular conditions.	Inquiry
HLA-B*39:156 Genomic Plasmid Vector	PHLAG82514298	Plasmid vector containing HLA-B*39:156 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:156 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:156 protein under different cellular conditions.	Inquiry
HLA-B*39:157N Genomic Plasmid Vector	PHLAG82514299	Plasmid vector containing HLA-B*39:157N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:157N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:157N protein under different cellular conditions.	Inquiry
HLA-B*39:158 Genomic Plasmid Vector	PHLAG82514300	Plasmid vector containing HLA-B*39:158 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:158 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:158 protein under different cellular conditions.	Inquiry

HLA-B*39:159 Genomic Plasmid Vector	PHLAG82514301	Plasmid vector containing HLA-B*39:159 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:159 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:159 protein under different cellular conditions.	Inquiry
HLA-B*39:16 Genomic Plasmid Vector	PHLAG82514302	Plasmid vector containing HLA-B*39:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:16 protein under different cellular conditions.	Inquiry
HLA-B*39:160 Genomic Plasmid Vector	PHLAG82514303	Plasmid vector containing HLA-B*39:160 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:160 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:160 protein under different cellular conditions.	Inquiry
HLA-B*39:161N Genomic Plasmid Vector	PHLAG82514304	Plasmid vector containing HLA-B*39:161N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:161N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:161N protein under different cellular conditions.	Inquiry
HLA-B*39:162 Genomic Plasmid Vector	PHLAG82514305	Plasmid vector containing HLA-B*39:162 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:162 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:162 protein under different cellular conditions.	Inquiry
HLA-B*39:163 Genomic Plasmid Vector	PHLAG82514306	Plasmid vector containing HLA-B*39:163 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:163 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:163 protein under different cellular conditions.	Inquiry
HLA-B*39:164 Genomic Plasmid Vector	PHLAG82514307	Plasmid vector containing HLA-B*39:164 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:164 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:164 protein under different cellular conditions.	Inquiry
HLA-B*39:165 Genomic Plasmid Vector	PHLAG82514308	Plasmid vector containing HLA-B*39:165 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:165 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:165 protein under different cellular conditions.	Inquiry
HLA-B*39:166 Genomic Plasmid Vector	PHLAG82514309	Plasmid vector containing HLA-B*39:166 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:166 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:166 protein under different cellular conditions.	Inquiry

HLA-B*39:167 Genomic Plasmid Vector	PHLAG82514310	Plasmid vector containing HLA-B*39:167 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:167 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:167 protein under different cellular conditions.	Inquiry
HLA-B*39:168 Genomic Plasmid Vector	PHLAG82514311	Plasmid vector containing HLA-B*39:168 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:168 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:168 protein under different cellular conditions.	Inquiry
HLA-B*39:169 Genomic Plasmid Vector	PHLAG82514312	Plasmid vector containing HLA-B*39:169 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:169 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:169 protein under different cellular conditions.	Inquiry
HLA-B*39:17 Genomic Plasmid Vector	PHLAG82514313	Plasmid vector containing HLA-B*39:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:17 protein under different cellular conditions.	Inquiry
HLA-B*39:170 Genomic Plasmid Vector	PHLAG82514314	Plasmid vector containing HLA-B*39:170 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:170 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:170 protein under different cellular conditions.	Inquiry
HLA-B*39:171 Genomic Plasmid Vector	PHLAG82514315	Plasmid vector containing HLA-B*39:171 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:171 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:171 protein under different cellular conditions.	Inquiry
HLA-B*39:172 Genomic Plasmid Vector	PHLAG82514316	Plasmid vector containing HLA-B*39:172 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:172 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:172 protein under different cellular conditions.	Inquiry
HLA-B*39:173 Genomic Plasmid Vector	PHLAG82514317	Plasmid vector containing HLA-B*39:173 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:173 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:173 protein under different cellular conditions.	Inquiry
HLA-B*39:174 Genomic Plasmid Vector	PHLAG82514318	Plasmid vector containing HLA-B*39:174 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:174 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:174 protein under different cellular conditions.	Inquiry

HLA-B*39:175N Genomic Plasmid Vector	PHLAG82514319	Plasmid vector containing HLA-B*39:175N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:175N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:175N protein under different cellular conditions.	Inquiry
HLA-B*39:176 Genomic Plasmid Vector	PHLAG825143220	Plasmid vector containing HLA-B*39:176 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:176 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:176 protein under different cellular conditions.	Inquiry
HLA-B*39:177 Genomic Plasmid Vector	PHLAG825143221	Plasmid vector containing HLA-B*39:177 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:177 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:177 protein under different cellular conditions.	Inquiry
HLA-B*39:178 Genomic Plasmid Vector	PHLAG825143222	Plasmid vector containing HLA-B*39:178 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:178 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:178 protein under different cellular conditions.	Inquiry
HLA-B*39:179 Genomic Plasmid Vector	PHLAG825143223	Plasmid vector containing HLA-B*39:179 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:179 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:179 protein under different cellular conditions.	Inquiry
HLA-B*39:18 Genomic Plasmid Vector	PHLAG825143224	Plasmid vector containing HLA-B*39:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:18 protein under different cellular conditions.	Inquiry
HLA-B*39:180 Genomic Plasmid Vector	PHLAG825143225	Plasmid vector containing HLA-B*39:180 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:180 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:180 protein under different cellular conditions.	Inquiry
HLA-B*39:181 Genomic Plasmid Vector	PHLAG825143226	Plasmid vector containing HLA-B*39:181 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:181 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:181 protein under different cellular conditions.	Inquiry
HLA-B*39:182 Genomic Plasmid Vector	PHLAG825143227	Plasmid vector containing HLA-B*39:182 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:182 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:182 protein under different cellular conditions.	Inquiry

HLA-B*39:183 Genomic Plasmid Vector	PHLAG82514328	Plasmid vector containing HLA-B*39:183 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:183 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:183 protein under different cellular conditions.	Inquiry
HLA-B*39:184 Genomic Plasmid Vector	PHLAG82514329	Plasmid vector containing HLA-B*39:184 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:184 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:184 protein under different cellular conditions.	Inquiry
HLA-B*39:185 Genomic Plasmid Vector	PHLAG82514330	Plasmid vector containing HLA-B*39:185 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:185 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:185 protein under different cellular conditions.	Inquiry
HLA-B*39:186 Genomic Plasmid Vector	PHLAG82514331	Plasmid vector containing HLA-B*39:186 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:186 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:186 protein under different cellular conditions.	Inquiry
HLA-B*39:187 Genomic Plasmid Vector	PHLAG82514332	Plasmid vector containing HLA-B*39:187 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:187 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:187 protein under different cellular conditions.	Inquiry
HLA-B*39:188 Genomic Plasmid Vector	PHLAG82514333	Plasmid vector containing HLA-B*39:188 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:188 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:188 protein under different cellular conditions.	Inquiry
HLA-B*39:189 Genomic Plasmid Vector	PHLAG82514334	Plasmid vector containing HLA-B*39:189 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:189 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:189 protein under different cellular conditions.	Inquiry
HLA-B*39:19:01 Genomic Plasmid Vector	PHLAG82514335	Plasmid vector containing HLA-B*39:19:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:19:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:19:01 protein under different cellular conditions.	Inquiry
HLA-B*39:19:02 Genomic Plasmid Vector	PHLAG82514336	Plasmid vector containing HLA-B*39:19:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:19:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:19:02 protein under different cellular conditions.	Inquiry

HLA-B*39:190 Genomic Plasmid Vector	PHLAG82514337	Plasmid vector containing HLA-B*39:190 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:190 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:190 protein under different cellular conditions.	Inquiry
HLA-B*39:191 Genomic Plasmid Vector	PHLAG82514338	Plasmid vector containing HLA-B*39:191 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:191 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:191 protein under different cellular conditions.	Inquiry
HLA-B*39:192 Genomic Plasmid Vector	PHLAG82514339	Plasmid vector containing HLA-B*39:192 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:192 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:192 protein under different cellular conditions.	Inquiry
HLA-B*39:193 Genomic Plasmid Vector	PHLAG825143400	Plasmid vector containing HLA-B*39:193 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:193 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:193 protein under different cellular conditions.	Inquiry
HLA-B*39:194Q Genomic Plasmid Vector	PHLAG825143401	Plasmid vector containing HLA-B*39:194Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:194Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:194Q protein under different cellular conditions.	Inquiry
HLA-B*39:195 Genomic Plasmid Vector	PHLAG825143402	Plasmid vector containing HLA-B*39:195 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:195 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:195 protein under different cellular conditions.	Inquiry
HLA-B*39:196 Genomic Plasmid Vector	PHLAG825143403	Plasmid vector containing HLA-B*39:196 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:196 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:196 protein under different cellular conditions.	Inquiry
HLA-B*39:197 Genomic Plasmid Vector	PHLAG825143404	Plasmid vector containing HLA-B*39:197 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:197 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:197 protein under different cellular conditions.	Inquiry
HLA-B*39:198 Genomic Plasmid Vector	PHLAG825143405	Plasmid vector containing HLA-B*39:198 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:198 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:198 protein under different cellular conditions.	Inquiry

HLA-B*39:199 Genomic Plasmid Vector	PHLAG82514346	Plasmid vector containing HLA-B*39:199 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:199 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:199 protein under different cellular conditions.	Inquiry
HLA-B*39:20 Genomic Plasmid Vector	PHLAG82514347	Plasmid vector containing HLA-B*39:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:20 protein under different cellular conditions.	Inquiry
HLA-B*39:200 Genomic Plasmid Vector	PHLAG82514348	Plasmid vector containing HLA-B*39:200 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:200 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:200 protein under different cellular conditions.	Inquiry
HLA-B*39:201 Genomic Plasmid Vector	PHLAG82514349	Plasmid vector containing HLA-B*39:201 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:201 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:201 protein under different cellular conditions.	Inquiry
HLA-B*39:202 Genomic Plasmid Vector	PHLAG82514350	Plasmid vector containing HLA-B*39:202 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:202 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:202 protein under different cellular conditions.	Inquiry
HLA-B*39:203Q Genomic Plasmid Vector	PHLAG82514351	Plasmid vector containing HLA-B*39:203Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:203Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:203Q protein under different cellular conditions.	Inquiry
HLA-B*39:204 Genomic Plasmid Vector	PHLAG82514352	Plasmid vector containing HLA-B*39:204 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:204 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:204 protein under different cellular conditions.	Inquiry
HLA-B*39:205 Genomic Plasmid Vector	PHLAG82514353	Plasmid vector containing HLA-B*39:205 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:205 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:205 protein under different cellular conditions.	Inquiry
HLA-B*39:206 Genomic Plasmid Vector	PHLAG82514354	Plasmid vector containing HLA-B*39:206 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:206 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:206 protein under different cellular conditions.	Inquiry

HLA-B*39:207N Genomic Plasmid Vector	PHLAG82514355	Plasmid vector containing HLA-B*39:207N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:207N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:207N protein under different cellular conditions.	Inquiry
HLA-B*39:208 Genomic Plasmid Vector	PHLAG82514356	Plasmid vector containing HLA-B*39:208 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:208 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:208 protein under different cellular conditions.	Inquiry
HLA-B*39:209 Genomic Plasmid Vector	PHLAG82514357	Plasmid vector containing HLA-B*39:209 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:209 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:209 protein under different cellular conditions.	Inquiry
HLA-B*39:210 Genomic Plasmid Vector	PHLAG82514358	Plasmid vector containing HLA-B*39:210 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:210 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:210 protein under different cellular conditions.	Inquiry
HLA-B*39:211 Genomic Plasmid Vector	PHLAG82514359	Plasmid vector containing HLA-B*39:211 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:211 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:211 protein under different cellular conditions.	Inquiry
HLA-B*39:212 Genomic Plasmid Vector	PHLAG82514360	Plasmid vector containing HLA-B*39:212 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:212 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:212 protein under different cellular conditions.	Inquiry
HLA-B*39:213 Genomic Plasmid Vector	PHLAG82514361	Plasmid vector containing HLA-B*39:213 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:213 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:213 protein under different cellular conditions.	Inquiry
HLA-B*39:214N Genomic Plasmid Vector	PHLAG82514362	Plasmid vector containing HLA-B*39:214N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:214N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:214N protein under different cellular conditions.	Inquiry
HLA-B*39:215 Genomic Plasmid Vector	PHLAG82514363	Plasmid vector containing HLA-B*39:215 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:215 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:215 protein under different cellular conditions.	Inquiry

HLA-B*39:216 Genomic Plasmid Vector	PHLAG82514364	Plasmid vector containing HLA-B*39:216 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:216 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:216 protein under different cellular conditions.	Inquiry
HLA-B*39:217 Genomic Plasmid Vector	PHLAG82514365	Plasmid vector containing HLA-B*39:217 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:217 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:217 protein under different cellular conditions.	Inquiry
HLA-B*39:218 Genomic Plasmid Vector	PHLAG82514366	Plasmid vector containing HLA-B*39:218 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:218 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:218 protein under different cellular conditions.	Inquiry
HLA-B*39:219 Genomic Plasmid Vector	PHLAG82514367	Plasmid vector containing HLA-B*39:219 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:219 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:219 protein under different cellular conditions.	Inquiry
HLA-B*39:22 Genomic Plasmid Vector	PHLAG82514368	Plasmid vector containing HLA-B*39:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:22 protein under different cellular conditions.	Inquiry
HLA-B*39:220 Genomic Plasmid Vector	PHLAG82514369	Plasmid vector containing HLA-B*39:220 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:220 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:220 protein under different cellular conditions.	Inquiry
HLA-B*39:221 Genomic Plasmid Vector	PHLAG82514370	Plasmid vector containing HLA-B*39:221 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:221 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:221 protein under different cellular conditions.	Inquiry
HLA-B*39:222 Genomic Plasmid Vector	PHLAG82514371	Plasmid vector containing HLA-B*39:222 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:222 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:222 protein under different cellular conditions.	Inquiry
HLA-B*39:223 Genomic Plasmid Vector	PHLAG82514372	Plasmid vector containing HLA-B*39:223 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:223 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:223 protein under different cellular conditions.	Inquiry

HLA-B*39:224 Genomic Plasmid Vector	PHLAG82514373	Plasmid vector containing HLA-B*39:224 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:224 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:224 protein under different cellular conditions.	Inquiry
HLA-B*39:225 Genomic Plasmid Vector	PHLAG82514374	Plasmid vector containing HLA-B*39:225 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:225 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:225 protein under different cellular conditions.	Inquiry
HLA-B*39:226 Genomic Plasmid Vector	PHLAG82514375	Plasmid vector containing HLA-B*39:226 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:226 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:226 protein under different cellular conditions.	Inquiry
HLA-B*39:227 Genomic Plasmid Vector	PHLAG82514376	Plasmid vector containing HLA-B*39:227 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:227 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:227 protein under different cellular conditions.	Inquiry
HLA-B*39:228 Genomic Plasmid Vector	PHLAG82514377	Plasmid vector containing HLA-B*39:228 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:228 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:228 protein under different cellular conditions.	Inquiry
HLA-B*39:229 Genomic Plasmid Vector	PHLAG82514378	Plasmid vector containing HLA-B*39:229 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:229 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:229 protein under different cellular conditions.	Inquiry
HLA-B*39:23 Genomic Plasmid Vector	PHLAG82514379	Plasmid vector containing HLA-B*39:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:23 protein under different cellular conditions.	Inquiry
HLA-B*39:230 Genomic Plasmid Vector	PHLAG82514380	Plasmid vector containing HLA-B*39:230 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:230 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:230 protein under different cellular conditions.	Inquiry
HLA-B*39:231 Genomic Plasmid Vector	PHLAG82514381	Plasmid vector containing HLA-B*39:231 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:231 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:231 protein under different cellular conditions.	Inquiry

HLA-B*39:232 Genomic Plasmid Vector	PHLAG8251438 2	Plasmid vector containing HLA-B*39:232 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:232 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:232 protein under different cellular conditions.	Inquiry
HLA-B*39:233 Genomic Plasmid Vector	PHLAG8251438 3	Plasmid vector containing HLA-B*39:233 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:233 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:233 protein under different cellular conditions.	Inquiry
HLA-B*39:234 Genomic Plasmid Vector	PHLAG8251438 4	Plasmid vector containing HLA-B*39:234 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:234 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:234 protein under different cellular conditions.	Inquiry
HLA-B*39:235 Genomic Plasmid Vector	PHLAG8251438 5	Plasmid vector containing HLA-B*39:235 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:235 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:235 protein under different cellular conditions.	Inquiry
HLA-B*39:24:01:01 Genomic Plasmid Vector	PHLAG8251438 6	Plasmid vector containing HLA-B*39:24:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:24:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:24:01:01 protein under different cellular conditions.	Inquiry
HLA-B*39:24:01:02 Genomic Plasmid Vector	PHLAG8251438 7	Plasmid vector containing HLA-B*39:24:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:24:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:24:01:02 protein under different cellular conditions.	Inquiry
HLA-B*39:24:02 Genomic Plasmid Vector	PHLAG8251438 8	Plasmid vector containing HLA-B*39:24:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:24:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:24:02 protein under different cellular conditions.	Inquiry
HLA-B*39:24:03 Genomic Plasmid Vector	PHLAG8251438 9	Plasmid vector containing HLA-B*39:24:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:24:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:24:03 protein under different cellular conditions.	Inquiry
HLA-B*39:25N Genomic Plasmid Vector	PHLAG8251439 0	Plasmid vector containing HLA-B*39:25N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:25N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:25N protein under different cellular conditions.	Inquiry

HLA-B*39:26 Genomic Plasmid Vector	PHLAG82514391	Plasmid vector containing HLA-B*39:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:26 protein under different cellular conditions.	Inquiry
HLA-B*39:27 Genomic Plasmid Vector	PHLAG82514392	Plasmid vector containing HLA-B*39:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:27 protein under different cellular conditions.	Inquiry
HLA-B*39:28 Genomic Plasmid Vector	PHLAG82514393	Plasmid vector containing HLA-B*39:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:28 protein under different cellular conditions.	Inquiry
HLA-B*39:29 Genomic Plasmid Vector	PHLAG82514394	Plasmid vector containing HLA-B*39:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:29 protein under different cellular conditions.	Inquiry
HLA-B*39:30 Genomic Plasmid Vector	PHLAG82514395	Plasmid vector containing HLA-B*39:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:30 protein under different cellular conditions.	Inquiry
HLA-B*39:31:01:01 Genomic Plasmid Vector	PHLAG82514396	Plasmid vector containing HLA-B*39:31:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:31:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:31:01:01 protein under different cellular conditions.	Inquiry
HLA-B*39:31:01:02 Genomic Plasmid Vector	PHLAG82514397	Plasmid vector containing HLA-B*39:31:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:31:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:31:01:02 protein under different cellular conditions.	Inquiry
HLA-B*39:32 Genomic Plasmid Vector	PHLAG82514398	Plasmid vector containing HLA-B*39:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:32 protein under different cellular conditions.	Inquiry
HLA-B*39:33 Genomic Plasmid Vector	PHLAG82514399	Plasmid vector containing HLA-B*39:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:33 protein under different cellular conditions.	Inquiry

HLA-B*39:34 Genomic Plasmid Vector	PHLAG82514400	Plasmid vector containing HLA-B*39:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:34 protein under different cellular conditions.	Inquiry
HLA-B*39:35 Genomic Plasmid Vector	PHLAG82514401	Plasmid vector containing HLA-B*39:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:35 protein under different cellular conditions.	Inquiry
HLA-B*39:36 Genomic Plasmid Vector	PHLAG82514402	Plasmid vector containing HLA-B*39:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:36 protein under different cellular conditions.	Inquiry
HLA-B*39:37:01:01 Genomic Plasmid Vector	PHLAG82514403	Plasmid vector containing HLA-B*39:37:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:37:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:37:01:01 protein under different cellular conditions.	Inquiry
HLA-B*39:37:01:02 Genomic Plasmid Vector	PHLAG82514404	Plasmid vector containing HLA-B*39:37:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:37:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:37:01:02 protein under different cellular conditions.	Inquiry
HLA-B*39:38Q Genomic Plasmid Vector	PHLAG82514405	Plasmid vector containing HLA-B*39:38Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:38Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:38Q protein under different cellular conditions.	Inquiry
HLA-B*39:39:01 Genomic Plasmid Vector	PHLAG82514406	Plasmid vector containing HLA-B*39:39:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:39:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:39:01 protein under different cellular conditions.	Inquiry
HLA-B*39:39:02 Genomic Plasmid Vector	PHLAG82514407	Plasmid vector containing HLA-B*39:39:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:39:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:39:02 protein under different cellular conditions.	Inquiry
HLA-B*39:40:01N Genomic Plasmid Vector	PHLAG82514408	Plasmid vector containing HLA-B*39:40:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:40:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:40:01N protein under different cellular conditions.	Inquiry

HLA-B*39:40:02N Genomic Plasmid Vector	PHLAG82514409	Plasmid vector containing HLA-B*39:40:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:40:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:40:02N protein under different cellular conditions.	Inquiry
HLA-B*39:41 Genomic Plasmid Vector	PHLAG825144110	Plasmid vector containing HLA-B*39:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:41 protein under different cellular conditions.	Inquiry
HLA-B*39:42 Genomic Plasmid Vector	PHLAG825144111	Plasmid vector containing HLA-B*39:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:42 protein under different cellular conditions.	Inquiry
HLA-B*39:43 Genomic Plasmid Vector	PHLAG825144112	Plasmid vector containing HLA-B*39:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:43 protein under different cellular conditions.	Inquiry
HLA-B*39:44 Genomic Plasmid Vector	PHLAG825144113	Plasmid vector containing HLA-B*39:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:44 protein under different cellular conditions.	Inquiry
HLA-B*39:45 Genomic Plasmid Vector	PHLAG825144114	Plasmid vector containing HLA-B*39:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:45 protein under different cellular conditions.	Inquiry
HLA-B*39:46 Genomic Plasmid Vector	PHLAG825144115	Plasmid vector containing HLA-B*39:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:46 protein under different cellular conditions.	Inquiry
HLA-B*39:47 Genomic Plasmid Vector	PHLAG825144116	Plasmid vector containing HLA-B*39:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:47 protein under different cellular conditions.	Inquiry
HLA-B*39:48 Genomic Plasmid Vector	PHLAG825144117	Plasmid vector containing HLA-B*39:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:48 protein under different cellular conditions.	Inquiry

HLA-B*39:49 Genomic Plasmid Vector	PHLAG82514418	Plasmid vector containing HLA-B*39:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:49 protein under different cellular conditions.	Inquiry
HLA-B*39:50 Genomic Plasmid Vector	PHLAG82514419	Plasmid vector containing HLA-B*39:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:50 protein under different cellular conditions.	Inquiry
HLA-B*39:51 Genomic Plasmid Vector	PHLAG825144220	Plasmid vector containing HLA-B*39:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:51 protein under different cellular conditions.	Inquiry
HLA-B*39:52 Genomic Plasmid Vector	PHLAG825144221	Plasmid vector containing HLA-B*39:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:52 protein under different cellular conditions.	Inquiry
HLA-B*39:53 Genomic Plasmid Vector	PHLAG825144222	Plasmid vector containing HLA-B*39:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:53 protein under different cellular conditions.	Inquiry
HLA-B*39:54 Genomic Plasmid Vector	PHLAG825144223	Plasmid vector containing HLA-B*39:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:54 protein under different cellular conditions.	Inquiry
HLA-B*39:55 Genomic Plasmid Vector	PHLAG825144224	Plasmid vector containing HLA-B*39:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:55 protein under different cellular conditions.	Inquiry
HLA-B*39:56 Genomic Plasmid Vector	PHLAG825144225	Plasmid vector containing HLA-B*39:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:56 protein under different cellular conditions.	Inquiry
HLA-B*39:57 Genomic Plasmid Vector	PHLAG825144226	Plasmid vector containing HLA-B*39:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:57 protein under different cellular conditions.	Inquiry

HLA-B*39:58:01 Genomic Plasmid Vector	PHLAG82514427	Plasmid vector containing HLA-B*39:58:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:58:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:58:01 protein under different cellular conditions.	Inquiry
HLA-B*39:58:02 Genomic Plasmid Vector	PHLAG82514428	Plasmid vector containing HLA-B*39:58:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:58:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:58:02 protein under different cellular conditions.	Inquiry
HLA-B*39:59 Genomic Plasmid Vector	PHLAG82514429	Plasmid vector containing HLA-B*39:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:59 protein under different cellular conditions.	Inquiry
HLA-B*39:60 Genomic Plasmid Vector	PHLAG82514430	Plasmid vector containing HLA-B*39:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:60 protein under different cellular conditions.	Inquiry
HLA-B*39:61 Genomic Plasmid Vector	PHLAG82514431	Plasmid vector containing HLA-B*39:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:61 protein under different cellular conditions.	Inquiry
HLA-B*39:62 Genomic Plasmid Vector	PHLAG82514432	Plasmid vector containing HLA-B*39:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:62 protein under different cellular conditions.	Inquiry
HLA-B*39:63 Genomic Plasmid Vector	PHLAG82514433	Plasmid vector containing HLA-B*39:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:63 protein under different cellular conditions.	Inquiry
HLA-B*39:64 Genomic Plasmid Vector	PHLAG82514434	Plasmid vector containing HLA-B*39:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:64 protein under different cellular conditions.	Inquiry
HLA-B*39:65 Genomic Plasmid Vector	PHLAG82514435	Plasmid vector containing HLA-B*39:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:65 protein under different cellular conditions.	Inquiry

HLA-B*39:66 Genomic Plasmid Vector	PHLAG82514436	Plasmid vector containing HLA-B*39:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:66 protein under different cellular conditions.	Inquiry
HLA-B*39:67 Genomic Plasmid Vector	PHLAG82514437	Plasmid vector containing HLA-B*39:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:67 protein under different cellular conditions.	Inquiry
HLA-B*39:68 Genomic Plasmid Vector	PHLAG82514438	Plasmid vector containing HLA-B*39:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:68 protein under different cellular conditions.	Inquiry
HLA-B*39:69 Genomic Plasmid Vector	PHLAG82514439	Plasmid vector containing HLA-B*39:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:69 protein under different cellular conditions.	Inquiry
HLA-B*39:70 Genomic Plasmid Vector	PHLAG82514440	Plasmid vector containing HLA-B*39:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:70 protein under different cellular conditions.	Inquiry
HLA-B*39:71 Genomic Plasmid Vector	PHLAG82514441	Plasmid vector containing HLA-B*39:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:71 protein under different cellular conditions.	Inquiry
HLA-B*39:72 Genomic Plasmid Vector	PHLAG82514442	Plasmid vector containing HLA-B*39:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:72 protein under different cellular conditions.	Inquiry
HLA-B*39:73 Genomic Plasmid Vector	PHLAG82514443	Plasmid vector containing HLA-B*39:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:73 protein under different cellular conditions.	Inquiry
HLA-B*39:74 Genomic Plasmid Vector	PHLAG82514444	Plasmid vector containing HLA-B*39:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:74 protein under different cellular conditions.	Inquiry

HLA-B*39:75 Genomic Plasmid Vector	PHLAG82514445	Plasmid vector containing HLA-B*39:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:75 protein under different cellular conditions.	Inquiry
HLA-B*39:76 Genomic Plasmid Vector	PHLAG82514446	Plasmid vector containing HLA-B*39:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:76 protein under different cellular conditions.	Inquiry
HLA-B*39:77 Genomic Plasmid Vector	PHLAG82514447	Plasmid vector containing HLA-B*39:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:77 protein under different cellular conditions.	Inquiry
HLA-B*39:78 Genomic Plasmid Vector	PHLAG82514448	Plasmid vector containing HLA-B*39:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:78 protein under different cellular conditions.	Inquiry
HLA-B*39:79 Genomic Plasmid Vector	PHLAG82514449	Plasmid vector containing HLA-B*39:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:79 protein under different cellular conditions.	Inquiry
HLA-B*39:80 Genomic Plasmid Vector	PHLAG825144510	Plasmid vector containing HLA-B*39:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:80 protein under different cellular conditions.	Inquiry
HLA-B*39:81 Genomic Plasmid Vector	PHLAG825144511	Plasmid vector containing HLA-B*39:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:81 protein under different cellular conditions.	Inquiry
HLA-B*39:82 Genomic Plasmid Vector	PHLAG825144512	Plasmid vector containing HLA-B*39:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:82 protein under different cellular conditions.	Inquiry
HLA-B*39:83:01 Genomic Plasmid Vector	PHLAG825144513	Plasmid vector containing HLA-B*39:83:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:83:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:83:01 protein under different cellular conditions.	Inquiry

HLA-B*39:83:02 Genomic Plasmid Vector	PHLAG82514454	Plasmid vector containing HLA-B*39:83:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:83:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:83:02 protein under different cellular conditions.	Inquiry
HLA-B*39:83:03 Genomic Plasmid Vector	PHLAG82514455	Plasmid vector containing HLA-B*39:83:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:83:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:83:03 protein under different cellular conditions.	Inquiry
HLA-B*39:84 Genomic Plasmid Vector	PHLAG82514456	Plasmid vector containing HLA-B*39:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:84 protein under different cellular conditions.	Inquiry
HLA-B*39:85 Genomic Plasmid Vector	PHLAG82514457	Plasmid vector containing HLA-B*39:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:85 protein under different cellular conditions.	Inquiry
HLA-B*39:86 Genomic Plasmid Vector	PHLAG82514458	Plasmid vector containing HLA-B*39:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:86 protein under different cellular conditions.	Inquiry
HLA-B*39:87N Genomic Plasmid Vector	PHLAG82514459	Plasmid vector containing HLA-B*39:87N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:87N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:87N protein under different cellular conditions.	Inquiry
HLA-B*39:88 Genomic Plasmid Vector	PHLAG82514460	Plasmid vector containing HLA-B*39:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:88 protein under different cellular conditions.	Inquiry
HLA-B*39:89 Genomic Plasmid Vector	PHLAG82514461	Plasmid vector containing HLA-B*39:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:89 protein under different cellular conditions.	Inquiry
HLA-B*39:90 Genomic Plasmid Vector	PHLAG82514462	Plasmid vector containing HLA-B*39:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:90 protein under different cellular conditions.	Inquiry

HLA-B*39:91 Genomic Plasmid Vector	PHLAG82514463	Plasmid vector containing HLA-B*39:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:91 protein under different cellular conditions.	Inquiry
HLA-B*39:92 Genomic Plasmid Vector	PHLAG82514464	Plasmid vector containing HLA-B*39:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:92 protein under different cellular conditions.	Inquiry
HLA-B*39:93 Genomic Plasmid Vector	PHLAG82514465	Plasmid vector containing HLA-B*39:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:93 protein under different cellular conditions.	Inquiry
HLA-B*39:94 Genomic Plasmid Vector	PHLAG82514466	Plasmid vector containing HLA-B*39:94 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:94 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:94 protein under different cellular conditions.	Inquiry
HLA-B*39:95N Genomic Plasmid Vector	PHLAG82514467	Plasmid vector containing HLA-B*39:95N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:95N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:95N protein under different cellular conditions.	Inquiry
HLA-B*39:96 Genomic Plasmid Vector	PHLAG82514468	Plasmid vector containing HLA-B*39:96 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:96 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:96 protein under different cellular conditions.	Inquiry
HLA-B*39:97N Genomic Plasmid Vector	PHLAG82514469	Plasmid vector containing HLA-B*39:97N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:97N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:97N protein under different cellular conditions.	Inquiry
HLA-B*39:98 Genomic Plasmid Vector	PHLAG82514470	Plasmid vector containing HLA-B*39:98 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:98 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:98 protein under different cellular conditions.	Inquiry
HLA-B*39:99 Genomic Plasmid Vector	PHLAG82514471	Plasmid vector containing HLA-B*39:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39:99 protein under different cellular conditions.	Inquiry

HLA-B*39012 Genomic Plasmid Vector	PHLAG82514472	Plasmid vector containing HLA-B*39012 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*39012 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*39012 protein under different cellular conditions.	Inquiry
HLA-B*3921 Genomic Plasmid Vector	PHLAG82514473	Plasmid vector containing HLA-B*3921 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*3921 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*3921 protein under different cellular conditions.	Inquiry
HLA-B*40:01:01 Genomic Plasmid Vector	PHLAG82514474	Plasmid vector containing HLA-B*40:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:01 Genomic Plasmid Vector	PHLAG82514475	Plasmid vector containing HLA-B*40:01:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:01 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:02 Genomic Plasmid Vector	PHLAG82514476	Plasmid vector containing HLA-B*40:01:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:02 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:03 Genomic Plasmid Vector	PHLAG82514477	Plasmid vector containing HLA-B*40:01:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:03 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:04 Genomic Plasmid Vector	PHLAG82514478	Plasmid vector containing HLA-B*40:01:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:04 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:05 Genomic Plasmid Vector	PHLAG82514479	Plasmid vector containing HLA-B*40:01:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:05 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:06 Genomic Plasmid Vector	PHLAG82514480	Plasmid vector containing HLA-B*40:01:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:06 protein under different cellular conditions.	Inquiry

HLA-B*40:01:02:07 Genomic Plasmid Vector	PHLAG82514481	Plasmid vector containing HLA-B*40:01:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:07 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:08 Genomic Plasmid Vector	PHLAG82514482	Plasmid vector containing HLA-B*40:01:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:08 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:09 Genomic Plasmid Vector	PHLAG82514483	Plasmid vector containing HLA-B*40:01:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:09 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:10 Genomic Plasmid Vector	PHLAG82514484	Plasmid vector containing HLA-B*40:01:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:10 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:11 Genomic Plasmid Vector	PHLAG82514485	Plasmid vector containing HLA-B*40:01:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:11 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:12 Genomic Plasmid Vector	PHLAG82514486	Plasmid vector containing HLA-B*40:01:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:12 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:13 Genomic Plasmid Vector	PHLAG82514487	Plasmid vector containing HLA-B*40:01:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:13 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:14 Genomic Plasmid Vector	PHLAG82514488	Plasmid vector containing HLA-B*40:01:02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:14 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:15 Genomic Plasmid Vector	PHLAG82514489	Plasmid vector containing HLA-B*40:01:02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:15 protein under different cellular conditions.	Inquiry

HLA-B*40:01:02:16 Genomic Plasmid Vector	PHLAG82514490	Plasmid vector containing HLA-B*40:01:02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:16 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:17 Genomic Plasmid Vector	PHLAG82514491	Plasmid vector containing HLA-B*40:01:02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:17 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:18 Genomic Plasmid Vector	PHLAG82514492	Plasmid vector containing HLA-B*40:01:02:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:18 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:19 Genomic Plasmid Vector	PHLAG82514493	Plasmid vector containing HLA-B*40:01:02:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:19 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:20 Genomic Plasmid Vector	PHLAG82514494	Plasmid vector containing HLA-B*40:01:02:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:20 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:21 Genomic Plasmid Vector	PHLAG82514495	Plasmid vector containing HLA-B*40:01:02:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:21 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:22 Genomic Plasmid Vector	PHLAG82514496	Plasmid vector containing HLA-B*40:01:02:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:22 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:23 Genomic Plasmid Vector	PHLAG82514497	Plasmid vector containing HLA-B*40:01:02:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:23 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:24 Genomic Plasmid Vector	PHLAG82514498	Plasmid vector containing HLA-B*40:01:02:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:24 protein under different cellular conditions.	Inquiry

HLA-B*40:01:02:25 Genomic Plasmid Vector	PHLAG82514499	Plasmid vector containing HLA-B*40:01:02:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:25 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:26 Genomic Plasmid Vector	PHLAG825145000	Plasmid vector containing HLA-B*40:01:02:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:26 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:27 Genomic Plasmid Vector	PHLAG825145001	Plasmid vector containing HLA-B*40:01:02:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:27 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:28 Genomic Plasmid Vector	PHLAG825145002	Plasmid vector containing HLA-B*40:01:02:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:28 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:29 Genomic Plasmid Vector	PHLAG825145003	Plasmid vector containing HLA-B*40:01:02:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:29 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:30 Genomic Plasmid Vector	PHLAG825145004	Plasmid vector containing HLA-B*40:01:02:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:30 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:31 Genomic Plasmid Vector	PHLAG825145005	Plasmid vector containing HLA-B*40:01:02:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:31 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:32 Genomic Plasmid Vector	PHLAG825145006	Plasmid vector containing HLA-B*40:01:02:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:32 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:33 Genomic Plasmid Vector	PHLAG825145007	Plasmid vector containing HLA-B*40:01:02:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:33 protein under different cellular conditions.	Inquiry

HLA-B*40:01:02:34 Genomic Plasmid Vector	PHLAG82514508	Plasmid vector containing HLA-B*40:01:02:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:34 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:35 Genomic Plasmid Vector	PHLAG82514509	Plasmid vector containing HLA-B*40:01:02:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:35 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:36 Genomic Plasmid Vector	PHLAG825145110	Plasmid vector containing HLA-B*40:01:02:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:36 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:37 Genomic Plasmid Vector	PHLAG825145111	Plasmid vector containing HLA-B*40:01:02:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:37 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:38 Genomic Plasmid Vector	PHLAG825145112	Plasmid vector containing HLA-B*40:01:02:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:38 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:39 Genomic Plasmid Vector	PHLAG825145113	Plasmid vector containing HLA-B*40:01:02:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:39 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:40 Genomic Plasmid Vector	PHLAG825145114	Plasmid vector containing HLA-B*40:01:02:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:40 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:41 Genomic Plasmid Vector	PHLAG825145115	Plasmid vector containing HLA-B*40:01:02:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:41 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:42 Genomic Plasmid Vector	PHLAG825145116	Plasmid vector containing HLA-B*40:01:02:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:42 protein under different cellular conditions.	Inquiry

HLA-B*40:01:02:43 Genomic Plasmid Vector	PHLAG82514517	Plasmid vector containing HLA-B*40:01:02:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:43 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:44 Genomic Plasmid Vector	PHLAG82514518	Plasmid vector containing HLA-B*40:01:02:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:44 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:45 Genomic Plasmid Vector	PHLAG82514519	Plasmid vector containing HLA-B*40:01:02:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:45 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:46 Genomic Plasmid Vector	PHLAG82514520	Plasmid vector containing HLA-B*40:01:02:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:46 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:47 Genomic Plasmid Vector	PHLAG82514521	Plasmid vector containing HLA-B*40:01:02:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:47 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:48 Genomic Plasmid Vector	PHLAG82514522	Plasmid vector containing HLA-B*40:01:02:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:48 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:49 Genomic Plasmid Vector	PHLAG82514523	Plasmid vector containing HLA-B*40:01:02:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:49 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:50 Genomic Plasmid Vector	PHLAG82514524	Plasmid vector containing HLA-B*40:01:02:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:50 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:51 Genomic Plasmid Vector	PHLAG82514525	Plasmid vector containing HLA-B*40:01:02:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:51 protein under different cellular conditions.	Inquiry

HLA-B*40:01:02:52 Genomic Plasmid Vector	PHLAG82514526	Plasmid vector containing HLA-B*40:01:02:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:52 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:53 Genomic Plasmid Vector	PHLAG82514527	Plasmid vector containing HLA-B*40:01:02:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:53 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:54 Genomic Plasmid Vector	PHLAG82514528	Plasmid vector containing HLA-B*40:01:02:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:54 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:55 Genomic Plasmid Vector	PHLAG82514529	Plasmid vector containing HLA-B*40:01:02:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:55 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:56 Genomic Plasmid Vector	PHLAG82514530	Plasmid vector containing HLA-B*40:01:02:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:56 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:57 Genomic Plasmid Vector	PHLAG82514531	Plasmid vector containing HLA-B*40:01:02:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:57 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:58 Genomic Plasmid Vector	PHLAG82514532	Plasmid vector containing HLA-B*40:01:02:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:58 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:59 Genomic Plasmid Vector	PHLAG82514533	Plasmid vector containing HLA-B*40:01:02:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:59 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:60 Genomic Plasmid Vector	PHLAG82514534	Plasmid vector containing HLA-B*40:01:02:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:60 protein under different cellular conditions.	Inquiry

HLA-B*40:01:02:61 Genomic Plasmid Vector	PHLAG82514535	Plasmid vector containing HLA-B*40:01:02:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:61 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:62 Genomic Plasmid Vector	PHLAG82514536	Plasmid vector containing HLA-B*40:01:02:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:62 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:63 Genomic Plasmid Vector	PHLAG82514537	Plasmid vector containing HLA-B*40:01:02:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:63 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:64 Genomic Plasmid Vector	PHLAG82514538	Plasmid vector containing HLA-B*40:01:02:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:64 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:65 Genomic Plasmid Vector	PHLAG82514539	Plasmid vector containing HLA-B*40:01:02:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:65 protein under different cellular conditions.	Inquiry
HLA-B*40:01:02:66 Genomic Plasmid Vector	PHLAG82514540	Plasmid vector containing HLA-B*40:01:02:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:02:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:02:66 protein under different cellular conditions.	Inquiry
HLA-B*40:01:03:01 Genomic Plasmid Vector	PHLAG82514541	Plasmid vector containing HLA-B*40:01:03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:03:01 protein under different cellular conditions.	Inquiry
HLA-B*40:01:03:02 Genomic Plasmid Vector	PHLAG82514542	Plasmid vector containing HLA-B*40:01:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:03:02 protein under different cellular conditions.	Inquiry
HLA-B*40:01:04 Genomic Plasmid Vector	PHLAG82514543	Plasmid vector containing HLA-B*40:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:04 protein under different cellular conditions.	Inquiry

HLA-B*40:01:05 Genomic Plasmid Vector	PHLAG82514544	Plasmid vector containing HLA-B*40:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:05 protein under different cellular conditions.	Inquiry
HLA-B*40:01:06 Genomic Plasmid Vector	PHLAG82514545	Plasmid vector containing HLA-B*40:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:06 protein under different cellular conditions.	Inquiry
HLA-B*40:01:07 Genomic Plasmid Vector	PHLAG82514546	Plasmid vector containing HLA-B*40:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:07 protein under different cellular conditions.	Inquiry
HLA-B*40:01:08 Genomic Plasmid Vector	PHLAG82514547	Plasmid vector containing HLA-B*40:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:08 protein under different cellular conditions.	Inquiry
HLA-B*40:01:09 Genomic Plasmid Vector	PHLAG82514548	Plasmid vector containing HLA-B*40:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:09 protein under different cellular conditions.	Inquiry
HLA-B*40:01:10 Genomic Plasmid Vector	PHLAG82514549	Plasmid vector containing HLA-B*40:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:10 protein under different cellular conditions.	Inquiry
HLA-B*40:01:11 Genomic Plasmid Vector	PHLAG82514550	Plasmid vector containing HLA-B*40:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:11 protein under different cellular conditions.	Inquiry
HLA-B*40:01:12 Genomic Plasmid Vector	PHLAG82514551	Plasmid vector containing HLA-B*40:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:12 protein under different cellular conditions.	Inquiry
HLA-B*40:01:13 Genomic Plasmid Vector	PHLAG82514552	Plasmid vector containing HLA-B*40:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:13 protein under different cellular conditions.	Inquiry

HLA-B*40:01:14 Genomic Plasmid Vector	PHLAG82514553	Plasmid vector containing HLA-B*40:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:14 protein under different cellular conditions.	Inquiry
HLA-B*40:01:15 Genomic Plasmid Vector	PHLAG82514554	Plasmid vector containing HLA-B*40:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:15 protein under different cellular conditions.	Inquiry
HLA-B*40:01:16 Genomic Plasmid Vector	PHLAG82514555	Plasmid vector containing HLA-B*40:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:16 protein under different cellular conditions.	Inquiry
HLA-B*40:01:17 Genomic Plasmid Vector	PHLAG82514556	Plasmid vector containing HLA-B*40:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:17 protein under different cellular conditions.	Inquiry
HLA-B*40:01:18 Genomic Plasmid Vector	PHLAG82514557	Plasmid vector containing HLA-B*40:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:18 protein under different cellular conditions.	Inquiry
HLA-B*40:01:19 Genomic Plasmid Vector	PHLAG82514558	Plasmid vector containing HLA-B*40:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:19 protein under different cellular conditions.	Inquiry
HLA-B*40:01:20 Genomic Plasmid Vector	PHLAG82514559	Plasmid vector containing HLA-B*40:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:20 protein under different cellular conditions.	Inquiry
HLA-B*40:01:21 Genomic Plasmid Vector	PHLAG82514560	Plasmid vector containing HLA-B*40:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:21 protein under different cellular conditions.	Inquiry
HLA-B*40:01:22 Genomic Plasmid Vector	PHLAG82514561	Plasmid vector containing HLA-B*40:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:22 protein under different cellular conditions.	Inquiry

HLA-B*40:01:23 Genomic Plasmid Vector	PHLAG82514562	Plasmid vector containing HLA-B*40:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:23 protein under different cellular conditions.	Inquiry
HLA-B*40:01:24 Genomic Plasmid Vector	PHLAG82514563	Plasmid vector containing HLA-B*40:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:24 protein under different cellular conditions.	Inquiry
HLA-B*40:01:25 Genomic Plasmid Vector	PHLAG82514564	Plasmid vector containing HLA-B*40:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:25 protein under different cellular conditions.	Inquiry
HLA-B*40:01:26 Genomic Plasmid Vector	PHLAG82514565	Plasmid vector containing HLA-B*40:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:26 protein under different cellular conditions.	Inquiry
HLA-B*40:01:27 Genomic Plasmid Vector	PHLAG82514566	Plasmid vector containing HLA-B*40:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:27 protein under different cellular conditions.	Inquiry
HLA-B*40:01:28 Genomic Plasmid Vector	PHLAG82514567	Plasmid vector containing HLA-B*40:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:28 protein under different cellular conditions.	Inquiry
HLA-B*40:01:29 Genomic Plasmid Vector	PHLAG82514568	Plasmid vector containing HLA-B*40:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:29 protein under different cellular conditions.	Inquiry
HLA-B*40:01:30 Genomic Plasmid Vector	PHLAG82514569	Plasmid vector containing HLA-B*40:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:30 protein under different cellular conditions.	Inquiry
HLA-B*40:01:31 Genomic Plasmid Vector	PHLAG82514570	Plasmid vector containing HLA-B*40:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:31 protein under different cellular conditions.	Inquiry

HLA-B*40:01:32 Genomic Plasmid Vector	PHLAG82514571	Plasmid vector containing HLA-B*40:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:32 protein under different cellular conditions.	Inquiry
HLA-B*40:01:33 Genomic Plasmid Vector	PHLAG82514572	Plasmid vector containing HLA-B*40:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:33 protein under different cellular conditions.	Inquiry
HLA-B*40:01:34 Genomic Plasmid Vector	PHLAG82514573	Plasmid vector containing HLA-B*40:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:34 protein under different cellular conditions.	Inquiry
HLA-B*40:01:35 Genomic Plasmid Vector	PHLAG82514574	Plasmid vector containing HLA-B*40:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:35 protein under different cellular conditions.	Inquiry
HLA-B*40:01:36 Genomic Plasmid Vector	PHLAG82514575	Plasmid vector containing HLA-B*40:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:36 protein under different cellular conditions.	Inquiry
HLA-B*40:01:37 Genomic Plasmid Vector	PHLAG82514576	Plasmid vector containing HLA-B*40:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:37 protein under different cellular conditions.	Inquiry
HLA-B*40:01:38 Genomic Plasmid Vector	PHLAG82514577	Plasmid vector containing HLA-B*40:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:38 protein under different cellular conditions.	Inquiry
HLA-B*40:01:39 Genomic Plasmid Vector	PHLAG82514578	Plasmid vector containing HLA-B*40:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:39 protein under different cellular conditions.	Inquiry
HLA-B*40:01:40 Genomic Plasmid Vector	PHLAG82514579	Plasmid vector containing HLA-B*40:01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:40 protein under different cellular conditions.	Inquiry

HLA-B*40:01:41 Genomic Plasmid Vector	PHLAG82514580	Plasmid vector containing HLA-B*40:01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:41 protein under different cellular conditions.	Inquiry
HLA-B*40:01:42 Genomic Plasmid Vector	PHLAG82514581	Plasmid vector containing HLA-B*40:01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:42 protein under different cellular conditions.	Inquiry
HLA-B*40:01:43 Genomic Plasmid Vector	PHLAG82514582	Plasmid vector containing HLA-B*40:01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:43 protein under different cellular conditions.	Inquiry
HLA-B*40:01:44 Genomic Plasmid Vector	PHLAG82514583	Plasmid vector containing HLA-B*40:01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:44 protein under different cellular conditions.	Inquiry
HLA-B*40:01:45 Genomic Plasmid Vector	PHLAG82514584	Plasmid vector containing HLA-B*40:01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:45 protein under different cellular conditions.	Inquiry
HLA-B*40:01:46 Genomic Plasmid Vector	PHLAG82514585	Plasmid vector containing HLA-B*40:01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:46 protein under different cellular conditions.	Inquiry
HLA-B*40:01:47 Genomic Plasmid Vector	PHLAG82514586	Plasmid vector containing HLA-B*40:01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:47 protein under different cellular conditions.	Inquiry
HLA-B*40:01:48 Genomic Plasmid Vector	PHLAG82514587	Plasmid vector containing HLA-B*40:01:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:48 protein under different cellular conditions.	Inquiry
HLA-B*40:01:49 Genomic Plasmid Vector	PHLAG82514588	Plasmid vector containing HLA-B*40:01:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:49 protein under different cellular conditions.	Inquiry

HLA-B*40:01:50 Genomic Plasmid Vector	PHLAG82514589	Plasmid vector containing HLA-B*40:01:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:50 protein under different cellular conditions.	Inquiry
HLA-B*40:01:51 Genomic Plasmid Vector	PHLAG825145910	Plasmid vector containing HLA-B*40:01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:51 protein under different cellular conditions.	Inquiry
HLA-B*40:01:52 Genomic Plasmid Vector	PHLAG825145911	Plasmid vector containing HLA-B*40:01:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:52 protein under different cellular conditions.	Inquiry
HLA-B*40:01:53 Genomic Plasmid Vector	PHLAG825145912	Plasmid vector containing HLA-B*40:01:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:53 protein under different cellular conditions.	Inquiry
HLA-B*40:01:54 Genomic Plasmid Vector	PHLAG825145913	Plasmid vector containing HLA-B*40:01:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:54 protein under different cellular conditions.	Inquiry
HLA-B*40:01:55 Genomic Plasmid Vector	PHLAG825145914	Plasmid vector containing HLA-B*40:01:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:55 protein under different cellular conditions.	Inquiry
HLA-B*40:01:56 Genomic Plasmid Vector	PHLAG825145915	Plasmid vector containing HLA-B*40:01:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:56 protein under different cellular conditions.	Inquiry
HLA-B*40:01:57 Genomic Plasmid Vector	PHLAG825145916	Plasmid vector containing HLA-B*40:01:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:57 protein under different cellular conditions.	Inquiry
HLA-B*40:01:58 Genomic Plasmid Vector	PHLAG825145917	Plasmid vector containing HLA-B*40:01:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:58 protein under different cellular conditions.	Inquiry

HLA-B*40:01:59 Genomic Plasmid Vector	PHLAG82514598	Plasmid vector containing HLA-B*40:01:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:59 protein under different cellular conditions.	Inquiry
HLA-B*40:01:60 Genomic Plasmid Vector	PHLAG82514599	Plasmid vector containing HLA-B*40:01:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:60 protein under different cellular conditions.	Inquiry
HLA-B*40:01:61 Genomic Plasmid Vector	PHLAG825146000	Plasmid vector containing HLA-B*40:01:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:61 protein under different cellular conditions.	Inquiry
HLA-B*40:01:62 Genomic Plasmid Vector	PHLAG825146001	Plasmid vector containing HLA-B*40:01:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:62 protein under different cellular conditions.	Inquiry
HLA-B*40:01:63 Genomic Plasmid Vector	PHLAG825146002	Plasmid vector containing HLA-B*40:01:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:63 protein under different cellular conditions.	Inquiry
HLA-B*40:01:64 Genomic Plasmid Vector	PHLAG825146003	Plasmid vector containing HLA-B*40:01:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:64 protein under different cellular conditions.	Inquiry
HLA-B*40:01:65 Genomic Plasmid Vector	PHLAG825146004	Plasmid vector containing HLA-B*40:01:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:65 protein under different cellular conditions.	Inquiry
HLA-B*40:01:66 Genomic Plasmid Vector	PHLAG825146005	Plasmid vector containing HLA-B*40:01:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:66 protein under different cellular conditions.	Inquiry
HLA-B*40:01:67 Genomic Plasmid Vector	PHLAG825146006	Plasmid vector containing HLA-B*40:01:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:67 protein under different cellular conditions.	Inquiry

HLA-B*40:01:68 Genomic Plasmid Vector	PHLAG82514607	Plasmid vector containing HLA-B*40:01:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:68 protein under different cellular conditions.	Inquiry
HLA-B*40:01:69 Genomic Plasmid Vector	PHLAG82514608	Plasmid vector containing HLA-B*40:01:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:69 protein under different cellular conditions.	Inquiry
HLA-B*40:01:70 Genomic Plasmid Vector	PHLAG82514609	Plasmid vector containing HLA-B*40:01:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:70 protein under different cellular conditions.	Inquiry
HLA-B*40:01:71 Genomic Plasmid Vector	PHLAG825146110	Plasmid vector containing HLA-B*40:01:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:71 protein under different cellular conditions.	Inquiry
HLA-B*40:01:72 Genomic Plasmid Vector	PHLAG825146111	Plasmid vector containing HLA-B*40:01:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:72 protein under different cellular conditions.	Inquiry
HLA-B*40:01:73 Genomic Plasmid Vector	PHLAG825146112	Plasmid vector containing HLA-B*40:01:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:73 protein under different cellular conditions.	Inquiry
HLA-B*40:01:74 Genomic Plasmid Vector	PHLAG825146113	Plasmid vector containing HLA-B*40:01:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:74 protein under different cellular conditions.	Inquiry
HLA-B*40:01:75 Genomic Plasmid Vector	PHLAG825146114	Plasmid vector containing HLA-B*40:01:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:75 protein under different cellular conditions.	Inquiry
HLA-B*40:01:76 Genomic Plasmid Vector	PHLAG825146115	Plasmid vector containing HLA-B*40:01:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:76 protein under different cellular conditions.	Inquiry

HLA-B*40:01:77 Genomic Plasmid Vector	PHLAG82514616	Plasmid vector containing HLA-B*40:01:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:77 protein under different cellular conditions.	Inquiry
HLA-B*40:01:78 Genomic Plasmid Vector	PHLAG82514617	Plasmid vector containing HLA-B*40:01:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:78 protein under different cellular conditions.	Inquiry
HLA-B*40:01:79 Genomic Plasmid Vector	PHLAG82514618	Plasmid vector containing HLA-B*40:01:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:79 protein under different cellular conditions.	Inquiry
HLA-B*40:01:80 Genomic Plasmid Vector	PHLAG82514619	Plasmid vector containing HLA-B*40:01:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:80 protein under different cellular conditions.	Inquiry
HLA-B*40:01:81 Genomic Plasmid Vector	PHLAG82514620	Plasmid vector containing HLA-B*40:01:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:81 protein under different cellular conditions.	Inquiry
HLA-B*40:01:82 Genomic Plasmid Vector	PHLAG82514621	Plasmid vector containing HLA-B*40:01:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:82 protein under different cellular conditions.	Inquiry
HLA-B*40:01:83 Genomic Plasmid Vector	PHLAG82514622	Plasmid vector containing HLA-B*40:01:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:83 protein under different cellular conditions.	Inquiry
HLA-B*40:01:84 Genomic Plasmid Vector	PHLAG82514623	Plasmid vector containing HLA-B*40:01:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:84 protein under different cellular conditions.	Inquiry
HLA-B*40:01:85 Genomic Plasmid Vector	PHLAG82514624	Plasmid vector containing HLA-B*40:01:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:85 protein under different cellular conditions.	Inquiry

HLA-B*40:01:86 Genomic Plasmid Vector	PHLAG82514625	Plasmid vector containing HLA-B*40:01:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:86 protein under different cellular conditions.	Inquiry
HLA-B*40:01:87 Genomic Plasmid Vector	PHLAG82514626	Plasmid vector containing HLA-B*40:01:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:87 protein under different cellular conditions.	Inquiry
HLA-B*40:01:88 Genomic Plasmid Vector	PHLAG82514627	Plasmid vector containing HLA-B*40:01:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:88 protein under different cellular conditions.	Inquiry
HLA-B*40:01:89 Genomic Plasmid Vector	PHLAG82514628	Plasmid vector containing HLA-B*40:01:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:89 protein under different cellular conditions.	Inquiry
HLA-B*40:01:90 Genomic Plasmid Vector	PHLAG82514629	Plasmid vector containing HLA-B*40:01:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:90 protein under different cellular conditions.	Inquiry
HLA-B*40:01:91 Genomic Plasmid Vector	PHLAG82514630	Plasmid vector containing HLA-B*40:01:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:91 protein under different cellular conditions.	Inquiry
HLA-B*40:01:92 Genomic Plasmid Vector	PHLAG82514631	Plasmid vector containing HLA-B*40:01:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:92 protein under different cellular conditions.	Inquiry
HLA-B*40:01:93 Genomic Plasmid Vector	PHLAG82514632	Plasmid vector containing HLA-B*40:01:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:93 protein under different cellular conditions.	Inquiry
HLA-B*40:01:94 Genomic Plasmid Vector	PHLAG82514633	Plasmid vector containing HLA-B*40:01:94 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:94 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:94 protein under different cellular conditions.	Inquiry

HLA-B*40:01:95 Genomic Plasmid Vector	PHLAG82514634	Plasmid vector containing HLA-B*40:01:95 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:01:95 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:01:95 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:01 Genomic Plasmid Vector	PHLAG82514635	Plasmid vector containing HLA-B*40:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:02 Genomic Plasmid Vector	PHLAG82514636	Plasmid vector containing HLA-B*40:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:03 Genomic Plasmid Vector	PHLAG82514637	Plasmid vector containing HLA-B*40:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:03 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:04 Genomic Plasmid Vector	PHLAG82514638	Plasmid vector containing HLA-B*40:02:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:04 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:05 Genomic Plasmid Vector	PHLAG82514639	Plasmid vector containing HLA-B*40:02:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:05 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:06 Genomic Plasmid Vector	PHLAG82514640	Plasmid vector containing HLA-B*40:02:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:06 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:07 Genomic Plasmid Vector	PHLAG82514641	Plasmid vector containing HLA-B*40:02:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:07 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:08 Genomic Plasmid Vector	PHLAG82514642	Plasmid vector containing HLA-B*40:02:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:08 protein under different cellular conditions.	Inquiry

HLA-B*40:02:01:09 Genomic Plasmid Vector	PHLAG82514643	Plasmid vector containing HLA-B*40:02:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:09 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:10 Genomic Plasmid Vector	PHLAG82514644	Plasmid vector containing HLA-B*40:02:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:10 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:11 Genomic Plasmid Vector	PHLAG82514645	Plasmid vector containing HLA-B*40:02:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:11 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:12 Genomic Plasmid Vector	PHLAG82514646	Plasmid vector containing HLA-B*40:02:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:12 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:13 Genomic Plasmid Vector	PHLAG82514647	Plasmid vector containing HLA-B*40:02:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:13 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:14 Genomic Plasmid Vector	PHLAG82514648	Plasmid vector containing HLA-B*40:02:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:14 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:15 Genomic Plasmid Vector	PHLAG82514649	Plasmid vector containing HLA-B*40:02:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:15 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:16 Genomic Plasmid Vector	PHLAG82514650	Plasmid vector containing HLA-B*40:02:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:16 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:17 Genomic Plasmid Vector	PHLAG82514651	Plasmid vector containing HLA-B*40:02:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:17 protein under different cellular conditions.	Inquiry

HLA-B*40:02:01:18 Genomic Plasmid Vector	PHLAG82514652	Plasmid vector containing HLA-B*40:02:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:18 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:19 Genomic Plasmid Vector	PHLAG82514653	Plasmid vector containing HLA-B*40:02:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:19 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:20 Genomic Plasmid Vector	PHLAG82514654	Plasmid vector containing HLA-B*40:02:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:20 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:21 Genomic Plasmid Vector	PHLAG82514655	Plasmid vector containing HLA-B*40:02:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:21 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:22 Genomic Plasmid Vector	PHLAG82514656	Plasmid vector containing HLA-B*40:02:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:22 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:23 Genomic Plasmid Vector	PHLAG82514657	Plasmid vector containing HLA-B*40:02:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:23 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:24 Genomic Plasmid Vector	PHLAG82514658	Plasmid vector containing HLA-B*40:02:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:24 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:25 Genomic Plasmid Vector	PHLAG82514659	Plasmid vector containing HLA-B*40:02:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:25 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:26 Genomic Plasmid Vector	PHLAG82514660	Plasmid vector containing HLA-B*40:02:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:26 protein under different cellular conditions.	Inquiry

HLA-B*40:02:01:27 Genomic Plasmid Vector	PHLAG82514661	Plasmid vector containing HLA-B*40:02:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:27 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:28 Genomic Plasmid Vector	PHLAG82514662	Plasmid vector containing HLA-B*40:02:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:28 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:29 Genomic Plasmid Vector	PHLAG82514663	Plasmid vector containing HLA-B*40:02:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:29 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:30 Genomic Plasmid Vector	PHLAG82514664	Plasmid vector containing HLA-B*40:02:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:30 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:31 Genomic Plasmid Vector	PHLAG82514665	Plasmid vector containing HLA-B*40:02:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:31 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:32Q Genomic Plasmid Vector	PHLAG82514666	Plasmid vector containing HLA-B*40:02:01:32Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:32Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:32Q protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:33 Genomic Plasmid Vector	PHLAG82514667	Plasmid vector containing HLA-B*40:02:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:33 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:34 Genomic Plasmid Vector	PHLAG82514668	Plasmid vector containing HLA-B*40:02:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:34 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:35 Genomic Plasmid Vector	PHLAG82514669	Plasmid vector containing HLA-B*40:02:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:35 protein under different cellular conditions.	Inquiry

HLA-B*40:02:01:36 Genomic Plasmid Vector	PHLAG82514670	Plasmid vector containing HLA-B*40:02:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:36 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:37 Genomic Plasmid Vector	PHLAG82514671	Plasmid vector containing HLA-B*40:02:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:37 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:38 Genomic Plasmid Vector	PHLAG82514672	Plasmid vector containing HLA-B*40:02:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:38 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:39 Genomic Plasmid Vector	PHLAG82514673	Plasmid vector containing HLA-B*40:02:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:39 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:40 Genomic Plasmid Vector	PHLAG82514674	Plasmid vector containing HLA-B*40:02:01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:40 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:41 Genomic Plasmid Vector	PHLAG82514675	Plasmid vector containing HLA-B*40:02:01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:41 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:42 Genomic Plasmid Vector	PHLAG82514676	Plasmid vector containing HLA-B*40:02:01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:42 protein under different cellular conditions.	Inquiry
HLA-B*40:02:01:43 Genomic Plasmid Vector	PHLAG82514677	Plasmid vector containing HLA-B*40:02:01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:01:43 protein under different cellular conditions.	Inquiry
HLA-B*40:02:02 Genomic Plasmid Vector	PHLAG82514678	Plasmid vector containing HLA-B*40:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:02 protein under different cellular conditions.	Inquiry

HLA-B*40:02:03 Genomic Plasmid Vector	PHLAG82514679	Plasmid vector containing HLA-B*40:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:03 protein under different cellular conditions.	Inquiry
HLA-B*40:02:04 Genomic Plasmid Vector	PHLAG82514680	Plasmid vector containing HLA-B*40:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:04 protein under different cellular conditions.	Inquiry
HLA-B*40:02:05 Genomic Plasmid Vector	PHLAG82514681	Plasmid vector containing HLA-B*40:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:05 protein under different cellular conditions.	Inquiry
HLA-B*40:02:06 Genomic Plasmid Vector	PHLAG82514682	Plasmid vector containing HLA-B*40:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:06 protein under different cellular conditions.	Inquiry
HLA-B*40:02:07 Genomic Plasmid Vector	PHLAG82514683	Plasmid vector containing HLA-B*40:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:07 protein under different cellular conditions.	Inquiry
HLA-B*40:02:08 Genomic Plasmid Vector	PHLAG82514684	Plasmid vector containing HLA-B*40:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:08 protein under different cellular conditions.	Inquiry
HLA-B*40:02:09 Genomic Plasmid Vector	PHLAG82514685	Plasmid vector containing HLA-B*40:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:09 protein under different cellular conditions.	Inquiry
HLA-B*40:02:10 Genomic Plasmid Vector	PHLAG82514686	Plasmid vector containing HLA-B*40:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:10 protein under different cellular conditions.	Inquiry
HLA-B*40:02:11 Genomic Plasmid Vector	PHLAG82514687	Plasmid vector containing HLA-B*40:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:11 protein under different cellular conditions.	Inquiry

HLA-B*40:02:12 Genomic Plasmid Vector	PHLAG82514688	Plasmid vector containing HLA-B*40:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:12 protein under different cellular conditions.	Inquiry
HLA-B*40:02:13 Genomic Plasmid Vector	PHLAG82514689	Plasmid vector containing HLA-B*40:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:13 protein under different cellular conditions.	Inquiry
HLA-B*40:02:14 Genomic Plasmid Vector	PHLAG825146910	Plasmid vector containing HLA-B*40:02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:14 protein under different cellular conditions.	Inquiry
HLA-B*40:02:15 Genomic Plasmid Vector	PHLAG825146911	Plasmid vector containing HLA-B*40:02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:15 protein under different cellular conditions.	Inquiry
HLA-B*40:02:16 Genomic Plasmid Vector	PHLAG825146912	Plasmid vector containing HLA-B*40:02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:16 protein under different cellular conditions.	Inquiry
HLA-B*40:02:17 Genomic Plasmid Vector	PHLAG825146913	Plasmid vector containing HLA-B*40:02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:17 protein under different cellular conditions.	Inquiry
HLA-B*40:02:18 Genomic Plasmid Vector	PHLAG825146914	Plasmid vector containing HLA-B*40:02:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:18 protein under different cellular conditions.	Inquiry
HLA-B*40:02:19 Genomic Plasmid Vector	PHLAG825146915	Plasmid vector containing HLA-B*40:02:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:19 protein under different cellular conditions.	Inquiry
HLA-B*40:02:20 Genomic Plasmid Vector	PHLAG825146916	Plasmid vector containing HLA-B*40:02:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:20 protein under different cellular conditions.	Inquiry

HLA-B*40:02:21 Genomic Plasmid Vector	PHLAG82514697	Plasmid vector containing HLA-B*40:02:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:21 protein under different cellular conditions.	Inquiry
HLA-B*40:02:22 Genomic Plasmid Vector	PHLAG82514698	Plasmid vector containing HLA-B*40:02:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:22 protein under different cellular conditions.	Inquiry
HLA-B*40:02:23 Genomic Plasmid Vector	PHLAG82514699	Plasmid vector containing HLA-B*40:02:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:23 protein under different cellular conditions.	Inquiry
HLA-B*40:02:24 Genomic Plasmid Vector	PHLAG825147000	Plasmid vector containing HLA-B*40:02:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:24 protein under different cellular conditions.	Inquiry
HLA-B*40:02:25 Genomic Plasmid Vector	PHLAG825147001	Plasmid vector containing HLA-B*40:02:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:25 protein under different cellular conditions.	Inquiry
HLA-B*40:02:26 Genomic Plasmid Vector	PHLAG825147002	Plasmid vector containing HLA-B*40:02:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:26 protein under different cellular conditions.	Inquiry
HLA-B*40:02:27 Genomic Plasmid Vector	PHLAG825147003	Plasmid vector containing HLA-B*40:02:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:27 protein under different cellular conditions.	Inquiry
HLA-B*40:02:28 Genomic Plasmid Vector	PHLAG825147004	Plasmid vector containing HLA-B*40:02:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:28 protein under different cellular conditions.	Inquiry
HLA-B*40:02:29 Genomic Plasmid Vector	PHLAG825147005	Plasmid vector containing HLA-B*40:02:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:29 protein under different cellular conditions.	Inquiry

HLA-B*40:02:30 Genomic Plasmid Vector	PHLAG82514706	Plasmid vector containing HLA-B*40:02:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:30 protein under different cellular conditions.	Inquiry
HLA-B*40:02:31 Genomic Plasmid Vector	PHLAG82514707	Plasmid vector containing HLA-B*40:02:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:31 protein under different cellular conditions.	Inquiry
HLA-B*40:02:32 Genomic Plasmid Vector	PHLAG82514708	Plasmid vector containing HLA-B*40:02:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:32 protein under different cellular conditions.	Inquiry
HLA-B*40:02:33 Genomic Plasmid Vector	PHLAG82514709	Plasmid vector containing HLA-B*40:02:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:33 protein under different cellular conditions.	Inquiry
HLA-B*40:02:34 Genomic Plasmid Vector	PHLAG825147110	Plasmid vector containing HLA-B*40:02:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:34 protein under different cellular conditions.	Inquiry
HLA-B*40:02:35 Genomic Plasmid Vector	PHLAG825147111	Plasmid vector containing HLA-B*40:02:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:35 protein under different cellular conditions.	Inquiry
HLA-B*40:02:36 Genomic Plasmid Vector	PHLAG825147112	Plasmid vector containing HLA-B*40:02:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:36 protein under different cellular conditions.	Inquiry
HLA-B*40:02:37 Genomic Plasmid Vector	PHLAG825147113	Plasmid vector containing HLA-B*40:02:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:37 protein under different cellular conditions.	Inquiry
HLA-B*40:02:38 Genomic Plasmid Vector	PHLAG825147114	Plasmid vector containing HLA-B*40:02:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:38 protein under different cellular conditions.	Inquiry

HLA-B*40:02:39 Genomic Plasmid Vector	PHLAG82514715	Plasmid vector containing HLA-B*40:02:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:39 protein under different cellular conditions.	Inquiry
HLA-B*40:02:40 Genomic Plasmid Vector	PHLAG82514716	Plasmid vector containing HLA-B*40:02:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:40 protein under different cellular conditions.	Inquiry
HLA-B*40:02:41 Genomic Plasmid Vector	PHLAG82514717	Plasmid vector containing HLA-B*40:02:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:02:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:02:41 protein under different cellular conditions.	Inquiry
HLA-B*40:03:01:01 Genomic Plasmid Vector	PHLAG82514718	Plasmid vector containing HLA-B*40:03:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:03:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:03:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:03:01:02 Genomic Plasmid Vector	PHLAG82514719	Plasmid vector containing HLA-B*40:03:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:03:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:03:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:03:01:03 Genomic Plasmid Vector	PHLAG82514720	Plasmid vector containing HLA-B*40:03:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:03:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:03:01:03 protein under different cellular conditions.	Inquiry
HLA-B*40:03:02 Genomic Plasmid Vector	PHLAG82514721	Plasmid vector containing HLA-B*40:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:03:02 protein under different cellular conditions.	Inquiry
HLA-B*40:04:01:01 Genomic Plasmid Vector	PHLAG82514722	Plasmid vector containing HLA-B*40:04:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:04:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:04:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:04:01:02 Genomic Plasmid Vector	PHLAG82514723	Plasmid vector containing HLA-B*40:04:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:04:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:04:01:02 protein under different cellular conditions.	Inquiry

HLA-B*40:04:01:03 Genomic Plasmid Vector	PHLAG82514724	Plasmid vector containing HLA-B*40:04:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:04:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:04:01:03 protein under different cellular conditions.	Inquiry
HLA-B*40:04:02 Genomic Plasmid Vector	PHLAG82514725	Plasmid vector containing HLA-B*40:04:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:04:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:04:02 protein under different cellular conditions.	Inquiry
HLA-B*40:04:03 Genomic Plasmid Vector	PHLAG82514726	Plasmid vector containing HLA-B*40:04:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:04:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:04:03 protein under different cellular conditions.	Inquiry
HLA-B*40:04:04 Genomic Plasmid Vector	PHLAG82514727	Plasmid vector containing HLA-B*40:04:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:04:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:04:04 protein under different cellular conditions.	Inquiry
HLA-B*40:05:01:01 Genomic Plasmid Vector	PHLAG82514728	Plasmid vector containing HLA-B*40:05:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:05:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:05:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:05:01:02 Genomic Plasmid Vector	PHLAG82514729	Plasmid vector containing HLA-B*40:05:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:05:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:05:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:05:01:03 Genomic Plasmid Vector	PHLAG82514730	Plasmid vector containing HLA-B*40:05:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:05:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:05:01:03 protein under different cellular conditions.	Inquiry
HLA-B*40:05:02 Genomic Plasmid Vector	PHLAG82514731	Plasmid vector containing HLA-B*40:05:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:05:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:05:02 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:01 Genomic Plasmid Vector	PHLAG82514732	Plasmid vector containing HLA-B*40:06:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:01 protein under different cellular conditions.	Inquiry

HLA-B*40:06:01:02 Genomic Plasmid Vector	PHLAG82514733	Plasmid vector containing HLA-B*40:06:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:03 Genomic Plasmid Vector	PHLAG82514734	Plasmid vector containing HLA-B*40:06:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:03 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:04 Genomic Plasmid Vector	PHLAG82514735	Plasmid vector containing HLA-B*40:06:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:04 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:05 Genomic Plasmid Vector	PHLAG82514736	Plasmid vector containing HLA-B*40:06:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:05 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:06 Genomic Plasmid Vector	PHLAG82514737	Plasmid vector containing HLA-B*40:06:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:06 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:07 Genomic Plasmid Vector	PHLAG82514738	Plasmid vector containing HLA-B*40:06:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:07 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:08 Genomic Plasmid Vector	PHLAG82514739	Plasmid vector containing HLA-B*40:06:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:08 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:09 Genomic Plasmid Vector	PHLAG82514740	Plasmid vector containing HLA-B*40:06:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:09 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:10 Genomic Plasmid Vector	PHLAG82514741	Plasmid vector containing HLA-B*40:06:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:10 protein under different cellular conditions.	Inquiry

HLA-B*40:06:01:11 Genomic Plasmid Vector	PHLAG82514742	Plasmid vector containing HLA-B*40:06:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:11 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:12 Genomic Plasmid Vector	PHLAG82514743	Plasmid vector containing HLA-B*40:06:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:12 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:13 Genomic Plasmid Vector	PHLAG82514744	Plasmid vector containing HLA-B*40:06:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:13 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:14 Genomic Plasmid Vector	PHLAG82514745	Plasmid vector containing HLA-B*40:06:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:14 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:15 Genomic Plasmid Vector	PHLAG82514746	Plasmid vector containing HLA-B*40:06:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:15 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:16 Genomic Plasmid Vector	PHLAG82514747	Plasmid vector containing HLA-B*40:06:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:16 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:17 Genomic Plasmid Vector	PHLAG82514748	Plasmid vector containing HLA-B*40:06:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:17 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:18 Genomic Plasmid Vector	PHLAG82514749	Plasmid vector containing HLA-B*40:06:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:18 protein under different cellular conditions.	Inquiry
HLA-B*40:06:01:19 Genomic Plasmid Vector	PHLAG82514750	Plasmid vector containing HLA-B*40:06:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:19 protein under different cellular conditions.	Inquiry

HLA-B*40:06:01:20 Genomic Plasmid Vector	PHLAG82514751	Plasmid vector containing HLA-B*40:06:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:01:20 protein under different cellular conditions.	Inquiry
HLA-B*40:06:02 Genomic Plasmid Vector	PHLAG82514752	Plasmid vector containing HLA-B*40:06:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:02 protein under different cellular conditions.	Inquiry
HLA-B*40:06:03 Genomic Plasmid Vector	PHLAG82514753	Plasmid vector containing HLA-B*40:06:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:03 protein under different cellular conditions.	Inquiry
HLA-B*40:06:04:01 Genomic Plasmid Vector	PHLAG82514754	Plasmid vector containing HLA-B*40:06:04:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:04:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:04:01 protein under different cellular conditions.	Inquiry
HLA-B*40:06:04:02 Genomic Plasmid Vector	PHLAG82514755	Plasmid vector containing HLA-B*40:06:04:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:04:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:04:02 protein under different cellular conditions.	Inquiry
HLA-B*40:06:04:03 Genomic Plasmid Vector	PHLAG82514756	Plasmid vector containing HLA-B*40:06:04:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:04:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:04:03 protein under different cellular conditions.	Inquiry
HLA-B*40:06:05 Genomic Plasmid Vector	PHLAG82514757	Plasmid vector containing HLA-B*40:06:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:05 protein under different cellular conditions.	Inquiry
HLA-B*40:06:06 Genomic Plasmid Vector	PHLAG82514758	Plasmid vector containing HLA-B*40:06:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:06 protein under different cellular conditions.	Inquiry
HLA-B*40:06:07 Genomic Plasmid Vector	PHLAG82514759	Plasmid vector containing HLA-B*40:06:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:07 protein under different cellular conditions.	Inquiry

HLA-B*40:06:08 Genomic Plasmid Vector	PHLAG82514760	Plasmid vector containing HLA-B*40:06:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:08 protein under different cellular conditions.	Inquiry
HLA-B*40:06:09 Genomic Plasmid Vector	PHLAG82514761	Plasmid vector containing HLA-B*40:06:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:09 protein under different cellular conditions.	Inquiry
HLA-B*40:06:10 Genomic Plasmid Vector	PHLAG82514762	Plasmid vector containing HLA-B*40:06:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:10 protein under different cellular conditions.	Inquiry
HLA-B*40:06:11 Genomic Plasmid Vector	PHLAG82514763	Plasmid vector containing HLA-B*40:06:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:11 protein under different cellular conditions.	Inquiry
HLA-B*40:06:12 Genomic Plasmid Vector	PHLAG82514764	Plasmid vector containing HLA-B*40:06:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:12 protein under different cellular conditions.	Inquiry
HLA-B*40:06:13 Genomic Plasmid Vector	PHLAG82514765	Plasmid vector containing HLA-B*40:06:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:13 protein under different cellular conditions.	Inquiry
HLA-B*40:06:14 Genomic Plasmid Vector	PHLAG82514766	Plasmid vector containing HLA-B*40:06:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:14 protein under different cellular conditions.	Inquiry
HLA-B*40:06:15 Genomic Plasmid Vector	PHLAG82514767	Plasmid vector containing HLA-B*40:06:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:15 protein under different cellular conditions.	Inquiry
HLA-B*40:06:16 Genomic Plasmid Vector	PHLAG82514768	Plasmid vector containing HLA-B*40:06:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:16 protein under different cellular conditions.	Inquiry

HLA-B*40:06:17 Genomic Plasmid Vector	PHLAG82514769	Plasmid vector containing HLA-B*40:06:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:17 protein under different cellular conditions.	Inquiry
HLA-B*40:06:18 Genomic Plasmid Vector	PHLAG82514770	Plasmid vector containing HLA-B*40:06:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:18 protein under different cellular conditions.	Inquiry
HLA-B*40:06:19 Genomic Plasmid Vector	PHLAG82514771	Plasmid vector containing HLA-B*40:06:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:19 protein under different cellular conditions.	Inquiry
HLA-B*40:06:20 Genomic Plasmid Vector	PHLAG82514772	Plasmid vector containing HLA-B*40:06:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:20 protein under different cellular conditions.	Inquiry
HLA-B*40:06:21 Genomic Plasmid Vector	PHLAG82514773	Plasmid vector containing HLA-B*40:06:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:21 protein under different cellular conditions.	Inquiry
HLA-B*40:06:22 Genomic Plasmid Vector	PHLAG82514774	Plasmid vector containing HLA-B*40:06:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:22 protein under different cellular conditions.	Inquiry
HLA-B*40:06:23 Genomic Plasmid Vector	PHLAG82514775	Plasmid vector containing HLA-B*40:06:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:23 protein under different cellular conditions.	Inquiry
HLA-B*40:06:24 Genomic Plasmid Vector	PHLAG82514776	Plasmid vector containing HLA-B*40:06:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:24 protein under different cellular conditions.	Inquiry
HLA-B*40:06:25 Genomic Plasmid Vector	PHLAG82514777	Plasmid vector containing HLA-B*40:06:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:25 protein under different cellular conditions.	Inquiry

HLA-B*40:06:26 Genomic Plasmid Vector	PHLAG82514778	Plasmid vector containing HLA-B*40:06:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:26 protein under different cellular conditions.	Inquiry
HLA-B*40:06:27 Genomic Plasmid Vector	PHLAG82514779	Plasmid vector containing HLA-B*40:06:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:27 protein under different cellular conditions.	Inquiry
HLA-B*40:06:28 Genomic Plasmid Vector	PHLAG82514780	Plasmid vector containing HLA-B*40:06:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:28 protein under different cellular conditions.	Inquiry
HLA-B*40:06:29 Genomic Plasmid Vector	PHLAG82514781	Plasmid vector containing HLA-B*40:06:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:29 protein under different cellular conditions.	Inquiry
HLA-B*40:06:30 Genomic Plasmid Vector	PHLAG82514782	Plasmid vector containing HLA-B*40:06:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:30 protein under different cellular conditions.	Inquiry
HLA-B*40:06:31 Genomic Plasmid Vector	PHLAG82514783	Plasmid vector containing HLA-B*40:06:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:31 protein under different cellular conditions.	Inquiry
HLA-B*40:06:32 Genomic Plasmid Vector	PHLAG82514784	Plasmid vector containing HLA-B*40:06:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:32 protein under different cellular conditions.	Inquiry
HLA-B*40:06:33 Genomic Plasmid Vector	PHLAG82514785	Plasmid vector containing HLA-B*40:06:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:33 protein under different cellular conditions.	Inquiry
HLA-B*40:06:34 Genomic Plasmid Vector	PHLAG82514786	Plasmid vector containing HLA-B*40:06:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:34 protein under different cellular conditions.	Inquiry

HLA-B*40:06:35 Genomic Plasmid Vector	PHLAG82514787	Plasmid vector containing HLA-B*40:06:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:06:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:06:35 protein under different cellular conditions.	Inquiry
HLA-B*40:07 Genomic Plasmid Vector	PHLAG82514788	Plasmid vector containing HLA-B*40:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:07 protein under different cellular conditions.	Inquiry
HLA-B*40:08:01:01 Genomic Plasmid Vector	PHLAG82514789	Plasmid vector containing HLA-B*40:08:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:08:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:08:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:08:01:02 Genomic Plasmid Vector	PHLAG82514790	Plasmid vector containing HLA-B*40:08:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:08:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:08:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:09 Genomic Plasmid Vector	PHLAG82514791	Plasmid vector containing HLA-B*40:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:09 protein under different cellular conditions.	Inquiry
HLA-B*40:10:01:01 Genomic Plasmid Vector	PHLAG82514792	Plasmid vector containing HLA-B*40:10:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:10:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:10:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:10:01:02 Genomic Plasmid Vector	PHLAG82514793	Plasmid vector containing HLA-B*40:10:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:10:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:10:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:10:02 Genomic Plasmid Vector	PHLAG82514794	Plasmid vector containing HLA-B*40:10:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:10:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:10:02 protein under different cellular conditions.	Inquiry
HLA-B*40:100 Genomic Plasmid Vector	PHLAG82514795	Plasmid vector containing HLA-B*40:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:100 protein under different cellular conditions.	Inquiry

HLA-B*40:101 Genomic Plasmid Vector	PHLAG82514796	Plasmid vector containing HLA-B*40:101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:101 protein under different cellular conditions.	Inquiry
HLA-B*40:102 Genomic Plasmid Vector	PHLAG82514797	Plasmid vector containing HLA-B*40:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:102 protein under different cellular conditions.	Inquiry
HLA-B*40:103 Genomic Plasmid Vector	PHLAG82514798	Plasmid vector containing HLA-B*40:103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:103 protein under different cellular conditions.	Inquiry
HLA-B*40:104 Genomic Plasmid Vector	PHLAG82514799	Plasmid vector containing HLA-B*40:104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:104 protein under different cellular conditions.	Inquiry
HLA-B*40:105 Genomic Plasmid Vector	PHLAG825148000	Plasmid vector containing HLA-B*40:105 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:105 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:105 protein under different cellular conditions.	Inquiry
HLA-B*40:106 Genomic Plasmid Vector	PHLAG825148001	Plasmid vector containing HLA-B*40:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:106 protein under different cellular conditions.	Inquiry
HLA-B*40:107 Genomic Plasmid Vector	PHLAG825148002	Plasmid vector containing HLA-B*40:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:107 protein under different cellular conditions.	Inquiry
HLA-B*40:108 Genomic Plasmid Vector	PHLAG825148003	Plasmid vector containing HLA-B*40:108 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:108 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:108 protein under different cellular conditions.	Inquiry
HLA-B*40:109 Genomic Plasmid Vector	PHLAG825148004	Plasmid vector containing HLA-B*40:109 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:109 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:109 protein under different cellular conditions.	Inquiry

HLA-B*40:11:01:01 Genomic Plasmid Vector	PHLAG82514805	Plasmid vector containing HLA-B*40:11:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:11:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:11:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:11:01:02 Genomic Plasmid Vector	PHLAG82514806	Plasmid vector containing HLA-B*40:11:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:11:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:11:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:11:01:03 Genomic Plasmid Vector	PHLAG82514807	Plasmid vector containing HLA-B*40:11:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:11:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:11:01:03 protein under different cellular conditions.	Inquiry
HLA-B*40:11:02 Genomic Plasmid Vector	PHLAG82514808	Plasmid vector containing HLA-B*40:11:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:11:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:11:02 protein under different cellular conditions.	Inquiry
HLA-B*40:110 Genomic Plasmid Vector	PHLAG82514809	Plasmid vector containing HLA-B*40:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:110 protein under different cellular conditions.	Inquiry
HLA-B*40:111 Genomic Plasmid Vector	PHLAG825148110	Plasmid vector containing HLA-B*40:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:111 protein under different cellular conditions.	Inquiry
HLA-B*40:112 Genomic Plasmid Vector	PHLAG825148111	Plasmid vector containing HLA-B*40:112 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:112 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:112 protein under different cellular conditions.	Inquiry
HLA-B*40:113 Genomic Plasmid Vector	PHLAG825148112	Plasmid vector containing HLA-B*40:113 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:113 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:113 protein under different cellular conditions.	Inquiry
HLA-B*40:114:01:01 Genomic Plasmid Vector	PHLAG825148113	Plasmid vector containing HLA-B*40:114:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:114:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:114:01:01 protein under different cellular conditions.	Inquiry

HLA-B*40:114:01:02 Genomic Plasmid Vector	PHLAG82514814	Plasmid vector containing HLA-B*40:114:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:114:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:114:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:114:02 Genomic Plasmid Vector	PHLAG82514815	Plasmid vector containing HLA-B*40:114:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:114:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:114:02 protein under different cellular conditions.	Inquiry
HLA-B*40:115 Genomic Plasmid Vector	PHLAG82514816	Plasmid vector containing HLA-B*40:115 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:115 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:115 protein under different cellular conditions.	Inquiry
HLA-B*40:116 Genomic Plasmid Vector	PHLAG82514817	Plasmid vector containing HLA-B*40:116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:116 protein under different cellular conditions.	Inquiry
HLA-B*40:117 Genomic Plasmid Vector	PHLAG82514818	Plasmid vector containing HLA-B*40:117 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:117 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:117 protein under different cellular conditions.	Inquiry
HLA-B*40:118N Genomic Plasmid Vector	PHLAG82514819	Plasmid vector containing HLA-B*40:118N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:118N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:118N protein under different cellular conditions.	Inquiry
HLA-B*40:119 Genomic Plasmid Vector	PHLAG82514820	Plasmid vector containing HLA-B*40:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:119 protein under different cellular conditions.	Inquiry
HLA-B*40:12:01 Genomic Plasmid Vector	PHLAG82514821	Plasmid vector containing HLA-B*40:12:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:12:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:12:01 protein under different cellular conditions.	Inquiry
HLA-B*40:12:02 Genomic Plasmid Vector	PHLAG82514822	Plasmid vector containing HLA-B*40:12:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:12:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:12:02 protein under different cellular conditions.	Inquiry

HLA-B*40:120 Genomic Plasmid Vector	PHLAG82514823	Plasmid vector containing HLA-B*40:120 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:120 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:120 protein under different cellular conditions.	Inquiry
HLA-B*40:121 Genomic Plasmid Vector	PHLAG82514824	Plasmid vector containing HLA-B*40:121 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:121 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:121 protein under different cellular conditions.	Inquiry
HLA-B*40:122 Genomic Plasmid Vector	PHLAG82514825	Plasmid vector containing HLA-B*40:122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:122 protein under different cellular conditions.	Inquiry
HLA-B*40:123 Genomic Plasmid Vector	PHLAG82514826	Plasmid vector containing HLA-B*40:123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:123 protein under different cellular conditions.	Inquiry
HLA-B*40:124:01 Genomic Plasmid Vector	PHLAG82514827	Plasmid vector containing HLA-B*40:124:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:124:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:124:01 protein under different cellular conditions.	Inquiry
HLA-B*40:124:02 Genomic Plasmid Vector	PHLAG82514828	Plasmid vector containing HLA-B*40:124:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:124:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:124:02 protein under different cellular conditions.	Inquiry
HLA-B*40:125:01 Genomic Plasmid Vector	PHLAG82514829	Plasmid vector containing HLA-B*40:125:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:125:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:125:01 protein under different cellular conditions.	Inquiry
HLA-B*40:125:02 Genomic Plasmid Vector	PHLAG82514830	Plasmid vector containing HLA-B*40:125:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:125:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:125:02 protein under different cellular conditions.	Inquiry
HLA-B*40:125:03 Genomic Plasmid Vector	PHLAG82514831	Plasmid vector containing HLA-B*40:125:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:125:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:125:03 protein under different cellular conditions.	Inquiry

HLA-B*40:125:04 Genomic Plasmid Vector	PHLAG82514832	Plasmid vector containing HLA-B*40:125:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:125:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:125:04 protein under different cellular conditions.	Inquiry
HLA-B*40:126 Genomic Plasmid Vector	PHLAG82514833	Plasmid vector containing HLA-B*40:126 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:126 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:126 protein under different cellular conditions.	Inquiry
HLA-B*40:127 Genomic Plasmid Vector	PHLAG82514834	Plasmid vector containing HLA-B*40:127 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:127 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:127 protein under different cellular conditions.	Inquiry
HLA-B*40:128 Genomic Plasmid Vector	PHLAG82514835	Plasmid vector containing HLA-B*40:128 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:128 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:128 protein under different cellular conditions.	Inquiry
HLA-B*40:129 Genomic Plasmid Vector	PHLAG82514836	Plasmid vector containing HLA-B*40:129 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:129 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:129 protein under different cellular conditions.	Inquiry
HLA-B*40:13 Genomic Plasmid Vector	PHLAG82514837	Plasmid vector containing HLA-B*40:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:13 protein under different cellular conditions.	Inquiry
HLA-B*40:130:01 Genomic Plasmid Vector	PHLAG82514838	Plasmid vector containing HLA-B*40:130:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:130:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:130:01 protein under different cellular conditions.	Inquiry
HLA-B*40:130:02 Genomic Plasmid Vector	PHLAG82514839	Plasmid vector containing HLA-B*40:130:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:130:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:130:02 protein under different cellular conditions.	Inquiry
HLA-B*40:131 Genomic Plasmid Vector	PHLAG82514840	Plasmid vector containing HLA-B*40:131 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:131 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:131 protein under different cellular conditions.	Inquiry

HLA-B*40:132 Genomic Plasmid Vector	PHLAG82514841	Plasmid vector containing HLA-B*40:132 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:132 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:132 protein under different cellular conditions.	Inquiry
HLA-B*40:133Q Genomic Plasmid Vector	PHLAG82514842	Plasmid vector containing HLA-B*40:133Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:133Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:133Q protein under different cellular conditions.	Inquiry
HLA-B*40:134 Genomic Plasmid Vector	PHLAG82514843	Plasmid vector containing HLA-B*40:134 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:134 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:134 protein under different cellular conditions.	Inquiry
HLA-B*40:135 Genomic Plasmid Vector	PHLAG82514844	Plasmid vector containing HLA-B*40:135 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:135 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:135 protein under different cellular conditions.	Inquiry
HLA-B*40:136 Genomic Plasmid Vector	PHLAG82514845	Plasmid vector containing HLA-B*40:136 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:136 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:136 protein under different cellular conditions.	Inquiry
HLA-B*40:137 Genomic Plasmid Vector	PHLAG82514846	Plasmid vector containing HLA-B*40:137 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:137 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:137 protein under different cellular conditions.	Inquiry
HLA-B*40:138 Genomic Plasmid Vector	PHLAG82514847	Plasmid vector containing HLA-B*40:138 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:138 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:138 protein under different cellular conditions.	Inquiry
HLA-B*40:139 Genomic Plasmid Vector	PHLAG82514848	Plasmid vector containing HLA-B*40:139 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:139 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:139 protein under different cellular conditions.	Inquiry
HLA-B*40:14:01 Genomic Plasmid Vector	PHLAG82514849	Plasmid vector containing HLA-B*40:14:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:14:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:14:01 protein under different cellular conditions.	Inquiry

HLA-B*40:14:02 Genomic Plasmid Vector	PHLAG825148510	Plasmid vector containing HLA-B*40:14:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:14:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:14:02 protein under different cellular conditions.	Inquiry
HLA-B*40:14:03 Genomic Plasmid Vector	PHLAG825148511	Plasmid vector containing HLA-B*40:14:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:14:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:14:03 protein under different cellular conditions.	Inquiry
HLA-B*40:140 Genomic Plasmid Vector	PHLAG825148512	Plasmid vector containing HLA-B*40:140 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:140 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:140 protein under different cellular conditions.	Inquiry
HLA-B*40:141 Genomic Plasmid Vector	PHLAG825148513	Plasmid vector containing HLA-B*40:141 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:141 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:141 protein under different cellular conditions.	Inquiry
HLA-B*40:142N Genomic Plasmid Vector	PHLAG825148514	Plasmid vector containing HLA-B*40:142N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:142N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:142N protein under different cellular conditions.	Inquiry
HLA-B*40:143 Genomic Plasmid Vector	PHLAG825148515	Plasmid vector containing HLA-B*40:143 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:143 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:143 protein under different cellular conditions.	Inquiry
HLA-B*40:144N Genomic Plasmid Vector	PHLAG825148516	Plasmid vector containing HLA-B*40:144N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:144N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:144N protein under different cellular conditions.	Inquiry
HLA-B*40:145 Genomic Plasmid Vector	PHLAG825148517	Plasmid vector containing HLA-B*40:145 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:145 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:145 protein under different cellular conditions.	Inquiry
HLA-B*40:146 Genomic Plasmid Vector	PHLAG825148518	Plasmid vector containing HLA-B*40:146 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:146 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:146 protein under different cellular conditions.	Inquiry

HLA-B*40:147 Genomic Plasmid Vector	PHLAG82514859	Plasmid vector containing HLA-B*40:147 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:147 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:147 protein under different cellular conditions.	Inquiry
HLA-B*40:148 Genomic Plasmid Vector	PHLAG825148600	Plasmid vector containing HLA-B*40:148 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:148 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:148 protein under different cellular conditions.	Inquiry
HLA-B*40:149 Genomic Plasmid Vector	PHLAG825148601	Plasmid vector containing HLA-B*40:149 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:149 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:149 protein under different cellular conditions.	Inquiry
HLA-B*40:15 Genomic Plasmid Vector	PHLAG825148602	Plasmid vector containing HLA-B*40:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:15 protein under different cellular conditions.	Inquiry
HLA-B*40:150 Genomic Plasmid Vector	PHLAG825148603	Plasmid vector containing HLA-B*40:150 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:150 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:150 protein under different cellular conditions.	Inquiry
HLA-B*40:151 Genomic Plasmid Vector	PHLAG825148604	Plasmid vector containing HLA-B*40:151 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:151 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:151 protein under different cellular conditions.	Inquiry
HLA-B*40:152 Genomic Plasmid Vector	PHLAG825148605	Plasmid vector containing HLA-B*40:152 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:152 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:152 protein under different cellular conditions.	Inquiry
HLA-B*40:153 Genomic Plasmid Vector	PHLAG825148606	Plasmid vector containing HLA-B*40:153 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:153 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:153 protein under different cellular conditions.	Inquiry
HLA-B*40:154 Genomic Plasmid Vector	PHLAG825148607	Plasmid vector containing HLA-B*40:154 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:154 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:154 protein under different cellular conditions.	Inquiry

HLA-B*40:155:01N Genomic Plasmid Vector	PHLAG82514868	Plasmid vector containing HLA-B*40:155:01N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:155:01N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:155:01N protein under different cellular conditions.	Inquiry
HLA-B*40:155:02N Genomic Plasmid Vector	PHLAG82514869	Plasmid vector containing HLA-B*40:155:02N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:155:02N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:155:02N protein under different cellular conditions.	Inquiry
HLA-B*40:156 Genomic Plasmid Vector	PHLAG82514870	Plasmid vector containing HLA-B*40:156 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:156 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:156 protein under different cellular conditions.	Inquiry
HLA-B*40:157 Genomic Plasmid Vector	PHLAG82514871	Plasmid vector containing HLA-B*40:157 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:157 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:157 protein under different cellular conditions.	Inquiry
HLA-B*40:158 Genomic Plasmid Vector	PHLAG82514872	Plasmid vector containing HLA-B*40:158 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:158 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:158 protein under different cellular conditions.	Inquiry
HLA-B*40:159 Genomic Plasmid Vector	PHLAG82514873	Plasmid vector containing HLA-B*40:159 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:159 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:159 protein under different cellular conditions.	Inquiry
HLA-B*40:16:01:01 Genomic Plasmid Vector	PHLAG82514874	Plasmid vector containing HLA-B*40:16:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:16:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:16:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:16:01:02 Genomic Plasmid Vector	PHLAG82514875	Plasmid vector containing HLA-B*40:16:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:16:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:16:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:160:01:01 Genomic Plasmid Vector	PHLAG82514876	Plasmid vector containing HLA-B*40:160:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:160:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:160:01:01 protein under different cellular conditions.	Inquiry

HLA-B*40:160:01:02 Genomic Plasmid Vector	PHLAG82514877	Plasmid vector containing HLA-B*40:160:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:160:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:160:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:160:02 Genomic Plasmid Vector	PHLAG82514878	Plasmid vector containing HLA-B*40:160:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:160:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:160:02 protein under different cellular conditions.	Inquiry
HLA-B*40:161 Genomic Plasmid Vector	PHLAG82514879	Plasmid vector containing HLA-B*40:161 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:161 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:161 protein under different cellular conditions.	Inquiry
HLA-B*40:162 Genomic Plasmid Vector	PHLAG82514880	Plasmid vector containing HLA-B*40:162 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:162 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:162 protein under different cellular conditions.	Inquiry
HLA-B*40:163 Genomic Plasmid Vector	PHLAG82514881	Plasmid vector containing HLA-B*40:163 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:163 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:163 protein under different cellular conditions.	Inquiry
HLA-B*40:164 Genomic Plasmid Vector	PHLAG82514882	Plasmid vector containing HLA-B*40:164 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:164 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:164 protein under different cellular conditions.	Inquiry
HLA-B*40:165 Genomic Plasmid Vector	PHLAG82514883	Plasmid vector containing HLA-B*40:165 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:165 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:165 protein under different cellular conditions.	Inquiry
HLA-B*40:166 Genomic Plasmid Vector	PHLAG82514884	Plasmid vector containing HLA-B*40:166 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:166 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:166 protein under different cellular conditions.	Inquiry
HLA-B*40:167 Genomic Plasmid Vector	PHLAG82514885	Plasmid vector containing HLA-B*40:167 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:167 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:167 protein under different cellular conditions.	Inquiry

HLA-B*40:168 Genomic Plasmid Vector	PHLAG82514886	Plasmid vector containing HLA-B*40:168 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:168 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:168 protein under different cellular conditions.	Inquiry
HLA-B*40:169 Genomic Plasmid Vector	PHLAG82514887	Plasmid vector containing HLA-B*40:169 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:169 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:169 protein under different cellular conditions.	Inquiry
HLA-B*40:170 Genomic Plasmid Vector	PHLAG82514888	Plasmid vector containing HLA-B*40:170 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:170 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:170 protein under different cellular conditions.	Inquiry
HLA-B*40:171 Genomic Plasmid Vector	PHLAG82514889	Plasmid vector containing HLA-B*40:171 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:171 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:171 protein under different cellular conditions.	Inquiry
HLA-B*40:172 Genomic Plasmid Vector	PHLAG82514890	Plasmid vector containing HLA-B*40:172 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:172 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:172 protein under different cellular conditions.	Inquiry
HLA-B*40:173 Genomic Plasmid Vector	PHLAG82514891	Plasmid vector containing HLA-B*40:173 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:173 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:173 protein under different cellular conditions.	Inquiry
HLA-B*40:174 Genomic Plasmid Vector	PHLAG82514892	Plasmid vector containing HLA-B*40:174 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:174 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:174 protein under different cellular conditions.	Inquiry
HLA-B*40:175 Genomic Plasmid Vector	PHLAG82514893	Plasmid vector containing HLA-B*40:175 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:175 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:175 protein under different cellular conditions.	Inquiry
HLA-B*40:176 Genomic Plasmid Vector	PHLAG82514894	Plasmid vector containing HLA-B*40:176 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:176 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:176 protein under different cellular conditions.	Inquiry

HLA-B*40:177 Genomic Plasmid Vector	PHLAG82514895	Plasmid vector containing HLA-B*40:177 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:177 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:177 protein under different cellular conditions.	Inquiry
HLA-B*40:178 Genomic Plasmid Vector	PHLAG82514896	Plasmid vector containing HLA-B*40:178 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:178 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:178 protein under different cellular conditions.	Inquiry
HLA-B*40:179 Genomic Plasmid Vector	PHLAG82514897	Plasmid vector containing HLA-B*40:179 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:179 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:179 protein under different cellular conditions.	Inquiry
HLA-B*40:18 Genomic Plasmid Vector	PHLAG82514898	Plasmid vector containing HLA-B*40:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:18 protein under different cellular conditions.	Inquiry
HLA-B*40:180 Genomic Plasmid Vector	PHLAG82514899	Plasmid vector containing HLA-B*40:180 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:180 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:180 protein under different cellular conditions.	Inquiry
HLA-B*40:181 Genomic Plasmid Vector	PHLAG825149100	Plasmid vector containing HLA-B*40:181 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:181 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:181 protein under different cellular conditions.	Inquiry
HLA-B*40:182 Genomic Plasmid Vector	PHLAG825149101	Plasmid vector containing HLA-B*40:182 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:182 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:182 protein under different cellular conditions.	Inquiry
HLA-B*40:183 Genomic Plasmid Vector	PHLAG825149102	Plasmid vector containing HLA-B*40:183 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:183 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:183 protein under different cellular conditions.	Inquiry
HLA-B*40:184 Genomic Plasmid Vector	PHLAG825149103	Plasmid vector containing HLA-B*40:184 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:184 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:184 protein under different cellular conditions.	Inquiry

HLA-B*40:185 Genomic Plasmid Vector	PHLAG82514904	Plasmid vector containing HLA-B*40:185 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:185 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:185 protein under different cellular conditions.	Inquiry
HLA-B*40:186:01 Genomic Plasmid Vector	PHLAG82514905	Plasmid vector containing HLA-B*40:186:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:186:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:186:01 protein under different cellular conditions.	Inquiry
HLA-B*40:186:02 Genomic Plasmid Vector	PHLAG82514906	Plasmid vector containing HLA-B*40:186:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:186:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:186:02 protein under different cellular conditions.	Inquiry
HLA-B*40:187 Genomic Plasmid Vector	PHLAG82514907	Plasmid vector containing HLA-B*40:187 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:187 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:187 protein under different cellular conditions.	Inquiry
HLA-B*40:188 Genomic Plasmid Vector	PHLAG82514908	Plasmid vector containing HLA-B*40:188 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:188 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:188 protein under different cellular conditions.	Inquiry
HLA-B*40:189 Genomic Plasmid Vector	PHLAG82514909	Plasmid vector containing HLA-B*40:189 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:189 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:189 protein under different cellular conditions.	Inquiry
HLA-B*40:19 Genomic Plasmid Vector	PHLAG825149110	Plasmid vector containing HLA-B*40:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:19 protein under different cellular conditions.	Inquiry
HLA-B*40:190 Genomic Plasmid Vector	PHLAG825149111	Plasmid vector containing HLA-B*40:190 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:190 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:190 protein under different cellular conditions.	Inquiry
HLA-B*40:191 Genomic Plasmid Vector	PHLAG825149112	Plasmid vector containing HLA-B*40:191 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:191 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:191 protein under different cellular conditions.	Inquiry

HLA-B*40:192 Genomic Plasmid Vector	PHLAG82514913	Plasmid vector containing HLA-B*40:192 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:192 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:192 protein under different cellular conditions.	Inquiry
HLA-B*40:193 Genomic Plasmid Vector	PHLAG82514914	Plasmid vector containing HLA-B*40:193 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:193 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:193 protein under different cellular conditions.	Inquiry
HLA-B*40:194 Genomic Plasmid Vector	PHLAG82514915	Plasmid vector containing HLA-B*40:194 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:194 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:194 protein under different cellular conditions.	Inquiry
HLA-B*40:195 Genomic Plasmid Vector	PHLAG82514916	Plasmid vector containing HLA-B*40:195 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:195 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:195 protein under different cellular conditions.	Inquiry
HLA-B*40:196 Genomic Plasmid Vector	PHLAG82514917	Plasmid vector containing HLA-B*40:196 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:196 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:196 protein under different cellular conditions.	Inquiry
HLA-B*40:197 Genomic Plasmid Vector	PHLAG82514918	Plasmid vector containing HLA-B*40:197 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:197 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:197 protein under different cellular conditions.	Inquiry
HLA-B*40:198 Genomic Plasmid Vector	PHLAG82514919	Plasmid vector containing HLA-B*40:198 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:198 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:198 protein under different cellular conditions.	Inquiry
HLA-B*40:199 Genomic Plasmid Vector	PHLAG82514920	Plasmid vector containing HLA-B*40:199 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:199 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:199 protein under different cellular conditions.	Inquiry
HLA-B*40:20:01:01 Genomic Plasmid Vector	PHLAG82514921	Plasmid vector containing HLA-B*40:20:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:20:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:20:01:01 protein under different cellular conditions.	Inquiry

HLA-B*40:20:01:02 Genomic Plasmid Vector	PHLAG82514922	Plasmid vector containing HLA-B*40:20:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:20:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:20:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:200 Genomic Plasmid Vector	PHLAG82514923	Plasmid vector containing HLA-B*40:200 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:200 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:200 protein under different cellular conditions.	Inquiry
HLA-B*40:201 Genomic Plasmid Vector	PHLAG82514924	Plasmid vector containing HLA-B*40:201 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:201 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:201 protein under different cellular conditions.	Inquiry
HLA-B*40:202 Genomic Plasmid Vector	PHLAG82514925	Plasmid vector containing HLA-B*40:202 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:202 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:202 protein under different cellular conditions.	Inquiry
HLA-B*40:203 Genomic Plasmid Vector	PHLAG82514926	Plasmid vector containing HLA-B*40:203 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:203 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:203 protein under different cellular conditions.	Inquiry
HLA-B*40:204 Genomic Plasmid Vector	PHLAG82514927	Plasmid vector containing HLA-B*40:204 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:204 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:204 protein under different cellular conditions.	Inquiry
HLA-B*40:205 Genomic Plasmid Vector	PHLAG82514928	Plasmid vector containing HLA-B*40:205 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:205 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:205 protein under different cellular conditions.	Inquiry
HLA-B*40:206 Genomic Plasmid Vector	PHLAG82514929	Plasmid vector containing HLA-B*40:206 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:206 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:206 protein under different cellular conditions.	Inquiry
HLA-B*40:207 Genomic Plasmid Vector	PHLAG82514930	Plasmid vector containing HLA-B*40:207 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:207 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:207 protein under different cellular conditions.	Inquiry

HLA-B*40:208 Genomic Plasmid Vector	PHLAG82514931	Plasmid vector containing HLA-B*40:208 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:208 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:208 protein under different cellular conditions.	Inquiry
HLA-B*40:209 Genomic Plasmid Vector	PHLAG82514932	Plasmid vector containing HLA-B*40:209 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:209 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:209 protein under different cellular conditions.	Inquiry
HLA-B*40:21 Genomic Plasmid Vector	PHLAG82514933	Plasmid vector containing HLA-B*40:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:21 protein under different cellular conditions.	Inquiry
HLA-B*40:210 Genomic Plasmid Vector	PHLAG82514934	Plasmid vector containing HLA-B*40:210 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:210 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:210 protein under different cellular conditions.	Inquiry
HLA-B*40:211 Genomic Plasmid Vector	PHLAG82514935	Plasmid vector containing HLA-B*40:211 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:211 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:211 protein under different cellular conditions.	Inquiry
HLA-B*40:212 Genomic Plasmid Vector	PHLAG82514936	Plasmid vector containing HLA-B*40:212 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:212 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:212 protein under different cellular conditions.	Inquiry
HLA-B*40:213 Genomic Plasmid Vector	PHLAG82514937	Plasmid vector containing HLA-B*40:213 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:213 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:213 protein under different cellular conditions.	Inquiry
HLA-B*40:214 Genomic Plasmid Vector	PHLAG82514938	Plasmid vector containing HLA-B*40:214 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:214 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:214 protein under different cellular conditions.	Inquiry
HLA-B*40:215 Genomic Plasmid Vector	PHLAG82514939	Plasmid vector containing HLA-B*40:215 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:215 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:215 protein under different cellular conditions.	Inquiry

HLA-B*40:216N Genomic Plasmid Vector	PHLAG82514940	Plasmid vector containing HLA-B*40:216N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:216N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:216N protein under different cellular conditions.	Inquiry
HLA-B*40:217 Genomic Plasmid Vector	PHLAG82514941	Plasmid vector containing HLA-B*40:217 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:217 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:217 protein under different cellular conditions.	Inquiry
HLA-B*40:218 Genomic Plasmid Vector	PHLAG82514942	Plasmid vector containing HLA-B*40:218 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:218 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:218 protein under different cellular conditions.	Inquiry
HLA-B*40:219 Genomic Plasmid Vector	PHLAG82514943	Plasmid vector containing HLA-B*40:219 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:219 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:219 protein under different cellular conditions.	Inquiry
HLA-B*40:220 Genomic Plasmid Vector	PHLAG82514944	Plasmid vector containing HLA-B*40:220 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:220 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:220 protein under different cellular conditions.	Inquiry
HLA-B*40:221 Genomic Plasmid Vector	PHLAG82514945	Plasmid vector containing HLA-B*40:221 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:221 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:221 protein under different cellular conditions.	Inquiry
HLA-B*40:222 Genomic Plasmid Vector	PHLAG82514946	Plasmid vector containing HLA-B*40:222 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:222 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:222 protein under different cellular conditions.	Inquiry
HLA-B*40:223 Genomic Plasmid Vector	PHLAG82514947	Plasmid vector containing HLA-B*40:223 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:223 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:223 protein under different cellular conditions.	Inquiry
HLA-B*40:224 Genomic Plasmid Vector	PHLAG82514948	Plasmid vector containing HLA-B*40:224 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:224 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:224 protein under different cellular conditions.	Inquiry

HLA-B*40:225:01 Genomic Plasmid Vector	PHLAG82514949	Plasmid vector containing HLA-B*40:225:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:225:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:225:01 protein under different cellular conditions.	Inquiry
HLA-B*40:225:02 Genomic Plasmid Vector	PHLAG82514950	Plasmid vector containing HLA-B*40:225:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:225:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:225:02 protein under different cellular conditions.	Inquiry
HLA-B*40:226 Genomic Plasmid Vector	PHLAG82514951	Plasmid vector containing HLA-B*40:226 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:226 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:226 protein under different cellular conditions.	Inquiry
HLA-B*40:227 Genomic Plasmid Vector	PHLAG82514952	Plasmid vector containing HLA-B*40:227 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:227 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:227 protein under different cellular conditions.	Inquiry
HLA-B*40:228 Genomic Plasmid Vector	PHLAG82514953	Plasmid vector containing HLA-B*40:228 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:228 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:228 protein under different cellular conditions.	Inquiry
HLA-B*40:229 Genomic Plasmid Vector	PHLAG82514954	Plasmid vector containing HLA-B*40:229 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:229 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:229 protein under different cellular conditions.	Inquiry
HLA-B*40:22N Genomic Plasmid Vector	PHLAG82514955	Plasmid vector containing HLA-B*40:22N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:22N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:22N protein under different cellular conditions.	Inquiry
HLA-B*40:23 Genomic Plasmid Vector	PHLAG82514956	Plasmid vector containing HLA-B*40:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:23 protein under different cellular conditions.	Inquiry
HLA-B*40:230 Genomic Plasmid Vector	PHLAG82514957	Plasmid vector containing HLA-B*40:230 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:230 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:230 protein under different cellular conditions.	Inquiry

HLA-B*40:231 Genomic Plasmid Vector	PHLAG82514958	Plasmid vector containing HLA-B*40:231 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:231 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:231 protein under different cellular conditions.	Inquiry
HLA-B*40:232 Genomic Plasmid Vector	PHLAG82514959	Plasmid vector containing HLA-B*40:232 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:232 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:232 protein under different cellular conditions.	Inquiry
HLA-B*40:233 Genomic Plasmid Vector	PHLAG82514960	Plasmid vector containing HLA-B*40:233 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:233 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:233 protein under different cellular conditions.	Inquiry
HLA-B*40:234 Genomic Plasmid Vector	PHLAG82514961	Plasmid vector containing HLA-B*40:234 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:234 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:234 protein under different cellular conditions.	Inquiry
HLA-B*40:235 Genomic Plasmid Vector	PHLAG82514962	Plasmid vector containing HLA-B*40:235 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:235 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:235 protein under different cellular conditions.	Inquiry
HLA-B*40:236 Genomic Plasmid Vector	PHLAG82514963	Plasmid vector containing HLA-B*40:236 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:236 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:236 protein under different cellular conditions.	Inquiry
HLA-B*40:237 Genomic Plasmid Vector	PHLAG82514964	Plasmid vector containing HLA-B*40:237 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:237 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:237 protein under different cellular conditions.	Inquiry
HLA-B*40:238 Genomic Plasmid Vector	PHLAG82514965	Plasmid vector containing HLA-B*40:238 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:238 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:238 protein under different cellular conditions.	Inquiry
HLA-B*40:239 Genomic Plasmid Vector	PHLAG82514966	Plasmid vector containing HLA-B*40:239 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:239 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:239 protein under different cellular conditions.	Inquiry

HLA-B*40:24 Genomic Plasmid Vector	PHLAG82514967	Plasmid vector containing HLA-B*40:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:24 protein under different cellular conditions.	Inquiry
HLA-B*40:240 Genomic Plasmid Vector	PHLAG82514968	Plasmid vector containing HLA-B*40:240 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:240 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:240 protein under different cellular conditions.	Inquiry
HLA-B*40:241 Genomic Plasmid Vector	PHLAG82514969	Plasmid vector containing HLA-B*40:241 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:241 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:241 protein under different cellular conditions.	Inquiry
HLA-B*40:242 Genomic Plasmid Vector	PHLAG82514970	Plasmid vector containing HLA-B*40:242 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:242 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:242 protein under different cellular conditions.	Inquiry
HLA-B*40:243 Genomic Plasmid Vector	PHLAG82514971	Plasmid vector containing HLA-B*40:243 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:243 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:243 protein under different cellular conditions.	Inquiry
HLA-B*40:244 Genomic Plasmid Vector	PHLAG82514972	Plasmid vector containing HLA-B*40:244 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:244 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:244 protein under different cellular conditions.	Inquiry
HLA-B*40:245:01 Genomic Plasmid Vector	PHLAG82514973	Plasmid vector containing HLA-B*40:245:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:245:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:245:01 protein under different cellular conditions.	Inquiry
HLA-B*40:245:02 Genomic Plasmid Vector	PHLAG82514974	Plasmid vector containing HLA-B*40:245:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:245:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:245:02 protein under different cellular conditions.	Inquiry
HLA-B*40:246 Genomic Plasmid Vector	PHLAG82514975	Plasmid vector containing HLA-B*40:246 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:246 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:246 protein under different cellular conditions.	Inquiry

HLA-B*40:247 Genomic Plasmid Vector	PHLAG82514976	Plasmid vector containing HLA-B*40:247 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:247 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:247 protein under different cellular conditions.	Inquiry
HLA-B*40:248 Genomic Plasmid Vector	PHLAG82514977	Plasmid vector containing HLA-B*40:248 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:248 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:248 protein under different cellular conditions.	Inquiry
HLA-B*40:249 Genomic Plasmid Vector	PHLAG82514978	Plasmid vector containing HLA-B*40:249 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:249 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:249 protein under different cellular conditions.	Inquiry
HLA-B*40:25 Genomic Plasmid Vector	PHLAG82514979	Plasmid vector containing HLA-B*40:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:25 protein under different cellular conditions.	Inquiry
HLA-B*40:250 Genomic Plasmid Vector	PHLAG82514980	Plasmid vector containing HLA-B*40:250 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:250 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:250 protein under different cellular conditions.	Inquiry
HLA-B*40:251 Genomic Plasmid Vector	PHLAG82514981	Plasmid vector containing HLA-B*40:251 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:251 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:251 protein under different cellular conditions.	Inquiry
HLA-B*40:252 Genomic Plasmid Vector	PHLAG82514982	Plasmid vector containing HLA-B*40:252 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:252 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:252 protein under different cellular conditions.	Inquiry
HLA-B*40:253 Genomic Plasmid Vector	PHLAG82514983	Plasmid vector containing HLA-B*40:253 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:253 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:253 protein under different cellular conditions.	Inquiry
HLA-B*40:254 Genomic Plasmid Vector	PHLAG82514984	Plasmid vector containing HLA-B*40:254 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:254 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:254 protein under different cellular conditions.	Inquiry

HLA-B*40:255 Genomic Plasmid Vector	PHLAG82514985	Plasmid vector containing HLA-B*40:255 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:255 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:255 protein under different cellular conditions.	Inquiry
HLA-B*40:256N Genomic Plasmid Vector	PHLAG82514986	Plasmid vector containing HLA-B*40:256N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:256N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:256N protein under different cellular conditions.	Inquiry
HLA-B*40:257 Genomic Plasmid Vector	PHLAG82514987	Plasmid vector containing HLA-B*40:257 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:257 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:257 protein under different cellular conditions.	Inquiry
HLA-B*40:258 Genomic Plasmid Vector	PHLAG82514988	Plasmid vector containing HLA-B*40:258 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:258 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:258 protein under different cellular conditions.	Inquiry
HLA-B*40:259 Genomic Plasmid Vector	PHLAG82514989	Plasmid vector containing HLA-B*40:259 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:259 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:259 protein under different cellular conditions.	Inquiry
HLA-B*40:26 Genomic Plasmid Vector	PHLAG82514990	Plasmid vector containing HLA-B*40:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:26 protein under different cellular conditions.	Inquiry
HLA-B*40:260 Genomic Plasmid Vector	PHLAG82514991	Plasmid vector containing HLA-B*40:260 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:260 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:260 protein under different cellular conditions.	Inquiry
HLA-B*40:261 Genomic Plasmid Vector	PHLAG82514992	Plasmid vector containing HLA-B*40:261 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:261 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:261 protein under different cellular conditions.	Inquiry
HLA-B*40:262 Genomic Plasmid Vector	PHLAG82514993	Plasmid vector containing HLA-B*40:262 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:262 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:262 protein under different cellular conditions.	Inquiry

HLA-B*40:263N Genomic Plasmid Vector	PHLAG82514994	Plasmid vector containing HLA-B*40:263N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:263N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:263N protein under different cellular conditions.	Inquiry
HLA-B*40:264 Genomic Plasmid Vector	PHLAG82514995	Plasmid vector containing HLA-B*40:264 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:264 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:264 protein under different cellular conditions.	Inquiry
HLA-B*40:265N Genomic Plasmid Vector	PHLAG82514996	Plasmid vector containing HLA-B*40:265N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:265N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:265N protein under different cellular conditions.	Inquiry
HLA-B*40:266 Genomic Plasmid Vector	PHLAG82514997	Plasmid vector containing HLA-B*40:266 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:266 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:266 protein under different cellular conditions.	Inquiry
HLA-B*40:267 Genomic Plasmid Vector	PHLAG82514998	Plasmid vector containing HLA-B*40:267 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:267 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:267 protein under different cellular conditions.	Inquiry
HLA-B*40:268 Genomic Plasmid Vector	PHLAG82514999	Plasmid vector containing HLA-B*40:268 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:268 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:268 protein under different cellular conditions.	Inquiry
HLA-B*40:269 Genomic Plasmid Vector	PHLAG825150000	Plasmid vector containing HLA-B*40:269 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:269 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:269 protein under different cellular conditions.	Inquiry
HLA-B*40:27:01 Genomic Plasmid Vector	PHLAG825150001	Plasmid vector containing HLA-B*40:27:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:27:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:27:01 protein under different cellular conditions.	Inquiry
HLA-B*40:27:02 Genomic Plasmid Vector	PHLAG825150002	Plasmid vector containing HLA-B*40:27:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:27:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:27:02 protein under different cellular conditions.	Inquiry

HLA-B*40:27:03 Genomic Plasmid Vector	PHLAG82515003	Plasmid vector containing HLA-B*40:27:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:27:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:27:03 protein under different cellular conditions.	Inquiry
HLA-B*40:270 Genomic Plasmid Vector	PHLAG82515004	Plasmid vector containing HLA-B*40:270 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:270 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:270 protein under different cellular conditions.	Inquiry
HLA-B*40:271 Genomic Plasmid Vector	PHLAG82515005	Plasmid vector containing HLA-B*40:271 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:271 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:271 protein under different cellular conditions.	Inquiry
HLA-B*40:272 Genomic Plasmid Vector	PHLAG82515006	Plasmid vector containing HLA-B*40:272 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:272 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:272 protein under different cellular conditions.	Inquiry
HLA-B*40:273 Genomic Plasmid Vector	PHLAG82515007	Plasmid vector containing HLA-B*40:273 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:273 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:273 protein under different cellular conditions.	Inquiry
HLA-B*40:274 Genomic Plasmid Vector	PHLAG82515008	Plasmid vector containing HLA-B*40:274 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:274 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:274 protein under different cellular conditions.	Inquiry
HLA-B*40:275 Genomic Plasmid Vector	PHLAG82515009	Plasmid vector containing HLA-B*40:275 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:275 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:275 protein under different cellular conditions.	Inquiry
HLA-B*40:276 Genomic Plasmid Vector	PHLAG825150110	Plasmid vector containing HLA-B*40:276 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:276 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:276 protein under different cellular conditions.	Inquiry
HLA-B*40:277 Genomic Plasmid Vector	PHLAG825150111	Plasmid vector containing HLA-B*40:277 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:277 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:277 protein under different cellular conditions.	Inquiry

HLA-B*40:278 Genomic Plasmid Vector	PHLAG82515012	Plasmid vector containing HLA-B*40:278 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:278 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:278 protein under different cellular conditions.	Inquiry
HLA-B*40:279 Genomic Plasmid Vector	PHLAG82515013	Plasmid vector containing HLA-B*40:279 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:279 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:279 protein under different cellular conditions.	Inquiry
HLA-B*40:28 Genomic Plasmid Vector	PHLAG82515014	Plasmid vector containing HLA-B*40:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:28 protein under different cellular conditions.	Inquiry
HLA-B*40:280 Genomic Plasmid Vector	PHLAG82515015	Plasmid vector containing HLA-B*40:280 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:280 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:280 protein under different cellular conditions.	Inquiry
HLA-B*40:281 Genomic Plasmid Vector	PHLAG82515016	Plasmid vector containing HLA-B*40:281 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:281 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:281 protein under different cellular conditions.	Inquiry
HLA-B*40:282 Genomic Plasmid Vector	PHLAG82515017	Plasmid vector containing HLA-B*40:282 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:282 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:282 protein under different cellular conditions.	Inquiry
HLA-B*40:283 Genomic Plasmid Vector	PHLAG82515018	Plasmid vector containing HLA-B*40:283 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:283 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:283 protein under different cellular conditions.	Inquiry
HLA-B*40:284 Genomic Plasmid Vector	PHLAG82515019	Plasmid vector containing HLA-B*40:284 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:284 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:284 protein under different cellular conditions.	Inquiry
HLA-B*40:285 Genomic Plasmid Vector	PHLAG82515020	Plasmid vector containing HLA-B*40:285 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:285 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:285 protein under different cellular conditions.	Inquiry

HLA-B*40:286N Genomic Plasmid Vector	PHLAG825150211	Plasmid vector containing HLA-B*40:286N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:286N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:286N protein under different cellular conditions.	Inquiry
HLA-B*40:287 Genomic Plasmid Vector	PHLAG825150212	Plasmid vector containing HLA-B*40:287 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:287 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:287 protein under different cellular conditions.	Inquiry
HLA-B*40:288 Genomic Plasmid Vector	PHLAG825150213	Plasmid vector containing HLA-B*40:288 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:288 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:288 protein under different cellular conditions.	Inquiry
HLA-B*40:289 Genomic Plasmid Vector	PHLAG825150214	Plasmid vector containing HLA-B*40:289 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:289 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:289 protein under different cellular conditions.	Inquiry
HLA-B*40:29 Genomic Plasmid Vector	PHLAG825150215	Plasmid vector containing HLA-B*40:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:29 protein under different cellular conditions.	Inquiry
HLA-B*40:290 Genomic Plasmid Vector	PHLAG825150216	Plasmid vector containing HLA-B*40:290 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:290 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:290 protein under different cellular conditions.	Inquiry
HLA-B*40:291N Genomic Plasmid Vector	PHLAG825150217	Plasmid vector containing HLA-B*40:291N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:291N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:291N protein under different cellular conditions.	Inquiry
HLA-B*40:292 Genomic Plasmid Vector	PHLAG825150218	Plasmid vector containing HLA-B*40:292 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:292 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:292 protein under different cellular conditions.	Inquiry
HLA-B*40:293 Genomic Plasmid Vector	PHLAG825150219	Plasmid vector containing HLA-B*40:293 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:293 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:293 protein under different cellular conditions.	Inquiry

HLA-B*40:294 Genomic Plasmid Vector	PHLAG825150310	Plasmid vector containing HLA-B*40:294 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:294 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:294 protein under different cellular conditions.	Inquiry
HLA-B*40:295 Genomic Plasmid Vector	PHLAG825150311	Plasmid vector containing HLA-B*40:295 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:295 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:295 protein under different cellular conditions.	Inquiry
HLA-B*40:296 Genomic Plasmid Vector	PHLAG825150312	Plasmid vector containing HLA-B*40:296 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:296 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:296 protein under different cellular conditions.	Inquiry
HLA-B*40:297 Genomic Plasmid Vector	PHLAG825150313	Plasmid vector containing HLA-B*40:297 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:297 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:297 protein under different cellular conditions.	Inquiry
HLA-B*40:298:01 Genomic Plasmid Vector	PHLAG825150314	Plasmid vector containing HLA-B*40:298:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:298:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:298:01 protein under different cellular conditions.	Inquiry
HLA-B*40:298:02 Genomic Plasmid Vector	PHLAG825150315	Plasmid vector containing HLA-B*40:298:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:298:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:298:02 protein under different cellular conditions.	Inquiry
HLA-B*40:299 Genomic Plasmid Vector	PHLAG825150316	Plasmid vector containing HLA-B*40:299 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:299 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:299 protein under different cellular conditions.	Inquiry
HLA-B*40:30 Genomic Plasmid Vector	PHLAG825150317	Plasmid vector containing HLA-B*40:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:30 protein under different cellular conditions.	Inquiry
HLA-B*40:300 Genomic Plasmid Vector	PHLAG825150318	Plasmid vector containing HLA-B*40:300 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:300 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:300 protein under different cellular conditions.	Inquiry

HLA-B*40:301 Genomic Plasmid Vector	PHLAG82515039	Plasmid vector containing HLA-B*40:301 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:301 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:301 protein under different cellular conditions.	Inquiry
HLA-B*40:302 Genomic Plasmid Vector	PHLAG825150400	Plasmid vector containing HLA-B*40:302 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:302 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:302 protein under different cellular conditions.	Inquiry
HLA-B*40:303 Genomic Plasmid Vector	PHLAG825150401	Plasmid vector containing HLA-B*40:303 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:303 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:303 protein under different cellular conditions.	Inquiry
HLA-B*40:304 Genomic Plasmid Vector	PHLAG825150402	Plasmid vector containing HLA-B*40:304 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:304 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:304 protein under different cellular conditions.	Inquiry
HLA-B*40:305 Genomic Plasmid Vector	PHLAG825150403	Plasmid vector containing HLA-B*40:305 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:305 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:305 protein under different cellular conditions.	Inquiry
HLA-B*40:306 Genomic Plasmid Vector	PHLAG825150404	Plasmid vector containing HLA-B*40:306 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:306 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:306 protein under different cellular conditions.	Inquiry
HLA-B*40:307 Genomic Plasmid Vector	PHLAG825150405	Plasmid vector containing HLA-B*40:307 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:307 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:307 protein under different cellular conditions.	Inquiry
HLA-B*40:308 Genomic Plasmid Vector	PHLAG825150406	Plasmid vector containing HLA-B*40:308 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:308 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:308 protein under different cellular conditions.	Inquiry
HLA-B*40:309 Genomic Plasmid Vector	PHLAG825150407	Plasmid vector containing HLA-B*40:309 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:309 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:309 protein under different cellular conditions.	Inquiry

HLA-B*40:31 Genomic Plasmid Vector	PHLAG82515048	Plasmid vector containing HLA-B*40:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:31 protein under different cellular conditions.	Inquiry
HLA-B*40:310 Genomic Plasmid Vector	PHLAG82515049	Plasmid vector containing HLA-B*40:310 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:310 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:310 protein under different cellular conditions.	Inquiry
HLA-B*40:311 Genomic Plasmid Vector	PHLAG82515050	Plasmid vector containing HLA-B*40:311 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:311 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:311 protein under different cellular conditions.	Inquiry
HLA-B*40:312 Genomic Plasmid Vector	PHLAG82515051	Plasmid vector containing HLA-B*40:312 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:312 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:312 protein under different cellular conditions.	Inquiry
HLA-B*40:313 Genomic Plasmid Vector	PHLAG82515052	Plasmid vector containing HLA-B*40:313 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:313 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:313 protein under different cellular conditions.	Inquiry
HLA-B*40:314 Genomic Plasmid Vector	PHLAG82515053	Plasmid vector containing HLA-B*40:314 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:314 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:314 protein under different cellular conditions.	Inquiry
HLA-B*40:315 Genomic Plasmid Vector	PHLAG82515054	Plasmid vector containing HLA-B*40:315 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:315 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:315 protein under different cellular conditions.	Inquiry
HLA-B*40:316 Genomic Plasmid Vector	PHLAG82515055	Plasmid vector containing HLA-B*40:316 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:316 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:316 protein under different cellular conditions.	Inquiry
HLA-B*40:317 Genomic Plasmid Vector	PHLAG82515056	Plasmid vector containing HLA-B*40:317 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:317 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:317 protein under different cellular conditions.	Inquiry

HLA-B*40:318 Genomic Plasmid Vector	PHLAG82515057	Plasmid vector containing HLA-B*40:318 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:318 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:318 protein under different cellular conditions.	Inquiry
HLA-B*40:319 Genomic Plasmid Vector	PHLAG82515058	Plasmid vector containing HLA-B*40:319 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:319 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:319 protein under different cellular conditions.	Inquiry
HLA-B*40:32 Genomic Plasmid Vector	PHLAG82515059	Plasmid vector containing HLA-B*40:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:32 protein under different cellular conditions.	Inquiry
HLA-B*40:320 Genomic Plasmid Vector	PHLAG82515060	Plasmid vector containing HLA-B*40:320 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:320 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:320 protein under different cellular conditions.	Inquiry
HLA-B*40:321 Genomic Plasmid Vector	PHLAG82515061	Plasmid vector containing HLA-B*40:321 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:321 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:321 protein under different cellular conditions.	Inquiry
HLA-B*40:322 Genomic Plasmid Vector	PHLAG82515062	Plasmid vector containing HLA-B*40:322 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:322 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:322 protein under different cellular conditions.	Inquiry
HLA-B*40:323:01 Genomic Plasmid Vector	PHLAG82515063	Plasmid vector containing HLA-B*40:323:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:323:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:323:01 protein under different cellular conditions.	Inquiry
HLA-B*40:323:02 Genomic Plasmid Vector	PHLAG82515064	Plasmid vector containing HLA-B*40:323:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:323:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:323:02 protein under different cellular conditions.	Inquiry
HLA-B*40:324 Genomic Plasmid Vector	PHLAG82515065	Plasmid vector containing HLA-B*40:324 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:324 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:324 protein under different cellular conditions.	Inquiry

HLA-B*40:325 Genomic Plasmid Vector	PHLAG82515066	Plasmid vector containing HLA-B*40:325 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:325 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:325 protein under different cellular conditions.	Inquiry
HLA-B*40:326 Genomic Plasmid Vector	PHLAG82515067	Plasmid vector containing HLA-B*40:326 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:326 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:326 protein under different cellular conditions.	Inquiry
HLA-B*40:327 Genomic Plasmid Vector	PHLAG82515068	Plasmid vector containing HLA-B*40:327 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:327 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:327 protein under different cellular conditions.	Inquiry
HLA-B*40:328 Genomic Plasmid Vector	PHLAG82515069	Plasmid vector containing HLA-B*40:328 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:328 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:328 protein under different cellular conditions.	Inquiry
HLA-B*40:329 Genomic Plasmid Vector	PHLAG82515070	Plasmid vector containing HLA-B*40:329 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:329 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:329 protein under different cellular conditions.	Inquiry
HLA-B*40:33 Genomic Plasmid Vector	PHLAG82515071	Plasmid vector containing HLA-B*40:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:33 protein under different cellular conditions.	Inquiry
HLA-B*40:330 Genomic Plasmid Vector	PHLAG82515072	Plasmid vector containing HLA-B*40:330 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:330 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:330 protein under different cellular conditions.	Inquiry
HLA-B*40:331 Genomic Plasmid Vector	PHLAG82515073	Plasmid vector containing HLA-B*40:331 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:331 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:331 protein under different cellular conditions.	Inquiry
HLA-B*40:332 Genomic Plasmid Vector	PHLAG82515074	Plasmid vector containing HLA-B*40:332 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:332 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:332 protein under different cellular conditions.	Inquiry

HLA-B*40:333 Genomic Plasmid Vector	PHLAG82515075	Plasmid vector containing HLA-B*40:333 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:333 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:333 protein under different cellular conditions.	Inquiry
HLA-B*40:334:01 Genomic Plasmid Vector	PHLAG82515076	Plasmid vector containing HLA-B*40:334:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:334:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:334:01 protein under different cellular conditions.	Inquiry
HLA-B*40:334:02 Genomic Plasmid Vector	PHLAG82515077	Plasmid vector containing HLA-B*40:334:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:334:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:334:02 protein under different cellular conditions.	Inquiry
HLA-B*40:335 Genomic Plasmid Vector	PHLAG82515078	Plasmid vector containing HLA-B*40:335 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:335 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:335 protein under different cellular conditions.	Inquiry
HLA-B*40:336 Genomic Plasmid Vector	PHLAG82515079	Plasmid vector containing HLA-B*40:336 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:336 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:336 protein under different cellular conditions.	Inquiry
HLA-B*40:337N Genomic Plasmid Vector	PHLAG82515080	Plasmid vector containing HLA-B*40:337N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:337N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:337N protein under different cellular conditions.	Inquiry
HLA-B*40:338N Genomic Plasmid Vector	PHLAG82515081	Plasmid vector containing HLA-B*40:338N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:338N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:338N protein under different cellular conditions.	Inquiry
HLA-B*40:339 Genomic Plasmid Vector	PHLAG82515082	Plasmid vector containing HLA-B*40:339 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:339 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:339 protein under different cellular conditions.	Inquiry
HLA-B*40:34 Genomic Plasmid Vector	PHLAG82515083	Plasmid vector containing HLA-B*40:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:34 protein under different cellular conditions.	Inquiry

HLA-B*40:340 Genomic Plasmid Vector	PHLAG82515084	Plasmid vector containing HLA-B*40:340 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:340 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:340 protein under different cellular conditions.	Inquiry
HLA-B*40:341 Genomic Plasmid Vector	PHLAG82515085	Plasmid vector containing HLA-B*40:341 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:341 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:341 protein under different cellular conditions.	Inquiry
HLA-B*40:342 Genomic Plasmid Vector	PHLAG82515086	Plasmid vector containing HLA-B*40:342 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:342 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:342 protein under different cellular conditions.	Inquiry
HLA-B*40:343 Genomic Plasmid Vector	PHLAG82515087	Plasmid vector containing HLA-B*40:343 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:343 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:343 protein under different cellular conditions.	Inquiry
HLA-B*40:344 Genomic Plasmid Vector	PHLAG82515088	Plasmid vector containing HLA-B*40:344 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:344 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:344 protein under different cellular conditions.	Inquiry
HLA-B*40:345N Genomic Plasmid Vector	PHLAG82515089	Plasmid vector containing HLA-B*40:345N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:345N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:345N protein under different cellular conditions.	Inquiry
HLA-B*40:346 Genomic Plasmid Vector	PHLAG82515090	Plasmid vector containing HLA-B*40:346 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:346 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:346 protein under different cellular conditions.	Inquiry
HLA-B*40:347 Genomic Plasmid Vector	PHLAG82515091	Plasmid vector containing HLA-B*40:347 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:347 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:347 protein under different cellular conditions.	Inquiry
HLA-B*40:348 Genomic Plasmid Vector	PHLAG82515092	Plasmid vector containing HLA-B*40:348 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:348 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:348 protein under different cellular conditions.	Inquiry

HLA-B*40:349 Genomic Plasmid Vector	PHLAG82515093	Plasmid vector containing HLA-B*40:349 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:349 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:349 protein under different cellular conditions.	Inquiry
HLA-B*40:35:01 Genomic Plasmid Vector	PHLAG82515094	Plasmid vector containing HLA-B*40:35:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:35:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:35:01 protein under different cellular conditions.	Inquiry
HLA-B*40:35:02 Genomic Plasmid Vector	PHLAG82515095	Plasmid vector containing HLA-B*40:35:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:35:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:35:02 protein under different cellular conditions.	Inquiry
HLA-B*40:35:03 Genomic Plasmid Vector	PHLAG82515096	Plasmid vector containing HLA-B*40:35:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:35:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:35:03 protein under different cellular conditions.	Inquiry
HLA-B*40:350 Genomic Plasmid Vector	PHLAG82515097	Plasmid vector containing HLA-B*40:350 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:350 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:350 protein under different cellular conditions.	Inquiry
HLA-B*40:351 Genomic Plasmid Vector	PHLAG82515098	Plasmid vector containing HLA-B*40:351 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:351 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:351 protein under different cellular conditions.	Inquiry
HLA-B*40:352 Genomic Plasmid Vector	PHLAG82515099	Plasmid vector containing HLA-B*40:352 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:352 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:352 protein under different cellular conditions.	Inquiry
HLA-B*40:353:01:01 Genomic Plasmid Vector	PHLAG825151000	Plasmid vector containing HLA-B*40:353:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:353:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:353:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:353:01:02 Genomic Plasmid Vector	PHLAG825151001	Plasmid vector containing HLA-B*40:353:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:353:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:353:01:02 protein under different cellular conditions.	Inquiry

HLA-B*40:353:02 Genomic Plasmid Vector	PHLAG825151012	Plasmid vector containing HLA-B*40:353:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:353:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:353:02 protein under different cellular conditions.	Inquiry
HLA-B*40:354 Genomic Plasmid Vector	PHLAG825151013	Plasmid vector containing HLA-B*40:354 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:354 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:354 protein under different cellular conditions.	Inquiry
HLA-B*40:355 Genomic Plasmid Vector	PHLAG825151014	Plasmid vector containing HLA-B*40:355 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:355 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:355 protein under different cellular conditions.	Inquiry
HLA-B*40:356 Genomic Plasmid Vector	PHLAG825151015	Plasmid vector containing HLA-B*40:356 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:356 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:356 protein under different cellular conditions.	Inquiry
HLA-B*40:357 Genomic Plasmid Vector	PHLAG825151016	Plasmid vector containing HLA-B*40:357 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:357 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:357 protein under different cellular conditions.	Inquiry
HLA-B*40:358 Genomic Plasmid Vector	PHLAG825151017	Plasmid vector containing HLA-B*40:358 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:358 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:358 protein under different cellular conditions.	Inquiry
HLA-B*40:359 Genomic Plasmid Vector	PHLAG825151018	Plasmid vector containing HLA-B*40:359 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:359 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:359 protein under different cellular conditions.	Inquiry
HLA-B*40:36 Genomic Plasmid Vector	PHLAG825151019	Plasmid vector containing HLA-B*40:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:36 protein under different cellular conditions.	Inquiry
HLA-B*40:360 Genomic Plasmid Vector	PHLAG825151110	Plasmid vector containing HLA-B*40:360 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:360 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:360 protein under different cellular conditions.	Inquiry

HLA-B*40:361N Genomic Plasmid Vector	PHLAG82515111	Plasmid vector containing HLA-B*40:361N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:361N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:361N protein under different cellular conditions.	Inquiry
HLA-B*40:362 Genomic Plasmid Vector	PHLAG82515112	Plasmid vector containing HLA-B*40:362 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:362 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:362 protein under different cellular conditions.	Inquiry
HLA-B*40:363 Genomic Plasmid Vector	PHLAG82515113	Plasmid vector containing HLA-B*40:363 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:363 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:363 protein under different cellular conditions.	Inquiry
HLA-B*40:364 Genomic Plasmid Vector	PHLAG82515114	Plasmid vector containing HLA-B*40:364 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:364 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:364 protein under different cellular conditions.	Inquiry
HLA-B*40:365 Genomic Plasmid Vector	PHLAG82515115	Plasmid vector containing HLA-B*40:365 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:365 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:365 protein under different cellular conditions.	Inquiry
HLA-B*40:366 Genomic Plasmid Vector	PHLAG82515116	Plasmid vector containing HLA-B*40:366 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:366 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:366 protein under different cellular conditions.	Inquiry
HLA-B*40:367 Genomic Plasmid Vector	PHLAG82515117	Plasmid vector containing HLA-B*40:367 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:367 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:367 protein under different cellular conditions.	Inquiry
HLA-B*40:368 Genomic Plasmid Vector	PHLAG82515118	Plasmid vector containing HLA-B*40:368 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:368 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:368 protein under different cellular conditions.	Inquiry
HLA-B*40:369 Genomic Plasmid Vector	PHLAG82515119	Plasmid vector containing HLA-B*40:369 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:369 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:369 protein under different cellular conditions.	Inquiry

HLA-B*40:37 Genomic Plasmid Vector	PHLAG82515120	Plasmid vector containing HLA-B*40:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:37 protein under different cellular conditions.	Inquiry
HLA-B*40:370 Genomic Plasmid Vector	PHLAG82515121	Plasmid vector containing HLA-B*40:370 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:370 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:370 protein under different cellular conditions.	Inquiry
HLA-B*40:371 Genomic Plasmid Vector	PHLAG82515122	Plasmid vector containing HLA-B*40:371 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:371 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:371 protein under different cellular conditions.	Inquiry
HLA-B*40:372N Genomic Plasmid Vector	PHLAG82515123	Plasmid vector containing HLA-B*40:372N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:372N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:372N protein under different cellular conditions.	Inquiry
HLA-B*40:373 Genomic Plasmid Vector	PHLAG82515124	Plasmid vector containing HLA-B*40:373 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:373 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:373 protein under different cellular conditions.	Inquiry
HLA-B*40:374 Genomic Plasmid Vector	PHLAG82515125	Plasmid vector containing HLA-B*40:374 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:374 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:374 protein under different cellular conditions.	Inquiry
HLA-B*40:375 Genomic Plasmid Vector	PHLAG82515126	Plasmid vector containing HLA-B*40:375 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:375 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:375 protein under different cellular conditions.	Inquiry
HLA-B*40:376 Genomic Plasmid Vector	PHLAG82515127	Plasmid vector containing HLA-B*40:376 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:376 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:376 protein under different cellular conditions.	Inquiry
HLA-B*40:377 Genomic Plasmid Vector	PHLAG82515128	Plasmid vector containing HLA-B*40:377 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:377 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:377 protein under different cellular conditions.	Inquiry

HLA-B*40:378 Genomic Plasmid Vector	PHLAG82515129	Plasmid vector containing HLA-B*40:378 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:378 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:378 protein under different cellular conditions.	Inquiry
HLA-B*40:379:01:01 Genomic Plasmid Vector	PHLAG825151310	Plasmid vector containing HLA-B*40:379:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:379:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:379:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:379:01:02 Genomic Plasmid Vector	PHLAG825151311	Plasmid vector containing HLA-B*40:379:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:379:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:379:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:379:02 Genomic Plasmid Vector	PHLAG825151312	Plasmid vector containing HLA-B*40:379:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:379:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:379:02 protein under different cellular conditions.	Inquiry
HLA-B*40:38 Genomic Plasmid Vector	PHLAG825151313	Plasmid vector containing HLA-B*40:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:38 protein under different cellular conditions.	Inquiry
HLA-B*40:380 Genomic Plasmid Vector	PHLAG825151314	Plasmid vector containing HLA-B*40:380 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:380 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:380 protein under different cellular conditions.	Inquiry
HLA-B*40:381:01 Genomic Plasmid Vector	PHLAG825151315	Plasmid vector containing HLA-B*40:381:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:381:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:381:01 protein under different cellular conditions.	Inquiry
HLA-B*40:381:02 Genomic Plasmid Vector	PHLAG825151316	Plasmid vector containing HLA-B*40:381:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:381:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:381:02 protein under different cellular conditions.	Inquiry
HLA-B*40:382 Genomic Plasmid Vector	PHLAG825151317	Plasmid vector containing HLA-B*40:382 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:382 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:382 protein under different cellular conditions.	Inquiry

HLA-B*40:383 Genomic Plasmid Vector	PHLAG82515138	Plasmid vector containing HLA-B*40:383 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:383 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:383 protein under different cellular conditions.	Inquiry
HLA-B*40:384 Genomic Plasmid Vector	PHLAG82515139	Plasmid vector containing HLA-B*40:384 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:384 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:384 protein under different cellular conditions.	Inquiry
HLA-B*40:385 Genomic Plasmid Vector	PHLAG82515140	Plasmid vector containing HLA-B*40:385 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:385 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:385 protein under different cellular conditions.	Inquiry
HLA-B*40:386 Genomic Plasmid Vector	PHLAG82515141	Plasmid vector containing HLA-B*40:386 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:386 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:386 protein under different cellular conditions.	Inquiry
HLA-B*40:387 Genomic Plasmid Vector	PHLAG82515142	Plasmid vector containing HLA-B*40:387 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:387 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:387 protein under different cellular conditions.	Inquiry
HLA-B*40:388 Genomic Plasmid Vector	PHLAG82515143	Plasmid vector containing HLA-B*40:388 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:388 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:388 protein under different cellular conditions.	Inquiry
HLA-B*40:389 Genomic Plasmid Vector	PHLAG82515144	Plasmid vector containing HLA-B*40:389 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:389 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:389 protein under different cellular conditions.	Inquiry
HLA-B*40:39 Genomic Plasmid Vector	PHLAG82515145	Plasmid vector containing HLA-B*40:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:39 protein under different cellular conditions.	Inquiry
HLA-B*40:390 Genomic Plasmid Vector	PHLAG82515146	Plasmid vector containing HLA-B*40:390 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:390 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:390 protein under different cellular conditions.	Inquiry

HLA-B*40:391 Genomic Plasmid Vector	PHLAG82515147	Plasmid vector containing HLA-B*40:391 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:391 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:391 protein under different cellular conditions.	Inquiry
HLA-B*40:392 Genomic Plasmid Vector	PHLAG82515148	Plasmid vector containing HLA-B*40:392 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:392 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:392 protein under different cellular conditions.	Inquiry
HLA-B*40:393 Genomic Plasmid Vector	PHLAG82515149	Plasmid vector containing HLA-B*40:393 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:393 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:393 protein under different cellular conditions.	Inquiry
HLA-B*40:394 Genomic Plasmid Vector	PHLAG825151510	Plasmid vector containing HLA-B*40:394 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:394 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:394 protein under different cellular conditions.	Inquiry
HLA-B*40:395 Genomic Plasmid Vector	PHLAG825151511	Plasmid vector containing HLA-B*40:395 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:395 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:395 protein under different cellular conditions.	Inquiry
HLA-B*40:396 Genomic Plasmid Vector	PHLAG825151512	Plasmid vector containing HLA-B*40:396 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:396 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:396 protein under different cellular conditions.	Inquiry
HLA-B*40:397 Genomic Plasmid Vector	PHLAG825151513	Plasmid vector containing HLA-B*40:397 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:397 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:397 protein under different cellular conditions.	Inquiry
HLA-B*40:398 Genomic Plasmid Vector	PHLAG825151514	Plasmid vector containing HLA-B*40:398 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:398 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:398 protein under different cellular conditions.	Inquiry
HLA-B*40:399N Genomic Plasmid Vector	PHLAG825151515	Plasmid vector containing HLA-B*40:399N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:399N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:399N protein under different cellular conditions.	Inquiry

HLA-B*40:40 Genomic Plasmid Vector	PHLAG82515156	Plasmid vector containing HLA-B*40:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:40 protein under different cellular conditions.	Inquiry
HLA-B*40:400 Genomic Plasmid Vector	PHLAG82515157	Plasmid vector containing HLA-B*40:400 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:400 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:400 protein under different cellular conditions.	Inquiry
HLA-B*40:401 Genomic Plasmid Vector	PHLAG82515158	Plasmid vector containing HLA-B*40:401 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:401 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:401 protein under different cellular conditions.	Inquiry
HLA-B*40:402 Genomic Plasmid Vector	PHLAG82515159	Plasmid vector containing HLA-B*40:402 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:402 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:402 protein under different cellular conditions.	Inquiry
HLA-B*40:403 Genomic Plasmid Vector	PHLAG82515160	Plasmid vector containing HLA-B*40:403 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:403 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:403 protein under different cellular conditions.	Inquiry
HLA-B*40:404 Genomic Plasmid Vector	PHLAG82515161	Plasmid vector containing HLA-B*40:404 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:404 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:404 protein under different cellular conditions.	Inquiry
HLA-B*40:405 Genomic Plasmid Vector	PHLAG82515162	Plasmid vector containing HLA-B*40:405 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:405 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:405 protein under different cellular conditions.	Inquiry
HLA-B*40:406 Genomic Plasmid Vector	PHLAG82515163	Plasmid vector containing HLA-B*40:406 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:406 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:406 protein under different cellular conditions.	Inquiry
HLA-B*40:407 Genomic Plasmid Vector	PHLAG82515164	Plasmid vector containing HLA-B*40:407 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:407 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:407 protein under different cellular conditions.	Inquiry

HLA-B*40:408 Genomic Plasmid Vector	PHLAG82515165	Plasmid vector containing HLA-B*40:408 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:408 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:408 protein under different cellular conditions.	Inquiry
HLA-B*40:409 Genomic Plasmid Vector	PHLAG82515166	Plasmid vector containing HLA-B*40:409 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:409 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:409 protein under different cellular conditions.	Inquiry
HLA-B*40:410 Genomic Plasmid Vector	PHLAG82515167	Plasmid vector containing HLA-B*40:410 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:410 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:410 protein under different cellular conditions.	Inquiry
HLA-B*40:411 Genomic Plasmid Vector	PHLAG82515168	Plasmid vector containing HLA-B*40:411 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:411 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:411 protein under different cellular conditions.	Inquiry
HLA-B*40:412 Genomic Plasmid Vector	PHLAG82515169	Plasmid vector containing HLA-B*40:412 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:412 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:412 protein under different cellular conditions.	Inquiry
HLA-B*40:413 Genomic Plasmid Vector	PHLAG82515170	Plasmid vector containing HLA-B*40:413 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:413 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:413 protein under different cellular conditions.	Inquiry
HLA-B*40:414 Genomic Plasmid Vector	PHLAG82515171	Plasmid vector containing HLA-B*40:414 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:414 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:414 protein under different cellular conditions.	Inquiry
HLA-B*40:415 Genomic Plasmid Vector	PHLAG82515172	Plasmid vector containing HLA-B*40:415 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:415 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:415 protein under different cellular conditions.	Inquiry
HLA-B*40:416 Genomic Plasmid Vector	PHLAG82515173	Plasmid vector containing HLA-B*40:416 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:416 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:416 protein under different cellular conditions.	Inquiry

HLA-B*40:417 Genomic Plasmid Vector	PHLAG82515174	Plasmid vector containing HLA-B*40:417 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:417 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:417 protein under different cellular conditions.	Inquiry
HLA-B*40:418 Genomic Plasmid Vector	PHLAG82515175	Plasmid vector containing HLA-B*40:418 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:418 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:418 protein under different cellular conditions.	Inquiry
HLA-B*40:419 Genomic Plasmid Vector	PHLAG82515176	Plasmid vector containing HLA-B*40:419 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:419 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:419 protein under different cellular conditions.	Inquiry
HLA-B*40:42 Genomic Plasmid Vector	PHLAG82515177	Plasmid vector containing HLA-B*40:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:42 protein under different cellular conditions.	Inquiry
HLA-B*40:420 Genomic Plasmid Vector	PHLAG82515178	Plasmid vector containing HLA-B*40:420 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:420 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:420 protein under different cellular conditions.	Inquiry
HLA-B*40:421Q Genomic Plasmid Vector	PHLAG82515179	Plasmid vector containing HLA-B*40:421Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:421Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:421Q protein under different cellular conditions.	Inquiry
HLA-B*40:422 Genomic Plasmid Vector	PHLAG82515180	Plasmid vector containing HLA-B*40:422 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:422 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:422 protein under different cellular conditions.	Inquiry
HLA-B*40:423 Genomic Plasmid Vector	PHLAG82515181	Plasmid vector containing HLA-B*40:423 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:423 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:423 protein under different cellular conditions.	Inquiry
HLA-B*40:424 Genomic Plasmid Vector	PHLAG82515182	Plasmid vector containing HLA-B*40:424 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:424 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:424 protein under different cellular conditions.	Inquiry

HLA-B*40:425 Genomic Plasmid Vector	PHLAG82515183	Plasmid vector containing HLA-B*40:425 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:425 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:425 protein under different cellular conditions.	Inquiry
HLA-B*40:426N Genomic Plasmid Vector	PHLAG82515184	Plasmid vector containing HLA-B*40:426N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:426N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:426N protein under different cellular conditions.	Inquiry
HLA-B*40:427 Genomic Plasmid Vector	PHLAG82515185	Plasmid vector containing HLA-B*40:427 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:427 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:427 protein under different cellular conditions.	Inquiry
HLA-B*40:428N Genomic Plasmid Vector	PHLAG82515186	Plasmid vector containing HLA-B*40:428N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:428N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:428N protein under different cellular conditions.	Inquiry
HLA-B*40:429 Genomic Plasmid Vector	PHLAG82515187	Plasmid vector containing HLA-B*40:429 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:429 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:429 protein under different cellular conditions.	Inquiry
HLA-B*40:43 Genomic Plasmid Vector	PHLAG82515188	Plasmid vector containing HLA-B*40:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:43 protein under different cellular conditions.	Inquiry
HLA-B*40:430 Genomic Plasmid Vector	PHLAG82515189	Plasmid vector containing HLA-B*40:430 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:430 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:430 protein under different cellular conditions.	Inquiry
HLA-B*40:431:01 Genomic Plasmid Vector	PHLAG825151910	Plasmid vector containing HLA-B*40:431:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:431:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:431:01 protein under different cellular conditions.	Inquiry
HLA-B*40:431:02 Genomic Plasmid Vector	PHLAG825151911	Plasmid vector containing HLA-B*40:431:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:431:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:431:02 protein under different cellular conditions.	Inquiry

HLA-B*40:432 Genomic Plasmid Vector	PHLAG82515192	Plasmid vector containing HLA-B*40:432 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:432 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:432 protein under different cellular conditions.	Inquiry
HLA-B*40:433 Genomic Plasmid Vector	PHLAG82515193	Plasmid vector containing HLA-B*40:433 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:433 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:433 protein under different cellular conditions.	Inquiry
HLA-B*40:434 Genomic Plasmid Vector	PHLAG82515194	Plasmid vector containing HLA-B*40:434 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:434 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:434 protein under different cellular conditions.	Inquiry
HLA-B*40:435 Genomic Plasmid Vector	PHLAG82515195	Plasmid vector containing HLA-B*40:435 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:435 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:435 protein under different cellular conditions.	Inquiry
HLA-B*40:436 Genomic Plasmid Vector	PHLAG82515196	Plasmid vector containing HLA-B*40:436 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:436 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:436 protein under different cellular conditions.	Inquiry
HLA-B*40:437 Genomic Plasmid Vector	PHLAG82515197	Plasmid vector containing HLA-B*40:437 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:437 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:437 protein under different cellular conditions.	Inquiry
HLA-B*40:438N Genomic Plasmid Vector	PHLAG82515198	Plasmid vector containing HLA-B*40:438N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:438N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:438N protein under different cellular conditions.	Inquiry
HLA-B*40:439 Genomic Plasmid Vector	PHLAG82515199	Plasmid vector containing HLA-B*40:439 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:439 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:439 protein under different cellular conditions.	Inquiry
HLA-B*40:44 Genomic Plasmid Vector	PHLAG825152000	Plasmid vector containing HLA-B*40:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:44 protein under different cellular conditions.	Inquiry

HLA-B*40:440 Genomic Plasmid Vector	PHLAG82515201	Plasmid vector containing HLA-B*40:440 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:440 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:440 protein under different cellular conditions.	Inquiry
HLA-B*40:441 Genomic Plasmid Vector	PHLAG82515202	Plasmid vector containing HLA-B*40:441 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:441 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:441 protein under different cellular conditions.	Inquiry
HLA-B*40:442 Genomic Plasmid Vector	PHLAG82515203	Plasmid vector containing HLA-B*40:442 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:442 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:442 protein under different cellular conditions.	Inquiry
HLA-B*40:443 Genomic Plasmid Vector	PHLAG82515204	Plasmid vector containing HLA-B*40:443 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:443 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:443 protein under different cellular conditions.	Inquiry
HLA-B*40:444:01 Genomic Plasmid Vector	PHLAG82515205	Plasmid vector containing HLA-B*40:444:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:444:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:444:01 protein under different cellular conditions.	Inquiry
HLA-B*40:444:02 Genomic Plasmid Vector	PHLAG82515206	Plasmid vector containing HLA-B*40:444:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:444:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:444:02 protein under different cellular conditions.	Inquiry
HLA-B*40:445 Genomic Plasmid Vector	PHLAG82515207	Plasmid vector containing HLA-B*40:445 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:445 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:445 protein under different cellular conditions.	Inquiry
HLA-B*40:446 Genomic Plasmid Vector	PHLAG82515208	Plasmid vector containing HLA-B*40:446 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:446 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:446 protein under different cellular conditions.	Inquiry
HLA-B*40:447 Genomic Plasmid Vector	PHLAG82515209	Plasmid vector containing HLA-B*40:447 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:447 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:447 protein under different cellular conditions.	Inquiry

HLA-B*40:448 Genomic Plasmid Vector	PHLAG82515210	Plasmid vector containing HLA-B*40:448 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:448 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:448 protein under different cellular conditions.	Inquiry
HLA-B*40:449 Genomic Plasmid Vector	PHLAG82515211	Plasmid vector containing HLA-B*40:449 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:449 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:449 protein under different cellular conditions.	Inquiry
HLA-B*40:45 Genomic Plasmid Vector	PHLAG82515212	Plasmid vector containing HLA-B*40:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:45 protein under different cellular conditions.	Inquiry
HLA-B*40:450 Genomic Plasmid Vector	PHLAG82515213	Plasmid vector containing HLA-B*40:450 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:450 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:450 protein under different cellular conditions.	Inquiry
HLA-B*40:451 Genomic Plasmid Vector	PHLAG82515214	Plasmid vector containing HLA-B*40:451 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:451 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:451 protein under different cellular conditions.	Inquiry
HLA-B*40:452 Genomic Plasmid Vector	PHLAG82515215	Plasmid vector containing HLA-B*40:452 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:452 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:452 protein under different cellular conditions.	Inquiry
HLA-B*40:453 Genomic Plasmid Vector	PHLAG82515216	Plasmid vector containing HLA-B*40:453 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:453 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:453 protein under different cellular conditions.	Inquiry
HLA-B*40:454 Genomic Plasmid Vector	PHLAG82515217	Plasmid vector containing HLA-B*40:454 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:454 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:454 protein under different cellular conditions.	Inquiry
HLA-B*40:455 Genomic Plasmid Vector	PHLAG82515218	Plasmid vector containing HLA-B*40:455 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:455 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:455 protein under different cellular conditions.	Inquiry

HLA-B*40:456 Genomic Plasmid Vector	PHLAG82515219	Plasmid vector containing HLA-B*40:456 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:456 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:456 protein under different cellular conditions.	Inquiry
HLA-B*40:457 Genomic Plasmid Vector	PHLAG82515220	Plasmid vector containing HLA-B*40:457 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:457 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:457 protein under different cellular conditions.	Inquiry
HLA-B*40:458 Genomic Plasmid Vector	PHLAG82515221	Plasmid vector containing HLA-B*40:458 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:458 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:458 protein under different cellular conditions.	Inquiry
HLA-B*40:459 Genomic Plasmid Vector	PHLAG82515222	Plasmid vector containing HLA-B*40:459 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:459 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:459 protein under different cellular conditions.	Inquiry
HLA-B*40:46 Genomic Plasmid Vector	PHLAG82515223	Plasmid vector containing HLA-B*40:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:46 protein under different cellular conditions.	Inquiry
HLA-B*40:460 Genomic Plasmid Vector	PHLAG82515224	Plasmid vector containing HLA-B*40:460 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:460 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:460 protein under different cellular conditions.	Inquiry
HLA-B*40:461 Genomic Plasmid Vector	PHLAG82515225	Plasmid vector containing HLA-B*40:461 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:461 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:461 protein under different cellular conditions.	Inquiry
HLA-B*40:462 Genomic Plasmid Vector	PHLAG82515226	Plasmid vector containing HLA-B*40:462 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:462 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:462 protein under different cellular conditions.	Inquiry
HLA-B*40:463 Genomic Plasmid Vector	PHLAG82515227	Plasmid vector containing HLA-B*40:463 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:463 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:463 protein under different cellular conditions.	Inquiry

HLA-B*40:464 Genomic Plasmid Vector	PHLAG82515228	Plasmid vector containing HLA-B*40:464 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:464 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:464 protein under different cellular conditions.	Inquiry
HLA-B*40:465 Genomic Plasmid Vector	PHLAG82515229	Plasmid vector containing HLA-B*40:465 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:465 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:465 protein under different cellular conditions.	Inquiry
HLA-B*40:466 Genomic Plasmid Vector	PHLAG82515230	Plasmid vector containing HLA-B*40:466 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:466 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:466 protein under different cellular conditions.	Inquiry
HLA-B*40:467 Genomic Plasmid Vector	PHLAG82515231	Plasmid vector containing HLA-B*40:467 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:467 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:467 protein under different cellular conditions.	Inquiry
HLA-B*40:468 Genomic Plasmid Vector	PHLAG82515232	Plasmid vector containing HLA-B*40:468 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:468 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:468 protein under different cellular conditions.	Inquiry
HLA-B*40:469 Genomic Plasmid Vector	PHLAG82515233	Plasmid vector containing HLA-B*40:469 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:469 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:469 protein under different cellular conditions.	Inquiry
HLA-B*40:47 Genomic Plasmid Vector	PHLAG82515234	Plasmid vector containing HLA-B*40:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:47 protein under different cellular conditions.	Inquiry
HLA-B*40:470 Genomic Plasmid Vector	PHLAG82515235	Plasmid vector containing HLA-B*40:470 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:470 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:470 protein under different cellular conditions.	Inquiry
HLA-B*40:471 Genomic Plasmid Vector	PHLAG82515236	Plasmid vector containing HLA-B*40:471 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:471 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:471 protein under different cellular conditions.	Inquiry

HLA-B*40:472 Genomic Plasmid Vector	PHLAG82515237	Plasmid vector containing HLA-B*40:472 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:472 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:472 protein under different cellular conditions.	Inquiry
HLA-B*40:473 Genomic Plasmid Vector	PHLAG82515238	Plasmid vector containing HLA-B*40:473 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:473 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:473 protein under different cellular conditions.	Inquiry
HLA-B*40:474 Genomic Plasmid Vector	PHLAG82515239	Plasmid vector containing HLA-B*40:474 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:474 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:474 protein under different cellular conditions.	Inquiry
HLA-B*40:475:01 Genomic Plasmid Vector	PHLAG825152400	Plasmid vector containing HLA-B*40:475:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:475:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:475:01 protein under different cellular conditions.	Inquiry
HLA-B*40:475:02 Genomic Plasmid Vector	PHLAG825152401	Plasmid vector containing HLA-B*40:475:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:475:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:475:02 protein under different cellular conditions.	Inquiry
HLA-B*40:476 Genomic Plasmid Vector	PHLAG825152402	Plasmid vector containing HLA-B*40:476 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:476 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:476 protein under different cellular conditions.	Inquiry
HLA-B*40:477 Genomic Plasmid Vector	PHLAG825152403	Plasmid vector containing HLA-B*40:477 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:477 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:477 protein under different cellular conditions.	Inquiry
HLA-B*40:478 Genomic Plasmid Vector	PHLAG825152404	Plasmid vector containing HLA-B*40:478 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:478 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:478 protein under different cellular conditions.	Inquiry
HLA-B*40:479 Genomic Plasmid Vector	PHLAG825152405	Plasmid vector containing HLA-B*40:479 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:479 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:479 protein under different cellular conditions.	Inquiry

HLA-B*40:48 Genomic Plasmid Vector	PHLAG82515246	Plasmid vector containing HLA-B*40:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:48 protein under different cellular conditions.	Inquiry
HLA-B*40:480 Genomic Plasmid Vector	PHLAG82515247	Plasmid vector containing HLA-B*40:480 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:480 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:480 protein under different cellular conditions.	Inquiry
HLA-B*40:481N Genomic Plasmid Vector	PHLAG82515248	Plasmid vector containing HLA-B*40:481N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:481N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:481N protein under different cellular conditions.	Inquiry
HLA-B*40:482 Genomic Plasmid Vector	PHLAG82515249	Plasmid vector containing HLA-B*40:482 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:482 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:482 protein under different cellular conditions.	Inquiry
HLA-B*40:483N Genomic Plasmid Vector	PHLAG82515250	Plasmid vector containing HLA-B*40:483N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:483N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:483N protein under different cellular conditions.	Inquiry
HLA-B*40:484 Genomic Plasmid Vector	PHLAG82515251	Plasmid vector containing HLA-B*40:484 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:484 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:484 protein under different cellular conditions.	Inquiry
HLA-B*40:485 Genomic Plasmid Vector	PHLAG82515252	Plasmid vector containing HLA-B*40:485 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:485 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:485 protein under different cellular conditions.	Inquiry
HLA-B*40:486 Genomic Plasmid Vector	PHLAG82515253	Plasmid vector containing HLA-B*40:486 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:486 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:486 protein under different cellular conditions.	Inquiry
HLA-B*40:487N Genomic Plasmid Vector	PHLAG82515254	Plasmid vector containing HLA-B*40:487N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:487N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:487N protein under different cellular conditions.	Inquiry

HLA-B*40:488N Genomic Plasmid Vector	PHLAG82515255	Plasmid vector containing HLA-B*40:488N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:488N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:488N protein under different cellular conditions.	Inquiry
HLA-B*40:489 Genomic Plasmid Vector	PHLAG82515256	Plasmid vector containing HLA-B*40:489 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:489 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:489 protein under different cellular conditions.	Inquiry
HLA-B*40:49 Genomic Plasmid Vector	PHLAG82515257	Plasmid vector containing HLA-B*40:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:49 protein under different cellular conditions.	Inquiry
HLA-B*40:490 Genomic Plasmid Vector	PHLAG82515258	Plasmid vector containing HLA-B*40:490 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:490 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:490 protein under different cellular conditions.	Inquiry
HLA-B*40:491 Genomic Plasmid Vector	PHLAG82515259	Plasmid vector containing HLA-B*40:491 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:491 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:491 protein under different cellular conditions.	Inquiry
HLA-B*40:492 Genomic Plasmid Vector	PHLAG82515260	Plasmid vector containing HLA-B*40:492 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:492 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:492 protein under different cellular conditions.	Inquiry
HLA-B*40:493 Genomic Plasmid Vector	PHLAG82515261	Plasmid vector containing HLA-B*40:493 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:493 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:493 protein under different cellular conditions.	Inquiry
HLA-B*40:494 Genomic Plasmid Vector	PHLAG82515262	Plasmid vector containing HLA-B*40:494 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:494 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:494 protein under different cellular conditions.	Inquiry
HLA-B*40:495 Genomic Plasmid Vector	PHLAG82515263	Plasmid vector containing HLA-B*40:495 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:495 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:495 protein under different cellular conditions.	Inquiry

HLA-B*40:496 Genomic Plasmid Vector	PHLAG82515264	Plasmid vector containing HLA-B*40:496 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:496 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:496 protein under different cellular conditions.	Inquiry
HLA-B*40:497 Genomic Plasmid Vector	PHLAG82515265	Plasmid vector containing HLA-B*40:497 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:497 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:497 protein under different cellular conditions.	Inquiry
HLA-B*40:498 Genomic Plasmid Vector	PHLAG82515266	Plasmid vector containing HLA-B*40:498 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:498 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:498 protein under different cellular conditions.	Inquiry
HLA-B*40:499 Genomic Plasmid Vector	PHLAG82515267	Plasmid vector containing HLA-B*40:499 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:499 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:499 protein under different cellular conditions.	Inquiry
HLA-B*40:50:01:01 Genomic Plasmid Vector	PHLAG82515268	Plasmid vector containing HLA-B*40:50:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:50:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:50:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:50:01:02 Genomic Plasmid Vector	PHLAG82515269	Plasmid vector containing HLA-B*40:50:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:50:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:50:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:500 Genomic Plasmid Vector	PHLAG82515270	Plasmid vector containing HLA-B*40:500 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:500 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:500 protein under different cellular conditions.	Inquiry
HLA-B*40:501 Genomic Plasmid Vector	PHLAG82515271	Plasmid vector containing HLA-B*40:501 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:501 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:501 protein under different cellular conditions.	Inquiry
HLA-B*40:502 Genomic Plasmid Vector	PHLAG82515272	Plasmid vector containing HLA-B*40:502 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:502 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:502 protein under different cellular conditions.	Inquiry

HLA-B*40:503 Genomic Plasmid Vector	PHLAG82515273	Plasmid vector containing HLA-B*40:503 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:503 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:503 protein under different cellular conditions.	Inquiry
HLA-B*40:504 Genomic Plasmid Vector	PHLAG82515274	Plasmid vector containing HLA-B*40:504 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:504 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:504 protein under different cellular conditions.	Inquiry
HLA-B*40:505 Genomic Plasmid Vector	PHLAG82515275	Plasmid vector containing HLA-B*40:505 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:505 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:505 protein under different cellular conditions.	Inquiry
HLA-B*40:506N Genomic Plasmid Vector	PHLAG82515276	Plasmid vector containing HLA-B*40:506N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:506N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:506N protein under different cellular conditions.	Inquiry
HLA-B*40:507N Genomic Plasmid Vector	PHLAG82515277	Plasmid vector containing HLA-B*40:507N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:507N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:507N protein under different cellular conditions.	Inquiry
HLA-B*40:508N Genomic Plasmid Vector	PHLAG82515278	Plasmid vector containing HLA-B*40:508N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:508N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:508N protein under different cellular conditions.	Inquiry
HLA-B*40:509Q Genomic Plasmid Vector	PHLAG82515279	Plasmid vector containing HLA-B*40:509Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:509Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:509Q protein under different cellular conditions.	Inquiry
HLA-B*40:51 Genomic Plasmid Vector	PHLAG82515280	Plasmid vector containing HLA-B*40:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:51 protein under different cellular conditions.	Inquiry
HLA-B*40:510N Genomic Plasmid Vector	PHLAG82515281	Plasmid vector containing HLA-B*40:510N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:510N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:510N protein under different cellular conditions.	Inquiry

HLA-B*40:511N Genomic Plasmid Vector	PHLAG8251528 2	Plasmid vector containing HLA-B*40:511N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:511N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:511N protein under different cellular conditions.	Inquiry
HLA-B*40:512 Genomic Plasmid Vector	PHLAG8251528 3	Plasmid vector containing HLA-B*40:512 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:512 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:512 protein under different cellular conditions.	Inquiry
HLA-B*40:513 Genomic Plasmid Vector	PHLAG8251528 4	Plasmid vector containing HLA-B*40:513 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:513 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:513 protein under different cellular conditions.	Inquiry
HLA-B*40:514N Genomic Plasmid Vector	PHLAG8251528 5	Plasmid vector containing HLA-B*40:514N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:514N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:514N protein under different cellular conditions.	Inquiry
HLA-B*40:515 Genomic Plasmid Vector	PHLAG8251528 6	Plasmid vector containing HLA-B*40:515 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:515 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:515 protein under different cellular conditions.	Inquiry
HLA-B*40:516 Genomic Plasmid Vector	PHLAG8251528 7	Plasmid vector containing HLA-B*40:516 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:516 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:516 protein under different cellular conditions.	Inquiry
HLA-B*40:517 Genomic Plasmid Vector	PHLAG8251528 8	Plasmid vector containing HLA-B*40:517 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:517 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:517 protein under different cellular conditions.	Inquiry
HLA-B*40:518 Genomic Plasmid Vector	PHLAG8251528 9	Plasmid vector containing HLA-B*40:518 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:518 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:518 protein under different cellular conditions.	Inquiry
HLA-B*40:519 Genomic Plasmid Vector	PHLAG8251529 0	Plasmid vector containing HLA-B*40:519 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:519 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:519 protein under different cellular conditions.	Inquiry

HLA-B*40:52 Genomic Plasmid Vector	PHLAG82515291	Plasmid vector containing HLA-B*40:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:52 protein under different cellular conditions.	Inquiry
HLA-B*40:520 Genomic Plasmid Vector	PHLAG82515292	Plasmid vector containing HLA-B*40:520 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:520 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:520 protein under different cellular conditions.	Inquiry
HLA-B*40:521 Genomic Plasmid Vector	PHLAG82515293	Plasmid vector containing HLA-B*40:521 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:521 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:521 protein under different cellular conditions.	Inquiry
HLA-B*40:522 Genomic Plasmid Vector	PHLAG82515294	Plasmid vector containing HLA-B*40:522 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:522 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:522 protein under different cellular conditions.	Inquiry
HLA-B*40:523 Genomic Plasmid Vector	PHLAG82515295	Plasmid vector containing HLA-B*40:523 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:523 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:523 protein under different cellular conditions.	Inquiry
HLA-B*40:524 Genomic Plasmid Vector	PHLAG82515296	Plasmid vector containing HLA-B*40:524 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:524 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:524 protein under different cellular conditions.	Inquiry
HLA-B*40:525 Genomic Plasmid Vector	PHLAG82515297	Plasmid vector containing HLA-B*40:525 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:525 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:525 protein under different cellular conditions.	Inquiry
HLA-B*40:526 Genomic Plasmid Vector	PHLAG82515298	Plasmid vector containing HLA-B*40:526 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:526 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:526 protein under different cellular conditions.	Inquiry
HLA-B*40:527 Genomic Plasmid Vector	PHLAG82515299	Plasmid vector containing HLA-B*40:527 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:527 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:527 protein under different cellular conditions.	Inquiry

HLA-B*40:528 Genomic Plasmid Vector	PHLAG82515300	Plasmid vector containing HLA-B*40:528 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:528 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:528 protein under different cellular conditions.	Inquiry
HLA-B*40:529 Genomic Plasmid Vector	PHLAG82515301	Plasmid vector containing HLA-B*40:529 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:529 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:529 protein under different cellular conditions.	Inquiry
HLA-B*40:53 Genomic Plasmid Vector	PHLAG82515302	Plasmid vector containing HLA-B*40:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:53 protein under different cellular conditions.	Inquiry
HLA-B*40:530 Genomic Plasmid Vector	PHLAG82515303	Plasmid vector containing HLA-B*40:530 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:530 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:530 protein under different cellular conditions.	Inquiry
HLA-B*40:531 Genomic Plasmid Vector	PHLAG82515304	Plasmid vector containing HLA-B*40:531 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:531 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:531 protein under different cellular conditions.	Inquiry
HLA-B*40:532 Genomic Plasmid Vector	PHLAG82515305	Plasmid vector containing HLA-B*40:532 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:532 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:532 protein under different cellular conditions.	Inquiry
HLA-B*40:533 Genomic Plasmid Vector	PHLAG82515306	Plasmid vector containing HLA-B*40:533 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:533 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:533 protein under different cellular conditions.	Inquiry
HLA-B*40:534 Genomic Plasmid Vector	PHLAG82515307	Plasmid vector containing HLA-B*40:534 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:534 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:534 protein under different cellular conditions.	Inquiry
HLA-B*40:535 Genomic Plasmid Vector	PHLAG82515308	Plasmid vector containing HLA-B*40:535 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:535 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:535 protein under different cellular conditions.	Inquiry

HLA-B*40:536N Genomic Plasmid Vector	PHLAG82515309	Plasmid vector containing HLA-B*40:536N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:536N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:536N protein under different cellular conditions.	Inquiry
HLA-B*40:537 Genomic Plasmid Vector	PHLAG825153110	Plasmid vector containing HLA-B*40:537 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:537 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:537 protein under different cellular conditions.	Inquiry
HLA-B*40:538 Genomic Plasmid Vector	PHLAG825153111	Plasmid vector containing HLA-B*40:538 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:538 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:538 protein under different cellular conditions.	Inquiry
HLA-B*40:539 Genomic Plasmid Vector	PHLAG825153112	Plasmid vector containing HLA-B*40:539 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:539 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:539 protein under different cellular conditions.	Inquiry
HLA-B*40:54 Genomic Plasmid Vector	PHLAG825153113	Plasmid vector containing HLA-B*40:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:54 protein under different cellular conditions.	Inquiry
HLA-B*40:540N Genomic Plasmid Vector	PHLAG825153114	Plasmid vector containing HLA-B*40:540N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:540N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:540N protein under different cellular conditions.	Inquiry
HLA-B*40:541 Genomic Plasmid Vector	PHLAG825153115	Plasmid vector containing HLA-B*40:541 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:541 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:541 protein under different cellular conditions.	Inquiry
HLA-B*40:542 Genomic Plasmid Vector	PHLAG825153116	Plasmid vector containing HLA-B*40:542 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:542 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:542 protein under different cellular conditions.	Inquiry
HLA-B*40:543 Genomic Plasmid Vector	PHLAG825153117	Plasmid vector containing HLA-B*40:543 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:543 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:543 protein under different cellular conditions.	Inquiry

HLA-B*40:544:01:01 Genomic Plasmid Vector	PHLAG82515318	Plasmid vector containing HLA-B*40:544:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:544:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:544:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:544:01:02 Genomic Plasmid Vector	PHLAG82515319	Plasmid vector containing HLA-B*40:544:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:544:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:544:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:545N Genomic Plasmid Vector	PHLAG82515320	Plasmid vector containing HLA-B*40:545N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:545N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:545N protein under different cellular conditions.	Inquiry
HLA-B*40:546 Genomic Plasmid Vector	PHLAG82515321	Plasmid vector containing HLA-B*40:546 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:546 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:546 protein under different cellular conditions.	Inquiry
HLA-B*40:547 Genomic Plasmid Vector	PHLAG82515322	Plasmid vector containing HLA-B*40:547 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:547 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:547 protein under different cellular conditions.	Inquiry
HLA-B*40:548 Genomic Plasmid Vector	PHLAG82515323	Plasmid vector containing HLA-B*40:548 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:548 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:548 protein under different cellular conditions.	Inquiry
HLA-B*40:549 Genomic Plasmid Vector	PHLAG82515324	Plasmid vector containing HLA-B*40:549 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:549 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:549 protein under different cellular conditions.	Inquiry
HLA-B*40:55 Genomic Plasmid Vector	PHLAG82515325	Plasmid vector containing HLA-B*40:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:55 protein under different cellular conditions.	Inquiry
HLA-B*40:550 Genomic Plasmid Vector	PHLAG82515326	Plasmid vector containing HLA-B*40:550 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:550 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:550 protein under different cellular conditions.	Inquiry

HLA-B*40:551 Genomic Plasmid Vector	PHLAG82515327	Plasmid vector containing HLA-B*40:551 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:551 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:551 protein under different cellular conditions.	Inquiry
HLA-B*40:552 Genomic Plasmid Vector	PHLAG82515328	Plasmid vector containing HLA-B*40:552 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:552 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:552 protein under different cellular conditions.	Inquiry
HLA-B*40:553 Genomic Plasmid Vector	PHLAG82515329	Plasmid vector containing HLA-B*40:553 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:553 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:553 protein under different cellular conditions.	Inquiry
HLA-B*40:554 Genomic Plasmid Vector	PHLAG82515330	Plasmid vector containing HLA-B*40:554 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:554 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:554 protein under different cellular conditions.	Inquiry
HLA-B*40:555 Genomic Plasmid Vector	PHLAG82515331	Plasmid vector containing HLA-B*40:555 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:555 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:555 protein under different cellular conditions.	Inquiry
HLA-B*40:556 Genomic Plasmid Vector	PHLAG82515332	Plasmid vector containing HLA-B*40:556 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:556 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:556 protein under different cellular conditions.	Inquiry
HLA-B*40:557 Genomic Plasmid Vector	PHLAG82515333	Plasmid vector containing HLA-B*40:557 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:557 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:557 protein under different cellular conditions.	Inquiry
HLA-B*40:558 Genomic Plasmid Vector	PHLAG82515334	Plasmid vector containing HLA-B*40:558 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:558 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:558 protein under different cellular conditions.	Inquiry
HLA-B*40:559 Genomic Plasmid Vector	PHLAG82515335	Plasmid vector containing HLA-B*40:559 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:559 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:559 protein under different cellular conditions.	Inquiry

HLA-B*40:56 Genomic Plasmid Vector	PHLAG82515336	Plasmid vector containing HLA-B*40:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:56 protein under different cellular conditions.	Inquiry
HLA-B*40:560 Genomic Plasmid Vector	PHLAG82515337	Plasmid vector containing HLA-B*40:560 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:560 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:560 protein under different cellular conditions.	Inquiry
HLA-B*40:561 Genomic Plasmid Vector	PHLAG82515338	Plasmid vector containing HLA-B*40:561 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:561 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:561 protein under different cellular conditions.	Inquiry
HLA-B*40:562 Genomic Plasmid Vector	PHLAG82515339	Plasmid vector containing HLA-B*40:562 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:562 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:562 protein under different cellular conditions.	Inquiry
HLA-B*40:563N Genomic Plasmid Vector	PHLAG82515340	Plasmid vector containing HLA-B*40:563N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:563N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:563N protein under different cellular conditions.	Inquiry
HLA-B*40:564 Genomic Plasmid Vector	PHLAG82515341	Plasmid vector containing HLA-B*40:564 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:564 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:564 protein under different cellular conditions.	Inquiry
HLA-B*40:565 Genomic Plasmid Vector	PHLAG82515342	Plasmid vector containing HLA-B*40:565 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:565 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:565 protein under different cellular conditions.	Inquiry
HLA-B*40:566 Genomic Plasmid Vector	PHLAG82515343	Plasmid vector containing HLA-B*40:566 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:566 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:566 protein under different cellular conditions.	Inquiry
HLA-B*40:567 Genomic Plasmid Vector	PHLAG82515344	Plasmid vector containing HLA-B*40:567 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:567 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:567 protein under different cellular conditions.	Inquiry

HLA-B*40:568 Genomic Plasmid Vector	PHLAG82515345	Plasmid vector containing HLA-B*40:568 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:568 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:568 protein under different cellular conditions.	Inquiry
HLA-B*40:569 Genomic Plasmid Vector	PHLAG82515346	Plasmid vector containing HLA-B*40:569 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:569 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:569 protein under different cellular conditions.	Inquiry
HLA-B*40:57 Genomic Plasmid Vector	PHLAG82515347	Plasmid vector containing HLA-B*40:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:57 protein under different cellular conditions.	Inquiry
HLA-B*40:570 Genomic Plasmid Vector	PHLAG82515348	Plasmid vector containing HLA-B*40:570 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:570 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:570 protein under different cellular conditions.	Inquiry
HLA-B*40:571N Genomic Plasmid Vector	PHLAG82515349	Plasmid vector containing HLA-B*40:571N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:571N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:571N protein under different cellular conditions.	Inquiry
HLA-B*40:572 Genomic Plasmid Vector	PHLAG82515350	Plasmid vector containing HLA-B*40:572 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:572 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:572 protein under different cellular conditions.	Inquiry
HLA-B*40:573 Genomic Plasmid Vector	PHLAG82515351	Plasmid vector containing HLA-B*40:573 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:573 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:573 protein under different cellular conditions.	Inquiry
HLA-B*40:574 Genomic Plasmid Vector	PHLAG82515352	Plasmid vector containing HLA-B*40:574 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:574 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:574 protein under different cellular conditions.	Inquiry
HLA-B*40:575 Genomic Plasmid Vector	PHLAG82515353	Plasmid vector containing HLA-B*40:575 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:575 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:575 protein under different cellular conditions.	Inquiry

HLA-B*40:576 Genomic Plasmid Vector	PHLAG82515354	Plasmid vector containing HLA-B*40:576 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:576 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:576 protein under different cellular conditions.	Inquiry
HLA-B*40:577 Genomic Plasmid Vector	PHLAG82515355	Plasmid vector containing HLA-B*40:577 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:577 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:577 protein under different cellular conditions.	Inquiry
HLA-B*40:578 Genomic Plasmid Vector	PHLAG82515356	Plasmid vector containing HLA-B*40:578 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:578 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:578 protein under different cellular conditions.	Inquiry
HLA-B*40:579 Genomic Plasmid Vector	PHLAG82515357	Plasmid vector containing HLA-B*40:579 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:579 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:579 protein under different cellular conditions.	Inquiry
HLA-B*40:58 Genomic Plasmid Vector	PHLAG82515358	Plasmid vector containing HLA-B*40:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:58 protein under different cellular conditions.	Inquiry
HLA-B*40:580 Genomic Plasmid Vector	PHLAG82515359	Plasmid vector containing HLA-B*40:580 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:580 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:580 protein under different cellular conditions.	Inquiry
HLA-B*40:581N Genomic Plasmid Vector	PHLAG82515360	Plasmid vector containing HLA-B*40:581N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:581N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:581N protein under different cellular conditions.	Inquiry
HLA-B*40:582 Genomic Plasmid Vector	PHLAG82515361	Plasmid vector containing HLA-B*40:582 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:582 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:582 protein under different cellular conditions.	Inquiry
HLA-B*40:583 Genomic Plasmid Vector	PHLAG82515362	Plasmid vector containing HLA-B*40:583 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:583 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:583 protein under different cellular conditions.	Inquiry

HLA-B*40:584 Genomic Plasmid Vector	PHLAG82515363	Plasmid vector containing HLA-B*40:584 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:584 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:584 protein under different cellular conditions.	Inquiry
HLA-B*40:585 Genomic Plasmid Vector	PHLAG82515364	Plasmid vector containing HLA-B*40:585 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:585 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:585 protein under different cellular conditions.	Inquiry
HLA-B*40:586 Genomic Plasmid Vector	PHLAG82515365	Plasmid vector containing HLA-B*40:586 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:586 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:586 protein under different cellular conditions.	Inquiry
HLA-B*40:587 Genomic Plasmid Vector	PHLAG82515366	Plasmid vector containing HLA-B*40:587 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:587 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:587 protein under different cellular conditions.	Inquiry
HLA-B*40:588 Genomic Plasmid Vector	PHLAG82515367	Plasmid vector containing HLA-B*40:588 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:588 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:588 protein under different cellular conditions.	Inquiry
HLA-B*40:589 Genomic Plasmid Vector	PHLAG82515368	Plasmid vector containing HLA-B*40:589 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:589 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:589 protein under different cellular conditions.	Inquiry
HLA-B*40:59 Genomic Plasmid Vector	PHLAG82515369	Plasmid vector containing HLA-B*40:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:59 protein under different cellular conditions.	Inquiry
HLA-B*40:590N Genomic Plasmid Vector	PHLAG82515370	Plasmid vector containing HLA-B*40:590N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:590N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:590N protein under different cellular conditions.	Inquiry
HLA-B*40:591 Genomic Plasmid Vector	PHLAG82515371	Plasmid vector containing HLA-B*40:591 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:591 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:591 protein under different cellular conditions.	Inquiry

HLA-B*40:592 Genomic Plasmid Vector	PHLAG8251537 2	Plasmid vector containing HLA-B*40:592 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:592 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:592 protein under different cellular conditions.	Inquiry
HLA-B*40:593 Genomic Plasmid Vector	PHLAG8251537 3	Plasmid vector containing HLA-B*40:593 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:593 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:593 protein under different cellular conditions.	Inquiry
HLA-B*40:594N Genomic Plasmid Vector	PHLAG8251537 4	Plasmid vector containing HLA-B*40:594N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:594N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:594N protein under different cellular conditions.	Inquiry
HLA-B*40:595 Genomic Plasmid Vector	PHLAG8251537 5	Plasmid vector containing HLA-B*40:595 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:595 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:595 protein under different cellular conditions.	Inquiry
HLA-B*40:596:01 Genomic Plasmid Vector	PHLAG8251537 6	Plasmid vector containing HLA-B*40:596:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:596:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:596:01 protein under different cellular conditions.	Inquiry
HLA-B*40:596:02 Genomic Plasmid Vector	PHLAG8251537 7	Plasmid vector containing HLA-B*40:596:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:596:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:596:02 protein under different cellular conditions.	Inquiry
HLA-B*40:597 Genomic Plasmid Vector	PHLAG8251537 8	Plasmid vector containing HLA-B*40:597 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:597 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:597 protein under different cellular conditions.	Inquiry
HLA-B*40:598 Genomic Plasmid Vector	PHLAG8251537 9	Plasmid vector containing HLA-B*40:598 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:598 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:598 protein under different cellular conditions.	Inquiry
HLA-B*40:599 Genomic Plasmid Vector	PHLAG8251538 0	Plasmid vector containing HLA-B*40:599 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:599 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:599 protein under different cellular conditions.	Inquiry

HLA-B*40:60 Genomic Plasmid Vector	PHLAG82515381	Plasmid vector containing HLA-B*40:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:60 protein under different cellular conditions.	Inquiry
HLA-B*40:600Q Genomic Plasmid Vector	PHLAG82515382	Plasmid vector containing HLA-B*40:600Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:600Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:600Q protein under different cellular conditions.	Inquiry
HLA-B*40:601 Genomic Plasmid Vector	PHLAG82515383	Plasmid vector containing HLA-B*40:601 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:601 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:601 protein under different cellular conditions.	Inquiry
HLA-B*40:602 Genomic Plasmid Vector	PHLAG82515384	Plasmid vector containing HLA-B*40:602 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:602 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:602 protein under different cellular conditions.	Inquiry
HLA-B*40:603 Genomic Plasmid Vector	PHLAG82515385	Plasmid vector containing HLA-B*40:603 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:603 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:603 protein under different cellular conditions.	Inquiry
HLA-B*40:604 Genomic Plasmid Vector	PHLAG82515386	Plasmid vector containing HLA-B*40:604 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:604 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:604 protein under different cellular conditions.	Inquiry
HLA-B*40:605 Genomic Plasmid Vector	PHLAG82515387	Plasmid vector containing HLA-B*40:605 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:605 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:605 protein under different cellular conditions.	Inquiry
HLA-B*40:606N Genomic Plasmid Vector	PHLAG82515388	Plasmid vector containing HLA-B*40:606N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:606N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:606N protein under different cellular conditions.	Inquiry
HLA-B*40:607 Genomic Plasmid Vector	PHLAG82515389	Plasmid vector containing HLA-B*40:607 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:607 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:607 protein under different cellular conditions.	Inquiry

HLA-B*40:608 Genomic Plasmid Vector	PHLAG82515390	Plasmid vector containing HLA-B*40:608 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:608 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:608 protein under different cellular conditions.	Inquiry
HLA-B*40:609 Genomic Plasmid Vector	PHLAG82515391	Plasmid vector containing HLA-B*40:609 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:609 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:609 protein under different cellular conditions.	Inquiry
HLA-B*40:61 Genomic Plasmid Vector	PHLAG82515392	Plasmid vector containing HLA-B*40:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:61 protein under different cellular conditions.	Inquiry
HLA-B*40:610 Genomic Plasmid Vector	PHLAG82515393	Plasmid vector containing HLA-B*40:610 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:610 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:610 protein under different cellular conditions.	Inquiry
HLA-B*40:611N Genomic Plasmid Vector	PHLAG82515394	Plasmid vector containing HLA-B*40:611N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:611N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:611N protein under different cellular conditions.	Inquiry
HLA-B*40:612 Genomic Plasmid Vector	PHLAG82515395	Plasmid vector containing HLA-B*40:612 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:612 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:612 protein under different cellular conditions.	Inquiry
HLA-B*40:613 Genomic Plasmid Vector	PHLAG82515396	Plasmid vector containing HLA-B*40:613 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:613 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:613 protein under different cellular conditions.	Inquiry
HLA-B*40:62 Genomic Plasmid Vector	PHLAG82515397	Plasmid vector containing HLA-B*40:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:62 protein under different cellular conditions.	Inquiry
HLA-B*40:63 Genomic Plasmid Vector	PHLAG82515398	Plasmid vector containing HLA-B*40:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:63 protein under different cellular conditions.	Inquiry

HLA-B*40:64:01:01 Genomic Plasmid Vector	PHLAG82515399	Plasmid vector containing HLA-B*40:64:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:64:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:64:01:01 protein under different cellular conditions.	Inquiry
HLA-B*40:64:01:02 Genomic Plasmid Vector	PHLAG82515400	Plasmid vector containing HLA-B*40:64:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:64:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:64:01:02 protein under different cellular conditions.	Inquiry
HLA-B*40:64:02 Genomic Plasmid Vector	PHLAG82515401	Plasmid vector containing HLA-B*40:64:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:64:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:64:02 protein under different cellular conditions.	Inquiry
HLA-B*40:65 Genomic Plasmid Vector	PHLAG82515402	Plasmid vector containing HLA-B*40:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:65 protein under different cellular conditions.	Inquiry
HLA-B*40:66 Genomic Plasmid Vector	PHLAG82515403	Plasmid vector containing HLA-B*40:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:66 protein under different cellular conditions.	Inquiry
HLA-B*40:67 Genomic Plasmid Vector	PHLAG82515404	Plasmid vector containing HLA-B*40:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:67 protein under different cellular conditions.	Inquiry
HLA-B*40:68 Genomic Plasmid Vector	PHLAG82515405	Plasmid vector containing HLA-B*40:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:68 protein under different cellular conditions.	Inquiry
HLA-B*40:69 Genomic Plasmid Vector	PHLAG82515406	Plasmid vector containing HLA-B*40:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:69 protein under different cellular conditions.	Inquiry
HLA-B*40:70:01 Genomic Plasmid Vector	PHLAG82515407	Plasmid vector containing HLA-B*40:70:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:70:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:70:01 protein under different cellular conditions.	Inquiry

HLA-B*40:70:02 Genomic Plasmid Vector	PHLAG82515408	Plasmid vector containing HLA-B*40:70:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:70:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:70:02 protein under different cellular conditions.	Inquiry
HLA-B*40:71 Genomic Plasmid Vector	PHLAG82515409	Plasmid vector containing HLA-B*40:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:71 protein under different cellular conditions.	Inquiry
HLA-B*40:72:01 Genomic Plasmid Vector	PHLAG825154110	Plasmid vector containing HLA-B*40:72:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:72:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:72:01 protein under different cellular conditions.	Inquiry
HLA-B*40:72:02 Genomic Plasmid Vector	PHLAG825154111	Plasmid vector containing HLA-B*40:72:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:72:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:72:02 protein under different cellular conditions.	Inquiry
HLA-B*40:72:03 Genomic Plasmid Vector	PHLAG825154112	Plasmid vector containing HLA-B*40:72:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:72:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:72:03 protein under different cellular conditions.	Inquiry
HLA-B*40:73 Genomic Plasmid Vector	PHLAG825154113	Plasmid vector containing HLA-B*40:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:73 protein under different cellular conditions.	Inquiry
HLA-B*40:74 Genomic Plasmid Vector	PHLAG825154114	Plasmid vector containing HLA-B*40:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:74 protein under different cellular conditions.	Inquiry
HLA-B*40:75 Genomic Plasmid Vector	PHLAG825154115	Plasmid vector containing HLA-B*40:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:75 protein under different cellular conditions.	Inquiry
HLA-B*40:76 Genomic Plasmid Vector	PHLAG825154116	Plasmid vector containing HLA-B*40:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:76 protein under different cellular conditions.	Inquiry

HLA-B*40:77 Genomic Plasmid Vector	PHLAG82515417	Plasmid vector containing HLA-B*40:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:77 protein under different cellular conditions.	Inquiry
HLA-B*40:78 Genomic Plasmid Vector	PHLAG82515418	Plasmid vector containing HLA-B*40:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:78 protein under different cellular conditions.	Inquiry
HLA-B*40:79 Genomic Plasmid Vector	PHLAG82515419	Plasmid vector containing HLA-B*40:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:79 protein under different cellular conditions.	Inquiry
HLA-B*40:80 Genomic Plasmid Vector	PHLAG825154220	Plasmid vector containing HLA-B*40:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:80 protein under different cellular conditions.	Inquiry
HLA-B*40:81 Genomic Plasmid Vector	PHLAG825154221	Plasmid vector containing HLA-B*40:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:81 protein under different cellular conditions.	Inquiry
HLA-B*40:82 Genomic Plasmid Vector	PHLAG825154222	Plasmid vector containing HLA-B*40:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:82 protein under different cellular conditions.	Inquiry
HLA-B*40:83 Genomic Plasmid Vector	PHLAG825154223	Plasmid vector containing HLA-B*40:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:83 protein under different cellular conditions.	Inquiry
HLA-B*40:84 Genomic Plasmid Vector	PHLAG825154224	Plasmid vector containing HLA-B*40:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:84 protein under different cellular conditions.	Inquiry
HLA-B*40:85 Genomic Plasmid Vector	PHLAG825154225	Plasmid vector containing HLA-B*40:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:85 protein under different cellular conditions.	Inquiry

HLA-B*40:86 Genomic Plasmid Vector	PHLAG82515426	Plasmid vector containing HLA-B*40:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:86 protein under different cellular conditions.	Inquiry
HLA-B*40:87:01 Genomic Plasmid Vector	PHLAG82515427	Plasmid vector containing HLA-B*40:87:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:87:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:87:01 protein under different cellular conditions.	Inquiry
HLA-B*40:87:02 Genomic Plasmid Vector	PHLAG82515428	Plasmid vector containing HLA-B*40:87:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:87:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:87:02 protein under different cellular conditions.	Inquiry
HLA-B*40:88 Genomic Plasmid Vector	PHLAG82515429	Plasmid vector containing HLA-B*40:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:88 protein under different cellular conditions.	Inquiry
HLA-B*40:89 Genomic Plasmid Vector	PHLAG82515430	Plasmid vector containing HLA-B*40:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:89 protein under different cellular conditions.	Inquiry
HLA-B*40:90 Genomic Plasmid Vector	PHLAG82515431	Plasmid vector containing HLA-B*40:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:90 protein under different cellular conditions.	Inquiry
HLA-B*40:91 Genomic Plasmid Vector	PHLAG82515432	Plasmid vector containing HLA-B*40:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:91 protein under different cellular conditions.	Inquiry
HLA-B*40:92 Genomic Plasmid Vector	PHLAG82515433	Plasmid vector containing HLA-B*40:92 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:92 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:92 protein under different cellular conditions.	Inquiry
HLA-B*40:93 Genomic Plasmid Vector	PHLAG82515434	Plasmid vector containing HLA-B*40:93 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:93 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:93 protein under different cellular conditions.	Inquiry

HLA-B*40:94 Genomic Plasmid Vector	PHLAG82515435	Plasmid vector containing HLA-B*40:94 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:94 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:94 protein under different cellular conditions.	Inquiry
HLA-B*40:95 Genomic Plasmid Vector	PHLAG82515436	Plasmid vector containing HLA-B*40:95 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:95 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:95 protein under different cellular conditions.	Inquiry
HLA-B*40:96 Genomic Plasmid Vector	PHLAG82515437	Plasmid vector containing HLA-B*40:96 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:96 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:96 protein under different cellular conditions.	Inquiry
HLA-B*40:97 Genomic Plasmid Vector	PHLAG82515438	Plasmid vector containing HLA-B*40:97 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:97 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:97 protein under different cellular conditions.	Inquiry
HLA-B*40:98 Genomic Plasmid Vector	PHLAG82515439	Plasmid vector containing HLA-B*40:98 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:98 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:98 protein under different cellular conditions.	Inquiry
HLA-B*40:99 Genomic Plasmid Vector	PHLAG82515440	Plasmid vector containing HLA-B*40:99 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*40:99 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*40:99 protein under different cellular conditions.	Inquiry
HLA-B*4017 Genomic Plasmid Vector	PHLAG82515441	Plasmid vector containing HLA-B*4017 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*4017 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*4017 protein under different cellular conditions.	Inquiry
HLA-B*4041 Genomic Plasmid Vector	PHLAG82515442	Plasmid vector containing HLA-B*4041 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*4041 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*4041 protein under different cellular conditions.	Inquiry
HLA-B*41:01:01:01 Genomic Plasmid Vector	PHLAG82515443	Plasmid vector containing HLA-B*41:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:01:01 protein under different cellular conditions.	Inquiry

HLA-B*41:01:01:02 Genomic Plasmid Vector	PHLAG82515444	Plasmid vector containing HLA-B*41:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:01:02 protein under different cellular conditions.	Inquiry
HLA-B*41:01:01:03 Genomic Plasmid Vector	PHLAG82515445	Plasmid vector containing HLA-B*41:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:01:03 protein under different cellular conditions.	Inquiry
HLA-B*41:01:01:04 Genomic Plasmid Vector	PHLAG82515446	Plasmid vector containing HLA-B*41:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:01:04 protein under different cellular conditions.	Inquiry
HLA-B*41:01:01:05 Genomic Plasmid Vector	PHLAG82515447	Plasmid vector containing HLA-B*41:01:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:01:05 protein under different cellular conditions.	Inquiry
HLA-B*41:01:01:06 Genomic Plasmid Vector	PHLAG82515448	Plasmid vector containing HLA-B*41:01:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:01:06 protein under different cellular conditions.	Inquiry
HLA-B*41:01:01:07 Genomic Plasmid Vector	PHLAG82515449	Plasmid vector containing HLA-B*41:01:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:01:07 protein under different cellular conditions.	Inquiry
HLA-B*41:01:01:08 Genomic Plasmid Vector	PHLAG82515450	Plasmid vector containing HLA-B*41:01:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:01:08 protein under different cellular conditions.	Inquiry
HLA-B*41:01:01:09 Genomic Plasmid Vector	PHLAG82515451	Plasmid vector containing HLA-B*41:01:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:01:09 protein under different cellular conditions.	Inquiry
HLA-B*41:01:02 Genomic Plasmid Vector	PHLAG82515452	Plasmid vector containing HLA-B*41:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:02 protein under different cellular conditions.	Inquiry

HLA-B*41:01:03 Genomic Plasmid Vector	PHLAG82515453	Plasmid vector containing HLA-B*41:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:03 protein under different cellular conditions.	Inquiry
HLA-B*41:01:04 Genomic Plasmid Vector	PHLAG82515454	Plasmid vector containing HLA-B*41:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:04 protein under different cellular conditions.	Inquiry
HLA-B*41:01:05 Genomic Plasmid Vector	PHLAG82515455	Plasmid vector containing HLA-B*41:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:05 protein under different cellular conditions.	Inquiry
HLA-B*41:01:06 Genomic Plasmid Vector	PHLAG82515456	Plasmid vector containing HLA-B*41:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:06 protein under different cellular conditions.	Inquiry
HLA-B*41:01:07 Genomic Plasmid Vector	PHLAG82515457	Plasmid vector containing HLA-B*41:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:07 protein under different cellular conditions.	Inquiry
HLA-B*41:01:08 Genomic Plasmid Vector	PHLAG82515458	Plasmid vector containing HLA-B*41:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:08 protein under different cellular conditions.	Inquiry
HLA-B*41:01:09 Genomic Plasmid Vector	PHLAG82515459	Plasmid vector containing HLA-B*41:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:09 protein under different cellular conditions.	Inquiry
HLA-B*41:01:10 Genomic Plasmid Vector	PHLAG82515460	Plasmid vector containing HLA-B*41:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:01:10 protein under different cellular conditions.	Inquiry
HLA-B*41:02:01:01 Genomic Plasmid Vector	PHLAG82515461	Plasmid vector containing HLA-B*41:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:01:01 protein under different cellular conditions.	Inquiry

HLA-B*41:02:01:02 Genomic Plasmid Vector	PHLAG82515462	Plasmid vector containing HLA-B*41:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:01:02 protein under different cellular conditions.	Inquiry
HLA-B*41:02:01:03 Genomic Plasmid Vector	PHLAG82515463	Plasmid vector containing HLA-B*41:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:01:03 protein under different cellular conditions.	Inquiry
HLA-B*41:02:01:04 Genomic Plasmid Vector	PHLAG82515464	Plasmid vector containing HLA-B*41:02:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:01:04 protein under different cellular conditions.	Inquiry
HLA-B*41:02:01:05 Genomic Plasmid Vector	PHLAG82515465	Plasmid vector containing HLA-B*41:02:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:01:05 protein under different cellular conditions.	Inquiry
HLA-B*41:02:01:06 Genomic Plasmid Vector	PHLAG82515466	Plasmid vector containing HLA-B*41:02:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:01:06 protein under different cellular conditions.	Inquiry
HLA-B*41:02:01:07 Genomic Plasmid Vector	PHLAG82515467	Plasmid vector containing HLA-B*41:02:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:01:07 protein under different cellular conditions.	Inquiry
HLA-B*41:02:01:08 Genomic Plasmid Vector	PHLAG82515468	Plasmid vector containing HLA-B*41:02:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:01:08 protein under different cellular conditions.	Inquiry
HLA-B*41:02:01:09 Genomic Plasmid Vector	PHLAG82515469	Plasmid vector containing HLA-B*41:02:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:01:09 protein under different cellular conditions.	Inquiry
HLA-B*41:02:01:10 Genomic Plasmid Vector	PHLAG82515470	Plasmid vector containing HLA-B*41:02:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:01:10 protein under different cellular conditions.	Inquiry

HLA-B*41:02:01:11 Genomic Plasmid Vector	PHLAG82515471	Plasmid vector containing HLA-B*41:02:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:01:11 protein under different cellular conditions.	Inquiry
HLA-B*41:02:01:12 Genomic Plasmid Vector	PHLAG82515472	Plasmid vector containing HLA-B*41:02:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:01:12 protein under different cellular conditions.	Inquiry
HLA-B*41:02:02 Genomic Plasmid Vector	PHLAG82515473	Plasmid vector containing HLA-B*41:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:02 protein under different cellular conditions.	Inquiry
HLA-B*41:02:03 Genomic Plasmid Vector	PHLAG82515474	Plasmid vector containing HLA-B*41:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:03 protein under different cellular conditions.	Inquiry
HLA-B*41:02:04 Genomic Plasmid Vector	PHLAG82515475	Plasmid vector containing HLA-B*41:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:04 protein under different cellular conditions.	Inquiry
HLA-B*41:02:05 Genomic Plasmid Vector	PHLAG82515476	Plasmid vector containing HLA-B*41:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:05 protein under different cellular conditions.	Inquiry
HLA-B*41:02:06 Genomic Plasmid Vector	PHLAG82515477	Plasmid vector containing HLA-B*41:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:06 protein under different cellular conditions.	Inquiry
HLA-B*41:02:07 Genomic Plasmid Vector	PHLAG82515478	Plasmid vector containing HLA-B*41:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:07 protein under different cellular conditions.	Inquiry
HLA-B*41:02:08 Genomic Plasmid Vector	PHLAG82515479	Plasmid vector containing HLA-B*41:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:08 protein under different cellular conditions.	Inquiry

HLA-B*41:02:09 Genomic Plasmid Vector	PHLAG82515480	Plasmid vector containing HLA-B*41:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:09 protein under different cellular conditions.	Inquiry
HLA-B*41:02:10 Genomic Plasmid Vector	PHLAG82515481	Plasmid vector containing HLA-B*41:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:10 protein under different cellular conditions.	Inquiry
HLA-B*41:02:11 Genomic Plasmid Vector	PHLAG82515482	Plasmid vector containing HLA-B*41:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:11 protein under different cellular conditions.	Inquiry
HLA-B*41:02:12 Genomic Plasmid Vector	PHLAG82515483	Plasmid vector containing HLA-B*41:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:12 protein under different cellular conditions.	Inquiry
HLA-B*41:02:13 Genomic Plasmid Vector	PHLAG82515484	Plasmid vector containing HLA-B*41:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:02:13 protein under different cellular conditions.	Inquiry
HLA-B*41:03:01 Genomic Plasmid Vector	PHLAG82515485	Plasmid vector containing HLA-B*41:03:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:03:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:03:01 protein under different cellular conditions.	Inquiry
HLA-B*41:03:02 Genomic Plasmid Vector	PHLAG82515486	Plasmid vector containing HLA-B*41:03:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:03:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:03:02 protein under different cellular conditions.	Inquiry
HLA-B*41:04 Genomic Plasmid Vector	PHLAG82515487	Plasmid vector containing HLA-B*41:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:04 protein under different cellular conditions.	Inquiry
HLA-B*41:05 Genomic Plasmid Vector	PHLAG82515488	Plasmid vector containing HLA-B*41:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:05 protein under different cellular conditions.	Inquiry

HLA-B*41:06 Genomic Plasmid Vector	PHLAG82515489	Plasmid vector containing HLA-B*41:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:06 protein under different cellular conditions.	Inquiry
HLA-B*41:07 Genomic Plasmid Vector	PHLAG825154900	Plasmid vector containing HLA-B*41:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:07 protein under different cellular conditions.	Inquiry
HLA-B*41:08 Genomic Plasmid Vector	PHLAG825154911	Plasmid vector containing HLA-B*41:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:08 protein under different cellular conditions.	Inquiry
HLA-B*41:09 Genomic Plasmid Vector	PHLAG825154922	Plasmid vector containing HLA-B*41:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:09 protein under different cellular conditions.	Inquiry
HLA-B*41:10 Genomic Plasmid Vector	PHLAG825154933	Plasmid vector containing HLA-B*41:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:10 protein under different cellular conditions.	Inquiry
HLA-B*41:11 Genomic Plasmid Vector	PHLAG825154944	Plasmid vector containing HLA-B*41:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:11 protein under different cellular conditions.	Inquiry
HLA-B*41:12 Genomic Plasmid Vector	PHLAG825154955	Plasmid vector containing HLA-B*41:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:12 protein under different cellular conditions.	Inquiry
HLA-B*41:13 Genomic Plasmid Vector	PHLAG825154966	Plasmid vector containing HLA-B*41:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:13 protein under different cellular conditions.	Inquiry
HLA-B*41:14 Genomic Plasmid Vector	PHLAG825154977	Plasmid vector containing HLA-B*41:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:14 protein under different cellular conditions.	Inquiry

HLA-B*41:15 Genomic Plasmid Vector	PHLAG82515498	Plasmid vector containing HLA-B*41:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:15 protein under different cellular conditions.	Inquiry
HLA-B*41:16 Genomic Plasmid Vector	PHLAG82515499	Plasmid vector containing HLA-B*41:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:16 protein under different cellular conditions.	Inquiry
HLA-B*41:17 Genomic Plasmid Vector	PHLAG825155000	Plasmid vector containing HLA-B*41:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:17 protein under different cellular conditions.	Inquiry
HLA-B*41:18 Genomic Plasmid Vector	PHLAG825155001	Plasmid vector containing HLA-B*41:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:18 protein under different cellular conditions.	Inquiry
HLA-B*41:19 Genomic Plasmid Vector	PHLAG825155002	Plasmid vector containing HLA-B*41:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:19 protein under different cellular conditions.	Inquiry
HLA-B*41:20 Genomic Plasmid Vector	PHLAG825155003	Plasmid vector containing HLA-B*41:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:20 protein under different cellular conditions.	Inquiry
HLA-B*41:21 Genomic Plasmid Vector	PHLAG825155004	Plasmid vector containing HLA-B*41:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:21 protein under different cellular conditions.	Inquiry
HLA-B*41:22 Genomic Plasmid Vector	PHLAG825155005	Plasmid vector containing HLA-B*41:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:22 protein under different cellular conditions.	Inquiry
HLA-B*41:23 Genomic Plasmid Vector	PHLAG825155006	Plasmid vector containing HLA-B*41:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:23 protein under different cellular conditions.	Inquiry

HLA-B*41:24 Genomic Plasmid Vector	PHLAG82515507	Plasmid vector containing HLA-B*41:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:24 protein under different cellular conditions.	Inquiry
HLA-B*41:25 Genomic Plasmid Vector	PHLAG82515508	Plasmid vector containing HLA-B*41:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:25 protein under different cellular conditions.	Inquiry
HLA-B*41:26 Genomic Plasmid Vector	PHLAG82515509	Plasmid vector containing HLA-B*41:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:26 protein under different cellular conditions.	Inquiry
HLA-B*41:27 Genomic Plasmid Vector	PHLAG82515510	Plasmid vector containing HLA-B*41:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:27 protein under different cellular conditions.	Inquiry
HLA-B*41:28 Genomic Plasmid Vector	PHLAG82515511	Plasmid vector containing HLA-B*41:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:28 protein under different cellular conditions.	Inquiry
HLA-B*41:29 Genomic Plasmid Vector	PHLAG82515512	Plasmid vector containing HLA-B*41:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:29 protein under different cellular conditions.	Inquiry
HLA-B*41:30 Genomic Plasmid Vector	PHLAG82515513	Plasmid vector containing HLA-B*41:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:30 protein under different cellular conditions.	Inquiry
HLA-B*41:31 Genomic Plasmid Vector	PHLAG82515514	Plasmid vector containing HLA-B*41:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:31 protein under different cellular conditions.	Inquiry
HLA-B*41:32 Genomic Plasmid Vector	PHLAG82515515	Plasmid vector containing HLA-B*41:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:32 protein under different cellular conditions.	Inquiry

HLA-B*41:33 Genomic Plasmid Vector	PHLAG82515516	Plasmid vector containing HLA-B*41:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:33 protein under different cellular conditions.	Inquiry
HLA-B*41:34 Genomic Plasmid Vector	PHLAG82515517	Plasmid vector containing HLA-B*41:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:34 protein under different cellular conditions.	Inquiry
HLA-B*41:35 Genomic Plasmid Vector	PHLAG82515518	Plasmid vector containing HLA-B*41:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:35 protein under different cellular conditions.	Inquiry
HLA-B*41:36 Genomic Plasmid Vector	PHLAG82515519	Plasmid vector containing HLA-B*41:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:36 protein under different cellular conditions.	Inquiry
HLA-B*41:37 Genomic Plasmid Vector	PHLAG82515520	Plasmid vector containing HLA-B*41:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:37 protein under different cellular conditions.	Inquiry
HLA-B*41:38 Genomic Plasmid Vector	PHLAG82515521	Plasmid vector containing HLA-B*41:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:38 protein under different cellular conditions.	Inquiry
HLA-B*41:39 Genomic Plasmid Vector	PHLAG82515522	Plasmid vector containing HLA-B*41:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:39 protein under different cellular conditions.	Inquiry
HLA-B*41:40 Genomic Plasmid Vector	PHLAG82515523	Plasmid vector containing HLA-B*41:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:40 protein under different cellular conditions.	Inquiry
HLA-B*41:41 Genomic Plasmid Vector	PHLAG82515524	Plasmid vector containing HLA-B*41:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:41 protein under different cellular conditions.	Inquiry

HLA-B*41:42 Genomic Plasmid Vector	PHLAG82515525	Plasmid vector containing HLA-B*41:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:42 protein under different cellular conditions.	Inquiry
HLA-B*41:43 Genomic Plasmid Vector	PHLAG82515526	Plasmid vector containing HLA-B*41:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:43 protein under different cellular conditions.	Inquiry
HLA-B*41:44 Genomic Plasmid Vector	PHLAG82515527	Plasmid vector containing HLA-B*41:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:44 protein under different cellular conditions.	Inquiry
HLA-B*41:45N Genomic Plasmid Vector	PHLAG82515528	Plasmid vector containing HLA-B*41:45N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:45N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:45N protein under different cellular conditions.	Inquiry
HLA-B*41:46 Genomic Plasmid Vector	PHLAG82515529	Plasmid vector containing HLA-B*41:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:46 protein under different cellular conditions.	Inquiry
HLA-B*41:47 Genomic Plasmid Vector	PHLAG82515530	Plasmid vector containing HLA-B*41:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:47 protein under different cellular conditions.	Inquiry
HLA-B*41:48 Genomic Plasmid Vector	PHLAG82515531	Plasmid vector containing HLA-B*41:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:48 protein under different cellular conditions.	Inquiry
HLA-B*41:49 Genomic Plasmid Vector	PHLAG82515532	Plasmid vector containing HLA-B*41:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:49 protein under different cellular conditions.	Inquiry
HLA-B*41:50 Genomic Plasmid Vector	PHLAG82515533	Plasmid vector containing HLA-B*41:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:50 protein under different cellular conditions.	Inquiry

HLA-B*41:51 Genomic Plasmid Vector	PHLAG82515534	Plasmid vector containing HLA-B*41:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:51 protein under different cellular conditions.	Inquiry
HLA-B*41:52 Genomic Plasmid Vector	PHLAG82515535	Plasmid vector containing HLA-B*41:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:52 protein under different cellular conditions.	Inquiry
HLA-B*41:53 Genomic Plasmid Vector	PHLAG82515536	Plasmid vector containing HLA-B*41:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:53 protein under different cellular conditions.	Inquiry
HLA-B*41:54 Genomic Plasmid Vector	PHLAG82515537	Plasmid vector containing HLA-B*41:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:54 protein under different cellular conditions.	Inquiry
HLA-B*41:55 Genomic Plasmid Vector	PHLAG82515538	Plasmid vector containing HLA-B*41:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:55 protein under different cellular conditions.	Inquiry
HLA-B*41:56Q Genomic Plasmid Vector	PHLAG82515539	Plasmid vector containing HLA-B*41:56Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:56Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:56Q protein under different cellular conditions.	Inquiry
HLA-B*41:57 Genomic Plasmid Vector	PHLAG82515540	Plasmid vector containing HLA-B*41:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:57 protein under different cellular conditions.	Inquiry
HLA-B*41:58 Genomic Plasmid Vector	PHLAG82515541	Plasmid vector containing HLA-B*41:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:58 protein under different cellular conditions.	Inquiry
HLA-B*41:59 Genomic Plasmid Vector	PHLAG82515542	Plasmid vector containing HLA-B*41:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:59 protein under different cellular conditions.	Inquiry

HLA-B*41:60 Genomic Plasmid Vector	PHLAG82515543	Plasmid vector containing HLA-B*41:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:60 protein under different cellular conditions.	Inquiry
HLA-B*41:61 Genomic Plasmid Vector	PHLAG82515544	Plasmid vector containing HLA-B*41:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:61 protein under different cellular conditions.	Inquiry
HLA-B*41:62 Genomic Plasmid Vector	PHLAG82515545	Plasmid vector containing HLA-B*41:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:62 protein under different cellular conditions.	Inquiry
HLA-B*41:63 Genomic Plasmid Vector	PHLAG82515546	Plasmid vector containing HLA-B*41:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:63 protein under different cellular conditions.	Inquiry
HLA-B*41:64 Genomic Plasmid Vector	PHLAG82515547	Plasmid vector containing HLA-B*41:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:64 protein under different cellular conditions.	Inquiry
HLA-B*41:65 Genomic Plasmid Vector	PHLAG82515548	Plasmid vector containing HLA-B*41:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:65 protein under different cellular conditions.	Inquiry
HLA-B*41:66 Genomic Plasmid Vector	PHLAG82515549	Plasmid vector containing HLA-B*41:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:66 protein under different cellular conditions.	Inquiry
HLA-B*41:67 Genomic Plasmid Vector	PHLAG82515550	Plasmid vector containing HLA-B*41:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:67 protein under different cellular conditions.	Inquiry
HLA-B*41:68 Genomic Plasmid Vector	PHLAG82515551	Plasmid vector containing HLA-B*41:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:68 protein under different cellular conditions.	Inquiry

HLA-B*41:69 Genomic Plasmid Vector	PHLAG825155512	Plasmid vector containing HLA-B*41:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:69 protein under different cellular conditions.	Inquiry
HLA-B*41:70 Genomic Plasmid Vector	PHLAG825155513	Plasmid vector containing HLA-B*41:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:70 protein under different cellular conditions.	Inquiry
HLA-B*41:71 Genomic Plasmid Vector	PHLAG825155514	Plasmid vector containing HLA-B*41:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:71 protein under different cellular conditions.	Inquiry
HLA-B*41:72 Genomic Plasmid Vector	PHLAG825155515	Plasmid vector containing HLA-B*41:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:72 protein under different cellular conditions.	Inquiry
HLA-B*41:73 Genomic Plasmid Vector	PHLAG825155516	Plasmid vector containing HLA-B*41:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:73 protein under different cellular conditions.	Inquiry
HLA-B*41:74 Genomic Plasmid Vector	PHLAG825155517	Plasmid vector containing HLA-B*41:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:74 protein under different cellular conditions.	Inquiry
HLA-B*41:75 Genomic Plasmid Vector	PHLAG825155518	Plasmid vector containing HLA-B*41:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:75 protein under different cellular conditions.	Inquiry
HLA-B*41:76 Genomic Plasmid Vector	PHLAG825155519	Plasmid vector containing HLA-B*41:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:76 protein under different cellular conditions.	Inquiry
HLA-B*41:77 Genomic Plasmid Vector	PHLAG825155560	Plasmid vector containing HLA-B*41:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:77 protein under different cellular conditions.	Inquiry

HLA-B*41:78 Genomic Plasmid Vector	PHLAG82515561	Plasmid vector containing HLA-B*41:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:78 protein under different cellular conditions.	Inquiry
HLA-B*41:79 Genomic Plasmid Vector	PHLAG82515562	Plasmid vector containing HLA-B*41:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:79 protein under different cellular conditions.	Inquiry
HLA-B*41:80 Genomic Plasmid Vector	PHLAG82515563	Plasmid vector containing HLA-B*41:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:80 protein under different cellular conditions.	Inquiry
HLA-B*41:81 Genomic Plasmid Vector	PHLAG82515564	Plasmid vector containing HLA-B*41:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:81 protein under different cellular conditions.	Inquiry
HLA-B*41:82 Genomic Plasmid Vector	PHLAG82515565	Plasmid vector containing HLA-B*41:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:82 protein under different cellular conditions.	Inquiry
HLA-B*41:83 Genomic Plasmid Vector	PHLAG82515566	Plasmid vector containing HLA-B*41:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:83 protein under different cellular conditions.	Inquiry
HLA-B*41:84 Genomic Plasmid Vector	PHLAG82515567	Plasmid vector containing HLA-B*41:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:84 protein under different cellular conditions.	Inquiry
HLA-B*41:85 Genomic Plasmid Vector	PHLAG82515568	Plasmid vector containing HLA-B*41:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:85 protein under different cellular conditions.	Inquiry
HLA-B*41:86 Genomic Plasmid Vector	PHLAG82515569	Plasmid vector containing HLA-B*41:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:86 protein under different cellular conditions.	Inquiry

HLA-B*41:87 Genomic Plasmid Vector	PHLAG82515570	Plasmid vector containing HLA-B*41:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:87 protein under different cellular conditions.	Inquiry
HLA-B*41:88 Genomic Plasmid Vector	PHLAG82515571	Plasmid vector containing HLA-B*41:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:88 protein under different cellular conditions.	Inquiry
HLA-B*41:89 Genomic Plasmid Vector	PHLAG82515572	Plasmid vector containing HLA-B*41:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:89 protein under different cellular conditions.	Inquiry
HLA-B*41:90 Genomic Plasmid Vector	PHLAG82515573	Plasmid vector containing HLA-B*41:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*41:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*41:90 protein under different cellular conditions.	Inquiry
HLA-B*42:01:01:01 Genomic Plasmid Vector	PHLAG82515574	Plasmid vector containing HLA-B*42:01:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:01:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:01:01:01 protein under different cellular conditions.	Inquiry
HLA-B*42:01:01:02 Genomic Plasmid Vector	PHLAG82515575	Plasmid vector containing HLA-B*42:01:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:01:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:01:01:02 protein under different cellular conditions.	Inquiry
HLA-B*42:01:01:03 Genomic Plasmid Vector	PHLAG82515576	Plasmid vector containing HLA-B*42:01:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:01:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:01:01:03 protein under different cellular conditions.	Inquiry
HLA-B*42:01:01:04 Genomic Plasmid Vector	PHLAG82515577	Plasmid vector containing HLA-B*42:01:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:01:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:01:01:04 protein under different cellular conditions.	Inquiry
HLA-B*42:01:02 Genomic Plasmid Vector	PHLAG82515578	Plasmid vector containing HLA-B*42:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:01:02 protein under different cellular conditions.	Inquiry

HLA-B*42:01:03 Genomic Plasmid Vector	PHLAG82515579	Plasmid vector containing HLA-B*42:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:01:03 protein under different cellular conditions.	Inquiry
HLA-B*42:01:04 Genomic Plasmid Vector	PHLAG825155580	Plasmid vector containing HLA-B*42:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:01:04 protein under different cellular conditions.	Inquiry
HLA-B*42:01:05 Genomic Plasmid Vector	PHLAG825155581	Plasmid vector containing HLA-B*42:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:01:05 protein under different cellular conditions.	Inquiry
HLA-B*42:01:06 Genomic Plasmid Vector	PHLAG825155582	Plasmid vector containing HLA-B*42:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:01:06 protein under different cellular conditions.	Inquiry
HLA-B*42:01:07 Genomic Plasmid Vector	PHLAG825155583	Plasmid vector containing HLA-B*42:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:01:07 protein under different cellular conditions.	Inquiry
HLA-B*42:01:08 Genomic Plasmid Vector	PHLAG825155584	Plasmid vector containing HLA-B*42:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:01:08 protein under different cellular conditions.	Inquiry
HLA-B*42:01:09 Genomic Plasmid Vector	PHLAG825155585	Plasmid vector containing HLA-B*42:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:01:09 protein under different cellular conditions.	Inquiry
HLA-B*42:02:01:01 Genomic Plasmid Vector	PHLAG825155586	Plasmid vector containing HLA-B*42:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:02:01:01 protein under different cellular conditions.	Inquiry
HLA-B*42:02:01:02 Genomic Plasmid Vector	PHLAG825155587	Plasmid vector containing HLA-B*42:02:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:02:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:02:01:02 protein under different cellular conditions.	Inquiry

HLA-B*42:02:01:03 Genomic Plasmid Vector	PHLAG82515588	Plasmid vector containing HLA-B*42:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:02:01:03 protein under different cellular conditions.	Inquiry
HLA-B*42:02:02 Genomic Plasmid Vector	PHLAG82515589	Plasmid vector containing HLA-B*42:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:02:02 protein under different cellular conditions.	Inquiry
HLA-B*42:04 Genomic Plasmid Vector	PHLAG825155910	Plasmid vector containing HLA-B*42:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:04 protein under different cellular conditions.	Inquiry
HLA-B*42:05:01 Genomic Plasmid Vector	PHLAG825155911	Plasmid vector containing HLA-B*42:05:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:05:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:05:01 protein under different cellular conditions.	Inquiry
HLA-B*42:05:02 Genomic Plasmid Vector	PHLAG825155912	Plasmid vector containing HLA-B*42:05:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:05:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:05:02 protein under different cellular conditions.	Inquiry
HLA-B*42:06 Genomic Plasmid Vector	PHLAG825155913	Plasmid vector containing HLA-B*42:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:06 protein under different cellular conditions.	Inquiry
HLA-B*42:07 Genomic Plasmid Vector	PHLAG825155914	Plasmid vector containing HLA-B*42:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:07 protein under different cellular conditions.	Inquiry
HLA-B*42:08 Genomic Plasmid Vector	PHLAG825155915	Plasmid vector containing HLA-B*42:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:08 protein under different cellular conditions.	Inquiry
HLA-B*42:09 Genomic Plasmid Vector	PHLAG825155916	Plasmid vector containing HLA-B*42:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:09 protein under different cellular conditions.	Inquiry

HLA-B*42:10 Genomic Plasmid Vector	PHLAG82515597	Plasmid vector containing HLA-B*42:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:10 protein under different cellular conditions.	Inquiry
HLA-B*42:11 Genomic Plasmid Vector	PHLAG82515598	Plasmid vector containing HLA-B*42:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:11 protein under different cellular conditions.	Inquiry
HLA-B*42:12 Genomic Plasmid Vector	PHLAG82515599	Plasmid vector containing HLA-B*42:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:12 protein under different cellular conditions.	Inquiry
HLA-B*42:13 Genomic Plasmid Vector	PHLAG825156000	Plasmid vector containing HLA-B*42:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:13 protein under different cellular conditions.	Inquiry
HLA-B*42:14 Genomic Plasmid Vector	PHLAG825156001	Plasmid vector containing HLA-B*42:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:14 protein under different cellular conditions.	Inquiry
HLA-B*42:15 Genomic Plasmid Vector	PHLAG825156002	Plasmid vector containing HLA-B*42:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:15 protein under different cellular conditions.	Inquiry
HLA-B*42:16:01 Genomic Plasmid Vector	PHLAG825156003	Plasmid vector containing HLA-B*42:16:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:16:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:16:01 protein under different cellular conditions.	Inquiry
HLA-B*42:16:02 Genomic Plasmid Vector	PHLAG825156004	Plasmid vector containing HLA-B*42:16:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:16:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:16:02 protein under different cellular conditions.	Inquiry
HLA-B*42:17 Genomic Plasmid Vector	PHLAG825156005	Plasmid vector containing HLA-B*42:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:17 protein under different cellular conditions.	Inquiry

HLA-B*42:18 Genomic Plasmid Vector	PHLAG82515606	Plasmid vector containing HLA-B*42:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:18 protein under different cellular conditions.	Inquiry
HLA-B*42:19 Genomic Plasmid Vector	PHLAG82515607	Plasmid vector containing HLA-B*42:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:19 protein under different cellular conditions.	Inquiry
HLA-B*42:20 Genomic Plasmid Vector	PHLAG82515608	Plasmid vector containing HLA-B*42:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:20 protein under different cellular conditions.	Inquiry
HLA-B*42:21 Genomic Plasmid Vector	PHLAG82515609	Plasmid vector containing HLA-B*42:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:21 protein under different cellular conditions.	Inquiry
HLA-B*42:22 Genomic Plasmid Vector	PHLAG82515610	Plasmid vector containing HLA-B*42:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:22 protein under different cellular conditions.	Inquiry
HLA-B*42:23 Genomic Plasmid Vector	PHLAG82515611	Plasmid vector containing HLA-B*42:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:23 protein under different cellular conditions.	Inquiry
HLA-B*42:24 Genomic Plasmid Vector	PHLAG82515612	Plasmid vector containing HLA-B*42:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:24 protein under different cellular conditions.	Inquiry
HLA-B*42:25 Genomic Plasmid Vector	PHLAG82515613	Plasmid vector containing HLA-B*42:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:25 protein under different cellular conditions.	Inquiry
HLA-B*42:26 Genomic Plasmid Vector	PHLAG82515614	Plasmid vector containing HLA-B*42:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:26 protein under different cellular conditions.	Inquiry

HLA-B*42:27 Genomic Plasmid Vector	PHLAG82515615	Plasmid vector containing HLA-B*42:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:27 protein under different cellular conditions.	Inquiry
HLA-B*42:28 Genomic Plasmid Vector	PHLAG82515616	Plasmid vector containing HLA-B*42:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:28 protein under different cellular conditions.	Inquiry
HLA-B*42:29 Genomic Plasmid Vector	PHLAG82515617	Plasmid vector containing HLA-B*42:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:29 protein under different cellular conditions.	Inquiry
HLA-B*42:30 Genomic Plasmid Vector	PHLAG82515618	Plasmid vector containing HLA-B*42:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:30 protein under different cellular conditions.	Inquiry
HLA-B*42:31 Genomic Plasmid Vector	PHLAG82515619	Plasmid vector containing HLA-B*42:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:31 protein under different cellular conditions.	Inquiry
HLA-B*42:32 Genomic Plasmid Vector	PHLAG82515620	Plasmid vector containing HLA-B*42:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:32 protein under different cellular conditions.	Inquiry
HLA-B*42:33 Genomic Plasmid Vector	PHLAG82515621	Plasmid vector containing HLA-B*42:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:33 protein under different cellular conditions.	Inquiry
HLA-B*42:34 Genomic Plasmid Vector	PHLAG82515622	Plasmid vector containing HLA-B*42:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:34 protein under different cellular conditions.	Inquiry
HLA-B*42:35 Genomic Plasmid Vector	PHLAG82515623	Plasmid vector containing HLA-B*42:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:35 protein under different cellular conditions.	Inquiry

HLA-B*42:36 Genomic Plasmid Vector	PHLAG82515624	Plasmid vector containing HLA-B*42:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:36 protein under different cellular conditions.	Inquiry
HLA-B*42:37 Genomic Plasmid Vector	PHLAG82515625	Plasmid vector containing HLA-B*42:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:37 protein under different cellular conditions.	Inquiry
HLA-B*42:38 Genomic Plasmid Vector	PHLAG82515626	Plasmid vector containing HLA-B*42:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:38 protein under different cellular conditions.	Inquiry
HLA-B*42:39 Genomic Plasmid Vector	PHLAG82515627	Plasmid vector containing HLA-B*42:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:39 protein under different cellular conditions.	Inquiry
HLA-B*42:40 Genomic Plasmid Vector	PHLAG82515628	Plasmid vector containing HLA-B*42:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*42:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*42:40 protein under different cellular conditions.	Inquiry
HLA-B*4203 Genomic Plasmid Vector	PHLAG82515629	Plasmid vector containing HLA-B*4203 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*4203 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*4203 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:01 Genomic Plasmid Vector	PHLAG82515630	Plasmid vector containing HLA-B*44:02:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:01 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:02S Genomic Plasmid Vector	PHLAG82515631	Plasmid vector containing HLA-B*44:02:01:02S genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:02S allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:02S protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:03 Genomic Plasmid Vector	PHLAG82515632	Plasmid vector containing HLA-B*44:02:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:03 protein under different cellular conditions.	Inquiry

HLA-B*44:02:01:04 Genomic Plasmid Vector	PHLAG82515633	Plasmid vector containing HLA-B*44:02:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:04 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:05 Genomic Plasmid Vector	PHLAG82515634	Plasmid vector containing HLA-B*44:02:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:05 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:06 Genomic Plasmid Vector	PHLAG82515635	Plasmid vector containing HLA-B*44:02:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:06 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:07 Genomic Plasmid Vector	PHLAG82515636	Plasmid vector containing HLA-B*44:02:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:07 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:08 Genomic Plasmid Vector	PHLAG82515637	Plasmid vector containing HLA-B*44:02:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:08 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:09 Genomic Plasmid Vector	PHLAG82515638	Plasmid vector containing HLA-B*44:02:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:09 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:10 Genomic Plasmid Vector	PHLAG82515639	Plasmid vector containing HLA-B*44:02:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:10 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:11 Genomic Plasmid Vector	PHLAG825156400	Plasmid vector containing HLA-B*44:02:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:11 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:12 Genomic Plasmid Vector	PHLAG825156401	Plasmid vector containing HLA-B*44:02:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:12 protein under different cellular conditions.	Inquiry

HLA-B*44:02:01:13Q Genomic Plasmid Vector	PHLAG82515642	Plasmid vector containing HLA-B*44:02:01:13Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:13Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:13Q protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:14 Genomic Plasmid Vector	PHLAG82515643	Plasmid vector containing HLA-B*44:02:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:14 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:15 Genomic Plasmid Vector	PHLAG82515644	Plasmid vector containing HLA-B*44:02:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:15 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:16 Genomic Plasmid Vector	PHLAG82515645	Plasmid vector containing HLA-B*44:02:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:16 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:17 Genomic Plasmid Vector	PHLAG82515646	Plasmid vector containing HLA-B*44:02:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:17 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:18 Genomic Plasmid Vector	PHLAG82515647	Plasmid vector containing HLA-B*44:02:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:18 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:19 Genomic Plasmid Vector	PHLAG82515648	Plasmid vector containing HLA-B*44:02:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:19 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:20 Genomic Plasmid Vector	PHLAG82515649	Plasmid vector containing HLA-B*44:02:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:20 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:21 Genomic Plasmid Vector	PHLAG82515650	Plasmid vector containing HLA-B*44:02:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:21 protein under different cellular conditions.	Inquiry

HLA-B*44:02:01:22 Genomic Plasmid Vector	PHLAG82515651	Plasmid vector containing HLA-B*44:02:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:22 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:23 Genomic Plasmid Vector	PHLAG82515652	Plasmid vector containing HLA-B*44:02:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:23 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:24 Genomic Plasmid Vector	PHLAG82515653	Plasmid vector containing HLA-B*44:02:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:24 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:25 Genomic Plasmid Vector	PHLAG82515654	Plasmid vector containing HLA-B*44:02:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:25 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:26 Genomic Plasmid Vector	PHLAG82515655	Plasmid vector containing HLA-B*44:02:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:26 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:27 Genomic Plasmid Vector	PHLAG82515656	Plasmid vector containing HLA-B*44:02:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:27 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:28 Genomic Plasmid Vector	PHLAG82515657	Plasmid vector containing HLA-B*44:02:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:28 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:29 Genomic Plasmid Vector	PHLAG82515658	Plasmid vector containing HLA-B*44:02:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:29 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:30 Genomic Plasmid Vector	PHLAG82515659	Plasmid vector containing HLA-B*44:02:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:30 protein under different cellular conditions.	Inquiry

HLA-B*44:02:01:31 Genomic Plasmid Vector	PHLAG82515660	Plasmid vector containing HLA-B*44:02:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:31 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:32 Genomic Plasmid Vector	PHLAG82515661	Plasmid vector containing HLA-B*44:02:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:32 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:33 Genomic Plasmid Vector	PHLAG82515662	Plasmid vector containing HLA-B*44:02:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:33 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:34 Genomic Plasmid Vector	PHLAG82515663	Plasmid vector containing HLA-B*44:02:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:34 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:35 Genomic Plasmid Vector	PHLAG82515664	Plasmid vector containing HLA-B*44:02:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:35 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:36 Genomic Plasmid Vector	PHLAG82515665	Plasmid vector containing HLA-B*44:02:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:36 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:37 Genomic Plasmid Vector	PHLAG82515666	Plasmid vector containing HLA-B*44:02:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:37 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:38 Genomic Plasmid Vector	PHLAG82515667	Plasmid vector containing HLA-B*44:02:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:38 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:39 Genomic Plasmid Vector	PHLAG82515668	Plasmid vector containing HLA-B*44:02:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:39 protein under different cellular conditions.	Inquiry

HLA-B*44:02:01:40 Genomic Plasmid Vector	PHLAG82515669	Plasmid vector containing HLA-B*44:02:01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:40 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:41 Genomic Plasmid Vector	PHLAG825156670	Plasmid vector containing HLA-B*44:02:01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:41 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:42 Genomic Plasmid Vector	PHLAG825156671	Plasmid vector containing HLA-B*44:02:01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:42 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:43 Genomic Plasmid Vector	PHLAG825156672	Plasmid vector containing HLA-B*44:02:01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:43 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:44 Genomic Plasmid Vector	PHLAG825156673	Plasmid vector containing HLA-B*44:02:01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:44 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:45 Genomic Plasmid Vector	PHLAG825156674	Plasmid vector containing HLA-B*44:02:01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:45 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:46 Genomic Plasmid Vector	PHLAG825156675	Plasmid vector containing HLA-B*44:02:01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:46 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:47 Genomic Plasmid Vector	PHLAG825156676	Plasmid vector containing HLA-B*44:02:01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:47 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:48 Genomic Plasmid Vector	PHLAG825156677	Plasmid vector containing HLA-B*44:02:01:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:48 protein under different cellular conditions.	Inquiry

HLA-B*44:02:01:49 Genomic Plasmid Vector	PHLAG82515678	Plasmid vector containing HLA-B*44:02:01:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:49 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:50 Genomic Plasmid Vector	PHLAG82515679	Plasmid vector containing HLA-B*44:02:01:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:50 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:51 Genomic Plasmid Vector	PHLAG825156810	Plasmid vector containing HLA-B*44:02:01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:51 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:52 Genomic Plasmid Vector	PHLAG825156811	Plasmid vector containing HLA-B*44:02:01:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:52 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:53 Genomic Plasmid Vector	PHLAG825156812	Plasmid vector containing HLA-B*44:02:01:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:53 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:54 Genomic Plasmid Vector	PHLAG825156813	Plasmid vector containing HLA-B*44:02:01:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:54 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:55 Genomic Plasmid Vector	PHLAG825156814	Plasmid vector containing HLA-B*44:02:01:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:55 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:56 Genomic Plasmid Vector	PHLAG825156815	Plasmid vector containing HLA-B*44:02:01:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:56 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:57 Genomic Plasmid Vector	PHLAG825156816	Plasmid vector containing HLA-B*44:02:01:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:57 protein under different cellular conditions.	Inquiry

HLA-B*44:02:01:58 Genomic Plasmid Vector	PHLAG82515687	Plasmid vector containing HLA-B*44:02:01:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:58 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:59 Genomic Plasmid Vector	PHLAG82515688	Plasmid vector containing HLA-B*44:02:01:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:59 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:60 Genomic Plasmid Vector	PHLAG82515689	Plasmid vector containing HLA-B*44:02:01:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:60 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:61 Genomic Plasmid Vector	PHLAG825156910	Plasmid vector containing HLA-B*44:02:01:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:61 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:62 Genomic Plasmid Vector	PHLAG825156911	Plasmid vector containing HLA-B*44:02:01:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:62 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:63 Genomic Plasmid Vector	PHLAG825156912	Plasmid vector containing HLA-B*44:02:01:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:63 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:64 Genomic Plasmid Vector	PHLAG825156913	Plasmid vector containing HLA-B*44:02:01:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:64 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:65 Genomic Plasmid Vector	PHLAG825156914	Plasmid vector containing HLA-B*44:02:01:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:65 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:66 Genomic Plasmid Vector	PHLAG825156915	Plasmid vector containing HLA-B*44:02:01:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:66 protein under different cellular conditions.	Inquiry

HLA-B*44:02:01:67 Genomic Plasmid Vector	PHLAG82515696	Plasmid vector containing HLA-B*44:02:01:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:67 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:68 Genomic Plasmid Vector	PHLAG82515697	Plasmid vector containing HLA-B*44:02:01:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:68 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:69 Genomic Plasmid Vector	PHLAG82515698	Plasmid vector containing HLA-B*44:02:01:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:69 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:70 Genomic Plasmid Vector	PHLAG82515699	Plasmid vector containing HLA-B*44:02:01:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:70 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:71 Genomic Plasmid Vector	PHLAG825157000	Plasmid vector containing HLA-B*44:02:01:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:71 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:72 Genomic Plasmid Vector	PHLAG825157001	Plasmid vector containing HLA-B*44:02:01:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:72 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:73 Genomic Plasmid Vector	PHLAG825157002	Plasmid vector containing HLA-B*44:02:01:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:73 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:74 Genomic Plasmid Vector	PHLAG825157003	Plasmid vector containing HLA-B*44:02:01:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:74 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:75 Genomic Plasmid Vector	PHLAG825157004	Plasmid vector containing HLA-B*44:02:01:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:75 protein under different cellular conditions.	Inquiry

HLA-B*44:02:01:76 Genomic Plasmid Vector	PHLAG82515705	Plasmid vector containing HLA-B*44:02:01:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:76 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:77 Genomic Plasmid Vector	PHLAG82515706	Plasmid vector containing HLA-B*44:02:01:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:77 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:78 Genomic Plasmid Vector	PHLAG82515707	Plasmid vector containing HLA-B*44:02:01:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:78 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:79 Genomic Plasmid Vector	PHLAG82515708	Plasmid vector containing HLA-B*44:02:01:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:79 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:80 Genomic Plasmid Vector	PHLAG82515709	Plasmid vector containing HLA-B*44:02:01:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:80 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:81 Genomic Plasmid Vector	PHLAG825157110	Plasmid vector containing HLA-B*44:02:01:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:81 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:82 Genomic Plasmid Vector	PHLAG825157111	Plasmid vector containing HLA-B*44:02:01:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:82 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:83 Genomic Plasmid Vector	PHLAG825157112	Plasmid vector containing HLA-B*44:02:01:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:83 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:84 Genomic Plasmid Vector	PHLAG825157113	Plasmid vector containing HLA-B*44:02:01:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:84 protein under different cellular conditions.	Inquiry

HLA-B*44:02:01:85 Genomic Plasmid Vector	PHLAG82515714	Plasmid vector containing HLA-B*44:02:01:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:85 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:86 Genomic Plasmid Vector	PHLAG82515715	Plasmid vector containing HLA-B*44:02:01:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:86 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:87 Genomic Plasmid Vector	PHLAG82515716	Plasmid vector containing HLA-B*44:02:01:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:87 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:88 Genomic Plasmid Vector	PHLAG82515717	Plasmid vector containing HLA-B*44:02:01:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:88 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:89 Genomic Plasmid Vector	PHLAG82515718	Plasmid vector containing HLA-B*44:02:01:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:89 protein under different cellular conditions.	Inquiry
HLA-B*44:02:01:90 Genomic Plasmid Vector	PHLAG82515719	Plasmid vector containing HLA-B*44:02:01:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:01:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:01:90 protein under different cellular conditions.	Inquiry
HLA-B*44:02:02 Genomic Plasmid Vector	PHLAG82515720	Plasmid vector containing HLA-B*44:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:02 protein under different cellular conditions.	Inquiry
HLA-B*44:02:03 Genomic Plasmid Vector	PHLAG82515721	Plasmid vector containing HLA-B*44:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:03 protein under different cellular conditions.	Inquiry
HLA-B*44:02:04 Genomic Plasmid Vector	PHLAG82515722	Plasmid vector containing HLA-B*44:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:04 protein under different cellular conditions.	Inquiry

HLA-B*44:02:05 Genomic Plasmid Vector	PHLAG82515723	Plasmid vector containing HLA-B*44:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:05 protein under different cellular conditions.	Inquiry
HLA-B*44:02:06 Genomic Plasmid Vector	PHLAG82515724	Plasmid vector containing HLA-B*44:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:06 protein under different cellular conditions.	Inquiry
HLA-B*44:02:07 Genomic Plasmid Vector	PHLAG82515725	Plasmid vector containing HLA-B*44:02:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:07 protein under different cellular conditions.	Inquiry
HLA-B*44:02:08 Genomic Plasmid Vector	PHLAG82515726	Plasmid vector containing HLA-B*44:02:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:08 protein under different cellular conditions.	Inquiry
HLA-B*44:02:09 Genomic Plasmid Vector	PHLAG82515727	Plasmid vector containing HLA-B*44:02:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:09 protein under different cellular conditions.	Inquiry
HLA-B*44:02:10 Genomic Plasmid Vector	PHLAG82515728	Plasmid vector containing HLA-B*44:02:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:10 protein under different cellular conditions.	Inquiry
HLA-B*44:02:11 Genomic Plasmid Vector	PHLAG82515729	Plasmid vector containing HLA-B*44:02:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:11 protein under different cellular conditions.	Inquiry
HLA-B*44:02:12 Genomic Plasmid Vector	PHLAG82515730	Plasmid vector containing HLA-B*44:02:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:12 protein under different cellular conditions.	Inquiry
HLA-B*44:02:13 Genomic Plasmid Vector	PHLAG82515731	Plasmid vector containing HLA-B*44:02:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:13 protein under different cellular conditions.	Inquiry

HLA-B*44:02:14 Genomic Plasmid Vector	PHLAG82515732	Plasmid vector containing HLA-B*44:02:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:14 protein under different cellular conditions.	Inquiry
HLA-B*44:02:15 Genomic Plasmid Vector	PHLAG82515733	Plasmid vector containing HLA-B*44:02:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:15 protein under different cellular conditions.	Inquiry
HLA-B*44:02:16 Genomic Plasmid Vector	PHLAG82515734	Plasmid vector containing HLA-B*44:02:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:16 protein under different cellular conditions.	Inquiry
HLA-B*44:02:17 Genomic Plasmid Vector	PHLAG82515735	Plasmid vector containing HLA-B*44:02:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:17 protein under different cellular conditions.	Inquiry
HLA-B*44:02:18 Genomic Plasmid Vector	PHLAG82515736	Plasmid vector containing HLA-B*44:02:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:18 protein under different cellular conditions.	Inquiry
HLA-B*44:02:19 Genomic Plasmid Vector	PHLAG82515737	Plasmid vector containing HLA-B*44:02:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:19 protein under different cellular conditions.	Inquiry
HLA-B*44:02:20 Genomic Plasmid Vector	PHLAG82515738	Plasmid vector containing HLA-B*44:02:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:20 protein under different cellular conditions.	Inquiry
HLA-B*44:02:21 Genomic Plasmid Vector	PHLAG82515739	Plasmid vector containing HLA-B*44:02:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:21 protein under different cellular conditions.	Inquiry
HLA-B*44:02:21 Genomic Plasmid Vector	PHLAG82515740	Plasmid vector containing HLA-B*44:02:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:21 protein under different cellular conditions.	Inquiry

HLA-B*44:02:22 Genomic Plasmid Vector	PHLAG82515741	Plasmid vector containing HLA-B*44:02:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:22 protein under different cellular conditions.	Inquiry
HLA-B*44:02:23 Genomic Plasmid Vector	PHLAG82515742	Plasmid vector containing HLA-B*44:02:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:23 protein under different cellular conditions.	Inquiry
HLA-B*44:02:24 Genomic Plasmid Vector	PHLAG82515743	Plasmid vector containing HLA-B*44:02:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:24 protein under different cellular conditions.	Inquiry
HLA-B*44:02:25 Genomic Plasmid Vector	PHLAG82515744	Plasmid vector containing HLA-B*44:02:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:25 protein under different cellular conditions.	Inquiry
HLA-B*44:02:26 Genomic Plasmid Vector	PHLAG82515745	Plasmid vector containing HLA-B*44:02:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:26 protein under different cellular conditions.	Inquiry
HLA-B*44:02:27 Genomic Plasmid Vector	PHLAG82515746	Plasmid vector containing HLA-B*44:02:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:27 protein under different cellular conditions.	Inquiry
HLA-B*44:02:28 Genomic Plasmid Vector	PHLAG82515747	Plasmid vector containing HLA-B*44:02:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:28 protein under different cellular conditions.	Inquiry
HLA-B*44:02:29 Genomic Plasmid Vector	PHLAG82515748	Plasmid vector containing HLA-B*44:02:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:29 protein under different cellular conditions.	Inquiry
HLA-B*44:02:30 Genomic Plasmid Vector	PHLAG82515749	Plasmid vector containing HLA-B*44:02:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:30 protein under different cellular conditions.	Inquiry

HLA-B*44:02:31 Genomic Plasmid Vector	PHLAG82515750	Plasmid vector containing HLA-B*44:02:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:31 protein under different cellular conditions.	Inquiry
HLA-B*44:02:32 Genomic Plasmid Vector	PHLAG82515751	Plasmid vector containing HLA-B*44:02:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:32 protein under different cellular conditions.	Inquiry
HLA-B*44:02:33 Genomic Plasmid Vector	PHLAG82515752	Plasmid vector containing HLA-B*44:02:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:33 protein under different cellular conditions.	Inquiry
HLA-B*44:02:34 Genomic Plasmid Vector	PHLAG82515753	Plasmid vector containing HLA-B*44:02:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:34 protein under different cellular conditions.	Inquiry
HLA-B*44:02:35 Genomic Plasmid Vector	PHLAG82515754	Plasmid vector containing HLA-B*44:02:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:35 protein under different cellular conditions.	Inquiry
HLA-B*44:02:36 Genomic Plasmid Vector	PHLAG82515755	Plasmid vector containing HLA-B*44:02:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:36 protein under different cellular conditions.	Inquiry
HLA-B*44:02:37 Genomic Plasmid Vector	PHLAG82515756	Plasmid vector containing HLA-B*44:02:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:37 protein under different cellular conditions.	Inquiry
HLA-B*44:02:38 Genomic Plasmid Vector	PHLAG82515757	Plasmid vector containing HLA-B*44:02:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:38 protein under different cellular conditions.	Inquiry
HLA-B*44:02:39 Genomic Plasmid Vector	PHLAG82515758	Plasmid vector containing HLA-B*44:02:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:39 protein under different cellular conditions.	Inquiry

HLA-B*44:02:40 Genomic Plasmid Vector	PHLAG82515759	Plasmid vector containing HLA-B*44:02:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:40 protein under different cellular conditions.	Inquiry
HLA-B*44:02:41 Genomic Plasmid Vector	PHLAG825157600	Plasmid vector containing HLA-B*44:02:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:41 protein under different cellular conditions.	Inquiry
HLA-B*44:02:42 Genomic Plasmid Vector	PHLAG825157601	Plasmid vector containing HLA-B*44:02:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:42 protein under different cellular conditions.	Inquiry
HLA-B*44:02:43 Genomic Plasmid Vector	PHLAG825157602	Plasmid vector containing HLA-B*44:02:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:43 protein under different cellular conditions.	Inquiry
HLA-B*44:02:44 Genomic Plasmid Vector	PHLAG825157603	Plasmid vector containing HLA-B*44:02:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:44 protein under different cellular conditions.	Inquiry
HLA-B*44:02:45 Genomic Plasmid Vector	PHLAG825157604	Plasmid vector containing HLA-B*44:02:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:45 protein under different cellular conditions.	Inquiry
HLA-B*44:02:46 Genomic Plasmid Vector	PHLAG825157605	Plasmid vector containing HLA-B*44:02:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:46 protein under different cellular conditions.	Inquiry
HLA-B*44:02:47 Genomic Plasmid Vector	PHLAG825157606	Plasmid vector containing HLA-B*44:02:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:47 protein under different cellular conditions.	Inquiry
HLA-B*44:02:48 Genomic Plasmid Vector	PHLAG825157607	Plasmid vector containing HLA-B*44:02:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:48 protein under different cellular conditions.	Inquiry

HLA-B*44:02:49:01 Genomic Plasmid Vector	PHLAG82515768	Plasmid vector containing HLA-B*44:02:49:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:49:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:49:01 protein under different cellular conditions.	Inquiry
HLA-B*44:02:49:02 Genomic Plasmid Vector	PHLAG82515769	Plasmid vector containing HLA-B*44:02:49:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:49:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:49:02 protein under different cellular conditions.	Inquiry
HLA-B*44:02:50 Genomic Plasmid Vector	PHLAG825157770	Plasmid vector containing HLA-B*44:02:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:50 protein under different cellular conditions.	Inquiry
HLA-B*44:02:51 Genomic Plasmid Vector	PHLAG825157771	Plasmid vector containing HLA-B*44:02:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:51 protein under different cellular conditions.	Inquiry
HLA-B*44:02:52 Genomic Plasmid Vector	PHLAG825157772	Plasmid vector containing HLA-B*44:02:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:52 protein under different cellular conditions.	Inquiry
HLA-B*44:02:53 Genomic Plasmid Vector	PHLAG825157773	Plasmid vector containing HLA-B*44:02:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:53 protein under different cellular conditions.	Inquiry
HLA-B*44:02:54 Genomic Plasmid Vector	PHLAG825157774	Plasmid vector containing HLA-B*44:02:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:54 protein under different cellular conditions.	Inquiry
HLA-B*44:02:55 Genomic Plasmid Vector	PHLAG825157775	Plasmid vector containing HLA-B*44:02:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:55 protein under different cellular conditions.	Inquiry
HLA-B*44:02:56 Genomic Plasmid Vector	PHLAG825157776	Plasmid vector containing HLA-B*44:02:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:56 protein under different cellular conditions.	Inquiry

HLA-B*44:02:57 Genomic Plasmid Vector	PHLAG82515777	Plasmid vector containing HLA-B*44:02:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:57 protein under different cellular conditions.	Inquiry
HLA-B*44:02:58 Genomic Plasmid Vector	PHLAG82515778	Plasmid vector containing HLA-B*44:02:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:58 protein under different cellular conditions.	Inquiry
HLA-B*44:02:59 Genomic Plasmid Vector	PHLAG82515779	Plasmid vector containing HLA-B*44:02:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:59 protein under different cellular conditions.	Inquiry
HLA-B*44:02:60 Genomic Plasmid Vector	PHLAG82515780	Plasmid vector containing HLA-B*44:02:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:60 protein under different cellular conditions.	Inquiry
HLA-B*44:02:61 Genomic Plasmid Vector	PHLAG82515781	Plasmid vector containing HLA-B*44:02:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:61 protein under different cellular conditions.	Inquiry
HLA-B*44:02:62 Genomic Plasmid Vector	PHLAG82515782	Plasmid vector containing HLA-B*44:02:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:62 protein under different cellular conditions.	Inquiry
HLA-B*44:02:63 Genomic Plasmid Vector	PHLAG82515783	Plasmid vector containing HLA-B*44:02:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:63 protein under different cellular conditions.	Inquiry
HLA-B*44:02:64 Genomic Plasmid Vector	PHLAG82515784	Plasmid vector containing HLA-B*44:02:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:64 protein under different cellular conditions.	Inquiry
HLA-B*44:02:65 Genomic Plasmid Vector	PHLAG82515785	Plasmid vector containing HLA-B*44:02:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:65 protein under different cellular conditions.	Inquiry

HLA-B*44:02:66 Genomic Plasmid Vector	PHLAG82515786	Plasmid vector containing HLA-B*44:02:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:66 protein under different cellular conditions.	Inquiry
HLA-B*44:02:67 Genomic Plasmid Vector	PHLAG82515787	Plasmid vector containing HLA-B*44:02:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:67 protein under different cellular conditions.	Inquiry
HLA-B*44:02:68 Genomic Plasmid Vector	PHLAG82515788	Plasmid vector containing HLA-B*44:02:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:68 protein under different cellular conditions.	Inquiry
HLA-B*44:02:69 Genomic Plasmid Vector	PHLAG82515789	Plasmid vector containing HLA-B*44:02:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:69 protein under different cellular conditions.	Inquiry
HLA-B*44:02:70 Genomic Plasmid Vector	PHLAG82515790	Plasmid vector containing HLA-B*44:02:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:70 protein under different cellular conditions.	Inquiry
HLA-B*44:02:71 Genomic Plasmid Vector	PHLAG82515791	Plasmid vector containing HLA-B*44:02:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:71 protein under different cellular conditions.	Inquiry
HLA-B*44:02:72 Genomic Plasmid Vector	PHLAG82515792	Plasmid vector containing HLA-B*44:02:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:72 protein under different cellular conditions.	Inquiry
HLA-B*44:02:73 Genomic Plasmid Vector	PHLAG82515793	Plasmid vector containing HLA-B*44:02:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:73 protein under different cellular conditions.	Inquiry
HLA-B*44:02:74 Genomic Plasmid Vector	PHLAG82515794	Plasmid vector containing HLA-B*44:02:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:74 protein under different cellular conditions.	Inquiry

HLA-B*44:02:75 Genomic Plasmid Vector	PHLAG82515795	Plasmid vector containing HLA-B*44:02:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:75 protein under different cellular conditions.	Inquiry
HLA-B*44:02:76 Genomic Plasmid Vector	PHLAG82515796	Plasmid vector containing HLA-B*44:02:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:76 protein under different cellular conditions.	Inquiry
HLA-B*44:02:77 Genomic Plasmid Vector	PHLAG82515797	Plasmid vector containing HLA-B*44:02:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:77 protein under different cellular conditions.	Inquiry
HLA-B*44:02:78 Genomic Plasmid Vector	PHLAG82515798	Plasmid vector containing HLA-B*44:02:78 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:78 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:78 protein under different cellular conditions.	Inquiry
HLA-B*44:02:79 Genomic Plasmid Vector	PHLAG82515799	Plasmid vector containing HLA-B*44:02:79 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:79 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:79 protein under different cellular conditions.	Inquiry
HLA-B*44:02:80 Genomic Plasmid Vector	PHLAG825158000	Plasmid vector containing HLA-B*44:02:80 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:80 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:80 protein under different cellular conditions.	Inquiry
HLA-B*44:02:81 Genomic Plasmid Vector	PHLAG825158001	Plasmid vector containing HLA-B*44:02:81 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:81 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:81 protein under different cellular conditions.	Inquiry
HLA-B*44:02:82 Genomic Plasmid Vector	PHLAG825158002	Plasmid vector containing HLA-B*44:02:82 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:82 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:82 protein under different cellular conditions.	Inquiry
HLA-B*44:02:83 Genomic Plasmid Vector	PHLAG825158003	Plasmid vector containing HLA-B*44:02:83 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:83 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:83 protein under different cellular conditions.	Inquiry

HLA-B*44:02:84 Genomic Plasmid Vector	PHLAG82515804	Plasmid vector containing HLA-B*44:02:84 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:84 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:84 protein under different cellular conditions.	Inquiry
HLA-B*44:02:85 Genomic Plasmid Vector	PHLAG82515805	Plasmid vector containing HLA-B*44:02:85 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:85 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:85 protein under different cellular conditions.	Inquiry
HLA-B*44:02:86 Genomic Plasmid Vector	PHLAG82515806	Plasmid vector containing HLA-B*44:02:86 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:86 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:86 protein under different cellular conditions.	Inquiry
HLA-B*44:02:87 Genomic Plasmid Vector	PHLAG82515807	Plasmid vector containing HLA-B*44:02:87 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:87 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:87 protein under different cellular conditions.	Inquiry
HLA-B*44:02:88 Genomic Plasmid Vector	PHLAG82515808	Plasmid vector containing HLA-B*44:02:88 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:88 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:88 protein under different cellular conditions.	Inquiry
HLA-B*44:02:89 Genomic Plasmid Vector	PHLAG82515809	Plasmid vector containing HLA-B*44:02:89 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:89 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:89 protein under different cellular conditions.	Inquiry
HLA-B*44:02:90 Genomic Plasmid Vector	PHLAG825158110	Plasmid vector containing HLA-B*44:02:90 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:90 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:90 protein under different cellular conditions.	Inquiry
HLA-B*44:02:91 Genomic Plasmid Vector	PHLAG825158111	Plasmid vector containing HLA-B*44:02:91 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:02:91 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:02:91 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:01 Genomic Plasmid Vector	PHLAG825158112	Plasmid vector containing HLA-B*44:03:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:01 protein under different cellular conditions.	Inquiry

HLA-B*44:03:01:02 Genomic Plasmid Vector	PHLAG82515813	Plasmid vector containing HLA-B*44:03:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:02 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:03 Genomic Plasmid Vector	PHLAG82515814	Plasmid vector containing HLA-B*44:03:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:03 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:04 Genomic Plasmid Vector	PHLAG82515815	Plasmid vector containing HLA-B*44:03:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:04 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:05 Genomic Plasmid Vector	PHLAG82515816	Plasmid vector containing HLA-B*44:03:01:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:05 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:06 Genomic Plasmid Vector	PHLAG82515817	Plasmid vector containing HLA-B*44:03:01:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:06 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:07 Genomic Plasmid Vector	PHLAG82515818	Plasmid vector containing HLA-B*44:03:01:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:07 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:08 Genomic Plasmid Vector	PHLAG82515819	Plasmid vector containing HLA-B*44:03:01:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:08 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:09 Genomic Plasmid Vector	PHLAG82515820	Plasmid vector containing HLA-B*44:03:01:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:09 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:10 Genomic Plasmid Vector	PHLAG82515821	Plasmid vector containing HLA-B*44:03:01:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:10 protein under different cellular conditions.	Inquiry

HLA-B*44:03:01:11 Genomic Plasmid Vector	PHLAG82515822	Plasmid vector containing HLA-B*44:03:01:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:11 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:12 Genomic Plasmid Vector	PHLAG82515823	Plasmid vector containing HLA-B*44:03:01:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:12 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:13 Genomic Plasmid Vector	PHLAG82515824	Plasmid vector containing HLA-B*44:03:01:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:13 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:14 Genomic Plasmid Vector	PHLAG82515825	Plasmid vector containing HLA-B*44:03:01:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:14 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:15 Genomic Plasmid Vector	PHLAG82515826	Plasmid vector containing HLA-B*44:03:01:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:15 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:16 Genomic Plasmid Vector	PHLAG82515827	Plasmid vector containing HLA-B*44:03:01:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:16 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:17 Genomic Plasmid Vector	PHLAG82515828	Plasmid vector containing HLA-B*44:03:01:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:17 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:18 Genomic Plasmid Vector	PHLAG82515829	Plasmid vector containing HLA-B*44:03:01:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:18 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:19 Genomic Plasmid Vector	PHLAG82515830	Plasmid vector containing HLA-B*44:03:01:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:19 protein under different cellular conditions.	Inquiry

HLA-B*44:03:01:20 Genomic Plasmid Vector	PHLAG82515831	Plasmid vector containing HLA-B*44:03:01:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:20 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:21 Genomic Plasmid Vector	PHLAG82515832	Plasmid vector containing HLA-B*44:03:01:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:21 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:22 Genomic Plasmid Vector	PHLAG82515833	Plasmid vector containing HLA-B*44:03:01:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:22 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:23 Genomic Plasmid Vector	PHLAG82515834	Plasmid vector containing HLA-B*44:03:01:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:23 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:24 Genomic Plasmid Vector	PHLAG82515835	Plasmid vector containing HLA-B*44:03:01:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:24 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:25 Genomic Plasmid Vector	PHLAG82515836	Plasmid vector containing HLA-B*44:03:01:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:25 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:26 Genomic Plasmid Vector	PHLAG82515837	Plasmid vector containing HLA-B*44:03:01:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:26 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:27 Genomic Plasmid Vector	PHLAG82515838	Plasmid vector containing HLA-B*44:03:01:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:27 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:28 Genomic Plasmid Vector	PHLAG82515839	Plasmid vector containing HLA-B*44:03:01:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:28 protein under different cellular conditions.	Inquiry

HLA-B*44:03:01:29 Genomic Plasmid Vector	PHLAG82515840	Plasmid vector containing HLA-B*44:03:01:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:29 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:30 Genomic Plasmid Vector	PHLAG82515841	Plasmid vector containing HLA-B*44:03:01:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:30 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:31 Genomic Plasmid Vector	PHLAG82515842	Plasmid vector containing HLA-B*44:03:01:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:31 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:32 Genomic Plasmid Vector	PHLAG82515843	Plasmid vector containing HLA-B*44:03:01:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:32 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:33 Genomic Plasmid Vector	PHLAG82515844	Plasmid vector containing HLA-B*44:03:01:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:33 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:34 Genomic Plasmid Vector	PHLAG82515845	Plasmid vector containing HLA-B*44:03:01:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:34 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:35 Genomic Plasmid Vector	PHLAG82515846	Plasmid vector containing HLA-B*44:03:01:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:35 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:36 Genomic Plasmid Vector	PHLAG82515847	Plasmid vector containing HLA-B*44:03:01:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:36 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:37 Genomic Plasmid Vector	PHLAG82515848	Plasmid vector containing HLA-B*44:03:01:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:37 protein under different cellular conditions.	Inquiry

HLA-B*44:03:01:38 Genomic Plasmid Vector	PHLAG82515849	Plasmid vector containing HLA-B*44:03:01:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:38 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:39 Genomic Plasmid Vector	PHLAG8251585 0	Plasmid vector containing HLA-B*44:03:01:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:39 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:40 Genomic Plasmid Vector	PHLAG8251585 1	Plasmid vector containing HLA-B*44:03:01:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:40 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:41 Genomic Plasmid Vector	PHLAG8251585 2	Plasmid vector containing HLA-B*44:03:01:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:41 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:42 Genomic Plasmid Vector	PHLAG8251585 3	Plasmid vector containing HLA-B*44:03:01:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:42 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:43 Genomic Plasmid Vector	PHLAG8251585 4	Plasmid vector containing HLA-B*44:03:01:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:43 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:44 Genomic Plasmid Vector	PHLAG8251585 5	Plasmid vector containing HLA-B*44:03:01:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:44 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:45 Genomic Plasmid Vector	PHLAG8251585 6	Plasmid vector containing HLA-B*44:03:01:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:45 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:46 Genomic Plasmid Vector	PHLAG8251585 7	Plasmid vector containing HLA-B*44:03:01:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:46 protein under different cellular conditions.	Inquiry

HLA-B*44:03:01:47 Genomic Plasmid Vector	PHLAG82515858	Plasmid vector containing HLA-B*44:03:01:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:47 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:48 Genomic Plasmid Vector	PHLAG82515859	Plasmid vector containing HLA-B*44:03:01:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:48 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:49 Genomic Plasmid Vector	PHLAG82515860	Plasmid vector containing HLA-B*44:03:01:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:49 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:50 Genomic Plasmid Vector	PHLAG82515861	Plasmid vector containing HLA-B*44:03:01:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:50 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:51 Genomic Plasmid Vector	PHLAG82515862	Plasmid vector containing HLA-B*44:03:01:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:51 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:52 Genomic Plasmid Vector	PHLAG82515863	Plasmid vector containing HLA-B*44:03:01:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:52 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:53 Genomic Plasmid Vector	PHLAG82515864	Plasmid vector containing HLA-B*44:03:01:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:53 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:54 Genomic Plasmid Vector	PHLAG82515865	Plasmid vector containing HLA-B*44:03:01:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:54 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:55 Genomic Plasmid Vector	PHLAG82515866	Plasmid vector containing HLA-B*44:03:01:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:55 protein under different cellular conditions.	Inquiry

HLA-B*44:03:01:56 Genomic Plasmid Vector	PHLAG82515867	Plasmid vector containing HLA-B*44:03:01:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:56 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:57 Genomic Plasmid Vector	PHLAG82515868	Plasmid vector containing HLA-B*44:03:01:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:57 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:58 Genomic Plasmid Vector	PHLAG82515869	Plasmid vector containing HLA-B*44:03:01:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:58 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:59 Genomic Plasmid Vector	PHLAG825158710	Plasmid vector containing HLA-B*44:03:01:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:59 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:60 Genomic Plasmid Vector	PHLAG825158711	Plasmid vector containing HLA-B*44:03:01:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:60 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:61 Genomic Plasmid Vector	PHLAG825158712	Plasmid vector containing HLA-B*44:03:01:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:61 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:62 Genomic Plasmid Vector	PHLAG825158713	Plasmid vector containing HLA-B*44:03:01:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:62 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:63 Genomic Plasmid Vector	PHLAG825158714	Plasmid vector containing HLA-B*44:03:01:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:63 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:64 Genomic Plasmid Vector	PHLAG825158715	Plasmid vector containing HLA-B*44:03:01:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:64 protein under different cellular conditions.	Inquiry

HLA-B*44:03:01:65 Genomic Plasmid Vector	PHLAG82515876	Plasmid vector containing HLA-B*44:03:01:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:65 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:66 Genomic Plasmid Vector	PHLAG82515877	Plasmid vector containing HLA-B*44:03:01:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:66 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:67 Genomic Plasmid Vector	PHLAG82515878	Plasmid vector containing HLA-B*44:03:01:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:67 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:68 Genomic Plasmid Vector	PHLAG82515879	Plasmid vector containing HLA-B*44:03:01:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:68 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:69 Genomic Plasmid Vector	PHLAG82515880	Plasmid vector containing HLA-B*44:03:01:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:69 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:70 Genomic Plasmid Vector	PHLAG82515881	Plasmid vector containing HLA-B*44:03:01:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:70 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:71 Genomic Plasmid Vector	PHLAG82515882	Plasmid vector containing HLA-B*44:03:01:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:71 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:72 Genomic Plasmid Vector	PHLAG82515883	Plasmid vector containing HLA-B*44:03:01:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:72 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:73 Genomic Plasmid Vector	PHLAG82515884	Plasmid vector containing HLA-B*44:03:01:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:73 protein under different cellular conditions.	Inquiry

HLA-B*44:03:01:74 Genomic Plasmid Vector	PHLAG82515885	Plasmid vector containing HLA-B*44:03:01:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:74 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:75 Genomic Plasmid Vector	PHLAG82515886	Plasmid vector containing HLA-B*44:03:01:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:75 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:76 Genomic Plasmid Vector	PHLAG82515887	Plasmid vector containing HLA-B*44:03:01:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:76 protein under different cellular conditions.	Inquiry
HLA-B*44:03:01:77 Genomic Plasmid Vector	PHLAG82515888	Plasmid vector containing HLA-B*44:03:01:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:01:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:01:77 protein under different cellular conditions.	Inquiry
HLA-B*44:03:02:01 Genomic Plasmid Vector	PHLAG82515889	Plasmid vector containing HLA-B*44:03:02:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:02:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:02:01 protein under different cellular conditions.	Inquiry
HLA-B*44:03:02:02 Genomic Plasmid Vector	PHLAG82515890	Plasmid vector containing HLA-B*44:03:02:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:02:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:02:02 protein under different cellular conditions.	Inquiry
HLA-B*44:03:02:03 Genomic Plasmid Vector	PHLAG82515891	Plasmid vector containing HLA-B*44:03:02:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:02:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:02:03 protein under different cellular conditions.	Inquiry
HLA-B*44:03:02:04 Genomic Plasmid Vector	PHLAG82515892	Plasmid vector containing HLA-B*44:03:02:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:02:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:02:04 protein under different cellular conditions.	Inquiry
HLA-B*44:03:02:05 Genomic Plasmid Vector	PHLAG82515893	Plasmid vector containing HLA-B*44:03:02:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:02:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:02:05 protein under different cellular conditions.	Inquiry

HLA-B*44:03:02:06 Genomic Plasmid Vector	PHLAG82515894	Plasmid vector containing HLA-B*44:03:02:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:02:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:02:06 protein under different cellular conditions.	Inquiry
HLA-B*44:03:03 Genomic Plasmid Vector	PHLAG82515895	Plasmid vector containing HLA-B*44:03:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:03 protein under different cellular conditions.	Inquiry
HLA-B*44:03:04 Genomic Plasmid Vector	PHLAG82515896	Plasmid vector containing HLA-B*44:03:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:04 protein under different cellular conditions.	Inquiry
HLA-B*44:03:05 Genomic Plasmid Vector	PHLAG82515897	Plasmid vector containing HLA-B*44:03:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:05 protein under different cellular conditions.	Inquiry
HLA-B*44:03:06 Genomic Plasmid Vector	PHLAG82515898	Plasmid vector containing HLA-B*44:03:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:06 protein under different cellular conditions.	Inquiry
HLA-B*44:03:07 Genomic Plasmid Vector	PHLAG82515899	Plasmid vector containing HLA-B*44:03:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:07 protein under different cellular conditions.	Inquiry
HLA-B*44:03:08 Genomic Plasmid Vector	PHLAG825159000	Plasmid vector containing HLA-B*44:03:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:08 protein under different cellular conditions.	Inquiry
HLA-B*44:03:09 Genomic Plasmid Vector	PHLAG825159001	Plasmid vector containing HLA-B*44:03:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:09 protein under different cellular conditions.	Inquiry
HLA-B*44:03:10 Genomic Plasmid Vector	PHLAG825159002	Plasmid vector containing HLA-B*44:03:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:10 protein under different cellular conditions.	Inquiry

HLA-B*44:03:11 Genomic Plasmid Vector	PHLAG82515903	Plasmid vector containing HLA-B*44:03:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:11 protein under different cellular conditions.	Inquiry
HLA-B*44:03:12 Genomic Plasmid Vector	PHLAG82515904	Plasmid vector containing HLA-B*44:03:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:12 protein under different cellular conditions.	Inquiry
HLA-B*44:03:13 Genomic Plasmid Vector	PHLAG82515905	Plasmid vector containing HLA-B*44:03:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:13 protein under different cellular conditions.	Inquiry
HLA-B*44:03:14 Genomic Plasmid Vector	PHLAG82515906	Plasmid vector containing HLA-B*44:03:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:14 protein under different cellular conditions.	Inquiry
HLA-B*44:03:15 Genomic Plasmid Vector	PHLAG82515907	Plasmid vector containing HLA-B*44:03:15 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:15 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:15 protein under different cellular conditions.	Inquiry
HLA-B*44:03:16 Genomic Plasmid Vector	PHLAG82515908	Plasmid vector containing HLA-B*44:03:16 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:16 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:16 protein under different cellular conditions.	Inquiry
HLA-B*44:03:17 Genomic Plasmid Vector	PHLAG82515909	Plasmid vector containing HLA-B*44:03:17 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:17 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:17 protein under different cellular conditions.	Inquiry
HLA-B*44:03:18 Genomic Plasmid Vector	PHLAG825159110	Plasmid vector containing HLA-B*44:03:18 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:18 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:18 protein under different cellular conditions.	Inquiry
HLA-B*44:03:19 Genomic Plasmid Vector	PHLAG825159111	Plasmid vector containing HLA-B*44:03:19 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:19 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:19 protein under different cellular conditions.	Inquiry

HLA-B*44:03:20 Genomic Plasmid Vector	PHLAG82515912	Plasmid vector containing HLA-B*44:03:20 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:20 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:20 protein under different cellular conditions.	Inquiry
HLA-B*44:03:21 Genomic Plasmid Vector	PHLAG82515913	Plasmid vector containing HLA-B*44:03:21 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:21 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:21 protein under different cellular conditions.	Inquiry
HLA-B*44:03:22 Genomic Plasmid Vector	PHLAG82515914	Plasmid vector containing HLA-B*44:03:22 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:22 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:22 protein under different cellular conditions.	Inquiry
HLA-B*44:03:23 Genomic Plasmid Vector	PHLAG82515915	Plasmid vector containing HLA-B*44:03:23 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:23 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:23 protein under different cellular conditions.	Inquiry
HLA-B*44:03:24 Genomic Plasmid Vector	PHLAG82515916	Plasmid vector containing HLA-B*44:03:24 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:24 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:24 protein under different cellular conditions.	Inquiry
HLA-B*44:03:25 Genomic Plasmid Vector	PHLAG82515917	Plasmid vector containing HLA-B*44:03:25 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:25 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:25 protein under different cellular conditions.	Inquiry
HLA-B*44:03:26 Genomic Plasmid Vector	PHLAG82515918	Plasmid vector containing HLA-B*44:03:26 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:26 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:26 protein under different cellular conditions.	Inquiry
HLA-B*44:03:27 Genomic Plasmid Vector	PHLAG82515919	Plasmid vector containing HLA-B*44:03:27 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:27 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:27 protein under different cellular conditions.	Inquiry
HLA-B*44:03:28 Genomic Plasmid Vector	PHLAG82515920	Plasmid vector containing HLA-B*44:03:28 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:28 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:28 protein under different cellular conditions.	Inquiry

HLA-B*44:03:29 Genomic Plasmid Vector	PHLAG82515921	Plasmid vector containing HLA-B*44:03:29 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:29 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:29 protein under different cellular conditions.	Inquiry
HLA-B*44:03:30 Genomic Plasmid Vector	PHLAG82515922	Plasmid vector containing HLA-B*44:03:30 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:30 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:30 protein under different cellular conditions.	Inquiry
HLA-B*44:03:31 Genomic Plasmid Vector	PHLAG82515923	Plasmid vector containing HLA-B*44:03:31 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:31 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:31 protein under different cellular conditions.	Inquiry
HLA-B*44:03:32 Genomic Plasmid Vector	PHLAG82515924	Plasmid vector containing HLA-B*44:03:32 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:32 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:32 protein under different cellular conditions.	Inquiry
HLA-B*44:03:33 Genomic Plasmid Vector	PHLAG82515925	Plasmid vector containing HLA-B*44:03:33 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:33 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:33 protein under different cellular conditions.	Inquiry
HLA-B*44:03:34 Genomic Plasmid Vector	PHLAG82515926	Plasmid vector containing HLA-B*44:03:34 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:34 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:34 protein under different cellular conditions.	Inquiry
HLA-B*44:03:35 Genomic Plasmid Vector	PHLAG82515927	Plasmid vector containing HLA-B*44:03:35 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:35 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:35 protein under different cellular conditions.	Inquiry
HLA-B*44:03:36 Genomic Plasmid Vector	PHLAG82515928	Plasmid vector containing HLA-B*44:03:36 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:36 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:36 protein under different cellular conditions.	Inquiry
HLA-B*44:03:37 Genomic Plasmid Vector	PHLAG82515929	Plasmid vector containing HLA-B*44:03:37 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:37 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:37 protein under different cellular conditions.	Inquiry

HLA-B*44:03:38 Genomic Plasmid Vector	PHLAG82515930	Plasmid vector containing HLA-B*44:03:38 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:38 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:38 protein under different cellular conditions.	Inquiry
HLA-B*44:03:39 Genomic Plasmid Vector	PHLAG82515931	Plasmid vector containing HLA-B*44:03:39 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:39 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:39 protein under different cellular conditions.	Inquiry
HLA-B*44:03:40 Genomic Plasmid Vector	PHLAG82515932	Plasmid vector containing HLA-B*44:03:40 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:40 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:40 protein under different cellular conditions.	Inquiry
HLA-B*44:03:41 Genomic Plasmid Vector	PHLAG82515933	Plasmid vector containing HLA-B*44:03:41 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:41 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:41 protein under different cellular conditions.	Inquiry
HLA-B*44:03:42 Genomic Plasmid Vector	PHLAG82515934	Plasmid vector containing HLA-B*44:03:42 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:42 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:42 protein under different cellular conditions.	Inquiry
HLA-B*44:03:43 Genomic Plasmid Vector	PHLAG82515935	Plasmid vector containing HLA-B*44:03:43 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:43 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:43 protein under different cellular conditions.	Inquiry
HLA-B*44:03:44 Genomic Plasmid Vector	PHLAG82515936	Plasmid vector containing HLA-B*44:03:44 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:44 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:44 protein under different cellular conditions.	Inquiry
HLA-B*44:03:45 Genomic Plasmid Vector	PHLAG82515937	Plasmid vector containing HLA-B*44:03:45 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:45 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:45 protein under different cellular conditions.	Inquiry
HLA-B*44:03:46 Genomic Plasmid Vector	PHLAG82515938	Plasmid vector containing HLA-B*44:03:46 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:46 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:46 protein under different cellular conditions.	Inquiry

HLA-B*44:03:47 Genomic Plasmid Vector	PHLAG82515939	Plasmid vector containing HLA-B*44:03:47 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:47 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:47 protein under different cellular conditions.	Inquiry
HLA-B*44:03:48 Genomic Plasmid Vector	PHLAG825159400	Plasmid vector containing HLA-B*44:03:48 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:48 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:48 protein under different cellular conditions.	Inquiry
HLA-B*44:03:49 Genomic Plasmid Vector	PHLAG825159401	Plasmid vector containing HLA-B*44:03:49 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:49 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:49 protein under different cellular conditions.	Inquiry
HLA-B*44:03:50 Genomic Plasmid Vector	PHLAG825159402	Plasmid vector containing HLA-B*44:03:50 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:50 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:50 protein under different cellular conditions.	Inquiry
HLA-B*44:03:51 Genomic Plasmid Vector	PHLAG825159403	Plasmid vector containing HLA-B*44:03:51 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:51 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:51 protein under different cellular conditions.	Inquiry
HLA-B*44:03:52 Genomic Plasmid Vector	PHLAG825159404	Plasmid vector containing HLA-B*44:03:52 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:52 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:52 protein under different cellular conditions.	Inquiry
HLA-B*44:03:53 Genomic Plasmid Vector	PHLAG825159405	Plasmid vector containing HLA-B*44:03:53 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:53 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:53 protein under different cellular conditions.	Inquiry
HLA-B*44:03:54 Genomic Plasmid Vector	PHLAG825159406	Plasmid vector containing HLA-B*44:03:54 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:54 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:54 protein under different cellular conditions.	Inquiry
HLA-B*44:03:55 Genomic Plasmid Vector	PHLAG825159407	Plasmid vector containing HLA-B*44:03:55 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:55 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:55 protein under different cellular conditions.	Inquiry

HLA-B*44:03:56 Genomic Plasmid Vector	PHLAG82515948	Plasmid vector containing HLA-B*44:03:56 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:56 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:56 protein under different cellular conditions.	Inquiry
HLA-B*44:03:57 Genomic Plasmid Vector	PHLAG82515949	Plasmid vector containing HLA-B*44:03:57 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:57 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:57 protein under different cellular conditions.	Inquiry
HLA-B*44:03:58 Genomic Plasmid Vector	PHLAG82515950	Plasmid vector containing HLA-B*44:03:58 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:58 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:58 protein under different cellular conditions.	Inquiry
HLA-B*44:03:59 Genomic Plasmid Vector	PHLAG82515951	Plasmid vector containing HLA-B*44:03:59 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:59 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:59 protein under different cellular conditions.	Inquiry
HLA-B*44:03:60 Genomic Plasmid Vector	PHLAG82515952	Plasmid vector containing HLA-B*44:03:60 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:60 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:60 protein under different cellular conditions.	Inquiry
HLA-B*44:03:61 Genomic Plasmid Vector	PHLAG82515953	Plasmid vector containing HLA-B*44:03:61 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:61 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:61 protein under different cellular conditions.	Inquiry
HLA-B*44:03:62 Genomic Plasmid Vector	PHLAG82515954	Plasmid vector containing HLA-B*44:03:62 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:62 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:62 protein under different cellular conditions.	Inquiry
HLA-B*44:03:63 Genomic Plasmid Vector	PHLAG82515955	Plasmid vector containing HLA-B*44:03:63 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:63 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:63 protein under different cellular conditions.	Inquiry
HLA-B*44:03:64 Genomic Plasmid Vector	PHLAG82515956	Plasmid vector containing HLA-B*44:03:64 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:64 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:64 protein under different cellular conditions.	Inquiry

HLA-B*44:03:65 Genomic Plasmid Vector	PHLAG82515957	Plasmid vector containing HLA-B*44:03:65 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:65 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:65 protein under different cellular conditions.	Inquiry
HLA-B*44:03:66 Genomic Plasmid Vector	PHLAG82515958	Plasmid vector containing HLA-B*44:03:66 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:66 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:66 protein under different cellular conditions.	Inquiry
HLA-B*44:03:67 Genomic Plasmid Vector	PHLAG82515959	Plasmid vector containing HLA-B*44:03:67 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:67 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:67 protein under different cellular conditions.	Inquiry
HLA-B*44:03:68 Genomic Plasmid Vector	PHLAG825159560	Plasmid vector containing HLA-B*44:03:68 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:68 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:68 protein under different cellular conditions.	Inquiry
HLA-B*44:03:69 Genomic Plasmid Vector	PHLAG825159561	Plasmid vector containing HLA-B*44:03:69 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:69 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:69 protein under different cellular conditions.	Inquiry
HLA-B*44:03:70 Genomic Plasmid Vector	PHLAG825159562	Plasmid vector containing HLA-B*44:03:70 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:70 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:70 protein under different cellular conditions.	Inquiry
HLA-B*44:03:71 Genomic Plasmid Vector	PHLAG825159563	Plasmid vector containing HLA-B*44:03:71 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:71 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:71 protein under different cellular conditions.	Inquiry
HLA-B*44:03:72 Genomic Plasmid Vector	PHLAG825159564	Plasmid vector containing HLA-B*44:03:72 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:72 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:72 protein under different cellular conditions.	Inquiry
HLA-B*44:03:73 Genomic Plasmid Vector	PHLAG825159565	Plasmid vector containing HLA-B*44:03:73 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:73 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:73 protein under different cellular conditions.	Inquiry

HLA-B*44:03:74 Genomic Plasmid Vector	PHLAG82515966	Plasmid vector containing HLA-B*44:03:74 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:74 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:74 protein under different cellular conditions.	Inquiry
HLA-B*44:03:75 Genomic Plasmid Vector	PHLAG82515967	Plasmid vector containing HLA-B*44:03:75 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:75 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:75 protein under different cellular conditions.	Inquiry
HLA-B*44:03:76 Genomic Plasmid Vector	PHLAG82515968	Plasmid vector containing HLA-B*44:03:76 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:76 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:76 protein under different cellular conditions.	Inquiry
HLA-B*44:03:77 Genomic Plasmid Vector	PHLAG82515969	Plasmid vector containing HLA-B*44:03:77 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:03:77 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:03:77 protein under different cellular conditions.	Inquiry
HLA-B*44:04 Genomic Plasmid Vector	PHLAG82515970	Plasmid vector containing HLA-B*44:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:04 protein under different cellular conditions.	Inquiry
HLA-B*44:05:01:01 Genomic Plasmid Vector	PHLAG82515971	Plasmid vector containing HLA-B*44:05:01:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:05:01:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:05:01:01 protein under different cellular conditions.	Inquiry
HLA-B*44:05:01:02 Genomic Plasmid Vector	PHLAG82515972	Plasmid vector containing HLA-B*44:05:01:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:05:01:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:05:01:02 protein under different cellular conditions.	Inquiry
HLA-B*44:05:01:03 Genomic Plasmid Vector	PHLAG82515973	Plasmid vector containing HLA-B*44:05:01:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:05:01:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:05:01:03 protein under different cellular conditions.	Inquiry
HLA-B*44:05:01:04 Genomic Plasmid Vector	PHLAG82515974	Plasmid vector containing HLA-B*44:05:01:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:05:01:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:05:01:04 protein under different cellular conditions.	Inquiry

HLA-B*44:05:02 Genomic Plasmid Vector	PHLAG82515975	Plasmid vector containing HLA-B*44:05:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:05:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:05:02 protein under different cellular conditions.	Inquiry
HLA-B*44:05:03 Genomic Plasmid Vector	PHLAG82515976	Plasmid vector containing HLA-B*44:05:03 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:05:03 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:05:03 protein under different cellular conditions.	Inquiry
HLA-B*44:05:04 Genomic Plasmid Vector	PHLAG82515977	Plasmid vector containing HLA-B*44:05:04 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:05:04 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:05:04 protein under different cellular conditions.	Inquiry
HLA-B*44:05:05 Genomic Plasmid Vector	PHLAG82515978	Plasmid vector containing HLA-B*44:05:05 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:05:05 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:05:05 protein under different cellular conditions.	Inquiry
HLA-B*44:05:06 Genomic Plasmid Vector	PHLAG82515979	Plasmid vector containing HLA-B*44:05:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:05:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:05:06 protein under different cellular conditions.	Inquiry
HLA-B*44:06 Genomic Plasmid Vector	PHLAG825159800	Plasmid vector containing HLA-B*44:06 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:06 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:06 protein under different cellular conditions.	Inquiry
HLA-B*44:07 Genomic Plasmid Vector	PHLAG825159801	Plasmid vector containing HLA-B*44:07 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:07 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:07 protein under different cellular conditions.	Inquiry
HLA-B*44:08 Genomic Plasmid Vector	PHLAG825159802	Plasmid vector containing HLA-B*44:08 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:08 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:08 protein under different cellular conditions.	Inquiry
HLA-B*44:09 Genomic Plasmid Vector	PHLAG825159803	Plasmid vector containing HLA-B*44:09 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:09 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:09 protein under different cellular conditions.	Inquiry

HLA-B*44:10 Genomic Plasmid Vector	PHLAG82515984	Plasmid vector containing HLA-B*44:10 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:10 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:10 protein under different cellular conditions.	Inquiry
HLA-B*44:100 Genomic Plasmid Vector	PHLAG82515985	Plasmid vector containing HLA-B*44:100 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:100 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:100 protein under different cellular conditions.	Inquiry
HLA-B*44:101 Genomic Plasmid Vector	PHLAG82515986	Plasmid vector containing HLA-B*44:101 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:101 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:101 protein under different cellular conditions.	Inquiry
HLA-B*44:102 Genomic Plasmid Vector	PHLAG82515987	Plasmid vector containing HLA-B*44:102 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:102 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:102 protein under different cellular conditions.	Inquiry
HLA-B*44:103 Genomic Plasmid Vector	PHLAG82515988	Plasmid vector containing HLA-B*44:103 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:103 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:103 protein under different cellular conditions.	Inquiry
HLA-B*44:104 Genomic Plasmid Vector	PHLAG82515989	Plasmid vector containing HLA-B*44:104 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:104 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:104 protein under different cellular conditions.	Inquiry
HLA-B*44:105 Genomic Plasmid Vector	PHLAG825159990	Plasmid vector containing HLA-B*44:105 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:105 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:105 protein under different cellular conditions.	Inquiry
HLA-B*44:106 Genomic Plasmid Vector	PHLAG825159991	Plasmid vector containing HLA-B*44:106 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:106 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:106 protein under different cellular conditions.	Inquiry
HLA-B*44:107 Genomic Plasmid Vector	PHLAG825159992	Plasmid vector containing HLA-B*44:107 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:107 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:107 protein under different cellular conditions.	Inquiry

HLA-B*44:108N Genomic Plasmid Vector	PHLAG82515993	Plasmid vector containing HLA-B*44:108N genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:108N allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:108N protein under different cellular conditions.	Inquiry
HLA-B*44:109 Genomic Plasmid Vector	PHLAG82515994	Plasmid vector containing HLA-B*44:109 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:109 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:109 protein under different cellular conditions.	Inquiry
HLA-B*44:11 Genomic Plasmid Vector	PHLAG82515995	Plasmid vector containing HLA-B*44:11 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:11 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:11 protein under different cellular conditions.	Inquiry
HLA-B*44:110 Genomic Plasmid Vector	PHLAG82515996	Plasmid vector containing HLA-B*44:110 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:110 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:110 protein under different cellular conditions.	Inquiry
HLA-B*44:111 Genomic Plasmid Vector	PHLAG82515997	Plasmid vector containing HLA-B*44:111 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:111 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:111 protein under different cellular conditions.	Inquiry
HLA-B*44:112 Genomic Plasmid Vector	PHLAG82515998	Plasmid vector containing HLA-B*44:112 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:112 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:112 protein under different cellular conditions.	Inquiry
HLA-B*44:113 Genomic Plasmid Vector	PHLAG82515999	Plasmid vector containing HLA-B*44:113 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:113 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:113 protein under different cellular conditions.	Inquiry
HLA-B*44:114 Genomic Plasmid Vector	PHLAG825160000	Plasmid vector containing HLA-B*44:114 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:114 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:114 protein under different cellular conditions.	Inquiry
HLA-B*44:115 Genomic Plasmid Vector	PHLAG825160001	Plasmid vector containing HLA-B*44:115 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:115 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:115 protein under different cellular conditions.	Inquiry

HLA-B*44:116 Genomic Plasmid Vector	PHLAG82516002	Plasmid vector containing HLA-B*44:116 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:116 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:116 protein under different cellular conditions.	Inquiry
HLA-B*44:117 Genomic Plasmid Vector	PHLAG82516003	Plasmid vector containing HLA-B*44:117 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:117 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:117 protein under different cellular conditions.	Inquiry
HLA-B*44:118 Genomic Plasmid Vector	PHLAG82516004	Plasmid vector containing HLA-B*44:118 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:118 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:118 protein under different cellular conditions.	Inquiry
HLA-B*44:119 Genomic Plasmid Vector	PHLAG82516005	Plasmid vector containing HLA-B*44:119 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:119 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:119 protein under different cellular conditions.	Inquiry
HLA-B*44:12 Genomic Plasmid Vector	PHLAG82516006	Plasmid vector containing HLA-B*44:12 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:12 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:12 protein under different cellular conditions.	Inquiry
HLA-B*44:120 Genomic Plasmid Vector	PHLAG82516007	Plasmid vector containing HLA-B*44:120 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:120 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:120 protein under different cellular conditions.	Inquiry
HLA-B*44:121 Genomic Plasmid Vector	PHLAG82516008	Plasmid vector containing HLA-B*44:121 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:121 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:121 protein under different cellular conditions.	Inquiry
HLA-B*44:122 Genomic Plasmid Vector	PHLAG82516009	Plasmid vector containing HLA-B*44:122 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:122 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:122 protein under different cellular conditions.	Inquiry
HLA-B*44:123 Genomic Plasmid Vector	PHLAG82516010	Plasmid vector containing HLA-B*44:123 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:123 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:123 protein under different cellular conditions.	Inquiry

HLA-B*44:124 Genomic Plasmid Vector	PHLAG82516011	Plasmid vector containing HLA-B*44:124 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:124 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:124 protein under different cellular conditions.	Inquiry
HLA-B*44:125 Genomic Plasmid Vector	PHLAG82516012	Plasmid vector containing HLA-B*44:125 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:125 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:125 protein under different cellular conditions.	Inquiry
HLA-B*44:126:01 Genomic Plasmid Vector	PHLAG82516013	Plasmid vector containing HLA-B*44:126:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:126:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:126:01 protein under different cellular conditions.	Inquiry
HLA-B*44:126:02 Genomic Plasmid Vector	PHLAG82516014	Plasmid vector containing HLA-B*44:126:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:126:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:126:02 protein under different cellular conditions.	Inquiry
HLA-B*44:127 Genomic Plasmid Vector	PHLAG82516015	Plasmid vector containing HLA-B*44:127 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:127 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:127 protein under different cellular conditions.	Inquiry
HLA-B*44:128:01 Genomic Plasmid Vector	PHLAG82516016	Plasmid vector containing HLA-B*44:128:01 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:128:01 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:128:01 protein under different cellular conditions.	Inquiry
HLA-B*44:128:02 Genomic Plasmid Vector	PHLAG82516017	Plasmid vector containing HLA-B*44:128:02 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:128:02 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:128:02 protein under different cellular conditions.	Inquiry
HLA-B*44:129 Genomic Plasmid Vector	PHLAG82516018	Plasmid vector containing HLA-B*44:129 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:129 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:129 protein under different cellular conditions.	Inquiry
HLA-B*44:13 Genomic Plasmid Vector	PHLAG82516019	Plasmid vector containing HLA-B*44:13 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:13 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:13 protein under different cellular conditions.	Inquiry

HLA-B*44:130 Genomic Plasmid Vector	PHLAG82516020	Plasmid vector containing HLA-B*44:130 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:130 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:130 protein under different cellular conditions.	Inquiry
HLA-B*44:131 Genomic Plasmid Vector	PHLAG82516021	Plasmid vector containing HLA-B*44:131 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:131 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:131 protein under different cellular conditions.	Inquiry
HLA-B*44:132 Genomic Plasmid Vector	PHLAG82516022	Plasmid vector containing HLA-B*44:132 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:132 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:132 protein under different cellular conditions.	Inquiry
HLA-B*44:133 Genomic Plasmid Vector	PHLAG82516023	Plasmid vector containing HLA-B*44:133 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:133 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:133 protein under different cellular conditions.	Inquiry
HLA-B*44:134 Genomic Plasmid Vector	PHLAG82516024	Plasmid vector containing HLA-B*44:134 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:134 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:134 protein under different cellular conditions.	Inquiry
HLA-B*44:135 Genomic Plasmid Vector	PHLAG82516025	Plasmid vector containing HLA-B*44:135 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:135 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:135 protein under different cellular conditions.	Inquiry
HLA-B*44:136 Genomic Plasmid Vector	PHLAG82516026	Plasmid vector containing HLA-B*44:136 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:136 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:136 protein under different cellular conditions.	Inquiry
HLA-B*44:137 Genomic Plasmid Vector	PHLAG82516027	Plasmid vector containing HLA-B*44:137 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:137 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:137 protein under different cellular conditions.	Inquiry
HLA-B*44:138Q Genomic Plasmid Vector	PHLAG82516028	Plasmid vector containing HLA-B*44:138Q genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:138Q allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:138Q protein under different cellular conditions.	Inquiry

HLA-B*44:139 Genomic Plasmid Vector	PHLAG82516029	Plasmid vector containing HLA-B*44:139 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:139 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:139 protein under different cellular conditions.	Inquiry
HLA-B*44:14 Genomic Plasmid Vector	PHLAG825160330	Plasmid vector containing HLA-B*44:14 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:14 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:14 protein under different cellular conditions.	Inquiry
HLA-B*44:140 Genomic Plasmid Vector	PHLAG825160331	Plasmid vector containing HLA-B*44:140 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:140 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:140 protein under different cellular conditions.	Inquiry
HLA-B*44:141 Genomic Plasmid Vector	PHLAG825160332	Plasmid vector containing HLA-B*44:141 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:141 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:141 protein under different cellular conditions.	Inquiry
HLA-B*44:142 Genomic Plasmid Vector	PHLAG825160333	Plasmid vector containing HLA-B*44:142 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:142 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:142 protein under different cellular conditions.	Inquiry
HLA-B*44:143 Genomic Plasmid Vector	PHLAG825160334	Plasmid vector containing HLA-B*44:143 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:143 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:143 protein under different cellular conditions.	Inquiry
HLA-B*44:144 Genomic Plasmid Vector	PHLAG825160335	Plasmid vector containing HLA-B*44:144 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:144 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:144 protein under different cellular conditions.	Inquiry
HLA-B*44:145 Genomic Plasmid Vector	PHLAG825160336	Plasmid vector containing HLA-B*44:145 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:145 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:145 protein under different cellular conditions.	Inquiry
HLA-B*44:146 Genomic Plasmid Vector	PHLAG825160337	Plasmid vector containing HLA-B*44:146 genomic sequence including 5'-UTR, exons, introns and 3'-UTR. This plasmid can be used as a reference standard in HLA typing assays to validate the accuracy of genotyping methods for HLA-B*44:146 allele. The plasmid vector can also be used for in vitro studies investigating the expression kinetics and post-translational modifications of HLA-B*44:146 protein under different cellular conditions.	Inquiry
