HLA-DRB1*14:262 Protein Expression Plasmid Vector	PHLAP92539624	Plasmid vector containing HLA-DRB1*14:262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:262 protein. This plasmid can be used for constructing HLA-DRB1*14:262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:263 Protein Expression Plasmid Vector	PHLAP92539625	Plasmid vector containing HLA-DRB1*14:263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:263 protein. This plasmid can be used for constructing HLA-DRB1*14:263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:264 Protein Expression Plasmid Vector	PHLAP92539626	Plasmid vector containing HLA-DRB1*14:264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:264 protein. This plasmid can be used for constructing HLA-DRB1*14:264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:265 Protein Expression Plasmid Vector	PHLAP92539627	Plasmid vector containing HLA-DRB1*14:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:265 protein. This plasmid can be used for constructing HLA-DRB1*14:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:266 Protein Expression Plasmid Vector	PHLAP92539628	Plasmid vector containing HLA-DRB1*14:266 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:266 protein. This plasmid can be used for constructing HLA-DRB1*14:266 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:266 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:267 Protein Expression Plasmid Vector	PHLAP92539629	Plasmid vector containing HLA-DRB1*14:267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:267 protein. This plasmid can be used for constructing HLA-DRB1*14:267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:268 Protein Expression Plasmid Vector	PHLAP92539630	Plasmid vector containing HLA-DRB1*14:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:268 protein. This plasmid can be used for constructing HLA-DRB1*14:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:269N Protein Expression Plasmid Vector	PHLAP92539631	Plasmid vector containing HLA-DRB1*14:269N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:269N protein. This plasmid can be used for constructing HLA-DRB1*14:269N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:269N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:27:01 Protein Expression Plasmid Vector	PHLAP92539632	Plasmid vector containing HLA-DRB1*14:27:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:27:01 protein. This plasmid can be used for constructing HLA-DRB1*14:27:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:27:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:27:02 Protein Expression Plasmid Vector	PHLAP92539633	Plasmid vector containing HLA-DRB1*14:27:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:27:02 protein. This plasmid can be used for constructing HLA-DRB1*14:27:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:27:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:270 Protein Expression Plasmid Vector	PHLAP92539634	Plasmid vector containing HLA-DRB1*14:270 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:270 protein. This plasmid can be used for constructing HLA-DRB1*14:270 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:270 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:271 Protein Expression Plasmid Vector	PHLAP92539635	Plasmid vector containing HLA-DRB1*14:271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:271 protein. This plasmid can be used for constructing HLA-DRB1*14:271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:272 Protein Expression Plasmid Vector	PHLAP92539636	Plasmid vector containing HLA-DRB1*14:272 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:272 protein. This plasmid can be used for constructing HLA-DRB1*14:272 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:272 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:273 Protein Expression Plasmid Vector	PHLAP92539637	Plasmid vector containing HLA-DRB1*14:273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:273 protein. This plasmid can be used for constructing HLA-DRB1*14:273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:274 Protein Expression Plasmid Vector	PHLAP92539638	Plasmid vector containing HLA-DRB1*14:274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:274 protein. This plasmid can be used for constructing HLA-DRB1*14:274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:275 Protein Expression Plasmid Vector	PHLAP92539639	Plasmid vector containing HLA-DRB1*14:275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:275 protein. This plasmid can be used for constructing HLA-DRB1*14:275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:276 Protein Expression Plasmid Vector	PHLAP925396400	Plasmid vector containing HLA-DRB1*14:276 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:276 protein. This plasmid can be used for constructing HLA-DRB1*14:276 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:276 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:277 Protein Expression Plasmid Vector	PHLAP925396401	Plasmid vector containing HLA-DRB1*14:277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:277 protein. This plasmid can be used for constructing HLA-DRB1*14:277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:278 Protein Expression Plasmid Vector	PHLAP925396402	Plasmid vector containing HLA-DRB1*14:278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:278 protein. This plasmid can be used for constructing HLA-DRB1*14:278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:279 Protein Expression Plasmid Vector	PHLAP925396403	Plasmid vector containing HLA-DRB1*14:279 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:279 protein. This plasmid can be used for constructing HLA-DRB1*14:279 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:279 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:28 Protein Expression Plasmid Vector	PHLAP925396404	Plasmid vector containing HLA-DRB1*14:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:28 protein. This plasmid can be used for constructing HLA-DRB1*14:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:29 Protein Expression Plasmid Vector	PHLAP92539645	Plasmid vector containing HLA-DRB1*14:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:29 protein. This plasmid can be used for constructing HLA-DRB1*14:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:30 Protein Expression Plasmid Vector	PHLAP92539646	Plasmid vector containing HLA-DRB1*14:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:30 protein. This plasmid can be used for constructing HLA-DRB1*14:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:31 Protein Expression Plasmid Vector	PHLAP92539647	Plasmid vector containing HLA-DRB1*14:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:31 protein. This plasmid can be used for constructing HLA-DRB1*14:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:32:01 Protein Expression Plasmid Vector	PHLAP92539648	Plasmid vector containing HLA-DRB1*14:32:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:32:01 protein. This plasmid can be used for constructing HLA-DRB1*14:32:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:32:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:32:02 Protein Expression Plasmid Vector	PHLAP92539649	Plasmid vector containing HLA-DRB1*14:32:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:32:02 protein. This plasmid can be used for constructing HLA-DRB1*14:32:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:32:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:32:03 Protein Expression Plasmid Vector	PHLAP92539650	Plasmid vector containing HLA-DRB1*14:32:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:32:03 protein. This plasmid can be used for constructing HLA-DRB1*14:32:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:32:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:33 Protein Expression Plasmid Vector	PHLAP92539651	Plasmid vector containing HLA-DRB1*14:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:33 protein. This plasmid can be used for constructing HLA-DRB1*14:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:34 Protein Expression Plasmid Vector	PHLAP92539652	Plasmid vector containing HLA-DRB1*14:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:34 protein. This plasmid can be used for constructing HLA-DRB1*14:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:35 Protein Expression Plasmid Vector	PHLAP92539653	Plasmid vector containing HLA-DRB1*14:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:35 protein. This plasmid can be used for constructing HLA-DRB1*14:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:36 Protein Expression Plasmid Vector	PHLAP92539654	Plasmid vector containing HLA-DRB1*14:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:36 protein. This plasmid can be used for constructing HLA-DRB1*14:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:37 Protein Expression Plasmid Vector	PHLAP92539655	Plasmid vector containing HLA-DRB1*14:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:37 protein. This plasmid can be used for constructing HLA-DRB1*14:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:38:01 Protein Expression Plasmid Vector	PHLAP92539656	Plasmid vector containing HLA-DRB1*14:38:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:38:01 protein. This plasmid can be used for constructing HLA-DRB1*14:38:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:38:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:38:02 Protein Expression Plasmid Vector	PHLAP92539657	Plasmid vector containing HLA-DRB1*14:38:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:38:02 protein. This plasmid can be used for constructing HLA-DRB1*14:38:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:38:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:39 Protein Expression Plasmid Vector	PHLAP92539658	Plasmid vector containing HLA-DRB1*14:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:39 protein. This plasmid can be used for constructing HLA-DRB1*14:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:40 Protein Expression Plasmid Vector	PHLAP92539659	Plasmid vector containing HLA-DRB1*14:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:40 protein. This plasmid can be used for constructing HLA-DRB1*14:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:41 Protein Expression Plasmid Vector	PHLAP92539660	Plasmid vector containing HLA-DRB1*14:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:41 protein. This plasmid can be used for constructing HLA-DRB1*14:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:42 Protein Expression Plasmid Vector	PHLAP92539661	Plasmid vector containing HLA-DRB1*14:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:42 protein. This plasmid can be used for constructing HLA-DRB1*14:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:43 Protein Expression Plasmid Vector	PHLAP92539662	Plasmid vector containing HLA-DRB1*14:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:43 protein. This plasmid can be used for constructing HLA-DRB1*14:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:44:01 Protein Expression Plasmid Vector	PHLAP92539663	Plasmid vector containing HLA-DRB1*14:44:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:44:01 protein. This plasmid can be used for constructing HLA-DRB1*14:44:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:44:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:44:02 Protein Expression Plasmid Vector	PHLAP92539664	Plasmid vector containing HLA-DRB1*14:44:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:44:02 protein. This plasmid can be used for constructing HLA-DRB1*14:44:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:44:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:44:03 Protein Expression Plasmid Vector	PHLAP92539665	Plasmid vector containing HLA-DRB1*14:44:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:44:03 protein. This plasmid can be used for constructing HLA-DRB1*14:44:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:44:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:45 Protein Expression Plasmid Vector	PHLAP92539666	Plasmid vector containing HLA-DRB1*14:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:45 protein. This plasmid can be used for constructing HLA-DRB1*14:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:46 Protein Expression Plasmid Vector	PHLAP92539667	Plasmid vector containing HLA-DRB1*14:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:46 protein. This plasmid can be used for constructing HLA-DRB1*14:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:47 Protein Expression Plasmid Vector	PHLAP92539668	Plasmid vector containing HLA-DRB1*14:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:47 protein. This plasmid can be used for constructing HLA-DRB1*14:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:48 Protein Expression Plasmid Vector	PHLAP92539669	Plasmid vector containing HLA-DRB1*14:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:48 protein. This plasmid can be used for constructing HLA-DRB1*14:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:49 Protein Expression Plasmid Vector	PHLAP92539670	Plasmid vector containing HLA-DRB1*14:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:49 protein. This plasmid can be used for constructing HLA-DRB1*14:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:50:01 Protein Expression Plasmid Vector	PHLAP92539671	Plasmid vector containing HLA-DRB1*14:50:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:50:01 protein. This plasmid can be used for constructing HLA-DRB1*14:50:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:50:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:50:02 Protein Expression Plasmid Vector	PHLAP92539672	Plasmid vector containing HLA-DRB1*14:50:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:50:02 protein. This plasmid can be used for constructing HLA-DRB1*14:50:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:50:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:51 Protein Expression Plasmid Vector	PHLAP92539673	Plasmid vector containing HLA-DRB1*14:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:51 protein. This plasmid can be used for constructing HLA-DRB1*14:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:52 Protein Expression Plasmid Vector	PHLAP92539674	Plasmid vector containing HLA-DRB1*14:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:52 protein. This plasmid can be used for constructing HLA-DRB1*14:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:53 Protein Expression Plasmid Vector	PHLAP92539675	Plasmid vector containing HLA-DRB1*14:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:53 protein. This plasmid can be used for constructing HLA-DRB1*14:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:01 Protein Expression Plasmid Vector	PHLAP92539676	Plasmid vector containing HLA-DRB1*14:54:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:01 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:02 Protein Expression Plasmid Vector	PHLAP92539677	Plasmid vector containing HLA-DRB1*14:54:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:02 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:03 Protein Expression Plasmid Vector	PHLAP92539678	Plasmid vector containing HLA-DRB1*14:54:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:03 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:04 Protein Expression Plasmid Vector	PHLAP92539679	Plasmid vector containing HLA-DRB1*14:54:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:04 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:05 Protein Expression Plasmid Vector	PHLAP92539680	Plasmid vector containing HLA-DRB1*14:54:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:05 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:06 Protein Expression Plasmid Vector	PHLAP92539681	Plasmid vector containing HLA-DRB1*14:54:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:06 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:54:01:07 Protein Expression Plasmid Vector	PHLAP92539682	Plasmid vector containing HLA-DRB1*14:54:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:07 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:08 Protein Expression Plasmid Vector	PHLAP92539683	Plasmid vector containing HLA-DRB1*14:54:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:08 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:09 Protein Expression Plasmid Vector	PHLAP92539684	Plasmid vector containing HLA-DRB1*14:54:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:09 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:10 Protein Expression Plasmid Vector	PHLAP92539685	Plasmid vector containing HLA-DRB1*14:54:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:10 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:11 Protein Expression Plasmid Vector	PHLAP92539686	Plasmid vector containing HLA-DRB1*14:54:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:11 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:12 Protein Expression Plasmid Vector	PHLAP92539687	Plasmid vector containing HLA-DRB1*14:54:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:12 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:13 Protein Expression Plasmid Vector	PHLAP92539688	Plasmid vector containing HLA-DRB1*14:54:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:13 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:54:01:14 Protein Expression Plasmid Vector	PHLAP92539689	Plasmid vector containing HLA-DRB1*14:54:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:14 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:15 Protein Expression Plasmid Vector	PHLAP92539690	Plasmid vector containing HLA-DRB1*14:54:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:15 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:16 Protein Expression Plasmid Vector	PHLAP92539691	Plasmid vector containing HLA-DRB1*14:54:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:16 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:01:17 Protein Expression Plasmid Vector	PHLAP92539692	Plasmid vector containing HLA-DRB1*14:54:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:01:17 protein. This plasmid can be used for constructing HLA-DRB1*14:54:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:02 Protein Expression Plasmid Vector	PHLAP92539693	Plasmid vector containing HLA-DRB1*14:54:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:02 protein. This plasmid can be used for constructing HLA-DRB1*14:54:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:03 Protein Expression Plasmid Vector	PHLAP92539694	Plasmid vector containing HLA-DRB1*14:54:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:03 protein. This plasmid can be used for constructing HLA-DRB1*14:54:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:04 Protein Expression Plasmid Vector	PHLAP92539695	Plasmid vector containing HLA-DRB1*14:54:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:04 protein. This plasmid can be used for constructing HLA-DRB1*14:54:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:54:05 Protein Expression Plasmid Vector	PHLAP92539696	Plasmid vector containing HLA-DRB1*14:54:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:05 protein. This plasmid can be used for constructing HLA-DRB1*14:54:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:06 Protein Expression Plasmid Vector	PHLAP92539697	Plasmid vector containing HLA-DRB1*14:54:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:06 protein. This plasmid can be used for constructing HLA-DRB1*14:54:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:07 Protein Expression Plasmid Vector	PHLAP92539698	Plasmid vector containing HLA-DRB1*14:54:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:07 protein. This plasmid can be used for constructing HLA-DRB1*14:54:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:08 Protein Expression Plasmid Vector	PHLAP92539699	Plasmid vector containing HLA-DRB1*14:54:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:08 protein. This plasmid can be used for constructing HLA-DRB1*14:54:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:09 Protein Expression Plasmid Vector	PHLAP92539700	Plasmid vector containing HLA-DRB1*14:54:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:09 protein. This plasmid can be used for constructing HLA-DRB1*14:54:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:10 Protein Expression Plasmid Vector	PHLAP92539701	Plasmid vector containing HLA-DRB1*14:54:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:10 protein. This plasmid can be used for constructing HLA-DRB1*14:54:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:11 Protein Expression Plasmid Vector	PHLAP92539702	Plasmid vector containing HLA-DRB1*14:54:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:11 protein. This plasmid can be used for constructing HLA-DRB1*14:54:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:54:12 Protein Expression Plasmid Vector	PHLAP92539703	Plasmid vector containing HLA-DRB1*14:54:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:12 protein. This plasmid can be used for constructing HLA-DRB1*14:54:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:13 Protein Expression Plasmid Vector	PHLAP92539704	Plasmid vector containing HLA-DRB1*14:54:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:13 protein. This plasmid can be used for constructing HLA-DRB1*14:54:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:54:14 Protein Expression Plasmid Vector	PHLAP92539705	Plasmid vector containing HLA-DRB1*14:54:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:54:14 protein. This plasmid can be used for constructing HLA-DRB1*14:54:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:54:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:55 Protein Expression Plasmid Vector	PHLAP92539706	Plasmid vector containing HLA-DRB1*14:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:55 protein. This plasmid can be used for constructing HLA-DRB1*14:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:56 Protein Expression Plasmid Vector	PHLAP92539707	Plasmid vector containing HLA-DRB1*14:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:56 protein. This plasmid can be used for constructing HLA-DRB1*14:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:57 Protein Expression Plasmid Vector	PHLAP92539708	Plasmid vector containing HLA-DRB1*14:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:57 protein. This plasmid can be used for constructing HLA-DRB1*14:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:58 Protein Expression Plasmid Vector	PHLAP92539709	Plasmid vector containing HLA-DRB1*14:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:58 protein. This plasmid can be used for constructing HLA-DRB1*14:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:59 Protein Expression Plasmid Vector	PHLAP92539710	Plasmid vector containing HLA-DRB1*14:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:59 protein. This plasmid can be used for constructing HLA-DRB1*14:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:60 Protein Expression Plasmid Vector	PHLAP92539711	Plasmid vector containing HLA-DRB1*14:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:60 protein. This plasmid can be used for constructing HLA-DRB1*14:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:61 Protein Expression Plasmid Vector	PHLAP92539712	Plasmid vector containing HLA-DRB1*14:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:61 protein. This plasmid can be used for constructing HLA-DRB1*14:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:62 Protein Expression Plasmid Vector	PHLAP92539713	Plasmid vector containing HLA-DRB1*14:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:62 protein. This plasmid can be used for constructing HLA-DRB1*14:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:63 Protein Expression Plasmid Vector	PHLAP92539714	Plasmid vector containing HLA-DRB1*14:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:63 protein. This plasmid can be used for constructing HLA-DRB1*14:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:64 Protein Expression Plasmid Vector	PHLAP92539715	Plasmid vector containing HLA-DRB1*14:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:64 protein. This plasmid can be used for constructing HLA-DRB1*14:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:65 Protein Expression Plasmid Vector	PHLAP92539716	Plasmid vector containing HLA-DRB1*14:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:65 protein. This plasmid can be used for constructing HLA-DRB1*14:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:67 Protein Expression Plasmid Vector	PHLAP92539717	Plasmid vector containing HLA-DRB1*14:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:67 protein. This plasmid can be used for constructing HLA-DRB1*14:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB1*14:68:01 Protein Expression Plasmid Vector	PHLAP92539718	Plasmid vector containing HLA-DRB1*14:68:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:68:01 protein. This plasmid can be used for constructing HLA-DRB1*14:68:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:68:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:68:02 Protein Expression Plasmid Vector	PHLAP92539719	Plasmid vector containing HLA-DRB1*14:68:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:68:02 protein. This plasmid can be used for constructing HLA-DRB1*14:68:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:68:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:69 Protein Expression Plasmid Vector	PHLAP92539720	Plasmid vector containing HLA-DRB1*14:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:69 protein. This plasmid can be used for constructing HLA-DRB1*14:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:70 Protein Expression Plasmid Vector	PHLAP92539721	Plasmid vector containing HLA-DRB1*14:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:70 protein. This plasmid can be used for constructing HLA-DRB1*14:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:71 Protein Expression Plasmid Vector	PHLAP92539722	Plasmid vector containing HLA-DRB1*14:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:71 protein. This plasmid can be used for constructing HLA-DRB1*14:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:72 Protein Expression Plasmid Vector	PHLAP92539723	Plasmid vector containing HLA-DRB1*14:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:72 protein. This plasmid can be used for constructing HLA-DRB1*14:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:73 Protein Expression Plasmid Vector	PHLAP92539724	Plasmid vector containing HLA-DRB1*14:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:73 protein. This plasmid can be used for constructing HLA-DRB1*14:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:74 Protein Expression Plasmid Vector	PHLAP92539725	Plasmid vector containing HLA-DRB1*14:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:74 protein. This plasmid can be used for constructing HLA-DRB1*14:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:75 Protein Expression Plasmid Vector	PHLAP92539726	Plasmid vector containing HLA-DRB1*14:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:75 protein. This plasmid can be used for constructing HLA-DRB1*14:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:76 Protein Expression Plasmid Vector	PHLAP92539727	Plasmid vector containing HLA-DRB1*14:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:76 protein. This plasmid can be used for constructing HLA-DRB1*14:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:77 Protein Expression Plasmid Vector	PHLAP92539728	Plasmid vector containing HLA-DRB1*14:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:77 protein. This plasmid can be used for constructing HLA-DRB1*14:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:78 Protein Expression Plasmid Vector	PHLAP92539729	Plasmid vector containing HLA-DRB1*14:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:78 protein. This plasmid can be used for constructing HLA-DRB1*14:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:79 Protein Expression Plasmid Vector	PHLAP92539730	Plasmid vector containing HLA-DRB1*14:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:79 protein. This plasmid can be used for constructing HLA-DRB1*14:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:80 Protein Expression Plasmid Vector	PHLAP92539731	Plasmid vector containing HLA-DRB1*14:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:80 protein. This plasmid can be used for constructing HLA-DRB1*14:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:81 Protein Expression Plasmid Vector	PHLAP92539732	Plasmid vector containing HLA-DRB1*14:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:81 protein. This plasmid can be used for constructing HLA-DRB1*14:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:82 Protein Expression Plasmid Vector	PHLAP92539733	Plasmid vector containing HLA-DRB1*14:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:82 protein. This plasmid can be used for constructing HLA-DRB1*14:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB1*14:83 Protein Expression Plasmid Vector	PHLAP92539734	Plasmid vector containing HLA-DRB1*14:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:83 protein. This plasmid can be used for constructing HLA-DRB1*14:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:84 Protein Expression Plasmid Vector	PHLAP92539735	Plasmid vector containing HLA-DRB1*14:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:84 protein. This plasmid can be used for constructing HLA-DRB1*14:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:85 Protein Expression Plasmid Vector	PHLAP92539736	Plasmid vector containing HLA-DRB1*14:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:85 protein. This plasmid can be used for constructing HLA-DRB1*14:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:86 Protein Expression Plasmid Vector	PHLAP92539737	Plasmid vector containing HLA-DRB1*14:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:86 protein. This plasmid can be used for constructing HLA-DRB1*14:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:87 Protein Expression Plasmid Vector	PHLAP92539738	Plasmid vector containing HLA-DRB1*14:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:87 protein. This plasmid can be used for constructing HLA-DRB1*14:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:88 Protein Expression Plasmid Vector	PHLAP92539739	Plasmid vector containing HLA-DRB1*14:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:88 protein. This plasmid can be used for constructing HLA-DRB1*14:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:89 Protein Expression Plasmid Vector	PHLAP92539740	Plasmid vector containing HLA-DRB1*14:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:89 protein. This plasmid can be used for constructing HLA-DRB1*14:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*14:90 Protein Expression Plasmid Vector	PHLAP92539741	Plasmid vector containing HLA-DRB1*14:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:90 protein. This plasmid can be used for constructing HLA-DRB1*14:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB1*14:91 Protein Expression Plasmid Vector	PHLAP92539742	Plasmid vector containing HLA-DRB1*14:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:91 protein. This plasmid can be used for constructing HLA-DRB1*14:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:92N Protein Expression Plasmid Vector	PHLAP92539743	Plasmid vector containing HLA-DRB1*14:92N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:92N protein. This plasmid can be used for constructing HLA-DRB1*14:92N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:92N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:93 Protein Expression Plasmid Vector	PHLAP92539744	Plasmid vector containing HLA-DRB1*14:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:93 protein. This plasmid can be used for constructing HLA-DRB1*14:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:94 Protein Expression Plasmid Vector	PHLAP92539745	Plasmid vector containing HLA-DRB1*14:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:94 protein. This plasmid can be used for constructing HLA-DRB1*14:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:95 Protein Expression Plasmid Vector	PHLAP92539746	Plasmid vector containing HLA-DRB1*14:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:95 protein. This plasmid can be used for constructing HLA-DRB1*14:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:96 Protein Expression Plasmid Vector	PHLAP92539747	Plasmid vector containing HLA-DRB1*14:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:96 protein. This plasmid can be used for constructing HLA-DRB1*14:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:97 Protein Expression Plasmid Vector	PHLAP92539748	Plasmid vector containing HLA-DRB1*14:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:97 protein. This plasmid can be used for constructing HLA-DRB1*14:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*14:98 Protein Expression Plasmid Vector	PHLAP92539749	Plasmid vector containing HLA-DRB1*14:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:98 protein. This plasmid can be used for constructing HLA-DRB1*14:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*14:99 Protein Expression Plasmid Vector	PHLAP92539750	Plasmid vector containing HLA-DRB1*14:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*14:99 protein. This plasmid can be used for constructing HLA-DRB1*14:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*14:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*1466 Protein Expression Plasmid Vector	PHLAP92539751	Plasmid vector containing HLA-DRB1*1466 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*1466 protein. This plasmid can be used for constructing HLA-DRB1*1466 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*1466 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:01 Protein Expression Plasmid Vector	PHLAP92539752	Plasmid vector containing HLA-DRB1*15:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:01 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:02 Protein Expression Plasmid Vector	PHLAP92539753	Plasmid vector containing HLA-DRB1*15:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:02 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:03 Protein Expression Plasmid Vector	PHLAP92539754	Plasmid vector containing HLA-DRB1*15:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:03 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:04 Protein Expression Plasmid Vector	PHLAP92539755	Plasmid vector containing HLA-DRB1*15:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:04 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:05 Protein Expression Plasmid Vector	PHLAP92539756	Plasmid vector containing HLA-DRB1*15:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:05 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:01:01:06 Protein Expression Plasmid Vector	PHLAP92539757	Plasmid vector containing HLA-DRB1*15:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:06 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:07 Protein Expression Plasmid Vector	PHLAP92539758	Plasmid vector containing HLA-DRB1*15:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:07 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:08 Protein Expression Plasmid Vector	PHLAP92539759	Plasmid vector containing HLA-DRB1*15:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:08 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:09 Protein Expression Plasmid Vector	PHLAP92539760	Plasmid vector containing HLA-DRB1*15:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:09 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:10 Protein Expression Plasmid Vector	PHLAP92539761	Plasmid vector containing HLA-DRB1*15:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:10 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:11 Protein Expression Plasmid Vector	PHLAP92539762	Plasmid vector containing HLA-DRB1*15:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:11 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:12 Protein Expression Plasmid Vector	PHLAP92539763	Plasmid vector containing HLA-DRB1*15:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:12 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:01:01:13 Protein Expression Plasmid Vector	PHLAP92539764	Plasmid vector containing HLA-DRB1*15:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:13 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:14 Protein Expression Plasmid Vector	PHLAP92539765	Plasmid vector containing HLA-DRB1*15:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:14 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:15 Protein Expression Plasmid Vector	PHLAP92539766	Plasmid vector containing HLA-DRB1*15:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:15 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:16 Protein Expression Plasmid Vector	PHLAP92539767	Plasmid vector containing HLA-DRB1*15:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:16 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:17 Protein Expression Plasmid Vector	PHLAP92539768	Plasmid vector containing HLA-DRB1*15:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:17 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:18 Protein Expression Plasmid Vector	PHLAP92539769	Plasmid vector containing HLA-DRB1*15:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:18 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:19 Protein Expression Plasmid Vector	PHLAP92539770	Plasmid vector containing HLA-DRB1*15:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:19 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:01:01:20 Protein Expression Plasmid Vector	PHLAP92539771	Plasmid vector containing HLA-DRB1*15:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:20 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:21 Protein Expression Plasmid Vector	PHLAP92539772	Plasmid vector containing HLA-DRB1*15:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:21 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:22 Protein Expression Plasmid Vector	PHLAP92539773	Plasmid vector containing HLA-DRB1*15:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:22 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:23 Protein Expression Plasmid Vector	PHLAP92539774	Plasmid vector containing HLA-DRB1*15:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:23 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:24 Protein Expression Plasmid Vector	PHLAP92539775	Plasmid vector containing HLA-DRB1*15:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:24 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:25 Protein Expression Plasmid Vector	PHLAP92539776	Plasmid vector containing HLA-DRB1*15:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:25 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:26 Protein Expression Plasmid Vector	PHLAP92539777	Plasmid vector containing HLA-DRB1*15:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:26 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:01:01:27 Protein Expression Plasmid Vector	PHLAP92539778	Plasmid vector containing HLA-DRB1*15:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:27 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:28 Protein Expression Plasmid Vector	PHLAP92539779	Plasmid vector containing HLA-DRB1*15:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:28 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:29 Protein Expression Plasmid Vector	PHLAP92539780	Plasmid vector containing HLA-DRB1*15:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:29 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:30 Protein Expression Plasmid Vector	PHLAP92539781	Plasmid vector containing HLA-DRB1*15:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:30 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:31 Protein Expression Plasmid Vector	PHLAP92539782	Plasmid vector containing HLA-DRB1*15:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:31 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:32Q Protein Expression Plasmid Vector	PHLAP92539783	Plasmid vector containing HLA-DRB1*15:01:01:32Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:32Q protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:32Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:32Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:01:33 Protein Expression Plasmid Vector	PHLAP92539784	Plasmid vector containing HLA-DRB1*15:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:01:33 protein. This plasmid can be used for constructing HLA-DRB1*15:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:01:02 Protein Expression Plasmid Vector	PHLAP92539785	Plasmid vector containing HLA-DRB1*15:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:02 protein. This plasmid can be used for constructing HLA-DRB1*15:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:03 Protein Expression Plasmid Vector	PHLAP92539786	Plasmid vector containing HLA-DRB1*15:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:03 protein. This plasmid can be used for constructing HLA-DRB1*15:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:04 Protein Expression Plasmid Vector	PHLAP92539787	Plasmid vector containing HLA-DRB1*15:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:04 protein. This plasmid can be used for constructing HLA-DRB1*15:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:05 Protein Expression Plasmid Vector	PHLAP92539788	Plasmid vector containing HLA-DRB1*15:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:05 protein. This plasmid can be used for constructing HLA-DRB1*15:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:06 Protein Expression Plasmid Vector	PHLAP92539789	Plasmid vector containing HLA-DRB1*15:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:06 protein. This plasmid can be used for constructing HLA-DRB1*15:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:07 Protein Expression Plasmid Vector	PHLAP92539790	Plasmid vector containing HLA-DRB1*15:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:07 protein. This plasmid can be used for constructing HLA-DRB1*15:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:08:01 Protein Expression Plasmid Vector	PHLAP92539791	Plasmid vector containing HLA-DRB1*15:01:08:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:08:01 protein. This plasmid can be used for constructing HLA-DRB1*15:01:08:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:08:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:01:08:02 Protein Expression Plasmid Vector	PHLAP92539792	Plasmid vector containing HLA-DRB1*15:01:08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:08:02 protein. This plasmid can be used for constructing HLA-DRB1*15:01:08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:09 Protein Expression Plasmid Vector	PHLAP92539793	Plasmid vector containing HLA-DRB1*15:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:09 protein. This plasmid can be used for constructing HLA-DRB1*15:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:10 Protein Expression Plasmid Vector	PHLAP92539794	Plasmid vector containing HLA-DRB1*15:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:10 protein. This plasmid can be used for constructing HLA-DRB1*15:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:11 Protein Expression Plasmid Vector	PHLAP92539795	Plasmid vector containing HLA-DRB1*15:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:11 protein. This plasmid can be used for constructing HLA-DRB1*15:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:12 Protein Expression Plasmid Vector	PHLAP92539796	Plasmid vector containing HLA-DRB1*15:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:12 protein. This plasmid can be used for constructing HLA-DRB1*15:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:13 Protein Expression Plasmid Vector	PHLAP92539797	Plasmid vector containing HLA-DRB1*15:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:13 protein. This plasmid can be used for constructing HLA-DRB1*15:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:14 Protein Expression Plasmid Vector	PHLAP92539798	Plasmid vector containing HLA-DRB1*15:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:14 protein. This plasmid can be used for constructing HLA-DRB1*15:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:01:15 Protein Expression Plasmid Vector	PHLAP92539799	Plasmid vector containing HLA-DRB1*15:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:15 protein. This plasmid can be used for constructing HLA-DRB1*15:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:16 Protein Expression Plasmid Vector	PHLAP92539800	Plasmid vector containing HLA-DRB1*15:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:16 protein. This plasmid can be used for constructing HLA-DRB1*15:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:17 Protein Expression Plasmid Vector	PHLAP92539801	Plasmid vector containing HLA-DRB1*15:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:17 protein. This plasmid can be used for constructing HLA-DRB1*15:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:18 Protein Expression Plasmid Vector	PHLAP92539802	Plasmid vector containing HLA-DRB1*15:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:18 protein. This plasmid can be used for constructing HLA-DRB1*15:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:19 Protein Expression Plasmid Vector	PHLAP92539803	Plasmid vector containing HLA-DRB1*15:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:19 protein. This plasmid can be used for constructing HLA-DRB1*15:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:20 Protein Expression Plasmid Vector	PHLAP92539804	Plasmid vector containing HLA-DRB1*15:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:20 protein. This plasmid can be used for constructing HLA-DRB1*15:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:21 Protein Expression Plasmid Vector	PHLAP92539805	Plasmid vector containing HLA-DRB1*15:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:21 protein. This plasmid can be used for constructing HLA-DRB1*15:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:01:22 Protein Expression Plasmid Vector	PHLAP92539806	Plasmid vector containing HLA-DRB1*15:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:22 protein. This plasmid can be used for constructing HLA-DRB1*15:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:23 Protein Expression Plasmid Vector	PHLAP92539807	Plasmid vector containing HLA-DRB1*15:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:23 protein. This plasmid can be used for constructing HLA-DRB1*15:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:24 Protein Expression Plasmid Vector	PHLAP92539808	Plasmid vector containing HLA-DRB1*15:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:24 protein. This plasmid can be used for constructing HLA-DRB1*15:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:25 Protein Expression Plasmid Vector	PHLAP92539809	Plasmid vector containing HLA-DRB1*15:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:25 protein. This plasmid can be used for constructing HLA-DRB1*15:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:26 Protein Expression Plasmid Vector	PHLAP92539810	Plasmid vector containing HLA-DRB1*15:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:26 protein. This plasmid can be used for constructing HLA-DRB1*15:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:27 Protein Expression Plasmid Vector	PHLAP92539811	Plasmid vector containing HLA-DRB1*15:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:27 protein. This plasmid can be used for constructing HLA-DRB1*15:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:28 Protein Expression Plasmid Vector	PHLAP92539812	Plasmid vector containing HLA-DRB1*15:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:28 protein. This plasmid can be used for constructing HLA-DRB1*15:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:01:29 Protein Expression Plasmid Vector	PHLAP92539813	Plasmid vector containing HLA-DRB1*15:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:29 protein. This plasmid can be used for constructing HLA-DRB1*15:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:30 Protein Expression Plasmid Vector	PHLAP92539814	Plasmid vector containing HLA-DRB1*15:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:30 protein. This plasmid can be used for constructing HLA-DRB1*15:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:31 Protein Expression Plasmid Vector	PHLAP92539815	Plasmid vector containing HLA-DRB1*15:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:31 protein. This plasmid can be used for constructing HLA-DRB1*15:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:32 Protein Expression Plasmid Vector	PHLAP92539816	Plasmid vector containing HLA-DRB1*15:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:32 protein. This plasmid can be used for constructing HLA-DRB1*15:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:33 Protein Expression Plasmid Vector	PHLAP92539817	Plasmid vector containing HLA-DRB1*15:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:33 protein. This plasmid can be used for constructing HLA-DRB1*15:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:34 Protein Expression Plasmid Vector	PHLAP92539818	Plasmid vector containing HLA-DRB1*15:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:34 protein. This plasmid can be used for constructing HLA-DRB1*15:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:35 Protein Expression Plasmid Vector	PHLAP92539819	Plasmid vector containing HLA-DRB1*15:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:35 protein. This plasmid can be used for constructing HLA-DRB1*15:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:01:36 Protein Expression Plasmid Vector	PHLAP92539820	Plasmid vector containing HLA-DRB1*15:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:36 protein. This plasmid can be used for constructing HLA-DRB1*15:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:37 Protein Expression Plasmid Vector	PHLAP92539821	Plasmid vector containing HLA-DRB1*15:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:37 protein. This plasmid can be used for constructing HLA-DRB1*15:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:38 Protein Expression Plasmid Vector	PHLAP92539822	Plasmid vector containing HLA-DRB1*15:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:38 protein. This plasmid can be used for constructing HLA-DRB1*15:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:39 Protein Expression Plasmid Vector	PHLAP92539823	Plasmid vector containing HLA-DRB1*15:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:39 protein. This plasmid can be used for constructing HLA-DRB1*15:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:40 Protein Expression Plasmid Vector	PHLAP92539824	Plasmid vector containing HLA-DRB1*15:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:40 protein. This plasmid can be used for constructing HLA-DRB1*15:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:41 Protein Expression Plasmid Vector	PHLAP92539825	Plasmid vector containing HLA-DRB1*15:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:41 protein. This plasmid can be used for constructing HLA-DRB1*15:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:42 Protein Expression Plasmid Vector	PHLAP92539826	Plasmid vector containing HLA-DRB1*15:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:42 protein. This plasmid can be used for constructing HLA-DRB1*15:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:01:43 Protein Expression Plasmid Vector	PHLAP92539827	Plasmid vector containing HLA-DRB1*15:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:43 protein. This plasmid can be used for constructing HLA-DRB1*15:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:44 Protein Expression Plasmid Vector	PHLAP92539828	Plasmid vector containing HLA-DRB1*15:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:44 protein. This plasmid can be used for constructing HLA-DRB1*15:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:45 Protein Expression Plasmid Vector	PHLAP92539829	Plasmid vector containing HLA-DRB1*15:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:45 protein. This plasmid can be used for constructing HLA-DRB1*15:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:46 Protein Expression Plasmid Vector	PHLAP92539830	Plasmid vector containing HLA-DRB1*15:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:46 protein. This plasmid can be used for constructing HLA-DRB1*15:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:47 Protein Expression Plasmid Vector	PHLAP92539831	Plasmid vector containing HLA-DRB1*15:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:47 protein. This plasmid can be used for constructing HLA-DRB1*15:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:48 Protein Expression Plasmid Vector	PHLAP92539832	Plasmid vector containing HLA-DRB1*15:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:48 protein. This plasmid can be used for constructing HLA-DRB1*15:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:49 Protein Expression Plasmid Vector	PHLAP92539833	Plasmid vector containing HLA-DRB1*15:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:49 protein. This plasmid can be used for constructing HLA-DRB1*15:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:01:50 Protein Expression Plasmid Vector	PHLAP92539834	Plasmid vector containing HLA-DRB1*15:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:50 protein. This plasmid can be used for constructing HLA-DRB1*15:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:51 Protein Expression Plasmid Vector	PHLAP92539835	Plasmid vector containing HLA-DRB1*15:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:51 protein. This plasmid can be used for constructing HLA-DRB1*15:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:52 Protein Expression Plasmid Vector	PHLAP92539836	Plasmid vector containing HLA-DRB1*15:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:52 protein. This plasmid can be used for constructing HLA-DRB1*15:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:01:53 Protein Expression Plasmid Vector	PHLAP92539837	Plasmid vector containing HLA-DRB1*15:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:01:53 protein. This plasmid can be used for constructing HLA-DRB1*15:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:01:01 Protein Expression Plasmid Vector	PHLAP92539838	Plasmid vector containing HLA-DRB1*15:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:01:01 protein. This plasmid can be used for constructing HLA-DRB1*15:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:01:02 Protein Expression Plasmid Vector	PHLAP92539839	Plasmid vector containing HLA-DRB1*15:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:01:02 protein. This plasmid can be used for constructing HLA-DRB1*15:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:01:03 Protein Expression Plasmid Vector	PHLAP92539840	Plasmid vector containing HLA-DRB1*15:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:01:03 protein. This plasmid can be used for constructing HLA-DRB1*15:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:02:01:04 Protein Expression Plasmid Vector	PHLAP92539841	Plasmid vector containing HLA-DRB1*15:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:01:04 protein. This plasmid can be used for constructing HLA-DRB1*15:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:01:05 Protein Expression Plasmid Vector	PHLAP92539842	Plasmid vector containing HLA-DRB1*15:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:01:05 protein. This plasmid can be used for constructing HLA-DRB1*15:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:01:06 Protein Expression Plasmid Vector	PHLAP92539843	Plasmid vector containing HLA-DRB1*15:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:01:06 protein. This plasmid can be used for constructing HLA-DRB1*15:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:01:07 Protein Expression Plasmid Vector	PHLAP92539844	Plasmid vector containing HLA-DRB1*15:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:01:07 protein. This plasmid can be used for constructing HLA-DRB1*15:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:01:08 Protein Expression Plasmid Vector	PHLAP92539845	Plasmid vector containing HLA-DRB1*15:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:01:08 protein. This plasmid can be used for constructing HLA-DRB1*15:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:02:01 Protein Expression Plasmid Vector	PHLAP92539846	Plasmid vector containing HLA-DRB1*15:02:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:02:01 protein. This plasmid can be used for constructing HLA-DRB1*15:02:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:02:02 Protein Expression Plasmid Vector	PHLAP92539847	Plasmid vector containing HLA-DRB1*15:02:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:02:02 protein. This plasmid can be used for constructing HLA-DRB1*15:02:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:02:02:03 Protein Expression Plasmid Vector	PHLAP92539848	Plasmid vector containing HLA-DRB1*15:02:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:02:03 protein. This plasmid can be used for constructing HLA-DRB1*15:02:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:03 Protein Expression Plasmid Vector	PHLAP92539849	Plasmid vector containing HLA-DRB1*15:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:03 protein. This plasmid can be used for constructing HLA-DRB1*15:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:04 Protein Expression Plasmid Vector	PHLAP92539850	Plasmid vector containing HLA-DRB1*15:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:04 protein. This plasmid can be used for constructing HLA-DRB1*15:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:05 Protein Expression Plasmid Vector	PHLAP92539851	Plasmid vector containing HLA-DRB1*15:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:05 protein. This plasmid can be used for constructing HLA-DRB1*15:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:06 Protein Expression Plasmid Vector	PHLAP92539852	Plasmid vector containing HLA-DRB1*15:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:06 protein. This plasmid can be used for constructing HLA-DRB1*15:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:07 Protein Expression Plasmid Vector	PHLAP92539853	Plasmid vector containing HLA-DRB1*15:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:07 protein. This plasmid can be used for constructing HLA-DRB1*15:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:08 Protein Expression Plasmid Vector	PHLAP92539854	Plasmid vector containing HLA-DRB1*15:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:08 protein. This plasmid can be used for constructing HLA-DRB1*15:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:02:09 Protein Expression Plasmid Vector	PHLAP92539855	Plasmid vector containing HLA-DRB1*15:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:09 protein. This plasmid can be used for constructing HLA-DRB1*15:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:10 Protein Expression Plasmid Vector	PHLAP92539856	Plasmid vector containing HLA-DRB1*15:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:10 protein. This plasmid can be used for constructing HLA-DRB1*15:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:11 Protein Expression Plasmid Vector	PHLAP92539857	Plasmid vector containing HLA-DRB1*15:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:11 protein. This plasmid can be used for constructing HLA-DRB1*15:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:12 Protein Expression Plasmid Vector	PHLAP92539858	Plasmid vector containing HLA-DRB1*15:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:12 protein. This plasmid can be used for constructing HLA-DRB1*15:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:13 Protein Expression Plasmid Vector	PHLAP92539859	Plasmid vector containing HLA-DRB1*15:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:13 protein. This plasmid can be used for constructing HLA-DRB1*15:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:14 Protein Expression Plasmid Vector	PHLAP92539860	Plasmid vector containing HLA-DRB1*15:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:14 protein. This plasmid can be used for constructing HLA-DRB1*15:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:15 Protein Expression Plasmid Vector	PHLAP92539861	Plasmid vector containing HLA-DRB1*15:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:15 protein. This plasmid can be used for constructing HLA-DRB1*15:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:02:16 Protein Expression Plasmid Vector	PHLAP92539862	Plasmid vector containing HLA-DRB1*15:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:16 protein. This plasmid can be used for constructing HLA-DRB1*15:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:17 Protein Expression Plasmid Vector	PHLAP92539863	Plasmid vector containing HLA-DRB1*15:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:17 protein. This plasmid can be used for constructing HLA-DRB1*15:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:18 Protein Expression Plasmid Vector	PHLAP92539864	Plasmid vector containing HLA-DRB1*15:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:18 protein. This plasmid can be used for constructing HLA-DRB1*15:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:19 Protein Expression Plasmid Vector	PHLAP92539865	Plasmid vector containing HLA-DRB1*15:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:19 protein. This plasmid can be used for constructing HLA-DRB1*15:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:02:20 Protein Expression Plasmid Vector	PHLAP92539866	Plasmid vector containing HLA-DRB1*15:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:02:20 protein. This plasmid can be used for constructing HLA-DRB1*15:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:03:01:01 Protein Expression Plasmid Vector	PHLAP92539867	Plasmid vector containing HLA-DRB1*15:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:03:01:01 protein. This plasmid can be used for constructing HLA-DRB1*15:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:03:01:02 Protein Expression Plasmid Vector	PHLAP92539868	Plasmid vector containing HLA-DRB1*15:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:03:01:02 protein. This plasmid can be used for constructing HLA-DRB1*15:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:03:01:03 Protein Expression Plasmid Vector	PHLAP92539869	Plasmid vector containing HLA-DRB1*15:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:03:01:03 protein. This plasmid can be used for constructing HLA-DRB1*15:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:03:01:04 Protein Expression Plasmid Vector	PHLAP92539870	Plasmid vector containing HLA-DRB1*15:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:03:01:04 protein. This plasmid can be used for constructing HLA-DRB1*15:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:03:02 Protein Expression Plasmid Vector	PHLAP92539871	Plasmid vector containing HLA-DRB1*15:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:03:02 protein. This plasmid can be used for constructing HLA-DRB1*15:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:03:03 Protein Expression Plasmid Vector	PHLAP92539872	Plasmid vector containing HLA-DRB1*15:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:03:03 protein. This plasmid can be used for constructing HLA-DRB1*15:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:03:04 Protein Expression Plasmid Vector	PHLAP92539873	Plasmid vector containing HLA-DRB1*15:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:03:04 protein. This plasmid can be used for constructing HLA-DRB1*15:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:03:05 Protein Expression Plasmid Vector	PHLAP92539874	Plasmid vector containing HLA-DRB1*15:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:03:05 protein. This plasmid can be used for constructing HLA-DRB1*15:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:03:06 Protein Expression Plasmid Vector	PHLAP92539875	Plasmid vector containing HLA-DRB1*15:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:03:06 protein. This plasmid can be used for constructing HLA-DRB1*15:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:04 Protein Expression Plasmid Vector	PHLAP92539876	Plasmid vector containing HLA-DRB1*15:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:04 protein. This plasmid can be used for constructing HLA-DRB1*15:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:05 Protein Expression Plasmid Vector	PHLAP92539877	Plasmid vector containing HLA-DRB1*15:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:05 protein. This plasmid can be used for constructing HLA-DRB1*15:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:06:01 Protein Expression Plasmid Vector	PHLAP92539878	Plasmid vector containing HLA-DRB1*15:06:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:06:01 protein. This plasmid can be used for constructing HLA-DRB1*15:06:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:06:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:06:02 Protein Expression Plasmid Vector	PHLAP92539879	Plasmid vector containing HLA-DRB1*15:06:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:06:02 protein. This plasmid can be used for constructing HLA-DRB1*15:06:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:06:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:06:03 Protein Expression Plasmid Vector	PHLAP92539880	Plasmid vector containing HLA-DRB1*15:06:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:06:03 protein. This plasmid can be used for constructing HLA-DRB1*15:06:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:06:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:06:04 Protein Expression Plasmid Vector	PHLAP92539881	Plasmid vector containing HLA-DRB1*15:06:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:06:04 protein. This plasmid can be used for constructing HLA-DRB1*15:06:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:06:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:07:01 Protein Expression Plasmid Vector	PHLAP92539882	Plasmid vector containing HLA-DRB1*15:07:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:07:01 protein. This plasmid can be used for constructing HLA-DRB1*15:07:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:07:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:07:02 Protein Expression Plasmid Vector	PHLAP925398833	Plasmid vector containing HLA-DRB1*15:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:07:02 protein. This plasmid can be used for constructing HLA-DRB1*15:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:07:03 Protein Expression Plasmid Vector	PHLAP925398834	Plasmid vector containing HLA-DRB1*15:07:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:07:03 protein. This plasmid can be used for constructing HLA-DRB1*15:07:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:07:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:08 Protein Expression Plasmid Vector	PHLAP925398835	Plasmid vector containing HLA-DRB1*15:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:08 protein. This plasmid can be used for constructing HLA-DRB1*15:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:09 Protein Expression Plasmid Vector	PHLAP925398836	Plasmid vector containing HLA-DRB1*15:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:09 protein. This plasmid can be used for constructing HLA-DRB1*15:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:10 Protein Expression Plasmid Vector	PHLAP925398837	Plasmid vector containing HLA-DRB1*15:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:10 protein. This plasmid can be used for constructing HLA-DRB1*15:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:100 Protein Expression Plasmid Vector	PHLAP925398838	Plasmid vector containing HLA-DRB1*15:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:100 protein. This plasmid can be used for constructing HLA-DRB1*15:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:101 Protein Expression Plasmid Vector	PHLAP925398839	Plasmid vector containing HLA-DRB1*15:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:101 protein. This plasmid can be used for constructing HLA-DRB1*15:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:102 Protein Expression Plasmid Vector	PHLAP92539890	Plasmid vector containing HLA-DRB1*15:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:102 protein. This plasmid can be used for constructing HLA-DRB1*15:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:103 Protein Expression Plasmid Vector	PHLAP92539891	Plasmid vector containing HLA-DRB1*15:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:103 protein. This plasmid can be used for constructing HLA-DRB1*15:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:104:01 Protein Expression Plasmid Vector	PHLAP92539892	Plasmid vector containing HLA-DRB1*15:104:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:104:01 protein. This plasmid can be used for constructing HLA-DRB1*15:104:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:104:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:104:02 Protein Expression Plasmid Vector	PHLAP92539893	Plasmid vector containing HLA-DRB1*15:104:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:104:02 protein. This plasmid can be used for constructing HLA-DRB1*15:104:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:104:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:104:03 Protein Expression Plasmid Vector	PHLAP92539894	Plasmid vector containing HLA-DRB1*15:104:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:104:03 protein. This plasmid can be used for constructing HLA-DRB1*15:104:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:104:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:105:01 Protein Expression Plasmid Vector	PHLAP92539895	Plasmid vector containing HLA-DRB1*15:105:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:105:01 protein. This plasmid can be used for constructing HLA-DRB1*15:105:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:105:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:105:02 Protein Expression Plasmid Vector	PHLAP92539896	Plasmid vector containing HLA-DRB1*15:105:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:105:02 protein. This plasmid can be used for constructing HLA-DRB1*15:105:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:105:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:106 Protein Expression Plasmid Vector	PHLAP92539897	Plasmid vector containing HLA-DRB1*15:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:106 protein. This plasmid can be used for constructing HLA-DRB1*15:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:107 Protein Expression Plasmid Vector	PHLAP92539898	Plasmid vector containing HLA-DRB1*15:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:107 protein. This plasmid can be used for constructing HLA-DRB1*15:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:108 Protein Expression Plasmid Vector	PHLAP92539899	Plasmid vector containing HLA-DRB1*15:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:108 protein. This plasmid can be used for constructing HLA-DRB1*15:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:109 Protein Expression Plasmid Vector	PHLAP925399900	Plasmid vector containing HLA-DRB1*15:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:109 protein. This plasmid can be used for constructing HLA-DRB1*15:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:11:01 Protein Expression Plasmid Vector	PHLAP925399901	Plasmid vector containing HLA-DRB1*15:11:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:11:01 protein. This plasmid can be used for constructing HLA-DRB1*15:11:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:11:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:11:02 Protein Expression Plasmid Vector	PHLAP925399902	Plasmid vector containing HLA-DRB1*15:11:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:11:02 protein. This plasmid can be used for constructing HLA-DRB1*15:11:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:11:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:110 Protein Expression Plasmid Vector	PHLAP925399903	Plasmid vector containing HLA-DRB1*15:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:110 protein. This plasmid can be used for constructing HLA-DRB1*15:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:111 Protein Expression Plasmid Vector	PHLAP92539904	Plasmid vector containing HLA-DRB1*15:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:111 protein. This plasmid can be used for constructing HLA-DRB1*15:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:112 Protein Expression Plasmid Vector	PHLAP92539905	Plasmid vector containing HLA-DRB1*15:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:112 protein. This plasmid can be used for constructing HLA-DRB1*15:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:113N Protein Expression Plasmid Vector	PHLAP92539906	Plasmid vector containing HLA-DRB1*15:113N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:113N protein. This plasmid can be used for constructing HLA-DRB1*15:113N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:113N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:114 Protein Expression Plasmid Vector	PHLAP92539907	Plasmid vector containing HLA-DRB1*15:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:114 protein. This plasmid can be used for constructing HLA-DRB1*15:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:115N Protein Expression Plasmid Vector	PHLAP92539908	Plasmid vector containing HLA-DRB1*15:115N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:115N protein. This plasmid can be used for constructing HLA-DRB1*15:115N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:115N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:116 Protein Expression Plasmid Vector	PHLAP92539909	Plasmid vector containing HLA-DRB1*15:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:116 protein. This plasmid can be used for constructing HLA-DRB1*15:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:117 Protein Expression Plasmid Vector	PHLAP925399910	Plasmid vector containing HLA-DRB1*15:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:117 protein. This plasmid can be used for constructing HLA-DRB1*15:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:118:01 Protein Expression Plasmid Vector	PHLAP92539911	Plasmid vector containing HLA-DRB1*15:118:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:118:01 protein. This plasmid can be used for constructing HLA-DRB1*15:118:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:118:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:118:02 Protein Expression Plasmid Vector	PHLAP92539912	Plasmid vector containing HLA-DRB1*15:118:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:118:02 protein. This plasmid can be used for constructing HLA-DRB1*15:118:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:118:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:119 Protein Expression Plasmid Vector	PHLAP92539913	Plasmid vector containing HLA-DRB1*15:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:119 protein. This plasmid can be used for constructing HLA-DRB1*15:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:12 Protein Expression Plasmid Vector	PHLAP92539914	Plasmid vector containing HLA-DRB1*15:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:12 protein. This plasmid can be used for constructing HLA-DRB1*15:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:120 Protein Expression Plasmid Vector	PHLAP92539915	Plasmid vector containing HLA-DRB1*15:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:120 protein. This plasmid can be used for constructing HLA-DRB1*15:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:121 Protein Expression Plasmid Vector	PHLAP92539916	Plasmid vector containing HLA-DRB1*15:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:121 protein. This plasmid can be used for constructing HLA-DRB1*15:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:122 Protein Expression Plasmid Vector	PHLAP92539917	Plasmid vector containing HLA-DRB1*15:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:122 protein. This plasmid can be used for constructing HLA-DRB1*15:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:123 Protein Expression Plasmid Vector	PHLAP92539918	Plasmid vector containing HLA-DRB1*15:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:123 protein. This plasmid can be used for constructing HLA-DRB1*15:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:124 Protein Expression Plasmid Vector	PHLAP92539919	Plasmid vector containing HLA-DRB1*15:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:124 protein. This plasmid can be used for constructing HLA-DRB1*15:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:125 Protein Expression Plasmid Vector	PHLAP92539920	Plasmid vector containing HLA-DRB1*15:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:125 protein. This plasmid can be used for constructing HLA-DRB1*15:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:126 Protein Expression Plasmid Vector	PHLAP92539921	Plasmid vector containing HLA-DRB1*15:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:126 protein. This plasmid can be used for constructing HLA-DRB1*15:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:127 Protein Expression Plasmid Vector	PHLAP92539922	Plasmid vector containing HLA-DRB1*15:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:127 protein. This plasmid can be used for constructing HLA-DRB1*15:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:128 Protein Expression Plasmid Vector	PHLAP92539923	Plasmid vector containing HLA-DRB1*15:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:128 protein. This plasmid can be used for constructing HLA-DRB1*15:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:129N Protein Expression Plasmid Vector	PHLAP92539924	Plasmid vector containing HLA-DRB1*15:129N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:129N protein. This plasmid can be used for constructing HLA-DRB1*15:129N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:129N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:130 Protein Expression Plasmid Vector	PHLAP92539925	Plasmid vector containing HLA-DRB1*15:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:130 protein. This plasmid can be used for constructing HLA-DRB1*15:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:131 Protein Expression Plasmid Vector	PHLAP92539926	Plasmid vector containing HLA-DRB1*15:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:131 protein. This plasmid can be used for constructing HLA-DRB1*15:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:132 Protein Expression Plasmid Vector	PHLAP92539927	Plasmid vector containing HLA-DRB1*15:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:132 protein. This plasmid can be used for constructing HLA-DRB1*15:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:133 Protein Expression Plasmid Vector	PHLAP92539928	Plasmid vector containing HLA-DRB1*15:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:133 protein. This plasmid can be used for constructing HLA-DRB1*15:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:134N Protein Expression Plasmid Vector	PHLAP92539929	Plasmid vector containing HLA-DRB1*15:134N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:134N protein. This plasmid can be used for constructing HLA-DRB1*15:134N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:134N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:135 Protein Expression Plasmid Vector	PHLAP92539930	Plasmid vector containing HLA-DRB1*15:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:135 protein. This plasmid can be used for constructing HLA-DRB1*15:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:136 Protein Expression Plasmid Vector	PHLAP92539931	Plasmid vector containing HLA-DRB1*15:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:136 protein. This plasmid can be used for constructing HLA-DRB1*15:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:137N Protein Expression Plasmid Vector	PHLAP92539932	Plasmid vector containing HLA-DRB1*15:137N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:137N protein. This plasmid can be used for constructing HLA-DRB1*15:137N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:137N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:138N Protein Expression Plasmid Vector	PHLAP92539933	Plasmid vector containing HLA-DRB1*15:138N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:138N protein. This plasmid can be used for constructing HLA-DRB1*15:138N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:138N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:139 Protein Expression Plasmid Vector	PHLAP92539934	Plasmid vector containing HLA-DRB1*15:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:139 protein. This plasmid can be used for constructing HLA-DRB1*15:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:13Q Protein Expression Plasmid Vector	PHLAP92539935	Plasmid vector containing HLA-DRB1*15:13Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:13Q protein. This plasmid can be used for constructing HLA-DRB1*15:13Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:13Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:14 Protein Expression Plasmid Vector	PHLAP92539936	Plasmid vector containing HLA-DRB1*15:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:14 protein. This plasmid can be used for constructing HLA-DRB1*15:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:140 Protein Expression Plasmid Vector	PHLAP92539937	Plasmid vector containing HLA-DRB1*15:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:140 protein. This plasmid can be used for constructing HLA-DRB1*15:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:141 Protein Expression Plasmid Vector	PHLAP92539938	Plasmid vector containing HLA-DRB1*15:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:141 protein. This plasmid can be used for constructing HLA-DRB1*15:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:142 Protein Expression Plasmid Vector	PHLAP92539939	Plasmid vector containing HLA-DRB1*15:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:142 protein. This plasmid can be used for constructing HLA-DRB1*15:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:143 Protein Expression Plasmid Vector	PHLAP92539940	Plasmid vector containing HLA-DRB1*15:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:143 protein. This plasmid can be used for constructing HLA-DRB1*15:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:144 Protein Expression Plasmid Vector	PHLAP92539941	Plasmid vector containing HLA-DRB1*15:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:144 protein. This plasmid can be used for constructing HLA-DRB1*15:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:145 Protein Expression Plasmid Vector	PHLAP92539942	Plasmid vector containing HLA-DRB1*15:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:145 protein. This plasmid can be used for constructing HLA-DRB1*15:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:146 Protein Expression Plasmid Vector	PHLAP92539943	Plasmid vector containing HLA-DRB1*15:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:146 protein. This plasmid can be used for constructing HLA-DRB1*15:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:147 Protein Expression Plasmid Vector	PHLAP92539944	Plasmid vector containing HLA-DRB1*15:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:147 protein. This plasmid can be used for constructing HLA-DRB1*15:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:148N Protein Expression Plasmid Vector	PHLAP92539945	Plasmid vector containing HLA-DRB1*15:148N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:148N protein. This plasmid can be used for constructing HLA-DRB1*15:148N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:148N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:149 Protein Expression Plasmid Vector	PHLAP92539946	Plasmid vector containing HLA-DRB1*15:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:149 protein. This plasmid can be used for constructing HLA-DRB1*15:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:15:01 Protein Expression Plasmid Vector	PHLAP92539947	Plasmid vector containing HLA-DRB1*15:15:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:15:01 protein. This plasmid can be used for constructing HLA-DRB1*15:15:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:15:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:15:02 Protein Expression Plasmid Vector	PHLAP92539948	Plasmid vector containing HLA-DRB1*15:15:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:15:02 protein. This plasmid can be used for constructing HLA-DRB1*15:15:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:15:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:15:03 Protein Expression Plasmid Vector	PHLAP92539949	Plasmid vector containing HLA-DRB1*15:15:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:15:03 protein. This plasmid can be used for constructing HLA-DRB1*15:15:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:15:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:150 Protein Expression Plasmid Vector	PHLAP92539950	Plasmid vector containing HLA-DRB1*15:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:150 protein. This plasmid can be used for constructing HLA-DRB1*15:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:151 Protein Expression Plasmid Vector	PHLAP92539951	Plasmid vector containing HLA-DRB1*15:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:151 protein. This plasmid can be used for constructing HLA-DRB1*15:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:152 Protein Expression Plasmid Vector	PHLAP92539952	Plasmid vector containing HLA-DRB1*15:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:152 protein. This plasmid can be used for constructing HLA-DRB1*15:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:153 Protein Expression Plasmid Vector	PHLAP92539953	Plasmid vector containing HLA-DRB1*15:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:153 protein. This plasmid can be used for constructing HLA-DRB1*15:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:154N Protein Expression Plasmid Vector	PHLAP92539954	Plasmid vector containing HLA-DRB1*15:154N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:154N protein. This plasmid can be used for constructing HLA-DRB1*15:154N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:154N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:155 Protein Expression Plasmid Vector	PHLAP92539955	Plasmid vector containing HLA-DRB1*15:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:155 protein. This plasmid can be used for constructing HLA-DRB1*15:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:156 Protein Expression Plasmid Vector	PHLAP92539956	Plasmid vector containing HLA-DRB1*15:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:156 protein. This plasmid can be used for constructing HLA-DRB1*15:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:157 Protein Expression Plasmid Vector	PHLAP92539957	Plasmid vector containing HLA-DRB1*15:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:157 protein. This plasmid can be used for constructing HLA-DRB1*15:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:158 Protein Expression Plasmid Vector	PHLAP92539958	Plasmid vector containing HLA-DRB1*15:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:158 protein. This plasmid can be used for constructing HLA-DRB1*15:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:159N Protein Expression Plasmid Vector	PHLAP92539959	Plasmid vector containing HLA-DRB1*15:159N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:159N protein. This plasmid can be used for constructing HLA-DRB1*15:159N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:159N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:16 Protein Expression Plasmid Vector	PHLAP92539960	Plasmid vector containing HLA-DRB1*15:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:16 protein. This plasmid can be used for constructing HLA-DRB1*15:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:160 Protein Expression Plasmid Vector	PHLAP92539961	Plasmid vector containing HLA-DRB1*15:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:160 protein. This plasmid can be used for constructing HLA-DRB1*15:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:161 Protein Expression Plasmid Vector	PHLAP92539962	Plasmid vector containing HLA-DRB1*15:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:161 protein. This plasmid can be used for constructing HLA-DRB1*15:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:162 Protein Expression Plasmid Vector	PHLAP92539963	Plasmid vector containing HLA-DRB1*15:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:162 protein. This plasmid can be used for constructing HLA-DRB1*15:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:163N Protein Expression Plasmid Vector	PHLAP92539964	Plasmid vector containing HLA-DRB1*15:163N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:163N protein. This plasmid can be used for constructing HLA-DRB1*15:163N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:163N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:164Q Protein Expression Plasmid Vector	PHLAP92539965	Plasmid vector containing HLA-DRB1*15:164Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:164Q protein. This plasmid can be used for constructing HLA-DRB1*15:164Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:164Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:165 Protein Expression Plasmid Vector	PHLAP92539966	Plasmid vector containing HLA-DRB1*15:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:165 protein. This plasmid can be used for constructing HLA-DRB1*15:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:166 Protein Expression Plasmid Vector	PHLAP92539967	Plasmid vector containing HLA-DRB1*15:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:166 protein. This plasmid can be used for constructing HLA-DRB1*15:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:167 Protein Expression Plasmid Vector	PHLAP92539968	Plasmid vector containing HLA-DRB1*15:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:167 protein. This plasmid can be used for constructing HLA-DRB1*15:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:168 Protein Expression Plasmid Vector	PHLAP92539969	Plasmid vector containing HLA-DRB1*15:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:168 protein. This plasmid can be used for constructing HLA-DRB1*15:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:169 Protein Expression Plasmid Vector	PHLAP92539970	Plasmid vector containing HLA-DRB1*15:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:169 protein. This plasmid can be used for constructing HLA-DRB1*15:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:170 Protein Expression Plasmid Vector	PHLAP92539971	Plasmid vector containing HLA-DRB1*15:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:170 protein. This plasmid can be used for constructing HLA-DRB1*15:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:171:01 Protein Expression Plasmid Vector	PHLAP92539972	Plasmid vector containing HLA-DRB1*15:171:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:171:01 protein. This plasmid can be used for constructing HLA-DRB1*15:171:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:171:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:171:02 Protein Expression Plasmid Vector	PHLAP92539973	Plasmid vector containing HLA-DRB1*15:171:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:171:02 protein. This plasmid can be used for constructing HLA-DRB1*15:171:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:171:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:172:01 Protein Expression Plasmid Vector	PHLAP92539974	Plasmid vector containing HLA-DRB1*15:172:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:172:01 protein. This plasmid can be used for constructing HLA-DRB1*15:172:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:172:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:172:02 Protein Expression Plasmid Vector	PHLAP92539975	Plasmid vector containing HLA-DRB1*15:172:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:172:02 protein. This plasmid can be used for constructing HLA-DRB1*15:172:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:172:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:173 Protein Expression Plasmid Vector	PHLAP92539976	Plasmid vector containing HLA-DRB1*15:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:173 protein. This plasmid can be used for constructing HLA-DRB1*15:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:174 Protein Expression Plasmid Vector	PHLAP92539977	Plasmid vector containing HLA-DRB1*15:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:174 protein. This plasmid can be used for constructing HLA-DRB1*15:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:175 Protein Expression Plasmid Vector	PHLAP92539978	Plasmid vector containing HLA-DRB1*15:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:175 protein. This plasmid can be used for constructing HLA-DRB1*15:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:176N Protein Expression Plasmid Vector	PHLAP92539979	Plasmid vector containing HLA-DRB1*15:176N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:176N protein. This plasmid can be used for constructing HLA-DRB1*15:176N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:176N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:177 Protein Expression Plasmid Vector	PHLAP92539980	Plasmid vector containing HLA-DRB1*15:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:177 protein. This plasmid can be used for constructing HLA-DRB1*15:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:178 Protein Expression Plasmid Vector	PHLAP92539981	Plasmid vector containing HLA-DRB1*15:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:178 protein. This plasmid can be used for constructing HLA-DRB1*15:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:179 Protein Expression Plasmid Vector	PHLAP92539982	Plasmid vector containing HLA-DRB1*15:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:179 protein. This plasmid can be used for constructing HLA-DRB1*15:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:17N Protein Expression Plasmid Vector	PHLAP92539983	Plasmid vector containing HLA-DRB1*15:17N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:17N protein. This plasmid can be used for constructing HLA-DRB1*15:17N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:17N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:18 Protein Expression Plasmid Vector	PHLAP92539984	Plasmid vector containing HLA-DRB1*15:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:18 protein. This plasmid can be used for constructing HLA-DRB1*15:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:180N Protein Expression Plasmid Vector	PHLAP92539985	Plasmid vector containing HLA-DRB1*15:180N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:180N protein. This plasmid can be used for constructing HLA-DRB1*15:180N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:180N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:181 Protein Expression Plasmid Vector	PHLAP92539986	Plasmid vector containing HLA-DRB1*15:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:181 protein. This plasmid can be used for constructing HLA-DRB1*15:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:182 Protein Expression Plasmid Vector	PHLAP92539987	Plasmid vector containing HLA-DRB1*15:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:182 protein. This plasmid can be used for constructing HLA-DRB1*15:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:183N Protein Expression Plasmid Vector	PHLAP92539988	Plasmid vector containing HLA-DRB1*15:183N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:183N protein. This plasmid can be used for constructing HLA-DRB1*15:183N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:183N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:184 Protein Expression Plasmid Vector	PHLAP92539989	Plasmid vector containing HLA-DRB1*15:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:184 protein. This plasmid can be used for constructing HLA-DRB1*15:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:185 Protein Expression Plasmid Vector	PHLAP92539990	Plasmid vector containing HLA-DRB1*15:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:185 protein. This plasmid can be used for constructing HLA-DRB1*15:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:186 Protein Expression Plasmid Vector	PHLAP92539991	Plasmid vector containing HLA-DRB1*15:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:186 protein. This plasmid can be used for constructing HLA-DRB1*15:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:187 Protein Expression Plasmid Vector	PHLAP92539992	Plasmid vector containing HLA-DRB1*15:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:187 protein. This plasmid can be used for constructing HLA-DRB1*15:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:188:01:01 Protein Expression Plasmid Vector	PHLAP92539993	Plasmid vector containing HLA-DRB1*15:188:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:188:01:01 protein. This plasmid can be used for constructing HLA-DRB1*15:188:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:188:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:188:01:02 Protein Expression Plasmid Vector	PHLAP92539994	Plasmid vector containing HLA-DRB1*15:188:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:188:01:02 protein. This plasmid can be used for constructing HLA-DRB1*15:188:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:188:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:189 Protein Expression Plasmid Vector	PHLAP92539995	Plasmid vector containing HLA-DRB1*15:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:189 protein. This plasmid can be used for constructing HLA-DRB1*15:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:19 Protein Expression Plasmid Vector	PHLAP92539996	Plasmid vector containing HLA-DRB1*15:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:19 protein. This plasmid can be used for constructing HLA-DRB1*15:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:190 Protein Expression Plasmid Vector	PHLAP92539997	Plasmid vector containing HLA-DRB1*15:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:190 protein. This plasmid can be used for constructing HLA-DRB1*15:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:191 Protein Expression Plasmid Vector	PHLAP92539998	Plasmid vector containing HLA-DRB1*15:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:191 protein. This plasmid can be used for constructing HLA-DRB1*15:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:192 Protein Expression Plasmid Vector	PHLAP92539999	Plasmid vector containing HLA-DRB1*15:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:192 protein. This plasmid can be used for constructing HLA-DRB1*15:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:193 Protein Expression Plasmid Vector	PHLAP925400000	Plasmid vector containing HLA-DRB1*15:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:193 protein. This plasmid can be used for constructing HLA-DRB1*15:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:194 Protein Expression Plasmid Vector	PHLAP925400001	Plasmid vector containing HLA-DRB1*15:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:194 protein. This plasmid can be used for constructing HLA-DRB1*15:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:195 Protein Expression Plasmid Vector	PHLAP92540002	Plasmid vector containing HLA-DRB1*15:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:195 protein. This plasmid can be used for constructing HLA-DRB1*15:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:196 Protein Expression Plasmid Vector	PHLAP92540003	Plasmid vector containing HLA-DRB1*15:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:196 protein. This plasmid can be used for constructing HLA-DRB1*15:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:197 Protein Expression Plasmid Vector	PHLAP92540004	Plasmid vector containing HLA-DRB1*15:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:197 protein. This plasmid can be used for constructing HLA-DRB1*15:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:198 Protein Expression Plasmid Vector	PHLAP92540005	Plasmid vector containing HLA-DRB1*15:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:198 protein. This plasmid can be used for constructing HLA-DRB1*15:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:199 Protein Expression Plasmid Vector	PHLAP92540006	Plasmid vector containing HLA-DRB1*15:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:199 protein. This plasmid can be used for constructing HLA-DRB1*15:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:20 Protein Expression Plasmid Vector	PHLAP92540007	Plasmid vector containing HLA-DRB1*15:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:20 protein. This plasmid can be used for constructing HLA-DRB1*15:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:200:01:01N Protein Expression Plasmid Vector	PHLAP92540008	Plasmid vector containing HLA-DRB1*15:200:01:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:200:01:01N protein. This plasmid can be used for constructing HLA-DRB1*15:200:01:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:200:01:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:200:01:02N Protein Expression Plasmid Vector	PHLAP92540009	Plasmid vector containing HLA-DRB1*15:200:01:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:200:01:02N protein. This plasmid can be used for constructing HLA-DRB1*15:200:01:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:200:01:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:201 Protein Expression Plasmid Vector	PHLAP92540010	Plasmid vector containing HLA-DRB1*15:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:201 protein. This plasmid can be used for constructing HLA-DRB1*15:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:202 Protein Expression Plasmid Vector	PHLAP92540011	Plasmid vector containing HLA-DRB1*15:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:202 protein. This plasmid can be used for constructing HLA-DRB1*15:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:203Q Protein Expression Plasmid Vector	PHLAP92540012	Plasmid vector containing HLA-DRB1*15:203Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:203Q protein. This plasmid can be used for constructing HLA-DRB1*15:203Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:203Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:204 Protein Expression Plasmid Vector	PHLAP92540013	Plasmid vector containing HLA-DRB1*15:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:204 protein. This plasmid can be used for constructing HLA-DRB1*15:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:205 Protein Expression Plasmid Vector	PHLAP92540014	Plasmid vector containing HLA-DRB1*15:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:205 protein. This plasmid can be used for constructing HLA-DRB1*15:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:206 Protein Expression Plasmid Vector	PHLAP92540015	Plasmid vector containing HLA-DRB1*15:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:206 protein. This plasmid can be used for constructing HLA-DRB1*15:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:207N Protein Expression Plasmid Vector	PHLAP92540016	Plasmid vector containing HLA-DRB1*15:207N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:207N protein. This plasmid can be used for constructing HLA-DRB1*15:207N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:207N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:208 Protein Expression Plasmid Vector	PHLAP92540017	Plasmid vector containing HLA-DRB1*15:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:208 protein. This plasmid can be used for constructing HLA-DRB1*15:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:209N Protein Expression Plasmid Vector	PHLAP92540018	Plasmid vector containing HLA-DRB1*15:209N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:209N protein. This plasmid can be used for constructing HLA-DRB1*15:209N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:209N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:21 Protein Expression Plasmid Vector	PHLAP92540019	Plasmid vector containing HLA-DRB1*15:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:21 protein. This plasmid can be used for constructing HLA-DRB1*15:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:210 Protein Expression Plasmid Vector	PHLAP92540020	Plasmid vector containing HLA-DRB1*15:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:210 protein. This plasmid can be used for constructing HLA-DRB1*15:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:211 Protein Expression Plasmid Vector	PHLAP92540021	Plasmid vector containing HLA-DRB1*15:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:211 protein. This plasmid can be used for constructing HLA-DRB1*15:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:212 Protein Expression Plasmid Vector	PHLAP92540022	Plasmid vector containing HLA-DRB1*15:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:212 protein. This plasmid can be used for constructing HLA-DRB1*15:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:213 Protein Expression Plasmid Vector	PHLAP92540023	Plasmid vector containing HLA-DRB1*15:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:213 protein. This plasmid can be used for constructing HLA-DRB1*15:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:214 Protein Expression Plasmid Vector	PHLAP92540024	Plasmid vector containing HLA-DRB1*15:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:214 protein. This plasmid can be used for constructing HLA-DRB1*15:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:215 Protein Expression Plasmid Vector	PHLAP92540025	Plasmid vector containing HLA-DRB1*15:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:215 protein. This plasmid can be used for constructing HLA-DRB1*15:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:216 Protein Expression Plasmid Vector	PHLAP92540026	Plasmid vector containing HLA-DRB1*15:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:216 protein. This plasmid can be used for constructing HLA-DRB1*15:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:217N Protein Expression Plasmid Vector	PHLAP92540027	Plasmid vector containing HLA-DRB1*15:217N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:217N protein. This plasmid can be used for constructing HLA-DRB1*15:217N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:217N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:218 Protein Expression Plasmid Vector	PHLAP92540028	Plasmid vector containing HLA-DRB1*15:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:218 protein. This plasmid can be used for constructing HLA-DRB1*15:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:219 Protein Expression Plasmid Vector	PHLAP92540029	Plasmid vector containing HLA-DRB1*15:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:219 protein. This plasmid can be used for constructing HLA-DRB1*15:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:22 Protein Expression Plasmid Vector	PHLAP92540030	Plasmid vector containing HLA-DRB1*15:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:22 protein. This plasmid can be used for constructing HLA-DRB1*15:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:220 Protein Expression Plasmid Vector	PHLAP92540031	Plasmid vector containing HLA-DRB1*15:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:220 protein. This plasmid can be used for constructing HLA-DRB1*15:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:221 Protein Expression Plasmid Vector	PHLAP92540032	Plasmid vector containing HLA-DRB1*15:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:221 protein. This plasmid can be used for constructing HLA-DRB1*15:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:222 Protein Expression Plasmid Vector	PHLAP92540033	Plasmid vector containing HLA-DRB1*15:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:222 protein. This plasmid can be used for constructing HLA-DRB1*15:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:223 Protein Expression Plasmid Vector	PHLAP92540034	Plasmid vector containing HLA-DRB1*15:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:223 protein. This plasmid can be used for constructing HLA-DRB1*15:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:224 Protein Expression Plasmid Vector	PHLAP92540035	Plasmid vector containing HLA-DRB1*15:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:224 protein. This plasmid can be used for constructing HLA-DRB1*15:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:225 Protein Expression Plasmid Vector	PHLAP92540036	Plasmid vector containing HLA-DRB1*15:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:225 protein. This plasmid can be used for constructing HLA-DRB1*15:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:226 Protein Expression Plasmid Vector	PHLAP92540037	Plasmid vector containing HLA-DRB1*15:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:226 protein. This plasmid can be used for constructing HLA-DRB1*15:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:227 Protein Expression Plasmid Vector	PHLAP92540038	Plasmid vector containing HLA-DRB1*15:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:227 protein. This plasmid can be used for constructing HLA-DRB1*15:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:228 Protein Expression Plasmid Vector	PHLAP92540039	Plasmid vector containing HLA-DRB1*15:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:228 protein. This plasmid can be used for constructing HLA-DRB1*15:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:229 Protein Expression Plasmid Vector	PHLAP92540040	Plasmid vector containing HLA-DRB1*15:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:229 protein. This plasmid can be used for constructing HLA-DRB1*15:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:23 Protein Expression Plasmid Vector	PHLAP92540041	Plasmid vector containing HLA-DRB1*15:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:23 protein. This plasmid can be used for constructing HLA-DRB1*15:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:230 Protein Expression Plasmid Vector	PHLAP92540042	Plasmid vector containing HLA-DRB1*15:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:230 protein. This plasmid can be used for constructing HLA-DRB1*15:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:231N Protein Expression Plasmid Vector	PHLAP92540043	Plasmid vector containing HLA-DRB1*15:231N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:231N protein. This plasmid can be used for constructing HLA-DRB1*15:231N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:231N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:232 Protein Expression Plasmid Vector	PHLAP92540044	Plasmid vector containing HLA-DRB1*15:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:232 protein. This plasmid can be used for constructing HLA-DRB1*15:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:233 Protein Expression Plasmid Vector	PHLAP92540045	Plasmid vector containing HLA-DRB1*15:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:233 protein. This plasmid can be used for constructing HLA-DRB1*15:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:234 Protein Expression Plasmid Vector	PHLAP92540046	Plasmid vector containing HLA-DRB1*15:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:234 protein. This plasmid can be used for constructing HLA-DRB1*15:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:235 Protein Expression Plasmid Vector	PHLAP92540047	Plasmid vector containing HLA-DRB1*15:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:235 protein. This plasmid can be used for constructing HLA-DRB1*15:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:236N Protein Expression Plasmid Vector	PHLAP92540048	Plasmid vector containing HLA-DRB1*15:236N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:236N protein. This plasmid can be used for constructing HLA-DRB1*15:236N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:236N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:237 Protein Expression Plasmid Vector	PHLAP92540049	Plasmid vector containing HLA-DRB1*15:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:237 protein. This plasmid can be used for constructing HLA-DRB1*15:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:238 Protein Expression Plasmid Vector	PHLAP92540050	Plasmid vector containing HLA-DRB1*15:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:238 protein. This plasmid can be used for constructing HLA-DRB1*15:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:239 Protein Expression Plasmid Vector	PHLAP92540051	Plasmid vector containing HLA-DRB1*15:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:239 protein. This plasmid can be used for constructing HLA-DRB1*15:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:24 Protein Expression Plasmid Vector	PHLAP92540052	Plasmid vector containing HLA-DRB1*15:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:24 protein. This plasmid can be used for constructing HLA-DRB1*15:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:240 Protein Expression Plasmid Vector	PHLAP92540053	Plasmid vector containing HLA-DRB1*15:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:240 protein. This plasmid can be used for constructing HLA-DRB1*15:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:25 Protein Expression Plasmid Vector	PHLAP92540054	Plasmid vector containing HLA-DRB1*15:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:25 protein. This plasmid can be used for constructing HLA-DRB1*15:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:26 Protein Expression Plasmid Vector	PHLAP92540055	Plasmid vector containing HLA-DRB1*15:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:26 protein. This plasmid can be used for constructing HLA-DRB1*15:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:27 Protein Expression Plasmid Vector	PHLAP92540056	Plasmid vector containing HLA-DRB1*15:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:27 protein. This plasmid can be used for constructing HLA-DRB1*15:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:28 Protein Expression Plasmid Vector	PHLAP92540057	Plasmid vector containing HLA-DRB1*15:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:28 protein. This plasmid can be used for constructing HLA-DRB1*15:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:29 Protein Expression Plasmid Vector	PHLAP92540058	Plasmid vector containing HLA-DRB1*15:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:29 protein. This plasmid can be used for constructing HLA-DRB1*15:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB1*15:30 Protein Expression Plasmid Vector	PHLAP92540059	Plasmid vector containing HLA-DRB1*15:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:30 protein. This plasmid can be used for constructing HLA-DRB1*15:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:31:01 Protein Expression Plasmid Vector	PHLAP92540060	Plasmid vector containing HLA-DRB1*15:31:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:31:01 protein. This plasmid can be used for constructing HLA-DRB1*15:31:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:31:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:31:02 Protein Expression Plasmid Vector	PHLAP92540061	Plasmid vector containing HLA-DRB1*15:31:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:31:02 protein. This plasmid can be used for constructing HLA-DRB1*15:31:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:31:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:32 Protein Expression Plasmid Vector	PHLAP92540062	Plasmid vector containing HLA-DRB1*15:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:32 protein. This plasmid can be used for constructing HLA-DRB1*15:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:33 Protein Expression Plasmid Vector	PHLAP92540063	Plasmid vector containing HLA-DRB1*15:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:33 protein. This plasmid can be used for constructing HLA-DRB1*15:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:34 Protein Expression Plasmid Vector	PHLAP92540064	Plasmid vector containing HLA-DRB1*15:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:34 protein. This plasmid can be used for constructing HLA-DRB1*15:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:35 Protein Expression Plasmid Vector	PHLAP92540065	Plasmid vector containing HLA-DRB1*15:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:35 protein. This plasmid can be used for constructing HLA-DRB1*15:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:36 Protein Expression Plasmid Vector	PHLAP92540066	Plasmid vector containing HLA-DRB1*15:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:36 protein. This plasmid can be used for constructing HLA-DRB1*15:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:37:01 Protein Expression Plasmid Vector	PHLAP92540067	Plasmid vector containing HLA-DRB1*15:37:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:37:01 protein. This plasmid can be used for constructing HLA-DRB1*15:37:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:37:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:37:02 Protein Expression Plasmid Vector	PHLAP92540068	Plasmid vector containing HLA-DRB1*15:37:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:37:02 protein. This plasmid can be used for constructing HLA-DRB1*15:37:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:37:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:38:01 Protein Expression Plasmid Vector	PHLAP92540069	Plasmid vector containing HLA-DRB1*15:38:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:38:01 protein. This plasmid can be used for constructing HLA-DRB1*15:38:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:38:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:38:02 Protein Expression Plasmid Vector	PHLAP92540070	Plasmid vector containing HLA-DRB1*15:38:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:38:02 protein. This plasmid can be used for constructing HLA-DRB1*15:38:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:38:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:39 Protein Expression Plasmid Vector	PHLAP92540071	Plasmid vector containing HLA-DRB1*15:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:39 protein. This plasmid can be used for constructing HLA-DRB1*15:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:40 Protein Expression Plasmid Vector	PHLAP92540072	Plasmid vector containing HLA-DRB1*15:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:40 protein. This plasmid can be used for constructing HLA-DRB1*15:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:41 Protein Expression Plasmid Vector	PHLAP92540073	Plasmid vector containing HLA-DRB1*15:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:41 protein. This plasmid can be used for constructing HLA-DRB1*15:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:42 Protein Expression Plasmid Vector	PHLAP92540074	Plasmid vector containing HLA-DRB1*15:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:42 protein. This plasmid can be used for constructing HLA-DRB1*15:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:43 Protein Expression Plasmid Vector	PHLAP92540075	Plasmid vector containing HLA-DRB1*15:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:43 protein. This plasmid can be used for constructing HLA-DRB1*15:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:44 Protein Expression Plasmid Vector	PHLAP92540076	Plasmid vector containing HLA-DRB1*15:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:44 protein. This plasmid can be used for constructing HLA-DRB1*15:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:45 Protein Expression Plasmid Vector	PHLAP92540077	Plasmid vector containing HLA-DRB1*15:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:45 protein. This plasmid can be used for constructing HLA-DRB1*15:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:46 Protein Expression Plasmid Vector	PHLAP92540078	Plasmid vector containing HLA-DRB1*15:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:46 protein. This plasmid can be used for constructing HLA-DRB1*15:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:47 Protein Expression Plasmid Vector	PHLAP92540079	Plasmid vector containing HLA-DRB1*15:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:47 protein. This plasmid can be used for constructing HLA-DRB1*15:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:48 Protein Expression Plasmid Vector	PHLAP92540080	Plasmid vector containing HLA-DRB1*15:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:48 protein. This plasmid can be used for constructing HLA-DRB1*15:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:49 Protein Expression Plasmid Vector	PHLAP92540081	Plasmid vector containing HLA-DRB1*15:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:49 protein. This plasmid can be used for constructing HLA-DRB1*15:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB1*15:50N Protein Expression Plasmid Vector	PHLAP92540082	Plasmid vector containing HLA-DRB1*15:50N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:50N protein. This plasmid can be used for constructing HLA-DRB1*15:50N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:50N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:51 Protein Expression Plasmid Vector	PHLAP92540083	Plasmid vector containing HLA-DRB1*15:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:51 protein. This plasmid can be used for constructing HLA-DRB1*15:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:52 Protein Expression Plasmid Vector	PHLAP92540084	Plasmid vector containing HLA-DRB1*15:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:52 protein. This plasmid can be used for constructing HLA-DRB1*15:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:53 Protein Expression Plasmid Vector	PHLAP92540085	Plasmid vector containing HLA-DRB1*15:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:53 protein. This plasmid can be used for constructing HLA-DRB1*15:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:54 Protein Expression Plasmid Vector	PHLAP92540086	Plasmid vector containing HLA-DRB1*15:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:54 protein. This plasmid can be used for constructing HLA-DRB1*15:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:55 Protein Expression Plasmid Vector	PHLAP92540087	Plasmid vector containing HLA-DRB1*15:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:55 protein. This plasmid can be used for constructing HLA-DRB1*15:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:56 Protein Expression Plasmid Vector	PHLAP92540088	Plasmid vector containing HLA-DRB1*15:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:56 protein. This plasmid can be used for constructing HLA-DRB1*15:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:57:01 Protein Expression Plasmid Vector	PHLAP92540089	Plasmid vector containing HLA-DRB1*15:57:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:57:01 protein. This plasmid can be used for constructing HLA-DRB1*15:57:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:57:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:57:02 Protein Expression Plasmid Vector	PHLAP92540090	Plasmid vector containing HLA-DRB1*15:57:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:57:02 protein. This plasmid can be used for constructing HLA-DRB1*15:57:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:57:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:58 Protein Expression Plasmid Vector	PHLAP92540091	Plasmid vector containing HLA-DRB1*15:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:58 protein. This plasmid can be used for constructing HLA-DRB1*15:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:59 Protein Expression Plasmid Vector	PHLAP92540092	Plasmid vector containing HLA-DRB1*15:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:59 protein. This plasmid can be used for constructing HLA-DRB1*15:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:60 Protein Expression Plasmid Vector	PHLAP92540093	Plasmid vector containing HLA-DRB1*15:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:60 protein. This plasmid can be used for constructing HLA-DRB1*15:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:61 Protein Expression Plasmid Vector	PHLAP92540094	Plasmid vector containing HLA-DRB1*15:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:61 protein. This plasmid can be used for constructing HLA-DRB1*15:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:62 Protein Expression Plasmid Vector	PHLAP92540095	Plasmid vector containing HLA-DRB1*15:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:62 protein. This plasmid can be used for constructing HLA-DRB1*15:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:63 Protein Expression Plasmid Vector	PHLAP92540096	Plasmid vector containing HLA-DRB1*15:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:63 protein. This plasmid can be used for constructing HLA-DRB1*15:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:64 Protein Expression Plasmid Vector	PHLAP92540097	Plasmid vector containing HLA-DRB1*15:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:64 protein. This plasmid can be used for constructing HLA-DRB1*15:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB1*15:65 Protein Expression Plasmid Vector	PHLAP92540098	Plasmid vector containing HLA-DRB1*15:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:65 protein. This plasmid can be used for constructing HLA-DRB1*15:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:66:01 Protein Expression Plasmid Vector	PHLAP92540099	Plasmid vector containing HLA-DRB1*15:66:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:66:01 protein. This plasmid can be used for constructing HLA-DRB1*15:66:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:66:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:66:02 Protein Expression Plasmid Vector	PHLAP925401000	Plasmid vector containing HLA-DRB1*15:66:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:66:02 protein. This plasmid can be used for constructing HLA-DRB1*15:66:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:66:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:67 Protein Expression Plasmid Vector	PHLAP925401001	Plasmid vector containing HLA-DRB1*15:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:67 protein. This plasmid can be used for constructing HLA-DRB1*15:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:68 Protein Expression Plasmid Vector	PHLAP925401002	Plasmid vector containing HLA-DRB1*15:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:68 protein. This plasmid can be used for constructing HLA-DRB1*15:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:69 Protein Expression Plasmid Vector	PHLAP925401003	Plasmid vector containing HLA-DRB1*15:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:69 protein. This plasmid can be used for constructing HLA-DRB1*15:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:70 Protein Expression Plasmid Vector	PHLAP925401004	Plasmid vector containing HLA-DRB1*15:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:70 protein. This plasmid can be used for constructing HLA-DRB1*15:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:71 Protein Expression Plasmid Vector	PHLAP925401005	Plasmid vector containing HLA-DRB1*15:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:71 protein. This plasmid can be used for constructing HLA-DRB1*15:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*15:72 Protein Expression Plasmid Vector	PHLAP92540106	Plasmid vector containing HLA-DRB1*15:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:72 protein. This plasmid can be used for constructing HLA-DRB1*15:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:73 Protein Expression Plasmid Vector	PHLAP92540107	Plasmid vector containing HLA-DRB1*15:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:73 protein. This plasmid can be used for constructing HLA-DRB1*15:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:74 Protein Expression Plasmid Vector	PHLAP92540108	Plasmid vector containing HLA-DRB1*15:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:74 protein. This plasmid can be used for constructing HLA-DRB1*15:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:75 Protein Expression Plasmid Vector	PHLAP92540109	Plasmid vector containing HLA-DRB1*15:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:75 protein. This plasmid can be used for constructing HLA-DRB1*15:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:76 Protein Expression Plasmid Vector	PHLAP92540110	Plasmid vector containing HLA-DRB1*15:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:76 protein. This plasmid can be used for constructing HLA-DRB1*15:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:77 Protein Expression Plasmid Vector	PHLAP92540111	Plasmid vector containing HLA-DRB1*15:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:77 protein. This plasmid can be used for constructing HLA-DRB1*15:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:78 Protein Expression Plasmid Vector	PHLAP92540112	Plasmid vector containing HLA-DRB1*15:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:78 protein. This plasmid can be used for constructing HLA-DRB1*15:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:79 Protein Expression Plasmid Vector	PHLAP92540113	Plasmid vector containing HLA-DRB1*15:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:79 protein. This plasmid can be used for constructing HLA-DRB1*15:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB1*15:80N Protein Expression Plasmid Vector	PHLAP92540114	Plasmid vector containing HLA-DRB1*15:80N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:80N protein. This plasmid can be used for constructing HLA-DRB1*15:80N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:80N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:81 Protein Expression Plasmid Vector	PHLAP92540115	Plasmid vector containing HLA-DRB1*15:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:81 protein. This plasmid can be used for constructing HLA-DRB1*15:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:82 Protein Expression Plasmid Vector	PHLAP92540116	Plasmid vector containing HLA-DRB1*15:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:82 protein. This plasmid can be used for constructing HLA-DRB1*15:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:83 Protein Expression Plasmid Vector	PHLAP92540117	Plasmid vector containing HLA-DRB1*15:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:83 protein. This plasmid can be used for constructing HLA-DRB1*15:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:84 Protein Expression Plasmid Vector	PHLAP92540118	Plasmid vector containing HLA-DRB1*15:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:84 protein. This plasmid can be used for constructing HLA-DRB1*15:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:85 Protein Expression Plasmid Vector	PHLAP92540119	Plasmid vector containing HLA-DRB1*15:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:85 protein. This plasmid can be used for constructing HLA-DRB1*15:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:86 Protein Expression Plasmid Vector	PHLAP92540120	Plasmid vector containing HLA-DRB1*15:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:86 protein. This plasmid can be used for constructing HLA-DRB1*15:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB1*15:87 Protein Expression Plasmid Vector	PHLAP92540121	Plasmid vector containing HLA-DRB1*15:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:87 protein. This plasmid can be used for constructing HLA-DRB1*15:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB1*15:88 Protein Expression Plasmid Vector	PHLAP92540122	Plasmid vector containing HLA-DRB1*15:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:88 protein. This plasmid can be used for constructing HLA-DRB1*15:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:89 Protein Expression Plasmid Vector	PHLAP92540123	Plasmid vector containing HLA-DRB1*15:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:89 protein. This plasmid can be used for constructing HLA-DRB1*15:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:90 Protein Expression Plasmid Vector	PHLAP92540124	Plasmid vector containing HLA-DRB1*15:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:90 protein. This plasmid can be used for constructing HLA-DRB1*15:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:91 Protein Expression Plasmid Vector	PHLAP92540125	Plasmid vector containing HLA-DRB1*15:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:91 protein. This plasmid can be used for constructing HLA-DRB1*15:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:92 Protein Expression Plasmid Vector	PHLAP92540126	Plasmid vector containing HLA-DRB1*15:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:92 protein. This plasmid can be used for constructing HLA-DRB1*15:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:93 Protein Expression Plasmid Vector	PHLAP92540127	Plasmid vector containing HLA-DRB1*15:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:93 protein. This plasmid can be used for constructing HLA-DRB1*15:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:94 Protein Expression Plasmid Vector	PHLAP92540128	Plasmid vector containing HLA-DRB1*15:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:94 protein. This plasmid can be used for constructing HLA-DRB1*15:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*15:95 Protein Expression Plasmid Vector	PHLAP92540129	Plasmid vector containing HLA-DRB1*15:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:95 protein. This plasmid can be used for constructing HLA-DRB1*15:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB1*15:96 Protein Expression Plasmid Vector	PHLAP92540130	Plasmid vector containing HLA-DRB1*15:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:96 protein. This plasmid can be used for constructing HLA-DRB1*15:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:97 Protein Expression Plasmid Vector	PHLAP92540131	Plasmid vector containing HLA-DRB1*15:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:97 protein. This plasmid can be used for constructing HLA-DRB1*15:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:98 Protein Expression Plasmid Vector	PHLAP92540132	Plasmid vector containing HLA-DRB1*15:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:98 protein. This plasmid can be used for constructing HLA-DRB1*15:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*15:99 Protein Expression Plasmid Vector	PHLAP92540133	Plasmid vector containing HLA-DRB1*15:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*15:99 protein. This plasmid can be used for constructing HLA-DRB1*15:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*15:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:01:01 Protein Expression Plasmid Vector	PHLAP92540134	Plasmid vector containing HLA-DRB1*16:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:01:01 protein. This plasmid can be used for constructing HLA-DRB1*16:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:01:02 Protein Expression Plasmid Vector	PHLAP92540135	Plasmid vector containing HLA-DRB1*16:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:01:02 protein. This plasmid can be used for constructing HLA-DRB1*16:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:01:03 Protein Expression Plasmid Vector	PHLAP92540136	Plasmid vector containing HLA-DRB1*16:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:01:03 protein. This plasmid can be used for constructing HLA-DRB1*16:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:01:01:04 Protein Expression Plasmid Vector	PHLAP92540137	Plasmid vector containing HLA-DRB1*16:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:01:04 protein. This plasmid can be used for constructing HLA-DRB1*16:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:02 Protein Expression Plasmid Vector	PHLAP92540138	Plasmid vector containing HLA-DRB1*16:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:02 protein. This plasmid can be used for constructing HLA-DRB1*16:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:03 Protein Expression Plasmid Vector	PHLAP92540139	Plasmid vector containing HLA-DRB1*16:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:03 protein. This plasmid can be used for constructing HLA-DRB1*16:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:04 Protein Expression Plasmid Vector	PHLAP92540140	Plasmid vector containing HLA-DRB1*16:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:04 protein. This plasmid can be used for constructing HLA-DRB1*16:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:05 Protein Expression Plasmid Vector	PHLAP92540141	Plasmid vector containing HLA-DRB1*16:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:05 protein. This plasmid can be used for constructing HLA-DRB1*16:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:06 Protein Expression Plasmid Vector	PHLAP92540142	Plasmid vector containing HLA-DRB1*16:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:06 protein. This plasmid can be used for constructing HLA-DRB1*16:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:07 Protein Expression Plasmid Vector	PHLAP92540143	Plasmid vector containing HLA-DRB1*16:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:07 protein. This plasmid can be used for constructing HLA-DRB1*16:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:01:08 Protein Expression Plasmid Vector	PHLAP92540144	Plasmid vector containing HLA-DRB1*16:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:08 protein. This plasmid can be used for constructing HLA-DRB1*16:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:09 Protein Expression Plasmid Vector	PHLAP92540145	Plasmid vector containing HLA-DRB1*16:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:09 protein. This plasmid can be used for constructing HLA-DRB1*16:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:10 Protein Expression Plasmid Vector	PHLAP92540146	Plasmid vector containing HLA-DRB1*16:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:10 protein. This plasmid can be used for constructing HLA-DRB1*16:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:11 Protein Expression Plasmid Vector	PHLAP92540147	Plasmid vector containing HLA-DRB1*16:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:11 protein. This plasmid can be used for constructing HLA-DRB1*16:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:12 Protein Expression Plasmid Vector	PHLAP92540148	Plasmid vector containing HLA-DRB1*16:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:12 protein. This plasmid can be used for constructing HLA-DRB1*16:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:13 Protein Expression Plasmid Vector	PHLAP92540149	Plasmid vector containing HLA-DRB1*16:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:13 protein. This plasmid can be used for constructing HLA-DRB1*16:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:14 Protein Expression Plasmid Vector	PHLAP92540150	Plasmid vector containing HLA-DRB1*16:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:14 protein. This plasmid can be used for constructing HLA-DRB1*16:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:01:15 Protein Expression Plasmid Vector	PHLAP92540151	Plasmid vector containing HLA-DRB1*16:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:15 protein. This plasmid can be used for constructing HLA-DRB1*16:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:16 Protein Expression Plasmid Vector	PHLAP92540152	Plasmid vector containing HLA-DRB1*16:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:16 protein. This plasmid can be used for constructing HLA-DRB1*16:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:17 Protein Expression Plasmid Vector	PHLAP92540153	Plasmid vector containing HLA-DRB1*16:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:17 protein. This plasmid can be used for constructing HLA-DRB1*16:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:18 Protein Expression Plasmid Vector	PHLAP92540154	Plasmid vector containing HLA-DRB1*16:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:18 protein. This plasmid can be used for constructing HLA-DRB1*16:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:01:19 Protein Expression Plasmid Vector	PHLAP92540155	Plasmid vector containing HLA-DRB1*16:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:01:19 protein. This plasmid can be used for constructing HLA-DRB1*16:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:01:01 Protein Expression Plasmid Vector	PHLAP92540156	Plasmid vector containing HLA-DRB1*16:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:01:01 protein. This plasmid can be used for constructing HLA-DRB1*16:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:01:02 Protein Expression Plasmid Vector	PHLAP92540157	Plasmid vector containing HLA-DRB1*16:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:01:02 protein. This plasmid can be used for constructing HLA-DRB1*16:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:02:01:03 Protein Expression Plasmid Vector	PHLAP92540158	Plasmid vector containing HLA-DRB1*16:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:01:03 protein. This plasmid can be used for constructing HLA-DRB1*16:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:01:04 Protein Expression Plasmid Vector	PHLAP92540159	Plasmid vector containing HLA-DRB1*16:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:01:04 protein. This plasmid can be used for constructing HLA-DRB1*16:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:01:05 Protein Expression Plasmid Vector	PHLAP92540160	Plasmid vector containing HLA-DRB1*16:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:01:05 protein. This plasmid can be used for constructing HLA-DRB1*16:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:01:06 Protein Expression Plasmid Vector	PHLAP92540161	Plasmid vector containing HLA-DRB1*16:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:01:06 protein. This plasmid can be used for constructing HLA-DRB1*16:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:02 Protein Expression Plasmid Vector	PHLAP92540162	Plasmid vector containing HLA-DRB1*16:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:02 protein. This plasmid can be used for constructing HLA-DRB1*16:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:03 Protein Expression Plasmid Vector	PHLAP92540163	Plasmid vector containing HLA-DRB1*16:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:03 protein. This plasmid can be used for constructing HLA-DRB1*16:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:04 Protein Expression Plasmid Vector	PHLAP92540164	Plasmid vector containing HLA-DRB1*16:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:04 protein. This plasmid can be used for constructing HLA-DRB1*16:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:02:05 Protein Expression Plasmid Vector	PHLAP92540165	Plasmid vector containing HLA-DRB1*16:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:05 protein. This plasmid can be used for constructing HLA-DRB1*16:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:06 Protein Expression Plasmid Vector	PHLAP92540166	Plasmid vector containing HLA-DRB1*16:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:06 protein. This plasmid can be used for constructing HLA-DRB1*16:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:07 Protein Expression Plasmid Vector	PHLAP92540167	Plasmid vector containing HLA-DRB1*16:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:07 protein. This plasmid can be used for constructing HLA-DRB1*16:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:08 Protein Expression Plasmid Vector	PHLAP92540168	Plasmid vector containing HLA-DRB1*16:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:08 protein. This plasmid can be used for constructing HLA-DRB1*16:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:09 Protein Expression Plasmid Vector	PHLAP92540169	Plasmid vector containing HLA-DRB1*16:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:09 protein. This plasmid can be used for constructing HLA-DRB1*16:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:10 Protein Expression Plasmid Vector	PHLAP92540170	Plasmid vector containing HLA-DRB1*16:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:10 protein. This plasmid can be used for constructing HLA-DRB1*16:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:11 Protein Expression Plasmid Vector	PHLAP92540171	Plasmid vector containing HLA-DRB1*16:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:11 protein. This plasmid can be used for constructing HLA-DRB1*16:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:02:12 Protein Expression Plasmid Vector	PHLAP92540172	Plasmid vector containing HLA-DRB1*16:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:12 protein. This plasmid can be used for constructing HLA-DRB1*16:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:02:13 Protein Expression Plasmid Vector	PHLAP92540173	Plasmid vector containing HLA-DRB1*16:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:02:13 protein. This plasmid can be used for constructing HLA-DRB1*16:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:03 Protein Expression Plasmid Vector	PHLAP92540174	Plasmid vector containing HLA-DRB1*16:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:03 protein. This plasmid can be used for constructing HLA-DRB1*16:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:04:01 Protein Expression Plasmid Vector	PHLAP92540175	Plasmid vector containing HLA-DRB1*16:04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:04:01 protein. This plasmid can be used for constructing HLA-DRB1*16:04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:04:02 Protein Expression Plasmid Vector	PHLAP92540176	Plasmid vector containing HLA-DRB1*16:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:04:02 protein. This plasmid can be used for constructing HLA-DRB1*16:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:05:01 Protein Expression Plasmid Vector	PHLAP92540177	Plasmid vector containing HLA-DRB1*16:05:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:05:01 protein. This plasmid can be used for constructing HLA-DRB1*16:05:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:05:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:05:02 Protein Expression Plasmid Vector	PHLAP92540178	Plasmid vector containing HLA-DRB1*16:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:05:02 protein. This plasmid can be used for constructing HLA-DRB1*16:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:07 Protein Expression Plasmid Vector	PHLAP92540179	Plasmid vector containing HLA-DRB1*16:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:07 protein. This plasmid can be used for constructing HLA-DRB1*16:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:08 Protein Expression Plasmid Vector	PHLAP92540180	Plasmid vector containing HLA-DRB1*16:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:08 protein. This plasmid can be used for constructing HLA-DRB1*16:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:09:01 Protein Expression Plasmid Vector	PHLAP92540181	Plasmid vector containing HLA-DRB1*16:09:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:09:01 protein. This plasmid can be used for constructing HLA-DRB1*16:09:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:09:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:09:02 Protein Expression Plasmid Vector	PHLAP92540182	Plasmid vector containing HLA-DRB1*16:09:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:09:02 protein. This plasmid can be used for constructing HLA-DRB1*16:09:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:09:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:10:01 Protein Expression Plasmid Vector	PHLAP92540183	Plasmid vector containing HLA-DRB1*16:10:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:10:01 protein. This plasmid can be used for constructing HLA-DRB1*16:10:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:10:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:10:02 Protein Expression Plasmid Vector	PHLAP92540184	Plasmid vector containing HLA-DRB1*16:10:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:10:02 protein. This plasmid can be used for constructing HLA-DRB1*16:10:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:10:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:11 Protein Expression Plasmid Vector	PHLAP92540185	Plasmid vector containing HLA-DRB1*16:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:11 protein. This plasmid can be used for constructing HLA-DRB1*16:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:12 Protein Expression Plasmid Vector	PHLAP92540186	Plasmid vector containing HLA-DRB1*16:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:12 protein. This plasmid can be used for constructing HLA-DRB1*16:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:13N Protein Expression Plasmid Vector	PHLAP92540187	Plasmid vector containing HLA-DRB1*16:13N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:13N protein. This plasmid can be used for constructing HLA-DRB1*16:13N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:13N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:14 Protein Expression Plasmid Vector	PHLAP92540188	Plasmid vector containing HLA-DRB1*16:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:14 protein. This plasmid can be used for constructing HLA-DRB1*16:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:15 Protein Expression Plasmid Vector	PHLAP92540189	Plasmid vector containing HLA-DRB1*16:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:15 protein. This plasmid can be used for constructing HLA-DRB1*16:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:16 Protein Expression Plasmid Vector	PHLAP92540190	Plasmid vector containing HLA-DRB1*16:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:16 protein. This plasmid can be used for constructing HLA-DRB1*16:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:17 Protein Expression Plasmid Vector	PHLAP92540191	Plasmid vector containing HLA-DRB1*16:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:17 protein. This plasmid can be used for constructing HLA-DRB1*16:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:18 Protein Expression Plasmid Vector	PHLAP92540192	Plasmid vector containing HLA-DRB1*16:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:18 protein. This plasmid can be used for constructing HLA-DRB1*16:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:19 Protein Expression Plasmid Vector	PHLAP92540193	Plasmid vector containing HLA-DRB1*16:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:19 protein. This plasmid can be used for constructing HLA-DRB1*16:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:20 Protein Expression Plasmid Vector	PHLAP92540194	Plasmid vector containing HLA-DRB1*16:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:20 protein. This plasmid can be used for constructing HLA-DRB1*16:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:21N Protein Expression Plasmid Vector	PHLAP92540195	Plasmid vector containing HLA-DRB1*16:21N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:21N protein. This plasmid can be used for constructing HLA-DRB1*16:21N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:21N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:22 Protein Expression Plasmid Vector	PHLAP92540196	Plasmid vector containing HLA-DRB1*16:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:22 protein. This plasmid can be used for constructing HLA-DRB1*16:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:23 Protein Expression Plasmid Vector	PHLAP92540197	Plasmid vector containing HLA-DRB1*16:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:23 protein. This plasmid can be used for constructing HLA-DRB1*16:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:24 Protein Expression Plasmid Vector	PHLAP92540198	Plasmid vector containing HLA-DRB1*16:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:24 protein. This plasmid can be used for constructing HLA-DRB1*16:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:25 Protein Expression Plasmid Vector	PHLAP92540199	Plasmid vector containing HLA-DRB1*16:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:25 protein. This plasmid can be used for constructing HLA-DRB1*16:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:26 Protein Expression Plasmid Vector	PHLAP92540200	Plasmid vector containing HLA-DRB1*16:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:26 protein. This plasmid can be used for constructing HLA-DRB1*16:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:27 Protein Expression Plasmid Vector	PHLAP92540201	Plasmid vector containing HLA-DRB1*16:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:27 protein. This plasmid can be used for constructing HLA-DRB1*16:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:28 Protein Expression Plasmid Vector	PHLAP92540202	Plasmid vector containing HLA-DRB1*16:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:28 protein. This plasmid can be used for constructing HLA-DRB1*16:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:29 Protein Expression Plasmid Vector	PHLAP92540203	Plasmid vector containing HLA-DRB1*16:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:29 protein. This plasmid can be used for constructing HLA-DRB1*16:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:30 Protein Expression Plasmid Vector	PHLAP92540204	Plasmid vector containing HLA-DRB1*16:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:30 protein. This plasmid can be used for constructing HLA-DRB1*16:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:31 Protein Expression Plasmid Vector	PHLAP92540205	Plasmid vector containing HLA-DRB1*16:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:31 protein. This plasmid can be used for constructing HLA-DRB1*16:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:32 Protein Expression Plasmid Vector	PHLAP92540206	Plasmid vector containing HLA-DRB1*16:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:32 protein. This plasmid can be used for constructing HLA-DRB1*16:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:33 Protein Expression Plasmid Vector	PHLAP92540207	Plasmid vector containing HLA-DRB1*16:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:33 protein. This plasmid can be used for constructing HLA-DRB1*16:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:34 Protein Expression Plasmid Vector	PHLAP92540208	Plasmid vector containing HLA-DRB1*16:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:34 protein. This plasmid can be used for constructing HLA-DRB1*16:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:35 Protein Expression Plasmid Vector	PHLAP92540209	Plasmid vector containing HLA-DRB1*16:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:35 protein. This plasmid can be used for constructing HLA-DRB1*16:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB1*16:36 Protein Expression Plasmid Vector	PHLAP92540210	Plasmid vector containing HLA-DRB1*16:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:36 protein. This plasmid can be used for constructing HLA-DRB1*16:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:37 Protein Expression Plasmid Vector	PHLAP92540211	Plasmid vector containing HLA-DRB1*16:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:37 protein. This plasmid can be used for constructing HLA-DRB1*16:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:38:01 Protein Expression Plasmid Vector	PHLAP92540212	Plasmid vector containing HLA-DRB1*16:38:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:38:01 protein. This plasmid can be used for constructing HLA-DRB1*16:38:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:38:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:38:02 Protein Expression Plasmid Vector	PHLAP92540213	Plasmid vector containing HLA-DRB1*16:38:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:38:02 protein. This plasmid can be used for constructing HLA-DRB1*16:38:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:38:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:39 Protein Expression Plasmid Vector	PHLAP92540214	Plasmid vector containing HLA-DRB1*16:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:39 protein. This plasmid can be used for constructing HLA-DRB1*16:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:40 Protein Expression Plasmid Vector	PHLAP92540215	Plasmid vector containing HLA-DRB1*16:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:40 protein. This plasmid can be used for constructing HLA-DRB1*16:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:41N Protein Expression Plasmid Vector	PHLAP92540216	Plasmid vector containing HLA-DRB1*16:41N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:41N protein. This plasmid can be used for constructing HLA-DRB1*16:41N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:41N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:42 Protein Expression Plasmid Vector	PHLAP92540217	Plasmid vector containing HLA-DRB1*16:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:42 protein. This plasmid can be used for constructing HLA-DRB1*16:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:43 Protein Expression Plasmid Vector	PHLAP92540218	Plasmid vector containing HLA-DRB1*16:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:43 protein. This plasmid can be used for constructing HLA-DRB1*16:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:44 Protein Expression Plasmid Vector	PHLAP92540219	Plasmid vector containing HLA-DRB1*16:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:44 protein. This plasmid can be used for constructing HLA-DRB1*16:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:45 Protein Expression Plasmid Vector	PHLAP92540220	Plasmid vector containing HLA-DRB1*16:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:45 protein. This plasmid can be used for constructing HLA-DRB1*16:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:46 Protein Expression Plasmid Vector	PHLAP92540221	Plasmid vector containing HLA-DRB1*16:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:46 protein. This plasmid can be used for constructing HLA-DRB1*16:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:47 Protein Expression Plasmid Vector	PHLAP92540222	Plasmid vector containing HLA-DRB1*16:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:47 protein. This plasmid can be used for constructing HLA-DRB1*16:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:48 Protein Expression Plasmid Vector	PHLAP92540223	Plasmid vector containing HLA-DRB1*16:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:48 protein. This plasmid can be used for constructing HLA-DRB1*16:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB1*16:49 Protein Expression Plasmid Vector	PHLAP92540224	Plasmid vector containing HLA-DRB1*16:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:49 protein. This plasmid can be used for constructing HLA-DRB1*16:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB1*16:50 Protein Expression Plasmid Vector	PHLAP92540225	Plasmid vector containing HLA-DRB1*16:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:50 protein. This plasmid can be used for constructing HLA-DRB1*16:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:51 Protein Expression Plasmid Vector	PHLAP92540226	Plasmid vector containing HLA-DRB1*16:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:51 protein. This plasmid can be used for constructing HLA-DRB1*16:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:52 Protein Expression Plasmid Vector	PHLAP92540227	Plasmid vector containing HLA-DRB1*16:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:52 protein. This plasmid can be used for constructing HLA-DRB1*16:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:53 Protein Expression Plasmid Vector	PHLAP92540228	Plasmid vector containing HLA-DRB1*16:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:53 protein. This plasmid can be used for constructing HLA-DRB1*16:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:54 Protein Expression Plasmid Vector	PHLAP92540229	Plasmid vector containing HLA-DRB1*16:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:54 protein. This plasmid can be used for constructing HLA-DRB1*16:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:55N Protein Expression Plasmid Vector	PHLAP92540230	Plasmid vector containing HLA-DRB1*16:55N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:55N protein. This plasmid can be used for constructing HLA-DRB1*16:55N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:55N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:56 Protein Expression Plasmid Vector	PHLAP92540231	Plasmid vector containing HLA-DRB1*16:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:56 protein. This plasmid can be used for constructing HLA-DRB1*16:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:57 Protein Expression Plasmid Vector	PHLAP92540232	Plasmid vector containing HLA-DRB1*16:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:57 protein. This plasmid can be used for constructing HLA-DRB1*16:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:58 Protein Expression Plasmid Vector	PHLAP92540233	Plasmid vector containing HLA-DRB1*16:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:58 protein. This plasmid can be used for constructing HLA-DRB1*16:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:59Q Protein Expression Plasmid Vector	PHLAP92540234	Plasmid vector containing HLA-DRB1*16:59Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:59Q protein. This plasmid can be used for constructing HLA-DRB1*16:59Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:59Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:60 Protein Expression Plasmid Vector	PHLAP92540235	Plasmid vector containing HLA-DRB1*16:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:60 protein. This plasmid can be used for constructing HLA-DRB1*16:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:61 Protein Expression Plasmid Vector	PHLAP92540236	Plasmid vector containing HLA-DRB1*16:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:61 protein. This plasmid can be used for constructing HLA-DRB1*16:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:62N Protein Expression Plasmid Vector	PHLAP92540237	Plasmid vector containing HLA-DRB1*16:62N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:62N protein. This plasmid can be used for constructing HLA-DRB1*16:62N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:62N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:63N Protein Expression Plasmid Vector	PHLAP92540238	Plasmid vector containing HLA-DRB1*16:63N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:63N protein. This plasmid can be used for constructing HLA-DRB1*16:63N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:63N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:64 Protein Expression Plasmid Vector	PHLAP92540239	Plasmid vector containing HLA-DRB1*16:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:64 protein. This plasmid can be used for constructing HLA-DRB1*16:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:65 Protein Expression Plasmid Vector	PHLAP92540240	Plasmid vector containing HLA-DRB1*16:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:65 protein. This plasmid can be used for constructing HLA-DRB1*16:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:66 Protein Expression Plasmid Vector	PHLAP92540241	Plasmid vector containing HLA-DRB1*16:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:66 protein. This plasmid can be used for constructing HLA-DRB1*16:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:67 Protein Expression Plasmid Vector	PHLAP92540242	Plasmid vector containing HLA-DRB1*16:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:67 protein. This plasmid can be used for constructing HLA-DRB1*16:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:68 Protein Expression Plasmid Vector	PHLAP92540243	Plasmid vector containing HLA-DRB1*16:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:68 protein. This plasmid can be used for constructing HLA-DRB1*16:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:69 Protein Expression Plasmid Vector	PHLAP92540244	Plasmid vector containing HLA-DRB1*16:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:69 protein. This plasmid can be used for constructing HLA-DRB1*16:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:70N Protein Expression Plasmid Vector	PHLAP92540245	Plasmid vector containing HLA-DRB1*16:70N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:70N protein. This plasmid can be used for constructing HLA-DRB1*16:70N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:70N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:71 Protein Expression Plasmid Vector	PHLAP92540246	Plasmid vector containing HLA-DRB1*16:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:71 protein. This plasmid can be used for constructing HLA-DRB1*16:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:72 Protein Expression Plasmid Vector	PHLAP92540247	Plasmid vector containing HLA-DRB1*16:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:72 protein. This plasmid can be used for constructing HLA-DRB1*16:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:73 Protein Expression Plasmid Vector	PHLAP92540248	Plasmid vector containing HLA-DRB1*16:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:73 protein. This plasmid can be used for constructing HLA-DRB1*16:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:74 Protein Expression Plasmid Vector	PHLAP92540249	Plasmid vector containing HLA-DRB1*16:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:74 protein. This plasmid can be used for constructing HLA-DRB1*16:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:75 Protein Expression Plasmid Vector	PHLAP92540250	Plasmid vector containing HLA-DRB1*16:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:75 protein. This plasmid can be used for constructing HLA-DRB1*16:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:76 Protein Expression Plasmid Vector	PHLAP92540251	Plasmid vector containing HLA-DRB1*16:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:76 protein. This plasmid can be used for constructing HLA-DRB1*16:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:77N Protein Expression Plasmid Vector	PHLAP92540252	Plasmid vector containing HLA-DRB1*16:77N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:77N protein. This plasmid can be used for constructing HLA-DRB1*16:77N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:77N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:78 Protein Expression Plasmid Vector	PHLAP92540253	Plasmid vector containing HLA-DRB1*16:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:78 protein. This plasmid can be used for constructing HLA-DRB1*16:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:79 Protein Expression Plasmid Vector	PHLAP92540254	Plasmid vector containing HLA-DRB1*16:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:79 protein. This plasmid can be used for constructing HLA-DRB1*16:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*16:80 Protein Expression Plasmid Vector	PHLAP92540255	Plasmid vector containing HLA-DRB1*16:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:80 protein. This plasmid can be used for constructing HLA-DRB1*16:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB1*16:81 Protein Expression Plasmid Vector	PHLAP92540256	Plasmid vector containing HLA-DRB1*16:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*16:81 protein. This plasmid can be used for constructing HLA-DRB1*16:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*16:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB1*1606 Protein Expression Plasmid Vector	PHLAP92540257	Plasmid vector containing HLA-DRB1*1606 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB1*1606 protein. This plasmid can be used for constructing HLA-DRB1*1606 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB1*1606 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB2*01:01 Protein Expression Plasmid Vector	PHLAP92540258	Plasmid vector containing HLA-DRB2*01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB2*01:01 protein. This plasmid can be used for constructing HLA-DRB2*01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB2*01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:02:01 Protein Expression Plasmid Vector	PHLAP92540259	Plasmid vector containing HLA-DRB3*01:01:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:02:01 protein. This plasmid can be used for constructing HLA-DRB3*01:01:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:02:02 Protein Expression Plasmid Vector	PHLAP92540260	Plasmid vector containing HLA-DRB3*01:01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:02:02 protein. This plasmid can be used for constructing HLA-DRB3*01:01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:02:03 Protein Expression Plasmid Vector	PHLAP92540261	Plasmid vector containing HLA-DRB3*01:01:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:02:03 protein. This plasmid can be used for constructing HLA-DRB3*01:01:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:02:04 Protein Expression Plasmid Vector	PHLAP92540262	Plasmid vector containing HLA-DRB3*01:01:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:02:04 protein. This plasmid can be used for constructing HLA-DRB3*01:01:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:01:02:05 Protein Expression Plasmid Vector	PHLAP92540263	Plasmid vector containing HLA-DRB3*01:01:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:02:05 protein. This plasmid can be used for constructing HLA-DRB3*01:01:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:02:06 Protein Expression Plasmid Vector	PHLAP92540264	Plasmid vector containing HLA-DRB3*01:01:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:02:06 protein. This plasmid can be used for constructing HLA-DRB3*01:01:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:02:07 Protein Expression Plasmid Vector	PHLAP92540265	Plasmid vector containing HLA-DRB3*01:01:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:02:07 protein. This plasmid can be used for constructing HLA-DRB3*01:01:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:02:08 Protein Expression Plasmid Vector	PHLAP92540266	Plasmid vector containing HLA-DRB3*01:01:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:02:08 protein. This plasmid can be used for constructing HLA-DRB3*01:01:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:02:09 Protein Expression Plasmid Vector	PHLAP92540267	Plasmid vector containing HLA-DRB3*01:01:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:02:09 protein. This plasmid can be used for constructing HLA-DRB3*01:01:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:03 Protein Expression Plasmid Vector	PHLAP92540268	Plasmid vector containing HLA-DRB3*01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:03 protein. This plasmid can be used for constructing HLA-DRB3*01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:04 Protein Expression Plasmid Vector	PHLAP92540269	Plasmid vector containing HLA-DRB3*01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:04 protein. This plasmid can be used for constructing HLA-DRB3*01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:01:05 Protein Expression Plasmid Vector	PHLAP92540270	Plasmid vector containing HLA-DRB3*01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:05 protein. This plasmid can be used for constructing HLA-DRB3*01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:06 Protein Expression Plasmid Vector	PHLAP92540271	Plasmid vector containing HLA-DRB3*01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:06 protein. This plasmid can be used for constructing HLA-DRB3*01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:07 Protein Expression Plasmid Vector	PHLAP92540272	Plasmid vector containing HLA-DRB3*01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:07 protein. This plasmid can be used for constructing HLA-DRB3*01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:08 Protein Expression Plasmid Vector	PHLAP92540273	Plasmid vector containing HLA-DRB3*01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:08 protein. This plasmid can be used for constructing HLA-DRB3*01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:09 Protein Expression Plasmid Vector	PHLAP92540274	Plasmid vector containing HLA-DRB3*01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:09 protein. This plasmid can be used for constructing HLA-DRB3*01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:10 Protein Expression Plasmid Vector	PHLAP92540275	Plasmid vector containing HLA-DRB3*01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:10 protein. This plasmid can be used for constructing HLA-DRB3*01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:11 Protein Expression Plasmid Vector	PHLAP92540276	Plasmid vector containing HLA-DRB3*01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:11 protein. This plasmid can be used for constructing HLA-DRB3*01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:01:12 Protein Expression Plasmid Vector	PHLAP92540277	Plasmid vector containing HLA-DRB3*01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:12 protein. This plasmid can be used for constructing HLA-DRB3*01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:13 Protein Expression Plasmid Vector	PHLAP92540278	Plasmid vector containing HLA-DRB3*01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:13 protein. This plasmid can be used for constructing HLA-DRB3*01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:14 Protein Expression Plasmid Vector	PHLAP92540279	Plasmid vector containing HLA-DRB3*01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:14 protein. This plasmid can be used for constructing HLA-DRB3*01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:15 Protein Expression Plasmid Vector	PHLAP92540280	Plasmid vector containing HLA-DRB3*01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:15 protein. This plasmid can be used for constructing HLA-DRB3*01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:16 Protein Expression Plasmid Vector	PHLAP92540281	Plasmid vector containing HLA-DRB3*01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:16 protein. This plasmid can be used for constructing HLA-DRB3*01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:17 Protein Expression Plasmid Vector	PHLAP92540282	Plasmid vector containing HLA-DRB3*01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:17 protein. This plasmid can be used for constructing HLA-DRB3*01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:18 Protein Expression Plasmid Vector	PHLAP92540283	Plasmid vector containing HLA-DRB3*01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:18 protein. This plasmid can be used for constructing HLA-DRB3*01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:01:19 Protein Expression Plasmid Vector	PHLAP92540284	Plasmid vector containing HLA-DRB3*01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:19 protein. This plasmid can be used for constructing HLA-DRB3*01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:20 Protein Expression Plasmid Vector	PHLAP92540285	Plasmid vector containing HLA-DRB3*01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:20 protein. This plasmid can be used for constructing HLA-DRB3*01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:21 Protein Expression Plasmid Vector	PHLAP92540286	Plasmid vector containing HLA-DRB3*01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:21 protein. This plasmid can be used for constructing HLA-DRB3*01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:22 Protein Expression Plasmid Vector	PHLAP92540287	Plasmid vector containing HLA-DRB3*01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:22 protein. This plasmid can be used for constructing HLA-DRB3*01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:23 Protein Expression Plasmid Vector	PHLAP92540288	Plasmid vector containing HLA-DRB3*01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:23 protein. This plasmid can be used for constructing HLA-DRB3*01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:01:24 Protein Expression Plasmid Vector	PHLAP92540289	Plasmid vector containing HLA-DRB3*01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:01:24 protein. This plasmid can be used for constructing HLA-DRB3*01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:02 Protein Expression Plasmid Vector	PHLAP92540290	Plasmid vector containing HLA-DRB3*01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:02 protein. This plasmid can be used for constructing HLA-DRB3*01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:03 Protein Expression Plasmid Vector	PHLAP92540291	Plasmid vector containing HLA-DRB3*01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:03 protein. This plasmid can be used for constructing HLA-DRB3*01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:04 Protein Expression Plasmid Vector	PHLAP92540292	Plasmid vector containing HLA-DRB3*01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:04 protein. This plasmid can be used for constructing HLA-DRB3*01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:05 Protein Expression Plasmid Vector	PHLAP92540293	Plasmid vector containing HLA-DRB3*01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:05 protein. This plasmid can be used for constructing HLA-DRB3*01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:06 Protein Expression Plasmid Vector	PHLAP92540294	Plasmid vector containing HLA-DRB3*01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:06 protein. This plasmid can be used for constructing HLA-DRB3*01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:07 Protein Expression Plasmid Vector	PHLAP92540295	Plasmid vector containing HLA-DRB3*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:07 protein. This plasmid can be used for constructing HLA-DRB3*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:08 Protein Expression Plasmid Vector	PHLAP92540296	Plasmid vector containing HLA-DRB3*01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:08 protein. This plasmid can be used for constructing HLA-DRB3*01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:09 Protein Expression Plasmid Vector	PHLAP92540297	Plasmid vector containing HLA-DRB3*01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:09 protein. This plasmid can be used for constructing HLA-DRB3*01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:10 Protein Expression Plasmid Vector	PHLAP92540298	Plasmid vector containing HLA-DRB3*01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:10 protein. This plasmid can be used for constructing HLA-DRB3*01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*01:100 Protein Expression Plasmid Vector	PHLAP92540299	Plasmid vector containing HLA-DRB3*01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:100 protein. This plasmid can be used for constructing HLA-DRB3*01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:101 Protein Expression Plasmid Vector	PHLAP92540300	Plasmid vector containing HLA-DRB3*01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:101 protein. This plasmid can be used for constructing HLA-DRB3*01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:102 Protein Expression Plasmid Vector	PHLAP92540301	Plasmid vector containing HLA-DRB3*01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:102 protein. This plasmid can be used for constructing HLA-DRB3*01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:103 Protein Expression Plasmid Vector	PHLAP92540302	Plasmid vector containing HLA-DRB3*01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:103 protein. This plasmid can be used for constructing HLA-DRB3*01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:104 Protein Expression Plasmid Vector	PHLAP92540303	Plasmid vector containing HLA-DRB3*01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:104 protein. This plasmid can be used for constructing HLA-DRB3*01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:105N Protein Expression Plasmid Vector	PHLAP92540304	Plasmid vector containing HLA-DRB3*01:105N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:105N protein. This plasmid can be used for constructing HLA-DRB3*01:105N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:105N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:106 Protein Expression Plasmid Vector	PHLAP92540305	Plasmid vector containing HLA-DRB3*01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:106 protein. This plasmid can be used for constructing HLA-DRB3*01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:107 Protein Expression Plasmid Vector	PHLAP92540306	Plasmid vector containing HLA-DRB3*01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:107 protein. This plasmid can be used for constructing HLA-DRB3*01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:108 Protein Expression Plasmid Vector	PHLAP92540307	Plasmid vector containing HLA-DRB3*01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:108 protein. This plasmid can be used for constructing HLA-DRB3*01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:109 Protein Expression Plasmid Vector	PHLAP92540308	Plasmid vector containing HLA-DRB3*01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:109 protein. This plasmid can be used for constructing HLA-DRB3*01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:11 Protein Expression Plasmid Vector	PHLAP92540309	Plasmid vector containing HLA-DRB3*01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:11 protein. This plasmid can be used for constructing HLA-DRB3*01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:110 Protein Expression Plasmid Vector	PHLAP92540310	Plasmid vector containing HLA-DRB3*01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:110 protein. This plasmid can be used for constructing HLA-DRB3*01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:111 Protein Expression Plasmid Vector	PHLAP92540311	Plasmid vector containing HLA-DRB3*01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:111 protein. This plasmid can be used for constructing HLA-DRB3*01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:112 Protein Expression Plasmid Vector	PHLAP92540312	Plasmid vector containing HLA-DRB3*01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:112 protein. This plasmid can be used for constructing HLA-DRB3*01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:113 Protein Expression Plasmid Vector	PHLAP92540313	Plasmid vector containing HLA-DRB3*01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:113 protein. This plasmid can be used for constructing HLA-DRB3*01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:114 Protein Expression Plasmid Vector	PHLAP92540314	Plasmid vector containing HLA-DRB3*01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:114 protein. This plasmid can be used for constructing HLA-DRB3*01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:115 Protein Expression Plasmid Vector	PHLAP92540315	Plasmid vector containing HLA-DRB3*01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:115 protein. This plasmid can be used for constructing HLA-DRB3*01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:116 Protein Expression Plasmid Vector	PHLAP92540316	Plasmid vector containing HLA-DRB3*01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:116 protein. This plasmid can be used for constructing HLA-DRB3*01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:117N Protein Expression Plasmid Vector	PHLAP92540317	Plasmid vector containing HLA-DRB3*01:117N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:117N protein. This plasmid can be used for constructing HLA-DRB3*01:117N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:117N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:118 Protein Expression Plasmid Vector	PHLAP92540318	Plasmid vector containing HLA-DRB3*01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:118 protein. This plasmid can be used for constructing HLA-DRB3*01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:119 Protein Expression Plasmid Vector	PHLAP92540319	Plasmid vector containing HLA-DRB3*01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:119 protein. This plasmid can be used for constructing HLA-DRB3*01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:12 Protein Expression Plasmid Vector	PHLAP92540320	Plasmid vector containing HLA-DRB3*01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:12 protein. This plasmid can be used for constructing HLA-DRB3*01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:120 Protein Expression Plasmid Vector	PHLAP92540321	Plasmid vector containing HLA-DRB3*01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:120 protein. This plasmid can be used for constructing HLA-DRB3*01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:121 Protein Expression Plasmid Vector	PHLAP92540322	Plasmid vector containing HLA-DRB3*01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:121 protein. This plasmid can be used for constructing HLA-DRB3*01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:122 Protein Expression Plasmid Vector	PHLAP92540323	Plasmid vector containing HLA-DRB3*01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:122 protein. This plasmid can be used for constructing HLA-DRB3*01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:123 Protein Expression Plasmid Vector	PHLAP92540324	Plasmid vector containing HLA-DRB3*01:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:123 protein. This plasmid can be used for constructing HLA-DRB3*01:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:124 Protein Expression Plasmid Vector	PHLAP92540325	Plasmid vector containing HLA-DRB3*01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:124 protein. This plasmid can be used for constructing HLA-DRB3*01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:125 Protein Expression Plasmid Vector	PHLAP92540326	Plasmid vector containing HLA-DRB3*01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:125 protein. This plasmid can be used for constructing HLA-DRB3*01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:126 Protein Expression Plasmid Vector	PHLAP92540327	Plasmid vector containing HLA-DRB3*01:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:126 protein. This plasmid can be used for constructing HLA-DRB3*01:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:127 Protein Expression Plasmid Vector	PHLAP92540328	Plasmid vector containing HLA-DRB3*01:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:127 protein. This plasmid can be used for constructing HLA-DRB3*01:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:128 Protein Expression Plasmid Vector	PHLAP92540329	Plasmid vector containing HLA-DRB3*01:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:128 protein. This plasmid can be used for constructing HLA-DRB3*01:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:129 Protein Expression Plasmid Vector	PHLAP92540330	Plasmid vector containing HLA-DRB3*01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:129 protein. This plasmid can be used for constructing HLA-DRB3*01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:13 Protein Expression Plasmid Vector	PHLAP92540331	Plasmid vector containing HLA-DRB3*01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:13 protein. This plasmid can be used for constructing HLA-DRB3*01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:130 Protein Expression Plasmid Vector	PHLAP92540332	Plasmid vector containing HLA-DRB3*01:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:130 protein. This plasmid can be used for constructing HLA-DRB3*01:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:131 Protein Expression Plasmid Vector	PHLAP92540333	Plasmid vector containing HLA-DRB3*01:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:131 protein. This plasmid can be used for constructing HLA-DRB3*01:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:132N Protein Expression Plasmid Vector	PHLAP92540334	Plasmid vector containing HLA-DRB3*01:132N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:132N protein. This plasmid can be used for constructing HLA-DRB3*01:132N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:132N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:133N Protein Expression Plasmid Vector	PHLAP92540335	Plasmid vector containing HLA-DRB3*01:133N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:133N protein. This plasmid can be used for constructing HLA-DRB3*01:133N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:133N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:134:01:01 Protein Expression Plasmid Vector	PHLAP92540336	Plasmid vector containing HLA-DRB3*01:134:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:134:01:01 protein. This plasmid can be used for constructing HLA-DRB3*01:134:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:134:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:134:01:02 Protein Expression Plasmid Vector	PHLAP92540337	Plasmid vector containing HLA-DRB3*01:134:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:134:01:02 protein. This plasmid can be used for constructing HLA-DRB3*01:134:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:134:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:135 Protein Expression Plasmid Vector	PHLAP92540338	Plasmid vector containing HLA-DRB3*01:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:135 protein. This plasmid can be used for constructing HLA-DRB3*01:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:136 Protein Expression Plasmid Vector	PHLAP92540339	Plasmid vector containing HLA-DRB3*01:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:136 protein. This plasmid can be used for constructing HLA-DRB3*01:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:137:01:01 Protein Expression Plasmid Vector	PHLAP92540340	Plasmid vector containing HLA-DRB3*01:137:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:137:01:01 protein. This plasmid can be used for constructing HLA-DRB3*01:137:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:137:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:137:01:02 Protein Expression Plasmid Vector	PHLAP92540341	Plasmid vector containing HLA-DRB3*01:137:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:137:01:02 protein. This plasmid can be used for constructing HLA-DRB3*01:137:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:137:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:138:01:01 Protein Expression Plasmid Vector	PHLAP92540342	Plasmid vector containing HLA-DRB3*01:138:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:138:01:01 protein. This plasmid can be used for constructing HLA-DRB3*01:138:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:138:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:138:01:02 Protein Expression Plasmid Vector	PHLAP92540343	Plasmid vector containing HLA-DRB3*01:138:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:138:01:02 protein. This plasmid can be used for constructing HLA-DRB3*01:138:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:138:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:138:01:03 Protein Expression Plasmid Vector	PHLAP92540344	Plasmid vector containing HLA-DRB3*01:138:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:138:01:03 protein. This plasmid can be used for constructing HLA-DRB3*01:138:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:138:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:139 Protein Expression Plasmid Vector	PHLAP92540345	Plasmid vector containing HLA-DRB3*01:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:139 protein. This plasmid can be used for constructing HLA-DRB3*01:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:14 Protein Expression Plasmid Vector	PHLAP92540346	Plasmid vector containing HLA-DRB3*01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:14 protein. This plasmid can be used for constructing HLA-DRB3*01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:140 Protein Expression Plasmid Vector	PHLAP92540347	Plasmid vector containing HLA-DRB3*01:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:140 protein. This plasmid can be used for constructing HLA-DRB3*01:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:141 Protein Expression Plasmid Vector	PHLAP92540348	Plasmid vector containing HLA-DRB3*01:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:141 protein. This plasmid can be used for constructing HLA-DRB3*01:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:142 Protein Expression Plasmid Vector	PHLAP92540349	Plasmid vector containing HLA-DRB3*01:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:142 protein. This plasmid can be used for constructing HLA-DRB3*01:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:143N Protein Expression Plasmid Vector	PHLAP92540350	Plasmid vector containing HLA-DRB3*01:143N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:143N protein. This plasmid can be used for constructing HLA-DRB3*01:143N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:143N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:144 Protein Expression Plasmid Vector	PHLAP92540351	Plasmid vector containing HLA-DRB3*01:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:144 protein. This plasmid can be used for constructing HLA-DRB3*01:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:145 Protein Expression Plasmid Vector	PHLAP92540352	Plasmid vector containing HLA-DRB3*01:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:145 protein. This plasmid can be used for constructing HLA-DRB3*01:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:146 Protein Expression Plasmid Vector	PHLAP92540353	Plasmid vector containing HLA-DRB3*01:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:146 protein. This plasmid can be used for constructing HLA-DRB3*01:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:147:01:01 Protein Expression Plasmid Vector	PHLAP92540354	Plasmid vector containing HLA-DRB3*01:147:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:147:01:01 protein. This plasmid can be used for constructing HLA-DRB3*01:147:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:147:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:147:01:02 Protein Expression Plasmid Vector	PHLAP92540355	Plasmid vector containing HLA-DRB3*01:147:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:147:01:02 protein. This plasmid can be used for constructing HLA-DRB3*01:147:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:147:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:15 Protein Expression Plasmid Vector	PHLAP92540356	Plasmid vector containing HLA-DRB3*01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:15 protein. This plasmid can be used for constructing HLA-DRB3*01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*01:16 Protein Expression Plasmid Vector	PHLAP92540357	Plasmid vector containing HLA-DRB3*01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:16 protein. This plasmid can be used for constructing HLA-DRB3*01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*01:17 Protein Expression Plasmid Vector	PHLAP92540358	Plasmid vector containing HLA-DRB3*01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:17 protein. This plasmid can be used for constructing HLA-DRB3*01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*01:18 Protein Expression Plasmid Vector	PHLAP92540359	Plasmid vector containing HLA-DRB3*01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:18 protein. This plasmid can be used for constructing HLA-DRB3*01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*01:19 Protein Expression Plasmid Vector	PHLAP92540360	Plasmid vector containing HLA-DRB3*01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:19 protein. This plasmid can be used for constructing HLA-DRB3*01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*01:20 Protein Expression Plasmid Vector	PHLAP92540361	Plasmid vector containing HLA-DRB3*01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:20 protein. This plasmid can be used for constructing HLA-DRB3*01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*01:21 Protein Expression Plasmid Vector	PHLAP92540362	Plasmid vector containing HLA-DRB3*01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:21 protein. This plasmid can be used for constructing HLA-DRB3*01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB3*01:22 Protein Expression Plasmid Vector	PHLAP92540363	Plasmid vector containing HLA-DRB3*01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:22 protein. This plasmid can be used for constructing HLA-DRB3*01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:23 Protein Expression Plasmid Vector	PHLAP92540364	Plasmid vector containing HLA-DRB3*01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:23 protein. This plasmid can be used for constructing HLA-DRB3*01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:24 Protein Expression Plasmid Vector	PHLAP92540365	Plasmid vector containing HLA-DRB3*01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:24 protein. This plasmid can be used for constructing HLA-DRB3*01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:25 Protein Expression Plasmid Vector	PHLAP92540366	Plasmid vector containing HLA-DRB3*01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:25 protein. This plasmid can be used for constructing HLA-DRB3*01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:26N Protein Expression Plasmid Vector	PHLAP92540367	Plasmid vector containing HLA-DRB3*01:26N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:26N protein. This plasmid can be used for constructing HLA-DRB3*01:26N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:26N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:27 Protein Expression Plasmid Vector	PHLAP92540368	Plasmid vector containing HLA-DRB3*01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:27 protein. This plasmid can be used for constructing HLA-DRB3*01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:28 Protein Expression Plasmid Vector	PHLAP92540369	Plasmid vector containing HLA-DRB3*01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:28 protein. This plasmid can be used for constructing HLA-DRB3*01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:29 Protein Expression Plasmid Vector	PHLAP92540370	Plasmid vector containing HLA-DRB3*01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:29 protein. This plasmid can be used for constructing HLA-DRB3*01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:30 Protein Expression Plasmid Vector	PHLAP92540371	Plasmid vector containing HLA-DRB3*01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:30 protein. This plasmid can be used for constructing HLA-DRB3*01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:31 Protein Expression Plasmid Vector	PHLAP92540372	Plasmid vector containing HLA-DRB3*01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:31 protein. This plasmid can be used for constructing HLA-DRB3*01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:32 Protein Expression Plasmid Vector	PHLAP92540373	Plasmid vector containing HLA-DRB3*01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:32 protein. This plasmid can be used for constructing HLA-DRB3*01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:33 Protein Expression Plasmid Vector	PHLAP92540374	Plasmid vector containing HLA-DRB3*01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:33 protein. This plasmid can be used for constructing HLA-DRB3*01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:34 Protein Expression Plasmid Vector	PHLAP92540375	Plasmid vector containing HLA-DRB3*01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:34 protein. This plasmid can be used for constructing HLA-DRB3*01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:35 Protein Expression Plasmid Vector	PHLAP92540376	Plasmid vector containing HLA-DRB3*01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:35 protein. This plasmid can be used for constructing HLA-DRB3*01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:36 Protein Expression Plasmid Vector	PHLAP92540377	Plasmid vector containing HLA-DRB3*01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:36 protein. This plasmid can be used for constructing HLA-DRB3*01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:37 Protein Expression Plasmid Vector	PHLAP92540378	Plasmid vector containing HLA-DRB3*01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:37 protein. This plasmid can be used for constructing HLA-DRB3*01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*01:38 Protein Expression Plasmid Vector	PHLAP92540379	Plasmid vector containing HLA-DRB3*01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:38 protein. This plasmid can be used for constructing HLA-DRB3*01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:39 Protein Expression Plasmid Vector	PHLAP92540380	Plasmid vector containing HLA-DRB3*01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:39 protein. This plasmid can be used for constructing HLA-DRB3*01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:40:01N Protein Expression Plasmid Vector	PHLAP92540381	Plasmid vector containing HLA-DRB3*01:40:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:40:01N protein. This plasmid can be used for constructing HLA-DRB3*01:40:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:40:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:40:02N Protein Expression Plasmid Vector	PHLAP92540382	Plasmid vector containing HLA-DRB3*01:40:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:40:02N protein. This plasmid can be used for constructing HLA-DRB3*01:40:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:40:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:41 Protein Expression Plasmid Vector	PHLAP92540383	Plasmid vector containing HLA-DRB3*01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:41 protein. This plasmid can be used for constructing HLA-DRB3*01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:42 Protein Expression Plasmid Vector	PHLAP92540384	Plasmid vector containing HLA-DRB3*01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:42 protein. This plasmid can be used for constructing HLA-DRB3*01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:43 Protein Expression Plasmid Vector	PHLAP92540385	Plasmid vector containing HLA-DRB3*01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:43 protein. This plasmid can be used for constructing HLA-DRB3*01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:44 Protein Expression Plasmid Vector	PHLAP92540386	Plasmid vector containing HLA-DRB3*01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:44 protein. This plasmid can be used for constructing HLA-DRB3*01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:45 Protein Expression Plasmid Vector	PHLAP92540387	Plasmid vector containing HLA-DRB3*01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:45 protein. This plasmid can be used for constructing HLA-DRB3*01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:46 Protein Expression Plasmid Vector	PHLAP92540388	Plasmid vector containing HLA-DRB3*01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:46 protein. This plasmid can be used for constructing HLA-DRB3*01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:47 Protein Expression Plasmid Vector	PHLAP92540389	Plasmid vector containing HLA-DRB3*01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:47 protein. This plasmid can be used for constructing HLA-DRB3*01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:48 Protein Expression Plasmid Vector	PHLAP92540390	Plasmid vector containing HLA-DRB3*01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:48 protein. This plasmid can be used for constructing HLA-DRB3*01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:49 Protein Expression Plasmid Vector	PHLAP92540391	Plasmid vector containing HLA-DRB3*01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:49 protein. This plasmid can be used for constructing HLA-DRB3*01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:50 Protein Expression Plasmid Vector	PHLAP92540392	Plasmid vector containing HLA-DRB3*01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:50 protein. This plasmid can be used for constructing HLA-DRB3*01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:51 Protein Expression Plasmid Vector	PHLAP92540393	Plasmid vector containing HLA-DRB3*01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:51 protein. This plasmid can be used for constructing HLA-DRB3*01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:52 Protein Expression Plasmid Vector	PHLAP92540394	Plasmid vector containing HLA-DRB3*01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:52 protein. This plasmid can be used for constructing HLA-DRB3*01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*01:53 Protein Expression Plasmid Vector	PHLAP92540395	Plasmid vector containing HLA-DRB3*01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:53 protein. This plasmid can be used for constructing HLA-DRB3*01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:54 Protein Expression Plasmid Vector	PHLAP92540396	Plasmid vector containing HLA-DRB3*01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:54 protein. This plasmid can be used for constructing HLA-DRB3*01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:55 Protein Expression Plasmid Vector	PHLAP92540397	Plasmid vector containing HLA-DRB3*01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:55 protein. This plasmid can be used for constructing HLA-DRB3*01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:56 Protein Expression Plasmid Vector	PHLAP92540398	Plasmid vector containing HLA-DRB3*01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:56 protein. This plasmid can be used for constructing HLA-DRB3*01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:57 Protein Expression Plasmid Vector	PHLAP92540399	Plasmid vector containing HLA-DRB3*01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:57 protein. This plasmid can be used for constructing HLA-DRB3*01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:58 Protein Expression Plasmid Vector	PHLAP925404000	Plasmid vector containing HLA-DRB3*01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:58 protein. This plasmid can be used for constructing HLA-DRB3*01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:59 Protein Expression Plasmid Vector	PHLAP925404001	Plasmid vector containing HLA-DRB3*01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:59 protein. This plasmid can be used for constructing HLA-DRB3*01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:60 Protein Expression Plasmid Vector	PHLAP925404002	Plasmid vector containing HLA-DRB3*01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:60 protein. This plasmid can be used for constructing HLA-DRB3*01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*01:61 Protein Expression Plasmid Vector	PHLAP92540403	Plasmid vector containing HLA-DRB3*01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:61 protein. This plasmid can be used for constructing HLA-DRB3*01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:62:01:01 Protein Expression Plasmid Vector	PHLAP92540404	Plasmid vector containing HLA-DRB3*01:62:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:62:01:01 protein. This plasmid can be used for constructing HLA-DRB3*01:62:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:62:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:62:01:02 Protein Expression Plasmid Vector	PHLAP92540405	Plasmid vector containing HLA-DRB3*01:62:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:62:01:02 protein. This plasmid can be used for constructing HLA-DRB3*01:62:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:62:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:63 Protein Expression Plasmid Vector	PHLAP92540406	Plasmid vector containing HLA-DRB3*01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:63 protein. This plasmid can be used for constructing HLA-DRB3*01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:64 Protein Expression Plasmid Vector	PHLAP92540407	Plasmid vector containing HLA-DRB3*01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:64 protein. This plasmid can be used for constructing HLA-DRB3*01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:65 Protein Expression Plasmid Vector	PHLAP92540408	Plasmid vector containing HLA-DRB3*01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:65 protein. This plasmid can be used for constructing HLA-DRB3*01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:66 Protein Expression Plasmid Vector	PHLAP92540409	Plasmid vector containing HLA-DRB3*01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:66 protein. This plasmid can be used for constructing HLA-DRB3*01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:67 Protein Expression Plasmid Vector	PHLAP92540410	Plasmid vector containing HLA-DRB3*01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:67 protein. This plasmid can be used for constructing HLA-DRB3*01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:68 Protein Expression Plasmid Vector	PHLAP925404116	Plasmid vector containing HLA-DRB3*01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:68 protein. This plasmid can be used for constructing HLA-DRB3*01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:69 Protein Expression Plasmid Vector	PHLAP925404126	Plasmid vector containing HLA-DRB3*01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:69 protein. This plasmid can be used for constructing HLA-DRB3*01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:70 Protein Expression Plasmid Vector	PHLAP925404136	Plasmid vector containing HLA-DRB3*01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:70 protein. This plasmid can be used for constructing HLA-DRB3*01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:71 Protein Expression Plasmid Vector	PHLAP925404146	Plasmid vector containing HLA-DRB3*01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:71 protein. This plasmid can be used for constructing HLA-DRB3*01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:72 Protein Expression Plasmid Vector	PHLAP925404156	Plasmid vector containing HLA-DRB3*01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:72 protein. This plasmid can be used for constructing HLA-DRB3*01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:73N Protein Expression Plasmid Vector	PHLAP925404166	Plasmid vector containing HLA-DRB3*01:73N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:73N protein. This plasmid can be used for constructing HLA-DRB3*01:73N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:73N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:74 Protein Expression Plasmid Vector	PHLAP925404176	Plasmid vector containing HLA-DRB3*01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:74 protein. This plasmid can be used for constructing HLA-DRB3*01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:75 Protein Expression Plasmid Vector	PHLAP925404186	Plasmid vector containing HLA-DRB3*01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:75 protein. This plasmid can be used for constructing HLA-DRB3*01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*01:77N Protein Expression Plasmid Vector	PHLAP92540419	Plasmid vector containing HLA-DRB3*01:77N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:77N protein. This plasmid can be used for constructing HLA-DRB3*01:77N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:77N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:78 Protein Expression Plasmid Vector	PHLAP92540420	Plasmid vector containing HLA-DRB3*01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:78 protein. This plasmid can be used for constructing HLA-DRB3*01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*01:79 Protein Expression Plasmid Vector	PHLAP92540421	Plasmid vector containing HLA-DRB3*01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:79 protein. This plasmid can be used for constructing HLA-DRB3*01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*01:80 Protein Expression Plasmid Vector	PHLAP92540422	Plasmid vector containing HLA-DRB3*01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:80 protein. This plasmid can be used for constructing HLA-DRB3*01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*01:81N Protein Expression Plasmid Vector	PHLAP92540423	Plasmid vector containing HLA-DRB3*01:81N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:81N protein. This plasmid can be used for constructing HLA-DRB3*01:81N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:81N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:82 Protein Expression Plasmid Vector	PHLAP92540424	Plasmid vector containing HLA-DRB3*01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:82 protein. This plasmid can be used for constructing HLA-DRB3*01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*01:83 Protein Expression Plasmid Vector	PHLAP92540425	Plasmid vector containing HLA-DRB3*01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:83 protein. This plasmid can be used for constructing HLA-DRB3*01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*01:84 Protein Expression Plasmid Vector	PHLAP92540426	Plasmid vector containing HLA-DRB3*01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:84 protein. This plasmid can be used for constructing HLA-DRB3*01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB3*01:85 Protein Expression Plasmid Vector	PHLAP92540427	Plasmid vector containing HLA-DRB3*01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:85 protein. This plasmid can be used for constructing HLA-DRB3*01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:86 Protein Expression Plasmid Vector	PHLAP92540428	Plasmid vector containing HLA-DRB3*01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:86 protein. This plasmid can be used for constructing HLA-DRB3*01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:87 Protein Expression Plasmid Vector	PHLAP92540429	Plasmid vector containing HLA-DRB3*01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:87 protein. This plasmid can be used for constructing HLA-DRB3*01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:88 Protein Expression Plasmid Vector	PHLAP92540430	Plasmid vector containing HLA-DRB3*01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:88 protein. This plasmid can be used for constructing HLA-DRB3*01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:89 Protein Expression Plasmid Vector	PHLAP92540431	Plasmid vector containing HLA-DRB3*01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:89 protein. This plasmid can be used for constructing HLA-DRB3*01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:90 Protein Expression Plasmid Vector	PHLAP92540432	Plasmid vector containing HLA-DRB3*01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:90 protein. This plasmid can be used for constructing HLA-DRB3*01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:91 Protein Expression Plasmid Vector	PHLAP92540433	Plasmid vector containing HLA-DRB3*01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:91 protein. This plasmid can be used for constructing HLA-DRB3*01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*01:92 Protein Expression Plasmid Vector	PHLAP92540434	Plasmid vector containing HLA-DRB3*01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:92 protein. This plasmid can be used for constructing HLA-DRB3*01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*01:93 Protein Expression Plasmid Vector	PHLAP92540435	Plasmid vector containing HLA-DRB3*01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:93 protein. This plasmid can be used for constructing HLA-DRB3*01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:94 Protein Expression Plasmid Vector	PHLAP92540436	Plasmid vector containing HLA-DRB3*01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:94 protein. This plasmid can be used for constructing HLA-DRB3*01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:95 Protein Expression Plasmid Vector	PHLAP92540437	Plasmid vector containing HLA-DRB3*01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:95 protein. This plasmid can be used for constructing HLA-DRB3*01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:96 Protein Expression Plasmid Vector	PHLAP92540438	Plasmid vector containing HLA-DRB3*01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:96 protein. This plasmid can be used for constructing HLA-DRB3*01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:97N Protein Expression Plasmid Vector	PHLAP92540439	Plasmid vector containing HLA-DRB3*01:97N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:97N protein. This plasmid can be used for constructing HLA-DRB3*01:97N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:97N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:98 Protein Expression Plasmid Vector	PHLAP92540440	Plasmid vector containing HLA-DRB3*01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:98 protein. This plasmid can be used for constructing HLA-DRB3*01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*01:99 Protein Expression Plasmid Vector	PHLAP92540441	Plasmid vector containing HLA-DRB3*01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*01:99 protein. This plasmid can be used for constructing HLA-DRB3*01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*010101 Protein Expression Plasmid Vector	PHLAP92540442	Plasmid vector containing HLA-DRB3*010101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*010101 protein. This plasmid can be used for constructing HLA-DRB3*010101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*010101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:01 Protein Expression Plasmid Vector	PHLAP92540443	Plasmid vector containing HLA-DRB3*02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:01 protein. This plasmid can be used for constructing HLA-DRB3*02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:01 Protein Expression Plasmid Vector	PHLAP92540444	Plasmid vector containing HLA-DRB3*02:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:01 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:02 Protein Expression Plasmid Vector	PHLAP92540445	Plasmid vector containing HLA-DRB3*02:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:02 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:03 Protein Expression Plasmid Vector	PHLAP92540446	Plasmid vector containing HLA-DRB3*02:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:03 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:04 Protein Expression Plasmid Vector	PHLAP92540447	Plasmid vector containing HLA-DRB3*02:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:04 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:05 Protein Expression Plasmid Vector	PHLAP92540448	Plasmid vector containing HLA-DRB3*02:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:05 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:06 Protein Expression Plasmid Vector	PHLAP92540449	Plasmid vector containing HLA-DRB3*02:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:06 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:02:01:07 Protein Expression Plasmid Vector	PHLAP92540450	Plasmid vector containing HLA-DRB3*02:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:07 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:09 Protein Expression Plasmid Vector	PHLAP92540451	Plasmid vector containing HLA-DRB3*02:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:09 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:10 Protein Expression Plasmid Vector	PHLAP92540452	Plasmid vector containing HLA-DRB3*02:02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:10 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:11 Protein Expression Plasmid Vector	PHLAP92540453	Plasmid vector containing HLA-DRB3*02:02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:11 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:12 Protein Expression Plasmid Vector	PHLAP92540454	Plasmid vector containing HLA-DRB3*02:02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:12 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:13 Protein Expression Plasmid Vector	PHLAP92540455	Plasmid vector containing HLA-DRB3*02:02:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:13 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:14 Protein Expression Plasmid Vector	PHLAP92540456	Plasmid vector containing HLA-DRB3*02:02:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:14 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:02:01:15 Protein Expression Plasmid Vector	PHLAP92540457	Plasmid vector containing HLA-DRB3*02:02:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:15 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:16 Protein Expression Plasmid Vector	PHLAP92540458	Plasmid vector containing HLA-DRB3*02:02:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:16 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:17 Protein Expression Plasmid Vector	PHLAP92540459	Plasmid vector containing HLA-DRB3*02:02:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:17 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:18 Protein Expression Plasmid Vector	PHLAP92540460	Plasmid vector containing HLA-DRB3*02:02:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:18 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:19 Protein Expression Plasmid Vector	PHLAP92540461	Plasmid vector containing HLA-DRB3*02:02:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:19 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:20 Protein Expression Plasmid Vector	PHLAP92540462	Plasmid vector containing HLA-DRB3*02:02:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:20 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:21 Protein Expression Plasmid Vector	PHLAP92540463	Plasmid vector containing HLA-DRB3*02:02:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:21 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:02:01:22 Protein Expression Plasmid Vector	PHLAP92540464	Plasmid vector containing HLA-DRB3*02:02:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:22 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:23 Protein Expression Plasmid Vector	PHLAP92540465	Plasmid vector containing HLA-DRB3*02:02:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:23 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:24 Protein Expression Plasmid Vector	PHLAP92540466	Plasmid vector containing HLA-DRB3*02:02:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:24 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:25 Protein Expression Plasmid Vector	PHLAP92540467	Plasmid vector containing HLA-DRB3*02:02:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:25 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:26 Protein Expression Plasmid Vector	PHLAP92540468	Plasmid vector containing HLA-DRB3*02:02:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:26 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:27 Protein Expression Plasmid Vector	PHLAP92540469	Plasmid vector containing HLA-DRB3*02:02:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:27 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:28 Protein Expression Plasmid Vector	PHLAP92540470	Plasmid vector containing HLA-DRB3*02:02:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:28 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:02:01:29 Protein Expression Plasmid Vector	PHLAP92540471	Plasmid vector containing HLA-DRB3*02:02:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:29 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:30 Protein Expression Plasmid Vector	PHLAP92540472	Plasmid vector containing HLA-DRB3*02:02:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:30 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:01:31 Protein Expression Plasmid Vector	PHLAP92540473	Plasmid vector containing HLA-DRB3*02:02:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:01:31 protein. This plasmid can be used for constructing HLA-DRB3*02:02:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:02 Protein Expression Plasmid Vector	PHLAP92540474	Plasmid vector containing HLA-DRB3*02:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:02 protein. This plasmid can be used for constructing HLA-DRB3*02:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:03 Protein Expression Plasmid Vector	PHLAP92540475	Plasmid vector containing HLA-DRB3*02:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:03 protein. This plasmid can be used for constructing HLA-DRB3*02:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:04 Protein Expression Plasmid Vector	PHLAP92540476	Plasmid vector containing HLA-DRB3*02:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:04 protein. This plasmid can be used for constructing HLA-DRB3*02:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:05 Protein Expression Plasmid Vector	PHLAP92540477	Plasmid vector containing HLA-DRB3*02:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:05 protein. This plasmid can be used for constructing HLA-DRB3*02:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:02:06 Protein Expression Plasmid Vector	PHLAP92540478	Plasmid vector containing HLA-DRB3*02:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:06 protein. This plasmid can be used for constructing HLA-DRB3*02:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:07 Protein Expression Plasmid Vector	PHLAP92540479	Plasmid vector containing HLA-DRB3*02:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:07 protein. This plasmid can be used for constructing HLA-DRB3*02:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:08 Protein Expression Plasmid Vector	PHLAP92540480	Plasmid vector containing HLA-DRB3*02:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:08 protein. This plasmid can be used for constructing HLA-DRB3*02:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:09 Protein Expression Plasmid Vector	PHLAP92540481	Plasmid vector containing HLA-DRB3*02:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:09 protein. This plasmid can be used for constructing HLA-DRB3*02:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:10 Protein Expression Plasmid Vector	PHLAP92540482	Plasmid vector containing HLA-DRB3*02:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:10 protein. This plasmid can be used for constructing HLA-DRB3*02:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:11 Protein Expression Plasmid Vector	PHLAP92540483	Plasmid vector containing HLA-DRB3*02:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:11 protein. This plasmid can be used for constructing HLA-DRB3*02:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:12 Protein Expression Plasmid Vector	PHLAP92540484	Plasmid vector containing HLA-DRB3*02:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:12 protein. This plasmid can be used for constructing HLA-DRB3*02:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:02:13 Protein Expression Plasmid Vector	PHLAP92540485	Plasmid vector containing HLA-DRB3*02:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:13 protein. This plasmid can be used for constructing HLA-DRB3*02:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:14 Protein Expression Plasmid Vector	PHLAP92540486	Plasmid vector containing HLA-DRB3*02:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:14 protein. This plasmid can be used for constructing HLA-DRB3*02:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:15 Protein Expression Plasmid Vector	PHLAP92540487	Plasmid vector containing HLA-DRB3*02:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:15 protein. This plasmid can be used for constructing HLA-DRB3*02:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:16 Protein Expression Plasmid Vector	PHLAP92540488	Plasmid vector containing HLA-DRB3*02:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:16 protein. This plasmid can be used for constructing HLA-DRB3*02:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:17 Protein Expression Plasmid Vector	PHLAP92540489	Plasmid vector containing HLA-DRB3*02:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:17 protein. This plasmid can be used for constructing HLA-DRB3*02:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:18 Protein Expression Plasmid Vector	PHLAP92540490	Plasmid vector containing HLA-DRB3*02:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:18 protein. This plasmid can be used for constructing HLA-DRB3*02:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:19 Protein Expression Plasmid Vector	PHLAP92540491	Plasmid vector containing HLA-DRB3*02:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:19 protein. This plasmid can be used for constructing HLA-DRB3*02:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:02:20 Protein Expression Plasmid Vector	PHLAP92540492	Plasmid vector containing HLA-DRB3*02:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:20 protein. This plasmid can be used for constructing HLA-DRB3*02:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:21 Protein Expression Plasmid Vector	PHLAP92540493	Plasmid vector containing HLA-DRB3*02:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:21 protein. This plasmid can be used for constructing HLA-DRB3*02:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:22 Protein Expression Plasmid Vector	PHLAP92540494	Plasmid vector containing HLA-DRB3*02:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:22 protein. This plasmid can be used for constructing HLA-DRB3*02:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:23 Protein Expression Plasmid Vector	PHLAP92540495	Plasmid vector containing HLA-DRB3*02:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:23 protein. This plasmid can be used for constructing HLA-DRB3*02:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:24 Protein Expression Plasmid Vector	PHLAP92540496	Plasmid vector containing HLA-DRB3*02:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:24 protein. This plasmid can be used for constructing HLA-DRB3*02:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:25 Protein Expression Plasmid Vector	PHLAP92540497	Plasmid vector containing HLA-DRB3*02:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:25 protein. This plasmid can be used for constructing HLA-DRB3*02:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:26 Protein Expression Plasmid Vector	PHLAP92540498	Plasmid vector containing HLA-DRB3*02:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:26 protein. This plasmid can be used for constructing HLA-DRB3*02:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:02:27 Protein Expression Plasmid Vector	PHLAP92540499	Plasmid vector containing HLA-DRB3*02:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:27 protein. This plasmid can be used for constructing HLA-DRB3*02:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:28 Protein Expression Plasmid Vector	PHLAP92540500	Plasmid vector containing HLA-DRB3*02:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:28 protein. This plasmid can be used for constructing HLA-DRB3*02:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:29 Protein Expression Plasmid Vector	PHLAP92540501	Plasmid vector containing HLA-DRB3*02:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:29 protein. This plasmid can be used for constructing HLA-DRB3*02:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:30 Protein Expression Plasmid Vector	PHLAP92540502	Plasmid vector containing HLA-DRB3*02:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:30 protein. This plasmid can be used for constructing HLA-DRB3*02:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:31 Protein Expression Plasmid Vector	PHLAP92540503	Plasmid vector containing HLA-DRB3*02:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:31 protein. This plasmid can be used for constructing HLA-DRB3*02:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:32 Protein Expression Plasmid Vector	PHLAP92540504	Plasmid vector containing HLA-DRB3*02:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:32 protein. This plasmid can be used for constructing HLA-DRB3*02:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:33 Protein Expression Plasmid Vector	PHLAP92540505	Plasmid vector containing HLA-DRB3*02:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:33 protein. This plasmid can be used for constructing HLA-DRB3*02:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:02:34 Protein Expression Plasmid Vector	PHLAP92540506	Plasmid vector containing HLA-DRB3*02:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:34 protein. This plasmid can be used for constructing HLA-DRB3*02:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:35 Protein Expression Plasmid Vector	PHLAP92540507	Plasmid vector containing HLA-DRB3*02:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:35 protein. This plasmid can be used for constructing HLA-DRB3*02:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:36 Protein Expression Plasmid Vector	PHLAP92540508	Plasmid vector containing HLA-DRB3*02:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:36 protein. This plasmid can be used for constructing HLA-DRB3*02:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:37 Protein Expression Plasmid Vector	PHLAP92540509	Plasmid vector containing HLA-DRB3*02:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:37 protein. This plasmid can be used for constructing HLA-DRB3*02:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:38 Protein Expression Plasmid Vector	PHLAP92540510	Plasmid vector containing HLA-DRB3*02:02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:38 protein. This plasmid can be used for constructing HLA-DRB3*02:02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:39 Protein Expression Plasmid Vector	PHLAP92540511	Plasmid vector containing HLA-DRB3*02:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:39 protein. This plasmid can be used for constructing HLA-DRB3*02:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:40 Protein Expression Plasmid Vector	PHLAP92540512	Plasmid vector containing HLA-DRB3*02:02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:40 protein. This plasmid can be used for constructing HLA-DRB3*02:02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:02:41 Protein Expression Plasmid Vector	PHLAP92540513	Plasmid vector containing HLA-DRB3*02:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:41 protein. This plasmid can be used for constructing HLA-DRB3*02:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:42 Protein Expression Plasmid Vector	PHLAP92540514	Plasmid vector containing HLA-DRB3*02:02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:42 protein. This plasmid can be used for constructing HLA-DRB3*02:02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:43 Protein Expression Plasmid Vector	PHLAP92540515	Plasmid vector containing HLA-DRB3*02:02:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:43 protein. This plasmid can be used for constructing HLA-DRB3*02:02:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:44 Protein Expression Plasmid Vector	PHLAP92540516	Plasmid vector containing HLA-DRB3*02:02:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:44 protein. This plasmid can be used for constructing HLA-DRB3*02:02:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:45 Protein Expression Plasmid Vector	PHLAP92540517	Plasmid vector containing HLA-DRB3*02:02:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:45 protein. This plasmid can be used for constructing HLA-DRB3*02:02:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:46 Protein Expression Plasmid Vector	PHLAP92540518	Plasmid vector containing HLA-DRB3*02:02:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:46 protein. This plasmid can be used for constructing HLA-DRB3*02:02:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:47 Protein Expression Plasmid Vector	PHLAP92540519	Plasmid vector containing HLA-DRB3*02:02:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:47 protein. This plasmid can be used for constructing HLA-DRB3*02:02:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:02:48 Protein Expression Plasmid Vector	PHLAP92540520	Plasmid vector containing HLA-DRB3*02:02:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:48 protein. This plasmid can be used for constructing HLA-DRB3*02:02:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:49 Protein Expression Plasmid Vector	PHLAP92540521	Plasmid vector containing HLA-DRB3*02:02:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:49 protein. This plasmid can be used for constructing HLA-DRB3*02:02:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:50 Protein Expression Plasmid Vector	PHLAP92540522	Plasmid vector containing HLA-DRB3*02:02:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:50 protein. This plasmid can be used for constructing HLA-DRB3*02:02:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:51 Protein Expression Plasmid Vector	PHLAP92540523	Plasmid vector containing HLA-DRB3*02:02:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:51 protein. This plasmid can be used for constructing HLA-DRB3*02:02:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:52 Protein Expression Plasmid Vector	PHLAP92540524	Plasmid vector containing HLA-DRB3*02:02:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:52 protein. This plasmid can be used for constructing HLA-DRB3*02:02:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:53 Protein Expression Plasmid Vector	PHLAP92540525	Plasmid vector containing HLA-DRB3*02:02:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:53 protein. This plasmid can be used for constructing HLA-DRB3*02:02:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:02:54 Protein Expression Plasmid Vector	PHLAP92540526	Plasmid vector containing HLA-DRB3*02:02:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:02:54 protein. This plasmid can be used for constructing HLA-DRB3*02:02:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:02:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:03 Protein Expression Plasmid Vector	PHLAP92540527	Plasmid vector containing HLA-DRB3*02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:03 protein. This plasmid can be used for constructing HLA-DRB3*02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:04 Protein Expression Plasmid Vector	PHLAP92540528	Plasmid vector containing HLA-DRB3*02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:04 protein. This plasmid can be used for constructing HLA-DRB3*02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:05:01 Protein Expression Plasmid Vector	PHLAP92540529	Plasmid vector containing HLA-DRB3*02:05:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:05:01 protein. This plasmid can be used for constructing HLA-DRB3*02:05:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:05:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:05:02 Protein Expression Plasmid Vector	PHLAP92540530	Plasmid vector containing HLA-DRB3*02:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:05:02 protein. This plasmid can be used for constructing HLA-DRB3*02:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:06 Protein Expression Plasmid Vector	PHLAP92540531	Plasmid vector containing HLA-DRB3*02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:06 protein. This plasmid can be used for constructing HLA-DRB3*02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:07 Protein Expression Plasmid Vector	PHLAP92540532	Plasmid vector containing HLA-DRB3*02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:07 protein. This plasmid can be used for constructing HLA-DRB3*02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:08 Protein Expression Plasmid Vector	PHLAP92540533	Plasmid vector containing HLA-DRB3*02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:08 protein. This plasmid can be used for constructing HLA-DRB3*02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:09 Protein Expression Plasmid Vector	PHLAP92540534	Plasmid vector containing HLA-DRB3*02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:09 protein. This plasmid can be used for constructing HLA-DRB3*02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:10 Protein Expression Plasmid Vector	PHLAP92540535	Plasmid vector containing HLA-DRB3*02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:10 protein. This plasmid can be used for constructing HLA-DRB3*02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:100 Protein Expression Plasmid Vector	PHLAP92540536	Plasmid vector containing HLA-DRB3*02:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:100 protein. This plasmid can be used for constructing HLA-DRB3*02:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:101 Protein Expression Plasmid Vector	PHLAP92540537	Plasmid vector containing HLA-DRB3*02:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:101 protein. This plasmid can be used for constructing HLA-DRB3*02:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:102 Protein Expression Plasmid Vector	PHLAP92540538	Plasmid vector containing HLA-DRB3*02:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:102 protein. This plasmid can be used for constructing HLA-DRB3*02:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:103 Protein Expression Plasmid Vector	PHLAP92540539	Plasmid vector containing HLA-DRB3*02:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:103 protein. This plasmid can be used for constructing HLA-DRB3*02:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:104 Protein Expression Plasmid Vector	PHLAP92540540	Plasmid vector containing HLA-DRB3*02:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:104 protein. This plasmid can be used for constructing HLA-DRB3*02:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:105 Protein Expression Plasmid Vector	PHLAP92540541	Plasmid vector containing HLA-DRB3*02:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:105 protein. This plasmid can be used for constructing HLA-DRB3*02:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:106 Protein Expression Plasmid Vector	PHLAP92540542	Plasmid vector containing HLA-DRB3*02:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:106 protein. This plasmid can be used for constructing HLA-DRB3*02:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:107 Protein Expression Plasmid Vector	PHLAP92540543	Plasmid vector containing HLA-DRB3*02:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:107 protein. This plasmid can be used for constructing HLA-DRB3*02:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:108 Protein Expression Plasmid Vector	PHLAP92540544	Plasmid vector containing HLA-DRB3*02:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:108 protein. This plasmid can be used for constructing HLA-DRB3*02:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:109N Protein Expression Plasmid Vector	PHLAP92540545	Plasmid vector containing HLA-DRB3*02:109N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:109N protein. This plasmid can be used for constructing HLA-DRB3*02:109N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:109N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:11 Protein Expression Plasmid Vector	PHLAP92540546	Plasmid vector containing HLA-DRB3*02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:11 protein. This plasmid can be used for constructing HLA-DRB3*02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:110 Protein Expression Plasmid Vector	PHLAP92540547	Plasmid vector containing HLA-DRB3*02:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:110 protein. This plasmid can be used for constructing HLA-DRB3*02:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:111 Protein Expression Plasmid Vector	PHLAP92540548	Plasmid vector containing HLA-DRB3*02:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:111 protein. This plasmid can be used for constructing HLA-DRB3*02:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:112 Protein Expression Plasmid Vector	PHLAP92540549	Plasmid vector containing HLA-DRB3*02:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:112 protein. This plasmid can be used for constructing HLA-DRB3*02:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:113 Protein Expression Plasmid Vector	PHLAP92540550	Plasmid vector containing HLA-DRB3*02:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:113 protein. This plasmid can be used for constructing HLA-DRB3*02:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:114 Protein Expression Plasmid Vector	PHLAP92540551	Plasmid vector containing HLA-DRB3*02:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:114 protein. This plasmid can be used for constructing HLA-DRB3*02:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:115 Protein Expression Plasmid Vector	PHLAP92540552	Plasmid vector containing HLA-DRB3*02:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:115 protein. This plasmid can be used for constructing HLA-DRB3*02:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:116 Protein Expression Plasmid Vector	PHLAP92540553	Plasmid vector containing HLA-DRB3*02:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:116 protein. This plasmid can be used for constructing HLA-DRB3*02:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:117 Protein Expression Plasmid Vector	PHLAP92540554	Plasmid vector containing HLA-DRB3*02:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:117 protein. This plasmid can be used for constructing HLA-DRB3*02:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:118 Protein Expression Plasmid Vector	PHLAP92540555	Plasmid vector containing HLA-DRB3*02:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:118 protein. This plasmid can be used for constructing HLA-DRB3*02:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:119 Protein Expression Plasmid Vector	PHLAP92540556	Plasmid vector containing HLA-DRB3*02:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:119 protein. This plasmid can be used for constructing HLA-DRB3*02:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:12 Protein Expression Plasmid Vector	PHLAP92540557	Plasmid vector containing HLA-DRB3*02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:12 protein. This plasmid can be used for constructing HLA-DRB3*02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:120 Protein Expression Plasmid Vector	PHLAP92540558	Plasmid vector containing HLA-DRB3*02:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:120 protein. This plasmid can be used for constructing HLA-DRB3*02:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:121N Protein Expression Plasmid Vector	PHLAP92540559	Plasmid vector containing HLA-DRB3*02:121N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:121N protein. This plasmid can be used for constructing HLA-DRB3*02:121N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:121N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:122 Protein Expression Plasmid Vector	PHLAP92540560	Plasmid vector containing HLA-DRB3*02:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:122 protein. This plasmid can be used for constructing HLA-DRB3*02:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:123 Protein Expression Plasmid Vector	PHLAP92540561	Plasmid vector containing HLA-DRB3*02:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:123 protein. This plasmid can be used for constructing HLA-DRB3*02:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:124 Protein Expression Plasmid Vector	PHLAP92540562	Plasmid vector containing HLA-DRB3*02:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:124 protein. This plasmid can be used for constructing HLA-DRB3*02:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:125N Protein Expression Plasmid Vector	PHLAP92540563	Plasmid vector containing HLA-DRB3*02:125N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:125N protein. This plasmid can be used for constructing HLA-DRB3*02:125N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:125N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:126 Protein Expression Plasmid Vector	PHLAP92540564	Plasmid vector containing HLA-DRB3*02:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:126 protein. This plasmid can be used for constructing HLA-DRB3*02:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:127 Protein Expression Plasmid Vector	PHLAP92540565	Plasmid vector containing HLA-DRB3*02:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:127 protein. This plasmid can be used for constructing HLA-DRB3*02:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:128 Protein Expression Plasmid Vector	PHLAP92540566	Plasmid vector containing HLA-DRB3*02:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:128 protein. This plasmid can be used for constructing HLA-DRB3*02:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:129 Protein Expression Plasmid Vector	PHLAP92540567	Plasmid vector containing HLA-DRB3*02:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:129 protein. This plasmid can be used for constructing HLA-DRB3*02:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:13 Protein Expression Plasmid Vector	PHLAP92540568	Plasmid vector containing HLA-DRB3*02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:13 protein. This plasmid can be used for constructing HLA-DRB3*02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:130 Protein Expression Plasmid Vector	PHLAP92540569	Plasmid vector containing HLA-DRB3*02:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:130 protein. This plasmid can be used for constructing HLA-DRB3*02:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:131 Protein Expression Plasmid Vector	PHLAP92540570	Plasmid vector containing HLA-DRB3*02:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:131 protein. This plasmid can be used for constructing HLA-DRB3*02:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:132 Protein Expression Plasmid Vector	PHLAP92540571	Plasmid vector containing HLA-DRB3*02:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:132 protein. This plasmid can be used for constructing HLA-DRB3*02:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:133 Protein Expression Plasmid Vector	PHLAP92540572	Plasmid vector containing HLA-DRB3*02:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:133 protein. This plasmid can be used for constructing HLA-DRB3*02:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:134 Protein Expression Plasmid Vector	PHLAP92540573	Plasmid vector containing HLA-DRB3*02:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:134 protein. This plasmid can be used for constructing HLA-DRB3*02:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:135 Protein Expression Plasmid Vector	PHLAP92540574	Plasmid vector containing HLA-DRB3*02:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:135 protein. This plasmid can be used for constructing HLA-DRB3*02:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:136 Protein Expression Plasmid Vector	PHLAP92540575	Plasmid vector containing HLA-DRB3*02:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:136 protein. This plasmid can be used for constructing HLA-DRB3*02:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:137N Protein Expression Plasmid Vector	PHLAP92540576	Plasmid vector containing HLA-DRB3*02:137N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:137N protein. This plasmid can be used for constructing HLA-DRB3*02:137N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:137N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:138 Protein Expression Plasmid Vector	PHLAP92540577	Plasmid vector containing HLA-DRB3*02:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:138 protein. This plasmid can be used for constructing HLA-DRB3*02:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:139 Protein Expression Plasmid Vector	PHLAP92540578	Plasmid vector containing HLA-DRB3*02:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:139 protein. This plasmid can be used for constructing HLA-DRB3*02:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:14 Protein Expression Plasmid Vector	PHLAP92540579	Plasmid vector containing HLA-DRB3*02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:14 protein. This plasmid can be used for constructing HLA-DRB3*02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:140 Protein Expression Plasmid Vector	PHLAP92540580	Plasmid vector containing HLA-DRB3*02:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:140 protein. This plasmid can be used for constructing HLA-DRB3*02:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:141 Protein Expression Plasmid Vector	PHLAP92540581	Plasmid vector containing HLA-DRB3*02:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:141 protein. This plasmid can be used for constructing HLA-DRB3*02:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:142 Protein Expression Plasmid Vector	PHLAP92540582	Plasmid vector containing HLA-DRB3*02:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:142 protein. This plasmid can be used for constructing HLA-DRB3*02:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:143 Protein Expression Plasmid Vector	PHLAP92540583	Plasmid vector containing HLA-DRB3*02:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:143 protein. This plasmid can be used for constructing HLA-DRB3*02:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:144 Protein Expression Plasmid Vector	PHLAP92540584	Plasmid vector containing HLA-DRB3*02:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:144 protein. This plasmid can be used for constructing HLA-DRB3*02:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:145N Protein Expression Plasmid Vector	PHLAP92540585	Plasmid vector containing HLA-DRB3*02:145N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:145N protein. This plasmid can be used for constructing HLA-DRB3*02:145N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:145N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:146 Protein Expression Plasmid Vector	PHLAP92540586	Plasmid vector containing HLA-DRB3*02:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:146 protein. This plasmid can be used for constructing HLA-DRB3*02:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:147 Protein Expression Plasmid Vector	PHLAP92540587	Plasmid vector containing HLA-DRB3*02:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:147 protein. This plasmid can be used for constructing HLA-DRB3*02:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:148 Protein Expression Plasmid Vector	PHLAP92540588	Plasmid vector containing HLA-DRB3*02:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:148 protein. This plasmid can be used for constructing HLA-DRB3*02:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:149 Protein Expression Plasmid Vector	PHLAP92540589	Plasmid vector containing HLA-DRB3*02:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:149 protein. This plasmid can be used for constructing HLA-DRB3*02:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:15 Protein Expression Plasmid Vector	PHLAP92540590	Plasmid vector containing HLA-DRB3*02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:15 protein. This plasmid can be used for constructing HLA-DRB3*02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:150 Protein Expression Plasmid Vector	PHLAP92540591	Plasmid vector containing HLA-DRB3*02:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:150 protein. This plasmid can be used for constructing HLA-DRB3*02:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:151 Protein Expression Plasmid Vector	PHLAP92540592	Plasmid vector containing HLA-DRB3*02:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:151 protein. This plasmid can be used for constructing HLA-DRB3*02:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:152 Protein Expression Plasmid Vector	PHLAP92540593	Plasmid vector containing HLA-DRB3*02:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:152 protein. This plasmid can be used for constructing HLA-DRB3*02:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:153 Protein Expression Plasmid Vector	PHLAP92540594	Plasmid vector containing HLA-DRB3*02:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:153 protein. This plasmid can be used for constructing HLA-DRB3*02:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:154 Protein Expression Plasmid Vector	PHLAP92540595	Plasmid vector containing HLA-DRB3*02:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:154 protein. This plasmid can be used for constructing HLA-DRB3*02:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:155 Protein Expression Plasmid Vector	PHLAP92540596	Plasmid vector containing HLA-DRB3*02:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:155 protein. This plasmid can be used for constructing HLA-DRB3*02:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:156 Protein Expression Plasmid Vector	PHLAP92540597	Plasmid vector containing HLA-DRB3*02:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:156 protein. This plasmid can be used for constructing HLA-DRB3*02:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:157 Protein Expression Plasmid Vector	PHLAP92540598	Plasmid vector containing HLA-DRB3*02:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:157 protein. This plasmid can be used for constructing HLA-DRB3*02:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:158 Protein Expression Plasmid Vector	PHLAP92540599	Plasmid vector containing HLA-DRB3*02:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:158 protein. This plasmid can be used for constructing HLA-DRB3*02:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:159 Protein Expression Plasmid Vector	PHLAP92540600	Plasmid vector containing HLA-DRB3*02:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:159 protein. This plasmid can be used for constructing HLA-DRB3*02:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:16 Protein Expression Plasmid Vector	PHLAP92540601	Plasmid vector containing HLA-DRB3*02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:16 protein. This plasmid can be used for constructing HLA-DRB3*02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:160 Protein Expression Plasmid Vector	PHLAP92540602	Plasmid vector containing HLA-DRB3*02:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:160 protein. This plasmid can be used for constructing HLA-DRB3*02:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:161 Protein Expression Plasmid Vector	PHLAP92540603	Plasmid vector containing HLA-DRB3*02:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:161 protein. This plasmid can be used for constructing HLA-DRB3*02:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:162 Protein Expression Plasmid Vector	PHLAP92540604	Plasmid vector containing HLA-DRB3*02:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:162 protein. This plasmid can be used for constructing HLA-DRB3*02:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:163 Protein Expression Plasmid Vector	PHLAP92540605	Plasmid vector containing HLA-DRB3*02:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:163 protein. This plasmid can be used for constructing HLA-DRB3*02:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:164 Protein Expression Plasmid Vector	PHLAP92540606	Plasmid vector containing HLA-DRB3*02:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:164 protein. This plasmid can be used for constructing HLA-DRB3*02:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:165N Protein Expression Plasmid Vector	PHLAP92540607	Plasmid vector containing HLA-DRB3*02:165N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:165N protein. This plasmid can be used for constructing HLA-DRB3*02:165N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:165N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:166 Protein Expression Plasmid Vector	PHLAP92540608	Plasmid vector containing HLA-DRB3*02:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:166 protein. This plasmid can be used for constructing HLA-DRB3*02:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:167 Protein Expression Plasmid Vector	PHLAP92540609	Plasmid vector containing HLA-DRB3*02:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:167 protein. This plasmid can be used for constructing HLA-DRB3*02:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:168 Protein Expression Plasmid Vector	PHLAP92540610	Plasmid vector containing HLA-DRB3*02:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:168 protein. This plasmid can be used for constructing HLA-DRB3*02:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:169 Protein Expression Plasmid Vector	PHLAP92540611	Plasmid vector containing HLA-DRB3*02:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:169 protein. This plasmid can be used for constructing HLA-DRB3*02:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:17 Protein Expression Plasmid Vector	PHLAP925406112	Plasmid vector containing HLA-DRB3*02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:17 protein. This plasmid can be used for constructing HLA-DRB3*02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:170 Protein Expression Plasmid Vector	PHLAP925406113	Plasmid vector containing HLA-DRB3*02:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:170 protein. This plasmid can be used for constructing HLA-DRB3*02:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:171 Protein Expression Plasmid Vector	PHLAP925406114	Plasmid vector containing HLA-DRB3*02:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:171 protein. This plasmid can be used for constructing HLA-DRB3*02:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:172 Protein Expression Plasmid Vector	PHLAP925406115	Plasmid vector containing HLA-DRB3*02:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:172 protein. This plasmid can be used for constructing HLA-DRB3*02:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:173:01 Protein Expression Plasmid Vector	PHLAP925406116	Plasmid vector containing HLA-DRB3*02:173:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:173:01 protein. This plasmid can be used for constructing HLA-DRB3*02:173:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:173:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:173:02 Protein Expression Plasmid Vector	PHLAP925406117	Plasmid vector containing HLA-DRB3*02:173:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:173:02 protein. This plasmid can be used for constructing HLA-DRB3*02:173:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:173:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:174 Protein Expression Plasmid Vector	PHLAP925406118	Plasmid vector containing HLA-DRB3*02:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:174 protein. This plasmid can be used for constructing HLA-DRB3*02:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:175 Protein Expression Plasmid Vector	PHLAP92540619	Plasmid vector containing HLA-DRB3*02:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:175 protein. This plasmid can be used for constructing HLA-DRB3*02:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:176 Protein Expression Plasmid Vector	PHLAP92540620	Plasmid vector containing HLA-DRB3*02:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:176 protein. This plasmid can be used for constructing HLA-DRB3*02:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:177 Protein Expression Plasmid Vector	PHLAP92540621	Plasmid vector containing HLA-DRB3*02:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:177 protein. This plasmid can be used for constructing HLA-DRB3*02:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:178 Protein Expression Plasmid Vector	PHLAP92540622	Plasmid vector containing HLA-DRB3*02:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:178 protein. This plasmid can be used for constructing HLA-DRB3*02:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:179N Protein Expression Plasmid Vector	PHLAP92540623	Plasmid vector containing HLA-DRB3*02:179N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:179N protein. This plasmid can be used for constructing HLA-DRB3*02:179N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:179N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:18 Protein Expression Plasmid Vector	PHLAP92540624	Plasmid vector containing HLA-DRB3*02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:18 protein. This plasmid can be used for constructing HLA-DRB3*02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:180 Protein Expression Plasmid Vector	PHLAP92540625	Plasmid vector containing HLA-DRB3*02:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:180 protein. This plasmid can be used for constructing HLA-DRB3*02:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:181 Protein Expression Plasmid Vector	PHLAP92540626	Plasmid vector containing HLA-DRB3*02:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:181 protein. This plasmid can be used for constructing HLA-DRB3*02:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:182 Protein Expression Plasmid Vector	PHLAP92540627	Plasmid vector containing HLA-DRB3*02:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:182 protein. This plasmid can be used for constructing HLA-DRB3*02:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:183 Protein Expression Plasmid Vector	PHLAP92540628	Plasmid vector containing HLA-DRB3*02:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:183 protein. This plasmid can be used for constructing HLA-DRB3*02:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:184 Protein Expression Plasmid Vector	PHLAP92540629	Plasmid vector containing HLA-DRB3*02:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:184 protein. This plasmid can be used for constructing HLA-DRB3*02:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:185 Protein Expression Plasmid Vector	PHLAP92540630	Plasmid vector containing HLA-DRB3*02:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:185 protein. This plasmid can be used for constructing HLA-DRB3*02:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:186 Protein Expression Plasmid Vector	PHLAP92540631	Plasmid vector containing HLA-DRB3*02:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:186 protein. This plasmid can be used for constructing HLA-DRB3*02:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:187N Protein Expression Plasmid Vector	PHLAP92540632	Plasmid vector containing HLA-DRB3*02:187N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:187N protein. This plasmid can be used for constructing HLA-DRB3*02:187N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:187N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:188 Protein Expression Plasmid Vector	PHLAP92540633	Plasmid vector containing HLA-DRB3*02:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:188 protein. This plasmid can be used for constructing HLA-DRB3*02:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:189 Protein Expression Plasmid Vector	PHLAP92540634	Plasmid vector containing HLA-DRB3*02:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:189 protein. This plasmid can be used for constructing HLA-DRB3*02:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:19 Protein Expression Plasmid Vector	PHLAP92540635	Plasmid vector containing HLA-DRB3*02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:19 protein. This plasmid can be used for constructing HLA-DRB3*02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:190 Protein Expression Plasmid Vector	PHLAP92540636	Plasmid vector containing HLA-DRB3*02:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:190 protein. This plasmid can be used for constructing HLA-DRB3*02:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:191 Protein Expression Plasmid Vector	PHLAP92540637	Plasmid vector containing HLA-DRB3*02:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:191 protein. This plasmid can be used for constructing HLA-DRB3*02:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:192 Protein Expression Plasmid Vector	PHLAP92540638	Plasmid vector containing HLA-DRB3*02:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:192 protein. This plasmid can be used for constructing HLA-DRB3*02:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:193 Protein Expression Plasmid Vector	PHLAP92540639	Plasmid vector containing HLA-DRB3*02:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:193 protein. This plasmid can be used for constructing HLA-DRB3*02:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:194 Protein Expression Plasmid Vector	PHLAP92540640	Plasmid vector containing HLA-DRB3*02:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:194 protein. This plasmid can be used for constructing HLA-DRB3*02:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:195 Protein Expression Plasmid Vector	PHLAP92540641	Plasmid vector containing HLA-DRB3*02:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:195 protein. This plasmid can be used for constructing HLA-DRB3*02:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:196 Protein Expression Plasmid Vector	PHLAP92540642	Plasmid vector containing HLA-DRB3*02:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:196 protein. This plasmid can be used for constructing HLA-DRB3*02:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:197 Protein Expression Plasmid Vector	PHLAP92540643	Plasmid vector containing HLA-DRB3*02:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:197 protein. This plasmid can be used for constructing HLA-DRB3*02:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:198 Protein Expression Plasmid Vector	PHLAP92540644	Plasmid vector containing HLA-DRB3*02:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:198 protein. This plasmid can be used for constructing HLA-DRB3*02:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:199 Protein Expression Plasmid Vector	PHLAP92540645	Plasmid vector containing HLA-DRB3*02:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:199 protein. This plasmid can be used for constructing HLA-DRB3*02:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:20 Protein Expression Plasmid Vector	PHLAP92540646	Plasmid vector containing HLA-DRB3*02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:20 protein. This plasmid can be used for constructing HLA-DRB3*02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:200 Protein Expression Plasmid Vector	PHLAP92540647	Plasmid vector containing HLA-DRB3*02:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:200 protein. This plasmid can be used for constructing HLA-DRB3*02:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:201 Protein Expression Plasmid Vector	PHLAP92540648	Plasmid vector containing HLA-DRB3*02:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:201 protein. This plasmid can be used for constructing HLA-DRB3*02:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:202 Protein Expression Plasmid Vector	PHLAP92540649	Plasmid vector containing HLA-DRB3*02:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:202 protein. This plasmid can be used for constructing HLA-DRB3*02:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:203 Protein Expression Plasmid Vector	PHLAP92540650	Plasmid vector containing HLA-DRB3*02:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:203 protein. This plasmid can be used for constructing HLA-DRB3*02:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:204 Protein Expression Plasmid Vector	PHLAP92540651	Plasmid vector containing HLA-DRB3*02:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:204 protein. This plasmid can be used for constructing HLA-DRB3*02:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:205 Protein Expression Plasmid Vector	PHLAP92540652	Plasmid vector containing HLA-DRB3*02:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:205 protein. This plasmid can be used for constructing HLA-DRB3*02:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:206N Protein Expression Plasmid Vector	PHLAP92540653	Plasmid vector containing HLA-DRB3*02:206N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:206N protein. This plasmid can be used for constructing HLA-DRB3*02:206N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:206N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:207 Protein Expression Plasmid Vector	PHLAP92540654	Plasmid vector containing HLA-DRB3*02:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:207 protein. This plasmid can be used for constructing HLA-DRB3*02:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:208 Protein Expression Plasmid Vector	PHLAP92540655	Plasmid vector containing HLA-DRB3*02:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:208 protein. This plasmid can be used for constructing HLA-DRB3*02:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:209 Protein Expression Plasmid Vector	PHLAP92540656	Plasmid vector containing HLA-DRB3*02:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:209 protein. This plasmid can be used for constructing HLA-DRB3*02:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:21 Protein Expression Plasmid Vector	PHLAP92540657	Plasmid vector containing HLA-DRB3*02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:21 protein. This plasmid can be used for constructing HLA-DRB3*02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:210Q Protein Expression Plasmid Vector	PHLAP92540658	Plasmid vector containing HLA-DRB3*02:210Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:210Q protein. This plasmid can be used for constructing HLA-DRB3*02:210Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:210Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:211 Protein Expression Plasmid Vector	PHLAP92540659	Plasmid vector containing HLA-DRB3*02:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:211 protein. This plasmid can be used for constructing HLA-DRB3*02:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:212 Protein Expression Plasmid Vector	PHLAP92540660	Plasmid vector containing HLA-DRB3*02:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:212 protein. This plasmid can be used for constructing HLA-DRB3*02:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:213 Protein Expression Plasmid Vector	PHLAP92540661	Plasmid vector containing HLA-DRB3*02:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:213 protein. This plasmid can be used for constructing HLA-DRB3*02:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:214N Protein Expression Plasmid Vector	PHLAP92540662	Plasmid vector containing HLA-DRB3*02:214N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:214N protein. This plasmid can be used for constructing HLA-DRB3*02:214N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:214N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:215 Protein Expression Plasmid Vector	PHLAP92540663	Plasmid vector containing HLA-DRB3*02:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:215 protein. This plasmid can be used for constructing HLA-DRB3*02:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:216 Protein Expression Plasmid Vector	PHLAP92540664	Plasmid vector containing HLA-DRB3*02:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:216 protein. This plasmid can be used for constructing HLA-DRB3*02:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:217 Protein Expression Plasmid Vector	PHLAP92540665	Plasmid vector containing HLA-DRB3*02:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:217 protein. This plasmid can be used for constructing HLA-DRB3*02:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:218 Protein Expression Plasmid Vector	PHLAP92540666	Plasmid vector containing HLA-DRB3*02:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:218 protein. This plasmid can be used for constructing HLA-DRB3*02:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:219 Protein Expression Plasmid Vector	PHLAP92540667	Plasmid vector containing HLA-DRB3*02:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:219 protein. This plasmid can be used for constructing HLA-DRB3*02:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:22:01 Protein Expression Plasmid Vector	PHLAP92540668	Plasmid vector containing HLA-DRB3*02:22:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:22:01 protein. This plasmid can be used for constructing HLA-DRB3*02:22:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:22:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:22:02 Protein Expression Plasmid Vector	PHLAP92540669	Plasmid vector containing HLA-DRB3*02:22:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:22:02 protein. This plasmid can be used for constructing HLA-DRB3*02:22:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:22:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:220 Protein Expression Plasmid Vector	PHLAP92540670	Plasmid vector containing HLA-DRB3*02:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:220 protein. This plasmid can be used for constructing HLA-DRB3*02:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:221 Protein Expression Plasmid Vector	PHLAP92540671	Plasmid vector containing HLA-DRB3*02:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:221 protein. This plasmid can be used for constructing HLA-DRB3*02:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:222N Protein Expression Plasmid Vector	PHLAP92540672	Plasmid vector containing HLA-DRB3*02:222N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:222N protein. This plasmid can be used for constructing HLA-DRB3*02:222N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:222N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:223 Protein Expression Plasmid Vector	PHLAP92540673	Plasmid vector containing HLA-DRB3*02:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:223 protein. This plasmid can be used for constructing HLA-DRB3*02:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:224 Protein Expression Plasmid Vector	PHLAP92540674	Plasmid vector containing HLA-DRB3*02:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:224 protein. This plasmid can be used for constructing HLA-DRB3*02:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:225 Protein Expression Plasmid Vector	PHLAP92540675	Plasmid vector containing HLA-DRB3*02:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:225 protein. This plasmid can be used for constructing HLA-DRB3*02:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:226N Protein Expression Plasmid Vector	PHLAP92540676	Plasmid vector containing HLA-DRB3*02:226N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:226N protein. This plasmid can be used for constructing HLA-DRB3*02:226N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:226N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:227 Protein Expression Plasmid Vector	PHLAP92540677	Plasmid vector containing HLA-DRB3*02:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:227 protein. This plasmid can be used for constructing HLA-DRB3*02:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:228 Protein Expression Plasmid Vector	PHLAP92540678	Plasmid vector containing HLA-DRB3*02:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:228 protein. This plasmid can be used for constructing HLA-DRB3*02:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:229 Protein Expression Plasmid Vector	PHLAP92540679	Plasmid vector containing HLA-DRB3*02:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:229 protein. This plasmid can be used for constructing HLA-DRB3*02:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:23 Protein Expression Plasmid Vector	PHLAP92540680	Plasmid vector containing HLA-DRB3*02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:23 protein. This plasmid can be used for constructing HLA-DRB3*02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:230 Protein Expression Plasmid Vector	PHLAP92540681	Plasmid vector containing HLA-DRB3*02:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:230 protein. This plasmid can be used for constructing HLA-DRB3*02:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:231 Protein Expression Plasmid Vector	PHLAP92540682	Plasmid vector containing HLA-DRB3*02:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:231 protein. This plasmid can be used for constructing HLA-DRB3*02:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:232 Protein Expression Plasmid Vector	PHLAP92540683	Plasmid vector containing HLA-DRB3*02:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:232 protein. This plasmid can be used for constructing HLA-DRB3*02:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:233 Protein Expression Plasmid Vector	PHLAP92540684	Plasmid vector containing HLA-DRB3*02:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:233 protein. This plasmid can be used for constructing HLA-DRB3*02:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:234 Protein Expression Plasmid Vector	PHLAP92540685	Plasmid vector containing HLA-DRB3*02:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:234 protein. This plasmid can be used for constructing HLA-DRB3*02:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:235 Protein Expression Plasmid Vector	PHLAP92540686	Plasmid vector containing HLA-DRB3*02:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:235 protein. This plasmid can be used for constructing HLA-DRB3*02:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:236:01:01 Protein Expression Plasmid Vector	PHLAP92540687	Plasmid vector containing HLA-DRB3*02:236:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:236:01:01 protein. This plasmid can be used for constructing HLA-DRB3*02:236:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:236:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:236:01:02 Protein Expression Plasmid Vector	PHLAP92540688	Plasmid vector containing HLA-DRB3*02:236:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:236:01:02 protein. This plasmid can be used for constructing HLA-DRB3*02:236:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:236:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:237:01:01 Protein Expression Plasmid Vector	PHLAP92540689	Plasmid vector containing HLA-DRB3*02:237:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:237:01:01 protein. This plasmid can be used for constructing HLA-DRB3*02:237:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:237:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:237:01:02 Protein Expression Plasmid Vector	PHLAP92540690	Plasmid vector containing HLA-DRB3*02:237:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:237:01:02 protein. This plasmid can be used for constructing HLA-DRB3*02:237:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:237:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:24 Protein Expression Plasmid Vector	PHLAP92540691	Plasmid vector containing HLA-DRB3*02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:24 protein. This plasmid can be used for constructing HLA-DRB3*02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:25 Protein Expression Plasmid Vector	PHLAP92540692	Plasmid vector containing HLA-DRB3*02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:25 protein. This plasmid can be used for constructing HLA-DRB3*02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:26 Protein Expression Plasmid Vector	PHLAP92540693	Plasmid vector containing HLA-DRB3*02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:26 protein. This plasmid can be used for constructing HLA-DRB3*02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:27 Protein Expression Plasmid Vector	PHLAP92540694	Plasmid vector containing HLA-DRB3*02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:27 protein. This plasmid can be used for constructing HLA-DRB3*02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:28 Protein Expression Plasmid Vector	PHLAP92540695	Plasmid vector containing HLA-DRB3*02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:28 protein. This plasmid can be used for constructing HLA-DRB3*02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:29N Protein Expression Plasmid Vector	PHLAP92540696	Plasmid vector containing HLA-DRB3*02:29N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:29N protein. This plasmid can be used for constructing HLA-DRB3*02:29N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:29N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:30 Protein Expression Plasmid Vector	PHLAP92540697	Plasmid vector containing HLA-DRB3*02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:30 protein. This plasmid can be used for constructing HLA-DRB3*02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:31:01 Protein Expression Plasmid Vector	PHLAP92540698	Plasmid vector containing HLA-DRB3*02:31:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:31:01 protein. This plasmid can be used for constructing HLA-DRB3*02:31:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:31:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:31:02 Protein Expression Plasmid Vector	PHLAP92540699	Plasmid vector containing HLA-DRB3*02:31:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:31:02 protein. This plasmid can be used for constructing HLA-DRB3*02:31:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:31:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:32:01:01 Protein Expression Plasmid Vector	PHLAP925407000	Plasmid vector containing HLA-DRB3*02:32:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:32:01:01 protein. This plasmid can be used for constructing HLA-DRB3*02:32:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:32:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:32:01:02 Protein Expression Plasmid Vector	PHLAP925407001	Plasmid vector containing HLA-DRB3*02:32:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:32:01:02 protein. This plasmid can be used for constructing HLA-DRB3*02:32:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:32:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:33 Protein Expression Plasmid Vector	PHLAP925407002	Plasmid vector containing HLA-DRB3*02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:33 protein. This plasmid can be used for constructing HLA-DRB3*02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:34 Protein Expression Plasmid Vector	PHLAP92540703	Plasmid vector containing HLA-DRB3*02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:34 protein. This plasmid can be used for constructing HLA-DRB3*02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:35 Protein Expression Plasmid Vector	PHLAP92540704	Plasmid vector containing HLA-DRB3*02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:35 protein. This plasmid can be used for constructing HLA-DRB3*02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:36 Protein Expression Plasmid Vector	PHLAP92540705	Plasmid vector containing HLA-DRB3*02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:36 protein. This plasmid can be used for constructing HLA-DRB3*02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:37 Protein Expression Plasmid Vector	PHLAP92540706	Plasmid vector containing HLA-DRB3*02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:37 protein. This plasmid can be used for constructing HLA-DRB3*02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:38 Protein Expression Plasmid Vector	PHLAP92540707	Plasmid vector containing HLA-DRB3*02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:38 protein. This plasmid can be used for constructing HLA-DRB3*02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:39 Protein Expression Plasmid Vector	PHLAP92540708	Plasmid vector containing HLA-DRB3*02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:39 protein. This plasmid can be used for constructing HLA-DRB3*02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:40 Protein Expression Plasmid Vector	PHLAP92540709	Plasmid vector containing HLA-DRB3*02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:40 protein. This plasmid can be used for constructing HLA-DRB3*02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:41 Protein Expression Plasmid Vector	PHLAP92540710	Plasmid vector containing HLA-DRB3*02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:41 protein. This plasmid can be used for constructing HLA-DRB3*02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*02:42 Protein Expression Plasmid Vector	PHLAP92540711	Plasmid vector containing HLA-DRB3*02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:42 protein. This plasmid can be used for constructing HLA-DRB3*02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:43 Protein Expression Plasmid Vector	PHLAP92540712	Plasmid vector containing HLA-DRB3*02:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:43 protein. This plasmid can be used for constructing HLA-DRB3*02:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:44 Protein Expression Plasmid Vector	PHLAP92540713	Plasmid vector containing HLA-DRB3*02:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:44 protein. This plasmid can be used for constructing HLA-DRB3*02:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:45 Protein Expression Plasmid Vector	PHLAP92540714	Plasmid vector containing HLA-DRB3*02:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:45 protein. This plasmid can be used for constructing HLA-DRB3*02:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:46 Protein Expression Plasmid Vector	PHLAP92540715	Plasmid vector containing HLA-DRB3*02:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:46 protein. This plasmid can be used for constructing HLA-DRB3*02:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:47 Protein Expression Plasmid Vector	PHLAP92540716	Plasmid vector containing HLA-DRB3*02:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:47 protein. This plasmid can be used for constructing HLA-DRB3*02:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:48 Protein Expression Plasmid Vector	PHLAP92540717	Plasmid vector containing HLA-DRB3*02:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:48 protein. This plasmid can be used for constructing HLA-DRB3*02:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:49 Protein Expression Plasmid Vector	PHLAP92540718	Plasmid vector containing HLA-DRB3*02:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:49 protein. This plasmid can be used for constructing HLA-DRB3*02:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*02:50 Protein Expression Plasmid Vector	PHLAP92540719	Plasmid vector containing HLA-DRB3*02:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:50 protein. This plasmid can be used for constructing HLA-DRB3*02:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:51 Protein Expression Plasmid Vector	PHLAP92540720	Plasmid vector containing HLA-DRB3*02:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:51 protein. This plasmid can be used for constructing HLA-DRB3*02:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:52 Protein Expression Plasmid Vector	PHLAP92540721	Plasmid vector containing HLA-DRB3*02:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:52 protein. This plasmid can be used for constructing HLA-DRB3*02:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:53 Protein Expression Plasmid Vector	PHLAP92540722	Plasmid vector containing HLA-DRB3*02:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:53 protein. This plasmid can be used for constructing HLA-DRB3*02:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:54 Protein Expression Plasmid Vector	PHLAP92540723	Plasmid vector containing HLA-DRB3*02:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:54 protein. This plasmid can be used for constructing HLA-DRB3*02:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:55N Protein Expression Plasmid Vector	PHLAP92540724	Plasmid vector containing HLA-DRB3*02:55N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:55N protein. This plasmid can be used for constructing HLA-DRB3*02:55N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:55N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:56 Protein Expression Plasmid Vector	PHLAP92540725	Plasmid vector containing HLA-DRB3*02:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:56 protein. This plasmid can be used for constructing HLA-DRB3*02:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:57 Protein Expression Plasmid Vector	PHLAP92540726	Plasmid vector containing HLA-DRB3*02:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:57 protein. This plasmid can be used for constructing HLA-DRB3*02:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:58 Protein Expression Plasmid Vector	PHLAP92540727	Plasmid vector containing HLA-DRB3*02:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:58 protein. This plasmid can be used for constructing HLA-DRB3*02:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:59 Protein Expression Plasmid Vector	PHLAP92540728	Plasmid vector containing HLA-DRB3*02:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:59 protein. This plasmid can be used for constructing HLA-DRB3*02:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:60 Protein Expression Plasmid Vector	PHLAP92540729	Plasmid vector containing HLA-DRB3*02:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:60 protein. This plasmid can be used for constructing HLA-DRB3*02:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:61Q Protein Expression Plasmid Vector	PHLAP92540730	Plasmid vector containing HLA-DRB3*02:61Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:61Q protein. This plasmid can be used for constructing HLA-DRB3*02:61Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:61Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:62 Protein Expression Plasmid Vector	PHLAP92540731	Plasmid vector containing HLA-DRB3*02:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:62 protein. This plasmid can be used for constructing HLA-DRB3*02:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:63 Protein Expression Plasmid Vector	PHLAP92540732	Plasmid vector containing HLA-DRB3*02:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:63 protein. This plasmid can be used for constructing HLA-DRB3*02:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:64 Protein Expression Plasmid Vector	PHLAP92540733	Plasmid vector containing HLA-DRB3*02:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:64 protein. This plasmid can be used for constructing HLA-DRB3*02:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:65 Protein Expression Plasmid Vector	PHLAP92540734	Plasmid vector containing HLA-DRB3*02:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:65 protein. This plasmid can be used for constructing HLA-DRB3*02:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:66 Protein Expression Plasmid Vector	PHLAP92540735	Plasmid vector containing HLA-DRB3*02:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:66 protein. This plasmid can be used for constructing HLA-DRB3*02:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:67N Protein Expression Plasmid Vector	PHLAP92540736	Plasmid vector containing HLA-DRB3*02:67N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:67N protein. This plasmid can be used for constructing HLA-DRB3*02:67N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:67N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:68 Protein Expression Plasmid Vector	PHLAP92540737	Plasmid vector containing HLA-DRB3*02:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:68 protein. This plasmid can be used for constructing HLA-DRB3*02:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:69 Protein Expression Plasmid Vector	PHLAP92540738	Plasmid vector containing HLA-DRB3*02:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:69 protein. This plasmid can be used for constructing HLA-DRB3*02:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:70 Protein Expression Plasmid Vector	PHLAP92540739	Plasmid vector containing HLA-DRB3*02:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:70 protein. This plasmid can be used for constructing HLA-DRB3*02:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:71 Protein Expression Plasmid Vector	PHLAP92540740	Plasmid vector containing HLA-DRB3*02:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:71 protein. This plasmid can be used for constructing HLA-DRB3*02:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:72 Protein Expression Plasmid Vector	PHLAP92540741	Plasmid vector containing HLA-DRB3*02:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:72 protein. This plasmid can be used for constructing HLA-DRB3*02:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:73 Protein Expression Plasmid Vector	PHLAP92540742	Plasmid vector containing HLA-DRB3*02:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:73 protein. This plasmid can be used for constructing HLA-DRB3*02:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:74 Protein Expression Plasmid Vector	PHLAP92540743	Plasmid vector containing HLA-DRB3*02:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:74 protein. This plasmid can be used for constructing HLA-DRB3*02:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:75 Protein Expression Plasmid Vector	PHLAP92540744	Plasmid vector containing HLA-DRB3*02:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:75 protein. This plasmid can be used for constructing HLA-DRB3*02:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:76 Protein Expression Plasmid Vector	PHLAP92540745	Plasmid vector containing HLA-DRB3*02:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:76 protein. This plasmid can be used for constructing HLA-DRB3*02:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:77 Protein Expression Plasmid Vector	PHLAP92540746	Plasmid vector containing HLA-DRB3*02:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:77 protein. This plasmid can be used for constructing HLA-DRB3*02:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:78 Protein Expression Plasmid Vector	PHLAP92540747	Plasmid vector containing HLA-DRB3*02:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:78 protein. This plasmid can be used for constructing HLA-DRB3*02:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:79 Protein Expression Plasmid Vector	PHLAP92540748	Plasmid vector containing HLA-DRB3*02:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:79 protein. This plasmid can be used for constructing HLA-DRB3*02:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:80:01N Protein Expression Plasmid Vector	PHLAP92540749	Plasmid vector containing HLA-DRB3*02:80:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:80:01N protein. This plasmid can be used for constructing HLA-DRB3*02:80:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:80:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:80:02N Protein Expression Plasmid Vector	PHLAP92540750	Plasmid vector containing HLA-DRB3*02:80:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:80:02N protein. This plasmid can be used for constructing HLA-DRB3*02:80:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:80:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:81 Protein Expression Plasmid Vector	PHLAP92540751	Plasmid vector containing HLA-DRB3*02:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:81 protein. This plasmid can be used for constructing HLA-DRB3*02:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:82 Protein Expression Plasmid Vector	PHLAP92540752	Plasmid vector containing HLA-DRB3*02:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:82 protein. This plasmid can be used for constructing HLA-DRB3*02:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:83 Protein Expression Plasmid Vector	PHLAP92540753	Plasmid vector containing HLA-DRB3*02:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:83 protein. This plasmid can be used for constructing HLA-DRB3*02:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:84 Protein Expression Plasmid Vector	PHLAP92540754	Plasmid vector containing HLA-DRB3*02:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:84 protein. This plasmid can be used for constructing HLA-DRB3*02:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:85 Protein Expression Plasmid Vector	PHLAP92540755	Plasmid vector containing HLA-DRB3*02:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:85 protein. This plasmid can be used for constructing HLA-DRB3*02:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:86 Protein Expression Plasmid Vector	PHLAP92540756	Plasmid vector containing HLA-DRB3*02:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:86 protein. This plasmid can be used for constructing HLA-DRB3*02:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:87 Protein Expression Plasmid Vector	PHLAP92540757	Plasmid vector containing HLA-DRB3*02:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:87 protein. This plasmid can be used for constructing HLA-DRB3*02:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*02:88 Protein Expression Plasmid Vector	PHLAP92540758	Plasmid vector containing HLA-DRB3*02:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:88 protein. This plasmid can be used for constructing HLA-DRB3*02:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*02:89 Protein Expression Plasmid Vector	PHLAP92540759	Plasmid vector containing HLA-DRB3*02:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:89 protein. This plasmid can be used for constructing HLA-DRB3*02:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:90 Protein Expression Plasmid Vector	PHLAP92540760	Plasmid vector containing HLA-DRB3*02:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:90 protein. This plasmid can be used for constructing HLA-DRB3*02:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:91 Protein Expression Plasmid Vector	PHLAP92540761	Plasmid vector containing HLA-DRB3*02:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:91 protein. This plasmid can be used for constructing HLA-DRB3*02:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:92 Protein Expression Plasmid Vector	PHLAP92540762	Plasmid vector containing HLA-DRB3*02:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:92 protein. This plasmid can be used for constructing HLA-DRB3*02:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:93 Protein Expression Plasmid Vector	PHLAP92540763	Plasmid vector containing HLA-DRB3*02:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:93 protein. This plasmid can be used for constructing HLA-DRB3*02:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:94 Protein Expression Plasmid Vector	PHLAP92540764	Plasmid vector containing HLA-DRB3*02:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:94 protein. This plasmid can be used for constructing HLA-DRB3*02:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:95N Protein Expression Plasmid Vector	PHLAP92540765	Plasmid vector containing HLA-DRB3*02:95N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:95N protein. This plasmid can be used for constructing HLA-DRB3*02:95N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:95N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:96 Protein Expression Plasmid Vector	PHLAP92540766	Plasmid vector containing HLA-DRB3*02:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:96 protein. This plasmid can be used for constructing HLA-DRB3*02:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*02:97 Protein Expression Plasmid Vector	PHLAP92540767	Plasmid vector containing HLA-DRB3*02:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:97 protein. This plasmid can be used for constructing HLA-DRB3*02:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:98 Protein Expression Plasmid Vector	PHLAP92540768	Plasmid vector containing HLA-DRB3*02:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:98 protein. This plasmid can be used for constructing HLA-DRB3*02:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*02:99 Protein Expression Plasmid Vector	PHLAP92540769	Plasmid vector containing HLA-DRB3*02:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*02:99 protein. This plasmid can be used for constructing HLA-DRB3*02:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*02:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:01:01 Protein Expression Plasmid Vector	PHLAP92540770	Plasmid vector containing HLA-DRB3*03:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:01:01 protein. This plasmid can be used for constructing HLA-DRB3*03:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:01:02 Protein Expression Plasmid Vector	PHLAP92540771	Plasmid vector containing HLA-DRB3*03:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:01:02 protein. This plasmid can be used for constructing HLA-DRB3*03:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:01:03 Protein Expression Plasmid Vector	PHLAP92540772	Plasmid vector containing HLA-DRB3*03:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:01:03 protein. This plasmid can be used for constructing HLA-DRB3*03:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:01:04 Protein Expression Plasmid Vector	PHLAP92540773	Plasmid vector containing HLA-DRB3*03:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:01:04 protein. This plasmid can be used for constructing HLA-DRB3*03:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*03:01:01:05 Protein Expression Plasmid Vector	PHLAP92540774	Plasmid vector containing HLA-DRB3*03:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:01:05 protein. This plasmid can be used for constructing HLA-DRB3*03:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:01:06 Protein Expression Plasmid Vector	PHLAP92540775	Plasmid vector containing HLA-DRB3*03:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:01:06 protein. This plasmid can be used for constructing HLA-DRB3*03:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:01:07 Protein Expression Plasmid Vector	PHLAP92540776	Plasmid vector containing HLA-DRB3*03:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:01:07 protein. This plasmid can be used for constructing HLA-DRB3*03:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:01:08 Protein Expression Plasmid Vector	PHLAP92540777	Plasmid vector containing HLA-DRB3*03:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:01:08 protein. This plasmid can be used for constructing HLA-DRB3*03:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:01:09 Protein Expression Plasmid Vector	PHLAP92540778	Plasmid vector containing HLA-DRB3*03:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:01:09 protein. This plasmid can be used for constructing HLA-DRB3*03:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:01:10 Protein Expression Plasmid Vector	PHLAP92540779	Plasmid vector containing HLA-DRB3*03:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:01:10 protein. This plasmid can be used for constructing HLA-DRB3*03:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:02 Protein Expression Plasmid Vector	PHLAP92540780	Plasmid vector containing HLA-DRB3*03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:02 protein. This plasmid can be used for constructing HLA-DRB3*03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*03:01:03:01 Protein Expression Plasmid Vector	PHLAP92540781	Plasmid vector containing HLA-DRB3*03:01:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:03:01 protein. This plasmid can be used for constructing HLA-DRB3*03:01:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:03:02 Protein Expression Plasmid Vector	PHLAP92540782	Plasmid vector containing HLA-DRB3*03:01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:03:02 protein. This plasmid can be used for constructing HLA-DRB3*03:01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:03:03 Protein Expression Plasmid Vector	PHLAP92540783	Plasmid vector containing HLA-DRB3*03:01:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:03:03 protein. This plasmid can be used for constructing HLA-DRB3*03:01:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:04 Protein Expression Plasmid Vector	PHLAP92540784	Plasmid vector containing HLA-DRB3*03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:04 protein. This plasmid can be used for constructing HLA-DRB3*03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:05 Protein Expression Plasmid Vector	PHLAP92540785	Plasmid vector containing HLA-DRB3*03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:05 protein. This plasmid can be used for constructing HLA-DRB3*03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:06 Protein Expression Plasmid Vector	PHLAP92540786	Plasmid vector containing HLA-DRB3*03:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:06 protein. This plasmid can be used for constructing HLA-DRB3*03:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:07 Protein Expression Plasmid Vector	PHLAP92540787	Plasmid vector containing HLA-DRB3*03:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:07 protein. This plasmid can be used for constructing HLA-DRB3*03:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*03:01:08 Protein Expression Plasmid Vector	PHLAP92540788	Plasmid vector containing HLA-DRB3*03:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:08 protein. This plasmid can be used for constructing HLA-DRB3*03:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:09 Protein Expression Plasmid Vector	PHLAP92540789	Plasmid vector containing HLA-DRB3*03:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:09 protein. This plasmid can be used for constructing HLA-DRB3*03:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:10 Protein Expression Plasmid Vector	PHLAP92540790	Plasmid vector containing HLA-DRB3*03:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:10 protein. This plasmid can be used for constructing HLA-DRB3*03:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:11 Protein Expression Plasmid Vector	PHLAP92540791	Plasmid vector containing HLA-DRB3*03:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:11 protein. This plasmid can be used for constructing HLA-DRB3*03:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:12 Protein Expression Plasmid Vector	PHLAP92540792	Plasmid vector containing HLA-DRB3*03:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:12 protein. This plasmid can be used for constructing HLA-DRB3*03:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:13 Protein Expression Plasmid Vector	PHLAP92540793	Plasmid vector containing HLA-DRB3*03:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:13 protein. This plasmid can be used for constructing HLA-DRB3*03:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:14 Protein Expression Plasmid Vector	PHLAP92540794	Plasmid vector containing HLA-DRB3*03:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:14 protein. This plasmid can be used for constructing HLA-DRB3*03:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*03:01:15 Protein Expression Plasmid Vector	PHLAP92540795	Plasmid vector containing HLA-DRB3*03:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:15 protein. This plasmid can be used for constructing HLA-DRB3*03:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:16 Protein Expression Plasmid Vector	PHLAP92540796	Plasmid vector containing HLA-DRB3*03:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:16 protein. This plasmid can be used for constructing HLA-DRB3*03:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:17:01 Protein Expression Plasmid Vector	PHLAP92540797	Plasmid vector containing HLA-DRB3*03:01:17:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:17:01 protein. This plasmid can be used for constructing HLA-DRB3*03:01:17:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:17:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:17:02 Protein Expression Plasmid Vector	PHLAP92540798	Plasmid vector containing HLA-DRB3*03:01:17:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:17:02 protein. This plasmid can be used for constructing HLA-DRB3*03:01:17:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:17:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:18 Protein Expression Plasmid Vector	PHLAP92540799	Plasmid vector containing HLA-DRB3*03:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:18 protein. This plasmid can be used for constructing HLA-DRB3*03:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:19 Protein Expression Plasmid Vector	PHLAP925408000	Plasmid vector containing HLA-DRB3*03:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:19 protein. This plasmid can be used for constructing HLA-DRB3*03:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:01:20 Protein Expression Plasmid Vector	PHLAP925408001	Plasmid vector containing HLA-DRB3*03:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:20 protein. This plasmid can be used for constructing HLA-DRB3*03:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*03:01:21 Protein Expression Plasmid Vector	PHLAP925408012	Plasmid vector containing HLA-DRB3*03:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:01:21 protein. This plasmid can be used for constructing HLA-DRB3*03:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:02 Protein Expression Plasmid Vector	PHLAP925408013	Plasmid vector containing HLA-DRB3*03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:02 protein. This plasmid can be used for constructing HLA-DRB3*03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:03 Protein Expression Plasmid Vector	PHLAP925408014	Plasmid vector containing HLA-DRB3*03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:03 protein. This plasmid can be used for constructing HLA-DRB3*03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:04:01 Protein Expression Plasmid Vector	PHLAP925408015	Plasmid vector containing HLA-DRB3*03:04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:04:01 protein. This plasmid can be used for constructing HLA-DRB3*03:04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:04:02 Protein Expression Plasmid Vector	PHLAP925408016	Plasmid vector containing HLA-DRB3*03:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:04:02 protein. This plasmid can be used for constructing HLA-DRB3*03:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:05 Protein Expression Plasmid Vector	PHLAP925408017	Plasmid vector containing HLA-DRB3*03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:05 protein. This plasmid can be used for constructing HLA-DRB3*03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:06 Protein Expression Plasmid Vector	PHLAP925408018	Plasmid vector containing HLA-DRB3*03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:06 protein. This plasmid can be used for constructing HLA-DRB3*03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB3*03:07 Protein Expression Plasmid Vector	PHLAP92540809	Plasmid vector containing HLA-DRB3*03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:07 protein. This plasmid can be used for constructing HLA-DRB3*03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:08 Protein Expression Plasmid Vector	PHLAP92540810	Plasmid vector containing HLA-DRB3*03:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:08 protein. This plasmid can be used for constructing HLA-DRB3*03:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:09 Protein Expression Plasmid Vector	PHLAP92540811	Plasmid vector containing HLA-DRB3*03:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:09 protein. This plasmid can be used for constructing HLA-DRB3*03:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:10 Protein Expression Plasmid Vector	PHLAP92540812	Plasmid vector containing HLA-DRB3*03:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:10 protein. This plasmid can be used for constructing HLA-DRB3*03:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:11 Protein Expression Plasmid Vector	PHLAP92540813	Plasmid vector containing HLA-DRB3*03:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:11 protein. This plasmid can be used for constructing HLA-DRB3*03:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:12 Protein Expression Plasmid Vector	PHLAP92540814	Plasmid vector containing HLA-DRB3*03:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:12 protein. This plasmid can be used for constructing HLA-DRB3*03:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:13 Protein Expression Plasmid Vector	PHLAP92540815	Plasmid vector containing HLA-DRB3*03:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:13 protein. This plasmid can be used for constructing HLA-DRB3*03:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:14 Protein Expression Plasmid Vector	PHLAP92540816	Plasmid vector containing HLA-DRB3*03:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:14 protein. This plasmid can be used for constructing HLA-DRB3*03:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*03:15 Protein Expression Plasmid Vector	PHLAP92540817	Plasmid vector containing HLA-DRB3*03:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:15 protein. This plasmid can be used for constructing HLA-DRB3*03:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:16 Protein Expression Plasmid Vector	PHLAP92540818	Plasmid vector containing HLA-DRB3*03:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:16 protein. This plasmid can be used for constructing HLA-DRB3*03:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:17 Protein Expression Plasmid Vector	PHLAP92540819	Plasmid vector containing HLA-DRB3*03:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:17 protein. This plasmid can be used for constructing HLA-DRB3*03:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:18 Protein Expression Plasmid Vector	PHLAP92540820	Plasmid vector containing HLA-DRB3*03:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:18 protein. This plasmid can be used for constructing HLA-DRB3*03:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:19 Protein Expression Plasmid Vector	PHLAP92540821	Plasmid vector containing HLA-DRB3*03:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:19 protein. This plasmid can be used for constructing HLA-DRB3*03:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:20 Protein Expression Plasmid Vector	PHLAP92540822	Plasmid vector containing HLA-DRB3*03:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:20 protein. This plasmid can be used for constructing HLA-DRB3*03:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:21 Protein Expression Plasmid Vector	PHLAP92540823	Plasmid vector containing HLA-DRB3*03:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:21 protein. This plasmid can be used for constructing HLA-DRB3*03:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:22:01 Protein Expression Plasmid Vector	PHLAP92540824	Plasmid vector containing HLA-DRB3*03:22:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:22:01 protein. This plasmid can be used for constructing HLA-DRB3*03:22:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:22:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*03:22:02 Protein Expression Plasmid Vector	PHLAP92540825	Plasmid vector containing HLA-DRB3*03:22:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:22:02 protein. This plasmid can be used for constructing HLA-DRB3*03:22:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:22:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:23 Protein Expression Plasmid Vector	PHLAP92540826	Plasmid vector containing HLA-DRB3*03:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:23 protein. This plasmid can be used for constructing HLA-DRB3*03:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:24 Protein Expression Plasmid Vector	PHLAP92540827	Plasmid vector containing HLA-DRB3*03:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:24 protein. This plasmid can be used for constructing HLA-DRB3*03:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:25 Protein Expression Plasmid Vector	PHLAP92540828	Plasmid vector containing HLA-DRB3*03:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:25 protein. This plasmid can be used for constructing HLA-DRB3*03:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:26 Protein Expression Plasmid Vector	PHLAP92540829	Plasmid vector containing HLA-DRB3*03:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:26 protein. This plasmid can be used for constructing HLA-DRB3*03:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:27 Protein Expression Plasmid Vector	PHLAP92540830	Plasmid vector containing HLA-DRB3*03:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:27 protein. This plasmid can be used for constructing HLA-DRB3*03:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:28 Protein Expression Plasmid Vector	PHLAP92540831	Plasmid vector containing HLA-DRB3*03:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:28 protein. This plasmid can be used for constructing HLA-DRB3*03:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:29 Protein Expression Plasmid Vector	PHLAP92540832	Plasmid vector containing HLA-DRB3*03:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:29 protein. This plasmid can be used for constructing HLA-DRB3*03:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB3*03:30N Protein Expression Plasmid Vector	PHLAP92540833	Plasmid vector containing HLA-DRB3*03:30N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:30N protein. This plasmid can be used for constructing HLA-DRB3*03:30N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:30N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:31 Protein Expression Plasmid Vector	PHLAP92540834	Plasmid vector containing HLA-DRB3*03:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:31 protein. This plasmid can be used for constructing HLA-DRB3*03:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:32 Protein Expression Plasmid Vector	PHLAP92540835	Plasmid vector containing HLA-DRB3*03:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:32 protein. This plasmid can be used for constructing HLA-DRB3*03:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:33 Protein Expression Plasmid Vector	PHLAP92540836	Plasmid vector containing HLA-DRB3*03:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:33 protein. This plasmid can be used for constructing HLA-DRB3*03:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:34 Protein Expression Plasmid Vector	PHLAP92540837	Plasmid vector containing HLA-DRB3*03:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:34 protein. This plasmid can be used for constructing HLA-DRB3*03:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:35 Protein Expression Plasmid Vector	PHLAP92540838	Plasmid vector containing HLA-DRB3*03:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:35 protein. This plasmid can be used for constructing HLA-DRB3*03:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:36 Protein Expression Plasmid Vector	PHLAP92540839	Plasmid vector containing HLA-DRB3*03:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:36 protein. This plasmid can be used for constructing HLA-DRB3*03:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB3*03:37 Protein Expression Plasmid Vector	PHLAP92540840	Plasmid vector containing HLA-DRB3*03:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:37 protein. This plasmid can be used for constructing HLA-DRB3*03:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB3*03:38 Protein Expression Plasmid Vector	PHLAP925408441	Plasmid vector containing HLA-DRB3*03:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:38 protein. This plasmid can be used for constructing HLA-DRB3*03:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:39 Protein Expression Plasmid Vector	PHLAP925408442	Plasmid vector containing HLA-DRB3*03:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:39 protein. This plasmid can be used for constructing HLA-DRB3*03:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:40 Protein Expression Plasmid Vector	PHLAP925408443	Plasmid vector containing HLA-DRB3*03:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:40 protein. This plasmid can be used for constructing HLA-DRB3*03:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:41 Protein Expression Plasmid Vector	PHLAP925408444	Plasmid vector containing HLA-DRB3*03:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:41 protein. This plasmid can be used for constructing HLA-DRB3*03:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:42 Protein Expression Plasmid Vector	PHLAP925408445	Plasmid vector containing HLA-DRB3*03:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:42 protein. This plasmid can be used for constructing HLA-DRB3*03:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:43 Protein Expression Plasmid Vector	PHLAP925408446	Plasmid vector containing HLA-DRB3*03:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:43 protein. This plasmid can be used for constructing HLA-DRB3*03:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:44 Protein Expression Plasmid Vector	PHLAP925408447	Plasmid vector containing HLA-DRB3*03:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:44 protein. This plasmid can be used for constructing HLA-DRB3*03:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:45 Protein Expression Plasmid Vector	PHLAP925408448	Plasmid vector containing HLA-DRB3*03:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:45 protein. This plasmid can be used for constructing HLA-DRB3*03:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*03:46 Protein Expression Plasmid Vector	PHLAP92540849	Plasmid vector containing HLA-DRB3*03:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:46 protein. This plasmid can be used for constructing HLA-DRB3*03:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:47 Protein Expression Plasmid Vector	PHLAP92540850	Plasmid vector containing HLA-DRB3*03:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:47 protein. This plasmid can be used for constructing HLA-DRB3*03:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:48 Protein Expression Plasmid Vector	PHLAP92540851	Plasmid vector containing HLA-DRB3*03:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:48 protein. This plasmid can be used for constructing HLA-DRB3*03:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:49 Protein Expression Plasmid Vector	PHLAP92540852	Plasmid vector containing HLA-DRB3*03:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:49 protein. This plasmid can be used for constructing HLA-DRB3*03:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:50 Protein Expression Plasmid Vector	PHLAP92540853	Plasmid vector containing HLA-DRB3*03:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:50 protein. This plasmid can be used for constructing HLA-DRB3*03:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:51 Protein Expression Plasmid Vector	PHLAP92540854	Plasmid vector containing HLA-DRB3*03:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:51 protein. This plasmid can be used for constructing HLA-DRB3*03:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:52 Protein Expression Plasmid Vector	PHLAP92540855	Plasmid vector containing HLA-DRB3*03:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:52 protein. This plasmid can be used for constructing HLA-DRB3*03:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:53 Protein Expression Plasmid Vector	PHLAP92540856	Plasmid vector containing HLA-DRB3*03:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:53 protein. This plasmid can be used for constructing HLA-DRB3*03:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*03:54 Protein Expression Plasmid Vector	PHLAP92540857	Plasmid vector containing HLA-DRB3*03:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:54 protein. This plasmid can be used for constructing HLA-DRB3*03:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:55 Protein Expression Plasmid Vector	PHLAP92540858	Plasmid vector containing HLA-DRB3*03:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:55 protein. This plasmid can be used for constructing HLA-DRB3*03:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:56 Protein Expression Plasmid Vector	PHLAP92540859	Plasmid vector containing HLA-DRB3*03:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:56 protein. This plasmid can be used for constructing HLA-DRB3*03:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:57Q Protein Expression Plasmid Vector	PHLAP92540860	Plasmid vector containing HLA-DRB3*03:57Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:57Q protein. This plasmid can be used for constructing HLA-DRB3*03:57Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:57Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:58 Protein Expression Plasmid Vector	PHLAP92540861	Plasmid vector containing HLA-DRB3*03:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:58 protein. This plasmid can be used for constructing HLA-DRB3*03:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:59 Protein Expression Plasmid Vector	PHLAP92540862	Plasmid vector containing HLA-DRB3*03:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:59 protein. This plasmid can be used for constructing HLA-DRB3*03:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:60 Protein Expression Plasmid Vector	PHLAP92540863	Plasmid vector containing HLA-DRB3*03:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:60 protein. This plasmid can be used for constructing HLA-DRB3*03:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:61 Protein Expression Plasmid Vector	PHLAP92540864	Plasmid vector containing HLA-DRB3*03:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:61 protein. This plasmid can be used for constructing HLA-DRB3*03:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*03:62 Protein Expression Plasmid Vector	PHLAP92540865	Plasmid vector containing HLA-DRB3*03:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:62 protein. This plasmid can be used for constructing HLA-DRB3*03:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:63 Protein Expression Plasmid Vector	PHLAP92540866	Plasmid vector containing HLA-DRB3*03:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:63 protein. This plasmid can be used for constructing HLA-DRB3*03:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:64 Protein Expression Plasmid Vector	PHLAP92540867	Plasmid vector containing HLA-DRB3*03:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:64 protein. This plasmid can be used for constructing HLA-DRB3*03:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:65 Protein Expression Plasmid Vector	PHLAP92540868	Plasmid vector containing HLA-DRB3*03:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:65 protein. This plasmid can be used for constructing HLA-DRB3*03:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:66 Protein Expression Plasmid Vector	PHLAP92540869	Plasmid vector containing HLA-DRB3*03:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:66 protein. This plasmid can be used for constructing HLA-DRB3*03:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:67 Protein Expression Plasmid Vector	PHLAP92540870	Plasmid vector containing HLA-DRB3*03:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:67 protein. This plasmid can be used for constructing HLA-DRB3*03:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:68 Protein Expression Plasmid Vector	PHLAP92540871	Plasmid vector containing HLA-DRB3*03:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:68 protein. This plasmid can be used for constructing HLA-DRB3*03:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:69 Protein Expression Plasmid Vector	PHLAP92540872	Plasmid vector containing HLA-DRB3*03:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:69 protein. This plasmid can be used for constructing HLA-DRB3*03:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*03:70 Protein Expression Plasmid Vector	PHLAP92540873	Plasmid vector containing HLA-DRB3*03:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:70 protein. This plasmid can be used for constructing HLA-DRB3*03:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:71 Protein Expression Plasmid Vector	PHLAP92540874	Plasmid vector containing HLA-DRB3*03:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:71 protein. This plasmid can be used for constructing HLA-DRB3*03:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:72 Protein Expression Plasmid Vector	PHLAP92540875	Plasmid vector containing HLA-DRB3*03:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:72 protein. This plasmid can be used for constructing HLA-DRB3*03:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:73 Protein Expression Plasmid Vector	PHLAP92540876	Plasmid vector containing HLA-DRB3*03:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:73 protein. This plasmid can be used for constructing HLA-DRB3*03:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:74 Protein Expression Plasmid Vector	PHLAP92540877	Plasmid vector containing HLA-DRB3*03:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:74 protein. This plasmid can be used for constructing HLA-DRB3*03:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:75 Protein Expression Plasmid Vector	PHLAP92540878	Plasmid vector containing HLA-DRB3*03:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:75 protein. This plasmid can be used for constructing HLA-DRB3*03:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:76 Protein Expression Plasmid Vector	PHLAP92540879	Plasmid vector containing HLA-DRB3*03:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:76 protein. This plasmid can be used for constructing HLA-DRB3*03:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB3*03:77 Protein Expression Plasmid Vector	PHLAP92540880	Plasmid vector containing HLA-DRB3*03:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:77 protein. This plasmid can be used for constructing HLA-DRB3*03:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB3*03:78 Protein Expression Plasmid Vector	PHLAP925408881	Plasmid vector containing HLA-DRB3*03:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:78 protein. This plasmid can be used for constructing HLA-DRB3*03:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:79:01 Protein Expression Plasmid Vector	PHLAP925408882	Plasmid vector containing HLA-DRB3*03:79:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:79:01 protein. This plasmid can be used for constructing HLA-DRB3*03:79:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:79:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:79:02 Protein Expression Plasmid Vector	PHLAP925408883	Plasmid vector containing HLA-DRB3*03:79:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:79:02 protein. This plasmid can be used for constructing HLA-DRB3*03:79:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:79:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:79:03 Protein Expression Plasmid Vector	PHLAP925408884	Plasmid vector containing HLA-DRB3*03:79:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:79:03 protein. This plasmid can be used for constructing HLA-DRB3*03:79:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:79:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:80:01:01 Protein Expression Plasmid Vector	PHLAP925408885	Plasmid vector containing HLA-DRB3*03:80:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:80:01:01 protein. This plasmid can be used for constructing HLA-DRB3*03:80:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:80:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:80:01:02 Protein Expression Plasmid Vector	PHLAP925408886	Plasmid vector containing HLA-DRB3*03:80:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:80:01:02 protein. This plasmid can be used for constructing HLA-DRB3*03:80:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:80:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:80:02:01 Protein Expression Plasmid Vector	PHLAP925408887	Plasmid vector containing HLA-DRB3*03:80:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:80:02:01 protein. This plasmid can be used for constructing HLA-DRB3*03:80:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:80:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB3*03:80:02:02 Protein Expression Plasmid Vector	PHLAP92540888	Plasmid vector containing HLA-DRB3*03:80:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:80:02:02 protein. This plasmid can be used for constructing HLA-DRB3*03:80:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:80:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:81:01:01 Protein Expression Plasmid Vector	PHLAP92540889	Plasmid vector containing HLA-DRB3*03:81:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:81:01:01 protein. This plasmid can be used for constructing HLA-DRB3*03:81:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:81:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:81:01:02 Protein Expression Plasmid Vector	PHLAP92540890	Plasmid vector containing HLA-DRB3*03:81:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:81:01:02 protein. This plasmid can be used for constructing HLA-DRB3*03:81:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:81:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:82 Protein Expression Plasmid Vector	PHLAP92540891	Plasmid vector containing HLA-DRB3*03:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:82 protein. This plasmid can be used for constructing HLA-DRB3*03:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:83 Protein Expression Plasmid Vector	PHLAP92540892	Plasmid vector containing HLA-DRB3*03:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:83 protein. This plasmid can be used for constructing HLA-DRB3*03:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB3*03:84 Protein Expression Plasmid Vector	PHLAP92540893	Plasmid vector containing HLA-DRB3*03:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB3*03:84 protein. This plasmid can be used for constructing HLA-DRB3*03:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB3*03:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92540894	Plasmid vector containing HLA-DRB4*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:01:01 protein. This plasmid can be used for constructing HLA-DRB4*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92540895	Plasmid vector containing HLA-DRB4*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:01:03 protein. This plasmid can be used for constructing HLA-DRB4*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92540896	Plasmid vector containing HLA-DRB4*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:01:04 protein. This plasmid can be used for constructing HLA-DRB4*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92540897	Plasmid vector containing HLA-DRB4*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:01:05 protein. This plasmid can be used for constructing HLA-DRB4*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:01:06 Protein Expression Plasmid Vector	PHLAP92540898	Plasmid vector containing HLA-DRB4*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:01:06 protein. This plasmid can be used for constructing HLA-DRB4*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:01:07 Protein Expression Plasmid Vector	PHLAP92540899	Plasmid vector containing HLA-DRB4*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:01:07 protein. This plasmid can be used for constructing HLA-DRB4*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:02 Protein Expression Plasmid Vector	PHLAP925409000	Plasmid vector containing HLA-DRB4*01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:02 protein. This plasmid can be used for constructing HLA-DRB4*01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:03 Protein Expression Plasmid Vector	PHLAP925409001	Plasmid vector containing HLA-DRB4*01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:03 protein. This plasmid can be used for constructing HLA-DRB4*01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:01:04 Protein Expression Plasmid Vector	PHLAP92540902	Plasmid vector containing HLA-DRB4*01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:04 protein. This plasmid can be used for constructing HLA-DRB4*01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:05 Protein Expression Plasmid Vector	PHLAP92540903	Plasmid vector containing HLA-DRB4*01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:05 protein. This plasmid can be used for constructing HLA-DRB4*01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:06 Protein Expression Plasmid Vector	PHLAP92540904	Plasmid vector containing HLA-DRB4*01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:06 protein. This plasmid can be used for constructing HLA-DRB4*01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:07 Protein Expression Plasmid Vector	PHLAP92540905	Plasmid vector containing HLA-DRB4*01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:07 protein. This plasmid can be used for constructing HLA-DRB4*01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:08 Protein Expression Plasmid Vector	PHLAP92540906	Plasmid vector containing HLA-DRB4*01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:08 protein. This plasmid can be used for constructing HLA-DRB4*01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:09 Protein Expression Plasmid Vector	PHLAP92540907	Plasmid vector containing HLA-DRB4*01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:09 protein. This plasmid can be used for constructing HLA-DRB4*01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:10 Protein Expression Plasmid Vector	PHLAP92540908	Plasmid vector containing HLA-DRB4*01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:10 protein. This plasmid can be used for constructing HLA-DRB4*01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:01:11 Protein Expression Plasmid Vector	PHLAP92540909	Plasmid vector containing HLA-DRB4*01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:11 protein. This plasmid can be used for constructing HLA-DRB4*01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:12 Protein Expression Plasmid Vector	PHLAP92540910	Plasmid vector containing HLA-DRB4*01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:12 protein. This plasmid can be used for constructing HLA-DRB4*01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:13 Protein Expression Plasmid Vector	PHLAP92540911	Plasmid vector containing HLA-DRB4*01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:13 protein. This plasmid can be used for constructing HLA-DRB4*01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:14 Protein Expression Plasmid Vector	PHLAP92540912	Plasmid vector containing HLA-DRB4*01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:14 protein. This plasmid can be used for constructing HLA-DRB4*01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:15 Protein Expression Plasmid Vector	PHLAP92540913	Plasmid vector containing HLA-DRB4*01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:15 protein. This plasmid can be used for constructing HLA-DRB4*01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:01:16 Protein Expression Plasmid Vector	PHLAP92540914	Plasmid vector containing HLA-DRB4*01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:01:16 protein. This plasmid can be used for constructing HLA-DRB4*01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:02:01:01 Protein Expression Plasmid Vector	PHLAP92540915	Plasmid vector containing HLA-DRB4*01:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:02:01:01 protein. This plasmid can be used for constructing HLA-DRB4*01:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:02:01:02 Protein Expression Plasmid Vector	PHLAP92540916	Plasmid vector containing HLA-DRB4*01:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:02:01:02 protein. This plasmid can be used for constructing HLA-DRB4*01:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:01 Protein Expression Plasmid Vector	PHLAP92540917	Plasmid vector containing HLA-DRB4*01:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:01 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:02N Protein Expression Plasmid Vector	PHLAP92540918	Plasmid vector containing HLA-DRB4*01:03:01:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:02N protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:03 Protein Expression Plasmid Vector	PHLAP92540919	Plasmid vector containing HLA-DRB4*01:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:03 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:04 Protein Expression Plasmid Vector	PHLAP92540920	Plasmid vector containing HLA-DRB4*01:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:04 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:05 Protein Expression Plasmid Vector	PHLAP92540921	Plasmid vector containing HLA-DRB4*01:03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:05 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:06 Protein Expression Plasmid Vector	PHLAP92540922	Plasmid vector containing HLA-DRB4*01:03:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:06 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:03:01:07 Protein Expression Plasmid Vector	PHLAP92540923	Plasmid vector containing HLA-DRB4*01:03:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:07 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:08 Protein Expression Plasmid Vector	PHLAP92540924	Plasmid vector containing HLA-DRB4*01:03:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:08 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:09 Protein Expression Plasmid Vector	PHLAP92540925	Plasmid vector containing HLA-DRB4*01:03:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:09 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:10 Protein Expression Plasmid Vector	PHLAP92540926	Plasmid vector containing HLA-DRB4*01:03:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:10 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:11 Protein Expression Plasmid Vector	PHLAP92540927	Plasmid vector containing HLA-DRB4*01:03:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:11 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:12 Protein Expression Plasmid Vector	PHLAP92540928	Plasmid vector containing HLA-DRB4*01:03:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:12 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:13N Protein Expression Plasmid Vector	PHLAP92540929	Plasmid vector containing HLA-DRB4*01:03:01:13N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:13N protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:13N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:13N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:03:01:14 Protein Expression Plasmid Vector	PHLAP92540930	Plasmid vector containing HLA-DRB4*01:03:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:14 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:15 Protein Expression Plasmid Vector	PHLAP92540931	Plasmid vector containing HLA-DRB4*01:03:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:15 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:16 Protein Expression Plasmid Vector	PHLAP92540932	Plasmid vector containing HLA-DRB4*01:03:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:16 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:17 Protein Expression Plasmid Vector	PHLAP92540933	Plasmid vector containing HLA-DRB4*01:03:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:17 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:18 Protein Expression Plasmid Vector	PHLAP92540934	Plasmid vector containing HLA-DRB4*01:03:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:18 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:19 Protein Expression Plasmid Vector	PHLAP92540935	Plasmid vector containing HLA-DRB4*01:03:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:19 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:20 Protein Expression Plasmid Vector	PHLAP92540936	Plasmid vector containing HLA-DRB4*01:03:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:20 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:03:01:21 Protein Expression Plasmid Vector	PHLAP92540937	Plasmid vector containing HLA-DRB4*01:03:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:21 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:22 Protein Expression Plasmid Vector	PHLAP92540938	Plasmid vector containing HLA-DRB4*01:03:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:22 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:23 Protein Expression Plasmid Vector	PHLAP92540939	Plasmid vector containing HLA-DRB4*01:03:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:23 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:24 Protein Expression Plasmid Vector	PHLAP92540940	Plasmid vector containing HLA-DRB4*01:03:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:24 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:25 Protein Expression Plasmid Vector	PHLAP92540941	Plasmid vector containing HLA-DRB4*01:03:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:25 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:26N Protein Expression Plasmid Vector	PHLAP92540942	Plasmid vector containing HLA-DRB4*01:03:01:26N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:26N protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:26N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:26N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:27 Protein Expression Plasmid Vector	PHLAP92540943	Plasmid vector containing HLA-DRB4*01:03:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:27 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:03:01:28N Protein Expression Plasmid Vector	PHLAP92540944	Plasmid vector containing HLA-DRB4*01:03:01:28N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:28N protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:28N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:28N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:29 Protein Expression Plasmid Vector	PHLAP92540945	Plasmid vector containing HLA-DRB4*01:03:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:29 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:30 Protein Expression Plasmid Vector	PHLAP92540946	Plasmid vector containing HLA-DRB4*01:03:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:30 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:01:31 Protein Expression Plasmid Vector	PHLAP92540947	Plasmid vector containing HLA-DRB4*01:03:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:01:31 protein. This plasmid can be used for constructing HLA-DRB4*01:03:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:02:01 Protein Expression Plasmid Vector	PHLAP92540948	Plasmid vector containing HLA-DRB4*01:03:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:02:01 protein. This plasmid can be used for constructing HLA-DRB4*01:03:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:02:02 Protein Expression Plasmid Vector	PHLAP92540949	Plasmid vector containing HLA-DRB4*01:03:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:02:02 protein. This plasmid can be used for constructing HLA-DRB4*01:03:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:02:03 Protein Expression Plasmid Vector	PHLAP92540950	Plasmid vector containing HLA-DRB4*01:03:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:02:03 protein. This plasmid can be used for constructing HLA-DRB4*01:03:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:03:02:04 Protein Expression Plasmid Vector	PHLAP92540951	Plasmid vector containing HLA-DRB4*01:03:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:02:04 protein. This plasmid can be used for constructing HLA-DRB4*01:03:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:02:05 Protein Expression Plasmid Vector	PHLAP92540952	Plasmid vector containing HLA-DRB4*01:03:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:02:05 protein. This plasmid can be used for constructing HLA-DRB4*01:03:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:02:06 Protein Expression Plasmid Vector	PHLAP92540953	Plasmid vector containing HLA-DRB4*01:03:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:02:06 protein. This plasmid can be used for constructing HLA-DRB4*01:03:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:02:07 Protein Expression Plasmid Vector	PHLAP92540954	Plasmid vector containing HLA-DRB4*01:03:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:02:07 protein. This plasmid can be used for constructing HLA-DRB4*01:03:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:02:08 Protein Expression Plasmid Vector	PHLAP92540955	Plasmid vector containing HLA-DRB4*01:03:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:02:08 protein. This plasmid can be used for constructing HLA-DRB4*01:03:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:02:09 Protein Expression Plasmid Vector	PHLAP92540956	Plasmid vector containing HLA-DRB4*01:03:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:02:09 protein. This plasmid can be used for constructing HLA-DRB4*01:03:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:02:10 Protein Expression Plasmid Vector	PHLAP92540957	Plasmid vector containing HLA-DRB4*01:03:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:02:10 protein. This plasmid can be used for constructing HLA-DRB4*01:03:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:03:03 Protein Expression Plasmid Vector	PHLAP92540958	Plasmid vector containing HLA-DRB4*01:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:03 protein. This plasmid can be used for constructing HLA-DRB4*01:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:04 Protein Expression Plasmid Vector	PHLAP92540959	Plasmid vector containing HLA-DRB4*01:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:04 protein. This plasmid can be used for constructing HLA-DRB4*01:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:05 Protein Expression Plasmid Vector	PHLAP92540960	Plasmid vector containing HLA-DRB4*01:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:05 protein. This plasmid can be used for constructing HLA-DRB4*01:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:06 Protein Expression Plasmid Vector	PHLAP92540961	Plasmid vector containing HLA-DRB4*01:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:06 protein. This plasmid can be used for constructing HLA-DRB4*01:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:07 Protein Expression Plasmid Vector	PHLAP92540962	Plasmid vector containing HLA-DRB4*01:03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:07 protein. This plasmid can be used for constructing HLA-DRB4*01:03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:08 Protein Expression Plasmid Vector	PHLAP92540963	Plasmid vector containing HLA-DRB4*01:03:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:08 protein. This plasmid can be used for constructing HLA-DRB4*01:03:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:09 Protein Expression Plasmid Vector	PHLAP92540964	Plasmid vector containing HLA-DRB4*01:03:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:09 protein. This plasmid can be used for constructing HLA-DRB4*01:03:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:03:10 Protein Expression Plasmid Vector	PHLAP92540965	Plasmid vector containing HLA-DRB4*01:03:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:10 protein. This plasmid can be used for constructing HLA-DRB4*01:03:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:11 Protein Expression Plasmid Vector	PHLAP92540966	Plasmid vector containing HLA-DRB4*01:03:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:11 protein. This plasmid can be used for constructing HLA-DRB4*01:03:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:12 Protein Expression Plasmid Vector	PHLAP92540967	Plasmid vector containing HLA-DRB4*01:03:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:12 protein. This plasmid can be used for constructing HLA-DRB4*01:03:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:13 Protein Expression Plasmid Vector	PHLAP92540968	Plasmid vector containing HLA-DRB4*01:03:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:13 protein. This plasmid can be used for constructing HLA-DRB4*01:03:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:14 Protein Expression Plasmid Vector	PHLAP92540969	Plasmid vector containing HLA-DRB4*01:03:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:14 protein. This plasmid can be used for constructing HLA-DRB4*01:03:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:15 Protein Expression Plasmid Vector	PHLAP92540970	Plasmid vector containing HLA-DRB4*01:03:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:15 protein. This plasmid can be used for constructing HLA-DRB4*01:03:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:16 Protein Expression Plasmid Vector	PHLAP92540971	Plasmid vector containing HLA-DRB4*01:03:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:16 protein. This plasmid can be used for constructing HLA-DRB4*01:03:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:03:17 Protein Expression Plasmid Vector	PHLAP92540972	Plasmid vector containing HLA-DRB4*01:03:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:17 protein. This plasmid can be used for constructing HLA-DRB4*01:03:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:18 Protein Expression Plasmid Vector	PHLAP92540973	Plasmid vector containing HLA-DRB4*01:03:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:18 protein. This plasmid can be used for constructing HLA-DRB4*01:03:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:19 Protein Expression Plasmid Vector	PHLAP92540974	Plasmid vector containing HLA-DRB4*01:03:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:19 protein. This plasmid can be used for constructing HLA-DRB4*01:03:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:20 Protein Expression Plasmid Vector	PHLAP92540975	Plasmid vector containing HLA-DRB4*01:03:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:20 protein. This plasmid can be used for constructing HLA-DRB4*01:03:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:21 Protein Expression Plasmid Vector	PHLAP92540976	Plasmid vector containing HLA-DRB4*01:03:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:21 protein. This plasmid can be used for constructing HLA-DRB4*01:03:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:22 Protein Expression Plasmid Vector	PHLAP92540977	Plasmid vector containing HLA-DRB4*01:03:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:22 protein. This plasmid can be used for constructing HLA-DRB4*01:03:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:23 Protein Expression Plasmid Vector	PHLAP92540978	Plasmid vector containing HLA-DRB4*01:03:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:23 protein. This plasmid can be used for constructing HLA-DRB4*01:03:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:03:24 Protein Expression Plasmid Vector	PHLAP92540979	Plasmid vector containing HLA-DRB4*01:03:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:24 protein. This plasmid can be used for constructing HLA-DRB4*01:03:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:25 Protein Expression Plasmid Vector	PHLAP92540980	Plasmid vector containing HLA-DRB4*01:03:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:25 protein. This plasmid can be used for constructing HLA-DRB4*01:03:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:26 Protein Expression Plasmid Vector	PHLAP92540981	Plasmid vector containing HLA-DRB4*01:03:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:26 protein. This plasmid can be used for constructing HLA-DRB4*01:03:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:27 Protein Expression Plasmid Vector	PHLAP92540982	Plasmid vector containing HLA-DRB4*01:03:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:27 protein. This plasmid can be used for constructing HLA-DRB4*01:03:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:28 Protein Expression Plasmid Vector	PHLAP92540983	Plasmid vector containing HLA-DRB4*01:03:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:28 protein. This plasmid can be used for constructing HLA-DRB4*01:03:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:29 Protein Expression Plasmid Vector	PHLAP92540984	Plasmid vector containing HLA-DRB4*01:03:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:29 protein. This plasmid can be used for constructing HLA-DRB4*01:03:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:30 Protein Expression Plasmid Vector	PHLAP92540985	Plasmid vector containing HLA-DRB4*01:03:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:30 protein. This plasmid can be used for constructing HLA-DRB4*01:03:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:03:31 Protein Expression Plasmid Vector	PHLAP92540986	Plasmid vector containing HLA-DRB4*01:03:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:31 protein. This plasmid can be used for constructing HLA-DRB4*01:03:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:32 Protein Expression Plasmid Vector	PHLAP92540987	Plasmid vector containing HLA-DRB4*01:03:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:32 protein. This plasmid can be used for constructing HLA-DRB4*01:03:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:33 Protein Expression Plasmid Vector	PHLAP92540988	Plasmid vector containing HLA-DRB4*01:03:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:33 protein. This plasmid can be used for constructing HLA-DRB4*01:03:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:34 Protein Expression Plasmid Vector	PHLAP92540989	Plasmid vector containing HLA-DRB4*01:03:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:34 protein. This plasmid can be used for constructing HLA-DRB4*01:03:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:35 Protein Expression Plasmid Vector	PHLAP92540990	Plasmid vector containing HLA-DRB4*01:03:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:35 protein. This plasmid can be used for constructing HLA-DRB4*01:03:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:36 Protein Expression Plasmid Vector	PHLAP92540991	Plasmid vector containing HLA-DRB4*01:03:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:36 protein. This plasmid can be used for constructing HLA-DRB4*01:03:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:37 Protein Expression Plasmid Vector	PHLAP92540992	Plasmid vector containing HLA-DRB4*01:03:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:37 protein. This plasmid can be used for constructing HLA-DRB4*01:03:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:03:38 Protein Expression Plasmid Vector	PHLAP92540993	Plasmid vector containing HLA-DRB4*01:03:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:38 protein. This plasmid can be used for constructing HLA-DRB4*01:03:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:39 Protein Expression Plasmid Vector	PHLAP92540994	Plasmid vector containing HLA-DRB4*01:03:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:39 protein. This plasmid can be used for constructing HLA-DRB4*01:03:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:40 Protein Expression Plasmid Vector	PHLAP92540995	Plasmid vector containing HLA-DRB4*01:03:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:40 protein. This plasmid can be used for constructing HLA-DRB4*01:03:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:41N Protein Expression Plasmid Vector	PHLAP92540996	Plasmid vector containing HLA-DRB4*01:03:41N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:41N protein. This plasmid can be used for constructing HLA-DRB4*01:03:41N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:41N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:42 Protein Expression Plasmid Vector	PHLAP92540997	Plasmid vector containing HLA-DRB4*01:03:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:42 protein. This plasmid can be used for constructing HLA-DRB4*01:03:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:43 Protein Expression Plasmid Vector	PHLAP92540998	Plasmid vector containing HLA-DRB4*01:03:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:43 protein. This plasmid can be used for constructing HLA-DRB4*01:03:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:44 Protein Expression Plasmid Vector	PHLAP92540999	Plasmid vector containing HLA-DRB4*01:03:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:44 protein. This plasmid can be used for constructing HLA-DRB4*01:03:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:03:45 Protein Expression Plasmid Vector	PHLAP92541000	Plasmid vector containing HLA-DRB4*01:03:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:45 protein. This plasmid can be used for constructing HLA-DRB4*01:03:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:46 Protein Expression Plasmid Vector	PHLAP92541001	Plasmid vector containing HLA-DRB4*01:03:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:46 protein. This plasmid can be used for constructing HLA-DRB4*01:03:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:03:47 Protein Expression Plasmid Vector	PHLAP92541002	Plasmid vector containing HLA-DRB4*01:03:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:03:47 protein. This plasmid can be used for constructing HLA-DRB4*01:03:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:03:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:04 Protein Expression Plasmid Vector	PHLAP92541003	Plasmid vector containing HLA-DRB4*01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:04 protein. This plasmid can be used for constructing HLA-DRB4*01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:05 Protein Expression Plasmid Vector	PHLAP92541004	Plasmid vector containing HLA-DRB4*01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:05 protein. This plasmid can be used for constructing HLA-DRB4*01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:06 Protein Expression Plasmid Vector	PHLAP92541005	Plasmid vector containing HLA-DRB4*01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:06 protein. This plasmid can be used for constructing HLA-DRB4*01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:07:01 Protein Expression Plasmid Vector	PHLAP92541006	Plasmid vector containing HLA-DRB4*01:07:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:07:01 protein. This plasmid can be used for constructing HLA-DRB4*01:07:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:07:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:07:02 Protein Expression Plasmid Vector	PHLAP92541007	Plasmid vector containing HLA-DRB4*01:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:07:02 protein. This plasmid can be used for constructing HLA-DRB4*01:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:08 Protein Expression Plasmid Vector	PHLAP92541008	Plasmid vector containing HLA-DRB4*01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:08 protein. This plasmid can be used for constructing HLA-DRB4*01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB4*01:09 Protein Expression Plasmid Vector	PHLAP92541009	Plasmid vector containing HLA-DRB4*01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:09 protein. This plasmid can be used for constructing HLA-DRB4*01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB4*01:10 Protein Expression Plasmid Vector	PHLAP92541010	Plasmid vector containing HLA-DRB4*01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:10 protein. This plasmid can be used for constructing HLA-DRB4*01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB4*01:100 Protein Expression Plasmid Vector	PHLAP92541011	Plasmid vector containing HLA-DRB4*01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:100 protein. This plasmid can be used for constructing HLA-DRB4*01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:101 Protein Expression Plasmid Vector	PHLAP92541012	Plasmid vector containing HLA-DRB4*01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:101 protein. This plasmid can be used for constructing HLA-DRB4*01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:102 Protein Expression Plasmid Vector	PHLAP92541013	Plasmid vector containing HLA-DRB4*01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:102 protein. This plasmid can be used for constructing HLA-DRB4*01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:103 Protein Expression Plasmid Vector	PHLAP92541014	Plasmid vector containing HLA-DRB4*01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:103 protein. This plasmid can be used for constructing HLA-DRB4*01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:104 Protein Expression Plasmid Vector	PHLAP92541015	Plasmid vector containing HLA-DRB4*01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:104 protein. This plasmid can be used for constructing HLA-DRB4*01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:105 Protein Expression Plasmid Vector	PHLAP92541016	Plasmid vector containing HLA-DRB4*01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:105 protein. This plasmid can be used for constructing HLA-DRB4*01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:106 Protein Expression Plasmid Vector	PHLAP92541017	Plasmid vector containing HLA-DRB4*01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:106 protein. This plasmid can be used for constructing HLA-DRB4*01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:107 Protein Expression Plasmid Vector	PHLAP92541018	Plasmid vector containing HLA-DRB4*01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:107 protein. This plasmid can be used for constructing HLA-DRB4*01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:108N Protein Expression Plasmid Vector	PHLAP92541019	Plasmid vector containing HLA-DRB4*01:108N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:108N protein. This plasmid can be used for constructing HLA-DRB4*01:108N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:108N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:109 Protein Expression Plasmid Vector	PHLAP92541020	Plasmid vector containing HLA-DRB4*01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:109 protein. This plasmid can be used for constructing HLA-DRB4*01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:11 Protein Expression Plasmid Vector	PHLAP92541021	Plasmid vector containing HLA-DRB4*01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:11 protein. This plasmid can be used for constructing HLA-DRB4*01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:110 Protein Expression Plasmid Vector	PHLAP92541022	Plasmid vector containing HLA-DRB4*01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:110 protein. This plasmid can be used for constructing HLA-DRB4*01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:111 Protein Expression Plasmid Vector	PHLAP92541023	Plasmid vector containing HLA-DRB4*01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:111 protein. This plasmid can be used for constructing HLA-DRB4*01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:112 Protein Expression Plasmid Vector	PHLAP92541024	Plasmid vector containing HLA-DRB4*01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:112 protein. This plasmid can be used for constructing HLA-DRB4*01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:113N Protein Expression Plasmid Vector	PHLAP92541025	Plasmid vector containing HLA-DRB4*01:113N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:113N protein. This plasmid can be used for constructing HLA-DRB4*01:113N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:113N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:114 Protein Expression Plasmid Vector	PHLAP92541026	Plasmid vector containing HLA-DRB4*01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:114 protein. This plasmid can be used for constructing HLA-DRB4*01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:115N Protein Expression Plasmid Vector	PHLAP92541027	Plasmid vector containing HLA-DRB4*01:115N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:115N protein. This plasmid can be used for constructing HLA-DRB4*01:115N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:115N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:116 Protein Expression Plasmid Vector	PHLAP92541028	Plasmid vector containing HLA-DRB4*01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:116 protein. This plasmid can be used for constructing HLA-DRB4*01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:117 Protein Expression Plasmid Vector	PHLAP92541029	Plasmid vector containing HLA-DRB4*01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:117 protein. This plasmid can be used for constructing HLA-DRB4*01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:118 Protein Expression Plasmid Vector	PHLAP92541030	Plasmid vector containing HLA-DRB4*01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:118 protein. This plasmid can be used for constructing HLA-DRB4*01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:119 Protein Expression Plasmid Vector	PHLAP92541031	Plasmid vector containing HLA-DRB4*01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:119 protein. This plasmid can be used for constructing HLA-DRB4*01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:12 Protein Expression Plasmid Vector	PHLAP92541032	Plasmid vector containing HLA-DRB4*01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:12 protein. This plasmid can be used for constructing HLA-DRB4*01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:120 Protein Expression Plasmid Vector	PHLAP92541033	Plasmid vector containing HLA-DRB4*01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:120 protein. This plasmid can be used for constructing HLA-DRB4*01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:121N Protein Expression Plasmid Vector	PHLAP92541034	Plasmid vector containing HLA-DRB4*01:121N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:121N protein. This plasmid can be used for constructing HLA-DRB4*01:121N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:121N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:122 Protein Expression Plasmid Vector	PHLAP92541035	Plasmid vector containing HLA-DRB4*01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:122 protein. This plasmid can be used for constructing HLA-DRB4*01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:123 Protein Expression Plasmid Vector	PHLAP92541036	Plasmid vector containing HLA-DRB4*01:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:123 protein. This plasmid can be used for constructing HLA-DRB4*01:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:124 Protein Expression Plasmid Vector	PHLAP92541037	Plasmid vector containing HLA-DRB4*01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:124 protein. This plasmid can be used for constructing HLA-DRB4*01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:125 Protein Expression Plasmid Vector	PHLAP92541038	Plasmid vector containing HLA-DRB4*01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:125 protein. This plasmid can be used for constructing HLA-DRB4*01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:126 Protein Expression Plasmid Vector	PHLAP92541039	Plasmid vector containing HLA-DRB4*01:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:126 protein. This plasmid can be used for constructing HLA-DRB4*01:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:127 Protein Expression Plasmid Vector	PHLAP92541040	Plasmid vector containing HLA-DRB4*01:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:127 protein. This plasmid can be used for constructing HLA-DRB4*01:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:128N Protein Expression Plasmid Vector	PHLAP92541041	Plasmid vector containing HLA-DRB4*01:128N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:128N protein. This plasmid can be used for constructing HLA-DRB4*01:128N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:128N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:129 Protein Expression Plasmid Vector	PHLAP92541042	Plasmid vector containing HLA-DRB4*01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:129 protein. This plasmid can be used for constructing HLA-DRB4*01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:13 Protein Expression Plasmid Vector	PHLAP92541043	Plasmid vector containing HLA-DRB4*01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:13 protein. This plasmid can be used for constructing HLA-DRB4*01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:130 Protein Expression Plasmid Vector	PHLAP92541044	Plasmid vector containing HLA-DRB4*01:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:130 protein. This plasmid can be used for constructing HLA-DRB4*01:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:131 Protein Expression Plasmid Vector	PHLAP92541045	Plasmid vector containing HLA-DRB4*01:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:131 protein. This plasmid can be used for constructing HLA-DRB4*01:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:132 Protein Expression Plasmid Vector	PHLAP92541046	Plasmid vector containing HLA-DRB4*01:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:132 protein. This plasmid can be used for constructing HLA-DRB4*01:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:133 Protein Expression Plasmid Vector	PHLAP92541047	Plasmid vector containing HLA-DRB4*01:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:133 protein. This plasmid can be used for constructing HLA-DRB4*01:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:134 Protein Expression Plasmid Vector	PHLAP92541048	Plasmid vector containing HLA-DRB4*01:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:134 protein. This plasmid can be used for constructing HLA-DRB4*01:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:135 Protein Expression Plasmid Vector	PHLAP92541049	Plasmid vector containing HLA-DRB4*01:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:135 protein. This plasmid can be used for constructing HLA-DRB4*01:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:136 Protein Expression Plasmid Vector	PHLAP92541050	Plasmid vector containing HLA-DRB4*01:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:136 protein. This plasmid can be used for constructing HLA-DRB4*01:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:137 Protein Expression Plasmid Vector	PHLAP92541051	Plasmid vector containing HLA-DRB4*01:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:137 protein. This plasmid can be used for constructing HLA-DRB4*01:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:138 Protein Expression Plasmid Vector	PHLAP92541052	Plasmid vector containing HLA-DRB4*01:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:138 protein. This plasmid can be used for constructing HLA-DRB4*01:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:139 Protein Expression Plasmid Vector	PHLAP92541053	Plasmid vector containing HLA-DRB4*01:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:139 protein. This plasmid can be used for constructing HLA-DRB4*01:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:140 Protein Expression Plasmid Vector	PHLAP92541054	Plasmid vector containing HLA-DRB4*01:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:140 protein. This plasmid can be used for constructing HLA-DRB4*01:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:141 Protein Expression Plasmid Vector	PHLAP92541055	Plasmid vector containing HLA-DRB4*01:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:141 protein. This plasmid can be used for constructing HLA-DRB4*01:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:142 Protein Expression Plasmid Vector	PHLAP92541056	Plasmid vector containing HLA-DRB4*01:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:142 protein. This plasmid can be used for constructing HLA-DRB4*01:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:143 Protein Expression Plasmid Vector	PHLAP92541057	Plasmid vector containing HLA-DRB4*01:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:143 protein. This plasmid can be used for constructing HLA-DRB4*01:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:144 Protein Expression Plasmid Vector	PHLAP92541058	Plasmid vector containing HLA-DRB4*01:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:144 protein. This plasmid can be used for constructing HLA-DRB4*01:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:145N Protein Expression Plasmid Vector	PHLAP92541059	Plasmid vector containing HLA-DRB4*01:145N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:145N protein. This plasmid can be used for constructing HLA-DRB4*01:145N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:145N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:146 Protein Expression Plasmid Vector	PHLAP92541060	Plasmid vector containing HLA-DRB4*01:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:146 protein. This plasmid can be used for constructing HLA-DRB4*01:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:147 Protein Expression Plasmid Vector	PHLAP92541061	Plasmid vector containing HLA-DRB4*01:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:147 protein. This plasmid can be used for constructing HLA-DRB4*01:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:148 Protein Expression Plasmid Vector	PHLAP92541062	Plasmid vector containing HLA-DRB4*01:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:148 protein. This plasmid can be used for constructing HLA-DRB4*01:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:149N Protein Expression Plasmid Vector	PHLAP92541063	Plasmid vector containing HLA-DRB4*01:149N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:149N protein. This plasmid can be used for constructing HLA-DRB4*01:149N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:149N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:14N Protein Expression Plasmid Vector	PHLAP92541064	Plasmid vector containing HLA-DRB4*01:14N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:14N protein. This plasmid can be used for constructing HLA-DRB4*01:14N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:14N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:15 Protein Expression Plasmid Vector	PHLAP92541065	Plasmid vector containing HLA-DRB4*01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:15 protein. This plasmid can be used for constructing HLA-DRB4*01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:150 Protein Expression Plasmid Vector	PHLAP92541066	Plasmid vector containing HLA-DRB4*01:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:150 protein. This plasmid can be used for constructing HLA-DRB4*01:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:151 Protein Expression Plasmid Vector	PHLAP92541067	Plasmid vector containing HLA-DRB4*01:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:151 protein. This plasmid can be used for constructing HLA-DRB4*01:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:152 Protein Expression Plasmid Vector	PHLAP92541068	Plasmid vector containing HLA-DRB4*01:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:152 protein. This plasmid can be used for constructing HLA-DRB4*01:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:153 Protein Expression Plasmid Vector	PHLAP92541069	Plasmid vector containing HLA-DRB4*01:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:153 protein. This plasmid can be used for constructing HLA-DRB4*01:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:154 Protein Expression Plasmid Vector	PHLAP92541070	Plasmid vector containing HLA-DRB4*01:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:154 protein. This plasmid can be used for constructing HLA-DRB4*01:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:155 Protein Expression Plasmid Vector	PHLAP92541071	Plasmid vector containing HLA-DRB4*01:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:155 protein. This plasmid can be used for constructing HLA-DRB4*01:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:156 Protein Expression Plasmid Vector	PHLAP92541072	Plasmid vector containing HLA-DRB4*01:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:156 protein. This plasmid can be used for constructing HLA-DRB4*01:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:157 Protein Expression Plasmid Vector	PHLAP92541073	Plasmid vector containing HLA-DRB4*01:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:157 protein. This plasmid can be used for constructing HLA-DRB4*01:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:158 Protein Expression Plasmid Vector	PHLAP92541074	Plasmid vector containing HLA-DRB4*01:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:158 protein. This plasmid can be used for constructing HLA-DRB4*01:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:159N Protein Expression Plasmid Vector	PHLAP92541075	Plasmid vector containing HLA-DRB4*01:159N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:159N protein. This plasmid can be used for constructing HLA-DRB4*01:159N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:159N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:160 Protein Expression Plasmid Vector	PHLAP92541076	Plasmid vector containing HLA-DRB4*01:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:160 protein. This plasmid can be used for constructing HLA-DRB4*01:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:161 Protein Expression Plasmid Vector	PHLAP92541077	Plasmid vector containing HLA-DRB4*01:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:161 protein. This plasmid can be used for constructing HLA-DRB4*01:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:162N Protein Expression Plasmid Vector	PHLAP92541078	Plasmid vector containing HLA-DRB4*01:162N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:162N protein. This plasmid can be used for constructing HLA-DRB4*01:162N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:162N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:163 Protein Expression Plasmid Vector	PHLAP92541079	Plasmid vector containing HLA-DRB4*01:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:163 protein. This plasmid can be used for constructing HLA-DRB4*01:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:164 Protein Expression Plasmid Vector	PHLAP92541080	Plasmid vector containing HLA-DRB4*01:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:164 protein. This plasmid can be used for constructing HLA-DRB4*01:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:165N Protein Expression Plasmid Vector	PHLAP92541081	Plasmid vector containing HLA-DRB4*01:165N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:165N protein. This plasmid can be used for constructing HLA-DRB4*01:165N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:165N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:166 Protein Expression Plasmid Vector	PHLAP92541082	Plasmid vector containing HLA-DRB4*01:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:166 protein. This plasmid can be used for constructing HLA-DRB4*01:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:167 Protein Expression Plasmid Vector	PHLAP92541083	Plasmid vector containing HLA-DRB4*01:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:167 protein. This plasmid can be used for constructing HLA-DRB4*01:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:168 Protein Expression Plasmid Vector	PHLAP92541084	Plasmid vector containing HLA-DRB4*01:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:168 protein. This plasmid can be used for constructing HLA-DRB4*01:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:169 Protein Expression Plasmid Vector	PHLAP92541085	Plasmid vector containing HLA-DRB4*01:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:169 protein. This plasmid can be used for constructing HLA-DRB4*01:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:16N Protein Expression Plasmid Vector	PHLAP92541086	Plasmid vector containing HLA-DRB4*01:16N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:16N protein. This plasmid can be used for constructing HLA-DRB4*01:16N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:16N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:17 Protein Expression Plasmid Vector	PHLAP92541087	Plasmid vector containing HLA-DRB4*01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:17 protein. This plasmid can be used for constructing HLA-DRB4*01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:170 Protein Expression Plasmid Vector	PHLAP92541088	Plasmid vector containing HLA-DRB4*01:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:170 protein. This plasmid can be used for constructing HLA-DRB4*01:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:171 Protein Expression Plasmid Vector	PHLAP92541089	Plasmid vector containing HLA-DRB4*01:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:171 protein. This plasmid can be used for constructing HLA-DRB4*01:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:172 Protein Expression Plasmid Vector	PHLAP92541090	Plasmid vector containing HLA-DRB4*01:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:172 protein. This plasmid can be used for constructing HLA-DRB4*01:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:173 Protein Expression Plasmid Vector	PHLAP92541091	Plasmid vector containing HLA-DRB4*01:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:173 protein. This plasmid can be used for constructing HLA-DRB4*01:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:174 Protein Expression Plasmid Vector	PHLAP92541092	Plasmid vector containing HLA-DRB4*01:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:174 protein. This plasmid can be used for constructing HLA-DRB4*01:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:175 Protein Expression Plasmid Vector	PHLAP92541093	Plasmid vector containing HLA-DRB4*01:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:175 protein. This plasmid can be used for constructing HLA-DRB4*01:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:176 Protein Expression Plasmid Vector	PHLAP92541094	Plasmid vector containing HLA-DRB4*01:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:176 protein. This plasmid can be used for constructing HLA-DRB4*01:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:177 Protein Expression Plasmid Vector	PHLAP92541095	Plasmid vector containing HLA-DRB4*01:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:177 protein. This plasmid can be used for constructing HLA-DRB4*01:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:178 Protein Expression Plasmid Vector	PHLAP92541096	Plasmid vector containing HLA-DRB4*01:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:178 protein. This plasmid can be used for constructing HLA-DRB4*01:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:179 Protein Expression Plasmid Vector	PHLAP92541097	Plasmid vector containing HLA-DRB4*01:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:179 protein. This plasmid can be used for constructing HLA-DRB4*01:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:18 Protein Expression Plasmid Vector	PHLAP92541098	Plasmid vector containing HLA-DRB4*01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:18 protein. This plasmid can be used for constructing HLA-DRB4*01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:180 Protein Expression Plasmid Vector	PHLAP92541099	Plasmid vector containing HLA-DRB4*01:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:180 protein. This plasmid can be used for constructing HLA-DRB4*01:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:181 Protein Expression Plasmid Vector	PHLAP925411000	Plasmid vector containing HLA-DRB4*01:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:181 protein. This plasmid can be used for constructing HLA-DRB4*01:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:182 Protein Expression Plasmid Vector	PHLAP925411001	Plasmid vector containing HLA-DRB4*01:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:182 protein. This plasmid can be used for constructing HLA-DRB4*01:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:183 Protein Expression Plasmid Vector	PHLAP925411002	Plasmid vector containing HLA-DRB4*01:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:183 protein. This plasmid can be used for constructing HLA-DRB4*01:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:184 Protein Expression Plasmid Vector	PHLAP925411003	Plasmid vector containing HLA-DRB4*01:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:184 protein. This plasmid can be used for constructing HLA-DRB4*01:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:185 Protein Expression Plasmid Vector	PHLAP925411004	Plasmid vector containing HLA-DRB4*01:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:185 protein. This plasmid can be used for constructing HLA-DRB4*01:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:186 Protein Expression Plasmid Vector	PHLAP92541105	Plasmid vector containing HLA-DRB4*01:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:186 protein. This plasmid can be used for constructing HLA-DRB4*01:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:187 Protein Expression Plasmid Vector	PHLAP92541106	Plasmid vector containing HLA-DRB4*01:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:187 protein. This plasmid can be used for constructing HLA-DRB4*01:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:188 Protein Expression Plasmid Vector	PHLAP92541107	Plasmid vector containing HLA-DRB4*01:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:188 protein. This plasmid can be used for constructing HLA-DRB4*01:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:189 Protein Expression Plasmid Vector	PHLAP92541108	Plasmid vector containing HLA-DRB4*01:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:189 protein. This plasmid can be used for constructing HLA-DRB4*01:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:19 Protein Expression Plasmid Vector	PHLAP92541109	Plasmid vector containing HLA-DRB4*01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:19 protein. This plasmid can be used for constructing HLA-DRB4*01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:190:01:01 Protein Expression Plasmid Vector	PHLAP92541110	Plasmid vector containing HLA-DRB4*01:190:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:190:01:01 protein. This plasmid can be used for constructing HLA-DRB4*01:190:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:190:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:190:01:02 Protein Expression Plasmid Vector	PHLAP92541111	Plasmid vector containing HLA-DRB4*01:190:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:190:01:02 protein. This plasmid can be used for constructing HLA-DRB4*01:190:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:190:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:191 Protein Expression Plasmid Vector	PHLAP925411112	Plasmid vector containing HLA-DRB4*01:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:191 protein. This plasmid can be used for constructing HLA-DRB4*01:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:192N Protein Expression Plasmid Vector	PHLAP925411113	Plasmid vector containing HLA-DRB4*01:192N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:192N protein. This plasmid can be used for constructing HLA-DRB4*01:192N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:192N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:193 Protein Expression Plasmid Vector	PHLAP925411114	Plasmid vector containing HLA-DRB4*01:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:193 protein. This plasmid can be used for constructing HLA-DRB4*01:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:194N Protein Expression Plasmid Vector	PHLAP925411115	Plasmid vector containing HLA-DRB4*01:194N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:194N protein. This plasmid can be used for constructing HLA-DRB4*01:194N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:194N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:195 Protein Expression Plasmid Vector	PHLAP925411116	Plasmid vector containing HLA-DRB4*01:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:195 protein. This plasmid can be used for constructing HLA-DRB4*01:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:196 Protein Expression Plasmid Vector	PHLAP925411117	Plasmid vector containing HLA-DRB4*01:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:196 protein. This plasmid can be used for constructing HLA-DRB4*01:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:197 Protein Expression Plasmid Vector	PHLAP925411118	Plasmid vector containing HLA-DRB4*01:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:197 protein. This plasmid can be used for constructing HLA-DRB4*01:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:198 Protein Expression Plasmid Vector	PHLAP92541119	Plasmid vector containing HLA-DRB4*01:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:198 protein. This plasmid can be used for constructing HLA-DRB4*01:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:199N Protein Expression Plasmid Vector	PHLAP92541120	Plasmid vector containing HLA-DRB4*01:199N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:199N protein. This plasmid can be used for constructing HLA-DRB4*01:199N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:199N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:20 Protein Expression Plasmid Vector	PHLAP92541121	Plasmid vector containing HLA-DRB4*01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:20 protein. This plasmid can be used for constructing HLA-DRB4*01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:200 Protein Expression Plasmid Vector	PHLAP92541122	Plasmid vector containing HLA-DRB4*01:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:200 protein. This plasmid can be used for constructing HLA-DRB4*01:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:201 Protein Expression Plasmid Vector	PHLAP92541123	Plasmid vector containing HLA-DRB4*01:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:201 protein. This plasmid can be used for constructing HLA-DRB4*01:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:202 Protein Expression Plasmid Vector	PHLAP92541124	Plasmid vector containing HLA-DRB4*01:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:202 protein. This plasmid can be used for constructing HLA-DRB4*01:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:203N Protein Expression Plasmid Vector	PHLAP92541125	Plasmid vector containing HLA-DRB4*01:203N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:203N protein. This plasmid can be used for constructing HLA-DRB4*01:203N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:203N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:204 Protein Expression Plasmid Vector	PHLAP92541126	Plasmid vector containing HLA-DRB4*01:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:204 protein. This plasmid can be used for constructing HLA-DRB4*01:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:205 Protein Expression Plasmid Vector	PHLAP92541127	Plasmid vector containing HLA-DRB4*01:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:205 protein. This plasmid can be used for constructing HLA-DRB4*01:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:206 Protein Expression Plasmid Vector	PHLAP92541128	Plasmid vector containing HLA-DRB4*01:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:206 protein. This plasmid can be used for constructing HLA-DRB4*01:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:207 Protein Expression Plasmid Vector	PHLAP92541129	Plasmid vector containing HLA-DRB4*01:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:207 protein. This plasmid can be used for constructing HLA-DRB4*01:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:208 Protein Expression Plasmid Vector	PHLAP92541130	Plasmid vector containing HLA-DRB4*01:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:208 protein. This plasmid can be used for constructing HLA-DRB4*01:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:209 Protein Expression Plasmid Vector	PHLAP92541131	Plasmid vector containing HLA-DRB4*01:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:209 protein. This plasmid can be used for constructing HLA-DRB4*01:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:21 Protein Expression Plasmid Vector	PHLAP92541132	Plasmid vector containing HLA-DRB4*01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:21 protein. This plasmid can be used for constructing HLA-DRB4*01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:210 Protein Expression Plasmid Vector	PHLAP92541133	Plasmid vector containing HLA-DRB4*01:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:210 protein. This plasmid can be used for constructing HLA-DRB4*01:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:211 Protein Expression Plasmid Vector	PHLAP92541134	Plasmid vector containing HLA-DRB4*01:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:211 protein. This plasmid can be used for constructing HLA-DRB4*01:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:212N Protein Expression Plasmid Vector	PHLAP92541135	Plasmid vector containing HLA-DRB4*01:212N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:212N protein. This plasmid can be used for constructing HLA-DRB4*01:212N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:212N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:213:01:01 Protein Expression Plasmid Vector	PHLAP92541136	Plasmid vector containing HLA-DRB4*01:213:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:213:01:01 protein. This plasmid can be used for constructing HLA-DRB4*01:213:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:213:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:213:01:02 Protein Expression Plasmid Vector	PHLAP92541137	Plasmid vector containing HLA-DRB4*01:213:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:213:01:02 protein. This plasmid can be used for constructing HLA-DRB4*01:213:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:213:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:22 Protein Expression Plasmid Vector	PHLAP92541138	Plasmid vector containing HLA-DRB4*01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:22 protein. This plasmid can be used for constructing HLA-DRB4*01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:23 Protein Expression Plasmid Vector	PHLAP92541139	Plasmid vector containing HLA-DRB4*01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:23 protein. This plasmid can be used for constructing HLA-DRB4*01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:24 Protein Expression Plasmid Vector	PHLAP925411440	Plasmid vector containing HLA-DRB4*01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:24 protein. This plasmid can be used for constructing HLA-DRB4*01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:25 Protein Expression Plasmid Vector	PHLAP925411441	Plasmid vector containing HLA-DRB4*01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:25 protein. This plasmid can be used for constructing HLA-DRB4*01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:26 Protein Expression Plasmid Vector	PHLAP925411442	Plasmid vector containing HLA-DRB4*01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:26 protein. This plasmid can be used for constructing HLA-DRB4*01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:27 Protein Expression Plasmid Vector	PHLAP925411443	Plasmid vector containing HLA-DRB4*01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:27 protein. This plasmid can be used for constructing HLA-DRB4*01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:28 Protein Expression Plasmid Vector	PHLAP925411444	Plasmid vector containing HLA-DRB4*01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:28 protein. This plasmid can be used for constructing HLA-DRB4*01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:29 Protein Expression Plasmid Vector	PHLAP925411445	Plasmid vector containing HLA-DRB4*01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:29 protein. This plasmid can be used for constructing HLA-DRB4*01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:30 Protein Expression Plasmid Vector	PHLAP925411446	Plasmid vector containing HLA-DRB4*01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:30 protein. This plasmid can be used for constructing HLA-DRB4*01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:31 Protein Expression Plasmid Vector	PHLAP925411447	Plasmid vector containing HLA-DRB4*01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:31 protein. This plasmid can be used for constructing HLA-DRB4*01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB4*01:32 Protein Expression Plasmid Vector	PHLAP92541148	Plasmid vector containing HLA-DRB4*01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:32 protein. This plasmid can be used for constructing HLA-DRB4*01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:33 Protein Expression Plasmid Vector	PHLAP92541149	Plasmid vector containing HLA-DRB4*01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:33 protein. This plasmid can be used for constructing HLA-DRB4*01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:34 Protein Expression Plasmid Vector	PHLAP92541150	Plasmid vector containing HLA-DRB4*01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:34 protein. This plasmid can be used for constructing HLA-DRB4*01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:35 Protein Expression Plasmid Vector	PHLAP92541151	Plasmid vector containing HLA-DRB4*01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:35 protein. This plasmid can be used for constructing HLA-DRB4*01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:36 Protein Expression Plasmid Vector	PHLAP92541152	Plasmid vector containing HLA-DRB4*01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:36 protein. This plasmid can be used for constructing HLA-DRB4*01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:37 Protein Expression Plasmid Vector	PHLAP92541153	Plasmid vector containing HLA-DRB4*01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:37 protein. This plasmid can be used for constructing HLA-DRB4*01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:38N Protein Expression Plasmid Vector	PHLAP92541154	Plasmid vector containing HLA-DRB4*01:38N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:38N protein. This plasmid can be used for constructing HLA-DRB4*01:38N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:38N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:39 Protein Expression Plasmid Vector	PHLAP92541155	Plasmid vector containing HLA-DRB4*01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:39 protein. This plasmid can be used for constructing HLA-DRB4*01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:40 Protein Expression Plasmid Vector	PHLAP92541156	Plasmid vector containing HLA-DRB4*01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:40 protein. This plasmid can be used for constructing HLA-DRB4*01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:41 Protein Expression Plasmid Vector	PHLAP92541157	Plasmid vector containing HLA-DRB4*01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:41 protein. This plasmid can be used for constructing HLA-DRB4*01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:42 Protein Expression Plasmid Vector	PHLAP92541158	Plasmid vector containing HLA-DRB4*01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:42 protein. This plasmid can be used for constructing HLA-DRB4*01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:43 Protein Expression Plasmid Vector	PHLAP92541159	Plasmid vector containing HLA-DRB4*01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:43 protein. This plasmid can be used for constructing HLA-DRB4*01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:44 Protein Expression Plasmid Vector	PHLAP92541160	Plasmid vector containing HLA-DRB4*01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:44 protein. This plasmid can be used for constructing HLA-DRB4*01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:45 Protein Expression Plasmid Vector	PHLAP92541161	Plasmid vector containing HLA-DRB4*01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:45 protein. This plasmid can be used for constructing HLA-DRB4*01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:46 Protein Expression Plasmid Vector	PHLAP92541162	Plasmid vector containing HLA-DRB4*01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:46 protein. This plasmid can be used for constructing HLA-DRB4*01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:47 Protein Expression Plasmid Vector	PHLAP92541163	Plasmid vector containing HLA-DRB4*01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:47 protein. This plasmid can be used for constructing HLA-DRB4*01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB4*01:48 Protein Expression Plasmid Vector	PHLAP92541164	Plasmid vector containing HLA-DRB4*01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:48 protein. This plasmid can be used for constructing HLA-DRB4*01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:49 Protein Expression Plasmid Vector	PHLAP92541165	Plasmid vector containing HLA-DRB4*01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:49 protein. This plasmid can be used for constructing HLA-DRB4*01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:50 Protein Expression Plasmid Vector	PHLAP92541166	Plasmid vector containing HLA-DRB4*01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:50 protein. This plasmid can be used for constructing HLA-DRB4*01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:51 Protein Expression Plasmid Vector	PHLAP92541167	Plasmid vector containing HLA-DRB4*01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:51 protein. This plasmid can be used for constructing HLA-DRB4*01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:52 Protein Expression Plasmid Vector	PHLAP92541168	Plasmid vector containing HLA-DRB4*01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:52 protein. This plasmid can be used for constructing HLA-DRB4*01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:53 Protein Expression Plasmid Vector	PHLAP92541169	Plasmid vector containing HLA-DRB4*01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:53 protein. This plasmid can be used for constructing HLA-DRB4*01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:54:01N Protein Expression Plasmid Vector	PHLAP92541170	Plasmid vector containing HLA-DRB4*01:54:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:54:01N protein. This plasmid can be used for constructing HLA-DRB4*01:54:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:54:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:54:02N Protein Expression Plasmid Vector	PHLAP92541171	Plasmid vector containing HLA-DRB4*01:54:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:54:02N protein. This plasmid can be used for constructing HLA-DRB4*01:54:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:54:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:55 Protein Expression Plasmid Vector	PHLAP925411712	Plasmid vector containing HLA-DRB4*01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:55 protein. This plasmid can be used for constructing HLA-DRB4*01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:56N Protein Expression Plasmid Vector	PHLAP925411713	Plasmid vector containing HLA-DRB4*01:56N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:56N protein. This plasmid can be used for constructing HLA-DRB4*01:56N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:56N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:57N Protein Expression Plasmid Vector	PHLAP925411714	Plasmid vector containing HLA-DRB4*01:57N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:57N protein. This plasmid can be used for constructing HLA-DRB4*01:57N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:57N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:58 Protein Expression Plasmid Vector	PHLAP925411715	Plasmid vector containing HLA-DRB4*01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:58 protein. This plasmid can be used for constructing HLA-DRB4*01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:59 Protein Expression Plasmid Vector	PHLAP925411716	Plasmid vector containing HLA-DRB4*01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:59 protein. This plasmid can be used for constructing HLA-DRB4*01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:60 Protein Expression Plasmid Vector	PHLAP925411717	Plasmid vector containing HLA-DRB4*01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:60 protein. This plasmid can be used for constructing HLA-DRB4*01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:61:01N Protein Expression Plasmid Vector	PHLAP925411718	Plasmid vector containing HLA-DRB4*01:61:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:61:01N protein. This plasmid can be used for constructing HLA-DRB4*01:61:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:61:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:61:02N Protein Expression Plasmid Vector	PHLAP92541179	Plasmid vector containing HLA-DRB4*01:61:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:61:02N protein. This plasmid can be used for constructing HLA-DRB4*01:61:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:61:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:62 Protein Expression Plasmid Vector	PHLAP92541180	Plasmid vector containing HLA-DRB4*01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:62 protein. This plasmid can be used for constructing HLA-DRB4*01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB4*01:63 Protein Expression Plasmid Vector	PHLAP92541181	Plasmid vector containing HLA-DRB4*01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:63 protein. This plasmid can be used for constructing HLA-DRB4*01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB4*01:64 Protein Expression Plasmid Vector	PHLAP92541182	Plasmid vector containing HLA-DRB4*01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:64 protein. This plasmid can be used for constructing HLA-DRB4*01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB4*01:65N Protein Expression Plasmid Vector	PHLAP92541183	Plasmid vector containing HLA-DRB4*01:65N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:65N protein. This plasmid can be used for constructing HLA-DRB4*01:65N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:65N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:66 Protein Expression Plasmid Vector	PHLAP92541184	Plasmid vector containing HLA-DRB4*01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:66 protein. This plasmid can be used for constructing HLA-DRB4*01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB4*01:67 Protein Expression Plasmid Vector	PHLAP92541185	Plasmid vector containing HLA-DRB4*01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:67 protein. This plasmid can be used for constructing HLA-DRB4*01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB4*01:68 Protein Expression Plasmid Vector	PHLAP92541186	Plasmid vector containing HLA-DRB4*01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:68 protein. This plasmid can be used for constructing HLA-DRB4*01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB4*01:69 Protein Expression Plasmid Vector	PHLAP92541187	Plasmid vector containing HLA-DRB4*01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:69 protein. This plasmid can be used for constructing HLA-DRB4*01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:70 Protein Expression Plasmid Vector	PHLAP92541188	Plasmid vector containing HLA-DRB4*01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:70 protein. This plasmid can be used for constructing HLA-DRB4*01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:71N Protein Expression Plasmid Vector	PHLAP92541189	Plasmid vector containing HLA-DRB4*01:71N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:71N protein. This plasmid can be used for constructing HLA-DRB4*01:71N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:71N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:72:01 Protein Expression Plasmid Vector	PHLAP92541190	Plasmid vector containing HLA-DRB4*01:72:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:72:01 protein. This plasmid can be used for constructing HLA-DRB4*01:72:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:72:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:72:02 Protein Expression Plasmid Vector	PHLAP92541191	Plasmid vector containing HLA-DRB4*01:72:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:72:02 protein. This plasmid can be used for constructing HLA-DRB4*01:72:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:72:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:73 Protein Expression Plasmid Vector	PHLAP92541192	Plasmid vector containing HLA-DRB4*01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:73 protein. This plasmid can be used for constructing HLA-DRB4*01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:74 Protein Expression Plasmid Vector	PHLAP92541193	Plasmid vector containing HLA-DRB4*01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:74 protein. This plasmid can be used for constructing HLA-DRB4*01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:75 Protein Expression Plasmid Vector	PHLAP92541194	Plasmid vector containing HLA-DRB4*01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:75 protein. This plasmid can be used for constructing HLA-DRB4*01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:76:01 Protein Expression Plasmid Vector	PHLAP92541195	Plasmid vector containing HLA-DRB4*01:76:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:76:01 protein. This plasmid can be used for constructing HLA-DRB4*01:76:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:76:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:76:02 Protein Expression Plasmid Vector	PHLAP92541196	Plasmid vector containing HLA-DRB4*01:76:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:76:02 protein. This plasmid can be used for constructing HLA-DRB4*01:76:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:76:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:77 Protein Expression Plasmid Vector	PHLAP92541197	Plasmid vector containing HLA-DRB4*01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:77 protein. This plasmid can be used for constructing HLA-DRB4*01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:78 Protein Expression Plasmid Vector	PHLAP92541198	Plasmid vector containing HLA-DRB4*01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:78 protein. This plasmid can be used for constructing HLA-DRB4*01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:79 Protein Expression Plasmid Vector	PHLAP92541199	Plasmid vector containing HLA-DRB4*01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:79 protein. This plasmid can be used for constructing HLA-DRB4*01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:80N Protein Expression Plasmid Vector	PHLAP925412000	Plasmid vector containing HLA-DRB4*01:80N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:80N protein. This plasmid can be used for constructing HLA-DRB4*01:80N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:80N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:81 Protein Expression Plasmid Vector	PHLAP92541201	Plasmid vector containing HLA-DRB4*01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:81 protein. This plasmid can be used for constructing HLA-DRB4*01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:82 Protein Expression Plasmid Vector	PHLAP92541202	Plasmid vector containing HLA-DRB4*01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:82 protein. This plasmid can be used for constructing HLA-DRB4*01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:83 Protein Expression Plasmid Vector	PHLAP92541203	Plasmid vector containing HLA-DRB4*01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:83 protein. This plasmid can be used for constructing HLA-DRB4*01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:84N Protein Expression Plasmid Vector	PHLAP92541204	Plasmid vector containing HLA-DRB4*01:84N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:84N protein. This plasmid can be used for constructing HLA-DRB4*01:84N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:84N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:85 Protein Expression Plasmid Vector	PHLAP92541205	Plasmid vector containing HLA-DRB4*01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:85 protein. This plasmid can be used for constructing HLA-DRB4*01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:86 Protein Expression Plasmid Vector	PHLAP92541206	Plasmid vector containing HLA-DRB4*01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:86 protein. This plasmid can be used for constructing HLA-DRB4*01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:87 Protein Expression Plasmid Vector	PHLAP92541207	Plasmid vector containing HLA-DRB4*01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:87 protein. This plasmid can be used for constructing HLA-DRB4*01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:88 Protein Expression Plasmid Vector	PHLAP92541208	Plasmid vector containing HLA-DRB4*01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:88 protein. This plasmid can be used for constructing HLA-DRB4*01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB4*01:89 Protein Expression Plasmid Vector	PHLAP92541209	Plasmid vector containing HLA-DRB4*01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:89 protein. This plasmid can be used for constructing HLA-DRB4*01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:90 Protein Expression Plasmid Vector	PHLAP92541210	Plasmid vector containing HLA-DRB4*01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:90 protein. This plasmid can be used for constructing HLA-DRB4*01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:91 Protein Expression Plasmid Vector	PHLAP92541211	Plasmid vector containing HLA-DRB4*01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:91 protein. This plasmid can be used for constructing HLA-DRB4*01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:92 Protein Expression Plasmid Vector	PHLAP92541212	Plasmid vector containing HLA-DRB4*01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:92 protein. This plasmid can be used for constructing HLA-DRB4*01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:93 Protein Expression Plasmid Vector	PHLAP92541213	Plasmid vector containing HLA-DRB4*01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:93 protein. This plasmid can be used for constructing HLA-DRB4*01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:94 Protein Expression Plasmid Vector	PHLAP92541214	Plasmid vector containing HLA-DRB4*01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:94 protein. This plasmid can be used for constructing HLA-DRB4*01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:95 Protein Expression Plasmid Vector	PHLAP92541215	Plasmid vector containing HLA-DRB4*01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:95 protein. This plasmid can be used for constructing HLA-DRB4*01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB4*01:96 Protein Expression Plasmid Vector	PHLAP92541216	Plasmid vector containing HLA-DRB4*01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:96 protein. This plasmid can be used for constructing HLA-DRB4*01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB4*01:97 Protein Expression Plasmid Vector	PHLAP92541217	Plasmid vector containing HLA-DRB4*01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:97 protein. This plasmid can be used for constructing HLA-DRB4*01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:98 Protein Expression Plasmid Vector	PHLAP92541218	Plasmid vector containing HLA-DRB4*01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:98 protein. This plasmid can be used for constructing HLA-DRB4*01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*01:99 Protein Expression Plasmid Vector	PHLAP92541219	Plasmid vector containing HLA-DRB4*01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*01:99 protein. This plasmid can be used for constructing HLA-DRB4*01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*0101102N Protein Expression Plasmid Vector	PHLAP92541220	Plasmid vector containing HLA-DRB4*0101102N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*0101102N protein. This plasmid can be used for constructing HLA-DRB4*0101102N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*0101102N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*02:01N Protein Expression Plasmid Vector	PHLAP92541221	Plasmid vector containing HLA-DRB4*02:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*02:01N protein. This plasmid can be used for constructing HLA-DRB4*02:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*02:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB4*03:01N Protein Expression Plasmid Vector	PHLAP92541222	Plasmid vector containing HLA-DRB4*03:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB4*03:01N protein. This plasmid can be used for constructing HLA-DRB4*03:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB4*03:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92541223	Plasmid vector containing HLA-DRB5*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:01 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92541224	Plasmid vector containing HLA-DRB5*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:02 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92541225	Plasmid vector containing HLA-DRB5*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:03 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92541226	Plasmid vector containing HLA-DRB5*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:04 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92541227	Plasmid vector containing HLA-DRB5*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:05 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:06 Protein Expression Plasmid Vector	PHLAP92541228	Plasmid vector containing HLA-DRB5*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:06 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:07 Protein Expression Plasmid Vector	PHLAP92541229	Plasmid vector containing HLA-DRB5*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:07 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:08 Protein Expression Plasmid Vector	PHLAP92541230	Plasmid vector containing HLA-DRB5*01:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:08 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:01:01:09 Protein Expression Plasmid Vector	PHLAP92541231	Plasmid vector containing HLA-DRB5*01:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:09 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:10 Protein Expression Plasmid Vector	PHLAP92541232	Plasmid vector containing HLA-DRB5*01:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:10 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:11 Protein Expression Plasmid Vector	PHLAP92541233	Plasmid vector containing HLA-DRB5*01:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:11 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:12 Protein Expression Plasmid Vector	PHLAP92541234	Plasmid vector containing HLA-DRB5*01:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:12 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:13 Protein Expression Plasmid Vector	PHLAP92541235	Plasmid vector containing HLA-DRB5*01:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:13 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:14 Protein Expression Plasmid Vector	PHLAP92541236	Plasmid vector containing HLA-DRB5*01:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:14 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:15 Protein Expression Plasmid Vector	PHLAP92541237	Plasmid vector containing HLA-DRB5*01:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:15 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:01:01:16 Protein Expression Plasmid Vector	PHLAP92541238	Plasmid vector containing HLA-DRB5*01:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:16 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:01:17 Protein Expression Plasmid Vector	PHLAP92541239	Plasmid vector containing HLA-DRB5*01:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:01:17 protein. This plasmid can be used for constructing HLA-DRB5*01:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:02 Protein Expression Plasmid Vector	PHLAP92541240	Plasmid vector containing HLA-DRB5*01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:02 protein. This plasmid can be used for constructing HLA-DRB5*01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:03 Protein Expression Plasmid Vector	PHLAP92541241	Plasmid vector containing HLA-DRB5*01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:03 protein. This plasmid can be used for constructing HLA-DRB5*01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:04 Protein Expression Plasmid Vector	PHLAP92541242	Plasmid vector containing HLA-DRB5*01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:04 protein. This plasmid can be used for constructing HLA-DRB5*01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:05 Protein Expression Plasmid Vector	PHLAP92541243	Plasmid vector containing HLA-DRB5*01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:05 protein. This plasmid can be used for constructing HLA-DRB5*01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:06 Protein Expression Plasmid Vector	PHLAP92541244	Plasmid vector containing HLA-DRB5*01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:06 protein. This plasmid can be used for constructing HLA-DRB5*01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:01:07 Protein Expression Plasmid Vector	PHLAP92541245	Plasmid vector containing HLA-DRB5*01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:07 protein. This plasmid can be used for constructing HLA-DRB5*01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:08 Protein Expression Plasmid Vector	PHLAP92541246	Plasmid vector containing HLA-DRB5*01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:08 protein. This plasmid can be used for constructing HLA-DRB5*01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:09 Protein Expression Plasmid Vector	PHLAP92541247	Plasmid vector containing HLA-DRB5*01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:09 protein. This plasmid can be used for constructing HLA-DRB5*01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:10 Protein Expression Plasmid Vector	PHLAP92541248	Plasmid vector containing HLA-DRB5*01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:10 protein. This plasmid can be used for constructing HLA-DRB5*01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:11 Protein Expression Plasmid Vector	PHLAP92541249	Plasmid vector containing HLA-DRB5*01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:11 protein. This plasmid can be used for constructing HLA-DRB5*01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:12 Protein Expression Plasmid Vector	PHLAP92541250	Plasmid vector containing HLA-DRB5*01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:12 protein. This plasmid can be used for constructing HLA-DRB5*01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:13 Protein Expression Plasmid Vector	PHLAP92541251	Plasmid vector containing HLA-DRB5*01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:13 protein. This plasmid can be used for constructing HLA-DRB5*01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:01:14 Protein Expression Plasmid Vector	PHLAP92541252	Plasmid vector containing HLA-DRB5*01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:14 protein. This plasmid can be used for constructing HLA-DRB5*01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:15 Protein Expression Plasmid Vector	PHLAP92541253	Plasmid vector containing HLA-DRB5*01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:15 protein. This plasmid can be used for constructing HLA-DRB5*01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:01:16 Protein Expression Plasmid Vector	PHLAP92541254	Plasmid vector containing HLA-DRB5*01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:01:16 protein. This plasmid can be used for constructing HLA-DRB5*01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:02:01:01 Protein Expression Plasmid Vector	PHLAP92541255	Plasmid vector containing HLA-DRB5*01:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:02:01:01 protein. This plasmid can be used for constructing HLA-DRB5*01:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:02:01:02 Protein Expression Plasmid Vector	PHLAP92541256	Plasmid vector containing HLA-DRB5*01:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:02:01:02 protein. This plasmid can be used for constructing HLA-DRB5*01:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:02:01:03 Protein Expression Plasmid Vector	PHLAP92541257	Plasmid vector containing HLA-DRB5*01:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:02:01:03 protein. This plasmid can be used for constructing HLA-DRB5*01:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:02:01:04 Protein Expression Plasmid Vector	PHLAP92541258	Plasmid vector containing HLA-DRB5*01:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:02:01:04 protein. This plasmid can be used for constructing HLA-DRB5*01:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:02:01:05 Protein Expression Plasmid Vector	PHLAP92541259	Plasmid vector containing HLA-DRB5*01:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:02:01:05 protein. This plasmid can be used for constructing HLA-DRB5*01:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:02:02 Protein Expression Plasmid Vector	PHLAP92541260	Plasmid vector containing HLA-DRB5*01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:02:02 protein. This plasmid can be used for constructing HLA-DRB5*01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:02:03 Protein Expression Plasmid Vector	PHLAP92541261	Plasmid vector containing HLA-DRB5*01:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:02:03 protein. This plasmid can be used for constructing HLA-DRB5*01:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:02:04 Protein Expression Plasmid Vector	PHLAP92541262	Plasmid vector containing HLA-DRB5*01:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:02:04 protein. This plasmid can be used for constructing HLA-DRB5*01:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:02:05 Protein Expression Plasmid Vector	PHLAP92541263	Plasmid vector containing HLA-DRB5*01:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:02:05 protein. This plasmid can be used for constructing HLA-DRB5*01:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:02:06 Protein Expression Plasmid Vector	PHLAP92541264	Plasmid vector containing HLA-DRB5*01:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:02:06 protein. This plasmid can be used for constructing HLA-DRB5*01:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:03 Protein Expression Plasmid Vector	PHLAP92541265	Plasmid vector containing HLA-DRB5*01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:03 protein. This plasmid can be used for constructing HLA-DRB5*01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:04 Protein Expression Plasmid Vector	PHLAP92541266	Plasmid vector containing HLA-DRB5*01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:04 protein. This plasmid can be used for constructing HLA-DRB5*01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:05 Protein Expression Plasmid Vector	PHLAP92541267	Plasmid vector containing HLA-DRB5*01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:05 protein. This plasmid can be used for constructing HLA-DRB5*01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:06 Protein Expression Plasmid Vector	PHLAP92541268	Plasmid vector containing HLA-DRB5*01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:06 protein. This plasmid can be used for constructing HLA-DRB5*01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:07 Protein Expression Plasmid Vector	PHLAP92541269	Plasmid vector containing HLA-DRB5*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:07 protein. This plasmid can be used for constructing HLA-DRB5*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:08:01N Protein Expression Plasmid Vector	PHLAP92541270	Plasmid vector containing HLA-DRB5*01:08:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:08:01N protein. This plasmid can be used for constructing HLA-DRB5*01:08:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:08:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:08:02N Protein Expression Plasmid Vector	PHLAP92541271	Plasmid vector containing HLA-DRB5*01:08:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:08:02N protein. This plasmid can be used for constructing HLA-DRB5*01:08:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:08:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:09 Protein Expression Plasmid Vector	PHLAP92541272	Plasmid vector containing HLA-DRB5*01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:09 protein. This plasmid can be used for constructing HLA-DRB5*01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:100 Protein Expression Plasmid Vector	PHLAP92541273	Plasmid vector containing HLA-DRB5*01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:100 protein. This plasmid can be used for constructing HLA-DRB5*01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:101N Protein Expression Plasmid Vector	PHLAP92541274	Plasmid vector containing HLA-DRB5*01:101N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:101N protein. This plasmid can be used for constructing HLA-DRB5*01:101N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:101N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:102 Protein Expression Plasmid Vector	PHLAP92541275	Plasmid vector containing HLA-DRB5*01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:102 protein. This plasmid can be used for constructing HLA-DRB5*01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:103 Protein Expression Plasmid Vector	PHLAP92541276	Plasmid vector containing HLA-DRB5*01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:103 protein. This plasmid can be used for constructing HLA-DRB5*01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:104 Protein Expression Plasmid Vector	PHLAP92541277	Plasmid vector containing HLA-DRB5*01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:104 protein. This plasmid can be used for constructing HLA-DRB5*01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:105:01 Protein Expression Plasmid Vector	PHLAP92541278	Plasmid vector containing HLA-DRB5*01:105:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:105:01 protein. This plasmid can be used for constructing HLA-DRB5*01:105:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:105:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:105:02 Protein Expression Plasmid Vector	PHLAP92541279	Plasmid vector containing HLA-DRB5*01:105:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:105:02 protein. This plasmid can be used for constructing HLA-DRB5*01:105:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:105:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:106 Protein Expression Plasmid Vector	PHLAP92541280	Plasmid vector containing HLA-DRB5*01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:106 protein. This plasmid can be used for constructing HLA-DRB5*01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:107 Protein Expression Plasmid Vector	PHLAP92541281	Plasmid vector containing HLA-DRB5*01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:107 protein. This plasmid can be used for constructing HLA-DRB5*01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:108 Protein Expression Plasmid Vector	PHLAP92541282	Plasmid vector containing HLA-DRB5*01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:108 protein. This plasmid can be used for constructing HLA-DRB5*01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:109 Protein Expression Plasmid Vector	PHLAP92541283	Plasmid vector containing HLA-DRB5*01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:109 protein. This plasmid can be used for constructing HLA-DRB5*01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:10N Protein Expression Plasmid Vector	PHLAP92541284	Plasmid vector containing HLA-DRB5*01:10N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:10N protein. This plasmid can be used for constructing HLA-DRB5*01:10N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:10N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:11 Protein Expression Plasmid Vector	PHLAP92541285	Plasmid vector containing HLA-DRB5*01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:11 protein. This plasmid can be used for constructing HLA-DRB5*01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:110 Protein Expression Plasmid Vector	PHLAP92541286	Plasmid vector containing HLA-DRB5*01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:110 protein. This plasmid can be used for constructing HLA-DRB5*01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:111 Protein Expression Plasmid Vector	PHLAP92541287	Plasmid vector containing HLA-DRB5*01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:111 protein. This plasmid can be used for constructing HLA-DRB5*01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:112 Protein Expression Plasmid Vector	PHLAP92541288	Plasmid vector containing HLA-DRB5*01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:112 protein. This plasmid can be used for constructing HLA-DRB5*01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:113 Protein Expression Plasmid Vector	PHLAP92541289	Plasmid vector containing HLA-DRB5*01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:113 protein. This plasmid can be used for constructing HLA-DRB5*01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:114 Protein Expression Plasmid Vector	PHLAP92541290	Plasmid vector containing HLA-DRB5*01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:114 protein. This plasmid can be used for constructing HLA-DRB5*01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:115 Protein Expression Plasmid Vector	PHLAP92541291	Plasmid vector containing HLA-DRB5*01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:115 protein. This plasmid can be used for constructing HLA-DRB5*01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:116 Protein Expression Plasmid Vector	PHLAP92541292	Plasmid vector containing HLA-DRB5*01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:116 protein. This plasmid can be used for constructing HLA-DRB5*01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:117 Protein Expression Plasmid Vector	PHLAP92541293	Plasmid vector containing HLA-DRB5*01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:117 protein. This plasmid can be used for constructing HLA-DRB5*01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:118 Protein Expression Plasmid Vector	PHLAP92541294	Plasmid vector containing HLA-DRB5*01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:118 protein. This plasmid can be used for constructing HLA-DRB5*01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:119 Protein Expression Plasmid Vector	PHLAP92541295	Plasmid vector containing HLA-DRB5*01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:119 protein. This plasmid can be used for constructing HLA-DRB5*01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:12 Protein Expression Plasmid Vector	PHLAP92541296	Plasmid vector containing HLA-DRB5*01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:12 protein. This plasmid can be used for constructing HLA-DRB5*01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:120N Protein Expression Plasmid Vector	PHLAP92541297	Plasmid vector containing HLA-DRB5*01:120N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:120N protein. This plasmid can be used for constructing HLA-DRB5*01:120N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:120N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:121N Protein Expression Plasmid Vector	PHLAP92541298	Plasmid vector containing HLA-DRB5*01:121N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:121N protein. This plasmid can be used for constructing HLA-DRB5*01:121N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:121N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:122 Protein Expression Plasmid Vector	PHLAP92541299	Plasmid vector containing HLA-DRB5*01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:122 protein. This plasmid can be used for constructing HLA-DRB5*01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:123 Protein Expression Plasmid Vector	PHLAP925413000	Plasmid vector containing HLA-DRB5*01:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:123 protein. This plasmid can be used for constructing HLA-DRB5*01:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:124 Protein Expression Plasmid Vector	PHLAP92541301	Plasmid vector containing HLA-DRB5*01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:124 protein. This plasmid can be used for constructing HLA-DRB5*01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:125N Protein Expression Plasmid Vector	PHLAP92541302	Plasmid vector containing HLA-DRB5*01:125N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:125N protein. This plasmid can be used for constructing HLA-DRB5*01:125N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:125N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:126 Protein Expression Plasmid Vector	PHLAP92541303	Plasmid vector containing HLA-DRB5*01:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:126 protein. This plasmid can be used for constructing HLA-DRB5*01:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:127N Protein Expression Plasmid Vector	PHLAP92541304	Plasmid vector containing HLA-DRB5*01:127N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:127N protein. This plasmid can be used for constructing HLA-DRB5*01:127N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:127N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:128 Protein Expression Plasmid Vector	PHLAP92541305	Plasmid vector containing HLA-DRB5*01:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:128 protein. This plasmid can be used for constructing HLA-DRB5*01:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:129 Protein Expression Plasmid Vector	PHLAP92541306	Plasmid vector containing HLA-DRB5*01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:129 protein. This plasmid can be used for constructing HLA-DRB5*01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:13 Protein Expression Plasmid Vector	PHLAP92541307	Plasmid vector containing HLA-DRB5*01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:13 protein. This plasmid can be used for constructing HLA-DRB5*01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:130 Protein Expression Plasmid Vector	PHLAP92541308	Plasmid vector containing HLA-DRB5*01:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:130 protein. This plasmid can be used for constructing HLA-DRB5*01:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:131N Protein Expression Plasmid Vector	PHLAP92541309	Plasmid vector containing HLA-DRB5*01:131N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:131N protein. This plasmid can be used for constructing HLA-DRB5*01:131N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:131N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:132 Protein Expression Plasmid Vector	PHLAP925413110	Plasmid vector containing HLA-DRB5*01:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:132 protein. This plasmid can be used for constructing HLA-DRB5*01:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:133 Protein Expression Plasmid Vector	PHLAP925413111	Plasmid vector containing HLA-DRB5*01:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:133 protein. This plasmid can be used for constructing HLA-DRB5*01:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:134N Protein Expression Plasmid Vector	PHLAP925413112	Plasmid vector containing HLA-DRB5*01:134N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:134N protein. This plasmid can be used for constructing HLA-DRB5*01:134N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:134N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:135 Protein Expression Plasmid Vector	PHLAP925413113	Plasmid vector containing HLA-DRB5*01:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:135 protein. This plasmid can be used for constructing HLA-DRB5*01:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:136 Protein Expression Plasmid Vector	PHLAP925413114	Plasmid vector containing HLA-DRB5*01:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:136 protein. This plasmid can be used for constructing HLA-DRB5*01:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:137 Protein Expression Plasmid Vector	PHLAP92541315	Plasmid vector containing HLA-DRB5*01:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:137 protein. This plasmid can be used for constructing HLA-DRB5*01:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:138 Protein Expression Plasmid Vector	PHLAP92541316	Plasmid vector containing HLA-DRB5*01:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:138 protein. This plasmid can be used for constructing HLA-DRB5*01:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:139 Protein Expression Plasmid Vector	PHLAP92541317	Plasmid vector containing HLA-DRB5*01:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:139 protein. This plasmid can be used for constructing HLA-DRB5*01:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:14 Protein Expression Plasmid Vector	PHLAP92541318	Plasmid vector containing HLA-DRB5*01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:14 protein. This plasmid can be used for constructing HLA-DRB5*01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:140 Protein Expression Plasmid Vector	PHLAP92541319	Plasmid vector containing HLA-DRB5*01:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:140 protein. This plasmid can be used for constructing HLA-DRB5*01:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:141 Protein Expression Plasmid Vector	PHLAP92541320	Plasmid vector containing HLA-DRB5*01:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:141 protein. This plasmid can be used for constructing HLA-DRB5*01:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:142 Protein Expression Plasmid Vector	PHLAP92541321	Plasmid vector containing HLA-DRB5*01:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:142 protein. This plasmid can be used for constructing HLA-DRB5*01:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:143 Protein Expression Plasmid Vector	PHLAP925413212	Plasmid vector containing HLA-DRB5*01:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:143 protein. This plasmid can be used for constructing HLA-DRB5*01:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:144N Protein Expression Plasmid Vector	PHLAP925413213	Plasmid vector containing HLA-DRB5*01:144N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:144N protein. This plasmid can be used for constructing HLA-DRB5*01:144N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:144N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:145N Protein Expression Plasmid Vector	PHLAP925413214	Plasmid vector containing HLA-DRB5*01:145N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:145N protein. This plasmid can be used for constructing HLA-DRB5*01:145N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:145N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:146 Protein Expression Plasmid Vector	PHLAP925413215	Plasmid vector containing HLA-DRB5*01:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:146 protein. This plasmid can be used for constructing HLA-DRB5*01:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:147 Protein Expression Plasmid Vector	PHLAP925413216	Plasmid vector containing HLA-DRB5*01:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:147 protein. This plasmid can be used for constructing HLA-DRB5*01:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:148 Protein Expression Plasmid Vector	PHLAP925413217	Plasmid vector containing HLA-DRB5*01:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:148 protein. This plasmid can be used for constructing HLA-DRB5*01:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:149 Protein Expression Plasmid Vector	PHLAP925413218	Plasmid vector containing HLA-DRB5*01:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:149 protein. This plasmid can be used for constructing HLA-DRB5*01:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:15 Protein Expression Plasmid Vector	PHLAP92541329	Plasmid vector containing HLA-DRB5*01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:15 protein. This plasmid can be used for constructing HLA-DRB5*01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:150 Protein Expression Plasmid Vector	PHLAP92541330	Plasmid vector containing HLA-DRB5*01:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:150 protein. This plasmid can be used for constructing HLA-DRB5*01:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:151 Protein Expression Plasmid Vector	PHLAP92541331	Plasmid vector containing HLA-DRB5*01:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:151 protein. This plasmid can be used for constructing HLA-DRB5*01:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:152 Protein Expression Plasmid Vector	PHLAP92541332	Plasmid vector containing HLA-DRB5*01:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:152 protein. This plasmid can be used for constructing HLA-DRB5*01:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:153 Protein Expression Plasmid Vector	PHLAP92541333	Plasmid vector containing HLA-DRB5*01:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:153 protein. This plasmid can be used for constructing HLA-DRB5*01:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:154 Protein Expression Plasmid Vector	PHLAP92541334	Plasmid vector containing HLA-DRB5*01:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:154 protein. This plasmid can be used for constructing HLA-DRB5*01:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:155 Protein Expression Plasmid Vector	PHLAP92541335	Plasmid vector containing HLA-DRB5*01:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:155 protein. This plasmid can be used for constructing HLA-DRB5*01:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:156 Protein Expression Plasmid Vector	PHLAP92541336	Plasmid vector containing HLA-DRB5*01:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:156 protein. This plasmid can be used for constructing HLA-DRB5*01:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:157:01:01 Protein Expression Plasmid Vector	PHLAP92541337	Plasmid vector containing HLA-DRB5*01:157:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:157:01:01 protein. This plasmid can be used for constructing HLA-DRB5*01:157:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:157:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:157:01:02 Protein Expression Plasmid Vector	PHLAP92541338	Plasmid vector containing HLA-DRB5*01:157:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:157:01:02 protein. This plasmid can be used for constructing HLA-DRB5*01:157:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:157:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:16 Protein Expression Plasmid Vector	PHLAP92541339	Plasmid vector containing HLA-DRB5*01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:16 protein. This plasmid can be used for constructing HLA-DRB5*01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:17 Protein Expression Plasmid Vector	PHLAP92541340	Plasmid vector containing HLA-DRB5*01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:17 protein. This plasmid can be used for constructing HLA-DRB5*01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:18 Protein Expression Plasmid Vector	PHLAP92541341	Plasmid vector containing HLA-DRB5*01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:18 protein. This plasmid can be used for constructing HLA-DRB5*01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:19 Protein Expression Plasmid Vector	PHLAP92541342	Plasmid vector containing HLA-DRB5*01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:19 protein. This plasmid can be used for constructing HLA-DRB5*01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:20 Protein Expression Plasmid Vector	PHLAP925413413	Plasmid vector containing HLA-DRB5*01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:20 protein. This plasmid can be used for constructing HLA-DRB5*01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:21 Protein Expression Plasmid Vector	PHLAP925413414	Plasmid vector containing HLA-DRB5*01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:21 protein. This plasmid can be used for constructing HLA-DRB5*01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:22:01 Protein Expression Plasmid Vector	PHLAP925413415	Plasmid vector containing HLA-DRB5*01:22:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:22:01 protein. This plasmid can be used for constructing HLA-DRB5*01:22:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:22:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:22:02 Protein Expression Plasmid Vector	PHLAP925413416	Plasmid vector containing HLA-DRB5*01:22:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:22:02 protein. This plasmid can be used for constructing HLA-DRB5*01:22:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:22:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:23 Protein Expression Plasmid Vector	PHLAP925413417	Plasmid vector containing HLA-DRB5*01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:23 protein. This plasmid can be used for constructing HLA-DRB5*01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:24 Protein Expression Plasmid Vector	PHLAP925413418	Plasmid vector containing HLA-DRB5*01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:24 protein. This plasmid can be used for constructing HLA-DRB5*01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:25 Protein Expression Plasmid Vector	PHLAP925413419	Plasmid vector containing HLA-DRB5*01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:25 protein. This plasmid can be used for constructing HLA-DRB5*01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:26 Protein Expression Plasmid Vector	PHLAP925413510	Plasmid vector containing HLA-DRB5*01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:26 protein. This plasmid can be used for constructing HLA-DRB5*01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:27N Protein Expression Plasmid Vector	PHLAP92541351	Plasmid vector containing HLA-DRB5*01:27N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:27N protein. This plasmid can be used for constructing HLA-DRB5*01:27N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:27N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:28 Protein Expression Plasmid Vector	PHLAP92541352	Plasmid vector containing HLA-DRB5*01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:28 protein. This plasmid can be used for constructing HLA-DRB5*01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:29 Protein Expression Plasmid Vector	PHLAP92541353	Plasmid vector containing HLA-DRB5*01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:29 protein. This plasmid can be used for constructing HLA-DRB5*01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:30 Protein Expression Plasmid Vector	PHLAP92541354	Plasmid vector containing HLA-DRB5*01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:30 protein. This plasmid can be used for constructing HLA-DRB5*01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:31 Protein Expression Plasmid Vector	PHLAP92541355	Plasmid vector containing HLA-DRB5*01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:31 protein. This plasmid can be used for constructing HLA-DRB5*01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:32 Protein Expression Plasmid Vector	PHLAP92541356	Plasmid vector containing HLA-DRB5*01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:32 protein. This plasmid can be used for constructing HLA-DRB5*01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:33 Protein Expression Plasmid Vector	PHLAP92541357	Plasmid vector containing HLA-DRB5*01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:33 protein. This plasmid can be used for constructing HLA-DRB5*01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:34 Protein Expression Plasmid Vector	PHLAP92541358	Plasmid vector containing HLA-DRB5*01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:34 protein. This plasmid can be used for constructing HLA-DRB5*01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB5*01:35 Protein Expression Plasmid Vector	PHLAP92541359	Plasmid vector containing HLA-DRB5*01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:35 protein. This plasmid can be used for constructing HLA-DRB5*01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*01:36 Protein Expression Plasmid Vector	PHLAP92541360	Plasmid vector containing HLA-DRB5*01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:36 protein. This plasmid can be used for constructing HLA-DRB5*01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*01:37 Protein Expression Plasmid Vector	PHLAP92541361	Plasmid vector containing HLA-DRB5*01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:37 protein. This plasmid can be used for constructing HLA-DRB5*01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*01:38 Protein Expression Plasmid Vector	PHLAP92541362	Plasmid vector containing HLA-DRB5*01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:38 protein. This plasmid can be used for constructing HLA-DRB5*01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*01:39 Protein Expression Plasmid Vector	PHLAP92541363	Plasmid vector containing HLA-DRB5*01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:39 protein. This plasmid can be used for constructing HLA-DRB5*01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*01:40 Protein Expression Plasmid Vector	PHLAP92541364	Plasmid vector containing HLA-DRB5*01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:40 protein. This plasmid can be used for constructing HLA-DRB5*01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*01:41 Protein Expression Plasmid Vector	PHLAP92541365	Plasmid vector containing HLA-DRB5*01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:41 protein. This plasmid can be used for constructing HLA-DRB5*01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*01:42 Protein Expression Plasmid Vector	PHLAP92541366	Plasmid vector containing HLA-DRB5*01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:42 protein. This plasmid can be used for constructing HLA-DRB5*01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB5*01:43 Protein Expression Plasmid Vector	PHLAP92541367	Plasmid vector containing HLA-DRB5*01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:43 protein. This plasmid can be used for constructing HLA-DRB5*01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:44 Protein Expression Plasmid Vector	PHLAP92541368	Plasmid vector containing HLA-DRB5*01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:44 protein. This plasmid can be used for constructing HLA-DRB5*01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:45 Protein Expression Plasmid Vector	PHLAP92541369	Plasmid vector containing HLA-DRB5*01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:45 protein. This plasmid can be used for constructing HLA-DRB5*01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:46 Protein Expression Plasmid Vector	PHLAP92541370	Plasmid vector containing HLA-DRB5*01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:46 protein. This plasmid can be used for constructing HLA-DRB5*01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:47 Protein Expression Plasmid Vector	PHLAP92541371	Plasmid vector containing HLA-DRB5*01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:47 protein. This plasmid can be used for constructing HLA-DRB5*01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:48N Protein Expression Plasmid Vector	PHLAP92541372	Plasmid vector containing HLA-DRB5*01:48N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:48N protein. This plasmid can be used for constructing HLA-DRB5*01:48N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:48N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:49N Protein Expression Plasmid Vector	PHLAP92541373	Plasmid vector containing HLA-DRB5*01:49N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:49N protein. This plasmid can be used for constructing HLA-DRB5*01:49N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:49N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:50 Protein Expression Plasmid Vector	PHLAP92541374	Plasmid vector containing HLA-DRB5*01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:50 protein. This plasmid can be used for constructing HLA-DRB5*01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:51 Protein Expression Plasmid Vector	PHLAP92541375	Plasmid vector containing HLA-DRB5*01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:51 protein. This plasmid can be used for constructing HLA-DRB5*01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:52N Protein Expression Plasmid Vector	PHLAP92541376	Plasmid vector containing HLA-DRB5*01:52N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:52N protein. This plasmid can be used for constructing HLA-DRB5*01:52N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:52N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:53N Protein Expression Plasmid Vector	PHLAP92541377	Plasmid vector containing HLA-DRB5*01:53N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:53N protein. This plasmid can be used for constructing HLA-DRB5*01:53N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:53N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:54 Protein Expression Plasmid Vector	PHLAP92541378	Plasmid vector containing HLA-DRB5*01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:54 protein. This plasmid can be used for constructing HLA-DRB5*01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:55 Protein Expression Plasmid Vector	PHLAP92541379	Plasmid vector containing HLA-DRB5*01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:55 protein. This plasmid can be used for constructing HLA-DRB5*01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:56 Protein Expression Plasmid Vector	PHLAP925413800	Plasmid vector containing HLA-DRB5*01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:56 protein. This plasmid can be used for constructing HLA-DRB5*01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:57 Protein Expression Plasmid Vector	PHLAP925413801	Plasmid vector containing HLA-DRB5*01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:57 protein. This plasmid can be used for constructing HLA-DRB5*01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:58N Protein Expression Plasmid Vector	PHLAP92541382	Plasmid vector containing HLA-DRB5*01:58N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:58N protein. This plasmid can be used for constructing HLA-DRB5*01:58N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:58N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:59 Protein Expression Plasmid Vector	PHLAP92541383	Plasmid vector containing HLA-DRB5*01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:59 protein. This plasmid can be used for constructing HLA-DRB5*01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:60 Protein Expression Plasmid Vector	PHLAP92541384	Plasmid vector containing HLA-DRB5*01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:60 protein. This plasmid can be used for constructing HLA-DRB5*01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:61 Protein Expression Plasmid Vector	PHLAP92541385	Plasmid vector containing HLA-DRB5*01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:61 protein. This plasmid can be used for constructing HLA-DRB5*01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:62 Protein Expression Plasmid Vector	PHLAP92541386	Plasmid vector containing HLA-DRB5*01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:62 protein. This plasmid can be used for constructing HLA-DRB5*01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:63:01 Protein Expression Plasmid Vector	PHLAP92541387	Plasmid vector containing HLA-DRB5*01:63:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:63:01 protein. This plasmid can be used for constructing HLA-DRB5*01:63:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:63:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:63:02 Protein Expression Plasmid Vector	PHLAP92541388	Plasmid vector containing HLA-DRB5*01:63:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:63:02 protein. This plasmid can be used for constructing HLA-DRB5*01:63:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:63:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:64 Protein Expression Plasmid Vector	PHLAP92541389	Plasmid vector containing HLA-DRB5*01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:64 protein. This plasmid can be used for constructing HLA-DRB5*01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:65 Protein Expression Plasmid Vector	PHLAP92541390	Plasmid vector containing HLA-DRB5*01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:65 protein. This plasmid can be used for constructing HLA-DRB5*01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:66 Protein Expression Plasmid Vector	PHLAP92541391	Plasmid vector containing HLA-DRB5*01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:66 protein. This plasmid can be used for constructing HLA-DRB5*01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:67N Protein Expression Plasmid Vector	PHLAP92541392	Plasmid vector containing HLA-DRB5*01:67N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:67N protein. This plasmid can be used for constructing HLA-DRB5*01:67N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:67N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:68N Protein Expression Plasmid Vector	PHLAP92541393	Plasmid vector containing HLA-DRB5*01:68N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:68N protein. This plasmid can be used for constructing HLA-DRB5*01:68N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:68N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:69 Protein Expression Plasmid Vector	PHLAP92541394	Plasmid vector containing HLA-DRB5*01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:69 protein. This plasmid can be used for constructing HLA-DRB5*01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:70 Protein Expression Plasmid Vector	PHLAP92541395	Plasmid vector containing HLA-DRB5*01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:70 protein. This plasmid can be used for constructing HLA-DRB5*01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:71N Protein Expression Plasmid Vector	PHLAP92541396	Plasmid vector containing HLA-DRB5*01:71N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:71N protein. This plasmid can be used for constructing HLA-DRB5*01:71N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:71N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:72 Protein Expression Plasmid Vector	PHLAP92541397	Plasmid vector containing HLA-DRB5*01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:72 protein. This plasmid can be used for constructing HLA-DRB5*01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:73 Protein Expression Plasmid Vector	PHLAP92541398	Plasmid vector containing HLA-DRB5*01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:73 protein. This plasmid can be used for constructing HLA-DRB5*01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:74 Protein Expression Plasmid Vector	PHLAP92541399	Plasmid vector containing HLA-DRB5*01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:74 protein. This plasmid can be used for constructing HLA-DRB5*01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:75 Protein Expression Plasmid Vector	PHLAP925414000	Plasmid vector containing HLA-DRB5*01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:75 protein. This plasmid can be used for constructing HLA-DRB5*01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:76 Protein Expression Plasmid Vector	PHLAP925414001	Plasmid vector containing HLA-DRB5*01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:76 protein. This plasmid can be used for constructing HLA-DRB5*01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:77 Protein Expression Plasmid Vector	PHLAP925414002	Plasmid vector containing HLA-DRB5*01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:77 protein. This plasmid can be used for constructing HLA-DRB5*01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:78 Protein Expression Plasmid Vector	PHLAP925414003	Plasmid vector containing HLA-DRB5*01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:78 protein. This plasmid can be used for constructing HLA-DRB5*01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB5*01:79Q Protein Expression Plasmid Vector	PHLAP925414044	Plasmid vector containing HLA-DRB5*01:79Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:79Q protein. This plasmid can be used for constructing HLA-DRB5*01:79Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:79Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:80 Protein Expression Plasmid Vector	PHLAP925414045	Plasmid vector containing HLA-DRB5*01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:80 protein. This plasmid can be used for constructing HLA-DRB5*01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:81N Protein Expression Plasmid Vector	PHLAP925414046	Plasmid vector containing HLA-DRB5*01:81N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:81N protein. This plasmid can be used for constructing HLA-DRB5*01:81N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:81N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:82 Protein Expression Plasmid Vector	PHLAP925414047	Plasmid vector containing HLA-DRB5*01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:82 protein. This plasmid can be used for constructing HLA-DRB5*01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:83N Protein Expression Plasmid Vector	PHLAP925414048	Plasmid vector containing HLA-DRB5*01:83N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:83N protein. This plasmid can be used for constructing HLA-DRB5*01:83N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:83N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:84 Protein Expression Plasmid Vector	PHLAP925414049	Plasmid vector containing HLA-DRB5*01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:84 protein. This plasmid can be used for constructing HLA-DRB5*01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*01:85 Protein Expression Plasmid Vector	PHLAP925414110	Plasmid vector containing HLA-DRB5*01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:85 protein. This plasmid can be used for constructing HLA-DRB5*01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB5*01:86 Protein Expression Plasmid Vector	PHLAP925414111	Plasmid vector containing HLA-DRB5*01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:86 protein. This plasmid can be used for constructing HLA-DRB5*01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:87 Protein Expression Plasmid Vector	PHLAP925414112	Plasmid vector containing HLA-DRB5*01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:87 protein. This plasmid can be used for constructing HLA-DRB5*01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:88 Protein Expression Plasmid Vector	PHLAP925414113	Plasmid vector containing HLA-DRB5*01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:88 protein. This plasmid can be used for constructing HLA-DRB5*01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:89 Protein Expression Plasmid Vector	PHLAP925414114	Plasmid vector containing HLA-DRB5*01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:89 protein. This plasmid can be used for constructing HLA-DRB5*01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:90 Protein Expression Plasmid Vector	PHLAP925414115	Plasmid vector containing HLA-DRB5*01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:90 protein. This plasmid can be used for constructing HLA-DRB5*01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:91 Protein Expression Plasmid Vector	PHLAP925414116	Plasmid vector containing HLA-DRB5*01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:91 protein. This plasmid can be used for constructing HLA-DRB5*01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:92N Protein Expression Plasmid Vector	PHLAP925414117	Plasmid vector containing HLA-DRB5*01:92N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:92N protein. This plasmid can be used for constructing HLA-DRB5*01:92N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:92N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:93 Protein Expression Plasmid Vector	PHLAP925414118	Plasmid vector containing HLA-DRB5*01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:93 protein. This plasmid can be used for constructing HLA-DRB5*01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*01:94 Protein Expression Plasmid Vector	PHLAP92541419	Plasmid vector containing HLA-DRB5*01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:94 protein. This plasmid can be used for constructing HLA-DRB5*01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:95 Protein Expression Plasmid Vector	PHLAP92541420	Plasmid vector containing HLA-DRB5*01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:95 protein. This plasmid can be used for constructing HLA-DRB5*01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:96 Protein Expression Plasmid Vector	PHLAP92541421	Plasmid vector containing HLA-DRB5*01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:96 protein. This plasmid can be used for constructing HLA-DRB5*01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:97 Protein Expression Plasmid Vector	PHLAP92541422	Plasmid vector containing HLA-DRB5*01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:97 protein. This plasmid can be used for constructing HLA-DRB5*01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:98 Protein Expression Plasmid Vector	PHLAP92541423	Plasmid vector containing HLA-DRB5*01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:98 protein. This plasmid can be used for constructing HLA-DRB5*01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*01:99 Protein Expression Plasmid Vector	PHLAP92541424	Plasmid vector containing HLA-DRB5*01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*01:99 protein. This plasmid can be used for constructing HLA-DRB5*01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:02:01:01 Protein Expression Plasmid Vector	PHLAP92541425	Plasmid vector containing HLA-DRB5*02:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:02:01:01 protein. This plasmid can be used for constructing HLA-DRB5*02:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:02:01:02 Protein Expression Plasmid Vector	PHLAP92541426	Plasmid vector containing HLA-DRB5*02:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:02:01:02 protein. This plasmid can be used for constructing HLA-DRB5*02:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*02:02:02 Protein Expression Plasmid Vector	PHLAP92541427	Plasmid vector containing HLA-DRB5*02:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:02:02 protein. This plasmid can be used for constructing HLA-DRB5*02:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:02:03 Protein Expression Plasmid Vector	PHLAP92541428	Plasmid vector containing HLA-DRB5*02:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:02:03 protein. This plasmid can be used for constructing HLA-DRB5*02:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:02:04 Protein Expression Plasmid Vector	PHLAP92541429	Plasmid vector containing HLA-DRB5*02:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:02:04 protein. This plasmid can be used for constructing HLA-DRB5*02:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:02:05 Protein Expression Plasmid Vector	PHLAP92541430	Plasmid vector containing HLA-DRB5*02:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:02:05 protein. This plasmid can be used for constructing HLA-DRB5*02:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:03 Protein Expression Plasmid Vector	PHLAP92541431	Plasmid vector containing HLA-DRB5*02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:03 protein. This plasmid can be used for constructing HLA-DRB5*02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:04 Protein Expression Plasmid Vector	PHLAP92541432	Plasmid vector containing HLA-DRB5*02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:04 protein. This plasmid can be used for constructing HLA-DRB5*02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:05 Protein Expression Plasmid Vector	PHLAP92541433	Plasmid vector containing HLA-DRB5*02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:05 protein. This plasmid can be used for constructing HLA-DRB5*02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*02:06 Protein Expression Plasmid Vector	PHLAP92541434	Plasmid vector containing HLA-DRB5*02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:06 protein. This plasmid can be used for constructing HLA-DRB5*02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:07 Protein Expression Plasmid Vector	PHLAP92541435	Plasmid vector containing HLA-DRB5*02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:07 protein. This plasmid can be used for constructing HLA-DRB5*02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:08 Protein Expression Plasmid Vector	PHLAP92541436	Plasmid vector containing HLA-DRB5*02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:08 protein. This plasmid can be used for constructing HLA-DRB5*02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:09 Protein Expression Plasmid Vector	PHLAP92541437	Plasmid vector containing HLA-DRB5*02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:09 protein. This plasmid can be used for constructing HLA-DRB5*02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:10 Protein Expression Plasmid Vector	PHLAP92541438	Plasmid vector containing HLA-DRB5*02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:10 protein. This plasmid can be used for constructing HLA-DRB5*02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:11 Protein Expression Plasmid Vector	PHLAP92541439	Plasmid vector containing HLA-DRB5*02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:11 protein. This plasmid can be used for constructing HLA-DRB5*02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:12 Protein Expression Plasmid Vector	PHLAP92541440	Plasmid vector containing HLA-DRB5*02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:12 protein. This plasmid can be used for constructing HLA-DRB5*02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:13 Protein Expression Plasmid Vector	PHLAP92541441	Plasmid vector containing HLA-DRB5*02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:13 protein. This plasmid can be used for constructing HLA-DRB5*02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB5*02:14 Protein Expression Plasmid Vector	PHLAP925414412	Plasmid vector containing HLA-DRB5*02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:14 protein. This plasmid can be used for constructing HLA-DRB5*02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:15 Protein Expression Plasmid Vector	PHLAP925414413	Plasmid vector containing HLA-DRB5*02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:15 protein. This plasmid can be used for constructing HLA-DRB5*02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:16 Protein Expression Plasmid Vector	PHLAP925414414	Plasmid vector containing HLA-DRB5*02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:16 protein. This plasmid can be used for constructing HLA-DRB5*02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:17 Protein Expression Plasmid Vector	PHLAP925414415	Plasmid vector containing HLA-DRB5*02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:17 protein. This plasmid can be used for constructing HLA-DRB5*02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:18 Protein Expression Plasmid Vector	PHLAP925414416	Plasmid vector containing HLA-DRB5*02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:18 protein. This plasmid can be used for constructing HLA-DRB5*02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:19N Protein Expression Plasmid Vector	PHLAP925414417	Plasmid vector containing HLA-DRB5*02:19N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:19N protein. This plasmid can be used for constructing HLA-DRB5*02:19N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:19N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:20 Protein Expression Plasmid Vector	PHLAP925414418	Plasmid vector containing HLA-DRB5*02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:20 protein. This plasmid can be used for constructing HLA-DRB5*02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:21:01 Protein Expression Plasmid Vector	PHLAP925414419	Plasmid vector containing HLA-DRB5*02:21:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:21:01 protein. This plasmid can be used for constructing HLA-DRB5*02:21:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:21:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*02:21:02 Protein Expression Plasmid Vector	PHLAP925414501	Plasmid vector containing HLA-DRB5*02:21:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:21:02 protein. This plasmid can be used for constructing HLA-DRB5*02:21:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:21:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:22 Protein Expression Plasmid Vector	PHLAP925414511	Plasmid vector containing HLA-DRB5*02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:22 protein. This plasmid can be used for constructing HLA-DRB5*02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*02:23 Protein Expression Plasmid Vector	PHLAP925414512	Plasmid vector containing HLA-DRB5*02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:23 protein. This plasmid can be used for constructing HLA-DRB5*02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*02:24 Protein Expression Plasmid Vector	PHLAP925414513	Plasmid vector containing HLA-DRB5*02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:24 protein. This plasmid can be used for constructing HLA-DRB5*02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-DRB5*02:25N Protein Expression Plasmid Vector	PHLAP925414514	Plasmid vector containing HLA-DRB5*02:25N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:25N protein. This plasmid can be used for constructing HLA-DRB5*02:25N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:25N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:26N Protein Expression Plasmid Vector	PHLAP925414515	Plasmid vector containing HLA-DRB5*02:26N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:26N protein. This plasmid can be used for constructing HLA-DRB5*02:26N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:26N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:27 Protein Expression Plasmid Vector	PHLAP925414516	Plasmid vector containing HLA-DRB5*02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:27 protein. This plasmid can be used for constructing HLA-DRB5*02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-DRB5*02:28 Protein Expression Plasmid Vector	PHLAP92541457	Plasmid vector containing HLA-DRB5*02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:28 protein. This plasmid can be used for constructing HLA-DRB5*02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:29 Protein Expression Plasmid Vector	PHLAP92541458	Plasmid vector containing HLA-DRB5*02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:29 protein. This plasmid can be used for constructing HLA-DRB5*02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:30 Protein Expression Plasmid Vector	PHLAP92541459	Plasmid vector containing HLA-DRB5*02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:30 protein. This plasmid can be used for constructing HLA-DRB5*02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:31 Protein Expression Plasmid Vector	PHLAP92541460	Plasmid vector containing HLA-DRB5*02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:31 protein. This plasmid can be used for constructing HLA-DRB5*02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:32 Protein Expression Plasmid Vector	PHLAP92541461	Plasmid vector containing HLA-DRB5*02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:32 protein. This plasmid can be used for constructing HLA-DRB5*02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:33 Protein Expression Plasmid Vector	PHLAP92541462	Plasmid vector containing HLA-DRB5*02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:33 protein. This plasmid can be used for constructing HLA-DRB5*02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:34 Protein Expression Plasmid Vector	PHLAP92541463	Plasmid vector containing HLA-DRB5*02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:34 protein. This plasmid can be used for constructing HLA-DRB5*02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry
HLA-DRB5*02:35 Protein Expression Plasmid Vector	PHLAP92541464	Plasmid vector containing HLA-DRB5*02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:35 protein. This plasmid can be used for constructing HLA-DRB5*02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis	Inquiry

HLA-DRB5*02:36 Protein Expression Plasmid Vector	PHLAP92541465	Plasmid vector containing HLA-DRB5*02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:36 protein. This plasmid can be used for constructing HLA-DRB5*02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:37 Protein Expression Plasmid Vector	PHLAP92541466	Plasmid vector containing HLA-DRB5*02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:37 protein. This plasmid can be used for constructing HLA-DRB5*02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:38 Protein Expression Plasmid Vector	PHLAP92541467	Plasmid vector containing HLA-DRB5*02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:38 protein. This plasmid can be used for constructing HLA-DRB5*02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:39 Protein Expression Plasmid Vector	PHLAP92541468	Plasmid vector containing HLA-DRB5*02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:39 protein. This plasmid can be used for constructing HLA-DRB5*02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:40N Protein Expression Plasmid Vector	PHLAP92541469	Plasmid vector containing HLA-DRB5*02:40N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:40N protein. This plasmid can be used for constructing HLA-DRB5*02:40N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:40N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:41 Protein Expression Plasmid Vector	PHLAP92541470	Plasmid vector containing HLA-DRB5*02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:41 protein. This plasmid can be used for constructing HLA-DRB5*02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:42 Protein Expression Plasmid Vector	PHLAP92541471	Plasmid vector containing HLA-DRB5*02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:42 protein. This plasmid can be used for constructing HLA-DRB5*02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*02:43N Protein Expression Plasmid Vector	PHLAP92541472	Plasmid vector containing HLA-DRB5*02:43N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:43N protein. This plasmid can be used for constructing HLA-DRB5*02:43N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:43N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB5*02:44 Protein Expression Plasmid Vector	PHLAP925414713	Plasmid vector containing HLA-DRB5*02:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*02:44 protein. This plasmid can be used for constructing HLA-DRB5*02:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*02:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB5*0201 Protein Expression Plasmid Vector	PHLAP925414714	Plasmid vector containing HLA-DRB5*0201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB5*0201 protein. This plasmid can be used for constructing HLA-DRB5*0201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB5*0201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB6*01:01 Protein Expression Plasmid Vector	PHLAP925414715	Plasmid vector containing HLA-DRB6*01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB6*01:01 protein. This plasmid can be used for constructing HLA-DRB6*01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB6*01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB6*02:01:01:01 Protein Expression Plasmid Vector	PHLAP925414716	Plasmid vector containing HLA-DRB6*02:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB6*02:01:01:01 protein. This plasmid can be used for constructing HLA-DRB6*02:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB6*02:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB6*02:01:01:02 Protein Expression Plasmid Vector	PHLAP925414717	Plasmid vector containing HLA-DRB6*02:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB6*02:01:01:02 protein. This plasmid can be used for constructing HLA-DRB6*02:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB6*02:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB6*02:02 Protein Expression Plasmid Vector	PHLAP925414718	Plasmid vector containing HLA-DRB6*02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB6*02:02 protein. This plasmid can be used for constructing HLA-DRB6*02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB6*02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB7*01:01:01 Protein Expression Plasmid Vector	PHLAP925414719	Plasmid vector containing HLA-DRB7*01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB7*01:01:01 protein. This plasmid can be used for constructing HLA-DRB7*01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB7*01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB7*01:01:02 Protein Expression Plasmid Vector	PHLAP925414810	Plasmid vector containing HLA-DRB7*01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB7*01:01:02 protein. This plasmid can be used for constructing HLA-DRB7*01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB7*01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB8*01:01 Protein Expression Plasmid Vector	PHLAP925414811	Plasmid vector containing HLA-DRB8*01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB8*01:01 protein. This plasmid can be used for constructing HLA-DRB8*01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB8*01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB9*01:01:01:01 Protein Expression Plasmid Vector	PHLAP925414812	Plasmid vector containing HLA-DRB9*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB9*01:01:01:01 protein. This plasmid can be used for constructing HLA-DRB9*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB9*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB9*01:01:01:02 Protein Expression Plasmid Vector	PHLAP925414813	Plasmid vector containing HLA-DRB9*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB9*01:01:01:02 protein. This plasmid can be used for constructing HLA-DRB9*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB9*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB9*01:01:01:03 Protein Expression Plasmid Vector	PHLAP925414814	Plasmid vector containing HLA-DRB9*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB9*01:01:01:03 protein. This plasmid can be used for constructing HLA-DRB9*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB9*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB9*01:01:02 Protein Expression Plasmid Vector	PHLAP925414815	Plasmid vector containing HLA-DRB9*01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB9*01:01:02 protein. This plasmid can be used for constructing HLA-DRB9*01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB9*01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DRB9*01:02:01:01 Protein Expression Plasmid Vector	PHLAP925414816	Plasmid vector containing HLA-DRB9*01:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB9*01:02:01:01 protein. This plasmid can be used for constructing HLA-DRB9*01:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB9*01:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DRB9*01:02:01:02 Protein Expression Plasmid Vector	PHLAP92541487	Plasmid vector containing HLA-DRB9*01:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DRB9*01:02:01:02 protein. This plasmid can be used for constructing HLA-DRB9*01:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DRB9*01:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92541488	Plasmid vector containing HLA-E*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:01 protein. This plasmid can be used for constructing HLA-E*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92541489	Plasmid vector containing HLA-E*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:02 protein. This plasmid can be used for constructing HLA-E*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92541490	Plasmid vector containing HLA-E*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:03 protein. This plasmid can be used for constructing HLA-E*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92541491	Plasmid vector containing HLA-E*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:04 protein. This plasmid can be used for constructing HLA-E*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92541492	Plasmid vector containing HLA-E*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:05 protein. This plasmid can be used for constructing HLA-E*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:06 Protein Expression Plasmid Vector	PHLAP92541493	Plasmid vector containing HLA-E*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:06 protein. This plasmid can be used for constructing HLA-E*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:01:07 Protein Expression Plasmid Vector	PHLAP92541494	Plasmid vector containing HLA-E*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:07 protein. This plasmid can be used for constructing HLA-E*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:08 Protein Expression Plasmid Vector	PHLAP92541495	Plasmid vector containing HLA-E*01:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:08 protein. This plasmid can be used for constructing HLA-E*01:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:09 Protein Expression Plasmid Vector	PHLAP92541496	Plasmid vector containing HLA-E*01:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:09 protein. This plasmid can be used for constructing HLA-E*01:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:10 Protein Expression Plasmid Vector	PHLAP92541497	Plasmid vector containing HLA-E*01:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:10 protein. This plasmid can be used for constructing HLA-E*01:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:11 Protein Expression Plasmid Vector	PHLAP92541498	Plasmid vector containing HLA-E*01:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:11 protein. This plasmid can be used for constructing HLA-E*01:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:12 Protein Expression Plasmid Vector	PHLAP92541499	Plasmid vector containing HLA-E*01:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:12 protein. This plasmid can be used for constructing HLA-E*01:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:13 Protein Expression Plasmid Vector	PHLAP925415000	Plasmid vector containing HLA-E*01:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:13 protein. This plasmid can be used for constructing HLA-E*01:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:01:14 Protein Expression Plasmid Vector	PHLAP92541501	Plasmid vector containing HLA-E*01:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:14 protein. This plasmid can be used for constructing HLA-E*01:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:15 Protein Expression Plasmid Vector	PHLAP92541502	Plasmid vector containing HLA-E*01:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:15 protein. This plasmid can be used for constructing HLA-E*01:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:16 Protein Expression Plasmid Vector	PHLAP92541503	Plasmid vector containing HLA-E*01:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:16 protein. This plasmid can be used for constructing HLA-E*01:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:17 Protein Expression Plasmid Vector	PHLAP92541504	Plasmid vector containing HLA-E*01:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:17 protein. This plasmid can be used for constructing HLA-E*01:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:18 Protein Expression Plasmid Vector	PHLAP92541505	Plasmid vector containing HLA-E*01:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:18 protein. This plasmid can be used for constructing HLA-E*01:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:19 Protein Expression Plasmid Vector	PHLAP92541506	Plasmid vector containing HLA-E*01:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:19 protein. This plasmid can be used for constructing HLA-E*01:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:20 Protein Expression Plasmid Vector	PHLAP92541507	Plasmid vector containing HLA-E*01:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:20 protein. This plasmid can be used for constructing HLA-E*01:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:01:21 Protein Expression Plasmid Vector	PHLAP92541508	Plasmid vector containing HLA-E*01:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:21 protein. This plasmid can be used for constructing HLA-E*01:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:22 Protein Expression Plasmid Vector	PHLAP92541509	Plasmid vector containing HLA-E*01:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:22 protein. This plasmid can be used for constructing HLA-E*01:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:23 Protein Expression Plasmid Vector	PHLAP925415110	Plasmid vector containing HLA-E*01:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:23 protein. This plasmid can be used for constructing HLA-E*01:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:24 Protein Expression Plasmid Vector	PHLAP925415111	Plasmid vector containing HLA-E*01:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:24 protein. This plasmid can be used for constructing HLA-E*01:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:25 Protein Expression Plasmid Vector	PHLAP925415112	Plasmid vector containing HLA-E*01:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:25 protein. This plasmid can be used for constructing HLA-E*01:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:26 Protein Expression Plasmid Vector	PHLAP925415113	Plasmid vector containing HLA-E*01:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:26 protein. This plasmid can be used for constructing HLA-E*01:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:27 Protein Expression Plasmid Vector	PHLAP925415114	Plasmid vector containing HLA-E*01:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:27 protein. This plasmid can be used for constructing HLA-E*01:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:01:28 Protein Expression Plasmid Vector	PHLAP92541515	Plasmid vector containing HLA-E*01:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:28 protein. This plasmid can be used for constructing HLA-E*01:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:29 Protein Expression Plasmid Vector	PHLAP92541516	Plasmid vector containing HLA-E*01:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:29 protein. This plasmid can be used for constructing HLA-E*01:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:30 Protein Expression Plasmid Vector	PHLAP92541517	Plasmid vector containing HLA-E*01:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:30 protein. This plasmid can be used for constructing HLA-E*01:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:31 Protein Expression Plasmid Vector	PHLAP92541518	Plasmid vector containing HLA-E*01:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:31 protein. This plasmid can be used for constructing HLA-E*01:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:32 Protein Expression Plasmid Vector	PHLAP92541519	Plasmid vector containing HLA-E*01:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:32 protein. This plasmid can be used for constructing HLA-E*01:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:33 Protein Expression Plasmid Vector	PHLAP92541520	Plasmid vector containing HLA-E*01:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:33 protein. This plasmid can be used for constructing HLA-E*01:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:34 Protein Expression Plasmid Vector	PHLAP92541521	Plasmid vector containing HLA-E*01:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:34 protein. This plasmid can be used for constructing HLA-E*01:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:01:35 Protein Expression Plasmid Vector	PHLAP92541522	Plasmid vector containing HLA-E*01:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:35 protein. This plasmid can be used for constructing HLA-E*01:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:36 Protein Expression Plasmid Vector	PHLAP92541523	Plasmid vector containing HLA-E*01:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:36 protein. This plasmid can be used for constructing HLA-E*01:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:37 Protein Expression Plasmid Vector	PHLAP92541524	Plasmid vector containing HLA-E*01:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:37 protein. This plasmid can be used for constructing HLA-E*01:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:38 Protein Expression Plasmid Vector	PHLAP92541525	Plasmid vector containing HLA-E*01:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:38 protein. This plasmid can be used for constructing HLA-E*01:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:39 Protein Expression Plasmid Vector	PHLAP92541526	Plasmid vector containing HLA-E*01:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:39 protein. This plasmid can be used for constructing HLA-E*01:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:40 Protein Expression Plasmid Vector	PHLAP92541527	Plasmid vector containing HLA-E*01:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:40 protein. This plasmid can be used for constructing HLA-E*01:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:41 Protein Expression Plasmid Vector	PHLAP92541528	Plasmid vector containing HLA-E*01:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:41 protein. This plasmid can be used for constructing HLA-E*01:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:01:42 Protein Expression Plasmid Vector	PHLAP92541529	Plasmid vector containing HLA-E*01:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:42 protein. This plasmid can be used for constructing HLA-E*01:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:43 Protein Expression Plasmid Vector	PHLAP92541530	Plasmid vector containing HLA-E*01:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:43 protein. This plasmid can be used for constructing HLA-E*01:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:44 Protein Expression Plasmid Vector	PHLAP92541531	Plasmid vector containing HLA-E*01:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:44 protein. This plasmid can be used for constructing HLA-E*01:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:45 Protein Expression Plasmid Vector	PHLAP92541532	Plasmid vector containing HLA-E*01:01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:45 protein. This plasmid can be used for constructing HLA-E*01:01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:46 Protein Expression Plasmid Vector	PHLAP92541533	Plasmid vector containing HLA-E*01:01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:46 protein. This plasmid can be used for constructing HLA-E*01:01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:47 Protein Expression Plasmid Vector	PHLAP92541534	Plasmid vector containing HLA-E*01:01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:47 protein. This plasmid can be used for constructing HLA-E*01:01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:48 Protein Expression Plasmid Vector	PHLAP92541535	Plasmid vector containing HLA-E*01:01:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:48 protein. This plasmid can be used for constructing HLA-E*01:01:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:01:49 Protein Expression Plasmid Vector	PHLAP92541536	Plasmid vector containing HLA-E*01:01:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:49 protein. This plasmid can be used for constructing HLA-E*01:01:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:50 Protein Expression Plasmid Vector	PHLAP92541537	Plasmid vector containing HLA-E*01:01:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:50 protein. This plasmid can be used for constructing HLA-E*01:01:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:51 Protein Expression Plasmid Vector	PHLAP92541538	Plasmid vector containing HLA-E*01:01:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:51 protein. This plasmid can be used for constructing HLA-E*01:01:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:52 Protein Expression Plasmid Vector	PHLAP92541539	Plasmid vector containing HLA-E*01:01:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:52 protein. This plasmid can be used for constructing HLA-E*01:01:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:53 Protein Expression Plasmid Vector	PHLAP92541540	Plasmid vector containing HLA-E*01:01:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:53 protein. This plasmid can be used for constructing HLA-E*01:01:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:54 Protein Expression Plasmid Vector	PHLAP92541541	Plasmid vector containing HLA-E*01:01:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:54 protein. This plasmid can be used for constructing HLA-E*01:01:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:55 Protein Expression Plasmid Vector	PHLAP92541542	Plasmid vector containing HLA-E*01:01:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:55 protein. This plasmid can be used for constructing HLA-E*01:01:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:01:56 Protein Expression Plasmid Vector	PHLAP925415413	Plasmid vector containing HLA-E*01:01:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:56 protein. This plasmid can be used for constructing HLA-E*01:01:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:57 Protein Expression Plasmid Vector	PHLAP925415414	Plasmid vector containing HLA-E*01:01:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:57 protein. This plasmid can be used for constructing HLA-E*01:01:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:58 Protein Expression Plasmid Vector	PHLAP925415415	Plasmid vector containing HLA-E*01:01:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:58 protein. This plasmid can be used for constructing HLA-E*01:01:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:59 Protein Expression Plasmid Vector	PHLAP925415416	Plasmid vector containing HLA-E*01:01:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:59 protein. This plasmid can be used for constructing HLA-E*01:01:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:60 Protein Expression Plasmid Vector	PHLAP925415417	Plasmid vector containing HLA-E*01:01:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:60 protein. This plasmid can be used for constructing HLA-E*01:01:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:61 Protein Expression Plasmid Vector	PHLAP925415418	Plasmid vector containing HLA-E*01:01:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:61 protein. This plasmid can be used for constructing HLA-E*01:01:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:62 Protein Expression Plasmid Vector	PHLAP925415419	Plasmid vector containing HLA-E*01:01:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:62 protein. This plasmid can be used for constructing HLA-E*01:01:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:01:63 Protein Expression Plasmid Vector	PHLAP92541550	Plasmid vector containing HLA-E*01:01:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:63 protein. This plasmid can be used for constructing HLA-E*01:01:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:64 Protein Expression Plasmid Vector	PHLAP92541551	Plasmid vector containing HLA-E*01:01:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:64 protein. This plasmid can be used for constructing HLA-E*01:01:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:01:65 Protein Expression Plasmid Vector	PHLAP92541552	Plasmid vector containing HLA-E*01:01:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:01:65 protein. This plasmid can be used for constructing HLA-E*01:01:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:02 Protein Expression Plasmid Vector	PHLAP92541553	Plasmid vector containing HLA-E*01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:02 protein. This plasmid can be used for constructing HLA-E*01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:03 Protein Expression Plasmid Vector	PHLAP92541554	Plasmid vector containing HLA-E*01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:03 protein. This plasmid can be used for constructing HLA-E*01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:04 Protein Expression Plasmid Vector	PHLAP92541555	Plasmid vector containing HLA-E*01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:04 protein. This plasmid can be used for constructing HLA-E*01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:05 Protein Expression Plasmid Vector	PHLAP92541556	Plasmid vector containing HLA-E*01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:05 protein. This plasmid can be used for constructing HLA-E*01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:06 Protein Expression Plasmid Vector	PHLAP92541557	Plasmid vector containing HLA-E*01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:06 protein. This plasmid can be used for constructing HLA-E*01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:07 Protein Expression Plasmid Vector	PHLAP92541558	Plasmid vector containing HLA-E*01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:07 protein. This plasmid can be used for constructing HLA-E*01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:08 Protein Expression Plasmid Vector	PHLAP92541559	Plasmid vector containing HLA-E*01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:08 protein. This plasmid can be used for constructing HLA-E*01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:09 Protein Expression Plasmid Vector	PHLAP92541560	Plasmid vector containing HLA-E*01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:09 protein. This plasmid can be used for constructing HLA-E*01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:10 Protein Expression Plasmid Vector	PHLAP92541561	Plasmid vector containing HLA-E*01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:10 protein. This plasmid can be used for constructing HLA-E*01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:11 Protein Expression Plasmid Vector	PHLAP92541562	Plasmid vector containing HLA-E*01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:11 protein. This plasmid can be used for constructing HLA-E*01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:12 Protein Expression Plasmid Vector	PHLAP92541563	Plasmid vector containing HLA-E*01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:12 protein. This plasmid can be used for constructing HLA-E*01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:13 Protein Expression Plasmid Vector	PHLAP92541564	Plasmid vector containing HLA-E*01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:13 protein. This plasmid can be used for constructing HLA-E*01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:14 Protein Expression Plasmid Vector	PHLAP92541565	Plasmid vector containing HLA-E*01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:14 protein. This plasmid can be used for constructing HLA-E*01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:15 Protein Expression Plasmid Vector	PHLAP92541566	Plasmid vector containing HLA-E*01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:15 protein. This plasmid can be used for constructing HLA-E*01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:16 Protein Expression Plasmid Vector	PHLAP92541567	Plasmid vector containing HLA-E*01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:16 protein. This plasmid can be used for constructing HLA-E*01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:17 Protein Expression Plasmid Vector	PHLAP92541568	Plasmid vector containing HLA-E*01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:17 protein. This plasmid can be used for constructing HLA-E*01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:18:01 Protein Expression Plasmid Vector	PHLAP92541569	Plasmid vector containing HLA-E*01:01:18:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:18:01 protein. This plasmid can be used for constructing HLA-E*01:01:18:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:18:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:18:02 Protein Expression Plasmid Vector	PHLAP92541570	Plasmid vector containing HLA-E*01:01:18:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:18:02 protein. This plasmid can be used for constructing HLA-E*01:01:18:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:18:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:19 Protein Expression Plasmid Vector	PHLAP92541571	Plasmid vector containing HLA-E*01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:19 protein. This plasmid can be used for constructing HLA-E*01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:20 Protein Expression Plasmid Vector	PHLAP92541572	Plasmid vector containing HLA-E*01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:20 protein. This plasmid can be used for constructing HLA-E*01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:21 Protein Expression Plasmid Vector	PHLAP92541573	Plasmid vector containing HLA-E*01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:21 protein. This plasmid can be used for constructing HLA-E*01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:22 Protein Expression Plasmid Vector	PHLAP92541574	Plasmid vector containing HLA-E*01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:22 protein. This plasmid can be used for constructing HLA-E*01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:23 Protein Expression Plasmid Vector	PHLAP92541575	Plasmid vector containing HLA-E*01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:23 protein. This plasmid can be used for constructing HLA-E*01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:24 Protein Expression Plasmid Vector	PHLAP92541576	Plasmid vector containing HLA-E*01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:24 protein. This plasmid can be used for constructing HLA-E*01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:25 Protein Expression Plasmid Vector	PHLAP92541577	Plasmid vector containing HLA-E*01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:25 protein. This plasmid can be used for constructing HLA-E*01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:26 Protein Expression Plasmid Vector	PHLAP92541578	Plasmid vector containing HLA-E*01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:26 protein. This plasmid can be used for constructing HLA-E*01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:27 Protein Expression Plasmid Vector	PHLAP92541579	Plasmid vector containing HLA-E*01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:27 protein. This plasmid can be used for constructing HLA-E*01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:28 Protein Expression Plasmid Vector	PHLAP925415800	Plasmid vector containing HLA-E*01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:28 protein. This plasmid can be used for constructing HLA-E*01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:29 Protein Expression Plasmid Vector	PHLAP92541581	Plasmid vector containing HLA-E*01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:29 protein. This plasmid can be used for constructing HLA-E*01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:30 Protein Expression Plasmid Vector	PHLAP92541582	Plasmid vector containing HLA-E*01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:30 protein. This plasmid can be used for constructing HLA-E*01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:31 Protein Expression Plasmid Vector	PHLAP92541583	Plasmid vector containing HLA-E*01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:31 protein. This plasmid can be used for constructing HLA-E*01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:32 Protein Expression Plasmid Vector	PHLAP92541584	Plasmid vector containing HLA-E*01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:32 protein. This plasmid can be used for constructing HLA-E*01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:33 Protein Expression Plasmid Vector	PHLAP92541585	Plasmid vector containing HLA-E*01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:33 protein. This plasmid can be used for constructing HLA-E*01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:34 Protein Expression Plasmid Vector	PHLAP92541586	Plasmid vector containing HLA-E*01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:34 protein. This plasmid can be used for constructing HLA-E*01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:35 Protein Expression Plasmid Vector	PHLAP92541587	Plasmid vector containing HLA-E*01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:35 protein. This plasmid can be used for constructing HLA-E*01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:36 Protein Expression Plasmid Vector	PHLAP92541588	Plasmid vector containing HLA-E*01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:36 protein. This plasmid can be used for constructing HLA-E*01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:37 Protein Expression Plasmid Vector	PHLAP92541589	Plasmid vector containing HLA-E*01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:37 protein. This plasmid can be used for constructing HLA-E*01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:38 Protein Expression Plasmid Vector	PHLAP92541590	Plasmid vector containing HLA-E*01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:38 protein. This plasmid can be used for constructing HLA-E*01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:39 Protein Expression Plasmid Vector	PHLAP92541591	Plasmid vector containing HLA-E*01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:39 protein. This plasmid can be used for constructing HLA-E*01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:40 Protein Expression Plasmid Vector	PHLAP92541592	Plasmid vector containing HLA-E*01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:40 protein. This plasmid can be used for constructing HLA-E*01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:41 Protein Expression Plasmid Vector	PHLAP92541593	Plasmid vector containing HLA-E*01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:41 protein. This plasmid can be used for constructing HLA-E*01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:42 Protein Expression Plasmid Vector	PHLAP92541594	Plasmid vector containing HLA-E*01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:42 protein. This plasmid can be used for constructing HLA-E*01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:43 Protein Expression Plasmid Vector	PHLAP92541595	Plasmid vector containing HLA-E*01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:43 protein. This plasmid can be used for constructing HLA-E*01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:44 Protein Expression Plasmid Vector	PHLAP92541596	Plasmid vector containing HLA-E*01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:44 protein. This plasmid can be used for constructing HLA-E*01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:01:45 Protein Expression Plasmid Vector	PHLAP92541597	Plasmid vector containing HLA-E*01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:45 protein. This plasmid can be used for constructing HLA-E*01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:46 Protein Expression Plasmid Vector	PHLAP92541598	Plasmid vector containing HLA-E*01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:46 protein. This plasmid can be used for constructing HLA-E*01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:01:47 Protein Expression Plasmid Vector	PHLAP92541599	Plasmid vector containing HLA-E*01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:01:47 protein. This plasmid can be used for constructing HLA-E*01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:01 Protein Expression Plasmid Vector	PHLAP925416000	Plasmid vector containing HLA-E*01:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:01 protein. This plasmid can be used for constructing HLA-E*01:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:02 Protein Expression Plasmid Vector	PHLAP925416001	Plasmid vector containing HLA-E*01:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:02 protein. This plasmid can be used for constructing HLA-E*01:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:03 Protein Expression Plasmid Vector	PHLAP925416002	Plasmid vector containing HLA-E*01:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:03 protein. This plasmid can be used for constructing HLA-E*01:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:04 Protein Expression Plasmid Vector	PHLAP925416003	Plasmid vector containing HLA-E*01:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:04 protein. This plasmid can be used for constructing HLA-E*01:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:01:05 Protein Expression Plasmid Vector	PHLAP92541604	Plasmid vector containing HLA-E*01:03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:05 protein. This plasmid can be used for constructing HLA-E*01:03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:06 Protein Expression Plasmid Vector	PHLAP92541605	Plasmid vector containing HLA-E*01:03:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:06 protein. This plasmid can be used for constructing HLA-E*01:03:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:07 Protein Expression Plasmid Vector	PHLAP92541606	Plasmid vector containing HLA-E*01:03:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:07 protein. This plasmid can be used for constructing HLA-E*01:03:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:08 Protein Expression Plasmid Vector	PHLAP92541607	Plasmid vector containing HLA-E*01:03:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:08 protein. This plasmid can be used for constructing HLA-E*01:03:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:09 Protein Expression Plasmid Vector	PHLAP92541608	Plasmid vector containing HLA-E*01:03:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:09 protein. This plasmid can be used for constructing HLA-E*01:03:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:10 Protein Expression Plasmid Vector	PHLAP92541609	Plasmid vector containing HLA-E*01:03:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:10 protein. This plasmid can be used for constructing HLA-E*01:03:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:11 Protein Expression Plasmid Vector	PHLAP92541610	Plasmid vector containing HLA-E*01:03:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:11 protein. This plasmid can be used for constructing HLA-E*01:03:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:01:12 Protein Expression Plasmid Vector	PHLAP92541611	Plasmid vector containing HLA-E*01:03:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:12 protein. This plasmid can be used for constructing HLA-E*01:03:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:13 Protein Expression Plasmid Vector	PHLAP92541612	Plasmid vector containing HLA-E*01:03:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:13 protein. This plasmid can be used for constructing HLA-E*01:03:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:14 Protein Expression Plasmid Vector	PHLAP92541613	Plasmid vector containing HLA-E*01:03:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:14 protein. This plasmid can be used for constructing HLA-E*01:03:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:15 Protein Expression Plasmid Vector	PHLAP92541614	Plasmid vector containing HLA-E*01:03:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:15 protein. This plasmid can be used for constructing HLA-E*01:03:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:01:16 Protein Expression Plasmid Vector	PHLAP92541615	Plasmid vector containing HLA-E*01:03:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:01:16 protein. This plasmid can be used for constructing HLA-E*01:03:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:01 Protein Expression Plasmid Vector	PHLAP92541616	Plasmid vector containing HLA-E*01:03:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:01 protein. This plasmid can be used for constructing HLA-E*01:03:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:02 Protein Expression Plasmid Vector	PHLAP92541617	Plasmid vector containing HLA-E*01:03:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:02 protein. This plasmid can be used for constructing HLA-E*01:03:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:02:03 Protein Expression Plasmid Vector	PHLAP92541618	Plasmid vector containing HLA-E*01:03:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:03 protein. This plasmid can be used for constructing HLA-E*01:03:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:04 Protein Expression Plasmid Vector	PHLAP92541619	Plasmid vector containing HLA-E*01:03:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:04 protein. This plasmid can be used for constructing HLA-E*01:03:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:05 Protein Expression Plasmid Vector	PHLAP92541620	Plasmid vector containing HLA-E*01:03:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:05 protein. This plasmid can be used for constructing HLA-E*01:03:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:06 Protein Expression Plasmid Vector	PHLAP92541621	Plasmid vector containing HLA-E*01:03:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:06 protein. This plasmid can be used for constructing HLA-E*01:03:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:07 Protein Expression Plasmid Vector	PHLAP92541622	Plasmid vector containing HLA-E*01:03:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:07 protein. This plasmid can be used for constructing HLA-E*01:03:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:08 Protein Expression Plasmid Vector	PHLAP92541623	Plasmid vector containing HLA-E*01:03:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:08 protein. This plasmid can be used for constructing HLA-E*01:03:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:09 Protein Expression Plasmid Vector	PHLAP92541624	Plasmid vector containing HLA-E*01:03:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:09 protein. This plasmid can be used for constructing HLA-E*01:03:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:02:10 Protein Expression Plasmid Vector	PHLAP92541625	Plasmid vector containing HLA-E*01:03:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:10 protein. This plasmid can be used for constructing HLA-E*01:03:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:11 Protein Expression Plasmid Vector	PHLAP92541626	Plasmid vector containing HLA-E*01:03:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:11 protein. This plasmid can be used for constructing HLA-E*01:03:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:12 Protein Expression Plasmid Vector	PHLAP92541627	Plasmid vector containing HLA-E*01:03:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:12 protein. This plasmid can be used for constructing HLA-E*01:03:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:13 Protein Expression Plasmid Vector	PHLAP92541628	Plasmid vector containing HLA-E*01:03:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:13 protein. This plasmid can be used for constructing HLA-E*01:03:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:14 Protein Expression Plasmid Vector	PHLAP92541629	Plasmid vector containing HLA-E*01:03:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:14 protein. This plasmid can be used for constructing HLA-E*01:03:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:15 Protein Expression Plasmid Vector	PHLAP92541630	Plasmid vector containing HLA-E*01:03:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:15 protein. This plasmid can be used for constructing HLA-E*01:03:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:16 Protein Expression Plasmid Vector	PHLAP92541631	Plasmid vector containing HLA-E*01:03:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:16 protein. This plasmid can be used for constructing HLA-E*01:03:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:02:17 Protein Expression Plasmid Vector	PHLAP92541632	Plasmid vector containing HLA-E*01:03:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:17 protein. This plasmid can be used for constructing HLA-E*01:03:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:18 Protein Expression Plasmid Vector	PHLAP92541633	Plasmid vector containing HLA-E*01:03:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:18 protein. This plasmid can be used for constructing HLA-E*01:03:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:19 Protein Expression Plasmid Vector	PHLAP92541634	Plasmid vector containing HLA-E*01:03:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:19 protein. This plasmid can be used for constructing HLA-E*01:03:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:20 Protein Expression Plasmid Vector	PHLAP92541635	Plasmid vector containing HLA-E*01:03:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:20 protein. This plasmid can be used for constructing HLA-E*01:03:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:21 Protein Expression Plasmid Vector	PHLAP92541636	Plasmid vector containing HLA-E*01:03:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:21 protein. This plasmid can be used for constructing HLA-E*01:03:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:22 Protein Expression Plasmid Vector	PHLAP92541637	Plasmid vector containing HLA-E*01:03:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:22 protein. This plasmid can be used for constructing HLA-E*01:03:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:23 Protein Expression Plasmid Vector	PHLAP92541638	Plasmid vector containing HLA-E*01:03:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:23 protein. This plasmid can be used for constructing HLA-E*01:03:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:02:24 Protein Expression Plasmid Vector	PHLAP92541639	Plasmid vector containing HLA-E*01:03:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:24 protein. This plasmid can be used for constructing HLA-E*01:03:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:25 Protein Expression Plasmid Vector	PHLAP92541640	Plasmid vector containing HLA-E*01:03:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:25 protein. This plasmid can be used for constructing HLA-E*01:03:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:26 Protein Expression Plasmid Vector	PHLAP92541641	Plasmid vector containing HLA-E*01:03:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:26 protein. This plasmid can be used for constructing HLA-E*01:03:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:27 Protein Expression Plasmid Vector	PHLAP92541642	Plasmid vector containing HLA-E*01:03:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:27 protein. This plasmid can be used for constructing HLA-E*01:03:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:28 Protein Expression Plasmid Vector	PHLAP92541643	Plasmid vector containing HLA-E*01:03:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:28 protein. This plasmid can be used for constructing HLA-E*01:03:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:29 Protein Expression Plasmid Vector	PHLAP92541644	Plasmid vector containing HLA-E*01:03:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:29 protein. This plasmid can be used for constructing HLA-E*01:03:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:30 Protein Expression Plasmid Vector	PHLAP92541645	Plasmid vector containing HLA-E*01:03:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:30 protein. This plasmid can be used for constructing HLA-E*01:03:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:02:31 Protein Expression Plasmid Vector	PHLAP92541646	Plasmid vector containing HLA-E*01:03:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:31 protein. This plasmid can be used for constructing HLA-E*01:03:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:32 Protein Expression Plasmid Vector	PHLAP92541647	Plasmid vector containing HLA-E*01:03:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:32 protein. This plasmid can be used for constructing HLA-E*01:03:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:33 Protein Expression Plasmid Vector	PHLAP92541648	Plasmid vector containing HLA-E*01:03:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:33 protein. This plasmid can be used for constructing HLA-E*01:03:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:34 Protein Expression Plasmid Vector	PHLAP92541649	Plasmid vector containing HLA-E*01:03:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:34 protein. This plasmid can be used for constructing HLA-E*01:03:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:35 Protein Expression Plasmid Vector	PHLAP92541650	Plasmid vector containing HLA-E*01:03:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:35 protein. This plasmid can be used for constructing HLA-E*01:03:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:36 Protein Expression Plasmid Vector	PHLAP92541651	Plasmid vector containing HLA-E*01:03:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:36 protein. This plasmid can be used for constructing HLA-E*01:03:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:37 Protein Expression Plasmid Vector	PHLAP92541652	Plasmid vector containing HLA-E*01:03:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:37 protein. This plasmid can be used for constructing HLA-E*01:03:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:02:38 Protein Expression Plasmid Vector	PHLAP92541653	Plasmid vector containing HLA-E*01:03:02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:38 protein. This plasmid can be used for constructing HLA-E*01:03:02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:39 Protein Expression Plasmid Vector	PHLAP92541654	Plasmid vector containing HLA-E*01:03:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:39 protein. This plasmid can be used for constructing HLA-E*01:03:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:40 Protein Expression Plasmid Vector	PHLAP92541655	Plasmid vector containing HLA-E*01:03:02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:40 protein. This plasmid can be used for constructing HLA-E*01:03:02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:41 Protein Expression Plasmid Vector	PHLAP92541656	Plasmid vector containing HLA-E*01:03:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:41 protein. This plasmid can be used for constructing HLA-E*01:03:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:02:42 Protein Expression Plasmid Vector	PHLAP92541657	Plasmid vector containing HLA-E*01:03:02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:02:42 protein. This plasmid can be used for constructing HLA-E*01:03:02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:03 Protein Expression Plasmid Vector	PHLAP92541658	Plasmid vector containing HLA-E*01:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:03 protein. This plasmid can be used for constructing HLA-E*01:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:04 Protein Expression Plasmid Vector	PHLAP92541659	Plasmid vector containing HLA-E*01:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:04 protein. This plasmid can be used for constructing HLA-E*01:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:05:01 Protein Expression Plasmid Vector	PHLAP92541660	Plasmid vector containing HLA-E*01:03:05:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:05:01 protein. This plasmid can be used for constructing HLA-E*01:03:05:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:05:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:05:02 Protein Expression Plasmid Vector	PHLAP92541661	Plasmid vector containing HLA-E*01:03:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:05:02 protein. This plasmid can be used for constructing HLA-E*01:03:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:05:03 Protein Expression Plasmid Vector	PHLAP92541662	Plasmid vector containing HLA-E*01:03:05:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:05:03 protein. This plasmid can be used for constructing HLA-E*01:03:05:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:05:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:05:04 Protein Expression Plasmid Vector	PHLAP92541663	Plasmid vector containing HLA-E*01:03:05:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:05:04 protein. This plasmid can be used for constructing HLA-E*01:03:05:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:05:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:06 Protein Expression Plasmid Vector	PHLAP92541664	Plasmid vector containing HLA-E*01:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:06 protein. This plasmid can be used for constructing HLA-E*01:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:07 Protein Expression Plasmid Vector	PHLAP92541665	Plasmid vector containing HLA-E*01:03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:07 protein. This plasmid can be used for constructing HLA-E*01:03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:08 Protein Expression Plasmid Vector	PHLAP92541666	Plasmid vector containing HLA-E*01:03:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:08 protein. This plasmid can be used for constructing HLA-E*01:03:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:09 Protein Expression Plasmid Vector	PHLAP92541667	Plasmid vector containing HLA-E*01:03:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:09 protein. This plasmid can be used for constructing HLA-E*01:03:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:10 Protein Expression Plasmid Vector	PHLAP92541668	Plasmid vector containing HLA-E*01:03:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:10 protein. This plasmid can be used for constructing HLA-E*01:03:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:11 Protein Expression Plasmid Vector	PHLAP92541669	Plasmid vector containing HLA-E*01:03:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:11 protein. This plasmid can be used for constructing HLA-E*01:03:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:12 Protein Expression Plasmid Vector	PHLAP92541670	Plasmid vector containing HLA-E*01:03:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:12 protein. This plasmid can be used for constructing HLA-E*01:03:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:13 Protein Expression Plasmid Vector	PHLAP92541671	Plasmid vector containing HLA-E*01:03:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:13 protein. This plasmid can be used for constructing HLA-E*01:03:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:14 Protein Expression Plasmid Vector	PHLAP92541672	Plasmid vector containing HLA-E*01:03:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:14 protein. This plasmid can be used for constructing HLA-E*01:03:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:15 Protein Expression Plasmid Vector	PHLAP92541673	Plasmid vector containing HLA-E*01:03:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:15 protein. This plasmid can be used for constructing HLA-E*01:03:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:16 Protein Expression Plasmid Vector	PHLAP92541674	Plasmid vector containing HLA-E*01:03:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:16 protein. This plasmid can be used for constructing HLA-E*01:03:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:17 Protein Expression Plasmid Vector	PHLAP92541675	Plasmid vector containing HLA-E*01:03:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:17 protein. This plasmid can be used for constructing HLA-E*01:03:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:18 Protein Expression Plasmid Vector	PHLAP92541676	Plasmid vector containing HLA-E*01:03:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:18 protein. This plasmid can be used for constructing HLA-E*01:03:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:19 Protein Expression Plasmid Vector	PHLAP92541677	Plasmid vector containing HLA-E*01:03:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:19 protein. This plasmid can be used for constructing HLA-E*01:03:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:20 Protein Expression Plasmid Vector	PHLAP92541678	Plasmid vector containing HLA-E*01:03:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:20 protein. This plasmid can be used for constructing HLA-E*01:03:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:21 Protein Expression Plasmid Vector	PHLAP92541679	Plasmid vector containing HLA-E*01:03:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:21 protein. This plasmid can be used for constructing HLA-E*01:03:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:22 Protein Expression Plasmid Vector	PHLAP92541680	Plasmid vector containing HLA-E*01:03:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:22 protein. This plasmid can be used for constructing HLA-E*01:03:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:23 Protein Expression Plasmid Vector	PHLAP92541681	Plasmid vector containing HLA-E*01:03:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:23 protein. This plasmid can be used for constructing HLA-E*01:03:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:24 Protein Expression Plasmid Vector	PHLAP92541682	Plasmid vector containing HLA-E*01:03:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:24 protein. This plasmid can be used for constructing HLA-E*01:03:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:25 Protein Expression Plasmid Vector	PHLAP92541683	Plasmid vector containing HLA-E*01:03:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:25 protein. This plasmid can be used for constructing HLA-E*01:03:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:26 Protein Expression Plasmid Vector	PHLAP92541684	Plasmid vector containing HLA-E*01:03:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:26 protein. This plasmid can be used for constructing HLA-E*01:03:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:27 Protein Expression Plasmid Vector	PHLAP92541685	Plasmid vector containing HLA-E*01:03:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:27 protein. This plasmid can be used for constructing HLA-E*01:03:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:28 Protein Expression Plasmid Vector	PHLAP92541686	Plasmid vector containing HLA-E*01:03:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:28 protein. This plasmid can be used for constructing HLA-E*01:03:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:29 Protein Expression Plasmid Vector	PHLAP92541687	Plasmid vector containing HLA-E*01:03:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:29 protein. This plasmid can be used for constructing HLA-E*01:03:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:30 Protein Expression Plasmid Vector	PHLAP92541688	Plasmid vector containing HLA-E*01:03:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:30 protein. This plasmid can be used for constructing HLA-E*01:03:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:31 Protein Expression Plasmid Vector	PHLAP92541689	Plasmid vector containing HLA-E*01:03:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:31 protein. This plasmid can be used for constructing HLA-E*01:03:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:32 Protein Expression Plasmid Vector	PHLAP92541690	Plasmid vector containing HLA-E*01:03:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:32 protein. This plasmid can be used for constructing HLA-E*01:03:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:33 Protein Expression Plasmid Vector	PHLAP92541691	Plasmid vector containing HLA-E*01:03:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:33 protein. This plasmid can be used for constructing HLA-E*01:03:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:34 Protein Expression Plasmid Vector	PHLAP92541692	Plasmid vector containing HLA-E*01:03:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:34 protein. This plasmid can be used for constructing HLA-E*01:03:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:35 Protein Expression Plasmid Vector	PHLAP92541693	Plasmid vector containing HLA-E*01:03:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:35 protein. This plasmid can be used for constructing HLA-E*01:03:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:36 Protein Expression Plasmid Vector	PHLAP92541694	Plasmid vector containing HLA-E*01:03:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:36 protein. This plasmid can be used for constructing HLA-E*01:03:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:37 Protein Expression Plasmid Vector	PHLAP92541695	Plasmid vector containing HLA-E*01:03:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:37 protein. This plasmid can be used for constructing HLA-E*01:03:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:38 Protein Expression Plasmid Vector	PHLAP92541696	Plasmid vector containing HLA-E*01:03:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:38 protein. This plasmid can be used for constructing HLA-E*01:03:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:39 Protein Expression Plasmid Vector	PHLAP92541697	Plasmid vector containing HLA-E*01:03:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:39 protein. This plasmid can be used for constructing HLA-E*01:03:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:40 Protein Expression Plasmid Vector	PHLAP92541698	Plasmid vector containing HLA-E*01:03:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:40 protein. This plasmid can be used for constructing HLA-E*01:03:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:03:41 Protein Expression Plasmid Vector	PHLAP92541699	Plasmid vector containing HLA-E*01:03:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:41 protein. This plasmid can be used for constructing HLA-E*01:03:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:03:42 Protein Expression Plasmid Vector	PHLAP92541700	Plasmid vector containing HLA-E*01:03:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:03:42 protein. This plasmid can be used for constructing HLA-E*01:03:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:03:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:04 Protein Expression Plasmid Vector	PHLAP92541701	Plasmid vector containing HLA-E*01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:04 protein. This plasmid can be used for constructing HLA-E*01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:05:01 Protein Expression Plasmid Vector	PHLAP92541702	Plasmid vector containing HLA-E*01:05:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:05:01 protein. This plasmid can be used for constructing HLA-E*01:05:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:05:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:05:02 Protein Expression Plasmid Vector	PHLAP92541703	Plasmid vector containing HLA-E*01:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:05:02 protein. This plasmid can be used for constructing HLA-E*01:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:06:01:01 Protein Expression Plasmid Vector	PHLAP92541704	Plasmid vector containing HLA-E*01:06:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:06:01:01 protein. This plasmid can be used for constructing HLA-E*01:06:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:06:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:06:01:02 Protein Expression Plasmid Vector	PHLAP92541705	Plasmid vector containing HLA-E*01:06:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:06:01:02 protein. This plasmid can be used for constructing HLA-E*01:06:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:06:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:06:02 Protein Expression Plasmid Vector	PHLAP92541706	Plasmid vector containing HLA-E*01:06:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:06:02 protein. This plasmid can be used for constructing HLA-E*01:06:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:06:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:06:03 Protein Expression Plasmid Vector	PHLAP92541707	Plasmid vector containing HLA-E*01:06:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:06:03 protein. This plasmid can be used for constructing HLA-E*01:06:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:06:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:06:04 Protein Expression Plasmid Vector	PHLAP92541708	Plasmid vector containing HLA-E*01:06:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:06:04 protein. This plasmid can be used for constructing HLA-E*01:06:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:06:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:06:05 Protein Expression Plasmid Vector	PHLAP92541709	Plasmid vector containing HLA-E*01:06:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:06:05 protein. This plasmid can be used for constructing HLA-E*01:06:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:06:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:06:06 Protein Expression Plasmid Vector	PHLAP92541710	Plasmid vector containing HLA-E*01:06:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:06:06 protein. This plasmid can be used for constructing HLA-E*01:06:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:06:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:07 Protein Expression Plasmid Vector	PHLAP92541711	Plasmid vector containing HLA-E*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:07 protein. This plasmid can be used for constructing HLA-E*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:08:01N Protein Expression Plasmid Vector	PHLAP92541712	Plasmid vector containing HLA-E*01:08:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:08:01N protein. This plasmid can be used for constructing HLA-E*01:08:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:08:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:08:02N Protein Expression Plasmid Vector	PHLAP92541713	Plasmid vector containing HLA-E*01:08:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:08:02N protein. This plasmid can be used for constructing HLA-E*01:08:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:08:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:09:01:01 Protein Expression Plasmid Vector	PHLAP92541714	Plasmid vector containing HLA-E*01:09:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:09:01:01 protein. This plasmid can be used for constructing HLA-E*01:09:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:09:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:09:01:02 Protein Expression Plasmid Vector	PHLAP92541715	Plasmid vector containing HLA-E*01:09:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:09:01:02 protein. This plasmid can be used for constructing HLA-E*01:09:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:09:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:10:01:01 Protein Expression Plasmid Vector	PHLAP92541716	Plasmid vector containing HLA-E*01:10:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:10:01:01 protein. This plasmid can be used for constructing HLA-E*01:10:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:10:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:10:01:02 Protein Expression Plasmid Vector	PHLAP92541717	Plasmid vector containing HLA-E*01:10:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:10:01:02 protein. This plasmid can be used for constructing HLA-E*01:10:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:10:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:100 Protein Expression Plasmid Vector	PHLAP92541718	Plasmid vector containing HLA-E*01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:100 protein. This plasmid can be used for constructing HLA-E*01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:101 Protein Expression Plasmid Vector	PHLAP92541719	Plasmid vector containing HLA-E*01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:101 protein. This plasmid can be used for constructing HLA-E*01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:102 Protein Expression Plasmid Vector	PHLAP92541720	Plasmid vector containing HLA-E*01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:102 protein. This plasmid can be used for constructing HLA-E*01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:103 Protein Expression Plasmid Vector	PHLAP925417211	Plasmid vector containing HLA-E*01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:103 protein. This plasmid can be used for constructing HLA-E*01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:104 Protein Expression Plasmid Vector	PHLAP925417212	Plasmid vector containing HLA-E*01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:104 protein. This plasmid can be used for constructing HLA-E*01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:105 Protein Expression Plasmid Vector	PHLAP925417213	Plasmid vector containing HLA-E*01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:105 protein. This plasmid can be used for constructing HLA-E*01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:106 Protein Expression Plasmid Vector	PHLAP925417214	Plasmid vector containing HLA-E*01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:106 protein. This plasmid can be used for constructing HLA-E*01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:107 Protein Expression Plasmid Vector	PHLAP925417215	Plasmid vector containing HLA-E*01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:107 protein. This plasmid can be used for constructing HLA-E*01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:108 Protein Expression Plasmid Vector	PHLAP925417216	Plasmid vector containing HLA-E*01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:108 protein. This plasmid can be used for constructing HLA-E*01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:109 Protein Expression Plasmid Vector	PHLAP925417217	Plasmid vector containing HLA-E*01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:109 protein. This plasmid can be used for constructing HLA-E*01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:11 Protein Expression Plasmid Vector	PHLAP925417218	Plasmid vector containing HLA-E*01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:11 protein. This plasmid can be used for constructing HLA-E*01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:110 Protein Expression Plasmid Vector	PHLAP92541729	Plasmid vector containing HLA-E*01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:110 protein. This plasmid can be used for constructing HLA-E*01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:111 Protein Expression Plasmid Vector	PHLAP92541730	Plasmid vector containing HLA-E*01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:111 protein. This plasmid can be used for constructing HLA-E*01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:112 Protein Expression Plasmid Vector	PHLAP92541731	Plasmid vector containing HLA-E*01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:112 protein. This plasmid can be used for constructing HLA-E*01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:113 Protein Expression Plasmid Vector	PHLAP92541732	Plasmid vector containing HLA-E*01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:113 protein. This plasmid can be used for constructing HLA-E*01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:114 Protein Expression Plasmid Vector	PHLAP92541733	Plasmid vector containing HLA-E*01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:114 protein. This plasmid can be used for constructing HLA-E*01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:115 Protein Expression Plasmid Vector	PHLAP92541734	Plasmid vector containing HLA-E*01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:115 protein. This plasmid can be used for constructing HLA-E*01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:116 Protein Expression Plasmid Vector	PHLAP92541735	Plasmid vector containing HLA-E*01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:116 protein. This plasmid can be used for constructing HLA-E*01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:117N Protein Expression Plasmid Vector	PHLAP92541736	Plasmid vector containing HLA-E*01:117N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:117N protein. This plasmid can be used for constructing HLA-E*01:117N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:117N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:118 Protein Expression Plasmid Vector	PHLAP92541737	Plasmid vector containing HLA-E*01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:118 protein. This plasmid can be used for constructing HLA-E*01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:119 Protein Expression Plasmid Vector	PHLAP92541738	Plasmid vector containing HLA-E*01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:119 protein. This plasmid can be used for constructing HLA-E*01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:12:01:01 Protein Expression Plasmid Vector	PHLAP92541739	Plasmid vector containing HLA-E*01:12:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:12:01:01 protein. This plasmid can be used for constructing HLA-E*01:12:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:12:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:12:01:02 Protein Expression Plasmid Vector	PHLAP92541740	Plasmid vector containing HLA-E*01:12:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:12:01:02 protein. This plasmid can be used for constructing HLA-E*01:12:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:12:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:120 Protein Expression Plasmid Vector	PHLAP92541741	Plasmid vector containing HLA-E*01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:120 protein. This plasmid can be used for constructing HLA-E*01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:121 Protein Expression Plasmid Vector	PHLAP92541742	Plasmid vector containing HLA-E*01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:121 protein. This plasmid can be used for constructing HLA-E*01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:122 Protein Expression Plasmid Vector	PHLAP92541743	Plasmid vector containing HLA-E*01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:122 protein. This plasmid can be used for constructing HLA-E*01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:123 Protein Expression Plasmid Vector	PHLAP92541744	Plasmid vector containing HLA-E*01:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:123 protein. This plasmid can be used for constructing HLA-E*01:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:124 Protein Expression Plasmid Vector	PHLAP92541745	Plasmid vector containing HLA-E*01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:124 protein. This plasmid can be used for constructing HLA-E*01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:125 Protein Expression Plasmid Vector	PHLAP92541746	Plasmid vector containing HLA-E*01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:125 protein. This plasmid can be used for constructing HLA-E*01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:126N Protein Expression Plasmid Vector	PHLAP92541747	Plasmid vector containing HLA-E*01:126N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:126N protein. This plasmid can be used for constructing HLA-E*01:126N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:126N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:127 Protein Expression Plasmid Vector	PHLAP92541748	Plasmid vector containing HLA-E*01:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:127 protein. This plasmid can be used for constructing HLA-E*01:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:128 Protein Expression Plasmid Vector	PHLAP92541749	Plasmid vector containing HLA-E*01:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:128 protein. This plasmid can be used for constructing HLA-E*01:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:129 Protein Expression Plasmid Vector	PHLAP92541750	Plasmid vector containing HLA-E*01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:129 protein. This plasmid can be used for constructing HLA-E*01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:13 Protein Expression Plasmid Vector	PHLAP92541751	Plasmid vector containing HLA-E*01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:13 protein. This plasmid can be used for constructing HLA-E*01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:130 Protein Expression Plasmid Vector	PHLAP92541752	Plasmid vector containing HLA-E*01:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:130 protein. This plasmid can be used for constructing HLA-E*01:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:131 Protein Expression Plasmid Vector	PHLAP92541753	Plasmid vector containing HLA-E*01:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:131 protein. This plasmid can be used for constructing HLA-E*01:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:132 Protein Expression Plasmid Vector	PHLAP92541754	Plasmid vector containing HLA-E*01:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:132 protein. This plasmid can be used for constructing HLA-E*01:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:133 Protein Expression Plasmid Vector	PHLAP92541755	Plasmid vector containing HLA-E*01:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:133 protein. This plasmid can be used for constructing HLA-E*01:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:134 Protein Expression Plasmid Vector	PHLAP92541756	Plasmid vector containing HLA-E*01:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:134 protein. This plasmid can be used for constructing HLA-E*01:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:135 Protein Expression Plasmid Vector	PHLAP92541757	Plasmid vector containing HLA-E*01:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:135 protein. This plasmid can be used for constructing HLA-E*01:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:136 Protein Expression Plasmid Vector	PHLAP92541758	Plasmid vector containing HLA-E*01:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:136 protein. This plasmid can be used for constructing HLA-E*01:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:137 Protein Expression Plasmid Vector	PHLAP92541759	Plasmid vector containing HLA-E*01:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:137 protein. This plasmid can be used for constructing HLA-E*01:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:138 Protein Expression Plasmid Vector	PHLAP92541760	Plasmid vector containing HLA-E*01:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:138 protein. This plasmid can be used for constructing HLA-E*01:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:139N Protein Expression Plasmid Vector	PHLAP925417611	Plasmid vector containing HLA-E*01:139N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:139N protein. This plasmid can be used for constructing HLA-E*01:139N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:139N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:14 Protein Expression Plasmid Vector	PHLAP925417612	Plasmid vector containing HLA-E*01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:14 protein. This plasmid can be used for constructing HLA-E*01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:140 Protein Expression Plasmid Vector	PHLAP925417613	Plasmid vector containing HLA-E*01:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:140 protein. This plasmid can be used for constructing HLA-E*01:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:141N Protein Expression Plasmid Vector	PHLAP925417614	Plasmid vector containing HLA-E*01:141N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:141N protein. This plasmid can be used for constructing HLA-E*01:141N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:141N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:142 Protein Expression Plasmid Vector	PHLAP925417615	Plasmid vector containing HLA-E*01:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:142 protein. This plasmid can be used for constructing HLA-E*01:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:143 Protein Expression Plasmid Vector	PHLAP925417616	Plasmid vector containing HLA-E*01:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:143 protein. This plasmid can be used for constructing HLA-E*01:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:144 Protein Expression Plasmid Vector	PHLAP925417617	Plasmid vector containing HLA-E*01:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:144 protein. This plasmid can be used for constructing HLA-E*01:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:145 Protein Expression Plasmid Vector	PHLAP925417618	Plasmid vector containing HLA-E*01:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:145 protein. This plasmid can be used for constructing HLA-E*01:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:146 Protein Expression Plasmid Vector	PHLAP92541769	Plasmid vector containing HLA-E*01:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:146 protein. This plasmid can be used for constructing HLA-E*01:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:147 Protein Expression Plasmid Vector	PHLAP92541770	Plasmid vector containing HLA-E*01:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:147 protein. This plasmid can be used for constructing HLA-E*01:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:148 Protein Expression Plasmid Vector	PHLAP92541771	Plasmid vector containing HLA-E*01:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:148 protein. This plasmid can be used for constructing HLA-E*01:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:149 Protein Expression Plasmid Vector	PHLAP92541772	Plasmid vector containing HLA-E*01:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:149 protein. This plasmid can be used for constructing HLA-E*01:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:15 Protein Expression Plasmid Vector	PHLAP92541773	Plasmid vector containing HLA-E*01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:15 protein. This plasmid can be used for constructing HLA-E*01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:150 Protein Expression Plasmid Vector	PHLAP92541774	Plasmid vector containing HLA-E*01:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:150 protein. This plasmid can be used for constructing HLA-E*01:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:151 Protein Expression Plasmid Vector	PHLAP92541775	Plasmid vector containing HLA-E*01:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:151 protein. This plasmid can be used for constructing HLA-E*01:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:152 Protein Expression Plasmid Vector	PHLAP92541776	Plasmid vector containing HLA-E*01:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:152 protein. This plasmid can be used for constructing HLA-E*01:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:153 Protein Expression Plasmid Vector	PHLAP92541777	Plasmid vector containing HLA-E*01:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:153 protein. This plasmid can be used for constructing HLA-E*01:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:154 Protein Expression Plasmid Vector	PHLAP92541778	Plasmid vector containing HLA-E*01:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:154 protein. This plasmid can be used for constructing HLA-E*01:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:16:01 Protein Expression Plasmid Vector	PHLAP92541779	Plasmid vector containing HLA-E*01:16:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:16:01 protein. This plasmid can be used for constructing HLA-E*01:16:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:16:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:16:02 Protein Expression Plasmid Vector	PHLAP92541780	Plasmid vector containing HLA-E*01:16:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:16:02 protein. This plasmid can be used for constructing HLA-E*01:16:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:16:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:17 Protein Expression Plasmid Vector	PHLAP92541781	Plasmid vector containing HLA-E*01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:17 protein. This plasmid can be used for constructing HLA-E*01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:18 Protein Expression Plasmid Vector	PHLAP92541782	Plasmid vector containing HLA-E*01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:18 protein. This plasmid can be used for constructing HLA-E*01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:19 Protein Expression Plasmid Vector	PHLAP92541783	Plasmid vector containing HLA-E*01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:19 protein. This plasmid can be used for constructing HLA-E*01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:20 Protein Expression Plasmid Vector	PHLAP92541784	Plasmid vector containing HLA-E*01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:20 protein. This plasmid can be used for constructing HLA-E*01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:21:01N Protein Expression Plasmid Vector	PHLAP92541785	Plasmid vector containing HLA-E*01:21:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:21:01N protein. This plasmid can be used for constructing HLA-E*01:21:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:21:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:21:02N Protein Expression Plasmid Vector	PHLAP92541786	Plasmid vector containing HLA-E*01:21:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:21:02N protein. This plasmid can be used for constructing HLA-E*01:21:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:21:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:22 Protein Expression Plasmid Vector	PHLAP92541787	Plasmid vector containing HLA-E*01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:22 protein. This plasmid can be used for constructing HLA-E*01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:23 Protein Expression Plasmid Vector	PHLAP92541788	Plasmid vector containing HLA-E*01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:23 protein. This plasmid can be used for constructing HLA-E*01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:24 Protein Expression Plasmid Vector	PHLAP92541789	Plasmid vector containing HLA-E*01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:24 protein. This plasmid can be used for constructing HLA-E*01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:25N Protein Expression Plasmid Vector	PHLAP92541790	Plasmid vector containing HLA-E*01:25N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:25N protein. This plasmid can be used for constructing HLA-E*01:25N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:25N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:26 Protein Expression Plasmid Vector	PHLAP92541791	Plasmid vector containing HLA-E*01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:26 protein. This plasmid can be used for constructing HLA-E*01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:27 Protein Expression Plasmid Vector	PHLAP92541792	Plasmid vector containing HLA-E*01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:27 protein. This plasmid can be used for constructing HLA-E*01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:28 Protein Expression Plasmid Vector	PHLAP92541793	Plasmid vector containing HLA-E*01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:28 protein. This plasmid can be used for constructing HLA-E*01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:29 Protein Expression Plasmid Vector	PHLAP92541794	Plasmid vector containing HLA-E*01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:29 protein. This plasmid can be used for constructing HLA-E*01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:30 Protein Expression Plasmid Vector	PHLAP92541795	Plasmid vector containing HLA-E*01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:30 protein. This plasmid can be used for constructing HLA-E*01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:31 Protein Expression Plasmid Vector	PHLAP92541796	Plasmid vector containing HLA-E*01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:31 protein. This plasmid can be used for constructing HLA-E*01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:32:01 Protein Expression Plasmid Vector	PHLAP92541797	Plasmid vector containing HLA-E*01:32:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:32:01 protein. This plasmid can be used for constructing HLA-E*01:32:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:32:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:32:02 Protein Expression Plasmid Vector	PHLAP92541798	Plasmid vector containing HLA-E*01:32:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:32:02 protein. This plasmid can be used for constructing HLA-E*01:32:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:32:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:33 Protein Expression Plasmid Vector	PHLAP92541799	Plasmid vector containing HLA-E*01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:33 protein. This plasmid can be used for constructing HLA-E*01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:34 Protein Expression Plasmid Vector	PHLAP925418000	Plasmid vector containing HLA-E*01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:34 protein. This plasmid can be used for constructing HLA-E*01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:35 Protein Expression Plasmid Vector	PHLAP92541801	Plasmid vector containing HLA-E*01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:35 protein. This plasmid can be used for constructing HLA-E*01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:36 Protein Expression Plasmid Vector	PHLAP92541802	Plasmid vector containing HLA-E*01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:36 protein. This plasmid can be used for constructing HLA-E*01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:37 Protein Expression Plasmid Vector	PHLAP92541803	Plasmid vector containing HLA-E*01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:37 protein. This plasmid can be used for constructing HLA-E*01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:38 Protein Expression Plasmid Vector	PHLAP92541804	Plasmid vector containing HLA-E*01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:38 protein. This plasmid can be used for constructing HLA-E*01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:39 Protein Expression Plasmid Vector	PHLAP92541805	Plasmid vector containing HLA-E*01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:39 protein. This plasmid can be used for constructing HLA-E*01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:40:01 Protein Expression Plasmid Vector	PHLAP92541806	Plasmid vector containing HLA-E*01:40:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:40:01 protein. This plasmid can be used for constructing HLA-E*01:40:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:40:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:40:02 Protein Expression Plasmid Vector	PHLAP92541807	Plasmid vector containing HLA-E*01:40:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:40:02 protein. This plasmid can be used for constructing HLA-E*01:40:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:40:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:41:01:01 Protein Expression Plasmid Vector	PHLAP92541808	Plasmid vector containing HLA-E*01:41:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:41:01:01 protein. This plasmid can be used for constructing HLA-E*01:41:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:41:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:41:01:02 Protein Expression Plasmid Vector	PHLAP92541809	Plasmid vector containing HLA-E*01:41:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:41:01:02 protein. This plasmid can be used for constructing HLA-E*01:41:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:41:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:42 Protein Expression Plasmid Vector	PHLAP92541810	Plasmid vector containing HLA-E*01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:42 protein. This plasmid can be used for constructing HLA-E*01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:43 Protein Expression Plasmid Vector	PHLAP92541811	Plasmid vector containing HLA-E*01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:43 protein. This plasmid can be used for constructing HLA-E*01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:44 Protein Expression Plasmid Vector	PHLAP92541812	Plasmid vector containing HLA-E*01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:44 protein. This plasmid can be used for constructing HLA-E*01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:45 Protein Expression Plasmid Vector	PHLAP92541813	Plasmid vector containing HLA-E*01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:45 protein. This plasmid can be used for constructing HLA-E*01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:46 Protein Expression Plasmid Vector	PHLAP92541814	Plasmid vector containing HLA-E*01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:46 protein. This plasmid can be used for constructing HLA-E*01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:47 Protein Expression Plasmid Vector	PHLAP92541815	Plasmid vector containing HLA-E*01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:47 protein. This plasmid can be used for constructing HLA-E*01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:48 Protein Expression Plasmid Vector	PHLAP92541816	Plasmid vector containing HLA-E*01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:48 protein. This plasmid can be used for constructing HLA-E*01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:49 Protein Expression Plasmid Vector	PHLAP92541817	Plasmid vector containing HLA-E*01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:49 protein. This plasmid can be used for constructing HLA-E*01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:50 Protein Expression Plasmid Vector	PHLAP92541818	Plasmid vector containing HLA-E*01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:50 protein. This plasmid can be used for constructing HLA-E*01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:51 Protein Expression Plasmid Vector	PHLAP92541819	Plasmid vector containing HLA-E*01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:51 protein. This plasmid can be used for constructing HLA-E*01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:52 Protein Expression Plasmid Vector	PHLAP92541820	Plasmid vector containing HLA-E*01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:52 protein. This plasmid can be used for constructing HLA-E*01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:53 Protein Expression Plasmid Vector	PHLAP92541821	Plasmid vector containing HLA-E*01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:53 protein. This plasmid can be used for constructing HLA-E*01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:54:01 Protein Expression Plasmid Vector	PHLAP92541822	Plasmid vector containing HLA-E*01:54:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:54:01 protein. This plasmid can be used for constructing HLA-E*01:54:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:54:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:54:02 Protein Expression Plasmid Vector	PHLAP92541823	Plasmid vector containing HLA-E*01:54:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:54:02 protein. This plasmid can be used for constructing HLA-E*01:54:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:54:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:55N Protein Expression Plasmid Vector	PHLAP92541824	Plasmid vector containing HLA-E*01:55N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:55N protein. This plasmid can be used for constructing HLA-E*01:55N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:55N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:56 Protein Expression Plasmid Vector	PHLAP92541825	Plasmid vector containing HLA-E*01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:56 protein. This plasmid can be used for constructing HLA-E*01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:57 Protein Expression Plasmid Vector	PHLAP92541826	Plasmid vector containing HLA-E*01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:57 protein. This plasmid can be used for constructing HLA-E*01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:58 Protein Expression Plasmid Vector	PHLAP92541827	Plasmid vector containing HLA-E*01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:58 protein. This plasmid can be used for constructing HLA-E*01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:59 Protein Expression Plasmid Vector	PHLAP92541828	Plasmid vector containing HLA-E*01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:59 protein. This plasmid can be used for constructing HLA-E*01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:60 Protein Expression Plasmid Vector	PHLAP92541829	Plasmid vector containing HLA-E*01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:60 protein. This plasmid can be used for constructing HLA-E*01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:61 Protein Expression Plasmid Vector	PHLAP925418330	Plasmid vector containing HLA-E*01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:61 protein. This plasmid can be used for constructing HLA-E*01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:62 Protein Expression Plasmid Vector	PHLAP925418331	Plasmid vector containing HLA-E*01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:62 protein. This plasmid can be used for constructing HLA-E*01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:63 Protein Expression Plasmid Vector	PHLAP925418332	Plasmid vector containing HLA-E*01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:63 protein. This plasmid can be used for constructing HLA-E*01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:64 Protein Expression Plasmid Vector	PHLAP92541833	Plasmid vector containing HLA-E*01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:64 protein. This plasmid can be used for constructing HLA-E*01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:65 Protein Expression Plasmid Vector	PHLAP92541834	Plasmid vector containing HLA-E*01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:65 protein. This plasmid can be used for constructing HLA-E*01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:66 Protein Expression Plasmid Vector	PHLAP92541835	Plasmid vector containing HLA-E*01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:66 protein. This plasmid can be used for constructing HLA-E*01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:67 Protein Expression Plasmid Vector	PHLAP92541836	Plasmid vector containing HLA-E*01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:67 protein. This plasmid can be used for constructing HLA-E*01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:68Q Protein Expression Plasmid Vector	PHLAP92541837	Plasmid vector containing HLA-E*01:68Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:68Q protein. This plasmid can be used for constructing HLA-E*01:68Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:68Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:69 Protein Expression Plasmid Vector	PHLAP92541838	Plasmid vector containing HLA-E*01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:69 protein. This plasmid can be used for constructing HLA-E*01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:70 Protein Expression Plasmid Vector	PHLAP92541839	Plasmid vector containing HLA-E*01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:70 protein. This plasmid can be used for constructing HLA-E*01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:71 Protein Expression Plasmid Vector	PHLAP92541840	Plasmid vector containing HLA-E*01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:71 protein. This plasmid can be used for constructing HLA-E*01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:72:01:01 Protein Expression Plasmid Vector	PHLAP92541841	Plasmid vector containing HLA-E*01:72:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:72:01:01 protein. This plasmid can be used for constructing HLA-E*01:72:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:72:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:72:01:02 Protein Expression Plasmid Vector	PHLAP92541842	Plasmid vector containing HLA-E*01:72:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:72:01:02 protein. This plasmid can be used for constructing HLA-E*01:72:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:72:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:73 Protein Expression Plasmid Vector	PHLAP92541843	Plasmid vector containing HLA-E*01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:73 protein. This plasmid can be used for constructing HLA-E*01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:74 Protein Expression Plasmid Vector	PHLAP92541844	Plasmid vector containing HLA-E*01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:74 protein. This plasmid can be used for constructing HLA-E*01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:75 Protein Expression Plasmid Vector	PHLAP92541845	Plasmid vector containing HLA-E*01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:75 protein. This plasmid can be used for constructing HLA-E*01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:76 Protein Expression Plasmid Vector	PHLAP92541846	Plasmid vector containing HLA-E*01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:76 protein. This plasmid can be used for constructing HLA-E*01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:77 Protein Expression Plasmid Vector	PHLAP92541847	Plasmid vector containing HLA-E*01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:77 protein. This plasmid can be used for constructing HLA-E*01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:78 Protein Expression Plasmid Vector	PHLAP92541848	Plasmid vector containing HLA-E*01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:78 protein. This plasmid can be used for constructing HLA-E*01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:79 Protein Expression Plasmid Vector	PHLAP92541849	Plasmid vector containing HLA-E*01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:79 protein. This plasmid can be used for constructing HLA-E*01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:80 Protein Expression Plasmid Vector	PHLAP92541850	Plasmid vector containing HLA-E*01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:80 protein. This plasmid can be used for constructing HLA-E*01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:81 Protein Expression Plasmid Vector	PHLAP92541851	Plasmid vector containing HLA-E*01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:81 protein. This plasmid can be used for constructing HLA-E*01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:82 Protein Expression Plasmid Vector	PHLAP92541852	Plasmid vector containing HLA-E*01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:82 protein. This plasmid can be used for constructing HLA-E*01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:83 Protein Expression Plasmid Vector	PHLAP92541853	Plasmid vector containing HLA-E*01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:83 protein. This plasmid can be used for constructing HLA-E*01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:84 Protein Expression Plasmid Vector	PHLAP92541854	Plasmid vector containing HLA-E*01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:84 protein. This plasmid can be used for constructing HLA-E*01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:85 Protein Expression Plasmid Vector	PHLAP92541855	Plasmid vector containing HLA-E*01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:85 protein. This plasmid can be used for constructing HLA-E*01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:86 Protein Expression Plasmid Vector	PHLAP92541856	Plasmid vector containing HLA-E*01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:86 protein. This plasmid can be used for constructing HLA-E*01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:87 Protein Expression Plasmid Vector	PHLAP92541857	Plasmid vector containing HLA-E*01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:87 protein. This plasmid can be used for constructing HLA-E*01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:88 Protein Expression Plasmid Vector	PHLAP92541858	Plasmid vector containing HLA-E*01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:88 protein. This plasmid can be used for constructing HLA-E*01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:89 Protein Expression Plasmid Vector	PHLAP92541859	Plasmid vector containing HLA-E*01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:89 protein. This plasmid can be used for constructing HLA-E*01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:90 Protein Expression Plasmid Vector	PHLAP92541860	Plasmid vector containing HLA-E*01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:90 protein. This plasmid can be used for constructing HLA-E*01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:91N Protein Expression Plasmid Vector	PHLAP92541861	Plasmid vector containing HLA-E*01:91N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:91N protein. This plasmid can be used for constructing HLA-E*01:91N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:91N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:92 Protein Expression Plasmid Vector	PHLAP92541862	Plasmid vector containing HLA-E*01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:92 protein. This plasmid can be used for constructing HLA-E*01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:93 Protein Expression Plasmid Vector	PHLAP92541863	Plasmid vector containing HLA-E*01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:93 protein. This plasmid can be used for constructing HLA-E*01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:94 Protein Expression Plasmid Vector	PHLAP92541864	Plasmid vector containing HLA-E*01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:94 protein. This plasmid can be used for constructing HLA-E*01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-E*01:95 Protein Expression Plasmid Vector	PHLAP92541865	Plasmid vector containing HLA-E*01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:95 protein. This plasmid can be used for constructing HLA-E*01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:96 Protein Expression Plasmid Vector	PHLAP92541866	Plasmid vector containing HLA-E*01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:96 protein. This plasmid can be used for constructing HLA-E*01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:97 Protein Expression Plasmid Vector	PHLAP92541867	Plasmid vector containing HLA-E*01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:97 protein. This plasmid can be used for constructing HLA-E*01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:98 Protein Expression Plasmid Vector	PHLAP92541868	Plasmid vector containing HLA-E*01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:98 protein. This plasmid can be used for constructing HLA-E*01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*01:99 Protein Expression Plasmid Vector	PHLAP92541869	Plasmid vector containing HLA-E*01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*01:99 protein. This plasmid can be used for constructing HLA-E*01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-E*0102 Protein Expression Plasmid Vector	PHLAP92541870	Plasmid vector containing HLA-E*0102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-E*0102 protein. This plasmid can be used for constructing HLA-E*0102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-E*0102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92541871	Plasmid vector containing HLA-F*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:01 protein. This plasmid can be used for constructing HLA-F*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92541872	Plasmid vector containing HLA-F*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:02 protein. This plasmid can be used for constructing HLA-F*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92541873	Plasmid vector containing HLA-F*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:03 protein. This plasmid can be used for constructing HLA-F*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92541874	Plasmid vector containing HLA-F*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:04 protein. This plasmid can be used for constructing HLA-F*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92541875	Plasmid vector containing HLA-F*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:05 protein. This plasmid can be used for constructing HLA-F*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:06 Protein Expression Plasmid Vector	PHLAP92541876	Plasmid vector containing HLA-F*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:06 protein. This plasmid can be used for constructing HLA-F*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:07 Protein Expression Plasmid Vector	PHLAP92541877	Plasmid vector containing HLA-F*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:07 protein. This plasmid can be used for constructing HLA-F*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:08 Protein Expression Plasmid Vector	PHLAP92541878	Plasmid vector containing HLA-F*01:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:08 protein. This plasmid can be used for constructing HLA-F*01:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:09 Protein Expression Plasmid Vector	PHLAP92541879	Plasmid vector containing HLA-F*01:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:09 protein. This plasmid can be used for constructing HLA-F*01:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:01:10 Protein Expression Plasmid Vector	PHLAP92541880	Plasmid vector containing HLA-F*01:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:10 protein. This plasmid can be used for constructing HLA-F*01:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:11 Protein Expression Plasmid Vector	PHLAP92541881	Plasmid vector containing HLA-F*01:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:11 protein. This plasmid can be used for constructing HLA-F*01:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:12 Protein Expression Plasmid Vector	PHLAP92541882	Plasmid vector containing HLA-F*01:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:12 protein. This plasmid can be used for constructing HLA-F*01:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:13 Protein Expression Plasmid Vector	PHLAP92541883	Plasmid vector containing HLA-F*01:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:13 protein. This plasmid can be used for constructing HLA-F*01:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:14 Protein Expression Plasmid Vector	PHLAP92541884	Plasmid vector containing HLA-F*01:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:14 protein. This plasmid can be used for constructing HLA-F*01:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:15 Protein Expression Plasmid Vector	PHLAP92541885	Plasmid vector containing HLA-F*01:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:15 protein. This plasmid can be used for constructing HLA-F*01:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:16 Protein Expression Plasmid Vector	PHLAP92541886	Plasmid vector containing HLA-F*01:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:16 protein. This plasmid can be used for constructing HLA-F*01:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:01:17 Protein Expression Plasmid Vector	PHLAP92541887	Plasmid vector containing HLA-F*01:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:17 protein. This plasmid can be used for constructing HLA-F*01:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:18 Protein Expression Plasmid Vector	PHLAP92541888	Plasmid vector containing HLA-F*01:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:18 protein. This plasmid can be used for constructing HLA-F*01:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:19 Protein Expression Plasmid Vector	PHLAP92541889	Plasmid vector containing HLA-F*01:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:19 protein. This plasmid can be used for constructing HLA-F*01:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:20 Protein Expression Plasmid Vector	PHLAP92541890	Plasmid vector containing HLA-F*01:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:20 protein. This plasmid can be used for constructing HLA-F*01:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:21 Protein Expression Plasmid Vector	PHLAP92541891	Plasmid vector containing HLA-F*01:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:21 protein. This plasmid can be used for constructing HLA-F*01:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:22 Protein Expression Plasmid Vector	PHLAP92541892	Plasmid vector containing HLA-F*01:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:22 protein. This plasmid can be used for constructing HLA-F*01:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:23 Protein Expression Plasmid Vector	PHLAP92541893	Plasmid vector containing HLA-F*01:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:23 protein. This plasmid can be used for constructing HLA-F*01:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:01:24 Protein Expression Plasmid Vector	PHLAP92541894	Plasmid vector containing HLA-F*01:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:24 protein. This plasmid can be used for constructing HLA-F*01:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:25 Protein Expression Plasmid Vector	PHLAP92541895	Plasmid vector containing HLA-F*01:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:25 protein. This plasmid can be used for constructing HLA-F*01:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:26 Protein Expression Plasmid Vector	PHLAP92541896	Plasmid vector containing HLA-F*01:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:26 protein. This plasmid can be used for constructing HLA-F*01:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:27 Protein Expression Plasmid Vector	PHLAP92541897	Plasmid vector containing HLA-F*01:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:27 protein. This plasmid can be used for constructing HLA-F*01:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:28 Protein Expression Plasmid Vector	PHLAP92541898	Plasmid vector containing HLA-F*01:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:28 protein. This plasmid can be used for constructing HLA-F*01:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:29 Protein Expression Plasmid Vector	PHLAP92541899	Plasmid vector containing HLA-F*01:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:29 protein. This plasmid can be used for constructing HLA-F*01:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:30 Protein Expression Plasmid Vector	PHLAP925419000	Plasmid vector containing HLA-F*01:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:30 protein. This plasmid can be used for constructing HLA-F*01:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:01:31 Protein Expression Plasmid Vector	PHLAP92541901	Plasmid vector containing HLA-F*01:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:31 protein. This plasmid can be used for constructing HLA-F*01:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:32 Protein Expression Plasmid Vector	PHLAP92541902	Plasmid vector containing HLA-F*01:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:32 protein. This plasmid can be used for constructing HLA-F*01:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:33 Protein Expression Plasmid Vector	PHLAP92541903	Plasmid vector containing HLA-F*01:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:33 protein. This plasmid can be used for constructing HLA-F*01:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:34 Protein Expression Plasmid Vector	PHLAP92541904	Plasmid vector containing HLA-F*01:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:34 protein. This plasmid can be used for constructing HLA-F*01:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:35 Protein Expression Plasmid Vector	PHLAP92541905	Plasmid vector containing HLA-F*01:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:35 protein. This plasmid can be used for constructing HLA-F*01:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:36 Protein Expression Plasmid Vector	PHLAP92541906	Plasmid vector containing HLA-F*01:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:36 protein. This plasmid can be used for constructing HLA-F*01:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:37 Protein Expression Plasmid Vector	PHLAP92541907	Plasmid vector containing HLA-F*01:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:37 protein. This plasmid can be used for constructing HLA-F*01:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:01:38 Protein Expression Plasmid Vector	PHLAP92541908	Plasmid vector containing HLA-F*01:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:38 protein. This plasmid can be used for constructing HLA-F*01:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:39 Protein Expression Plasmid Vector	PHLAP92541909	Plasmid vector containing HLA-F*01:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:39 protein. This plasmid can be used for constructing HLA-F*01:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:40 Protein Expression Plasmid Vector	PHLAP92541910	Plasmid vector containing HLA-F*01:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:40 protein. This plasmid can be used for constructing HLA-F*01:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:41 Protein Expression Plasmid Vector	PHLAP92541911	Plasmid vector containing HLA-F*01:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:41 protein. This plasmid can be used for constructing HLA-F*01:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:42 Protein Expression Plasmid Vector	PHLAP92541912	Plasmid vector containing HLA-F*01:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:42 protein. This plasmid can be used for constructing HLA-F*01:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:43 Protein Expression Plasmid Vector	PHLAP92541913	Plasmid vector containing HLA-F*01:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:43 protein. This plasmid can be used for constructing HLA-F*01:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:44 Protein Expression Plasmid Vector	PHLAP92541914	Plasmid vector containing HLA-F*01:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:44 protein. This plasmid can be used for constructing HLA-F*01:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:01:45 Protein Expression Plasmid Vector	PHLAP92541915	Plasmid vector containing HLA-F*01:01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:45 protein. This plasmid can be used for constructing HLA-F*01:01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:46 Protein Expression Plasmid Vector	PHLAP92541916	Plasmid vector containing HLA-F*01:01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:46 protein. This plasmid can be used for constructing HLA-F*01:01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:47 Protein Expression Plasmid Vector	PHLAP92541917	Plasmid vector containing HLA-F*01:01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:47 protein. This plasmid can be used for constructing HLA-F*01:01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:48 Protein Expression Plasmid Vector	PHLAP92541918	Plasmid vector containing HLA-F*01:01:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:48 protein. This plasmid can be used for constructing HLA-F*01:01:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:49 Protein Expression Plasmid Vector	PHLAP92541919	Plasmid vector containing HLA-F*01:01:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:49 protein. This plasmid can be used for constructing HLA-F*01:01:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:50 Protein Expression Plasmid Vector	PHLAP92541920	Plasmid vector containing HLA-F*01:01:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:50 protein. This plasmid can be used for constructing HLA-F*01:01:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:51 Protein Expression Plasmid Vector	PHLAP92541921	Plasmid vector containing HLA-F*01:01:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:51 protein. This plasmid can be used for constructing HLA-F*01:01:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:01:52 Protein Expression Plasmid Vector	PHLAP92541922	Plasmid vector containing HLA-F*01:01:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:52 protein. This plasmid can be used for constructing HLA-F*01:01:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:53 Protein Expression Plasmid Vector	PHLAP92541923	Plasmid vector containing HLA-F*01:01:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:53 protein. This plasmid can be used for constructing HLA-F*01:01:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:54 Protein Expression Plasmid Vector	PHLAP92541924	Plasmid vector containing HLA-F*01:01:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:54 protein. This plasmid can be used for constructing HLA-F*01:01:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:55 Protein Expression Plasmid Vector	PHLAP92541925	Plasmid vector containing HLA-F*01:01:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:55 protein. This plasmid can be used for constructing HLA-F*01:01:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:56 Protein Expression Plasmid Vector	PHLAP92541926	Plasmid vector containing HLA-F*01:01:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:56 protein. This plasmid can be used for constructing HLA-F*01:01:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:57 Protein Expression Plasmid Vector	PHLAP92541927	Plasmid vector containing HLA-F*01:01:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:57 protein. This plasmid can be used for constructing HLA-F*01:01:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:01:58 Protein Expression Plasmid Vector	PHLAP92541928	Plasmid vector containing HLA-F*01:01:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:01:58 protein. This plasmid can be used for constructing HLA-F*01:01:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:02:01 Protein Expression Plasmid Vector	PHLAP92541929	Plasmid vector containing HLA-F*01:01:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:01 protein. This plasmid can be used for constructing HLA-F*01:01:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:02 Protein Expression Plasmid Vector	PHLAP92541930	Plasmid vector containing HLA-F*01:01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:02 protein. This plasmid can be used for constructing HLA-F*01:01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:03 Protein Expression Plasmid Vector	PHLAP92541931	Plasmid vector containing HLA-F*01:01:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:03 protein. This plasmid can be used for constructing HLA-F*01:01:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:04 Protein Expression Plasmid Vector	PHLAP92541932	Plasmid vector containing HLA-F*01:01:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:04 protein. This plasmid can be used for constructing HLA-F*01:01:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:05 Protein Expression Plasmid Vector	PHLAP92541933	Plasmid vector containing HLA-F*01:01:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:05 protein. This plasmid can be used for constructing HLA-F*01:01:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:06 Protein Expression Plasmid Vector	PHLAP92541934	Plasmid vector containing HLA-F*01:01:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:06 protein. This plasmid can be used for constructing HLA-F*01:01:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:07 Protein Expression Plasmid Vector	PHLAP92541935	Plasmid vector containing HLA-F*01:01:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:07 protein. This plasmid can be used for constructing HLA-F*01:01:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:02:08 Protein Expression Plasmid Vector	PHLAP92541936	Plasmid vector containing HLA-F*01:01:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:08 protein. This plasmid can be used for constructing HLA-F*01:01:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:09 Protein Expression Plasmid Vector	PHLAP92541937	Plasmid vector containing HLA-F*01:01:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:09 protein. This plasmid can be used for constructing HLA-F*01:01:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:10 Protein Expression Plasmid Vector	PHLAP92541938	Plasmid vector containing HLA-F*01:01:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:10 protein. This plasmid can be used for constructing HLA-F*01:01:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:11 Protein Expression Plasmid Vector	PHLAP92541939	Plasmid vector containing HLA-F*01:01:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:11 protein. This plasmid can be used for constructing HLA-F*01:01:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:12 Protein Expression Plasmid Vector	PHLAP92541940	Plasmid vector containing HLA-F*01:01:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:12 protein. This plasmid can be used for constructing HLA-F*01:01:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:13 Protein Expression Plasmid Vector	PHLAP92541941	Plasmid vector containing HLA-F*01:01:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:13 protein. This plasmid can be used for constructing HLA-F*01:01:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:14 Protein Expression Plasmid Vector	PHLAP92541942	Plasmid vector containing HLA-F*01:01:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:14 protein. This plasmid can be used for constructing HLA-F*01:01:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:02:15 Protein Expression Plasmid Vector	PHLAP92541943	Plasmid vector containing HLA-F*01:01:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:15 protein. This plasmid can be used for constructing HLA-F*01:01:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:16 Protein Expression Plasmid Vector	PHLAP92541944	Plasmid vector containing HLA-F*01:01:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:16 protein. This plasmid can be used for constructing HLA-F*01:01:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:02:17 Protein Expression Plasmid Vector	PHLAP92541945	Plasmid vector containing HLA-F*01:01:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:02:17 protein. This plasmid can be used for constructing HLA-F*01:01:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:03:01 Protein Expression Plasmid Vector	PHLAP92541946	Plasmid vector containing HLA-F*01:01:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:03:01 protein. This plasmid can be used for constructing HLA-F*01:01:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:03:02 Protein Expression Plasmid Vector	PHLAP92541947	Plasmid vector containing HLA-F*01:01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:03:02 protein. This plasmid can be used for constructing HLA-F*01:01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:03:03 Protein Expression Plasmid Vector	PHLAP92541948	Plasmid vector containing HLA-F*01:01:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:03:03 protein. This plasmid can be used for constructing HLA-F*01:01:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:03:04 Protein Expression Plasmid Vector	PHLAP92541949	Plasmid vector containing HLA-F*01:01:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:03:04 protein. This plasmid can be used for constructing HLA-F*01:01:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:04 Protein Expression Plasmid Vector	PHLAP92541950	Plasmid vector containing HLA-F*01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:04 protein. This plasmid can be used for constructing HLA-F*01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:05 Protein Expression Plasmid Vector	PHLAP92541951	Plasmid vector containing HLA-F*01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:05 protein. This plasmid can be used for constructing HLA-F*01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:06 Protein Expression Plasmid Vector	PHLAP92541952	Plasmid vector containing HLA-F*01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:06 protein. This plasmid can be used for constructing HLA-F*01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:07 Protein Expression Plasmid Vector	PHLAP92541953	Plasmid vector containing HLA-F*01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:07 protein. This plasmid can be used for constructing HLA-F*01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:08 Protein Expression Plasmid Vector	PHLAP92541954	Plasmid vector containing HLA-F*01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:08 protein. This plasmid can be used for constructing HLA-F*01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:09 Protein Expression Plasmid Vector	PHLAP92541955	Plasmid vector containing HLA-F*01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:09 protein. This plasmid can be used for constructing HLA-F*01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:10 Protein Expression Plasmid Vector	PHLAP92541956	Plasmid vector containing HLA-F*01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:10 protein. This plasmid can be used for constructing HLA-F*01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:01:11 Protein Expression Plasmid Vector	PHLAP92541957	Plasmid vector containing HLA-F*01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:11 protein. This plasmid can be used for constructing HLA-F*01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:01:12 Protein Expression Plasmid Vector	PHLAP92541958	Plasmid vector containing HLA-F*01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:01:12 protein. This plasmid can be used for constructing HLA-F*01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:02:01:01 Protein Expression Plasmid Vector	PHLAP92541959	Plasmid vector containing HLA-F*01:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:02:01:01 protein. This plasmid can be used for constructing HLA-F*01:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:02:01:02 Protein Expression Plasmid Vector	PHLAP92541960	Plasmid vector containing HLA-F*01:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:02:01:02 protein. This plasmid can be used for constructing HLA-F*01:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:03:01:01 Protein Expression Plasmid Vector	PHLAP92541961	Plasmid vector containing HLA-F*01:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:03:01:01 protein. This plasmid can be used for constructing HLA-F*01:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:03:01:02 Protein Expression Plasmid Vector	PHLAP92541962	Plasmid vector containing HLA-F*01:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:03:01:02 protein. This plasmid can be used for constructing HLA-F*01:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:03:01:03 Protein Expression Plasmid Vector	PHLAP92541963	Plasmid vector containing HLA-F*01:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:03:01:03 protein. This plasmid can be used for constructing HLA-F*01:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:03:01:04 Protein Expression Plasmid Vector	PHLAP92541964	Plasmid vector containing HLA-F*01:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:03:01:04 protein. This plasmid can be used for constructing HLA-F*01:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:03:01:05 Protein Expression Plasmid Vector	PHLAP92541965	Plasmid vector containing HLA-F*01:03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:03:01:05 protein. This plasmid can be used for constructing HLA-F*01:03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:03:01:06 Protein Expression Plasmid Vector	PHLAP92541966	Plasmid vector containing HLA-F*01:03:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:03:01:06 protein. This plasmid can be used for constructing HLA-F*01:03:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:03:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:03:02 Protein Expression Plasmid Vector	PHLAP92541967	Plasmid vector containing HLA-F*01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:03:02 protein. This plasmid can be used for constructing HLA-F*01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:04:01:01 Protein Expression Plasmid Vector	PHLAP92541968	Plasmid vector containing HLA-F*01:04:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:04:01:01 protein. This plasmid can be used for constructing HLA-F*01:04:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:04:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:04:01:02 Protein Expression Plasmid Vector	PHLAP92541969	Plasmid vector containing HLA-F*01:04:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:04:01:02 protein. This plasmid can be used for constructing HLA-F*01:04:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:04:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:05:01:01 Protein Expression Plasmid Vector	PHLAP92541970	Plasmid vector containing HLA-F*01:05:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:05:01:01 protein. This plasmid can be used for constructing HLA-F*01:05:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:05:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:05:01:02 Protein Expression Plasmid Vector	PHLAP92541971	Plasmid vector containing HLA-F*01:05:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:05:01:02 protein. This plasmid can be used for constructing HLA-F*01:05:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:05:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:06 Protein Expression Plasmid Vector	PHLAP92541972	Plasmid vector containing HLA-F*01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:06 protein. This plasmid can be used for constructing HLA-F*01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:07 Protein Expression Plasmid Vector	PHLAP92541973	Plasmid vector containing HLA-F*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:07 protein. This plasmid can be used for constructing HLA-F*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:08 Protein Expression Plasmid Vector	PHLAP92541974	Plasmid vector containing HLA-F*01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:08 protein. This plasmid can be used for constructing HLA-F*01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:09 Protein Expression Plasmid Vector	PHLAP92541975	Plasmid vector containing HLA-F*01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:09 protein. This plasmid can be used for constructing HLA-F*01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:10 Protein Expression Plasmid Vector	PHLAP92541976	Plasmid vector containing HLA-F*01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:10 protein. This plasmid can be used for constructing HLA-F*01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:11 Protein Expression Plasmid Vector	PHLAP92541977	Plasmid vector containing HLA-F*01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:11 protein. This plasmid can be used for constructing HLA-F*01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:12 Protein Expression Plasmid Vector	PHLAP92541978	Plasmid vector containing HLA-F*01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:12 protein. This plasmid can be used for constructing HLA-F*01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:13N Protein Expression Plasmid Vector	PHLAP92541979	Plasmid vector containing HLA-F*01:13N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:13N protein. This plasmid can be used for constructing HLA-F*01:13N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:13N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:14:01:01N Protein Expression Plasmid Vector	PHLAP92541980	Plasmid vector containing HLA-F*01:14:01:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:14:01:01N protein. This plasmid can be used for constructing HLA-F*01:14:01:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:14:01:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:14:01:02N Protein Expression Plasmid Vector	PHLAP92541981	Plasmid vector containing HLA-F*01:14:01:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:14:01:02N protein. This plasmid can be used for constructing HLA-F*01:14:01:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:14:01:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:15 Protein Expression Plasmid Vector	PHLAP92541982	Plasmid vector containing HLA-F*01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:15 protein. This plasmid can be used for constructing HLA-F*01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:16 Protein Expression Plasmid Vector	PHLAP92541983	Plasmid vector containing HLA-F*01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:16 protein. This plasmid can be used for constructing HLA-F*01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:17 Protein Expression Plasmid Vector	PHLAP92541984	Plasmid vector containing HLA-F*01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:17 protein. This plasmid can be used for constructing HLA-F*01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:18 Protein Expression Plasmid Vector	PHLAP92541985	Plasmid vector containing HLA-F*01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:18 protein. This plasmid can be used for constructing HLA-F*01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:19 Protein Expression Plasmid Vector	PHLAP92541986	Plasmid vector containing HLA-F*01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:19 protein. This plasmid can be used for constructing HLA-F*01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:20 Protein Expression Plasmid Vector	PHLAP92541987	Plasmid vector containing HLA-F*01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:20 protein. This plasmid can be used for constructing HLA-F*01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:21 Protein Expression Plasmid Vector	PHLAP92541988	Plasmid vector containing HLA-F*01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:21 protein. This plasmid can be used for constructing HLA-F*01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:22 Protein Expression Plasmid Vector	PHLAP92541989	Plasmid vector containing HLA-F*01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:22 protein. This plasmid can be used for constructing HLA-F*01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:23 Protein Expression Plasmid Vector	PHLAP92541990	Plasmid vector containing HLA-F*01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:23 protein. This plasmid can be used for constructing HLA-F*01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:24 Protein Expression Plasmid Vector	PHLAP92541991	Plasmid vector containing HLA-F*01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:24 protein. This plasmid can be used for constructing HLA-F*01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:25 Protein Expression Plasmid Vector	PHLAP92541992	Plasmid vector containing HLA-F*01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:25 protein. This plasmid can be used for constructing HLA-F*01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:26 Protein Expression Plasmid Vector	PHLAP92541993	Plasmid vector containing HLA-F*01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:26 protein. This plasmid can be used for constructing HLA-F*01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:27 Protein Expression Plasmid Vector	PHLAP92541994	Plasmid vector containing HLA-F*01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:27 protein. This plasmid can be used for constructing HLA-F*01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-F*01:28 Protein Expression Plasmid Vector	PHLAP92541995	Plasmid vector containing HLA-F*01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:28 protein. This plasmid can be used for constructing HLA-F*01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-F*01:29 Protein Expression Plasmid Vector	PHLAP92541996	Plasmid vector containing HLA-F*01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-F*01:29 protein. This plasmid can be used for constructing HLA-F*01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-F*01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92541997	Plasmid vector containing HLA-G*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:01 protein. This plasmid can be used for constructing HLA-G*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92541998	Plasmid vector containing HLA-G*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:02 protein. This plasmid can be used for constructing HLA-G*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92541999	Plasmid vector containing HLA-G*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:03 protein. This plasmid can be used for constructing HLA-G*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:04 Protein Expression Plasmid Vector	PHLAP925420000	Plasmid vector containing HLA-G*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:04 protein. This plasmid can be used for constructing HLA-G*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:05 Protein Expression Plasmid Vector	PHLAP925420001	Plasmid vector containing HLA-G*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:05 protein. This plasmid can be used for constructing HLA-G*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:06 Protein Expression Plasmid Vector	PHLAP925420002	Plasmid vector containing HLA-G*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:06 protein. This plasmid can be used for constructing HLA-G*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:01:07 Protein Expression Plasmid Vector	PHLAP92542003	Plasmid vector containing HLA-G*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:07 protein. This plasmid can be used for constructing HLA-G*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:08 Protein Expression Plasmid Vector	PHLAP92542004	Plasmid vector containing HLA-G*01:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:08 protein. This plasmid can be used for constructing HLA-G*01:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:09 Protein Expression Plasmid Vector	PHLAP92542005	Plasmid vector containing HLA-G*01:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:09 protein. This plasmid can be used for constructing HLA-G*01:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:10 Protein Expression Plasmid Vector	PHLAP92542006	Plasmid vector containing HLA-G*01:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:10 protein. This plasmid can be used for constructing HLA-G*01:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:11 Protein Expression Plasmid Vector	PHLAP92542007	Plasmid vector containing HLA-G*01:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:11 protein. This plasmid can be used for constructing HLA-G*01:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:12 Protein Expression Plasmid Vector	PHLAP92542008	Plasmid vector containing HLA-G*01:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:12 protein. This plasmid can be used for constructing HLA-G*01:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:13 Protein Expression Plasmid Vector	PHLAP92542009	Plasmid vector containing HLA-G*01:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:13 protein. This plasmid can be used for constructing HLA-G*01:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:01:14Q Protein Expression Plasmid Vector	PHLAP92542010	Plasmid vector containing HLA-G*01:01:01:14Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:14Q protein. This plasmid can be used for constructing HLA-G*01:01:01:14Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:14Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:15 Protein Expression Plasmid Vector	PHLAP92542011	Plasmid vector containing HLA-G*01:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:15 protein. This plasmid can be used for constructing HLA-G*01:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:16 Protein Expression Plasmid Vector	PHLAP92542012	Plasmid vector containing HLA-G*01:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:16 protein. This plasmid can be used for constructing HLA-G*01:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:17 Protein Expression Plasmid Vector	PHLAP92542013	Plasmid vector containing HLA-G*01:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:17 protein. This plasmid can be used for constructing HLA-G*01:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:18 Protein Expression Plasmid Vector	PHLAP92542014	Plasmid vector containing HLA-G*01:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:18 protein. This plasmid can be used for constructing HLA-G*01:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:19 Protein Expression Plasmid Vector	PHLAP92542015	Plasmid vector containing HLA-G*01:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:19 protein. This plasmid can be used for constructing HLA-G*01:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:20 Protein Expression Plasmid Vector	PHLAP92542016	Plasmid vector containing HLA-G*01:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:20 protein. This plasmid can be used for constructing HLA-G*01:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:01:21 Protein Expression Plasmid Vector	PHLAP92542017	Plasmid vector containing HLA-G*01:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:21 protein. This plasmid can be used for constructing HLA-G*01:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:22 Protein Expression Plasmid Vector	PHLAP92542018	Plasmid vector containing HLA-G*01:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:22 protein. This plasmid can be used for constructing HLA-G*01:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:23 Protein Expression Plasmid Vector	PHLAP92542019	Plasmid vector containing HLA-G*01:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:23 protein. This plasmid can be used for constructing HLA-G*01:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:24 Protein Expression Plasmid Vector	PHLAP92542020	Plasmid vector containing HLA-G*01:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:24 protein. This plasmid can be used for constructing HLA-G*01:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:25 Protein Expression Plasmid Vector	PHLAP92542021	Plasmid vector containing HLA-G*01:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:25 protein. This plasmid can be used for constructing HLA-G*01:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:26 Protein Expression Plasmid Vector	PHLAP92542022	Plasmid vector containing HLA-G*01:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:26 protein. This plasmid can be used for constructing HLA-G*01:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:27 Protein Expression Plasmid Vector	PHLAP92542023	Plasmid vector containing HLA-G*01:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:27 protein. This plasmid can be used for constructing HLA-G*01:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:01:28 Protein Expression Plasmid Vector	PHLAP92542024	Plasmid vector containing HLA-G*01:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:28 protein. This plasmid can be used for constructing HLA-G*01:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:29 Protein Expression Plasmid Vector	PHLAP92542025	Plasmid vector containing HLA-G*01:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:29 protein. This plasmid can be used for constructing HLA-G*01:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:30 Protein Expression Plasmid Vector	PHLAP92542026	Plasmid vector containing HLA-G*01:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:30 protein. This plasmid can be used for constructing HLA-G*01:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:31 Protein Expression Plasmid Vector	PHLAP92542027	Plasmid vector containing HLA-G*01:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:31 protein. This plasmid can be used for constructing HLA-G*01:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:32 Protein Expression Plasmid Vector	PHLAP92542028	Plasmid vector containing HLA-G*01:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:32 protein. This plasmid can be used for constructing HLA-G*01:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:33 Protein Expression Plasmid Vector	PHLAP92542029	Plasmid vector containing HLA-G*01:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:33 protein. This plasmid can be used for constructing HLA-G*01:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:34 Protein Expression Plasmid Vector	PHLAP92542030	Plasmid vector containing HLA-G*01:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:34 protein. This plasmid can be used for constructing HLA-G*01:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:01:35 Protein Expression Plasmid Vector	PHLAP92542031	Plasmid vector containing HLA-G*01:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:35 protein. This plasmid can be used for constructing HLA-G*01:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:36 Protein Expression Plasmid Vector	PHLAP92542032	Plasmid vector containing HLA-G*01:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:36 protein. This plasmid can be used for constructing HLA-G*01:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:37 Protein Expression Plasmid Vector	PHLAP92542033	Plasmid vector containing HLA-G*01:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:37 protein. This plasmid can be used for constructing HLA-G*01:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:38 Protein Expression Plasmid Vector	PHLAP92542034	Plasmid vector containing HLA-G*01:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:38 protein. This plasmid can be used for constructing HLA-G*01:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:01:39 Protein Expression Plasmid Vector	PHLAP92542035	Plasmid vector containing HLA-G*01:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:01:39 protein. This plasmid can be used for constructing HLA-G*01:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:02:01 Protein Expression Plasmid Vector	PHLAP92542036	Plasmid vector containing HLA-G*01:01:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:01 protein. This plasmid can be used for constructing HLA-G*01:01:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:02:02 Protein Expression Plasmid Vector	PHLAP92542037	Plasmid vector containing HLA-G*01:01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:02 protein. This plasmid can be used for constructing HLA-G*01:01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:02:03 Protein Expression Plasmid Vector	PHLAP92542038	Plasmid vector containing HLA-G*01:01:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:03 protein. This plasmid can be used for constructing HLA-G*01:01:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:02:04 Protein Expression Plasmid Vector	PHLAP92542039	Plasmid vector containing HLA-G*01:01:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:04 protein. This plasmid can be used for constructing HLA-G*01:01:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:02:05Q Protein Expression Plasmid Vector	PHLAP925420400	Plasmid vector containing HLA-G*01:01:02:05Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:05Q protein. This plasmid can be used for constructing HLA-G*01:01:02:05Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:05Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:02:06 Protein Expression Plasmid Vector	PHLAP925420401	Plasmid vector containing HLA-G*01:01:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:06 protein. This plasmid can be used for constructing HLA-G*01:01:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:02:07 Protein Expression Plasmid Vector	PHLAP925420402	Plasmid vector containing HLA-G*01:01:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:07 protein. This plasmid can be used for constructing HLA-G*01:01:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:02:08 Protein Expression Plasmid Vector	PHLAP925420403	Plasmid vector containing HLA-G*01:01:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:08 protein. This plasmid can be used for constructing HLA-G*01:01:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:02:09 Protein Expression Plasmid Vector	PHLAP925420404	Plasmid vector containing HLA-G*01:01:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:09 protein. This plasmid can be used for constructing HLA-G*01:01:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:02:10 Protein Expression Plasmid Vector	PHLAP92542045	Plasmid vector containing HLA-G*01:01:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:10 protein. This plasmid can be used for constructing HLA-G*01:01:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:02:11 Protein Expression Plasmid Vector	PHLAP92542046	Plasmid vector containing HLA-G*01:01:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:11 protein. This plasmid can be used for constructing HLA-G*01:01:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:02:12 Protein Expression Plasmid Vector	PHLAP92542047	Plasmid vector containing HLA-G*01:01:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:12 protein. This plasmid can be used for constructing HLA-G*01:01:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:02:13 Protein Expression Plasmid Vector	PHLAP92542048	Plasmid vector containing HLA-G*01:01:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:13 protein. This plasmid can be used for constructing HLA-G*01:01:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:02:14 Protein Expression Plasmid Vector	PHLAP92542049	Plasmid vector containing HLA-G*01:01:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:02:14 protein. This plasmid can be used for constructing HLA-G*01:01:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:03:01 Protein Expression Plasmid Vector	PHLAP92542050	Plasmid vector containing HLA-G*01:01:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:03:01 protein. This plasmid can be used for constructing HLA-G*01:01:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:03:02 Protein Expression Plasmid Vector	PHLAP92542051	Plasmid vector containing HLA-G*01:01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:03:02 protein. This plasmid can be used for constructing HLA-G*01:01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:03:03 Protein Expression Plasmid Vector	PHLAP925420512	Plasmid vector containing HLA-G*01:01:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:03:03 protein. This plasmid can be used for constructing HLA-G*01:01:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:03:04 Protein Expression Plasmid Vector	PHLAP925420513	Plasmid vector containing HLA-G*01:01:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:03:04 protein. This plasmid can be used for constructing HLA-G*01:01:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:03:05 Protein Expression Plasmid Vector	PHLAP925420514	Plasmid vector containing HLA-G*01:01:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:03:05 protein. This plasmid can be used for constructing HLA-G*01:01:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:03:06 Protein Expression Plasmid Vector	PHLAP925420515	Plasmid vector containing HLA-G*01:01:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:03:06 protein. This plasmid can be used for constructing HLA-G*01:01:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:04 Protein Expression Plasmid Vector	PHLAP925420516	Plasmid vector containing HLA-G*01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:04 protein. This plasmid can be used for constructing HLA-G*01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:05 Protein Expression Plasmid Vector	PHLAP925420517	Plasmid vector containing HLA-G*01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:05 protein. This plasmid can be used for constructing HLA-G*01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:06 Protein Expression Plasmid Vector	PHLAP925420518	Plasmid vector containing HLA-G*01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:06 protein. This plasmid can be used for constructing HLA-G*01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:07 Protein Expression Plasmid Vector	PHLAP92542059	Plasmid vector containing HLA-G*01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:07 protein. This plasmid can be used for constructing HLA-G*01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:08 Protein Expression Plasmid Vector	PHLAP92542060	Plasmid vector containing HLA-G*01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:08 protein. This plasmid can be used for constructing HLA-G*01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:09:01 Protein Expression Plasmid Vector	PHLAP92542061	Plasmid vector containing HLA-G*01:01:09:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:09:01 protein. This plasmid can be used for constructing HLA-G*01:01:09:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:09:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:09:02 Protein Expression Plasmid Vector	PHLAP92542062	Plasmid vector containing HLA-G*01:01:09:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:09:02 protein. This plasmid can be used for constructing HLA-G*01:01:09:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:09:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:11 Protein Expression Plasmid Vector	PHLAP92542063	Plasmid vector containing HLA-G*01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:11 protein. This plasmid can be used for constructing HLA-G*01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:12 Protein Expression Plasmid Vector	PHLAP92542064	Plasmid vector containing HLA-G*01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:12 protein. This plasmid can be used for constructing HLA-G*01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:13 Protein Expression Plasmid Vector	PHLAP92542065	Plasmid vector containing HLA-G*01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:13 protein. This plasmid can be used for constructing HLA-G*01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:14 Protein Expression Plasmid Vector	PHLAP92542066	Plasmid vector containing HLA-G*01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:14 protein. This plasmid can be used for constructing HLA-G*01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:15:01 Protein Expression Plasmid Vector	PHLAP92542067	Plasmid vector containing HLA-G*01:01:15:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:15:01 protein. This plasmid can be used for constructing HLA-G*01:01:15:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:15:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:15:02 Protein Expression Plasmid Vector	PHLAP92542068	Plasmid vector containing HLA-G*01:01:15:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:15:02 protein. This plasmid can be used for constructing HLA-G*01:01:15:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:15:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:16 Protein Expression Plasmid Vector	PHLAP92542069	Plasmid vector containing HLA-G*01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:16 protein. This plasmid can be used for constructing HLA-G*01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:17 Protein Expression Plasmid Vector	PHLAP92542070	Plasmid vector containing HLA-G*01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:17 protein. This plasmid can be used for constructing HLA-G*01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:18 Protein Expression Plasmid Vector	PHLAP92542071	Plasmid vector containing HLA-G*01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:18 protein. This plasmid can be used for constructing HLA-G*01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:19 Protein Expression Plasmid Vector	PHLAP92542072	Plasmid vector containing HLA-G*01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:19 protein. This plasmid can be used for constructing HLA-G*01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:20 Protein Expression Plasmid Vector	PHLAP92542073	Plasmid vector containing HLA-G*01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:20 protein. This plasmid can be used for constructing HLA-G*01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:21 Protein Expression Plasmid Vector	PHLAP92542074	Plasmid vector containing HLA-G*01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:21 protein. This plasmid can be used for constructing HLA-G*01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:22:01 Protein Expression Plasmid Vector	PHLAP92542075	Plasmid vector containing HLA-G*01:01:22:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:22:01 protein. This plasmid can be used for constructing HLA-G*01:01:22:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:22:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:22:02 Protein Expression Plasmid Vector	PHLAP92542076	Plasmid vector containing HLA-G*01:01:22:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:22:02 protein. This plasmid can be used for constructing HLA-G*01:01:22:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:22:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:22:03 Protein Expression Plasmid Vector	PHLAP92542077	Plasmid vector containing HLA-G*01:01:22:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:22:03 protein. This plasmid can be used for constructing HLA-G*01:01:22:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:22:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:22:04 Protein Expression Plasmid Vector	PHLAP92542078	Plasmid vector containing HLA-G*01:01:22:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:22:04 protein. This plasmid can be used for constructing HLA-G*01:01:22:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:22:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:22:05 Protein Expression Plasmid Vector	PHLAP92542079	Plasmid vector containing HLA-G*01:01:22:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:22:05 protein. This plasmid can be used for constructing HLA-G*01:01:22:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:22:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:22:06 Protein Expression Plasmid Vector	PHLAP92542080	Plasmid vector containing HLA-G*01:01:22:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:22:06 protein. This plasmid can be used for constructing HLA-G*01:01:22:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:22:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:23 Protein Expression Plasmid Vector	PHLAP92542081	Plasmid vector containing HLA-G*01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:23 protein. This plasmid can be used for constructing HLA-G*01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:24 Protein Expression Plasmid Vector	PHLAP92542082	Plasmid vector containing HLA-G*01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:24 protein. This plasmid can be used for constructing HLA-G*01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:25 Protein Expression Plasmid Vector	PHLAP92542083	Plasmid vector containing HLA-G*01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:25 protein. This plasmid can be used for constructing HLA-G*01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:26 Protein Expression Plasmid Vector	PHLAP92542084	Plasmid vector containing HLA-G*01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:26 protein. This plasmid can be used for constructing HLA-G*01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:27 Protein Expression Plasmid Vector	PHLAP92542085	Plasmid vector containing HLA-G*01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:27 protein. This plasmid can be used for constructing HLA-G*01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:28 Protein Expression Plasmid Vector	PHLAP92542086	Plasmid vector containing HLA-G*01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:28 protein. This plasmid can be used for constructing HLA-G*01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:29 Protein Expression Plasmid Vector	PHLAP92542087	Plasmid vector containing HLA-G*01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:29 protein. This plasmid can be used for constructing HLA-G*01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:30:01 Protein Expression Plasmid Vector	PHLAP92542088	Plasmid vector containing HLA-G*01:01:30:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:30:01 protein. This plasmid can be used for constructing HLA-G*01:01:30:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:30:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:30:02 Protein Expression Plasmid Vector	PHLAP92542089	Plasmid vector containing HLA-G*01:01:30:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:30:02 protein. This plasmid can be used for constructing HLA-G*01:01:30:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:30:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:01:31 Protein Expression Plasmid Vector	PHLAP92542090	Plasmid vector containing HLA-G*01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:31 protein. This plasmid can be used for constructing HLA-G*01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:32 Protein Expression Plasmid Vector	PHLAP92542091	Plasmid vector containing HLA-G*01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:32 protein. This plasmid can be used for constructing HLA-G*01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:33 Protein Expression Plasmid Vector	PHLAP92542092	Plasmid vector containing HLA-G*01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:33 protein. This plasmid can be used for constructing HLA-G*01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:34 Protein Expression Plasmid Vector	PHLAP92542093	Plasmid vector containing HLA-G*01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:34 protein. This plasmid can be used for constructing HLA-G*01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:01:35 Protein Expression Plasmid Vector	PHLAP92542094	Plasmid vector containing HLA-G*01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:01:35 protein. This plasmid can be used for constructing HLA-G*01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:02 Protein Expression Plasmid Vector	PHLAP92542095	Plasmid vector containing HLA-G*01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:02 protein. This plasmid can be used for constructing HLA-G*01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:03:01:01 Protein Expression Plasmid Vector	PHLAP92542096	Plasmid vector containing HLA-G*01:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:03:01:01 protein. This plasmid can be used for constructing HLA-G*01:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:03:01:02 Protein Expression Plasmid Vector	PHLAP92542097	Plasmid vector containing HLA-G*01:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:03:01:02 protein. This plasmid can be used for constructing HLA-G*01:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:04:01:01 Protein Expression Plasmid Vector	PHLAP92542098	Plasmid vector containing HLA-G*01:04:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:01:01 protein. This plasmid can be used for constructing HLA-G*01:04:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:01:02 Protein Expression Plasmid Vector	PHLAP92542099	Plasmid vector containing HLA-G*01:04:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:01:02 protein. This plasmid can be used for constructing HLA-G*01:04:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:01:03 Protein Expression Plasmid Vector	PHLAP925421000	Plasmid vector containing HLA-G*01:04:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:01:03 protein. This plasmid can be used for constructing HLA-G*01:04:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:01:04Q Protein Expression Plasmid Vector	PHLAP925421001	Plasmid vector containing HLA-G*01:04:01:04Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:01:04Q protein. This plasmid can be used for constructing HLA-G*01:04:01:04Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:01:04Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:01:05 Protein Expression Plasmid Vector	PHLAP925421002	Plasmid vector containing HLA-G*01:04:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:01:05 protein. This plasmid can be used for constructing HLA-G*01:04:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:01:06 Protein Expression Plasmid Vector	PHLAP925421003	Plasmid vector containing HLA-G*01:04:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:01:06 protein. This plasmid can be used for constructing HLA-G*01:04:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:01:07 Protein Expression Plasmid Vector	PHLAP925421004	Plasmid vector containing HLA-G*01:04:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:01:07 protein. This plasmid can be used for constructing HLA-G*01:04:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:04:01:08 Protein Expression Plasmid Vector	PHLAP92542105	Plasmid vector containing HLA-G*01:04:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:01:08 protein. This plasmid can be used for constructing HLA-G*01:04:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:01:09 Protein Expression Plasmid Vector	PHLAP92542106	Plasmid vector containing HLA-G*01:04:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:01:09 protein. This plasmid can be used for constructing HLA-G*01:04:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:01:10 Protein Expression Plasmid Vector	PHLAP92542107	Plasmid vector containing HLA-G*01:04:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:01:10 protein. This plasmid can be used for constructing HLA-G*01:04:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:02 Protein Expression Plasmid Vector	PHLAP92542108	Plasmid vector containing HLA-G*01:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:02 protein. This plasmid can be used for constructing HLA-G*01:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:03 Protein Expression Plasmid Vector	PHLAP92542109	Plasmid vector containing HLA-G*01:04:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:03 protein. This plasmid can be used for constructing HLA-G*01:04:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:04:01 Protein Expression Plasmid Vector	PHLAP92542110	Plasmid vector containing HLA-G*01:04:04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:04:01 protein. This plasmid can be used for constructing HLA-G*01:04:04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:04:02 Protein Expression Plasmid Vector	PHLAP92542111	Plasmid vector containing HLA-G*01:04:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:04:02 protein. This plasmid can be used for constructing HLA-G*01:04:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:04:05 Protein Expression Plasmid Vector	PHLAP925421112	Plasmid vector containing HLA-G*01:04:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:05 protein. This plasmid can be used for constructing HLA-G*01:04:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:06 Protein Expression Plasmid Vector	PHLAP925421113	Plasmid vector containing HLA-G*01:04:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:06 protein. This plasmid can be used for constructing HLA-G*01:04:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:07 Protein Expression Plasmid Vector	PHLAP925421114	Plasmid vector containing HLA-G*01:04:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:07 protein. This plasmid can be used for constructing HLA-G*01:04:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:08 Protein Expression Plasmid Vector	PHLAP925421115	Plasmid vector containing HLA-G*01:04:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:08 protein. This plasmid can be used for constructing HLA-G*01:04:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:09 Protein Expression Plasmid Vector	PHLAP925421116	Plasmid vector containing HLA-G*01:04:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:09 protein. This plasmid can be used for constructing HLA-G*01:04:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:10 Protein Expression Plasmid Vector	PHLAP925421117	Plasmid vector containing HLA-G*01:04:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:10 protein. This plasmid can be used for constructing HLA-G*01:04:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:04:11 Protein Expression Plasmid Vector	PHLAP925421118	Plasmid vector containing HLA-G*01:04:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:04:11 protein. This plasmid can be used for constructing HLA-G*01:04:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:04:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:05:01N Protein Expression Plasmid Vector	PHLAP925421119	Plasmid vector containing HLA-G*01:05:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:05:01N protein. This plasmid can be used for constructing HLA-G*01:05:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:05:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:05:02N Protein Expression Plasmid Vector	PHLAP925421 20	Plasmid vector containing HLA-G*01:05:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:05:02N protein. This plasmid can be used for constructing HLA-G*01:05:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:05:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:06:01:01 Protein Expression Plasmid Vector	PHLAP925421 21	Plasmid vector containing HLA-G*01:06:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:06:01:01 protein. This plasmid can be used for constructing HLA-G*01:06:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:06:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:06:01:02 Protein Expression Plasmid Vector	PHLAP925421 22	Plasmid vector containing HLA-G*01:06:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:06:01:02 protein. This plasmid can be used for constructing HLA-G*01:06:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:06:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:06:01:03 Protein Expression Plasmid Vector	PHLAP925421 23	Plasmid vector containing HLA-G*01:06:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:06:01:03 protein. This plasmid can be used for constructing HLA-G*01:06:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:06:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:06:02 Protein Expression Plasmid Vector	PHLAP925421 24	Plasmid vector containing HLA-G*01:06:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:06:02 protein. This plasmid can be used for constructing HLA-G*01:06:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:06:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:07 Protein Expression Plasmid Vector	PHLAP925421 25	Plasmid vector containing HLA-G*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:07 protein. This plasmid can be used for constructing HLA-G*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:08:01 Protein Expression Plasmid Vector	PHLAP925421 26	Plasmid vector containing HLA-G*01:08:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:08:01 protein. This plasmid can be used for constructing HLA-G*01:08:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:08:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:08:02 Protein Expression Plasmid Vector	PHLAP92542127	Plasmid vector containing HLA-G*01:08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:08:02 protein. This plasmid can be used for constructing HLA-G*01:08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:09 Protein Expression Plasmid Vector	PHLAP92542128	Plasmid vector containing HLA-G*01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:09 protein. This plasmid can be used for constructing HLA-G*01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:10 Protein Expression Plasmid Vector	PHLAP92542129	Plasmid vector containing HLA-G*01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:10 protein. This plasmid can be used for constructing HLA-G*01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:11 Protein Expression Plasmid Vector	PHLAP92542130	Plasmid vector containing HLA-G*01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:11 protein. This plasmid can be used for constructing HLA-G*01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:12 Protein Expression Plasmid Vector	PHLAP92542131	Plasmid vector containing HLA-G*01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:12 protein. This plasmid can be used for constructing HLA-G*01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:13N Protein Expression Plasmid Vector	PHLAP92542132	Plasmid vector containing HLA-G*01:13N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:13N protein. This plasmid can be used for constructing HLA-G*01:13N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:13N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:14 Protein Expression Plasmid Vector	PHLAP92542133	Plasmid vector containing HLA-G*01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:14 protein. This plasmid can be used for constructing HLA-G*01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:15 Protein Expression Plasmid Vector	PHLAP92542134	Plasmid vector containing HLA-G*01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:15 protein. This plasmid can be used for constructing HLA-G*01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:16 Protein Expression Plasmid Vector	PHLAP92542135	Plasmid vector containing HLA-G*01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:16 protein. This plasmid can be used for constructing HLA-G*01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:17 Protein Expression Plasmid Vector	PHLAP92542136	Plasmid vector containing HLA-G*01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:17 protein. This plasmid can be used for constructing HLA-G*01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:18 Protein Expression Plasmid Vector	PHLAP92542137	Plasmid vector containing HLA-G*01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:18 protein. This plasmid can be used for constructing HLA-G*01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:19 Protein Expression Plasmid Vector	PHLAP92542138	Plasmid vector containing HLA-G*01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:19 protein. This plasmid can be used for constructing HLA-G*01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:20 Protein Expression Plasmid Vector	PHLAP92542139	Plasmid vector containing HLA-G*01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:20 protein. This plasmid can be used for constructing HLA-G*01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:21N Protein Expression Plasmid Vector	PHLAP92542140	Plasmid vector containing HLA-G*01:21N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:21N protein. This plasmid can be used for constructing HLA-G*01:21N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:21N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:22 Protein Expression Plasmid Vector	PHLAP92542141	Plasmid vector containing HLA-G*01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:22 protein. This plasmid can be used for constructing HLA-G*01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:23 Protein Expression Plasmid Vector	PHLAP92542142	Plasmid vector containing HLA-G*01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:23 protein. This plasmid can be used for constructing HLA-G*01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:24:01 Protein Expression Plasmid Vector	PHLAP92542143	Plasmid vector containing HLA-G*01:24:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:24:01 protein. This plasmid can be used for constructing HLA-G*01:24:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:24:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:24:02 Protein Expression Plasmid Vector	PHLAP92542144	Plasmid vector containing HLA-G*01:24:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:24:02 protein. This plasmid can be used for constructing HLA-G*01:24:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:24:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:25N Protein Expression Plasmid Vector	PHLAP92542145	Plasmid vector containing HLA-G*01:25N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:25N protein. This plasmid can be used for constructing HLA-G*01:25N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:25N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:26 Protein Expression Plasmid Vector	PHLAP92542146	Plasmid vector containing HLA-G*01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:26 protein. This plasmid can be used for constructing HLA-G*01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:27 Protein Expression Plasmid Vector	PHLAP92542147	Plasmid vector containing HLA-G*01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:27 protein. This plasmid can be used for constructing HLA-G*01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:28N Protein Expression Plasmid Vector	PHLAP92542148	Plasmid vector containing HLA-G*01:28N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:28N protein. This plasmid can be used for constructing HLA-G*01:28N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:28N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:29 Protein Expression Plasmid Vector	PHLAP92542149	Plasmid vector containing HLA-G*01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:29 protein. This plasmid can be used for constructing HLA-G*01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:30 Protein Expression Plasmid Vector	PHLAP925421510	Plasmid vector containing HLA-G*01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:30 protein. This plasmid can be used for constructing HLA-G*01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:31 Protein Expression Plasmid Vector	PHLAP92542151	Plasmid vector containing HLA-G*01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:31 protein. This plasmid can be used for constructing HLA-G*01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:32 Protein Expression Plasmid Vector	PHLAP92542152	Plasmid vector containing HLA-G*01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:32 protein. This plasmid can be used for constructing HLA-G*01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:33 Protein Expression Plasmid Vector	PHLAP92542153	Plasmid vector containing HLA-G*01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:33 protein. This plasmid can be used for constructing HLA-G*01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:34 Protein Expression Plasmid Vector	PHLAP92542154	Plasmid vector containing HLA-G*01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:34 protein. This plasmid can be used for constructing HLA-G*01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:35 Protein Expression Plasmid Vector	PHLAP92542155	Plasmid vector containing HLA-G*01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:35 protein. This plasmid can be used for constructing HLA-G*01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:36Q Protein Expression Plasmid Vector	PHLAP92542156	Plasmid vector containing HLA-G*01:36Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:36Q protein. This plasmid can be used for constructing HLA-G*01:36Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:36Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:37 Protein Expression Plasmid Vector	PHLAP92542157	Plasmid vector containing HLA-G*01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:37 protein. This plasmid can be used for constructing HLA-G*01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:38Q Protein Expression Plasmid Vector	PHLAP92542158	Plasmid vector containing HLA-G*01:38Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:38Q protein. This plasmid can be used for constructing HLA-G*01:38Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:38Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:39 Protein Expression Plasmid Vector	PHLAP92542159	Plasmid vector containing HLA-G*01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:39 protein. This plasmid can be used for constructing HLA-G*01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:40 Protein Expression Plasmid Vector	PHLAP92542160	Plasmid vector containing HLA-G*01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:40 protein. This plasmid can be used for constructing HLA-G*01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:41 Protein Expression Plasmid Vector	PHLAP92542161	Plasmid vector containing HLA-G*01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:41 protein. This plasmid can be used for constructing HLA-G*01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:42 Protein Expression Plasmid Vector	PHLAP92542162	Plasmid vector containing HLA-G*01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:42 protein. This plasmid can be used for constructing HLA-G*01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:43 Protein Expression Plasmid Vector	PHLAP92542163	Plasmid vector containing HLA-G*01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:43 protein. This plasmid can be used for constructing HLA-G*01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:44 Protein Expression Plasmid Vector	PHLAP92542164	Plasmid vector containing HLA-G*01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:44 protein. This plasmid can be used for constructing HLA-G*01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:45 Protein Expression Plasmid Vector	PHLAP92542165	Plasmid vector containing HLA-G*01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:45 protein. This plasmid can be used for constructing HLA-G*01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:46 Protein Expression Plasmid Vector	PHLAP92542166	Plasmid vector containing HLA-G*01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:46 protein. This plasmid can be used for constructing HLA-G*01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:47 Protein Expression Plasmid Vector	PHLAP92542167	Plasmid vector containing HLA-G*01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:47 protein. This plasmid can be used for constructing HLA-G*01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:48 Protein Expression Plasmid Vector	PHLAP92542168	Plasmid vector containing HLA-G*01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:48 protein. This plasmid can be used for constructing HLA-G*01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:49 Protein Expression Plasmid Vector	PHLAP92542169	Plasmid vector containing HLA-G*01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:49 protein. This plasmid can be used for constructing HLA-G*01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:50Q Protein Expression Plasmid Vector	PHLAP92542170	Plasmid vector containing HLA-G*01:50Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:50Q protein. This plasmid can be used for constructing HLA-G*01:50Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:50Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:51 Protein Expression Plasmid Vector	PHLAP92542171	Plasmid vector containing HLA-G*01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:51 protein. This plasmid can be used for constructing HLA-G*01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:52 Protein Expression Plasmid Vector	PHLAP92542172	Plasmid vector containing HLA-G*01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:52 protein. This plasmid can be used for constructing HLA-G*01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:53 Protein Expression Plasmid Vector	PHLAP92542173	Plasmid vector containing HLA-G*01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:53 protein. This plasmid can be used for constructing HLA-G*01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:54 Protein Expression Plasmid Vector	PHLAP92542174	Plasmid vector containing HLA-G*01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:54 protein. This plasmid can be used for constructing HLA-G*01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:55 Protein Expression Plasmid Vector	PHLAP92542175	Plasmid vector containing HLA-G*01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:55 protein. This plasmid can be used for constructing HLA-G*01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:56 Protein Expression Plasmid Vector	PHLAP92542176	Plasmid vector containing HLA-G*01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:56 protein. This plasmid can be used for constructing HLA-G*01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:57 Protein Expression Plasmid Vector	PHLAP92542177	Plasmid vector containing HLA-G*01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:57 protein. This plasmid can be used for constructing HLA-G*01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:58 Protein Expression Plasmid Vector	PHLAP92542178	Plasmid vector containing HLA-G*01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:58 protein. This plasmid can be used for constructing HLA-G*01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:59 Protein Expression Plasmid Vector	PHLAP92542179	Plasmid vector containing HLA-G*01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:59 protein. This plasmid can be used for constructing HLA-G*01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:60 Protein Expression Plasmid Vector	PHLAP925421800	Plasmid vector containing HLA-G*01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:60 protein. This plasmid can be used for constructing HLA-G*01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:61 Protein Expression Plasmid Vector	PHLAP925421801	Plasmid vector containing HLA-G*01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:61 protein. This plasmid can be used for constructing HLA-G*01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*01:62 Protein Expression Plasmid Vector	PHLAP925421802	Plasmid vector containing HLA-G*01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:62 protein. This plasmid can be used for constructing HLA-G*01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-G*01:63 Protein Expression Plasmid Vector	PHLAP92542183	Plasmid vector containing HLA-G*01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*01:63 protein. This plasmid can be used for constructing HLA-G*01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-G*010110 Protein Expression Plasmid Vector	PHLAP92542184	Plasmid vector containing HLA-G*010110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-G*010110 protein. This plasmid can be used for constructing HLA-G*010110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-G*010110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92542185	Plasmid vector containing HLA-H*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:01:01:01 protein. This plasmid can be used for constructing HLA-H*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92542186	Plasmid vector containing HLA-H*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:01:01:02 protein. This plasmid can be used for constructing HLA-H*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92542187	Plasmid vector containing HLA-H*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:01:01:03 protein. This plasmid can be used for constructing HLA-H*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92542188	Plasmid vector containing HLA-H*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:01:01:04 protein. This plasmid can be used for constructing HLA-H*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92542189	Plasmid vector containing HLA-H*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:01:01:05 protein. This plasmid can be used for constructing HLA-H*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-H*01:01:01:06 Protein Expression Plasmid Vector	PHLAP92542190	Plasmid vector containing HLA-H*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:01:01:06 protein. This plasmid can be used for constructing HLA-H*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:01:01:07 Protein Expression Plasmid Vector	PHLAP92542191	Plasmid vector containing HLA-H*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:01:01:07 protein. This plasmid can be used for constructing HLA-H*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:01:01:08 Protein Expression Plasmid Vector	PHLAP92542192	Plasmid vector containing HLA-H*01:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:01:01:08 protein. This plasmid can be used for constructing HLA-H*01:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:01:01:09 Protein Expression Plasmid Vector	PHLAP92542193	Plasmid vector containing HLA-H*01:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:01:01:09 protein. This plasmid can be used for constructing HLA-H*01:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:01:02 Protein Expression Plasmid Vector	PHLAP92542194	Plasmid vector containing HLA-H*01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:01:02 protein. This plasmid can be used for constructing HLA-H*01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:01:03 Protein Expression Plasmid Vector	PHLAP92542195	Plasmid vector containing HLA-H*01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:01:03 protein. This plasmid can be used for constructing HLA-H*01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:01:04 Protein Expression Plasmid Vector	PHLAP92542196	Plasmid vector containing HLA-H*01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:01:04 protein. This plasmid can be used for constructing HLA-H*01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-H*01:02:01:01 Protein Expression Plasmid Vector	PHLAP92542197	Plasmid vector containing HLA-H*01:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:02:01:01 protein. This plasmid can be used for constructing HLA-H*01:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:02:01:02 Protein Expression Plasmid Vector	PHLAP92542198	Plasmid vector containing HLA-H*01:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:02:01:02 protein. This plasmid can be used for constructing HLA-H*01:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:02:01:03 Protein Expression Plasmid Vector	PHLAP92542199	Plasmid vector containing HLA-H*01:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:02:01:03 protein. This plasmid can be used for constructing HLA-H*01:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:02:01:04 Protein Expression Plasmid Vector	PHLAP922542200	Plasmid vector containing HLA-H*01:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:02:01:04 protein. This plasmid can be used for constructing HLA-H*01:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:02:01:05 Protein Expression Plasmid Vector	PHLAP922542201	Plasmid vector containing HLA-H*01:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:02:01:05 protein. This plasmid can be used for constructing HLA-H*01:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:02:01:06 Protein Expression Plasmid Vector	PHLAP922542202	Plasmid vector containing HLA-H*01:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:02:01:06 protein. This plasmid can be used for constructing HLA-H*01:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:03:01:01 Protein Expression Plasmid Vector	PHLAP922542203	Plasmid vector containing HLA-H*01:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:03:01:01 protein. This plasmid can be used for constructing HLA-H*01:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-H*01:03:01:02 Protein Expression Plasmid Vector	PHLAP92542204	Plasmid vector containing HLA-H*01:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:03:01:02 protein. This plasmid can be used for constructing HLA-H*01:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:03:01:03 Protein Expression Plasmid Vector	PHLAP92542205	Plasmid vector containing HLA-H*01:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:03:01:03 protein. This plasmid can be used for constructing HLA-H*01:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:04 Protein Expression Plasmid Vector	PHLAP92542206	Plasmid vector containing HLA-H*01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:04 protein. This plasmid can be used for constructing HLA-H*01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:05 Protein Expression Plasmid Vector	PHLAP92542207	Plasmid vector containing HLA-H*01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:05 protein. This plasmid can be used for constructing HLA-H*01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:06:01:01 Protein Expression Plasmid Vector	PHLAP92542208	Plasmid vector containing HLA-H*01:06:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:06:01:01 protein. This plasmid can be used for constructing HLA-H*01:06:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:06:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:06:01:02 Protein Expression Plasmid Vector	PHLAP92542209	Plasmid vector containing HLA-H*01:06:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:06:01:02 protein. This plasmid can be used for constructing HLA-H*01:06:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:06:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:07 Protein Expression Plasmid Vector	PHLAP925422110	Plasmid vector containing HLA-H*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:07 protein. This plasmid can be used for constructing HLA-H*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-H*01:08 Protein Expression Plasmid Vector	PHLAP92542211	Plasmid vector containing HLA-H*01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:08 protein. This plasmid can be used for constructing HLA-H*01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:09 Protein Expression Plasmid Vector	PHLAP92542212	Plasmid vector containing HLA-H*01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:09 protein. This plasmid can be used for constructing HLA-H*01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:10 Protein Expression Plasmid Vector	PHLAP92542213	Plasmid vector containing HLA-H*01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:10 protein. This plasmid can be used for constructing HLA-H*01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:11 Protein Expression Plasmid Vector	PHLAP92542214	Plasmid vector containing HLA-H*01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:11 protein. This plasmid can be used for constructing HLA-H*01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:12 Protein Expression Plasmid Vector	PHLAP92542215	Plasmid vector containing HLA-H*01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:12 protein. This plasmid can be used for constructing HLA-H*01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*01:13 Protein Expression Plasmid Vector	PHLAP92542216	Plasmid vector containing HLA-H*01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*01:13 protein. This plasmid can be used for constructing HLA-H*01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:01:01:01 Protein Expression Plasmid Vector	PHLAP92542217	Plasmid vector containing HLA-H*02:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:01:01:01 protein. This plasmid can be used for constructing HLA-H*02:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:01:01:02 Protein Expression Plasmid Vector	PHLAP92542218	Plasmid vector containing HLA-H*02:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:01:01:02 protein. This plasmid can be used for constructing HLA-H*02:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-H*02:01:01:03 Protein Expression Plasmid Vector	PHLAP92542219	Plasmid vector containing HLA-H*02:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:01:01:03 protein. This plasmid can be used for constructing HLA-H*02:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:01:01:04 Protein Expression Plasmid Vector	PHLAP92542220	Plasmid vector containing HLA-H*02:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:01:01:04 protein. This plasmid can be used for constructing HLA-H*02:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:01:01:05 Protein Expression Plasmid Vector	PHLAP92542221	Plasmid vector containing HLA-H*02:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:01:01:05 protein. This plasmid can be used for constructing HLA-H*02:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:01:02 Protein Expression Plasmid Vector	PHLAP92542222	Plasmid vector containing HLA-H*02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:01:02 protein. This plasmid can be used for constructing HLA-H*02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:02:01:01 Protein Expression Plasmid Vector	PHLAP92542223	Plasmid vector containing HLA-H*02:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:02:01:01 protein. This plasmid can be used for constructing HLA-H*02:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:02:01:02 Protein Expression Plasmid Vector	PHLAP92542224	Plasmid vector containing HLA-H*02:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:02:01:02 protein. This plasmid can be used for constructing HLA-H*02:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:02:02 Protein Expression Plasmid Vector	PHLAP92542225	Plasmid vector containing HLA-H*02:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:02:02 protein. This plasmid can be used for constructing HLA-H*02:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-H*02:03:01 Protein Expression Plasmid Vector	PHLAP92542226	Plasmid vector containing HLA-H*02:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:03:01 protein. This plasmid can be used for constructing HLA-H*02:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:03:02:01 Protein Expression Plasmid Vector	PHLAP92542227	Plasmid vector containing HLA-H*02:03:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:03:02:01 protein. This plasmid can be used for constructing HLA-H*02:03:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:03:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:03:02:02 Protein Expression Plasmid Vector	PHLAP92542228	Plasmid vector containing HLA-H*02:03:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:03:02:02 protein. This plasmid can be used for constructing HLA-H*02:03:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:03:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:04:01 Protein Expression Plasmid Vector	PHLAP92542229	Plasmid vector containing HLA-H*02:04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:04:01 protein. This plasmid can be used for constructing HLA-H*02:04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:04:02 Protein Expression Plasmid Vector	PHLAP92542230	Plasmid vector containing HLA-H*02:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:04:02 protein. This plasmid can be used for constructing HLA-H*02:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:04:03 Protein Expression Plasmid Vector	PHLAP92542231	Plasmid vector containing HLA-H*02:04:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:04:03 protein. This plasmid can be used for constructing HLA-H*02:04:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:04:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:05:01:01 Protein Expression Plasmid Vector	PHLAP92542232	Plasmid vector containing HLA-H*02:05:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:05:01:01 protein. This plasmid can be used for constructing HLA-H*02:05:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:05:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-H*02:05:01:02 Protein Expression Plasmid Vector	PHLAP92542233	Plasmid vector containing HLA-H*02:05:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:05:01:02 protein. This plasmid can be used for constructing HLA-H*02:05:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:05:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:05:01:03 Protein Expression Plasmid Vector	PHLAP92542234	Plasmid vector containing HLA-H*02:05:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:05:01:03 protein. This plasmid can be used for constructing HLA-H*02:05:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:05:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:05:01:04 Protein Expression Plasmid Vector	PHLAP92542235	Plasmid vector containing HLA-H*02:05:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:05:01:04 protein. This plasmid can be used for constructing HLA-H*02:05:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:05:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:06 Protein Expression Plasmid Vector	PHLAP92542236	Plasmid vector containing HLA-H*02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:06 protein. This plasmid can be used for constructing HLA-H*02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:07:01:01 Protein Expression Plasmid Vector	PHLAP92542237	Plasmid vector containing HLA-H*02:07:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:07:01:01 protein. This plasmid can be used for constructing HLA-H*02:07:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:07:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:07:01:02 Protein Expression Plasmid Vector	PHLAP92542238	Plasmid vector containing HLA-H*02:07:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:07:01:02 protein. This plasmid can be used for constructing HLA-H*02:07:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:07:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:07:02 Protein Expression Plasmid Vector	PHLAP92542239	Plasmid vector containing HLA-H*02:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:07:02 protein. This plasmid can be used for constructing HLA-H*02:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-H*02:08:01:01 Protein Expression Plasmid Vector	PHLAP92542240	Plasmid vector containing HLA-H*02:08:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:08:01:01 protein. This plasmid can be used for constructing HLA-H*02:08:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:08:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:08:01:02 Protein Expression Plasmid Vector	PHLAP92542241	Plasmid vector containing HLA-H*02:08:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:08:01:02 protein. This plasmid can be used for constructing HLA-H*02:08:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:08:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:08:01:03 Protein Expression Plasmid Vector	PHLAP92542242	Plasmid vector containing HLA-H*02:08:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:08:01:03 protein. This plasmid can be used for constructing HLA-H*02:08:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:08:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:09 Protein Expression Plasmid Vector	PHLAP92542243	Plasmid vector containing HLA-H*02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:09 protein. This plasmid can be used for constructing HLA-H*02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:10:01:01 Protein Expression Plasmid Vector	PHLAP92542244	Plasmid vector containing HLA-H*02:10:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:10:01:01 protein. This plasmid can be used for constructing HLA-H*02:10:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:10:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:10:01:02 Protein Expression Plasmid Vector	PHLAP92542245	Plasmid vector containing HLA-H*02:10:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:10:01:02 protein. This plasmid can be used for constructing HLA-H*02:10:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:10:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:11:01:01 Protein Expression Plasmid Vector	PHLAP92542246	Plasmid vector containing HLA-H*02:11:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:11:01:01 protein. This plasmid can be used for constructing HLA-H*02:11:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:11:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-H*02:11:01:02 Protein Expression Plasmid Vector	PHLAP92542247	Plasmid vector containing HLA-H*02:11:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:11:01:02 protein. This plasmid can be used for constructing HLA-H*02:11:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:11:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:12 Protein Expression Plasmid Vector	PHLAP92542248	Plasmid vector containing HLA-H*02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:12 protein. This plasmid can be used for constructing HLA-H*02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:13 Protein Expression Plasmid Vector	PHLAP92542249	Plasmid vector containing HLA-H*02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:13 protein. This plasmid can be used for constructing HLA-H*02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:14 Protein Expression Plasmid Vector	PHLAP92542250	Plasmid vector containing HLA-H*02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:14 protein. This plasmid can be used for constructing HLA-H*02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:15 Protein Expression Plasmid Vector	PHLAP92542251	Plasmid vector containing HLA-H*02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:15 protein. This plasmid can be used for constructing HLA-H*02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:16 Protein Expression Plasmid Vector	PHLAP92542252	Plasmid vector containing HLA-H*02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:16 protein. This plasmid can be used for constructing HLA-H*02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:17 Protein Expression Plasmid Vector	PHLAP92542253	Plasmid vector containing HLA-H*02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:17 protein. This plasmid can be used for constructing HLA-H*02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:18 Protein Expression Plasmid Vector	PHLAP92542254	Plasmid vector containing HLA-H*02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:18 protein. This plasmid can be used for constructing HLA-H*02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-H*02:19:01:01 Protein Expression Plasmid Vector	PHLAP92542255	Plasmid vector containing HLA-H*02:19:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:19:01:01 protein. This plasmid can be used for constructing HLA-H*02:19:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:19:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:19:01:02 Protein Expression Plasmid Vector	PHLAP92542256	Plasmid vector containing HLA-H*02:19:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:19:01:02 protein. This plasmid can be used for constructing HLA-H*02:19:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:19:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:20 Protein Expression Plasmid Vector	PHLAP92542257	Plasmid vector containing HLA-H*02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:20 protein. This plasmid can be used for constructing HLA-H*02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:21 Protein Expression Plasmid Vector	PHLAP92542258	Plasmid vector containing HLA-H*02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:21 protein. This plasmid can be used for constructing HLA-H*02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:22 Protein Expression Plasmid Vector	PHLAP92542259	Plasmid vector containing HLA-H*02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:22 protein. This plasmid can be used for constructing HLA-H*02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:23 Protein Expression Plasmid Vector	PHLAP92542260	Plasmid vector containing HLA-H*02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:23 protein. This plasmid can be used for constructing HLA-H*02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:24 Protein Expression Plasmid Vector	PHLAP92542261	Plasmid vector containing HLA-H*02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:24 protein. This plasmid can be used for constructing HLA-H*02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-H*02:25:01:01 Protein Expression Plasmid Vector	PHLAP92542262	Plasmid vector containing HLA-H*02:25:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:25:01:01 protein. This plasmid can be used for constructing HLA-H*02:25:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:25:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:25:01:02 Protein Expression Plasmid Vector	PHLAP92542263	Plasmid vector containing HLA-H*02:25:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:25:01:02 protein. This plasmid can be used for constructing HLA-H*02:25:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:25:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:26 Protein Expression Plasmid Vector	PHLAP92542264	Plasmid vector containing HLA-H*02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:26 protein. This plasmid can be used for constructing HLA-H*02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:27 Protein Expression Plasmid Vector	PHLAP92542265	Plasmid vector containing HLA-H*02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:27 protein. This plasmid can be used for constructing HLA-H*02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:28 Protein Expression Plasmid Vector	PHLAP92542266	Plasmid vector containing HLA-H*02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:28 protein. This plasmid can be used for constructing HLA-H*02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:29 Protein Expression Plasmid Vector	PHLAP92542267	Plasmid vector containing HLA-H*02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:29 protein. This plasmid can be used for constructing HLA-H*02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:30 Protein Expression Plasmid Vector	PHLAP92542268	Plasmid vector containing HLA-H*02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:30 protein. This plasmid can be used for constructing HLA-H*02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-H*02:31 Protein Expression Plasmid Vector	PHLAP92542269	Plasmid vector containing HLA-H*02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*02:31 protein. This plasmid can be used for constructing HLA-H*02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-H*03:01 Protein Expression Plasmid Vector	PHLAP92542270	Plasmid vector containing HLA-H*03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-H*03:01 protein. This plasmid can be used for constructing HLA-H*03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-H*03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-HFE*001:01:01 Protein Expression Plasmid Vector	PHLAP92542271	Plasmid vector containing HLA-HFE*001:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-HFE*001:01:01 protein. This plasmid can be used for constructing HLA-HFE*001:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-HFE*001:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-HFE*001:01:02 Protein Expression Plasmid Vector	PHLAP92542272	Plasmid vector containing HLA-HFE*001:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-HFE*001:01:02 protein. This plasmid can be used for constructing HLA-HFE*001:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-HFE*001:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-HFE*001:01:03 Protein Expression Plasmid Vector	PHLAP92542273	Plasmid vector containing HLA-HFE*001:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-HFE*001:01:03 protein. This plasmid can be used for constructing HLA-HFE*001:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-HFE*001:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-HFE*002 Protein Expression Plasmid Vector	PHLAP92542274	Plasmid vector containing HLA-HFE*002 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-HFE*002 protein. This plasmid can be used for constructing HLA-HFE*002 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-HFE*002 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-HFE*003 Protein Expression Plasmid Vector	PHLAP92542275	Plasmid vector containing HLA-HFE*003 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-HFE*003 protein. This plasmid can be used for constructing HLA-HFE*003 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-HFE*003 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-HFE*004 Protein Expression Plasmid Vector	PHLAP92542276	Plasmid vector containing HLA-HFE*004 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-HFE*004 protein. This plasmid can be used for constructing HLA-HFE*004 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-HFE*004 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-J*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92542277	Plasmid vector containing HLA-J*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:01 protein. This plasmid can be used for constructing HLA-J*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92542278	Plasmid vector containing HLA-J*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:02 protein. This plasmid can be used for constructing HLA-J*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92542279	Plasmid vector containing HLA-J*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:03 protein. This plasmid can be used for constructing HLA-J*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92542280	Plasmid vector containing HLA-J*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:04 protein. This plasmid can be used for constructing HLA-J*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92542281	Plasmid vector containing HLA-J*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:05 protein. This plasmid can be used for constructing HLA-J*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:06 Protein Expression Plasmid Vector	PHLAP92542282	Plasmid vector containing HLA-J*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:06 protein. This plasmid can be used for constructing HLA-J*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:07 Protein Expression Plasmid Vector	PHLAP92542283	Plasmid vector containing HLA-J*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:07 protein. This plasmid can be used for constructing HLA-J*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-J*01:01:01:08 Protein Expression Plasmid Vector	PHLAP92542284	Plasmid vector containing HLA-J*01:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:08 protein. This plasmid can be used for constructing HLA-J*01:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:09 Protein Expression Plasmid Vector	PHLAP92542285	Plasmid vector containing HLA-J*01:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:09 protein. This plasmid can be used for constructing HLA-J*01:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:10 Protein Expression Plasmid Vector	PHLAP92542286	Plasmid vector containing HLA-J*01:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:10 protein. This plasmid can be used for constructing HLA-J*01:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:11 Protein Expression Plasmid Vector	PHLAP92542287	Plasmid vector containing HLA-J*01:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:11 protein. This plasmid can be used for constructing HLA-J*01:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:12 Protein Expression Plasmid Vector	PHLAP92542288	Plasmid vector containing HLA-J*01:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:12 protein. This plasmid can be used for constructing HLA-J*01:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:13 Protein Expression Plasmid Vector	PHLAP92542289	Plasmid vector containing HLA-J*01:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:13 protein. This plasmid can be used for constructing HLA-J*01:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:14 Protein Expression Plasmid Vector	PHLAP92542290	Plasmid vector containing HLA-J*01:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:14 protein. This plasmid can be used for constructing HLA-J*01:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-J*01:01:01:15 Protein Expression Plasmid Vector	PHLAP92542291	Plasmid vector containing HLA-J*01:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:15 protein. This plasmid can be used for constructing HLA-J*01:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:16 Protein Expression Plasmid Vector	PHLAP92542292	Plasmid vector containing HLA-J*01:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:16 protein. This plasmid can be used for constructing HLA-J*01:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:17 Protein Expression Plasmid Vector	PHLAP92542293	Plasmid vector containing HLA-J*01:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:17 protein. This plasmid can be used for constructing HLA-J*01:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:18 Protein Expression Plasmid Vector	PHLAP92542294	Plasmid vector containing HLA-J*01:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:18 protein. This plasmid can be used for constructing HLA-J*01:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:19 Protein Expression Plasmid Vector	PHLAP92542295	Plasmid vector containing HLA-J*01:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:19 protein. This plasmid can be used for constructing HLA-J*01:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:20 Protein Expression Plasmid Vector	PHLAP92542296	Plasmid vector containing HLA-J*01:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:20 protein. This plasmid can be used for constructing HLA-J*01:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:21 Protein Expression Plasmid Vector	PHLAP92542297	Plasmid vector containing HLA-J*01:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:21 protein. This plasmid can be used for constructing HLA-J*01:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-J*01:01:01:22 Protein Expression Plasmid Vector	PHLAP92542298	Plasmid vector containing HLA-J*01:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:22 protein. This plasmid can be used for constructing HLA-J*01:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:23 Protein Expression Plasmid Vector	PHLAP92542299	Plasmid vector containing HLA-J*01:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:23 protein. This plasmid can be used for constructing HLA-J*01:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:24 Protein Expression Plasmid Vector	PHLAP92542300	Plasmid vector containing HLA-J*01:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:24 protein. This plasmid can be used for constructing HLA-J*01:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:25 Protein Expression Plasmid Vector	PHLAP92542301	Plasmid vector containing HLA-J*01:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:25 protein. This plasmid can be used for constructing HLA-J*01:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:26 Protein Expression Plasmid Vector	PHLAP92542302	Plasmid vector containing HLA-J*01:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:26 protein. This plasmid can be used for constructing HLA-J*01:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:27 Protein Expression Plasmid Vector	PHLAP92542303	Plasmid vector containing HLA-J*01:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:27 protein. This plasmid can be used for constructing HLA-J*01:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:28 Protein Expression Plasmid Vector	PHLAP92542304	Plasmid vector containing HLA-J*01:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:28 protein. This plasmid can be used for constructing HLA-J*01:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-J*01:01:01:29 Protein Expression Plasmid Vector	PHLAP92542305	Plasmid vector containing HLA-J*01:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:29 protein. This plasmid can be used for constructing HLA-J*01:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:30 Protein Expression Plasmid Vector	PHLAP92542306	Plasmid vector containing HLA-J*01:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:30 protein. This plasmid can be used for constructing HLA-J*01:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:31 Protein Expression Plasmid Vector	PHLAP92542307	Plasmid vector containing HLA-J*01:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:31 protein. This plasmid can be used for constructing HLA-J*01:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*01:01:01:32 Protein Expression Plasmid Vector	PHLAP92542308	Plasmid vector containing HLA-J*01:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*01:01:01:32 protein. This plasmid can be used for constructing HLA-J*01:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*01:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-J*02:01 Protein Expression Plasmid Vector	PHLAP92542309	Plasmid vector containing HLA-J*02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-J*02:01 protein. This plasmid can be used for constructing HLA-J*02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-J*02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-K*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92542310	Plasmid vector containing HLA-K*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-K*01:01:01:01 protein. This plasmid can be used for constructing HLA-K*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-K*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-K*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92542311	Plasmid vector containing HLA-K*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-K*01:01:01:02 protein. This plasmid can be used for constructing HLA-K*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-K*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-K*01:01:01:03 Protein Expression Plasmid Vector	PHLAP925423112	Plasmid vector containing HLA-K*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-K*01:01:01:03 protein. This plasmid can be used for constructing HLA-K*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-K*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-K*01:01:01:04 Protein Expression Plasmid Vector	PHLAP925423113	Plasmid vector containing HLA-K*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-K*01:01:01:04 protein. This plasmid can be used for constructing HLA-K*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-K*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-K*01:02 Protein Expression Plasmid Vector	PHLAP925423114	Plasmid vector containing HLA-K*01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-K*01:02 protein. This plasmid can be used for constructing HLA-K*01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-K*01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-K*01:03 Protein Expression Plasmid Vector	PHLAP925423115	Plasmid vector containing HLA-K*01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-K*01:03 protein. This plasmid can be used for constructing HLA-K*01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-K*01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-K*01:04 Protein Expression Plasmid Vector	PHLAP925423116	Plasmid vector containing HLA-K*01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-K*01:04 protein. This plasmid can be used for constructing HLA-K*01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-K*01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-L*01:01:01:01 Protein Expression Plasmid Vector	PHLAP925423117	Plasmid vector containing HLA-L*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-L*01:01:01:01 protein. This plasmid can be used for constructing HLA-L*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-L*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-L*01:01:01:02 Protein Expression Plasmid Vector	PHLAP925423118	Plasmid vector containing HLA-L*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-L*01:01:01:02 protein. This plasmid can be used for constructing HLA-L*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-L*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-L*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92542319	Plasmid vector containing HLA-L*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-L*01:01:01:03 protein. This plasmid can be used for constructing HLA-L*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-L*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-L*01:01:02 Protein Expression Plasmid Vector	PHLAP92542320	Plasmid vector containing HLA-L*01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-L*01:01:02 protein. This plasmid can be used for constructing HLA-L*01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-L*01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-L*01:02 Protein Expression Plasmid Vector	PHLAP92542321	Plasmid vector containing HLA-L*01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-L*01:02 protein. This plasmid can be used for constructing HLA-L*01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-L*01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-L*01:03 Protein Expression Plasmid Vector	PHLAP92542322	Plasmid vector containing HLA-L*01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-L*01:03 protein. This plasmid can be used for constructing HLA-L*01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-L*01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*001:01:01 Protein Expression Plasmid Vector	PHLAP92542323	Plasmid vector containing HLA-MICA*001:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*001:01:01 protein. This plasmid can be used for constructing HLA-MICA*001:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*001:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*001:01:02 Protein Expression Plasmid Vector	PHLAP92542324	Plasmid vector containing HLA-MICA*001:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*001:01:02 protein. This plasmid can be used for constructing HLA-MICA*001:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*001:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*001:02 Protein Expression Plasmid Vector	PHLAP92542325	Plasmid vector containing HLA-MICA*001:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*001:02 protein. This plasmid can be used for constructing HLA-MICA*001:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*001:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*002:01:01 Protein Expression Plasmid Vector	PHLAP92542326	Plasmid vector containing HLA-MICA*002:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:01 protein. This plasmid can be used for constructing HLA-MICA*002:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:02 Protein Expression Plasmid Vector	PHLAP92542327	Plasmid vector containing HLA-MICA*002:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:02 protein. This plasmid can be used for constructing HLA-MICA*002:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:03 Protein Expression Plasmid Vector	PHLAP92542328	Plasmid vector containing HLA-MICA*002:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:03 protein. This plasmid can be used for constructing HLA-MICA*002:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:04 Protein Expression Plasmid Vector	PHLAP92542329	Plasmid vector containing HLA-MICA*002:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:04 protein. This plasmid can be used for constructing HLA-MICA*002:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:05 Protein Expression Plasmid Vector	PHLAP92542330	Plasmid vector containing HLA-MICA*002:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:05 protein. This plasmid can be used for constructing HLA-MICA*002:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:06 Protein Expression Plasmid Vector	PHLAP92542331	Plasmid vector containing HLA-MICA*002:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:06 protein. This plasmid can be used for constructing HLA-MICA*002:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:07 Protein Expression Plasmid Vector	PHLAP92542332	Plasmid vector containing HLA-MICA*002:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:07 protein. This plasmid can be used for constructing HLA-MICA*002:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*002:01:08 Protein Expression Plasmid Vector	PHLAP925423313	Plasmid vector containing HLA-MICA*002:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:08 protein. This plasmid can be used for constructing HLA-MICA*002:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:09 Protein Expression Plasmid Vector	PHLAP925423314	Plasmid vector containing HLA-MICA*002:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:09 protein. This plasmid can be used for constructing HLA-MICA*002:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:10 Protein Expression Plasmid Vector	PHLAP925423315	Plasmid vector containing HLA-MICA*002:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:10 protein. This plasmid can be used for constructing HLA-MICA*002:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:11 Protein Expression Plasmid Vector	PHLAP925423316	Plasmid vector containing HLA-MICA*002:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:11 protein. This plasmid can be used for constructing HLA-MICA*002:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:12 Protein Expression Plasmid Vector	PHLAP925423317	Plasmid vector containing HLA-MICA*002:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:12 protein. This plasmid can be used for constructing HLA-MICA*002:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:13Q Protein Expression Plasmid Vector	PHLAP925423318	Plasmid vector containing HLA-MICA*002:01:13Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:13Q protein. This plasmid can be used for constructing HLA-MICA*002:01:13Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:13Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:14 Protein Expression Plasmid Vector	PHLAP925423319	Plasmid vector containing HLA-MICA*002:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:14 protein. This plasmid can be used for constructing HLA-MICA*002:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*002:01:15 Protein Expression Plasmid Vector	PHLAP92542340	Plasmid vector containing HLA-MICA*002:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:15 protein. This plasmid can be used for constructing HLA-MICA*002:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:16 Protein Expression Plasmid Vector	PHLAP92542341	Plasmid vector containing HLA-MICA*002:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:16 protein. This plasmid can be used for constructing HLA-MICA*002:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:17 Protein Expression Plasmid Vector	PHLAP92542342	Plasmid vector containing HLA-MICA*002:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:17 protein. This plasmid can be used for constructing HLA-MICA*002:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:18 Protein Expression Plasmid Vector	PHLAP92542343	Plasmid vector containing HLA-MICA*002:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:18 protein. This plasmid can be used for constructing HLA-MICA*002:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:19 Protein Expression Plasmid Vector	PHLAP92542344	Plasmid vector containing HLA-MICA*002:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:19 protein. This plasmid can be used for constructing HLA-MICA*002:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:20 Protein Expression Plasmid Vector	PHLAP92542345	Plasmid vector containing HLA-MICA*002:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:20 protein. This plasmid can be used for constructing HLA-MICA*002:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:21 Protein Expression Plasmid Vector	PHLAP92542346	Plasmid vector containing HLA-MICA*002:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:21 protein. This plasmid can be used for constructing HLA-MICA*002:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*002:01:22 Protein Expression Plasmid Vector	PHLAP92542347	Plasmid vector containing HLA-MICA*002:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:22 protein. This plasmid can be used for constructing HLA-MICA*002:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:23 Protein Expression Plasmid Vector	PHLAP92542348	Plasmid vector containing HLA-MICA*002:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:23 protein. This plasmid can be used for constructing HLA-MICA*002:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:24 Protein Expression Plasmid Vector	PHLAP92542349	Plasmid vector containing HLA-MICA*002:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:24 protein. This plasmid can be used for constructing HLA-MICA*002:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:25 Protein Expression Plasmid Vector	PHLAP92542350	Plasmid vector containing HLA-MICA*002:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:25 protein. This plasmid can be used for constructing HLA-MICA*002:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:26 Protein Expression Plasmid Vector	PHLAP92542351	Plasmid vector containing HLA-MICA*002:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:26 protein. This plasmid can be used for constructing HLA-MICA*002:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:27 Protein Expression Plasmid Vector	PHLAP92542352	Plasmid vector containing HLA-MICA*002:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:27 protein. This plasmid can be used for constructing HLA-MICA*002:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:28 Protein Expression Plasmid Vector	PHLAP92542353	Plasmid vector containing HLA-MICA*002:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:28 protein. This plasmid can be used for constructing HLA-MICA*002:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*002:01:29 Protein Expression Plasmid Vector	PHLAP92542354	Plasmid vector containing HLA-MICA*002:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:29 protein. This plasmid can be used for constructing HLA-MICA*002:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:01:30 Protein Expression Plasmid Vector	PHLAP92542355	Plasmid vector containing HLA-MICA*002:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:01:30 protein. This plasmid can be used for constructing HLA-MICA*002:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:02 Protein Expression Plasmid Vector	PHLAP92542356	Plasmid vector containing HLA-MICA*002:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:02 protein. This plasmid can be used for constructing HLA-MICA*002:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:03 Protein Expression Plasmid Vector	PHLAP92542357	Plasmid vector containing HLA-MICA*002:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:03 protein. This plasmid can be used for constructing HLA-MICA*002:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:04 Protein Expression Plasmid Vector	PHLAP92542358	Plasmid vector containing HLA-MICA*002:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:04 protein. This plasmid can be used for constructing HLA-MICA*002:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:05 Protein Expression Plasmid Vector	PHLAP92542359	Plasmid vector containing HLA-MICA*002:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:05 protein. This plasmid can be used for constructing HLA-MICA*002:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:06 Protein Expression Plasmid Vector	PHLAP92542360	Plasmid vector containing HLA-MICA*002:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:06 protein. This plasmid can be used for constructing HLA-MICA*002:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*002:07 Protein Expression Plasmid Vector	PHLAP92542361	Plasmid vector containing HLA-MICA*002:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:07 protein. This plasmid can be used for constructing HLA-MICA*002:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:08 Protein Expression Plasmid Vector	PHLAP92542362	Plasmid vector containing HLA-MICA*002:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:08 protein. This plasmid can be used for constructing HLA-MICA*002:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:09 Protein Expression Plasmid Vector	PHLAP92542363	Plasmid vector containing HLA-MICA*002:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:09 protein. This plasmid can be used for constructing HLA-MICA*002:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:10 Protein Expression Plasmid Vector	PHLAP92542364	Plasmid vector containing HLA-MICA*002:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:10 protein. This plasmid can be used for constructing HLA-MICA*002:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:11 Protein Expression Plasmid Vector	PHLAP92542365	Plasmid vector containing HLA-MICA*002:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:11 protein. This plasmid can be used for constructing HLA-MICA*002:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:12 Protein Expression Plasmid Vector	PHLAP92542366	Plasmid vector containing HLA-MICA*002:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:12 protein. This plasmid can be used for constructing HLA-MICA*002:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*002:13 Protein Expression Plasmid Vector	PHLAP92542367	Plasmid vector containing HLA-MICA*002:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:13 protein. This plasmid can be used for constructing HLA-MICA*002:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*002:14 Protein Expression Plasmid Vector	PHLAP92542368	Plasmid vector containing HLA-MICA*002:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*002:14 protein. This plasmid can be used for constructing HLA-MICA*002:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*002:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*003 Protein Expression Plasmid Vector	PHLAP92542369	Plasmid vector containing HLA-MICA*003 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*003 protein. This plasmid can be used for constructing HLA-MICA*003 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*003 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:01 Protein Expression Plasmid Vector	PHLAP92542370	Plasmid vector containing HLA-MICA*004:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:01 protein. This plasmid can be used for constructing HLA-MICA*004:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:02 Protein Expression Plasmid Vector	PHLAP92542371	Plasmid vector containing HLA-MICA*004:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:02 protein. This plasmid can be used for constructing HLA-MICA*004:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:03 Protein Expression Plasmid Vector	PHLAP92542372	Plasmid vector containing HLA-MICA*004:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:03 protein. This plasmid can be used for constructing HLA-MICA*004:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:04 Protein Expression Plasmid Vector	PHLAP92542373	Plasmid vector containing HLA-MICA*004:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:04 protein. This plasmid can be used for constructing HLA-MICA*004:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:05 Protein Expression Plasmid Vector	PHLAP92542374	Plasmid vector containing HLA-MICA*004:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:05 protein. This plasmid can be used for constructing HLA-MICA*004:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*004:01:06 Protein Expression Plasmid Vector	PHLAP92542375	Plasmid vector containing HLA-MICA*004:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:06 protein. This plasmid can be used for constructing HLA-MICA*004:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:07 Protein Expression Plasmid Vector	PHLAP92542376	Plasmid vector containing HLA-MICA*004:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:07 protein. This plasmid can be used for constructing HLA-MICA*004:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:08 Protein Expression Plasmid Vector	PHLAP92542377	Plasmid vector containing HLA-MICA*004:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:08 protein. This plasmid can be used for constructing HLA-MICA*004:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:09 Protein Expression Plasmid Vector	PHLAP92542378	Plasmid vector containing HLA-MICA*004:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:09 protein. This plasmid can be used for constructing HLA-MICA*004:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:10 Protein Expression Plasmid Vector	PHLAP92542379	Plasmid vector containing HLA-MICA*004:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:10 protein. This plasmid can be used for constructing HLA-MICA*004:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:11 Protein Expression Plasmid Vector	PHLAP92542380	Plasmid vector containing HLA-MICA*004:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:11 protein. This plasmid can be used for constructing HLA-MICA*004:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:12 Protein Expression Plasmid Vector	PHLAP92542381	Plasmid vector containing HLA-MICA*004:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:12 protein. This plasmid can be used for constructing HLA-MICA*004:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*004:01:13 Protein Expression Plasmid Vector	PHLAP925423812	Plasmid vector containing HLA-MICA*004:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:13 protein. This plasmid can be used for constructing HLA-MICA*004:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:14 Protein Expression Plasmid Vector	PHLAP925423813	Plasmid vector containing HLA-MICA*004:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:14 protein. This plasmid can be used for constructing HLA-MICA*004:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:01:15 Protein Expression Plasmid Vector	PHLAP925423814	Plasmid vector containing HLA-MICA*004:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:01:15 protein. This plasmid can be used for constructing HLA-MICA*004:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:02 Protein Expression Plasmid Vector	PHLAP925423815	Plasmid vector containing HLA-MICA*004:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:02 protein. This plasmid can be used for constructing HLA-MICA*004:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:03 Protein Expression Plasmid Vector	PHLAP925423816	Plasmid vector containing HLA-MICA*004:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:03 protein. This plasmid can be used for constructing HLA-MICA*004:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*004:04 Protein Expression Plasmid Vector	PHLAP925423817	Plasmid vector containing HLA-MICA*004:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*004:04 protein. This plasmid can be used for constructing HLA-MICA*004:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*004:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*005 Protein Expression Plasmid Vector	PHLAP925423818	Plasmid vector containing HLA-MICA*005 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*005 protein. This plasmid can be used for constructing HLA-MICA*005 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*005 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*006 Protein Expression Plasmid Vector	PHLAP92542389	Plasmid vector containing HLA-MICA*006 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*006 protein. This plasmid can be used for constructing HLA-MICA*006 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*006 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:01:01 Protein Expression Plasmid Vector	PHLAP92542390	Plasmid vector containing HLA-MICA*007:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:01:01 protein. This plasmid can be used for constructing HLA-MICA*007:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:01:02 Protein Expression Plasmid Vector	PHLAP92542391	Plasmid vector containing HLA-MICA*007:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:01:02 protein. This plasmid can be used for constructing HLA-MICA*007:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:01:03 Protein Expression Plasmid Vector	PHLAP92542392	Plasmid vector containing HLA-MICA*007:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:01:03 protein. This plasmid can be used for constructing HLA-MICA*007:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:01:04 Protein Expression Plasmid Vector	PHLAP92542393	Plasmid vector containing HLA-MICA*007:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:01:04 protein. This plasmid can be used for constructing HLA-MICA*007:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:01:05 Protein Expression Plasmid Vector	PHLAP92542394	Plasmid vector containing HLA-MICA*007:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:01:05 protein. This plasmid can be used for constructing HLA-MICA*007:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:01:06 Protein Expression Plasmid Vector	PHLAP92542395	Plasmid vector containing HLA-MICA*007:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:01:06 protein. This plasmid can be used for constructing HLA-MICA*007:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*007:01:07 Protein Expression Plasmid Vector	PHLAP92542396	Plasmid vector containing HLA-MICA*007:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:01:07 protein. This plasmid can be used for constructing HLA-MICA*007:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:01:08 Protein Expression Plasmid Vector	PHLAP92542397	Plasmid vector containing HLA-MICA*007:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:01:08 protein. This plasmid can be used for constructing HLA-MICA*007:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:01:09 Protein Expression Plasmid Vector	PHLAP92542398	Plasmid vector containing HLA-MICA*007:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:01:09 protein. This plasmid can be used for constructing HLA-MICA*007:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:01:10 Protein Expression Plasmid Vector	PHLAP92542399	Plasmid vector containing HLA-MICA*007:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:01:10 protein. This plasmid can be used for constructing HLA-MICA*007:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:01:11 Protein Expression Plasmid Vector	PHLAP925424000	Plasmid vector containing HLA-MICA*007:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:01:11 protein. This plasmid can be used for constructing HLA-MICA*007:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:02 Protein Expression Plasmid Vector	PHLAP925424001	Plasmid vector containing HLA-MICA*007:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:02 protein. This plasmid can be used for constructing HLA-MICA*007:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:03 Protein Expression Plasmid Vector	PHLAP925424002	Plasmid vector containing HLA-MICA*007:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:03 protein. This plasmid can be used for constructing HLA-MICA*007:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*007:04 Protein Expression Plasmid Vector	PHLAP925424043	Plasmid vector containing HLA-MICA*007:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:04 protein. This plasmid can be used for constructing HLA-MICA*007:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:05 Protein Expression Plasmid Vector	PHLAP925424044	Plasmid vector containing HLA-MICA*007:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:05 protein. This plasmid can be used for constructing HLA-MICA*007:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:06:01 Protein Expression Plasmid Vector	PHLAP925424045	Plasmid vector containing HLA-MICA*007:06:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:06:01 protein. This plasmid can be used for constructing HLA-MICA*007:06:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:06:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:06:02 Protein Expression Plasmid Vector	PHLAP925424046	Plasmid vector containing HLA-MICA*007:06:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:06:02 protein. This plasmid can be used for constructing HLA-MICA*007:06:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:06:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:07 Protein Expression Plasmid Vector	PHLAP925424047	Plasmid vector containing HLA-MICA*007:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:07 protein. This plasmid can be used for constructing HLA-MICA*007:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:08 Protein Expression Plasmid Vector	PHLAP925424048	Plasmid vector containing HLA-MICA*007:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:08 protein. This plasmid can be used for constructing HLA-MICA*007:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*007:09 Protein Expression Plasmid Vector	PHLAP925424049	Plasmid vector containing HLA-MICA*007:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:09 protein. This plasmid can be used for constructing HLA-MICA*007:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*007:10 Protein Expression Plasmid Vector	PHLAP92542410	Plasmid vector containing HLA-MICA*007:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*007:10 protein. This plasmid can be used for constructing HLA-MICA*007:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*007:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:01 Protein Expression Plasmid Vector	PHLAP92542411	Plasmid vector containing HLA-MICA*008:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:01 protein. This plasmid can be used for constructing HLA-MICA*008:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:02 Protein Expression Plasmid Vector	PHLAP92542412	Plasmid vector containing HLA-MICA*008:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:02 protein. This plasmid can be used for constructing HLA-MICA*008:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:03 Protein Expression Plasmid Vector	PHLAP92542413	Plasmid vector containing HLA-MICA*008:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:03 protein. This plasmid can be used for constructing HLA-MICA*008:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:04 Protein Expression Plasmid Vector	PHLAP92542414	Plasmid vector containing HLA-MICA*008:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:04 protein. This plasmid can be used for constructing HLA-MICA*008:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:05 Protein Expression Plasmid Vector	PHLAP92542415	Plasmid vector containing HLA-MICA*008:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:05 protein. This plasmid can be used for constructing HLA-MICA*008:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:06 Protein Expression Plasmid Vector	PHLAP92542416	Plasmid vector containing HLA-MICA*008:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:06 protein. This plasmid can be used for constructing HLA-MICA*008:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*008:01:07 Protein Expression Plasmid Vector	PHLAP92542417	Plasmid vector containing HLA-MICA*008:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:07 protein. This plasmid can be used for constructing HLA-MICA*008:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:08 Protein Expression Plasmid Vector	PHLAP92542418	Plasmid vector containing HLA-MICA*008:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:08 protein. This plasmid can be used for constructing HLA-MICA*008:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:09 Protein Expression Plasmid Vector	PHLAP92542419	Plasmid vector containing HLA-MICA*008:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:09 protein. This plasmid can be used for constructing HLA-MICA*008:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:10 Protein Expression Plasmid Vector	PHLAP92542420	Plasmid vector containing HLA-MICA*008:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:10 protein. This plasmid can be used for constructing HLA-MICA*008:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:11 Protein Expression Plasmid Vector	PHLAP92542421	Plasmid vector containing HLA-MICA*008:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:11 protein. This plasmid can be used for constructing HLA-MICA*008:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:12 Protein Expression Plasmid Vector	PHLAP92542422	Plasmid vector containing HLA-MICA*008:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:12 protein. This plasmid can be used for constructing HLA-MICA*008:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:13 Protein Expression Plasmid Vector	PHLAP92542423	Plasmid vector containing HLA-MICA*008:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:13 protein. This plasmid can be used for constructing HLA-MICA*008:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*008:01:14 Protein Expression Plasmid Vector	PHLAP925424 24	Plasmid vector containing HLA-MICA*008:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:14 protein. This plasmid can be used for constructing HLA-MICA*008:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:15 Protein Expression Plasmid Vector	PHLAP925424 25	Plasmid vector containing HLA-MICA*008:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:15 protein. This plasmid can be used for constructing HLA-MICA*008:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:16 Protein Expression Plasmid Vector	PHLAP925424 26	Plasmid vector containing HLA-MICA*008:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:16 protein. This plasmid can be used for constructing HLA-MICA*008:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:17 Protein Expression Plasmid Vector	PHLAP925424 27	Plasmid vector containing HLA-MICA*008:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:17 protein. This plasmid can be used for constructing HLA-MICA*008:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:18 Protein Expression Plasmid Vector	PHLAP925424 28	Plasmid vector containing HLA-MICA*008:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:18 protein. This plasmid can be used for constructing HLA-MICA*008:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:01:19 Protein Expression Plasmid Vector	PHLAP925424 29	Plasmid vector containing HLA-MICA*008:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:01:19 protein. This plasmid can be used for constructing HLA-MICA*008:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:02 Protein Expression Plasmid Vector	PHLAP925424 30	Plasmid vector containing HLA-MICA*008:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:02 protein. This plasmid can be used for constructing HLA-MICA*008:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*008:03 Protein Expression Plasmid Vector	PHLAP925424 31	Plasmid vector containing HLA-MICA*008:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:03 protein. This plasmid can be used for constructing HLA-MICA*008:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:04:01 Protein Expression Plasmid Vector	PHLAP925424 32	Plasmid vector containing HLA-MICA*008:04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:04:01 protein. This plasmid can be used for constructing HLA-MICA*008:04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:04:02 Protein Expression Plasmid Vector	PHLAP925424 33	Plasmid vector containing HLA-MICA*008:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:04:02 protein. This plasmid can be used for constructing HLA-MICA*008:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:04:03 Protein Expression Plasmid Vector	PHLAP925424 34	Plasmid vector containing HLA-MICA*008:04:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:04:03 protein. This plasmid can be used for constructing HLA-MICA*008:04:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:04:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:04:04 Protein Expression Plasmid Vector	PHLAP925424 35	Plasmid vector containing HLA-MICA*008:04:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:04:04 protein. This plasmid can be used for constructing HLA-MICA*008:04:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:04:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:04:05 Protein Expression Plasmid Vector	PHLAP925424 36	Plasmid vector containing HLA-MICA*008:04:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:04:05 protein. This plasmid can be used for constructing HLA-MICA*008:04:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:04:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:04:06 Protein Expression Plasmid Vector	PHLAP925424 37	Plasmid vector containing HLA-MICA*008:04:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:04:06 protein. This plasmid can be used for constructing HLA-MICA*008:04:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:04:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*008:04:07 Protein Expression Plasmid Vector	PHLAP92542438	Plasmid vector containing HLA-MICA*008:04:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:04:07 protein. This plasmid can be used for constructing HLA-MICA*008:04:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:04:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:04:08 Protein Expression Plasmid Vector	PHLAP92542439	Plasmid vector containing HLA-MICA*008:04:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:04:08 protein. This plasmid can be used for constructing HLA-MICA*008:04:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:04:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:04:09 Protein Expression Plasmid Vector	PHLAP92542440	Plasmid vector containing HLA-MICA*008:04:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:04:09 protein. This plasmid can be used for constructing HLA-MICA*008:04:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:04:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:04:10 Protein Expression Plasmid Vector	PHLAP92542441	Plasmid vector containing HLA-MICA*008:04:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:04:10 protein. This plasmid can be used for constructing HLA-MICA*008:04:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:04:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:04:11 Protein Expression Plasmid Vector	PHLAP92542442	Plasmid vector containing HLA-MICA*008:04:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:04:11 protein. This plasmid can be used for constructing HLA-MICA*008:04:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:04:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:04:12 Protein Expression Plasmid Vector	PHLAP92542443	Plasmid vector containing HLA-MICA*008:04:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:04:12 protein. This plasmid can be used for constructing HLA-MICA*008:04:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:04:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:05 Protein Expression Plasmid Vector	PHLAP92542444	Plasmid vector containing HLA-MICA*008:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:05 protein. This plasmid can be used for constructing HLA-MICA*008:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*008:06 Protein Expression Plasmid Vector	PHLAP92542445	Plasmid vector containing HLA-MICA*008:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:06 protein. This plasmid can be used for constructing HLA-MICA*008:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:07 Protein Expression Plasmid Vector	PHLAP92542446	Plasmid vector containing HLA-MICA*008:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:07 protein. This plasmid can be used for constructing HLA-MICA*008:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:08 Protein Expression Plasmid Vector	PHLAP92542447	Plasmid vector containing HLA-MICA*008:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:08 protein. This plasmid can be used for constructing HLA-MICA*008:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:09 Protein Expression Plasmid Vector	PHLAP92542448	Plasmid vector containing HLA-MICA*008:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:09 protein. This plasmid can be used for constructing HLA-MICA*008:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:10 Protein Expression Plasmid Vector	PHLAP92542449	Plasmid vector containing HLA-MICA*008:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:10 protein. This plasmid can be used for constructing HLA-MICA*008:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:11 Protein Expression Plasmid Vector	PHLAP92542450	Plasmid vector containing HLA-MICA*008:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:11 protein. This plasmid can be used for constructing HLA-MICA*008:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:12 Protein Expression Plasmid Vector	PHLAP92542451	Plasmid vector containing HLA-MICA*008:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:12 protein. This plasmid can be used for constructing HLA-MICA*008:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*008:13:01 Protein Expression Plasmid Vector	PHLAP925424512	Plasmid vector containing HLA-MICA*008:13:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:13:01 protein. This plasmid can be used for constructing HLA-MICA*008:13:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:13:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:13:02 Protein Expression Plasmid Vector	PHLAP925424513	Plasmid vector containing HLA-MICA*008:13:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:13:02 protein. This plasmid can be used for constructing HLA-MICA*008:13:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:13:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:14 Protein Expression Plasmid Vector	PHLAP925424514	Plasmid vector containing HLA-MICA*008:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:14 protein. This plasmid can be used for constructing HLA-MICA*008:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:15 Protein Expression Plasmid Vector	PHLAP925424515	Plasmid vector containing HLA-MICA*008:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:15 protein. This plasmid can be used for constructing HLA-MICA*008:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:16 Protein Expression Plasmid Vector	PHLAP925424516	Plasmid vector containing HLA-MICA*008:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:16 protein. This plasmid can be used for constructing HLA-MICA*008:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:17 Protein Expression Plasmid Vector	PHLAP925424517	Plasmid vector containing HLA-MICA*008:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:17 protein. This plasmid can be used for constructing HLA-MICA*008:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:18 Protein Expression Plasmid Vector	PHLAP925424518	Plasmid vector containing HLA-MICA*008:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:18 protein. This plasmid can be used for constructing HLA-MICA*008:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*008:19 Protein Expression Plasmid Vector	PHLAP92542459	Plasmid vector containing HLA-MICA*008:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:19 protein. This plasmid can be used for constructing HLA-MICA*008:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:20 Protein Expression Plasmid Vector	PHLAP92542460	Plasmid vector containing HLA-MICA*008:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:20 protein. This plasmid can be used for constructing HLA-MICA*008:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:21 Protein Expression Plasmid Vector	PHLAP92542461	Plasmid vector containing HLA-MICA*008:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:21 protein. This plasmid can be used for constructing HLA-MICA*008:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:22 Protein Expression Plasmid Vector	PHLAP92542462	Plasmid vector containing HLA-MICA*008:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:22 protein. This plasmid can be used for constructing HLA-MICA*008:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:23:01 Protein Expression Plasmid Vector	PHLAP92542463	Plasmid vector containing HLA-MICA*008:23:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:23:01 protein. This plasmid can be used for constructing HLA-MICA*008:23:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:23:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:23:02 Protein Expression Plasmid Vector	PHLAP92542464	Plasmid vector containing HLA-MICA*008:23:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:23:02 protein. This plasmid can be used for constructing HLA-MICA*008:23:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:23:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:24 Protein Expression Plasmid Vector	PHLAP92542465	Plasmid vector containing HLA-MICA*008:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:24 protein. This plasmid can be used for constructing HLA-MICA*008:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*008:25 Protein Expression Plasmid Vector	PHLAP92542466	Plasmid vector containing HLA-MICA*008:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:25 protein. This plasmid can be used for constructing HLA-MICA*008:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:26 Protein Expression Plasmid Vector	PHLAP92542467	Plasmid vector containing HLA-MICA*008:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:26 protein. This plasmid can be used for constructing HLA-MICA*008:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:27 Protein Expression Plasmid Vector	PHLAP92542468	Plasmid vector containing HLA-MICA*008:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:27 protein. This plasmid can be used for constructing HLA-MICA*008:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:28 Protein Expression Plasmid Vector	PHLAP92542469	Plasmid vector containing HLA-MICA*008:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:28 protein. This plasmid can be used for constructing HLA-MICA*008:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:29 Protein Expression Plasmid Vector	PHLAP92542470	Plasmid vector containing HLA-MICA*008:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:29 protein. This plasmid can be used for constructing HLA-MICA*008:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:30 Protein Expression Plasmid Vector	PHLAP92542471	Plasmid vector containing HLA-MICA*008:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:30 protein. This plasmid can be used for constructing HLA-MICA*008:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:31 Protein Expression Plasmid Vector	PHLAP92542472	Plasmid vector containing HLA-MICA*008:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:31 protein. This plasmid can be used for constructing HLA-MICA*008:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*008:32 Protein Expression Plasmid Vector	PHLAP925424733	Plasmid vector containing HLA-MICA*008:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:32 protein. This plasmid can be used for constructing HLA-MICA*008:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*008:33 Protein Expression Plasmid Vector	PHLAP925424734	Plasmid vector containing HLA-MICA*008:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*008:33 protein. This plasmid can be used for constructing HLA-MICA*008:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*008:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:01:01 Protein Expression Plasmid Vector	PHLAP925424735	Plasmid vector containing HLA-MICA*009:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:01 protein. This plasmid can be used for constructing HLA-MICA*009:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:01:02 Protein Expression Plasmid Vector	PHLAP925424736	Plasmid vector containing HLA-MICA*009:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:02 protein. This plasmid can be used for constructing HLA-MICA*009:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:01:03 Protein Expression Plasmid Vector	PHLAP925424737	Plasmid vector containing HLA-MICA*009:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:03 protein. This plasmid can be used for constructing HLA-MICA*009:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:01:04 Protein Expression Plasmid Vector	PHLAP925424738	Plasmid vector containing HLA-MICA*009:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:04 protein. This plasmid can be used for constructing HLA-MICA*009:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:01:05 Protein Expression Plasmid Vector	PHLAP925424739	Plasmid vector containing HLA-MICA*009:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:05 protein. This plasmid can be used for constructing HLA-MICA*009:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*009:01:06 Protein Expression Plasmid Vector	PHLAP925424840	Plasmid vector containing HLA-MICA*009:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:06 protein. This plasmid can be used for constructing HLA-MICA*009:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:01:07 Protein Expression Plasmid Vector	PHLAP925424841	Plasmid vector containing HLA-MICA*009:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:07 protein. This plasmid can be used for constructing HLA-MICA*009:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:01:08 Protein Expression Plasmid Vector	PHLAP925424842	Plasmid vector containing HLA-MICA*009:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:08 protein. This plasmid can be used for constructing HLA-MICA*009:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:01:09 Protein Expression Plasmid Vector	PHLAP925424843	Plasmid vector containing HLA-MICA*009:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:09 protein. This plasmid can be used for constructing HLA-MICA*009:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:01:10 Protein Expression Plasmid Vector	PHLAP925424844	Plasmid vector containing HLA-MICA*009:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:10 protein. This plasmid can be used for constructing HLA-MICA*009:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:01:11 Protein Expression Plasmid Vector	PHLAP925424845	Plasmid vector containing HLA-MICA*009:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:11 protein. This plasmid can be used for constructing HLA-MICA*009:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:01:12 Protein Expression Plasmid Vector	PHLAP925424846	Plasmid vector containing HLA-MICA*009:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:12 protein. This plasmid can be used for constructing HLA-MICA*009:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*009:01:13 Protein Expression Plasmid Vector	PHLAP92542487	Plasmid vector containing HLA-MICA*009:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:13 protein. This plasmid can be used for constructing HLA-MICA*009:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:01:14 Protein Expression Plasmid Vector	PHLAP92542488	Plasmid vector containing HLA-MICA*009:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:01:14 protein. This plasmid can be used for constructing HLA-MICA*009:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:02:01 Protein Expression Plasmid Vector	PHLAP92542489	Plasmid vector containing HLA-MICA*009:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:02:01 protein. This plasmid can be used for constructing HLA-MICA*009:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:02:02 Protein Expression Plasmid Vector	PHLAP92542490	Plasmid vector containing HLA-MICA*009:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:02:02 protein. This plasmid can be used for constructing HLA-MICA*009:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:02:03 Protein Expression Plasmid Vector	PHLAP92542491	Plasmid vector containing HLA-MICA*009:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:02:03 protein. This plasmid can be used for constructing HLA-MICA*009:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:02:04 Protein Expression Plasmid Vector	PHLAP92542492	Plasmid vector containing HLA-MICA*009:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:02:04 protein. This plasmid can be used for constructing HLA-MICA*009:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:02:05 Protein Expression Plasmid Vector	PHLAP92542493	Plasmid vector containing HLA-MICA*009:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:02:05 protein. This plasmid can be used for constructing HLA-MICA*009:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*009:02:06 Protein Expression Plasmid Vector	PHLAP92542494	Plasmid vector containing HLA-MICA*009:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:02:06 protein. This plasmid can be used for constructing HLA-MICA*009:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:02:07 Protein Expression Plasmid Vector	PHLAP92542495	Plasmid vector containing HLA-MICA*009:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:02:07 protein. This plasmid can be used for constructing HLA-MICA*009:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:03:01 Protein Expression Plasmid Vector	PHLAP92542496	Plasmid vector containing HLA-MICA*009:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:03:01 protein. This plasmid can be used for constructing HLA-MICA*009:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:03:02 Protein Expression Plasmid Vector	PHLAP92542497	Plasmid vector containing HLA-MICA*009:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:03:02 protein. This plasmid can be used for constructing HLA-MICA*009:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:04 Protein Expression Plasmid Vector	PHLAP92542498	Plasmid vector containing HLA-MICA*009:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:04 protein. This plasmid can be used for constructing HLA-MICA*009:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:05 Protein Expression Plasmid Vector	PHLAP92542499	Plasmid vector containing HLA-MICA*009:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:05 protein. This plasmid can be used for constructing HLA-MICA*009:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:06 Protein Expression Plasmid Vector	PHLAP925425000	Plasmid vector containing HLA-MICA*009:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:06 protein. This plasmid can be used for constructing HLA-MICA*009:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*009:07 Protein Expression Plasmid Vector	PHLAP92542501	Plasmid vector containing HLA-MICA*009:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:07 protein. This plasmid can be used for constructing HLA-MICA*009:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*009:08 Protein Expression Plasmid Vector	PHLAP92542502	Plasmid vector containing HLA-MICA*009:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*009:08 protein. This plasmid can be used for constructing HLA-MICA*009:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*009:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:01 Protein Expression Plasmid Vector	PHLAP92542503	Plasmid vector containing HLA-MICA*010:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:01 protein. This plasmid can be used for constructing HLA-MICA*010:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:02 Protein Expression Plasmid Vector	PHLAP92542504	Plasmid vector containing HLA-MICA*010:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:02 protein. This plasmid can be used for constructing HLA-MICA*010:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:03 Protein Expression Plasmid Vector	PHLAP92542505	Plasmid vector containing HLA-MICA*010:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:03 protein. This plasmid can be used for constructing HLA-MICA*010:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:04 Protein Expression Plasmid Vector	PHLAP92542506	Plasmid vector containing HLA-MICA*010:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:04 protein. This plasmid can be used for constructing HLA-MICA*010:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:05 Protein Expression Plasmid Vector	PHLAP92542507	Plasmid vector containing HLA-MICA*010:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:05 protein. This plasmid can be used for constructing HLA-MICA*010:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*010:01:06 Protein Expression Plasmid Vector	PHLAP92542508	Plasmid vector containing HLA-MICA*010:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:06 protein. This plasmid can be used for constructing HLA-MICA*010:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:07 Protein Expression Plasmid Vector	PHLAP92542509	Plasmid vector containing HLA-MICA*010:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:07 protein. This plasmid can be used for constructing HLA-MICA*010:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:08 Protein Expression Plasmid Vector	PHLAP925425110	Plasmid vector containing HLA-MICA*010:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:08 protein. This plasmid can be used for constructing HLA-MICA*010:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:09 Protein Expression Plasmid Vector	PHLAP925425111	Plasmid vector containing HLA-MICA*010:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:09 protein. This plasmid can be used for constructing HLA-MICA*010:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:10 Protein Expression Plasmid Vector	PHLAP925425112	Plasmid vector containing HLA-MICA*010:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:10 protein. This plasmid can be used for constructing HLA-MICA*010:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:11 Protein Expression Plasmid Vector	PHLAP925425113	Plasmid vector containing HLA-MICA*010:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:11 protein. This plasmid can be used for constructing HLA-MICA*010:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:12 Protein Expression Plasmid Vector	PHLAP925425114	Plasmid vector containing HLA-MICA*010:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:12 protein. This plasmid can be used for constructing HLA-MICA*010:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*010:01:13 Protein Expression Plasmid Vector	PHLAP92542515	Plasmid vector containing HLA-MICA*010:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:13 protein. This plasmid can be used for constructing HLA-MICA*010:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:14 Protein Expression Plasmid Vector	PHLAP92542516	Plasmid vector containing HLA-MICA*010:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:14 protein. This plasmid can be used for constructing HLA-MICA*010:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:15 Protein Expression Plasmid Vector	PHLAP92542517	Plasmid vector containing HLA-MICA*010:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:15 protein. This plasmid can be used for constructing HLA-MICA*010:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:16 Protein Expression Plasmid Vector	PHLAP92542518	Plasmid vector containing HLA-MICA*010:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:16 protein. This plasmid can be used for constructing HLA-MICA*010:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:17 Protein Expression Plasmid Vector	PHLAP92542519	Plasmid vector containing HLA-MICA*010:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:17 protein. This plasmid can be used for constructing HLA-MICA*010:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:01:18 Protein Expression Plasmid Vector	PHLAP92542520	Plasmid vector containing HLA-MICA*010:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:01:18 protein. This plasmid can be used for constructing HLA-MICA*010:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:02:01 Protein Expression Plasmid Vector	PHLAP92542521	Plasmid vector containing HLA-MICA*010:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:02:01 protein. This plasmid can be used for constructing HLA-MICA*010:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*010:02:02 Protein Expression Plasmid Vector	PHLAP92542522	Plasmid vector containing HLA-MICA*010:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:02:02 protein. This plasmid can be used for constructing HLA-MICA*010:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:03 Protein Expression Plasmid Vector	PHLAP92542523	Plasmid vector containing HLA-MICA*010:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:03 protein. This plasmid can be used for constructing HLA-MICA*010:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:04 Protein Expression Plasmid Vector	PHLAP92542524	Plasmid vector containing HLA-MICA*010:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:04 protein. This plasmid can be used for constructing HLA-MICA*010:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:05 Protein Expression Plasmid Vector	PHLAP92542525	Plasmid vector containing HLA-MICA*010:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:05 protein. This plasmid can be used for constructing HLA-MICA*010:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:06 Protein Expression Plasmid Vector	PHLAP92542526	Plasmid vector containing HLA-MICA*010:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:06 protein. This plasmid can be used for constructing HLA-MICA*010:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:07 Protein Expression Plasmid Vector	PHLAP92542527	Plasmid vector containing HLA-MICA*010:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:07 protein. This plasmid can be used for constructing HLA-MICA*010:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:08 Protein Expression Plasmid Vector	PHLAP92542528	Plasmid vector containing HLA-MICA*010:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:08 protein. This plasmid can be used for constructing HLA-MICA*010:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*010:09 Protein Expression Plasmid Vector	PHLAP92542529	Plasmid vector containing HLA-MICA*010:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:09 protein. This plasmid can be used for constructing HLA-MICA*010:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:10 Protein Expression Plasmid Vector	PHLAP92542530	Plasmid vector containing HLA-MICA*010:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:10 protein. This plasmid can be used for constructing HLA-MICA*010:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*010:11 Protein Expression Plasmid Vector	PHLAP92542531	Plasmid vector containing HLA-MICA*010:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*010:11 protein. This plasmid can be used for constructing HLA-MICA*010:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*010:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*011:01:01 Protein Expression Plasmid Vector	PHLAP92542532	Plasmid vector containing HLA-MICA*011:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*011:01:01 protein. This plasmid can be used for constructing HLA-MICA*011:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*011:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*011:01:02 Protein Expression Plasmid Vector	PHLAP92542533	Plasmid vector containing HLA-MICA*011:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*011:01:02 protein. This plasmid can be used for constructing HLA-MICA*011:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*011:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*011:01:03 Protein Expression Plasmid Vector	PHLAP92542534	Plasmid vector containing HLA-MICA*011:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*011:01:03 protein. This plasmid can be used for constructing HLA-MICA*011:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*011:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*011:01:04Q Protein Expression Plasmid Vector	PHLAP92542535	Plasmid vector containing HLA-MICA*011:01:04Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*011:01:04Q protein. This plasmid can be used for constructing HLA-MICA*011:01:04Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*011:01:04Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*011:01:05 Protein Expression Plasmid Vector	PHLAP92542536	Plasmid vector containing HLA-MICA*011:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*011:01:05 protein. This plasmid can be used for constructing HLA-MICA*011:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*011:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*011:01:06 Protein Expression Plasmid Vector	PHLAP92542537	Plasmid vector containing HLA-MICA*011:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*011:01:06 protein. This plasmid can be used for constructing HLA-MICA*011:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*011:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*011:01:07 Protein Expression Plasmid Vector	PHLAP92542538	Plasmid vector containing HLA-MICA*011:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*011:01:07 protein. This plasmid can be used for constructing HLA-MICA*011:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*011:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*011:01:08 Protein Expression Plasmid Vector	PHLAP92542539	Plasmid vector containing HLA-MICA*011:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*011:01:08 protein. This plasmid can be used for constructing HLA-MICA*011:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*011:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*011:01:09 Protein Expression Plasmid Vector	PHLAP925425400	Plasmid vector containing HLA-MICA*011:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*011:01:09 protein. This plasmid can be used for constructing HLA-MICA*011:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*011:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:01:01 Protein Expression Plasmid Vector	PHLAP925425401	Plasmid vector containing HLA-MICA*012:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:01:01 protein. This plasmid can be used for constructing HLA-MICA*012:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:01:02 Protein Expression Plasmid Vector	PHLAP925425402	Plasmid vector containing HLA-MICA*012:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:01:02 protein. This plasmid can be used for constructing HLA-MICA*012:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*012:01:03 Protein Expression Plasmid Vector	PHLAP925425413	Plasmid vector containing HLA-MICA*012:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:01:03 protein. This plasmid can be used for constructing HLA-MICA*012:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:01:04 Protein Expression Plasmid Vector	PHLAP925425414	Plasmid vector containing HLA-MICA*012:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:01:04 protein. This plasmid can be used for constructing HLA-MICA*012:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:01:05 Protein Expression Plasmid Vector	PHLAP925425415	Plasmid vector containing HLA-MICA*012:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:01:05 protein. This plasmid can be used for constructing HLA-MICA*012:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:01:06 Protein Expression Plasmid Vector	PHLAP925425416	Plasmid vector containing HLA-MICA*012:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:01:06 protein. This plasmid can be used for constructing HLA-MICA*012:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:01:07 Protein Expression Plasmid Vector	PHLAP925425417	Plasmid vector containing HLA-MICA*012:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:01:07 protein. This plasmid can be used for constructing HLA-MICA*012:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:01:08 Protein Expression Plasmid Vector	PHLAP925425418	Plasmid vector containing HLA-MICA*012:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:01:08 protein. This plasmid can be used for constructing HLA-MICA*012:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:02 Protein Expression Plasmid Vector	PHLAP925425419	Plasmid vector containing HLA-MICA*012:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:02 protein. This plasmid can be used for constructing HLA-MICA*012:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*012:03 Protein Expression Plasmid Vector	PHLAP92542550	Plasmid vector containing HLA-MICA*012:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:03 protein. This plasmid can be used for constructing HLA-MICA*012:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:04 Protein Expression Plasmid Vector	PHLAP92542551	Plasmid vector containing HLA-MICA*012:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:04 protein. This plasmid can be used for constructing HLA-MICA*012:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:05 Protein Expression Plasmid Vector	PHLAP92542552	Plasmid vector containing HLA-MICA*012:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:05 protein. This plasmid can be used for constructing HLA-MICA*012:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:06 Protein Expression Plasmid Vector	PHLAP92542553	Plasmid vector containing HLA-MICA*012:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:06 protein. This plasmid can be used for constructing HLA-MICA*012:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:07 Protein Expression Plasmid Vector	PHLAP92542554	Plasmid vector containing HLA-MICA*012:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:07 protein. This plasmid can be used for constructing HLA-MICA*012:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*012:08 Protein Expression Plasmid Vector	PHLAP92542555	Plasmid vector containing HLA-MICA*012:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*012:08 protein. This plasmid can be used for constructing HLA-MICA*012:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*012:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*013 Protein Expression Plasmid Vector	PHLAP92542556	Plasmid vector containing HLA-MICA*013 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*013 protein. This plasmid can be used for constructing HLA-MICA*013 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*013 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*014 Protein Expression Plasmid Vector	PHLAP92542557	Plasmid vector containing HLA-MICA*014 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*014 protein. This plasmid can be used for constructing HLA-MICA*014 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*014 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*015:01 Protein Expression Plasmid Vector	PHLAP92542558	Plasmid vector containing HLA-MICA*015:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*015:01 protein. This plasmid can be used for constructing HLA-MICA*015:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*015:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*015:02 Protein Expression Plasmid Vector	PHLAP92542559	Plasmid vector containing HLA-MICA*015:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*015:02 protein. This plasmid can be used for constructing HLA-MICA*015:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*015:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*016:01:01 Protein Expression Plasmid Vector	PHLAP92542560	Plasmid vector containing HLA-MICA*016:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*016:01:01 protein. This plasmid can be used for constructing HLA-MICA*016:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*016:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*016:01:02 Protein Expression Plasmid Vector	PHLAP92542561	Plasmid vector containing HLA-MICA*016:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*016:01:02 protein. This plasmid can be used for constructing HLA-MICA*016:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*016:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*016:01:03 Protein Expression Plasmid Vector	PHLAP92542562	Plasmid vector containing HLA-MICA*016:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*016:01:03 protein. This plasmid can be used for constructing HLA-MICA*016:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*016:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*016:02 Protein Expression Plasmid Vector	PHLAP92542563	Plasmid vector containing HLA-MICA*016:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*016:02 protein. This plasmid can be used for constructing HLA-MICA*016:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*016:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*016:03 Protein Expression Plasmid Vector	PHLAP92542564	Plasmid vector containing HLA-MICA*016:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*016:03 protein. This plasmid can be used for constructing HLA-MICA*016:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*016:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*017:01 Protein Expression Plasmid Vector	PHLAP92542565	Plasmid vector containing HLA-MICA*017:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*017:01 protein. This plasmid can be used for constructing HLA-MICA*017:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*017:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*017:02 Protein Expression Plasmid Vector	PHLAP92542566	Plasmid vector containing HLA-MICA*017:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*017:02 protein. This plasmid can be used for constructing HLA-MICA*017:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*017:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*017:03 Protein Expression Plasmid Vector	PHLAP92542567	Plasmid vector containing HLA-MICA*017:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*017:03 protein. This plasmid can be used for constructing HLA-MICA*017:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*017:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*017:04 Protein Expression Plasmid Vector	PHLAP92542568	Plasmid vector containing HLA-MICA*017:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*017:04 protein. This plasmid can be used for constructing HLA-MICA*017:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*017:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:01:01 Protein Expression Plasmid Vector	PHLAP92542569	Plasmid vector containing HLA-MICA*018:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:01 protein. This plasmid can be used for constructing HLA-MICA*018:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:01:02 Protein Expression Plasmid Vector	PHLAP92542570	Plasmid vector containing HLA-MICA*018:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:02 protein. This plasmid can be used for constructing HLA-MICA*018:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*018:01:03 Protein Expression Plasmid Vector	PHLAP92542571	Plasmid vector containing HLA-MICA*018:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:03 protein. This plasmid can be used for constructing HLA-MICA*018:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:01:04 Protein Expression Plasmid Vector	PHLAP92542572	Plasmid vector containing HLA-MICA*018:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:04 protein. This plasmid can be used for constructing HLA-MICA*018:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:01:05 Protein Expression Plasmid Vector	PHLAP92542573	Plasmid vector containing HLA-MICA*018:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:05 protein. This plasmid can be used for constructing HLA-MICA*018:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:01:06 Protein Expression Plasmid Vector	PHLAP92542574	Plasmid vector containing HLA-MICA*018:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:06 protein. This plasmid can be used for constructing HLA-MICA*018:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:01:07 Protein Expression Plasmid Vector	PHLAP92542575	Plasmid vector containing HLA-MICA*018:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:07 protein. This plasmid can be used for constructing HLA-MICA*018:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:01:08 Protein Expression Plasmid Vector	PHLAP92542576	Plasmid vector containing HLA-MICA*018:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:08 protein. This plasmid can be used for constructing HLA-MICA*018:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:01:09 Protein Expression Plasmid Vector	PHLAP92542577	Plasmid vector containing HLA-MICA*018:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:09 protein. This plasmid can be used for constructing HLA-MICA*018:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*018:01:10 Protein Expression Plasmid Vector	PHLAP92542578	Plasmid vector containing HLA-MICA*018:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:10 protein. This plasmid can be used for constructing HLA-MICA*018:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:01:11 Protein Expression Plasmid Vector	PHLAP92542579	Plasmid vector containing HLA-MICA*018:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:11 protein. This plasmid can be used for constructing HLA-MICA*018:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:01:12 Protein Expression Plasmid Vector	PHLAP92542580	Plasmid vector containing HLA-MICA*018:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:12 protein. This plasmid can be used for constructing HLA-MICA*018:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:01:13 Protein Expression Plasmid Vector	PHLAP92542581	Plasmid vector containing HLA-MICA*018:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:01:13 protein. This plasmid can be used for constructing HLA-MICA*018:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:02 Protein Expression Plasmid Vector	PHLAP92542582	Plasmid vector containing HLA-MICA*018:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:02 protein. This plasmid can be used for constructing HLA-MICA*018:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*018:03 Protein Expression Plasmid Vector	PHLAP92542583	Plasmid vector containing HLA-MICA*018:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*018:03 protein. This plasmid can be used for constructing HLA-MICA*018:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*018:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*019:01:01 Protein Expression Plasmid Vector	PHLAP92542584	Plasmid vector containing HLA-MICA*019:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:01:01 protein. This plasmid can be used for constructing HLA-MICA*019:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*019:01:02 Protein Expression Plasmid Vector	PHLAP92542585	Plasmid vector containing HLA-MICA*019:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:01:02 protein. This plasmid can be used for constructing HLA-MICA*019:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*019:01:03 Protein Expression Plasmid Vector	PHLAP92542586	Plasmid vector containing HLA-MICA*019:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:01:03 protein. This plasmid can be used for constructing HLA-MICA*019:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*019:01:04 Protein Expression Plasmid Vector	PHLAP92542587	Plasmid vector containing HLA-MICA*019:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:01:04 protein. This plasmid can be used for constructing HLA-MICA*019:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*019:01:05 Protein Expression Plasmid Vector	PHLAP92542588	Plasmid vector containing HLA-MICA*019:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:01:05 protein. This plasmid can be used for constructing HLA-MICA*019:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*019:01:06 Protein Expression Plasmid Vector	PHLAP92542589	Plasmid vector containing HLA-MICA*019:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:01:06 protein. This plasmid can be used for constructing HLA-MICA*019:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*019:01:07 Protein Expression Plasmid Vector	PHLAP92542590	Plasmid vector containing HLA-MICA*019:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:01:07 protein. This plasmid can be used for constructing HLA-MICA*019:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*019:01:08 Protein Expression Plasmid Vector	PHLAP92542591	Plasmid vector containing HLA-MICA*019:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:01:08 protein. This plasmid can be used for constructing HLA-MICA*019:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*019:01:09 Protein Expression Plasmid Vector	PHLAP92542592	Plasmid vector containing HLA-MICA*019:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:01:09 protein. This plasmid can be used for constructing HLA-MICA*019:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*019:01:10 Protein Expression Plasmid Vector	PHLAP92542593	Plasmid vector containing HLA-MICA*019:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:01:10 protein. This plasmid can be used for constructing HLA-MICA*019:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*019:01:11 Protein Expression Plasmid Vector	PHLAP92542594	Plasmid vector containing HLA-MICA*019:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:01:11 protein. This plasmid can be used for constructing HLA-MICA*019:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*019:02 Protein Expression Plasmid Vector	PHLAP92542595	Plasmid vector containing HLA-MICA*019:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:02 protein. This plasmid can be used for constructing HLA-MICA*019:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*019:03 Protein Expression Plasmid Vector	PHLAP92542596	Plasmid vector containing HLA-MICA*019:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*019:03 protein. This plasmid can be used for constructing HLA-MICA*019:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*019:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*020 Protein Expression Plasmid Vector	PHLAP92542597	Plasmid vector containing HLA-MICA*020 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*020 protein. This plasmid can be used for constructing HLA-MICA*020 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*020 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*021 Protein Expression Plasmid Vector	PHLAP92542598	Plasmid vector containing HLA-MICA*021 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*021 protein. This plasmid can be used for constructing HLA-MICA*021 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*021 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*022:01:01 Protein Expression Plasmid Vector	PHLAP92542599	Plasmid vector containing HLA-MICA*022:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*022:01:01 protein. This plasmid can be used for constructing HLA-MICA*022:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*022:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*022:01:02 Protein Expression Plasmid Vector	PHLAP92542600	Plasmid vector containing HLA-MICA*022:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*022:01:02 protein. This plasmid can be used for constructing HLA-MICA*022:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*022:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*023 Protein Expression Plasmid Vector	PHLAP92542601	Plasmid vector containing HLA-MICA*023 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*023 protein. This plasmid can be used for constructing HLA-MICA*023 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*023 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*024 Protein Expression Plasmid Vector	PHLAP92542602	Plasmid vector containing HLA-MICA*024 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*024 protein. This plasmid can be used for constructing HLA-MICA*024 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*024 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*025 Protein Expression Plasmid Vector	PHLAP92542603	Plasmid vector containing HLA-MICA*025 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*025 protein. This plasmid can be used for constructing HLA-MICA*025 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*025 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*026 Protein Expression Plasmid Vector	PHLAP92542604	Plasmid vector containing HLA-MICA*026 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*026 protein. This plasmid can be used for constructing HLA-MICA*026 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*026 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*027:01:01 Protein Expression Plasmid Vector	PHLAP92542605	Plasmid vector containing HLA-MICA*027:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*027:01:01 protein. This plasmid can be used for constructing HLA-MICA*027:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*027:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*027:01:02 Protein Expression Plasmid Vector	PHLAP92542606	Plasmid vector containing HLA-MICA*027:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*027:01:02 protein. This plasmid can be used for constructing HLA-MICA*027:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*027:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*027:01:03 Protein Expression Plasmid Vector	PHLAP92542607	Plasmid vector containing HLA-MICA*027:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*027:01:03 protein. This plasmid can be used for constructing HLA-MICA*027:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*027:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*027:02 Protein Expression Plasmid Vector	PHLAP92542608	Plasmid vector containing HLA-MICA*027:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*027:02 protein. This plasmid can be used for constructing HLA-MICA*027:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*027:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*028 Protein Expression Plasmid Vector	PHLAP92542609	Plasmid vector containing HLA-MICA*028 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*028 protein. This plasmid can be used for constructing HLA-MICA*028 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*028 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*029:01:01 Protein Expression Plasmid Vector	PHLAP925426110	Plasmid vector containing HLA-MICA*029:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*029:01:01 protein. This plasmid can be used for constructing HLA-MICA*029:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*029:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*029:01:02 Protein Expression Plasmid Vector	PHLAP925426111	Plasmid vector containing HLA-MICA*029:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*029:01:02 protein. This plasmid can be used for constructing HLA-MICA*029:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*029:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*029:02 Protein Expression Plasmid Vector	PHLAP925426112	Plasmid vector containing HLA-MICA*029:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*029:02 protein. This plasmid can be used for constructing HLA-MICA*029:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*029:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*029:03 Protein Expression Plasmid Vector	PHLAP925426113	Plasmid vector containing HLA-MICA*029:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*029:03 protein. This plasmid can be used for constructing HLA-MICA*029:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*029:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*030 Protein Expression Plasmid Vector	PHLAP925426114	Plasmid vector containing HLA-MICA*030 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*030 protein. This plasmid can be used for constructing HLA-MICA*030 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*030 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*031 Protein Expression Plasmid Vector	PHLAP925426115	Plasmid vector containing HLA-MICA*031 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*031 protein. This plasmid can be used for constructing HLA-MICA*031 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*031 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*032 Protein Expression Plasmid Vector	PHLAP925426116	Plasmid vector containing HLA-MICA*032 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*032 protein. This plasmid can be used for constructing HLA-MICA*032 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*032 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*033:01:01 Protein Expression Plasmid Vector	PHLAP925426117	Plasmid vector containing HLA-MICA*033:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*033:01:01 protein. This plasmid can be used for constructing HLA-MICA*033:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*033:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*033:01:02 Protein Expression Plasmid Vector	PHLAP925426118	Plasmid vector containing HLA-MICA*033:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*033:01:02 protein. This plasmid can be used for constructing HLA-MICA*033:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*033:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*034 Protein Expression Plasmid Vector	PHLAP925426119	Plasmid vector containing HLA-MICA*034 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*034 protein. This plasmid can be used for constructing HLA-MICA*034 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*034 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*035 Protein Expression Plasmid Vector	PHLAP92542620	Plasmid vector containing HLA-MICA*035 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*035 protein. This plasmid can be used for constructing HLA-MICA*035 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*035 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*036 Protein Expression Plasmid Vector	PHLAP92542621	Plasmid vector containing HLA-MICA*036 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*036 protein. This plasmid can be used for constructing HLA-MICA*036 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*036 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*037 Protein Expression Plasmid Vector	PHLAP92542622	Plasmid vector containing HLA-MICA*037 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*037 protein. This plasmid can be used for constructing HLA-MICA*037 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*037 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*038 Protein Expression Plasmid Vector	PHLAP92542623	Plasmid vector containing HLA-MICA*038 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*038 protein. This plasmid can be used for constructing HLA-MICA*038 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*038 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*039 Protein Expression Plasmid Vector	PHLAP92542624	Plasmid vector containing HLA-MICA*039 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*039 protein. This plasmid can be used for constructing HLA-MICA*039 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*039 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*040 Protein Expression Plasmid Vector	PHLAP92542625	Plasmid vector containing HLA-MICA*040 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*040 protein. This plasmid can be used for constructing HLA-MICA*040 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*040 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*041 Protein Expression Plasmid Vector	PHLAP92542626	Plasmid vector containing HLA-MICA*041 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*041 protein. This plasmid can be used for constructing HLA-MICA*041 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*041 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*042 Protein Expression Plasmid Vector	PHLAP92542627	Plasmid vector containing HLA-MICA*042 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*042 protein. This plasmid can be used for constructing HLA-MICA*042 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*042 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*043 Protein Expression Plasmid Vector	PHLAP92542628	Plasmid vector containing HLA-MICA*043 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*043 protein. This plasmid can be used for constructing HLA-MICA*043 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*043 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*044 Protein Expression Plasmid Vector	PHLAP92542629	Plasmid vector containing HLA-MICA*044 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*044 protein. This plasmid can be used for constructing HLA-MICA*044 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*044 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*045:01:01 Protein Expression Plasmid Vector	PHLAP92542630	Plasmid vector containing HLA-MICA*045:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*045:01:01 protein. This plasmid can be used for constructing HLA-MICA*045:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*045:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*045:01:02 Protein Expression Plasmid Vector	PHLAP92542631	Plasmid vector containing HLA-MICA*045:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*045:01:02 protein. This plasmid can be used for constructing HLA-MICA*045:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*045:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*045:01:03 Protein Expression Plasmid Vector	PHLAP92542632	Plasmid vector containing HLA-MICA*045:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*045:01:03 protein. This plasmid can be used for constructing HLA-MICA*045:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*045:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*046 Protein Expression Plasmid Vector	PHLAP92542633	Plasmid vector containing HLA-MICA*046 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*046 protein. This plasmid can be used for constructing HLA-MICA*046 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*046 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*047 Protein Expression Plasmid Vector	PHLAP92542634	Plasmid vector containing HLA-MICA*047 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*047 protein. This plasmid can be used for constructing HLA-MICA*047 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*047 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*048 Protein Expression Plasmid Vector	PHLAP92542635	Plasmid vector containing HLA-MICA*048 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*048 protein. This plasmid can be used for constructing HLA-MICA*048 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*048 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*049:01:01 Protein Expression Plasmid Vector	PHLAP92542636	Plasmid vector containing HLA-MICA*049:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*049:01:01 protein. This plasmid can be used for constructing HLA-MICA*049:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*049:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*049:01:02 Protein Expression Plasmid Vector	PHLAP92542637	Plasmid vector containing HLA-MICA*049:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*049:01:02 protein. This plasmid can be used for constructing HLA-MICA*049:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*049:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*049:02 Protein Expression Plasmid Vector	PHLAP92542638	Plasmid vector containing HLA-MICA*049:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*049:02 protein. This plasmid can be used for constructing HLA-MICA*049:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*049:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*050 Protein Expression Plasmid Vector	PHLAP92542639	Plasmid vector containing HLA-MICA*050 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*050 protein. This plasmid can be used for constructing HLA-MICA*050 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*050 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*051 Protein Expression Plasmid Vector	PHLAP92542640	Plasmid vector containing HLA-MICA*051 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*051 protein. This plasmid can be used for constructing HLA-MICA*051 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*051 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*052 Protein Expression Plasmid Vector	PHLAP92542641	Plasmid vector containing HLA-MICA*052 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*052 protein. This plasmid can be used for constructing HLA-MICA*052 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*052 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*053:01:01 Protein Expression Plasmid Vector	PHLAP925426412	Plasmid vector containing HLA-MICA*053:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*053:01:01 protein. This plasmid can be used for constructing HLA-MICA*053:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*053:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*053:01:02 Protein Expression Plasmid Vector	PHLAP925426413	Plasmid vector containing HLA-MICA*053:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*053:01:02 protein. This plasmid can be used for constructing HLA-MICA*053:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*053:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*053:01:03 Protein Expression Plasmid Vector	PHLAP925426414	Plasmid vector containing HLA-MICA*053:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*053:01:03 protein. This plasmid can be used for constructing HLA-MICA*053:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*053:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*053:01:04 Protein Expression Plasmid Vector	PHLAP925426415	Plasmid vector containing HLA-MICA*053:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*053:01:04 protein. This plasmid can be used for constructing HLA-MICA*053:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*053:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*053:01:05 Protein Expression Plasmid Vector	PHLAP925426416	Plasmid vector containing HLA-MICA*053:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*053:01:05 protein. This plasmid can be used for constructing HLA-MICA*053:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*053:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*054 Protein Expression Plasmid Vector	PHLAP925426417	Plasmid vector containing HLA-MICA*054 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*054 protein. This plasmid can be used for constructing HLA-MICA*054 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*054 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*055 Protein Expression Plasmid Vector	PHLAP925426418	Plasmid vector containing HLA-MICA*055 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*055 protein. This plasmid can be used for constructing HLA-MICA*055 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*055 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*056 Protein Expression Plasmid Vector	PHLAP92542649	Plasmid vector containing HLA-MICA*056 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*056 protein. This plasmid can be used for constructing HLA-MICA*056 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*056 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*057:01:01 Protein Expression Plasmid Vector	PHLAP92542650	Plasmid vector containing HLA-MICA*057:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*057:01:01 protein. This plasmid can be used for constructing HLA-MICA*057:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*057:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*057:01:02 Protein Expression Plasmid Vector	PHLAP92542651	Plasmid vector containing HLA-MICA*057:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*057:01:02 protein. This plasmid can be used for constructing HLA-MICA*057:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*057:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*057:01:03 Protein Expression Plasmid Vector	PHLAP92542652	Plasmid vector containing HLA-MICA*057:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*057:01:03 protein. This plasmid can be used for constructing HLA-MICA*057:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*057:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*057:01:04 Protein Expression Plasmid Vector	PHLAP92542653	Plasmid vector containing HLA-MICA*057:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*057:01:04 protein. This plasmid can be used for constructing HLA-MICA*057:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*057:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*058 Protein Expression Plasmid Vector	PHLAP92542654	Plasmid vector containing HLA-MICA*058 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*058 protein. This plasmid can be used for constructing HLA-MICA*058 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*058 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*059 Protein Expression Plasmid Vector	PHLAP92542655	Plasmid vector containing HLA-MICA*059 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*059 protein. This plasmid can be used for constructing HLA-MICA*059 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*059 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*060 Protein Expression Plasmid Vector	PHLAP92542656	Plasmid vector containing HLA-MICA*060 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*060 protein. This plasmid can be used for constructing HLA-MICA*060 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*060 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*061 Protein Expression Plasmid Vector	PHLAP92542657	Plasmid vector containing HLA-MICA*061 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*061 protein. This plasmid can be used for constructing HLA-MICA*061 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*061 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*062:01:01 Protein Expression Plasmid Vector	PHLAP92542658	Plasmid vector containing HLA-MICA*062:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*062:01:01 protein. This plasmid can be used for constructing HLA-MICA*062:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*062:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*062:01:02 Protein Expression Plasmid Vector	PHLAP92542659	Plasmid vector containing HLA-MICA*062:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*062:01:02 protein. This plasmid can be used for constructing HLA-MICA*062:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*062:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*063N Protein Expression Plasmid Vector	PHLAP92542660	Plasmid vector containing HLA-MICA*063N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*063N protein. This plasmid can be used for constructing HLA-MICA*063N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*063N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*064N Protein Expression Plasmid Vector	PHLAP92542661	Plasmid vector containing HLA-MICA*064N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*064N protein. This plasmid can be used for constructing HLA-MICA*064N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*064N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*065 Protein Expression Plasmid Vector	PHLAP92542662	Plasmid vector containing HLA-MICA*065 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*065 protein. This plasmid can be used for constructing HLA-MICA*065 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*065 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*066 Protein Expression Plasmid Vector	PHLAP925426663	Plasmid vector containing HLA-MICA*066 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*066 protein. This plasmid can be used for constructing HLA-MICA*066 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*066 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*067 Protein Expression Plasmid Vector	PHLAP925426664	Plasmid vector containing HLA-MICA*067 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*067 protein. This plasmid can be used for constructing HLA-MICA*067 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*067 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*068:01:01 Protein Expression Plasmid Vector	PHLAP925426665	Plasmid vector containing HLA-MICA*068:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*068:01:01 protein. This plasmid can be used for constructing HLA-MICA*068:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*068:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*068:01:02 Protein Expression Plasmid Vector	PHLAP925426666	Plasmid vector containing HLA-MICA*068:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*068:01:02 protein. This plasmid can be used for constructing HLA-MICA*068:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*068:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*068:02 Protein Expression Plasmid Vector	PHLAP925426667	Plasmid vector containing HLA-MICA*068:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*068:02 protein. This plasmid can be used for constructing HLA-MICA*068:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*068:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*069 Protein Expression Plasmid Vector	PHLAP925426668	Plasmid vector containing HLA-MICA*069 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*069 protein. This plasmid can be used for constructing HLA-MICA*069 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*069 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*070 Protein Expression Plasmid Vector	PHLAP925426669	Plasmid vector containing HLA-MICA*070 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*070 protein. This plasmid can be used for constructing HLA-MICA*070 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*070 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*071 Protein Expression Plasmid Vector	PHLAP92542670	Plasmid vector containing HLA-MICA*071 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*071 protein. This plasmid can be used for constructing HLA-MICA*071 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*071 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*072:01:01 Protein Expression Plasmid Vector	PHLAP92542671	Plasmid vector containing HLA-MICA*072:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*072:01:01 protein. This plasmid can be used for constructing HLA-MICA*072:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*072:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*072:01:02 Protein Expression Plasmid Vector	PHLAP92542672	Plasmid vector containing HLA-MICA*072:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*072:01:02 protein. This plasmid can be used for constructing HLA-MICA*072:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*072:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*072:01:03 Protein Expression Plasmid Vector	PHLAP92542673	Plasmid vector containing HLA-MICA*072:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*072:01:03 protein. This plasmid can be used for constructing HLA-MICA*072:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*072:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*073 Protein Expression Plasmid Vector	PHLAP92542674	Plasmid vector containing HLA-MICA*073 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*073 protein. This plasmid can be used for constructing HLA-MICA*073 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*073 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*074 Protein Expression Plasmid Vector	PHLAP92542675	Plasmid vector containing HLA-MICA*074 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*074 protein. This plasmid can be used for constructing HLA-MICA*074 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*074 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*075 Protein Expression Plasmid Vector	PHLAP92542676	Plasmid vector containing HLA-MICA*075 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*075 protein. This plasmid can be used for constructing HLA-MICA*075 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*075 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*076 Protein Expression Plasmid Vector	PHLAP92542677	Plasmid vector containing HLA-MICA*076 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*076 protein. This plasmid can be used for constructing HLA-MICA*076 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*076 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*077 Protein Expression Plasmid Vector	PHLAP92542678	Plasmid vector containing HLA-MICA*077 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*077 protein. This plasmid can be used for constructing HLA-MICA*077 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*077 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*078 Protein Expression Plasmid Vector	PHLAP92542679	Plasmid vector containing HLA-MICA*078 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*078 protein. This plasmid can be used for constructing HLA-MICA*078 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*078 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*079 Protein Expression Plasmid Vector	PHLAP92542680	Plasmid vector containing HLA-MICA*079 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*079 protein. This plasmid can be used for constructing HLA-MICA*079 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*079 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*080 Protein Expression Plasmid Vector	PHLAP92542681	Plasmid vector containing HLA-MICA*080 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*080 protein. This plasmid can be used for constructing HLA-MICA*080 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*080 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*081 Protein Expression Plasmid Vector	PHLAP92542682	Plasmid vector containing HLA-MICA*081 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*081 protein. This plasmid can be used for constructing HLA-MICA*081 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*081 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*082 Protein Expression Plasmid Vector	PHLAP92542683	Plasmid vector containing HLA-MICA*082 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*082 protein. This plasmid can be used for constructing HLA-MICA*082 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*082 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*083 Protein Expression Plasmid Vector	PHLAP92542684	Plasmid vector containing HLA-MICA*083 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*083 protein. This plasmid can be used for constructing HLA-MICA*083 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*083 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*084 Protein Expression Plasmid Vector	PHLAP92542685	Plasmid vector containing HLA-MICA*084 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*084 protein. This plasmid can be used for constructing HLA-MICA*084 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*084 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*085 Protein Expression Plasmid Vector	PHLAP92542686	Plasmid vector containing HLA-MICA*085 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*085 protein. This plasmid can be used for constructing HLA-MICA*085 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*085 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*086 Protein Expression Plasmid Vector	PHLAP92542687	Plasmid vector containing HLA-MICA*086 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*086 protein. This plasmid can be used for constructing HLA-MICA*086 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*086 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*087 Protein Expression Plasmid Vector	PHLAP92542688	Plasmid vector containing HLA-MICA*087 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*087 protein. This plasmid can be used for constructing HLA-MICA*087 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*087 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*088N Protein Expression Plasmid Vector	PHLAP92542689	Plasmid vector containing HLA-MICA*088N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*088N protein. This plasmid can be used for constructing HLA-MICA*088N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*088N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*089 Protein Expression Plasmid Vector	PHLAP92542690	Plasmid vector containing HLA-MICA*089 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*089 protein. This plasmid can be used for constructing HLA-MICA*089 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*089 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*090 Protein Expression Plasmid Vector	PHLAP92542691	Plasmid vector containing HLA-MICA*090 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*090 protein. This plasmid can be used for constructing HLA-MICA*090 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*090 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*091 Protein Expression Plasmid Vector	PHLAP92542692	Plasmid vector containing HLA-MICA*091 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*091 protein. This plasmid can be used for constructing HLA-MICA*091 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*091 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*092 Protein Expression Plasmid Vector	PHLAP925426923	Plasmid vector containing HLA-MICA*092 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*092 protein. This plasmid can be used for constructing HLA-MICA*092 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*092 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*093 Protein Expression Plasmid Vector	PHLAP925426924	Plasmid vector containing HLA-MICA*093 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*093 protein. This plasmid can be used for constructing HLA-MICA*093 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*093 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*094 Protein Expression Plasmid Vector	PHLAP925426925	Plasmid vector containing HLA-MICA*094 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*094 protein. This plasmid can be used for constructing HLA-MICA*094 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*094 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*095 Protein Expression Plasmid Vector	PHLAP925426926	Plasmid vector containing HLA-MICA*095 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*095 protein. This plasmid can be used for constructing HLA-MICA*095 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*095 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*096N Protein Expression Plasmid Vector	PHLAP925426927	Plasmid vector containing HLA-MICA*096N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*096N protein. This plasmid can be used for constructing HLA-MICA*096N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*096N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*097 Protein Expression Plasmid Vector	PHLAP925426928	Plasmid vector containing HLA-MICA*097 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*097 protein. This plasmid can be used for constructing HLA-MICA*097 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*097 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*098:01 Protein Expression Plasmid Vector	PHLAP925426929	Plasmid vector containing HLA-MICA*098:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*098:01 protein. This plasmid can be used for constructing HLA-MICA*098:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*098:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*098:02 Protein Expression Plasmid Vector	PHLAP925427000	Plasmid vector containing HLA-MICA*098:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*098:02 protein. This plasmid can be used for constructing HLA-MICA*098:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*098:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*099:01:01 Protein Expression Plasmid Vector	PHLAP925427001	Plasmid vector containing HLA-MICA*099:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*099:01:01 protein. This plasmid can be used for constructing HLA-MICA*099:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*099:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*099:01:02 Protein Expression Plasmid Vector	PHLAP925427002	Plasmid vector containing HLA-MICA*099:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*099:01:02 protein. This plasmid can be used for constructing HLA-MICA*099:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*099:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*100 Protein Expression Plasmid Vector	PHLAP925427003	Plasmid vector containing HLA-MICA*100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*100 protein. This plasmid can be used for constructing HLA-MICA*100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*101 Protein Expression Plasmid Vector	PHLAP925427004	Plasmid vector containing HLA-MICA*101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*101 protein. This plasmid can be used for constructing HLA-MICA*101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*102 Protein Expression Plasmid Vector	PHLAP925427005	Plasmid vector containing HLA-MICA*102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*102 protein. This plasmid can be used for constructing HLA-MICA*102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*103 Protein Expression Plasmid Vector	PHLAP925427006	Plasmid vector containing HLA-MICA*103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*103 protein. This plasmid can be used for constructing HLA-MICA*103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*104 Protein Expression Plasmid Vector	PHLAP92542707	Plasmid vector containing HLA-MICA*104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*104 protein. This plasmid can be used for constructing HLA-MICA*104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*105Q Protein Expression Plasmid Vector	PHLAP92542708	Plasmid vector containing HLA-MICA*105Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*105Q protein. This plasmid can be used for constructing HLA-MICA*105Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*105Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*106 Protein Expression Plasmid Vector	PHLAP92542709	Plasmid vector containing HLA-MICA*106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*106 protein. This plasmid can be used for constructing HLA-MICA*106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*107N Protein Expression Plasmid Vector	PHLAP92542710	Plasmid vector containing HLA-MICA*107N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*107N protein. This plasmid can be used for constructing HLA-MICA*107N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*107N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*108 Protein Expression Plasmid Vector	PHLAP92542711	Plasmid vector containing HLA-MICA*108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*108 protein. This plasmid can be used for constructing HLA-MICA*108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*109 Protein Expression Plasmid Vector	PHLAP92542712	Plasmid vector containing HLA-MICA*109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*109 protein. This plasmid can be used for constructing HLA-MICA*109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*110 Protein Expression Plasmid Vector	PHLAP92542713	Plasmid vector containing HLA-MICA*110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*110 protein. This plasmid can be used for constructing HLA-MICA*110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*111:01 Protein Expression Plasmid Vector	PHLAP92542714	Plasmid vector containing HLA-MICA*111:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*111:01 protein. This plasmid can be used for constructing HLA-MICA*111:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*111:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*111:02 Protein Expression Plasmid Vector	PHLAP92542715	Plasmid vector containing HLA-MICA*111:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*111:02 protein. This plasmid can be used for constructing HLA-MICA*111:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*111:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*112:01:01 Protein Expression Plasmid Vector	PHLAP92542716	Plasmid vector containing HLA-MICA*112:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*112:01:01 protein. This plasmid can be used for constructing HLA-MICA*112:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*112:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*112:01:02 Protein Expression Plasmid Vector	PHLAP92542717	Plasmid vector containing HLA-MICA*112:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*112:01:02 protein. This plasmid can be used for constructing HLA-MICA*112:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*112:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*112:01:03 Protein Expression Plasmid Vector	PHLAP92542718	Plasmid vector containing HLA-MICA*112:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*112:01:03 protein. This plasmid can be used for constructing HLA-MICA*112:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*112:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*112:01:04 Protein Expression Plasmid Vector	PHLAP92542719	Plasmid vector containing HLA-MICA*112:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*112:01:04 protein. This plasmid can be used for constructing HLA-MICA*112:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*112:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*112:01:05 Protein Expression Plasmid Vector	PHLAP92542720	Plasmid vector containing HLA-MICA*112:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*112:01:05 protein. This plasmid can be used for constructing HLA-MICA*112:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*112:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*112:02 Protein Expression Plasmid Vector	PHLAP92542721	Plasmid vector containing HLA-MICA*112:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*112:02 protein. This plasmid can be used for constructing HLA-MICA*112:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*112:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*113 Protein Expression Plasmid Vector	PHLAP92542722	Plasmid vector containing HLA-MICA*113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*113 protein. This plasmid can be used for constructing HLA-MICA*113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*114 Protein Expression Plasmid Vector	PHLAP92542723	Plasmid vector containing HLA-MICA*114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*114 protein. This plasmid can be used for constructing HLA-MICA*114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*115 Protein Expression Plasmid Vector	PHLAP92542724	Plasmid vector containing HLA-MICA*115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*115 protein. This plasmid can be used for constructing HLA-MICA*115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*116 Protein Expression Plasmid Vector	PHLAP92542725	Plasmid vector containing HLA-MICA*116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*116 protein. This plasmid can be used for constructing HLA-MICA*116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*117 Protein Expression Plasmid Vector	PHLAP92542726	Plasmid vector containing HLA-MICA*117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*117 protein. This plasmid can be used for constructing HLA-MICA*117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*118 Protein Expression Plasmid Vector	PHLAP92542727	Plasmid vector containing HLA-MICA*118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*118 protein. This plasmid can be used for constructing HLA-MICA*118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*119:01:01 Protein Expression Plasmid Vector	PHLAP92542728	Plasmid vector containing HLA-MICA*119:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*119:01:01 protein. This plasmid can be used for constructing HLA-MICA*119:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*119:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*119:01:02 Protein Expression Plasmid Vector	PHLAP92542729	Plasmid vector containing HLA-MICA*119:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*119:01:02 protein. This plasmid can be used for constructing HLA-MICA*119:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*119:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*120 Protein Expression Plasmid Vector	PHLAP92542730	Plasmid vector containing HLA-MICA*120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*120 protein. This plasmid can be used for constructing HLA-MICA*120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*121 Protein Expression Plasmid Vector	PHLAP92542731	Plasmid vector containing HLA-MICA*121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*121 protein. This plasmid can be used for constructing HLA-MICA*121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*122 Protein Expression Plasmid Vector	PHLAP92542732	Plasmid vector containing HLA-MICA*122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*122 protein. This plasmid can be used for constructing HLA-MICA*122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*123 Protein Expression Plasmid Vector	PHLAP92542733	Plasmid vector containing HLA-MICA*123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*123 protein. This plasmid can be used for constructing HLA-MICA*123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*124:01:01 Protein Expression Plasmid Vector	PHLAP92542734	Plasmid vector containing HLA-MICA*124:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*124:01:01 protein. This plasmid can be used for constructing HLA-MICA*124:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*124:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*124:01:02 Protein Expression Plasmid Vector	PHLAP92542735	Plasmid vector containing HLA-MICA*124:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*124:01:02 protein. This plasmid can be used for constructing HLA-MICA*124:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*124:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*125 Protein Expression Plasmid Vector	PHLAP92542736	Plasmid vector containing HLA-MICA*125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*125 protein. This plasmid can be used for constructing HLA-MICA*125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*126 Protein Expression Plasmid Vector	PHLAP92542737	Plasmid vector containing HLA-MICA*126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*126 protein. This plasmid can be used for constructing HLA-MICA*126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*127 Protein Expression Plasmid Vector	PHLAP92542738	Plasmid vector containing HLA-MICA*127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*127 protein. This plasmid can be used for constructing HLA-MICA*127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*128 Protein Expression Plasmid Vector	PHLAP92542739	Plasmid vector containing HLA-MICA*128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*128 protein. This plasmid can be used for constructing HLA-MICA*128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*129 Protein Expression Plasmid Vector	PHLAP92542740	Plasmid vector containing HLA-MICA*129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*129 protein. This plasmid can be used for constructing HLA-MICA*129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*130:01 Protein Expression Plasmid Vector	PHLAP92542741	Plasmid vector containing HLA-MICA*130:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*130:01 protein. This plasmid can be used for constructing HLA-MICA*130:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*130:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*130:02 Protein Expression Plasmid Vector	PHLAP92542742	Plasmid vector containing HLA-MICA*130:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*130:02 protein. This plasmid can be used for constructing HLA-MICA*130:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*130:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*131 Protein Expression Plasmid Vector	PHLAP92542743	Plasmid vector containing HLA-MICA*131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*131 protein. This plasmid can be used for constructing HLA-MICA*131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*132 Protein Expression Plasmid Vector	PHLAP92542744	Plasmid vector containing HLA-MICA*132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*132 protein. This plasmid can be used for constructing HLA-MICA*132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*133 Protein Expression Plasmid Vector	PHLAP92542745	Plasmid vector containing HLA-MICA*133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*133 protein. This plasmid can be used for constructing HLA-MICA*133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*134 Protein Expression Plasmid Vector	PHLAP92542746	Plasmid vector containing HLA-MICA*134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*134 protein. This plasmid can be used for constructing HLA-MICA*134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*135 Protein Expression Plasmid Vector	PHLAP92542747	Plasmid vector containing HLA-MICA*135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*135 protein. This plasmid can be used for constructing HLA-MICA*135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*136 Protein Expression Plasmid Vector	PHLAP92542748	Plasmid vector containing HLA-MICA*136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*136 protein. This plasmid can be used for constructing HLA-MICA*136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*137:01:01 Protein Expression Plasmid Vector	PHLAP92542749	Plasmid vector containing HLA-MICA*137:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*137:01:01 protein. This plasmid can be used for constructing HLA-MICA*137:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*137:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*137:01:02 Protein Expression Plasmid Vector	PHLAP92542750	Plasmid vector containing HLA-MICA*137:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*137:01:02 protein. This plasmid can be used for constructing HLA-MICA*137:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*137:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*138 Protein Expression Plasmid Vector	PHLAP92542751	Plasmid vector containing HLA-MICA*138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*138 protein. This plasmid can be used for constructing HLA-MICA*138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*139 Protein Expression Plasmid Vector	PHLAP925427512	Plasmid vector containing HLA-MICA*139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*139 protein. This plasmid can be used for constructing HLA-MICA*139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*140 Protein Expression Plasmid Vector	PHLAP925427513	Plasmid vector containing HLA-MICA*140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*140 protein. This plasmid can be used for constructing HLA-MICA*140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*141 Protein Expression Plasmid Vector	PHLAP925427514	Plasmid vector containing HLA-MICA*141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*141 protein. This plasmid can be used for constructing HLA-MICA*141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*142:01:01 Protein Expression Plasmid Vector	PHLAP925427515	Plasmid vector containing HLA-MICA*142:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*142:01:01 protein. This plasmid can be used for constructing HLA-MICA*142:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*142:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*142:01:02 Protein Expression Plasmid Vector	PHLAP925427516	Plasmid vector containing HLA-MICA*142:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*142:01:02 protein. This plasmid can be used for constructing HLA-MICA*142:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*142:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*143 Protein Expression Plasmid Vector	PHLAP925427517	Plasmid vector containing HLA-MICA*143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*143 protein. This plasmid can be used for constructing HLA-MICA*143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*144 Protein Expression Plasmid Vector	PHLAP925427518	Plasmid vector containing HLA-MICA*144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*144 protein. This plasmid can be used for constructing HLA-MICA*144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*145 Protein Expression Plasmid Vector	PHLAP925427519	Plasmid vector containing HLA-MICA*145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*145 protein. This plasmid can be used for constructing HLA-MICA*145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*146 Protein Expression Plasmid Vector	PHLAP92542760	Plasmid vector containing HLA-MICA*146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*146 protein. This plasmid can be used for constructing HLA-MICA*146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*147 Protein Expression Plasmid Vector	PHLAP92542761	Plasmid vector containing HLA-MICA*147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*147 protein. This plasmid can be used for constructing HLA-MICA*147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*148 Protein Expression Plasmid Vector	PHLAP92542762	Plasmid vector containing HLA-MICA*148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*148 protein. This plasmid can be used for constructing HLA-MICA*148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*149 Protein Expression Plasmid Vector	PHLAP92542763	Plasmid vector containing HLA-MICA*149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*149 protein. This plasmid can be used for constructing HLA-MICA*149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*150 Protein Expression Plasmid Vector	PHLAP92542764	Plasmid vector containing HLA-MICA*150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*150 protein. This plasmid can be used for constructing HLA-MICA*150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*151:01:01 Protein Expression Plasmid Vector	PHLAP92542765	Plasmid vector containing HLA-MICA*151:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*151:01:01 protein. This plasmid can be used for constructing HLA-MICA*151:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*151:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*151:01:02 Protein Expression Plasmid Vector	PHLAP92542766	Plasmid vector containing HLA-MICA*151:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*151:01:02 protein. This plasmid can be used for constructing HLA-MICA*151:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*151:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*151:01:03 Protein Expression Plasmid Vector	PHLAP92542767	Plasmid vector containing HLA-MICA*151:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*151:01:03 protein. This plasmid can be used for constructing HLA-MICA*151:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*151:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*152 Protein Expression Plasmid Vector	PHLAP92542768	Plasmid vector containing HLA-MICA*152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*152 protein. This plasmid can be used for constructing HLA-MICA*152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*153 Protein Expression Plasmid Vector	PHLAP92542769	Plasmid vector containing HLA-MICA*153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*153 protein. This plasmid can be used for constructing HLA-MICA*153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*154 Protein Expression Plasmid Vector	PHLAP92542770	Plasmid vector containing HLA-MICA*154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*154 protein. This plasmid can be used for constructing HLA-MICA*154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*155 Protein Expression Plasmid Vector	PHLAP92542771	Plasmid vector containing HLA-MICA*155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*155 protein. This plasmid can be used for constructing HLA-MICA*155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*156 Protein Expression Plasmid Vector	PHLAP92542772	Plasmid vector containing HLA-MICA*156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*156 protein. This plasmid can be used for constructing HLA-MICA*156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*157 Protein Expression Plasmid Vector	PHLAP92542773	Plasmid vector containing HLA-MICA*157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*157 protein. This plasmid can be used for constructing HLA-MICA*157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*158 Protein Expression Plasmid Vector	PHLAP92542774	Plasmid vector containing HLA-MICA*158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*158 protein. This plasmid can be used for constructing HLA-MICA*158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*159 Protein Expression Plasmid Vector	PHLAP92542775	Plasmid vector containing HLA-MICA*159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*159 protein. This plasmid can be used for constructing HLA-MICA*159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*160 Protein Expression Plasmid Vector	PHLAP92542776	Plasmid vector containing HLA-MICA*160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*160 protein. This plasmid can be used for constructing HLA-MICA*160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*161 Protein Expression Plasmid Vector	PHLAP92542777	Plasmid vector containing HLA-MICA*161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*161 protein. This plasmid can be used for constructing HLA-MICA*161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*162 Protein Expression Plasmid Vector	PHLAP92542778	Plasmid vector containing HLA-MICA*162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*162 protein. This plasmid can be used for constructing HLA-MICA*162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*163 Protein Expression Plasmid Vector	PHLAP92542779	Plasmid vector containing HLA-MICA*163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*163 protein. This plasmid can be used for constructing HLA-MICA*163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*164 Protein Expression Plasmid Vector	PHLAP92542780	Plasmid vector containing HLA-MICA*164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*164 protein. This plasmid can be used for constructing HLA-MICA*164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*165 Protein Expression Plasmid Vector	PHLAP92542781	Plasmid vector containing HLA-MICA*165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*165 protein. This plasmid can be used for constructing HLA-MICA*165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*166:01:01 Protein Expression Plasmid Vector	PHLAP92542782	Plasmid vector containing HLA-MICA*166:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*166:01:01 protein. This plasmid can be used for constructing HLA-MICA*166:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*166:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*166:01:02 Protein Expression Plasmid Vector	PHLAP925427833	Plasmid vector containing HLA-MICA*166:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*166:01:02 protein. This plasmid can be used for constructing HLA-MICA*166:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*166:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*166:01:03 Protein Expression Plasmid Vector	PHLAP925427834	Plasmid vector containing HLA-MICA*166:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*166:01:03 protein. This plasmid can be used for constructing HLA-MICA*166:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*166:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*167 Protein Expression Plasmid Vector	PHLAP925427835	Plasmid vector containing HLA-MICA*167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*167 protein. This plasmid can be used for constructing HLA-MICA*167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*168:01:01 Protein Expression Plasmid Vector	PHLAP925427836	Plasmid vector containing HLA-MICA*168:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*168:01:01 protein. This plasmid can be used for constructing HLA-MICA*168:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*168:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*168:01:02 Protein Expression Plasmid Vector	PHLAP925427837	Plasmid vector containing HLA-MICA*168:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*168:01:02 protein. This plasmid can be used for constructing HLA-MICA*168:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*168:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*169 Protein Expression Plasmid Vector	PHLAP925427838	Plasmid vector containing HLA-MICA*169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*169 protein. This plasmid can be used for constructing HLA-MICA*169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*170 Protein Expression Plasmid Vector	PHLAP925427839	Plasmid vector containing HLA-MICA*170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*170 protein. This plasmid can be used for constructing HLA-MICA*170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*171Q Protein Expression Plasmid Vector	PHLAP92542790	Plasmid vector containing HLA-MICA*171Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*171Q protein. This plasmid can be used for constructing HLA-MICA*171Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*171Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*172 Protein Expression Plasmid Vector	PHLAP92542791	Plasmid vector containing HLA-MICA*172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*172 protein. This plasmid can be used for constructing HLA-MICA*172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*173 Protein Expression Plasmid Vector	PHLAP92542792	Plasmid vector containing HLA-MICA*173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*173 protein. This plasmid can be used for constructing HLA-MICA*173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*174 Protein Expression Plasmid Vector	PHLAP92542793	Plasmid vector containing HLA-MICA*174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*174 protein. This plasmid can be used for constructing HLA-MICA*174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*175 Protein Expression Plasmid Vector	PHLAP92542794	Plasmid vector containing HLA-MICA*175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*175 protein. This plasmid can be used for constructing HLA-MICA*175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*176 Protein Expression Plasmid Vector	PHLAP92542795	Plasmid vector containing HLA-MICA*176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*176 protein. This plasmid can be used for constructing HLA-MICA*176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*177 Protein Expression Plasmid Vector	PHLAP92542796	Plasmid vector containing HLA-MICA*177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*177 protein. This plasmid can be used for constructing HLA-MICA*177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*178 Protein Expression Plasmid Vector	PHLAP92542797	Plasmid vector containing HLA-MICA*178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*178 protein. This plasmid can be used for constructing HLA-MICA*178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*179 Protein Expression Plasmid Vector	PHLAP92542798	Plasmid vector containing HLA-MICA*179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*179 protein. This plasmid can be used for constructing HLA-MICA*179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*180 Protein Expression Plasmid Vector	PHLAP92542799	Plasmid vector containing HLA-MICA*180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*180 protein. This plasmid can be used for constructing HLA-MICA*180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*181 Protein Expression Plasmid Vector	PHLAP925428000	Plasmid vector containing HLA-MICA*181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*181 protein. This plasmid can be used for constructing HLA-MICA*181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*182 Protein Expression Plasmid Vector	PHLAP925428001	Plasmid vector containing HLA-MICA*182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*182 protein. This plasmid can be used for constructing HLA-MICA*182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*183 Protein Expression Plasmid Vector	PHLAP925428002	Plasmid vector containing HLA-MICA*183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*183 protein. This plasmid can be used for constructing HLA-MICA*183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*184 Protein Expression Plasmid Vector	PHLAP925428003	Plasmid vector containing HLA-MICA*184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*184 protein. This plasmid can be used for constructing HLA-MICA*184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*185 Protein Expression Plasmid Vector	PHLAP925428004	Plasmid vector containing HLA-MICA*185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*185 protein. This plasmid can be used for constructing HLA-MICA*185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*186 Protein Expression Plasmid Vector	PHLAP925428005	Plasmid vector containing HLA-MICA*186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*186 protein. This plasmid can be used for constructing HLA-MICA*186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*187 Protein Expression Plasmid Vector	PHLAP92542806	Plasmid vector containing HLA-MICA*187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*187 protein. This plasmid can be used for constructing HLA-MICA*187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*188 Protein Expression Plasmid Vector	PHLAP92542807	Plasmid vector containing HLA-MICA*188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*188 protein. This plasmid can be used for constructing HLA-MICA*188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*189 Protein Expression Plasmid Vector	PHLAP92542808	Plasmid vector containing HLA-MICA*189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*189 protein. This plasmid can be used for constructing HLA-MICA*189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*190 Protein Expression Plasmid Vector	PHLAP92542809	Plasmid vector containing HLA-MICA*190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*190 protein. This plasmid can be used for constructing HLA-MICA*190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*191 Protein Expression Plasmid Vector	PHLAP92542810	Plasmid vector containing HLA-MICA*191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*191 protein. This plasmid can be used for constructing HLA-MICA*191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*192 Protein Expression Plasmid Vector	PHLAP92542811	Plasmid vector containing HLA-MICA*192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*192 protein. This plasmid can be used for constructing HLA-MICA*192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*193 Protein Expression Plasmid Vector	PHLAP92542812	Plasmid vector containing HLA-MICA*193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*193 protein. This plasmid can be used for constructing HLA-MICA*193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*194 Protein Expression Plasmid Vector	PHLAP92542813	Plasmid vector containing HLA-MICA*194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*194 protein. This plasmid can be used for constructing HLA-MICA*194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*195N Protein Expression Plasmid Vector	PHLAP92542814	Plasmid vector containing HLA-MICA*195N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*195N protein. This plasmid can be used for constructing HLA-MICA*195N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*195N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*196 Protein Expression Plasmid Vector	PHLAP92542815	Plasmid vector containing HLA-MICA*196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*196 protein. This plasmid can be used for constructing HLA-MICA*196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*197 Protein Expression Plasmid Vector	PHLAP92542816	Plasmid vector containing HLA-MICA*197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*197 protein. This plasmid can be used for constructing HLA-MICA*197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*198 Protein Expression Plasmid Vector	PHLAP92542817	Plasmid vector containing HLA-MICA*198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*198 protein. This plasmid can be used for constructing HLA-MICA*198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*199 Protein Expression Plasmid Vector	PHLAP92542818	Plasmid vector containing HLA-MICA*199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*199 protein. This plasmid can be used for constructing HLA-MICA*199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*200 Protein Expression Plasmid Vector	PHLAP92542819	Plasmid vector containing HLA-MICA*200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*200 protein. This plasmid can be used for constructing HLA-MICA*200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*201 Protein Expression Plasmid Vector	PHLAP92542820	Plasmid vector containing HLA-MICA*201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*201 protein. This plasmid can be used for constructing HLA-MICA*201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*202 Protein Expression Plasmid Vector	PHLAP92542821	Plasmid vector containing HLA-MICA*202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*202 protein. This plasmid can be used for constructing HLA-MICA*202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*203 Protein Expression Plasmid Vector	PHLAP92542822	Plasmid vector containing HLA-MICA*203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*203 protein. This plasmid can be used for constructing HLA-MICA*203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*204 Protein Expression Plasmid Vector	PHLAP92542823	Plasmid vector containing HLA-MICA*204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*204 protein. This plasmid can be used for constructing HLA-MICA*204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*205 Protein Expression Plasmid Vector	PHLAP92542824	Plasmid vector containing HLA-MICA*205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*205 protein. This plasmid can be used for constructing HLA-MICA*205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*206 Protein Expression Plasmid Vector	PHLAP92542825	Plasmid vector containing HLA-MICA*206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*206 protein. This plasmid can be used for constructing HLA-MICA*206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*207 Protein Expression Plasmid Vector	PHLAP92542826	Plasmid vector containing HLA-MICA*207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*207 protein. This plasmid can be used for constructing HLA-MICA*207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*208:01:01 Protein Expression Plasmid Vector	PHLAP92542827	Plasmid vector containing HLA-MICA*208:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*208:01:01 protein. This plasmid can be used for constructing HLA-MICA*208:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*208:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*208:01:02 Protein Expression Plasmid Vector	PHLAP92542828	Plasmid vector containing HLA-MICA*208:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*208:01:02 protein. This plasmid can be used for constructing HLA-MICA*208:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*208:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*208:01:03 Protein Expression Plasmid Vector	PHLAP92542829	Plasmid vector containing HLA-MICA*208:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*208:01:03 protein. This plasmid can be used for constructing HLA-MICA*208:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*208:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*208:01:04 Protein Expression Plasmid Vector	PHLAP92542830	Plasmid vector containing HLA-MICA*208:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*208:01:04 protein. This plasmid can be used for constructing HLA-MICA*208:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*208:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*209 Protein Expression Plasmid Vector	PHLAP92542831	Plasmid vector containing HLA-MICA*209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*209 protein. This plasmid can be used for constructing HLA-MICA*209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*210 Protein Expression Plasmid Vector	PHLAP92542832	Plasmid vector containing HLA-MICA*210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*210 protein. This plasmid can be used for constructing HLA-MICA*210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*211 Protein Expression Plasmid Vector	PHLAP92542833	Plasmid vector containing HLA-MICA*211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*211 protein. This plasmid can be used for constructing HLA-MICA*211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*212 Protein Expression Plasmid Vector	PHLAP92542834	Plasmid vector containing HLA-MICA*212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*212 protein. This plasmid can be used for constructing HLA-MICA*212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*213 Protein Expression Plasmid Vector	PHLAP92542835	Plasmid vector containing HLA-MICA*213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*213 protein. This plasmid can be used for constructing HLA-MICA*213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*214 Protein Expression Plasmid Vector	PHLAP92542836	Plasmid vector containing HLA-MICA*214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*214 protein. This plasmid can be used for constructing HLA-MICA*214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*215 Protein Expression Plasmid Vector	PHLAP92542837	Plasmid vector containing HLA-MICA*215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*215 protein. This plasmid can be used for constructing HLA-MICA*215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*216:01:01 Protein Expression Plasmid Vector	PHLAP92542838	Plasmid vector containing HLA-MICA*216:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*216:01:01 protein. This plasmid can be used for constructing HLA-MICA*216:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*216:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*216:01:02 Protein Expression Plasmid Vector	PHLAP92542839	Plasmid vector containing HLA-MICA*216:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*216:01:02 protein. This plasmid can be used for constructing HLA-MICA*216:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*216:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*217 Protein Expression Plasmid Vector	PHLAP92542840	Plasmid vector containing HLA-MICA*217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*217 protein. This plasmid can be used for constructing HLA-MICA*217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*218 Protein Expression Plasmid Vector	PHLAP92542841	Plasmid vector containing HLA-MICA*218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*218 protein. This plasmid can be used for constructing HLA-MICA*218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*219 Protein Expression Plasmid Vector	PHLAP92542842	Plasmid vector containing HLA-MICA*219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*219 protein. This plasmid can be used for constructing HLA-MICA*219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*220 Protein Expression Plasmid Vector	PHLAP92542843	Plasmid vector containing HLA-MICA*220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*220 protein. This plasmid can be used for constructing HLA-MICA*220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*221 Protein Expression Plasmid Vector	PHLAP92542844	Plasmid vector containing HLA-MICA*221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*221 protein. This plasmid can be used for constructing HLA-MICA*221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*222N Protein Expression Plasmid Vector	PHLAP92542845	Plasmid vector containing HLA-MICA*222N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*222N protein. This plasmid can be used for constructing HLA-MICA*222N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*222N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*223 Protein Expression Plasmid Vector	PHLAP92542846	Plasmid vector containing HLA-MICA*223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*223 protein. This plasmid can be used for constructing HLA-MICA*223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*224 Protein Expression Plasmid Vector	PHLAP92542847	Plasmid vector containing HLA-MICA*224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*224 protein. This plasmid can be used for constructing HLA-MICA*224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*225 Protein Expression Plasmid Vector	PHLAP92542848	Plasmid vector containing HLA-MICA*225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*225 protein. This plasmid can be used for constructing HLA-MICA*225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*226 Protein Expression Plasmid Vector	PHLAP92542849	Plasmid vector containing HLA-MICA*226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*226 protein. This plasmid can be used for constructing HLA-MICA*226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*227 Protein Expression Plasmid Vector	PHLAP92542850	Plasmid vector containing HLA-MICA*227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*227 protein. This plasmid can be used for constructing HLA-MICA*227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*228 Protein Expression Plasmid Vector	PHLAP92542851	Plasmid vector containing HLA-MICA*228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*228 protein. This plasmid can be used for constructing HLA-MICA*228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*229 Protein Expression Plasmid Vector	PHLAP92542852	Plasmid vector containing HLA-MICA*229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*229 protein. This plasmid can be used for constructing HLA-MICA*229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*230 Protein Expression Plasmid Vector	PHLAP92542853	Plasmid vector containing HLA-MICA*230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*230 protein. This plasmid can be used for constructing HLA-MICA*230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*231 Protein Expression Plasmid Vector	PHLAP92542854	Plasmid vector containing HLA-MICA*231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*231 protein. This plasmid can be used for constructing HLA-MICA*231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*232 Protein Expression Plasmid Vector	PHLAP92542855	Plasmid vector containing HLA-MICA*232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*232 protein. This plasmid can be used for constructing HLA-MICA*232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*233 Protein Expression Plasmid Vector	PHLAP92542856	Plasmid vector containing HLA-MICA*233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*233 protein. This plasmid can be used for constructing HLA-MICA*233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*234 Protein Expression Plasmid Vector	PHLAP92542857	Plasmid vector containing HLA-MICA*234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*234 protein. This plasmid can be used for constructing HLA-MICA*234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*235 Protein Expression Plasmid Vector	PHLAP92542858	Plasmid vector containing HLA-MICA*235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*235 protein. This plasmid can be used for constructing HLA-MICA*235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*236:01:01 Protein Expression Plasmid Vector	PHLAP92542859	Plasmid vector containing HLA-MICA*236:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*236:01:01 protein. This plasmid can be used for constructing HLA-MICA*236:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*236:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*236:01:02 Protein Expression Plasmid Vector	PHLAP92542860	Plasmid vector containing HLA-MICA*236:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*236:01:02 protein. This plasmid can be used for constructing HLA-MICA*236:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*236:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*237 Protein Expression Plasmid Vector	PHLAP92542861	Plasmid vector containing HLA-MICA*237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*237 protein. This plasmid can be used for constructing HLA-MICA*237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*238 Protein Expression Plasmid Vector	PHLAP92542862	Plasmid vector containing HLA-MICA*238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*238 protein. This plasmid can be used for constructing HLA-MICA*238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*239 Protein Expression Plasmid Vector	PHLAP92542863	Plasmid vector containing HLA-MICA*239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*239 protein. This plasmid can be used for constructing HLA-MICA*239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*240 Protein Expression Plasmid Vector	PHLAP92542864	Plasmid vector containing HLA-MICA*240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*240 protein. This plasmid can be used for constructing HLA-MICA*240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*241 Protein Expression Plasmid Vector	PHLAP92542865	Plasmid vector containing HLA-MICA*241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*241 protein. This plasmid can be used for constructing HLA-MICA*241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*242 Protein Expression Plasmid Vector	PHLAP92542866	Plasmid vector containing HLA-MICA*242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*242 protein. This plasmid can be used for constructing HLA-MICA*242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*243 Protein Expression Plasmid Vector	PHLAP92542867	Plasmid vector containing HLA-MICA*243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*243 protein. This plasmid can be used for constructing HLA-MICA*243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*244 Protein Expression Plasmid Vector	PHLAP92542868	Plasmid vector containing HLA-MICA*244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*244 protein. This plasmid can be used for constructing HLA-MICA*244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*245 Protein Expression Plasmid Vector	PHLAP92542869	Plasmid vector containing HLA-MICA*245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*245 protein. This plasmid can be used for constructing HLA-MICA*245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*246 Protein Expression Plasmid Vector	PHLAP92542870	Plasmid vector containing HLA-MICA*246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*246 protein. This plasmid can be used for constructing HLA-MICA*246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*247 Protein Expression Plasmid Vector	PHLAP92542871	Plasmid vector containing HLA-MICA*247 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*247 protein. This plasmid can be used for constructing HLA-MICA*247 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*247 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*248 Protein Expression Plasmid Vector	PHLAP92542872	Plasmid vector containing HLA-MICA*248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*248 protein. This plasmid can be used for constructing HLA-MICA*248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*249 Protein Expression Plasmid Vector	PHLAP92542873	Plasmid vector containing HLA-MICA*249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*249 protein. This plasmid can be used for constructing HLA-MICA*249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*250:01:01 Protein Expression Plasmid Vector	PHLAP92542874	Plasmid vector containing HLA-MICA*250:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*250:01:01 protein. This plasmid can be used for constructing HLA-MICA*250:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*250:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*250:01:02 Protein Expression Plasmid Vector	PHLAP92542875	Plasmid vector containing HLA-MICA*250:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*250:01:02 protein. This plasmid can be used for constructing HLA-MICA*250:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*250:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*251 Protein Expression Plasmid Vector	PHLAP92542876	Plasmid vector containing HLA-MICA*251 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*251 protein. This plasmid can be used for constructing HLA-MICA*251 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*251 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*252:01:01 Protein Expression Plasmid Vector	PHLAP92542877	Plasmid vector containing HLA-MICA*252:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*252:01:01 protein. This plasmid can be used for constructing HLA-MICA*252:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*252:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*252:01:02 Protein Expression Plasmid Vector	PHLAP92542878	Plasmid vector containing HLA-MICA*252:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*252:01:02 protein. This plasmid can be used for constructing HLA-MICA*252:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*252:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*253 Protein Expression Plasmid Vector	PHLAP92542879	Plasmid vector containing HLA-MICA*253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*253 protein. This plasmid can be used for constructing HLA-MICA*253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*254 Protein Expression Plasmid Vector	PHLAP92542880	Plasmid vector containing HLA-MICA*254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*254 protein. This plasmid can be used for constructing HLA-MICA*254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*255 Protein Expression Plasmid Vector	PHLAP92542881	Plasmid vector containing HLA-MICA*255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*255 protein. This plasmid can be used for constructing HLA-MICA*255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*256 Protein Expression Plasmid Vector	PHLAP92542882	Plasmid vector containing HLA-MICA*256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*256 protein. This plasmid can be used for constructing HLA-MICA*256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*257 Protein Expression Plasmid Vector	PHLAP92542883	Plasmid vector containing HLA-MICA*257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*257 protein. This plasmid can be used for constructing HLA-MICA*257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*258 Protein Expression Plasmid Vector	PHLAP92542884	Plasmid vector containing HLA-MICA*258 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*258 protein. This plasmid can be used for constructing HLA-MICA*258 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*258 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*259 Protein Expression Plasmid Vector	PHLAP92542885	Plasmid vector containing HLA-MICA*259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*259 protein. This plasmid can be used for constructing HLA-MICA*259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*260 Protein Expression Plasmid Vector	PHLAP92542886	Plasmid vector containing HLA-MICA*260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*260 protein. This plasmid can be used for constructing HLA-MICA*260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*261 Protein Expression Plasmid Vector	PHLAP92542887	Plasmid vector containing HLA-MICA*261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*261 protein. This plasmid can be used for constructing HLA-MICA*261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*262 Protein Expression Plasmid Vector	PHLAP92542888	Plasmid vector containing HLA-MICA*262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*262 protein. This plasmid can be used for constructing HLA-MICA*262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*263 Protein Expression Plasmid Vector	PHLAP92542889	Plasmid vector containing HLA-MICA*263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*263 protein. This plasmid can be used for constructing HLA-MICA*263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*264 Protein Expression Plasmid Vector	PHLAP92542890	Plasmid vector containing HLA-MICA*264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*264 protein. This plasmid can be used for constructing HLA-MICA*264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*265 Protein Expression Plasmid Vector	PHLAP92542891	Plasmid vector containing HLA-MICA*265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*265 protein. This plasmid can be used for constructing HLA-MICA*265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*266 Protein Expression Plasmid Vector	PHLAP92542892	Plasmid vector containing HLA-MICA*266 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*266 protein. This plasmid can be used for constructing HLA-MICA*266 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*266 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*267 Protein Expression Plasmid Vector	PHLAP92542893	Plasmid vector containing HLA-MICA*267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*267 protein. This plasmid can be used for constructing HLA-MICA*267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*268 Protein Expression Plasmid Vector	PHLAP92542894	Plasmid vector containing HLA-MICA*268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*268 protein. This plasmid can be used for constructing HLA-MICA*268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*269 Protein Expression Plasmid Vector	PHLAP92542895	Plasmid vector containing HLA-MICA*269 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*269 protein. This plasmid can be used for constructing HLA-MICA*269 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*269 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*270 Protein Expression Plasmid Vector	PHLAP92542896	Plasmid vector containing HLA-MICA*270 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*270 protein. This plasmid can be used for constructing HLA-MICA*270 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*270 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*271 Protein Expression Plasmid Vector	PHLAP92542897	Plasmid vector containing HLA-MICA*271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*271 protein. This plasmid can be used for constructing HLA-MICA*271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*272 Protein Expression Plasmid Vector	PHLAP92542898	Plasmid vector containing HLA-MICA*272 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*272 protein. This plasmid can be used for constructing HLA-MICA*272 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*272 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*273 Protein Expression Plasmid Vector	PHLAP92542899	Plasmid vector containing HLA-MICA*273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*273 protein. This plasmid can be used for constructing HLA-MICA*273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*274 Protein Expression Plasmid Vector	PHLAP92542900	Plasmid vector containing HLA-MICA*274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*274 protein. This plasmid can be used for constructing HLA-MICA*274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*275 Protein Expression Plasmid Vector	PHLAP92542901	Plasmid vector containing HLA-MICA*275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*275 protein. This plasmid can be used for constructing HLA-MICA*275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*276 Protein Expression Plasmid Vector	PHLAP92542902	Plasmid vector containing HLA-MICA*276 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*276 protein. This plasmid can be used for constructing HLA-MICA*276 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*276 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*277 Protein Expression Plasmid Vector	PHLAP92542903	Plasmid vector containing HLA-MICA*277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*277 protein. This plasmid can be used for constructing HLA-MICA*277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*278 Protein Expression Plasmid Vector	PHLAP92542904	Plasmid vector containing HLA-MICA*278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*278 protein. This plasmid can be used for constructing HLA-MICA*278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*279 Protein Expression Plasmid Vector	PHLAP92542905	Plasmid vector containing HLA-MICA*279 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*279 protein. This plasmid can be used for constructing HLA-MICA*279 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*279 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*280 Protein Expression Plasmid Vector	PHLAP92542906	Plasmid vector containing HLA-MICA*280 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*280 protein. This plasmid can be used for constructing HLA-MICA*280 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*280 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*281 Protein Expression Plasmid Vector	PHLAP92542907	Plasmid vector containing HLA-MICA*281 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*281 protein. This plasmid can be used for constructing HLA-MICA*281 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*281 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*282 Protein Expression Plasmid Vector	PHLAP92542908	Plasmid vector containing HLA-MICA*282 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*282 protein. This plasmid can be used for constructing HLA-MICA*282 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*282 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*283 Protein Expression Plasmid Vector	PHLAP92542909	Plasmid vector containing HLA-MICA*283 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*283 protein. This plasmid can be used for constructing HLA-MICA*283 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*283 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*284 Protein Expression Plasmid Vector	PHLAP92542910	Plasmid vector containing HLA-MICA*284 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*284 protein. This plasmid can be used for constructing HLA-MICA*284 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*284 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*285 Protein Expression Plasmid Vector	PHLAP92542911	Plasmid vector containing HLA-MICA*285 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*285 protein. This plasmid can be used for constructing HLA-MICA*285 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*285 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*286N Protein Expression Plasmid Vector	PHLAP92542912	Plasmid vector containing HLA-MICA*286N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*286N protein. This plasmid can be used for constructing HLA-MICA*286N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*286N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*287 Protein Expression Plasmid Vector	PHLAP92542913	Plasmid vector containing HLA-MICA*287 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*287 protein. This plasmid can be used for constructing HLA-MICA*287 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*287 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*288 Protein Expression Plasmid Vector	PHLAP92542914	Plasmid vector containing HLA-MICA*288 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*288 protein. This plasmid can be used for constructing HLA-MICA*288 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*288 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*289 Protein Expression Plasmid Vector	PHLAP92542915	Plasmid vector containing HLA-MICA*289 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*289 protein. This plasmid can be used for constructing HLA-MICA*289 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*289 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*290 Protein Expression Plasmid Vector	PHLAP92542916	Plasmid vector containing HLA-MICA*290 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*290 protein. This plasmid can be used for constructing HLA-MICA*290 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*290 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICA*291 Protein Expression Plasmid Vector	PHLAP92542917	Plasmid vector containing HLA-MICA*291 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*291 protein. This plasmid can be used for constructing HLA-MICA*291 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*291 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*292 Protein Expression Plasmid Vector	PHLAP92542918	Plasmid vector containing HLA-MICA*292 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*292 protein. This plasmid can be used for constructing HLA-MICA*292 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*292 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*293N Protein Expression Plasmid Vector	PHLAP92542919	Plasmid vector containing HLA-MICA*293N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*293N protein. This plasmid can be used for constructing HLA-MICA*293N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*293N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICA*294 Protein Expression Plasmid Vector	PHLAP92542920	Plasmid vector containing HLA-MICA*294 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICA*294 protein. This plasmid can be used for constructing HLA-MICA*294 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICA*294 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*001 Protein Expression Plasmid Vector	PHLAP92542921	Plasmid vector containing HLA-MICB*001 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*001 protein. This plasmid can be used for constructing HLA-MICB*001 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*001 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:01 Protein Expression Plasmid Vector	PHLAP92542922	Plasmid vector containing HLA-MICB*002:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:01 protein. This plasmid can be used for constructing HLA-MICB*002:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:02 Protein Expression Plasmid Vector	PHLAP92542923	Plasmid vector containing HLA-MICB*002:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:02 protein. This plasmid can be used for constructing HLA-MICB*002:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*002:01:03 Protein Expression Plasmid Vector	PHLAP92542924	Plasmid vector containing HLA-MICB*002:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:03 protein. This plasmid can be used for constructing HLA-MICB*002:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:04 Protein Expression Plasmid Vector	PHLAP92542925	Plasmid vector containing HLA-MICB*002:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:04 protein. This plasmid can be used for constructing HLA-MICB*002:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:05 Protein Expression Plasmid Vector	PHLAP92542926	Plasmid vector containing HLA-MICB*002:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:05 protein. This plasmid can be used for constructing HLA-MICB*002:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:06 Protein Expression Plasmid Vector	PHLAP92542927	Plasmid vector containing HLA-MICB*002:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:06 protein. This plasmid can be used for constructing HLA-MICB*002:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:07 Protein Expression Plasmid Vector	PHLAP92542928	Plasmid vector containing HLA-MICB*002:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:07 protein. This plasmid can be used for constructing HLA-MICB*002:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:08 Protein Expression Plasmid Vector	PHLAP92542929	Plasmid vector containing HLA-MICB*002:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:08 protein. This plasmid can be used for constructing HLA-MICB*002:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:09 Protein Expression Plasmid Vector	PHLAP92542930	Plasmid vector containing HLA-MICB*002:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:09 protein. This plasmid can be used for constructing HLA-MICB*002:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*002:01:10 Protein Expression Plasmid Vector	PHLAP92542931	Plasmid vector containing HLA-MICB*002:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:10 protein. This plasmid can be used for constructing HLA-MICB*002:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:11 Protein Expression Plasmid Vector	PHLAP92542932	Plasmid vector containing HLA-MICB*002:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:11 protein. This plasmid can be used for constructing HLA-MICB*002:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:12 Protein Expression Plasmid Vector	PHLAP92542933	Plasmid vector containing HLA-MICB*002:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:12 protein. This plasmid can be used for constructing HLA-MICB*002:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:13 Protein Expression Plasmid Vector	PHLAP92542934	Plasmid vector containing HLA-MICB*002:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:13 protein. This plasmid can be used for constructing HLA-MICB*002:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:14 Protein Expression Plasmid Vector	PHLAP92542935	Plasmid vector containing HLA-MICB*002:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:14 protein. This plasmid can be used for constructing HLA-MICB*002:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:15 Protein Expression Plasmid Vector	PHLAP92542936	Plasmid vector containing HLA-MICB*002:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:15 protein. This plasmid can be used for constructing HLA-MICB*002:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:16 Protein Expression Plasmid Vector	PHLAP92542937	Plasmid vector containing HLA-MICB*002:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:16 protein. This plasmid can be used for constructing HLA-MICB*002:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*002:01:17 Protein Expression Plasmid Vector	PHLAP92542938	Plasmid vector containing HLA-MICB*002:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:17 protein. This plasmid can be used for constructing HLA-MICB*002:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:18 Protein Expression Plasmid Vector	PHLAP92542939	Plasmid vector containing HLA-MICB*002:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:18 protein. This plasmid can be used for constructing HLA-MICB*002:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:19 Protein Expression Plasmid Vector	PHLAP92542940	Plasmid vector containing HLA-MICB*002:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:19 protein. This plasmid can be used for constructing HLA-MICB*002:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:20 Protein Expression Plasmid Vector	PHLAP92542941	Plasmid vector containing HLA-MICB*002:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:20 protein. This plasmid can be used for constructing HLA-MICB*002:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:21 Protein Expression Plasmid Vector	PHLAP92542942	Plasmid vector containing HLA-MICB*002:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:21 protein. This plasmid can be used for constructing HLA-MICB*002:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:22 Protein Expression Plasmid Vector	PHLAP92542943	Plasmid vector containing HLA-MICB*002:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:22 protein. This plasmid can be used for constructing HLA-MICB*002:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:23 Protein Expression Plasmid Vector	PHLAP92542944	Plasmid vector containing HLA-MICB*002:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:23 protein. This plasmid can be used for constructing HLA-MICB*002:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*002:01:24 Protein Expression Plasmid Vector	PHLAP92542945	Plasmid vector containing HLA-MICB*002:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:24 protein. This plasmid can be used for constructing HLA-MICB*002:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:25 Protein Expression Plasmid Vector	PHLAP92542946	Plasmid vector containing HLA-MICB*002:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:25 protein. This plasmid can be used for constructing HLA-MICB*002:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:26 Protein Expression Plasmid Vector	PHLAP92542947	Plasmid vector containing HLA-MICB*002:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:26 protein. This plasmid can be used for constructing HLA-MICB*002:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:27 Protein Expression Plasmid Vector	PHLAP92542948	Plasmid vector containing HLA-MICB*002:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:27 protein. This plasmid can be used for constructing HLA-MICB*002:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:28 Protein Expression Plasmid Vector	PHLAP92542949	Plasmid vector containing HLA-MICB*002:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:28 protein. This plasmid can be used for constructing HLA-MICB*002:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:29 Protein Expression Plasmid Vector	PHLAP92542950	Plasmid vector containing HLA-MICB*002:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:29 protein. This plasmid can be used for constructing HLA-MICB*002:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:30 Protein Expression Plasmid Vector	PHLAP92542951	Plasmid vector containing HLA-MICB*002:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:30 protein. This plasmid can be used for constructing HLA-MICB*002:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*002:01:31 Protein Expression Plasmid Vector	PHLAP92542952	Plasmid vector containing HLA-MICB*002:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:31 protein. This plasmid can be used for constructing HLA-MICB*002:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:32 Protein Expression Plasmid Vector	PHLAP92542953	Plasmid vector containing HLA-MICB*002:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:32 protein. This plasmid can be used for constructing HLA-MICB*002:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:33 Protein Expression Plasmid Vector	PHLAP92542954	Plasmid vector containing HLA-MICB*002:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:33 protein. This plasmid can be used for constructing HLA-MICB*002:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:34 Protein Expression Plasmid Vector	PHLAP92542955	Plasmid vector containing HLA-MICB*002:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:34 protein. This plasmid can be used for constructing HLA-MICB*002:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:35 Protein Expression Plasmid Vector	PHLAP92542956	Plasmid vector containing HLA-MICB*002:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:35 protein. This plasmid can be used for constructing HLA-MICB*002:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:36 Protein Expression Plasmid Vector	PHLAP92542957	Plasmid vector containing HLA-MICB*002:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:36 protein. This plasmid can be used for constructing HLA-MICB*002:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:37 Protein Expression Plasmid Vector	PHLAP92542958	Plasmid vector containing HLA-MICB*002:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:37 protein. This plasmid can be used for constructing HLA-MICB*002:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*002:01:38 Protein Expression Plasmid Vector	PHLAP92542959	Plasmid vector containing HLA-MICB*002:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:38 protein. This plasmid can be used for constructing HLA-MICB*002:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:01:39 Protein Expression Plasmid Vector	PHLAP92542960	Plasmid vector containing HLA-MICB*002:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:01:39 protein. This plasmid can be used for constructing HLA-MICB*002:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:02:01 Protein Expression Plasmid Vector	PHLAP92542961	Plasmid vector containing HLA-MICB*002:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:02:01 protein. This plasmid can be used for constructing HLA-MICB*002:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:02:02 Protein Expression Plasmid Vector	PHLAP92542962	Plasmid vector containing HLA-MICB*002:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:02:02 protein. This plasmid can be used for constructing HLA-MICB*002:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:03 Protein Expression Plasmid Vector	PHLAP92542963	Plasmid vector containing HLA-MICB*002:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:03 protein. This plasmid can be used for constructing HLA-MICB*002:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:04 Protein Expression Plasmid Vector	PHLAP92542964	Plasmid vector containing HLA-MICB*002:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:04 protein. This plasmid can be used for constructing HLA-MICB*002:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*002:05 Protein Expression Plasmid Vector	PHLAP92542965	Plasmid vector containing HLA-MICB*002:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:05 protein. This plasmid can be used for constructing HLA-MICB*002:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*002:06 Protein Expression Plasmid Vector	PHLAP92542966	Plasmid vector containing HLA-MICB*002:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*002:06 protein. This plasmid can be used for constructing HLA-MICB*002:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*002:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*003:01:01 Protein Expression Plasmid Vector	PHLAP92542967	Plasmid vector containing HLA-MICB*003:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*003:01:01 protein. This plasmid can be used for constructing HLA-MICB*003:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*003:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*003:01:02 Protein Expression Plasmid Vector	PHLAP92542968	Plasmid vector containing HLA-MICB*003:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*003:01:02 protein. This plasmid can be used for constructing HLA-MICB*003:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*003:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*003:01:03 Protein Expression Plasmid Vector	PHLAP92542969	Plasmid vector containing HLA-MICB*003:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*003:01:03 protein. This plasmid can be used for constructing HLA-MICB*003:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*003:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*003:01:04 Protein Expression Plasmid Vector	PHLAP92542970	Plasmid vector containing HLA-MICB*003:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*003:01:04 protein. This plasmid can be used for constructing HLA-MICB*003:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*003:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*003:01:05 Protein Expression Plasmid Vector	PHLAP92542971	Plasmid vector containing HLA-MICB*003:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*003:01:05 protein. This plasmid can be used for constructing HLA-MICB*003:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*003:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*003:01:06 Protein Expression Plasmid Vector	PHLAP92542972	Plasmid vector containing HLA-MICB*003:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*003:01:06 protein. This plasmid can be used for constructing HLA-MICB*003:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*003:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*003:01:07 Protein Expression Plasmid Vector	PHLAP92542973	Plasmid vector containing HLA-MICB*003:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*003:01:07 protein. This plasmid can be used for constructing HLA-MICB*003:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*003:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*003:01:08 Protein Expression Plasmid Vector	PHLAP92542974	Plasmid vector containing HLA-MICB*003:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*003:01:08 protein. This plasmid can be used for constructing HLA-MICB*003:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*003:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*003:01:09 Protein Expression Plasmid Vector	PHLAP92542975	Plasmid vector containing HLA-MICB*003:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*003:01:09 protein. This plasmid can be used for constructing HLA-MICB*003:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*003:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*003:01:10 Protein Expression Plasmid Vector	PHLAP92542976	Plasmid vector containing HLA-MICB*003:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*003:01:10 protein. This plasmid can be used for constructing HLA-MICB*003:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*003:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*003:01:11 Protein Expression Plasmid Vector	PHLAP92542977	Plasmid vector containing HLA-MICB*003:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*003:01:11 protein. This plasmid can be used for constructing HLA-MICB*003:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*003:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*003:01:12 Protein Expression Plasmid Vector	PHLAP92542978	Plasmid vector containing HLA-MICB*003:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*003:01:12 protein. This plasmid can be used for constructing HLA-MICB*003:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*003:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:01 Protein Expression Plasmid Vector	PHLAP92542979	Plasmid vector containing HLA-MICB*004:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:01 protein. This plasmid can be used for constructing HLA-MICB*004:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*004:01:02 Protein Expression Plasmid Vector	PHLAP92542980	Plasmid vector containing HLA-MICB*004:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:02 protein. This plasmid can be used for constructing HLA-MICB*004:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:03 Protein Expression Plasmid Vector	PHLAP92542981	Plasmid vector containing HLA-MICB*004:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:03 protein. This plasmid can be used for constructing HLA-MICB*004:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:04 Protein Expression Plasmid Vector	PHLAP92542982	Plasmid vector containing HLA-MICB*004:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:04 protein. This plasmid can be used for constructing HLA-MICB*004:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:05 Protein Expression Plasmid Vector	PHLAP92542983	Plasmid vector containing HLA-MICB*004:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:05 protein. This plasmid can be used for constructing HLA-MICB*004:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:06 Protein Expression Plasmid Vector	PHLAP92542984	Plasmid vector containing HLA-MICB*004:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:06 protein. This plasmid can be used for constructing HLA-MICB*004:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:07 Protein Expression Plasmid Vector	PHLAP92542985	Plasmid vector containing HLA-MICB*004:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:07 protein. This plasmid can be used for constructing HLA-MICB*004:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:08 Protein Expression Plasmid Vector	PHLAP92542986	Plasmid vector containing HLA-MICB*004:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:08 protein. This plasmid can be used for constructing HLA-MICB*004:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*004:01:09 Protein Expression Plasmid Vector	PHLAP92542987	Plasmid vector containing HLA-MICB*004:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:09 protein. This plasmid can be used for constructing HLA-MICB*004:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:10 Protein Expression Plasmid Vector	PHLAP92542988	Plasmid vector containing HLA-MICB*004:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:10 protein. This plasmid can be used for constructing HLA-MICB*004:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:11 Protein Expression Plasmid Vector	PHLAP92542989	Plasmid vector containing HLA-MICB*004:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:11 protein. This plasmid can be used for constructing HLA-MICB*004:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:12 Protein Expression Plasmid Vector	PHLAP92542990	Plasmid vector containing HLA-MICB*004:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:12 protein. This plasmid can be used for constructing HLA-MICB*004:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:13 Protein Expression Plasmid Vector	PHLAP92542991	Plasmid vector containing HLA-MICB*004:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:13 protein. This plasmid can be used for constructing HLA-MICB*004:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:14 Protein Expression Plasmid Vector	PHLAP92542992	Plasmid vector containing HLA-MICB*004:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:14 protein. This plasmid can be used for constructing HLA-MICB*004:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:15 Protein Expression Plasmid Vector	PHLAP92542993	Plasmid vector containing HLA-MICB*004:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:15 protein. This plasmid can be used for constructing HLA-MICB*004:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*004:01:16 Protein Expression Plasmid Vector	PHLAP92542994	Plasmid vector containing HLA-MICB*004:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:16 protein. This plasmid can be used for constructing HLA-MICB*004:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:17 Protein Expression Plasmid Vector	PHLAP92542995	Plasmid vector containing HLA-MICB*004:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:17 protein. This plasmid can be used for constructing HLA-MICB*004:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:18 Protein Expression Plasmid Vector	PHLAP92542996	Plasmid vector containing HLA-MICB*004:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:18 protein. This plasmid can be used for constructing HLA-MICB*004:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:19 Protein Expression Plasmid Vector	PHLAP92542997	Plasmid vector containing HLA-MICB*004:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:19 protein. This plasmid can be used for constructing HLA-MICB*004:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:20 Protein Expression Plasmid Vector	PHLAP92542998	Plasmid vector containing HLA-MICB*004:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:20 protein. This plasmid can be used for constructing HLA-MICB*004:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:21 Protein Expression Plasmid Vector	PHLAP92542999	Plasmid vector containing HLA-MICB*004:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:21 protein. This plasmid can be used for constructing HLA-MICB*004:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:22 Protein Expression Plasmid Vector	PHLAP925430000	Plasmid vector containing HLA-MICB*004:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:22 protein. This plasmid can be used for constructing HLA-MICB*004:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*004:01:23 Protein Expression Plasmid Vector	PHLAP92543001	Plasmid vector containing HLA-MICB*004:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:23 protein. This plasmid can be used for constructing HLA-MICB*004:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:24 Protein Expression Plasmid Vector	PHLAP92543002	Plasmid vector containing HLA-MICB*004:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:24 protein. This plasmid can be used for constructing HLA-MICB*004:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:25 Protein Expression Plasmid Vector	PHLAP92543003	Plasmid vector containing HLA-MICB*004:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:25 protein. This plasmid can be used for constructing HLA-MICB*004:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:26 Protein Expression Plasmid Vector	PHLAP92543004	Plasmid vector containing HLA-MICB*004:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:26 protein. This plasmid can be used for constructing HLA-MICB*004:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:27 Protein Expression Plasmid Vector	PHLAP92543005	Plasmid vector containing HLA-MICB*004:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:27 protein. This plasmid can be used for constructing HLA-MICB*004:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:28 Protein Expression Plasmid Vector	PHLAP92543006	Plasmid vector containing HLA-MICB*004:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:28 protein. This plasmid can be used for constructing HLA-MICB*004:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:29 Protein Expression Plasmid Vector	PHLAP92543007	Plasmid vector containing HLA-MICB*004:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:29 protein. This plasmid can be used for constructing HLA-MICB*004:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*004:01:30 Protein Expression Plasmid Vector	PHLAP92543008	Plasmid vector containing HLA-MICB*004:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:30 protein. This plasmid can be used for constructing HLA-MICB*004:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:31 Protein Expression Plasmid Vector	PHLAP92543009	Plasmid vector containing HLA-MICB*004:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:31 protein. This plasmid can be used for constructing HLA-MICB*004:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:32 Protein Expression Plasmid Vector	PHLAP925430110	Plasmid vector containing HLA-MICB*004:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:32 protein. This plasmid can be used for constructing HLA-MICB*004:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:01:33 Protein Expression Plasmid Vector	PHLAP925430111	Plasmid vector containing HLA-MICB*004:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:01:33 protein. This plasmid can be used for constructing HLA-MICB*004:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:02 Protein Expression Plasmid Vector	PHLAP925430112	Plasmid vector containing HLA-MICB*004:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:02 protein. This plasmid can be used for constructing HLA-MICB*004:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*004:03 Protein Expression Plasmid Vector	PHLAP925430113	Plasmid vector containing HLA-MICB*004:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*004:03 protein. This plasmid can be used for constructing HLA-MICB*004:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*004:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:01:01 Protein Expression Plasmid Vector	PHLAP925430114	Plasmid vector containing HLA-MICB*005:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:01:01 protein. This plasmid can be used for constructing HLA-MICB*005:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:01:02 Protein Expression Plasmid Vector	PHLAP92543015	Plasmid vector containing HLA-MICB*005:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:01:02 protein. This plasmid can be used for constructing HLA-MICB*005:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:01:03 Protein Expression Plasmid Vector	PHLAP92543016	Plasmid vector containing HLA-MICB*005:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:01:03 protein. This plasmid can be used for constructing HLA-MICB*005:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:01:04 Protein Expression Plasmid Vector	PHLAP92543017	Plasmid vector containing HLA-MICB*005:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:01:04 protein. This plasmid can be used for constructing HLA-MICB*005:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:01 Protein Expression Plasmid Vector	PHLAP92543018	Plasmid vector containing HLA-MICB*005:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:01 protein. This plasmid can be used for constructing HLA-MICB*005:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:02 Protein Expression Plasmid Vector	PHLAP92543019	Plasmid vector containing HLA-MICB*005:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:02 protein. This plasmid can be used for constructing HLA-MICB*005:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:03 Protein Expression Plasmid Vector	PHLAP92543020	Plasmid vector containing HLA-MICB*005:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:03 protein. This plasmid can be used for constructing HLA-MICB*005:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:04 Protein Expression Plasmid Vector	PHLAP92543021	Plasmid vector containing HLA-MICB*005:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:04 protein. This plasmid can be used for constructing HLA-MICB*005:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:02:05 Protein Expression Plasmid Vector	PHLAP92543022	Plasmid vector containing HLA-MICB*005:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:05 protein. This plasmid can be used for constructing HLA-MICB*005:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:06 Protein Expression Plasmid Vector	PHLAP92543023	Plasmid vector containing HLA-MICB*005:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:06 protein. This plasmid can be used for constructing HLA-MICB*005:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:07 Protein Expression Plasmid Vector	PHLAP92543024	Plasmid vector containing HLA-MICB*005:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:07 protein. This plasmid can be used for constructing HLA-MICB*005:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:08 Protein Expression Plasmid Vector	PHLAP92543025	Plasmid vector containing HLA-MICB*005:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:08 protein. This plasmid can be used for constructing HLA-MICB*005:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:09 Protein Expression Plasmid Vector	PHLAP92543026	Plasmid vector containing HLA-MICB*005:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:09 protein. This plasmid can be used for constructing HLA-MICB*005:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:10 Protein Expression Plasmid Vector	PHLAP92543027	Plasmid vector containing HLA-MICB*005:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:10 protein. This plasmid can be used for constructing HLA-MICB*005:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:11 Protein Expression Plasmid Vector	PHLAP92543028	Plasmid vector containing HLA-MICB*005:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:11 protein. This plasmid can be used for constructing HLA-MICB*005:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:02:12 Protein Expression Plasmid Vector	PHLAP92543029	Plasmid vector containing HLA-MICB*005:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:12 protein. This plasmid can be used for constructing HLA-MICB*005:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:13 Protein Expression Plasmid Vector	PHLAP92543030	Plasmid vector containing HLA-MICB*005:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:13 protein. This plasmid can be used for constructing HLA-MICB*005:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:14 Protein Expression Plasmid Vector	PHLAP92543031	Plasmid vector containing HLA-MICB*005:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:14 protein. This plasmid can be used for constructing HLA-MICB*005:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:15 Protein Expression Plasmid Vector	PHLAP92543032	Plasmid vector containing HLA-MICB*005:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:15 protein. This plasmid can be used for constructing HLA-MICB*005:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:16 Protein Expression Plasmid Vector	PHLAP92543033	Plasmid vector containing HLA-MICB*005:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:16 protein. This plasmid can be used for constructing HLA-MICB*005:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:17 Protein Expression Plasmid Vector	PHLAP92543034	Plasmid vector containing HLA-MICB*005:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:17 protein. This plasmid can be used for constructing HLA-MICB*005:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:18 Protein Expression Plasmid Vector	PHLAP92543035	Plasmid vector containing HLA-MICB*005:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:18 protein. This plasmid can be used for constructing HLA-MICB*005:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:02:19 Protein Expression Plasmid Vector	PHLAP92543036	Plasmid vector containing HLA-MICB*005:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:19 protein. This plasmid can be used for constructing HLA-MICB*005:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:20 Protein Expression Plasmid Vector	PHLAP92543037	Plasmid vector containing HLA-MICB*005:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:20 protein. This plasmid can be used for constructing HLA-MICB*005:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:21 Protein Expression Plasmid Vector	PHLAP92543038	Plasmid vector containing HLA-MICB*005:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:21 protein. This plasmid can be used for constructing HLA-MICB*005:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:22 Protein Expression Plasmid Vector	PHLAP92543039	Plasmid vector containing HLA-MICB*005:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:22 protein. This plasmid can be used for constructing HLA-MICB*005:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:23 Protein Expression Plasmid Vector	PHLAP92543040	Plasmid vector containing HLA-MICB*005:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:23 protein. This plasmid can be used for constructing HLA-MICB*005:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:24 Protein Expression Plasmid Vector	PHLAP92543041	Plasmid vector containing HLA-MICB*005:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:24 protein. This plasmid can be used for constructing HLA-MICB*005:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:25 Protein Expression Plasmid Vector	PHLAP92543042	Plasmid vector containing HLA-MICB*005:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:25 protein. This plasmid can be used for constructing HLA-MICB*005:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:02:26 Protein Expression Plasmid Vector	PHLAP925430443	Plasmid vector containing HLA-MICB*005:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:26 protein. This plasmid can be used for constructing HLA-MICB*005:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:27 Protein Expression Plasmid Vector	PHLAP925430444	Plasmid vector containing HLA-MICB*005:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:27 protein. This plasmid can be used for constructing HLA-MICB*005:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:28 Protein Expression Plasmid Vector	PHLAP925430445	Plasmid vector containing HLA-MICB*005:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:28 protein. This plasmid can be used for constructing HLA-MICB*005:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:29 Protein Expression Plasmid Vector	PHLAP925430446	Plasmid vector containing HLA-MICB*005:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:29 protein. This plasmid can be used for constructing HLA-MICB*005:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:30 Protein Expression Plasmid Vector	PHLAP925430447	Plasmid vector containing HLA-MICB*005:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:30 protein. This plasmid can be used for constructing HLA-MICB*005:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:31 Protein Expression Plasmid Vector	PHLAP925430448	Plasmid vector containing HLA-MICB*005:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:31 protein. This plasmid can be used for constructing HLA-MICB*005:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:32 Protein Expression Plasmid Vector	PHLAP925430449	Plasmid vector containing HLA-MICB*005:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:32 protein. This plasmid can be used for constructing HLA-MICB*005:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:02:33 Protein Expression Plasmid Vector	PHLAP92543050	Plasmid vector containing HLA-MICB*005:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:33 protein. This plasmid can be used for constructing HLA-MICB*005:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:34 Protein Expression Plasmid Vector	PHLAP92543051	Plasmid vector containing HLA-MICB*005:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:34 protein. This plasmid can be used for constructing HLA-MICB*005:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:35 Protein Expression Plasmid Vector	PHLAP92543052	Plasmid vector containing HLA-MICB*005:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:35 protein. This plasmid can be used for constructing HLA-MICB*005:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:36 Protein Expression Plasmid Vector	PHLAP92543053	Plasmid vector containing HLA-MICB*005:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:36 protein. This plasmid can be used for constructing HLA-MICB*005:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:37 Protein Expression Plasmid Vector	PHLAP92543054	Plasmid vector containing HLA-MICB*005:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:37 protein. This plasmid can be used for constructing HLA-MICB*005:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:38 Protein Expression Plasmid Vector	PHLAP92543055	Plasmid vector containing HLA-MICB*005:02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:38 protein. This plasmid can be used for constructing HLA-MICB*005:02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:39 Protein Expression Plasmid Vector	PHLAP92543056	Plasmid vector containing HLA-MICB*005:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:39 protein. This plasmid can be used for constructing HLA-MICB*005:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:02:40 Protein Expression Plasmid Vector	PHLAP92543057	Plasmid vector containing HLA-MICB*005:02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:40 protein. This plasmid can be used for constructing HLA-MICB*005:02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:41 Protein Expression Plasmid Vector	PHLAP92543058	Plasmid vector containing HLA-MICB*005:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:41 protein. This plasmid can be used for constructing HLA-MICB*005:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:42 Protein Expression Plasmid Vector	PHLAP92543059	Plasmid vector containing HLA-MICB*005:02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:42 protein. This plasmid can be used for constructing HLA-MICB*005:02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:43 Protein Expression Plasmid Vector	PHLAP92543060	Plasmid vector containing HLA-MICB*005:02:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:43 protein. This plasmid can be used for constructing HLA-MICB*005:02:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:44 Protein Expression Plasmid Vector	PHLAP92543061	Plasmid vector containing HLA-MICB*005:02:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:44 protein. This plasmid can be used for constructing HLA-MICB*005:02:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:45 Protein Expression Plasmid Vector	PHLAP92543062	Plasmid vector containing HLA-MICB*005:02:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:45 protein. This plasmid can be used for constructing HLA-MICB*005:02:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:46 Protein Expression Plasmid Vector	PHLAP92543063	Plasmid vector containing HLA-MICB*005:02:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:46 protein. This plasmid can be used for constructing HLA-MICB*005:02:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:02:47 Protein Expression Plasmid Vector	PHLAP92543064	Plasmid vector containing HLA-MICB*005:02:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:47 protein. This plasmid can be used for constructing HLA-MICB*005:02:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:48 Protein Expression Plasmid Vector	PHLAP92543065	Plasmid vector containing HLA-MICB*005:02:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:48 protein. This plasmid can be used for constructing HLA-MICB*005:02:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:49 Protein Expression Plasmid Vector	PHLAP92543066	Plasmid vector containing HLA-MICB*005:02:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:49 protein. This plasmid can be used for constructing HLA-MICB*005:02:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:50 Protein Expression Plasmid Vector	PHLAP92543067	Plasmid vector containing HLA-MICB*005:02:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:50 protein. This plasmid can be used for constructing HLA-MICB*005:02:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:51 Protein Expression Plasmid Vector	PHLAP92543068	Plasmid vector containing HLA-MICB*005:02:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:51 protein. This plasmid can be used for constructing HLA-MICB*005:02:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:52 Protein Expression Plasmid Vector	PHLAP92543069	Plasmid vector containing HLA-MICB*005:02:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:52 protein. This plasmid can be used for constructing HLA-MICB*005:02:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:53 Protein Expression Plasmid Vector	PHLAP92543070	Plasmid vector containing HLA-MICB*005:02:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:53 protein. This plasmid can be used for constructing HLA-MICB*005:02:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:02:54 Protein Expression Plasmid Vector	PHLAP92543071	Plasmid vector containing HLA-MICB*005:02:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:54 protein. This plasmid can be used for constructing HLA-MICB*005:02:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:55 Protein Expression Plasmid Vector	PHLAP92543072	Plasmid vector containing HLA-MICB*005:02:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:55 protein. This plasmid can be used for constructing HLA-MICB*005:02:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:56 Protein Expression Plasmid Vector	PHLAP92543073	Plasmid vector containing HLA-MICB*005:02:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:56 protein. This plasmid can be used for constructing HLA-MICB*005:02:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:57 Protein Expression Plasmid Vector	PHLAP92543074	Plasmid vector containing HLA-MICB*005:02:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:57 protein. This plasmid can be used for constructing HLA-MICB*005:02:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:58 Protein Expression Plasmid Vector	PHLAP92543075	Plasmid vector containing HLA-MICB*005:02:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:58 protein. This plasmid can be used for constructing HLA-MICB*005:02:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:02:59 Protein Expression Plasmid Vector	PHLAP92543076	Plasmid vector containing HLA-MICB*005:02:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:02:59 protein. This plasmid can be used for constructing HLA-MICB*005:02:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:02:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:03:01 Protein Expression Plasmid Vector	PHLAP92543077	Plasmid vector containing HLA-MICB*005:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:03:01 protein. This plasmid can be used for constructing HLA-MICB*005:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:03:02 Protein Expression Plasmid Vector	PHLAP92543078	Plasmid vector containing HLA-MICB*005:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:03:02 protein. This plasmid can be used for constructing HLA-MICB*005:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:03:03 Protein Expression Plasmid Vector	PHLAP92543079	Plasmid vector containing HLA-MICB*005:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:03:03 protein. This plasmid can be used for constructing HLA-MICB*005:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:03:04 Protein Expression Plasmid Vector	PHLAP92543080	Plasmid vector containing HLA-MICB*005:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:03:04 protein. This plasmid can be used for constructing HLA-MICB*005:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:03:05 Protein Expression Plasmid Vector	PHLAP92543081	Plasmid vector containing HLA-MICB*005:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:03:05 protein. This plasmid can be used for constructing HLA-MICB*005:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:03:06 Protein Expression Plasmid Vector	PHLAP92543082	Plasmid vector containing HLA-MICB*005:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:03:06 protein. This plasmid can be used for constructing HLA-MICB*005:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:03:07 Protein Expression Plasmid Vector	PHLAP92543083	Plasmid vector containing HLA-MICB*005:03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:03:07 protein. This plasmid can be used for constructing HLA-MICB*005:03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:03:08 Protein Expression Plasmid Vector	PHLAP92543084	Plasmid vector containing HLA-MICB*005:03:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:03:08 protein. This plasmid can be used for constructing HLA-MICB*005:03:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:03:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:03:09 Protein Expression Plasmid Vector	PHLAP92543085	Plasmid vector containing HLA-MICB*005:03:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:03:09 protein. This plasmid can be used for constructing HLA-MICB*005:03:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:03:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:04 Protein Expression Plasmid Vector	PHLAP92543086	Plasmid vector containing HLA-MICB*005:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:04 protein. This plasmid can be used for constructing HLA-MICB*005:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:05 Protein Expression Plasmid Vector	PHLAP92543087	Plasmid vector containing HLA-MICB*005:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:05 protein. This plasmid can be used for constructing HLA-MICB*005:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:06:01 Protein Expression Plasmid Vector	PHLAP92543088	Plasmid vector containing HLA-MICB*005:06:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:06:01 protein. This plasmid can be used for constructing HLA-MICB*005:06:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:06:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:06:02 Protein Expression Plasmid Vector	PHLAP92543089	Plasmid vector containing HLA-MICB*005:06:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:06:02 protein. This plasmid can be used for constructing HLA-MICB*005:06:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:06:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:06:03 Protein Expression Plasmid Vector	PHLAP92543090	Plasmid vector containing HLA-MICB*005:06:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:06:03 protein. This plasmid can be used for constructing HLA-MICB*005:06:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:06:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:07:01 Protein Expression Plasmid Vector	PHLAP92543091	Plasmid vector containing HLA-MICB*005:07:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:07:01 protein. This plasmid can be used for constructing HLA-MICB*005:07:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:07:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:07:02 Protein Expression Plasmid Vector	PHLAP92543092	Plasmid vector containing HLA-MICB*005:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:07:02 protein. This plasmid can be used for constructing HLA-MICB*005:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:08:01 Protein Expression Plasmid Vector	PHLAP92543093	Plasmid vector containing HLA-MICB*005:08:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:08:01 protein. This plasmid can be used for constructing HLA-MICB*005:08:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:08:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:08:02 Protein Expression Plasmid Vector	PHLAP92543094	Plasmid vector containing HLA-MICB*005:08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:08:02 protein. This plasmid can be used for constructing HLA-MICB*005:08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:09 Protein Expression Plasmid Vector	PHLAP92543095	Plasmid vector containing HLA-MICB*005:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:09 protein. This plasmid can be used for constructing HLA-MICB*005:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:10 Protein Expression Plasmid Vector	PHLAP92543096	Plasmid vector containing HLA-MICB*005:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:10 protein. This plasmid can be used for constructing HLA-MICB*005:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:11 Protein Expression Plasmid Vector	PHLAP92543097	Plasmid vector containing HLA-MICB*005:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:11 protein. This plasmid can be used for constructing HLA-MICB*005:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:12 Protein Expression Plasmid Vector	PHLAP92543098	Plasmid vector containing HLA-MICB*005:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:12 protein. This plasmid can be used for constructing HLA-MICB*005:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*005:13 Protein Expression Plasmid Vector	PHLAP92543099	Plasmid vector containing HLA-MICB*005:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:13 protein. This plasmid can be used for constructing HLA-MICB*005:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:14 Protein Expression Plasmid Vector	PHLAP925431000	Plasmid vector containing HLA-MICB*005:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:14 protein. This plasmid can be used for constructing HLA-MICB*005:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:15 Protein Expression Plasmid Vector	PHLAP925431001	Plasmid vector containing HLA-MICB*005:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:15 protein. This plasmid can be used for constructing HLA-MICB*005:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*005:16 Protein Expression Plasmid Vector	PHLAP925431002	Plasmid vector containing HLA-MICB*005:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*005:16 protein. This plasmid can be used for constructing HLA-MICB*005:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*005:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*006:01:01 Protein Expression Plasmid Vector	PHLAP925431003	Plasmid vector containing HLA-MICB*006:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*006:01:01 protein. This plasmid can be used for constructing HLA-MICB*006:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*006:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*006:01:02 Protein Expression Plasmid Vector	PHLAP925431004	Plasmid vector containing HLA-MICB*006:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*006:01:02 protein. This plasmid can be used for constructing HLA-MICB*006:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*006:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*007 Protein Expression Plasmid Vector	PHLAP925431005	Plasmid vector containing HLA-MICB*007 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*007 protein. This plasmid can be used for constructing HLA-MICB*007 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*007 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*008:01:01 Protein Expression Plasmid Vector	PHLAP92543106	Plasmid vector containing HLA-MICB*008:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:01 protein. This plasmid can be used for constructing HLA-MICB*008:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:02 Protein Expression Plasmid Vector	PHLAP92543107	Plasmid vector containing HLA-MICB*008:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:02 protein. This plasmid can be used for constructing HLA-MICB*008:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:03 Protein Expression Plasmid Vector	PHLAP92543108	Plasmid vector containing HLA-MICB*008:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:03 protein. This plasmid can be used for constructing HLA-MICB*008:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:04 Protein Expression Plasmid Vector	PHLAP92543109	Plasmid vector containing HLA-MICB*008:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:04 protein. This plasmid can be used for constructing HLA-MICB*008:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:05 Protein Expression Plasmid Vector	PHLAP92543110	Plasmid vector containing HLA-MICB*008:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:05 protein. This plasmid can be used for constructing HLA-MICB*008:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:06 Protein Expression Plasmid Vector	PHLAP92543111	Plasmid vector containing HLA-MICB*008:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:06 protein. This plasmid can be used for constructing HLA-MICB*008:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:07 Protein Expression Plasmid Vector	PHLAP92543112	Plasmid vector containing HLA-MICB*008:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:07 protein. This plasmid can be used for constructing HLA-MICB*008:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*008:01:08 Protein Expression Plasmid Vector	PHLAP925431113	Plasmid vector containing HLA-MICB*008:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:08 protein. This plasmid can be used for constructing HLA-MICB*008:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:09 Protein Expression Plasmid Vector	PHLAP925431114	Plasmid vector containing HLA-MICB*008:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:09 protein. This plasmid can be used for constructing HLA-MICB*008:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:10 Protein Expression Plasmid Vector	PHLAP925431115	Plasmid vector containing HLA-MICB*008:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:10 protein. This plasmid can be used for constructing HLA-MICB*008:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:11 Protein Expression Plasmid Vector	PHLAP925431116	Plasmid vector containing HLA-MICB*008:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:11 protein. This plasmid can be used for constructing HLA-MICB*008:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:12 Protein Expression Plasmid Vector	PHLAP925431117	Plasmid vector containing HLA-MICB*008:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:12 protein. This plasmid can be used for constructing HLA-MICB*008:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:13 Protein Expression Plasmid Vector	PHLAP925431118	Plasmid vector containing HLA-MICB*008:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:13 protein. This plasmid can be used for constructing HLA-MICB*008:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:14 Protein Expression Plasmid Vector	PHLAP925431119	Plasmid vector containing HLA-MICB*008:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:14 protein. This plasmid can be used for constructing HLA-MICB*008:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*008:01:15 Protein Expression Plasmid Vector	PHLAP925431210	Plasmid vector containing HLA-MICB*008:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:15 protein. This plasmid can be used for constructing HLA-MICB*008:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:16 Protein Expression Plasmid Vector	PHLAP925431211	Plasmid vector containing HLA-MICB*008:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:16 protein. This plasmid can be used for constructing HLA-MICB*008:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:17 Protein Expression Plasmid Vector	PHLAP925431212	Plasmid vector containing HLA-MICB*008:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:17 protein. This plasmid can be used for constructing HLA-MICB*008:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:18 Protein Expression Plasmid Vector	PHLAP925431213	Plasmid vector containing HLA-MICB*008:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:18 protein. This plasmid can be used for constructing HLA-MICB*008:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:19 Protein Expression Plasmid Vector	PHLAP925431214	Plasmid vector containing HLA-MICB*008:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:19 protein. This plasmid can be used for constructing HLA-MICB*008:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*008:01:20 Protein Expression Plasmid Vector	PHLAP925431215	Plasmid vector containing HLA-MICB*008:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*008:01:20 protein. This plasmid can be used for constructing HLA-MICB*008:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*008:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:01N Protein Expression Plasmid Vector	PHLAP925431216	Plasmid vector containing HLA-MICB*009:01:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:01N protein. This plasmid can be used for constructing HLA-MICB*009:01:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*009:01:02N Protein Expression Plasmid Vector	PHLAP92543127	Plasmid vector containing HLA-MICB*009:01:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:02N protein. This plasmid can be used for constructing HLA-MICB*009:01:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:03N Protein Expression Plasmid Vector	PHLAP92543128	Plasmid vector containing HLA-MICB*009:01:03N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:03N protein. This plasmid can be used for constructing HLA-MICB*009:01:03N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:03N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:04N Protein Expression Plasmid Vector	PHLAP92543129	Plasmid vector containing HLA-MICB*009:01:04N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:04N protein. This plasmid can be used for constructing HLA-MICB*009:01:04N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:04N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:05N Protein Expression Plasmid Vector	PHLAP925431310	Plasmid vector containing HLA-MICB*009:01:05N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:05N protein. This plasmid can be used for constructing HLA-MICB*009:01:05N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:05N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:06N Protein Expression Plasmid Vector	PHLAP925431311	Plasmid vector containing HLA-MICB*009:01:06N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:06N protein. This plasmid can be used for constructing HLA-MICB*009:01:06N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:06N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:07N Protein Expression Plasmid Vector	PHLAP925431312	Plasmid vector containing HLA-MICB*009:01:07N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:07N protein. This plasmid can be used for constructing HLA-MICB*009:01:07N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:07N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:08N Protein Expression Plasmid Vector	PHLAP925431313	Plasmid vector containing HLA-MICB*009:01:08N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:08N protein. This plasmid can be used for constructing HLA-MICB*009:01:08N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:08N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*009:01:09N Protein Expression Plasmid Vector	PHLAP92543134	Plasmid vector containing HLA-MICB*009:01:09N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:09N protein. This plasmid can be used for constructing HLA-MICB*009:01:09N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:09N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:10N Protein Expression Plasmid Vector	PHLAP92543135	Plasmid vector containing HLA-MICB*009:01:10N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:10N protein. This plasmid can be used for constructing HLA-MICB*009:01:10N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:10N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:11N Protein Expression Plasmid Vector	PHLAP92543136	Plasmid vector containing HLA-MICB*009:01:11N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:11N protein. This plasmid can be used for constructing HLA-MICB*009:01:11N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:11N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:12N Protein Expression Plasmid Vector	PHLAP92543137	Plasmid vector containing HLA-MICB*009:01:12N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:12N protein. This plasmid can be used for constructing HLA-MICB*009:01:12N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:12N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:13N Protein Expression Plasmid Vector	PHLAP92543138	Plasmid vector containing HLA-MICB*009:01:13N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:13N protein. This plasmid can be used for constructing HLA-MICB*009:01:13N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:13N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:14N Protein Expression Plasmid Vector	PHLAP92543139	Plasmid vector containing HLA-MICB*009:01:14N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:14N protein. This plasmid can be used for constructing HLA-MICB*009:01:14N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:14N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*009:01:15N Protein Expression Plasmid Vector	PHLAP92543140	Plasmid vector containing HLA-MICB*009:01:15N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*009:01:15N protein. This plasmid can be used for constructing HLA-MICB*009:01:15N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*009:01:15N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*010 Protein Expression Plasmid Vector	PHLAP92543141	Plasmid vector containing HLA-MICB*010 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*010 protein. This plasmid can be used for constructing HLA-MICB*010 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*010 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*011 Protein Expression Plasmid Vector	PHLAP92543142	Plasmid vector containing HLA-MICB*011 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*011 protein. This plasmid can be used for constructing HLA-MICB*011 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*011 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*012 Protein Expression Plasmid Vector	PHLAP92543143	Plasmid vector containing HLA-MICB*012 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*012 protein. This plasmid can be used for constructing HLA-MICB*012 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*012 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*013:01:01 Protein Expression Plasmid Vector	PHLAP92543144	Plasmid vector containing HLA-MICB*013:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*013:01:01 protein. This plasmid can be used for constructing HLA-MICB*013:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*013:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*013:01:02 Protein Expression Plasmid Vector	PHLAP92543145	Plasmid vector containing HLA-MICB*013:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*013:01:02 protein. This plasmid can be used for constructing HLA-MICB*013:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*013:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*013:01:03 Protein Expression Plasmid Vector	PHLAP92543146	Plasmid vector containing HLA-MICB*013:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*013:01:03 protein. This plasmid can be used for constructing HLA-MICB*013:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*013:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*013:01:04 Protein Expression Plasmid Vector	PHLAP92543147	Plasmid vector containing HLA-MICB*013:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*013:01:04 protein. This plasmid can be used for constructing HLA-MICB*013:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*013:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*013:01:05 Protein Expression Plasmid Vector	PHLAP92543148	Plasmid vector containing HLA-MICB*013:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*013:01:05 protein. This plasmid can be used for constructing HLA-MICB*013:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*013:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*013:01:06 Protein Expression Plasmid Vector	PHLAP92543149	Plasmid vector containing HLA-MICB*013:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*013:01:06 protein. This plasmid can be used for constructing HLA-MICB*013:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*013:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*014:01:01 Protein Expression Plasmid Vector	PHLAP92543150	Plasmid vector containing HLA-MICB*014:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*014:01:01 protein. This plasmid can be used for constructing HLA-MICB*014:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*014:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*014:01:02 Protein Expression Plasmid Vector	PHLAP92543151	Plasmid vector containing HLA-MICB*014:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*014:01:02 protein. This plasmid can be used for constructing HLA-MICB*014:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*014:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*014:01:03 Protein Expression Plasmid Vector	PHLAP92543152	Plasmid vector containing HLA-MICB*014:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*014:01:03 protein. This plasmid can be used for constructing HLA-MICB*014:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*014:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*014:01:04 Protein Expression Plasmid Vector	PHLAP92543153	Plasmid vector containing HLA-MICB*014:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*014:01:04 protein. This plasmid can be used for constructing HLA-MICB*014:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*014:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*014:01:05 Protein Expression Plasmid Vector	PHLAP92543154	Plasmid vector containing HLA-MICB*014:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*014:01:05 protein. This plasmid can be used for constructing HLA-MICB*014:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*014:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*014:01:06 Protein Expression Plasmid Vector	PHLAP92543155	Plasmid vector containing HLA-MICB*014:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*014:01:06 protein. This plasmid can be used for constructing HLA-MICB*014:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*014:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*014:01:07 Protein Expression Plasmid Vector	PHLAP92543156	Plasmid vector containing HLA-MICB*014:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*014:01:07 protein. This plasmid can be used for constructing HLA-MICB*014:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*014:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*014:01:08 Protein Expression Plasmid Vector	PHLAP92543157	Plasmid vector containing HLA-MICB*014:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*014:01:08 protein. This plasmid can be used for constructing HLA-MICB*014:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*014:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*014:01:09 Protein Expression Plasmid Vector	PHLAP92543158	Plasmid vector containing HLA-MICB*014:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*014:01:09 protein. This plasmid can be used for constructing HLA-MICB*014:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*014:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*014:02 Protein Expression Plasmid Vector	PHLAP92543159	Plasmid vector containing HLA-MICB*014:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*014:02 protein. This plasmid can be used for constructing HLA-MICB*014:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*014:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*014:03 Protein Expression Plasmid Vector	PHLAP92543160	Plasmid vector containing HLA-MICB*014:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*014:03 protein. This plasmid can be used for constructing HLA-MICB*014:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*014:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*015 Protein Expression Plasmid Vector	PHLAP92543161	Plasmid vector containing HLA-MICB*015 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*015 protein. This plasmid can be used for constructing HLA-MICB*015 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*015 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*016 Protein Expression Plasmid Vector	PHLAP925431612	Plasmid vector containing HLA-MICB*016 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*016 protein. This plasmid can be used for constructing HLA-MICB*016 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*016 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*017 Protein Expression Plasmid Vector	PHLAP925431613	Plasmid vector containing HLA-MICB*017 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*017 protein. This plasmid can be used for constructing HLA-MICB*017 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*017 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*018:01:01 Protein Expression Plasmid Vector	PHLAP925431614	Plasmid vector containing HLA-MICB*018:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*018:01:01 protein. This plasmid can be used for constructing HLA-MICB*018:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*018:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*018:01:02 Protein Expression Plasmid Vector	PHLAP925431615	Plasmid vector containing HLA-MICB*018:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*018:01:02 protein. This plasmid can be used for constructing HLA-MICB*018:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*018:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*018:01:03 Protein Expression Plasmid Vector	PHLAP925431616	Plasmid vector containing HLA-MICB*018:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*018:01:03 protein. This plasmid can be used for constructing HLA-MICB*018:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*018:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*019:01:01 Protein Expression Plasmid Vector	PHLAP925431617	Plasmid vector containing HLA-MICB*019:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*019:01:01 protein. This plasmid can be used for constructing HLA-MICB*019:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*019:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*019:01:02 Protein Expression Plasmid Vector	PHLAP925431618	Plasmid vector containing HLA-MICB*019:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*019:01:02 protein. This plasmid can be used for constructing HLA-MICB*019:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*019:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*019:01:03 Protein Expression Plasmid Vector	PHLAP92543169	Plasmid vector containing HLA-MICB*019:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*019:01:03 protein. This plasmid can be used for constructing HLA-MICB*019:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*019:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*019:01:04 Protein Expression Plasmid Vector	PHLAP92543170	Plasmid vector containing HLA-MICB*019:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*019:01:04 protein. This plasmid can be used for constructing HLA-MICB*019:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*019:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*019:01:05 Protein Expression Plasmid Vector	PHLAP92543171	Plasmid vector containing HLA-MICB*019:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*019:01:05 protein. This plasmid can be used for constructing HLA-MICB*019:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*019:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*019:01:06 Protein Expression Plasmid Vector	PHLAP92543172	Plasmid vector containing HLA-MICB*019:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*019:01:06 protein. This plasmid can be used for constructing HLA-MICB*019:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*019:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*019:01:07 Protein Expression Plasmid Vector	PHLAP92543173	Plasmid vector containing HLA-MICB*019:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*019:01:07 protein. This plasmid can be used for constructing HLA-MICB*019:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*019:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*019:01:08 Protein Expression Plasmid Vector	PHLAP92543174	Plasmid vector containing HLA-MICB*019:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*019:01:08 protein. This plasmid can be used for constructing HLA-MICB*019:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*019:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*020:01:01 Protein Expression Plasmid Vector	PHLAP92543175	Plasmid vector containing HLA-MICB*020:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*020:01:01 protein. This plasmid can be used for constructing HLA-MICB*020:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*020:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*020:01:02 Protein Expression Plasmid Vector	PHLAP92543176	Plasmid vector containing HLA-MICB*020:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*020:01:02 protein. This plasmid can be used for constructing HLA-MICB*020:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*020:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*020:01:03 Protein Expression Plasmid Vector	PHLAP92543177	Plasmid vector containing HLA-MICB*020:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*020:01:03 protein. This plasmid can be used for constructing HLA-MICB*020:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*020:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*021:01:01N Protein Expression Plasmid Vector	PHLAP92543178	Plasmid vector containing HLA-MICB*021:01:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*021:01:01N protein. This plasmid can be used for constructing HLA-MICB*021:01:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*021:01:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*021:01:02N Protein Expression Plasmid Vector	PHLAP92543179	Plasmid vector containing HLA-MICB*021:01:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*021:01:02N protein. This plasmid can be used for constructing HLA-MICB*021:01:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*021:01:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*021:01:03N Protein Expression Plasmid Vector	PHLAP92543180	Plasmid vector containing HLA-MICB*021:01:03N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*021:01:03N protein. This plasmid can be used for constructing HLA-MICB*021:01:03N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*021:01:03N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*021:01:04N Protein Expression Plasmid Vector	PHLAP92543181	Plasmid vector containing HLA-MICB*021:01:04N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*021:01:04N protein. This plasmid can be used for constructing HLA-MICB*021:01:04N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*021:01:04N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*021:01:05N Protein Expression Plasmid Vector	PHLAP92543182	Plasmid vector containing HLA-MICB*021:01:05N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*021:01:05N protein. This plasmid can be used for constructing HLA-MICB*021:01:05N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*021:01:05N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*021:01:06N Protein Expression Plasmid Vector	PHLAP925431833	Plasmid vector containing HLA-MICB*021:01:06N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*021:01:06N protein. This plasmid can be used for constructing HLA-MICB*021:01:06N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*021:01:06N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*021:01:07N Protein Expression Plasmid Vector	PHLAP925431834	Plasmid vector containing HLA-MICB*021:01:07N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*021:01:07N protein. This plasmid can be used for constructing HLA-MICB*021:01:07N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*021:01:07N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*022 Protein Expression Plasmid Vector	PHLAP925431835	Plasmid vector containing HLA-MICB*022 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*022 protein. This plasmid can be used for constructing HLA-MICB*022 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*022 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*023 Protein Expression Plasmid Vector	PHLAP925431836	Plasmid vector containing HLA-MICB*023 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*023 protein. This plasmid can be used for constructing HLA-MICB*023 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*023 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*024:01:01 Protein Expression Plasmid Vector	PHLAP925431837	Plasmid vector containing HLA-MICB*024:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*024:01:01 protein. This plasmid can be used for constructing HLA-MICB*024:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*024:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*024:01:02 Protein Expression Plasmid Vector	PHLAP925431838	Plasmid vector containing HLA-MICB*024:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*024:01:02 protein. This plasmid can be used for constructing HLA-MICB*024:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*024:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*024:01:03 Protein Expression Plasmid Vector	PHLAP925431839	Plasmid vector containing HLA-MICB*024:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*024:01:03 protein. This plasmid can be used for constructing HLA-MICB*024:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*024:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*024:01:04 Protein Expression Plasmid Vector	PHLAP92543190	Plasmid vector containing HLA-MICB*024:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*024:01:04 protein. This plasmid can be used for constructing HLA-MICB*024:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*024:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*024:01:05 Protein Expression Plasmid Vector	PHLAP92543191	Plasmid vector containing HLA-MICB*024:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*024:01:05 protein. This plasmid can be used for constructing HLA-MICB*024:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*024:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*024:01:06 Protein Expression Plasmid Vector	PHLAP92543192	Plasmid vector containing HLA-MICB*024:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*024:01:06 protein. This plasmid can be used for constructing HLA-MICB*024:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*024:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*025:01:01 Protein Expression Plasmid Vector	PHLAP92543193	Plasmid vector containing HLA-MICB*025:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*025:01:01 protein. This plasmid can be used for constructing HLA-MICB*025:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*025:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*025:01:02 Protein Expression Plasmid Vector	PHLAP92543194	Plasmid vector containing HLA-MICB*025:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*025:01:02 protein. This plasmid can be used for constructing HLA-MICB*025:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*025:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*025:01:03 Protein Expression Plasmid Vector	PHLAP92543195	Plasmid vector containing HLA-MICB*025:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*025:01:03 protein. This plasmid can be used for constructing HLA-MICB*025:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*025:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*025:01:04 Protein Expression Plasmid Vector	PHLAP92543196	Plasmid vector containing HLA-MICB*025:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*025:01:04 protein. This plasmid can be used for constructing HLA-MICB*025:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*025:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*025:01:05 Protein Expression Plasmid Vector	PHLAP92543197	Plasmid vector containing HLA-MICB*025:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*025:01:05 protein. This plasmid can be used for constructing HLA-MICB*025:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*025:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*026 Protein Expression Plasmid Vector	PHLAP92543198	Plasmid vector containing HLA-MICB*026 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*026 protein. This plasmid can be used for constructing HLA-MICB*026 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*026 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*027 Protein Expression Plasmid Vector	PHLAP92543199	Plasmid vector containing HLA-MICB*027 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*027 protein. This plasmid can be used for constructing HLA-MICB*027 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*027 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*028 Protein Expression Plasmid Vector	PHLAP925432000	Plasmid vector containing HLA-MICB*028 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*028 protein. This plasmid can be used for constructing HLA-MICB*028 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*028 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*029 Protein Expression Plasmid Vector	PHLAP925432001	Plasmid vector containing HLA-MICB*029 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*029 protein. This plasmid can be used for constructing HLA-MICB*029 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*029 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*030 Protein Expression Plasmid Vector	PHLAP925432002	Plasmid vector containing HLA-MICB*030 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*030 protein. This plasmid can be used for constructing HLA-MICB*030 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*030 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*031:01:01 Protein Expression Plasmid Vector	PHLAP925432003	Plasmid vector containing HLA-MICB*031:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*031:01:01 protein. This plasmid can be used for constructing HLA-MICB*031:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*031:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*031:01:02 Protein Expression Plasmid Vector	PHLAP92543204	Plasmid vector containing HLA-MICB*031:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*031:01:02 protein. This plasmid can be used for constructing HLA-MICB*031:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*031:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*031:01:03 Protein Expression Plasmid Vector	PHLAP92543205	Plasmid vector containing HLA-MICB*031:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*031:01:03 protein. This plasmid can be used for constructing HLA-MICB*031:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*031:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*031:01:04 Protein Expression Plasmid Vector	PHLAP92543206	Plasmid vector containing HLA-MICB*031:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*031:01:04 protein. This plasmid can be used for constructing HLA-MICB*031:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*031:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*031:01:05 Protein Expression Plasmid Vector	PHLAP92543207	Plasmid vector containing HLA-MICB*031:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*031:01:05 protein. This plasmid can be used for constructing HLA-MICB*031:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*031:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*031:01:06 Protein Expression Plasmid Vector	PHLAP92543208	Plasmid vector containing HLA-MICB*031:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*031:01:06 protein. This plasmid can be used for constructing HLA-MICB*031:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*031:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*032 Protein Expression Plasmid Vector	PHLAP92543209	Plasmid vector containing HLA-MICB*032 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*032 protein. This plasmid can be used for constructing HLA-MICB*032 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*032 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*033 Protein Expression Plasmid Vector	PHLAP925432110	Plasmid vector containing HLA-MICB*033 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*033 protein. This plasmid can be used for constructing HLA-MICB*033 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*033 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*034 Protein Expression Plasmid Vector	PHLAP925432111	Plasmid vector containing HLA-MICB*034 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*034 protein. This plasmid can be used for constructing HLA-MICB*034 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*034 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*035 Protein Expression Plasmid Vector	PHLAP925432112	Plasmid vector containing HLA-MICB*035 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*035 protein. This plasmid can be used for constructing HLA-MICB*035 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*035 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*036 Protein Expression Plasmid Vector	PHLAP925432113	Plasmid vector containing HLA-MICB*036 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*036 protein. This plasmid can be used for constructing HLA-MICB*036 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*036 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*037 Protein Expression Plasmid Vector	PHLAP925432114	Plasmid vector containing HLA-MICB*037 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*037 protein. This plasmid can be used for constructing HLA-MICB*037 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*037 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*038 Protein Expression Plasmid Vector	PHLAP925432115	Plasmid vector containing HLA-MICB*038 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*038 protein. This plasmid can be used for constructing HLA-MICB*038 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*038 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*039 Protein Expression Plasmid Vector	PHLAP925432116	Plasmid vector containing HLA-MICB*039 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*039 protein. This plasmid can be used for constructing HLA-MICB*039 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*039 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*040 Protein Expression Plasmid Vector	PHLAP925432117	Plasmid vector containing HLA-MICB*040 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*040 protein. This plasmid can be used for constructing HLA-MICB*040 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*040 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*041N Protein Expression Plasmid Vector	PHLAP925432118	Plasmid vector containing HLA-MICB*041N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*041N protein. This plasmid can be used for constructing HLA-MICB*041N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*041N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*042 Protein Expression Plasmid Vector	PHLAP92543219	Plasmid vector containing HLA-MICB*042 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*042 protein. This plasmid can be used for constructing HLA-MICB*042 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*042 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*043N Protein Expression Plasmid Vector	PHLAP92543220	Plasmid vector containing HLA-MICB*043N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*043N protein. This plasmid can be used for constructing HLA-MICB*043N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*043N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*044 Protein Expression Plasmid Vector	PHLAP92543221	Plasmid vector containing HLA-MICB*044 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*044 protein. This plasmid can be used for constructing HLA-MICB*044 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*044 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*045N Protein Expression Plasmid Vector	PHLAP92543222	Plasmid vector containing HLA-MICB*045N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*045N protein. This plasmid can be used for constructing HLA-MICB*045N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*045N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*046 Protein Expression Plasmid Vector	PHLAP92543223	Plasmid vector containing HLA-MICB*046 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*046 protein. This plasmid can be used for constructing HLA-MICB*046 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*046 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*047 Protein Expression Plasmid Vector	PHLAP92543224	Plasmid vector containing HLA-MICB*047 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*047 protein. This plasmid can be used for constructing HLA-MICB*047 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*047 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*048 Protein Expression Plasmid Vector	PHLAP92543225	Plasmid vector containing HLA-MICB*048 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*048 protein. This plasmid can be used for constructing HLA-MICB*048 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*048 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*049 Protein Expression Plasmid Vector	PHLAP92543226	Plasmid vector containing HLA-MICB*049 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*049 protein. This plasmid can be used for constructing HLA-MICB*049 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*049 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*050 Protein Expression Plasmid Vector	PHLAP92543227	Plasmid vector containing HLA-MICB*050 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*050 protein. This plasmid can be used for constructing HLA-MICB*050 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*050 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*051 Protein Expression Plasmid Vector	PHLAP92543228	Plasmid vector containing HLA-MICB*051 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*051 protein. This plasmid can be used for constructing HLA-MICB*051 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*051 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*052 Protein Expression Plasmid Vector	PHLAP92543229	Plasmid vector containing HLA-MICB*052 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*052 protein. This plasmid can be used for constructing HLA-MICB*052 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*052 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*053 Protein Expression Plasmid Vector	PHLAP92543230	Plasmid vector containing HLA-MICB*053 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*053 protein. This plasmid can be used for constructing HLA-MICB*053 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*053 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*054 Protein Expression Plasmid Vector	PHLAP92543231	Plasmid vector containing HLA-MICB*054 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*054 protein. This plasmid can be used for constructing HLA-MICB*054 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*054 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*055 Protein Expression Plasmid Vector	PHLAP92543232	Plasmid vector containing HLA-MICB*055 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*055 protein. This plasmid can be used for constructing HLA-MICB*055 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*055 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*056 Protein Expression Plasmid Vector	PHLAP92543233	Plasmid vector containing HLA-MICB*056 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*056 protein. This plasmid can be used for constructing HLA-MICB*056 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*056 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*057 Protein Expression Plasmid Vector	PHLAP92543234	Plasmid vector containing HLA-MICB*057 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*057 protein. This plasmid can be used for constructing HLA-MICB*057 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*057 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-MICB*058 Protein Expression Plasmid Vector	PHLAP92543235	Plasmid vector containing HLA-MICB*058 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*058 protein. This plasmid can be used for constructing HLA-MICB*058 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*058 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-MICB*059 Protein Expression Plasmid Vector	PHLAP92543236	Plasmid vector containing HLA-MICB*059 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-MICB*059 protein. This plasmid can be used for constructing HLA-MICB*059 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-MICB*059 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-N*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92543237	Plasmid vector containing HLA-N*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-N*01:01:01:01 protein. This plasmid can be used for constructing HLA-N*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-N*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-N*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92543238	Plasmid vector containing HLA-N*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-N*01:01:01:02 protein. This plasmid can be used for constructing HLA-N*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-N*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-N*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92543239	Plasmid vector containing HLA-N*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-N*01:01:01:03 protein. This plasmid can be used for constructing HLA-N*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-N*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-N*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92543240	Plasmid vector containing HLA-N*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-N*01:01:01:04 protein. This plasmid can be used for constructing HLA-N*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-N*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-N*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92543241	Plasmid vector containing HLA-N*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-N*01:01:01:05 protein. This plasmid can be used for constructing HLA-N*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-N*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-P*01:01:01:01 Protein Expression Plasmid Vector	PHLAP925432 42	Plasmid vector containing HLA-P*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-P*01:01:01:01 protein. This plasmid can be used for constructing HLA-P*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-P*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-P*01:01:01:02 Protein Expression Plasmid Vector	PHLAP925432 43	Plasmid vector containing HLA-P*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-P*01:01:01:02 protein. This plasmid can be used for constructing HLA-P*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-P*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-P*01:02 Protein Expression Plasmid Vector	PHLAP925432 44	Plasmid vector containing HLA-P*01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-P*01:02 protein. This plasmid can be used for constructing HLA-P*01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-P*01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-P*02:01:01:01 Protein Expression Plasmid Vector	PHLAP925432 45	Plasmid vector containing HLA-P*02:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-P*02:01:01:01 protein. This plasmid can be used for constructing HLA-P*02:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-P*02:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-P*02:01:01:02 Protein Expression Plasmid Vector	PHLAP925432 46	Plasmid vector containing HLA-P*02:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-P*02:01:01:02 protein. This plasmid can be used for constructing HLA-P*02:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-P*02:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-R*01:01:01:01 Protein Expression Plasmid Vector	PHLAP925432 47	Plasmid vector containing HLA-R*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-R*01:01:01:01 protein. This plasmid can be used for constructing HLA-R*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-R*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-R*01:01:01:02 Protein Expression Plasmid Vector	PHLAP925432 48	Plasmid vector containing HLA-R*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-R*01:01:01:02 protein. This plasmid can be used for constructing HLA-R*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-R*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-S*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92543249	Plasmid vector containing HLA-S*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-S*01:01:01:01 protein. This plasmid can be used for constructing HLA-S*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-S*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-S*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92543250	Plasmid vector containing HLA-S*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-S*01:01:01:02 protein. This plasmid can be used for constructing HLA-S*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-S*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-S*01:02:01:01 Protein Expression Plasmid Vector	PHLAP92543251	Plasmid vector containing HLA-S*01:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-S*01:02:01:01 protein. This plasmid can be used for constructing HLA-S*01:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-S*01:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-S*01:02:01:02 Protein Expression Plasmid Vector	PHLAP92543252	Plasmid vector containing HLA-S*01:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-S*01:02:01:02 protein. This plasmid can be used for constructing HLA-S*01:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-S*01:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-S*01:02:01:03 Protein Expression Plasmid Vector	PHLAP92543253	Plasmid vector containing HLA-S*01:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-S*01:02:01:03 protein. This plasmid can be used for constructing HLA-S*01:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-S*01:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-S*01:03 Protein Expression Plasmid Vector	PHLAP92543254	Plasmid vector containing HLA-S*01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-S*01:03 protein. This plasmid can be used for constructing HLA-S*01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-S*01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-S*01:04 Protein Expression Plasmid Vector	PHLAP92543255	Plasmid vector containing HLA-S*01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-S*01:04 protein. This plasmid can be used for constructing HLA-S*01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-S*01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-T*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92543256	Plasmid vector containing HLA-T*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-T*01:01:01:01 protein. This plasmid can be used for constructing HLA-T*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-T*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-T*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92543257	Plasmid vector containing HLA-T*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-T*01:01:01:02 protein. This plasmid can be used for constructing HLA-T*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-T*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-T*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92543258	Plasmid vector containing HLA-T*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-T*01:01:01:03 protein. This plasmid can be used for constructing HLA-T*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-T*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-T*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92543259	Plasmid vector containing HLA-T*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-T*01:01:01:04 protein. This plasmid can be used for constructing HLA-T*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-T*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-T*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92543260	Plasmid vector containing HLA-T*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-T*01:01:01:05 protein. This plasmid can be used for constructing HLA-T*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-T*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-T*02:01:01:01 Protein Expression Plasmid Vector	PHLAP92543261	Plasmid vector containing HLA-T*02:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-T*02:01:01:01 protein. This plasmid can be used for constructing HLA-T*02:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-T*02:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-T*02:01:01:02 Protein Expression Plasmid Vector	PHLAP92543262	Plasmid vector containing HLA-T*02:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-T*02:01:01:02 protein. This plasmid can be used for constructing HLA-T*02:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-T*02:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-T*03:01:01:01 Protein Expression Plasmid Vector	PHLAP92543263	Plasmid vector containing HLA-T*03:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-T*03:01:01:01 protein. This plasmid can be used for constructing HLA-T*03:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-T*03:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-T*03:01:01:02 Protein Expression Plasmid Vector	PHLAP92543264	Plasmid vector containing HLA-T*03:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-T*03:01:01:02 protein. This plasmid can be used for constructing HLA-T*03:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-T*03:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92543265	Plasmid vector containing HLA-TAP1*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:01:01:01 protein. This plasmid can be used for constructing HLA-TAP1*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92543266	Plasmid vector containing HLA-TAP1*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:01:01:02 protein. This plasmid can be used for constructing HLA-TAP1*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92543267	Plasmid vector containing HLA-TAP1*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:01:01:03 protein. This plasmid can be used for constructing HLA-TAP1*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92543268	Plasmid vector containing HLA-TAP1*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:01:01:04 protein. This plasmid can be used for constructing HLA-TAP1*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92543269	Plasmid vector containing HLA-TAP1*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:01:01:05 protein. This plasmid can be used for constructing HLA-TAP1*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP1*01:01:01:06 Protein Expression Plasmid Vector	PHLAP92543270	Plasmid vector containing HLA-TAP1*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:01:01:06 protein. This plasmid can be used for constructing HLA-TAP1*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*01:01:02 Protein Expression Plasmid Vector	PHLAP92543271	Plasmid vector containing HLA-TAP1*01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:01:02 protein. This plasmid can be used for constructing HLA-TAP1*01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*01:02N Protein Expression Plasmid Vector	PHLAP92543272	Plasmid vector containing HLA-TAP1*01:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:02N protein. This plasmid can be used for constructing HLA-TAP1*01:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*01:03 Protein Expression Plasmid Vector	PHLAP92543273	Plasmid vector containing HLA-TAP1*01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:03 protein. This plasmid can be used for constructing HLA-TAP1*01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-TAP1*01:04 Protein Expression Plasmid Vector	PHLAP92543274	Plasmid vector containing HLA-TAP1*01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:04 protein. This plasmid can be used for constructing HLA-TAP1*01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-TAP1*01:05 Protein Expression Plasmid Vector	PHLAP92543275	Plasmid vector containing HLA-TAP1*01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:05 protein. This plasmid can be used for constructing HLA-TAP1*01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-TAP1*01:06 Protein Expression Plasmid Vector	PHLAP92543276	Plasmid vector containing HLA-TAP1*01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:06 protein. This plasmid can be used for constructing HLA-TAP1*01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-TAP1*01:07 Protein Expression Plasmid Vector	PHLAP92543277	Plasmid vector containing HLA-TAP1*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*01:07 protein. This plasmid can be used for constructing HLA-TAP1*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*02:01:01 Protein Expression Plasmid Vector	PHLAP92543278	Plasmid vector containing HLA-TAP1*02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*02:01:01 protein. This plasmid can be used for constructing HLA-TAP1*02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*02:01:02 Protein Expression Plasmid Vector	PHLAP92543279	Plasmid vector containing HLA-TAP1*02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*02:01:02 protein. This plasmid can be used for constructing HLA-TAP1*02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*03:01 Protein Expression Plasmid Vector	PHLAP92543280	Plasmid vector containing HLA-TAP1*03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*03:01 protein. This plasmid can be used for constructing HLA-TAP1*03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*04:01 Protein Expression Plasmid Vector	PHLAP92543281	Plasmid vector containing HLA-TAP1*04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*04:01 protein. This plasmid can be used for constructing HLA-TAP1*04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*05:01 Protein Expression Plasmid Vector	PHLAP92543282	Plasmid vector containing HLA-TAP1*05:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*05:01 protein. This plasmid can be used for constructing HLA-TAP1*05:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*05:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP1*06:01 Protein Expression Plasmid Vector	PHLAP92543283	Plasmid vector containing HLA-TAP1*06:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP1*06:01 protein. This plasmid can be used for constructing HLA-TAP1*06:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP1*06:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:01:01 Protein Expression Plasmid Vector	PHLAP92543284	Plasmid vector containing HLA-TAP2*01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:01 protein. This plasmid can be used for constructing HLA-TAP2*01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:02:01 Protein Expression Plasmid Vector	PHLAP92543285	Plasmid vector containing HLA-TAP2*01:01:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:02:01 protein. This plasmid can be used for constructing HLA-TAP2*01:01:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:02:02 Protein Expression Plasmid Vector	PHLAP92543286	Plasmid vector containing HLA-TAP2*01:01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:02:02 protein. This plasmid can be used for constructing HLA-TAP2*01:01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:01 Protein Expression Plasmid Vector	PHLAP92543287	Plasmid vector containing HLA-TAP2*01:01:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:01 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:02 Protein Expression Plasmid Vector	PHLAP92543288	Plasmid vector containing HLA-TAP2*01:01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:02 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:03 Protein Expression Plasmid Vector	PHLAP92543289	Plasmid vector containing HLA-TAP2*01:01:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:03 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:04 Protein Expression Plasmid Vector	PHLAP92543290	Plasmid vector containing HLA-TAP2*01:01:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:04 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:01:03:05 Protein Expression Plasmid Vector	PHLAP92543291	Plasmid vector containing HLA-TAP2*01:01:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:05 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:06 Protein Expression Plasmid Vector	PHLAP92543292	Plasmid vector containing HLA-TAP2*01:01:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:06 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:07 Protein Expression Plasmid Vector	PHLAP92543293	Plasmid vector containing HLA-TAP2*01:01:03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:07 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:08 Protein Expression Plasmid Vector	PHLAP92543294	Plasmid vector containing HLA-TAP2*01:01:03:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:08 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:09 Protein Expression Plasmid Vector	PHLAP92543295	Plasmid vector containing HLA-TAP2*01:01:03:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:09 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:10 Protein Expression Plasmid Vector	PHLAP92543296	Plasmid vector containing HLA-TAP2*01:01:03:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:10 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:11 Protein Expression Plasmid Vector	PHLAP92543297	Plasmid vector containing HLA-TAP2*01:01:03:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:11 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:01:03:12 Protein Expression Plasmid Vector	PHLAP92543298	Plasmid vector containing HLA-TAP2*01:01:03:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:12 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:13 Protein Expression Plasmid Vector	PHLAP92543299	Plasmid vector containing HLA-TAP2*01:01:03:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:13 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:14 Protein Expression Plasmid Vector	PHLAP925433000	Plasmid vector containing HLA-TAP2*01:01:03:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:14 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:15 Protein Expression Plasmid Vector	PHLAP925433001	Plasmid vector containing HLA-TAP2*01:01:03:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:15 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:16 Protein Expression Plasmid Vector	PHLAP925433002	Plasmid vector containing HLA-TAP2*01:01:03:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:16 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:17 Protein Expression Plasmid Vector	PHLAP925433003	Plasmid vector containing HLA-TAP2*01:01:03:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:17 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:18 Protein Expression Plasmid Vector	PHLAP925433004	Plasmid vector containing HLA-TAP2*01:01:03:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:18 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:01:03:19 Protein Expression Plasmid Vector	PHLAP92543305	Plasmid vector containing HLA-TAP2*01:01:03:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:19 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:20 Protein Expression Plasmid Vector	PHLAP92543306	Plasmid vector containing HLA-TAP2*01:01:03:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:20 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:03:21 Protein Expression Plasmid Vector	PHLAP92543307	Plasmid vector containing HLA-TAP2*01:01:03:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:03:21 protein. This plasmid can be used for constructing HLA-TAP2*01:01:03:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:03:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:04 Protein Expression Plasmid Vector	PHLAP92543308	Plasmid vector containing HLA-TAP2*01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:04 protein. This plasmid can be used for constructing HLA-TAP2*01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:05:01 Protein Expression Plasmid Vector	PHLAP92543309	Plasmid vector containing HLA-TAP2*01:01:05:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:05:01 protein. This plasmid can be used for constructing HLA-TAP2*01:01:05:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:05:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:05:02 Protein Expression Plasmid Vector	PHLAP925433110	Plasmid vector containing HLA-TAP2*01:01:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:05:02 protein. This plasmid can be used for constructing HLA-TAP2*01:01:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:05:03 Protein Expression Plasmid Vector	PHLAP925433111	Plasmid vector containing HLA-TAP2*01:01:05:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:05:03 protein. This plasmid can be used for constructing HLA-TAP2*01:01:05:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:05:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:01:05:04 Protein Expression Plasmid Vector	PHLAP925433112	Plasmid vector containing HLA-TAP2*01:01:05:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:05:04 protein. This plasmid can be used for constructing HLA-TAP2*01:01:05:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:05:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:05:05 Protein Expression Plasmid Vector	PHLAP925433113	Plasmid vector containing HLA-TAP2*01:01:05:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:05:05 protein. This plasmid can be used for constructing HLA-TAP2*01:01:05:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:05:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:05:06 Protein Expression Plasmid Vector	PHLAP925433114	Plasmid vector containing HLA-TAP2*01:01:05:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:05:06 protein. This plasmid can be used for constructing HLA-TAP2*01:01:05:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:05:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:05:07 Protein Expression Plasmid Vector	PHLAP925433115	Plasmid vector containing HLA-TAP2*01:01:05:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:05:07 protein. This plasmid can be used for constructing HLA-TAP2*01:01:05:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:05:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:05:08 Protein Expression Plasmid Vector	PHLAP925433116	Plasmid vector containing HLA-TAP2*01:01:05:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:05:08 protein. This plasmid can be used for constructing HLA-TAP2*01:01:05:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:05:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:05:09 Protein Expression Plasmid Vector	PHLAP925433117	Plasmid vector containing HLA-TAP2*01:01:05:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:05:09 protein. This plasmid can be used for constructing HLA-TAP2*01:01:05:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:05:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:05:10 Protein Expression Plasmid Vector	PHLAP925433118	Plasmid vector containing HLA-TAP2*01:01:05:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:05:10 protein. This plasmid can be used for constructing HLA-TAP2*01:01:05:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:05:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:01:05:11 Protein Expression Plasmid Vector	PHLAP92543319	Plasmid vector containing HLA-TAP2*01:01:05:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:05:11 protein. This plasmid can be used for constructing HLA-TAP2*01:01:05:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:05:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:05:12 Protein Expression Plasmid Vector	PHLAP92543320	Plasmid vector containing HLA-TAP2*01:01:05:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:05:12 protein. This plasmid can be used for constructing HLA-TAP2*01:01:05:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:05:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:06 Protein Expression Plasmid Vector	PHLAP92543321	Plasmid vector containing HLA-TAP2*01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:06 protein. This plasmid can be used for constructing HLA-TAP2*01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:07:01 Protein Expression Plasmid Vector	PHLAP92543322	Plasmid vector containing HLA-TAP2*01:01:07:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:07:01 protein. This plasmid can be used for constructing HLA-TAP2*01:01:07:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:07:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:07:02 Protein Expression Plasmid Vector	PHLAP92543323	Plasmid vector containing HLA-TAP2*01:01:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:07:02 protein. This plasmid can be used for constructing HLA-TAP2*01:01:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:07:03 Protein Expression Plasmid Vector	PHLAP92543324	Plasmid vector containing HLA-TAP2*01:01:07:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:07:03 protein. This plasmid can be used for constructing HLA-TAP2*01:01:07:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:07:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:07:04 Protein Expression Plasmid Vector	PHLAP92543325	Plasmid vector containing HLA-TAP2*01:01:07:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:07:04 protein. This plasmid can be used for constructing HLA-TAP2*01:01:07:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:07:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:01:07:05 Protein Expression Plasmid Vector	PHLAP92543326	Plasmid vector containing HLA-TAP2*01:01:07:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:07:05 protein. This plasmid can be used for constructing HLA-TAP2*01:01:07:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:07:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:07:06 Protein Expression Plasmid Vector	PHLAP92543327	Plasmid vector containing HLA-TAP2*01:01:07:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:07:06 protein. This plasmid can be used for constructing HLA-TAP2*01:01:07:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:07:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:07:07 Protein Expression Plasmid Vector	PHLAP92543328	Plasmid vector containing HLA-TAP2*01:01:07:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:07:07 protein. This plasmid can be used for constructing HLA-TAP2*01:01:07:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:07:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:07:08 Protein Expression Plasmid Vector	PHLAP92543329	Plasmid vector containing HLA-TAP2*01:01:07:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:07:08 protein. This plasmid can be used for constructing HLA-TAP2*01:01:07:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:07:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:07:09 Protein Expression Plasmid Vector	PHLAP92543330	Plasmid vector containing HLA-TAP2*01:01:07:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:07:09 protein. This plasmid can be used for constructing HLA-TAP2*01:01:07:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:07:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:07:10 Protein Expression Plasmid Vector	PHLAP92543331	Plasmid vector containing HLA-TAP2*01:01:07:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:07:10 protein. This plasmid can be used for constructing HLA-TAP2*01:01:07:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:07:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:07:11 Protein Expression Plasmid Vector	PHLAP92543332	Plasmid vector containing HLA-TAP2*01:01:07:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:07:11 protein. This plasmid can be used for constructing HLA-TAP2*01:01:07:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:07:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:01:07:12 Protein Expression Plasmid Vector	PHLAP92543333	Plasmid vector containing HLA-TAP2*01:01:07:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:07:12 protein. This plasmid can be used for constructing HLA-TAP2*01:01:07:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:07:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:01:08 Protein Expression Plasmid Vector	PHLAP92543334	Plasmid vector containing HLA-TAP2*01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:01:08 protein. This plasmid can be used for constructing HLA-TAP2*01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:02:01 Protein Expression Plasmid Vector	PHLAP92543335	Plasmid vector containing HLA-TAP2*01:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:02:01 protein. This plasmid can be used for constructing HLA-TAP2*01:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:02:02 Protein Expression Plasmid Vector	PHLAP92543336	Plasmid vector containing HLA-TAP2*01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:02:02 protein. This plasmid can be used for constructing HLA-TAP2*01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:03:01 Protein Expression Plasmid Vector	PHLAP92543337	Plasmid vector containing HLA-TAP2*01:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:03:01 protein. This plasmid can be used for constructing HLA-TAP2*01:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:03:02:01 Protein Expression Plasmid Vector	PHLAP92543338	Plasmid vector containing HLA-TAP2*01:03:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:03:02:01 protein. This plasmid can be used for constructing HLA-TAP2*01:03:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:03:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:03:02:02 Protein Expression Plasmid Vector	PHLAP92543339	Plasmid vector containing HLA-TAP2*01:03:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:03:02:02 protein. This plasmid can be used for constructing HLA-TAP2*01:03:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:03:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:03:02:03 Protein Expression Plasmid Vector	PHLAP92543340	Plasmid vector containing HLA-TAP2*01:03:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:03:02:03 protein. This plasmid can be used for constructing HLA-TAP2*01:03:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:03:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:03:02:04 Protein Expression Plasmid Vector	PHLAP92543341	Plasmid vector containing HLA-TAP2*01:03:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:03:02:04 protein. This plasmid can be used for constructing HLA-TAP2*01:03:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:03:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:03:02:05 Protein Expression Plasmid Vector	PHLAP92543342	Plasmid vector containing HLA-TAP2*01:03:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:03:02:05 protein. This plasmid can be used for constructing HLA-TAP2*01:03:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:03:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:03:02:06 Protein Expression Plasmid Vector	PHLAP92543343	Plasmid vector containing HLA-TAP2*01:03:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:03:02:06 protein. This plasmid can be used for constructing HLA-TAP2*01:03:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:03:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:03:02:07 Protein Expression Plasmid Vector	PHLAP92543344	Plasmid vector containing HLA-TAP2*01:03:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:03:02:07 protein. This plasmid can be used for constructing HLA-TAP2*01:03:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:03:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:03:02:08 Protein Expression Plasmid Vector	PHLAP92543345	Plasmid vector containing HLA-TAP2*01:03:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:03:02:08 protein. This plasmid can be used for constructing HLA-TAP2*01:03:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:03:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:03:03 Protein Expression Plasmid Vector	PHLAP92543346	Plasmid vector containing HLA-TAP2*01:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:03:03 protein. This plasmid can be used for constructing HLA-TAP2*01:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:03:04 Protein Expression Plasmid Vector	PHLAP92543347	Plasmid vector containing HLA-TAP2*01:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:03:04 protein. This plasmid can be used for constructing HLA-TAP2*01:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:04:01:01 Protein Expression Plasmid Vector	PHLAP92543348	Plasmid vector containing HLA-TAP2*01:04:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:04:01:01 protein. This plasmid can be used for constructing HLA-TAP2*01:04:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:04:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:04:01:02 Protein Expression Plasmid Vector	PHLAP92543349	Plasmid vector containing HLA-TAP2*01:04:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:04:01:02 protein. This plasmid can be used for constructing HLA-TAP2*01:04:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:04:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:04:01:03 Protein Expression Plasmid Vector	PHLAP925433350	Plasmid vector containing HLA-TAP2*01:04:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:04:01:03 protein. This plasmid can be used for constructing HLA-TAP2*01:04:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:04:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:04:01:04 Protein Expression Plasmid Vector	PHLAP925433351	Plasmid vector containing HLA-TAP2*01:04:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:04:01:04 protein. This plasmid can be used for constructing HLA-TAP2*01:04:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:04:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:01:01 Protein Expression Plasmid Vector	PHLAP925433352	Plasmid vector containing HLA-TAP2*01:05:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:01 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:01:02 Protein Expression Plasmid Vector	PHLAP925433353	Plasmid vector containing HLA-TAP2*01:05:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:02 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:05:01:03 Protein Expression Plasmid Vector	PHLAP92543354	Plasmid vector containing HLA-TAP2*01:05:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:03 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:01:04 Protein Expression Plasmid Vector	PHLAP92543355	Plasmid vector containing HLA-TAP2*01:05:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:04 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:01:05 Protein Expression Plasmid Vector	PHLAP92543356	Plasmid vector containing HLA-TAP2*01:05:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:05 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:01:06 Protein Expression Plasmid Vector	PHLAP92543357	Plasmid vector containing HLA-TAP2*01:05:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:06 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:01:07 Protein Expression Plasmid Vector	PHLAP92543358	Plasmid vector containing HLA-TAP2*01:05:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:07 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:01:08 Protein Expression Plasmid Vector	PHLAP92543359	Plasmid vector containing HLA-TAP2*01:05:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:08 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:01:09 Protein Expression Plasmid Vector	PHLAP92543360	Plasmid vector containing HLA-TAP2*01:05:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:09 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:05:01:10 Protein Expression Plasmid Vector	PHLAP925433661	Plasmid vector containing HLA-TAP2*01:05:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:10 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:01:11 Protein Expression Plasmid Vector	PHLAP925433662	Plasmid vector containing HLA-TAP2*01:05:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:11 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:01:12 Protein Expression Plasmid Vector	PHLAP925433663	Plasmid vector containing HLA-TAP2*01:05:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:12 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:01:13 Protein Expression Plasmid Vector	PHLAP925433664	Plasmid vector containing HLA-TAP2*01:05:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:13 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:01:14 Protein Expression Plasmid Vector	PHLAP925433665	Plasmid vector containing HLA-TAP2*01:05:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:01:14 protein. This plasmid can be used for constructing HLA-TAP2*01:05:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:05:02 Protein Expression Plasmid Vector	PHLAP925433666	Plasmid vector containing HLA-TAP2*01:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:05:02 protein. This plasmid can be used for constructing HLA-TAP2*01:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:06 Protein Expression Plasmid Vector	PHLAP925433667	Plasmid vector containing HLA-TAP2*01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:06 protein. This plasmid can be used for constructing HLA-TAP2*01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*01:07 Protein Expression Plasmid Vector	PHLAP92543368	Plasmid vector containing HLA-TAP2*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:07 protein. This plasmid can be used for constructing HLA-TAP2*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*01:08 Protein Expression Plasmid Vector	PHLAP92543369	Plasmid vector containing HLA-TAP2*01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*01:08 protein. This plasmid can be used for constructing HLA-TAP2*01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:01 Protein Expression Plasmid Vector	PHLAP92543370	Plasmid vector containing HLA-TAP2*02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:01 protein. This plasmid can be used for constructing HLA-TAP2*02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:02:01 Protein Expression Plasmid Vector	PHLAP92543371	Plasmid vector containing HLA-TAP2*02:01:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:02:01 protein. This plasmid can be used for constructing HLA-TAP2*02:01:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:02:02 Protein Expression Plasmid Vector	PHLAP92543372	Plasmid vector containing HLA-TAP2*02:01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:02:02 protein. This plasmid can be used for constructing HLA-TAP2*02:01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:02:03 Protein Expression Plasmid Vector	PHLAP92543373	Plasmid vector containing HLA-TAP2*02:01:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:02:03 protein. This plasmid can be used for constructing HLA-TAP2*02:01:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:02:04 Protein Expression Plasmid Vector	PHLAP92543374	Plasmid vector containing HLA-TAP2*02:01:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:02:04 protein. This plasmid can be used for constructing HLA-TAP2*02:01:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*02:01:02:05 Protein Expression Plasmid Vector	PHLAP92543375	Plasmid vector containing HLA-TAP2*02:01:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:02:05 protein. This plasmid can be used for constructing HLA-TAP2*02:01:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:02:06 Protein Expression Plasmid Vector	PHLAP92543376	Plasmid vector containing HLA-TAP2*02:01:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:02:06 protein. This plasmid can be used for constructing HLA-TAP2*02:01:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:02:07 Protein Expression Plasmid Vector	PHLAP92543377	Plasmid vector containing HLA-TAP2*02:01:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:02:07 protein. This plasmid can be used for constructing HLA-TAP2*02:01:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:03:01 Protein Expression Plasmid Vector	PHLAP92543378	Plasmid vector containing HLA-TAP2*02:01:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:03:01 protein. This plasmid can be used for constructing HLA-TAP2*02:01:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:03:02 Protein Expression Plasmid Vector	PHLAP92543379	Plasmid vector containing HLA-TAP2*02:01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:03:02 protein. This plasmid can be used for constructing HLA-TAP2*02:01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:03:03 Protein Expression Plasmid Vector	PHLAP92543380	Plasmid vector containing HLA-TAP2*02:01:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:03:03 protein. This plasmid can be used for constructing HLA-TAP2*02:01:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:03:04 Protein Expression Plasmid Vector	PHLAP92543381	Plasmid vector containing HLA-TAP2*02:01:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:03:04 protein. This plasmid can be used for constructing HLA-TAP2*02:01:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*02:01:03:05 Protein Expression Plasmid Vector	PHLAP925433882	Plasmid vector containing HLA-TAP2*02:01:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:03:05 protein. This plasmid can be used for constructing HLA-TAP2*02:01:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:03:06 Protein Expression Plasmid Vector	PHLAP925433883	Plasmid vector containing HLA-TAP2*02:01:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:03:06 protein. This plasmid can be used for constructing HLA-TAP2*02:01:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:03:07 Protein Expression Plasmid Vector	PHLAP925433884	Plasmid vector containing HLA-TAP2*02:01:03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:03:07 protein. This plasmid can be used for constructing HLA-TAP2*02:01:03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:01:04 Protein Expression Plasmid Vector	PHLAP925433885	Plasmid vector containing HLA-TAP2*02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:01:04 protein. This plasmid can be used for constructing HLA-TAP2*02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:02 Protein Expression Plasmid Vector	PHLAP925433886	Plasmid vector containing HLA-TAP2*02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:02 protein. This plasmid can be used for constructing HLA-TAP2*02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:03 Protein Expression Plasmid Vector	PHLAP925433887	Plasmid vector containing HLA-TAP2*02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:03 protein. This plasmid can be used for constructing HLA-TAP2*02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-TAP2*02:04 Protein Expression Plasmid Vector	PHLAP925433888	Plasmid vector containing HLA-TAP2*02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:04 protein. This plasmid can be used for constructing HLA-TAP2*02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-TAP2*02:05 Protein Expression Plasmid Vector	PHLAP92543389	Plasmid vector containing HLA-TAP2*02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-TAP2*02:05 protein. This plasmid can be used for constructing HLA-TAP2*02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-TAP2*02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-U*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92543390	Plasmid vector containing HLA-U*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-U*01:01:01:01 protein. This plasmid can be used for constructing HLA-U*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-U*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-U*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92543391	Plasmid vector containing HLA-U*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-U*01:01:01:02 protein. This plasmid can be used for constructing HLA-U*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-U*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-U*01:02 Protein Expression Plasmid Vector	PHLAP92543392	Plasmid vector containing HLA-U*01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-U*01:02 protein. This plasmid can be used for constructing HLA-U*01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-U*01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-U*01:03 Protein Expression Plasmid Vector	PHLAP92543393	Plasmid vector containing HLA-U*01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-U*01:03 protein. This plasmid can be used for constructing HLA-U*01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-U*01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-U*01:04 Protein Expression Plasmid Vector	PHLAP92543394	Plasmid vector containing HLA-U*01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-U*01:04 protein. This plasmid can be used for constructing HLA-U*01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-U*01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-U*01:05 Protein Expression Plasmid Vector	PHLAP92543395	Plasmid vector containing HLA-U*01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-U*01:05 protein. This plasmid can be used for constructing HLA-U*01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-U*01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-U*01:06 Protein Expression Plasmid Vector	PHLAP92543396	Plasmid vector containing HLA-U*01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-U*01:06 protein. This plasmid can be used for constructing HLA-U*01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-U*01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-V*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92543397	Plasmid vector containing HLA-V*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-V*01:01:01:01 protein. This plasmid can be used for constructing HLA-V*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-V*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-V*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92543398	Plasmid vector containing HLA-V*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-V*01:01:01:02 protein. This plasmid can be used for constructing HLA-V*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-V*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-V*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92543399	Plasmid vector containing HLA-V*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-V*01:01:01:03 protein. This plasmid can be used for constructing HLA-V*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-V*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-V*01:01:01:04 Protein Expression Plasmid Vector	PHLAP925434000	Plasmid vector containing HLA-V*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-V*01:01:01:04 protein. This plasmid can be used for constructing HLA-V*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-V*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-W*01:01:01:01 Protein Expression Plasmid Vector	PHLAP925434001	Plasmid vector containing HLA-W*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*01:01:01:01 protein. This plasmid can be used for constructing HLA-W*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-W*01:01:01:02 Protein Expression Plasmid Vector	PHLAP925434002	Plasmid vector containing HLA-W*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*01:01:01:02 protein. This plasmid can be used for constructing HLA-W*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-W*01:01:01:03 Protein Expression Plasmid Vector	PHLAP925434003	Plasmid vector containing HLA-W*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*01:01:01:03 protein. This plasmid can be used for constructing HLA-W*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-W*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92543404	Plasmid vector containing HLA-W*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*01:01:01:04 protein. This plasmid can be used for constructing HLA-W*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-W*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92543405	Plasmid vector containing HLA-W*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*01:01:01:05 protein. This plasmid can be used for constructing HLA-W*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-W*01:01:01:06 Protein Expression Plasmid Vector	PHLAP92543406	Plasmid vector containing HLA-W*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*01:01:01:06 protein. This plasmid can be used for constructing HLA-W*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-W*01:01:01:07 Protein Expression Plasmid Vector	PHLAP92543407	Plasmid vector containing HLA-W*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*01:01:01:07 protein. This plasmid can be used for constructing HLA-W*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-W*02:01 Protein Expression Plasmid Vector	PHLAP92543408	Plasmid vector containing HLA-W*02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*02:01 protein. This plasmid can be used for constructing HLA-W*02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-W*03:01:01:01 Protein Expression Plasmid Vector	PHLAP92543409	Plasmid vector containing HLA-W*03:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*03:01:01:01 protein. This plasmid can be used for constructing HLA-W*03:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*03:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-W*03:01:01:02 Protein Expression Plasmid Vector	PHLAP925434110	Plasmid vector containing HLA-W*03:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*03:01:01:02 protein. This plasmid can be used for constructing HLA-W*03:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*03:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-W*04:01 Protein Expression Plasmid Vector	PHLAP925434111	Plasmid vector containing HLA-W*04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*04:01 protein. This plasmid can be used for constructing HLA-W*04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-W*05:01 Protein Expression Plasmid Vector	PHLAP925434112	Plasmid vector containing HLA-W*05:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*05:01 protein. This plasmid can be used for constructing HLA-W*05:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*05:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-W*05:02 Protein Expression Plasmid Vector	PHLAP925434113	Plasmid vector containing HLA-W*05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-W*05:02 protein. This plasmid can be used for constructing HLA-W*05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-W*05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Y*01:01 Protein Expression Plasmid Vector	PHLAP925434114	Plasmid vector containing HLA-Y*01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Y*01:01 protein. This plasmid can be used for constructing HLA-Y*01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Y*01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Y*02:01 Protein Expression Plasmid Vector	PHLAP925434115	Plasmid vector containing HLA-Y*02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Y*02:01 protein. This plasmid can be used for constructing HLA-Y*02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Y*02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Y*03:01 Protein Expression Plasmid Vector	PHLAP925434116	Plasmid vector containing HLA-Y*03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Y*03:01 protein. This plasmid can be used for constructing HLA-Y*03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Y*03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
