HLA-A*32:01:22 Protein Expression Plasmid Vector	PHLAP9257273	Plasmid vector containing HLA-A*32:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:22 protein. This plasmid can be used for constructing HLA-A*32:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:23 Protein Expression Plasmid Vector	PHLAP9257274	Plasmid vector containing HLA-A*32:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:23 protein. This plasmid can be used for constructing HLA-A*32:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:24 Protein Expression Plasmid Vector	PHLAP9257275	Plasmid vector containing HLA-A*32:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:24 protein. This plasmid can be used for constructing HLA-A*32:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:25 Protein Expression Plasmid Vector	PHLAP9257276	Plasmid vector containing HLA-A*32:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:25 protein. This plasmid can be used for constructing HLA-A*32:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:26 Protein Expression Plasmid Vector	PHLAP9257277	Plasmid vector containing HLA-A*32:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:26 protein. This plasmid can be used for constructing HLA-A*32:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:27 Protein Expression Plasmid Vector	PHLAP9257278	Plasmid vector containing HLA-A*32:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:27 protein. This plasmid can be used for constructing HLA-A*32:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:28 Protein Expression Plasmid Vector	PHLAP9257279	Plasmid vector containing HLA-A*32:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:28 protein. This plasmid can be used for constructing HLA-A*32:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:29 Protein Expression Plasmid Vector	PHLAP9257280	Plasmid vector containing HLA-A*32:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:29 protein. This plasmid can be used for constructing HLA-A*32:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:30 Protein Expression Plasmid Vector	PHLAP9257281	Plasmid vector containing HLA-A*32:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:30 protein. This plasmid can be used for constructing HLA-A*32:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:31 Protein Expression Plasmid Vector	PHLAP9257282	Plasmid vector containing HLA-A*32:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:31 protein. This plasmid can be used for constructing HLA-A*32:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:32 Protein Expression Plasmid Vector	PHLAP9257283	Plasmid vector containing HLA-A*32:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:32 protein. This plasmid can be used for constructing HLA-A*32:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:33 Protein Expression Plasmid Vector	PHLAP9257284	Plasmid vector containing HLA-A*32:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:33 protein. This plasmid can be used for constructing HLA-A*32:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:34 Protein Expression Plasmid Vector	PHLAP9257285	Plasmid vector containing HLA-A*32:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:34 protein. This plasmid can be used for constructing HLA-A*32:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:35 Protein Expression Plasmid Vector	PHLAP9257286	Plasmid vector containing HLA-A*32:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:35 protein. This plasmid can be used for constructing HLA-A*32:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:36 Protein Expression Plasmid Vector	PHLAP9257287	Plasmid vector containing HLA-A*32:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:36 protein. This plasmid can be used for constructing HLA-A*32:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:37 Protein Expression Plasmid Vector	PHLAP9257288	Plasmid vector containing HLA-A*32:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:37 protein. This plasmid can be used for constructing HLA-A*32:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:38 Protein Expression Plasmid Vector	PHLAP9257289	Plasmid vector containing HLA-A*32:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:38 protein. This plasmid can be used for constructing HLA-A*32:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:39 Protein Expression Plasmid Vector	PHLAP9257290	Plasmid vector containing HLA-A*32:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:39 protein. This plasmid can be used for constructing HLA-A*32:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:40 Protein Expression Plasmid Vector	PHLAP9257291	Plasmid vector containing HLA-A*32:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:40 protein. This plasmid can be used for constructing HLA-A*32:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:41 Protein Expression Plasmid Vector	PHLAP9257292	Plasmid vector containing HLA-A*32:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:41 protein. This plasmid can be used for constructing HLA-A*32:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:42 Protein Expression Plasmid Vector	PHLAP9257293	Plasmid vector containing HLA-A*32:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:42 protein. This plasmid can be used for constructing HLA-A*32:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:43 Protein Expression Plasmid Vector	PHLAP9257294	Plasmid vector containing HLA-A*32:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:43 protein. This plasmid can be used for constructing HLA-A*32:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:44 Protein Expression Plasmid Vector	PHLAP9257295	Plasmid vector containing HLA-A*32:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:44 protein. This plasmid can be used for constructing HLA-A*32:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:45 Protein Expression Plasmid Vector	PHLAP9257296	Plasmid vector containing HLA-A*32:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:45 protein. This plasmid can be used for constructing HLA-A*32:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:46 Protein Expression Plasmid Vector	PHLAP9257297	Plasmid vector containing HLA-A*32:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:46 protein. This plasmid can be used for constructing HLA-A*32:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:47 Protein Expression Plasmid Vector	PHLAP9257298	Plasmid vector containing HLA-A*32:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:47 protein. This plasmid can be used for constructing HLA-A*32:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:48 Protein Expression Plasmid Vector	PHLAP9257299	Plasmid vector containing HLA-A*32:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:48 protein. This plasmid can be used for constructing HLA-A*32:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:49 Protein Expression Plasmid Vector	PHLAP9257300	Plasmid vector containing HLA-A*32:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:49 protein. This plasmid can be used for constructing HLA-A*32:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:50 Protein Expression Plasmid Vector	PHLAP9257301	Plasmid vector containing HLA-A*32:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:50 protein. This plasmid can be used for constructing HLA-A*32:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:51 Protein Expression Plasmid Vector	PHLAP9257302	Plasmid vector containing HLA-A*32:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:51 protein. This plasmid can be used for constructing HLA-A*32:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:52 Protein Expression Plasmid Vector	PHLAP9257303	Plasmid vector containing HLA-A*32:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:52 protein. This plasmid can be used for constructing HLA-A*32:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:53 Protein Expression Plasmid Vector	PHLAP9257304	Plasmid vector containing HLA-A*32:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:53 protein. This plasmid can be used for constructing HLA-A*32:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:54 Protein Expression Plasmid Vector	PHLAP9257305	Plasmid vector containing HLA-A*32:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:54 protein. This plasmid can be used for constructing HLA-A*32:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:55 Protein Expression Plasmid Vector	PHLAP9257306	Plasmid vector containing HLA-A*32:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:55 protein. This plasmid can be used for constructing HLA-A*32:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:56 Protein Expression Plasmid Vector	PHLAP9257307	Plasmid vector containing HLA-A*32:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:56 protein. This plasmid can be used for constructing HLA-A*32:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:57 Protein Expression Plasmid Vector	PHLAP9257308	Plasmid vector containing HLA-A*32:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:57 protein. This plasmid can be used for constructing HLA-A*32:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:58 Protein Expression Plasmid Vector	PHLAP9257309	Plasmid vector containing HLA-A*32:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:58 protein. This plasmid can be used for constructing HLA-A*32:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:59 Protein Expression Plasmid Vector	PHLAP9257310	Plasmid vector containing HLA-A*32:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:59 protein. This plasmid can be used for constructing HLA-A*32:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:60 Protein Expression Plasmid Vector	PHLAP9257311	Plasmid vector containing HLA-A*32:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:60 protein. This plasmid can be used for constructing HLA-A*32:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:61 Protein Expression Plasmid Vector	PHLAP9257312	Plasmid vector containing HLA-A*32:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:61 protein. This plasmid can be used for constructing HLA-A*32:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:62 Protein Expression Plasmid Vector	PHLAP9257313	Plasmid vector containing HLA-A*32:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:62 protein. This plasmid can be used for constructing HLA-A*32:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:63 Protein Expression Plasmid Vector	PHLAP9257314	Plasmid vector containing HLA-A*32:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:63 protein. This plasmid can be used for constructing HLA-A*32:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:64 Protein Expression Plasmid Vector	PHLAP9257315	Plasmid vector containing HLA-A*32:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:64 protein. This plasmid can be used for constructing HLA-A*32:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:65 Protein Expression Plasmid Vector	PHLAP9257316	Plasmid vector containing HLA-A*32:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:65 protein. This plasmid can be used for constructing HLA-A*32:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:02 Protein Expression Plasmid Vector	PHLAP9257317	Plasmid vector containing HLA-A*32:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:02 protein. This plasmid can be used for constructing HLA-A*32:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:03:01:01 Protein Expression Plasmid Vector	PHLAP9257318	Plasmid vector containing HLA-A*32:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:03:01:01 protein. This plasmid can be used for constructing HLA-A*32:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:03:01:02 Protein Expression Plasmid Vector	PHLAP9257319	Plasmid vector containing HLA-A*32:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:03:01:02 protein. This plasmid can be used for constructing HLA-A*32:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:04 Protein Expression Plasmid Vector	PHLAP9257320	Plasmid vector containing HLA-A*32:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:04 protein. This plasmid can be used for constructing HLA-A*32:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:05 Protein Expression Plasmid Vector	PHLAP9257321	Plasmid vector containing HLA-A*32:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:05 protein. This plasmid can be used for constructing HLA-A*32:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:06 Protein Expression Plasmid Vector	PHLAP9257322	Plasmid vector containing HLA-A*32:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:06 protein. This plasmid can be used for constructing HLA-A*32:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:07 Protein Expression Plasmid Vector	PHLAP9257323	Plasmid vector containing HLA-A*32:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:07 protein. This plasmid can be used for constructing HLA-A*32:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:08 Protein Expression Plasmid Vector	PHLAP9257324	Plasmid vector containing HLA-A*32:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:08 protein. This plasmid can be used for constructing HLA-A*32:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:09 Protein Expression Plasmid Vector	PHLAP9257325	Plasmid vector containing HLA-A*32:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:09 protein. This plasmid can be used for constructing HLA-A*32:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:10 Protein Expression Plasmid Vector	PHLAP9257326	Plasmid vector containing HLA-A*32:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:10 protein. This plasmid can be used for constructing HLA-A*32:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:100 Protein Expression Plasmid Vector	PHLAP9257327	Plasmid vector containing HLA-A*32:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:100 protein. This plasmid can be used for constructing HLA-A*32:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:101Q Protein Expression Plasmid Vector	PHLAP9257328	Plasmid vector containing HLA-A*32:101Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:101Q protein. This plasmid can be used for constructing HLA-A*32:101Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:101Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:102 Protein Expression Plasmid Vector	PHLAP9257329	Plasmid vector containing HLA-A*32:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:102 protein. This plasmid can be used for constructing HLA-A*32:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:103 Protein Expression Plasmid Vector	PHLAP9257330	Plasmid vector containing HLA-A*32:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:103 protein. This plasmid can be used for constructing HLA-A*32:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:104 Protein Expression Plasmid Vector	PHLAP9257331	Plasmid vector containing HLA-A*32:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:104 protein. This plasmid can be used for constructing HLA-A*32:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:105 Protein Expression Plasmid Vector	PHLAP9257332	Plasmid vector containing HLA-A*32:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:105 protein. This plasmid can be used for constructing HLA-A*32:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:106:01:01 Protein Expression Plasmid Vector	PHLAP9257333	Plasmid vector containing HLA-A*32:106:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:106:01:01 protein. This plasmid can be used for constructing HLA-A*32:106:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:106:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:106:01:02 Protein Expression Plasmid Vector	PHLAP9257334	Plasmid vector containing HLA-A*32:106:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:106:01:02 protein. This plasmid can be used for constructing HLA-A*32:106:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:106:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:107 Protein Expression Plasmid Vector	PHLAP9257335	Plasmid vector containing HLA-A*32:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:107 protein. This plasmid can be used for constructing HLA-A*32:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:108 Protein Expression Plasmid Vector	PHLAP9257336	Plasmid vector containing HLA-A*32:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:108 protein. This plasmid can be used for constructing HLA-A*32:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:109 Protein Expression Plasmid Vector	PHLAP9257337	Plasmid vector containing HLA-A*32:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:109 protein. This plasmid can be used for constructing HLA-A*32:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:110 Protein Expression Plasmid Vector	PHLAP9257338	Plasmid vector containing HLA-A*32:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:110 protein. This plasmid can be used for constructing HLA-A*32:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:111 Protein Expression Plasmid Vector	PHLAP9257339	Plasmid vector containing HLA-A*32:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:111 protein. This plasmid can be used for constructing HLA-A*32:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:112N Protein Expression Plasmid Vector	PHLAP9257340	Plasmid vector containing HLA-A*32:112N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:112N protein. This plasmid can be used for constructing HLA-A*32:112N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:112N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:113 Protein Expression Plasmid Vector	PHLAP9257341	Plasmid vector containing HLA-A*32:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:113 protein. This plasmid can be used for constructing HLA-A*32:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:114 Protein Expression Plasmid Vector	PHLAP9257342	Plasmid vector containing HLA-A*32:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:114 protein. This plasmid can be used for constructing HLA-A*32:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:115 Protein Expression Plasmid Vector	PHLAP9257343	Plasmid vector containing HLA-A*32:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:115 protein. This plasmid can be used for constructing HLA-A*32:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:116 Protein Expression Plasmid Vector	PHLAP9257344	Plasmid vector containing HLA-A*32:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:116 protein. This plasmid can be used for constructing HLA-A*32:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:117N Protein Expression Plasmid Vector	PHLAP9257345	Plasmid vector containing HLA-A*32:117N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:117N protein. This plasmid can be used for constructing HLA-A*32:117N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:117N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:118 Protein Expression Plasmid Vector	PHLAP9257346	Plasmid vector containing HLA-A*32:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:118 protein. This plasmid can be used for constructing HLA-A*32:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:119 Protein Expression Plasmid Vector	PHLAP9257347	Plasmid vector containing HLA-A*32:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:119 protein. This plasmid can be used for constructing HLA-A*32:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:11Q Protein Expression Plasmid Vector	PHLAP9257348	Plasmid vector containing HLA-A*32:11Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:11Q protein. This plasmid can be used for constructing HLA-A*32:11Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:11Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:12 Protein Expression Plasmid Vector	PHLAP9257349	Plasmid vector containing HLA-A*32:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:12 protein. This plasmid can be used for constructing HLA-A*32:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:120 Protein Expression Plasmid Vector	PHLAP9257350	Plasmid vector containing HLA-A*32:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:120 protein. This plasmid can be used for constructing HLA-A*32:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:121 Protein Expression Plasmid Vector	PHLAP9257351	Plasmid vector containing HLA-A*32:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:121 protein. This plasmid can be used for constructing HLA-A*32:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:122 Protein Expression Plasmid Vector	PHLAP9257352	Plasmid vector containing HLA-A*32:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:122 protein. This plasmid can be used for constructing HLA-A*32:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:123 Protein Expression Plasmid Vector	PHLAP9257353	Plasmid vector containing HLA-A*32:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:123 protein. This plasmid can be used for constructing HLA-A*32:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:124 Protein Expression Plasmid Vector	PHLAP9257354	Plasmid vector containing HLA-A*32:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:124 protein. This plasmid can be used for constructing HLA-A*32:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:125 Protein Expression Plasmid Vector	PHLAP9257355	Plasmid vector containing HLA-A*32:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:125 protein. This plasmid can be used for constructing HLA-A*32:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:126N Protein Expression Plasmid Vector	PHLAP9257356	Plasmid vector containing HLA-A*32:126N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:126N protein. This plasmid can be used for constructing HLA-A*32:126N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:126N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:127 Protein Expression Plasmid Vector	PHLAP9257357	Plasmid vector containing HLA-A*32:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:127 protein. This plasmid can be used for constructing HLA-A*32:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:128 Protein Expression Plasmid Vector	PHLAP9257358	Plasmid vector containing HLA-A*32:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:128 protein. This plasmid can be used for constructing HLA-A*32:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:129 Protein Expression Plasmid Vector	PHLAP9257359	Plasmid vector containing HLA-A*32:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:129 protein. This plasmid can be used for constructing HLA-A*32:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:13 Protein Expression Plasmid Vector	PHLAP9257360	Plasmid vector containing HLA-A*32:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:13 protein. This plasmid can be used for constructing HLA-A*32:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:130N Protein Expression Plasmid Vector	PHLAP9257361	Plasmid vector containing HLA-A*32:130N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:130N protein. This plasmid can be used for constructing HLA-A*32:130N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:130N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:131 Protein Expression Plasmid Vector	PHLAP9257362	Plasmid vector containing HLA-A*32:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:131 protein. This plasmid can be used for constructing HLA-A*32:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:132N Protein Expression Plasmid Vector	PHLAP9257363	Plasmid vector containing HLA-A*32:132N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:132N protein. This plasmid can be used for constructing HLA-A*32:132N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:132N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:133N Protein Expression Plasmid Vector	PHLAP9257364	Plasmid vector containing HLA-A*32:133N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:133N protein. This plasmid can be used for constructing HLA-A*32:133N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:133N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:134 Protein Expression Plasmid Vector	PHLAP9257365	Plasmid vector containing HLA-A*32:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:134 protein. This plasmid can be used for constructing HLA-A*32:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:135N Protein Expression Plasmid Vector	PHLAP9257366	Plasmid vector containing HLA-A*32:135N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:135N protein. This plasmid can be used for constructing HLA-A*32:135N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:135N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:136 Protein Expression Plasmid Vector	PHLAP9257367	Plasmid vector containing HLA-A*32:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:136 protein. This plasmid can be used for constructing HLA-A*32:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:137 Protein Expression Plasmid Vector	PHLAP9257368	Plasmid vector containing HLA-A*32:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:137 protein. This plasmid can be used for constructing HLA-A*32:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:138 Protein Expression Plasmid Vector	PHLAP9257369	Plasmid vector containing HLA-A*32:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:138 protein. This plasmid can be used for constructing HLA-A*32:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:139 Protein Expression Plasmid Vector	PHLAP9257370	Plasmid vector containing HLA-A*32:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:139 protein. This plasmid can be used for constructing HLA-A*32:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:14 Protein Expression Plasmid Vector	PHLAP9257371	Plasmid vector containing HLA-A*32:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:14 protein. This plasmid can be used for constructing HLA-A*32:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:140 Protein Expression Plasmid Vector	PHLAP9257372	Plasmid vector containing HLA-A*32:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:140 protein. This plasmid can be used for constructing HLA-A*32:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:141 Protein Expression Plasmid Vector	PHLAP9257373	Plasmid vector containing HLA-A*32:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:141 protein. This plasmid can be used for constructing HLA-A*32:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:142 Protein Expression Plasmid Vector	PHLAP9257374	Plasmid vector containing HLA-A*32:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:142 protein. This plasmid can be used for constructing HLA-A*32:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:143 Protein Expression Plasmid Vector	PHLAP9257375	Plasmid vector containing HLA-A*32:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:143 protein. This plasmid can be used for constructing HLA-A*32:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:144 Protein Expression Plasmid Vector	PHLAP9257376	Plasmid vector containing HLA-A*32:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:144 protein. This plasmid can be used for constructing HLA-A*32:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:145 Protein Expression Plasmid Vector	PHLAP9257377	Plasmid vector containing HLA-A*32:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:145 protein. This plasmid can be used for constructing HLA-A*32:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:146 Protein Expression Plasmid Vector	PHLAP9257378	Plasmid vector containing HLA-A*32:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:146 protein. This plasmid can be used for constructing HLA-A*32:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:147 Protein Expression Plasmid Vector	PHLAP9257379	Plasmid vector containing HLA-A*32:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:147 protein. This plasmid can be used for constructing HLA-A*32:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:148 Protein Expression Plasmid Vector	PHLAP9257380	Plasmid vector containing HLA-A*32:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:148 protein. This plasmid can be used for constructing HLA-A*32:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:149 Protein Expression Plasmid Vector	PHLAP9257381	Plasmid vector containing HLA-A*32:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:149 protein. This plasmid can be used for constructing HLA-A*32:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:15 Protein Expression Plasmid Vector	PHLAP9257382	Plasmid vector containing HLA-A*32:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:15 protein. This plasmid can be used for constructing HLA-A*32:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:150 Protein Expression Plasmid Vector	PHLAP9257383	Plasmid vector containing HLA-A*32:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:150 protein. This plasmid can be used for constructing HLA-A*32:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:151:01 Protein Expression Plasmid Vector	PHLAP9257384	Plasmid vector containing HLA-A*32:151:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:151:01 protein. This plasmid can be used for constructing HLA-A*32:151:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:151:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:151:02 Protein Expression Plasmid Vector	PHLAP9257385	Plasmid vector containing HLA-A*32:151:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:151:02 protein. This plasmid can be used for constructing HLA-A*32:151:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:151:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:152 Protein Expression Plasmid Vector	PHLAP9257386	Plasmid vector containing HLA-A*32:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:152 protein. This plasmid can be used for constructing HLA-A*32:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:153 Protein Expression Plasmid Vector	PHLAP9257387	Plasmid vector containing HLA-A*32:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:153 protein. This plasmid can be used for constructing HLA-A*32:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:154 Protein Expression Plasmid Vector	PHLAP9257388	Plasmid vector containing HLA-A*32:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:154 protein. This plasmid can be used for constructing HLA-A*32:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:155 Protein Expression Plasmid Vector	PHLAP9257389	Plasmid vector containing HLA-A*32:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:155 protein. This plasmid can be used for constructing HLA-A*32:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:156 Protein Expression Plasmid Vector	PHLAP9257390	Plasmid vector containing HLA-A*32:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:156 protein. This plasmid can be used for constructing HLA-A*32:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:157 Protein Expression Plasmid Vector	PHLAP9257391	Plasmid vector containing HLA-A*32:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:157 protein. This plasmid can be used for constructing HLA-A*32:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:158 Protein Expression Plasmid Vector	PHLAP9257392	Plasmid vector containing HLA-A*32:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:158 protein. This plasmid can be used for constructing HLA-A*32:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:159 Protein Expression Plasmid Vector	PHLAP9257393	Plasmid vector containing HLA-A*32:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:159 protein. This plasmid can be used for constructing HLA-A*32:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:16 Protein Expression Plasmid Vector	PHLAP9257394	Plasmid vector containing HLA-A*32:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:16 protein. This plasmid can be used for constructing HLA-A*32:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:160N Protein Expression Plasmid Vector	PHLAP9257395	Plasmid vector containing HLA-A*32:160N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:160N protein. This plasmid can be used for constructing HLA-A*32:160N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:160N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:161 Protein Expression Plasmid Vector	PHLAP9257396	Plasmid vector containing HLA-A*32:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:161 protein. This plasmid can be used for constructing HLA-A*32:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:162 Protein Expression Plasmid Vector	PHLAP9257397	Plasmid vector containing HLA-A*32:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:162 protein. This plasmid can be used for constructing HLA-A*32:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:163 Protein Expression Plasmid Vector	PHLAP9257398	Plasmid vector containing HLA-A*32:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:163 protein. This plasmid can be used for constructing HLA-A*32:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:164 Protein Expression Plasmid Vector	PHLAP9257399	Plasmid vector containing HLA-A*32:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:164 protein. This plasmid can be used for constructing HLA-A*32:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:165 Protein Expression Plasmid Vector	PHLAP9257400	Plasmid vector containing HLA-A*32:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:165 protein. This plasmid can be used for constructing HLA-A*32:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:166Q Protein Expression Plasmid Vector	PHLAP9257401	Plasmid vector containing HLA-A*32:166Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:166Q protein. This plasmid can be used for constructing HLA-A*32:166Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:166Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:167N Protein Expression Plasmid Vector	PHLAP9257402	Plasmid vector containing HLA-A*32:167N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:167N protein. This plasmid can be used for constructing HLA-A*32:167N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:167N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:168N Protein Expression Plasmid Vector	PHLAP9257403	Plasmid vector containing HLA-A*32:168N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:168N protein. This plasmid can be used for constructing HLA-A*32:168N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:168N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:169 Protein Expression Plasmid Vector	PHLAP9257404	Plasmid vector containing HLA-A*32:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:169 protein. This plasmid can be used for constructing HLA-A*32:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:17 Protein Expression Plasmid Vector	PHLAP9257405	Plasmid vector containing HLA-A*32:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:17 protein. This plasmid can be used for constructing HLA-A*32:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:170 Protein Expression Plasmid Vector	PHLAP9257406	Plasmid vector containing HLA-A*32:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:170 protein. This plasmid can be used for constructing HLA-A*32:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:171 Protein Expression Plasmid Vector	PHLAP9257407	Plasmid vector containing HLA-A*32:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:171 protein. This plasmid can be used for constructing HLA-A*32:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:172 Protein Expression Plasmid Vector	PHLAP9257408	Plasmid vector containing HLA-A*32:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:172 protein. This plasmid can be used for constructing HLA-A*32:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:173 Protein Expression Plasmid Vector	PHLAP9257409	Plasmid vector containing HLA-A*32:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:173 protein. This plasmid can be used for constructing HLA-A*32:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:174 Protein Expression Plasmid Vector	PHLAP9257410	Plasmid vector containing HLA-A*32:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:174 protein. This plasmid can be used for constructing HLA-A*32:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:175 Protein Expression Plasmid Vector	PHLAP9257411	Plasmid vector containing HLA-A*32:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:175 protein. This plasmid can be used for constructing HLA-A*32:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:176 Protein Expression Plasmid Vector	PHLAP9257412	Plasmid vector containing HLA-A*32:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:176 protein. This plasmid can be used for constructing HLA-A*32:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:177 Protein Expression Plasmid Vector	PHLAP9257413	Plasmid vector containing HLA-A*32:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:177 protein. This plasmid can be used for constructing HLA-A*32:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:178 Protein Expression Plasmid Vector	PHLAP9257414	Plasmid vector containing HLA-A*32:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:178 protein. This plasmid can be used for constructing HLA-A*32:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:179 Protein Expression Plasmid Vector	PHLAP9257415	Plasmid vector containing HLA-A*32:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:179 protein. This plasmid can be used for constructing HLA-A*32:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:18 Protein Expression Plasmid Vector	PHLAP9257416	Plasmid vector containing HLA-A*32:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:18 protein. This plasmid can be used for constructing HLA-A*32:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:180 Protein Expression Plasmid Vector	PHLAP9257417	Plasmid vector containing HLA-A*32:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:180 protein. This plasmid can be used for constructing HLA-A*32:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:181 Protein Expression Plasmid Vector	PHLAP9257418	Plasmid vector containing HLA-A*32:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:181 protein. This plasmid can be used for constructing HLA-A*32:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:182 Protein Expression Plasmid Vector	PHLAP9257419	Plasmid vector containing HLA-A*32:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:182 protein. This plasmid can be used for constructing HLA-A*32:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:183 Protein Expression Plasmid Vector	PHLAP9257420	Plasmid vector containing HLA-A*32:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:183 protein. This plasmid can be used for constructing HLA-A*32:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:184 Protein Expression Plasmid Vector	PHLAP9257421	Plasmid vector containing HLA-A*32:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:184 protein. This plasmid can be used for constructing HLA-A*32:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:185 Protein Expression Plasmid Vector	PHLAP9257422	Plasmid vector containing HLA-A*32:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:185 protein. This plasmid can be used for constructing HLA-A*32:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:186 Protein Expression Plasmid Vector	PHLAP9257423	Plasmid vector containing HLA-A*32:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:186 protein. This plasmid can be used for constructing HLA-A*32:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:187 Protein Expression Plasmid Vector	PHLAP9257424	Plasmid vector containing HLA-A*32:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:187 protein. This plasmid can be used for constructing HLA-A*32:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:188 Protein Expression Plasmid Vector	PHLAP9257425	Plasmid vector containing HLA-A*32:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:188 protein. This plasmid can be used for constructing HLA-A*32:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:189 Protein Expression Plasmid Vector	PHLAP9257426	Plasmid vector containing HLA-A*32:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:189 protein. This plasmid can be used for constructing HLA-A*32:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:190 Protein Expression Plasmid Vector	PHLAP9257427	Plasmid vector containing HLA-A*32:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:190 protein. This plasmid can be used for constructing HLA-A*32:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:191Q Protein Expression Plasmid Vector	PHLAP9257428	Plasmid vector containing HLA-A*32:191Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:191Q protein. This plasmid can be used for constructing HLA-A*32:191Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:191Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:192 Protein Expression Plasmid Vector	PHLAP9257429	Plasmid vector containing HLA-A*32:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:192 protein. This plasmid can be used for constructing HLA-A*32:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:193 Protein Expression Plasmid Vector	PHLAP9257430	Plasmid vector containing HLA-A*32:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:193 protein. This plasmid can be used for constructing HLA-A*32:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:194 Protein Expression Plasmid Vector	PHLAP9257431	Plasmid vector containing HLA-A*32:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:194 protein. This plasmid can be used for constructing HLA-A*32:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:195 Protein Expression Plasmid Vector	PHLAP9257432	Plasmid vector containing HLA-A*32:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:195 protein. This plasmid can be used for constructing HLA-A*32:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:19N Protein Expression Plasmid Vector	PHLAP9257433	Plasmid vector containing HLA-A*32:19N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:19N protein. This plasmid can be used for constructing HLA-A*32:19N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:19N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:20 Protein Expression Plasmid Vector	PHLAP9257434	Plasmid vector containing HLA-A*32:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:20 protein. This plasmid can be used for constructing HLA-A*32:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:21 Protein Expression Plasmid Vector	PHLAP9257435	Plasmid vector containing HLA-A*32:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:21 protein. This plasmid can be used for constructing HLA-A*32:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:22 Protein Expression Plasmid Vector	PHLAP9257436	Plasmid vector containing HLA-A*32:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:22 protein. This plasmid can be used for constructing HLA-A*32:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:23 Protein Expression Plasmid Vector	PHLAP9257437	Plasmid vector containing HLA-A*32:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:23 protein. This plasmid can be used for constructing HLA-A*32:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:24 Protein Expression Plasmid Vector	PHLAP9257438	Plasmid vector containing HLA-A*32:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:24 protein. This plasmid can be used for constructing HLA-A*32:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:25 Protein Expression Plasmid Vector	PHLAP9257439	Plasmid vector containing HLA-A*32:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:25 protein. This plasmid can be used for constructing HLA-A*32:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:26:01 Protein Expression Plasmid Vector	PHLAP9257440	Plasmid vector containing HLA-A*32:26:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:26:01 protein. This plasmid can be used for constructing HLA-A*32:26:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:26:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:26:02 Protein Expression Plasmid Vector	PHLAP9257441	Plasmid vector containing HLA-A*32:26:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:26:02 protein. This plasmid can be used for constructing HLA-A*32:26:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:26:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:27N Protein Expression Plasmid Vector	PHLAP9257442	Plasmid vector containing HLA-A*32:27N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:27N protein. This plasmid can be used for constructing HLA-A*32:27N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:27N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:28 Protein Expression Plasmid Vector	PHLAP9257443	Plasmid vector containing HLA-A*32:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:28 protein. This plasmid can be used for constructing HLA-A*32:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:29 Protein Expression Plasmid Vector	PHLAP9257444	Plasmid vector containing HLA-A*32:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:29 protein. This plasmid can be used for constructing HLA-A*32:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:30:01 Protein Expression Plasmid Vector	PHLAP9257445	Plasmid vector containing HLA-A*32:30:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:30:01 protein. This plasmid can be used for constructing HLA-A*32:30:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:30:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:30:02 Protein Expression Plasmid Vector	PHLAP9257446	Plasmid vector containing HLA-A*32:30:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:30:02 protein. This plasmid can be used for constructing HLA-A*32:30:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:30:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:31 Protein Expression Plasmid Vector	PHLAP9257447	Plasmid vector containing HLA-A*32:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:31 protein. This plasmid can be used for constructing HLA-A*32:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:32 Protein Expression Plasmid Vector	PHLAP9257448	Plasmid vector containing HLA-A*32:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:32 protein. This plasmid can be used for constructing HLA-A*32:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:33:01 Protein Expression Plasmid Vector	PHLAP9257449	Plasmid vector containing HLA-A*32:33:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:33:01 protein. This plasmid can be used for constructing HLA-A*32:33:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:33:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:33:02 Protein Expression Plasmid Vector	PHLAP9257450	Plasmid vector containing HLA-A*32:33:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:33:02 protein. This plasmid can be used for constructing HLA-A*32:33:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:33:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:33:03 Protein Expression Plasmid Vector	PHLAP9257451	Plasmid vector containing HLA-A*32:33:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:33:03 protein. This plasmid can be used for constructing HLA-A*32:33:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:33:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:34 Protein Expression Plasmid Vector	PHLAP9257452	Plasmid vector containing HLA-A*32:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:34 protein. This plasmid can be used for constructing HLA-A*32:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:35 Protein Expression Plasmid Vector	PHLAP9257453	Plasmid vector containing HLA-A*32:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:35 protein. This plasmid can be used for constructing HLA-A*32:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:36 Protein Expression Plasmid Vector	PHLAP9257454	Plasmid vector containing HLA-A*32:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:36 protein. This plasmid can be used for constructing HLA-A*32:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:37 Protein Expression Plasmid Vector	PHLAP9257455	Plasmid vector containing HLA-A*32:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:37 protein. This plasmid can be used for constructing HLA-A*32:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:38 Protein Expression Plasmid Vector	PHLAP9257456	Plasmid vector containing HLA-A*32:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:38 protein. This plasmid can be used for constructing HLA-A*32:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:39 Protein Expression Plasmid Vector	PHLAP9257457	Plasmid vector containing HLA-A*32:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:39 protein. This plasmid can be used for constructing HLA-A*32:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:40 Protein Expression Plasmid Vector	PHLAP9257458	Plasmid vector containing HLA-A*32:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:40 protein. This plasmid can be used for constructing HLA-A*32:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:41 Protein Expression Plasmid Vector	PHLAP9257459	Plasmid vector containing HLA-A*32:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:41 protein. This plasmid can be used for constructing HLA-A*32:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:42 Protein Expression Plasmid Vector	PHLAP9257460	Plasmid vector containing HLA-A*32:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:42 protein. This plasmid can be used for constructing HLA-A*32:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:43:01 Protein Expression Plasmid Vector	PHLAP9257461	Plasmid vector containing HLA-A*32:43:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:43:01 protein. This plasmid can be used for constructing HLA-A*32:43:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:43:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:43:02 Protein Expression Plasmid Vector	PHLAP9257462	Plasmid vector containing HLA-A*32:43:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:43:02 protein. This plasmid can be used for constructing HLA-A*32:43:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:43:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:44 Protein Expression Plasmid Vector	PHLAP9257463	Plasmid vector containing HLA-A*32:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:44 protein. This plasmid can be used for constructing HLA-A*32:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:45N Protein Expression Plasmid Vector	PHLAP9257464	Plasmid vector containing HLA-A*32:45N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:45N protein. This plasmid can be used for constructing HLA-A*32:45N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:45N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:46:01 Protein Expression Plasmid Vector	PHLAP9257465	Plasmid vector containing HLA-A*32:46:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:46:01 protein. This plasmid can be used for constructing HLA-A*32:46:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:46:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:46:02 Protein Expression Plasmid Vector	PHLAP9257466	Plasmid vector containing HLA-A*32:46:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:46:02 protein. This plasmid can be used for constructing HLA-A*32:46:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:46:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:47 Protein Expression Plasmid Vector	PHLAP9257467	Plasmid vector containing HLA-A*32:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:47 protein. This plasmid can be used for constructing HLA-A*32:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:48N Protein Expression Plasmid Vector	PHLAP9257468	Plasmid vector containing HLA-A*32:48N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:48N protein. This plasmid can be used for constructing HLA-A*32:48N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:48N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:49 Protein Expression Plasmid Vector	PHLAP9257469	Plasmid vector containing HLA-A*32:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:49 protein. This plasmid can be used for constructing HLA-A*32:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:50 Protein Expression Plasmid Vector	PHLAP9257470	Plasmid vector containing HLA-A*32:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:50 protein. This plasmid can be used for constructing HLA-A*32:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:51 Protein Expression Plasmid Vector	PHLAP9257471	Plasmid vector containing HLA-A*32:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:51 protein. This plasmid can be used for constructing HLA-A*32:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:52 Protein Expression Plasmid Vector	PHLAP9257472	Plasmid vector containing HLA-A*32:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:52 protein. This plasmid can be used for constructing HLA-A*32:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:53 Protein Expression Plasmid Vector	PHLAP9257473	Plasmid vector containing HLA-A*32:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:53 protein. This plasmid can be used for constructing HLA-A*32:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:54 Protein Expression Plasmid Vector	PHLAP9257474	Plasmid vector containing HLA-A*32:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:54 protein. This plasmid can be used for constructing HLA-A*32:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:55:01 Protein Expression Plasmid Vector	PHLAP9257475	Plasmid vector containing HLA-A*32:55:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:55:01 protein. This plasmid can be used for constructing HLA-A*32:55:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:55:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:55:02 Protein Expression Plasmid Vector	PHLAP9257476	Plasmid vector containing HLA-A*32:55:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:55:02 protein. This plasmid can be used for constructing HLA-A*32:55:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:55:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:55:03 Protein Expression Plasmid Vector	PHLAP9257477	Plasmid vector containing HLA-A*32:55:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:55:03 protein. This plasmid can be used for constructing HLA-A*32:55:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:55:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:56N Protein Expression Plasmid Vector	PHLAP9257478	Plasmid vector containing HLA-A*32:56N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:56N protein. This plasmid can be used for constructing HLA-A*32:56N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:56N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:57 Protein Expression Plasmid Vector	PHLAP9257479	Plasmid vector containing HLA-A*32:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:57 protein. This plasmid can be used for constructing HLA-A*32:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:58 Protein Expression Plasmid Vector	PHLAP9257480	Plasmid vector containing HLA-A*32:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:58 protein. This plasmid can be used for constructing HLA-A*32:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:59 Protein Expression Plasmid Vector	PHLAP9257481	Plasmid vector containing HLA-A*32:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:59 protein. This plasmid can be used for constructing HLA-A*32:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:60 Protein Expression Plasmid Vector	PHLAP9257482	Plasmid vector containing HLA-A*32:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:60 protein. This plasmid can be used for constructing HLA-A*32:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:61 Protein Expression Plasmid Vector	PHLAP9257483	Plasmid vector containing HLA-A*32:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:61 protein. This plasmid can be used for constructing HLA-A*32:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:62 Protein Expression Plasmid Vector	PHLAP9257484	Plasmid vector containing HLA-A*32:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:62 protein. This plasmid can be used for constructing HLA-A*32:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:63 Protein Expression Plasmid Vector	PHLAP9257485	Plasmid vector containing HLA-A*32:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:63 protein. This plasmid can be used for constructing HLA-A*32:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:64 Protein Expression Plasmid Vector	PHLAP9257486	Plasmid vector containing HLA-A*32:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:64 protein. This plasmid can be used for constructing HLA-A*32:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:65 Protein Expression Plasmid Vector	PHLAP9257487	Plasmid vector containing HLA-A*32:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:65 protein. This plasmid can be used for constructing HLA-A*32:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:66 Protein Expression Plasmid Vector	PHLAP9257488	Plasmid vector containing HLA-A*32:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:66 protein. This plasmid can be used for constructing HLA-A*32:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:67 Protein Expression Plasmid Vector	PHLAP9257489	Plasmid vector containing HLA-A*32:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:67 protein. This plasmid can be used for constructing HLA-A*32:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:68 Protein Expression Plasmid Vector	PHLAP9257490	Plasmid vector containing HLA-A*32:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:68 protein. This plasmid can be used for constructing HLA-A*32:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:69 Protein Expression Plasmid Vector	PHLAP9257491	Plasmid vector containing HLA-A*32:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:69 protein. This plasmid can be used for constructing HLA-A*32:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:70 Protein Expression Plasmid Vector	PHLAP9257492	Plasmid vector containing HLA-A*32:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:70 protein. This plasmid can be used for constructing HLA-A*32:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:71 Protein Expression Plasmid Vector	PHLAP9257493	Plasmid vector containing HLA-A*32:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:71 protein. This plasmid can be used for constructing HLA-A*32:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:72 Protein Expression Plasmid Vector	PHLAP9257494	Plasmid vector containing HLA-A*32:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:72 protein. This plasmid can be used for constructing HLA-A*32:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:73 Protein Expression Plasmid Vector	PHLAP9257495	Plasmid vector containing HLA-A*32:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:73 protein. This plasmid can be used for constructing HLA-A*32:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:74 Protein Expression Plasmid Vector	PHLAP9257496	Plasmid vector containing HLA-A*32:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:74 protein. This plasmid can be used for constructing HLA-A*32:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:75 Protein Expression Plasmid Vector	PHLAP9257497	Plasmid vector containing HLA-A*32:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:75 protein. This plasmid can be used for constructing HLA-A*32:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:76 Protein Expression Plasmid Vector	PHLAP9257498	Plasmid vector containing HLA-A*32:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:76 protein. This plasmid can be used for constructing HLA-A*32:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:77 Protein Expression Plasmid Vector	PHLAP9257499	Plasmid vector containing HLA-A*32:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:77 protein. This plasmid can be used for constructing HLA-A*32:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:78 Protein Expression Plasmid Vector	PHLAP9257500	Plasmid vector containing HLA-A*32:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:78 protein. This plasmid can be used for constructing HLA-A*32:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:79 Protein Expression Plasmid Vector	PHLAP9257501	Plasmid vector containing HLA-A*32:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:79 protein. This plasmid can be used for constructing HLA-A*32:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:80 Protein Expression Plasmid Vector	PHLAP9257502	Plasmid vector containing HLA-A*32:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:80 protein. This plasmid can be used for constructing HLA-A*32:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:81 Protein Expression Plasmid Vector	PHLAP9257503	Plasmid vector containing HLA-A*32:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:81 protein. This plasmid can be used for constructing HLA-A*32:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:82 Protein Expression Plasmid Vector	PHLAP9257504	Plasmid vector containing HLA-A*32:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:82 protein. This plasmid can be used for constructing HLA-A*32:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:83 Protein Expression Plasmid Vector	PHLAP9257505	Plasmid vector containing HLA-A*32:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:83 protein. This plasmid can be used for constructing HLA-A*32:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:84 Protein Expression Plasmid Vector	PHLAP9257506	Plasmid vector containing HLA-A*32:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:84 protein. This plasmid can be used for constructing HLA-A*32:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:85 Protein Expression Plasmid Vector	PHLAP9257507	Plasmid vector containing HLA-A*32:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:85 protein. This plasmid can be used for constructing HLA-A*32:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:86 Protein Expression Plasmid Vector	PHLAP9257508	Plasmid vector containing HLA-A*32:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:86 protein. This plasmid can be used for constructing HLA-A*32:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:87 Protein Expression Plasmid Vector	PHLAP9257509	Plasmid vector containing HLA-A*32:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:87 protein. This plasmid can be used for constructing HLA-A*32:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:88 Protein Expression Plasmid Vector	PHLAP9257510	Plasmid vector containing HLA-A*32:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:88 protein. This plasmid can be used for constructing HLA-A*32:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:89 Protein Expression Plasmid Vector	PHLAP9257511	Plasmid vector containing HLA-A*32:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:89 protein. This plasmid can be used for constructing HLA-A*32:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:90 Protein Expression Plasmid Vector	PHLAP9257512	Plasmid vector containing HLA-A*32:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:90 protein. This plasmid can be used for constructing HLA-A*32:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:91 Protein Expression Plasmid Vector	PHLAP9257513	Plasmid vector containing HLA-A*32:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:91 protein. This plasmid can be used for constructing HLA-A*32:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:92N Protein Expression Plasmid Vector	PHLAP9257514	Plasmid vector containing HLA-A*32:92N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:92N protein. This plasmid can be used for constructing HLA-A*32:92N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:92N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:93 Protein Expression Plasmid Vector	PHLAP9257515	Plasmid vector containing HLA-A*32:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:93 protein. This plasmid can be used for constructing HLA-A*32:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:94 Protein Expression Plasmid Vector	PHLAP9257516	Plasmid vector containing HLA-A*32:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:94 protein. This plasmid can be used for constructing HLA-A*32:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:95 Protein Expression Plasmid Vector	PHLAP9257517	Plasmid vector containing HLA-A*32:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:95 protein. This plasmid can be used for constructing HLA-A*32:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:96 Protein Expression Plasmid Vector	PHLAP9257518	Plasmid vector containing HLA-A*32:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:96 protein. This plasmid can be used for constructing HLA-A*32:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:97 Protein Expression Plasmid Vector	PHLAP9257519	Plasmid vector containing HLA-A*32:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:97 protein. This plasmid can be used for constructing HLA-A*32:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:98 Protein Expression Plasmid Vector	PHLAP9257520	Plasmid vector containing HLA-A*32:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:98 protein. This plasmid can be used for constructing HLA-A*32:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:99 Protein Expression Plasmid Vector	PHLAP9257521	Plasmid vector containing HLA-A*32:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:99 protein. This plasmid can be used for constructing HLA-A*32:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:01 Protein Expression Plasmid Vector	PHLAP9257522	Plasmid vector containing HLA-A*33:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:01 protein. This plasmid can be used for constructing HLA-A*33:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:02 Protein Expression Plasmid Vector	PHLAP9257523	Plasmid vector containing HLA-A*33:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:02 protein. This plasmid can be used for constructing HLA-A*33:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:01:01:03 Protein Expression Plasmid Vector	PHLAP9257524	Plasmid vector containing HLA-A*33:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:03 protein. This plasmid can be used for constructing HLA-A*33:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:04 Protein Expression Plasmid Vector	PHLAP9257525	Plasmid vector containing HLA-A*33:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:04 protein. This plasmid can be used for constructing HLA-A*33:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:05 Protein Expression Plasmid Vector	PHLAP9257526	Plasmid vector containing HLA-A*33:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:05 protein. This plasmid can be used for constructing HLA-A*33:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:06 Protein Expression Plasmid Vector	PHLAP9257527	Plasmid vector containing HLA-A*33:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:06 protein. This plasmid can be used for constructing HLA-A*33:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:07 Protein Expression Plasmid Vector	PHLAP9257528	Plasmid vector containing HLA-A*33:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:07 protein. This plasmid can be used for constructing HLA-A*33:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:08 Protein Expression Plasmid Vector	PHLAP9257529	Plasmid vector containing HLA-A*33:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:08 protein. This plasmid can be used for constructing HLA-A*33:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:09 Protein Expression Plasmid Vector	PHLAP9257530	Plasmid vector containing HLA-A*33:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:09 protein. This plasmid can be used for constructing HLA-A*33:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:01:01:10 Protein Expression Plasmid Vector	PHLAP9257531	Plasmid vector containing HLA-A*33:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:10 protein. This plasmid can be used for constructing HLA-A*33:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:11 Protein Expression Plasmid Vector	PHLAP9257532	Plasmid vector containing HLA-A*33:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:11 protein. This plasmid can be used for constructing HLA-A*33:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:12 Protein Expression Plasmid Vector	PHLAP9257533	Plasmid vector containing HLA-A*33:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:12 protein. This plasmid can be used for constructing HLA-A*33:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:13 Protein Expression Plasmid Vector	PHLAP9257534	Plasmid vector containing HLA-A*33:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:13 protein. This plasmid can be used for constructing HLA-A*33:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:14 Protein Expression Plasmid Vector	PHLAP9257535	Plasmid vector containing HLA-A*33:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:14 protein. This plasmid can be used for constructing HLA-A*33:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:15 Protein Expression Plasmid Vector	PHLAP9257536	Plasmid vector containing HLA-A*33:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:15 protein. This plasmid can be used for constructing HLA-A*33:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:16 Protein Expression Plasmid Vector	PHLAP9257537	Plasmid vector containing HLA-A*33:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:16 protein. This plasmid can be used for constructing HLA-A*33:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:01:01:17 Protein Expression Plasmid Vector	PHLAP9257538	Plasmid vector containing HLA-A*33:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:17 protein. This plasmid can be used for constructing HLA-A*33:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:18 Protein Expression Plasmid Vector	PHLAP9257539	Plasmid vector containing HLA-A*33:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:18 protein. This plasmid can be used for constructing HLA-A*33:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:19 Protein Expression Plasmid Vector	PHLAP9257540	Plasmid vector containing HLA-A*33:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:19 protein. This plasmid can be used for constructing HLA-A*33:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:01:20 Protein Expression Plasmid Vector	PHLAP9257541	Plasmid vector containing HLA-A*33:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:01:20 protein. This plasmid can be used for constructing HLA-A*33:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:02 Protein Expression Plasmid Vector	PHLAP9257542	Plasmid vector containing HLA-A*33:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:02 protein. This plasmid can be used for constructing HLA-A*33:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:03 Protein Expression Plasmid Vector	PHLAP9257543	Plasmid vector containing HLA-A*33:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:03 protein. This plasmid can be used for constructing HLA-A*33:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:04 Protein Expression Plasmid Vector	PHLAP9257544	Plasmid vector containing HLA-A*33:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:04 protein. This plasmid can be used for constructing HLA-A*33:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:01:05 Protein Expression Plasmid Vector	PHLAP9257545	Plasmid vector containing HLA-A*33:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:05 protein. This plasmid can be used for constructing HLA-A*33:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:06 Protein Expression Plasmid Vector	PHLAP9257546	Plasmid vector containing HLA-A*33:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:06 protein. This plasmid can be used for constructing HLA-A*33:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:07 Protein Expression Plasmid Vector	PHLAP9257547	Plasmid vector containing HLA-A*33:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:07 protein. This plasmid can be used for constructing HLA-A*33:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:08 Protein Expression Plasmid Vector	PHLAP9257548	Plasmid vector containing HLA-A*33:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:08 protein. This plasmid can be used for constructing HLA-A*33:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:09 Protein Expression Plasmid Vector	PHLAP9257549	Plasmid vector containing HLA-A*33:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:09 protein. This plasmid can be used for constructing HLA-A*33:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:10 Protein Expression Plasmid Vector	PHLAP9257550	Plasmid vector containing HLA-A*33:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:10 protein. This plasmid can be used for constructing HLA-A*33:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:11 Protein Expression Plasmid Vector	PHLAP9257551	Plasmid vector containing HLA-A*33:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:11 protein. This plasmid can be used for constructing HLA-A*33:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:12 Protein Expression Plasmid Vector	PHLAP9257552	Plasmid vector containing HLA-A*33:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:12 protein. This plasmid can be used for constructing HLA-A*33:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:01:13 Protein Expression Plasmid Vector	PHLAP9257553	Plasmid vector containing HLA-A*33:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:13 protein. This plasmid can be used for constructing HLA-A*33:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:14 Protein Expression Plasmid Vector	PHLAP9257554	Plasmid vector containing HLA-A*33:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:14 protein. This plasmid can be used for constructing HLA-A*33:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:15 Protein Expression Plasmid Vector	PHLAP9257555	Plasmid vector containing HLA-A*33:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:15 protein. This plasmid can be used for constructing HLA-A*33:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:16 Protein Expression Plasmid Vector	PHLAP9257556	Plasmid vector containing HLA-A*33:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:16 protein. This plasmid can be used for constructing HLA-A*33:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:17 Protein Expression Plasmid Vector	PHLAP9257557	Plasmid vector containing HLA-A*33:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:17 protein. This plasmid can be used for constructing HLA-A*33:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:18 Protein Expression Plasmid Vector	PHLAP9257558	Plasmid vector containing HLA-A*33:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:18 protein. This plasmid can be used for constructing HLA-A*33:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:19 Protein Expression Plasmid Vector	PHLAP9257559	Plasmid vector containing HLA-A*33:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:19 protein. This plasmid can be used for constructing HLA-A*33:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:20 Protein Expression Plasmid Vector	PHLAP9257560	Plasmid vector containing HLA-A*33:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:20 protein. This plasmid can be used for constructing HLA-A*33:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:01:21 Protein Expression Plasmid Vector	PHLAP9257561	Plasmid vector containing HLA-A*33:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:21 protein. This plasmid can be used for constructing HLA-A*33:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:01:22 Protein Expression Plasmid Vector	PHLAP9257562	Plasmid vector containing HLA-A*33:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:01:22 protein. This plasmid can be used for constructing HLA-A*33:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:01 Protein Expression Plasmid Vector	PHLAP9257563	Plasmid vector containing HLA-A*33:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:01 protein. This plasmid can be used for constructing HLA-A*33:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:02 Protein Expression Plasmid Vector	PHLAP9257564	Plasmid vector containing HLA-A*33:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:02 protein. This plasmid can be used for constructing HLA-A*33:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:03 Protein Expression Plasmid Vector	PHLAP9257565	Plasmid vector containing HLA-A*33:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:03 protein. This plasmid can be used for constructing HLA-A*33:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:04 Protein Expression Plasmid Vector	PHLAP9257566	Plasmid vector containing HLA-A*33:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:04 protein. This plasmid can be used for constructing HLA-A*33:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:05 Protein Expression Plasmid Vector	PHLAP9257567	Plasmid vector containing HLA-A*33:03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:05 protein. This plasmid can be used for constructing HLA-A*33:03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:01:06 Protein Expression Plasmid Vector	PHLAP9257568	Plasmid vector containing HLA-A*33:03:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:06 protein. This plasmid can be used for constructing HLA-A*33:03:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:07 Protein Expression Plasmid Vector	PHLAP9257569	Plasmid vector containing HLA-A*33:03:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:07 protein. This plasmid can be used for constructing HLA-A*33:03:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:08 Protein Expression Plasmid Vector	PHLAP9257570	Plasmid vector containing HLA-A*33:03:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:08 protein. This plasmid can be used for constructing HLA-A*33:03:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:09 Protein Expression Plasmid Vector	PHLAP9257571	Plasmid vector containing HLA-A*33:03:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:09 protein. This plasmid can be used for constructing HLA-A*33:03:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:10 Protein Expression Plasmid Vector	PHLAP9257572	Plasmid vector containing HLA-A*33:03:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:10 protein. This plasmid can be used for constructing HLA-A*33:03:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:11 Protein Expression Plasmid Vector	PHLAP9257573	Plasmid vector containing HLA-A*33:03:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:11 protein. This plasmid can be used for constructing HLA-A*33:03:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:12 Protein Expression Plasmid Vector	PHLAP9257574	Plasmid vector containing HLA-A*33:03:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:12 protein. This plasmid can be used for constructing HLA-A*33:03:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:01:13 Protein Expression Plasmid Vector	PHLAP9257575	Plasmid vector containing HLA-A*33:03:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:13 protein. This plasmid can be used for constructing HLA-A*33:03:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:14 Protein Expression Plasmid Vector	PHLAP9257576	Plasmid vector containing HLA-A*33:03:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:14 protein. This plasmid can be used for constructing HLA-A*33:03:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:15 Protein Expression Plasmid Vector	PHLAP9257577	Plasmid vector containing HLA-A*33:03:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:15 protein. This plasmid can be used for constructing HLA-A*33:03:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:16 Protein Expression Plasmid Vector	PHLAP9257578	Plasmid vector containing HLA-A*33:03:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:16 protein. This plasmid can be used for constructing HLA-A*33:03:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:17 Protein Expression Plasmid Vector	PHLAP9257579	Plasmid vector containing HLA-A*33:03:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:17 protein. This plasmid can be used for constructing HLA-A*33:03:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:18 Protein Expression Plasmid Vector	PHLAP9257580	Plasmid vector containing HLA-A*33:03:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:18 protein. This plasmid can be used for constructing HLA-A*33:03:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:19 Protein Expression Plasmid Vector	PHLAP9257581	Plasmid vector containing HLA-A*33:03:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:19 protein. This plasmid can be used for constructing HLA-A*33:03:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:01:20 Protein Expression Plasmid Vector	PHLAP9257582	Plasmid vector containing HLA-A*33:03:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:20 protein. This plasmid can be used for constructing HLA-A*33:03:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:21Q Protein Expression Plasmid Vector	PHLAP9257583	Plasmid vector containing HLA-A*33:03:01:21Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:21Q protein. This plasmid can be used for constructing HLA-A*33:03:01:21Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:21Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:22 Protein Expression Plasmid Vector	PHLAP9257584	Plasmid vector containing HLA-A*33:03:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:22 protein. This plasmid can be used for constructing HLA-A*33:03:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:23 Protein Expression Plasmid Vector	PHLAP9257585	Plasmid vector containing HLA-A*33:03:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:23 protein. This plasmid can be used for constructing HLA-A*33:03:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:24 Protein Expression Plasmid Vector	PHLAP9257586	Plasmid vector containing HLA-A*33:03:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:24 protein. This plasmid can be used for constructing HLA-A*33:03:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:25 Protein Expression Plasmid Vector	PHLAP9257587	Plasmid vector containing HLA-A*33:03:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:25 protein. This plasmid can be used for constructing HLA-A*33:03:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:26 Protein Expression Plasmid Vector	PHLAP9257588	Plasmid vector containing HLA-A*33:03:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:26 protein. This plasmid can be used for constructing HLA-A*33:03:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:01:27 Protein Expression Plasmid Vector	PHLAP9257589	Plasmid vector containing HLA-A*33:03:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:27 protein. This plasmid can be used for constructing HLA-A*33:03:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:28 Protein Expression Plasmid Vector	PHLAP9257590	Plasmid vector containing HLA-A*33:03:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:28 protein. This plasmid can be used for constructing HLA-A*33:03:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:01:29 Protein Expression Plasmid Vector	PHLAP9257591	Plasmid vector containing HLA-A*33:03:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:01:29 protein. This plasmid can be used for constructing HLA-A*33:03:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:02 Protein Expression Plasmid Vector	PHLAP9257592	Plasmid vector containing HLA-A*33:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:02 protein. This plasmid can be used for constructing HLA-A*33:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:03Q Protein Expression Plasmid Vector	PHLAP9257593	Plasmid vector containing HLA-A*33:03:03Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:03Q protein. This plasmid can be used for constructing HLA-A*33:03:03Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:03Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:04 Protein Expression Plasmid Vector	PHLAP9257594	Plasmid vector containing HLA-A*33:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:04 protein. This plasmid can be used for constructing HLA-A*33:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:05 Protein Expression Plasmid Vector	PHLAP9257595	Plasmid vector containing HLA-A*33:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:05 protein. This plasmid can be used for constructing HLA-A*33:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:06 Protein Expression Plasmid Vector	PHLAP9257596	Plasmid vector containing HLA-A*33:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:06 protein. This plasmid can be used for constructing HLA-A*33:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:07 Protein Expression Plasmid Vector	PHLAP9257597	Plasmid vector containing HLA-A*33:03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:07 protein. This plasmid can be used for constructing HLA-A*33:03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:08 Protein Expression Plasmid Vector	PHLAP9257598	Plasmid vector containing HLA-A*33:03:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:08 protein. This plasmid can be used for constructing HLA-A*33:03:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:09 Protein Expression Plasmid Vector	PHLAP9257599	Plasmid vector containing HLA-A*33:03:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:09 protein. This plasmid can be used for constructing HLA-A*33:03:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:10 Protein Expression Plasmid Vector	PHLAP9257600	Plasmid vector containing HLA-A*33:03:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:10 protein. This plasmid can be used for constructing HLA-A*33:03:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:11 Protein Expression Plasmid Vector	PHLAP9257601	Plasmid vector containing HLA-A*33:03:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:11 protein. This plasmid can be used for constructing HLA-A*33:03:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:12 Protein Expression Plasmid Vector	PHLAP9257602	Plasmid vector containing HLA-A*33:03:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:12 protein. This plasmid can be used for constructing HLA-A*33:03:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:13 Protein Expression Plasmid Vector	PHLAP9257603	Plasmid vector containing HLA-A*33:03:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:13 protein. This plasmid can be used for constructing HLA-A*33:03:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:14 Protein Expression Plasmid Vector	PHLAP9257604	Plasmid vector containing HLA-A*33:03:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:14 protein. This plasmid can be used for constructing HLA-A*33:03:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:15 Protein Expression Plasmid Vector	PHLAP9257605	Plasmid vector containing HLA-A*33:03:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:15 protein. This plasmid can be used for constructing HLA-A*33:03:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:16 Protein Expression Plasmid Vector	PHLAP9257606	Plasmid vector containing HLA-A*33:03:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:16 protein. This plasmid can be used for constructing HLA-A*33:03:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:17 Protein Expression Plasmid Vector	PHLAP9257607	Plasmid vector containing HLA-A*33:03:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:17 protein. This plasmid can be used for constructing HLA-A*33:03:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:18 Protein Expression Plasmid Vector	PHLAP9257608	Plasmid vector containing HLA-A*33:03:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:18 protein. This plasmid can be used for constructing HLA-A*33:03:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:19 Protein Expression Plasmid Vector	PHLAP9257609	Plasmid vector containing HLA-A*33:03:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:19 protein. This plasmid can be used for constructing HLA-A*33:03:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:20 Protein Expression Plasmid Vector	PHLAP9257610	Plasmid vector containing HLA-A*33:03:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:20 protein. This plasmid can be used for constructing HLA-A*33:03:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:21 Protein Expression Plasmid Vector	PHLAP9257611	Plasmid vector containing HLA-A*33:03:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:21 protein. This plasmid can be used for constructing HLA-A*33:03:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:22 Protein Expression Plasmid Vector	PHLAP9257612	Plasmid vector containing HLA-A*33:03:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:22 protein. This plasmid can be used for constructing HLA-A*33:03:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:23 Protein Expression Plasmid Vector	PHLAP9257613	Plasmid vector containing HLA-A*33:03:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:23 protein. This plasmid can be used for constructing HLA-A*33:03:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:24 Protein Expression Plasmid Vector	PHLAP9257614	Plasmid vector containing HLA-A*33:03:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:24 protein. This plasmid can be used for constructing HLA-A*33:03:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:25 Protein Expression Plasmid Vector	PHLAP9257615	Plasmid vector containing HLA-A*33:03:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:25 protein. This plasmid can be used for constructing HLA-A*33:03:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:26 Protein Expression Plasmid Vector	PHLAP9257616	Plasmid vector containing HLA-A*33:03:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:26 protein. This plasmid can be used for constructing HLA-A*33:03:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:27 Protein Expression Plasmid Vector	PHLAP9257617	Plasmid vector containing HLA-A*33:03:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:27 protein. This plasmid can be used for constructing HLA-A*33:03:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:28 Protein Expression Plasmid Vector	PHLAP9257618	Plasmid vector containing HLA-A*33:03:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:28 protein. This plasmid can be used for constructing HLA-A*33:03:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:29 Protein Expression Plasmid Vector	PHLAP9257619	Plasmid vector containing HLA-A*33:03:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:29 protein. This plasmid can be used for constructing HLA-A*33:03:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:30 Protein Expression Plasmid Vector	PHLAP9257620	Plasmid vector containing HLA-A*33:03:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:30 protein. This plasmid can be used for constructing HLA-A*33:03:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:31 Protein Expression Plasmid Vector	PHLAP9257621	Plasmid vector containing HLA-A*33:03:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:31 protein. This plasmid can be used for constructing HLA-A*33:03:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:32 Protein Expression Plasmid Vector	PHLAP9257622	Plasmid vector containing HLA-A*33:03:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:32 protein. This plasmid can be used for constructing HLA-A*33:03:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:33 Protein Expression Plasmid Vector	PHLAP9257623	Plasmid vector containing HLA-A*33:03:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:33 protein. This plasmid can be used for constructing HLA-A*33:03:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:34 Protein Expression Plasmid Vector	PHLAP9257624	Plasmid vector containing HLA-A*33:03:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:34 protein. This plasmid can be used for constructing HLA-A*33:03:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:35 Protein Expression Plasmid Vector	PHLAP9257625	Plasmid vector containing HLA-A*33:03:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:35 protein. This plasmid can be used for constructing HLA-A*33:03:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:36 Protein Expression Plasmid Vector	PHLAP9257626	Plasmid vector containing HLA-A*33:03:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:36 protein. This plasmid can be used for constructing HLA-A*33:03:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:37 Protein Expression Plasmid Vector	PHLAP9257627	Plasmid vector containing HLA-A*33:03:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:37 protein. This plasmid can be used for constructing HLA-A*33:03:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:38 Protein Expression Plasmid Vector	PHLAP9257628	Plasmid vector containing HLA-A*33:03:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:38 protein. This plasmid can be used for constructing HLA-A*33:03:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:39 Protein Expression Plasmid Vector	PHLAP9257629	Plasmid vector containing HLA-A*33:03:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:39 protein. This plasmid can be used for constructing HLA-A*33:03:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:40 Protein Expression Plasmid Vector	PHLAP9257630	Plasmid vector containing HLA-A*33:03:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:40 protein. This plasmid can be used for constructing HLA-A*33:03:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:41 Protein Expression Plasmid Vector	PHLAP9257631	Plasmid vector containing HLA-A*33:03:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:41 protein. This plasmid can be used for constructing HLA-A*33:03:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:42 Protein Expression Plasmid Vector	PHLAP9257632	Plasmid vector containing HLA-A*33:03:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:42 protein. This plasmid can be used for constructing HLA-A*33:03:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:43 Protein Expression Plasmid Vector	PHLAP9257633	Plasmid vector containing HLA-A*33:03:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:43 protein. This plasmid can be used for constructing HLA-A*33:03:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:44 Protein Expression Plasmid Vector	PHLAP9257634	Plasmid vector containing HLA-A*33:03:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:44 protein. This plasmid can be used for constructing HLA-A*33:03:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:45 Protein Expression Plasmid Vector	PHLAP9257635	Plasmid vector containing HLA-A*33:03:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:45 protein. This plasmid can be used for constructing HLA-A*33:03:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:46 Protein Expression Plasmid Vector	PHLAP9257636	Plasmid vector containing HLA-A*33:03:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:46 protein. This plasmid can be used for constructing HLA-A*33:03:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:47 Protein Expression Plasmid Vector	PHLAP9257637	Plasmid vector containing HLA-A*33:03:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:47 protein. This plasmid can be used for constructing HLA-A*33:03:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:48 Protein Expression Plasmid Vector	PHLAP9257638	Plasmid vector containing HLA-A*33:03:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:48 protein. This plasmid can be used for constructing HLA-A*33:03:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:49 Protein Expression Plasmid Vector	PHLAP9257639	Plasmid vector containing HLA-A*33:03:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:49 protein. This plasmid can be used for constructing HLA-A*33:03:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:50 Protein Expression Plasmid Vector	PHLAP9257640	Plasmid vector containing HLA-A*33:03:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:50 protein. This plasmid can be used for constructing HLA-A*33:03:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:51 Protein Expression Plasmid Vector	PHLAP9257641	Plasmid vector containing HLA-A*33:03:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:51 protein. This plasmid can be used for constructing HLA-A*33:03:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:52 Protein Expression Plasmid Vector	PHLAP9257642	Plasmid vector containing HLA-A*33:03:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:52 protein. This plasmid can be used for constructing HLA-A*33:03:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:53 Protein Expression Plasmid Vector	PHLAP9257643	Plasmid vector containing HLA-A*33:03:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:53 protein. This plasmid can be used for constructing HLA-A*33:03:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:54 Protein Expression Plasmid Vector	PHLAP9257644	Plasmid vector containing HLA-A*33:03:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:54 protein. This plasmid can be used for constructing HLA-A*33:03:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:55 Protein Expression Plasmid Vector	PHLAP9257645	Plasmid vector containing HLA-A*33:03:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:55 protein. This plasmid can be used for constructing HLA-A*33:03:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:56 Protein Expression Plasmid Vector	PHLAP9257646	Plasmid vector containing HLA-A*33:03:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:56 protein. This plasmid can be used for constructing HLA-A*33:03:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:57 Protein Expression Plasmid Vector	PHLAP9257647	Plasmid vector containing HLA-A*33:03:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:57 protein. This plasmid can be used for constructing HLA-A*33:03:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:58 Protein Expression Plasmid Vector	PHLAP9257648	Plasmid vector containing HLA-A*33:03:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:58 protein. This plasmid can be used for constructing HLA-A*33:03:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:59 Protein Expression Plasmid Vector	PHLAP9257649	Plasmid vector containing HLA-A*33:03:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:59 protein. This plasmid can be used for constructing HLA-A*33:03:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:60 Protein Expression Plasmid Vector	PHLAP9257650	Plasmid vector containing HLA-A*33:03:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:60 protein. This plasmid can be used for constructing HLA-A*33:03:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:61 Protein Expression Plasmid Vector	PHLAP9257651	Plasmid vector containing HLA-A*33:03:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:61 protein. This plasmid can be used for constructing HLA-A*33:03:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:62 Protein Expression Plasmid Vector	PHLAP9257652	Plasmid vector containing HLA-A*33:03:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:62 protein. This plasmid can be used for constructing HLA-A*33:03:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:63 Protein Expression Plasmid Vector	PHLAP9257653	Plasmid vector containing HLA-A*33:03:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:63 protein. This plasmid can be used for constructing HLA-A*33:03:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:64 Protein Expression Plasmid Vector	PHLAP9257654	Plasmid vector containing HLA-A*33:03:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:64 protein. This plasmid can be used for constructing HLA-A*33:03:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:65 Protein Expression Plasmid Vector	PHLAP9257655	Plasmid vector containing HLA-A*33:03:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:65 protein. This plasmid can be used for constructing HLA-A*33:03:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:66 Protein Expression Plasmid Vector	PHLAP9257656	Plasmid vector containing HLA-A*33:03:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:66 protein. This plasmid can be used for constructing HLA-A*33:03:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:67 Protein Expression Plasmid Vector	PHLAP9257657	Plasmid vector containing HLA-A*33:03:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:67 protein. This plasmid can be used for constructing HLA-A*33:03:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:68 Protein Expression Plasmid Vector	PHLAP9257658	Plasmid vector containing HLA-A*33:03:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:68 protein. This plasmid can be used for constructing HLA-A*33:03:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:03:69 Protein Expression Plasmid Vector	PHLAP9257659	Plasmid vector containing HLA-A*33:03:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:69 protein. This plasmid can be used for constructing HLA-A*33:03:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:03:70 Protein Expression Plasmid Vector	PHLAP9257660	Plasmid vector containing HLA-A*33:03:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:03:70 protein. This plasmid can be used for constructing HLA-A*33:03:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:03:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:04 Protein Expression Plasmid Vector	PHLAP9257661	Plasmid vector containing HLA-A*33:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:04 protein. This plasmid can be used for constructing HLA-A*33:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:05 Protein Expression Plasmid Vector	PHLAP9257662	Plasmid vector containing HLA-A*33:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:05 protein. This plasmid can be used for constructing HLA-A*33:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:06 Protein Expression Plasmid Vector	PHLAP9257663	Plasmid vector containing HLA-A*33:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:06 protein. This plasmid can be used for constructing HLA-A*33:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:07 Protein Expression Plasmid Vector	PHLAP9257664	Plasmid vector containing HLA-A*33:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:07 protein. This plasmid can be used for constructing HLA-A*33:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:08 Protein Expression Plasmid Vector	PHLAP9257665	Plasmid vector containing HLA-A*33:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:08 protein. This plasmid can be used for constructing HLA-A*33:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:09 Protein Expression Plasmid Vector	PHLAP9257666	Plasmid vector containing HLA-A*33:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:09 protein. This plasmid can be used for constructing HLA-A*33:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:10 Protein Expression Plasmid Vector	PHLAP9257667	Plasmid vector containing HLA-A*33:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:10 protein. This plasmid can be used for constructing HLA-A*33:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:100 Protein Expression Plasmid Vector	PHLAP9257668	Plasmid vector containing HLA-A*33:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:100 protein. This plasmid can be used for constructing HLA-A*33:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:101 Protein Expression Plasmid Vector	PHLAP9257669	Plasmid vector containing HLA-A*33:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:101 protein. This plasmid can be used for constructing HLA-A*33:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:102 Protein Expression Plasmid Vector	PHLAP9257670	Plasmid vector containing HLA-A*33:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:102 protein. This plasmid can be used for constructing HLA-A*33:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:103 Protein Expression Plasmid Vector	PHLAP9257671	Plasmid vector containing HLA-A*33:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:103 protein. This plasmid can be used for constructing HLA-A*33:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:104 Protein Expression Plasmid Vector	PHLAP9257672	Plasmid vector containing HLA-A*33:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:104 protein. This plasmid can be used for constructing HLA-A*33:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:105 Protein Expression Plasmid Vector	PHLAP9257673	Plasmid vector containing HLA-A*33:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:105 protein. This plasmid can be used for constructing HLA-A*33:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:106 Protein Expression Plasmid Vector	PHLAP9257674	Plasmid vector containing HLA-A*33:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:106 protein. This plasmid can be used for constructing HLA-A*33:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:107 Protein Expression Plasmid Vector	PHLAP9257675	Plasmid vector containing HLA-A*33:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:107 protein. This plasmid can be used for constructing HLA-A*33:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:108 Protein Expression Plasmid Vector	PHLAP9257676	Plasmid vector containing HLA-A*33:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:108 protein. This plasmid can be used for constructing HLA-A*33:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:109 Protein Expression Plasmid Vector	PHLAP9257677	Plasmid vector containing HLA-A*33:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:109 protein. This plasmid can be used for constructing HLA-A*33:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:11 Protein Expression Plasmid Vector	PHLAP9257678	Plasmid vector containing HLA-A*33:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:11 protein. This plasmid can be used for constructing HLA-A*33:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:110 Protein Expression Plasmid Vector	PHLAP9257679	Plasmid vector containing HLA-A*33:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:110 protein. This plasmid can be used for constructing HLA-A*33:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:111 Protein Expression Plasmid Vector	PHLAP9257680	Plasmid vector containing HLA-A*33:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:111 protein. This plasmid can be used for constructing HLA-A*33:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:112 Protein Expression Plasmid Vector	PHLAP9257681	Plasmid vector containing HLA-A*33:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:112 protein. This plasmid can be used for constructing HLA-A*33:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:113 Protein Expression Plasmid Vector	PHLAP9257682	Plasmid vector containing HLA-A*33:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:113 protein. This plasmid can be used for constructing HLA-A*33:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:114 Protein Expression Plasmid Vector	PHLAP9257683	Plasmid vector containing HLA-A*33:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:114 protein. This plasmid can be used for constructing HLA-A*33:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:115 Protein Expression Plasmid Vector	PHLAP9257684	Plasmid vector containing HLA-A*33:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:115 protein. This plasmid can be used for constructing HLA-A*33:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:116 Protein Expression Plasmid Vector	PHLAP9257685	Plasmid vector containing HLA-A*33:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:116 protein. This plasmid can be used for constructing HLA-A*33:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:117 Protein Expression Plasmid Vector	PHLAP9257686	Plasmid vector containing HLA-A*33:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:117 protein. This plasmid can be used for constructing HLA-A*33:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:118 Protein Expression Plasmid Vector	PHLAP9257687	Plasmid vector containing HLA-A*33:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:118 protein. This plasmid can be used for constructing HLA-A*33:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:119 Protein Expression Plasmid Vector	PHLAP9257688	Plasmid vector containing HLA-A*33:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:119 protein. This plasmid can be used for constructing HLA-A*33:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:12 Protein Expression Plasmid Vector	PHLAP9257689	Plasmid vector containing HLA-A*33:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:12 protein. This plasmid can be used for constructing HLA-A*33:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:120 Protein Expression Plasmid Vector	PHLAP9257690	Plasmid vector containing HLA-A*33:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:120 protein. This plasmid can be used for constructing HLA-A*33:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:121 Protein Expression Plasmid Vector	PHLAP9257691	Plasmid vector containing HLA-A*33:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:121 protein. This plasmid can be used for constructing HLA-A*33:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:122 Protein Expression Plasmid Vector	PHLAP9257692	Plasmid vector containing HLA-A*33:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:122 protein. This plasmid can be used for constructing HLA-A*33:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:123N Protein Expression Plasmid Vector	PHLAP9257693	Plasmid vector containing HLA-A*33:123N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:123N protein. This plasmid can be used for constructing HLA-A*33:123N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:123N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:124 Protein Expression Plasmid Vector	PHLAP9257694	Plasmid vector containing HLA-A*33:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:124 protein. This plasmid can be used for constructing HLA-A*33:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:125 Protein Expression Plasmid Vector	PHLAP9257695	Plasmid vector containing HLA-A*33:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:125 protein. This plasmid can be used for constructing HLA-A*33:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:126 Protein Expression Plasmid Vector	PHLAP9257696	Plasmid vector containing HLA-A*33:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:126 protein. This plasmid can be used for constructing HLA-A*33:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:127 Protein Expression Plasmid Vector	PHLAP9257697	Plasmid vector containing HLA-A*33:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:127 protein. This plasmid can be used for constructing HLA-A*33:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:128 Protein Expression Plasmid Vector	PHLAP9257698	Plasmid vector containing HLA-A*33:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:128 protein. This plasmid can be used for constructing HLA-A*33:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:129N Protein Expression Plasmid Vector	PHLAP9257699	Plasmid vector containing HLA-A*33:129N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:129N protein. This plasmid can be used for constructing HLA-A*33:129N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:129N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:13 Protein Expression Plasmid Vector	PHLAP9257700	Plasmid vector containing HLA-A*33:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:13 protein. This plasmid can be used for constructing HLA-A*33:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:130 Protein Expression Plasmid Vector	PHLAP9257701	Plasmid vector containing HLA-A*33:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:130 protein. This plasmid can be used for constructing HLA-A*33:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:131 Protein Expression Plasmid Vector	PHLAP9257702	Plasmid vector containing HLA-A*33:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:131 protein. This plasmid can be used for constructing HLA-A*33:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:132 Protein Expression Plasmid Vector	PHLAP9257703	Plasmid vector containing HLA-A*33:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:132 protein. This plasmid can be used for constructing HLA-A*33:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:133 Protein Expression Plasmid Vector	PHLAP9257704	Plasmid vector containing HLA-A*33:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:133 protein. This plasmid can be used for constructing HLA-A*33:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:134 Protein Expression Plasmid Vector	PHLAP9257705	Plasmid vector containing HLA-A*33:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:134 protein. This plasmid can be used for constructing HLA-A*33:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:135 Protein Expression Plasmid Vector	PHLAP9257706	Plasmid vector containing HLA-A*33:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:135 protein. This plasmid can be used for constructing HLA-A*33:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:136 Protein Expression Plasmid Vector	PHLAP9257707	Plasmid vector containing HLA-A*33:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:136 protein. This plasmid can be used for constructing HLA-A*33:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:137 Protein Expression Plasmid Vector	PHLAP9257708	Plasmid vector containing HLA-A*33:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:137 protein. This plasmid can be used for constructing HLA-A*33:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:138 Protein Expression Plasmid Vector	PHLAP9257709	Plasmid vector containing HLA-A*33:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:138 protein. This plasmid can be used for constructing HLA-A*33:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:139 Protein Expression Plasmid Vector	PHLAP9257710	Plasmid vector containing HLA-A*33:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:139 protein. This plasmid can be used for constructing HLA-A*33:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:14 Protein Expression Plasmid Vector	PHLAP9257711	Plasmid vector containing HLA-A*33:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:14 protein. This plasmid can be used for constructing HLA-A*33:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:140N Protein Expression Plasmid Vector	PHLAP9257712	Plasmid vector containing HLA-A*33:140N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:140N protein. This plasmid can be used for constructing HLA-A*33:140N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:140N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:141 Protein Expression Plasmid Vector	PHLAP9257713	Plasmid vector containing HLA-A*33:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:141 protein. This plasmid can be used for constructing HLA-A*33:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:142 Protein Expression Plasmid Vector	PHLAP9257714	Plasmid vector containing HLA-A*33:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:142 protein. This plasmid can be used for constructing HLA-A*33:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:143N Protein Expression Plasmid Vector	PHLAP9257715	Plasmid vector containing HLA-A*33:143N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:143N protein. This plasmid can be used for constructing HLA-A*33:143N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:143N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:144 Protein Expression Plasmid Vector	PHLAP9257716	Plasmid vector containing HLA-A*33:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:144 protein. This plasmid can be used for constructing HLA-A*33:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:145 Protein Expression Plasmid Vector	PHLAP9257717	Plasmid vector containing HLA-A*33:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:145 protein. This plasmid can be used for constructing HLA-A*33:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:146 Protein Expression Plasmid Vector	PHLAP9257718	Plasmid vector containing HLA-A*33:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:146 protein. This plasmid can be used for constructing HLA-A*33:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:147 Protein Expression Plasmid Vector	PHLAP9257719	Plasmid vector containing HLA-A*33:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:147 protein. This plasmid can be used for constructing HLA-A*33:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:148 Protein Expression Plasmid Vector	PHLAP9257720	Plasmid vector containing HLA-A*33:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:148 protein. This plasmid can be used for constructing HLA-A*33:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:149 Protein Expression Plasmid Vector	PHLAP9257721	Plasmid vector containing HLA-A*33:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:149 protein. This plasmid can be used for constructing HLA-A*33:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:15 Protein Expression Plasmid Vector	PHLAP9257722	Plasmid vector containing HLA-A*33:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:15 protein. This plasmid can be used for constructing HLA-A*33:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:150 Protein Expression Plasmid Vector	PHLAP9257723	Plasmid vector containing HLA-A*33:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:150 protein. This plasmid can be used for constructing HLA-A*33:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:151 Protein Expression Plasmid Vector	PHLAP9257724	Plasmid vector containing HLA-A*33:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:151 protein. This plasmid can be used for constructing HLA-A*33:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:152:01 Protein Expression Plasmid Vector	PHLAP9257725	Plasmid vector containing HLA-A*33:152:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:152:01 protein. This plasmid can be used for constructing HLA-A*33:152:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:152:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:152:02 Protein Expression Plasmid Vector	PHLAP9257726	Plasmid vector containing HLA-A*33:152:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:152:02 protein. This plasmid can be used for constructing HLA-A*33:152:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:152:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:153 Protein Expression Plasmid Vector	PHLAP9257727	Plasmid vector containing HLA-A*33:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:153 protein. This plasmid can be used for constructing HLA-A*33:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:154N Protein Expression Plasmid Vector	PHLAP9257728	Plasmid vector containing HLA-A*33:154N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:154N protein. This plasmid can be used for constructing HLA-A*33:154N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:154N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:155 Protein Expression Plasmid Vector	PHLAP9257729	Plasmid vector containing HLA-A*33:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:155 protein. This plasmid can be used for constructing HLA-A*33:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:156N Protein Expression Plasmid Vector	PHLAP9257730	Plasmid vector containing HLA-A*33:156N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:156N protein. This plasmid can be used for constructing HLA-A*33:156N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:156N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:157N Protein Expression Plasmid Vector	PHLAP9257731	Plasmid vector containing HLA-A*33:157N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:157N protein. This plasmid can be used for constructing HLA-A*33:157N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:157N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:158 Protein Expression Plasmid Vector	PHLAP9257732	Plasmid vector containing HLA-A*33:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:158 protein. This plasmid can be used for constructing HLA-A*33:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:159 Protein Expression Plasmid Vector	PHLAP9257733	Plasmid vector containing HLA-A*33:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:159 protein. This plasmid can be used for constructing HLA-A*33:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:16 Protein Expression Plasmid Vector	PHLAP9257734	Plasmid vector containing HLA-A*33:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:16 protein. This plasmid can be used for constructing HLA-A*33:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:160 Protein Expression Plasmid Vector	PHLAP9257735	Plasmid vector containing HLA-A*33:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:160 protein. This plasmid can be used for constructing HLA-A*33:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:161 Protein Expression Plasmid Vector	PHLAP9257736	Plasmid vector containing HLA-A*33:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:161 protein. This plasmid can be used for constructing HLA-A*33:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:162 Protein Expression Plasmid Vector	PHLAP9257737	Plasmid vector containing HLA-A*33:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:162 protein. This plasmid can be used for constructing HLA-A*33:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:163 Protein Expression Plasmid Vector	PHLAP9257738	Plasmid vector containing HLA-A*33:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:163 protein. This plasmid can be used for constructing HLA-A*33:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:164 Protein Expression Plasmid Vector	PHLAP9257739	Plasmid vector containing HLA-A*33:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:164 protein. This plasmid can be used for constructing HLA-A*33:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:165 Protein Expression Plasmid Vector	PHLAP9257740	Plasmid vector containing HLA-A*33:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:165 protein. This plasmid can be used for constructing HLA-A*33:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:166 Protein Expression Plasmid Vector	PHLAP9257741	Plasmid vector containing HLA-A*33:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:166 protein. This plasmid can be used for constructing HLA-A*33:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:167 Protein Expression Plasmid Vector	PHLAP9257742	Plasmid vector containing HLA-A*33:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:167 protein. This plasmid can be used for constructing HLA-A*33:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:168 Protein Expression Plasmid Vector	PHLAP9257743	Plasmid vector containing HLA-A*33:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:168 protein. This plasmid can be used for constructing HLA-A*33:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:169 Protein Expression Plasmid Vector	PHLAP9257744	Plasmid vector containing HLA-A*33:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:169 protein. This plasmid can be used for constructing HLA-A*33:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:17 Protein Expression Plasmid Vector	PHLAP9257745	Plasmid vector containing HLA-A*33:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:17 protein. This plasmid can be used for constructing HLA-A*33:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:170 Protein Expression Plasmid Vector	PHLAP9257746	Plasmid vector containing HLA-A*33:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:170 protein. This plasmid can be used for constructing HLA-A*33:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:171 Protein Expression Plasmid Vector	PHLAP9257747	Plasmid vector containing HLA-A*33:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:171 protein. This plasmid can be used for constructing HLA-A*33:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:172 Protein Expression Plasmid Vector	PHLAP9257748	Plasmid vector containing HLA-A*33:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:172 protein. This plasmid can be used for constructing HLA-A*33:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:173 Protein Expression Plasmid Vector	PHLAP9257749	Plasmid vector containing HLA-A*33:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:173 protein. This plasmid can be used for constructing HLA-A*33:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:174N Protein Expression Plasmid Vector	PHLAP9257750	Plasmid vector containing HLA-A*33:174N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:174N protein. This plasmid can be used for constructing HLA-A*33:174N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:174N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:175Q Protein Expression Plasmid Vector	PHLAP9257751	Plasmid vector containing HLA-A*33:175Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:175Q protein. This plasmid can be used for constructing HLA-A*33:175Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:175Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:176N Protein Expression Plasmid Vector	PHLAP9257752	Plasmid vector containing HLA-A*33:176N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:176N protein. This plasmid can be used for constructing HLA-A*33:176N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:176N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:177 Protein Expression Plasmid Vector	PHLAP9257753	Plasmid vector containing HLA-A*33:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:177 protein. This plasmid can be used for constructing HLA-A*33:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:178 Protein Expression Plasmid Vector	PHLAP9257754	Plasmid vector containing HLA-A*33:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:178 protein. This plasmid can be used for constructing HLA-A*33:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:179 Protein Expression Plasmid Vector	PHLAP9257755	Plasmid vector containing HLA-A*33:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:179 protein. This plasmid can be used for constructing HLA-A*33:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:18:01 Protein Expression Plasmid Vector	PHLAP9257756	Plasmid vector containing HLA-A*33:18:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:18:01 protein. This plasmid can be used for constructing HLA-A*33:18:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:18:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:18:02 Protein Expression Plasmid Vector	PHLAP9257757	Plasmid vector containing HLA-A*33:18:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:18:02 protein. This plasmid can be used for constructing HLA-A*33:18:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:18:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:180 Protein Expression Plasmid Vector	PHLAP9257758	Plasmid vector containing HLA-A*33:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:180 protein. This plasmid can be used for constructing HLA-A*33:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:181 Protein Expression Plasmid Vector	PHLAP9257759	Plasmid vector containing HLA-A*33:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:181 protein. This plasmid can be used for constructing HLA-A*33:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:182 Protein Expression Plasmid Vector	PHLAP9257760	Plasmid vector containing HLA-A*33:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:182 protein. This plasmid can be used for constructing HLA-A*33:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:183 Protein Expression Plasmid Vector	PHLAP9257761	Plasmid vector containing HLA-A*33:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:183 protein. This plasmid can be used for constructing HLA-A*33:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:184 Protein Expression Plasmid Vector	PHLAP9257762	Plasmid vector containing HLA-A*33:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:184 protein. This plasmid can be used for constructing HLA-A*33:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:185 Protein Expression Plasmid Vector	PHLAP9257763	Plasmid vector containing HLA-A*33:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:185 protein. This plasmid can be used for constructing HLA-A*33:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:186 Protein Expression Plasmid Vector	PHLAP9257764	Plasmid vector containing HLA-A*33:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:186 protein. This plasmid can be used for constructing HLA-A*33:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:187 Protein Expression Plasmid Vector	PHLAP9257765	Plasmid vector containing HLA-A*33:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:187 protein. This plasmid can be used for constructing HLA-A*33:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:188 Protein Expression Plasmid Vector	PHLAP9257766	Plasmid vector containing HLA-A*33:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:188 protein. This plasmid can be used for constructing HLA-A*33:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:189 Protein Expression Plasmid Vector	PHLAP9257767	Plasmid vector containing HLA-A*33:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:189 protein. This plasmid can be used for constructing HLA-A*33:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:19 Protein Expression Plasmid Vector	PHLAP9257768	Plasmid vector containing HLA-A*33:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:19 protein. This plasmid can be used for constructing HLA-A*33:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:190 Protein Expression Plasmid Vector	PHLAP9257769	Plasmid vector containing HLA-A*33:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:190 protein. This plasmid can be used for constructing HLA-A*33:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:191 Protein Expression Plasmid Vector	PHLAP9257770	Plasmid vector containing HLA-A*33:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:191 protein. This plasmid can be used for constructing HLA-A*33:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:192 Protein Expression Plasmid Vector	PHLAP9257771	Plasmid vector containing HLA-A*33:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:192 protein. This plasmid can be used for constructing HLA-A*33:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:193 Protein Expression Plasmid Vector	PHLAP9257772	Plasmid vector containing HLA-A*33:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:193 protein. This plasmid can be used for constructing HLA-A*33:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:194N Protein Expression Plasmid Vector	PHLAP9257773	Plasmid vector containing HLA-A*33:194N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:194N protein. This plasmid can be used for constructing HLA-A*33:194N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:194N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:195 Protein Expression Plasmid Vector	PHLAP9257774	Plasmid vector containing HLA-A*33:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:195 protein. This plasmid can be used for constructing HLA-A*33:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:196 Protein Expression Plasmid Vector	PHLAP9257775	Plasmid vector containing HLA-A*33:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:196 protein. This plasmid can be used for constructing HLA-A*33:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:197 Protein Expression Plasmid Vector	PHLAP9257776	Plasmid vector containing HLA-A*33:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:197 protein. This plasmid can be used for constructing HLA-A*33:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:198N Protein Expression Plasmid Vector	PHLAP9257777	Plasmid vector containing HLA-A*33:198N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:198N protein. This plasmid can be used for constructing HLA-A*33:198N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:198N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:199 Protein Expression Plasmid Vector	PHLAP9257778	Plasmid vector containing HLA-A*33:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:199 protein. This plasmid can be used for constructing HLA-A*33:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:20 Protein Expression Plasmid Vector	PHLAP9257779	Plasmid vector containing HLA-A*33:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:20 protein. This plasmid can be used for constructing HLA-A*33:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:200 Protein Expression Plasmid Vector	PHLAP9257780	Plasmid vector containing HLA-A*33:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:200 protein. This plasmid can be used for constructing HLA-A*33:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:201 Protein Expression Plasmid Vector	PHLAP9257781	Plasmid vector containing HLA-A*33:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:201 protein. This plasmid can be used for constructing HLA-A*33:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:202 Protein Expression Plasmid Vector	PHLAP9257782	Plasmid vector containing HLA-A*33:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:202 protein. This plasmid can be used for constructing HLA-A*33:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:203 Protein Expression Plasmid Vector	PHLAP9257783	Plasmid vector containing HLA-A*33:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:203 protein. This plasmid can be used for constructing HLA-A*33:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:204 Protein Expression Plasmid Vector	PHLAP9257784	Plasmid vector containing HLA-A*33:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:204 protein. This plasmid can be used for constructing HLA-A*33:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:205 Protein Expression Plasmid Vector	PHLAP9257785	Plasmid vector containing HLA-A*33:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:205 protein. This plasmid can be used for constructing HLA-A*33:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:206 Protein Expression Plasmid Vector	PHLAP9257786	Plasmid vector containing HLA-A*33:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:206 protein. This plasmid can be used for constructing HLA-A*33:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:207 Protein Expression Plasmid Vector	PHLAP9257787	Plasmid vector containing HLA-A*33:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:207 protein. This plasmid can be used for constructing HLA-A*33:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:208 Protein Expression Plasmid Vector	PHLAP9257788	Plasmid vector containing HLA-A*33:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:208 protein. This plasmid can be used for constructing HLA-A*33:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:209 Protein Expression Plasmid Vector	PHLAP9257789	Plasmid vector containing HLA-A*33:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:209 protein. This plasmid can be used for constructing HLA-A*33:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:21 Protein Expression Plasmid Vector	PHLAP9257790	Plasmid vector containing HLA-A*33:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:21 protein. This plasmid can be used for constructing HLA-A*33:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:210 Protein Expression Plasmid Vector	PHLAP9257791	Plasmid vector containing HLA-A*33:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:210 protein. This plasmid can be used for constructing HLA-A*33:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:211 Protein Expression Plasmid Vector	PHLAP9257792	Plasmid vector containing HLA-A*33:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:211 protein. This plasmid can be used for constructing HLA-A*33:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:212 Protein Expression Plasmid Vector	PHLAP9257793	Plasmid vector containing HLA-A*33:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:212 protein. This plasmid can be used for constructing HLA-A*33:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:213N Protein Expression Plasmid Vector	PHLAP9257794	Plasmid vector containing HLA-A*33:213N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:213N protein. This plasmid can be used for constructing HLA-A*33:213N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:213N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:214 Protein Expression Plasmid Vector	PHLAP9257795	Plasmid vector containing HLA-A*33:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:214 protein. This plasmid can be used for constructing HLA-A*33:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:215 Protein Expression Plasmid Vector	PHLAP9257796	Plasmid vector containing HLA-A*33:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:215 protein. This plasmid can be used for constructing HLA-A*33:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:216 Protein Expression Plasmid Vector	PHLAP9257797	Plasmid vector containing HLA-A*33:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:216 protein. This plasmid can be used for constructing HLA-A*33:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:217 Protein Expression Plasmid Vector	PHLAP9257798	Plasmid vector containing HLA-A*33:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:217 protein. This plasmid can be used for constructing HLA-A*33:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:218 Protein Expression Plasmid Vector	PHLAP9257799	Plasmid vector containing HLA-A*33:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:218 protein. This plasmid can be used for constructing HLA-A*33:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:219 Protein Expression Plasmid Vector	PHLAP9257800	Plasmid vector containing HLA-A*33:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:219 protein. This plasmid can be used for constructing HLA-A*33:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:22 Protein Expression Plasmid Vector	PHLAP9257801	Plasmid vector containing HLA-A*33:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:22 protein. This plasmid can be used for constructing HLA-A*33:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:220 Protein Expression Plasmid Vector	PHLAP9257802	Plasmid vector containing HLA-A*33:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:220 protein. This plasmid can be used for constructing HLA-A*33:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:221 Protein Expression Plasmid Vector	PHLAP9257803	Plasmid vector containing HLA-A*33:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:221 protein. This plasmid can be used for constructing HLA-A*33:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:222 Protein Expression Plasmid Vector	PHLAP9257804	Plasmid vector containing HLA-A*33:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:222 protein. This plasmid can be used for constructing HLA-A*33:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:223 Protein Expression Plasmid Vector	PHLAP9257805	Plasmid vector containing HLA-A*33:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:223 protein. This plasmid can be used for constructing HLA-A*33:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:224 Protein Expression Plasmid Vector	PHLAP9257806	Plasmid vector containing HLA-A*33:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:224 protein. This plasmid can be used for constructing HLA-A*33:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:225 Protein Expression Plasmid Vector	PHLAP9257807	Plasmid vector containing HLA-A*33:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:225 protein. This plasmid can be used for constructing HLA-A*33:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:226 Protein Expression Plasmid Vector	PHLAP9257808	Plasmid vector containing HLA-A*33:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:226 protein. This plasmid can be used for constructing HLA-A*33:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:227 Protein Expression Plasmid Vector	PHLAP9257809	Plasmid vector containing HLA-A*33:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:227 protein. This plasmid can be used for constructing HLA-A*33:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:228 Protein Expression Plasmid Vector	PHLAP9257810	Plasmid vector containing HLA-A*33:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:228 protein. This plasmid can be used for constructing HLA-A*33:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:229N Protein Expression Plasmid Vector	PHLAP9257811	Plasmid vector containing HLA-A*33:229N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:229N protein. This plasmid can be used for constructing HLA-A*33:229N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:229N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:23 Protein Expression Plasmid Vector	PHLAP9257812	Plasmid vector containing HLA-A*33:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:23 protein. This plasmid can be used for constructing HLA-A*33:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:230N Protein Expression Plasmid Vector	PHLAP9257813	Plasmid vector containing HLA-A*33:230N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:230N protein. This plasmid can be used for constructing HLA-A*33:230N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:230N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:231 Protein Expression Plasmid Vector	PHLAP9257814	Plasmid vector containing HLA-A*33:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:231 protein. This plasmid can be used for constructing HLA-A*33:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:232 Protein Expression Plasmid Vector	PHLAP9257815	Plasmid vector containing HLA-A*33:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:232 protein. This plasmid can be used for constructing HLA-A*33:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:233 Protein Expression Plasmid Vector	PHLAP9257816	Plasmid vector containing HLA-A*33:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:233 protein. This plasmid can be used for constructing HLA-A*33:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:234 Protein Expression Plasmid Vector	PHLAP9257817	Plasmid vector containing HLA-A*33:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:234 protein. This plasmid can be used for constructing HLA-A*33:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:235 Protein Expression Plasmid Vector	PHLAP9257818	Plasmid vector containing HLA-A*33:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:235 protein. This plasmid can be used for constructing HLA-A*33:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:236 Protein Expression Plasmid Vector	PHLAP9257819	Plasmid vector containing HLA-A*33:236 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:236 protein. This plasmid can be used for constructing HLA-A*33:236 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:236 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:237 Protein Expression Plasmid Vector	PHLAP9257820	Plasmid vector containing HLA-A*33:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:237 protein. This plasmid can be used for constructing HLA-A*33:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:238 Protein Expression Plasmid Vector	PHLAP9257821	Plasmid vector containing HLA-A*33:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:238 protein. This plasmid can be used for constructing HLA-A*33:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:239Q Protein Expression Plasmid Vector	PHLAP9257822	Plasmid vector containing HLA-A*33:239Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:239Q protein. This plasmid can be used for constructing HLA-A*33:239Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:239Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:24 Protein Expression Plasmid Vector	PHLAP9257823	Plasmid vector containing HLA-A*33:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:24 protein. This plasmid can be used for constructing HLA-A*33:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:240 Protein Expression Plasmid Vector	PHLAP9257824	Plasmid vector containing HLA-A*33:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:240 protein. This plasmid can be used for constructing HLA-A*33:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:241 Protein Expression Plasmid Vector	PHLAP9257825	Plasmid vector containing HLA-A*33:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:241 protein. This plasmid can be used for constructing HLA-A*33:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:242:01:01 Protein Expression Plasmid Vector	PHLAP9257826	Plasmid vector containing HLA-A*33:242:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:242:01:01 protein. This plasmid can be used for constructing HLA-A*33:242:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:242:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:242:01:02 Protein Expression Plasmid Vector	PHLAP9257827	Plasmid vector containing HLA-A*33:242:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:242:01:02 protein. This plasmid can be used for constructing HLA-A*33:242:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:242:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:243 Protein Expression Plasmid Vector	PHLAP9257828	Plasmid vector containing HLA-A*33:243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:243 protein. This plasmid can be used for constructing HLA-A*33:243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:244 Protein Expression Plasmid Vector	PHLAP9257829	Plasmid vector containing HLA-A*33:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:244 protein. This plasmid can be used for constructing HLA-A*33:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:245 Protein Expression Plasmid Vector	PHLAP9257830	Plasmid vector containing HLA-A*33:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:245 protein. This plasmid can be used for constructing HLA-A*33:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:246 Protein Expression Plasmid Vector	PHLAP9257831	Plasmid vector containing HLA-A*33:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:246 protein. This plasmid can be used for constructing HLA-A*33:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:247 Protein Expression Plasmid Vector	PHLAP9257832	Plasmid vector containing HLA-A*33:247 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:247 protein. This plasmid can be used for constructing HLA-A*33:247 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:247 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:248N Protein Expression Plasmid Vector	PHLAP9257833	Plasmid vector containing HLA-A*33:248N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:248N protein. This plasmid can be used for constructing HLA-A*33:248N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:248N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:249 Protein Expression Plasmid Vector	PHLAP9257834	Plasmid vector containing HLA-A*33:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:249 protein. This plasmid can be used for constructing HLA-A*33:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:25 Protein Expression Plasmid Vector	PHLAP9257835	Plasmid vector containing HLA-A*33:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:25 protein. This plasmid can be used for constructing HLA-A*33:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:250 Protein Expression Plasmid Vector	PHLAP9257836	Plasmid vector containing HLA-A*33:250 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:250 protein. This plasmid can be used for constructing HLA-A*33:250 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:250 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:251 Protein Expression Plasmid Vector	PHLAP9257837	Plasmid vector containing HLA-A*33:251 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:251 protein. This plasmid can be used for constructing HLA-A*33:251 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:251 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:252 Protein Expression Plasmid Vector	PHLAP9257838	Plasmid vector containing HLA-A*33:252 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:252 protein. This plasmid can be used for constructing HLA-A*33:252 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:252 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:253 Protein Expression Plasmid Vector	PHLAP9257839	Plasmid vector containing HLA-A*33:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:253 protein. This plasmid can be used for constructing HLA-A*33:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:254 Protein Expression Plasmid Vector	PHLAP9257840	Plasmid vector containing HLA-A*33:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:254 protein. This plasmid can be used for constructing HLA-A*33:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:255 Protein Expression Plasmid Vector	PHLAP9257841	Plasmid vector containing HLA-A*33:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:255 protein. This plasmid can be used for constructing HLA-A*33:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:256 Protein Expression Plasmid Vector	PHLAP9257842	Plasmid vector containing HLA-A*33:256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:256 protein. This plasmid can be used for constructing HLA-A*33:256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:257 Protein Expression Plasmid Vector	PHLAP9257843	Plasmid vector containing HLA-A*33:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:257 protein. This plasmid can be used for constructing HLA-A*33:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:258N Protein Expression Plasmid Vector	PHLAP9257844	Plasmid vector containing HLA-A*33:258N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:258N protein. This plasmid can be used for constructing HLA-A*33:258N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:258N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:259 Protein Expression Plasmid Vector	PHLAP9257845	Plasmid vector containing HLA-A*33:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:259 protein. This plasmid can be used for constructing HLA-A*33:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:26 Protein Expression Plasmid Vector	PHLAP9257846	Plasmid vector containing HLA-A*33:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:26 protein. This plasmid can be used for constructing HLA-A*33:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:260 Protein Expression Plasmid Vector	PHLAP9257847	Plasmid vector containing HLA-A*33:260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:260 protein. This plasmid can be used for constructing HLA-A*33:260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:261N Protein Expression Plasmid Vector	PHLAP9257848	Plasmid vector containing HLA-A*33:261N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:261N protein. This plasmid can be used for constructing HLA-A*33:261N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:261N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:262 Protein Expression Plasmid Vector	PHLAP9257849	Plasmid vector containing HLA-A*33:262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:262 protein. This plasmid can be used for constructing HLA-A*33:262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:263 Protein Expression Plasmid Vector	PHLAP9257850	Plasmid vector containing HLA-A*33:263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:263 protein. This plasmid can be used for constructing HLA-A*33:263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:264 Protein Expression Plasmid Vector	PHLAP9257851	Plasmid vector containing HLA-A*33:264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:264 protein. This plasmid can be used for constructing HLA-A*33:264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:265 Protein Expression Plasmid Vector	PHLAP9257852	Plasmid vector containing HLA-A*33:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:265 protein. This plasmid can be used for constructing HLA-A*33:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:266N Protein Expression Plasmid Vector	PHLAP9257853	Plasmid vector containing HLA-A*33:266N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:266N protein. This plasmid can be used for constructing HLA-A*33:266N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:266N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:267 Protein Expression Plasmid Vector	PHLAP9257854	Plasmid vector containing HLA-A*33:267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:267 protein. This plasmid can be used for constructing HLA-A*33:267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:268 Protein Expression Plasmid Vector	PHLAP9257855	Plasmid vector containing HLA-A*33:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:268 protein. This plasmid can be used for constructing HLA-A*33:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:269 Protein Expression Plasmid Vector	PHLAP9257856	Plasmid vector containing HLA-A*33:269 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:269 protein. This plasmid can be used for constructing HLA-A*33:269 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:269 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:27 Protein Expression Plasmid Vector	PHLAP9257857	Plasmid vector containing HLA-A*33:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:27 protein. This plasmid can be used for constructing HLA-A*33:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:270 Protein Expression Plasmid Vector	PHLAP9257858	Plasmid vector containing HLA-A*33:270 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:270 protein. This plasmid can be used for constructing HLA-A*33:270 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:270 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:271 Protein Expression Plasmid Vector	PHLAP9257859	Plasmid vector containing HLA-A*33:271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:271 protein. This plasmid can be used for constructing HLA-A*33:271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:272 Protein Expression Plasmid Vector	PHLAP9257860	Plasmid vector containing HLA-A*33:272 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:272 protein. This plasmid can be used for constructing HLA-A*33:272 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:272 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:273Q Protein Expression Plasmid Vector	PHLAP9257861	Plasmid vector containing HLA-A*33:273Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:273Q protein. This plasmid can be used for constructing HLA-A*33:273Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:273Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:274 Protein Expression Plasmid Vector	PHLAP9257862	Plasmid vector containing HLA-A*33:274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:274 protein. This plasmid can be used for constructing HLA-A*33:274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:275 Protein Expression Plasmid Vector	PHLAP9257863	Plasmid vector containing HLA-A*33:275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:275 protein. This plasmid can be used for constructing HLA-A*33:275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:276 Protein Expression Plasmid Vector	PHLAP9257864	Plasmid vector containing HLA-A*33:276 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:276 protein. This plasmid can be used for constructing HLA-A*33:276 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:276 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:277N Protein Expression Plasmid Vector	PHLAP9257865	Plasmid vector containing HLA-A*33:277N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:277N protein. This plasmid can be used for constructing HLA-A*33:277N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:277N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:278 Protein Expression Plasmid Vector	PHLAP9257866	Plasmid vector containing HLA-A*33:278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:278 protein. This plasmid can be used for constructing HLA-A*33:278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:279 Protein Expression Plasmid Vector	PHLAP9257867	Plasmid vector containing HLA-A*33:279 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:279 protein. This plasmid can be used for constructing HLA-A*33:279 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:279 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:28 Protein Expression Plasmid Vector	PHLAP9257868	Plasmid vector containing HLA-A*33:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:28 protein. This plasmid can be used for constructing HLA-A*33:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:280 Protein Expression Plasmid Vector	PHLAP9257869	Plasmid vector containing HLA-A*33:280 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:280 protein. This plasmid can be used for constructing HLA-A*33:280 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:280 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:281 Protein Expression Plasmid Vector	PHLAP9257870	Plasmid vector containing HLA-A*33:281 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:281 protein. This plasmid can be used for constructing HLA-A*33:281 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:281 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:282N Protein Expression Plasmid Vector	PHLAP9257871	Plasmid vector containing HLA-A*33:282N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:282N protein. This plasmid can be used for constructing HLA-A*33:282N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:282N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:283 Protein Expression Plasmid Vector	PHLAP9257872	Plasmid vector containing HLA-A*33:283 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:283 protein. This plasmid can be used for constructing HLA-A*33:283 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:283 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:29 Protein Expression Plasmid Vector	PHLAP9257873	Plasmid vector containing HLA-A*33:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:29 protein. This plasmid can be used for constructing HLA-A*33:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:30 Protein Expression Plasmid Vector	PHLAP9257874	Plasmid vector containing HLA-A*33:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:30 protein. This plasmid can be used for constructing HLA-A*33:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:31 Protein Expression Plasmid Vector	PHLAP9257875	Plasmid vector containing HLA-A*33:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:31 protein. This plasmid can be used for constructing HLA-A*33:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:32:01 Protein Expression Plasmid Vector	PHLAP9257876	Plasmid vector containing HLA-A*33:32:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:32:01 protein. This plasmid can be used for constructing HLA-A*33:32:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:32:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:32:02 Protein Expression Plasmid Vector	PHLAP9257877	Plasmid vector containing HLA-A*33:32:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:32:02 protein. This plasmid can be used for constructing HLA-A*33:32:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:32:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:33:01 Protein Expression Plasmid Vector	PHLAP9257878	Plasmid vector containing HLA-A*33:33:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:33:01 protein. This plasmid can be used for constructing HLA-A*33:33:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:33:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:33:02 Protein Expression Plasmid Vector	PHLAP9257879	Plasmid vector containing HLA-A*33:33:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:33:02 protein. This plasmid can be used for constructing HLA-A*33:33:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:33:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:34 Protein Expression Plasmid Vector	PHLAP9257880	Plasmid vector containing HLA-A*33:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:34 protein. This plasmid can be used for constructing HLA-A*33:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:35 Protein Expression Plasmid Vector	PHLAP9257881	Plasmid vector containing HLA-A*33:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:35 protein. This plasmid can be used for constructing HLA-A*33:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:36 Protein Expression Plasmid Vector	PHLAP9257882	Plasmid vector containing HLA-A*33:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:36 protein. This plasmid can be used for constructing HLA-A*33:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:37 Protein Expression Plasmid Vector	PHLAP9257883	Plasmid vector containing HLA-A*33:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:37 protein. This plasmid can be used for constructing HLA-A*33:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:38 Protein Expression Plasmid Vector	PHLAP9257884	Plasmid vector containing HLA-A*33:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:38 protein. This plasmid can be used for constructing HLA-A*33:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:39 Protein Expression Plasmid Vector	PHLAP9257885	Plasmid vector containing HLA-A*33:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:39 protein. This plasmid can be used for constructing HLA-A*33:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:40:01 Protein Expression Plasmid Vector	PHLAP9257886	Plasmid vector containing HLA-A*33:40:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:40:01 protein. This plasmid can be used for constructing HLA-A*33:40:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:40:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:40:02 Protein Expression Plasmid Vector	PHLAP9257887	Plasmid vector containing HLA-A*33:40:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:40:02 protein. This plasmid can be used for constructing HLA-A*33:40:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:40:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:41 Protein Expression Plasmid Vector	PHLAP9257888	Plasmid vector containing HLA-A*33:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:41 protein. This plasmid can be used for constructing HLA-A*33:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:42 Protein Expression Plasmid Vector	PHLAP9257889	Plasmid vector containing HLA-A*33:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:42 protein. This plasmid can be used for constructing HLA-A*33:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:43 Protein Expression Plasmid Vector	PHLAP9257890	Plasmid vector containing HLA-A*33:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:43 protein. This plasmid can be used for constructing HLA-A*33:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:44 Protein Expression Plasmid Vector	PHLAP9257891	Plasmid vector containing HLA-A*33:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:44 protein. This plasmid can be used for constructing HLA-A*33:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:45 Protein Expression Plasmid Vector	PHLAP9257892	Plasmid vector containing HLA-A*33:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:45 protein. This plasmid can be used for constructing HLA-A*33:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:46 Protein Expression Plasmid Vector	PHLAP9257893	Plasmid vector containing HLA-A*33:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:46 protein. This plasmid can be used for constructing HLA-A*33:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:47 Protein Expression Plasmid Vector	PHLAP9257894	Plasmid vector containing HLA-A*33:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:47 protein. This plasmid can be used for constructing HLA-A*33:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:48 Protein Expression Plasmid Vector	PHLAP9257895	Plasmid vector containing HLA-A*33:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:48 protein. This plasmid can be used for constructing HLA-A*33:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:49 Protein Expression Plasmid Vector	PHLAP9257896	Plasmid vector containing HLA-A*33:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:49 protein. This plasmid can be used for constructing HLA-A*33:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:50 Protein Expression Plasmid Vector	PHLAP9257897	Plasmid vector containing HLA-A*33:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:50 protein. This plasmid can be used for constructing HLA-A*33:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:51 Protein Expression Plasmid Vector	PHLAP9257898	Plasmid vector containing HLA-A*33:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:51 protein. This plasmid can be used for constructing HLA-A*33:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:52 Protein Expression Plasmid Vector	PHLAP9257899	Plasmid vector containing HLA-A*33:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:52 protein. This plasmid can be used for constructing HLA-A*33:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:53 Protein Expression Plasmid Vector	PHLAP9257900	Plasmid vector containing HLA-A*33:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:53 protein. This plasmid can be used for constructing HLA-A*33:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:54 Protein Expression Plasmid Vector	PHLAP9257901	Plasmid vector containing HLA-A*33:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:54 protein. This plasmid can be used for constructing HLA-A*33:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:55 Protein Expression Plasmid Vector	PHLAP9257902	Plasmid vector containing HLA-A*33:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:55 protein. This plasmid can be used for constructing HLA-A*33:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:56 Protein Expression Plasmid Vector	PHLAP9257903	Plasmid vector containing HLA-A*33:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:56 protein. This plasmid can be used for constructing HLA-A*33:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:57 Protein Expression Plasmid Vector	PHLAP9257904	Plasmid vector containing HLA-A*33:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:57 protein. This plasmid can be used for constructing HLA-A*33:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:58 Protein Expression Plasmid Vector	PHLAP9257905	Plasmid vector containing HLA-A*33:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:58 protein. This plasmid can be used for constructing HLA-A*33:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:59 Protein Expression Plasmid Vector	PHLAP9257906	Plasmid vector containing HLA-A*33:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:59 protein. This plasmid can be used for constructing HLA-A*33:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:60 Protein Expression Plasmid Vector	PHLAP9257907	Plasmid vector containing HLA-A*33:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:60 protein. This plasmid can be used for constructing HLA-A*33:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:61 Protein Expression Plasmid Vector	PHLAP9257908	Plasmid vector containing HLA-A*33:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:61 protein. This plasmid can be used for constructing HLA-A*33:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:62 Protein Expression Plasmid Vector	PHLAP9257909	Plasmid vector containing HLA-A*33:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:62 protein. This plasmid can be used for constructing HLA-A*33:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:63 Protein Expression Plasmid Vector	PHLAP9257910	Plasmid vector containing HLA-A*33:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:63 protein. This plasmid can be used for constructing HLA-A*33:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:64 Protein Expression Plasmid Vector	PHLAP9257911	Plasmid vector containing HLA-A*33:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:64 protein. This plasmid can be used for constructing HLA-A*33:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:65 Protein Expression Plasmid Vector	PHLAP9257912	Plasmid vector containing HLA-A*33:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:65 protein. This plasmid can be used for constructing HLA-A*33:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:66 Protein Expression Plasmid Vector	PHLAP9257913	Plasmid vector containing HLA-A*33:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:66 protein. This plasmid can be used for constructing HLA-A*33:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:67 Protein Expression Plasmid Vector	PHLAP9257914	Plasmid vector containing HLA-A*33:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:67 protein. This plasmid can be used for constructing HLA-A*33:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:68 Protein Expression Plasmid Vector	PHLAP9257915	Plasmid vector containing HLA-A*33:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:68 protein. This plasmid can be used for constructing HLA-A*33:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:69 Protein Expression Plasmid Vector	PHLAP9257916	Plasmid vector containing HLA-A*33:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:69 protein. This plasmid can be used for constructing HLA-A*33:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:70:01 Protein Expression Plasmid Vector	PHLAP9257917	Plasmid vector containing HLA-A*33:70:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:70:01 protein. This plasmid can be used for constructing HLA-A*33:70:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:70:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:70:02 Protein Expression Plasmid Vector	PHLAP9257918	Plasmid vector containing HLA-A*33:70:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:70:02 protein. This plasmid can be used for constructing HLA-A*33:70:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:70:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:71 Protein Expression Plasmid Vector	PHLAP9257919	Plasmid vector containing HLA-A*33:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:71 protein. This plasmid can be used for constructing HLA-A*33:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:72 Protein Expression Plasmid Vector	PHLAP9257920	Plasmid vector containing HLA-A*33:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:72 protein. This plasmid can be used for constructing HLA-A*33:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:73N Protein Expression Plasmid Vector	PHLAP9257921	Plasmid vector containing HLA-A*33:73N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:73N protein. This plasmid can be used for constructing HLA-A*33:73N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:73N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:74N Protein Expression Plasmid Vector	PHLAP9257922	Plasmid vector containing HLA-A*33:74N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:74N protein. This plasmid can be used for constructing HLA-A*33:74N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:74N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:75 Protein Expression Plasmid Vector	PHLAP9257923	Plasmid vector containing HLA-A*33:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:75 protein. This plasmid can be used for constructing HLA-A*33:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:76 Protein Expression Plasmid Vector	PHLAP9257924	Plasmid vector containing HLA-A*33:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:76 protein. This plasmid can be used for constructing HLA-A*33:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:77 Protein Expression Plasmid Vector	PHLAP9257925	Plasmid vector containing HLA-A*33:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:77 protein. This plasmid can be used for constructing HLA-A*33:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:78 Protein Expression Plasmid Vector	PHLAP9257926	Plasmid vector containing HLA-A*33:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:78 protein. This plasmid can be used for constructing HLA-A*33:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:79 Protein Expression Plasmid Vector	PHLAP9257927	Plasmid vector containing HLA-A*33:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:79 protein. This plasmid can be used for constructing HLA-A*33:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:80N Protein Expression Plasmid Vector	PHLAP9257928	Plasmid vector containing HLA-A*33:80N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:80N protein. This plasmid can be used for constructing HLA-A*33:80N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:80N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:81 Protein Expression Plasmid Vector	PHLAP9257929	Plasmid vector containing HLA-A*33:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:81 protein. This plasmid can be used for constructing HLA-A*33:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:82 Protein Expression Plasmid Vector	PHLAP9257930	Plasmid vector containing HLA-A*33:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:82 protein. This plasmid can be used for constructing HLA-A*33:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:83 Protein Expression Plasmid Vector	PHLAP9257931	Plasmid vector containing HLA-A*33:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:83 protein. This plasmid can be used for constructing HLA-A*33:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:84 Protein Expression Plasmid Vector	PHLAP9257932	Plasmid vector containing HLA-A*33:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:84 protein. This plasmid can be used for constructing HLA-A*33:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:85 Protein Expression Plasmid Vector	PHLAP9257933	Plasmid vector containing HLA-A*33:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:85 protein. This plasmid can be used for constructing HLA-A*33:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:86 Protein Expression Plasmid Vector	PHLAP9257934	Plasmid vector containing HLA-A*33:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:86 protein. This plasmid can be used for constructing HLA-A*33:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:87 Protein Expression Plasmid Vector	PHLAP9257935	Plasmid vector containing HLA-A*33:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:87 protein. This plasmid can be used for constructing HLA-A*33:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:88 Protein Expression Plasmid Vector	PHLAP9257936	Plasmid vector containing HLA-A*33:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:88 protein. This plasmid can be used for constructing HLA-A*33:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:89 Protein Expression Plasmid Vector	PHLAP9257937	Plasmid vector containing HLA-A*33:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:89 protein. This plasmid can be used for constructing HLA-A*33:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:90 Protein Expression Plasmid Vector	PHLAP9257938	Plasmid vector containing HLA-A*33:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:90 protein. This plasmid can be used for constructing HLA-A*33:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:91 Protein Expression Plasmid Vector	PHLAP9257939	Plasmid vector containing HLA-A*33:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:91 protein. This plasmid can be used for constructing HLA-A*33:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*33:92 Protein Expression Plasmid Vector	PHLAP9257940	Plasmid vector containing HLA-A*33:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:92 protein. This plasmid can be used for constructing HLA-A*33:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:93 Protein Expression Plasmid Vector	PHLAP9257941	Plasmid vector containing HLA-A*33:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:93 protein. This plasmid can be used for constructing HLA-A*33:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:94 Protein Expression Plasmid Vector	PHLAP9257942	Plasmid vector containing HLA-A*33:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:94 protein. This plasmid can be used for constructing HLA-A*33:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:95 Protein Expression Plasmid Vector	PHLAP9257943	Plasmid vector containing HLA-A*33:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:95 protein. This plasmid can be used for constructing HLA-A*33:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:96N Protein Expression Plasmid Vector	PHLAP9257944	Plasmid vector containing HLA-A*33:96N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:96N protein. This plasmid can be used for constructing HLA-A*33:96N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:96N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:97 Protein Expression Plasmid Vector	PHLAP9257945	Plasmid vector containing HLA-A*33:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:97 protein. This plasmid can be used for constructing HLA-A*33:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:98 Protein Expression Plasmid Vector	PHLAP9257946	Plasmid vector containing HLA-A*33:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:98 protein. This plasmid can be used for constructing HLA-A*33:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*33:99 Protein Expression Plasmid Vector	PHLAP9257947	Plasmid vector containing HLA-A*33:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*33:99 protein. This plasmid can be used for constructing HLA-A*33:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*33:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*3302 Protein Expression Plasmid Vector	PHLAP9257948	Plasmid vector containing HLA-A*3302 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*3302 protein. This plasmid can be used for constructing HLA-A*3302 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*3302 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:01:01:01 Protein Expression Plasmid Vector	PHLAP9257949	Plasmid vector containing HLA-A*34:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:01:01:01 protein. This plasmid can be used for constructing HLA-A*34:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:01:01:02 Protein Expression Plasmid Vector	PHLAP9257950	Plasmid vector containing HLA-A*34:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:01:01:02 protein. This plasmid can be used for constructing HLA-A*34:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:01:01:03 Protein Expression Plasmid Vector	PHLAP9257951	Plasmid vector containing HLA-A*34:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:01:01:03 protein. This plasmid can be used for constructing HLA-A*34:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:01:01:04 Protein Expression Plasmid Vector	PHLAP9257952	Plasmid vector containing HLA-A*34:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:01:01:04 protein. This plasmid can be used for constructing HLA-A*34:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:01:02 Protein Expression Plasmid Vector	PHLAP9257953	Plasmid vector containing HLA-A*34:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:01:02 protein. This plasmid can be used for constructing HLA-A*34:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:01:03 Protein Expression Plasmid Vector	PHLAP9257954	Plasmid vector containing HLA-A*34:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:01:03 protein. This plasmid can be used for constructing HLA-A*34:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*34:01:04 Protein Expression Plasmid Vector	PHLAP9257955	Plasmid vector containing HLA-A*34:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:01:04 protein. This plasmid can be used for constructing HLA-A*34:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:01:05 Protein Expression Plasmid Vector	PHLAP9257956	Plasmid vector containing HLA-A*34:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:01:05 protein. This plasmid can be used for constructing HLA-A*34:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:01:06Q Protein Expression Plasmid Vector	PHLAP9257957	Plasmid vector containing HLA-A*34:01:06Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:01:06Q protein. This plasmid can be used for constructing HLA-A*34:01:06Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:01:06Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:01:07 Protein Expression Plasmid Vector	PHLAP9257958	Plasmid vector containing HLA-A*34:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:01:07 protein. This plasmid can be used for constructing HLA-A*34:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:01:01 Protein Expression Plasmid Vector	PHLAP9257959	Plasmid vector containing HLA-A*34:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:01:01 protein. This plasmid can be used for constructing HLA-A*34:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:01:02 Protein Expression Plasmid Vector	PHLAP9257960	Plasmid vector containing HLA-A*34:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:01:02 protein. This plasmid can be used for constructing HLA-A*34:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:01:03 Protein Expression Plasmid Vector	PHLAP9257961	Plasmid vector containing HLA-A*34:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:01:03 protein. This plasmid can be used for constructing HLA-A*34:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*34:02:01:04 Protein Expression Plasmid Vector	PHLAP9257962	Plasmid vector containing HLA-A*34:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:01:04 protein. This plasmid can be used for constructing HLA-A*34:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:01:05 Protein Expression Plasmid Vector	PHLAP9257963	Plasmid vector containing HLA-A*34:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:01:05 protein. This plasmid can be used for constructing HLA-A*34:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:01:06 Protein Expression Plasmid Vector	PHLAP9257964	Plasmid vector containing HLA-A*34:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:01:06 protein. This plasmid can be used for constructing HLA-A*34:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:01:07 Protein Expression Plasmid Vector	PHLAP9257965	Plasmid vector containing HLA-A*34:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:01:07 protein. This plasmid can be used for constructing HLA-A*34:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:01:08 Protein Expression Plasmid Vector	PHLAP9257966	Plasmid vector containing HLA-A*34:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:01:08 protein. This plasmid can be used for constructing HLA-A*34:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:02 Protein Expression Plasmid Vector	PHLAP9257967	Plasmid vector containing HLA-A*34:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:02 protein. This plasmid can be used for constructing HLA-A*34:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:03 Protein Expression Plasmid Vector	PHLAP9257968	Plasmid vector containing HLA-A*34:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:03 protein. This plasmid can be used for constructing HLA-A*34:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*34:02:04 Protein Expression Plasmid Vector	PHLAP9257969	Plasmid vector containing HLA-A*34:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:04 protein. This plasmid can be used for constructing HLA-A*34:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:05 Protein Expression Plasmid Vector	PHLAP9257970	Plasmid vector containing HLA-A*34:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:05 protein. This plasmid can be used for constructing HLA-A*34:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:06 Protein Expression Plasmid Vector	PHLAP9257971	Plasmid vector containing HLA-A*34:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:06 protein. This plasmid can be used for constructing HLA-A*34:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:07 Protein Expression Plasmid Vector	PHLAP9257972	Plasmid vector containing HLA-A*34:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:07 protein. This plasmid can be used for constructing HLA-A*34:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:02:08 Protein Expression Plasmid Vector	PHLAP9257973	Plasmid vector containing HLA-A*34:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:02:08 protein. This plasmid can be used for constructing HLA-A*34:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:03 Protein Expression Plasmid Vector	PHLAP9257974	Plasmid vector containing HLA-A*34:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:03 protein. This plasmid can be used for constructing HLA-A*34:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:04 Protein Expression Plasmid Vector	PHLAP9257975	Plasmid vector containing HLA-A*34:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:04 protein. This plasmid can be used for constructing HLA-A*34:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:05 Protein Expression Plasmid Vector	PHLAP9257976	Plasmid vector containing HLA-A*34:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:05 protein. This plasmid can be used for constructing HLA-A*34:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*34:06 Protein Expression Plasmid Vector	PHLAP9257977	Plasmid vector containing HLA-A*34:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:06 protein. This plasmid can be used for constructing HLA-A*34:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:07 Protein Expression Plasmid Vector	PHLAP9257978	Plasmid vector containing HLA-A*34:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:07 protein. This plasmid can be used for constructing HLA-A*34:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:08 Protein Expression Plasmid Vector	PHLAP9257979	Plasmid vector containing HLA-A*34:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:08 protein. This plasmid can be used for constructing HLA-A*34:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:09 Protein Expression Plasmid Vector	PHLAP9257980	Plasmid vector containing HLA-A*34:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:09 protein. This plasmid can be used for constructing HLA-A*34:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:10N Protein Expression Plasmid Vector	PHLAP9257981	Plasmid vector containing HLA-A*34:10N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:10N protein. This plasmid can be used for constructing HLA-A*34:10N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:10N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:11 Protein Expression Plasmid Vector	PHLAP9257982	Plasmid vector containing HLA-A*34:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:11 protein. This plasmid can be used for constructing HLA-A*34:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:12 Protein Expression Plasmid Vector	PHLAP9257983	Plasmid vector containing HLA-A*34:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:12 protein. This plasmid can be used for constructing HLA-A*34:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:13 Protein Expression Plasmid Vector	PHLAP9257984	Plasmid vector containing HLA-A*34:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:13 protein. This plasmid can be used for constructing HLA-A*34:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*34:14 Protein Expression Plasmid Vector	PHLAP9257985	Plasmid vector containing HLA-A*34:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:14 protein. This plasmid can be used for constructing HLA-A*34:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:15 Protein Expression Plasmid Vector	PHLAP9257986	Plasmid vector containing HLA-A*34:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:15 protein. This plasmid can be used for constructing HLA-A*34:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:16 Protein Expression Plasmid Vector	PHLAP9257987	Plasmid vector containing HLA-A*34:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:16 protein. This plasmid can be used for constructing HLA-A*34:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:17 Protein Expression Plasmid Vector	PHLAP9257988	Plasmid vector containing HLA-A*34:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:17 protein. This plasmid can be used for constructing HLA-A*34:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:18 Protein Expression Plasmid Vector	PHLAP9257989	Plasmid vector containing HLA-A*34:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:18 protein. This plasmid can be used for constructing HLA-A*34:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:19 Protein Expression Plasmid Vector	PHLAP9257990	Plasmid vector containing HLA-A*34:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:19 protein. This plasmid can be used for constructing HLA-A*34:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:20 Protein Expression Plasmid Vector	PHLAP9257991	Plasmid vector containing HLA-A*34:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:20 protein. This plasmid can be used for constructing HLA-A*34:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:21 Protein Expression Plasmid Vector	PHLAP9257992	Plasmid vector containing HLA-A*34:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:21 protein. This plasmid can be used for constructing HLA-A*34:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*34:22 Protein Expression Plasmid Vector	PHLAP9257993	Plasmid vector containing HLA-A*34:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:22 protein. This plasmid can be used for constructing HLA-A*34:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:23 Protein Expression Plasmid Vector	PHLAP9257994	Plasmid vector containing HLA-A*34:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:23 protein. This plasmid can be used for constructing HLA-A*34:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:24 Protein Expression Plasmid Vector	PHLAP9257995	Plasmid vector containing HLA-A*34:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:24 protein. This plasmid can be used for constructing HLA-A*34:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:25 Protein Expression Plasmid Vector	PHLAP9257996	Plasmid vector containing HLA-A*34:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:25 protein. This plasmid can be used for constructing HLA-A*34:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:26N Protein Expression Plasmid Vector	PHLAP9257997	Plasmid vector containing HLA-A*34:26N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:26N protein. This plasmid can be used for constructing HLA-A*34:26N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:26N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:27 Protein Expression Plasmid Vector	PHLAP9257998	Plasmid vector containing HLA-A*34:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:27 protein. This plasmid can be used for constructing HLA-A*34:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:28 Protein Expression Plasmid Vector	PHLAP9257999	Plasmid vector containing HLA-A*34:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:28 protein. This plasmid can be used for constructing HLA-A*34:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:29N Protein Expression Plasmid Vector	PHLAP9258000	Plasmid vector containing HLA-A*34:29N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:29N protein. This plasmid can be used for constructing HLA-A*34:29N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:29N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*34:30N Protein Expression Plasmid Vector	PHLAP9258001	Plasmid vector containing HLA-A*34:30N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:30N protein. This plasmid can be used for constructing HLA-A*34:30N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:30N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:31 Protein Expression Plasmid Vector	PHLAP9258002	Plasmid vector containing HLA-A*34:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:31 protein. This plasmid can be used for constructing HLA-A*34:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:32 Protein Expression Plasmid Vector	PHLAP9258003	Plasmid vector containing HLA-A*34:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:32 protein. This plasmid can be used for constructing HLA-A*34:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:33 Protein Expression Plasmid Vector	PHLAP9258004	Plasmid vector containing HLA-A*34:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:33 protein. This plasmid can be used for constructing HLA-A*34:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*34:34 Protein Expression Plasmid Vector	PHLAP9258005	Plasmid vector containing HLA-A*34:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*34:34 protein. This plasmid can be used for constructing HLA-A*34:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*34:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:01:01:01 Protein Expression Plasmid Vector	PHLAP9258006	Plasmid vector containing HLA-A*36:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:01:01:01 protein. This plasmid can be used for constructing HLA-A*36:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:01:01:02 Protein Expression Plasmid Vector	PHLAP9258007	Plasmid vector containing HLA-A*36:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:01:01:02 protein. This plasmid can be used for constructing HLA-A*36:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*36:01:01:03 Protein Expression Plasmid Vector	PHLAP9258008	Plasmid vector containing HLA-A*36:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:01:01:03 protein. This plasmid can be used for constructing HLA-A*36:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:01:02 Protein Expression Plasmid Vector	PHLAP9258009	Plasmid vector containing HLA-A*36:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:01:02 protein. This plasmid can be used for constructing HLA-A*36:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:02 Protein Expression Plasmid Vector	PHLAP9258010	Plasmid vector containing HLA-A*36:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:02 protein. This plasmid can be used for constructing HLA-A*36:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:03 Protein Expression Plasmid Vector	PHLAP9258011	Plasmid vector containing HLA-A*36:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:03 protein. This plasmid can be used for constructing HLA-A*36:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:04 Protein Expression Plasmid Vector	PHLAP9258012	Plasmid vector containing HLA-A*36:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:04 protein. This plasmid can be used for constructing HLA-A*36:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:05 Protein Expression Plasmid Vector	PHLAP9258013	Plasmid vector containing HLA-A*36:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:05 protein. This plasmid can be used for constructing HLA-A*36:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:06 Protein Expression Plasmid Vector	PHLAP9258014	Plasmid vector containing HLA-A*36:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:06 protein. This plasmid can be used for constructing HLA-A*36:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:07 Protein Expression Plasmid Vector	PHLAP9258015	Plasmid vector containing HLA-A*36:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:07 protein. This plasmid can be used for constructing HLA-A*36:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*36:08 Protein Expression Plasmid Vector	PHLAP9258016	Plasmid vector containing HLA-A*36:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:08 protein. This plasmid can be used for constructing HLA-A*36:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:09 Protein Expression Plasmid Vector	PHLAP9258017	Plasmid vector containing HLA-A*36:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:09 protein. This plasmid can be used for constructing HLA-A*36:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:10 Protein Expression Plasmid Vector	PHLAP9258018	Plasmid vector containing HLA-A*36:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:10 protein. This plasmid can be used for constructing HLA-A*36:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:11 Protein Expression Plasmid Vector	PHLAP9258019	Plasmid vector containing HLA-A*36:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:11 protein. This plasmid can be used for constructing HLA-A*36:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:12 Protein Expression Plasmid Vector	PHLAP9258020	Plasmid vector containing HLA-A*36:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:12 protein. This plasmid can be used for constructing HLA-A*36:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:13 Protein Expression Plasmid Vector	PHLAP9258021	Plasmid vector containing HLA-A*36:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:13 protein. This plasmid can be used for constructing HLA-A*36:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:14 Protein Expression Plasmid Vector	PHLAP9258022	Plasmid vector containing HLA-A*36:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:14 protein. This plasmid can be used for constructing HLA-A*36:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*36:15 Protein Expression Plasmid Vector	PHLAP9258023	Plasmid vector containing HLA-A*36:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*36:15 protein. This plasmid can be used for constructing HLA-A*36:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*36:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*43:01 Protein Expression Plasmid Vector	PHLAP9258024	Plasmid vector containing HLA-A*43:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*43:01 protein. This plasmid can be used for constructing HLA-A*43:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*43:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*43:02N Protein Expression Plasmid Vector	PHLAP9258025	Plasmid vector containing HLA-A*43:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*43:02N protein. This plasmid can be used for constructing HLA-A*43:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*43:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*43:03 Protein Expression Plasmid Vector	PHLAP9258026	Plasmid vector containing HLA-A*43:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*43:03 protein. This plasmid can be used for constructing HLA-A*43:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*43:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:01:01 Protein Expression Plasmid Vector	PHLAP9258027	Plasmid vector containing HLA-A*66:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:01:01 protein. This plasmid can be used for constructing HLA-A*66:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:01:02 Protein Expression Plasmid Vector	PHLAP9258028	Plasmid vector containing HLA-A*66:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:01:02 protein. This plasmid can be used for constructing HLA-A*66:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:01:03 Protein Expression Plasmid Vector	PHLAP9258029	Plasmid vector containing HLA-A*66:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:01:03 protein. This plasmid can be used for constructing HLA-A*66:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:01:04 Protein Expression Plasmid Vector	PHLAP9258030	Plasmid vector containing HLA-A*66:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:01:04 protein. This plasmid can be used for constructing HLA-A*66:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*66:01:01:05 Protein Expression Plasmid Vector	PHLAP9258031	Plasmid vector containing HLA-A*66:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:01:05 protein. This plasmid can be used for constructing HLA-A*66:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:01:06 Protein Expression Plasmid Vector	PHLAP9258032	Plasmid vector containing HLA-A*66:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:01:06 protein. This plasmid can be used for constructing HLA-A*66:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:01:07 Protein Expression Plasmid Vector	PHLAP9258033	Plasmid vector containing HLA-A*66:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:01:07 protein. This plasmid can be used for constructing HLA-A*66:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:01:08 Protein Expression Plasmid Vector	PHLAP9258034	Plasmid vector containing HLA-A*66:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:01:08 protein. This plasmid can be used for constructing HLA-A*66:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:02 Protein Expression Plasmid Vector	PHLAP9258035	Plasmid vector containing HLA-A*66:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:02 protein. This plasmid can be used for constructing HLA-A*66:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:03 Protein Expression Plasmid Vector	PHLAP9258036	Plasmid vector containing HLA-A*66:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:03 protein. This plasmid can be used for constructing HLA-A*66:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:04 Protein Expression Plasmid Vector	PHLAP9258037	Plasmid vector containing HLA-A*66:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:04 protein. This plasmid can be used for constructing HLA-A*66:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*66:01:05 Protein Expression Plasmid Vector	PHLAP9258038	Plasmid vector containing HLA-A*66:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:05 protein. This plasmid can be used for constructing HLA-A*66:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:06 Protein Expression Plasmid Vector	PHLAP9258039	Plasmid vector containing HLA-A*66:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:06 protein. This plasmid can be used for constructing HLA-A*66:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:07 Protein Expression Plasmid Vector	PHLAP9258040	Plasmid vector containing HLA-A*66:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:07 protein. This plasmid can be used for constructing HLA-A*66:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:01:08 Protein Expression Plasmid Vector	PHLAP9258041	Plasmid vector containing HLA-A*66:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:01:08 protein. This plasmid can be used for constructing HLA-A*66:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:02:01:01 Protein Expression Plasmid Vector	PHLAP9258042	Plasmid vector containing HLA-A*66:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:02:01:01 protein. This plasmid can be used for constructing HLA-A*66:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:02:01:02 Protein Expression Plasmid Vector	PHLAP9258043	Plasmid vector containing HLA-A*66:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:02:01:02 protein. This plasmid can be used for constructing HLA-A*66:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:02:01:03 Protein Expression Plasmid Vector	PHLAP9258044	Plasmid vector containing HLA-A*66:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:02:01:03 protein. This plasmid can be used for constructing HLA-A*66:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*66:03:01:01 Protein Expression Plasmid Vector	PHLAP9258045	Plasmid vector containing HLA-A*66:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:03:01:01 protein. This plasmid can be used for constructing HLA-A*66:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:03:01:02 Protein Expression Plasmid Vector	PHLAP9258046	Plasmid vector containing HLA-A*66:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:03:01:02 protein. This plasmid can be used for constructing HLA-A*66:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:03:01:03 Protein Expression Plasmid Vector	PHLAP9258047	Plasmid vector containing HLA-A*66:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:03:01:03 protein. This plasmid can be used for constructing HLA-A*66:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:04 Protein Expression Plasmid Vector	PHLAP9258048	Plasmid vector containing HLA-A*66:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:04 protein. This plasmid can be used for constructing HLA-A*66:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:05 Protein Expression Plasmid Vector	PHLAP9258049	Plasmid vector containing HLA-A*66:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:05 protein. This plasmid can be used for constructing HLA-A*66:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:06 Protein Expression Plasmid Vector	PHLAP9258050	Plasmid vector containing HLA-A*66:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:06 protein. This plasmid can be used for constructing HLA-A*66:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:07 Protein Expression Plasmid Vector	PHLAP9258051	Plasmid vector containing HLA-A*66:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:07 protein. This plasmid can be used for constructing HLA-A*66:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*66:08 Protein Expression Plasmid Vector	PHLAP9258052	Plasmid vector containing HLA-A*66:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:08 protein. This plasmid can be used for constructing HLA-A*66:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:09 Protein Expression Plasmid Vector	PHLAP9258053	Plasmid vector containing HLA-A*66:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:09 protein. This plasmid can be used for constructing HLA-A*66:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:10 Protein Expression Plasmid Vector	PHLAP9258054	Plasmid vector containing HLA-A*66:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:10 protein. This plasmid can be used for constructing HLA-A*66:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:11 Protein Expression Plasmid Vector	PHLAP9258055	Plasmid vector containing HLA-A*66:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:11 protein. This plasmid can be used for constructing HLA-A*66:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:12 Protein Expression Plasmid Vector	PHLAP9258056	Plasmid vector containing HLA-A*66:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:12 protein. This plasmid can be used for constructing HLA-A*66:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:13 Protein Expression Plasmid Vector	PHLAP9258057	Plasmid vector containing HLA-A*66:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:13 protein. This plasmid can be used for constructing HLA-A*66:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:14 Protein Expression Plasmid Vector	PHLAP9258058	Plasmid vector containing HLA-A*66:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:14 protein. This plasmid can be used for constructing HLA-A*66:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:15 Protein Expression Plasmid Vector	PHLAP9258059	Plasmid vector containing HLA-A*66:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:15 protein. This plasmid can be used for constructing HLA-A*66:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*66:16 Protein Expression Plasmid Vector	PHLAP9258060	Plasmid vector containing HLA-A*66:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:16 protein. This plasmid can be used for constructing HLA-A*66:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:17 Protein Expression Plasmid Vector	PHLAP9258061	Plasmid vector containing HLA-A*66:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:17 protein. This plasmid can be used for constructing HLA-A*66:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:18 Protein Expression Plasmid Vector	PHLAP9258062	Plasmid vector containing HLA-A*66:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:18 protein. This plasmid can be used for constructing HLA-A*66:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:19 Protein Expression Plasmid Vector	PHLAP9258063	Plasmid vector containing HLA-A*66:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:19 protein. This plasmid can be used for constructing HLA-A*66:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:20 Protein Expression Plasmid Vector	PHLAP9258064	Plasmid vector containing HLA-A*66:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:20 protein. This plasmid can be used for constructing HLA-A*66:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:21 Protein Expression Plasmid Vector	PHLAP9258065	Plasmid vector containing HLA-A*66:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:21 protein. This plasmid can be used for constructing HLA-A*66:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:22 Protein Expression Plasmid Vector	PHLAP9258066	Plasmid vector containing HLA-A*66:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:22 protein. This plasmid can be used for constructing HLA-A*66:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:23 Protein Expression Plasmid Vector	PHLAP9258067	Plasmid vector containing HLA-A*66:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:23 protein. This plasmid can be used for constructing HLA-A*66:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*66:24 Protein Expression Plasmid Vector	PHLAP9258068	Plasmid vector containing HLA-A*66:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:24 protein. This plasmid can be used for constructing HLA-A*66:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:25 Protein Expression Plasmid Vector	PHLAP9258069	Plasmid vector containing HLA-A*66:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:25 protein. This plasmid can be used for constructing HLA-A*66:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:26Q Protein Expression Plasmid Vector	PHLAP9258070	Plasmid vector containing HLA-A*66:26Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:26Q protein. This plasmid can be used for constructing HLA-A*66:26Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:26Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:27N Protein Expression Plasmid Vector	PHLAP9258071	Plasmid vector containing HLA-A*66:27N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:27N protein. This plasmid can be used for constructing HLA-A*66:27N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:27N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:28N Protein Expression Plasmid Vector	PHLAP9258072	Plasmid vector containing HLA-A*66:28N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:28N protein. This plasmid can be used for constructing HLA-A*66:28N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:28N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:29 Protein Expression Plasmid Vector	PHLAP9258073	Plasmid vector containing HLA-A*66:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:29 protein. This plasmid can be used for constructing HLA-A*66:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:30 Protein Expression Plasmid Vector	PHLAP9258074	Plasmid vector containing HLA-A*66:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:30 protein. This plasmid can be used for constructing HLA-A*66:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:31 Protein Expression Plasmid Vector	PHLAP9258075	Plasmid vector containing HLA-A*66:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:31 protein. This plasmid can be used for constructing HLA-A*66:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*66:32 Protein Expression Plasmid Vector	PHLAP9258076	Plasmid vector containing HLA-A*66:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:32 protein. This plasmid can be used for constructing HLA-A*66:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:33 Protein Expression Plasmid Vector	PHLAP9258077	Plasmid vector containing HLA-A*66:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:33 protein. This plasmid can be used for constructing HLA-A*66:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:34 Protein Expression Plasmid Vector	PHLAP9258078	Plasmid vector containing HLA-A*66:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:34 protein. This plasmid can be used for constructing HLA-A*66:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:35 Protein Expression Plasmid Vector	PHLAP9258079	Plasmid vector containing HLA-A*66:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:35 protein. This plasmid can be used for constructing HLA-A*66:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:36 Protein Expression Plasmid Vector	PHLAP9258080	Plasmid vector containing HLA-A*66:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:36 protein. This plasmid can be used for constructing HLA-A*66:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:37 Protein Expression Plasmid Vector	PHLAP9258081	Plasmid vector containing HLA-A*66:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:37 protein. This plasmid can be used for constructing HLA-A*66:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:38 Protein Expression Plasmid Vector	PHLAP9258082	Plasmid vector containing HLA-A*66:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:38 protein. This plasmid can be used for constructing HLA-A*66:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:39N Protein Expression Plasmid Vector	PHLAP9258083	Plasmid vector containing HLA-A*66:39N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:39N protein. This plasmid can be used for constructing HLA-A*66:39N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:39N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*66:40 Protein Expression Plasmid Vector	PHLAP9258084	Plasmid vector containing HLA-A*66:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:40 protein. This plasmid can be used for constructing HLA-A*66:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:41 Protein Expression Plasmid Vector	PHLAP9258085	Plasmid vector containing HLA-A*66:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:41 protein. This plasmid can be used for constructing HLA-A*66:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:42 Protein Expression Plasmid Vector	PHLAP9258086	Plasmid vector containing HLA-A*66:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:42 protein. This plasmid can be used for constructing HLA-A*66:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:43 Protein Expression Plasmid Vector	PHLAP9258087	Plasmid vector containing HLA-A*66:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:43 protein. This plasmid can be used for constructing HLA-A*66:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:44 Protein Expression Plasmid Vector	PHLAP9258088	Plasmid vector containing HLA-A*66:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:44 protein. This plasmid can be used for constructing HLA-A*66:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:45 Protein Expression Plasmid Vector	PHLAP9258089	Plasmid vector containing HLA-A*66:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:45 protein. This plasmid can be used for constructing HLA-A*66:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:46 Protein Expression Plasmid Vector	PHLAP9258090	Plasmid vector containing HLA-A*66:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:46 protein. This plasmid can be used for constructing HLA-A*66:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:47 Protein Expression Plasmid Vector	PHLAP9258091	Plasmid vector containing HLA-A*66:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:47 protein. This plasmid can be used for constructing HLA-A*66:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*66:48 Protein Expression Plasmid Vector	PHLAP9258092	Plasmid vector containing HLA-A*66:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:48 protein. This plasmid can be used for constructing HLA-A*66:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*66:49 Protein Expression Plasmid Vector	PHLAP9258093	Plasmid vector containing HLA-A*66:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*66:49 protein. This plasmid can be used for constructing HLA-A*66:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*66:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:01 Protein Expression Plasmid Vector	PHLAP9258094	Plasmid vector containing HLA-A*68:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:01 protein. This plasmid can be used for constructing HLA-A*68:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:02 Protein Expression Plasmid Vector	PHLAP9258095	Plasmid vector containing HLA-A*68:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:02 protein. This plasmid can be used for constructing HLA-A*68:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:03 Protein Expression Plasmid Vector	PHLAP9258096	Plasmid vector containing HLA-A*68:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:03 protein. This plasmid can be used for constructing HLA-A*68:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:04 Protein Expression Plasmid Vector	PHLAP9258097	Plasmid vector containing HLA-A*68:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:04 protein. This plasmid can be used for constructing HLA-A*68:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:05 Protein Expression Plasmid Vector	PHLAP9258098	Plasmid vector containing HLA-A*68:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:05 protein. This plasmid can be used for constructing HLA-A*68:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:01:06 Protein Expression Plasmid Vector	PHLAP9258099	Plasmid vector containing HLA-A*68:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:06 protein. This plasmid can be used for constructing HLA-A*68:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:07 Protein Expression Plasmid Vector	PHLAP9258100	Plasmid vector containing HLA-A*68:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:07 protein. This plasmid can be used for constructing HLA-A*68:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:08 Protein Expression Plasmid Vector	PHLAP9258101	Plasmid vector containing HLA-A*68:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:08 protein. This plasmid can be used for constructing HLA-A*68:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:09 Protein Expression Plasmid Vector	PHLAP9258102	Plasmid vector containing HLA-A*68:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:09 protein. This plasmid can be used for constructing HLA-A*68:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:10 Protein Expression Plasmid Vector	PHLAP9258103	Plasmid vector containing HLA-A*68:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:10 protein. This plasmid can be used for constructing HLA-A*68:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:11 Protein Expression Plasmid Vector	PHLAP9258104	Plasmid vector containing HLA-A*68:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:11 protein. This plasmid can be used for constructing HLA-A*68:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:12 Protein Expression Plasmid Vector	PHLAP9258105	Plasmid vector containing HLA-A*68:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:12 protein. This plasmid can be used for constructing HLA-A*68:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:01:13 Protein Expression Plasmid Vector	PHLAP9258106	Plasmid vector containing HLA-A*68:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:13 protein. This plasmid can be used for constructing HLA-A*68:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:14 Protein Expression Plasmid Vector	PHLAP9258107	Plasmid vector containing HLA-A*68:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:14 protein. This plasmid can be used for constructing HLA-A*68:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:01:15 Protein Expression Plasmid Vector	PHLAP9258108	Plasmid vector containing HLA-A*68:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:01:15 protein. This plasmid can be used for constructing HLA-A*68:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:01 Protein Expression Plasmid Vector	PHLAP9258109	Plasmid vector containing HLA-A*68:01:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:01 protein. This plasmid can be used for constructing HLA-A*68:01:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:02 Protein Expression Plasmid Vector	PHLAP9258110	Plasmid vector containing HLA-A*68:01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:02 protein. This plasmid can be used for constructing HLA-A*68:01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:03 Protein Expression Plasmid Vector	PHLAP9258111	Plasmid vector containing HLA-A*68:01:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:03 protein. This plasmid can be used for constructing HLA-A*68:01:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:04 Protein Expression Plasmid Vector	PHLAP9258112	Plasmid vector containing HLA-A*68:01:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:04 protein. This plasmid can be used for constructing HLA-A*68:01:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:02:05 Protein Expression Plasmid Vector	PHLAP9258113	Plasmid vector containing HLA-A*68:01:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:05 protein. This plasmid can be used for constructing HLA-A*68:01:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:06 Protein Expression Plasmid Vector	PHLAP9258114	Plasmid vector containing HLA-A*68:01:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:06 protein. This plasmid can be used for constructing HLA-A*68:01:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:07 Protein Expression Plasmid Vector	PHLAP9258115	Plasmid vector containing HLA-A*68:01:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:07 protein. This plasmid can be used for constructing HLA-A*68:01:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:08 Protein Expression Plasmid Vector	PHLAP9258116	Plasmid vector containing HLA-A*68:01:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:08 protein. This plasmid can be used for constructing HLA-A*68:01:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:09 Protein Expression Plasmid Vector	PHLAP9258117	Plasmid vector containing HLA-A*68:01:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:09 protein. This plasmid can be used for constructing HLA-A*68:01:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:10 Protein Expression Plasmid Vector	PHLAP9258118	Plasmid vector containing HLA-A*68:01:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:10 protein. This plasmid can be used for constructing HLA-A*68:01:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:11 Protein Expression Plasmid Vector	PHLAP9258119	Plasmid vector containing HLA-A*68:01:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:11 protein. This plasmid can be used for constructing HLA-A*68:01:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:02:12 Protein Expression Plasmid Vector	PHLAP9258120	Plasmid vector containing HLA-A*68:01:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:12 protein. This plasmid can be used for constructing HLA-A*68:01:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:13 Protein Expression Plasmid Vector	PHLAP9258121	Plasmid vector containing HLA-A*68:01:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:13 protein. This plasmid can be used for constructing HLA-A*68:01:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:14 Protein Expression Plasmid Vector	PHLAP9258122	Plasmid vector containing HLA-A*68:01:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:14 protein. This plasmid can be used for constructing HLA-A*68:01:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:15 Protein Expression Plasmid Vector	PHLAP9258123	Plasmid vector containing HLA-A*68:01:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:15 protein. This plasmid can be used for constructing HLA-A*68:01:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:16 Protein Expression Plasmid Vector	PHLAP9258124	Plasmid vector containing HLA-A*68:01:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:16 protein. This plasmid can be used for constructing HLA-A*68:01:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:17 Protein Expression Plasmid Vector	PHLAP9258125	Plasmid vector containing HLA-A*68:01:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:17 protein. This plasmid can be used for constructing HLA-A*68:01:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:18 Protein Expression Plasmid Vector	PHLAP9258126	Plasmid vector containing HLA-A*68:01:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:18 protein. This plasmid can be used for constructing HLA-A*68:01:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:02:19 Protein Expression Plasmid Vector	PHLAP9258127	Plasmid vector containing HLA-A*68:01:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:19 protein. This plasmid can be used for constructing HLA-A*68:01:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:20 Protein Expression Plasmid Vector	PHLAP9258128	Plasmid vector containing HLA-A*68:01:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:20 protein. This plasmid can be used for constructing HLA-A*68:01:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:21 Protein Expression Plasmid Vector	PHLAP9258129	Plasmid vector containing HLA-A*68:01:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:21 protein. This plasmid can be used for constructing HLA-A*68:01:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:22 Protein Expression Plasmid Vector	PHLAP9258130	Plasmid vector containing HLA-A*68:01:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:22 protein. This plasmid can be used for constructing HLA-A*68:01:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:23 Protein Expression Plasmid Vector	PHLAP9258131	Plasmid vector containing HLA-A*68:01:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:23 protein. This plasmid can be used for constructing HLA-A*68:01:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:24 Protein Expression Plasmid Vector	PHLAP9258132	Plasmid vector containing HLA-A*68:01:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:24 protein. This plasmid can be used for constructing HLA-A*68:01:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:25 Protein Expression Plasmid Vector	PHLAP9258133	Plasmid vector containing HLA-A*68:01:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:25 protein. This plasmid can be used for constructing HLA-A*68:01:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:02:26 Protein Expression Plasmid Vector	PHLAP9258134	Plasmid vector containing HLA-A*68:01:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:26 protein. This plasmid can be used for constructing HLA-A*68:01:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:27 Protein Expression Plasmid Vector	PHLAP9258135	Plasmid vector containing HLA-A*68:01:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:27 protein. This plasmid can be used for constructing HLA-A*68:01:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:28 Protein Expression Plasmid Vector	PHLAP9258136	Plasmid vector containing HLA-A*68:01:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:28 protein. This plasmid can be used for constructing HLA-A*68:01:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:29 Protein Expression Plasmid Vector	PHLAP9258137	Plasmid vector containing HLA-A*68:01:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:29 protein. This plasmid can be used for constructing HLA-A*68:01:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:30 Protein Expression Plasmid Vector	PHLAP9258138	Plasmid vector containing HLA-A*68:01:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:30 protein. This plasmid can be used for constructing HLA-A*68:01:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:31 Protein Expression Plasmid Vector	PHLAP9258139	Plasmid vector containing HLA-A*68:01:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:31 protein. This plasmid can be used for constructing HLA-A*68:01:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:32 Protein Expression Plasmid Vector	PHLAP9258140	Plasmid vector containing HLA-A*68:01:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:32 protein. This plasmid can be used for constructing HLA-A*68:01:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:02:33 Protein Expression Plasmid Vector	PHLAP9258141	Plasmid vector containing HLA-A*68:01:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:33 protein. This plasmid can be used for constructing HLA-A*68:01:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:34 Protein Expression Plasmid Vector	PHLAP9258142	Plasmid vector containing HLA-A*68:01:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:34 protein. This plasmid can be used for constructing HLA-A*68:01:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:35 Protein Expression Plasmid Vector	PHLAP9258143	Plasmid vector containing HLA-A*68:01:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:35 protein. This plasmid can be used for constructing HLA-A*68:01:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:36 Protein Expression Plasmid Vector	PHLAP9258144	Plasmid vector containing HLA-A*68:01:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:36 protein. This plasmid can be used for constructing HLA-A*68:01:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:02:37 Protein Expression Plasmid Vector	PHLAP9258145	Plasmid vector containing HLA-A*68:01:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:02:37 protein. This plasmid can be used for constructing HLA-A*68:01:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:03 Protein Expression Plasmid Vector	PHLAP9258146	Plasmid vector containing HLA-A*68:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:03 protein. This plasmid can be used for constructing HLA-A*68:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:04 Protein Expression Plasmid Vector	PHLAP9258147	Plasmid vector containing HLA-A*68:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:04 protein. This plasmid can be used for constructing HLA-A*68:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:05 Protein Expression Plasmid Vector	PHLAP9258148	Plasmid vector containing HLA-A*68:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:05 protein. This plasmid can be used for constructing HLA-A*68:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:06 Protein Expression Plasmid Vector	PHLAP9258149	Plasmid vector containing HLA-A*68:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:06 protein. This plasmid can be used for constructing HLA-A*68:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:07 Protein Expression Plasmid Vector	PHLAP9258150	Plasmid vector containing HLA-A*68:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:07 protein. This plasmid can be used for constructing HLA-A*68:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:08 Protein Expression Plasmid Vector	PHLAP9258151	Plasmid vector containing HLA-A*68:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:08 protein. This plasmid can be used for constructing HLA-A*68:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:09 Protein Expression Plasmid Vector	PHLAP9258152	Plasmid vector containing HLA-A*68:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:09 protein. This plasmid can be used for constructing HLA-A*68:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:10 Protein Expression Plasmid Vector	PHLAP9258153	Plasmid vector containing HLA-A*68:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:10 protein. This plasmid can be used for constructing HLA-A*68:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:11 Protein Expression Plasmid Vector	PHLAP9258154	Plasmid vector containing HLA-A*68:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:11 protein. This plasmid can be used for constructing HLA-A*68:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:12 Protein Expression Plasmid Vector	PHLAP9258155	Plasmid vector containing HLA-A*68:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:12 protein. This plasmid can be used for constructing HLA-A*68:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:13 Protein Expression Plasmid Vector	PHLAP9258156	Plasmid vector containing HLA-A*68:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:13 protein. This plasmid can be used for constructing HLA-A*68:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:14 Protein Expression Plasmid Vector	PHLAP9258157	Plasmid vector containing HLA-A*68:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:14 protein. This plasmid can be used for constructing HLA-A*68:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:15 Protein Expression Plasmid Vector	PHLAP9258158	Plasmid vector containing HLA-A*68:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:15 protein. This plasmid can be used for constructing HLA-A*68:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:16 Protein Expression Plasmid Vector	PHLAP9258159	Plasmid vector containing HLA-A*68:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:16 protein. This plasmid can be used for constructing HLA-A*68:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:17 Protein Expression Plasmid Vector	PHLAP9258160	Plasmid vector containing HLA-A*68:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:17 protein. This plasmid can be used for constructing HLA-A*68:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:18 Protein Expression Plasmid Vector	PHLAP9258161	Plasmid vector containing HLA-A*68:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:18 protein. This plasmid can be used for constructing HLA-A*68:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:19 Protein Expression Plasmid Vector	PHLAP9258162	Plasmid vector containing HLA-A*68:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:19 protein. This plasmid can be used for constructing HLA-A*68:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:20 Protein Expression Plasmid Vector	PHLAP9258163	Plasmid vector containing HLA-A*68:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:20 protein. This plasmid can be used for constructing HLA-A*68:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:21 Protein Expression Plasmid Vector	PHLAP9258164	Plasmid vector containing HLA-A*68:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:21 protein. This plasmid can be used for constructing HLA-A*68:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:22 Protein Expression Plasmid Vector	PHLAP9258165	Plasmid vector containing HLA-A*68:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:22 protein. This plasmid can be used for constructing HLA-A*68:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:23 Protein Expression Plasmid Vector	PHLAP9258166	Plasmid vector containing HLA-A*68:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:23 protein. This plasmid can be used for constructing HLA-A*68:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:24 Protein Expression Plasmid Vector	PHLAP9258167	Plasmid vector containing HLA-A*68:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:24 protein. This plasmid can be used for constructing HLA-A*68:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:25 Protein Expression Plasmid Vector	PHLAP9258168	Plasmid vector containing HLA-A*68:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:25 protein. This plasmid can be used for constructing HLA-A*68:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:26 Protein Expression Plasmid Vector	PHLAP9258169	Plasmid vector containing HLA-A*68:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:26 protein. This plasmid can be used for constructing HLA-A*68:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:27 Protein Expression Plasmid Vector	PHLAP9258170	Plasmid vector containing HLA-A*68:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:27 protein. This plasmid can be used for constructing HLA-A*68:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:28 Protein Expression Plasmid Vector	PHLAP9258171	Plasmid vector containing HLA-A*68:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:28 protein. This plasmid can be used for constructing HLA-A*68:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:29 Protein Expression Plasmid Vector	PHLAP9258172	Plasmid vector containing HLA-A*68:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:29 protein. This plasmid can be used for constructing HLA-A*68:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:30 Protein Expression Plasmid Vector	PHLAP9258173	Plasmid vector containing HLA-A*68:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:30 protein. This plasmid can be used for constructing HLA-A*68:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:31 Protein Expression Plasmid Vector	PHLAP9258174	Plasmid vector containing HLA-A*68:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:31 protein. This plasmid can be used for constructing HLA-A*68:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:32 Protein Expression Plasmid Vector	PHLAP9258175	Plasmid vector containing HLA-A*68:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:32 protein. This plasmid can be used for constructing HLA-A*68:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:33 Protein Expression Plasmid Vector	PHLAP9258176	Plasmid vector containing HLA-A*68:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:33 protein. This plasmid can be used for constructing HLA-A*68:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:34 Protein Expression Plasmid Vector	PHLAP9258177	Plasmid vector containing HLA-A*68:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:34 protein. This plasmid can be used for constructing HLA-A*68:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:35 Protein Expression Plasmid Vector	PHLAP9258178	Plasmid vector containing HLA-A*68:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:35 protein. This plasmid can be used for constructing HLA-A*68:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:36 Protein Expression Plasmid Vector	PHLAP9258179	Plasmid vector containing HLA-A*68:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:36 protein. This plasmid can be used for constructing HLA-A*68:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:37 Protein Expression Plasmid Vector	PHLAP9258180	Plasmid vector containing HLA-A*68:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:37 protein. This plasmid can be used for constructing HLA-A*68:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:38 Protein Expression Plasmid Vector	PHLAP9258181	Plasmid vector containing HLA-A*68:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:38 protein. This plasmid can be used for constructing HLA-A*68:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:39 Protein Expression Plasmid Vector	PHLAP9258182	Plasmid vector containing HLA-A*68:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:39 protein. This plasmid can be used for constructing HLA-A*68:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:40 Protein Expression Plasmid Vector	PHLAP9258183	Plasmid vector containing HLA-A*68:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:40 protein. This plasmid can be used for constructing HLA-A*68:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:41 Protein Expression Plasmid Vector	PHLAP9258184	Plasmid vector containing HLA-A*68:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:41 protein. This plasmid can be used for constructing HLA-A*68:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:42 Protein Expression Plasmid Vector	PHLAP9258185	Plasmid vector containing HLA-A*68:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:42 protein. This plasmid can be used for constructing HLA-A*68:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:43 Protein Expression Plasmid Vector	PHLAP9258186	Plasmid vector containing HLA-A*68:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:43 protein. This plasmid can be used for constructing HLA-A*68:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:44 Protein Expression Plasmid Vector	PHLAP9258187	Plasmid vector containing HLA-A*68:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:44 protein. This plasmid can be used for constructing HLA-A*68:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:45 Protein Expression Plasmid Vector	PHLAP9258188	Plasmid vector containing HLA-A*68:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:45 protein. This plasmid can be used for constructing HLA-A*68:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:46 Protein Expression Plasmid Vector	PHLAP9258189	Plasmid vector containing HLA-A*68:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:46 protein. This plasmid can be used for constructing HLA-A*68:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:47 Protein Expression Plasmid Vector	PHLAP9258190	Plasmid vector containing HLA-A*68:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:47 protein. This plasmid can be used for constructing HLA-A*68:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:48 Protein Expression Plasmid Vector	PHLAP9258191	Plasmid vector containing HLA-A*68:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:48 protein. This plasmid can be used for constructing HLA-A*68:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:49 Protein Expression Plasmid Vector	PHLAP9258192	Plasmid vector containing HLA-A*68:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:49 protein. This plasmid can be used for constructing HLA-A*68:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:50 Protein Expression Plasmid Vector	PHLAP9258193	Plasmid vector containing HLA-A*68:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:50 protein. This plasmid can be used for constructing HLA-A*68:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:51 Protein Expression Plasmid Vector	PHLAP9258194	Plasmid vector containing HLA-A*68:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:51 protein. This plasmid can be used for constructing HLA-A*68:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:52 Protein Expression Plasmid Vector	PHLAP9258195	Plasmid vector containing HLA-A*68:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:52 protein. This plasmid can be used for constructing HLA-A*68:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:53 Protein Expression Plasmid Vector	PHLAP9258196	Plasmid vector containing HLA-A*68:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:53 protein. This plasmid can be used for constructing HLA-A*68:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:54 Protein Expression Plasmid Vector	PHLAP9258197	Plasmid vector containing HLA-A*68:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:54 protein. This plasmid can be used for constructing HLA-A*68:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:55 Protein Expression Plasmid Vector	PHLAP9258198	Plasmid vector containing HLA-A*68:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:55 protein. This plasmid can be used for constructing HLA-A*68:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:56 Protein Expression Plasmid Vector	PHLAP9258199	Plasmid vector containing HLA-A*68:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:56 protein. This plasmid can be used for constructing HLA-A*68:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:57 Protein Expression Plasmid Vector	PHLAP9258200	Plasmid vector containing HLA-A*68:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:57 protein. This plasmid can be used for constructing HLA-A*68:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:58 Protein Expression Plasmid Vector	PHLAP9258201	Plasmid vector containing HLA-A*68:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:58 protein. This plasmid can be used for constructing HLA-A*68:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:59Q Protein Expression Plasmid Vector	PHLAP9258202	Plasmid vector containing HLA-A*68:01:59Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:59Q protein. This plasmid can be used for constructing HLA-A*68:01:59Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:59Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:60 Protein Expression Plasmid Vector	PHLAP9258203	Plasmid vector containing HLA-A*68:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:60 protein. This plasmid can be used for constructing HLA-A*68:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:61 Protein Expression Plasmid Vector	PHLAP9258204	Plasmid vector containing HLA-A*68:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:61 protein. This plasmid can be used for constructing HLA-A*68:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:62 Protein Expression Plasmid Vector	PHLAP9258205	Plasmid vector containing HLA-A*68:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:62 protein. This plasmid can be used for constructing HLA-A*68:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:63 Protein Expression Plasmid Vector	PHLAP9258206	Plasmid vector containing HLA-A*68:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:63 protein. This plasmid can be used for constructing HLA-A*68:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:64 Protein Expression Plasmid Vector	PHLAP9258207	Plasmid vector containing HLA-A*68:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:64 protein. This plasmid can be used for constructing HLA-A*68:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:65 Protein Expression Plasmid Vector	PHLAP9258208	Plasmid vector containing HLA-A*68:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:65 protein. This plasmid can be used for constructing HLA-A*68:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:66 Protein Expression Plasmid Vector	PHLAP9258209	Plasmid vector containing HLA-A*68:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:66 protein. This plasmid can be used for constructing HLA-A*68:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:67 Protein Expression Plasmid Vector	PHLAP9258210	Plasmid vector containing HLA-A*68:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:67 protein. This plasmid can be used for constructing HLA-A*68:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:01:68 Protein Expression Plasmid Vector	PHLAP9258211	Plasmid vector containing HLA-A*68:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:68 protein. This plasmid can be used for constructing HLA-A*68:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:01:69 Protein Expression Plasmid Vector	PHLAP9258212	Plasmid vector containing HLA-A*68:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:01:69 protein. This plasmid can be used for constructing HLA-A*68:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:01 Protein Expression Plasmid Vector	PHLAP9258213	Plasmid vector containing HLA-A*68:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:01 protein. This plasmid can be used for constructing HLA-A*68:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:02 Protein Expression Plasmid Vector	PHLAP9258214	Plasmid vector containing HLA-A*68:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:02 protein. This plasmid can be used for constructing HLA-A*68:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:03 Protein Expression Plasmid Vector	PHLAP9258215	Plasmid vector containing HLA-A*68:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:03 protein. This plasmid can be used for constructing HLA-A*68:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:04 Protein Expression Plasmid Vector	PHLAP9258216	Plasmid vector containing HLA-A*68:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:04 protein. This plasmid can be used for constructing HLA-A*68:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:05 Protein Expression Plasmid Vector	PHLAP9258217	Plasmid vector containing HLA-A*68:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:05 protein. This plasmid can be used for constructing HLA-A*68:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:06 Protein Expression Plasmid Vector	PHLAP9258218	Plasmid vector containing HLA-A*68:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:06 protein. This plasmid can be used for constructing HLA-A*68:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:02:01:07 Protein Expression Plasmid Vector	PHLAP9258219	Plasmid vector containing HLA-A*68:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:07 protein. This plasmid can be used for constructing HLA-A*68:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:08 Protein Expression Plasmid Vector	PHLAP9258220	Plasmid vector containing HLA-A*68:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:08 protein. This plasmid can be used for constructing HLA-A*68:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:09 Protein Expression Plasmid Vector	PHLAP9258221	Plasmid vector containing HLA-A*68:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:09 protein. This plasmid can be used for constructing HLA-A*68:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:10 Protein Expression Plasmid Vector	PHLAP9258222	Plasmid vector containing HLA-A*68:02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:10 protein. This plasmid can be used for constructing HLA-A*68:02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:11 Protein Expression Plasmid Vector	PHLAP9258223	Plasmid vector containing HLA-A*68:02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:11 protein. This plasmid can be used for constructing HLA-A*68:02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:12 Protein Expression Plasmid Vector	PHLAP9258224	Plasmid vector containing HLA-A*68:02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:12 protein. This plasmid can be used for constructing HLA-A*68:02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:13 Protein Expression Plasmid Vector	PHLAP9258225	Plasmid vector containing HLA-A*68:02:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:13 protein. This plasmid can be used for constructing HLA-A*68:02:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:02:01:14 Protein Expression Plasmid Vector	PHLAP9258226	Plasmid vector containing HLA-A*68:02:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:14 protein. This plasmid can be used for constructing HLA-A*68:02:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:15 Protein Expression Plasmid Vector	PHLAP9258227	Plasmid vector containing HLA-A*68:02:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:15 protein. This plasmid can be used for constructing HLA-A*68:02:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:16 Protein Expression Plasmid Vector	PHLAP9258228	Plasmid vector containing HLA-A*68:02:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:16 protein. This plasmid can be used for constructing HLA-A*68:02:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:17 Protein Expression Plasmid Vector	PHLAP9258229	Plasmid vector containing HLA-A*68:02:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:17 protein. This plasmid can be used for constructing HLA-A*68:02:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:18 Protein Expression Plasmid Vector	PHLAP9258230	Plasmid vector containing HLA-A*68:02:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:18 protein. This plasmid can be used for constructing HLA-A*68:02:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:19 Protein Expression Plasmid Vector	PHLAP9258231	Plasmid vector containing HLA-A*68:02:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:19 protein. This plasmid can be used for constructing HLA-A*68:02:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:01:20 Protein Expression Plasmid Vector	PHLAP9258232	Plasmid vector containing HLA-A*68:02:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:01:20 protein. This plasmid can be used for constructing HLA-A*68:02:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:02:02 Protein Expression Plasmid Vector	PHLAP9258233	Plasmid vector containing HLA-A*68:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:02 protein. This plasmid can be used for constructing HLA-A*68:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:03 Protein Expression Plasmid Vector	PHLAP9258234	Plasmid vector containing HLA-A*68:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:03 protein. This plasmid can be used for constructing HLA-A*68:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:04 Protein Expression Plasmid Vector	PHLAP9258235	Plasmid vector containing HLA-A*68:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:04 protein. This plasmid can be used for constructing HLA-A*68:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:05 Protein Expression Plasmid Vector	PHLAP9258236	Plasmid vector containing HLA-A*68:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:05 protein. This plasmid can be used for constructing HLA-A*68:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:06 Protein Expression Plasmid Vector	PHLAP9258237	Plasmid vector containing HLA-A*68:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:06 protein. This plasmid can be used for constructing HLA-A*68:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:07 Protein Expression Plasmid Vector	PHLAP9258238	Plasmid vector containing HLA-A*68:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:07 protein. This plasmid can be used for constructing HLA-A*68:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:08 Protein Expression Plasmid Vector	PHLAP9258239	Plasmid vector containing HLA-A*68:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:08 protein. This plasmid can be used for constructing HLA-A*68:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:09 Protein Expression Plasmid Vector	PHLAP9258240	Plasmid vector containing HLA-A*68:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:09 protein. This plasmid can be used for constructing HLA-A*68:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:02:10 Protein Expression Plasmid Vector	PHLAP9258241	Plasmid vector containing HLA-A*68:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:10 protein. This plasmid can be used for constructing HLA-A*68:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:11 Protein Expression Plasmid Vector	PHLAP9258242	Plasmid vector containing HLA-A*68:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:11 protein. This plasmid can be used for constructing HLA-A*68:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:12 Protein Expression Plasmid Vector	PHLAP9258243	Plasmid vector containing HLA-A*68:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:12 protein. This plasmid can be used for constructing HLA-A*68:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:13 Protein Expression Plasmid Vector	PHLAP9258244	Plasmid vector containing HLA-A*68:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:13 protein. This plasmid can be used for constructing HLA-A*68:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:14 Protein Expression Plasmid Vector	PHLAP9258245	Plasmid vector containing HLA-A*68:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:14 protein. This plasmid can be used for constructing HLA-A*68:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:15 Protein Expression Plasmid Vector	PHLAP9258246	Plasmid vector containing HLA-A*68:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:15 protein. This plasmid can be used for constructing HLA-A*68:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:16 Protein Expression Plasmid Vector	PHLAP9258247	Plasmid vector containing HLA-A*68:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:16 protein. This plasmid can be used for constructing HLA-A*68:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:17 Protein Expression Plasmid Vector	PHLAP9258248	Plasmid vector containing HLA-A*68:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:17 protein. This plasmid can be used for constructing HLA-A*68:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:02:18 Protein Expression Plasmid Vector	PHLAP9258249	Plasmid vector containing HLA-A*68:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:18 protein. This plasmid can be used for constructing HLA-A*68:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:19 Protein Expression Plasmid Vector	PHLAP9258250	Plasmid vector containing HLA-A*68:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:19 protein. This plasmid can be used for constructing HLA-A*68:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:20 Protein Expression Plasmid Vector	PHLAP9258251	Plasmid vector containing HLA-A*68:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:20 protein. This plasmid can be used for constructing HLA-A*68:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:21 Protein Expression Plasmid Vector	PHLAP9258252	Plasmid vector containing HLA-A*68:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:21 protein. This plasmid can be used for constructing HLA-A*68:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:22 Protein Expression Plasmid Vector	PHLAP9258253	Plasmid vector containing HLA-A*68:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:22 protein. This plasmid can be used for constructing HLA-A*68:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:23 Protein Expression Plasmid Vector	PHLAP9258254	Plasmid vector containing HLA-A*68:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:23 protein. This plasmid can be used for constructing HLA-A*68:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:24 Protein Expression Plasmid Vector	PHLAP9258255	Plasmid vector containing HLA-A*68:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:24 protein. This plasmid can be used for constructing HLA-A*68:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:25 Protein Expression Plasmid Vector	PHLAP9258256	Plasmid vector containing HLA-A*68:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:25 protein. This plasmid can be used for constructing HLA-A*68:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:02:26 Protein Expression Plasmid Vector	PHLAP9258257	Plasmid vector containing HLA-A*68:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:26 protein. This plasmid can be used for constructing HLA-A*68:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:27 Protein Expression Plasmid Vector	PHLAP9258258	Plasmid vector containing HLA-A*68:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:27 protein. This plasmid can be used for constructing HLA-A*68:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:02:28 Protein Expression Plasmid Vector	PHLAP9258259	Plasmid vector containing HLA-A*68:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:02:28 protein. This plasmid can be used for constructing HLA-A*68:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:03:01:01 Protein Expression Plasmid Vector	PHLAP9258260	Plasmid vector containing HLA-A*68:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:03:01:01 protein. This plasmid can be used for constructing HLA-A*68:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:03:01:02 Protein Expression Plasmid Vector	PHLAP9258261	Plasmid vector containing HLA-A*68:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:03:01:02 protein. This plasmid can be used for constructing HLA-A*68:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:03:01:03 Protein Expression Plasmid Vector	PHLAP9258262	Plasmid vector containing HLA-A*68:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:03:01:03 protein. This plasmid can be used for constructing HLA-A*68:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:03:01:04 Protein Expression Plasmid Vector	PHLAP9258263	Plasmid vector containing HLA-A*68:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:03:01:04 protein. This plasmid can be used for constructing HLA-A*68:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:03:01:05 Protein Expression Plasmid Vector	PHLAP9258264	Plasmid vector containing HLA-A*68:03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:03:01:05 protein. This plasmid can be used for constructing HLA-A*68:03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:03:01:06 Protein Expression Plasmid Vector	PHLAP9258265	Plasmid vector containing HLA-A*68:03:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:03:01:06 protein. This plasmid can be used for constructing HLA-A*68:03:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:03:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:03:01:07 Protein Expression Plasmid Vector	PHLAP9258266	Plasmid vector containing HLA-A*68:03:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:03:01:07 protein. This plasmid can be used for constructing HLA-A*68:03:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:03:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:03:02 Protein Expression Plasmid Vector	PHLAP9258267	Plasmid vector containing HLA-A*68:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:03:02 protein. This plasmid can be used for constructing HLA-A*68:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:03:03 Protein Expression Plasmid Vector	PHLAP9258268	Plasmid vector containing HLA-A*68:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:03:03 protein. This plasmid can be used for constructing HLA-A*68:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:03:04 Protein Expression Plasmid Vector	PHLAP9258269	Plasmid vector containing HLA-A*68:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:03:04 protein. This plasmid can be used for constructing HLA-A*68:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:04:01 Protein Expression Plasmid Vector	PHLAP9258270	Plasmid vector containing HLA-A*68:04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:04:01 protein. This plasmid can be used for constructing HLA-A*68:04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:04:02 Protein Expression Plasmid Vector	PHLAP9258271	Plasmid vector containing HLA-A*68:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:04:02 protein. This plasmid can be used for constructing HLA-A*68:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:05 Protein Expression Plasmid Vector	PHLAP9258272	Plasmid vector containing HLA-A*68:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:05 protein. This plasmid can be used for constructing HLA-A*68:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:06 Protein Expression Plasmid Vector	PHLAP9258273	Plasmid vector containing HLA-A*68:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:06 protein. This plasmid can be used for constructing HLA-A*68:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:07 Protein Expression Plasmid Vector	PHLAP9258274	Plasmid vector containing HLA-A*68:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:07 protein. This plasmid can be used for constructing HLA-A*68:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:08:01:01 Protein Expression Plasmid Vector	PHLAP9258275	Plasmid vector containing HLA-A*68:08:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:08:01:01 protein. This plasmid can be used for constructing HLA-A*68:08:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:08:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:08:01:02 Protein Expression Plasmid Vector	PHLAP9258276	Plasmid vector containing HLA-A*68:08:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:08:01:02 protein. This plasmid can be used for constructing HLA-A*68:08:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:08:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:08:02 Protein Expression Plasmid Vector	PHLAP9258277	Plasmid vector containing HLA-A*68:08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:08:02 protein. This plasmid can be used for constructing HLA-A*68:08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:09 Protein Expression Plasmid Vector	PHLAP9258278	Plasmid vector containing HLA-A*68:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:09 protein. This plasmid can be used for constructing HLA-A*68:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:10 Protein Expression Plasmid Vector	PHLAP9258279	Plasmid vector containing HLA-A*68:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:10 protein. This plasmid can be used for constructing HLA-A*68:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:100 Protein Expression Plasmid Vector	PHLAP9258280	Plasmid vector containing HLA-A*68:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:100 protein. This plasmid can be used for constructing HLA-A*68:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:101:01 Protein Expression Plasmid Vector	PHLAP9258281	Plasmid vector containing HLA-A*68:101:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:101:01 protein. This plasmid can be used for constructing HLA-A*68:101:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:101:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:101:02 Protein Expression Plasmid Vector	PHLAP9258282	Plasmid vector containing HLA-A*68:101:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:101:02 protein. This plasmid can be used for constructing HLA-A*68:101:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:101:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:102 Protein Expression Plasmid Vector	PHLAP9258283	Plasmid vector containing HLA-A*68:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:102 protein. This plasmid can be used for constructing HLA-A*68:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:103:01 Protein Expression Plasmid Vector	PHLAP9258284	Plasmid vector containing HLA-A*68:103:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:103:01 protein. This plasmid can be used for constructing HLA-A*68:103:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:103:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:103:02 Protein Expression Plasmid Vector	PHLAP9258285	Plasmid vector containing HLA-A*68:103:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:103:02 protein. This plasmid can be used for constructing HLA-A*68:103:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:103:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:104:01 Protein Expression Plasmid Vector	PHLAP9258286	Plasmid vector containing HLA-A*68:104:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:104:01 protein. This plasmid can be used for constructing HLA-A*68:104:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:104:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:104:02 Protein Expression Plasmid Vector	PHLAP9258287	Plasmid vector containing HLA-A*68:104:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:104:02 protein. This plasmid can be used for constructing HLA-A*68:104:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:104:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:105:01:01 Protein Expression Plasmid Vector	PHLAP9258288	Plasmid vector containing HLA-A*68:105:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:105:01:01 protein. This plasmid can be used for constructing HLA-A*68:105:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:105:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:105:01:02 Protein Expression Plasmid Vector	PHLAP9258289	Plasmid vector containing HLA-A*68:105:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:105:01:02 protein. This plasmid can be used for constructing HLA-A*68:105:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:105:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:106 Protein Expression Plasmid Vector	PHLAP9258290	Plasmid vector containing HLA-A*68:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:106 protein. This plasmid can be used for constructing HLA-A*68:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:107 Protein Expression Plasmid Vector	PHLAP9258291	Plasmid vector containing HLA-A*68:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:107 protein. This plasmid can be used for constructing HLA-A*68:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:108 Protein Expression Plasmid Vector	PHLAP9258292	Plasmid vector containing HLA-A*68:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:108 protein. This plasmid can be used for constructing HLA-A*68:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:109 Protein Expression Plasmid Vector	PHLAP9258293	Plasmid vector containing HLA-A*68:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:109 protein. This plasmid can be used for constructing HLA-A*68:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:110 Protein Expression Plasmid Vector	PHLAP9258294	Plasmid vector containing HLA-A*68:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:110 protein. This plasmid can be used for constructing HLA-A*68:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:111 Protein Expression Plasmid Vector	PHLAP9258295	Plasmid vector containing HLA-A*68:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:111 protein. This plasmid can be used for constructing HLA-A*68:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:112:01 Protein Expression Plasmid Vector	PHLAP9258296	Plasmid vector containing HLA-A*68:112:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:112:01 protein. This plasmid can be used for constructing HLA-A*68:112:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:112:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:112:02 Protein Expression Plasmid Vector	PHLAP9258297	Plasmid vector containing HLA-A*68:112:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:112:02 protein. This plasmid can be used for constructing HLA-A*68:112:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:112:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:113:01 Protein Expression Plasmid Vector	PHLAP9258298	Plasmid vector containing HLA-A*68:113:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:113:01 protein. This plasmid can be used for constructing HLA-A*68:113:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:113:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:113:02 Protein Expression Plasmid Vector	PHLAP9258299	Plasmid vector containing HLA-A*68:113:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:113:02 protein. This plasmid can be used for constructing HLA-A*68:113:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:113:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:114:01 Protein Expression Plasmid Vector	PHLAP9258300	Plasmid vector containing HLA-A*68:114:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:114:01 protein. This plasmid can be used for constructing HLA-A*68:114:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:114:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:114:02 Protein Expression Plasmid Vector	PHLAP9258301	Plasmid vector containing HLA-A*68:114:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:114:02 protein. This plasmid can be used for constructing HLA-A*68:114:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:114:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:115 Protein Expression Plasmid Vector	PHLAP9258302	Plasmid vector containing HLA-A*68:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:115 protein. This plasmid can be used for constructing HLA-A*68:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:116 Protein Expression Plasmid Vector	PHLAP9258303	Plasmid vector containing HLA-A*68:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:116 protein. This plasmid can be used for constructing HLA-A*68:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:117 Protein Expression Plasmid Vector	PHLAP9258304	Plasmid vector containing HLA-A*68:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:117 protein. This plasmid can be used for constructing HLA-A*68:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:118 Protein Expression Plasmid Vector	PHLAP9258305	Plasmid vector containing HLA-A*68:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:118 protein. This plasmid can be used for constructing HLA-A*68:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:119:01 Protein Expression Plasmid Vector	PHLAP9258306	Plasmid vector containing HLA-A*68:119:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:119:01 protein. This plasmid can be used for constructing HLA-A*68:119:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:119:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:119:02 Protein Expression Plasmid Vector	PHLAP9258307	Plasmid vector containing HLA-A*68:119:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:119:02 protein. This plasmid can be used for constructing HLA-A*68:119:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:119:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:11N Protein Expression Plasmid Vector	PHLAP9258308	Plasmid vector containing HLA-A*68:11N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:11N protein. This plasmid can be used for constructing HLA-A*68:11N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:11N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:12:01 Protein Expression Plasmid Vector	PHLAP9258309	Plasmid vector containing HLA-A*68:12:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:12:01 protein. This plasmid can be used for constructing HLA-A*68:12:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:12:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:12:02 Protein Expression Plasmid Vector	PHLAP9258310	Plasmid vector containing HLA-A*68:12:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:12:02 protein. This plasmid can be used for constructing HLA-A*68:12:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:12:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:120N Protein Expression Plasmid Vector	PHLAP9258311	Plasmid vector containing HLA-A*68:120N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:120N protein. This plasmid can be used for constructing HLA-A*68:120N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:120N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:121:01 Protein Expression Plasmid Vector	PHLAP9258312	Plasmid vector containing HLA-A*68:121:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:121:01 protein. This plasmid can be used for constructing HLA-A*68:121:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:121:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:121:02 Protein Expression Plasmid Vector	PHLAP9258313	Plasmid vector containing HLA-A*68:121:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:121:02 protein. This plasmid can be used for constructing HLA-A*68:121:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:121:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:122 Protein Expression Plasmid Vector	PHLAP9258314	Plasmid vector containing HLA-A*68:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:122 protein. This plasmid can be used for constructing HLA-A*68:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:123 Protein Expression Plasmid Vector	PHLAP9258315	Plasmid vector containing HLA-A*68:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:123 protein. This plasmid can be used for constructing HLA-A*68:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:124 Protein Expression Plasmid Vector	PHLAP9258316	Plasmid vector containing HLA-A*68:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:124 protein. This plasmid can be used for constructing HLA-A*68:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:125 Protein Expression Plasmid Vector	PHLAP9258317	Plasmid vector containing HLA-A*68:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:125 protein. This plasmid can be used for constructing HLA-A*68:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:126 Protein Expression Plasmid Vector	PHLAP9258318	Plasmid vector containing HLA-A*68:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:126 protein. This plasmid can be used for constructing HLA-A*68:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:127 Protein Expression Plasmid Vector	PHLAP9258319	Plasmid vector containing HLA-A*68:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:127 protein. This plasmid can be used for constructing HLA-A*68:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:128 Protein Expression Plasmid Vector	PHLAP9258320	Plasmid vector containing HLA-A*68:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:128 protein. This plasmid can be used for constructing HLA-A*68:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:129 Protein Expression Plasmid Vector	PHLAP9258321	Plasmid vector containing HLA-A*68:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:129 protein. This plasmid can be used for constructing HLA-A*68:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:13:01 Protein Expression Plasmid Vector	PHLAP9258322	Plasmid vector containing HLA-A*68:13:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:13:01 protein. This plasmid can be used for constructing HLA-A*68:13:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:13:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:13:02 Protein Expression Plasmid Vector	PHLAP9258323	Plasmid vector containing HLA-A*68:13:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:13:02 protein. This plasmid can be used for constructing HLA-A*68:13:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:13:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:130:01 Protein Expression Plasmid Vector	PHLAP9258324	Plasmid vector containing HLA-A*68:130:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:130:01 protein. This plasmid can be used for constructing HLA-A*68:130:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:130:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:130:02 Protein Expression Plasmid Vector	PHLAP9258325	Plasmid vector containing HLA-A*68:130:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:130:02 protein. This plasmid can be used for constructing HLA-A*68:130:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:130:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:131 Protein Expression Plasmid Vector	PHLAP9258326	Plasmid vector containing HLA-A*68:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:131 protein. This plasmid can be used for constructing HLA-A*68:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:132 Protein Expression Plasmid Vector	PHLAP9258327	Plasmid vector containing HLA-A*68:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:132 protein. This plasmid can be used for constructing HLA-A*68:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:133 Protein Expression Plasmid Vector	PHLAP9258328	Plasmid vector containing HLA-A*68:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:133 protein. This plasmid can be used for constructing HLA-A*68:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:134 Protein Expression Plasmid Vector	PHLAP9258329	Plasmid vector containing HLA-A*68:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:134 protein. This plasmid can be used for constructing HLA-A*68:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:135 Protein Expression Plasmid Vector	PHLAP9258330	Plasmid vector containing HLA-A*68:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:135 protein. This plasmid can be used for constructing HLA-A*68:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:136 Protein Expression Plasmid Vector	PHLAP9258331	Plasmid vector containing HLA-A*68:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:136 protein. This plasmid can be used for constructing HLA-A*68:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:137 Protein Expression Plasmid Vector	PHLAP9258332	Plasmid vector containing HLA-A*68:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:137 protein. This plasmid can be used for constructing HLA-A*68:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:138 Protein Expression Plasmid Vector	PHLAP9258333	Plasmid vector containing HLA-A*68:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:138 protein. This plasmid can be used for constructing HLA-A*68:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:139 Protein Expression Plasmid Vector	PHLAP9258334	Plasmid vector containing HLA-A*68:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:139 protein. This plasmid can be used for constructing HLA-A*68:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:14 Protein Expression Plasmid Vector	PHLAP9258335	Plasmid vector containing HLA-A*68:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:14 protein. This plasmid can be used for constructing HLA-A*68:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:140 Protein Expression Plasmid Vector	PHLAP9258336	Plasmid vector containing HLA-A*68:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:140 protein. This plasmid can be used for constructing HLA-A*68:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:141 Protein Expression Plasmid Vector	PHLAP9258337	Plasmid vector containing HLA-A*68:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:141 protein. This plasmid can be used for constructing HLA-A*68:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:142N Protein Expression Plasmid Vector	PHLAP9258338	Plasmid vector containing HLA-A*68:142N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:142N protein. This plasmid can be used for constructing HLA-A*68:142N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:142N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:143 Protein Expression Plasmid Vector	PHLAP9258339	Plasmid vector containing HLA-A*68:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:143 protein. This plasmid can be used for constructing HLA-A*68:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:144 Protein Expression Plasmid Vector	PHLAP9258340	Plasmid vector containing HLA-A*68:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:144 protein. This plasmid can be used for constructing HLA-A*68:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:145 Protein Expression Plasmid Vector	PHLAP9258341	Plasmid vector containing HLA-A*68:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:145 protein. This plasmid can be used for constructing HLA-A*68:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:146 Protein Expression Plasmid Vector	PHLAP9258342	Plasmid vector containing HLA-A*68:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:146 protein. This plasmid can be used for constructing HLA-A*68:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:147 Protein Expression Plasmid Vector	PHLAP9258343	Plasmid vector containing HLA-A*68:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:147 protein. This plasmid can be used for constructing HLA-A*68:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:148Q Protein Expression Plasmid Vector	PHLAP9258344	Plasmid vector containing HLA-A*68:148Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:148Q protein. This plasmid can be used for constructing HLA-A*68:148Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:148Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:149 Protein Expression Plasmid Vector	PHLAP9258345	Plasmid vector containing HLA-A*68:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:149 protein. This plasmid can be used for constructing HLA-A*68:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:15 Protein Expression Plasmid Vector	PHLAP9258346	Plasmid vector containing HLA-A*68:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:15 protein. This plasmid can be used for constructing HLA-A*68:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:150 Protein Expression Plasmid Vector	PHLAP9258347	Plasmid vector containing HLA-A*68:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:150 protein. This plasmid can be used for constructing HLA-A*68:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:151 Protein Expression Plasmid Vector	PHLAP9258348	Plasmid vector containing HLA-A*68:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:151 protein. This plasmid can be used for constructing HLA-A*68:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:152 Protein Expression Plasmid Vector	PHLAP9258349	Plasmid vector containing HLA-A*68:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:152 protein. This plasmid can be used for constructing HLA-A*68:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:153 Protein Expression Plasmid Vector	PHLAP9258350	Plasmid vector containing HLA-A*68:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:153 protein. This plasmid can be used for constructing HLA-A*68:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:154 Protein Expression Plasmid Vector	PHLAP9258351	Plasmid vector containing HLA-A*68:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:154 protein. This plasmid can be used for constructing HLA-A*68:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:155 Protein Expression Plasmid Vector	PHLAP9258352	Plasmid vector containing HLA-A*68:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:155 protein. This plasmid can be used for constructing HLA-A*68:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:156 Protein Expression Plasmid Vector	PHLAP9258353	Plasmid vector containing HLA-A*68:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:156 protein. This plasmid can be used for constructing HLA-A*68:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:157 Protein Expression Plasmid Vector	PHLAP9258354	Plasmid vector containing HLA-A*68:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:157 protein. This plasmid can be used for constructing HLA-A*68:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:158 Protein Expression Plasmid Vector	PHLAP9258355	Plasmid vector containing HLA-A*68:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:158 protein. This plasmid can be used for constructing HLA-A*68:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:159Q Protein Expression Plasmid Vector	PHLAP9258356	Plasmid vector containing HLA-A*68:159Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:159Q protein. This plasmid can be used for constructing HLA-A*68:159Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:159Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:16 Protein Expression Plasmid Vector	PHLAP9258357	Plasmid vector containing HLA-A*68:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:16 protein. This plasmid can be used for constructing HLA-A*68:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:160 Protein Expression Plasmid Vector	PHLAP9258358	Plasmid vector containing HLA-A*68:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:160 protein. This plasmid can be used for constructing HLA-A*68:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:161 Protein Expression Plasmid Vector	PHLAP9258359	Plasmid vector containing HLA-A*68:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:161 protein. This plasmid can be used for constructing HLA-A*68:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:162 Protein Expression Plasmid Vector	PHLAP9258360	Plasmid vector containing HLA-A*68:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:162 protein. This plasmid can be used for constructing HLA-A*68:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:163 Protein Expression Plasmid Vector	PHLAP9258361	Plasmid vector containing HLA-A*68:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:163 protein. This plasmid can be used for constructing HLA-A*68:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:164:01 Protein Expression Plasmid Vector	PHLAP9258362	Plasmid vector containing HLA-A*68:164:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:164:01 protein. This plasmid can be used for constructing HLA-A*68:164:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:164:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:164:02 Protein Expression Plasmid Vector	PHLAP9258363	Plasmid vector containing HLA-A*68:164:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:164:02 protein. This plasmid can be used for constructing HLA-A*68:164:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:164:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:165 Protein Expression Plasmid Vector	PHLAP9258364	Plasmid vector containing HLA-A*68:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:165 protein. This plasmid can be used for constructing HLA-A*68:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:166 Protein Expression Plasmid Vector	PHLAP9258365	Plasmid vector containing HLA-A*68:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:166 protein. This plasmid can be used for constructing HLA-A*68:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:167 Protein Expression Plasmid Vector	PHLAP9258366	Plasmid vector containing HLA-A*68:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:167 protein. This plasmid can be used for constructing HLA-A*68:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:168 Protein Expression Plasmid Vector	PHLAP9258367	Plasmid vector containing HLA-A*68:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:168 protein. This plasmid can be used for constructing HLA-A*68:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:169 Protein Expression Plasmid Vector	PHLAP9258368	Plasmid vector containing HLA-A*68:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:169 protein. This plasmid can be used for constructing HLA-A*68:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:17:01 Protein Expression Plasmid Vector	PHLAP9258369	Plasmid vector containing HLA-A*68:17:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:17:01 protein. This plasmid can be used for constructing HLA-A*68:17:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:17:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:17:02 Protein Expression Plasmid Vector	PHLAP9258370	Plasmid vector containing HLA-A*68:17:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:17:02 protein. This plasmid can be used for constructing HLA-A*68:17:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:17:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:170 Protein Expression Plasmid Vector	PHLAP9258371	Plasmid vector containing HLA-A*68:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:170 protein. This plasmid can be used for constructing HLA-A*68:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:171:01N Protein Expression Plasmid Vector	PHLAP9258372	Plasmid vector containing HLA-A*68:171:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:171:01N protein. This plasmid can be used for constructing HLA-A*68:171:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:171:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:171:02N Protein Expression Plasmid Vector	PHLAP9258373	Plasmid vector containing HLA-A*68:171:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:171:02N protein. This plasmid can be used for constructing HLA-A*68:171:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:171:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:172 Protein Expression Plasmid Vector	PHLAP9258374	Plasmid vector containing HLA-A*68:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:172 protein. This plasmid can be used for constructing HLA-A*68:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:173 Protein Expression Plasmid Vector	PHLAP9258375	Plasmid vector containing HLA-A*68:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:173 protein. This plasmid can be used for constructing HLA-A*68:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:174 Protein Expression Plasmid Vector	PHLAP9258376	Plasmid vector containing HLA-A*68:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:174 protein. This plasmid can be used for constructing HLA-A*68:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:175:01 Protein Expression Plasmid Vector	PHLAP9258377	Plasmid vector containing HLA-A*68:175:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:175:01 protein. This plasmid can be used for constructing HLA-A*68:175:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:175:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:175:02 Protein Expression Plasmid Vector	PHLAP9258378	Plasmid vector containing HLA-A*68:175:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:175:02 protein. This plasmid can be used for constructing HLA-A*68:175:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:175:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:176:01 Protein Expression Plasmid Vector	PHLAP9258379	Plasmid vector containing HLA-A*68:176:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:176:01 protein. This plasmid can be used for constructing HLA-A*68:176:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:176:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:176:02 Protein Expression Plasmid Vector	PHLAP9258380	Plasmid vector containing HLA-A*68:176:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:176:02 protein. This plasmid can be used for constructing HLA-A*68:176:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:176:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:177 Protein Expression Plasmid Vector	PHLAP9258381	Plasmid vector containing HLA-A*68:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:177 protein. This plasmid can be used for constructing HLA-A*68:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:178 Protein Expression Plasmid Vector	PHLAP9258382	Plasmid vector containing HLA-A*68:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:178 protein. This plasmid can be used for constructing HLA-A*68:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:179 Protein Expression Plasmid Vector	PHLAP9258383	Plasmid vector containing HLA-A*68:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:179 protein. This plasmid can be used for constructing HLA-A*68:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:180 Protein Expression Plasmid Vector	PHLAP9258384	Plasmid vector containing HLA-A*68:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:180 protein. This plasmid can be used for constructing HLA-A*68:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:181N Protein Expression Plasmid Vector	PHLAP9258385	Plasmid vector containing HLA-A*68:181N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:181N protein. This plasmid can be used for constructing HLA-A*68:181N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:181N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:182N Protein Expression Plasmid Vector	PHLAP9258386	Plasmid vector containing HLA-A*68:182N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:182N protein. This plasmid can be used for constructing HLA-A*68:182N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:182N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:183 Protein Expression Plasmid Vector	PHLAP9258387	Plasmid vector containing HLA-A*68:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:183 protein. This plasmid can be used for constructing HLA-A*68:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:184 Protein Expression Plasmid Vector	PHLAP9258388	Plasmid vector containing HLA-A*68:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:184 protein. This plasmid can be used for constructing HLA-A*68:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:185 Protein Expression Plasmid Vector	PHLAP9258389	Plasmid vector containing HLA-A*68:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:185 protein. This plasmid can be used for constructing HLA-A*68:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:186 Protein Expression Plasmid Vector	PHLAP9258390	Plasmid vector containing HLA-A*68:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:186 protein. This plasmid can be used for constructing HLA-A*68:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:187 Protein Expression Plasmid Vector	PHLAP9258391	Plasmid vector containing HLA-A*68:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:187 protein. This plasmid can be used for constructing HLA-A*68:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:188 Protein Expression Plasmid Vector	PHLAP9258392	Plasmid vector containing HLA-A*68:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:188 protein. This plasmid can be used for constructing HLA-A*68:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:189 Protein Expression Plasmid Vector	PHLAP9258393	Plasmid vector containing HLA-A*68:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:189 protein. This plasmid can be used for constructing HLA-A*68:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:18N Protein Expression Plasmid Vector	PHLAP9258394	Plasmid vector containing HLA-A*68:18N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:18N protein. This plasmid can be used for constructing HLA-A*68:18N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:18N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:19 Protein Expression Plasmid Vector	PHLAP9258395	Plasmid vector containing HLA-A*68:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:19 protein. This plasmid can be used for constructing HLA-A*68:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:190:01 Protein Expression Plasmid Vector	PHLAP9258396	Plasmid vector containing HLA-A*68:190:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:190:01 protein. This plasmid can be used for constructing HLA-A*68:190:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:190:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:190:02 Protein Expression Plasmid Vector	PHLAP9258397	Plasmid vector containing HLA-A*68:190:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:190:02 protein. This plasmid can be used for constructing HLA-A*68:190:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:190:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:191 Protein Expression Plasmid Vector	PHLAP9258398	Plasmid vector containing HLA-A*68:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:191 protein. This plasmid can be used for constructing HLA-A*68:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:192 Protein Expression Plasmid Vector	PHLAP9258399	Plasmid vector containing HLA-A*68:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:192 protein. This plasmid can be used for constructing HLA-A*68:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:193 Protein Expression Plasmid Vector	PHLAP9258400	Plasmid vector containing HLA-A*68:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:193 protein. This plasmid can be used for constructing HLA-A*68:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:194 Protein Expression Plasmid Vector	PHLAP9258401	Plasmid vector containing HLA-A*68:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:194 protein. This plasmid can be used for constructing HLA-A*68:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:195 Protein Expression Plasmid Vector	PHLAP9258402	Plasmid vector containing HLA-A*68:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:195 protein. This plasmid can be used for constructing HLA-A*68:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:196 Protein Expression Plasmid Vector	PHLAP9258403	Plasmid vector containing HLA-A*68:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:196 protein. This plasmid can be used for constructing HLA-A*68:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:197 Protein Expression Plasmid Vector	PHLAP9258404	Plasmid vector containing HLA-A*68:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:197 protein. This plasmid can be used for constructing HLA-A*68:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:198 Protein Expression Plasmid Vector	PHLAP9258405	Plasmid vector containing HLA-A*68:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:198 protein. This plasmid can be used for constructing HLA-A*68:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:199N Protein Expression Plasmid Vector	PHLAP9258406	Plasmid vector containing HLA-A*68:199N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:199N protein. This plasmid can be used for constructing HLA-A*68:199N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:199N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:20 Protein Expression Plasmid Vector	PHLAP9258407	Plasmid vector containing HLA-A*68:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:20 protein. This plasmid can be used for constructing HLA-A*68:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:200 Protein Expression Plasmid Vector	PHLAP9258408	Plasmid vector containing HLA-A*68:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:200 protein. This plasmid can be used for constructing HLA-A*68:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:201 Protein Expression Plasmid Vector	PHLAP9258409	Plasmid vector containing HLA-A*68:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:201 protein. This plasmid can be used for constructing HLA-A*68:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:202 Protein Expression Plasmid Vector	PHLAP9258410	Plasmid vector containing HLA-A*68:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:202 protein. This plasmid can be used for constructing HLA-A*68:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:203N Protein Expression Plasmid Vector	PHLAP9258411	Plasmid vector containing HLA-A*68:203N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:203N protein. This plasmid can be used for constructing HLA-A*68:203N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:203N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:204 Protein Expression Plasmid Vector	PHLAP9258412	Plasmid vector containing HLA-A*68:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:204 protein. This plasmid can be used for constructing HLA-A*68:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:205N Protein Expression Plasmid Vector	PHLAP9258413	Plasmid vector containing HLA-A*68:205N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:205N protein. This plasmid can be used for constructing HLA-A*68:205N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:205N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:206 Protein Expression Plasmid Vector	PHLAP9258414	Plasmid vector containing HLA-A*68:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:206 protein. This plasmid can be used for constructing HLA-A*68:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:207 Protein Expression Plasmid Vector	PHLAP9258415	Plasmid vector containing HLA-A*68:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:207 protein. This plasmid can be used for constructing HLA-A*68:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:208 Protein Expression Plasmid Vector	PHLAP9258416	Plasmid vector containing HLA-A*68:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:208 protein. This plasmid can be used for constructing HLA-A*68:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:209 Protein Expression Plasmid Vector	PHLAP9258417	Plasmid vector containing HLA-A*68:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:209 protein. This plasmid can be used for constructing HLA-A*68:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:21:01 Protein Expression Plasmid Vector	PHLAP9258418	Plasmid vector containing HLA-A*68:21:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:21:01 protein. This plasmid can be used for constructing HLA-A*68:21:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:21:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:21:02 Protein Expression Plasmid Vector	PHLAP9258419	Plasmid vector containing HLA-A*68:21:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:21:02 protein. This plasmid can be used for constructing HLA-A*68:21:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:21:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:21:03 Protein Expression Plasmid Vector	PHLAP9258420	Plasmid vector containing HLA-A*68:21:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:21:03 protein. This plasmid can be used for constructing HLA-A*68:21:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:21:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:210N Protein Expression Plasmid Vector	PHLAP9258421	Plasmid vector containing HLA-A*68:210N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:210N protein. This plasmid can be used for constructing HLA-A*68:210N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:210N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:211 Protein Expression Plasmid Vector	PHLAP9258422	Plasmid vector containing HLA-A*68:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:211 protein. This plasmid can be used for constructing HLA-A*68:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:212 Protein Expression Plasmid Vector	PHLAP9258423	Plasmid vector containing HLA-A*68:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:212 protein. This plasmid can be used for constructing HLA-A*68:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:213N Protein Expression Plasmid Vector	PHLAP9258424	Plasmid vector containing HLA-A*68:213N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:213N protein. This plasmid can be used for constructing HLA-A*68:213N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:213N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:214 Protein Expression Plasmid Vector	PHLAP9258425	Plasmid vector containing HLA-A*68:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:214 protein. This plasmid can be used for constructing HLA-A*68:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:215 Protein Expression Plasmid Vector	PHLAP9258426	Plasmid vector containing HLA-A*68:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:215 protein. This plasmid can be used for constructing HLA-A*68:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:216N Protein Expression Plasmid Vector	PHLAP9258427	Plasmid vector containing HLA-A*68:216N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:216N protein. This plasmid can be used for constructing HLA-A*68:216N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:216N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:217 Protein Expression Plasmid Vector	PHLAP9258428	Plasmid vector containing HLA-A*68:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:217 protein. This plasmid can be used for constructing HLA-A*68:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:218 Protein Expression Plasmid Vector	PHLAP9258429	Plasmid vector containing HLA-A*68:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:218 protein. This plasmid can be used for constructing HLA-A*68:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:219 Protein Expression Plasmid Vector	PHLAP9258430	Plasmid vector containing HLA-A*68:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:219 protein. This plasmid can be used for constructing HLA-A*68:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:22 Protein Expression Plasmid Vector	PHLAP9258431	Plasmid vector containing HLA-A*68:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:22 protein. This plasmid can be used for constructing HLA-A*68:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:220 Protein Expression Plasmid Vector	PHLAP9258432	Plasmid vector containing HLA-A*68:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:220 protein. This plasmid can be used for constructing HLA-A*68:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:221 Protein Expression Plasmid Vector	PHLAP9258433	Plasmid vector containing HLA-A*68:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:221 protein. This plasmid can be used for constructing HLA-A*68:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:222 Protein Expression Plasmid Vector	PHLAP9258434	Plasmid vector containing HLA-A*68:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:222 protein. This plasmid can be used for constructing HLA-A*68:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:223 Protein Expression Plasmid Vector	PHLAP9258435	Plasmid vector containing HLA-A*68:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:223 protein. This plasmid can be used for constructing HLA-A*68:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:224 Protein Expression Plasmid Vector	PHLAP9258436	Plasmid vector containing HLA-A*68:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:224 protein. This plasmid can be used for constructing HLA-A*68:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:225 Protein Expression Plasmid Vector	PHLAP9258437	Plasmid vector containing HLA-A*68:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:225 protein. This plasmid can be used for constructing HLA-A*68:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:226 Protein Expression Plasmid Vector	PHLAP9258438	Plasmid vector containing HLA-A*68:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:226 protein. This plasmid can be used for constructing HLA-A*68:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:227 Protein Expression Plasmid Vector	PHLAP9258439	Plasmid vector containing HLA-A*68:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:227 protein. This plasmid can be used for constructing HLA-A*68:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:228 Protein Expression Plasmid Vector	PHLAP9258440	Plasmid vector containing HLA-A*68:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:228 protein. This plasmid can be used for constructing HLA-A*68:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:229 Protein Expression Plasmid Vector	PHLAP9258441	Plasmid vector containing HLA-A*68:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:229 protein. This plasmid can be used for constructing HLA-A*68:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:23:01 Protein Expression Plasmid Vector	PHLAP9258442	Plasmid vector containing HLA-A*68:23:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:23:01 protein. This plasmid can be used for constructing HLA-A*68:23:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:23:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:23:02 Protein Expression Plasmid Vector	PHLAP9258443	Plasmid vector containing HLA-A*68:23:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:23:02 protein. This plasmid can be used for constructing HLA-A*68:23:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:23:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:230 Protein Expression Plasmid Vector	PHLAP9258444	Plasmid vector containing HLA-A*68:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:230 protein. This plasmid can be used for constructing HLA-A*68:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:231 Protein Expression Plasmid Vector	PHLAP9258445	Plasmid vector containing HLA-A*68:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:231 protein. This plasmid can be used for constructing HLA-A*68:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:232 Protein Expression Plasmid Vector	PHLAP9258446	Plasmid vector containing HLA-A*68:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:232 protein. This plasmid can be used for constructing HLA-A*68:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:233 Protein Expression Plasmid Vector	PHLAP9258447	Plasmid vector containing HLA-A*68:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:233 protein. This plasmid can be used for constructing HLA-A*68:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:234 Protein Expression Plasmid Vector	PHLAP9258448	Plasmid vector containing HLA-A*68:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:234 protein. This plasmid can be used for constructing HLA-A*68:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:235 Protein Expression Plasmid Vector	PHLAP9258449	Plasmid vector containing HLA-A*68:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:235 protein. This plasmid can be used for constructing HLA-A*68:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:236N Protein Expression Plasmid Vector	PHLAP9258450	Plasmid vector containing HLA-A*68:236N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:236N protein. This plasmid can be used for constructing HLA-A*68:236N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:236N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:237 Protein Expression Plasmid Vector	PHLAP9258451	Plasmid vector containing HLA-A*68:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:237 protein. This plasmid can be used for constructing HLA-A*68:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:238 Protein Expression Plasmid Vector	PHLAP9258452	Plasmid vector containing HLA-A*68:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:238 protein. This plasmid can be used for constructing HLA-A*68:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:239 Protein Expression Plasmid Vector	PHLAP9258453	Plasmid vector containing HLA-A*68:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:239 protein. This plasmid can be used for constructing HLA-A*68:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:24 Protein Expression Plasmid Vector	PHLAP9258454	Plasmid vector containing HLA-A*68:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:24 protein. This plasmid can be used for constructing HLA-A*68:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:240 Protein Expression Plasmid Vector	PHLAP9258455	Plasmid vector containing HLA-A*68:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:240 protein. This plasmid can be used for constructing HLA-A*68:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:241 Protein Expression Plasmid Vector	PHLAP9258456	Plasmid vector containing HLA-A*68:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:241 protein. This plasmid can be used for constructing HLA-A*68:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:242 Protein Expression Plasmid Vector	PHLAP9258457	Plasmid vector containing HLA-A*68:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:242 protein. This plasmid can be used for constructing HLA-A*68:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:243 Protein Expression Plasmid Vector	PHLAP9258458	Plasmid vector containing HLA-A*68:243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:243 protein. This plasmid can be used for constructing HLA-A*68:243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:244:01 Protein Expression Plasmid Vector	PHLAP9258459	Plasmid vector containing HLA-A*68:244:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:244:01 protein. This plasmid can be used for constructing HLA-A*68:244:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:244:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:244:02 Protein Expression Plasmid Vector	PHLAP9258460	Plasmid vector containing HLA-A*68:244:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:244:02 protein. This plasmid can be used for constructing HLA-A*68:244:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:244:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:245N Protein Expression Plasmid Vector	PHLAP9258461	Plasmid vector containing HLA-A*68:245N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:245N protein. This plasmid can be used for constructing HLA-A*68:245N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:245N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:246 Protein Expression Plasmid Vector	PHLAP9258462	Plasmid vector containing HLA-A*68:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:246 protein. This plasmid can be used for constructing HLA-A*68:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:247 Protein Expression Plasmid Vector	PHLAP9258463	Plasmid vector containing HLA-A*68:247 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:247 protein. This plasmid can be used for constructing HLA-A*68:247 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:247 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:248 Protein Expression Plasmid Vector	PHLAP9258464	Plasmid vector containing HLA-A*68:248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:248 protein. This plasmid can be used for constructing HLA-A*68:248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:249 Protein Expression Plasmid Vector	PHLAP9258465	Plasmid vector containing HLA-A*68:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:249 protein. This plasmid can be used for constructing HLA-A*68:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:25 Protein Expression Plasmid Vector	PHLAP9258466	Plasmid vector containing HLA-A*68:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:25 protein. This plasmid can be used for constructing HLA-A*68:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:250 Protein Expression Plasmid Vector	PHLAP9258467	Plasmid vector containing HLA-A*68:250 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:250 protein. This plasmid can be used for constructing HLA-A*68:250 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:250 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:251N Protein Expression Plasmid Vector	PHLAP9258468	Plasmid vector containing HLA-A*68:251N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:251N protein. This plasmid can be used for constructing HLA-A*68:251N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:251N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:252 Protein Expression Plasmid Vector	PHLAP9258469	Plasmid vector containing HLA-A*68:252 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:252 protein. This plasmid can be used for constructing HLA-A*68:252 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:252 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:253 Protein Expression Plasmid Vector	PHLAP9258470	Plasmid vector containing HLA-A*68:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:253 protein. This plasmid can be used for constructing HLA-A*68:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:254 Protein Expression Plasmid Vector	PHLAP9258471	Plasmid vector containing HLA-A*68:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:254 protein. This plasmid can be used for constructing HLA-A*68:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:255 Protein Expression Plasmid Vector	PHLAP9258472	Plasmid vector containing HLA-A*68:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:255 protein. This plasmid can be used for constructing HLA-A*68:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:256 Protein Expression Plasmid Vector	PHLAP9258473	Plasmid vector containing HLA-A*68:256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:256 protein. This plasmid can be used for constructing HLA-A*68:256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:257 Protein Expression Plasmid Vector	PHLAP9258474	Plasmid vector containing HLA-A*68:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:257 protein. This plasmid can be used for constructing HLA-A*68:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:258 Protein Expression Plasmid Vector	PHLAP9258475	Plasmid vector containing HLA-A*68:258 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:258 protein. This plasmid can be used for constructing HLA-A*68:258 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:258 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:259 Protein Expression Plasmid Vector	PHLAP9258476	Plasmid vector containing HLA-A*68:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:259 protein. This plasmid can be used for constructing HLA-A*68:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:26 Protein Expression Plasmid Vector	PHLAP9258477	Plasmid vector containing HLA-A*68:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:26 protein. This plasmid can be used for constructing HLA-A*68:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:260 Protein Expression Plasmid Vector	PHLAP9258478	Plasmid vector containing HLA-A*68:260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:260 protein. This plasmid can be used for constructing HLA-A*68:260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:261 Protein Expression Plasmid Vector	PHLAP9258479	Plasmid vector containing HLA-A*68:261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:261 protein. This plasmid can be used for constructing HLA-A*68:261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:262 Protein Expression Plasmid Vector	PHLAP9258480	Plasmid vector containing HLA-A*68:262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:262 protein. This plasmid can be used for constructing HLA-A*68:262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:263Q Protein Expression Plasmid Vector	PHLAP9258481	Plasmid vector containing HLA-A*68:263Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:263Q protein. This plasmid can be used for constructing HLA-A*68:263Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:263Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:264 Protein Expression Plasmid Vector	PHLAP9258482	Plasmid vector containing HLA-A*68:264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:264 protein. This plasmid can be used for constructing HLA-A*68:264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:265 Protein Expression Plasmid Vector	PHLAP9258483	Plasmid vector containing HLA-A*68:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:265 protein. This plasmid can be used for constructing HLA-A*68:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:266N Protein Expression Plasmid Vector	PHLAP9258484	Plasmid vector containing HLA-A*68:266N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:266N protein. This plasmid can be used for constructing HLA-A*68:266N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:266N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:267N Protein Expression Plasmid Vector	PHLAP9258485	Plasmid vector containing HLA-A*68:267N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:267N protein. This plasmid can be used for constructing HLA-A*68:267N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:267N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:268 Protein Expression Plasmid Vector	PHLAP9258486	Plasmid vector containing HLA-A*68:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:268 protein. This plasmid can be used for constructing HLA-A*68:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:269N Protein Expression Plasmid Vector	PHLAP9258487	Plasmid vector containing HLA-A*68:269N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:269N protein. This plasmid can be used for constructing HLA-A*68:269N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:269N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:27:01 Protein Expression Plasmid Vector	PHLAP9258488	Plasmid vector containing HLA-A*68:27:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:27:01 protein. This plasmid can be used for constructing HLA-A*68:27:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:27:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:27:02 Protein Expression Plasmid Vector	PHLAP9258489	Plasmid vector containing HLA-A*68:27:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:27:02 protein. This plasmid can be used for constructing HLA-A*68:27:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:27:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:270 Protein Expression Plasmid Vector	PHLAP9258490	Plasmid vector containing HLA-A*68:270 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:270 protein. This plasmid can be used for constructing HLA-A*68:270 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:270 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:271 Protein Expression Plasmid Vector	PHLAP9258491	Plasmid vector containing HLA-A*68:271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:271 protein. This plasmid can be used for constructing HLA-A*68:271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:272 Protein Expression Plasmid Vector	PHLAP9258492	Plasmid vector containing HLA-A*68:272 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:272 protein. This plasmid can be used for constructing HLA-A*68:272 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:272 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:273 Protein Expression Plasmid Vector	PHLAP9258493	Plasmid vector containing HLA-A*68:273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:273 protein. This plasmid can be used for constructing HLA-A*68:273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:274 Protein Expression Plasmid Vector	PHLAP9258494	Plasmid vector containing HLA-A*68:274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:274 protein. This plasmid can be used for constructing HLA-A*68:274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:275 Protein Expression Plasmid Vector	PHLAP9258495	Plasmid vector containing HLA-A*68:275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:275 protein. This plasmid can be used for constructing HLA-A*68:275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:276Q Protein Expression Plasmid Vector	PHLAP9258496	Plasmid vector containing HLA-A*68:276Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:276Q protein. This plasmid can be used for constructing HLA-A*68:276Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:276Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:277 Protein Expression Plasmid Vector	PHLAP9258497	Plasmid vector containing HLA-A*68:277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:277 protein. This plasmid can be used for constructing HLA-A*68:277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:278 Protein Expression Plasmid Vector	PHLAP9258498	Plasmid vector containing HLA-A*68:278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:278 protein. This plasmid can be used for constructing HLA-A*68:278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:279 Protein Expression Plasmid Vector	PHLAP9258499	Plasmid vector containing HLA-A*68:279 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:279 protein. This plasmid can be used for constructing HLA-A*68:279 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:279 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:28 Protein Expression Plasmid Vector	PHLAP9258500	Plasmid vector containing HLA-A*68:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:28 protein. This plasmid can be used for constructing HLA-A*68:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:280 Protein Expression Plasmid Vector	PHLAP9258501	Plasmid vector containing HLA-A*68:280 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:280 protein. This plasmid can be used for constructing HLA-A*68:280 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:280 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:281N Protein Expression Plasmid Vector	PHLAP9258502	Plasmid vector containing HLA-A*68:281N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:281N protein. This plasmid can be used for constructing HLA-A*68:281N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:281N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:282 Protein Expression Plasmid Vector	PHLAP9258503	Plasmid vector containing HLA-A*68:282 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:282 protein. This plasmid can be used for constructing HLA-A*68:282 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:282 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:283 Protein Expression Plasmid Vector	PHLAP9258504	Plasmid vector containing HLA-A*68:283 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:283 protein. This plasmid can be used for constructing HLA-A*68:283 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:283 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:284 Protein Expression Plasmid Vector	PHLAP9258505	Plasmid vector containing HLA-A*68:284 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:284 protein. This plasmid can be used for constructing HLA-A*68:284 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:284 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:285 Protein Expression Plasmid Vector	PHLAP9258506	Plasmid vector containing HLA-A*68:285 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:285 protein. This plasmid can be used for constructing HLA-A*68:285 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:285 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:286 Protein Expression Plasmid Vector	PHLAP9258507	Plasmid vector containing HLA-A*68:286 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:286 protein. This plasmid can be used for constructing HLA-A*68:286 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:286 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:287 Protein Expression Plasmid Vector	PHLAP9258508	Plasmid vector containing HLA-A*68:287 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:287 protein. This plasmid can be used for constructing HLA-A*68:287 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:287 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:288 Protein Expression Plasmid Vector	PHLAP9258509	Plasmid vector containing HLA-A*68:288 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:288 protein. This plasmid can be used for constructing HLA-A*68:288 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:288 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:289 Protein Expression Plasmid Vector	PHLAP9258510	Plasmid vector containing HLA-A*68:289 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:289 protein. This plasmid can be used for constructing HLA-A*68:289 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:289 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:29 Protein Expression Plasmid Vector	PHLAP9258511	Plasmid vector containing HLA-A*68:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:29 protein. This plasmid can be used for constructing HLA-A*68:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:290 Protein Expression Plasmid Vector	PHLAP9258512	Plasmid vector containing HLA-A*68:290 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:290 protein. This plasmid can be used for constructing HLA-A*68:290 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:290 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:291 Protein Expression Plasmid Vector	PHLAP9258513	Plasmid vector containing HLA-A*68:291 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:291 protein. This plasmid can be used for constructing HLA-A*68:291 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:291 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:292N Protein Expression Plasmid Vector	PHLAP9258514	Plasmid vector containing HLA-A*68:292N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:292N protein. This plasmid can be used for constructing HLA-A*68:292N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:292N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:293Q Protein Expression Plasmid Vector	PHLAP9258515	Plasmid vector containing HLA-A*68:293Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:293Q protein. This plasmid can be used for constructing HLA-A*68:293Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:293Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:294 Protein Expression Plasmid Vector	PHLAP9258516	Plasmid vector containing HLA-A*68:294 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:294 protein. This plasmid can be used for constructing HLA-A*68:294 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:294 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:295 Protein Expression Plasmid Vector	PHLAP9258517	Plasmid vector containing HLA-A*68:295 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:295 protein. This plasmid can be used for constructing HLA-A*68:295 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:295 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:296 Protein Expression Plasmid Vector	PHLAP9258518	Plasmid vector containing HLA-A*68:296 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:296 protein. This plasmid can be used for constructing HLA-A*68:296 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:296 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:297 Protein Expression Plasmid Vector	PHLAP9258519	Plasmid vector containing HLA-A*68:297 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:297 protein. This plasmid can be used for constructing HLA-A*68:297 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:297 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:298 Protein Expression Plasmid Vector	PHLAP9258520	Plasmid vector containing HLA-A*68:298 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:298 protein. This plasmid can be used for constructing HLA-A*68:298 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:298 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:299 Protein Expression Plasmid Vector	PHLAP9258521	Plasmid vector containing HLA-A*68:299 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:299 protein. This plasmid can be used for constructing HLA-A*68:299 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:299 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:30 Protein Expression Plasmid Vector	PHLAP9258522	Plasmid vector containing HLA-A*68:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:30 protein. This plasmid can be used for constructing HLA-A*68:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:300 Protein Expression Plasmid Vector	PHLAP9258523	Plasmid vector containing HLA-A*68:300 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:300 protein. This plasmid can be used for constructing HLA-A*68:300 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:300 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:301 Protein Expression Plasmid Vector	PHLAP9258524	Plasmid vector containing HLA-A*68:301 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:301 protein. This plasmid can be used for constructing HLA-A*68:301 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:301 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:302 Protein Expression Plasmid Vector	PHLAP9258525	Plasmid vector containing HLA-A*68:302 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:302 protein. This plasmid can be used for constructing HLA-A*68:302 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:302 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:303 Protein Expression Plasmid Vector	PHLAP9258526	Plasmid vector containing HLA-A*68:303 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:303 protein. This plasmid can be used for constructing HLA-A*68:303 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:303 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:304 Protein Expression Plasmid Vector	PHLAP9258527	Plasmid vector containing HLA-A*68:304 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:304 protein. This plasmid can be used for constructing HLA-A*68:304 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:304 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:305 Protein Expression Plasmid Vector	PHLAP9258528	Plasmid vector containing HLA-A*68:305 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:305 protein. This plasmid can be used for constructing HLA-A*68:305 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:305 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:306 Protein Expression Plasmid Vector	PHLAP9258529	Plasmid vector containing HLA-A*68:306 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:306 protein. This plasmid can be used for constructing HLA-A*68:306 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:306 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:307 Protein Expression Plasmid Vector	PHLAP9258530	Plasmid vector containing HLA-A*68:307 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:307 protein. This plasmid can be used for constructing HLA-A*68:307 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:307 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:308 Protein Expression Plasmid Vector	PHLAP9258531	Plasmid vector containing HLA-A*68:308 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:308 protein. This plasmid can be used for constructing HLA-A*68:308 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:308 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:309 Protein Expression Plasmid Vector	PHLAP9258532	Plasmid vector containing HLA-A*68:309 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:309 protein. This plasmid can be used for constructing HLA-A*68:309 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:309 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:31 Protein Expression Plasmid Vector	PHLAP9258533	Plasmid vector containing HLA-A*68:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:31 protein. This plasmid can be used for constructing HLA-A*68:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:310 Protein Expression Plasmid Vector	PHLAP9258534	Plasmid vector containing HLA-A*68:310 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:310 protein. This plasmid can be used for constructing HLA-A*68:310 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:310 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:311 Protein Expression Plasmid Vector	PHLAP9258535	Plasmid vector containing HLA-A*68:311 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:311 protein. This plasmid can be used for constructing HLA-A*68:311 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:311 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:312 Protein Expression Plasmid Vector	PHLAP9258536	Plasmid vector containing HLA-A*68:312 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:312 protein. This plasmid can be used for constructing HLA-A*68:312 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:312 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:313 Protein Expression Plasmid Vector	PHLAP9258537	Plasmid vector containing HLA-A*68:313 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:313 protein. This plasmid can be used for constructing HLA-A*68:313 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:313 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:314 Protein Expression Plasmid Vector	PHLAP9258538	Plasmid vector containing HLA-A*68:314 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:314 protein. This plasmid can be used for constructing HLA-A*68:314 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:314 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:315 Protein Expression Plasmid Vector	PHLAP9258539	Plasmid vector containing HLA-A*68:315 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:315 protein. This plasmid can be used for constructing HLA-A*68:315 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:315 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:316 Protein Expression Plasmid Vector	PHLAP9258540	Plasmid vector containing HLA-A*68:316 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:316 protein. This plasmid can be used for constructing HLA-A*68:316 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:316 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:317 Protein Expression Plasmid Vector	PHLAP9258541	Plasmid vector containing HLA-A*68:317 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:317 protein. This plasmid can be used for constructing HLA-A*68:317 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:317 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:318 Protein Expression Plasmid Vector	PHLAP9258542	Plasmid vector containing HLA-A*68:318 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:318 protein. This plasmid can be used for constructing HLA-A*68:318 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:318 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:319 Protein Expression Plasmid Vector	PHLAP9258543	Plasmid vector containing HLA-A*68:319 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:319 protein. This plasmid can be used for constructing HLA-A*68:319 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:319 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:32 Protein Expression Plasmid Vector	PHLAP9258544	Plasmid vector containing HLA-A*68:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:32 protein. This plasmid can be used for constructing HLA-A*68:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:320 Protein Expression Plasmid Vector	PHLAP9258545	Plasmid vector containing HLA-A*68:320 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:320 protein. This plasmid can be used for constructing HLA-A*68:320 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:320 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:321 Protein Expression Plasmid Vector	PHLAP9258546	Plasmid vector containing HLA-A*68:321 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:321 protein. This plasmid can be used for constructing HLA-A*68:321 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:321 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:322 Protein Expression Plasmid Vector	PHLAP9258547	Plasmid vector containing HLA-A*68:322 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:322 protein. This plasmid can be used for constructing HLA-A*68:322 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:322 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:323 Protein Expression Plasmid Vector	PHLAP9258548	Plasmid vector containing HLA-A*68:323 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:323 protein. This plasmid can be used for constructing HLA-A*68:323 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:323 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:324 Protein Expression Plasmid Vector	PHLAP9258549	Plasmid vector containing HLA-A*68:324 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:324 protein. This plasmid can be used for constructing HLA-A*68:324 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:324 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:325 Protein Expression Plasmid Vector	PHLAP9258550	Plasmid vector containing HLA-A*68:325 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:325 protein. This plasmid can be used for constructing HLA-A*68:325 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:325 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:326 Protein Expression Plasmid Vector	PHLAP9258551	Plasmid vector containing HLA-A*68:326 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:326 protein. This plasmid can be used for constructing HLA-A*68:326 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:326 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:327 Protein Expression Plasmid Vector	PHLAP9258552	Plasmid vector containing HLA-A*68:327 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:327 protein. This plasmid can be used for constructing HLA-A*68:327 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:327 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:328 Protein Expression Plasmid Vector	PHLAP9258553	Plasmid vector containing HLA-A*68:328 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:328 protein. This plasmid can be used for constructing HLA-A*68:328 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:328 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:329 Protein Expression Plasmid Vector	PHLAP9258554	Plasmid vector containing HLA-A*68:329 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:329 protein. This plasmid can be used for constructing HLA-A*68:329 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:329 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:33 Protein Expression Plasmid Vector	PHLAP9258555	Plasmid vector containing HLA-A*68:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:33 protein. This plasmid can be used for constructing HLA-A*68:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:330 Protein Expression Plasmid Vector	PHLAP9258556	Plasmid vector containing HLA-A*68:330 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:330 protein. This plasmid can be used for constructing HLA-A*68:330 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:330 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:331 Protein Expression Plasmid Vector	PHLAP9258557	Plasmid vector containing HLA-A*68:331 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:331 protein. This plasmid can be used for constructing HLA-A*68:331 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:331 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:332 Protein Expression Plasmid Vector	PHLAP9258558	Plasmid vector containing HLA-A*68:332 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:332 protein. This plasmid can be used for constructing HLA-A*68:332 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:332 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:333 Protein Expression Plasmid Vector	PHLAP9258559	Plasmid vector containing HLA-A*68:333 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:333 protein. This plasmid can be used for constructing HLA-A*68:333 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:333 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:334 Protein Expression Plasmid Vector	PHLAP9258560	Plasmid vector containing HLA-A*68:334 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:334 protein. This plasmid can be used for constructing HLA-A*68:334 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:334 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:34 Protein Expression Plasmid Vector	PHLAP9258561	Plasmid vector containing HLA-A*68:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:34 protein. This plasmid can be used for constructing HLA-A*68:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:35:01:01 Protein Expression Plasmid Vector	PHLAP9258562	Plasmid vector containing HLA-A*68:35:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:35:01:01 protein. This plasmid can be used for constructing HLA-A*68:35:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:35:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:35:01:02 Protein Expression Plasmid Vector	PHLAP9258563	Plasmid vector containing HLA-A*68:35:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:35:01:02 protein. This plasmid can be used for constructing HLA-A*68:35:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:35:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:36 Protein Expression Plasmid Vector	PHLAP9258564	Plasmid vector containing HLA-A*68:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:36 protein. This plasmid can be used for constructing HLA-A*68:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:37 Protein Expression Plasmid Vector	PHLAP9258565	Plasmid vector containing HLA-A*68:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:37 protein. This plasmid can be used for constructing HLA-A*68:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:38 Protein Expression Plasmid Vector	PHLAP9258566	Plasmid vector containing HLA-A*68:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:38 protein. This plasmid can be used for constructing HLA-A*68:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:39 Protein Expression Plasmid Vector	PHLAP9258567	Plasmid vector containing HLA-A*68:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:39 protein. This plasmid can be used for constructing HLA-A*68:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:40 Protein Expression Plasmid Vector	PHLAP9258568	Plasmid vector containing HLA-A*68:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:40 protein. This plasmid can be used for constructing HLA-A*68:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:41 Protein Expression Plasmid Vector	PHLAP9258569	Plasmid vector containing HLA-A*68:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:41 protein. This plasmid can be used for constructing HLA-A*68:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:42 Protein Expression Plasmid Vector	PHLAP9258570	Plasmid vector containing HLA-A*68:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:42 protein. This plasmid can be used for constructing HLA-A*68:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:43:01 Protein Expression Plasmid Vector	PHLAP9258571	Plasmid vector containing HLA-A*68:43:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:43:01 protein. This plasmid can be used for constructing HLA-A*68:43:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:43:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:43:02 Protein Expression Plasmid Vector	PHLAP9258572	Plasmid vector containing HLA-A*68:43:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:43:02 protein. This plasmid can be used for constructing HLA-A*68:43:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:43:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:44 Protein Expression Plasmid Vector	PHLAP9258573	Plasmid vector containing HLA-A*68:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:44 protein. This plasmid can be used for constructing HLA-A*68:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:45 Protein Expression Plasmid Vector	PHLAP9258574	Plasmid vector containing HLA-A*68:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:45 protein. This plasmid can be used for constructing HLA-A*68:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:46 Protein Expression Plasmid Vector	PHLAP9258575	Plasmid vector containing HLA-A*68:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:46 protein. This plasmid can be used for constructing HLA-A*68:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:47 Protein Expression Plasmid Vector	PHLAP9258576	Plasmid vector containing HLA-A*68:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:47 protein. This plasmid can be used for constructing HLA-A*68:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:48 Protein Expression Plasmid Vector	PHLAP9258577	Plasmid vector containing HLA-A*68:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:48 protein. This plasmid can be used for constructing HLA-A*68:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:49N Protein Expression Plasmid Vector	PHLAP9258578	Plasmid vector containing HLA-A*68:49N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:49N protein. This plasmid can be used for constructing HLA-A*68:49N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:49N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:50:01 Protein Expression Plasmid Vector	PHLAP9258579	Plasmid vector containing HLA-A*68:50:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:50:01 protein. This plasmid can be used for constructing HLA-A*68:50:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:50:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:50:02 Protein Expression Plasmid Vector	PHLAP9258580	Plasmid vector containing HLA-A*68:50:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:50:02 protein. This plasmid can be used for constructing HLA-A*68:50:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:50:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:51 Protein Expression Plasmid Vector	PHLAP9258581	Plasmid vector containing HLA-A*68:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:51 protein. This plasmid can be used for constructing HLA-A*68:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:52 Protein Expression Plasmid Vector	PHLAP9258582	Plasmid vector containing HLA-A*68:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:52 protein. This plasmid can be used for constructing HLA-A*68:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:53 Protein Expression Plasmid Vector	PHLAP9258583	Plasmid vector containing HLA-A*68:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:53 protein. This plasmid can be used for constructing HLA-A*68:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:54 Protein Expression Plasmid Vector	PHLAP9258584	Plasmid vector containing HLA-A*68:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:54 protein. This plasmid can be used for constructing HLA-A*68:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:55:01 Protein Expression Plasmid Vector	PHLAP9258585	Plasmid vector containing HLA-A*68:55:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:55:01 protein. This plasmid can be used for constructing HLA-A*68:55:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:55:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:55:02 Protein Expression Plasmid Vector	PHLAP9258586	Plasmid vector containing HLA-A*68:55:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:55:02 protein. This plasmid can be used for constructing HLA-A*68:55:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:55:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:56:01 Protein Expression Plasmid Vector	PHLAP9258587	Plasmid vector containing HLA-A*68:56:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:56:01 protein. This plasmid can be used for constructing HLA-A*68:56:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:56:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:56:02 Protein Expression Plasmid Vector	PHLAP9258588	Plasmid vector containing HLA-A*68:56:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:56:02 protein. This plasmid can be used for constructing HLA-A*68:56:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:56:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:57 Protein Expression Plasmid Vector	PHLAP9258589	Plasmid vector containing HLA-A*68:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:57 protein. This plasmid can be used for constructing HLA-A*68:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:58:01 Protein Expression Plasmid Vector	PHLAP9258590	Plasmid vector containing HLA-A*68:58:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:58:01 protein. This plasmid can be used for constructing HLA-A*68:58:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:58:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:58:02 Protein Expression Plasmid Vector	PHLAP9258591	Plasmid vector containing HLA-A*68:58:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:58:02 protein. This plasmid can be used for constructing HLA-A*68:58:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:58:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:59N Protein Expression Plasmid Vector	PHLAP9258592	Plasmid vector containing HLA-A*68:59N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:59N protein. This plasmid can be used for constructing HLA-A*68:59N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:59N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:60 Protein Expression Plasmid Vector	PHLAP9258593	Plasmid vector containing HLA-A*68:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:60 protein. This plasmid can be used for constructing HLA-A*68:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:61 Protein Expression Plasmid Vector	PHLAP9258594	Plasmid vector containing HLA-A*68:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:61 protein. This plasmid can be used for constructing HLA-A*68:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:62 Protein Expression Plasmid Vector	PHLAP9258595	Plasmid vector containing HLA-A*68:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:62 protein. This plasmid can be used for constructing HLA-A*68:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:63 Protein Expression Plasmid Vector	PHLAP9258596	Plasmid vector containing HLA-A*68:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:63 protein. This plasmid can be used for constructing HLA-A*68:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:64 Protein Expression Plasmid Vector	PHLAP9258597	Plasmid vector containing HLA-A*68:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:64 protein. This plasmid can be used for constructing HLA-A*68:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:65 Protein Expression Plasmid Vector	PHLAP9258598	Plasmid vector containing HLA-A*68:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:65 protein. This plasmid can be used for constructing HLA-A*68:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:66:01 Protein Expression Plasmid Vector	PHLAP9258599	Plasmid vector containing HLA-A*68:66:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:66:01 protein. This plasmid can be used for constructing HLA-A*68:66:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:66:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:66:02 Protein Expression Plasmid Vector	PHLAP9258600	Plasmid vector containing HLA-A*68:66:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:66:02 protein. This plasmid can be used for constructing HLA-A*68:66:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:66:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:67 Protein Expression Plasmid Vector	PHLAP9258601	Plasmid vector containing HLA-A*68:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:67 protein. This plasmid can be used for constructing HLA-A*68:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:68 Protein Expression Plasmid Vector	PHLAP9258602	Plasmid vector containing HLA-A*68:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:68 protein. This plasmid can be used for constructing HLA-A*68:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:69 Protein Expression Plasmid Vector	PHLAP9258603	Plasmid vector containing HLA-A*68:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:69 protein. This plasmid can be used for constructing HLA-A*68:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:70 Protein Expression Plasmid Vector	PHLAP9258604	Plasmid vector containing HLA-A*68:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:70 protein. This plasmid can be used for constructing HLA-A*68:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:71 Protein Expression Plasmid Vector	PHLAP9258605	Plasmid vector containing HLA-A*68:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:71 protein. This plasmid can be used for constructing HLA-A*68:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:72 Protein Expression Plasmid Vector	PHLAP9258606	Plasmid vector containing HLA-A*68:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:72 protein. This plasmid can be used for constructing HLA-A*68:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:73 Protein Expression Plasmid Vector	PHLAP9258607	Plasmid vector containing HLA-A*68:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:73 protein. This plasmid can be used for constructing HLA-A*68:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:74 Protein Expression Plasmid Vector	PHLAP9258608	Plasmid vector containing HLA-A*68:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:74 protein. This plasmid can be used for constructing HLA-A*68:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:75:01 Protein Expression Plasmid Vector	PHLAP9258609	Plasmid vector containing HLA-A*68:75:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:75:01 protein. This plasmid can be used for constructing HLA-A*68:75:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:75:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:75:02 Protein Expression Plasmid Vector	PHLAP9258610	Plasmid vector containing HLA-A*68:75:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:75:02 protein. This plasmid can be used for constructing HLA-A*68:75:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:75:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:76:01 Protein Expression Plasmid Vector	PHLAP9258611	Plasmid vector containing HLA-A*68:76:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:76:01 protein. This plasmid can be used for constructing HLA-A*68:76:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:76:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:76:02 Protein Expression Plasmid Vector	PHLAP9258612	Plasmid vector containing HLA-A*68:76:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:76:02 protein. This plasmid can be used for constructing HLA-A*68:76:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:76:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:77 Protein Expression Plasmid Vector	PHLAP9258613	Plasmid vector containing HLA-A*68:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:77 protein. This plasmid can be used for constructing HLA-A*68:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:78 Protein Expression Plasmid Vector	PHLAP9258614	Plasmid vector containing HLA-A*68:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:78 protein. This plasmid can be used for constructing HLA-A*68:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:79 Protein Expression Plasmid Vector	PHLAP9258615	Plasmid vector containing HLA-A*68:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:79 protein. This plasmid can be used for constructing HLA-A*68:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:80 Protein Expression Plasmid Vector	PHLAP9258616	Plasmid vector containing HLA-A*68:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:80 protein. This plasmid can be used for constructing HLA-A*68:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:81 Protein Expression Plasmid Vector	PHLAP9258617	Plasmid vector containing HLA-A*68:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:81 protein. This plasmid can be used for constructing HLA-A*68:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:82 Protein Expression Plasmid Vector	PHLAP9258618	Plasmid vector containing HLA-A*68:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:82 protein. This plasmid can be used for constructing HLA-A*68:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:83 Protein Expression Plasmid Vector	PHLAP9258619	Plasmid vector containing HLA-A*68:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:83 protein. This plasmid can be used for constructing HLA-A*68:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:84 Protein Expression Plasmid Vector	PHLAP9258620	Plasmid vector containing HLA-A*68:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:84 protein. This plasmid can be used for constructing HLA-A*68:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:85 Protein Expression Plasmid Vector	PHLAP9258621	Plasmid vector containing HLA-A*68:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:85 protein. This plasmid can be used for constructing HLA-A*68:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:86 Protein Expression Plasmid Vector	PHLAP9258622	Plasmid vector containing HLA-A*68:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:86 protein. This plasmid can be used for constructing HLA-A*68:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:87 Protein Expression Plasmid Vector	PHLAP9258623	Plasmid vector containing HLA-A*68:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:87 protein. This plasmid can be used for constructing HLA-A*68:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:88 Protein Expression Plasmid Vector	PHLAP9258624	Plasmid vector containing HLA-A*68:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:88 protein. This plasmid can be used for constructing HLA-A*68:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:89 Protein Expression Plasmid Vector	PHLAP9258625	Plasmid vector containing HLA-A*68:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:89 protein. This plasmid can be used for constructing HLA-A*68:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:90 Protein Expression Plasmid Vector	PHLAP9258626	Plasmid vector containing HLA-A*68:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:90 protein. This plasmid can be used for constructing HLA-A*68:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:91:01 Protein Expression Plasmid Vector	PHLAP9258627	Plasmid vector containing HLA-A*68:91:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:91:01 protein. This plasmid can be used for constructing HLA-A*68:91:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:91:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:91:02 Protein Expression Plasmid Vector	PHLAP9258628	Plasmid vector containing HLA-A*68:91:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:91:02 protein. This plasmid can be used for constructing HLA-A*68:91:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:91:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:92 Protein Expression Plasmid Vector	PHLAP9258629	Plasmid vector containing HLA-A*68:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:92 protein. This plasmid can be used for constructing HLA-A*68:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:93 Protein Expression Plasmid Vector	PHLAP9258630	Plasmid vector containing HLA-A*68:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:93 protein. This plasmid can be used for constructing HLA-A*68:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:94N Protein Expression Plasmid Vector	PHLAP9258631	Plasmid vector containing HLA-A*68:94N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:94N protein. This plasmid can be used for constructing HLA-A*68:94N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:94N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*68:95 Protein Expression Plasmid Vector	PHLAP9258632	Plasmid vector containing HLA-A*68:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:95 protein. This plasmid can be used for constructing HLA-A*68:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:96 Protein Expression Plasmid Vector	PHLAP9258633	Plasmid vector containing HLA-A*68:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:96 protein. This plasmid can be used for constructing HLA-A*68:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:97 Protein Expression Plasmid Vector	PHLAP9258634	Plasmid vector containing HLA-A*68:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:97 protein. This plasmid can be used for constructing HLA-A*68:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:98 Protein Expression Plasmid Vector	PHLAP9258635	Plasmid vector containing HLA-A*68:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:98 protein. This plasmid can be used for constructing HLA-A*68:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:99:01 Protein Expression Plasmid Vector	PHLAP9258636	Plasmid vector containing HLA-A*68:99:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:99:01 protein. This plasmid can be used for constructing HLA-A*68:99:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:99:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*68:99:02 Protein Expression Plasmid Vector	PHLAP9258637	Plasmid vector containing HLA-A*68:99:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*68:99:02 protein. This plasmid can be used for constructing HLA-A*68:99:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*68:99:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:01:01:01 Protein Expression Plasmid Vector	PHLAP9258638	Plasmid vector containing HLA-A*69:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:01:01:01 protein. This plasmid can be used for constructing HLA-A*69:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:01:01:02 Protein Expression Plasmid Vector	PHLAP9258639	Plasmid vector containing HLA-A*69:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:01:01:02 protein. This plasmid can be used for constructing HLA-A*69:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*69:01:01:03 Protein Expression Plasmid Vector	PHLAP9258640	Plasmid vector containing HLA-A*69:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:01:01:03 protein. This plasmid can be used for constructing HLA-A*69:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:01:02 Protein Expression Plasmid Vector	PHLAP9258641	Plasmid vector containing HLA-A*69:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:01:02 protein. This plasmid can be used for constructing HLA-A*69:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:01:03 Protein Expression Plasmid Vector	PHLAP9258642	Plasmid vector containing HLA-A*69:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:01:03 protein. This plasmid can be used for constructing HLA-A*69:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:01:04 Protein Expression Plasmid Vector	PHLAP9258643	Plasmid vector containing HLA-A*69:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:01:04 protein. This plasmid can be used for constructing HLA-A*69:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:01:05 Protein Expression Plasmid Vector	PHLAP9258644	Plasmid vector containing HLA-A*69:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:01:05 protein. This plasmid can be used for constructing HLA-A*69:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:01:06 Protein Expression Plasmid Vector	PHLAP9258645	Plasmid vector containing HLA-A*69:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:01:06 protein. This plasmid can be used for constructing HLA-A*69:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:02 Protein Expression Plasmid Vector	PHLAP9258646	Plasmid vector containing HLA-A*69:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:02 protein. This plasmid can be used for constructing HLA-A*69:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:03 Protein Expression Plasmid Vector	PHLAP9258647	Plasmid vector containing HLA-A*69:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:03 protein. This plasmid can be used for constructing HLA-A*69:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*69:04 Protein Expression Plasmid Vector	PHLAP9258648	Plasmid vector containing HLA-A*69:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:04 protein. This plasmid can be used for constructing HLA-A*69:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:05 Protein Expression Plasmid Vector	PHLAP9258649	Plasmid vector containing HLA-A*69:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:05 protein. This plasmid can be used for constructing HLA-A*69:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:06 Protein Expression Plasmid Vector	PHLAP9258650	Plasmid vector containing HLA-A*69:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:06 protein. This plasmid can be used for constructing HLA-A*69:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:07 Protein Expression Plasmid Vector	PHLAP9258651	Plasmid vector containing HLA-A*69:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:07 protein. This plasmid can be used for constructing HLA-A*69:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:08 Protein Expression Plasmid Vector	PHLAP9258652	Plasmid vector containing HLA-A*69:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:08 protein. This plasmid can be used for constructing HLA-A*69:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*69:09 Protein Expression Plasmid Vector	PHLAP9258653	Plasmid vector containing HLA-A*69:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*69:09 protein. This plasmid can be used for constructing HLA-A*69:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*69:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:01:01 Protein Expression Plasmid Vector	PHLAP9258654	Plasmid vector containing HLA-A*74:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:01:01 protein. This plasmid can be used for constructing HLA-A*74:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:01:02 Protein Expression Plasmid Vector	PHLAP9258655	Plasmid vector containing HLA-A*74:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:01:02 protein. This plasmid can be used for constructing HLA-A*74:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*74:01:01:03 Protein Expression Plasmid Vector	PHLAP9258656	Plasmid vector containing HLA-A*74:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:01:03 protein. This plasmid can be used for constructing HLA-A*74:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:01:04 Protein Expression Plasmid Vector	PHLAP9258657	Plasmid vector containing HLA-A*74:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:01:04 protein. This plasmid can be used for constructing HLA-A*74:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:01:05 Protein Expression Plasmid Vector	PHLAP9258658	Plasmid vector containing HLA-A*74:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:01:05 protein. This plasmid can be used for constructing HLA-A*74:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:01:06 Protein Expression Plasmid Vector	PHLAP9258659	Plasmid vector containing HLA-A*74:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:01:06 protein. This plasmid can be used for constructing HLA-A*74:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:01:07 Protein Expression Plasmid Vector	PHLAP9258660	Plasmid vector containing HLA-A*74:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:01:07 protein. This plasmid can be used for constructing HLA-A*74:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:01:08 Protein Expression Plasmid Vector	PHLAP9258661	Plasmid vector containing HLA-A*74:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:01:08 protein. This plasmid can be used for constructing HLA-A*74:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:02 Protein Expression Plasmid Vector	PHLAP9258662	Plasmid vector containing HLA-A*74:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:02 protein. This plasmid can be used for constructing HLA-A*74:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*74:01:03 Protein Expression Plasmid Vector	PHLAP9258663	Plasmid vector containing HLA-A*74:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:03 protein. This plasmid can be used for constructing HLA-A*74:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:04 Protein Expression Plasmid Vector	PHLAP9258664	Plasmid vector containing HLA-A*74:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:04 protein. This plasmid can be used for constructing HLA-A*74:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:05 Protein Expression Plasmid Vector	PHLAP9258665	Plasmid vector containing HLA-A*74:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:05 protein. This plasmid can be used for constructing HLA-A*74:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:06 Protein Expression Plasmid Vector	PHLAP9258666	Plasmid vector containing HLA-A*74:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:06 protein. This plasmid can be used for constructing HLA-A*74:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:07 Protein Expression Plasmid Vector	PHLAP9258667	Plasmid vector containing HLA-A*74:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:07 protein. This plasmid can be used for constructing HLA-A*74:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:08 Protein Expression Plasmid Vector	PHLAP9258668	Plasmid vector containing HLA-A*74:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:08 protein. This plasmid can be used for constructing HLA-A*74:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:09 Protein Expression Plasmid Vector	PHLAP9258669	Plasmid vector containing HLA-A*74:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:09 protein. This plasmid can be used for constructing HLA-A*74:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:10 Protein Expression Plasmid Vector	PHLAP9258670	Plasmid vector containing HLA-A*74:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:10 protein. This plasmid can be used for constructing HLA-A*74:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*74:01:11 Protein Expression Plasmid Vector	PHLAP9258671	Plasmid vector containing HLA-A*74:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:11 protein. This plasmid can be used for constructing HLA-A*74:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:01:12 Protein Expression Plasmid Vector	PHLAP9258672	Plasmid vector containing HLA-A*74:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:01:12 protein. This plasmid can be used for constructing HLA-A*74:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:02:01:01 Protein Expression Plasmid Vector	PHLAP9258673	Plasmid vector containing HLA-A*74:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:02:01:01 protein. This plasmid can be used for constructing HLA-A*74:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:02:01:02 Protein Expression Plasmid Vector	PHLAP9258674	Plasmid vector containing HLA-A*74:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:02:01:02 protein. This plasmid can be used for constructing HLA-A*74:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:02:01:03 Protein Expression Plasmid Vector	PHLAP9258675	Plasmid vector containing HLA-A*74:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:02:01:03 protein. This plasmid can be used for constructing HLA-A*74:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:03:01:01 Protein Expression Plasmid Vector	PHLAP9258676	Plasmid vector containing HLA-A*74:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:03:01:01 protein. This plasmid can be used for constructing HLA-A*74:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:03:01:02 Protein Expression Plasmid Vector	PHLAP9258677	Plasmid vector containing HLA-A*74:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:03:01:02 protein. This plasmid can be used for constructing HLA-A*74:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*74:03:01:03 Protein Expression Plasmid Vector	PHLAP9258678	Plasmid vector containing HLA-A*74:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:03:01:03 protein. This plasmid can be used for constructing HLA-A*74:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:03:02 Protein Expression Plasmid Vector	PHLAP9258679	Plasmid vector containing HLA-A*74:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:03:02 protein. This plasmid can be used for constructing HLA-A*74:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:03:03 Protein Expression Plasmid Vector	PHLAP9258680	Plasmid vector containing HLA-A*74:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:03:03 protein. This plasmid can be used for constructing HLA-A*74:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:04 Protein Expression Plasmid Vector	PHLAP9258681	Plasmid vector containing HLA-A*74:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:04 protein. This plasmid can be used for constructing HLA-A*74:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:05 Protein Expression Plasmid Vector	PHLAP9258682	Plasmid vector containing HLA-A*74:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:05 protein. This plasmid can be used for constructing HLA-A*74:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:06 Protein Expression Plasmid Vector	PHLAP9258683	Plasmid vector containing HLA-A*74:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:06 protein. This plasmid can be used for constructing HLA-A*74:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:07 Protein Expression Plasmid Vector	PHLAP9258684	Plasmid vector containing HLA-A*74:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:07 protein. This plasmid can be used for constructing HLA-A*74:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:08 Protein Expression Plasmid Vector	PHLAP9258685	Plasmid vector containing HLA-A*74:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:08 protein. This plasmid can be used for constructing HLA-A*74:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*74:09 Protein Expression Plasmid Vector	PHLAP9258686	Plasmid vector containing HLA-A*74:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:09 protein. This plasmid can be used for constructing HLA-A*74:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:10 Protein Expression Plasmid Vector	PHLAP9258687	Plasmid vector containing HLA-A*74:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:10 protein. This plasmid can be used for constructing HLA-A*74:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:11 Protein Expression Plasmid Vector	PHLAP9258688	Plasmid vector containing HLA-A*74:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:11 protein. This plasmid can be used for constructing HLA-A*74:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:12N Protein Expression Plasmid Vector	PHLAP9258689	Plasmid vector containing HLA-A*74:12N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:12N protein. This plasmid can be used for constructing HLA-A*74:12N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:12N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:13 Protein Expression Plasmid Vector	PHLAP9258690	Plasmid vector containing HLA-A*74:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:13 protein. This plasmid can be used for constructing HLA-A*74:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:14N Protein Expression Plasmid Vector	PHLAP9258691	Plasmid vector containing HLA-A*74:14N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:14N protein. This plasmid can be used for constructing HLA-A*74:14N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:14N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:15 Protein Expression Plasmid Vector	PHLAP9258692	Plasmid vector containing HLA-A*74:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:15 protein. This plasmid can be used for constructing HLA-A*74:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:16:01 Protein Expression Plasmid Vector	PHLAP9258693	Plasmid vector containing HLA-A*74:16:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:16:01 protein. This plasmid can be used for constructing HLA-A*74:16:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:16:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*74:16:02 Protein Expression Plasmid Vector	PHLAP9258694	Plasmid vector containing HLA-A*74:16:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:16:02 protein. This plasmid can be used for constructing HLA-A*74:16:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:16:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:17 Protein Expression Plasmid Vector	PHLAP9258695	Plasmid vector containing HLA-A*74:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:17 protein. This plasmid can be used for constructing HLA-A*74:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:18 Protein Expression Plasmid Vector	PHLAP9258696	Plasmid vector containing HLA-A*74:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:18 protein. This plasmid can be used for constructing HLA-A*74:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:19 Protein Expression Plasmid Vector	PHLAP9258697	Plasmid vector containing HLA-A*74:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:19 protein. This plasmid can be used for constructing HLA-A*74:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:20 Protein Expression Plasmid Vector	PHLAP9258698	Plasmid vector containing HLA-A*74:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:20 protein. This plasmid can be used for constructing HLA-A*74:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:21 Protein Expression Plasmid Vector	PHLAP9258699	Plasmid vector containing HLA-A*74:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:21 protein. This plasmid can be used for constructing HLA-A*74:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:22 Protein Expression Plasmid Vector	PHLAP9258700	Plasmid vector containing HLA-A*74:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:22 protein. This plasmid can be used for constructing HLA-A*74:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:23 Protein Expression Plasmid Vector	PHLAP9258701	Plasmid vector containing HLA-A*74:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:23 protein. This plasmid can be used for constructing HLA-A*74:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*74:24 Protein Expression Plasmid Vector	PHLAP9258702	Plasmid vector containing HLA-A*74:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:24 protein. This plasmid can be used for constructing HLA-A*74:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:25 Protein Expression Plasmid Vector	PHLAP9258703	Plasmid vector containing HLA-A*74:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:25 protein. This plasmid can be used for constructing HLA-A*74:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:26 Protein Expression Plasmid Vector	PHLAP9258704	Plasmid vector containing HLA-A*74:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:26 protein. This plasmid can be used for constructing HLA-A*74:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:27 Protein Expression Plasmid Vector	PHLAP9258705	Plasmid vector containing HLA-A*74:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:27 protein. This plasmid can be used for constructing HLA-A*74:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:28 Protein Expression Plasmid Vector	PHLAP9258706	Plasmid vector containing HLA-A*74:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:28 protein. This plasmid can be used for constructing HLA-A*74:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:29 Protein Expression Plasmid Vector	PHLAP9258707	Plasmid vector containing HLA-A*74:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:29 protein. This plasmid can be used for constructing HLA-A*74:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:30 Protein Expression Plasmid Vector	PHLAP9258708	Plasmid vector containing HLA-A*74:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:30 protein. This plasmid can be used for constructing HLA-A*74:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:31 Protein Expression Plasmid Vector	PHLAP9258709	Plasmid vector containing HLA-A*74:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:31 protein. This plasmid can be used for constructing HLA-A*74:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*74:32N Protein Expression Plasmid Vector	PHLAP9258710	Plasmid vector containing HLA-A*74:32N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:32N protein. This plasmid can be used for constructing HLA-A*74:32N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:32N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:33 Protein Expression Plasmid Vector	PHLAP9258711	Plasmid vector containing HLA-A*74:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:33 protein. This plasmid can be used for constructing HLA-A*74:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:34 Protein Expression Plasmid Vector	PHLAP9258712	Plasmid vector containing HLA-A*74:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:34 protein. This plasmid can be used for constructing HLA-A*74:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:35 Protein Expression Plasmid Vector	PHLAP9258713	Plasmid vector containing HLA-A*74:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:35 protein. This plasmid can be used for constructing HLA-A*74:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:36 Protein Expression Plasmid Vector	PHLAP9258714	Plasmid vector containing HLA-A*74:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:36 protein. This plasmid can be used for constructing HLA-A*74:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:37 Protein Expression Plasmid Vector	PHLAP9258715	Plasmid vector containing HLA-A*74:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:37 protein. This plasmid can be used for constructing HLA-A*74:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:38 Protein Expression Plasmid Vector	PHLAP9258716	Plasmid vector containing HLA-A*74:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:38 protein. This plasmid can be used for constructing HLA-A*74:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:39 Protein Expression Plasmid Vector	PHLAP9258717	Plasmid vector containing HLA-A*74:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:39 protein. This plasmid can be used for constructing HLA-A*74:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*74:40 Protein Expression Plasmid Vector	PHLAP9258718	Plasmid vector containing HLA-A*74:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:40 protein. This plasmid can be used for constructing HLA-A*74:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:41 Protein Expression Plasmid Vector	PHLAP9258719	Plasmid vector containing HLA-A*74:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:41 protein. This plasmid can be used for constructing HLA-A*74:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:42 Protein Expression Plasmid Vector	PHLAP9258720	Plasmid vector containing HLA-A*74:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:42 protein. This plasmid can be used for constructing HLA-A*74:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:43 Protein Expression Plasmid Vector	PHLAP9258721	Plasmid vector containing HLA-A*74:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:43 protein. This plasmid can be used for constructing HLA-A*74:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:44 Protein Expression Plasmid Vector	PHLAP9258722	Plasmid vector containing HLA-A*74:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:44 protein. This plasmid can be used for constructing HLA-A*74:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:45 Protein Expression Plasmid Vector	PHLAP9258723	Plasmid vector containing HLA-A*74:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:45 protein. This plasmid can be used for constructing HLA-A*74:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:46 Protein Expression Plasmid Vector	PHLAP9258724	Plasmid vector containing HLA-A*74:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:46 protein. This plasmid can be used for constructing HLA-A*74:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:47N Protein Expression Plasmid Vector	PHLAP9258725	Plasmid vector containing HLA-A*74:47N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:47N protein. This plasmid can be used for constructing HLA-A*74:47N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:47N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*74:48 Protein Expression Plasmid Vector	PHLAP9258726	Plasmid vector containing HLA-A*74:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:48 protein. This plasmid can be used for constructing HLA-A*74:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:49 Protein Expression Plasmid Vector	PHLAP9258727	Plasmid vector containing HLA-A*74:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:49 protein. This plasmid can be used for constructing HLA-A*74:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:50 Protein Expression Plasmid Vector	PHLAP9258728	Plasmid vector containing HLA-A*74:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:50 protein. This plasmid can be used for constructing HLA-A*74:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:51 Protein Expression Plasmid Vector	PHLAP9258729	Plasmid vector containing HLA-A*74:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:51 protein. This plasmid can be used for constructing HLA-A*74:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:52 Protein Expression Plasmid Vector	PHLAP9258730	Plasmid vector containing HLA-A*74:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:52 protein. This plasmid can be used for constructing HLA-A*74:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*74:53 Protein Expression Plasmid Vector	PHLAP9258731	Plasmid vector containing HLA-A*74:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*74:53 protein. This plasmid can be used for constructing HLA-A*74:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*74:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*80:01:01:01 Protein Expression Plasmid Vector	PHLAP9258732	Plasmid vector containing HLA-A*80:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:01:01:01 protein. This plasmid can be used for constructing HLA-A*80:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*80:01:01:02 Protein Expression Plasmid Vector	PHLAP9258733	Plasmid vector containing HLA-A*80:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:01:01:02 protein. This plasmid can be used for constructing HLA-A*80:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*80:01:01:03 Protein Expression Plasmid Vector	PHLAP9258734	Plasmid vector containing HLA-A*80:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:01:01:03 protein. This plasmid can be used for constructing HLA-A*80:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*80:01:02 Protein Expression Plasmid Vector	PHLAP9258735	Plasmid vector containing HLA-A*80:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:01:02 protein. This plasmid can be used for constructing HLA-A*80:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*80:02 Protein Expression Plasmid Vector	PHLAP9258736	Plasmid vector containing HLA-A*80:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:02 protein. This plasmid can be used for constructing HLA-A*80:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*80:03 Protein Expression Plasmid Vector	PHLAP9258737	Plasmid vector containing HLA-A*80:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:03 protein. This plasmid can be used for constructing HLA-A*80:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*80:04 Protein Expression Plasmid Vector	PHLAP9258738	Plasmid vector containing HLA-A*80:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:04 protein. This plasmid can be used for constructing HLA-A*80:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*80:05 Protein Expression Plasmid Vector	PHLAP9258739	Plasmid vector containing HLA-A*80:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:05 protein. This plasmid can be used for constructing HLA-A*80:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*80:06 Protein Expression Plasmid Vector	PHLAP9258740	Plasmid vector containing HLA-A*80:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:06 protein. This plasmid can be used for constructing HLA-A*80:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*80:07 Protein Expression Plasmid Vector	PHLAP9258741	Plasmid vector containing HLA-A*80:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:07 protein. This plasmid can be used for constructing HLA-A*80:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*80:08N Protein Expression Plasmid Vector	PHLAP9258742	Plasmid vector containing HLA-A*80:08N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:08N protein. This plasmid can be used for constructing HLA-A*80:08N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:08N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*80:09N Protein Expression Plasmid Vector	PHLAP9258743	Plasmid vector containing HLA-A*80:09N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:09N protein. This plasmid can be used for constructing HLA-A*80:09N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:09N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*80:10 Protein Expression Plasmid Vector	PHLAP9258744	Plasmid vector containing HLA-A*80:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*80:10 protein. This plasmid can be used for constructing HLA-A*80:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*80:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:01 Protein Expression Plasmid Vector	PHLAP9258745	Plasmid vector containing HLA-B*07:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:01 protein. This plasmid can be used for constructing HLA-B*07:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:02 Protein Expression Plasmid Vector	PHLAP9258746	Plasmid vector containing HLA-B*07:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:02 protein. This plasmid can be used for constructing HLA-B*07:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:03 Protein Expression Plasmid Vector	PHLAP9258747	Plasmid vector containing HLA-B*07:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:03 protein. This plasmid can be used for constructing HLA-B*07:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:04 Protein Expression Plasmid Vector	PHLAP9258748	Plasmid vector containing HLA-B*07:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:04 protein. This plasmid can be used for constructing HLA-B*07:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:05 Protein Expression Plasmid Vector	PHLAP9258749	Plasmid vector containing HLA-B*07:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:05 protein. This plasmid can be used for constructing HLA-B*07:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:06 Protein Expression Plasmid Vector	PHLAP9258750	Plasmid vector containing HLA-B*07:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:06 protein. This plasmid can be used for constructing HLA-B*07:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:07 Protein Expression Plasmid Vector	PHLAP9258751	Plasmid vector containing HLA-B*07:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:07 protein. This plasmid can be used for constructing HLA-B*07:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:08 Protein Expression Plasmid Vector	PHLAP9258752	Plasmid vector containing HLA-B*07:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:08 protein. This plasmid can be used for constructing HLA-B*07:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:09 Protein Expression Plasmid Vector	PHLAP9258753	Plasmid vector containing HLA-B*07:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:09 protein. This plasmid can be used for constructing HLA-B*07:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:10 Protein Expression Plasmid Vector	PHLAP9258754	Plasmid vector containing HLA-B*07:02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:10 protein. This plasmid can be used for constructing HLA-B*07:02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:100 Protein Expression Plasmid Vector	PHLAP9258755	Plasmid vector containing HLA-B*07:02:01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:100 protein. This plasmid can be used for constructing HLA-B*07:02:01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:101 Protein Expression Plasmid Vector	PHLAP9258756	Plasmid vector containing HLA-B*07:02:01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:101 protein. This plasmid can be used for constructing HLA-B*07:02:01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:102 Protein Expression Plasmid Vector	PHLAP9258757	Plasmid vector containing HLA-B*07:02:01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:102 protein. This plasmid can be used for constructing HLA-B*07:02:01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:103 Protein Expression Plasmid Vector	PHLAP9258758	Plasmid vector containing HLA-B*07:02:01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:103 protein. This plasmid can be used for constructing HLA-B*07:02:01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:104 Protein Expression Plasmid Vector	PHLAP9258759	Plasmid vector containing HLA-B*07:02:01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:104 protein. This plasmid can be used for constructing HLA-B*07:02:01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:105 Protein Expression Plasmid Vector	PHLAP9258760	Plasmid vector containing HLA-B*07:02:01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:105 protein. This plasmid can be used for constructing HLA-B*07:02:01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:106 Protein Expression Plasmid Vector	PHLAP9258761	Plasmid vector containing HLA-B*07:02:01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:106 protein. This plasmid can be used for constructing HLA-B*07:02:01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:107 Protein Expression Plasmid Vector	PHLAP9258762	Plasmid vector containing HLA-B*07:02:01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:107 protein. This plasmid can be used for constructing HLA-B*07:02:01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:108 Protein Expression Plasmid Vector	PHLAP9258763	Plasmid vector containing HLA-B*07:02:01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:108 protein. This plasmid can be used for constructing HLA-B*07:02:01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:109 Protein Expression Plasmid Vector	PHLAP9258764	Plasmid vector containing HLA-B*07:02:01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:109 protein. This plasmid can be used for constructing HLA-B*07:02:01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:11 Protein Expression Plasmid Vector	PHLAP9258765	Plasmid vector containing HLA-B*07:02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:11 protein. This plasmid can be used for constructing HLA-B*07:02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:110 Protein Expression Plasmid Vector	PHLAP9258766	Plasmid vector containing HLA-B*07:02:01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:110 protein. This plasmid can be used for constructing HLA-B*07:02:01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:111 Protein Expression Plasmid Vector	PHLAP9258767	Plasmid vector containing HLA-B*07:02:01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:111 protein. This plasmid can be used for constructing HLA-B*07:02:01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:112 Protein Expression Plasmid Vector	PHLAP9258768	Plasmid vector containing HLA-B*07:02:01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:112 protein. This plasmid can be used for constructing HLA-B*07:02:01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:113 Protein Expression Plasmid Vector	PHLAP9258769	Plasmid vector containing HLA-B*07:02:01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:113 protein. This plasmid can be used for constructing HLA-B*07:02:01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:113 Protein Expression Plasmid Vector	PHLAP9258770	Plasmid vector containing HLA-B*07:02:01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:113 protein. This plasmid can be used for constructing HLA-B*07:02:01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:114 Protein Expression Plasmid Vector	PHLAP9258771	Plasmid vector containing HLA-B*07:02:01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:114 protein. This plasmid can be used for constructing HLA-B*07:02:01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:115 Protein Expression Plasmid Vector	PHLAP9258772	Plasmid vector containing HLA-B*07:02:01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:115 protein. This plasmid can be used for constructing HLA-B*07:02:01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:116 Protein Expression Plasmid Vector	PHLAP9258773	Plasmid vector containing HLA-B*07:02:01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:116 protein. This plasmid can be used for constructing HLA-B*07:02:01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:117 Protein Expression Plasmid Vector	PHLAP9258774	Plasmid vector containing HLA-B*07:02:01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:117 protein. This plasmid can be used for constructing HLA-B*07:02:01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:118 Protein Expression Plasmid Vector	PHLAP9258775	Plasmid vector containing HLA-B*07:02:01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:118 protein. This plasmid can be used for constructing HLA-B*07:02:01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:119 Protein Expression Plasmid Vector	PHLAP9258776	Plasmid vector containing HLA-B*07:02:01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:119 protein. This plasmid can be used for constructing HLA-B*07:02:01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:12 Protein Expression Plasmid Vector	PHLAP9258777	Plasmid vector containing HLA-B*07:02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:12 protein. This plasmid can be used for constructing HLA-B*07:02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:120 Protein Expression Plasmid Vector	PHLAP9258778	Plasmid vector containing HLA-B*07:02:01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:120 protein. This plasmid can be used for constructing HLA-B*07:02:01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:121 Protein Expression Plasmid Vector	PHLAP9258779	Plasmid vector containing HLA-B*07:02:01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:121 protein. This plasmid can be used for constructing HLA-B*07:02:01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:122 Protein Expression Plasmid Vector	PHLAP9258780	Plasmid vector containing HLA-B*07:02:01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:122 protein. This plasmid can be used for constructing HLA-B*07:02:01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:123 Protein Expression Plasmid Vector	PHLAP9258781	Plasmid vector containing HLA-B*07:02:01:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:123 protein. This plasmid can be used for constructing HLA-B*07:02:01:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:124 Protein Expression Plasmid Vector	PHLAP9258782	Plasmid vector containing HLA-B*07:02:01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:124 protein. This plasmid can be used for constructing HLA-B*07:02:01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:125 Protein Expression Plasmid Vector	PHLAP9258783	Plasmid vector containing HLA-B*07:02:01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:125 protein. This plasmid can be used for constructing HLA-B*07:02:01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:126N Protein Expression Plasmid Vector	PHLAP9258784	Plasmid vector containing HLA-B*07:02:01:126N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:126N protein. This plasmid can be used for constructing HLA-B*07:02:01:126N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:126N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:127 Protein Expression Plasmid Vector	PHLAP9258785	Plasmid vector containing HLA-B*07:02:01:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:127 protein. This plasmid can be used for constructing HLA-B*07:02:01:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:128 Protein Expression Plasmid Vector	PHLAP9258786	Plasmid vector containing HLA-B*07:02:01:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:128 protein. This plasmid can be used for constructing HLA-B*07:02:01:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:129 Protein Expression Plasmid Vector	PHLAP9258787	Plasmid vector containing HLA-B*07:02:01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:129 protein. This plasmid can be used for constructing HLA-B*07:02:01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:13 Protein Expression Plasmid Vector	PHLAP9258788	Plasmid vector containing HLA-B*07:02:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:13 protein. This plasmid can be used for constructing HLA-B*07:02:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:130Q Protein Expression Plasmid Vector	PHLAP9258789	Plasmid vector containing HLA-B*07:02:01:130Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:130Q protein. This plasmid can be used for constructing HLA-B*07:02:01:130Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:130Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:131 Protein Expression Plasmid Vector	PHLAP9258790	Plasmid vector containing HLA-B*07:02:01:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:131 protein. This plasmid can be used for constructing HLA-B*07:02:01:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:132 Protein Expression Plasmid Vector	PHLAP9258791	Plasmid vector containing HLA-B*07:02:01:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:132 protein. This plasmid can be used for constructing HLA-B*07:02:01:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:14 Protein Expression Plasmid Vector	PHLAP9258792	Plasmid vector containing HLA-B*07:02:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:14 protein. This plasmid can be used for constructing HLA-B*07:02:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:15 Protein Expression Plasmid Vector	PHLAP9258793	Plasmid vector containing HLA-B*07:02:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:15 protein. This plasmid can be used for constructing HLA-B*07:02:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:16 Protein Expression Plasmid Vector	PHLAP9258794	Plasmid vector containing HLA-B*07:02:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:16 protein. This plasmid can be used for constructing HLA-B*07:02:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:17 Protein Expression Plasmid Vector	PHLAP9258795	Plasmid vector containing HLA-B*07:02:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:17 protein. This plasmid can be used for constructing HLA-B*07:02:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:18 Protein Expression Plasmid Vector	PHLAP9258796	Plasmid vector containing HLA-B*07:02:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:18 protein. This plasmid can be used for constructing HLA-B*07:02:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:19 Protein Expression Plasmid Vector	PHLAP9258797	Plasmid vector containing HLA-B*07:02:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:19 protein. This plasmid can be used for constructing HLA-B*07:02:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:20 Protein Expression Plasmid Vector	PHLAP9258798	Plasmid vector containing HLA-B*07:02:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:20 protein. This plasmid can be used for constructing HLA-B*07:02:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:21 Protein Expression Plasmid Vector	PHLAP9258799	Plasmid vector containing HLA-B*07:02:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:21 protein. This plasmid can be used for constructing HLA-B*07:02:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:22 Protein Expression Plasmid Vector	PHLAP9258800	Plasmid vector containing HLA-B*07:02:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:22 protein. This plasmid can be used for constructing HLA-B*07:02:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:23 Protein Expression Plasmid Vector	PHLAP9258801	Plasmid vector containing HLA-B*07:02:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:23 protein. This plasmid can be used for constructing HLA-B*07:02:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:24 Protein Expression Plasmid Vector	PHLAP9258802	Plasmid vector containing HLA-B*07:02:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:24 protein. This plasmid can be used for constructing HLA-B*07:02:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:25 Protein Expression Plasmid Vector	PHLAP9258803	Plasmid vector containing HLA-B*07:02:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:25 protein. This plasmid can be used for constructing HLA-B*07:02:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:26 Protein Expression Plasmid Vector	PHLAP9258804	Plasmid vector containing HLA-B*07:02:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:26 protein. This plasmid can be used for constructing HLA-B*07:02:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:27 Protein Expression Plasmid Vector	PHLAP9258805	Plasmid vector containing HLA-B*07:02:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:27 protein. This plasmid can be used for constructing HLA-B*07:02:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:28 Protein Expression Plasmid Vector	PHLAP9258806	Plasmid vector containing HLA-B*07:02:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:28 protein. This plasmid can be used for constructing HLA-B*07:02:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:29 Protein Expression Plasmid Vector	PHLAP9258807	Plasmid vector containing HLA-B*07:02:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:29 protein. This plasmid can be used for constructing HLA-B*07:02:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:30 Protein Expression Plasmid Vector	PHLAP9258808	Plasmid vector containing HLA-B*07:02:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:30 protein. This plasmid can be used for constructing HLA-B*07:02:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:31 Protein Expression Plasmid Vector	PHLAP9258809	Plasmid vector containing HLA-B*07:02:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:31 protein. This plasmid can be used for constructing HLA-B*07:02:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:32 Protein Expression Plasmid Vector	PHLAP9258810	Plasmid vector containing HLA-B*07:02:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:32 protein. This plasmid can be used for constructing HLA-B*07:02:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:33 Protein Expression Plasmid Vector	PHLAP9258811	Plasmid vector containing HLA-B*07:02:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:33 protein. This plasmid can be used for constructing HLA-B*07:02:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:34 Protein Expression Plasmid Vector	PHLAP9258812	Plasmid vector containing HLA-B*07:02:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:34 protein. This plasmid can be used for constructing HLA-B*07:02:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:35 Protein Expression Plasmid Vector	PHLAP9258813	Plasmid vector containing HLA-B*07:02:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:35 protein. This plasmid can be used for constructing HLA-B*07:02:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:36 Protein Expression Plasmid Vector	PHLAP9258814	Plasmid vector containing HLA-B*07:02:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:36 protein. This plasmid can be used for constructing HLA-B*07:02:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:37 Protein Expression Plasmid Vector	PHLAP9258815	Plasmid vector containing HLA-B*07:02:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:37 protein. This plasmid can be used for constructing HLA-B*07:02:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:38 Protein Expression Plasmid Vector	PHLAP9258816	Plasmid vector containing HLA-B*07:02:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:38 protein. This plasmid can be used for constructing HLA-B*07:02:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:39 Protein Expression Plasmid Vector	PHLAP9258817	Plasmid vector containing HLA-B*07:02:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:39 protein. This plasmid can be used for constructing HLA-B*07:02:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:40 Protein Expression Plasmid Vector	PHLAP9258818	Plasmid vector containing HLA-B*07:02:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:40 protein. This plasmid can be used for constructing HLA-B*07:02:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:41 Protein Expression Plasmid Vector	PHLAP9258819	Plasmid vector containing HLA-B*07:02:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:41 protein. This plasmid can be used for constructing HLA-B*07:02:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:42 Protein Expression Plasmid Vector	PHLAP9258820	Plasmid vector containing HLA-B*07:02:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:42 protein. This plasmid can be used for constructing HLA-B*07:02:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:43 Protein Expression Plasmid Vector	PHLAP9258821	Plasmid vector containing HLA-B*07:02:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:43 protein. This plasmid can be used for constructing HLA-B*07:02:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:44 Protein Expression Plasmid Vector	PHLAP9258822	Plasmid vector containing HLA-B*07:02:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:44 protein. This plasmid can be used for constructing HLA-B*07:02:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:45 Protein Expression Plasmid Vector	PHLAP9258823	Plasmid vector containing HLA-B*07:02:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:45 protein. This plasmid can be used for constructing HLA-B*07:02:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:46 Protein Expression Plasmid Vector	PHLAP9258824	Plasmid vector containing HLA-B*07:02:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:46 protein. This plasmid can be used for constructing HLA-B*07:02:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:47 Protein Expression Plasmid Vector	PHLAP9258825	Plasmid vector containing HLA-B*07:02:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:47 protein. This plasmid can be used for constructing HLA-B*07:02:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:48 Protein Expression Plasmid Vector	PHLAP9258826	Plasmid vector containing HLA-B*07:02:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:48 protein. This plasmid can be used for constructing HLA-B*07:02:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:49 Protein Expression Plasmid Vector	PHLAP9258827	Plasmid vector containing HLA-B*07:02:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:49 protein. This plasmid can be used for constructing HLA-B*07:02:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:50 Protein Expression Plasmid Vector	PHLAP9258828	Plasmid vector containing HLA-B*07:02:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:50 protein. This plasmid can be used for constructing HLA-B*07:02:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:51 Protein Expression Plasmid Vector	PHLAP9258829	Plasmid vector containing HLA-B*07:02:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:51 protein. This plasmid can be used for constructing HLA-B*07:02:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:52 Protein Expression Plasmid Vector	PHLAP9258830	Plasmid vector containing HLA-B*07:02:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:52 protein. This plasmid can be used for constructing HLA-B*07:02:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:53 Protein Expression Plasmid Vector	PHLAP9258831	Plasmid vector containing HLA-B*07:02:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:53 protein. This plasmid can be used for constructing HLA-B*07:02:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:54 Protein Expression Plasmid Vector	PHLAP9258832	Plasmid vector containing HLA-B*07:02:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:54 protein. This plasmid can be used for constructing HLA-B*07:02:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:55 Protein Expression Plasmid Vector	PHLAP9258833	Plasmid vector containing HLA-B*07:02:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:55 protein. This plasmid can be used for constructing HLA-B*07:02:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:56 Protein Expression Plasmid Vector	PHLAP9258834	Plasmid vector containing HLA-B*07:02:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:56 protein. This plasmid can be used for constructing HLA-B*07:02:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:57 Protein Expression Plasmid Vector	PHLAP9258835	Plasmid vector containing HLA-B*07:02:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:57 protein. This plasmid can be used for constructing HLA-B*07:02:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:58 Protein Expression Plasmid Vector	PHLAP9258836	Plasmid vector containing HLA-B*07:02:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:58 protein. This plasmid can be used for constructing HLA-B*07:02:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:59 Protein Expression Plasmid Vector	PHLAP9258837	Plasmid vector containing HLA-B*07:02:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:59 protein. This plasmid can be used for constructing HLA-B*07:02:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:60 Protein Expression Plasmid Vector	PHLAP9258838	Plasmid vector containing HLA-B*07:02:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:60 protein. This plasmid can be used for constructing HLA-B*07:02:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:61 Protein Expression Plasmid Vector	PHLAP9258839	Plasmid vector containing HLA-B*07:02:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:61 protein. This plasmid can be used for constructing HLA-B*07:02:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:62 Protein Expression Plasmid Vector	PHLAP9258840	Plasmid vector containing HLA-B*07:02:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:62 protein. This plasmid can be used for constructing HLA-B*07:02:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:63 Protein Expression Plasmid Vector	PHLAP9258841	Plasmid vector containing HLA-B*07:02:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:63 protein. This plasmid can be used for constructing HLA-B*07:02:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:64 Protein Expression Plasmid Vector	PHLAP9258842	Plasmid vector containing HLA-B*07:02:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:64 protein. This plasmid can be used for constructing HLA-B*07:02:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:65 Protein Expression Plasmid Vector	PHLAP9258843	Plasmid vector containing HLA-B*07:02:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:65 protein. This plasmid can be used for constructing HLA-B*07:02:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:66 Protein Expression Plasmid Vector	PHLAP9258844	Plasmid vector containing HLA-B*07:02:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:66 protein. This plasmid can be used for constructing HLA-B*07:02:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:67 Protein Expression Plasmid Vector	PHLAP9258845	Plasmid vector containing HLA-B*07:02:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:67 protein. This plasmid can be used for constructing HLA-B*07:02:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:68 Protein Expression Plasmid Vector	PHLAP9258846	Plasmid vector containing HLA-B*07:02:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:68 protein. This plasmid can be used for constructing HLA-B*07:02:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:69 Protein Expression Plasmid Vector	PHLAP9258847	Plasmid vector containing HLA-B*07:02:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:69 protein. This plasmid can be used for constructing HLA-B*07:02:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:70 Protein Expression Plasmid Vector	PHLAP9258848	Plasmid vector containing HLA-B*07:02:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:70 protein. This plasmid can be used for constructing HLA-B*07:02:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:71 Protein Expression Plasmid Vector	PHLAP9258849	Plasmid vector containing HLA-B*07:02:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:71 protein. This plasmid can be used for constructing HLA-B*07:02:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:72 Protein Expression Plasmid Vector	PHLAP9258850	Plasmid vector containing HLA-B*07:02:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:72 protein. This plasmid can be used for constructing HLA-B*07:02:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:73 Protein Expression Plasmid Vector	PHLAP9258851	Plasmid vector containing HLA-B*07:02:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:73 protein. This plasmid can be used for constructing HLA-B*07:02:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:74 Protein Expression Plasmid Vector	PHLAP9258852	Plasmid vector containing HLA-B*07:02:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:74 protein. This plasmid can be used for constructing HLA-B*07:02:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:75 Protein Expression Plasmid Vector	PHLAP9258853	Plasmid vector containing HLA-B*07:02:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:75 protein. This plasmid can be used for constructing HLA-B*07:02:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:76 Protein Expression Plasmid Vector	PHLAP9258854	Plasmid vector containing HLA-B*07:02:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:76 protein. This plasmid can be used for constructing HLA-B*07:02:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:77 Protein Expression Plasmid Vector	PHLAP9258855	Plasmid vector containing HLA-B*07:02:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:77 protein. This plasmid can be used for constructing HLA-B*07:02:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:78 Protein Expression Plasmid Vector	PHLAP9258856	Plasmid vector containing HLA-B*07:02:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:78 protein. This plasmid can be used for constructing HLA-B*07:02:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:79 Protein Expression Plasmid Vector	PHLAP9258857	Plasmid vector containing HLA-B*07:02:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:79 protein. This plasmid can be used for constructing HLA-B*07:02:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:80 Protein Expression Plasmid Vector	PHLAP9258858	Plasmid vector containing HLA-B*07:02:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:80 protein. This plasmid can be used for constructing HLA-B*07:02:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:81 Protein Expression Plasmid Vector	PHLAP9258859	Plasmid vector containing HLA-B*07:02:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:81 protein. This plasmid can be used for constructing HLA-B*07:02:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:82 Protein Expression Plasmid Vector	PHLAP9258860	Plasmid vector containing HLA-B*07:02:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:82 protein. This plasmid can be used for constructing HLA-B*07:02:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:83 Protein Expression Plasmid Vector	PHLAP9258861	Plasmid vector containing HLA-B*07:02:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:83 protein. This plasmid can be used for constructing HLA-B*07:02:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:84 Protein Expression Plasmid Vector	PHLAP9258862	Plasmid vector containing HLA-B*07:02:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:84 protein. This plasmid can be used for constructing HLA-B*07:02:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:85 Protein Expression Plasmid Vector	PHLAP9258863	Plasmid vector containing HLA-B*07:02:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:85 protein. This plasmid can be used for constructing HLA-B*07:02:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:86 Protein Expression Plasmid Vector	PHLAP9258864	Plasmid vector containing HLA-B*07:02:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:86 protein. This plasmid can be used for constructing HLA-B*07:02:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:87 Protein Expression Plasmid Vector	PHLAP9258865	Plasmid vector containing HLA-B*07:02:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:87 protein. This plasmid can be used for constructing HLA-B*07:02:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:88 Protein Expression Plasmid Vector	PHLAP9258866	Plasmid vector containing HLA-B*07:02:01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:88 protein. This plasmid can be used for constructing HLA-B*07:02:01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:89 Protein Expression Plasmid Vector	PHLAP9258867	Plasmid vector containing HLA-B*07:02:01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:89 protein. This plasmid can be used for constructing HLA-B*07:02:01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:90 Protein Expression Plasmid Vector	PHLAP9258868	Plasmid vector containing HLA-B*07:02:01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:90 protein. This plasmid can be used for constructing HLA-B*07:02:01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:91 Protein Expression Plasmid Vector	PHLAP9258869	Plasmid vector containing HLA-B*07:02:01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:91 protein. This plasmid can be used for constructing HLA-B*07:02:01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:92 Protein Expression Plasmid Vector	PHLAP9258870	Plasmid vector containing HLA-B*07:02:01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:92 protein. This plasmid can be used for constructing HLA-B*07:02:01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:93 Protein Expression Plasmid Vector	PHLAP9258871	Plasmid vector containing HLA-B*07:02:01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:93 protein. This plasmid can be used for constructing HLA-B*07:02:01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:94 Protein Expression Plasmid Vector	PHLAP9258872	Plasmid vector containing HLA-B*07:02:01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:94 protein. This plasmid can be used for constructing HLA-B*07:02:01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:95 Protein Expression Plasmid Vector	PHLAP9258873	Plasmid vector containing HLA-B*07:02:01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:95 protein. This plasmid can be used for constructing HLA-B*07:02:01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:96 Protein Expression Plasmid Vector	PHLAP9258874	Plasmid vector containing HLA-B*07:02:01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:96 protein. This plasmid can be used for constructing HLA-B*07:02:01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:01:97 Protein Expression Plasmid Vector	PHLAP9258875	Plasmid vector containing HLA-B*07:02:01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:97 protein. This plasmid can be used for constructing HLA-B*07:02:01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:98 Protein Expression Plasmid Vector	PHLAP9258876	Plasmid vector containing HLA-B*07:02:01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:98 protein. This plasmid can be used for constructing HLA-B*07:02:01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:01:99 Protein Expression Plasmid Vector	PHLAP9258877	Plasmid vector containing HLA-B*07:02:01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:01:99 protein. This plasmid can be used for constructing HLA-B*07:02:01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:02 Protein Expression Plasmid Vector	PHLAP9258878	Plasmid vector containing HLA-B*07:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:02 protein. This plasmid can be used for constructing HLA-B*07:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:03 Protein Expression Plasmid Vector	PHLAP9258879	Plasmid vector containing HLA-B*07:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:03 protein. This plasmid can be used for constructing HLA-B*07:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:04 Protein Expression Plasmid Vector	PHLAP9258880	Plasmid vector containing HLA-B*07:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:04 protein. This plasmid can be used for constructing HLA-B*07:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:05 Protein Expression Plasmid Vector	PHLAP9258881	Plasmid vector containing HLA-B*07:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:05 protein. This plasmid can be used for constructing HLA-B*07:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:06 Protein Expression Plasmid Vector	PHLAP9258882	Plasmid vector containing HLA-B*07:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:06 protein. This plasmid can be used for constructing HLA-B*07:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:07 Protein Expression Plasmid Vector	PHLAP9258883	Plasmid vector containing HLA-B*07:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:07 protein. This plasmid can be used for constructing HLA-B*07:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:08 Protein Expression Plasmid Vector	PHLAP9258884	Plasmid vector containing HLA-B*07:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:08 protein. This plasmid can be used for constructing HLA-B*07:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:09 Protein Expression Plasmid Vector	PHLAP9258885	Plasmid vector containing HLA-B*07:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:09 protein. This plasmid can be used for constructing HLA-B*07:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:10 Protein Expression Plasmid Vector	PHLAP9258886	Plasmid vector containing HLA-B*07:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:10 protein. This plasmid can be used for constructing HLA-B*07:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:100 Protein Expression Plasmid Vector	PHLAP9258887	Plasmid vector containing HLA-B*07:02:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:100 protein. This plasmid can be used for constructing HLA-B*07:02:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-B*07:02:101 Protein Expression Plasmid Vector	PHLAP9258888	Plasmid vector containing HLA-B*07:02:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:101 protein. This plasmid can be used for constructing HLA-B*07:02:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry
HLA-B*07:02:102 Protein Expression Plasmid Vector	PHLAP9258889	Plasmid vector containing HLA-B*07:02:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:102 protein. This plasmid can be used for constructing HLA-B*07:02:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM	Inquiry

HLA-B*07:02:103 Protein Expression Plasmid Vector	PHLAP9258890	Plasmid vector containing HLA-B*07:02:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:103 protein. This plasmid can be used for constructing HLA-B*07:02:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:104 Protein Expression Plasmid Vector	PHLAP9258891	Plasmid vector containing HLA-B*07:02:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:104 protein. This plasmid can be used for constructing HLA-B*07:02:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:105 Protein Expression Plasmid Vector	PHLAP9258892	Plasmid vector containing HLA-B*07:02:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:105 protein. This plasmid can be used for constructing HLA-B*07:02:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:106 Protein Expression Plasmid Vector	PHLAP9258893	Plasmid vector containing HLA-B*07:02:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:106 protein. This plasmid can be used for constructing HLA-B*07:02:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:107 Protein Expression Plasmid Vector	PHLAP9258894	Plasmid vector containing HLA-B*07:02:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:107 protein. This plasmid can be used for constructing HLA-B*07:02:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:108 Protein Expression Plasmid Vector	PHLAP9258895	Plasmid vector containing HLA-B*07:02:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:108 protein. This plasmid can be used for constructing HLA-B*07:02:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:109 Protein Expression Plasmid Vector	PHLAP9258896	Plasmid vector containing HLA-B*07:02:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:109 protein. This plasmid can be used for constructing HLA-B*07:02:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:11 Protein Expression Plasmid Vector	PHLAP9258897	Plasmid vector containing HLA-B*07:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:11 protein. This plasmid can be used for constructing HLA-B*07:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:110 Protein Expression Plasmid Vector	PHLAP9258898	Plasmid vector containing HLA-B*07:02:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:110 protein. This plasmid can be used for constructing HLA-B*07:02:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:12 Protein Expression Plasmid Vector	PHLAP9258899	Plasmid vector containing HLA-B*07:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:12 protein. This plasmid can be used for constructing HLA-B*07:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:13 Protein Expression Plasmid Vector	PHLAP9258900	Plasmid vector containing HLA-B*07:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:13 protein. This plasmid can be used for constructing HLA-B*07:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:14 Protein Expression Plasmid Vector	PHLAP9258901	Plasmid vector containing HLA-B*07:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:14 protein. This plasmid can be used for constructing HLA-B*07:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:15 Protein Expression Plasmid Vector	PHLAP9258902	Plasmid vector containing HLA-B*07:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:15 protein. This plasmid can be used for constructing HLA-B*07:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:16 Protein Expression Plasmid Vector	PHLAP9258903	Plasmid vector containing HLA-B*07:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:16 protein. This plasmid can be used for constructing HLA-B*07:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:17 Protein Expression Plasmid Vector	PHLAP9258904	Plasmid vector containing HLA-B*07:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:17 protein. This plasmid can be used for constructing HLA-B*07:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:18 Protein Expression Plasmid Vector	PHLAP9258905	Plasmid vector containing HLA-B*07:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:18 protein. This plasmid can be used for constructing HLA-B*07:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:19 Protein Expression Plasmid Vector	PHLAP9258906	Plasmid vector containing HLA-B*07:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:19 protein. This plasmid can be used for constructing HLA-B*07:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:20 Protein Expression Plasmid Vector	PHLAP9258907	Plasmid vector containing HLA-B*07:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:20 protein. This plasmid can be used for constructing HLA-B*07:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:21 Protein Expression Plasmid Vector	PHLAP9258908	Plasmid vector containing HLA-B*07:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:21 protein. This plasmid can be used for constructing HLA-B*07:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:22 Protein Expression Plasmid Vector	PHLAP9258909	Plasmid vector containing HLA-B*07:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:22 protein. This plasmid can be used for constructing HLA-B*07:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:23 Protein Expression Plasmid Vector	PHLAP9258910	Plasmid vector containing HLA-B*07:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:23 protein. This plasmid can be used for constructing HLA-B*07:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:24 Protein Expression Plasmid Vector	PHLAP9258911	Plasmid vector containing HLA-B*07:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:24 protein. This plasmid can be used for constructing HLA-B*07:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:25 Protein Expression Plasmid Vector	PHLAP9258912	Plasmid vector containing HLA-B*07:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:25 protein. This plasmid can be used for constructing HLA-B*07:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:26 Protein Expression Plasmid Vector	PHLAP9258913	Plasmid vector containing HLA-B*07:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:26 protein. This plasmid can be used for constructing HLA-B*07:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:27 Protein Expression Plasmid Vector	PHLAP9258914	Plasmid vector containing HLA-B*07:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:27 protein. This plasmid can be used for constructing HLA-B*07:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:28 Protein Expression Plasmid Vector	PHLAP9258915	Plasmid vector containing HLA-B*07:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:28 protein. This plasmid can be used for constructing HLA-B*07:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:29 Protein Expression Plasmid Vector	PHLAP9258916	Plasmid vector containing HLA-B*07:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:29 protein. This plasmid can be used for constructing HLA-B*07:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:30 Protein Expression Plasmid Vector	PHLAP9258917	Plasmid vector containing HLA-B*07:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:30 protein. This plasmid can be used for constructing HLA-B*07:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:31 Protein Expression Plasmid Vector	PHLAP9258918	Plasmid vector containing HLA-B*07:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:31 protein. This plasmid can be used for constructing HLA-B*07:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:32 Protein Expression Plasmid Vector	PHLAP9258919	Plasmid vector containing HLA-B*07:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:32 protein. This plasmid can be used for constructing HLA-B*07:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:33 Protein Expression Plasmid Vector	PHLAP9258920	Plasmid vector containing HLA-B*07:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:33 protein. This plasmid can be used for constructing HLA-B*07:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:34 Protein Expression Plasmid Vector	PHLAP9258921	Plasmid vector containing HLA-B*07:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:34 protein. This plasmid can be used for constructing HLA-B*07:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:35 Protein Expression Plasmid Vector	PHLAP9258922	Plasmid vector containing HLA-B*07:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:35 protein. This plasmid can be used for constructing HLA-B*07:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:36 Protein Expression Plasmid Vector	PHLAP9258923	Plasmid vector containing HLA-B*07:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:36 protein. This plasmid can be used for constructing HLA-B*07:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:37 Protein Expression Plasmid Vector	PHLAP9258924	Plasmid vector containing HLA-B*07:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:37 protein. This plasmid can be used for constructing HLA-B*07:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:38 Protein Expression Plasmid Vector	PHLAP9258925	Plasmid vector containing HLA-B*07:02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:38 protein. This plasmid can be used for constructing HLA-B*07:02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:39 Protein Expression Plasmid Vector	PHLAP9258926	Plasmid vector containing HLA-B*07:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:39 protein. This plasmid can be used for constructing HLA-B*07:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:40 Protein Expression Plasmid Vector	PHLAP9258927	Plasmid vector containing HLA-B*07:02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:40 protein. This plasmid can be used for constructing HLA-B*07:02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:41 Protein Expression Plasmid Vector	PHLAP9258928	Plasmid vector containing HLA-B*07:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:41 protein. This plasmid can be used for constructing HLA-B*07:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:42 Protein Expression Plasmid Vector	PHLAP9258929	Plasmid vector containing HLA-B*07:02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:42 protein. This plasmid can be used for constructing HLA-B*07:02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:43 Protein Expression Plasmid Vector	PHLAP9258930	Plasmid vector containing HLA-B*07:02:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:43 protein. This plasmid can be used for constructing HLA-B*07:02:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:44 Protein Expression Plasmid Vector	PHLAP9258931	Plasmid vector containing HLA-B*07:02:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:44 protein. This plasmid can be used for constructing HLA-B*07:02:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:45 Protein Expression Plasmid Vector	PHLAP9258932	Plasmid vector containing HLA-B*07:02:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:45 protein. This plasmid can be used for constructing HLA-B*07:02:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:46 Protein Expression Plasmid Vector	PHLAP9258933	Plasmid vector containing HLA-B*07:02:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:46 protein. This plasmid can be used for constructing HLA-B*07:02:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:47 Protein Expression Plasmid Vector	PHLAP9258934	Plasmid vector containing HLA-B*07:02:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:47 protein. This plasmid can be used for constructing HLA-B*07:02:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:48 Protein Expression Plasmid Vector	PHLAP9258935	Plasmid vector containing HLA-B*07:02:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:48 protein. This plasmid can be used for constructing HLA-B*07:02:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:49 Protein Expression Plasmid Vector	PHLAP9258936	Plasmid vector containing HLA-B*07:02:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:49 protein. This plasmid can be used for constructing HLA-B*07:02:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:50 Protein Expression Plasmid Vector	PHLAP9258937	Plasmid vector containing HLA-B*07:02:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:50 protein. This plasmid can be used for constructing HLA-B*07:02:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:51 Protein Expression Plasmid Vector	PHLAP9258938	Plasmid vector containing HLA-B*07:02:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:51 protein. This plasmid can be used for constructing HLA-B*07:02:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:52 Protein Expression Plasmid Vector	PHLAP9258939	Plasmid vector containing HLA-B*07:02:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:52 protein. This plasmid can be used for constructing HLA-B*07:02:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:53 Protein Expression Plasmid Vector	PHLAP9258940	Plasmid vector containing HLA-B*07:02:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:53 protein. This plasmid can be used for constructing HLA-B*07:02:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:54 Protein Expression Plasmid Vector	PHLAP9258941	Plasmid vector containing HLA-B*07:02:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:54 protein. This plasmid can be used for constructing HLA-B*07:02:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:55 Protein Expression Plasmid Vector	PHLAP9258942	Plasmid vector containing HLA-B*07:02:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:55 protein. This plasmid can be used for constructing HLA-B*07:02:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:56 Protein Expression Plasmid Vector	PHLAP9258943	Plasmid vector containing HLA-B*07:02:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:56 protein. This plasmid can be used for constructing HLA-B*07:02:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:57 Protein Expression Plasmid Vector	PHLAP9258944	Plasmid vector containing HLA-B*07:02:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:57 protein. This plasmid can be used for constructing HLA-B*07:02:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:58 Protein Expression Plasmid Vector	PHLAP9258945	Plasmid vector containing HLA-B*07:02:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:58 protein. This plasmid can be used for constructing HLA-B*07:02:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:59 Protein Expression Plasmid Vector	PHLAP9258946	Plasmid vector containing HLA-B*07:02:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:59 protein. This plasmid can be used for constructing HLA-B*07:02:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:60 Protein Expression Plasmid Vector	PHLAP9258947	Plasmid vector containing HLA-B*07:02:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:60 protein. This plasmid can be used for constructing HLA-B*07:02:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:61 Protein Expression Plasmid Vector	PHLAP9258948	Plasmid vector containing HLA-B*07:02:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:61 protein. This plasmid can be used for constructing HLA-B*07:02:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:62 Protein Expression Plasmid Vector	PHLAP9258949	Plasmid vector containing HLA-B*07:02:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:62 protein. This plasmid can be used for constructing HLA-B*07:02:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:63 Protein Expression Plasmid Vector	PHLAP9258950	Plasmid vector containing HLA-B*07:02:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:63 protein. This plasmid can be used for constructing HLA-B*07:02:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:64 Protein Expression Plasmid Vector	PHLAP9258951	Plasmid vector containing HLA-B*07:02:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:64 protein. This plasmid can be used for constructing HLA-B*07:02:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:65 Protein Expression Plasmid Vector	PHLAP9258952	Plasmid vector containing HLA-B*07:02:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:65 protein. This plasmid can be used for constructing HLA-B*07:02:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:66 Protein Expression Plasmid Vector	PHLAP9258953	Plasmid vector containing HLA-B*07:02:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:66 protein. This plasmid can be used for constructing HLA-B*07:02:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:67 Protein Expression Plasmid Vector	PHLAP9258954	Plasmid vector containing HLA-B*07:02:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:67 protein. This plasmid can be used for constructing HLA-B*07:02:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:68 Protein Expression Plasmid Vector	PHLAP9258955	Plasmid vector containing HLA-B*07:02:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:68 protein. This plasmid can be used for constructing HLA-B*07:02:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:69 Protein Expression Plasmid Vector	PHLAP9258956	Plasmid vector containing HLA-B*07:02:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:69 protein. This plasmid can be used for constructing HLA-B*07:02:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:70 Protein Expression Plasmid Vector	PHLAP9258957	Plasmid vector containing HLA-B*07:02:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:70 protein. This plasmid can be used for constructing HLA-B*07:02:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:71 Protein Expression Plasmid Vector	PHLAP9258958	Plasmid vector containing HLA-B*07:02:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:71 protein. This plasmid can be used for constructing HLA-B*07:02:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:72 Protein Expression Plasmid Vector	PHLAP9258959	Plasmid vector containing HLA-B*07:02:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:72 protein. This plasmid can be used for constructing HLA-B*07:02:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:73 Protein Expression Plasmid Vector	PHLAP9258960	Plasmid vector containing HLA-B*07:02:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:73 protein. This plasmid can be used for constructing HLA-B*07:02:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:74 Protein Expression Plasmid Vector	PHLAP9258961	Plasmid vector containing HLA-B*07:02:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:74 protein. This plasmid can be used for constructing HLA-B*07:02:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:75:01 Protein Expression Plasmid Vector	PHLAP9258962	Plasmid vector containing HLA-B*07:02:75:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:75:01 protein. This plasmid can be used for constructing HLA-B*07:02:75:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:75:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:75:02 Protein Expression Plasmid Vector	PHLAP9258963	Plasmid vector containing HLA-B*07:02:75:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:75:02 protein. This plasmid can be used for constructing HLA-B*07:02:75:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:75:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:76 Protein Expression Plasmid Vector	PHLAP9258964	Plasmid vector containing HLA-B*07:02:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:76 protein. This plasmid can be used for constructing HLA-B*07:02:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:77 Protein Expression Plasmid Vector	PHLAP9258965	Plasmid vector containing HLA-B*07:02:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:77 protein. This plasmid can be used for constructing HLA-B*07:02:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:78 Protein Expression Plasmid Vector	PHLAP9258966	Plasmid vector containing HLA-B*07:02:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:78 protein. This plasmid can be used for constructing HLA-B*07:02:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:79 Protein Expression Plasmid Vector	PHLAP9258967	Plasmid vector containing HLA-B*07:02:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:79 protein. This plasmid can be used for constructing HLA-B*07:02:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:80 Protein Expression Plasmid Vector	PHLAP9258968	Plasmid vector containing HLA-B*07:02:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:80 protein. This plasmid can be used for constructing HLA-B*07:02:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:81 Protein Expression Plasmid Vector	PHLAP9258969	Plasmid vector containing HLA-B*07:02:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:81 protein. This plasmid can be used for constructing HLA-B*07:02:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:82 Protein Expression Plasmid Vector	PHLAP9258970	Plasmid vector containing HLA-B*07:02:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:82 protein. This plasmid can be used for constructing HLA-B*07:02:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:83 Protein Expression Plasmid Vector	PHLAP9258971	Plasmid vector containing HLA-B*07:02:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:83 protein. This plasmid can be used for constructing HLA-B*07:02:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:84 Protein Expression Plasmid Vector	PHLAP9258972	Plasmid vector containing HLA-B*07:02:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:84 protein. This plasmid can be used for constructing HLA-B*07:02:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:85 Protein Expression Plasmid Vector	PHLAP9258973	Plasmid vector containing HLA-B*07:02:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:85 protein. This plasmid can be used for constructing HLA-B*07:02:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:86 Protein Expression Plasmid Vector	PHLAP9258974	Plasmid vector containing HLA-B*07:02:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:86 protein. This plasmid can be used for constructing HLA-B*07:02:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:87 Protein Expression Plasmid Vector	PHLAP9258975	Plasmid vector containing HLA-B*07:02:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:87 protein. This plasmid can be used for constructing HLA-B*07:02:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:88 Protein Expression Plasmid Vector	PHLAP9258976	Plasmid vector containing HLA-B*07:02:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:88 protein. This plasmid can be used for constructing HLA-B*07:02:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:89 Protein Expression Plasmid Vector	PHLAP9258977	Plasmid vector containing HLA-B*07:02:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:89 protein. This plasmid can be used for constructing HLA-B*07:02:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:90 Protein Expression Plasmid Vector	PHLAP9258978	Plasmid vector containing HLA-B*07:02:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:90 protein. This plasmid can be used for constructing HLA-B*07:02:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:91 Protein Expression Plasmid Vector	PHLAP9258979	Plasmid vector containing HLA-B*07:02:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:91 protein. This plasmid can be used for constructing HLA-B*07:02:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:92 Protein Expression Plasmid Vector	PHLAP9258980	Plasmid vector containing HLA-B*07:02:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:92 protein. This plasmid can be used for constructing HLA-B*07:02:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:93 Protein Expression Plasmid Vector	PHLAP9258981	Plasmid vector containing HLA-B*07:02:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:93 protein. This plasmid can be used for constructing HLA-B*07:02:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:94 Protein Expression Plasmid Vector	PHLAP9258982	Plasmid vector containing HLA-B*07:02:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:94 protein. This plasmid can be used for constructing HLA-B*07:02:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:95 Protein Expression Plasmid Vector	PHLAP9258983	Plasmid vector containing HLA-B*07:02:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:95 protein. This plasmid can be used for constructing HLA-B*07:02:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:96 Protein Expression Plasmid Vector	PHLAP9258984	Plasmid vector containing HLA-B*07:02:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:96 protein. This plasmid can be used for constructing HLA-B*07:02:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:97 Protein Expression Plasmid Vector	PHLAP9258985	Plasmid vector containing HLA-B*07:02:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:97 protein. This plasmid can be used for constructing HLA-B*07:02:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:02:98 Protein Expression Plasmid Vector	PHLAP9258986	Plasmid vector containing HLA-B*07:02:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:98 protein. This plasmid can be used for constructing HLA-B*07:02:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:02:99 Protein Expression Plasmid Vector	PHLAP9258987	Plasmid vector containing HLA-B*07:02:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:02:99 protein. This plasmid can be used for constructing HLA-B*07:02:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:02:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:03 Protein Expression Plasmid Vector	PHLAP9258988	Plasmid vector containing HLA-B*07:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:03 protein. This plasmid can be used for constructing HLA-B*07:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:04:01 Protein Expression Plasmid Vector	PHLAP9258989	Plasmid vector containing HLA-B*07:04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:04:01 protein. This plasmid can be used for constructing HLA-B*07:04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:04:02 Protein Expression Plasmid Vector	PHLAP9258990	Plasmid vector containing HLA-B*07:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:04:02 protein. This plasmid can be used for constructing HLA-B*07:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:01:01 Protein Expression Plasmid Vector	PHLAP9258991	Plasmid vector containing HLA-B*07:05:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:01:01 protein. This plasmid can be used for constructing HLA-B*07:05:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:01:02 Protein Expression Plasmid Vector	PHLAP9258992	Plasmid vector containing HLA-B*07:05:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:01:02 protein. This plasmid can be used for constructing HLA-B*07:05:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:05:01:03 Protein Expression Plasmid Vector	PHLAP9258993	Plasmid vector containing HLA-B*07:05:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:01:03 protein. This plasmid can be used for constructing HLA-B*07:05:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:01:04 Protein Expression Plasmid Vector	PHLAP9258994	Plasmid vector containing HLA-B*07:05:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:01:04 protein. This plasmid can be used for constructing HLA-B*07:05:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:01:05 Protein Expression Plasmid Vector	PHLAP9258995	Plasmid vector containing HLA-B*07:05:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:01:05 protein. This plasmid can be used for constructing HLA-B*07:05:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:01:06 Protein Expression Plasmid Vector	PHLAP9258996	Plasmid vector containing HLA-B*07:05:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:01:06 protein. This plasmid can be used for constructing HLA-B*07:05:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:01:07 Protein Expression Plasmid Vector	PHLAP9258997	Plasmid vector containing HLA-B*07:05:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:01:07 protein. This plasmid can be used for constructing HLA-B*07:05:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:01:08 Protein Expression Plasmid Vector	PHLAP9258998	Plasmid vector containing HLA-B*07:05:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:01:08 protein. This plasmid can be used for constructing HLA-B*07:05:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:02 Protein Expression Plasmid Vector	PHLAP9258999	Plasmid vector containing HLA-B*07:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:02 protein. This plasmid can be used for constructing HLA-B*07:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:05:03 Protein Expression Plasmid Vector	PHLAP9259000	Plasmid vector containing HLA-B*07:05:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:03 protein. This plasmid can be used for constructing HLA-B*07:05:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:04 Protein Expression Plasmid Vector	PHLAP9259001	Plasmid vector containing HLA-B*07:05:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:04 protein. This plasmid can be used for constructing HLA-B*07:05:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:05 Protein Expression Plasmid Vector	PHLAP9259002	Plasmid vector containing HLA-B*07:05:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:05 protein. This plasmid can be used for constructing HLA-B*07:05:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:06 Protein Expression Plasmid Vector	PHLAP9259003	Plasmid vector containing HLA-B*07:05:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:06 protein. This plasmid can be used for constructing HLA-B*07:05:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:07 Protein Expression Plasmid Vector	PHLAP9259004	Plasmid vector containing HLA-B*07:05:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:07 protein. This plasmid can be used for constructing HLA-B*07:05:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:08 Protein Expression Plasmid Vector	PHLAP9259005	Plasmid vector containing HLA-B*07:05:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:08 protein. This plasmid can be used for constructing HLA-B*07:05:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:09 Protein Expression Plasmid Vector	PHLAP9259006	Plasmid vector containing HLA-B*07:05:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:09 protein. This plasmid can be used for constructing HLA-B*07:05:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:10 Protein Expression Plasmid Vector	PHLAP9259007	Plasmid vector containing HLA-B*07:05:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:10 protein. This plasmid can be used for constructing HLA-B*07:05:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:05:11 Protein Expression Plasmid Vector	PHLAP9259008	Plasmid vector containing HLA-B*07:05:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:11 protein. This plasmid can be used for constructing HLA-B*07:05:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:12 Protein Expression Plasmid Vector	PHLAP9259009	Plasmid vector containing HLA-B*07:05:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:12 protein. This plasmid can be used for constructing HLA-B*07:05:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:05:13 Protein Expression Plasmid Vector	PHLAP9259010	Plasmid vector containing HLA-B*07:05:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:05:13 protein. This plasmid can be used for constructing HLA-B*07:05:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:05:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:06:01:01 Protein Expression Plasmid Vector	PHLAP9259011	Plasmid vector containing HLA-B*07:06:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:06:01:01 protein. This plasmid can be used for constructing HLA-B*07:06:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:06:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:06:01:02 Protein Expression Plasmid Vector	PHLAP9259012	Plasmid vector containing HLA-B*07:06:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:06:01:02 protein. This plasmid can be used for constructing HLA-B*07:06:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:06:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:06:01:03 Protein Expression Plasmid Vector	PHLAP9259013	Plasmid vector containing HLA-B*07:06:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:06:01:03 protein. This plasmid can be used for constructing HLA-B*07:06:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:06:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:06:01:04 Protein Expression Plasmid Vector	PHLAP9259014	Plasmid vector containing HLA-B*07:06:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:06:01:04 protein. This plasmid can be used for constructing HLA-B*07:06:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:06:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:06:01:05 Protein Expression Plasmid Vector	PHLAP9259015	Plasmid vector containing HLA-B*07:06:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:06:01:05 protein. This plasmid can be used for constructing HLA-B*07:06:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:06:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:06:01:06 Protein Expression Plasmid Vector	PHLAP9259016	Plasmid vector containing HLA-B*07:06:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:06:01:06 protein. This plasmid can be used for constructing HLA-B*07:06:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:06:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:06:02 Protein Expression Plasmid Vector	PHLAP9259017	Plasmid vector containing HLA-B*07:06:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:06:02 protein. This plasmid can be used for constructing HLA-B*07:06:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:06:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:06:03 Protein Expression Plasmid Vector	PHLAP9259018	Plasmid vector containing HLA-B*07:06:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:06:03 protein. This plasmid can be used for constructing HLA-B*07:06:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:06:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:06:04 Protein Expression Plasmid Vector	PHLAP9259019	Plasmid vector containing HLA-B*07:06:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:06:04 protein. This plasmid can be used for constructing HLA-B*07:06:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:06:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:06:05 Protein Expression Plasmid Vector	PHLAP9259020	Plasmid vector containing HLA-B*07:06:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:06:05 protein. This plasmid can be used for constructing HLA-B*07:06:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:06:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:06:06 Protein Expression Plasmid Vector	PHLAP9259021	Plasmid vector containing HLA-B*07:06:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:06:06 protein. This plasmid can be used for constructing HLA-B*07:06:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:06:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:07:01:01 Protein Expression Plasmid Vector	PHLAP9259022	Plasmid vector containing HLA-B*07:07:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:07:01:01 protein. This plasmid can be used for constructing HLA-B*07:07:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:07:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:07:01:02 Protein Expression Plasmid Vector	PHLAP9259023	Plasmid vector containing HLA-B*07:07:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:07:01:02 protein. This plasmid can be used for constructing HLA-B*07:07:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:07:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:07:02 Protein Expression Plasmid Vector	PHLAP9259024	Plasmid vector containing HLA-B*07:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:07:02 protein. This plasmid can be used for constructing HLA-B*07:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:07:03 Protein Expression Plasmid Vector	PHLAP9259025	Plasmid vector containing HLA-B*07:07:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:07:03 protein. This plasmid can be used for constructing HLA-B*07:07:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:07:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:08:01 Protein Expression Plasmid Vector	PHLAP9259026	Plasmid vector containing HLA-B*07:08:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:08:01 protein. This plasmid can be used for constructing HLA-B*07:08:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:08:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:08:02 Protein Expression Plasmid Vector	PHLAP9259027	Plasmid vector containing HLA-B*07:08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:08:02 protein. This plasmid can be used for constructing HLA-B*07:08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:09:01 Protein Expression Plasmid Vector	PHLAP9259028	Plasmid vector containing HLA-B*07:09:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:09:01 protein. This plasmid can be used for constructing HLA-B*07:09:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:09:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:09:02 Protein Expression Plasmid Vector	PHLAP9259029	Plasmid vector containing HLA-B*07:09:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:09:02 protein. This plasmid can be used for constructing HLA-B*07:09:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:09:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:10:01 Protein Expression Plasmid Vector	PHLAP9259030	Plasmid vector containing HLA-B*07:10:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:10:01 protein. This plasmid can be used for constructing HLA-B*07:10:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:10:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:10:02 Protein Expression Plasmid Vector	PHLAP9259031	Plasmid vector containing HLA-B*07:10:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:10:02 protein. This plasmid can be used for constructing HLA-B*07:10:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:10:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:100 Protein Expression Plasmid Vector	PHLAP9259032	Plasmid vector containing HLA-B*07:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:100 protein. This plasmid can be used for constructing HLA-B*07:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:101 Protein Expression Plasmid Vector	PHLAP9259033	Plasmid vector containing HLA-B*07:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:101 protein. This plasmid can be used for constructing HLA-B*07:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:102 Protein Expression Plasmid Vector	PHLAP9259034	Plasmid vector containing HLA-B*07:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:102 protein. This plasmid can be used for constructing HLA-B*07:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:103 Protein Expression Plasmid Vector	PHLAP9259035	Plasmid vector containing HLA-B*07:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:103 protein. This plasmid can be used for constructing HLA-B*07:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:104 Protein Expression Plasmid Vector	PHLAP9259036	Plasmid vector containing HLA-B*07:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:104 protein. This plasmid can be used for constructing HLA-B*07:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:105 Protein Expression Plasmid Vector	PHLAP9259037	Plasmid vector containing HLA-B*07:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:105 protein. This plasmid can be used for constructing HLA-B*07:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:106 Protein Expression Plasmid Vector	PHLAP9259038	Plasmid vector containing HLA-B*07:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:106 protein. This plasmid can be used for constructing HLA-B*07:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:107 Protein Expression Plasmid Vector	PHLAP9259039	Plasmid vector containing HLA-B*07:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:107 protein. This plasmid can be used for constructing HLA-B*07:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:108 Protein Expression Plasmid Vector	PHLAP9259040	Plasmid vector containing HLA-B*07:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:108 protein. This plasmid can be used for constructing HLA-B*07:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:109 Protein Expression Plasmid Vector	PHLAP9259041	Plasmid vector containing HLA-B*07:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:109 protein. This plasmid can be used for constructing HLA-B*07:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:11 Protein Expression Plasmid Vector	PHLAP9259042	Plasmid vector containing HLA-B*07:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:11 protein. This plasmid can be used for constructing HLA-B*07:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:110 Protein Expression Plasmid Vector	PHLAP9259043	Plasmid vector containing HLA-B*07:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:110 protein. This plasmid can be used for constructing HLA-B*07:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:111N Protein Expression Plasmid Vector	PHLAP9259044	Plasmid vector containing HLA-B*07:111N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:111N protein. This plasmid can be used for constructing HLA-B*07:111N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:111N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:112 Protein Expression Plasmid Vector	PHLAP9259045	Plasmid vector containing HLA-B*07:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:112 protein. This plasmid can be used for constructing HLA-B*07:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:113 Protein Expression Plasmid Vector	PHLAP9259046	Plasmid vector containing HLA-B*07:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:113 protein. This plasmid can be used for constructing HLA-B*07:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:114 Protein Expression Plasmid Vector	PHLAP9259047	Plasmid vector containing HLA-B*07:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:114 protein. This plasmid can be used for constructing HLA-B*07:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:115 Protein Expression Plasmid Vector	PHLAP9259048	Plasmid vector containing HLA-B*07:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:115 protein. This plasmid can be used for constructing HLA-B*07:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:116 Protein Expression Plasmid Vector	PHLAP9259049	Plasmid vector containing HLA-B*07:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:116 protein. This plasmid can be used for constructing HLA-B*07:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:117 Protein Expression Plasmid Vector	PHLAP9259050	Plasmid vector containing HLA-B*07:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:117 protein. This plasmid can be used for constructing HLA-B*07:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:118 Protein Expression Plasmid Vector	PHLAP9259051	Plasmid vector containing HLA-B*07:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:118 protein. This plasmid can be used for constructing HLA-B*07:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:119 Protein Expression Plasmid Vector	PHLAP9259052	Plasmid vector containing HLA-B*07:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:119 protein. This plasmid can be used for constructing HLA-B*07:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:12 Protein Expression Plasmid Vector	PHLAP9259053	Plasmid vector containing HLA-B*07:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:12 protein. This plasmid can be used for constructing HLA-B*07:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:120 Protein Expression Plasmid Vector	PHLAP9259054	Plasmid vector containing HLA-B*07:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:120 protein. This plasmid can be used for constructing HLA-B*07:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:121 Protein Expression Plasmid Vector	PHLAP9259055	Plasmid vector containing HLA-B*07:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:121 protein. This plasmid can be used for constructing HLA-B*07:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:122 Protein Expression Plasmid Vector	PHLAP9259056	Plasmid vector containing HLA-B*07:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:122 protein. This plasmid can be used for constructing HLA-B*07:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:123 Protein Expression Plasmid Vector	PHLAP9259057	Plasmid vector containing HLA-B*07:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:123 protein. This plasmid can be used for constructing HLA-B*07:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:124 Protein Expression Plasmid Vector	PHLAP9259058	Plasmid vector containing HLA-B*07:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:124 protein. This plasmid can be used for constructing HLA-B*07:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:125 Protein Expression Plasmid Vector	PHLAP9259059	Plasmid vector containing HLA-B*07:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:125 protein. This plasmid can be used for constructing HLA-B*07:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:126 Protein Expression Plasmid Vector	PHLAP9259060	Plasmid vector containing HLA-B*07:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:126 protein. This plasmid can be used for constructing HLA-B*07:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:127 Protein Expression Plasmid Vector	PHLAP9259061	Plasmid vector containing HLA-B*07:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:127 protein. This plasmid can be used for constructing HLA-B*07:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:128 Protein Expression Plasmid Vector	PHLAP9259062	Plasmid vector containing HLA-B*07:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:128 protein. This plasmid can be used for constructing HLA-B*07:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:129 Protein Expression Plasmid Vector	PHLAP9259063	Plasmid vector containing HLA-B*07:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:129 protein. This plasmid can be used for constructing HLA-B*07:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:13 Protein Expression Plasmid Vector	PHLAP9259064	Plasmid vector containing HLA-B*07:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:13 protein. This plasmid can be used for constructing HLA-B*07:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:130 Protein Expression Plasmid Vector	PHLAP9259065	Plasmid vector containing HLA-B*07:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:130 protein. This plasmid can be used for constructing HLA-B*07:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:131 Protein Expression Plasmid Vector	PHLAP9259066	Plasmid vector containing HLA-B*07:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:131 protein. This plasmid can be used for constructing HLA-B*07:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:132 Protein Expression Plasmid Vector	PHLAP9259067	Plasmid vector containing HLA-B*07:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:132 protein. This plasmid can be used for constructing HLA-B*07:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:133 Protein Expression Plasmid Vector	PHLAP9259068	Plasmid vector containing HLA-B*07:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:133 protein. This plasmid can be used for constructing HLA-B*07:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:134 Protein Expression Plasmid Vector	PHLAP9259069	Plasmid vector containing HLA-B*07:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:134 protein. This plasmid can be used for constructing HLA-B*07:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:135N Protein Expression Plasmid Vector	PHLAP9259070	Plasmid vector containing HLA-B*07:135N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:135N protein. This plasmid can be used for constructing HLA-B*07:135N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:135N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:136:01 Protein Expression Plasmid Vector	PHLAP9259071	Plasmid vector containing HLA-B*07:136:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:136:01 protein. This plasmid can be used for constructing HLA-B*07:136:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:136:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:136:02 Protein Expression Plasmid Vector	PHLAP9259072	Plasmid vector containing HLA-B*07:136:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:136:02 protein. This plasmid can be used for constructing HLA-B*07:136:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:136:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:137 Protein Expression Plasmid Vector	PHLAP9259073	Plasmid vector containing HLA-B*07:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:137 protein. This plasmid can be used for constructing HLA-B*07:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:138 Protein Expression Plasmid Vector	PHLAP9259074	Plasmid vector containing HLA-B*07:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:138 protein. This plasmid can be used for constructing HLA-B*07:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:138 Protein Expression Plasmid Vector	PHLAP9259075	Plasmid vector containing HLA-B*07:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:138 protein. This plasmid can be used for constructing HLA-B*07:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:139:01 Protein Expression Plasmid Vector	PHLAP9259076	Plasmid vector containing HLA-B*07:139:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:139:01 protein. This plasmid can be used for constructing HLA-B*07:139:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:139:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:139:02 Protein Expression Plasmid Vector	PHLAP9259077	Plasmid vector containing HLA-B*07:139:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:139:02 protein. This plasmid can be used for constructing HLA-B*07:139:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:139:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:14:01 Protein Expression Plasmid Vector	PHLAP9259078	Plasmid vector containing HLA-B*07:14:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:14:01 protein. This plasmid can be used for constructing HLA-B*07:14:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:14:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:14:02 Protein Expression Plasmid Vector	PHLAP9259079	Plasmid vector containing HLA-B*07:14:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:14:02 protein. This plasmid can be used for constructing HLA-B*07:14:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:14:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:140 Protein Expression Plasmid Vector	PHLAP9259080	Plasmid vector containing HLA-B*07:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:140 protein. This plasmid can be used for constructing HLA-B*07:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:141 Protein Expression Plasmid Vector	PHLAP9259081	Plasmid vector containing HLA-B*07:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:141 protein. This plasmid can be used for constructing HLA-B*07:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:142 Protein Expression Plasmid Vector	PHLAP9259082	Plasmid vector containing HLA-B*07:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:142 protein. This plasmid can be used for constructing HLA-B*07:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:143 Protein Expression Plasmid Vector	PHLAP9259083	Plasmid vector containing HLA-B*07:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:143 protein. This plasmid can be used for constructing HLA-B*07:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:144 Protein Expression Plasmid Vector	PHLAP9259084	Plasmid vector containing HLA-B*07:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:144 protein. This plasmid can be used for constructing HLA-B*07:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:145 Protein Expression Plasmid Vector	PHLAP9259085	Plasmid vector containing HLA-B*07:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:145 protein. This plasmid can be used for constructing HLA-B*07:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:146 Protein Expression Plasmid Vector	PHLAP9259086	Plasmid vector containing HLA-B*07:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:146 protein. This plasmid can be used for constructing HLA-B*07:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:147 Protein Expression Plasmid Vector	PHLAP9259087	Plasmid vector containing HLA-B*07:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:147 protein. This plasmid can be used for constructing HLA-B*07:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:148 Protein Expression Plasmid Vector	PHLAP9259088	Plasmid vector containing HLA-B*07:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:148 protein. This plasmid can be used for constructing HLA-B*07:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:149 Protein Expression Plasmid Vector	PHLAP9259089	Plasmid vector containing HLA-B*07:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:149 protein. This plasmid can be used for constructing HLA-B*07:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:15 Protein Expression Plasmid Vector	PHLAP9259090	Plasmid vector containing HLA-B*07:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:15 protein. This plasmid can be used for constructing HLA-B*07:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:150 Protein Expression Plasmid Vector	PHLAP9259091	Plasmid vector containing HLA-B*07:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:150 protein. This plasmid can be used for constructing HLA-B*07:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:151:01 Protein Expression Plasmid Vector	PHLAP9259092	Plasmid vector containing HLA-B*07:151:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:151:01 protein. This plasmid can be used for constructing HLA-B*07:151:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:151:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:151:02 Protein Expression Plasmid Vector	PHLAP9259093	Plasmid vector containing HLA-B*07:151:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:151:02 protein. This plasmid can be used for constructing HLA-B*07:151:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:151:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:152 Protein Expression Plasmid Vector	PHLAP9259094	Plasmid vector containing HLA-B*07:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:152 protein. This plasmid can be used for constructing HLA-B*07:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:153 Protein Expression Plasmid Vector	PHLAP9259095	Plasmid vector containing HLA-B*07:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:153 protein. This plasmid can be used for constructing HLA-B*07:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:154 Protein Expression Plasmid Vector	PHLAP9259096	Plasmid vector containing HLA-B*07:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:154 protein. This plasmid can be used for constructing HLA-B*07:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:155 Protein Expression Plasmid Vector	PHLAP9259097	Plasmid vector containing HLA-B*07:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:155 protein. This plasmid can be used for constructing HLA-B*07:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:156 Protein Expression Plasmid Vector	PHLAP9259098	Plasmid vector containing HLA-B*07:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:156 protein. This plasmid can be used for constructing HLA-B*07:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:157 Protein Expression Plasmid Vector	PHLAP9259099	Plasmid vector containing HLA-B*07:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:157 protein. This plasmid can be used for constructing HLA-B*07:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:158 Protein Expression Plasmid Vector	PHLAP9259100	Plasmid vector containing HLA-B*07:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:158 protein. This plasmid can be used for constructing HLA-B*07:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:159 Protein Expression Plasmid Vector	PHLAP9259101	Plasmid vector containing HLA-B*07:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:159 protein. This plasmid can be used for constructing HLA-B*07:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:16 Protein Expression Plasmid Vector	PHLAP9259102	Plasmid vector containing HLA-B*07:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:16 protein. This plasmid can be used for constructing HLA-B*07:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:160 Protein Expression Plasmid Vector	PHLAP9259103	Plasmid vector containing HLA-B*07:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:160 protein. This plasmid can be used for constructing HLA-B*07:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:161N Protein Expression Plasmid Vector	PHLAP9259104	Plasmid vector containing HLA-B*07:161N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:161N protein. This plasmid can be used for constructing HLA-B*07:161N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:161N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:162 Protein Expression Plasmid Vector	PHLAP9259105	Plasmid vector containing HLA-B*07:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:162 protein. This plasmid can be used for constructing HLA-B*07:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:163 Protein Expression Plasmid Vector	PHLAP9259106	Plasmid vector containing HLA-B*07:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:163 protein. This plasmid can be used for constructing HLA-B*07:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:164 Protein Expression Plasmid Vector	PHLAP9259107	Plasmid vector containing HLA-B*07:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:164 protein. This plasmid can be used for constructing HLA-B*07:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:165 Protein Expression Plasmid Vector	PHLAP9259108	Plasmid vector containing HLA-B*07:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:165 protein. This plasmid can be used for constructing HLA-B*07:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:166 Protein Expression Plasmid Vector	PHLAP9259109	Plasmid vector containing HLA-B*07:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:166 protein. This plasmid can be used for constructing HLA-B*07:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:167N Protein Expression Plasmid Vector	PHLAP9259110	Plasmid vector containing HLA-B*07:167N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:167N protein. This plasmid can be used for constructing HLA-B*07:167N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:167N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:168 Protein Expression Plasmid Vector	PHLAP9259111	Plasmid vector containing HLA-B*07:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:168 protein. This plasmid can be used for constructing HLA-B*07:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:169 Protein Expression Plasmid Vector	PHLAP9259112	Plasmid vector containing HLA-B*07:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:169 protein. This plasmid can be used for constructing HLA-B*07:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:17 Protein Expression Plasmid Vector	PHLAP9259113	Plasmid vector containing HLA-B*07:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:17 protein. This plasmid can be used for constructing HLA-B*07:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:170 Protein Expression Plasmid Vector	PHLAP9259114	Plasmid vector containing HLA-B*07:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:170 protein. This plasmid can be used for constructing HLA-B*07:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:171 Protein Expression Plasmid Vector	PHLAP9259115	Plasmid vector containing HLA-B*07:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:171 protein. This plasmid can be used for constructing HLA-B*07:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:172:01 Protein Expression Plasmid Vector	PHLAP9259116	Plasmid vector containing HLA-B*07:172:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:172:01 protein. This plasmid can be used for constructing HLA-B*07:172:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:172:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:172:02 Protein Expression Plasmid Vector	PHLAP9259117	Plasmid vector containing HLA-B*07:172:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:172:02 protein. This plasmid can be used for constructing HLA-B*07:172:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:172:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:173 Protein Expression Plasmid Vector	PHLAP9259118	Plasmid vector containing HLA-B*07:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:173 protein. This plasmid can be used for constructing HLA-B*07:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:174 Protein Expression Plasmid Vector	PHLAP9259119	Plasmid vector containing HLA-B*07:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:174 protein. This plasmid can be used for constructing HLA-B*07:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:175 Protein Expression Plasmid Vector	PHLAP9259120	Plasmid vector containing HLA-B*07:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:175 protein. This plasmid can be used for constructing HLA-B*07:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:176 Protein Expression Plasmid Vector	PHLAP9259121	Plasmid vector containing HLA-B*07:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:176 protein. This plasmid can be used for constructing HLA-B*07:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:177 Protein Expression Plasmid Vector	PHLAP9259122	Plasmid vector containing HLA-B*07:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:177 protein. This plasmid can be used for constructing HLA-B*07:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:178 Protein Expression Plasmid Vector	PHLAP9259123	Plasmid vector containing HLA-B*07:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:178 protein. This plasmid can be used for constructing HLA-B*07:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:179 Protein Expression Plasmid Vector	PHLAP9259124	Plasmid vector containing HLA-B*07:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:179 protein. This plasmid can be used for constructing HLA-B*07:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:18:01 Protein Expression Plasmid Vector	PHLAP9259125	Plasmid vector containing HLA-B*07:18:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:18:01 protein. This plasmid can be used for constructing HLA-B*07:18:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:18:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:18:02 Protein Expression Plasmid Vector	PHLAP9259126	Plasmid vector containing HLA-B*07:18:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:18:02 protein. This plasmid can be used for constructing HLA-B*07:18:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:18:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:180 Protein Expression Plasmid Vector	PHLAP9259127	Plasmid vector containing HLA-B*07:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:180 protein. This plasmid can be used for constructing HLA-B*07:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:181N Protein Expression Plasmid Vector	PHLAP9259128	Plasmid vector containing HLA-B*07:181N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:181N protein. This plasmid can be used for constructing HLA-B*07:181N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:181N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:182N Protein Expression Plasmid Vector	PHLAP9259129	Plasmid vector containing HLA-B*07:182N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:182N protein. This plasmid can be used for constructing HLA-B*07:182N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:182N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:183 Protein Expression Plasmid Vector	PHLAP9259130	Plasmid vector containing HLA-B*07:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:183 protein. This plasmid can be used for constructing HLA-B*07:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:184 Protein Expression Plasmid Vector	PHLAP9259131	Plasmid vector containing HLA-B*07:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:184 protein. This plasmid can be used for constructing HLA-B*07:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:185 Protein Expression Plasmid Vector	PHLAP9259132	Plasmid vector containing HLA-B*07:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:185 protein. This plasmid can be used for constructing HLA-B*07:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:186 Protein Expression Plasmid Vector	PHLAP9259133	Plasmid vector containing HLA-B*07:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:186 protein. This plasmid can be used for constructing HLA-B*07:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:187 Protein Expression Plasmid Vector	PHLAP9259134	Plasmid vector containing HLA-B*07:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:187 protein. This plasmid can be used for constructing HLA-B*07:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:188 Protein Expression Plasmid Vector	PHLAP9259135	Plasmid vector containing HLA-B*07:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:188 protein. This plasmid can be used for constructing HLA-B*07:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:189 Protein Expression Plasmid Vector	PHLAP9259136	Plasmid vector containing HLA-B*07:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:189 protein. This plasmid can be used for constructing HLA-B*07:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:19 Protein Expression Plasmid Vector	PHLAP9259137	Plasmid vector containing HLA-B*07:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:19 protein. This plasmid can be used for constructing HLA-B*07:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:190 Protein Expression Plasmid Vector	PHLAP9259138	Plasmid vector containing HLA-B*07:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:190 protein. This plasmid can be used for constructing HLA-B*07:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:191 Protein Expression Plasmid Vector	PHLAP9259139	Plasmid vector containing HLA-B*07:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:191 protein. This plasmid can be used for constructing HLA-B*07:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:192 Protein Expression Plasmid Vector	PHLAP9259140	Plasmid vector containing HLA-B*07:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:192 protein. This plasmid can be used for constructing HLA-B*07:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:193 Protein Expression Plasmid Vector	PHLAP9259141	Plasmid vector containing HLA-B*07:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:193 protein. This plasmid can be used for constructing HLA-B*07:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:194 Protein Expression Plasmid Vector	PHLAP9259142	Plasmid vector containing HLA-B*07:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:194 protein. This plasmid can be used for constructing HLA-B*07:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:195 Protein Expression Plasmid Vector	PHLAP9259143	Plasmid vector containing HLA-B*07:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:195 protein. This plasmid can be used for constructing HLA-B*07:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:196 Protein Expression Plasmid Vector	PHLAP9259144	Plasmid vector containing HLA-B*07:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:196 protein. This plasmid can be used for constructing HLA-B*07:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:197 Protein Expression Plasmid Vector	PHLAP9259145	Plasmid vector containing HLA-B*07:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:197 protein. This plasmid can be used for constructing HLA-B*07:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:198 Protein Expression Plasmid Vector	PHLAP9259146	Plasmid vector containing HLA-B*07:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:198 protein. This plasmid can be used for constructing HLA-B*07:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:199 Protein Expression Plasmid Vector	PHLAP9259147	Plasmid vector containing HLA-B*07:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:199 protein. This plasmid can be used for constructing HLA-B*07:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:20 Protein Expression Plasmid Vector	PHLAP9259148	Plasmid vector containing HLA-B*07:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:20 protein. This plasmid can be used for constructing HLA-B*07:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:200 Protein Expression Plasmid Vector	PHLAP9259149	Plasmid vector containing HLA-B*07:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:200 protein. This plasmid can be used for constructing HLA-B*07:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:201N Protein Expression Plasmid Vector	PHLAP9259150	Plasmid vector containing HLA-B*07:201N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:201N protein. This plasmid can be used for constructing HLA-B*07:201N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:201N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:202 Protein Expression Plasmid Vector	PHLAP9259151	Plasmid vector containing HLA-B*07:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:202 protein. This plasmid can be used for constructing HLA-B*07:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:203 Protein Expression Plasmid Vector	PHLAP9259152	Plasmid vector containing HLA-B*07:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:203 protein. This plasmid can be used for constructing HLA-B*07:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:204 Protein Expression Plasmid Vector	PHLAP9259153	Plasmid vector containing HLA-B*07:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:204 protein. This plasmid can be used for constructing HLA-B*07:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:205 Protein Expression Plasmid Vector	PHLAP9259154	Plasmid vector containing HLA-B*07:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:205 protein. This plasmid can be used for constructing HLA-B*07:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:206:01 Protein Expression Plasmid Vector	PHLAP9259155	Plasmid vector containing HLA-B*07:206:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:206:01 protein. This plasmid can be used for constructing HLA-B*07:206:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:206:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:206:02 Protein Expression Plasmid Vector	PHLAP9259156	Plasmid vector containing HLA-B*07:206:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:206:02 protein. This plasmid can be used for constructing HLA-B*07:206:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:206:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:207 Protein Expression Plasmid Vector	PHLAP9259157	Plasmid vector containing HLA-B*07:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:207 protein. This plasmid can be used for constructing HLA-B*07:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:208 Protein Expression Plasmid Vector	PHLAP9259158	Plasmid vector containing HLA-B*07:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:208 protein. This plasmid can be used for constructing HLA-B*07:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:209 Protein Expression Plasmid Vector	PHLAP9259159	Plasmid vector containing HLA-B*07:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:209 protein. This plasmid can be used for constructing HLA-B*07:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:21 Protein Expression Plasmid Vector	PHLAP9259160	Plasmid vector containing HLA-B*07:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:21 protein. This plasmid can be used for constructing HLA-B*07:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:210 Protein Expression Plasmid Vector	PHLAP9259161	Plasmid vector containing HLA-B*07:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:210 protein. This plasmid can be used for constructing HLA-B*07:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:211 Protein Expression Plasmid Vector	PHLAP9259162	Plasmid vector containing HLA-B*07:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:211 protein. This plasmid can be used for constructing HLA-B*07:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:212 Protein Expression Plasmid Vector	PHLAP9259163	Plasmid vector containing HLA-B*07:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:212 protein. This plasmid can be used for constructing HLA-B*07:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:213 Protein Expression Plasmid Vector	PHLAP9259164	Plasmid vector containing HLA-B*07:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:213 protein. This plasmid can be used for constructing HLA-B*07:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:214 Protein Expression Plasmid Vector	PHLAP9259165	Plasmid vector containing HLA-B*07:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:214 protein. This plasmid can be used for constructing HLA-B*07:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:215 Protein Expression Plasmid Vector	PHLAP9259166	Plasmid vector containing HLA-B*07:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:215 protein. This plasmid can be used for constructing HLA-B*07:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:216 Protein Expression Plasmid Vector	PHLAP9259167	Plasmid vector containing HLA-B*07:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:216 protein. This plasmid can be used for constructing HLA-B*07:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:217 Protein Expression Plasmid Vector	PHLAP9259168	Plasmid vector containing HLA-B*07:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:217 protein. This plasmid can be used for constructing HLA-B*07:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:218 Protein Expression Plasmid Vector	PHLAP9259169	Plasmid vector containing HLA-B*07:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:218 protein. This plasmid can be used for constructing HLA-B*07:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:219 Protein Expression Plasmid Vector	PHLAP9259170	Plasmid vector containing HLA-B*07:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:219 protein. This plasmid can be used for constructing HLA-B*07:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:22:01 Protein Expression Plasmid Vector	PHLAP9259171	Plasmid vector containing HLA-B*07:22:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:22:01 protein. This plasmid can be used for constructing HLA-B*07:22:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:22:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:22:02 Protein Expression Plasmid Vector	PHLAP9259172	Plasmid vector containing HLA-B*07:22:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:22:02 protein. This plasmid can be used for constructing HLA-B*07:22:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:22:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:220 Protein Expression Plasmid Vector	PHLAP9259173	Plasmid vector containing HLA-B*07:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:220 protein. This plasmid can be used for constructing HLA-B*07:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:221 Protein Expression Plasmid Vector	PHLAP9259174	Plasmid vector containing HLA-B*07:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:221 protein. This plasmid can be used for constructing HLA-B*07:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:222 Protein Expression Plasmid Vector	PHLAP9259175	Plasmid vector containing HLA-B*07:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:222 protein. This plasmid can be used for constructing HLA-B*07:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:223 Protein Expression Plasmid Vector	PHLAP9259176	Plasmid vector containing HLA-B*07:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:223 protein. This plasmid can be used for constructing HLA-B*07:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:224 Protein Expression Plasmid Vector	PHLAP9259177	Plasmid vector containing HLA-B*07:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:224 protein. This plasmid can be used for constructing HLA-B*07:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:225 Protein Expression Plasmid Vector	PHLAP9259178	Plasmid vector containing HLA-B*07:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:225 protein. This plasmid can be used for constructing HLA-B*07:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:226 Protein Expression Plasmid Vector	PHLAP9259179	Plasmid vector containing HLA-B*07:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:226 protein. This plasmid can be used for constructing HLA-B*07:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:227 Protein Expression Plasmid Vector	PHLAP9259180	Plasmid vector containing HLA-B*07:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:227 protein. This plasmid can be used for constructing HLA-B*07:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:228:01 Protein Expression Plasmid Vector	PHLAP9259181	Plasmid vector containing HLA-B*07:228:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:228:01 protein. This plasmid can be used for constructing HLA-B*07:228:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:228:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:228:02 Protein Expression Plasmid Vector	PHLAP9259182	Plasmid vector containing HLA-B*07:228:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:228:02 protein. This plasmid can be used for constructing HLA-B*07:228:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:228:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:229:01 Protein Expression Plasmid Vector	PHLAP9259183	Plasmid vector containing HLA-B*07:229:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:229:01 protein. This plasmid can be used for constructing HLA-B*07:229:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:229:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:229:02 Protein Expression Plasmid Vector	PHLAP9259184	Plasmid vector containing HLA-B*07:229:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:229:02 protein. This plasmid can be used for constructing HLA-B*07:229:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:229:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:23 Protein Expression Plasmid Vector	PHLAP9259185	Plasmid vector containing HLA-B*07:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:23 protein. This plasmid can be used for constructing HLA-B*07:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:230 Protein Expression Plasmid Vector	PHLAP9259186	Plasmid vector containing HLA-B*07:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:230 protein. This plasmid can be used for constructing HLA-B*07:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:231N Protein Expression Plasmid Vector	PHLAP9259187	Plasmid vector containing HLA-B*07:231N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:231N protein. This plasmid can be used for constructing HLA-B*07:231N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:231N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:232 Protein Expression Plasmid Vector	PHLAP9259188	Plasmid vector containing HLA-B*07:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:232 protein. This plasmid can be used for constructing HLA-B*07:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:233 Protein Expression Plasmid Vector	PHLAP9259189	Plasmid vector containing HLA-B*07:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:233 protein. This plasmid can be used for constructing HLA-B*07:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:234 Protein Expression Plasmid Vector	PHLAP9259190	Plasmid vector containing HLA-B*07:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:234 protein. This plasmid can be used for constructing HLA-B*07:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:235 Protein Expression Plasmid Vector	PHLAP9259191	Plasmid vector containing HLA-B*07:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:235 protein. This plasmid can be used for constructing HLA-B*07:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:236 Protein Expression Plasmid Vector	PHLAP9259192	Plasmid vector containing HLA-B*07:236 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:236 protein. This plasmid can be used for constructing HLA-B*07:236 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:236 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:237 Protein Expression Plasmid Vector	PHLAP9259193	Plasmid vector containing HLA-B*07:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:237 protein. This plasmid can be used for constructing HLA-B*07:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:238 Protein Expression Plasmid Vector	PHLAP9259194	Plasmid vector containing HLA-B*07:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:238 protein. This plasmid can be used for constructing HLA-B*07:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:239 Protein Expression Plasmid Vector	PHLAP9259195	Plasmid vector containing HLA-B*07:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:239 protein. This plasmid can be used for constructing HLA-B*07:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:24 Protein Expression Plasmid Vector	PHLAP9259196	Plasmid vector containing HLA-B*07:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:24 protein. This plasmid can be used for constructing HLA-B*07:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:240 Protein Expression Plasmid Vector	PHLAP9259197	Plasmid vector containing HLA-B*07:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:240 protein. This plasmid can be used for constructing HLA-B*07:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:241 Protein Expression Plasmid Vector	PHLAP9259198	Plasmid vector containing HLA-B*07:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:241 protein. This plasmid can be used for constructing HLA-B*07:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:242 Protein Expression Plasmid Vector	PHLAP9259199	Plasmid vector containing HLA-B*07:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:242 protein. This plasmid can be used for constructing HLA-B*07:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:243 Protein Expression Plasmid Vector	PHLAP9259200	Plasmid vector containing HLA-B*07:243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:243 protein. This plasmid can be used for constructing HLA-B*07:243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:244 Protein Expression Plasmid Vector	PHLAP9259201	Plasmid vector containing HLA-B*07:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:244 protein. This plasmid can be used for constructing HLA-B*07:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:245 Protein Expression Plasmid Vector	PHLAP9259202	Plasmid vector containing HLA-B*07:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:245 protein. This plasmid can be used for constructing HLA-B*07:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:246 Protein Expression Plasmid Vector	PHLAP9259203	Plasmid vector containing HLA-B*07:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:246 protein. This plasmid can be used for constructing HLA-B*07:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:247 Protein Expression Plasmid Vector	PHLAP9259204	Plasmid vector containing HLA-B*07:247 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:247 protein. This plasmid can be used for constructing HLA-B*07:247 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:247 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:248 Protein Expression Plasmid Vector	PHLAP9259205	Plasmid vector containing HLA-B*07:248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:248 protein. This plasmid can be used for constructing HLA-B*07:248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:249 Protein Expression Plasmid Vector	PHLAP9259206	Plasmid vector containing HLA-B*07:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:249 protein. This plasmid can be used for constructing HLA-B*07:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:25 Protein Expression Plasmid Vector	PHLAP9259207	Plasmid vector containing HLA-B*07:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:25 protein. This plasmid can be used for constructing HLA-B*07:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:250 Protein Expression Plasmid Vector	PHLAP9259208	Plasmid vector containing HLA-B*07:250 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:250 protein. This plasmid can be used for constructing HLA-B*07:250 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:250 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:251N Protein Expression Plasmid Vector	PHLAP9259209	Plasmid vector containing HLA-B*07:251N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:251N protein. This plasmid can be used for constructing HLA-B*07:251N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:251N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:252 Protein Expression Plasmid Vector	PHLAP9259210	Plasmid vector containing HLA-B*07:252 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:252 protein. This plasmid can be used for constructing HLA-B*07:252 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:252 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:253 Protein Expression Plasmid Vector	PHLAP9259211	Plasmid vector containing HLA-B*07:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:253 protein. This plasmid can be used for constructing HLA-B*07:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:254 Protein Expression Plasmid Vector	PHLAP9259212	Plasmid vector containing HLA-B*07:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:254 protein. This plasmid can be used for constructing HLA-B*07:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:255 Protein Expression Plasmid Vector	PHLAP9259213	Plasmid vector containing HLA-B*07:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:255 protein. This plasmid can be used for constructing HLA-B*07:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:256 Protein Expression Plasmid Vector	PHLAP9259214	Plasmid vector containing HLA-B*07:256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:256 protein. This plasmid can be used for constructing HLA-B*07:256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:257 Protein Expression Plasmid Vector	PHLAP9259215	Plasmid vector containing HLA-B*07:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:257 protein. This plasmid can be used for constructing HLA-B*07:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:258 Protein Expression Plasmid Vector	PHLAP9259216	Plasmid vector containing HLA-B*07:258 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:258 protein. This plasmid can be used for constructing HLA-B*07:258 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:258 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:259 Protein Expression Plasmid Vector	PHLAP9259217	Plasmid vector containing HLA-B*07:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:259 protein. This plasmid can be used for constructing HLA-B*07:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:26 Protein Expression Plasmid Vector	PHLAP9259218	Plasmid vector containing HLA-B*07:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:26 protein. This plasmid can be used for constructing HLA-B*07:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:260 Protein Expression Plasmid Vector	PHLAP9259219	Plasmid vector containing HLA-B*07:260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:260 protein. This plasmid can be used for constructing HLA-B*07:260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:261 Protein Expression Plasmid Vector	PHLAP9259220	Plasmid vector containing HLA-B*07:261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:261 protein. This plasmid can be used for constructing HLA-B*07:261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:262:01 Protein Expression Plasmid Vector	PHLAP9259221	Plasmid vector containing HLA-B*07:262:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:262:01 protein. This plasmid can be used for constructing HLA-B*07:262:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:262:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:262:02 Protein Expression Plasmid Vector	PHLAP9259222	Plasmid vector containing HLA-B*07:262:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:262:02 protein. This plasmid can be used for constructing HLA-B*07:262:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:262:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:263 Protein Expression Plasmid Vector	PHLAP9259223	Plasmid vector containing HLA-B*07:263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:263 protein. This plasmid can be used for constructing HLA-B*07:263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:264 Protein Expression Plasmid Vector	PHLAP9259224	Plasmid vector containing HLA-B*07:264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:264 protein. This plasmid can be used for constructing HLA-B*07:264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:265 Protein Expression Plasmid Vector	PHLAP9259225	Plasmid vector containing HLA-B*07:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:265 protein. This plasmid can be used for constructing HLA-B*07:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:266 Protein Expression Plasmid Vector	PHLAP9259226	Plasmid vector containing HLA-B*07:266 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:266 protein. This plasmid can be used for constructing HLA-B*07:266 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:266 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:267 Protein Expression Plasmid Vector	PHLAP9259227	Plasmid vector containing HLA-B*07:267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:267 protein. This plasmid can be used for constructing HLA-B*07:267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:268 Protein Expression Plasmid Vector	PHLAP9259228	Plasmid vector containing HLA-B*07:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:268 protein. This plasmid can be used for constructing HLA-B*07:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:269 Protein Expression Plasmid Vector	PHLAP9259229	Plasmid vector containing HLA-B*07:269 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:269 protein. This plasmid can be used for constructing HLA-B*07:269 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:269 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:27 Protein Expression Plasmid Vector	PHLAP9259230	Plasmid vector containing HLA-B*07:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:27 protein. This plasmid can be used for constructing HLA-B*07:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:270 Protein Expression Plasmid Vector	PHLAP9259231	Plasmid vector containing HLA-B*07:270 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:270 protein. This plasmid can be used for constructing HLA-B*07:270 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:270 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:271 Protein Expression Plasmid Vector	PHLAP9259232	Plasmid vector containing HLA-B*07:271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:271 protein. This plasmid can be used for constructing HLA-B*07:271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:272N Protein Expression Plasmid Vector	PHLAP9259233	Plasmid vector containing HLA-B*07:272N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:272N protein. This plasmid can be used for constructing HLA-B*07:272N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:272N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:273 Protein Expression Plasmid Vector	PHLAP9259234	Plasmid vector containing HLA-B*07:273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:273 protein. This plasmid can be used for constructing HLA-B*07:273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:274 Protein Expression Plasmid Vector	PHLAP9259235	Plasmid vector containing HLA-B*07:274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:274 protein. This plasmid can be used for constructing HLA-B*07:274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:275 Protein Expression Plasmid Vector	PHLAP9259236	Plasmid vector containing HLA-B*07:275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:275 protein. This plasmid can be used for constructing HLA-B*07:275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:276:01 Protein Expression Plasmid Vector	PHLAP9259237	Plasmid vector containing HLA-B*07:276:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:276:01 protein. This plasmid can be used for constructing HLA-B*07:276:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:276:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:276:02 Protein Expression Plasmid Vector	PHLAP9259238	Plasmid vector containing HLA-B*07:276:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:276:02 protein. This plasmid can be used for constructing HLA-B*07:276:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:276:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:277 Protein Expression Plasmid Vector	PHLAP9259239	Plasmid vector containing HLA-B*07:277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:277 protein. This plasmid can be used for constructing HLA-B*07:277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:278 Protein Expression Plasmid Vector	PHLAP9259240	Plasmid vector containing HLA-B*07:278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:278 protein. This plasmid can be used for constructing HLA-B*07:278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:279 Protein Expression Plasmid Vector	PHLAP9259241	Plasmid vector containing HLA-B*07:279 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:279 protein. This plasmid can be used for constructing HLA-B*07:279 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:279 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:28 Protein Expression Plasmid Vector	PHLAP9259242	Plasmid vector containing HLA-B*07:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:28 protein. This plasmid can be used for constructing HLA-B*07:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:280 Protein Expression Plasmid Vector	PHLAP9259243	Plasmid vector containing HLA-B*07:280 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:280 protein. This plasmid can be used for constructing HLA-B*07:280 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:280 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:281 Protein Expression Plasmid Vector	PHLAP9259244	Plasmid vector containing HLA-B*07:281 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:281 protein. This plasmid can be used for constructing HLA-B*07:281 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:281 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:282 Protein Expression Plasmid Vector	PHLAP9259245	Plasmid vector containing HLA-B*07:282 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:282 protein. This plasmid can be used for constructing HLA-B*07:282 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:282 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:283 Protein Expression Plasmid Vector	PHLAP9259246	Plasmid vector containing HLA-B*07:283 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:283 protein. This plasmid can be used for constructing HLA-B*07:283 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:283 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:284 Protein Expression Plasmid Vector	PHLAP9259247	Plasmid vector containing HLA-B*07:284 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:284 protein. This plasmid can be used for constructing HLA-B*07:284 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:284 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:285N Protein Expression Plasmid Vector	PHLAP9259248	Plasmid vector containing HLA-B*07:285N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:285N protein. This plasmid can be used for constructing HLA-B*07:285N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:285N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:286 Protein Expression Plasmid Vector	PHLAP9259249	Plasmid vector containing HLA-B*07:286 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:286 protein. This plasmid can be used for constructing HLA-B*07:286 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:286 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:287 Protein Expression Plasmid Vector	PHLAP9259250	Plasmid vector containing HLA-B*07:287 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:287 protein. This plasmid can be used for constructing HLA-B*07:287 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:287 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:288 Protein Expression Plasmid Vector	PHLAP9259251	Plasmid vector containing HLA-B*07:288 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:288 protein. This plasmid can be used for constructing HLA-B*07:288 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:288 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:289 Protein Expression Plasmid Vector	PHLAP9259252	Plasmid vector containing HLA-B*07:289 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:289 protein. This plasmid can be used for constructing HLA-B*07:289 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:289 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:29 Protein Expression Plasmid Vector	PHLAP9259253	Plasmid vector containing HLA-B*07:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:29 protein. This plasmid can be used for constructing HLA-B*07:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:290 Protein Expression Plasmid Vector	PHLAP9259254	Plasmid vector containing HLA-B*07:290 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:290 protein. This plasmid can be used for constructing HLA-B*07:290 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:290 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:291 Protein Expression Plasmid Vector	PHLAP9259255	Plasmid vector containing HLA-B*07:291 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:291 protein. This plasmid can be used for constructing HLA-B*07:291 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:291 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:292 Protein Expression Plasmid Vector	PHLAP9259256	Plasmid vector containing HLA-B*07:292 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:292 protein. This plasmid can be used for constructing HLA-B*07:292 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:292 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:293 Protein Expression Plasmid Vector	PHLAP9259257	Plasmid vector containing HLA-B*07:293 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:293 protein. This plasmid can be used for constructing HLA-B*07:293 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:293 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:294 Protein Expression Plasmid Vector	PHLAP9259258	Plasmid vector containing HLA-B*07:294 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:294 protein. This plasmid can be used for constructing HLA-B*07:294 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:294 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:295 Protein Expression Plasmid Vector	PHLAP9259259	Plasmid vector containing HLA-B*07:295 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:295 protein. This plasmid can be used for constructing HLA-B*07:295 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:295 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:296 Protein Expression Plasmid Vector	PHLAP9259260	Plasmid vector containing HLA-B*07:296 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:296 protein. This plasmid can be used for constructing HLA-B*07:296 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:296 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:297 Protein Expression Plasmid Vector	PHLAP9259261	Plasmid vector containing HLA-B*07:297 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:297 protein. This plasmid can be used for constructing HLA-B*07:297 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:297 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:298 Protein Expression Plasmid Vector	PHLAP9259262	Plasmid vector containing HLA-B*07:298 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:298 protein. This plasmid can be used for constructing HLA-B*07:298 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:298 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:299 Protein Expression Plasmid Vector	PHLAP9259263	Plasmid vector containing HLA-B*07:299 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:299 protein. This plasmid can be used for constructing HLA-B*07:299 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:299 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:30 Protein Expression Plasmid Vector	PHLAP9259264	Plasmid vector containing HLA-B*07:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:30 protein. This plasmid can be used for constructing HLA-B*07:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:300 Protein Expression Plasmid Vector	PHLAP9259265	Plasmid vector containing HLA-B*07:300 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:300 protein. This plasmid can be used for constructing HLA-B*07:300 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:300 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:301 Protein Expression Plasmid Vector	PHLAP9259266	Plasmid vector containing HLA-B*07:301 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:301 protein. This plasmid can be used for constructing HLA-B*07:301 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:301 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:302 Protein Expression Plasmid Vector	PHLAP9259267	Plasmid vector containing HLA-B*07:302 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:302 protein. This plasmid can be used for constructing HLA-B*07:302 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:302 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:303:01 Protein Expression Plasmid Vector	PHLAP9259268	Plasmid vector containing HLA-B*07:303:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:303:01 protein. This plasmid can be used for constructing HLA-B*07:303:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:303:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:303:02 Protein Expression Plasmid Vector	PHLAP9259269	Plasmid vector containing HLA-B*07:303:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:303:02 protein. This plasmid can be used for constructing HLA-B*07:303:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:303:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:304 Protein Expression Plasmid Vector	PHLAP9259270	Plasmid vector containing HLA-B*07:304 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:304 protein. This plasmid can be used for constructing HLA-B*07:304 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:304 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:305 Protein Expression Plasmid Vector	PHLAP9259271	Plasmid vector containing HLA-B*07:305 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:305 protein. This plasmid can be used for constructing HLA-B*07:305 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:305 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:306 Protein Expression Plasmid Vector	PHLAP9259272	Plasmid vector containing HLA-B*07:306 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:306 protein. This plasmid can be used for constructing HLA-B*07:306 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:306 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:307 Protein Expression Plasmid Vector	PHLAP9259273	Plasmid vector containing HLA-B*07:307 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:307 protein. This plasmid can be used for constructing HLA-B*07:307 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:307 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:308 Protein Expression Plasmid Vector	PHLAP9259274	Plasmid vector containing HLA-B*07:308 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:308 protein. This plasmid can be used for constructing HLA-B*07:308 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:308 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:309 Protein Expression Plasmid Vector	PHLAP9259275	Plasmid vector containing HLA-B*07:309 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:309 protein. This plasmid can be used for constructing HLA-B*07:309 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:309 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:31:01 Protein Expression Plasmid Vector	PHLAP9259276	Plasmid vector containing HLA-B*07:31:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:31:01 protein. This plasmid can be used for constructing HLA-B*07:31:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:31:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:31:02 Protein Expression Plasmid Vector	PHLAP9259277	Plasmid vector containing HLA-B*07:31:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:31:02 protein. This plasmid can be used for constructing HLA-B*07:31:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:31:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:310 Protein Expression Plasmid Vector	PHLAP9259278	Plasmid vector containing HLA-B*07:310 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:310 protein. This plasmid can be used for constructing HLA-B*07:310 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:310 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:311 Protein Expression Plasmid Vector	PHLAP9259279	Plasmid vector containing HLA-B*07:311 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:311 protein. This plasmid can be used for constructing HLA-B*07:311 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:311 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:312 Protein Expression Plasmid Vector	PHLAP9259280	Plasmid vector containing HLA-B*07:312 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:312 protein. This plasmid can be used for constructing HLA-B*07:312 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:312 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:313 Protein Expression Plasmid Vector	PHLAP9259281	Plasmid vector containing HLA-B*07:313 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:313 protein. This plasmid can be used for constructing HLA-B*07:313 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:313 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:314 Protein Expression Plasmid Vector	PHLAP9259282	Plasmid vector containing HLA-B*07:314 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:314 protein. This plasmid can be used for constructing HLA-B*07:314 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:314 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:315N Protein Expression Plasmid Vector	PHLAP9259283	Plasmid vector containing HLA-B*07:315N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:315N protein. This plasmid can be used for constructing HLA-B*07:315N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:315N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:316N Protein Expression Plasmid Vector	PHLAP9259284	Plasmid vector containing HLA-B*07:316N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:316N protein. This plasmid can be used for constructing HLA-B*07:316N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:316N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:317 Protein Expression Plasmid Vector	PHLAP9259285	Plasmid vector containing HLA-B*07:317 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:317 protein. This plasmid can be used for constructing HLA-B*07:317 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:317 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:318N Protein Expression Plasmid Vector	PHLAP9259286	Plasmid vector containing HLA-B*07:318N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:318N protein. This plasmid can be used for constructing HLA-B*07:318N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:318N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:319 Protein Expression Plasmid Vector	PHLAP9259287	Plasmid vector containing HLA-B*07:319 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:319 protein. This plasmid can be used for constructing HLA-B*07:319 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:319 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:32 Protein Expression Plasmid Vector	PHLAP9259288	Plasmid vector containing HLA-B*07:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:32 protein. This plasmid can be used for constructing HLA-B*07:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:320 Protein Expression Plasmid Vector	PHLAP9259289	Plasmid vector containing HLA-B*07:320 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:320 protein. This plasmid can be used for constructing HLA-B*07:320 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:320 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:321 Protein Expression Plasmid Vector	PHLAP9259290	Plasmid vector containing HLA-B*07:321 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:321 protein. This plasmid can be used for constructing HLA-B*07:321 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:321 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:322 Protein Expression Plasmid Vector	PHLAP9259291	Plasmid vector containing HLA-B*07:322 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:322 protein. This plasmid can be used for constructing HLA-B*07:322 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:322 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:323 Protein Expression Plasmid Vector	PHLAP9259292	Plasmid vector containing HLA-B*07:323 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:323 protein. This plasmid can be used for constructing HLA-B*07:323 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:323 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:324 Protein Expression Plasmid Vector	PHLAP9259293	Plasmid vector containing HLA-B*07:324 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:324 protein. This plasmid can be used for constructing HLA-B*07:324 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:324 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:325N Protein Expression Plasmid Vector	PHLAP9259294	Plasmid vector containing HLA-B*07:325N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:325N protein. This plasmid can be used for constructing HLA-B*07:325N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:325N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:326 Protein Expression Plasmid Vector	PHLAP9259295	Plasmid vector containing HLA-B*07:326 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:326 protein. This plasmid can be used for constructing HLA-B*07:326 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:326 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:327 Protein Expression Plasmid Vector	PHLAP9259296	Plasmid vector containing HLA-B*07:327 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:327 protein. This plasmid can be used for constructing HLA-B*07:327 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:327 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:328 Protein Expression Plasmid Vector	PHLAP9259297	Plasmid vector containing HLA-B*07:328 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:328 protein. This plasmid can be used for constructing HLA-B*07:328 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:328 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:329 Protein Expression Plasmid Vector	PHLAP9259298	Plasmid vector containing HLA-B*07:329 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:329 protein. This plasmid can be used for constructing HLA-B*07:329 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:329 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:33:01 Protein Expression Plasmid Vector	PHLAP9259299	Plasmid vector containing HLA-B*07:33:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:33:01 protein. This plasmid can be used for constructing HLA-B*07:33:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:33:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:33:02 Protein Expression Plasmid Vector	PHLAP9259300	Plasmid vector containing HLA-B*07:33:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:33:02 protein. This plasmid can be used for constructing HLA-B*07:33:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:33:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:33:03 Protein Expression Plasmid Vector	PHLAP9259301	Plasmid vector containing HLA-B*07:33:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:33:03 protein. This plasmid can be used for constructing HLA-B*07:33:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:33:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:330N Protein Expression Plasmid Vector	PHLAP9259302	Plasmid vector containing HLA-B*07:330N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:330N protein. This plasmid can be used for constructing HLA-B*07:330N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:330N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:331 Protein Expression Plasmid Vector	PHLAP9259303	Plasmid vector containing HLA-B*07:331 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:331 protein. This plasmid can be used for constructing HLA-B*07:331 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:331 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:332 Protein Expression Plasmid Vector	PHLAP9259304	Plasmid vector containing HLA-B*07:332 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:332 protein. This plasmid can be used for constructing HLA-B*07:332 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:332 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:333 Protein Expression Plasmid Vector	PHLAP9259305	Plasmid vector containing HLA-B*07:333 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:333 protein. This plasmid can be used for constructing HLA-B*07:333 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:333 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:334 Protein Expression Plasmid Vector	PHLAP9259306	Plasmid vector containing HLA-B*07:334 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:334 protein. This plasmid can be used for constructing HLA-B*07:334 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:334 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:335 Protein Expression Plasmid Vector	PHLAP9259307	Plasmid vector containing HLA-B*07:335 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:335 protein. This plasmid can be used for constructing HLA-B*07:335 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:335 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:336 Protein Expression Plasmid Vector	PHLAP9259308	Plasmid vector containing HLA-B*07:336 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:336 protein. This plasmid can be used for constructing HLA-B*07:336 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:336 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:337 Protein Expression Plasmid Vector	PHLAP9259309	Plasmid vector containing HLA-B*07:337 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:337 protein. This plasmid can be used for constructing HLA-B*07:337 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:337 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:338 Protein Expression Plasmid Vector	PHLAP9259310	Plasmid vector containing HLA-B*07:338 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:338 protein. This plasmid can be used for constructing HLA-B*07:338 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:338 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:339 Protein Expression Plasmid Vector	PHLAP9259311	Plasmid vector containing HLA-B*07:339 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:339 protein. This plasmid can be used for constructing HLA-B*07:339 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:339 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:34 Protein Expression Plasmid Vector	PHLAP9259312	Plasmid vector containing HLA-B*07:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:34 protein. This plasmid can be used for constructing HLA-B*07:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:340 Protein Expression Plasmid Vector	PHLAP9259313	Plasmid vector containing HLA-B*07:340 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:340 protein. This plasmid can be used for constructing HLA-B*07:340 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:340 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:341 Protein Expression Plasmid Vector	PHLAP9259314	Plasmid vector containing HLA-B*07:341 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:341 protein. This plasmid can be used for constructing HLA-B*07:341 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:341 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:342 Protein Expression Plasmid Vector	PHLAP9259315	Plasmid vector containing HLA-B*07:342 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:342 protein. This plasmid can be used for constructing HLA-B*07:342 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:342 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:343N Protein Expression Plasmid Vector	PHLAP9259316	Plasmid vector containing HLA-B*07:343N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:343N protein. This plasmid can be used for constructing HLA-B*07:343N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:343N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:344 Protein Expression Plasmid Vector	PHLAP9259317	Plasmid vector containing HLA-B*07:344 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:344 protein. This plasmid can be used for constructing HLA-B*07:344 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:344 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:345 Protein Expression Plasmid Vector	PHLAP9259318	Plasmid vector containing HLA-B*07:345 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:345 protein. This plasmid can be used for constructing HLA-B*07:345 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:345 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:346 Protein Expression Plasmid Vector	PHLAP9259319	Plasmid vector containing HLA-B*07:346 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:346 protein. This plasmid can be used for constructing HLA-B*07:346 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:346 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:347 Protein Expression Plasmid Vector	PHLAP9259320	Plasmid vector containing HLA-B*07:347 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:347 protein. This plasmid can be used for constructing HLA-B*07:347 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:347 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:348 Protein Expression Plasmid Vector	PHLAP9259321	Plasmid vector containing HLA-B*07:348 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:348 protein. This plasmid can be used for constructing HLA-B*07:348 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:348 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:349 Protein Expression Plasmid Vector	PHLAP9259322	Plasmid vector containing HLA-B*07:349 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:349 protein. This plasmid can be used for constructing HLA-B*07:349 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:349 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:35 Protein Expression Plasmid Vector	PHLAP9259323	Plasmid vector containing HLA-B*07:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:35 protein. This plasmid can be used for constructing HLA-B*07:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:350 Protein Expression Plasmid Vector	PHLAP9259324	Plasmid vector containing HLA-B*07:350 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:350 protein. This plasmid can be used for constructing HLA-B*07:350 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:350 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:351N Protein Expression Plasmid Vector	PHLAP9259325	Plasmid vector containing HLA-B*07:351N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:351N protein. This plasmid can be used for constructing HLA-B*07:351N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:351N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:352 Protein Expression Plasmid Vector	PHLAP9259326	Plasmid vector containing HLA-B*07:352 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:352 protein. This plasmid can be used for constructing HLA-B*07:352 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:352 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:353 Protein Expression Plasmid Vector	PHLAP9259327	Plasmid vector containing HLA-B*07:353 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:353 protein. This plasmid can be used for constructing HLA-B*07:353 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:353 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:354 Protein Expression Plasmid Vector	PHLAP9259328	Plasmid vector containing HLA-B*07:354 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:354 protein. This plasmid can be used for constructing HLA-B*07:354 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:354 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:355 Protein Expression Plasmid Vector	PHLAP9259329	Plasmid vector containing HLA-B*07:355 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:355 protein. This plasmid can be used for constructing HLA-B*07:355 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:355 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:356 Protein Expression Plasmid Vector	PHLAP9259330	Plasmid vector containing HLA-B*07:356 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:356 protein. This plasmid can be used for constructing HLA-B*07:356 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:356 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:357 Protein Expression Plasmid Vector	PHLAP9259331	Plasmid vector containing HLA-B*07:357 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:357 protein. This plasmid can be used for constructing HLA-B*07:357 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:357 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:358 Protein Expression Plasmid Vector	PHLAP9259332	Plasmid vector containing HLA-B*07:358 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:358 protein. This plasmid can be used for constructing HLA-B*07:358 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:358 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:359 Protein Expression Plasmid Vector	PHLAP9259333	Plasmid vector containing HLA-B*07:359 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:359 protein. This plasmid can be used for constructing HLA-B*07:359 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:359 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:36 Protein Expression Plasmid Vector	PHLAP9259334	Plasmid vector containing HLA-B*07:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:36 protein. This plasmid can be used for constructing HLA-B*07:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:360Q Protein Expression Plasmid Vector	PHLAP9259335	Plasmid vector containing HLA-B*07:360Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:360Q protein. This plasmid can be used for constructing HLA-B*07:360Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:360Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:361 Protein Expression Plasmid Vector	PHLAP9259336	Plasmid vector containing HLA-B*07:361 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:361 protein. This plasmid can be used for constructing HLA-B*07:361 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:361 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:362 Protein Expression Plasmid Vector	PHLAP9259337	Plasmid vector containing HLA-B*07:362 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:362 protein. This plasmid can be used for constructing HLA-B*07:362 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:362 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:363 Protein Expression Plasmid Vector	PHLAP9259338	Plasmid vector containing HLA-B*07:363 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:363 protein. This plasmid can be used for constructing HLA-B*07:363 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:363 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:364 Protein Expression Plasmid Vector	PHLAP9259339	Plasmid vector containing HLA-B*07:364 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:364 protein. This plasmid can be used for constructing HLA-B*07:364 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:364 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:365 Protein Expression Plasmid Vector	PHLAP9259340	Plasmid vector containing HLA-B*07:365 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:365 protein. This plasmid can be used for constructing HLA-B*07:365 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:365 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:366 Protein Expression Plasmid Vector	PHLAP9259341	Plasmid vector containing HLA-B*07:366 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:366 protein. This plasmid can be used for constructing HLA-B*07:366 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:366 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:367 Protein Expression Plasmid Vector	PHLAP9259342	Plasmid vector containing HLA-B*07:367 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:367 protein. This plasmid can be used for constructing HLA-B*07:367 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:367 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:368 Protein Expression Plasmid Vector	PHLAP9259343	Plasmid vector containing HLA-B*07:368 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:368 protein. This plasmid can be used for constructing HLA-B*07:368 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:368 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:369 Protein Expression Plasmid Vector	PHLAP9259344	Plasmid vector containing HLA-B*07:369 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:369 protein. This plasmid can be used for constructing HLA-B*07:369 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:369 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:37:01 Protein Expression Plasmid Vector	PHLAP9259345	Plasmid vector containing HLA-B*07:37:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:37:01 protein. This plasmid can be used for constructing HLA-B*07:37:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:37:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:37:02 Protein Expression Plasmid Vector	PHLAP9259346	Plasmid vector containing HLA-B*07:37:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:37:02 protein. This plasmid can be used for constructing HLA-B*07:37:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:37:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:370 Protein Expression Plasmid Vector	PHLAP9259347	Plasmid vector containing HLA-B*07:370 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:370 protein. This plasmid can be used for constructing HLA-B*07:370 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:370 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:371 Protein Expression Plasmid Vector	PHLAP9259348	Plasmid vector containing HLA-B*07:371 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:371 protein. This plasmid can be used for constructing HLA-B*07:371 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:371 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:372 Protein Expression Plasmid Vector	PHLAP9259349	Plasmid vector containing HLA-B*07:372 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:372 protein. This plasmid can be used for constructing HLA-B*07:372 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:372 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:373N Protein Expression Plasmid Vector	PHLAP9259350	Plasmid vector containing HLA-B*07:373N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:373N protein. This plasmid can be used for constructing HLA-B*07:373N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:373N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:374N Protein Expression Plasmid Vector	PHLAP9259351	Plasmid vector containing HLA-B*07:374N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:374N protein. This plasmid can be used for constructing HLA-B*07:374N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:374N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:375 Protein Expression Plasmid Vector	PHLAP9259352	Plasmid vector containing HLA-B*07:375 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:375 protein. This plasmid can be used for constructing HLA-B*07:375 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:375 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:376 Protein Expression Plasmid Vector	PHLAP9259353	Plasmid vector containing HLA-B*07:376 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:376 protein. This plasmid can be used for constructing HLA-B*07:376 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:376 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:377 Protein Expression Plasmid Vector	PHLAP9259354	Plasmid vector containing HLA-B*07:377 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:377 protein. This plasmid can be used for constructing HLA-B*07:377 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:377 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:378 Protein Expression Plasmid Vector	PHLAP9259355	Plasmid vector containing HLA-B*07:378 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:378 protein. This plasmid can be used for constructing HLA-B*07:378 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:378 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:379 Protein Expression Plasmid Vector	PHLAP9259356	Plasmid vector containing HLA-B*07:379 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:379 protein. This plasmid can be used for constructing HLA-B*07:379 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:379 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:38 Protein Expression Plasmid Vector	PHLAP9259357	Plasmid vector containing HLA-B*07:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:38 protein. This plasmid can be used for constructing HLA-B*07:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:380 Protein Expression Plasmid Vector	PHLAP9259358	Plasmid vector containing HLA-B*07:380 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:380 protein. This plasmid can be used for constructing HLA-B*07:380 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:380 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:381 Protein Expression Plasmid Vector	PHLAP9259359	Plasmid vector containing HLA-B*07:381 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:381 protein. This plasmid can be used for constructing HLA-B*07:381 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:381 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:382 Protein Expression Plasmid Vector	PHLAP9259360	Plasmid vector containing HLA-B*07:382 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:382 protein. This plasmid can be used for constructing HLA-B*07:382 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:382 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:383 Protein Expression Plasmid Vector	PHLAP9259361	Plasmid vector containing HLA-B*07:383 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:383 protein. This plasmid can be used for constructing HLA-B*07:383 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:383 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:384 Protein Expression Plasmid Vector	PHLAP9259362	Plasmid vector containing HLA-B*07:384 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:384 protein. This plasmid can be used for constructing HLA-B*07:384 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:384 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:385 Protein Expression Plasmid Vector	PHLAP9259363	Plasmid vector containing HLA-B*07:385 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:385 protein. This plasmid can be used for constructing HLA-B*07:385 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:385 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:386N Protein Expression Plasmid Vector	PHLAP9259364	Plasmid vector containing HLA-B*07:386N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:386N protein. This plasmid can be used for constructing HLA-B*07:386N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:386N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:387 Protein Expression Plasmid Vector	PHLAP9259365	Plasmid vector containing HLA-B*07:387 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:387 protein. This plasmid can be used for constructing HLA-B*07:387 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:387 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:388 Protein Expression Plasmid Vector	PHLAP9259366	Plasmid vector containing HLA-B*07:388 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:388 protein. This plasmid can be used for constructing HLA-B*07:388 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:388 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:389 Protein Expression Plasmid Vector	PHLAP9259367	Plasmid vector containing HLA-B*07:389 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:389 protein. This plasmid can be used for constructing HLA-B*07:389 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:389 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:39 Protein Expression Plasmid Vector	PHLAP9259368	Plasmid vector containing HLA-B*07:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:39 protein. This plasmid can be used for constructing HLA-B*07:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:390 Protein Expression Plasmid Vector	PHLAP9259369	Plasmid vector containing HLA-B*07:390 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:390 protein. This plasmid can be used for constructing HLA-B*07:390 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:390 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:391 Protein Expression Plasmid Vector	PHLAP9259370	Plasmid vector containing HLA-B*07:391 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:391 protein. This plasmid can be used for constructing HLA-B*07:391 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:391 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:392 Protein Expression Plasmid Vector	PHLAP9259371	Plasmid vector containing HLA-B*07:392 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:392 protein. This plasmid can be used for constructing HLA-B*07:392 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:392 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:393 Protein Expression Plasmid Vector	PHLAP9259372	Plasmid vector containing HLA-B*07:393 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:393 protein. This plasmid can be used for constructing HLA-B*07:393 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:393 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:394 Protein Expression Plasmid Vector	PHLAP9259373	Plasmid vector containing HLA-B*07:394 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:394 protein. This plasmid can be used for constructing HLA-B*07:394 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:394 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:395 Protein Expression Plasmid Vector	PHLAP9259374	Plasmid vector containing HLA-B*07:395 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:395 protein. This plasmid can be used for constructing HLA-B*07:395 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:395 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:396 Protein Expression Plasmid Vector	PHLAP9259375	Plasmid vector containing HLA-B*07:396 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:396 protein. This plasmid can be used for constructing HLA-B*07:396 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:396 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:397 Protein Expression Plasmid Vector	PHLAP9259376	Plasmid vector containing HLA-B*07:397 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:397 protein. This plasmid can be used for constructing HLA-B*07:397 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:397 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:398 Protein Expression Plasmid Vector	PHLAP9259377	Plasmid vector containing HLA-B*07:398 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:398 protein. This plasmid can be used for constructing HLA-B*07:398 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:398 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:399 Protein Expression Plasmid Vector	PHLAP9259378	Plasmid vector containing HLA-B*07:399 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:399 protein. This plasmid can be used for constructing HLA-B*07:399 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:399 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:40 Protein Expression Plasmid Vector	PHLAP9259379	Plasmid vector containing HLA-B*07:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:40 protein. This plasmid can be used for constructing HLA-B*07:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:400 Protein Expression Plasmid Vector	PHLAP9259380	Plasmid vector containing HLA-B*07:400 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:400 protein. This plasmid can be used for constructing HLA-B*07:400 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:400 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:401 Protein Expression Plasmid Vector	PHLAP9259381	Plasmid vector containing HLA-B*07:401 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:401 protein. This plasmid can be used for constructing HLA-B*07:401 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:401 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:402 Protein Expression Plasmid Vector	PHLAP9259382	Plasmid vector containing HLA-B*07:402 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:402 protein. This plasmid can be used for constructing HLA-B*07:402 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:402 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:403 Protein Expression Plasmid Vector	PHLAP9259383	Plasmid vector containing HLA-B*07:403 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:403 protein. This plasmid can be used for constructing HLA-B*07:403 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:403 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:404 Protein Expression Plasmid Vector	PHLAP9259384	Plasmid vector containing HLA-B*07:404 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:404 protein. This plasmid can be used for constructing HLA-B*07:404 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:404 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:405 Protein Expression Plasmid Vector	PHLAP9259385	Plasmid vector containing HLA-B*07:405 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:405 protein. This plasmid can be used for constructing HLA-B*07:405 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:405 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:406 Protein Expression Plasmid Vector	PHLAP9259386	Plasmid vector containing HLA-B*07:406 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:406 protein. This plasmid can be used for constructing HLA-B*07:406 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:406 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:407 Protein Expression Plasmid Vector	PHLAP9259387	Plasmid vector containing HLA-B*07:407 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:407 protein. This plasmid can be used for constructing HLA-B*07:407 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:407 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:408 Protein Expression Plasmid Vector	PHLAP9259388	Plasmid vector containing HLA-B*07:408 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:408 protein. This plasmid can be used for constructing HLA-B*07:408 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:408 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:409 Protein Expression Plasmid Vector	PHLAP9259389	Plasmid vector containing HLA-B*07:409 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:409 protein. This plasmid can be used for constructing HLA-B*07:409 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:409 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:41 Protein Expression Plasmid Vector	PHLAP9259390	Plasmid vector containing HLA-B*07:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:41 protein. This plasmid can be used for constructing HLA-B*07:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:410 Protein Expression Plasmid Vector	PHLAP9259391	Plasmid vector containing HLA-B*07:410 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:410 protein. This plasmid can be used for constructing HLA-B*07:410 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:410 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:411 Protein Expression Plasmid Vector	PHLAP9259392	Plasmid vector containing HLA-B*07:411 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:411 protein. This plasmid can be used for constructing HLA-B*07:411 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:411 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:412 Protein Expression Plasmid Vector	PHLAP9259393	Plasmid vector containing HLA-B*07:412 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:412 protein. This plasmid can be used for constructing HLA-B*07:412 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:412 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:413 Protein Expression Plasmid Vector	PHLAP9259394	Plasmid vector containing HLA-B*07:413 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:413 protein. This plasmid can be used for constructing HLA-B*07:413 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:413 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:414 Protein Expression Plasmid Vector	PHLAP9259395	Plasmid vector containing HLA-B*07:414 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:414 protein. This plasmid can be used for constructing HLA-B*07:414 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:414 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:415N Protein Expression Plasmid Vector	PHLAP9259396	Plasmid vector containing HLA-B*07:415N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:415N protein. This plasmid can be used for constructing HLA-B*07:415N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:415N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:416 Protein Expression Plasmid Vector	PHLAP9259397	Plasmid vector containing HLA-B*07:416 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:416 protein. This plasmid can be used for constructing HLA-B*07:416 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:416 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:417 Protein Expression Plasmid Vector	PHLAP9259398	Plasmid vector containing HLA-B*07:417 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:417 protein. This plasmid can be used for constructing HLA-B*07:417 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:417 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:418 Protein Expression Plasmid Vector	PHLAP9259399	Plasmid vector containing HLA-B*07:418 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:418 protein. This plasmid can be used for constructing HLA-B*07:418 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:418 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:419 Protein Expression Plasmid Vector	PHLAP9259400	Plasmid vector containing HLA-B*07:419 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:419 protein. This plasmid can be used for constructing HLA-B*07:419 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:419 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:42 Protein Expression Plasmid Vector	PHLAP9259401	Plasmid vector containing HLA-B*07:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:42 protein. This plasmid can be used for constructing HLA-B*07:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:420 Protein Expression Plasmid Vector	PHLAP9259402	Plasmid vector containing HLA-B*07:420 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:420 protein. This plasmid can be used for constructing HLA-B*07:420 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:420 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:421 Protein Expression Plasmid Vector	PHLAP9259403	Plasmid vector containing HLA-B*07:421 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:421 protein. This plasmid can be used for constructing HLA-B*07:421 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:421 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:422 Protein Expression Plasmid Vector	PHLAP9259404	Plasmid vector containing HLA-B*07:422 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:422 protein. This plasmid can be used for constructing HLA-B*07:422 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:422 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:423 Protein Expression Plasmid Vector	PHLAP9259405	Plasmid vector containing HLA-B*07:423 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:423 protein. This plasmid can be used for constructing HLA-B*07:423 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:423 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:424 Protein Expression Plasmid Vector	PHLAP9259406	Plasmid vector containing HLA-B*07:424 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:424 protein. This plasmid can be used for constructing HLA-B*07:424 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:424 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:425N Protein Expression Plasmid Vector	PHLAP9259407	Plasmid vector containing HLA-B*07:425N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:425N protein. This plasmid can be used for constructing HLA-B*07:425N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:425N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:426Q Protein Expression Plasmid Vector	PHLAP9259408	Plasmid vector containing HLA-B*07:426Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:426Q protein. This plasmid can be used for constructing HLA-B*07:426Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:426Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:427 Protein Expression Plasmid Vector	PHLAP9259409	Plasmid vector containing HLA-B*07:427 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:427 protein. This plasmid can be used for constructing HLA-B*07:427 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:427 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:428 Protein Expression Plasmid Vector	PHLAP9259410	Plasmid vector containing HLA-B*07:428 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:428 protein. This plasmid can be used for constructing HLA-B*07:428 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:428 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:429 Protein Expression Plasmid Vector	PHLAP9259411	Plasmid vector containing HLA-B*07:429 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:429 protein. This plasmid can be used for constructing HLA-B*07:429 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:429 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:43 Protein Expression Plasmid Vector	PHLAP9259412	Plasmid vector containing HLA-B*07:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:43 protein. This plasmid can be used for constructing HLA-B*07:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:430 Protein Expression Plasmid Vector	PHLAP9259413	Plasmid vector containing HLA-B*07:430 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:430 protein. This plasmid can be used for constructing HLA-B*07:430 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:430 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:431 Protein Expression Plasmid Vector	PHLAP9259414	Plasmid vector containing HLA-B*07:431 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:431 protein. This plasmid can be used for constructing HLA-B*07:431 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:431 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:432 Protein Expression Plasmid Vector	PHLAP9259415	Plasmid vector containing HLA-B*07:432 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:432 protein. This plasmid can be used for constructing HLA-B*07:432 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:432 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:433 Protein Expression Plasmid Vector	PHLAP9259416	Plasmid vector containing HLA-B*07:433 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:433 protein. This plasmid can be used for constructing HLA-B*07:433 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:433 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:434 Protein Expression Plasmid Vector	PHLAP9259417	Plasmid vector containing HLA-B*07:434 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:434 protein. This plasmid can be used for constructing HLA-B*07:434 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:434 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:435N Protein Expression Plasmid Vector	PHLAP9259418	Plasmid vector containing HLA-B*07:435N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:435N protein. This plasmid can be used for constructing HLA-B*07:435N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:435N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:436 Protein Expression Plasmid Vector	PHLAP9259419	Plasmid vector containing HLA-B*07:436 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:436 protein. This plasmid can be used for constructing HLA-B*07:436 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:436 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:437 Protein Expression Plasmid Vector	PHLAP9259420	Plasmid vector containing HLA-B*07:437 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:437 protein. This plasmid can be used for constructing HLA-B*07:437 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:437 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:438 Protein Expression Plasmid Vector	PHLAP9259421	Plasmid vector containing HLA-B*07:438 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:438 protein. This plasmid can be used for constructing HLA-B*07:438 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:438 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:439 Protein Expression Plasmid Vector	PHLAP9259422	Plasmid vector containing HLA-B*07:439 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:439 protein. This plasmid can be used for constructing HLA-B*07:439 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:439 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:440 Protein Expression Plasmid Vector	PHLAP9259423	Plasmid vector containing HLA-B*07:440 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:440 protein. This plasmid can be used for constructing HLA-B*07:440 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:440 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:441 Protein Expression Plasmid Vector	PHLAP9259424	Plasmid vector containing HLA-B*07:441 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:441 protein. This plasmid can be used for constructing HLA-B*07:441 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:441 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:442 Protein Expression Plasmid Vector	PHLAP9259425	Plasmid vector containing HLA-B*07:442 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:442 protein. This plasmid can be used for constructing HLA-B*07:442 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:442 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:443 Protein Expression Plasmid Vector	PHLAP9259426	Plasmid vector containing HLA-B*07:443 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:443 protein. This plasmid can be used for constructing HLA-B*07:443 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:443 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:444 Protein Expression Plasmid Vector	PHLAP9259427	Plasmid vector containing HLA-B*07:444 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:444 protein. This plasmid can be used for constructing HLA-B*07:444 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:444 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:445 Protein Expression Plasmid Vector	PHLAP9259428	Plasmid vector containing HLA-B*07:445 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:445 protein. This plasmid can be used for constructing HLA-B*07:445 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:445 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:446N Protein Expression Plasmid Vector	PHLAP9259429	Plasmid vector containing HLA-B*07:446N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:446N protein. This plasmid can be used for constructing HLA-B*07:446N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:446N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:447 Protein Expression Plasmid Vector	PHLAP9259430	Plasmid vector containing HLA-B*07:447 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:447 protein. This plasmid can be used for constructing HLA-B*07:447 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:447 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:448 Protein Expression Plasmid Vector	PHLAP9259431	Plasmid vector containing HLA-B*07:448 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:448 protein. This plasmid can be used for constructing HLA-B*07:448 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:448 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:449 Protein Expression Plasmid Vector	PHLAP9259432	Plasmid vector containing HLA-B*07:449 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:449 protein. This plasmid can be used for constructing HLA-B*07:449 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:449 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:44N Protein Expression Plasmid Vector	PHLAP9259433	Plasmid vector containing HLA-B*07:44N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:44N protein. This plasmid can be used for constructing HLA-B*07:44N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:44N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:45 Protein Expression Plasmid Vector	PHLAP9259434	Plasmid vector containing HLA-B*07:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:45 protein. This plasmid can be used for constructing HLA-B*07:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:450 Protein Expression Plasmid Vector	PHLAP9259435	Plasmid vector containing HLA-B*07:450 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:450 protein. This plasmid can be used for constructing HLA-B*07:450 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:450 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:451 Protein Expression Plasmid Vector	PHLAP9259436	Plasmid vector containing HLA-B*07:451 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:451 protein. This plasmid can be used for constructing HLA-B*07:451 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:451 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:452 Protein Expression Plasmid Vector	PHLAP9259437	Plasmid vector containing HLA-B*07:452 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:452 protein. This plasmid can be used for constructing HLA-B*07:452 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:452 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:453 Protein Expression Plasmid Vector	PHLAP9259438	Plasmid vector containing HLA-B*07:453 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:453 protein. This plasmid can be used for constructing HLA-B*07:453 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:453 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:454 Protein Expression Plasmid Vector	PHLAP9259439	Plasmid vector containing HLA-B*07:454 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:454 protein. This plasmid can be used for constructing HLA-B*07:454 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:454 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:455 Protein Expression Plasmid Vector	PHLAP9259440	Plasmid vector containing HLA-B*07:455 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:455 protein. This plasmid can be used for constructing HLA-B*07:455 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:455 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:456 Protein Expression Plasmid Vector	PHLAP9259441	Plasmid vector containing HLA-B*07:456 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:456 protein. This plasmid can be used for constructing HLA-B*07:456 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:456 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:457 Protein Expression Plasmid Vector	PHLAP9259442	Plasmid vector containing HLA-B*07:457 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:457 protein. This plasmid can be used for constructing HLA-B*07:457 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:457 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:458 Protein Expression Plasmid Vector	PHLAP9259443	Plasmid vector containing HLA-B*07:458 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:458 protein. This plasmid can be used for constructing HLA-B*07:458 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:458 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:459 Protein Expression Plasmid Vector	PHLAP9259444	Plasmid vector containing HLA-B*07:459 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:459 protein. This plasmid can be used for constructing HLA-B*07:459 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:459 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:46 Protein Expression Plasmid Vector	PHLAP9259445	Plasmid vector containing HLA-B*07:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:46 protein. This plasmid can be used for constructing HLA-B*07:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:460N Protein Expression Plasmid Vector	PHLAP9259446	Plasmid vector containing HLA-B*07:460N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:460N protein. This plasmid can be used for constructing HLA-B*07:460N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:460N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:461 Protein Expression Plasmid Vector	PHLAP9259447	Plasmid vector containing HLA-B*07:461 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:461 protein. This plasmid can be used for constructing HLA-B*07:461 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:461 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:462 Protein Expression Plasmid Vector	PHLAP9259448	Plasmid vector containing HLA-B*07:462 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:462 protein. This plasmid can be used for constructing HLA-B*07:462 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:462 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:463 Protein Expression Plasmid Vector	PHLAP9259449	Plasmid vector containing HLA-B*07:463 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:463 protein. This plasmid can be used for constructing HLA-B*07:463 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:463 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:464 Protein Expression Plasmid Vector	PHLAP9259450	Plasmid vector containing HLA-B*07:464 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:464 protein. This plasmid can be used for constructing HLA-B*07:464 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:464 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:465 Protein Expression Plasmid Vector	PHLAP9259451	Plasmid vector containing HLA-B*07:465 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:465 protein. This plasmid can be used for constructing HLA-B*07:465 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:465 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:466 Protein Expression Plasmid Vector	PHLAP9259452	Plasmid vector containing HLA-B*07:466 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:466 protein. This plasmid can be used for constructing HLA-B*07:466 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:466 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:467Q Protein Expression Plasmid Vector	PHLAP9259453	Plasmid vector containing HLA-B*07:467Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:467Q protein. This plasmid can be used for constructing HLA-B*07:467Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:467Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:468N Protein Expression Plasmid Vector	PHLAP9259454	Plasmid vector containing HLA-B*07:468N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:468N protein. This plasmid can be used for constructing HLA-B*07:468N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:468N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:469N Protein Expression Plasmid Vector	PHLAP9259455	Plasmid vector containing HLA-B*07:469N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:469N protein. This plasmid can be used for constructing HLA-B*07:469N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:469N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:47 Protein Expression Plasmid Vector	PHLAP9259456	Plasmid vector containing HLA-B*07:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:47 protein. This plasmid can be used for constructing HLA-B*07:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:470 Protein Expression Plasmid Vector	PHLAP9259457	Plasmid vector containing HLA-B*07:470 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:470 protein. This plasmid can be used for constructing HLA-B*07:470 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:470 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:471 Protein Expression Plasmid Vector	PHLAP9259458	Plasmid vector containing HLA-B*07:471 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:471 protein. This plasmid can be used for constructing HLA-B*07:471 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:471 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:472N Protein Expression Plasmid Vector	PHLAP9259459	Plasmid vector containing HLA-B*07:472N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:472N protein. This plasmid can be used for constructing HLA-B*07:472N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:472N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:473 Protein Expression Plasmid Vector	PHLAP9259460	Plasmid vector containing HLA-B*07:473 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:473 protein. This plasmid can be used for constructing HLA-B*07:473 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:473 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:474 Protein Expression Plasmid Vector	PHLAP9259461	Plasmid vector containing HLA-B*07:474 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:474 protein. This plasmid can be used for constructing HLA-B*07:474 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:474 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:475 Protein Expression Plasmid Vector	PHLAP9259462	Plasmid vector containing HLA-B*07:475 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:475 protein. This plasmid can be used for constructing HLA-B*07:475 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:475 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:476 Protein Expression Plasmid Vector	PHLAP9259463	Plasmid vector containing HLA-B*07:476 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:476 protein. This plasmid can be used for constructing HLA-B*07:476 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:476 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:477 Protein Expression Plasmid Vector	PHLAP9259464	Plasmid vector containing HLA-B*07:477 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:477 protein. This plasmid can be used for constructing HLA-B*07:477 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:477 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:478 Protein Expression Plasmid Vector	PHLAP9259465	Plasmid vector containing HLA-B*07:478 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:478 protein. This plasmid can be used for constructing HLA-B*07:478 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:478 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:479N Protein Expression Plasmid Vector	PHLAP9259466	Plasmid vector containing HLA-B*07:479N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:479N protein. This plasmid can be used for constructing HLA-B*07:479N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:479N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:48:01 Protein Expression Plasmid Vector	PHLAP9259467	Plasmid vector containing HLA-B*07:48:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:48:01 protein. This plasmid can be used for constructing HLA-B*07:48:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:48:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:48:02 Protein Expression Plasmid Vector	PHLAP9259468	Plasmid vector containing HLA-B*07:48:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:48:02 protein. This plasmid can be used for constructing HLA-B*07:48:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:48:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:480 Protein Expression Plasmid Vector	PHLAP9259469	Plasmid vector containing HLA-B*07:480 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:480 protein. This plasmid can be used for constructing HLA-B*07:480 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:480 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:481N Protein Expression Plasmid Vector	PHLAP9259470	Plasmid vector containing HLA-B*07:481N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:481N protein. This plasmid can be used for constructing HLA-B*07:481N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:481N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:482 Protein Expression Plasmid Vector	PHLAP9259471	Plasmid vector containing HLA-B*07:482 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:482 protein. This plasmid can be used for constructing HLA-B*07:482 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:482 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:483 Protein Expression Plasmid Vector	PHLAP9259472	Plasmid vector containing HLA-B*07:483 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:483 protein. This plasmid can be used for constructing HLA-B*07:483 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:483 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:484 Protein Expression Plasmid Vector	PHLAP9259473	Plasmid vector containing HLA-B*07:484 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:484 protein. This plasmid can be used for constructing HLA-B*07:484 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:484 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:485 Protein Expression Plasmid Vector	PHLAP9259474	Plasmid vector containing HLA-B*07:485 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:485 protein. This plasmid can be used for constructing HLA-B*07:485 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:485 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:486 Protein Expression Plasmid Vector	PHLAP9259475	Plasmid vector containing HLA-B*07:486 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:486 protein. This plasmid can be used for constructing HLA-B*07:486 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:486 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:487 Protein Expression Plasmid Vector	PHLAP9259476	Plasmid vector containing HLA-B*07:487 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:487 protein. This plasmid can be used for constructing HLA-B*07:487 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:487 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:488 Protein Expression Plasmid Vector	PHLAP9259477	Plasmid vector containing HLA-B*07:488 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:488 protein. This plasmid can be used for constructing HLA-B*07:488 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:488 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:489 Protein Expression Plasmid Vector	PHLAP9259478	Plasmid vector containing HLA-B*07:489 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:489 protein. This plasmid can be used for constructing HLA-B*07:489 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:489 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:490 Protein Expression Plasmid Vector	PHLAP9259479	Plasmid vector containing HLA-B*07:490 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:490 protein. This plasmid can be used for constructing HLA-B*07:490 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:490 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:491 Protein Expression Plasmid Vector	PHLAP9259480	Plasmid vector containing HLA-B*07:491 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:491 protein. This plasmid can be used for constructing HLA-B*07:491 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:491 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:492 Protein Expression Plasmid Vector	PHLAP9259481	Plasmid vector containing HLA-B*07:492 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:492 protein. This plasmid can be used for constructing HLA-B*07:492 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:492 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:493 Protein Expression Plasmid Vector	PHLAP9259482	Plasmid vector containing HLA-B*07:493 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:493 protein. This plasmid can be used for constructing HLA-B*07:493 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:493 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:494 Protein Expression Plasmid Vector	PHLAP9259483	Plasmid vector containing HLA-B*07:494 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:494 protein. This plasmid can be used for constructing HLA-B*07:494 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:494 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:495 Protein Expression Plasmid Vector	PHLAP9259484	Plasmid vector containing HLA-B*07:495 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:495 protein. This plasmid can be used for constructing HLA-B*07:495 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:495 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:496 Protein Expression Plasmid Vector	PHLAP9259485	Plasmid vector containing HLA-B*07:496 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:496 protein. This plasmid can be used for constructing HLA-B*07:496 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:496 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:497 Protein Expression Plasmid Vector	PHLAP9259486	Plasmid vector containing HLA-B*07:497 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:497 protein. This plasmid can be used for constructing HLA-B*07:497 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:497 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:498 Protein Expression Plasmid Vector	PHLAP9259487	Plasmid vector containing HLA-B*07:498 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:498 protein. This plasmid can be used for constructing HLA-B*07:498 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:498 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:499 Protein Expression Plasmid Vector	PHLAP9259488	Plasmid vector containing HLA-B*07:499 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:499 protein. This plasmid can be used for constructing HLA-B*07:499 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:499 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:49N Protein Expression Plasmid Vector	PHLAP9259489	Plasmid vector containing HLA-B*07:49N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:49N protein. This plasmid can be used for constructing HLA-B*07:49N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:49N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:50 Protein Expression Plasmid Vector	PHLAP9259490	Plasmid vector containing HLA-B*07:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:50 protein. This plasmid can be used for constructing HLA-B*07:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:500 Protein Expression Plasmid Vector	PHLAP9259491	Plasmid vector containing HLA-B*07:500 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:500 protein. This plasmid can be used for constructing HLA-B*07:500 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:500 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:501 Protein Expression Plasmid Vector	PHLAP9259492	Plasmid vector containing HLA-B*07:501 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:501 protein. This plasmid can be used for constructing HLA-B*07:501 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:501 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:502 Protein Expression Plasmid Vector	PHLAP9259493	Plasmid vector containing HLA-B*07:502 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:502 protein. This plasmid can be used for constructing HLA-B*07:502 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:502 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:503 Protein Expression Plasmid Vector	PHLAP9259494	Plasmid vector containing HLA-B*07:503 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:503 protein. This plasmid can be used for constructing HLA-B*07:503 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:503 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:504 Protein Expression Plasmid Vector	PHLAP9259495	Plasmid vector containing HLA-B*07:504 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:504 protein. This plasmid can be used for constructing HLA-B*07:504 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:504 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:505 Protein Expression Plasmid Vector	PHLAP9259496	Plasmid vector containing HLA-B*07:505 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:505 protein. This plasmid can be used for constructing HLA-B*07:505 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:505 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:506 Protein Expression Plasmid Vector	PHLAP9259497	Plasmid vector containing HLA-B*07:506 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:506 protein. This plasmid can be used for constructing HLA-B*07:506 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:506 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:507 Protein Expression Plasmid Vector	PHLAP9259498	Plasmid vector containing HLA-B*07:507 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:507 protein. This plasmid can be used for constructing HLA-B*07:507 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:507 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:508 Protein Expression Plasmid Vector	PHLAP9259499	Plasmid vector containing HLA-B*07:508 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:508 protein. This plasmid can be used for constructing HLA-B*07:508 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:508 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:509N Protein Expression Plasmid Vector	PHLAP9259500	Plasmid vector containing HLA-B*07:509N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:509N protein. This plasmid can be used for constructing HLA-B*07:509N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:509N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:51 Protein Expression Plasmid Vector	PHLAP9259501	Plasmid vector containing HLA-B*07:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:51 protein. This plasmid can be used for constructing HLA-B*07:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:510 Protein Expression Plasmid Vector	PHLAP9259502	Plasmid vector containing HLA-B*07:510 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:510 protein. This plasmid can be used for constructing HLA-B*07:510 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:510 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:511 Protein Expression Plasmid Vector	PHLAP9259503	Plasmid vector containing HLA-B*07:511 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:511 protein. This plasmid can be used for constructing HLA-B*07:511 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:511 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:512 Protein Expression Plasmid Vector	PHLAP9259504	Plasmid vector containing HLA-B*07:512 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:512 protein. This plasmid can be used for constructing HLA-B*07:512 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:512 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:513 Protein Expression Plasmid Vector	PHLAP9259505	Plasmid vector containing HLA-B*07:513 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:513 protein. This plasmid can be used for constructing HLA-B*07:513 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:513 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:514 Protein Expression Plasmid Vector	PHLAP9259506	Plasmid vector containing HLA-B*07:514 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:514 protein. This plasmid can be used for constructing HLA-B*07:514 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:514 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:515 Protein Expression Plasmid Vector	PHLAP9259507	Plasmid vector containing HLA-B*07:515 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:515 protein. This plasmid can be used for constructing HLA-B*07:515 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:515 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:516:01:01 Protein Expression Plasmid Vector	PHLAP9259508	Plasmid vector containing HLA-B*07:516:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:516:01:01 protein. This plasmid can be used for constructing HLA-B*07:516:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:516:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:516:01:02 Protein Expression Plasmid Vector	PHLAP9259509	Plasmid vector containing HLA-B*07:516:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:516:01:02 protein. This plasmid can be used for constructing HLA-B*07:516:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:516:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:517 Protein Expression Plasmid Vector	PHLAP9259510	Plasmid vector containing HLA-B*07:517 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:517 protein. This plasmid can be used for constructing HLA-B*07:517 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:517 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:518 Protein Expression Plasmid Vector	PHLAP9259511	Plasmid vector containing HLA-B*07:518 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:518 protein. This plasmid can be used for constructing HLA-B*07:518 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:518 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:519 Protein Expression Plasmid Vector	PHLAP9259512	Plasmid vector containing HLA-B*07:519 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:519 protein. This plasmid can be used for constructing HLA-B*07:519 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:519 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:52 Protein Expression Plasmid Vector	PHLAP9259513	Plasmid vector containing HLA-B*07:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:52 protein. This plasmid can be used for constructing HLA-B*07:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:520N Protein Expression Plasmid Vector	PHLAP9259514	Plasmid vector containing HLA-B*07:520N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:520N protein. This plasmid can be used for constructing HLA-B*07:520N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:520N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:521 Protein Expression Plasmid Vector	PHLAP9259515	Plasmid vector containing HLA-B*07:521 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:521 protein. This plasmid can be used for constructing HLA-B*07:521 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:521 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:522 Protein Expression Plasmid Vector	PHLAP9259516	Plasmid vector containing HLA-B*07:522 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:522 protein. This plasmid can be used for constructing HLA-B*07:522 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:522 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:523 Protein Expression Plasmid Vector	PHLAP9259517	Plasmid vector containing HLA-B*07:523 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:523 protein. This plasmid can be used for constructing HLA-B*07:523 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:523 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:524 Protein Expression Plasmid Vector	PHLAP9259518	Plasmid vector containing HLA-B*07:524 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:524 protein. This plasmid can be used for constructing HLA-B*07:524 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:524 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:525 Protein Expression Plasmid Vector	PHLAP9259519	Plasmid vector containing HLA-B*07:525 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:525 protein. This plasmid can be used for constructing HLA-B*07:525 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:525 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:526N Protein Expression Plasmid Vector	PHLAP9259520	Plasmid vector containing HLA-B*07:526N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:526N protein. This plasmid can be used for constructing HLA-B*07:526N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:526N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:527 Protein Expression Plasmid Vector	PHLAP9259521	Plasmid vector containing HLA-B*07:527 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:527 protein. This plasmid can be used for constructing HLA-B*07:527 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:527 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:528 Protein Expression Plasmid Vector	PHLAP9259522	Plasmid vector containing HLA-B*07:528 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:528 protein. This plasmid can be used for constructing HLA-B*07:528 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:528 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:529 Protein Expression Plasmid Vector	PHLAP9259523	Plasmid vector containing HLA-B*07:529 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:529 protein. This plasmid can be used for constructing HLA-B*07:529 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:529 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:53 Protein Expression Plasmid Vector	PHLAP9259524	Plasmid vector containing HLA-B*07:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:53 protein. This plasmid can be used for constructing HLA-B*07:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:530 Protein Expression Plasmid Vector	PHLAP9259525	Plasmid vector containing HLA-B*07:530 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:530 protein. This plasmid can be used for constructing HLA-B*07:530 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:530 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:531 Protein Expression Plasmid Vector	PHLAP9259526	Plasmid vector containing HLA-B*07:531 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:531 protein. This plasmid can be used for constructing HLA-B*07:531 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:531 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:532 Protein Expression Plasmid Vector	PHLAP9259527	Plasmid vector containing HLA-B*07:532 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:532 protein. This plasmid can be used for constructing HLA-B*07:532 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:532 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:533 Protein Expression Plasmid Vector	PHLAP9259528	Plasmid vector containing HLA-B*07:533 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:533 protein. This plasmid can be used for constructing HLA-B*07:533 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:533 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:534 Protein Expression Plasmid Vector	PHLAP9259529	Plasmid vector containing HLA-B*07:534 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:534 protein. This plasmid can be used for constructing HLA-B*07:534 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:534 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:535 Protein Expression Plasmid Vector	PHLAP9259530	Plasmid vector containing HLA-B*07:535 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:535 protein. This plasmid can be used for constructing HLA-B*07:535 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:535 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:536 Protein Expression Plasmid Vector	PHLAP9259531	Plasmid vector containing HLA-B*07:536 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:536 protein. This plasmid can be used for constructing HLA-B*07:536 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:536 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:537 Protein Expression Plasmid Vector	PHLAP9259532	Plasmid vector containing HLA-B*07:537 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:537 protein. This plasmid can be used for constructing HLA-B*07:537 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:537 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:54 Protein Expression Plasmid Vector	PHLAP9259533	Plasmid vector containing HLA-B*07:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:54 protein. This plasmid can be used for constructing HLA-B*07:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:55 Protein Expression Plasmid Vector	PHLAP9259534	Plasmid vector containing HLA-B*07:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:55 protein. This plasmid can be used for constructing HLA-B*07:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:56:01 Protein Expression Plasmid Vector	PHLAP9259535	Plasmid vector containing HLA-B*07:56:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:56:01 protein. This plasmid can be used for constructing HLA-B*07:56:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:56:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:56:02 Protein Expression Plasmid Vector	PHLAP9259536	Plasmid vector containing HLA-B*07:56:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:56:02 protein. This plasmid can be used for constructing HLA-B*07:56:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:56:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:56:03 Protein Expression Plasmid Vector	PHLAP9259537	Plasmid vector containing HLA-B*07:56:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:56:03 protein. This plasmid can be used for constructing HLA-B*07:56:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:56:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:57 Protein Expression Plasmid Vector	PHLAP9259538	Plasmid vector containing HLA-B*07:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:57 protein. This plasmid can be used for constructing HLA-B*07:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:58 Protein Expression Plasmid Vector	PHLAP9259539	Plasmid vector containing HLA-B*07:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:58 protein. This plasmid can be used for constructing HLA-B*07:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:59 Protein Expression Plasmid Vector	PHLAP9259540	Plasmid vector containing HLA-B*07:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:59 protein. This plasmid can be used for constructing HLA-B*07:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:60 Protein Expression Plasmid Vector	PHLAP9259541	Plasmid vector containing HLA-B*07:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:60 protein. This plasmid can be used for constructing HLA-B*07:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:61 Protein Expression Plasmid Vector	PHLAP9259542	Plasmid vector containing HLA-B*07:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:61 protein. This plasmid can be used for constructing HLA-B*07:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:62:01 Protein Expression Plasmid Vector	PHLAP9259543	Plasmid vector containing HLA-B*07:62:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:62:01 protein. This plasmid can be used for constructing HLA-B*07:62:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:62:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:62:02 Protein Expression Plasmid Vector	PHLAP9259544	Plasmid vector containing HLA-B*07:62:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:62:02 protein. This plasmid can be used for constructing HLA-B*07:62:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:62:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:63 Protein Expression Plasmid Vector	PHLAP9259545	Plasmid vector containing HLA-B*07:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:63 protein. This plasmid can be used for constructing HLA-B*07:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:64 Protein Expression Plasmid Vector	PHLAP9259546	Plasmid vector containing HLA-B*07:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:64 protein. This plasmid can be used for constructing HLA-B*07:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:65 Protein Expression Plasmid Vector	PHLAP9259547	Plasmid vector containing HLA-B*07:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:65 protein. This plasmid can be used for constructing HLA-B*07:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:66 Protein Expression Plasmid Vector	PHLAP9259548	Plasmid vector containing HLA-B*07:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:66 protein. This plasmid can be used for constructing HLA-B*07:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:67N Protein Expression Plasmid Vector	PHLAP9259549	Plasmid vector containing HLA-B*07:67N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:67N protein. This plasmid can be used for constructing HLA-B*07:67N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:67N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:68:01 Protein Expression Plasmid Vector	PHLAP9259550	Plasmid vector containing HLA-B*07:68:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:68:01 protein. This plasmid can be used for constructing HLA-B*07:68:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:68:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:68:02 Protein Expression Plasmid Vector	PHLAP9259551	Plasmid vector containing HLA-B*07:68:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:68:02 protein. This plasmid can be used for constructing HLA-B*07:68:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:68:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:68:03 Protein Expression Plasmid Vector	PHLAP9259552	Plasmid vector containing HLA-B*07:68:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:68:03 protein. This plasmid can be used for constructing HLA-B*07:68:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:68:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:69 Protein Expression Plasmid Vector	PHLAP9259553	Plasmid vector containing HLA-B*07:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:69 protein. This plasmid can be used for constructing HLA-B*07:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:70 Protein Expression Plasmid Vector	PHLAP9259554	Plasmid vector containing HLA-B*07:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:70 protein. This plasmid can be used for constructing HLA-B*07:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:71 Protein Expression Plasmid Vector	PHLAP9259555	Plasmid vector containing HLA-B*07:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:71 protein. This plasmid can be used for constructing HLA-B*07:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:72 Protein Expression Plasmid Vector	PHLAP9259556	Plasmid vector containing HLA-B*07:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:72 protein. This plasmid can be used for constructing HLA-B*07:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:73 Protein Expression Plasmid Vector	PHLAP9259557	Plasmid vector containing HLA-B*07:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:73 protein. This plasmid can be used for constructing HLA-B*07:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:74 Protein Expression Plasmid Vector	PHLAP9259558	Plasmid vector containing HLA-B*07:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:74 protein. This plasmid can be used for constructing HLA-B*07:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:75:01:01 Protein Expression Plasmid Vector	PHLAP9259559	Plasmid vector containing HLA-B*07:75:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:75:01:01 protein. This plasmid can be used for constructing HLA-B*07:75:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:75:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:75:01:02 Protein Expression Plasmid Vector	PHLAP9259560	Plasmid vector containing HLA-B*07:75:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:75:01:02 protein. This plasmid can be used for constructing HLA-B*07:75:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:75:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:76 Protein Expression Plasmid Vector	PHLAP9259561	Plasmid vector containing HLA-B*07:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:76 protein. This plasmid can be used for constructing HLA-B*07:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:77 Protein Expression Plasmid Vector	PHLAP9259562	Plasmid vector containing HLA-B*07:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:77 protein. This plasmid can be used for constructing HLA-B*07:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:78 Protein Expression Plasmid Vector	PHLAP9259563	Plasmid vector containing HLA-B*07:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:78 protein. This plasmid can be used for constructing HLA-B*07:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:79 Protein Expression Plasmid Vector	PHLAP9259564	Plasmid vector containing HLA-B*07:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:79 protein. This plasmid can be used for constructing HLA-B*07:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:80 Protein Expression Plasmid Vector	PHLAP9259565	Plasmid vector containing HLA-B*07:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:80 protein. This plasmid can be used for constructing HLA-B*07:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:81 Protein Expression Plasmid Vector	PHLAP9259566	Plasmid vector containing HLA-B*07:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:81 protein. This plasmid can be used for constructing HLA-B*07:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:82 Protein Expression Plasmid Vector	PHLAP9259567	Plasmid vector containing HLA-B*07:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:82 protein. This plasmid can be used for constructing HLA-B*07:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:83 Protein Expression Plasmid Vector	PHLAP9259568	Plasmid vector containing HLA-B*07:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:83 protein. This plasmid can be used for constructing HLA-B*07:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:84 Protein Expression Plasmid Vector	PHLAP9259569	Plasmid vector containing HLA-B*07:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:84 protein. This plasmid can be used for constructing HLA-B*07:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:85:01 Protein Expression Plasmid Vector	PHLAP9259570	Plasmid vector containing HLA-B*07:85:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:85:01 protein. This plasmid can be used for constructing HLA-B*07:85:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:85:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:85:02 Protein Expression Plasmid Vector	PHLAP9259571	Plasmid vector containing HLA-B*07:85:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:85:02 protein. This plasmid can be used for constructing HLA-B*07:85:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:85:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:86 Protein Expression Plasmid Vector	PHLAP9259572	Plasmid vector containing HLA-B*07:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:86 protein. This plasmid can be used for constructing HLA-B*07:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:87 Protein Expression Plasmid Vector	PHLAP9259573	Plasmid vector containing HLA-B*07:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:87 protein. This plasmid can be used for constructing HLA-B*07:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:88 Protein Expression Plasmid Vector	PHLAP9259574	Plasmid vector containing HLA-B*07:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:88 protein. This plasmid can be used for constructing HLA-B*07:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:89 Protein Expression Plasmid Vector	PHLAP9259575	Plasmid vector containing HLA-B*07:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:89 protein. This plasmid can be used for constructing HLA-B*07:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:90 Protein Expression Plasmid Vector	PHLAP9259576	Plasmid vector containing HLA-B*07:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:90 protein. This plasmid can be used for constructing HLA-B*07:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:91 Protein Expression Plasmid Vector	PHLAP9259577	Plasmid vector containing HLA-B*07:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:91 protein. This plasmid can be used for constructing HLA-B*07:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:92 Protein Expression Plasmid Vector	PHLAP9259578	Plasmid vector containing HLA-B*07:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:92 protein. This plasmid can be used for constructing HLA-B*07:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:93:01 Protein Expression Plasmid Vector	PHLAP9259579	Plasmid vector containing HLA-B*07:93:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:93:01 protein. This plasmid can be used for constructing HLA-B*07:93:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:93:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:93:02 Protein Expression Plasmid Vector	PHLAP9259580	Plasmid vector containing HLA-B*07:93:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:93:02 protein. This plasmid can be used for constructing HLA-B*07:93:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:93:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:94 Protein Expression Plasmid Vector	PHLAP9259581	Plasmid vector containing HLA-B*07:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:94 protein. This plasmid can be used for constructing HLA-B*07:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*07:95 Protein Expression Plasmid Vector	PHLAP9259582	Plasmid vector containing HLA-B*07:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:95 protein. This plasmid can be used for constructing HLA-B*07:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:96:01 Protein Expression Plasmid Vector	PHLAP9259583	Plasmid vector containing HLA-B*07:96:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:96:01 protein. This plasmid can be used for constructing HLA-B*07:96:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:96:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:96:02 Protein Expression Plasmid Vector	PHLAP9259584	Plasmid vector containing HLA-B*07:96:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:96:02 protein. This plasmid can be used for constructing HLA-B*07:96:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:96:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:97 Protein Expression Plasmid Vector	PHLAP9259585	Plasmid vector containing HLA-B*07:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:97 protein. This plasmid can be used for constructing HLA-B*07:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:98 Protein Expression Plasmid Vector	PHLAP9259586	Plasmid vector containing HLA-B*07:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:98 protein. This plasmid can be used for constructing HLA-B*07:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*07:99 Protein Expression Plasmid Vector	PHLAP9259587	Plasmid vector containing HLA-B*07:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*07:99 protein. This plasmid can be used for constructing HLA-B*07:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*07:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*0701 Protein Expression Plasmid Vector	PHLAP9259588	Plasmid vector containing HLA-B*0701 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*0701 protein. This plasmid can be used for constructing HLA-B*0701 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*0701 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:01 Protein Expression Plasmid Vector	PHLAP9259589	Plasmid vector containing HLA-B*08:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:01 protein. This plasmid can be used for constructing HLA-B*08:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:01:02 Protein Expression Plasmid Vector	PHLAP9259590	Plasmid vector containing HLA-B*08:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:02 protein. This plasmid can be used for constructing HLA-B*08:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:03 Protein Expression Plasmid Vector	PHLAP9259591	Plasmid vector containing HLA-B*08:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:03 protein. This plasmid can be used for constructing HLA-B*08:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:04 Protein Expression Plasmid Vector	PHLAP9259592	Plasmid vector containing HLA-B*08:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:04 protein. This plasmid can be used for constructing HLA-B*08:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:05 Protein Expression Plasmid Vector	PHLAP9259593	Plasmid vector containing HLA-B*08:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:05 protein. This plasmid can be used for constructing HLA-B*08:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:06 Protein Expression Plasmid Vector	PHLAP9259594	Plasmid vector containing HLA-B*08:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:06 protein. This plasmid can be used for constructing HLA-B*08:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:07 Protein Expression Plasmid Vector	PHLAP9259595	Plasmid vector containing HLA-B*08:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:07 protein. This plasmid can be used for constructing HLA-B*08:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:08 Protein Expression Plasmid Vector	PHLAP9259596	Plasmid vector containing HLA-B*08:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:08 protein. This plasmid can be used for constructing HLA-B*08:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:01:09 Protein Expression Plasmid Vector	PHLAP9259597	Plasmid vector containing HLA-B*08:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:09 protein. This plasmid can be used for constructing HLA-B*08:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:10 Protein Expression Plasmid Vector	PHLAP9259598	Plasmid vector containing HLA-B*08:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:10 protein. This plasmid can be used for constructing HLA-B*08:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:11 Protein Expression Plasmid Vector	PHLAP9259599	Plasmid vector containing HLA-B*08:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:11 protein. This plasmid can be used for constructing HLA-B*08:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:12 Protein Expression Plasmid Vector	PHLAP9259600	Plasmid vector containing HLA-B*08:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:12 protein. This plasmid can be used for constructing HLA-B*08:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:13 Protein Expression Plasmid Vector	PHLAP9259601	Plasmid vector containing HLA-B*08:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:13 protein. This plasmid can be used for constructing HLA-B*08:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:14 Protein Expression Plasmid Vector	PHLAP9259602	Plasmid vector containing HLA-B*08:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:14 protein. This plasmid can be used for constructing HLA-B*08:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:15 Protein Expression Plasmid Vector	PHLAP9259603	Plasmid vector containing HLA-B*08:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:15 protein. This plasmid can be used for constructing HLA-B*08:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:01:16 Protein Expression Plasmid Vector	PHLAP9259604	Plasmid vector containing HLA-B*08:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:16 protein. This plasmid can be used for constructing HLA-B*08:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:17 Protein Expression Plasmid Vector	PHLAP9259605	Plasmid vector containing HLA-B*08:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:17 protein. This plasmid can be used for constructing HLA-B*08:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:18 Protein Expression Plasmid Vector	PHLAP9259606	Plasmid vector containing HLA-B*08:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:18 protein. This plasmid can be used for constructing HLA-B*08:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:19 Protein Expression Plasmid Vector	PHLAP9259607	Plasmid vector containing HLA-B*08:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:19 protein. This plasmid can be used for constructing HLA-B*08:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:20 Protein Expression Plasmid Vector	PHLAP9259608	Plasmid vector containing HLA-B*08:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:20 protein. This plasmid can be used for constructing HLA-B*08:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:21 Protein Expression Plasmid Vector	PHLAP9259609	Plasmid vector containing HLA-B*08:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:21 protein. This plasmid can be used for constructing HLA-B*08:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:22 Protein Expression Plasmid Vector	PHLAP9259610	Plasmid vector containing HLA-B*08:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:22 protein. This plasmid can be used for constructing HLA-B*08:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:01:23 Protein Expression Plasmid Vector	PHLAP9259611	Plasmid vector containing HLA-B*08:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:23 protein. This plasmid can be used for constructing HLA-B*08:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:24 Protein Expression Plasmid Vector	PHLAP9259612	Plasmid vector containing HLA-B*08:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:24 protein. This plasmid can be used for constructing HLA-B*08:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:25 Protein Expression Plasmid Vector	PHLAP9259613	Plasmid vector containing HLA-B*08:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:25 protein. This plasmid can be used for constructing HLA-B*08:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:26 Protein Expression Plasmid Vector	PHLAP9259614	Plasmid vector containing HLA-B*08:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:26 protein. This plasmid can be used for constructing HLA-B*08:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:27 Protein Expression Plasmid Vector	PHLAP9259615	Plasmid vector containing HLA-B*08:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:27 protein. This plasmid can be used for constructing HLA-B*08:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:28 Protein Expression Plasmid Vector	PHLAP9259616	Plasmid vector containing HLA-B*08:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:28 protein. This plasmid can be used for constructing HLA-B*08:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:29 Protein Expression Plasmid Vector	PHLAP9259617	Plasmid vector containing HLA-B*08:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:29 protein. This plasmid can be used for constructing HLA-B*08:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:01:30 Protein Expression Plasmid Vector	PHLAP9259618	Plasmid vector containing HLA-B*08:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:30 protein. This plasmid can be used for constructing HLA-B*08:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:31 Protein Expression Plasmid Vector	PHLAP9259619	Plasmid vector containing HLA-B*08:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:31 protein. This plasmid can be used for constructing HLA-B*08:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:32 Protein Expression Plasmid Vector	PHLAP9259620	Plasmid vector containing HLA-B*08:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:32 protein. This plasmid can be used for constructing HLA-B*08:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:33 Protein Expression Plasmid Vector	PHLAP9259621	Plasmid vector containing HLA-B*08:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:33 protein. This plasmid can be used for constructing HLA-B*08:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:34 Protein Expression Plasmid Vector	PHLAP9259622	Plasmid vector containing HLA-B*08:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:34 protein. This plasmid can be used for constructing HLA-B*08:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:35 Protein Expression Plasmid Vector	PHLAP9259623	Plasmid vector containing HLA-B*08:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:35 protein. This plasmid can be used for constructing HLA-B*08:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:36 Protein Expression Plasmid Vector	PHLAP9259624	Plasmid vector containing HLA-B*08:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:36 protein. This plasmid can be used for constructing HLA-B*08:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:01:37 Protein Expression Plasmid Vector	PHLAP9259625	Plasmid vector containing HLA-B*08:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:37 protein. This plasmid can be used for constructing HLA-B*08:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:38 Protein Expression Plasmid Vector	PHLAP9259626	Plasmid vector containing HLA-B*08:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:38 protein. This plasmid can be used for constructing HLA-B*08:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:39 Protein Expression Plasmid Vector	PHLAP9259627	Plasmid vector containing HLA-B*08:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:39 protein. This plasmid can be used for constructing HLA-B*08:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:40 Protein Expression Plasmid Vector	PHLAP9259628	Plasmid vector containing HLA-B*08:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:40 protein. This plasmid can be used for constructing HLA-B*08:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:41 Protein Expression Plasmid Vector	PHLAP9259629	Plasmid vector containing HLA-B*08:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:41 protein. This plasmid can be used for constructing HLA-B*08:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:42 Protein Expression Plasmid Vector	PHLAP9259630	Plasmid vector containing HLA-B*08:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:42 protein. This plasmid can be used for constructing HLA-B*08:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:43 Protein Expression Plasmid Vector	PHLAP9259631	Plasmid vector containing HLA-B*08:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:43 protein. This plasmid can be used for constructing HLA-B*08:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:01:44 Protein Expression Plasmid Vector	PHLAP9259632	Plasmid vector containing HLA-B*08:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:44 protein. This plasmid can be used for constructing HLA-B*08:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:45 Protein Expression Plasmid Vector	PHLAP9259633	Plasmid vector containing HLA-B*08:01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:45 protein. This plasmid can be used for constructing HLA-B*08:01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:46 Protein Expression Plasmid Vector	PHLAP9259634	Plasmid vector containing HLA-B*08:01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:46 protein. This plasmid can be used for constructing HLA-B*08:01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:47 Protein Expression Plasmid Vector	PHLAP9259635	Plasmid vector containing HLA-B*08:01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:47 protein. This plasmid can be used for constructing HLA-B*08:01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:48 Protein Expression Plasmid Vector	PHLAP9259636	Plasmid vector containing HLA-B*08:01:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:48 protein. This plasmid can be used for constructing HLA-B*08:01:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:49 Protein Expression Plasmid Vector	PHLAP9259637	Plasmid vector containing HLA-B*08:01:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:49 protein. This plasmid can be used for constructing HLA-B*08:01:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:50 Protein Expression Plasmid Vector	PHLAP9259638	Plasmid vector containing HLA-B*08:01:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:50 protein. This plasmid can be used for constructing HLA-B*08:01:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:01:51 Protein Expression Plasmid Vector	PHLAP9259639	Plasmid vector containing HLA-B*08:01:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:51 protein. This plasmid can be used for constructing HLA-B*08:01:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:52 Protein Expression Plasmid Vector	PHLAP9259640	Plasmid vector containing HLA-B*08:01:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:52 protein. This plasmid can be used for constructing HLA-B*08:01:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:53 Protein Expression Plasmid Vector	PHLAP9259641	Plasmid vector containing HLA-B*08:01:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:53 protein. This plasmid can be used for constructing HLA-B*08:01:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:54 Protein Expression Plasmid Vector	PHLAP9259642	Plasmid vector containing HLA-B*08:01:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:54 protein. This plasmid can be used for constructing HLA-B*08:01:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:55 Protein Expression Plasmid Vector	PHLAP9259643	Plasmid vector containing HLA-B*08:01:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:55 protein. This plasmid can be used for constructing HLA-B*08:01:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:56 Protein Expression Plasmid Vector	PHLAP9259644	Plasmid vector containing HLA-B*08:01:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:56 protein. This plasmid can be used for constructing HLA-B*08:01:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:57 Protein Expression Plasmid Vector	PHLAP9259645	Plasmid vector containing HLA-B*08:01:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:57 protein. This plasmid can be used for constructing HLA-B*08:01:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:01:58 Protein Expression Plasmid Vector	PHLAP9259646	Plasmid vector containing HLA-B*08:01:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:58 protein. This plasmid can be used for constructing HLA-B*08:01:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:59 Protein Expression Plasmid Vector	PHLAP9259647	Plasmid vector containing HLA-B*08:01:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:59 protein. This plasmid can be used for constructing HLA-B*08:01:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:60 Protein Expression Plasmid Vector	PHLAP9259648	Plasmid vector containing HLA-B*08:01:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:60 protein. This plasmid can be used for constructing HLA-B*08:01:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:61 Protein Expression Plasmid Vector	PHLAP9259649	Plasmid vector containing HLA-B*08:01:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:61 protein. This plasmid can be used for constructing HLA-B*08:01:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:62 Protein Expression Plasmid Vector	PHLAP9259650	Plasmid vector containing HLA-B*08:01:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:62 protein. This plasmid can be used for constructing HLA-B*08:01:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:63 Protein Expression Plasmid Vector	PHLAP9259651	Plasmid vector containing HLA-B*08:01:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:63 protein. This plasmid can be used for constructing HLA-B*08:01:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:64 Protein Expression Plasmid Vector	PHLAP9259652	Plasmid vector containing HLA-B*08:01:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:64 protein. This plasmid can be used for constructing HLA-B*08:01:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:01:65 Protein Expression Plasmid Vector	PHLAP9259653	Plasmid vector containing HLA-B*08:01:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:65 protein. This plasmid can be used for constructing HLA-B*08:01:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:66 Protein Expression Plasmid Vector	PHLAP9259654	Plasmid vector containing HLA-B*08:01:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:66 protein. This plasmid can be used for constructing HLA-B*08:01:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:67 Protein Expression Plasmid Vector	PHLAP9259655	Plasmid vector containing HLA-B*08:01:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:67 protein. This plasmid can be used for constructing HLA-B*08:01:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:68 Protein Expression Plasmid Vector	PHLAP9259656	Plasmid vector containing HLA-B*08:01:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:68 protein. This plasmid can be used for constructing HLA-B*08:01:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:69 Protein Expression Plasmid Vector	PHLAP9259657	Plasmid vector containing HLA-B*08:01:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:69 protein. This plasmid can be used for constructing HLA-B*08:01:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:70 Protein Expression Plasmid Vector	PHLAP9259658	Plasmid vector containing HLA-B*08:01:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:70 protein. This plasmid can be used for constructing HLA-B*08:01:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:71 Protein Expression Plasmid Vector	PHLAP9259659	Plasmid vector containing HLA-B*08:01:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:71 protein. This plasmid can be used for constructing HLA-B*08:01:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:01:72 Protein Expression Plasmid Vector	PHLAP9259660	Plasmid vector containing HLA-B*08:01:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:72 protein. This plasmid can be used for constructing HLA-B*08:01:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:73 Protein Expression Plasmid Vector	PHLAP9259661	Plasmid vector containing HLA-B*08:01:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:73 protein. This plasmid can be used for constructing HLA-B*08:01:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:74 Protein Expression Plasmid Vector	PHLAP9259662	Plasmid vector containing HLA-B*08:01:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:74 protein. This plasmid can be used for constructing HLA-B*08:01:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:75 Protein Expression Plasmid Vector	PHLAP9259663	Plasmid vector containing HLA-B*08:01:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:75 protein. This plasmid can be used for constructing HLA-B*08:01:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:76 Protein Expression Plasmid Vector	PHLAP9259664	Plasmid vector containing HLA-B*08:01:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:76 protein. This plasmid can be used for constructing HLA-B*08:01:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:77 Protein Expression Plasmid Vector	PHLAP9259665	Plasmid vector containing HLA-B*08:01:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:77 protein. This plasmid can be used for constructing HLA-B*08:01:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:01:78 Protein Expression Plasmid Vector	PHLAP9259666	Plasmid vector containing HLA-B*08:01:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:01:78 protein. This plasmid can be used for constructing HLA-B*08:01:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:02 Protein Expression Plasmid Vector	PHLAP9259667	Plasmid vector containing HLA-B*08:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:02 protein. This plasmid can be used for constructing HLA-B*08:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:03 Protein Expression Plasmid Vector	PHLAP9259668	Plasmid vector containing HLA-B*08:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:03 protein. This plasmid can be used for constructing HLA-B*08:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:04 Protein Expression Plasmid Vector	PHLAP9259669	Plasmid vector containing HLA-B*08:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:04 protein. This plasmid can be used for constructing HLA-B*08:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:05 Protein Expression Plasmid Vector	PHLAP9259670	Plasmid vector containing HLA-B*08:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:05 protein. This plasmid can be used for constructing HLA-B*08:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:06 Protein Expression Plasmid Vector	PHLAP9259671	Plasmid vector containing HLA-B*08:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:06 protein. This plasmid can be used for constructing HLA-B*08:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:07 Protein Expression Plasmid Vector	PHLAP9259672	Plasmid vector containing HLA-B*08:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:07 protein. This plasmid can be used for constructing HLA-B*08:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:08 Protein Expression Plasmid Vector	PHLAP9259673	Plasmid vector containing HLA-B*08:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:08 protein. This plasmid can be used for constructing HLA-B*08:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:09 Protein Expression Plasmid Vector	PHLAP9259674	Plasmid vector containing HLA-B*08:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:09 protein. This plasmid can be used for constructing HLA-B*08:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:10 Protein Expression Plasmid Vector	PHLAP9259675	Plasmid vector containing HLA-B*08:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:10 protein. This plasmid can be used for constructing HLA-B*08:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:11 Protein Expression Plasmid Vector	PHLAP9259676	Plasmid vector containing HLA-B*08:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:11 protein. This plasmid can be used for constructing HLA-B*08:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:12 Protein Expression Plasmid Vector	PHLAP9259677	Plasmid vector containing HLA-B*08:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:12 protein. This plasmid can be used for constructing HLA-B*08:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:13 Protein Expression Plasmid Vector	PHLAP9259678	Plasmid vector containing HLA-B*08:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:13 protein. This plasmid can be used for constructing HLA-B*08:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:14 Protein Expression Plasmid Vector	PHLAP9259679	Plasmid vector containing HLA-B*08:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:14 protein. This plasmid can be used for constructing HLA-B*08:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:15 Protein Expression Plasmid Vector	PHLAP9259680	Plasmid vector containing HLA-B*08:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:15 protein. This plasmid can be used for constructing HLA-B*08:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:16 Protein Expression Plasmid Vector	PHLAP9259681	Plasmid vector containing HLA-B*08:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:16 protein. This plasmid can be used for constructing HLA-B*08:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:17 Protein Expression Plasmid Vector	PHLAP9259682	Plasmid vector containing HLA-B*08:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:17 protein. This plasmid can be used for constructing HLA-B*08:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:18 Protein Expression Plasmid Vector	PHLAP9259683	Plasmid vector containing HLA-B*08:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:18 protein. This plasmid can be used for constructing HLA-B*08:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:19 Protein Expression Plasmid Vector	PHLAP9259684	Plasmid vector containing HLA-B*08:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:19 protein. This plasmid can be used for constructing HLA-B*08:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:20 Protein Expression Plasmid Vector	PHLAP9259685	Plasmid vector containing HLA-B*08:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:20 protein. This plasmid can be used for constructing HLA-B*08:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:21 Protein Expression Plasmid Vector	PHLAP9259686	Plasmid vector containing HLA-B*08:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:21 protein. This plasmid can be used for constructing HLA-B*08:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:22 Protein Expression Plasmid Vector	PHLAP9259687	Plasmid vector containing HLA-B*08:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:22 protein. This plasmid can be used for constructing HLA-B*08:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:23 Protein Expression Plasmid Vector	PHLAP9259688	Plasmid vector containing HLA-B*08:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:23 protein. This plasmid can be used for constructing HLA-B*08:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:24 Protein Expression Plasmid Vector	PHLAP9259689	Plasmid vector containing HLA-B*08:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:24 protein. This plasmid can be used for constructing HLA-B*08:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:25 Protein Expression Plasmid Vector	PHLAP9259690	Plasmid vector containing HLA-B*08:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:25 protein. This plasmid can be used for constructing HLA-B*08:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:26 Protein Expression Plasmid Vector	PHLAP9259691	Plasmid vector containing HLA-B*08:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:26 protein. This plasmid can be used for constructing HLA-B*08:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:27 Protein Expression Plasmid Vector	PHLAP9259692	Plasmid vector containing HLA-B*08:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:27 protein. This plasmid can be used for constructing HLA-B*08:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:28 Protein Expression Plasmid Vector	PHLAP9259693	Plasmid vector containing HLA-B*08:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:28 protein. This plasmid can be used for constructing HLA-B*08:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:29 Protein Expression Plasmid Vector	PHLAP9259694	Plasmid vector containing HLA-B*08:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:29 protein. This plasmid can be used for constructing HLA-B*08:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:30 Protein Expression Plasmid Vector	PHLAP9259695	Plasmid vector containing HLA-B*08:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:30 protein. This plasmid can be used for constructing HLA-B*08:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:31 Protein Expression Plasmid Vector	PHLAP9259696	Plasmid vector containing HLA-B*08:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:31 protein. This plasmid can be used for constructing HLA-B*08:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:32 Protein Expression Plasmid Vector	PHLAP9259697	Plasmid vector containing HLA-B*08:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:32 protein. This plasmid can be used for constructing HLA-B*08:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:33 Protein Expression Plasmid Vector	PHLAP9259698	Plasmid vector containing HLA-B*08:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:33 protein. This plasmid can be used for constructing HLA-B*08:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:34 Protein Expression Plasmid Vector	PHLAP9259699	Plasmid vector containing HLA-B*08:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:34 protein. This plasmid can be used for constructing HLA-B*08:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:35 Protein Expression Plasmid Vector	PHLAP9259700	Plasmid vector containing HLA-B*08:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:35 protein. This plasmid can be used for constructing HLA-B*08:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:36 Protein Expression Plasmid Vector	PHLAP9259701	Plasmid vector containing HLA-B*08:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:36 protein. This plasmid can be used for constructing HLA-B*08:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:37 Protein Expression Plasmid Vector	PHLAP9259702	Plasmid vector containing HLA-B*08:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:37 protein. This plasmid can be used for constructing HLA-B*08:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:38 Protein Expression Plasmid Vector	PHLAP9259703	Plasmid vector containing HLA-B*08:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:38 protein. This plasmid can be used for constructing HLA-B*08:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:39 Protein Expression Plasmid Vector	PHLAP9259704	Plasmid vector containing HLA-B*08:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:39 protein. This plasmid can be used for constructing HLA-B*08:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:40 Protein Expression Plasmid Vector	PHLAP9259705	Plasmid vector containing HLA-B*08:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:40 protein. This plasmid can be used for constructing HLA-B*08:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:41 Protein Expression Plasmid Vector	PHLAP9259706	Plasmid vector containing HLA-B*08:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:41 protein. This plasmid can be used for constructing HLA-B*08:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:42 Protein Expression Plasmid Vector	PHLAP9259707	Plasmid vector containing HLA-B*08:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:42 protein. This plasmid can be used for constructing HLA-B*08:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:43 Protein Expression Plasmid Vector	PHLAP9259708	Plasmid vector containing HLA-B*08:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:43 protein. This plasmid can be used for constructing HLA-B*08:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:44 Protein Expression Plasmid Vector	PHLAP9259709	Plasmid vector containing HLA-B*08:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:44 protein. This plasmid can be used for constructing HLA-B*08:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:45 Protein Expression Plasmid Vector	PHLAP9259710	Plasmid vector containing HLA-B*08:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:45 protein. This plasmid can be used for constructing HLA-B*08:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:46 Protein Expression Plasmid Vector	PHLAP9259711	Plasmid vector containing HLA-B*08:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:46 protein. This plasmid can be used for constructing HLA-B*08:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:47 Protein Expression Plasmid Vector	PHLAP9259712	Plasmid vector containing HLA-B*08:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:47 protein. This plasmid can be used for constructing HLA-B*08:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:48 Protein Expression Plasmid Vector	PHLAP9259713	Plasmid vector containing HLA-B*08:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:48 protein. This plasmid can be used for constructing HLA-B*08:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:49 Protein Expression Plasmid Vector	PHLAP9259714	Plasmid vector containing HLA-B*08:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:49 protein. This plasmid can be used for constructing HLA-B*08:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:50 Protein Expression Plasmid Vector	PHLAP9259715	Plasmid vector containing HLA-B*08:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:50 protein. This plasmid can be used for constructing HLA-B*08:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:51 Protein Expression Plasmid Vector	PHLAP9259716	Plasmid vector containing HLA-B*08:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:51 protein. This plasmid can be used for constructing HLA-B*08:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:52 Protein Expression Plasmid Vector	PHLAP9259717	Plasmid vector containing HLA-B*08:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:52 protein. This plasmid can be used for constructing HLA-B*08:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:53 Protein Expression Plasmid Vector	PHLAP9259718	Plasmid vector containing HLA-B*08:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:53 protein. This plasmid can be used for constructing HLA-B*08:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:54 Protein Expression Plasmid Vector	PHLAP9259719	Plasmid vector containing HLA-B*08:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:54 protein. This plasmid can be used for constructing HLA-B*08:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:55 Protein Expression Plasmid Vector	PHLAP9259720	Plasmid vector containing HLA-B*08:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:55 protein. This plasmid can be used for constructing HLA-B*08:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:56 Protein Expression Plasmid Vector	PHLAP9259721	Plasmid vector containing HLA-B*08:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:56 protein. This plasmid can be used for constructing HLA-B*08:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:57 Protein Expression Plasmid Vector	PHLAP9259722	Plasmid vector containing HLA-B*08:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:57 protein. This plasmid can be used for constructing HLA-B*08:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:58 Protein Expression Plasmid Vector	PHLAP9259723	Plasmid vector containing HLA-B*08:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:58 protein. This plasmid can be used for constructing HLA-B*08:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:59 Protein Expression Plasmid Vector	PHLAP9259724	Plasmid vector containing HLA-B*08:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:59 protein. This plasmid can be used for constructing HLA-B*08:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:60 Protein Expression Plasmid Vector	PHLAP9259725	Plasmid vector containing HLA-B*08:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:60 protein. This plasmid can be used for constructing HLA-B*08:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:61 Protein Expression Plasmid Vector	PHLAP9259726	Plasmid vector containing HLA-B*08:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:61 protein. This plasmid can be used for constructing HLA-B*08:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:62 Protein Expression Plasmid Vector	PHLAP9259727	Plasmid vector containing HLA-B*08:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:62 protein. This plasmid can be used for constructing HLA-B*08:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:63 Protein Expression Plasmid Vector	PHLAP9259728	Plasmid vector containing HLA-B*08:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:63 protein. This plasmid can be used for constructing HLA-B*08:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:64 Protein Expression Plasmid Vector	PHLAP9259729	Plasmid vector containing HLA-B*08:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:64 protein. This plasmid can be used for constructing HLA-B*08:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:65 Protein Expression Plasmid Vector	PHLAP9259730	Plasmid vector containing HLA-B*08:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:65 protein. This plasmid can be used for constructing HLA-B*08:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:66 Protein Expression Plasmid Vector	PHLAP9259731	Plasmid vector containing HLA-B*08:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:66 protein. This plasmid can be used for constructing HLA-B*08:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:67 Protein Expression Plasmid Vector	PHLAP9259732	Plasmid vector containing HLA-B*08:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:67 protein. This plasmid can be used for constructing HLA-B*08:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:68 Protein Expression Plasmid Vector	PHLAP9259733	Plasmid vector containing HLA-B*08:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:68 protein. This plasmid can be used for constructing HLA-B*08:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:69 Protein Expression Plasmid Vector	PHLAP9259734	Plasmid vector containing HLA-B*08:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:69 protein. This plasmid can be used for constructing HLA-B*08:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:70 Protein Expression Plasmid Vector	PHLAP9259735	Plasmid vector containing HLA-B*08:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:70 protein. This plasmid can be used for constructing HLA-B*08:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:71 Protein Expression Plasmid Vector	PHLAP9259736	Plasmid vector containing HLA-B*08:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:71 protein. This plasmid can be used for constructing HLA-B*08:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:72 Protein Expression Plasmid Vector	PHLAP9259737	Plasmid vector containing HLA-B*08:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:72 protein. This plasmid can be used for constructing HLA-B*08:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:73 Protein Expression Plasmid Vector	PHLAP9259738	Plasmid vector containing HLA-B*08:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:73 protein. This plasmid can be used for constructing HLA-B*08:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:74 Protein Expression Plasmid Vector	PHLAP9259739	Plasmid vector containing HLA-B*08:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:74 protein. This plasmid can be used for constructing HLA-B*08:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:75 Protein Expression Plasmid Vector	PHLAP9259740	Plasmid vector containing HLA-B*08:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:75 protein. This plasmid can be used for constructing HLA-B*08:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:76 Protein Expression Plasmid Vector	PHLAP9259741	Plasmid vector containing HLA-B*08:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:76 protein. This plasmid can be used for constructing HLA-B*08:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:77 Protein Expression Plasmid Vector	PHLAP9259742	Plasmid vector containing HLA-B*08:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:77 protein. This plasmid can be used for constructing HLA-B*08:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:78 Protein Expression Plasmid Vector	PHLAP9259743	Plasmid vector containing HLA-B*08:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:78 protein. This plasmid can be used for constructing HLA-B*08:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:79 Protein Expression Plasmid Vector	PHLAP9259744	Plasmid vector containing HLA-B*08:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:79 protein. This plasmid can be used for constructing HLA-B*08:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:80 Protein Expression Plasmid Vector	PHLAP9259745	Plasmid vector containing HLA-B*08:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:80 protein. This plasmid can be used for constructing HLA-B*08:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:01:81 Protein Expression Plasmid Vector	PHLAP9259746	Plasmid vector containing HLA-B*08:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:81 protein. This plasmid can be used for constructing HLA-B*08:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:01:82 Protein Expression Plasmid Vector	PHLAP9259747	Plasmid vector containing HLA-B*08:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:01:82 protein. This plasmid can be used for constructing HLA-B*08:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:02 Protein Expression Plasmid Vector	PHLAP9259748	Plasmid vector containing HLA-B*08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:02 protein. This plasmid can be used for constructing HLA-B*08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:03 Protein Expression Plasmid Vector	PHLAP9259749	Plasmid vector containing HLA-B*08:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:03 protein. This plasmid can be used for constructing HLA-B*08:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:04:01 Protein Expression Plasmid Vector	PHLAP9259750	Plasmid vector containing HLA-B*08:04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:04:01 protein. This plasmid can be used for constructing HLA-B*08:04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:04:02 Protein Expression Plasmid Vector	PHLAP9259751	Plasmid vector containing HLA-B*08:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:04:02 protein. This plasmid can be used for constructing HLA-B*08:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:05 Protein Expression Plasmid Vector	PHLAP9259752	Plasmid vector containing HLA-B*08:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:05 protein. This plasmid can be used for constructing HLA-B*08:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:06 Protein Expression Plasmid Vector	PHLAP9259753	Plasmid vector containing HLA-B*08:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:06 protein. This plasmid can be used for constructing HLA-B*08:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:07 Protein Expression Plasmid Vector	PHLAP9259754	Plasmid vector containing HLA-B*08:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:07 protein. This plasmid can be used for constructing HLA-B*08:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:08N Protein Expression Plasmid Vector	PHLAP9259755	Plasmid vector containing HLA-B*08:08N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:08N protein. This plasmid can be used for constructing HLA-B*08:08N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:08N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:09 Protein Expression Plasmid Vector	PHLAP9259756	Plasmid vector containing HLA-B*08:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:09 protein. This plasmid can be used for constructing HLA-B*08:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:10 Protein Expression Plasmid Vector	PHLAP9259757	Plasmid vector containing HLA-B*08:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:10 protein. This plasmid can be used for constructing HLA-B*08:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:100 Protein Expression Plasmid Vector	PHLAP9259758	Plasmid vector containing HLA-B*08:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:100 protein. This plasmid can be used for constructing HLA-B*08:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:101 Protein Expression Plasmid Vector	PHLAP9259759	Plasmid vector containing HLA-B*08:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:101 protein. This plasmid can be used for constructing HLA-B*08:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:102 Protein Expression Plasmid Vector	PHLAP9259760	Plasmid vector containing HLA-B*08:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:102 protein. This plasmid can be used for constructing HLA-B*08:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:103 Protein Expression Plasmid Vector	PHLAP9259761	Plasmid vector containing HLA-B*08:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:103 protein. This plasmid can be used for constructing HLA-B*08:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:104 Protein Expression Plasmid Vector	PHLAP9259762	Plasmid vector containing HLA-B*08:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:104 protein. This plasmid can be used for constructing HLA-B*08:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:105 Protein Expression Plasmid Vector	PHLAP9259763	Plasmid vector containing HLA-B*08:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:105 protein. This plasmid can be used for constructing HLA-B*08:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:106 Protein Expression Plasmid Vector	PHLAP9259764	Plasmid vector containing HLA-B*08:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:106 protein. This plasmid can be used for constructing HLA-B*08:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:107 Protein Expression Plasmid Vector	PHLAP9259765	Plasmid vector containing HLA-B*08:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:107 protein. This plasmid can be used for constructing HLA-B*08:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:108 Protein Expression Plasmid Vector	PHLAP9259766	Plasmid vector containing HLA-B*08:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:108 protein. This plasmid can be used for constructing HLA-B*08:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:109 Protein Expression Plasmid Vector	PHLAP9259767	Plasmid vector containing HLA-B*08:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:109 protein. This plasmid can be used for constructing HLA-B*08:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:11 Protein Expression Plasmid Vector	PHLAP9259768	Plasmid vector containing HLA-B*08:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:11 protein. This plasmid can be used for constructing HLA-B*08:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:110 Protein Expression Plasmid Vector	PHLAP9259769	Plasmid vector containing HLA-B*08:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:110 protein. This plasmid can be used for constructing HLA-B*08:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:111:01 Protein Expression Plasmid Vector	PHLAP9259770	Plasmid vector containing HLA-B*08:111:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:111:01 protein. This plasmid can be used for constructing HLA-B*08:111:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:111:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:111:02 Protein Expression Plasmid Vector	PHLAP9259771	Plasmid vector containing HLA-B*08:111:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:111:02 protein. This plasmid can be used for constructing HLA-B*08:111:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:111:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:112 Protein Expression Plasmid Vector	PHLAP9259772	Plasmid vector containing HLA-B*08:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:112 protein. This plasmid can be used for constructing HLA-B*08:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:113 Protein Expression Plasmid Vector	PHLAP9259773	Plasmid vector containing HLA-B*08:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:113 protein. This plasmid can be used for constructing HLA-B*08:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:114 Protein Expression Plasmid Vector	PHLAP9259774	Plasmid vector containing HLA-B*08:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:114 protein. This plasmid can be used for constructing HLA-B*08:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:115 Protein Expression Plasmid Vector	PHLAP9259775	Plasmid vector containing HLA-B*08:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:115 protein. This plasmid can be used for constructing HLA-B*08:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:116 Protein Expression Plasmid Vector	PHLAP9259776	Plasmid vector containing HLA-B*08:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:116 protein. This plasmid can be used for constructing HLA-B*08:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:117 Protein Expression Plasmid Vector	PHLAP9259777	Plasmid vector containing HLA-B*08:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:117 protein. This plasmid can be used for constructing HLA-B*08:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:118 Protein Expression Plasmid Vector	PHLAP9259778	Plasmid vector containing HLA-B*08:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:118 protein. This plasmid can be used for constructing HLA-B*08:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:119 Protein Expression Plasmid Vector	PHLAP9259779	Plasmid vector containing HLA-B*08:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:119 protein. This plasmid can be used for constructing HLA-B*08:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:12:01 Protein Expression Plasmid Vector	PHLAP9259780	Plasmid vector containing HLA-B*08:12:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:12:01 protein. This plasmid can be used for constructing HLA-B*08:12:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:12:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:12:02 Protein Expression Plasmid Vector	PHLAP9259781	Plasmid vector containing HLA-B*08:12:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:12:02 protein. This plasmid can be used for constructing HLA-B*08:12:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:12:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:12:03 Protein Expression Plasmid Vector	PHLAP9259782	Plasmid vector containing HLA-B*08:12:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:12:03 protein. This plasmid can be used for constructing HLA-B*08:12:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:12:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:120 Protein Expression Plasmid Vector	PHLAP9259783	Plasmid vector containing HLA-B*08:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:120 protein. This plasmid can be used for constructing HLA-B*08:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:121 Protein Expression Plasmid Vector	PHLAP9259784	Plasmid vector containing HLA-B*08:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:121 protein. This plasmid can be used for constructing HLA-B*08:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:122 Protein Expression Plasmid Vector	PHLAP9259785	Plasmid vector containing HLA-B*08:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:122 protein. This plasmid can be used for constructing HLA-B*08:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:123 Protein Expression Plasmid Vector	PHLAP9259786	Plasmid vector containing HLA-B*08:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:123 protein. This plasmid can be used for constructing HLA-B*08:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:124 Protein Expression Plasmid Vector	PHLAP9259787	Plasmid vector containing HLA-B*08:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:124 protein. This plasmid can be used for constructing HLA-B*08:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:125 Protein Expression Plasmid Vector	PHLAP9259788	Plasmid vector containing HLA-B*08:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:125 protein. This plasmid can be used for constructing HLA-B*08:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:126 Protein Expression Plasmid Vector	PHLAP9259789	Plasmid vector containing HLA-B*08:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:126 protein. This plasmid can be used for constructing HLA-B*08:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:127 Protein Expression Plasmid Vector	PHLAP9259790	Plasmid vector containing HLA-B*08:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:127 protein. This plasmid can be used for constructing HLA-B*08:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:128 Protein Expression Plasmid Vector	PHLAP9259791	Plasmid vector containing HLA-B*08:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:128 protein. This plasmid can be used for constructing HLA-B*08:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:129 Protein Expression Plasmid Vector	PHLAP9259792	Plasmid vector containing HLA-B*08:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:129 protein. This plasmid can be used for constructing HLA-B*08:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:13 Protein Expression Plasmid Vector	PHLAP9259793	Plasmid vector containing HLA-B*08:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:13 protein. This plasmid can be used for constructing HLA-B*08:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:130 Protein Expression Plasmid Vector	PHLAP9259794	Plasmid vector containing HLA-B*08:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:130 protein. This plasmid can be used for constructing HLA-B*08:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:131 Protein Expression Plasmid Vector	PHLAP9259795	Plasmid vector containing HLA-B*08:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:131 protein. This plasmid can be used for constructing HLA-B*08:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:132 Protein Expression Plasmid Vector	PHLAP9259796	Plasmid vector containing HLA-B*08:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:132 protein. This plasmid can be used for constructing HLA-B*08:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:133 Protein Expression Plasmid Vector	PHLAP9259797	Plasmid vector containing HLA-B*08:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:133 protein. This plasmid can be used for constructing HLA-B*08:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:134 Protein Expression Plasmid Vector	PHLAP9259798	Plasmid vector containing HLA-B*08:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:134 protein. This plasmid can be used for constructing HLA-B*08:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:135 Protein Expression Plasmid Vector	PHLAP9259799	Plasmid vector containing HLA-B*08:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:135 protein. This plasmid can be used for constructing HLA-B*08:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:136 Protein Expression Plasmid Vector	PHLAP9259800	Plasmid vector containing HLA-B*08:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:136 protein. This plasmid can be used for constructing HLA-B*08:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:137 Protein Expression Plasmid Vector	PHLAP9259801	Plasmid vector containing HLA-B*08:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:137 protein. This plasmid can be used for constructing HLA-B*08:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:138 Protein Expression Plasmid Vector	PHLAP9259802	Plasmid vector containing HLA-B*08:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:138 protein. This plasmid can be used for constructing HLA-B*08:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:139 Protein Expression Plasmid Vector	PHLAP9259803	Plasmid vector containing HLA-B*08:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:139 protein. This plasmid can be used for constructing HLA-B*08:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:14 Protein Expression Plasmid Vector	PHLAP9259804	Plasmid vector containing HLA-B*08:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:14 protein. This plasmid can be used for constructing HLA-B*08:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:140 Protein Expression Plasmid Vector	PHLAP9259805	Plasmid vector containing HLA-B*08:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:140 protein. This plasmid can be used for constructing HLA-B*08:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:141 Protein Expression Plasmid Vector	PHLAP9259806	Plasmid vector containing HLA-B*08:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:141 protein. This plasmid can be used for constructing HLA-B*08:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:142 Protein Expression Plasmid Vector	PHLAP9259807	Plasmid vector containing HLA-B*08:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:142 protein. This plasmid can be used for constructing HLA-B*08:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:143 Protein Expression Plasmid Vector	PHLAP9259808	Plasmid vector containing HLA-B*08:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:143 protein. This plasmid can be used for constructing HLA-B*08:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:144 Protein Expression Plasmid Vector	PHLAP9259809	Plasmid vector containing HLA-B*08:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:144 protein. This plasmid can be used for constructing HLA-B*08:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:145 Protein Expression Plasmid Vector	PHLAP9259810	Plasmid vector containing HLA-B*08:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:145 protein. This plasmid can be used for constructing HLA-B*08:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:146 Protein Expression Plasmid Vector	PHLAP9259811	Plasmid vector containing HLA-B*08:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:146 protein. This plasmid can be used for constructing HLA-B*08:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:147 Protein Expression Plasmid Vector	PHLAP9259812	Plasmid vector containing HLA-B*08:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:147 protein. This plasmid can be used for constructing HLA-B*08:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:148N Protein Expression Plasmid Vector	PHLAP9259813	Plasmid vector containing HLA-B*08:148N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:148N protein. This plasmid can be used for constructing HLA-B*08:148N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:148N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:149 Protein Expression Plasmid Vector	PHLAP9259814	Plasmid vector containing HLA-B*08:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:149 protein. This plasmid can be used for constructing HLA-B*08:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:15 Protein Expression Plasmid Vector	PHLAP9259815	Plasmid vector containing HLA-B*08:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:15 protein. This plasmid can be used for constructing HLA-B*08:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:150 Protein Expression Plasmid Vector	PHLAP9259816	Plasmid vector containing HLA-B*08:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:150 protein. This plasmid can be used for constructing HLA-B*08:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:151 Protein Expression Plasmid Vector	PHLAP9259817	Plasmid vector containing HLA-B*08:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:151 protein. This plasmid can be used for constructing HLA-B*08:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:152 Protein Expression Plasmid Vector	PHLAP9259818	Plasmid vector containing HLA-B*08:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:152 protein. This plasmid can be used for constructing HLA-B*08:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:153 Protein Expression Plasmid Vector	PHLAP9259819	Plasmid vector containing HLA-B*08:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:153 protein. This plasmid can be used for constructing HLA-B*08:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:154 Protein Expression Plasmid Vector	PHLAP9259820	Plasmid vector containing HLA-B*08:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:154 protein. This plasmid can be used for constructing HLA-B*08:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:155 Protein Expression Plasmid Vector	PHLAP9259821	Plasmid vector containing HLA-B*08:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:155 protein. This plasmid can be used for constructing HLA-B*08:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:156 Protein Expression Plasmid Vector	PHLAP9259822	Plasmid vector containing HLA-B*08:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:156 protein. This plasmid can be used for constructing HLA-B*08:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:157 Protein Expression Plasmid Vector	PHLAP9259823	Plasmid vector containing HLA-B*08:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:157 protein. This plasmid can be used for constructing HLA-B*08:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:158 Protein Expression Plasmid Vector	PHLAP9259824	Plasmid vector containing HLA-B*08:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:158 protein. This plasmid can be used for constructing HLA-B*08:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:159 Protein Expression Plasmid Vector	PHLAP9259825	Plasmid vector containing HLA-B*08:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:159 protein. This plasmid can be used for constructing HLA-B*08:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:16 Protein Expression Plasmid Vector	PHLAP9259826	Plasmid vector containing HLA-B*08:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:16 protein. This plasmid can be used for constructing HLA-B*08:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:160 Protein Expression Plasmid Vector	PHLAP9259827	Plasmid vector containing HLA-B*08:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:160 protein. This plasmid can be used for constructing HLA-B*08:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:161 Protein Expression Plasmid Vector	PHLAP9259828	Plasmid vector containing HLA-B*08:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:161 protein. This plasmid can be used for constructing HLA-B*08:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:162 Protein Expression Plasmid Vector	PHLAP9259829	Plasmid vector containing HLA-B*08:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:162 protein. This plasmid can be used for constructing HLA-B*08:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:163 Protein Expression Plasmid Vector	PHLAP9259830	Plasmid vector containing HLA-B*08:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:163 protein. This plasmid can be used for constructing HLA-B*08:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:164 Protein Expression Plasmid Vector	PHLAP9259831	Plasmid vector containing HLA-B*08:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:164 protein. This plasmid can be used for constructing HLA-B*08:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:165 Protein Expression Plasmid Vector	PHLAP9259832	Plasmid vector containing HLA-B*08:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:165 protein. This plasmid can be used for constructing HLA-B*08:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:166 Protein Expression Plasmid Vector	PHLAP9259833	Plasmid vector containing HLA-B*08:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:166 protein. This plasmid can be used for constructing HLA-B*08:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:167 Protein Expression Plasmid Vector	PHLAP9259834	Plasmid vector containing HLA-B*08:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:167 protein. This plasmid can be used for constructing HLA-B*08:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:168 Protein Expression Plasmid Vector	PHLAP9259835	Plasmid vector containing HLA-B*08:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:168 protein. This plasmid can be used for constructing HLA-B*08:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:169 Protein Expression Plasmid Vector	PHLAP9259836	Plasmid vector containing HLA-B*08:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:169 protein. This plasmid can be used for constructing HLA-B*08:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:17 Protein Expression Plasmid Vector	PHLAP9259837	Plasmid vector containing HLA-B*08:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:17 protein. This plasmid can be used for constructing HLA-B*08:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:170 Protein Expression Plasmid Vector	PHLAP9259838	Plasmid vector containing HLA-B*08:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:170 protein. This plasmid can be used for constructing HLA-B*08:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:171 Protein Expression Plasmid Vector	PHLAP9259839	Plasmid vector containing HLA-B*08:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:171 protein. This plasmid can be used for constructing HLA-B*08:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:172 Protein Expression Plasmid Vector	PHLAP9259840	Plasmid vector containing HLA-B*08:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:172 protein. This plasmid can be used for constructing HLA-B*08:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:173 Protein Expression Plasmid Vector	PHLAP9259841	Plasmid vector containing HLA-B*08:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:173 protein. This plasmid can be used for constructing HLA-B*08:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:174 Protein Expression Plasmid Vector	PHLAP9259842	Plasmid vector containing HLA-B*08:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:174 protein. This plasmid can be used for constructing HLA-B*08:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:175 Protein Expression Plasmid Vector	PHLAP9259843	Plasmid vector containing HLA-B*08:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:175 protein. This plasmid can be used for constructing HLA-B*08:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:176 Protein Expression Plasmid Vector	PHLAP9259844	Plasmid vector containing HLA-B*08:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:176 protein. This plasmid can be used for constructing HLA-B*08:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:177 Protein Expression Plasmid Vector	PHLAP9259845	Plasmid vector containing HLA-B*08:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:177 protein. This plasmid can be used for constructing HLA-B*08:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:178 Protein Expression Plasmid Vector	PHLAP9259846	Plasmid vector containing HLA-B*08:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:178 protein. This plasmid can be used for constructing HLA-B*08:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:179 Protein Expression Plasmid Vector	PHLAP9259847	Plasmid vector containing HLA-B*08:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:179 protein. This plasmid can be used for constructing HLA-B*08:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:18 Protein Expression Plasmid Vector	PHLAP9259848	Plasmid vector containing HLA-B*08:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:18 protein. This plasmid can be used for constructing HLA-B*08:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:180 Protein Expression Plasmid Vector	PHLAP9259849	Plasmid vector containing HLA-B*08:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:180 protein. This plasmid can be used for constructing HLA-B*08:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:181 Protein Expression Plasmid Vector	PHLAP9259850	Plasmid vector containing HLA-B*08:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:181 protein. This plasmid can be used for constructing HLA-B*08:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:182 Protein Expression Plasmid Vector	PHLAP9259851	Plasmid vector containing HLA-B*08:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:182 protein. This plasmid can be used for constructing HLA-B*08:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:183 Protein Expression Plasmid Vector	PHLAP9259852	Plasmid vector containing HLA-B*08:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:183 protein. This plasmid can be used for constructing HLA-B*08:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:184 Protein Expression Plasmid Vector	PHLAP9259853	Plasmid vector containing HLA-B*08:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:184 protein. This plasmid can be used for constructing HLA-B*08:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:185 Protein Expression Plasmid Vector	PHLAP9259854	Plasmid vector containing HLA-B*08:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:185 protein. This plasmid can be used for constructing HLA-B*08:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:186 Protein Expression Plasmid Vector	PHLAP9259855	Plasmid vector containing HLA-B*08:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:186 protein. This plasmid can be used for constructing HLA-B*08:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:187 Protein Expression Plasmid Vector	PHLAP9259856	Plasmid vector containing HLA-B*08:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:187 protein. This plasmid can be used for constructing HLA-B*08:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:188 Protein Expression Plasmid Vector	PHLAP9259857	Plasmid vector containing HLA-B*08:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:188 protein. This plasmid can be used for constructing HLA-B*08:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:189:01 Protein Expression Plasmid Vector	PHLAP9259858	Plasmid vector containing HLA-B*08:189:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:189:01 protein. This plasmid can be used for constructing HLA-B*08:189:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:189:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:189:02 Protein Expression Plasmid Vector	PHLAP9259859	Plasmid vector containing HLA-B*08:189:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:189:02 protein. This plasmid can be used for constructing HLA-B*08:189:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:189:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:190 Protein Expression Plasmid Vector	PHLAP9259860	Plasmid vector containing HLA-B*08:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:190 protein. This plasmid can be used for constructing HLA-B*08:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:191 Protein Expression Plasmid Vector	PHLAP9259861	Plasmid vector containing HLA-B*08:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:191 protein. This plasmid can be used for constructing HLA-B*08:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:192 Protein Expression Plasmid Vector	PHLAP9259862	Plasmid vector containing HLA-B*08:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:192 protein. This plasmid can be used for constructing HLA-B*08:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:193 Protein Expression Plasmid Vector	PHLAP9259863	Plasmid vector containing HLA-B*08:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:193 protein. This plasmid can be used for constructing HLA-B*08:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:194 Protein Expression Plasmid Vector	PHLAP9259864	Plasmid vector containing HLA-B*08:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:194 protein. This plasmid can be used for constructing HLA-B*08:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:195 Protein Expression Plasmid Vector	PHLAP9259865	Plasmid vector containing HLA-B*08:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:195 protein. This plasmid can be used for constructing HLA-B*08:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:196 Protein Expression Plasmid Vector	PHLAP9259866	Plasmid vector containing HLA-B*08:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:196 protein. This plasmid can be used for constructing HLA-B*08:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:197 Protein Expression Plasmid Vector	PHLAP9259867	Plasmid vector containing HLA-B*08:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:197 protein. This plasmid can be used for constructing HLA-B*08:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:198 Protein Expression Plasmid Vector	PHLAP9259868	Plasmid vector containing HLA-B*08:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:198 protein. This plasmid can be used for constructing HLA-B*08:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:199 Protein Expression Plasmid Vector	PHLAP9259869	Plasmid vector containing HLA-B*08:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:199 protein. This plasmid can be used for constructing HLA-B*08:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:19N Protein Expression Plasmid Vector	PHLAP9259870	Plasmid vector containing HLA-B*08:19N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:19N protein. This plasmid can be used for constructing HLA-B*08:19N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:19N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:20:01 Protein Expression Plasmid Vector	PHLAP9259871	Plasmid vector containing HLA-B*08:20:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:20:01 protein. This plasmid can be used for constructing HLA-B*08:20:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:20:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:20:02 Protein Expression Plasmid Vector	PHLAP9259872	Plasmid vector containing HLA-B*08:20:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:20:02 protein. This plasmid can be used for constructing HLA-B*08:20:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:20:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:200 Protein Expression Plasmid Vector	PHLAP9259873	Plasmid vector containing HLA-B*08:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:200 protein. This plasmid can be used for constructing HLA-B*08:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:201 Protein Expression Plasmid Vector	PHLAP9259874	Plasmid vector containing HLA-B*08:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:201 protein. This plasmid can be used for constructing HLA-B*08:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:202 Protein Expression Plasmid Vector	PHLAP9259875	Plasmid vector containing HLA-B*08:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:202 protein. This plasmid can be used for constructing HLA-B*08:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:203 Protein Expression Plasmid Vector	PHLAP9259876	Plasmid vector containing HLA-B*08:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:203 protein. This plasmid can be used for constructing HLA-B*08:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:204 Protein Expression Plasmid Vector	PHLAP9259877	Plasmid vector containing HLA-B*08:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:204 protein. This plasmid can be used for constructing HLA-B*08:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:205 Protein Expression Plasmid Vector	PHLAP9259878	Plasmid vector containing HLA-B*08:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:205 protein. This plasmid can be used for constructing HLA-B*08:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:206 Protein Expression Plasmid Vector	PHLAP9259879	Plasmid vector containing HLA-B*08:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:206 protein. This plasmid can be used for constructing HLA-B*08:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:207 Protein Expression Plasmid Vector	PHLAP9259880	Plasmid vector containing HLA-B*08:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:207 protein. This plasmid can be used for constructing HLA-B*08:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:208 Protein Expression Plasmid Vector	PHLAP9259881	Plasmid vector containing HLA-B*08:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:208 protein. This plasmid can be used for constructing HLA-B*08:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:209 Protein Expression Plasmid Vector	PHLAP9259882	Plasmid vector containing HLA-B*08:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:209 protein. This plasmid can be used for constructing HLA-B*08:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:21 Protein Expression Plasmid Vector	PHLAP9259883	Plasmid vector containing HLA-B*08:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:21 protein. This plasmid can be used for constructing HLA-B*08:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:210 Protein Expression Plasmid Vector	PHLAP9259884	Plasmid vector containing HLA-B*08:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:210 protein. This plasmid can be used for constructing HLA-B*08:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:211 Protein Expression Plasmid Vector	PHLAP9259885	Plasmid vector containing HLA-B*08:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:211 protein. This plasmid can be used for constructing HLA-B*08:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:212 Protein Expression Plasmid Vector	PHLAP9259886	Plasmid vector containing HLA-B*08:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:212 protein. This plasmid can be used for constructing HLA-B*08:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:213:01 Protein Expression Plasmid Vector	PHLAP9259887	Plasmid vector containing HLA-B*08:213:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:213:01 protein. This plasmid can be used for constructing HLA-B*08:213:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:213:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:213:02 Protein Expression Plasmid Vector	PHLAP9259888	Plasmid vector containing HLA-B*08:213:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:213:02 protein. This plasmid can be used for constructing HLA-B*08:213:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:213:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:214N Protein Expression Plasmid Vector	PHLAP9259889	Plasmid vector containing HLA-B*08:214N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:214N protein. This plasmid can be used for constructing HLA-B*08:214N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:214N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:215N Protein Expression Plasmid Vector	PHLAP9259890	Plasmid vector containing HLA-B*08:215N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:215N protein. This plasmid can be used for constructing HLA-B*08:215N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:215N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:216 Protein Expression Plasmid Vector	PHLAP9259891	Plasmid vector containing HLA-B*08:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:216 protein. This plasmid can be used for constructing HLA-B*08:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:217 Protein Expression Plasmid Vector	PHLAP9259892	Plasmid vector containing HLA-B*08:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:217 protein. This plasmid can be used for constructing HLA-B*08:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:218 Protein Expression Plasmid Vector	PHLAP9259893	Plasmid vector containing HLA-B*08:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:218 protein. This plasmid can be used for constructing HLA-B*08:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:219 Protein Expression Plasmid Vector	PHLAP9259894	Plasmid vector containing HLA-B*08:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:219 protein. This plasmid can be used for constructing HLA-B*08:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:22 Protein Expression Plasmid Vector	PHLAP9259895	Plasmid vector containing HLA-B*08:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:22 protein. This plasmid can be used for constructing HLA-B*08:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:220N Protein Expression Plasmid Vector	PHLAP9259896	Plasmid vector containing HLA-B*08:220N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:220N protein. This plasmid can be used for constructing HLA-B*08:220N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:220N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:221 Protein Expression Plasmid Vector	PHLAP9259897	Plasmid vector containing HLA-B*08:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:221 protein. This plasmid can be used for constructing HLA-B*08:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:222 Protein Expression Plasmid Vector	PHLAP9259898	Plasmid vector containing HLA-B*08:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:222 protein. This plasmid can be used for constructing HLA-B*08:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:223 Protein Expression Plasmid Vector	PHLAP9259899	Plasmid vector containing HLA-B*08:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:223 protein. This plasmid can be used for constructing HLA-B*08:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:224 Protein Expression Plasmid Vector	PHLAP9259900	Plasmid vector containing HLA-B*08:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:224 protein. This plasmid can be used for constructing HLA-B*08:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:225 Protein Expression Plasmid Vector	PHLAP9259901	Plasmid vector containing HLA-B*08:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:225 protein. This plasmid can be used for constructing HLA-B*08:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:226 Protein Expression Plasmid Vector	PHLAP9259902	Plasmid vector containing HLA-B*08:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:226 protein. This plasmid can be used for constructing HLA-B*08:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:227 Protein Expression Plasmid Vector	PHLAP9259903	Plasmid vector containing HLA-B*08:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:227 protein. This plasmid can be used for constructing HLA-B*08:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:228 Protein Expression Plasmid Vector	PHLAP9259904	Plasmid vector containing HLA-B*08:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:228 protein. This plasmid can be used for constructing HLA-B*08:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:229 Protein Expression Plasmid Vector	PHLAP9259905	Plasmid vector containing HLA-B*08:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:229 protein. This plasmid can be used for constructing HLA-B*08:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:23 Protein Expression Plasmid Vector	PHLAP9259906	Plasmid vector containing HLA-B*08:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:23 protein. This plasmid can be used for constructing HLA-B*08:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:230 Protein Expression Plasmid Vector	PHLAP9259907	Plasmid vector containing HLA-B*08:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:230 protein. This plasmid can be used for constructing HLA-B*08:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:231 Protein Expression Plasmid Vector	PHLAP9259908	Plasmid vector containing HLA-B*08:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:231 protein. This plasmid can be used for constructing HLA-B*08:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:232 Protein Expression Plasmid Vector	PHLAP9259909	Plasmid vector containing HLA-B*08:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:232 protein. This plasmid can be used for constructing HLA-B*08:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:233 Protein Expression Plasmid Vector	PHLAP9259910	Plasmid vector containing HLA-B*08:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:233 protein. This plasmid can be used for constructing HLA-B*08:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:234 Protein Expression Plasmid Vector	PHLAP9259911	Plasmid vector containing HLA-B*08:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:234 protein. This plasmid can be used for constructing HLA-B*08:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:235 Protein Expression Plasmid Vector	PHLAP9259912	Plasmid vector containing HLA-B*08:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:235 protein. This plasmid can be used for constructing HLA-B*08:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:236N Protein Expression Plasmid Vector	PHLAP9259913	Plasmid vector containing HLA-B*08:236N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:236N protein. This plasmid can be used for constructing HLA-B*08:236N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:236N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:237 Protein Expression Plasmid Vector	PHLAP9259914	Plasmid vector containing HLA-B*08:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:237 protein. This plasmid can be used for constructing HLA-B*08:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:238 Protein Expression Plasmid Vector	PHLAP9259915	Plasmid vector containing HLA-B*08:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:238 protein. This plasmid can be used for constructing HLA-B*08:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:239 Protein Expression Plasmid Vector	PHLAP9259916	Plasmid vector containing HLA-B*08:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:239 protein. This plasmid can be used for constructing HLA-B*08:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:24 Protein Expression Plasmid Vector	PHLAP9259917	Plasmid vector containing HLA-B*08:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:24 protein. This plasmid can be used for constructing HLA-B*08:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:240 Protein Expression Plasmid Vector	PHLAP9259918	Plasmid vector containing HLA-B*08:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:240 protein. This plasmid can be used for constructing HLA-B*08:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:242 Protein Expression Plasmid Vector	PHLAP9259919	Plasmid vector containing HLA-B*08:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:242 protein. This plasmid can be used for constructing HLA-B*08:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:243 Protein Expression Plasmid Vector	PHLAP9259920	Plasmid vector containing HLA-B*08:243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:243 protein. This plasmid can be used for constructing HLA-B*08:243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:244 Protein Expression Plasmid Vector	PHLAP9259921	Plasmid vector containing HLA-B*08:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:244 protein. This plasmid can be used for constructing HLA-B*08:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:245 Protein Expression Plasmid Vector	PHLAP9259922	Plasmid vector containing HLA-B*08:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:245 protein. This plasmid can be used for constructing HLA-B*08:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:246 Protein Expression Plasmid Vector	PHLAP9259923	Plasmid vector containing HLA-B*08:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:246 protein. This plasmid can be used for constructing HLA-B*08:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:247 Protein Expression Plasmid Vector	PHLAP9259924	Plasmid vector containing HLA-B*08:247 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:247 protein. This plasmid can be used for constructing HLA-B*08:247 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:247 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:248 Protein Expression Plasmid Vector	PHLAP9259925	Plasmid vector containing HLA-B*08:248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:248 protein. This plasmid can be used for constructing HLA-B*08:248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:249 Protein Expression Plasmid Vector	PHLAP9259926	Plasmid vector containing HLA-B*08:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:249 protein. This plasmid can be used for constructing HLA-B*08:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:25 Protein Expression Plasmid Vector	PHLAP9259927	Plasmid vector containing HLA-B*08:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:25 protein. This plasmid can be used for constructing HLA-B*08:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:250 Protein Expression Plasmid Vector	PHLAP9259928	Plasmid vector containing HLA-B*08:250 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:250 protein. This plasmid can be used for constructing HLA-B*08:250 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:250 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:251 Protein Expression Plasmid Vector	PHLAP9259929	Plasmid vector containing HLA-B*08:251 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:251 protein. This plasmid can be used for constructing HLA-B*08:251 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:251 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:252N Protein Expression Plasmid Vector	PHLAP9259930	Plasmid vector containing HLA-B*08:252N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:252N protein. This plasmid can be used for constructing HLA-B*08:252N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:252N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:253 Protein Expression Plasmid Vector	PHLAP9259931	Plasmid vector containing HLA-B*08:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:253 protein. This plasmid can be used for constructing HLA-B*08:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:254 Protein Expression Plasmid Vector	PHLAP9259932	Plasmid vector containing HLA-B*08:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:254 protein. This plasmid can be used for constructing HLA-B*08:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:255 Protein Expression Plasmid Vector	PHLAP9259933	Plasmid vector containing HLA-B*08:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:255 protein. This plasmid can be used for constructing HLA-B*08:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:256 Protein Expression Plasmid Vector	PHLAP9259934	Plasmid vector containing HLA-B*08:256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:256 protein. This plasmid can be used for constructing HLA-B*08:256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:257 Protein Expression Plasmid Vector	PHLAP9259935	Plasmid vector containing HLA-B*08:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:257 protein. This plasmid can be used for constructing HLA-B*08:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:258 Protein Expression Plasmid Vector	PHLAP9259936	Plasmid vector containing HLA-B*08:258 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:258 protein. This plasmid can be used for constructing HLA-B*08:258 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:258 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:259 Protein Expression Plasmid Vector	PHLAP9259937	Plasmid vector containing HLA-B*08:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:259 protein. This plasmid can be used for constructing HLA-B*08:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:26:01 Protein Expression Plasmid Vector	PHLAP9259938	Plasmid vector containing HLA-B*08:26:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:26:01 protein. This plasmid can be used for constructing HLA-B*08:26:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:26:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:26:02 Protein Expression Plasmid Vector	PHLAP9259939	Plasmid vector containing HLA-B*08:26:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:26:02 protein. This plasmid can be used for constructing HLA-B*08:26:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:26:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:26:03 Protein Expression Plasmid Vector	PHLAP9259940	Plasmid vector containing HLA-B*08:26:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:26:03 protein. This plasmid can be used for constructing HLA-B*08:26:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:26:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:260 Protein Expression Plasmid Vector	PHLAP9259941	Plasmid vector containing HLA-B*08:260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:260 protein. This plasmid can be used for constructing HLA-B*08:260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:261 Protein Expression Plasmid Vector	PHLAP9259942	Plasmid vector containing HLA-B*08:261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:261 protein. This plasmid can be used for constructing HLA-B*08:261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:262 Protein Expression Plasmid Vector	PHLAP9259943	Plasmid vector containing HLA-B*08:262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:262 protein. This plasmid can be used for constructing HLA-B*08:262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:263 Protein Expression Plasmid Vector	PHLAP9259944	Plasmid vector containing HLA-B*08:263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:263 protein. This plasmid can be used for constructing HLA-B*08:263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:264 Protein Expression Plasmid Vector	PHLAP9259945	Plasmid vector containing HLA-B*08:264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:264 protein. This plasmid can be used for constructing HLA-B*08:264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:265 Protein Expression Plasmid Vector	PHLAP9259946	Plasmid vector containing HLA-B*08:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:265 protein. This plasmid can be used for constructing HLA-B*08:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:266 Protein Expression Plasmid Vector	PHLAP9259947	Plasmid vector containing HLA-B*08:266 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:266 protein. This plasmid can be used for constructing HLA-B*08:266 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:266 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:267 Protein Expression Plasmid Vector	PHLAP9259948	Plasmid vector containing HLA-B*08:267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:267 protein. This plasmid can be used for constructing HLA-B*08:267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:268 Protein Expression Plasmid Vector	PHLAP9259949	Plasmid vector containing HLA-B*08:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:268 protein. This plasmid can be used for constructing HLA-B*08:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:269 Protein Expression Plasmid Vector	PHLAP9259950	Plasmid vector containing HLA-B*08:269 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:269 protein. This plasmid can be used for constructing HLA-B*08:269 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:269 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:27 Protein Expression Plasmid Vector	PHLAP9259951	Plasmid vector containing HLA-B*08:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:27 protein. This plasmid can be used for constructing HLA-B*08:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:270Q Protein Expression Plasmid Vector	PHLAP9259952	Plasmid vector containing HLA-B*08:270Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:270Q protein. This plasmid can be used for constructing HLA-B*08:270Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:270Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:271 Protein Expression Plasmid Vector	PHLAP9259953	Plasmid vector containing HLA-B*08:271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:271 protein. This plasmid can be used for constructing HLA-B*08:271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:272 Protein Expression Plasmid Vector	PHLAP9259954	Plasmid vector containing HLA-B*08:272 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:272 protein. This plasmid can be used for constructing HLA-B*08:272 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:272 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:273 Protein Expression Plasmid Vector	PHLAP9259955	Plasmid vector containing HLA-B*08:273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:273 protein. This plasmid can be used for constructing HLA-B*08:273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:274 Protein Expression Plasmid Vector	PHLAP9259956	Plasmid vector containing HLA-B*08:274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:274 protein. This plasmid can be used for constructing HLA-B*08:274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:275 Protein Expression Plasmid Vector	PHLAP9259957	Plasmid vector containing HLA-B*08:275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:275 protein. This plasmid can be used for constructing HLA-B*08:275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:276 Protein Expression Plasmid Vector	PHLAP9259958	Plasmid vector containing HLA-B*08:276 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:276 protein. This plasmid can be used for constructing HLA-B*08:276 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:276 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:277 Protein Expression Plasmid Vector	PHLAP9259959	Plasmid vector containing HLA-B*08:277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:277 protein. This plasmid can be used for constructing HLA-B*08:277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:278 Protein Expression Plasmid Vector	PHLAP9259960	Plasmid vector containing HLA-B*08:278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:278 protein. This plasmid can be used for constructing HLA-B*08:278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:279N Protein Expression Plasmid Vector	PHLAP9259961	Plasmid vector containing HLA-B*08:279N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:279N protein. This plasmid can be used for constructing HLA-B*08:279N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:279N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:28 Protein Expression Plasmid Vector	PHLAP9259962	Plasmid vector containing HLA-B*08:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:28 protein. This plasmid can be used for constructing HLA-B*08:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:280 Protein Expression Plasmid Vector	PHLAP9259963	Plasmid vector containing HLA-B*08:280 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:280 protein. This plasmid can be used for constructing HLA-B*08:280 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:280 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:281:01 Protein Expression Plasmid Vector	PHLAP9259964	Plasmid vector containing HLA-B*08:281:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:281:01 protein. This plasmid can be used for constructing HLA-B*08:281:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:281:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:281:02 Protein Expression Plasmid Vector	PHLAP9259965	Plasmid vector containing HLA-B*08:281:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:281:02 protein. This plasmid can be used for constructing HLA-B*08:281:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:281:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:282 Protein Expression Plasmid Vector	PHLAP9259966	Plasmid vector containing HLA-B*08:282 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:282 protein. This plasmid can be used for constructing HLA-B*08:282 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:282 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:283 Protein Expression Plasmid Vector	PHLAP9259967	Plasmid vector containing HLA-B*08:283 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:283 protein. This plasmid can be used for constructing HLA-B*08:283 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:283 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:284Q Protein Expression Plasmid Vector	PHLAP9259968	Plasmid vector containing HLA-B*08:284Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:284Q protein. This plasmid can be used for constructing HLA-B*08:284Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:284Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:285 Protein Expression Plasmid Vector	PHLAP9259969	Plasmid vector containing HLA-B*08:285 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:285 protein. This plasmid can be used for constructing HLA-B*08:285 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:285 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:286 Protein Expression Plasmid Vector	PHLAP9259970	Plasmid vector containing HLA-B*08:286 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:286 protein. This plasmid can be used for constructing HLA-B*08:286 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:286 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:287N Protein Expression Plasmid Vector	PHLAP9259971	Plasmid vector containing HLA-B*08:287N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:287N protein. This plasmid can be used for constructing HLA-B*08:287N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:287N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:288 Protein Expression Plasmid Vector	PHLAP9259972	Plasmid vector containing HLA-B*08:288 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:288 protein. This plasmid can be used for constructing HLA-B*08:288 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:288 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:289 Protein Expression Plasmid Vector	PHLAP9259973	Plasmid vector containing HLA-B*08:289 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:289 protein. This plasmid can be used for constructing HLA-B*08:289 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:289 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:29 Protein Expression Plasmid Vector	PHLAP9259974	Plasmid vector containing HLA-B*08:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:29 protein. This plasmid can be used for constructing HLA-B*08:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:290 Protein Expression Plasmid Vector	PHLAP9259975	Plasmid vector containing HLA-B*08:290 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:290 protein. This plasmid can be used for constructing HLA-B*08:290 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:290 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:291 Protein Expression Plasmid Vector	PHLAP9259976	Plasmid vector containing HLA-B*08:291 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:291 protein. This plasmid can be used for constructing HLA-B*08:291 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:291 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:292 Protein Expression Plasmid Vector	PHLAP9259977	Plasmid vector containing HLA-B*08:292 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:292 protein. This plasmid can be used for constructing HLA-B*08:292 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:292 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:293N Protein Expression Plasmid Vector	PHLAP9259978	Plasmid vector containing HLA-B*08:293N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:293N protein. This plasmid can be used for constructing HLA-B*08:293N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:293N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:294 Protein Expression Plasmid Vector	PHLAP9259979	Plasmid vector containing HLA-B*08:294 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:294 protein. This plasmid can be used for constructing HLA-B*08:294 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:294 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:295 Protein Expression Plasmid Vector	PHLAP9259980	Plasmid vector containing HLA-B*08:295 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:295 protein. This plasmid can be used for constructing HLA-B*08:295 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:295 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:296 Protein Expression Plasmid Vector	PHLAP9259981	Plasmid vector containing HLA-B*08:296 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:296 protein. This plasmid can be used for constructing HLA-B*08:296 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:296 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:297 Protein Expression Plasmid Vector	PHLAP9259982	Plasmid vector containing HLA-B*08:297 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:297 protein. This plasmid can be used for constructing HLA-B*08:297 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:297 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:298 Protein Expression Plasmid Vector	PHLAP9259983	Plasmid vector containing HLA-B*08:298 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:298 protein. This plasmid can be used for constructing HLA-B*08:298 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:298 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:299 Protein Expression Plasmid Vector	PHLAP9259984	Plasmid vector containing HLA-B*08:299 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:299 protein. This plasmid can be used for constructing HLA-B*08:299 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:299 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:300Q Protein Expression Plasmid Vector	PHLAP9259985	Plasmid vector containing HLA-B*08:300Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:300Q protein. This plasmid can be used for constructing HLA-B*08:300Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:300Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:301 Protein Expression Plasmid Vector	PHLAP9259986	Plasmid vector containing HLA-B*08:301 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:301 protein. This plasmid can be used for constructing HLA-B*08:301 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:301 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:302 Protein Expression Plasmid Vector	PHLAP9259987	Plasmid vector containing HLA-B*08:302 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:302 protein. This plasmid can be used for constructing HLA-B*08:302 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:302 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:303 Protein Expression Plasmid Vector	PHLAP9259988	Plasmid vector containing HLA-B*08:303 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:303 protein. This plasmid can be used for constructing HLA-B*08:303 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:303 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:304 Protein Expression Plasmid Vector	PHLAP9259989	Plasmid vector containing HLA-B*08:304 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:304 protein. This plasmid can be used for constructing HLA-B*08:304 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:304 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:305 Protein Expression Plasmid Vector	PHLAP9259990	Plasmid vector containing HLA-B*08:305 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:305 protein. This plasmid can be used for constructing HLA-B*08:305 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:305 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:306 Protein Expression Plasmid Vector	PHLAP9259991	Plasmid vector containing HLA-B*08:306 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:306 protein. This plasmid can be used for constructing HLA-B*08:306 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:306 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:307 Protein Expression Plasmid Vector	PHLAP9259992	Plasmid vector containing HLA-B*08:307 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:307 protein. This plasmid can be used for constructing HLA-B*08:307 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:307 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:308 Protein Expression Plasmid Vector	PHLAP9259993	Plasmid vector containing HLA-B*08:308 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:308 protein. This plasmid can be used for constructing HLA-B*08:308 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:308 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:309 Protein Expression Plasmid Vector	PHLAP9259994	Plasmid vector containing HLA-B*08:309 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:309 protein. This plasmid can be used for constructing HLA-B*08:309 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:309 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:30N Protein Expression Plasmid Vector	PHLAP9259995	Plasmid vector containing HLA-B*08:30N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:30N protein. This plasmid can be used for constructing HLA-B*08:30N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:30N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:31 Protein Expression Plasmid Vector	PHLAP9259996	Plasmid vector containing HLA-B*08:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:31 protein. This plasmid can be used for constructing HLA-B*08:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:310 Protein Expression Plasmid Vector	PHLAP9259997	Plasmid vector containing HLA-B*08:310 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:310 protein. This plasmid can be used for constructing HLA-B*08:310 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:310 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:311 Protein Expression Plasmid Vector	PHLAP9259998	Plasmid vector containing HLA-B*08:311 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:311 protein. This plasmid can be used for constructing HLA-B*08:311 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:311 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:312 Protein Expression Plasmid Vector	PHLAP9259999	Plasmid vector containing HLA-B*08:312 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:312 protein. This plasmid can be used for constructing HLA-B*08:312 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:312 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:313 Protein Expression Plasmid Vector	PHLAP92510000	Plasmid vector containing HLA-B*08:313 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:313 protein. This plasmid can be used for constructing HLA-B*08:313 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:313 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:314 Protein Expression Plasmid Vector	PHLAP92510001	Plasmid vector containing HLA-B*08:314 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:314 protein. This plasmid can be used for constructing HLA-B*08:314 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:314 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:315 Protein Expression Plasmid Vector	PHLAP92510002	Plasmid vector containing HLA-B*08:315 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:315 protein. This plasmid can be used for constructing HLA-B*08:315 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:315 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:316 Protein Expression Plasmid Vector	PHLAP92510003	Plasmid vector containing HLA-B*08:316 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:316 protein. This plasmid can be used for constructing HLA-B*08:316 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:316 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:317 Protein Expression Plasmid Vector	PHLAP92510004	Plasmid vector containing HLA-B*08:317 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:317 protein. This plasmid can be used for constructing HLA-B*08:317 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:317 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:318 Protein Expression Plasmid Vector	PHLAP92510005	Plasmid vector containing HLA-B*08:318 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:318 protein. This plasmid can be used for constructing HLA-B*08:318 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:318 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:319 Protein Expression Plasmid Vector	PHLAP92510006	Plasmid vector containing HLA-B*08:319 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:319 protein. This plasmid can be used for constructing HLA-B*08:319 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:319 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:32 Protein Expression Plasmid Vector	PHLAP92510007	Plasmid vector containing HLA-B*08:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:32 protein. This plasmid can be used for constructing HLA-B*08:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:320 Protein Expression Plasmid Vector	PHLAP92510008	Plasmid vector containing HLA-B*08:320 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:320 protein. This plasmid can be used for constructing HLA-B*08:320 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:320 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:321 Protein Expression Plasmid Vector	PHLAP92510009	Plasmid vector containing HLA-B*08:321 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:321 protein. This plasmid can be used for constructing HLA-B*08:321 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:321 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:322 Protein Expression Plasmid Vector	PHLAP925100010	Plasmid vector containing HLA-B*08:322 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:322 protein. This plasmid can be used for constructing HLA-B*08:322 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:322 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:323Q Protein Expression Plasmid Vector	PHLAP92510011	Plasmid vector containing HLA-B*08:323Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:323Q protein. This plasmid can be used for constructing HLA-B*08:323Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:323Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:324 Protein Expression Plasmid Vector	PHLAP92510012	Plasmid vector containing HLA-B*08:324 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:324 protein. This plasmid can be used for constructing HLA-B*08:324 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:324 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:325 Protein Expression Plasmid Vector	PHLAP92510013	Plasmid vector containing HLA-B*08:325 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:325 protein. This plasmid can be used for constructing HLA-B*08:325 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:325 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:326 Protein Expression Plasmid Vector	PHLAP92510014	Plasmid vector containing HLA-B*08:326 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:326 protein. This plasmid can be used for constructing HLA-B*08:326 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:326 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:327 Protein Expression Plasmid Vector	PHLAP92510015	Plasmid vector containing HLA-B*08:327 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:327 protein. This plasmid can be used for constructing HLA-B*08:327 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:327 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:328N Protein Expression Plasmid Vector	PHLAP92510016	Plasmid vector containing HLA-B*08:328N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:328N protein. This plasmid can be used for constructing HLA-B*08:328N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:328N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:329Q Protein Expression Plasmid Vector	PHLAP92510017	Plasmid vector containing HLA-B*08:329Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:329Q protein. This plasmid can be used for constructing HLA-B*08:329Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:329Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:33 Protein Expression Plasmid Vector	PHLAP92510018	Plasmid vector containing HLA-B*08:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:33 protein. This plasmid can be used for constructing HLA-B*08:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:330 Protein Expression Plasmid Vector	PHLAP92510019	Plasmid vector containing HLA-B*08:330 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:330 protein. This plasmid can be used for constructing HLA-B*08:330 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:330 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:331 Protein Expression Plasmid Vector	PHLAP92510020	Plasmid vector containing HLA-B*08:331 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:331 protein. This plasmid can be used for constructing HLA-B*08:331 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:331 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:332 Protein Expression Plasmid Vector	PHLAP92510021	Plasmid vector containing HLA-B*08:332 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:332 protein. This plasmid can be used for constructing HLA-B*08:332 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:332 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:333N Protein Expression Plasmid Vector	PHLAP92510022	Plasmid vector containing HLA-B*08:333N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:333N protein. This plasmid can be used for constructing HLA-B*08:333N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:333N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:334 Protein Expression Plasmid Vector	PHLAP92510023	Plasmid vector containing HLA-B*08:334 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:334 protein. This plasmid can be used for constructing HLA-B*08:334 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:334 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:335 Protein Expression Plasmid Vector	PHLAP92510024	Plasmid vector containing HLA-B*08:335 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:335 protein. This plasmid can be used for constructing HLA-B*08:335 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:335 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:336N Protein Expression Plasmid Vector	PHLAP92510025	Plasmid vector containing HLA-B*08:336N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:336N protein. This plasmid can be used for constructing HLA-B*08:336N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:336N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:34 Protein Expression Plasmid Vector	PHLAP92510026	Plasmid vector containing HLA-B*08:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:34 protein. This plasmid can be used for constructing HLA-B*08:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:35 Protein Expression Plasmid Vector	PHLAP92510027	Plasmid vector containing HLA-B*08:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:35 protein. This plasmid can be used for constructing HLA-B*08:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:36 Protein Expression Plasmid Vector	PHLAP92510028	Plasmid vector containing HLA-B*08:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:36 protein. This plasmid can be used for constructing HLA-B*08:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:37 Protein Expression Plasmid Vector	PHLAP92510029	Plasmid vector containing HLA-B*08:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:37 protein. This plasmid can be used for constructing HLA-B*08:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:38:01 Protein Expression Plasmid Vector	PHLAP925100310	Plasmid vector containing HLA-B*08:38:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:38:01 protein. This plasmid can be used for constructing HLA-B*08:38:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:38:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:38:02 Protein Expression Plasmid Vector	PHLAP925100311	Plasmid vector containing HLA-B*08:38:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:38:02 protein. This plasmid can be used for constructing HLA-B*08:38:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:38:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:39 Protein Expression Plasmid Vector	PHLAP925100312	Plasmid vector containing HLA-B*08:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:39 protein. This plasmid can be used for constructing HLA-B*08:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:40 Protein Expression Plasmid Vector	PHLAP925100313	Plasmid vector containing HLA-B*08:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:40 protein. This plasmid can be used for constructing HLA-B*08:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:41 Protein Expression Plasmid Vector	PHLAP925100314	Plasmid vector containing HLA-B*08:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:41 protein. This plasmid can be used for constructing HLA-B*08:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:42 Protein Expression Plasmid Vector	PHLAP92510035	Plasmid vector containing HLA-B*08:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:42 protein. This plasmid can be used for constructing HLA-B*08:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:43 Protein Expression Plasmid Vector	PHLAP92510036	Plasmid vector containing HLA-B*08:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:43 protein. This plasmid can be used for constructing HLA-B*08:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:44 Protein Expression Plasmid Vector	PHLAP92510037	Plasmid vector containing HLA-B*08:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:44 protein. This plasmid can be used for constructing HLA-B*08:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:45 Protein Expression Plasmid Vector	PHLAP92510038	Plasmid vector containing HLA-B*08:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:45 protein. This plasmid can be used for constructing HLA-B*08:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:46 Protein Expression Plasmid Vector	PHLAP92510039	Plasmid vector containing HLA-B*08:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:46 protein. This plasmid can be used for constructing HLA-B*08:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:47 Protein Expression Plasmid Vector	PHLAP92510040	Plasmid vector containing HLA-B*08:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:47 protein. This plasmid can be used for constructing HLA-B*08:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:48 Protein Expression Plasmid Vector	PHLAP92510041	Plasmid vector containing HLA-B*08:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:48 protein. This plasmid can be used for constructing HLA-B*08:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:49 Protein Expression Plasmid Vector	PHLAP92510042	Plasmid vector containing HLA-B*08:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:49 protein. This plasmid can be used for constructing HLA-B*08:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:50 Protein Expression Plasmid Vector	PHLAP92510043	Plasmid vector containing HLA-B*08:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:50 protein. This plasmid can be used for constructing HLA-B*08:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:51 Protein Expression Plasmid Vector	PHLAP92510044	Plasmid vector containing HLA-B*08:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:51 protein. This plasmid can be used for constructing HLA-B*08:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:52 Protein Expression Plasmid Vector	PHLAP92510045	Plasmid vector containing HLA-B*08:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:52 protein. This plasmid can be used for constructing HLA-B*08:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:53:01 Protein Expression Plasmid Vector	PHLAP92510046	Plasmid vector containing HLA-B*08:53:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:53:01 protein. This plasmid can be used for constructing HLA-B*08:53:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:53:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:53:02 Protein Expression Plasmid Vector	PHLAP92510047	Plasmid vector containing HLA-B*08:53:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:53:02 protein. This plasmid can be used for constructing HLA-B*08:53:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:53:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:54:01 Protein Expression Plasmid Vector	PHLAP92510048	Plasmid vector containing HLA-B*08:54:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:54:01 protein. This plasmid can be used for constructing HLA-B*08:54:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:54:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:54:02 Protein Expression Plasmid Vector	PHLAP92510049	Plasmid vector containing HLA-B*08:54:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:54:02 protein. This plasmid can be used for constructing HLA-B*08:54:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:54:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:55 Protein Expression Plasmid Vector	PHLAP92510050	Plasmid vector containing HLA-B*08:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:55 protein. This plasmid can be used for constructing HLA-B*08:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:56:01 Protein Expression Plasmid Vector	PHLAP92510051	Plasmid vector containing HLA-B*08:56:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:56:01 protein. This plasmid can be used for constructing HLA-B*08:56:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:56:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:56:02 Protein Expression Plasmid Vector	PHLAP92510052	Plasmid vector containing HLA-B*08:56:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:56:02 protein. This plasmid can be used for constructing HLA-B*08:56:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:56:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:56:03 Protein Expression Plasmid Vector	PHLAP92510053	Plasmid vector containing HLA-B*08:56:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:56:03 protein. This plasmid can be used for constructing HLA-B*08:56:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:56:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:57 Protein Expression Plasmid Vector	PHLAP92510054	Plasmid vector containing HLA-B*08:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:57 protein. This plasmid can be used for constructing HLA-B*08:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:58 Protein Expression Plasmid Vector	PHLAP92510055	Plasmid vector containing HLA-B*08:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:58 protein. This plasmid can be used for constructing HLA-B*08:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:59:01 Protein Expression Plasmid Vector	PHLAP92510056	Plasmid vector containing HLA-B*08:59:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:59:01 protein. This plasmid can be used for constructing HLA-B*08:59:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:59:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:59:02 Protein Expression Plasmid Vector	PHLAP92510057	Plasmid vector containing HLA-B*08:59:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:59:02 protein. This plasmid can be used for constructing HLA-B*08:59:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:59:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:60 Protein Expression Plasmid Vector	PHLAP92510058	Plasmid vector containing HLA-B*08:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:60 protein. This plasmid can be used for constructing HLA-B*08:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:61 Protein Expression Plasmid Vector	PHLAP92510059	Plasmid vector containing HLA-B*08:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:61 protein. This plasmid can be used for constructing HLA-B*08:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:62 Protein Expression Plasmid Vector	PHLAP92510060	Plasmid vector containing HLA-B*08:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:62 protein. This plasmid can be used for constructing HLA-B*08:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:63 Protein Expression Plasmid Vector	PHLAP92510061	Plasmid vector containing HLA-B*08:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:63 protein. This plasmid can be used for constructing HLA-B*08:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:64 Protein Expression Plasmid Vector	PHLAP92510062	Plasmid vector containing HLA-B*08:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:64 protein. This plasmid can be used for constructing HLA-B*08:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:65 Protein Expression Plasmid Vector	PHLAP92510063	Plasmid vector containing HLA-B*08:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:65 protein. This plasmid can be used for constructing HLA-B*08:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:66 Protein Expression Plasmid Vector	PHLAP92510064	Plasmid vector containing HLA-B*08:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:66 protein. This plasmid can be used for constructing HLA-B*08:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:67:01N Protein Expression Plasmid Vector	PHLAP92510065	Plasmid vector containing HLA-B*08:67:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:67:01N protein. This plasmid can be used for constructing HLA-B*08:67:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:67:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:67:02N Protein Expression Plasmid Vector	PHLAP92510066	Plasmid vector containing HLA-B*08:67:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:67:02N protein. This plasmid can be used for constructing HLA-B*08:67:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:67:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:68 Protein Expression Plasmid Vector	PHLAP92510067	Plasmid vector containing HLA-B*08:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:68 protein. This plasmid can be used for constructing HLA-B*08:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:69 Protein Expression Plasmid Vector	PHLAP92510068	Plasmid vector containing HLA-B*08:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:69 protein. This plasmid can be used for constructing HLA-B*08:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:70 Protein Expression Plasmid Vector	PHLAP92510069	Plasmid vector containing HLA-B*08:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:70 protein. This plasmid can be used for constructing HLA-B*08:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:71 Protein Expression Plasmid Vector	PHLAP925100710	Plasmid vector containing HLA-B*08:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:71 protein. This plasmid can be used for constructing HLA-B*08:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:72N Protein Expression Plasmid Vector	PHLAP925100711	Plasmid vector containing HLA-B*08:72N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:72N protein. This plasmid can be used for constructing HLA-B*08:72N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:72N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:73 Protein Expression Plasmid Vector	PHLAP925100712	Plasmid vector containing HLA-B*08:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:73 protein. This plasmid can be used for constructing HLA-B*08:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:74 Protein Expression Plasmid Vector	PHLAP925100713	Plasmid vector containing HLA-B*08:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:74 protein. This plasmid can be used for constructing HLA-B*08:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:75 Protein Expression Plasmid Vector	PHLAP925100714	Plasmid vector containing HLA-B*08:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:75 protein. This plasmid can be used for constructing HLA-B*08:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:76 Protein Expression Plasmid Vector	PHLAP92510075	Plasmid vector containing HLA-B*08:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:76 protein. This plasmid can be used for constructing HLA-B*08:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:77 Protein Expression Plasmid Vector	PHLAP92510076	Plasmid vector containing HLA-B*08:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:77 protein. This plasmid can be used for constructing HLA-B*08:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:78 Protein Expression Plasmid Vector	PHLAP92510077	Plasmid vector containing HLA-B*08:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:78 protein. This plasmid can be used for constructing HLA-B*08:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:79:01 Protein Expression Plasmid Vector	PHLAP92510078	Plasmid vector containing HLA-B*08:79:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:79:01 protein. This plasmid can be used for constructing HLA-B*08:79:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:79:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:79:02 Protein Expression Plasmid Vector	PHLAP92510079	Plasmid vector containing HLA-B*08:79:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:79:02 protein. This plasmid can be used for constructing HLA-B*08:79:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:79:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:80 Protein Expression Plasmid Vector	PHLAP92510080	Plasmid vector containing HLA-B*08:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:80 protein. This plasmid can be used for constructing HLA-B*08:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:81 Protein Expression Plasmid Vector	PHLAP92510081	Plasmid vector containing HLA-B*08:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:81 protein. This plasmid can be used for constructing HLA-B*08:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:82N Protein Expression Plasmid Vector	PHLAP92510082	Plasmid vector containing HLA-B*08:82N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:82N protein. This plasmid can be used for constructing HLA-B*08:82N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:82N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:83 Protein Expression Plasmid Vector	PHLAP92510083	Plasmid vector containing HLA-B*08:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:83 protein. This plasmid can be used for constructing HLA-B*08:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:84 Protein Expression Plasmid Vector	PHLAP92510084	Plasmid vector containing HLA-B*08:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:84 protein. This plasmid can be used for constructing HLA-B*08:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:85 Protein Expression Plasmid Vector	PHLAP92510085	Plasmid vector containing HLA-B*08:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:85 protein. This plasmid can be used for constructing HLA-B*08:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:86N Protein Expression Plasmid Vector	PHLAP92510086	Plasmid vector containing HLA-B*08:86N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:86N protein. This plasmid can be used for constructing HLA-B*08:86N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:86N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:87 Protein Expression Plasmid Vector	PHLAP92510087	Plasmid vector containing HLA-B*08:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:87 protein. This plasmid can be used for constructing HLA-B*08:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:88 Protein Expression Plasmid Vector	PHLAP92510088	Plasmid vector containing HLA-B*08:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:88 protein. This plasmid can be used for constructing HLA-B*08:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:89 Protein Expression Plasmid Vector	PHLAP92510089	Plasmid vector containing HLA-B*08:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:89 protein. This plasmid can be used for constructing HLA-B*08:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:90 Protein Expression Plasmid Vector	PHLAP92510090	Plasmid vector containing HLA-B*08:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:90 protein. This plasmid can be used for constructing HLA-B*08:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:91 Protein Expression Plasmid Vector	PHLAP92510091	Plasmid vector containing HLA-B*08:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:91 protein. This plasmid can be used for constructing HLA-B*08:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:92 Protein Expression Plasmid Vector	PHLAP92510092	Plasmid vector containing HLA-B*08:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:92 protein. This plasmid can be used for constructing HLA-B*08:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:93 Protein Expression Plasmid Vector	PHLAP92510093	Plasmid vector containing HLA-B*08:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:93 protein. This plasmid can be used for constructing HLA-B*08:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:94 Protein Expression Plasmid Vector	PHLAP92510094	Plasmid vector containing HLA-B*08:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:94 protein. This plasmid can be used for constructing HLA-B*08:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:95 Protein Expression Plasmid Vector	PHLAP92510095	Plasmid vector containing HLA-B*08:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:95 protein. This plasmid can be used for constructing HLA-B*08:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:96:01 Protein Expression Plasmid Vector	PHLAP92510096	Plasmid vector containing HLA-B*08:96:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:96:01 protein. This plasmid can be used for constructing HLA-B*08:96:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:96:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:96:02 Protein Expression Plasmid Vector	PHLAP92510097	Plasmid vector containing HLA-B*08:96:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:96:02 protein. This plasmid can be used for constructing HLA-B*08:96:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:96:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:97 Protein Expression Plasmid Vector	PHLAP92510098	Plasmid vector containing HLA-B*08:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:97 protein. This plasmid can be used for constructing HLA-B*08:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*08:98 Protein Expression Plasmid Vector	PHLAP92510099	Plasmid vector containing HLA-B*08:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:98 protein. This plasmid can be used for constructing HLA-B*08:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*08:99 Protein Expression Plasmid Vector	PHLAP925101000	Plasmid vector containing HLA-B*08:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*08:99 protein. This plasmid can be used for constructing HLA-B*08:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*08:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:01:01 Protein Expression Plasmid Vector	PHLAP925101011	Plasmid vector containing HLA-B*13:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:01:01 protein. This plasmid can be used for constructing HLA-B*13:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:01:02 Protein Expression Plasmid Vector	PHLAP925101012	Plasmid vector containing HLA-B*13:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:01:02 protein. This plasmid can be used for constructing HLA-B*13:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:01:03 Protein Expression Plasmid Vector	PHLAP925101013	Plasmid vector containing HLA-B*13:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:01:03 protein. This plasmid can be used for constructing HLA-B*13:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:01:04 Protein Expression Plasmid Vector	PHLAP925101014	Plasmid vector containing HLA-B*13:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:01:04 protein. This plasmid can be used for constructing HLA-B*13:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:01:05 Protein Expression Plasmid Vector	PHLAP925101015	Plasmid vector containing HLA-B*13:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:01:05 protein. This plasmid can be used for constructing HLA-B*13:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:01:01:06 Protein Expression Plasmid Vector	PHLAP92510106	Plasmid vector containing HLA-B*13:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:01:06 protein. This plasmid can be used for constructing HLA-B*13:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:01:07 Protein Expression Plasmid Vector	PHLAP92510107	Plasmid vector containing HLA-B*13:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:01:07 protein. This plasmid can be used for constructing HLA-B*13:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:01:08 Protein Expression Plasmid Vector	PHLAP92510108	Plasmid vector containing HLA-B*13:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:01:08 protein. This plasmid can be used for constructing HLA-B*13:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:01:09 Protein Expression Plasmid Vector	PHLAP92510109	Plasmid vector containing HLA-B*13:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:01:09 protein. This plasmid can be used for constructing HLA-B*13:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:01:10 Protein Expression Plasmid Vector	PHLAP925101110	Plasmid vector containing HLA-B*13:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:01:10 protein. This plasmid can be used for constructing HLA-B*13:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:01:11 Protein Expression Plasmid Vector	PHLAP925101111	Plasmid vector containing HLA-B*13:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:01:11 protein. This plasmid can be used for constructing HLA-B*13:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:01:12 Protein Expression Plasmid Vector	PHLAP925101112	Plasmid vector containing HLA-B*13:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:01:12 protein. This plasmid can be used for constructing HLA-B*13:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:01:02 Protein Expression Plasmid Vector	PHLAP92510113	Plasmid vector containing HLA-B*13:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:02 protein. This plasmid can be used for constructing HLA-B*13:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:03 Protein Expression Plasmid Vector	PHLAP92510114	Plasmid vector containing HLA-B*13:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:03 protein. This plasmid can be used for constructing HLA-B*13:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:04 Protein Expression Plasmid Vector	PHLAP92510115	Plasmid vector containing HLA-B*13:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:04 protein. This plasmid can be used for constructing HLA-B*13:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:05 Protein Expression Plasmid Vector	PHLAP92510116	Plasmid vector containing HLA-B*13:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:05 protein. This plasmid can be used for constructing HLA-B*13:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:06 Protein Expression Plasmid Vector	PHLAP92510117	Plasmid vector containing HLA-B*13:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:06 protein. This plasmid can be used for constructing HLA-B*13:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:07 Protein Expression Plasmid Vector	PHLAP92510118	Plasmid vector containing HLA-B*13:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:07 protein. This plasmid can be used for constructing HLA-B*13:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:08 Protein Expression Plasmid Vector	PHLAP92510119	Plasmid vector containing HLA-B*13:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:08 protein. This plasmid can be used for constructing HLA-B*13:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:09 Protein Expression Plasmid Vector	PHLAP92510120	Plasmid vector containing HLA-B*13:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:09 protein. This plasmid can be used for constructing HLA-B*13:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:01:10 Protein Expression Plasmid Vector	PHLAP92510121	Plasmid vector containing HLA-B*13:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:10 protein. This plasmid can be used for constructing HLA-B*13:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:11 Protein Expression Plasmid Vector	PHLAP92510122	Plasmid vector containing HLA-B*13:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:11 protein. This plasmid can be used for constructing HLA-B*13:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:12 Protein Expression Plasmid Vector	PHLAP92510123	Plasmid vector containing HLA-B*13:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:12 protein. This plasmid can be used for constructing HLA-B*13:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:13 Protein Expression Plasmid Vector	PHLAP92510124	Plasmid vector containing HLA-B*13:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:13 protein. This plasmid can be used for constructing HLA-B*13:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:14 Protein Expression Plasmid Vector	PHLAP92510125	Plasmid vector containing HLA-B*13:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:14 protein. This plasmid can be used for constructing HLA-B*13:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:15 Protein Expression Plasmid Vector	PHLAP92510126	Plasmid vector containing HLA-B*13:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:15 protein. This plasmid can be used for constructing HLA-B*13:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:16 Protein Expression Plasmid Vector	PHLAP92510127	Plasmid vector containing HLA-B*13:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:16 protein. This plasmid can be used for constructing HLA-B*13:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:17 Protein Expression Plasmid Vector	PHLAP92510128	Plasmid vector containing HLA-B*13:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:17 protein. This plasmid can be used for constructing HLA-B*13:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:01:18 Protein Expression Plasmid Vector	PHLAP92510129	Plasmid vector containing HLA-B*13:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:18 protein. This plasmid can be used for constructing HLA-B*13:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:19 Protein Expression Plasmid Vector	PHLAP92510130	Plasmid vector containing HLA-B*13:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:19 protein. This plasmid can be used for constructing HLA-B*13:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:20 Protein Expression Plasmid Vector	PHLAP92510131	Plasmid vector containing HLA-B*13:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:20 protein. This plasmid can be used for constructing HLA-B*13:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:21 Protein Expression Plasmid Vector	PHLAP92510132	Plasmid vector containing HLA-B*13:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:21 protein. This plasmid can be used for constructing HLA-B*13:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:22 Protein Expression Plasmid Vector	PHLAP92510133	Plasmid vector containing HLA-B*13:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:22 protein. This plasmid can be used for constructing HLA-B*13:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:23 Protein Expression Plasmid Vector	PHLAP92510134	Plasmid vector containing HLA-B*13:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:23 protein. This plasmid can be used for constructing HLA-B*13:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:24 Protein Expression Plasmid Vector	PHLAP92510135	Plasmid vector containing HLA-B*13:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:24 protein. This plasmid can be used for constructing HLA-B*13:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:01:25 Protein Expression Plasmid Vector	PHLAP92510136	Plasmid vector containing HLA-B*13:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:01:25 protein. This plasmid can be used for constructing HLA-B*13:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:02:01:01 Protein Expression Plasmid Vector	PHLAP92510137	Plasmid vector containing HLA-B*13:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:01 protein. This plasmid can be used for constructing HLA-B*13:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:02 Protein Expression Plasmid Vector	PHLAP92510138	Plasmid vector containing HLA-B*13:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:02 protein. This plasmid can be used for constructing HLA-B*13:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:03 Protein Expression Plasmid Vector	PHLAP92510139	Plasmid vector containing HLA-B*13:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:03 protein. This plasmid can be used for constructing HLA-B*13:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:04 Protein Expression Plasmid Vector	PHLAP92510140	Plasmid vector containing HLA-B*13:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:04 protein. This plasmid can be used for constructing HLA-B*13:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:05 Protein Expression Plasmid Vector	PHLAP92510141	Plasmid vector containing HLA-B*13:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:05 protein. This plasmid can be used for constructing HLA-B*13:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:06 Protein Expression Plasmid Vector	PHLAP92510142	Plasmid vector containing HLA-B*13:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:06 protein. This plasmid can be used for constructing HLA-B*13:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:07 Protein Expression Plasmid Vector	PHLAP92510143	Plasmid vector containing HLA-B*13:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:07 protein. This plasmid can be used for constructing HLA-B*13:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:02:01:08 Protein Expression Plasmid Vector	PHLAP92510144	Plasmid vector containing HLA-B*13:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:08 protein. This plasmid can be used for constructing HLA-B*13:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:09 Protein Expression Plasmid Vector	PHLAP92510145	Plasmid vector containing HLA-B*13:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:09 protein. This plasmid can be used for constructing HLA-B*13:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:10 Protein Expression Plasmid Vector	PHLAP92510146	Plasmid vector containing HLA-B*13:02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:10 protein. This plasmid can be used for constructing HLA-B*13:02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:11 Protein Expression Plasmid Vector	PHLAP92510147	Plasmid vector containing HLA-B*13:02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:11 protein. This plasmid can be used for constructing HLA-B*13:02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:12 Protein Expression Plasmid Vector	PHLAP92510148	Plasmid vector containing HLA-B*13:02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:12 protein. This plasmid can be used for constructing HLA-B*13:02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:13 Protein Expression Plasmid Vector	PHLAP92510149	Plasmid vector containing HLA-B*13:02:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:13 protein. This plasmid can be used for constructing HLA-B*13:02:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:14 Protein Expression Plasmid Vector	PHLAP92510150	Plasmid vector containing HLA-B*13:02:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:14 protein. This plasmid can be used for constructing HLA-B*13:02:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:02:01:15 Protein Expression Plasmid Vector	PHLAP92510151	Plasmid vector containing HLA-B*13:02:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:15 protein. This plasmid can be used for constructing HLA-B*13:02:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:16 Protein Expression Plasmid Vector	PHLAP92510152	Plasmid vector containing HLA-B*13:02:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:16 protein. This plasmid can be used for constructing HLA-B*13:02:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:17 Protein Expression Plasmid Vector	PHLAP92510153	Plasmid vector containing HLA-B*13:02:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:17 protein. This plasmid can be used for constructing HLA-B*13:02:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:18 Protein Expression Plasmid Vector	PHLAP92510154	Plasmid vector containing HLA-B*13:02:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:18 protein. This plasmid can be used for constructing HLA-B*13:02:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:19 Protein Expression Plasmid Vector	PHLAP92510155	Plasmid vector containing HLA-B*13:02:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:19 protein. This plasmid can be used for constructing HLA-B*13:02:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:20 Protein Expression Plasmid Vector	PHLAP92510156	Plasmid vector containing HLA-B*13:02:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:20 protein. This plasmid can be used for constructing HLA-B*13:02:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:21 Protein Expression Plasmid Vector	PHLAP92510157	Plasmid vector containing HLA-B*13:02:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:21 protein. This plasmid can be used for constructing HLA-B*13:02:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:02:01:22 Protein Expression Plasmid Vector	PHLAP92510158	Plasmid vector containing HLA-B*13:02:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:22 protein. This plasmid can be used for constructing HLA-B*13:02:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:23 Protein Expression Plasmid Vector	PHLAP92510159	Plasmid vector containing HLA-B*13:02:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:23 protein. This plasmid can be used for constructing HLA-B*13:02:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:24 Protein Expression Plasmid Vector	PHLAP92510160	Plasmid vector containing HLA-B*13:02:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:24 protein. This plasmid can be used for constructing HLA-B*13:02:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:25 Protein Expression Plasmid Vector	PHLAP92510161	Plasmid vector containing HLA-B*13:02:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:25 protein. This plasmid can be used for constructing HLA-B*13:02:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:26 Protein Expression Plasmid Vector	PHLAP92510162	Plasmid vector containing HLA-B*13:02:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:26 protein. This plasmid can be used for constructing HLA-B*13:02:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:27 Protein Expression Plasmid Vector	PHLAP92510163	Plasmid vector containing HLA-B*13:02:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:27 protein. This plasmid can be used for constructing HLA-B*13:02:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:28 Protein Expression Plasmid Vector	PHLAP92510164	Plasmid vector containing HLA-B*13:02:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:28 protein. This plasmid can be used for constructing HLA-B*13:02:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:02:01:29 Protein Expression Plasmid Vector	PHLAP92510165	Plasmid vector containing HLA-B*13:02:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:29 protein. This plasmid can be used for constructing HLA-B*13:02:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:30 Protein Expression Plasmid Vector	PHLAP92510166	Plasmid vector containing HLA-B*13:02:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:30 protein. This plasmid can be used for constructing HLA-B*13:02:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:31 Protein Expression Plasmid Vector	PHLAP92510167	Plasmid vector containing HLA-B*13:02:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:31 protein. This plasmid can be used for constructing HLA-B*13:02:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:01:32 Protein Expression Plasmid Vector	PHLAP92510168	Plasmid vector containing HLA-B*13:02:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:01:32 protein. This plasmid can be used for constructing HLA-B*13:02:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:02 Protein Expression Plasmid Vector	PHLAP92510169	Plasmid vector containing HLA-B*13:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:02 protein. This plasmid can be used for constructing HLA-B*13:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:03 Protein Expression Plasmid Vector	PHLAP92510170	Plasmid vector containing HLA-B*13:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:03 protein. This plasmid can be used for constructing HLA-B*13:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:04 Protein Expression Plasmid Vector	PHLAP92510171	Plasmid vector containing HLA-B*13:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:04 protein. This plasmid can be used for constructing HLA-B*13:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:02:05 Protein Expression Plasmid Vector	PHLAP92510172	Plasmid vector containing HLA-B*13:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:05 protein. This plasmid can be used for constructing HLA-B*13:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:06 Protein Expression Plasmid Vector	PHLAP92510173	Plasmid vector containing HLA-B*13:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:06 protein. This plasmid can be used for constructing HLA-B*13:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:07 Protein Expression Plasmid Vector	PHLAP92510174	Plasmid vector containing HLA-B*13:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:07 protein. This plasmid can be used for constructing HLA-B*13:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:08 Protein Expression Plasmid Vector	PHLAP92510175	Plasmid vector containing HLA-B*13:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:08 protein. This plasmid can be used for constructing HLA-B*13:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:09 Protein Expression Plasmid Vector	PHLAP92510176	Plasmid vector containing HLA-B*13:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:09 protein. This plasmid can be used for constructing HLA-B*13:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:10 Protein Expression Plasmid Vector	PHLAP92510177	Plasmid vector containing HLA-B*13:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:10 protein. This plasmid can be used for constructing HLA-B*13:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:11 Protein Expression Plasmid Vector	PHLAP92510178	Plasmid vector containing HLA-B*13:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:11 protein. This plasmid can be used for constructing HLA-B*13:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:12 Protein Expression Plasmid Vector	PHLAP92510179	Plasmid vector containing HLA-B*13:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:12 protein. This plasmid can be used for constructing HLA-B*13:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:02:13 Protein Expression Plasmid Vector	PHLAP92510180	Plasmid vector containing HLA-B*13:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:13 protein. This plasmid can be used for constructing HLA-B*13:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:14 Protein Expression Plasmid Vector	PHLAP92510181	Plasmid vector containing HLA-B*13:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:14 protein. This plasmid can be used for constructing HLA-B*13:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:15 Protein Expression Plasmid Vector	PHLAP92510182	Plasmid vector containing HLA-B*13:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:15 protein. This plasmid can be used for constructing HLA-B*13:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:16 Protein Expression Plasmid Vector	PHLAP92510183	Plasmid vector containing HLA-B*13:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:16 protein. This plasmid can be used for constructing HLA-B*13:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:17 Protein Expression Plasmid Vector	PHLAP92510184	Plasmid vector containing HLA-B*13:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:17 protein. This plasmid can be used for constructing HLA-B*13:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:18 Protein Expression Plasmid Vector	PHLAP92510185	Plasmid vector containing HLA-B*13:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:18 protein. This plasmid can be used for constructing HLA-B*13:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:19 Protein Expression Plasmid Vector	PHLAP92510186	Plasmid vector containing HLA-B*13:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:19 protein. This plasmid can be used for constructing HLA-B*13:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:20 Protein Expression Plasmid Vector	PHLAP92510187	Plasmid vector containing HLA-B*13:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:20 protein. This plasmid can be used for constructing HLA-B*13:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:02:21 Protein Expression Plasmid Vector	PHLAP92510188	Plasmid vector containing HLA-B*13:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:21 protein. This plasmid can be used for constructing HLA-B*13:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:22 Protein Expression Plasmid Vector	PHLAP92510189	Plasmid vector containing HLA-B*13:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:22 protein. This plasmid can be used for constructing HLA-B*13:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:23 Protein Expression Plasmid Vector	PHLAP92510190	Plasmid vector containing HLA-B*13:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:23 protein. This plasmid can be used for constructing HLA-B*13:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:24 Protein Expression Plasmid Vector	PHLAP92510191	Plasmid vector containing HLA-B*13:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:24 protein. This plasmid can be used for constructing HLA-B*13:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:25 Protein Expression Plasmid Vector	PHLAP92510192	Plasmid vector containing HLA-B*13:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:25 protein. This plasmid can be used for constructing HLA-B*13:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:26 Protein Expression Plasmid Vector	PHLAP92510193	Plasmid vector containing HLA-B*13:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:26 protein. This plasmid can be used for constructing HLA-B*13:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:27 Protein Expression Plasmid Vector	PHLAP92510194	Plasmid vector containing HLA-B*13:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:27 protein. This plasmid can be used for constructing HLA-B*13:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:28 Protein Expression Plasmid Vector	PHLAP92510195	Plasmid vector containing HLA-B*13:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:28 protein. This plasmid can be used for constructing HLA-B*13:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:02:29 Protein Expression Plasmid Vector	PHLAP92510196	Plasmid vector containing HLA-B*13:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:29 protein. This plasmid can be used for constructing HLA-B*13:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:30 Protein Expression Plasmid Vector	PHLAP92510197	Plasmid vector containing HLA-B*13:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:30 protein. This plasmid can be used for constructing HLA-B*13:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:31 Protein Expression Plasmid Vector	PHLAP92510198	Plasmid vector containing HLA-B*13:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:31 protein. This plasmid can be used for constructing HLA-B*13:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:32 Protein Expression Plasmid Vector	PHLAP92510199	Plasmid vector containing HLA-B*13:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:32 protein. This plasmid can be used for constructing HLA-B*13:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:33 Protein Expression Plasmid Vector	PHLAP925102000	Plasmid vector containing HLA-B*13:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:33 protein. This plasmid can be used for constructing HLA-B*13:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:34 Protein Expression Plasmid Vector	PHLAP925102001	Plasmid vector containing HLA-B*13:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:34 protein. This plasmid can be used for constructing HLA-B*13:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:35 Protein Expression Plasmid Vector	PHLAP925102002	Plasmid vector containing HLA-B*13:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:35 protein. This plasmid can be used for constructing HLA-B*13:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:36 Protein Expression Plasmid Vector	PHLAP925102003	Plasmid vector containing HLA-B*13:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:36 protein. This plasmid can be used for constructing HLA-B*13:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:02:37 Protein Expression Plasmid Vector	PHLAP92510204	Plasmid vector containing HLA-B*13:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:37 protein. This plasmid can be used for constructing HLA-B*13:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:38 Protein Expression Plasmid Vector	PHLAP92510205	Plasmid vector containing HLA-B*13:02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:38 protein. This plasmid can be used for constructing HLA-B*13:02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:39 Protein Expression Plasmid Vector	PHLAP92510206	Plasmid vector containing HLA-B*13:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:39 protein. This plasmid can be used for constructing HLA-B*13:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:40 Protein Expression Plasmid Vector	PHLAP92510207	Plasmid vector containing HLA-B*13:02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:40 protein. This plasmid can be used for constructing HLA-B*13:02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:41 Protein Expression Plasmid Vector	PHLAP92510208	Plasmid vector containing HLA-B*13:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:41 protein. This plasmid can be used for constructing HLA-B*13:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:42 Protein Expression Plasmid Vector	PHLAP92510209	Plasmid vector containing HLA-B*13:02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:42 protein. This plasmid can be used for constructing HLA-B*13:02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:43 Protein Expression Plasmid Vector	PHLAP925102110	Plasmid vector containing HLA-B*13:02:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:43 protein. This plasmid can be used for constructing HLA-B*13:02:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:44 Protein Expression Plasmid Vector	PHLAP925102111	Plasmid vector containing HLA-B*13:02:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:44 protein. This plasmid can be used for constructing HLA-B*13:02:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:02:45 Protein Expression Plasmid Vector	PHLAP92510212	Plasmid vector containing HLA-B*13:02:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:45 protein. This plasmid can be used for constructing HLA-B*13:02:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:02:46 Protein Expression Plasmid Vector	PHLAP92510213	Plasmid vector containing HLA-B*13:02:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:02:46 protein. This plasmid can be used for constructing HLA-B*13:02:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:02:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:03 Protein Expression Plasmid Vector	PHLAP92510214	Plasmid vector containing HLA-B*13:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:03 protein. This plasmid can be used for constructing HLA-B*13:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:04 Protein Expression Plasmid Vector	PHLAP92510215	Plasmid vector containing HLA-B*13:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:04 protein. This plasmid can be used for constructing HLA-B*13:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:06 Protein Expression Plasmid Vector	PHLAP92510216	Plasmid vector containing HLA-B*13:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:06 protein. This plasmid can be used for constructing HLA-B*13:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:07N Protein Expression Plasmid Vector	PHLAP92510217	Plasmid vector containing HLA-B*13:07N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:07N protein. This plasmid can be used for constructing HLA-B*13:07N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:07N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:08 Protein Expression Plasmid Vector	PHLAP92510218	Plasmid vector containing HLA-B*13:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:08 protein. This plasmid can be used for constructing HLA-B*13:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:09 Protein Expression Plasmid Vector	PHLAP92510219	Plasmid vector containing HLA-B*13:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:09 protein. This plasmid can be used for constructing HLA-B*13:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:10 Protein Expression Plasmid Vector	PHLAP92510220	Plasmid vector containing HLA-B*13:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:10 protein. This plasmid can be used for constructing HLA-B*13:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:100 Protein Expression Plasmid Vector	PHLAP92510221	Plasmid vector containing HLA-B*13:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:100 protein. This plasmid can be used for constructing HLA-B*13:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:101 Protein Expression Plasmid Vector	PHLAP92510222	Plasmid vector containing HLA-B*13:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:101 protein. This plasmid can be used for constructing HLA-B*13:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:102 Protein Expression Plasmid Vector	PHLAP92510223	Plasmid vector containing HLA-B*13:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:102 protein. This plasmid can be used for constructing HLA-B*13:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:103N Protein Expression Plasmid Vector	PHLAP92510224	Plasmid vector containing HLA-B*13:103N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:103N protein. This plasmid can be used for constructing HLA-B*13:103N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:103N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:104 Protein Expression Plasmid Vector	PHLAP92510225	Plasmid vector containing HLA-B*13:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:104 protein. This plasmid can be used for constructing HLA-B*13:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:105 Protein Expression Plasmid Vector	PHLAP92510226	Plasmid vector containing HLA-B*13:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:105 protein. This plasmid can be used for constructing HLA-B*13:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:106 Protein Expression Plasmid Vector	PHLAP92510227	Plasmid vector containing HLA-B*13:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:106 protein. This plasmid can be used for constructing HLA-B*13:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:107 Protein Expression Plasmid Vector	PHLAP92510228	Plasmid vector containing HLA-B*13:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:107 protein. This plasmid can be used for constructing HLA-B*13:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:108 Protein Expression Plasmid Vector	PHLAP92510229	Plasmid vector containing HLA-B*13:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:108 protein. This plasmid can be used for constructing HLA-B*13:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:109 Protein Expression Plasmid Vector	PHLAP92510230	Plasmid vector containing HLA-B*13:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:109 protein. This plasmid can be used for constructing HLA-B*13:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:11 Protein Expression Plasmid Vector	PHLAP92510231	Plasmid vector containing HLA-B*13:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:11 protein. This plasmid can be used for constructing HLA-B*13:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:110 Protein Expression Plasmid Vector	PHLAP92510232	Plasmid vector containing HLA-B*13:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:110 protein. This plasmid can be used for constructing HLA-B*13:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:111 Protein Expression Plasmid Vector	PHLAP92510233	Plasmid vector containing HLA-B*13:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:111 protein. This plasmid can be used for constructing HLA-B*13:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:112 Protein Expression Plasmid Vector	PHLAP92510234	Plasmid vector containing HLA-B*13:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:112 protein. This plasmid can be used for constructing HLA-B*13:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:113 Protein Expression Plasmid Vector	PHLAP92510235	Plasmid vector containing HLA-B*13:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:113 protein. This plasmid can be used for constructing HLA-B*13:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:114 Protein Expression Plasmid Vector	PHLAP92510236	Plasmid vector containing HLA-B*13:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:114 protein. This plasmid can be used for constructing HLA-B*13:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:115 Protein Expression Plasmid Vector	PHLAP92510237	Plasmid vector containing HLA-B*13:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:115 protein. This plasmid can be used for constructing HLA-B*13:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:116N Protein Expression Plasmid Vector	PHLAP92510238	Plasmid vector containing HLA-B*13:116N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:116N protein. This plasmid can be used for constructing HLA-B*13:116N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:116N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:117 Protein Expression Plasmid Vector	PHLAP92510239	Plasmid vector containing HLA-B*13:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:117 protein. This plasmid can be used for constructing HLA-B*13:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:118 Protein Expression Plasmid Vector	PHLAP925102400	Plasmid vector containing HLA-B*13:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:118 protein. This plasmid can be used for constructing HLA-B*13:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:119 Protein Expression Plasmid Vector	PHLAP925102401	Plasmid vector containing HLA-B*13:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:119 protein. This plasmid can be used for constructing HLA-B*13:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:12:01 Protein Expression Plasmid Vector	PHLAP925102402	Plasmid vector containing HLA-B*13:12:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:12:01 protein. This plasmid can be used for constructing HLA-B*13:12:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:12:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:12:02 Protein Expression Plasmid Vector	PHLAP925102403	Plasmid vector containing HLA-B*13:12:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:12:02 protein. This plasmid can be used for constructing HLA-B*13:12:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:12:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:120 Protein Expression Plasmid Vector	PHLAP92510244	Plasmid vector containing HLA-B*13:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:120 protein. This plasmid can be used for constructing HLA-B*13:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:121 Protein Expression Plasmid Vector	PHLAP92510245	Plasmid vector containing HLA-B*13:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:121 protein. This plasmid can be used for constructing HLA-B*13:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:122 Protein Expression Plasmid Vector	PHLAP92510246	Plasmid vector containing HLA-B*13:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:122 protein. This plasmid can be used for constructing HLA-B*13:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:123Q Protein Expression Plasmid Vector	PHLAP92510247	Plasmid vector containing HLA-B*13:123Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:123Q protein. This plasmid can be used for constructing HLA-B*13:123Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:123Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:124 Protein Expression Plasmid Vector	PHLAP92510248	Plasmid vector containing HLA-B*13:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:124 protein. This plasmid can be used for constructing HLA-B*13:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:125 Protein Expression Plasmid Vector	PHLAP92510249	Plasmid vector containing HLA-B*13:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:125 protein. This plasmid can be used for constructing HLA-B*13:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:126 Protein Expression Plasmid Vector	PHLAP92510250	Plasmid vector containing HLA-B*13:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:126 protein. This plasmid can be used for constructing HLA-B*13:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:127 Protein Expression Plasmid Vector	PHLAP92510251	Plasmid vector containing HLA-B*13:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:127 protein. This plasmid can be used for constructing HLA-B*13:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:128 Protein Expression Plasmid Vector	PHLAP92510252	Plasmid vector containing HLA-B*13:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:128 protein. This plasmid can be used for constructing HLA-B*13:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:129 Protein Expression Plasmid Vector	PHLAP92510253	Plasmid vector containing HLA-B*13:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:129 protein. This plasmid can be used for constructing HLA-B*13:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:13:01 Protein Expression Plasmid Vector	PHLAP92510254	Plasmid vector containing HLA-B*13:13:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:13:01 protein. This plasmid can be used for constructing HLA-B*13:13:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:13:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:13:02 Protein Expression Plasmid Vector	PHLAP92510255	Plasmid vector containing HLA-B*13:13:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:13:02 protein. This plasmid can be used for constructing HLA-B*13:13:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:13:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:130 Protein Expression Plasmid Vector	PHLAP92510256	Plasmid vector containing HLA-B*13:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:130 protein. This plasmid can be used for constructing HLA-B*13:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:131 Protein Expression Plasmid Vector	PHLAP92510257	Plasmid vector containing HLA-B*13:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:131 protein. This plasmid can be used for constructing HLA-B*13:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:132 Protein Expression Plasmid Vector	PHLAP92510258	Plasmid vector containing HLA-B*13:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:132 protein. This plasmid can be used for constructing HLA-B*13:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:133 Protein Expression Plasmid Vector	PHLAP92510259	Plasmid vector containing HLA-B*13:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:133 protein. This plasmid can be used for constructing HLA-B*13:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:134 Protein Expression Plasmid Vector	PHLAP92510260	Plasmid vector containing HLA-B*13:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:134 protein. This plasmid can be used for constructing HLA-B*13:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:135 Protein Expression Plasmid Vector	PHLAP92510261	Plasmid vector containing HLA-B*13:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:135 protein. This plasmid can be used for constructing HLA-B*13:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:136 Protein Expression Plasmid Vector	PHLAP92510262	Plasmid vector containing HLA-B*13:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:136 protein. This plasmid can be used for constructing HLA-B*13:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:137N Protein Expression Plasmid Vector	PHLAP92510263	Plasmid vector containing HLA-B*13:137N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:137N protein. This plasmid can be used for constructing HLA-B*13:137N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:137N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:138 Protein Expression Plasmid Vector	PHLAP92510264	Plasmid vector containing HLA-B*13:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:138 protein. This plasmid can be used for constructing HLA-B*13:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:139N Protein Expression Plasmid Vector	PHLAP92510265	Plasmid vector containing HLA-B*13:139N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:139N protein. This plasmid can be used for constructing HLA-B*13:139N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:139N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:14 Protein Expression Plasmid Vector	PHLAP92510266	Plasmid vector containing HLA-B*13:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:14 protein. This plasmid can be used for constructing HLA-B*13:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:140 Protein Expression Plasmid Vector	PHLAP92510267	Plasmid vector containing HLA-B*13:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:140 protein. This plasmid can be used for constructing HLA-B*13:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:141 Protein Expression Plasmid Vector	PHLAP92510268	Plasmid vector containing HLA-B*13:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:141 protein. This plasmid can be used for constructing HLA-B*13:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:142 Protein Expression Plasmid Vector	PHLAP92510269	Plasmid vector containing HLA-B*13:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:142 protein. This plasmid can be used for constructing HLA-B*13:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:143 Protein Expression Plasmid Vector	PHLAP925102700	Plasmid vector containing HLA-B*13:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:143 protein. This plasmid can be used for constructing HLA-B*13:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:144 Protein Expression Plasmid Vector	PHLAP925102701	Plasmid vector containing HLA-B*13:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:144 protein. This plasmid can be used for constructing HLA-B*13:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:145 Protein Expression Plasmid Vector	PHLAP925102702	Plasmid vector containing HLA-B*13:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:145 protein. This plasmid can be used for constructing HLA-B*13:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:146 Protein Expression Plasmid Vector	PHLAP925102703	Plasmid vector containing HLA-B*13:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:146 protein. This plasmid can be used for constructing HLA-B*13:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:147 Protein Expression Plasmid Vector	PHLAP925102704	Plasmid vector containing HLA-B*13:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:147 protein. This plasmid can be used for constructing HLA-B*13:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:148 Protein Expression Plasmid Vector	PHLAP925102705	Plasmid vector containing HLA-B*13:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:148 protein. This plasmid can be used for constructing HLA-B*13:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:149 Protein Expression Plasmid Vector	PHLAP92510276	Plasmid vector containing HLA-B*13:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:149 protein. This plasmid can be used for constructing HLA-B*13:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:15 Protein Expression Plasmid Vector	PHLAP92510277	Plasmid vector containing HLA-B*13:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:15 protein. This plasmid can be used for constructing HLA-B*13:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:150 Protein Expression Plasmid Vector	PHLAP92510278	Plasmid vector containing HLA-B*13:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:150 protein. This plasmid can be used for constructing HLA-B*13:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:151 Protein Expression Plasmid Vector	PHLAP92510279	Plasmid vector containing HLA-B*13:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:151 protein. This plasmid can be used for constructing HLA-B*13:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:152 Protein Expression Plasmid Vector	PHLAP92510280	Plasmid vector containing HLA-B*13:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:152 protein. This plasmid can be used for constructing HLA-B*13:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:153 Protein Expression Plasmid Vector	PHLAP92510281	Plasmid vector containing HLA-B*13:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:153 protein. This plasmid can be used for constructing HLA-B*13:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:154 Protein Expression Plasmid Vector	PHLAP92510282	Plasmid vector containing HLA-B*13:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:154 protein. This plasmid can be used for constructing HLA-B*13:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:155 Protein Expression Plasmid Vector	PHLAP92510283	Plasmid vector containing HLA-B*13:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:155 protein. This plasmid can be used for constructing HLA-B*13:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:156 Protein Expression Plasmid Vector	PHLAP92510284	Plasmid vector containing HLA-B*13:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:156 protein. This plasmid can be used for constructing HLA-B*13:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:157 Protein Expression Plasmid Vector	PHLAP92510285	Plasmid vector containing HLA-B*13:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:157 protein. This plasmid can be used for constructing HLA-B*13:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:158 Protein Expression Plasmid Vector	PHLAP92510286	Plasmid vector containing HLA-B*13:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:158 protein. This plasmid can be used for constructing HLA-B*13:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:159 Protein Expression Plasmid Vector	PHLAP92510287	Plasmid vector containing HLA-B*13:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:159 protein. This plasmid can be used for constructing HLA-B*13:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:16 Protein Expression Plasmid Vector	PHLAP92510288	Plasmid vector containing HLA-B*13:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:16 protein. This plasmid can be used for constructing HLA-B*13:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:160 Protein Expression Plasmid Vector	PHLAP92510289	Plasmid vector containing HLA-B*13:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:160 protein. This plasmid can be used for constructing HLA-B*13:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:161N Protein Expression Plasmid Vector	PHLAP92510290	Plasmid vector containing HLA-B*13:161N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:161N protein. This plasmid can be used for constructing HLA-B*13:161N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:161N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:162 Protein Expression Plasmid Vector	PHLAP92510291	Plasmid vector containing HLA-B*13:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:162 protein. This plasmid can be used for constructing HLA-B*13:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:163 Protein Expression Plasmid Vector	PHLAP92510292	Plasmid vector containing HLA-B*13:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:163 protein. This plasmid can be used for constructing HLA-B*13:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:164 Protein Expression Plasmid Vector	PHLAP92510293	Plasmid vector containing HLA-B*13:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:164 protein. This plasmid can be used for constructing HLA-B*13:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:165 Protein Expression Plasmid Vector	PHLAP92510294	Plasmid vector containing HLA-B*13:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:165 protein. This plasmid can be used for constructing HLA-B*13:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:166 Protein Expression Plasmid Vector	PHLAP92510295	Plasmid vector containing HLA-B*13:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:166 protein. This plasmid can be used for constructing HLA-B*13:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:167 Protein Expression Plasmid Vector	PHLAP92510296	Plasmid vector containing HLA-B*13:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:167 protein. This plasmid can be used for constructing HLA-B*13:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:168 Protein Expression Plasmid Vector	PHLAP92510297	Plasmid vector containing HLA-B*13:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:168 protein. This plasmid can be used for constructing HLA-B*13:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:169 Protein Expression Plasmid Vector	PHLAP92510298	Plasmid vector containing HLA-B*13:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:169 protein. This plasmid can be used for constructing HLA-B*13:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:17 Protein Expression Plasmid Vector	PHLAP92510299	Plasmid vector containing HLA-B*13:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:17 protein. This plasmid can be used for constructing HLA-B*13:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:170 Protein Expression Plasmid Vector	PHLAP92510300	Plasmid vector containing HLA-B*13:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:170 protein. This plasmid can be used for constructing HLA-B*13:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:171 Protein Expression Plasmid Vector	PHLAP92510301	Plasmid vector containing HLA-B*13:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:171 protein. This plasmid can be used for constructing HLA-B*13:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:172 Protein Expression Plasmid Vector	PHLAP92510302	Plasmid vector containing HLA-B*13:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:172 protein. This plasmid can be used for constructing HLA-B*13:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:173 Protein Expression Plasmid Vector	PHLAP92510303	Plasmid vector containing HLA-B*13:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:173 protein. This plasmid can be used for constructing HLA-B*13:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:174 Protein Expression Plasmid Vector	PHLAP92510304	Plasmid vector containing HLA-B*13:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:174 protein. This plasmid can be used for constructing HLA-B*13:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:175 Protein Expression Plasmid Vector	PHLAP92510305	Plasmid vector containing HLA-B*13:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:175 protein. This plasmid can be used for constructing HLA-B*13:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:176 Protein Expression Plasmid Vector	PHLAP92510306	Plasmid vector containing HLA-B*13:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:176 protein. This plasmid can be used for constructing HLA-B*13:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:177 Protein Expression Plasmid Vector	PHLAP92510307	Plasmid vector containing HLA-B*13:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:177 protein. This plasmid can be used for constructing HLA-B*13:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:178 Protein Expression Plasmid Vector	PHLAP92510308	Plasmid vector containing HLA-B*13:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:178 protein. This plasmid can be used for constructing HLA-B*13:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:179 Protein Expression Plasmid Vector	PHLAP92510309	Plasmid vector containing HLA-B*13:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:179 protein. This plasmid can be used for constructing HLA-B*13:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:18 Protein Expression Plasmid Vector	PHLAP925103110	Plasmid vector containing HLA-B*13:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:18 protein. This plasmid can be used for constructing HLA-B*13:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:180 Protein Expression Plasmid Vector	PHLAP925103111	Plasmid vector containing HLA-B*13:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:180 protein. This plasmid can be used for constructing HLA-B*13:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:181 Protein Expression Plasmid Vector	PHLAP925103112	Plasmid vector containing HLA-B*13:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:181 protein. This plasmid can be used for constructing HLA-B*13:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:182 Protein Expression Plasmid Vector	PHLAP925103113	Plasmid vector containing HLA-B*13:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:182 protein. This plasmid can be used for constructing HLA-B*13:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:183 Protein Expression Plasmid Vector	PHLAP925103114	Plasmid vector containing HLA-B*13:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:183 protein. This plasmid can be used for constructing HLA-B*13:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:184 Protein Expression Plasmid Vector	PHLAP925103115	Plasmid vector containing HLA-B*13:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:184 protein. This plasmid can be used for constructing HLA-B*13:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:185 Protein Expression Plasmid Vector	PHLAP92510316	Plasmid vector containing HLA-B*13:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:185 protein. This plasmid can be used for constructing HLA-B*13:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:186 Protein Expression Plasmid Vector	PHLAP92510317	Plasmid vector containing HLA-B*13:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:186 protein. This plasmid can be used for constructing HLA-B*13:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:187 Protein Expression Plasmid Vector	PHLAP92510318	Plasmid vector containing HLA-B*13:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:187 protein. This plasmid can be used for constructing HLA-B*13:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:188 Protein Expression Plasmid Vector	PHLAP92510319	Plasmid vector containing HLA-B*13:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:188 protein. This plasmid can be used for constructing HLA-B*13:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:189 Protein Expression Plasmid Vector	PHLAP92510320	Plasmid vector containing HLA-B*13:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:189 protein. This plasmid can be used for constructing HLA-B*13:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:19 Protein Expression Plasmid Vector	PHLAP92510321	Plasmid vector containing HLA-B*13:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:19 protein. This plasmid can be used for constructing HLA-B*13:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:190 Protein Expression Plasmid Vector	PHLAP92510322	Plasmid vector containing HLA-B*13:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:190 protein. This plasmid can be used for constructing HLA-B*13:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:191 Protein Expression Plasmid Vector	PHLAP92510323	Plasmid vector containing HLA-B*13:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:191 protein. This plasmid can be used for constructing HLA-B*13:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:192 Protein Expression Plasmid Vector	PHLAP92510324	Plasmid vector containing HLA-B*13:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:192 protein. This plasmid can be used for constructing HLA-B*13:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:193 Protein Expression Plasmid Vector	PHLAP92510325	Plasmid vector containing HLA-B*13:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:193 protein. This plasmid can be used for constructing HLA-B*13:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:194 Protein Expression Plasmid Vector	PHLAP92510326	Plasmid vector containing HLA-B*13:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:194 protein. This plasmid can be used for constructing HLA-B*13:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:195 Protein Expression Plasmid Vector	PHLAP92510327	Plasmid vector containing HLA-B*13:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:195 protein. This plasmid can be used for constructing HLA-B*13:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:196 Protein Expression Plasmid Vector	PHLAP92510328	Plasmid vector containing HLA-B*13:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:196 protein. This plasmid can be used for constructing HLA-B*13:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:197 Protein Expression Plasmid Vector	PHLAP92510329	Plasmid vector containing HLA-B*13:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:197 protein. This plasmid can be used for constructing HLA-B*13:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:198N Protein Expression Plasmid Vector	PHLAP92510330	Plasmid vector containing HLA-B*13:198N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:198N protein. This plasmid can be used for constructing HLA-B*13:198N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:198N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:199 Protein Expression Plasmid Vector	PHLAP92510331	Plasmid vector containing HLA-B*13:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:199 protein. This plasmid can be used for constructing HLA-B*13:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:20 Protein Expression Plasmid Vector	PHLAP92510332	Plasmid vector containing HLA-B*13:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:20 protein. This plasmid can be used for constructing HLA-B*13:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:200 Protein Expression Plasmid Vector	PHLAP92510333	Plasmid vector containing HLA-B*13:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:200 protein. This plasmid can be used for constructing HLA-B*13:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:201 Protein Expression Plasmid Vector	PHLAP92510334	Plasmid vector containing HLA-B*13:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:201 protein. This plasmid can be used for constructing HLA-B*13:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:202 Protein Expression Plasmid Vector	PHLAP92510335	Plasmid vector containing HLA-B*13:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:202 protein. This plasmid can be used for constructing HLA-B*13:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:203 Protein Expression Plasmid Vector	PHLAP92510336	Plasmid vector containing HLA-B*13:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:203 protein. This plasmid can be used for constructing HLA-B*13:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:204 Protein Expression Plasmid Vector	PHLAP92510337	Plasmid vector containing HLA-B*13:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:204 protein. This plasmid can be used for constructing HLA-B*13:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:205N Protein Expression Plasmid Vector	PHLAP92510338	Plasmid vector containing HLA-B*13:205N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:205N protein. This plasmid can be used for constructing HLA-B*13:205N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:205N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:206 Protein Expression Plasmid Vector	PHLAP92510339	Plasmid vector containing HLA-B*13:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:206 protein. This plasmid can be used for constructing HLA-B*13:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:207 Protein Expression Plasmid Vector	PHLAP92510340	Plasmid vector containing HLA-B*13:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:207 protein. This plasmid can be used for constructing HLA-B*13:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:208 Protein Expression Plasmid Vector	PHLAP92510341	Plasmid vector containing HLA-B*13:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:208 protein. This plasmid can be used for constructing HLA-B*13:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:209N Protein Expression Plasmid Vector	PHLAP92510342	Plasmid vector containing HLA-B*13:209N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:209N protein. This plasmid can be used for constructing HLA-B*13:209N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:209N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:21 Protein Expression Plasmid Vector	PHLAP92510343	Plasmid vector containing HLA-B*13:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:21 protein. This plasmid can be used for constructing HLA-B*13:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:210 Protein Expression Plasmid Vector	PHLAP92510344	Plasmid vector containing HLA-B*13:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:210 protein. This plasmid can be used for constructing HLA-B*13:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:211 Protein Expression Plasmid Vector	PHLAP92510345	Plasmid vector containing HLA-B*13:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:211 protein. This plasmid can be used for constructing HLA-B*13:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:212 Protein Expression Plasmid Vector	PHLAP92510346	Plasmid vector containing HLA-B*13:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:212 protein. This plasmid can be used for constructing HLA-B*13:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:22:01 Protein Expression Plasmid Vector	PHLAP92510347	Plasmid vector containing HLA-B*13:22:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:22:01 protein. This plasmid can be used for constructing HLA-B*13:22:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:22:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:22:02 Protein Expression Plasmid Vector	PHLAP92510348	Plasmid vector containing HLA-B*13:22:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:22:02 protein. This plasmid can be used for constructing HLA-B*13:22:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:22:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:23 Protein Expression Plasmid Vector	PHLAP92510349	Plasmid vector containing HLA-B*13:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:23 protein. This plasmid can be used for constructing HLA-B*13:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:25 Protein Expression Plasmid Vector	PHLAP92510350	Plasmid vector containing HLA-B*13:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:25 protein. This plasmid can be used for constructing HLA-B*13:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:26:01 Protein Expression Plasmid Vector	PHLAP92510351	Plasmid vector containing HLA-B*13:26:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:26:01 protein. This plasmid can be used for constructing HLA-B*13:26:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:26:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:26:02 Protein Expression Plasmid Vector	PHLAP92510352	Plasmid vector containing HLA-B*13:26:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:26:02 protein. This plasmid can be used for constructing HLA-B*13:26:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:26:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:27 Protein Expression Plasmid Vector	PHLAP92510353	Plasmid vector containing HLA-B*13:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:27 protein. This plasmid can be used for constructing HLA-B*13:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:28 Protein Expression Plasmid Vector	PHLAP92510354	Plasmid vector containing HLA-B*13:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:28 protein. This plasmid can be used for constructing HLA-B*13:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:29 Protein Expression Plasmid Vector	PHLAP92510355	Plasmid vector containing HLA-B*13:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:29 protein. This plasmid can be used for constructing HLA-B*13:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:30 Protein Expression Plasmid Vector	PHLAP92510356	Plasmid vector containing HLA-B*13:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:30 protein. This plasmid can be used for constructing HLA-B*13:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:31 Protein Expression Plasmid Vector	PHLAP92510357	Plasmid vector containing HLA-B*13:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:31 protein. This plasmid can be used for constructing HLA-B*13:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:32 Protein Expression Plasmid Vector	PHLAP92510358	Plasmid vector containing HLA-B*13:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:32 protein. This plasmid can be used for constructing HLA-B*13:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:33 Protein Expression Plasmid Vector	PHLAP92510359	Plasmid vector containing HLA-B*13:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:33 protein. This plasmid can be used for constructing HLA-B*13:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:34 Protein Expression Plasmid Vector	PHLAP92510360	Plasmid vector containing HLA-B*13:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:34 protein. This plasmid can be used for constructing HLA-B*13:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:35 Protein Expression Plasmid Vector	PHLAP92510361	Plasmid vector containing HLA-B*13:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:35 protein. This plasmid can be used for constructing HLA-B*13:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:36 Protein Expression Plasmid Vector	PHLAP92510362	Plasmid vector containing HLA-B*13:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:36 protein. This plasmid can be used for constructing HLA-B*13:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:37 Protein Expression Plasmid Vector	PHLAP92510363	Plasmid vector containing HLA-B*13:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:37 protein. This plasmid can be used for constructing HLA-B*13:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:38 Protein Expression Plasmid Vector	PHLAP92510364	Plasmid vector containing HLA-B*13:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:38 protein. This plasmid can be used for constructing HLA-B*13:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:39 Protein Expression Plasmid Vector	PHLAP92510365	Plasmid vector containing HLA-B*13:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:39 protein. This plasmid can be used for constructing HLA-B*13:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:40 Protein Expression Plasmid Vector	PHLAP92510366	Plasmid vector containing HLA-B*13:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:40 protein. This plasmid can be used for constructing HLA-B*13:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:41 Protein Expression Plasmid Vector	PHLAP92510367	Plasmid vector containing HLA-B*13:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:41 protein. This plasmid can be used for constructing HLA-B*13:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:42 Protein Expression Plasmid Vector	PHLAP92510368	Plasmid vector containing HLA-B*13:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:42 protein. This plasmid can be used for constructing HLA-B*13:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:43 Protein Expression Plasmid Vector	PHLAP92510369	Plasmid vector containing HLA-B*13:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:43 protein. This plasmid can be used for constructing HLA-B*13:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:44 Protein Expression Plasmid Vector	PHLAP92510370	Plasmid vector containing HLA-B*13:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:44 protein. This plasmid can be used for constructing HLA-B*13:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:45 Protein Expression Plasmid Vector	PHLAP92510371	Plasmid vector containing HLA-B*13:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:45 protein. This plasmid can be used for constructing HLA-B*13:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:46 Protein Expression Plasmid Vector	PHLAP92510372	Plasmid vector containing HLA-B*13:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:46 protein. This plasmid can be used for constructing HLA-B*13:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:47 Protein Expression Plasmid Vector	PHLAP92510373	Plasmid vector containing HLA-B*13:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:47 protein. This plasmid can be used for constructing HLA-B*13:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:48 Protein Expression Plasmid Vector	PHLAP92510374	Plasmid vector containing HLA-B*13:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:48 protein. This plasmid can be used for constructing HLA-B*13:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:49N Protein Expression Plasmid Vector	PHLAP92510375	Plasmid vector containing HLA-B*13:49N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:49N protein. This plasmid can be used for constructing HLA-B*13:49N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:49N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:50 Protein Expression Plasmid Vector	PHLAP92510376	Plasmid vector containing HLA-B*13:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:50 protein. This plasmid can be used for constructing HLA-B*13:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:50 Protein Expression Plasmid Vector	PHLAP92510377	Plasmid vector containing HLA-B*13:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:50 protein. This plasmid can be used for constructing HLA-B*13:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:51 Protein Expression Plasmid Vector	PHLAP92510378	Plasmid vector containing HLA-B*13:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:51 protein. This plasmid can be used for constructing HLA-B*13:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:52 Protein Expression Plasmid Vector	PHLAP92510379	Plasmid vector containing HLA-B*13:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:52 protein. This plasmid can be used for constructing HLA-B*13:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:53 Protein Expression Plasmid Vector	PHLAP92510380	Plasmid vector containing HLA-B*13:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:53 protein. This plasmid can be used for constructing HLA-B*13:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:54 Protein Expression Plasmid Vector	PHLAP92510381	Plasmid vector containing HLA-B*13:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:54 protein. This plasmid can be used for constructing HLA-B*13:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:55 Protein Expression Plasmid Vector	PHLAP92510382	Plasmid vector containing HLA-B*13:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:55 protein. This plasmid can be used for constructing HLA-B*13:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:56:01N Protein Expression Plasmid Vector	PHLAP92510383	Plasmid vector containing HLA-B*13:56:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:56:01N protein. This plasmid can be used for constructing HLA-B*13:56:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:56:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:56:02N Protein Expression Plasmid Vector	PHLAP92510384	Plasmid vector containing HLA-B*13:56:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:56:02N protein. This plasmid can be used for constructing HLA-B*13:56:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:56:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:57 Protein Expression Plasmid Vector	PHLAP92510385	Plasmid vector containing HLA-B*13:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:57 protein. This plasmid can be used for constructing HLA-B*13:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:58 Protein Expression Plasmid Vector	PHLAP92510386	Plasmid vector containing HLA-B*13:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:58 protein. This plasmid can be used for constructing HLA-B*13:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:59 Protein Expression Plasmid Vector	PHLAP92510387	Plasmid vector containing HLA-B*13:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:59 protein. This plasmid can be used for constructing HLA-B*13:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:60 Protein Expression Plasmid Vector	PHLAP92510388	Plasmid vector containing HLA-B*13:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:60 protein. This plasmid can be used for constructing HLA-B*13:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:61 Protein Expression Plasmid Vector	PHLAP92510389	Plasmid vector containing HLA-B*13:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:61 protein. This plasmid can be used for constructing HLA-B*13:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:62 Protein Expression Plasmid Vector	PHLAP92510390	Plasmid vector containing HLA-B*13:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:62 protein. This plasmid can be used for constructing HLA-B*13:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:63N Protein Expression Plasmid Vector	PHLAP92510391	Plasmid vector containing HLA-B*13:63N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:63N protein. This plasmid can be used for constructing HLA-B*13:63N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:63N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:64 Protein Expression Plasmid Vector	PHLAP92510392	Plasmid vector containing HLA-B*13:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:64 protein. This plasmid can be used for constructing HLA-B*13:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:65 Protein Expression Plasmid Vector	PHLAP92510393	Plasmid vector containing HLA-B*13:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:65 protein. This plasmid can be used for constructing HLA-B*13:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:66 Protein Expression Plasmid Vector	PHLAP92510394	Plasmid vector containing HLA-B*13:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:66 protein. This plasmid can be used for constructing HLA-B*13:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:67 Protein Expression Plasmid Vector	PHLAP92510395	Plasmid vector containing HLA-B*13:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:67 protein. This plasmid can be used for constructing HLA-B*13:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:68 Protein Expression Plasmid Vector	PHLAP92510396	Plasmid vector containing HLA-B*13:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:68 protein. This plasmid can be used for constructing HLA-B*13:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:69 Protein Expression Plasmid Vector	PHLAP92510397	Plasmid vector containing HLA-B*13:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:69 protein. This plasmid can be used for constructing HLA-B*13:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:70 Protein Expression Plasmid Vector	PHLAP92510398	Plasmid vector containing HLA-B*13:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:70 protein. This plasmid can be used for constructing HLA-B*13:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:71 Protein Expression Plasmid Vector	PHLAP92510399	Plasmid vector containing HLA-B*13:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:71 protein. This plasmid can be used for constructing HLA-B*13:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:72 Protein Expression Plasmid Vector	PHLAP925104000	Plasmid vector containing HLA-B*13:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:72 protein. This plasmid can be used for constructing HLA-B*13:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:73 Protein Expression Plasmid Vector	PHLAP925104001	Plasmid vector containing HLA-B*13:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:73 protein. This plasmid can be used for constructing HLA-B*13:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:74 Protein Expression Plasmid Vector	PHLAP925104002	Plasmid vector containing HLA-B*13:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:74 protein. This plasmid can be used for constructing HLA-B*13:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:75 Protein Expression Plasmid Vector	PHLAP925104003	Plasmid vector containing HLA-B*13:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:75 protein. This plasmid can be used for constructing HLA-B*13:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:76N Protein Expression Plasmid Vector	PHLAP92510404	Plasmid vector containing HLA-B*13:76N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:76N protein. This plasmid can be used for constructing HLA-B*13:76N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:76N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:77 Protein Expression Plasmid Vector	PHLAP92510405	Plasmid vector containing HLA-B*13:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:77 protein. This plasmid can be used for constructing HLA-B*13:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:78 Protein Expression Plasmid Vector	PHLAP92510406	Plasmid vector containing HLA-B*13:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:78 protein. This plasmid can be used for constructing HLA-B*13:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:79 Protein Expression Plasmid Vector	PHLAP92510407	Plasmid vector containing HLA-B*13:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:79 protein. This plasmid can be used for constructing HLA-B*13:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:80 Protein Expression Plasmid Vector	PHLAP92510408	Plasmid vector containing HLA-B*13:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:80 protein. This plasmid can be used for constructing HLA-B*13:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:81 Protein Expression Plasmid Vector	PHLAP92510409	Plasmid vector containing HLA-B*13:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:81 protein. This plasmid can be used for constructing HLA-B*13:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:82 Protein Expression Plasmid Vector	PHLAP92510410	Plasmid vector containing HLA-B*13:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:82 protein. This plasmid can be used for constructing HLA-B*13:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:83 Protein Expression Plasmid Vector	PHLAP92510411	Plasmid vector containing HLA-B*13:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:83 protein. This plasmid can be used for constructing HLA-B*13:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:84 Protein Expression Plasmid Vector	PHLAP92510412	Plasmid vector containing HLA-B*13:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:84 protein. This plasmid can be used for constructing HLA-B*13:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:85 Protein Expression Plasmid Vector	PHLAP92510413	Plasmid vector containing HLA-B*13:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:85 protein. This plasmid can be used for constructing HLA-B*13:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:86 Protein Expression Plasmid Vector	PHLAP92510414	Plasmid vector containing HLA-B*13:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:86 protein. This plasmid can be used for constructing HLA-B*13:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:87 Protein Expression Plasmid Vector	PHLAP92510415	Plasmid vector containing HLA-B*13:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:87 protein. This plasmid can be used for constructing HLA-B*13:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:88 Protein Expression Plasmid Vector	PHLAP92510416	Plasmid vector containing HLA-B*13:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:88 protein. This plasmid can be used for constructing HLA-B*13:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:89 Protein Expression Plasmid Vector	PHLAP92510417	Plasmid vector containing HLA-B*13:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:89 protein. This plasmid can be used for constructing HLA-B*13:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:90 Protein Expression Plasmid Vector	PHLAP92510418	Plasmid vector containing HLA-B*13:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:90 protein. This plasmid can be used for constructing HLA-B*13:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:91 Protein Expression Plasmid Vector	PHLAP92510419	Plasmid vector containing HLA-B*13:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:91 protein. This plasmid can be used for constructing HLA-B*13:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*13:92 Protein Expression Plasmid Vector	PHLAP92510420	Plasmid vector containing HLA-B*13:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:92 protein. This plasmid can be used for constructing HLA-B*13:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:93 Protein Expression Plasmid Vector	PHLAP92510421	Plasmid vector containing HLA-B*13:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:93 protein. This plasmid can be used for constructing HLA-B*13:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:94 Protein Expression Plasmid Vector	PHLAP92510422	Plasmid vector containing HLA-B*13:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:94 protein. This plasmid can be used for constructing HLA-B*13:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:95 Protein Expression Plasmid Vector	PHLAP92510423	Plasmid vector containing HLA-B*13:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:95 protein. This plasmid can be used for constructing HLA-B*13:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:96 Protein Expression Plasmid Vector	PHLAP92510424	Plasmid vector containing HLA-B*13:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:96 protein. This plasmid can be used for constructing HLA-B*13:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:97 Protein Expression Plasmid Vector	PHLAP92510425	Plasmid vector containing HLA-B*13:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:97 protein. This plasmid can be used for constructing HLA-B*13:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:98 Protein Expression Plasmid Vector	PHLAP92510426	Plasmid vector containing HLA-B*13:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:98 protein. This plasmid can be used for constructing HLA-B*13:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*13:99 Protein Expression Plasmid Vector	PHLAP92510427	Plasmid vector containing HLA-B*13:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*13:99 protein. This plasmid can be used for constructing HLA-B*13:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*13:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*1305 Protein Expression Plasmid Vector	PHLAP92510428	Plasmid vector containing HLA-B*1305 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*1305 protein. This plasmid can be used for constructing HLA-B*1305 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*1305 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*1324 Protein Expression Plasmid Vector	PHLAP92510429	Plasmid vector containing HLA-B*1324 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*1324 protein. This plasmid can be used for constructing HLA-B*1324 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*1324 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:01:01 Protein Expression Plasmid Vector	PHLAP925104300	Plasmid vector containing HLA-B*14:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:01:01 protein. This plasmid can be used for constructing HLA-B*14:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:01:02 Protein Expression Plasmid Vector	PHLAP925104301	Plasmid vector containing HLA-B*14:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:01:02 protein. This plasmid can be used for constructing HLA-B*14:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:01:03 Protein Expression Plasmid Vector	PHLAP925104302	Plasmid vector containing HLA-B*14:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:01:03 protein. This plasmid can be used for constructing HLA-B*14:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:01:04 Protein Expression Plasmid Vector	PHLAP925104303	Plasmid vector containing HLA-B*14:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:01:04 protein. This plasmid can be used for constructing HLA-B*14:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:01:05 Protein Expression Plasmid Vector	PHLAP925104304	Plasmid vector containing HLA-B*14:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:01:05 protein. This plasmid can be used for constructing HLA-B*14:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:01:01:06 Protein Expression Plasmid Vector	PHLAP92510435	Plasmid vector containing HLA-B*14:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:01:06 protein. This plasmid can be used for constructing HLA-B*14:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:01:07 Protein Expression Plasmid Vector	PHLAP92510436	Plasmid vector containing HLA-B*14:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:01:07 protein. This plasmid can be used for constructing HLA-B*14:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:01:08 Protein Expression Plasmid Vector	PHLAP92510437	Plasmid vector containing HLA-B*14:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:01:08 protein. This plasmid can be used for constructing HLA-B*14:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:01:09 Protein Expression Plasmid Vector	PHLAP92510438	Plasmid vector containing HLA-B*14:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:01:09 protein. This plasmid can be used for constructing HLA-B*14:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:01:10 Protein Expression Plasmid Vector	PHLAP92510439	Plasmid vector containing HLA-B*14:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:01:10 protein. This plasmid can be used for constructing HLA-B*14:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:01:11 Protein Expression Plasmid Vector	PHLAP92510440	Plasmid vector containing HLA-B*14:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:01:11 protein. This plasmid can be used for constructing HLA-B*14:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:01:12 Protein Expression Plasmid Vector	PHLAP92510441	Plasmid vector containing HLA-B*14:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:01:12 protein. This plasmid can be used for constructing HLA-B*14:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:01:02 Protein Expression Plasmid Vector	PHLAP92510442	Plasmid vector containing HLA-B*14:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:02 protein. This plasmid can be used for constructing HLA-B*14:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:03 Protein Expression Plasmid Vector	PHLAP92510443	Plasmid vector containing HLA-B*14:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:03 protein. This plasmid can be used for constructing HLA-B*14:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:04 Protein Expression Plasmid Vector	PHLAP92510444	Plasmid vector containing HLA-B*14:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:04 protein. This plasmid can be used for constructing HLA-B*14:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:05 Protein Expression Plasmid Vector	PHLAP92510445	Plasmid vector containing HLA-B*14:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:05 protein. This plasmid can be used for constructing HLA-B*14:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:06 Protein Expression Plasmid Vector	PHLAP92510446	Plasmid vector containing HLA-B*14:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:06 protein. This plasmid can be used for constructing HLA-B*14:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:07 Protein Expression Plasmid Vector	PHLAP92510447	Plasmid vector containing HLA-B*14:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:07 protein. This plasmid can be used for constructing HLA-B*14:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:08 Protein Expression Plasmid Vector	PHLAP92510448	Plasmid vector containing HLA-B*14:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:08 protein. This plasmid can be used for constructing HLA-B*14:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:09 Protein Expression Plasmid Vector	PHLAP92510449	Plasmid vector containing HLA-B*14:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:09 protein. This plasmid can be used for constructing HLA-B*14:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:01:10 Protein Expression Plasmid Vector	PHLAP92510450	Plasmid vector containing HLA-B*14:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:10 protein. This plasmid can be used for constructing HLA-B*14:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:11 Protein Expression Plasmid Vector	PHLAP92510451	Plasmid vector containing HLA-B*14:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:11 protein. This plasmid can be used for constructing HLA-B*14:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:12 Protein Expression Plasmid Vector	PHLAP92510452	Plasmid vector containing HLA-B*14:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:12 protein. This plasmid can be used for constructing HLA-B*14:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:13 Protein Expression Plasmid Vector	PHLAP92510453	Plasmid vector containing HLA-B*14:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:13 protein. This plasmid can be used for constructing HLA-B*14:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:14 Protein Expression Plasmid Vector	PHLAP92510454	Plasmid vector containing HLA-B*14:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:14 protein. This plasmid can be used for constructing HLA-B*14:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:01:15 Protein Expression Plasmid Vector	PHLAP92510455	Plasmid vector containing HLA-B*14:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:01:15 protein. This plasmid can be used for constructing HLA-B*14:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:01 Protein Expression Plasmid Vector	PHLAP92510456	Plasmid vector containing HLA-B*14:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:01 protein. This plasmid can be used for constructing HLA-B*14:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:02 Protein Expression Plasmid Vector	PHLAP92510457	Plasmid vector containing HLA-B*14:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:02 protein. This plasmid can be used for constructing HLA-B*14:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:02:01:03 Protein Expression Plasmid Vector	PHLAP92510458	Plasmid vector containing HLA-B*14:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:03 protein. This plasmid can be used for constructing HLA-B*14:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:04 Protein Expression Plasmid Vector	PHLAP92510459	Plasmid vector containing HLA-B*14:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:04 protein. This plasmid can be used for constructing HLA-B*14:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:05 Protein Expression Plasmid Vector	PHLAP92510460	Plasmid vector containing HLA-B*14:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:05 protein. This plasmid can be used for constructing HLA-B*14:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:06 Protein Expression Plasmid Vector	PHLAP92510461	Plasmid vector containing HLA-B*14:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:06 protein. This plasmid can be used for constructing HLA-B*14:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:07 Protein Expression Plasmid Vector	PHLAP92510462	Plasmid vector containing HLA-B*14:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:07 protein. This plasmid can be used for constructing HLA-B*14:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:08 Protein Expression Plasmid Vector	PHLAP92510463	Plasmid vector containing HLA-B*14:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:08 protein. This plasmid can be used for constructing HLA-B*14:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:09 Protein Expression Plasmid Vector	PHLAP92510464	Plasmid vector containing HLA-B*14:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:09 protein. This plasmid can be used for constructing HLA-B*14:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:02:01:10 Protein Expression Plasmid Vector	PHLAP92510465	Plasmid vector containing HLA-B*14:02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:10 protein. This plasmid can be used for constructing HLA-B*14:02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:11 Protein Expression Plasmid Vector	PHLAP92510466	Plasmid vector containing HLA-B*14:02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:11 protein. This plasmid can be used for constructing HLA-B*14:02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:12 Protein Expression Plasmid Vector	PHLAP92510467	Plasmid vector containing HLA-B*14:02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:12 protein. This plasmid can be used for constructing HLA-B*14:02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:13 Protein Expression Plasmid Vector	PHLAP92510468	Plasmid vector containing HLA-B*14:02:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:13 protein. This plasmid can be used for constructing HLA-B*14:02:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:14 Protein Expression Plasmid Vector	PHLAP92510469	Plasmid vector containing HLA-B*14:02:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:14 protein. This plasmid can be used for constructing HLA-B*14:02:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:15 Protein Expression Plasmid Vector	PHLAP92510470	Plasmid vector containing HLA-B*14:02:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:15 protein. This plasmid can be used for constructing HLA-B*14:02:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:16 Protein Expression Plasmid Vector	PHLAP92510471	Plasmid vector containing HLA-B*14:02:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:16 protein. This plasmid can be used for constructing HLA-B*14:02:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:02:01:17 Protein Expression Plasmid Vector	PHLAP92510472	Plasmid vector containing HLA-B*14:02:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:17 protein. This plasmid can be used for constructing HLA-B*14:02:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:18 Protein Expression Plasmid Vector	PHLAP92510473	Plasmid vector containing HLA-B*14:02:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:18 protein. This plasmid can be used for constructing HLA-B*14:02:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:19 Protein Expression Plasmid Vector	PHLAP92510474	Plasmid vector containing HLA-B*14:02:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:19 protein. This plasmid can be used for constructing HLA-B*14:02:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:20 Protein Expression Plasmid Vector	PHLAP92510475	Plasmid vector containing HLA-B*14:02:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:20 protein. This plasmid can be used for constructing HLA-B*14:02:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:21 Protein Expression Plasmid Vector	PHLAP92510476	Plasmid vector containing HLA-B*14:02:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:21 protein. This plasmid can be used for constructing HLA-B*14:02:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:22 Protein Expression Plasmid Vector	PHLAP92510477	Plasmid vector containing HLA-B*14:02:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:22 protein. This plasmid can be used for constructing HLA-B*14:02:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:23 Protein Expression Plasmid Vector	PHLAP92510478	Plasmid vector containing HLA-B*14:02:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:23 protein. This plasmid can be used for constructing HLA-B*14:02:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:02:01:24 Protein Expression Plasmid Vector	PHLAP92510479	Plasmid vector containing HLA-B*14:02:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:24 protein. This plasmid can be used for constructing HLA-B*14:02:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:25Q Protein Expression Plasmid Vector	PHLAP92510480	Plasmid vector containing HLA-B*14:02:01:25Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:25Q protein. This plasmid can be used for constructing HLA-B*14:02:01:25Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:25Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:26 Protein Expression Plasmid Vector	PHLAP92510481	Plasmid vector containing HLA-B*14:02:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:26 protein. This plasmid can be used for constructing HLA-B*14:02:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:27 Protein Expression Plasmid Vector	PHLAP92510482	Plasmid vector containing HLA-B*14:02:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:27 protein. This plasmid can be used for constructing HLA-B*14:02:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:28 Protein Expression Plasmid Vector	PHLAP92510483	Plasmid vector containing HLA-B*14:02:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:28 protein. This plasmid can be used for constructing HLA-B*14:02:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:29 Protein Expression Plasmid Vector	PHLAP92510484	Plasmid vector containing HLA-B*14:02:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:29 protein. This plasmid can be used for constructing HLA-B*14:02:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:01:30 Protein Expression Plasmid Vector	PHLAP92510485	Plasmid vector containing HLA-B*14:02:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:01:30 protein. This plasmid can be used for constructing HLA-B*14:02:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:02:02 Protein Expression Plasmid Vector	PHLAP92510486	Plasmid vector containing HLA-B*14:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:02 protein. This plasmid can be used for constructing HLA-B*14:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:03 Protein Expression Plasmid Vector	PHLAP92510487	Plasmid vector containing HLA-B*14:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:03 protein. This plasmid can be used for constructing HLA-B*14:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:04 Protein Expression Plasmid Vector	PHLAP92510488	Plasmid vector containing HLA-B*14:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:04 protein. This plasmid can be used for constructing HLA-B*14:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:05 Protein Expression Plasmid Vector	PHLAP92510489	Plasmid vector containing HLA-B*14:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:05 protein. This plasmid can be used for constructing HLA-B*14:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:06 Protein Expression Plasmid Vector	PHLAP92510490	Plasmid vector containing HLA-B*14:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:06 protein. This plasmid can be used for constructing HLA-B*14:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:07 Protein Expression Plasmid Vector	PHLAP92510491	Plasmid vector containing HLA-B*14:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:07 protein. This plasmid can be used for constructing HLA-B*14:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:08 Protein Expression Plasmid Vector	PHLAP92510492	Plasmid vector containing HLA-B*14:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:08 protein. This plasmid can be used for constructing HLA-B*14:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:09 Protein Expression Plasmid Vector	PHLAP92510493	Plasmid vector containing HLA-B*14:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:09 protein. This plasmid can be used for constructing HLA-B*14:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:02:10 Protein Expression Plasmid Vector	PHLAP92510494	Plasmid vector containing HLA-B*14:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:10 protein. This plasmid can be used for constructing HLA-B*14:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:11 Protein Expression Plasmid Vector	PHLAP92510495	Plasmid vector containing HLA-B*14:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:11 protein. This plasmid can be used for constructing HLA-B*14:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:12 Protein Expression Plasmid Vector	PHLAP92510496	Plasmid vector containing HLA-B*14:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:12 protein. This plasmid can be used for constructing HLA-B*14:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:13 Protein Expression Plasmid Vector	PHLAP92510497	Plasmid vector containing HLA-B*14:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:13 protein. This plasmid can be used for constructing HLA-B*14:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:14 Protein Expression Plasmid Vector	PHLAP92510498	Plasmid vector containing HLA-B*14:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:14 protein. This plasmid can be used for constructing HLA-B*14:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:15 Protein Expression Plasmid Vector	PHLAP92510499	Plasmid vector containing HLA-B*14:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:15 protein. This plasmid can be used for constructing HLA-B*14:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:16 Protein Expression Plasmid Vector	PHLAP925105000	Plasmid vector containing HLA-B*14:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:16 protein. This plasmid can be used for constructing HLA-B*14:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:17 Protein Expression Plasmid Vector	PHLAP925105001	Plasmid vector containing HLA-B*14:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:17 protein. This plasmid can be used for constructing HLA-B*14:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:02:18 Protein Expression Plasmid Vector	PHLAP92510502	Plasmid vector containing HLA-B*14:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:18 protein. This plasmid can be used for constructing HLA-B*14:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:19 Protein Expression Plasmid Vector	PHLAP92510503	Plasmid vector containing HLA-B*14:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:19 protein. This plasmid can be used for constructing HLA-B*14:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:20 Protein Expression Plasmid Vector	PHLAP92510504	Plasmid vector containing HLA-B*14:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:20 protein. This plasmid can be used for constructing HLA-B*14:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:21 Protein Expression Plasmid Vector	PHLAP92510505	Plasmid vector containing HLA-B*14:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:21 protein. This plasmid can be used for constructing HLA-B*14:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:22 Protein Expression Plasmid Vector	PHLAP92510506	Plasmid vector containing HLA-B*14:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:22 protein. This plasmid can be used for constructing HLA-B*14:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:23 Protein Expression Plasmid Vector	PHLAP92510507	Plasmid vector containing HLA-B*14:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:23 protein. This plasmid can be used for constructing HLA-B*14:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:24 Protein Expression Plasmid Vector	PHLAP92510508	Plasmid vector containing HLA-B*14:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:24 protein. This plasmid can be used for constructing HLA-B*14:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:25 Protein Expression Plasmid Vector	PHLAP92510509	Plasmid vector containing HLA-B*14:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:25 protein. This plasmid can be used for constructing HLA-B*14:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:02:26 Protein Expression Plasmid Vector	PHLAP92510510	Plasmid vector containing HLA-B*14:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:26 protein. This plasmid can be used for constructing HLA-B*14:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:27 Protein Expression Plasmid Vector	PHLAP92510511	Plasmid vector containing HLA-B*14:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:27 protein. This plasmid can be used for constructing HLA-B*14:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:28 Protein Expression Plasmid Vector	PHLAP92510512	Plasmid vector containing HLA-B*14:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:28 protein. This plasmid can be used for constructing HLA-B*14:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:29 Protein Expression Plasmid Vector	PHLAP92510513	Plasmid vector containing HLA-B*14:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:29 protein. This plasmid can be used for constructing HLA-B*14:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:30 Protein Expression Plasmid Vector	PHLAP92510514	Plasmid vector containing HLA-B*14:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:30 protein. This plasmid can be used for constructing HLA-B*14:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:31:01 Protein Expression Plasmid Vector	PHLAP92510515	Plasmid vector containing HLA-B*14:02:31:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:31:01 protein. This plasmid can be used for constructing HLA-B*14:02:31:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:31:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:31:02 Protein Expression Plasmid Vector	PHLAP92510516	Plasmid vector containing HLA-B*14:02:31:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:31:02 protein. This plasmid can be used for constructing HLA-B*14:02:31:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:31:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:32 Protein Expression Plasmid Vector	PHLAP92510517	Plasmid vector containing HLA-B*14:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:32 protein. This plasmid can be used for constructing HLA-B*14:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:02:33 Protein Expression Plasmid Vector	PHLAP92510518	Plasmid vector containing HLA-B*14:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:33 protein. This plasmid can be used for constructing HLA-B*14:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:02:34 Protein Expression Plasmid Vector	PHLAP92510519	Plasmid vector containing HLA-B*14:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:02:34 protein. This plasmid can be used for constructing HLA-B*14:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:03 Protein Expression Plasmid Vector	PHLAP925105220	Plasmid vector containing HLA-B*14:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:03 protein. This plasmid can be used for constructing HLA-B*14:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:04 Protein Expression Plasmid Vector	PHLAP925105221	Plasmid vector containing HLA-B*14:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:04 protein. This plasmid can be used for constructing HLA-B*14:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:05 Protein Expression Plasmid Vector	PHLAP925105222	Plasmid vector containing HLA-B*14:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:05 protein. This plasmid can be used for constructing HLA-B*14:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:06:01 Protein Expression Plasmid Vector	PHLAP925105223	Plasmid vector containing HLA-B*14:06:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:06:01 protein. This plasmid can be used for constructing HLA-B*14:06:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:06:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:06:02 Protein Expression Plasmid Vector	PHLAP925105224	Plasmid vector containing HLA-B*14:06:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:06:02 protein. This plasmid can be used for constructing HLA-B*14:06:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:06:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:07N Protein Expression Plasmid Vector	PHLAP925105225	Plasmid vector containing HLA-B*14:07N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:07N protein. This plasmid can be used for constructing HLA-B*14:07N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:07N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:08:01 Protein Expression Plasmid Vector	PHLAP92510526	Plasmid vector containing HLA-B*14:08:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:08:01 protein. This plasmid can be used for constructing HLA-B*14:08:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:08:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:08:02 Protein Expression Plasmid Vector	PHLAP92510527	Plasmid vector containing HLA-B*14:08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:08:02 protein. This plasmid can be used for constructing HLA-B*14:08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:09 Protein Expression Plasmid Vector	PHLAP92510528	Plasmid vector containing HLA-B*14:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:09 protein. This plasmid can be used for constructing HLA-B*14:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:10 Protein Expression Plasmid Vector	PHLAP92510529	Plasmid vector containing HLA-B*14:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:10 protein. This plasmid can be used for constructing HLA-B*14:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:100N Protein Expression Plasmid Vector	PHLAP92510530	Plasmid vector containing HLA-B*14:100N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:100N protein. This plasmid can be used for constructing HLA-B*14:100N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:100N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:101N Protein Expression Plasmid Vector	PHLAP92510531	Plasmid vector containing HLA-B*14:101N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:101N protein. This plasmid can be used for constructing HLA-B*14:101N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:101N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:102 Protein Expression Plasmid Vector	PHLAP92510532	Plasmid vector containing HLA-B*14:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:102 protein. This plasmid can be used for constructing HLA-B*14:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:103 Protein Expression Plasmid Vector	PHLAP92510533	Plasmid vector containing HLA-B*14:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:103 protein. This plasmid can be used for constructing HLA-B*14:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:104 Protein Expression Plasmid Vector	PHLAP92510534	Plasmid vector containing HLA-B*14:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:104 protein. This plasmid can be used for constructing HLA-B*14:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:105 Protein Expression Plasmid Vector	PHLAP92510535	Plasmid vector containing HLA-B*14:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:105 protein. This plasmid can be used for constructing HLA-B*14:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:106 Protein Expression Plasmid Vector	PHLAP92510536	Plasmid vector containing HLA-B*14:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:106 protein. This plasmid can be used for constructing HLA-B*14:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:107 Protein Expression Plasmid Vector	PHLAP92510537	Plasmid vector containing HLA-B*14:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:107 protein. This plasmid can be used for constructing HLA-B*14:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:108Q Protein Expression Plasmid Vector	PHLAP92510538	Plasmid vector containing HLA-B*14:108Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:108Q protein. This plasmid can be used for constructing HLA-B*14:108Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:108Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:109 Protein Expression Plasmid Vector	PHLAP92510539	Plasmid vector containing HLA-B*14:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:109 protein. This plasmid can be used for constructing HLA-B*14:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:11 Protein Expression Plasmid Vector	PHLAP92510540	Plasmid vector containing HLA-B*14:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:11 protein. This plasmid can be used for constructing HLA-B*14:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:110 Protein Expression Plasmid Vector	PHLAP92510541	Plasmid vector containing HLA-B*14:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:110 protein. This plasmid can be used for constructing HLA-B*14:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:111 Protein Expression Plasmid Vector	PHLAP92510542	Plasmid vector containing HLA-B*14:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:111 protein. This plasmid can be used for constructing HLA-B*14:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:112 Protein Expression Plasmid Vector	PHLAP92510543	Plasmid vector containing HLA-B*14:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:112 protein. This plasmid can be used for constructing HLA-B*14:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:113N Protein Expression Plasmid Vector	PHLAP92510544	Plasmid vector containing HLA-B*14:113N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:113N protein. This plasmid can be used for constructing HLA-B*14:113N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:113N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:114 Protein Expression Plasmid Vector	PHLAP92510545	Plasmid vector containing HLA-B*14:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:114 protein. This plasmid can be used for constructing HLA-B*14:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:115 Protein Expression Plasmid Vector	PHLAP92510546	Plasmid vector containing HLA-B*14:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:115 protein. This plasmid can be used for constructing HLA-B*14:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:116 Protein Expression Plasmid Vector	PHLAP92510547	Plasmid vector containing HLA-B*14:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:116 protein. This plasmid can be used for constructing HLA-B*14:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:117 Protein Expression Plasmid Vector	PHLAP92510548	Plasmid vector containing HLA-B*14:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:117 protein. This plasmid can be used for constructing HLA-B*14:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:118 Protein Expression Plasmid Vector	PHLAP92510549	Plasmid vector containing HLA-B*14:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:118 protein. This plasmid can be used for constructing HLA-B*14:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:119 Protein Expression Plasmid Vector	PHLAP92510550	Plasmid vector containing HLA-B*14:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:119 protein. This plasmid can be used for constructing HLA-B*14:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:12 Protein Expression Plasmid Vector	PHLAP92510551	Plasmid vector containing HLA-B*14:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:12 protein. This plasmid can be used for constructing HLA-B*14:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:120 Protein Expression Plasmid Vector	PHLAP92510552	Plasmid vector containing HLA-B*14:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:120 protein. This plasmid can be used for constructing HLA-B*14:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:121 Protein Expression Plasmid Vector	PHLAP92510553	Plasmid vector containing HLA-B*14:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:121 protein. This plasmid can be used for constructing HLA-B*14:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:122 Protein Expression Plasmid Vector	PHLAP92510554	Plasmid vector containing HLA-B*14:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:122 protein. This plasmid can be used for constructing HLA-B*14:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:123 Protein Expression Plasmid Vector	PHLAP92510555	Plasmid vector containing HLA-B*14:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:123 protein. This plasmid can be used for constructing HLA-B*14:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:124 Protein Expression Plasmid Vector	PHLAP92510556	Plasmid vector containing HLA-B*14:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:124 protein. This plasmid can be used for constructing HLA-B*14:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:125 Protein Expression Plasmid Vector	PHLAP92510557	Plasmid vector containing HLA-B*14:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:125 protein. This plasmid can be used for constructing HLA-B*14:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:126 Protein Expression Plasmid Vector	PHLAP92510558	Plasmid vector containing HLA-B*14:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:126 protein. This plasmid can be used for constructing HLA-B*14:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:127 Protein Expression Plasmid Vector	PHLAP92510559	Plasmid vector containing HLA-B*14:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:127 protein. This plasmid can be used for constructing HLA-B*14:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:128 Protein Expression Plasmid Vector	PHLAP92510560	Plasmid vector containing HLA-B*14:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:128 protein. This plasmid can be used for constructing HLA-B*14:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:129 Protein Expression Plasmid Vector	PHLAP92510561	Plasmid vector containing HLA-B*14:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:129 protein. This plasmid can be used for constructing HLA-B*14:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:13 Protein Expression Plasmid Vector	PHLAP92510562	Plasmid vector containing HLA-B*14:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:13 protein. This plasmid can be used for constructing HLA-B*14:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:130 Protein Expression Plasmid Vector	PHLAP92510563	Plasmid vector containing HLA-B*14:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:130 protein. This plasmid can be used for constructing HLA-B*14:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:131N Protein Expression Plasmid Vector	PHLAP92510564	Plasmid vector containing HLA-B*14:131N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:131N protein. This plasmid can be used for constructing HLA-B*14:131N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:131N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:132 Protein Expression Plasmid Vector	PHLAP92510565	Plasmid vector containing HLA-B*14:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:132 protein. This plasmid can be used for constructing HLA-B*14:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:133 Protein Expression Plasmid Vector	PHLAP92510566	Plasmid vector containing HLA-B*14:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:133 protein. This plasmid can be used for constructing HLA-B*14:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:134 Protein Expression Plasmid Vector	PHLAP92510567	Plasmid vector containing HLA-B*14:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:134 protein. This plasmid can be used for constructing HLA-B*14:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:135 Protein Expression Plasmid Vector	PHLAP92510568	Plasmid vector containing HLA-B*14:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:135 protein. This plasmid can be used for constructing HLA-B*14:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:136 Protein Expression Plasmid Vector	PHLAP92510569	Plasmid vector containing HLA-B*14:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:136 protein. This plasmid can be used for constructing HLA-B*14:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:137 Protein Expression Plasmid Vector	PHLAP92510570	Plasmid vector containing HLA-B*14:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:137 protein. This plasmid can be used for constructing HLA-B*14:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:138 Protein Expression Plasmid Vector	PHLAP92510571	Plasmid vector containing HLA-B*14:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:138 protein. This plasmid can be used for constructing HLA-B*14:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:139N Protein Expression Plasmid Vector	PHLAP92510572	Plasmid vector containing HLA-B*14:139N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:139N protein. This plasmid can be used for constructing HLA-B*14:139N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:139N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:14 Protein Expression Plasmid Vector	PHLAP92510573	Plasmid vector containing HLA-B*14:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:14 protein. This plasmid can be used for constructing HLA-B*14:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:15 Protein Expression Plasmid Vector	PHLAP92510574	Plasmid vector containing HLA-B*14:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:15 protein. This plasmid can be used for constructing HLA-B*14:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:16 Protein Expression Plasmid Vector	PHLAP92510575	Plasmid vector containing HLA-B*14:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:16 protein. This plasmid can be used for constructing HLA-B*14:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:17 Protein Expression Plasmid Vector	PHLAP92510576	Plasmid vector containing HLA-B*14:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:17 protein. This plasmid can be used for constructing HLA-B*14:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:18 Protein Expression Plasmid Vector	PHLAP92510577	Plasmid vector containing HLA-B*14:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:18 protein. This plasmid can be used for constructing HLA-B*14:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:19 Protein Expression Plasmid Vector	PHLAP92510578	Plasmid vector containing HLA-B*14:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:19 protein. This plasmid can be used for constructing HLA-B*14:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:20 Protein Expression Plasmid Vector	PHLAP92510579	Plasmid vector containing HLA-B*14:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:20 protein. This plasmid can be used for constructing HLA-B*14:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:21:01 Protein Expression Plasmid Vector	PHLAP92510580	Plasmid vector containing HLA-B*14:21:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:21:01 protein. This plasmid can be used for constructing HLA-B*14:21:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:21:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:21:02 Protein Expression Plasmid Vector	PHLAP92510581	Plasmid vector containing HLA-B*14:21:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:21:02 protein. This plasmid can be used for constructing HLA-B*14:21:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:21:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:22 Protein Expression Plasmid Vector	PHLAP92510582	Plasmid vector containing HLA-B*14:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:22 protein. This plasmid can be used for constructing HLA-B*14:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:23 Protein Expression Plasmid Vector	PHLAP92510583	Plasmid vector containing HLA-B*14:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:23 protein. This plasmid can be used for constructing HLA-B*14:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:24 Protein Expression Plasmid Vector	PHLAP92510584	Plasmid vector containing HLA-B*14:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:24 protein. This plasmid can be used for constructing HLA-B*14:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:25 Protein Expression Plasmid Vector	PHLAP92510585	Plasmid vector containing HLA-B*14:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:25 protein. This plasmid can be used for constructing HLA-B*14:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:26 Protein Expression Plasmid Vector	PHLAP92510586	Plasmid vector containing HLA-B*14:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:26 protein. This plasmid can be used for constructing HLA-B*14:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:27 Protein Expression Plasmid Vector	PHLAP92510587	Plasmid vector containing HLA-B*14:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:27 protein. This plasmid can be used for constructing HLA-B*14:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:28 Protein Expression Plasmid Vector	PHLAP92510588	Plasmid vector containing HLA-B*14:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:28 protein. This plasmid can be used for constructing HLA-B*14:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:29 Protein Expression Plasmid Vector	PHLAP92510589	Plasmid vector containing HLA-B*14:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:29 protein. This plasmid can be used for constructing HLA-B*14:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:30 Protein Expression Plasmid Vector	PHLAP92510590	Plasmid vector containing HLA-B*14:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:30 protein. This plasmid can be used for constructing HLA-B*14:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:31 Protein Expression Plasmid Vector	PHLAP92510591	Plasmid vector containing HLA-B*14:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:31 protein. This plasmid can be used for constructing HLA-B*14:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:32 Protein Expression Plasmid Vector	PHLAP92510592	Plasmid vector containing HLA-B*14:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:32 protein. This plasmid can be used for constructing HLA-B*14:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:33 Protein Expression Plasmid Vector	PHLAP92510593	Plasmid vector containing HLA-B*14:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:33 protein. This plasmid can be used for constructing HLA-B*14:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:34 Protein Expression Plasmid Vector	PHLAP92510594	Plasmid vector containing HLA-B*14:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:34 protein. This plasmid can be used for constructing HLA-B*14:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:35 Protein Expression Plasmid Vector	PHLAP92510595	Plasmid vector containing HLA-B*14:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:35 protein. This plasmid can be used for constructing HLA-B*14:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:36 Protein Expression Plasmid Vector	PHLAP92510596	Plasmid vector containing HLA-B*14:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:36 protein. This plasmid can be used for constructing HLA-B*14:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:37 Protein Expression Plasmid Vector	PHLAP92510597	Plasmid vector containing HLA-B*14:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:37 protein. This plasmid can be used for constructing HLA-B*14:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:38 Protein Expression Plasmid Vector	PHLAP92510598	Plasmid vector containing HLA-B*14:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:38 protein. This plasmid can be used for constructing HLA-B*14:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:39 Protein Expression Plasmid Vector	PHLAP92510599	Plasmid vector containing HLA-B*14:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:39 protein. This plasmid can be used for constructing HLA-B*14:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:40 Protein Expression Plasmid Vector	PHLAP925106000	Plasmid vector containing HLA-B*14:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:40 protein. This plasmid can be used for constructing HLA-B*14:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:41N Protein Expression Plasmid Vector	PHLAP925106001	Plasmid vector containing HLA-B*14:41N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:41N protein. This plasmid can be used for constructing HLA-B*14:41N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:41N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:42:01 Protein Expression Plasmid Vector	PHLAP925106002	Plasmid vector containing HLA-B*14:42:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:42:01 protein. This plasmid can be used for constructing HLA-B*14:42:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:42:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:42:02 Protein Expression Plasmid Vector	PHLAP925106003	Plasmid vector containing HLA-B*14:42:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:42:02 protein. This plasmid can be used for constructing HLA-B*14:42:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:42:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:43 Protein Expression Plasmid Vector	PHLAP925106004	Plasmid vector containing HLA-B*14:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:43 protein. This plasmid can be used for constructing HLA-B*14:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:44 Protein Expression Plasmid Vector	PHLAP925106005	Plasmid vector containing HLA-B*14:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:44 protein. This plasmid can be used for constructing HLA-B*14:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:45 Protein Expression Plasmid Vector	PHLAP92510606	Plasmid vector containing HLA-B*14:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:45 protein. This plasmid can be used for constructing HLA-B*14:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:46 Protein Expression Plasmid Vector	PHLAP92510607	Plasmid vector containing HLA-B*14:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:46 protein. This plasmid can be used for constructing HLA-B*14:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:47 Protein Expression Plasmid Vector	PHLAP92510608	Plasmid vector containing HLA-B*14:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:47 protein. This plasmid can be used for constructing HLA-B*14:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:48 Protein Expression Plasmid Vector	PHLAP92510609	Plasmid vector containing HLA-B*14:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:48 protein. This plasmid can be used for constructing HLA-B*14:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:49 Protein Expression Plasmid Vector	PHLAP925106110	Plasmid vector containing HLA-B*14:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:49 protein. This plasmid can be used for constructing HLA-B*14:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:50 Protein Expression Plasmid Vector	PHLAP925106111	Plasmid vector containing HLA-B*14:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:50 protein. This plasmid can be used for constructing HLA-B*14:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:51 Protein Expression Plasmid Vector	PHLAP925106112	Plasmid vector containing HLA-B*14:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:51 protein. This plasmid can be used for constructing HLA-B*14:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:52 Protein Expression Plasmid Vector	PHLAP925106113	Plasmid vector containing HLA-B*14:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:52 protein. This plasmid can be used for constructing HLA-B*14:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:53 Protein Expression Plasmid Vector	PHLAP92510614	Plasmid vector containing HLA-B*14:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:53 protein. This plasmid can be used for constructing HLA-B*14:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:54 Protein Expression Plasmid Vector	PHLAP92510615	Plasmid vector containing HLA-B*14:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:54 protein. This plasmid can be used for constructing HLA-B*14:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:55 Protein Expression Plasmid Vector	PHLAP92510616	Plasmid vector containing HLA-B*14:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:55 protein. This plasmid can be used for constructing HLA-B*14:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:56 Protein Expression Plasmid Vector	PHLAP92510617	Plasmid vector containing HLA-B*14:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:56 protein. This plasmid can be used for constructing HLA-B*14:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:57 Protein Expression Plasmid Vector	PHLAP92510618	Plasmid vector containing HLA-B*14:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:57 protein. This plasmid can be used for constructing HLA-B*14:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:58 Protein Expression Plasmid Vector	PHLAP92510619	Plasmid vector containing HLA-B*14:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:58 protein. This plasmid can be used for constructing HLA-B*14:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:59 Protein Expression Plasmid Vector	PHLAP92510620	Plasmid vector containing HLA-B*14:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:59 protein. This plasmid can be used for constructing HLA-B*14:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:60 Protein Expression Plasmid Vector	PHLAP92510621	Plasmid vector containing HLA-B*14:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:60 protein. This plasmid can be used for constructing HLA-B*14:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:61 Protein Expression Plasmid Vector	PHLAP92510622	Plasmid vector containing HLA-B*14:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:61 protein. This plasmid can be used for constructing HLA-B*14:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:62 Protein Expression Plasmid Vector	PHLAP92510623	Plasmid vector containing HLA-B*14:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:62 protein. This plasmid can be used for constructing HLA-B*14:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:63 Protein Expression Plasmid Vector	PHLAP92510624	Plasmid vector containing HLA-B*14:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:63 protein. This plasmid can be used for constructing HLA-B*14:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:64 Protein Expression Plasmid Vector	PHLAP92510625	Plasmid vector containing HLA-B*14:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:64 protein. This plasmid can be used for constructing HLA-B*14:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:65 Protein Expression Plasmid Vector	PHLAP92510626	Plasmid vector containing HLA-B*14:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:65 protein. This plasmid can be used for constructing HLA-B*14:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:66 Protein Expression Plasmid Vector	PHLAP92510627	Plasmid vector containing HLA-B*14:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:66 protein. This plasmid can be used for constructing HLA-B*14:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:67 Protein Expression Plasmid Vector	PHLAP92510628	Plasmid vector containing HLA-B*14:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:67 protein. This plasmid can be used for constructing HLA-B*14:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:68 Protein Expression Plasmid Vector	PHLAP92510629	Plasmid vector containing HLA-B*14:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:68 protein. This plasmid can be used for constructing HLA-B*14:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:69N Protein Expression Plasmid Vector	PHLAP92510630	Plasmid vector containing HLA-B*14:69N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:69N protein. This plasmid can be used for constructing HLA-B*14:69N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:69N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:70Q Protein Expression Plasmid Vector	PHLAP92510631	Plasmid vector containing HLA-B*14:70Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:70Q protein. This plasmid can be used for constructing HLA-B*14:70Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:70Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:71 Protein Expression Plasmid Vector	PHLAP92510632	Plasmid vector containing HLA-B*14:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:71 protein. This plasmid can be used for constructing HLA-B*14:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:72N Protein Expression Plasmid Vector	PHLAP92510633	Plasmid vector containing HLA-B*14:72N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:72N protein. This plasmid can be used for constructing HLA-B*14:72N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:72N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:73 Protein Expression Plasmid Vector	PHLAP92510634	Plasmid vector containing HLA-B*14:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:73 protein. This plasmid can be used for constructing HLA-B*14:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:74 Protein Expression Plasmid Vector	PHLAP92510635	Plasmid vector containing HLA-B*14:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:74 protein. This plasmid can be used for constructing HLA-B*14:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:75 Protein Expression Plasmid Vector	PHLAP92510636	Plasmid vector containing HLA-B*14:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:75 protein. This plasmid can be used for constructing HLA-B*14:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:76N Protein Expression Plasmid Vector	PHLAP92510637	Plasmid vector containing HLA-B*14:76N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:76N protein. This plasmid can be used for constructing HLA-B*14:76N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:76N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:77 Protein Expression Plasmid Vector	PHLAP92510638	Plasmid vector containing HLA-B*14:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:77 protein. This plasmid can be used for constructing HLA-B*14:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:78 Protein Expression Plasmid Vector	PHLAP92510639	Plasmid vector containing HLA-B*14:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:78 protein. This plasmid can be used for constructing HLA-B*14:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:79N Protein Expression Plasmid Vector	PHLAP925106400	Plasmid vector containing HLA-B*14:79N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:79N protein. This plasmid can be used for constructing HLA-B*14:79N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:79N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:80 Protein Expression Plasmid Vector	PHLAP925106401	Plasmid vector containing HLA-B*14:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:80 protein. This plasmid can be used for constructing HLA-B*14:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:81 Protein Expression Plasmid Vector	PHLAP925106402	Plasmid vector containing HLA-B*14:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:81 protein. This plasmid can be used for constructing HLA-B*14:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:82 Protein Expression Plasmid Vector	PHLAP925106403	Plasmid vector containing HLA-B*14:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:82 protein. This plasmid can be used for constructing HLA-B*14:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:83 Protein Expression Plasmid Vector	PHLAP925106404	Plasmid vector containing HLA-B*14:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:83 protein. This plasmid can be used for constructing HLA-B*14:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:84 Protein Expression Plasmid Vector	PHLAP925106405	Plasmid vector containing HLA-B*14:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:84 protein. This plasmid can be used for constructing HLA-B*14:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:85N Protein Expression Plasmid Vector	PHLAP92510646	Plasmid vector containing HLA-B*14:85N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:85N protein. This plasmid can be used for constructing HLA-B*14:85N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:85N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:86 Protein Expression Plasmid Vector	PHLAP92510647	Plasmid vector containing HLA-B*14:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:86 protein. This plasmid can be used for constructing HLA-B*14:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:87 Protein Expression Plasmid Vector	PHLAP92510648	Plasmid vector containing HLA-B*14:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:87 protein. This plasmid can be used for constructing HLA-B*14:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:88 Protein Expression Plasmid Vector	PHLAP92510649	Plasmid vector containing HLA-B*14:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:88 protein. This plasmid can be used for constructing HLA-B*14:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:89 Protein Expression Plasmid Vector	PHLAP92510650	Plasmid vector containing HLA-B*14:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:89 protein. This plasmid can be used for constructing HLA-B*14:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:90 Protein Expression Plasmid Vector	PHLAP92510651	Plasmid vector containing HLA-B*14:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:90 protein. This plasmid can be used for constructing HLA-B*14:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:91 Protein Expression Plasmid Vector	PHLAP92510652	Plasmid vector containing HLA-B*14:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:91 protein. This plasmid can be used for constructing HLA-B*14:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:92 Protein Expression Plasmid Vector	PHLAP92510653	Plasmid vector containing HLA-B*14:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:92 protein. This plasmid can be used for constructing HLA-B*14:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*14:93 Protein Expression Plasmid Vector	PHLAP92510654	Plasmid vector containing HLA-B*14:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:93 protein. This plasmid can be used for constructing HLA-B*14:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:94 Protein Expression Plasmid Vector	PHLAP92510655	Plasmid vector containing HLA-B*14:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:94 protein. This plasmid can be used for constructing HLA-B*14:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:95 Protein Expression Plasmid Vector	PHLAP92510656	Plasmid vector containing HLA-B*14:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:95 protein. This plasmid can be used for constructing HLA-B*14:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:96 Protein Expression Plasmid Vector	PHLAP92510657	Plasmid vector containing HLA-B*14:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:96 protein. This plasmid can be used for constructing HLA-B*14:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:97 Protein Expression Plasmid Vector	PHLAP92510658	Plasmid vector containing HLA-B*14:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:97 protein. This plasmid can be used for constructing HLA-B*14:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:98 Protein Expression Plasmid Vector	PHLAP92510659	Plasmid vector containing HLA-B*14:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:98 protein. This plasmid can be used for constructing HLA-B*14:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*14:99 Protein Expression Plasmid Vector	PHLAP92510660	Plasmid vector containing HLA-B*14:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*14:99 protein. This plasmid can be used for constructing HLA-B*14:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*14:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:01 Protein Expression Plasmid Vector	PHLAP92510661	Plasmid vector containing HLA-B*15:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:01 protein. This plasmid can be used for constructing HLA-B*15:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:01:02N Protein Expression Plasmid Vector	PHLAP92510662	Plasmid vector containing HLA-B*15:01:01:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:02N protein. This plasmid can be used for constructing HLA-B*15:01:01:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:03 Protein Expression Plasmid Vector	PHLAP92510663	Plasmid vector containing HLA-B*15:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:03 protein. This plasmid can be used for constructing HLA-B*15:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:04 Protein Expression Plasmid Vector	PHLAP92510664	Plasmid vector containing HLA-B*15:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:04 protein. This plasmid can be used for constructing HLA-B*15:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:05 Protein Expression Plasmid Vector	PHLAP92510665	Plasmid vector containing HLA-B*15:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:05 protein. This plasmid can be used for constructing HLA-B*15:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:06 Protein Expression Plasmid Vector	PHLAP92510666	Plasmid vector containing HLA-B*15:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:06 protein. This plasmid can be used for constructing HLA-B*15:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:07 Protein Expression Plasmid Vector	PHLAP92510667	Plasmid vector containing HLA-B*15:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:07 protein. This plasmid can be used for constructing HLA-B*15:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:08 Protein Expression Plasmid Vector	PHLAP92510668	Plasmid vector containing HLA-B*15:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:08 protein. This plasmid can be used for constructing HLA-B*15:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:01:09 Protein Expression Plasmid Vector	PHLAP92510669	Plasmid vector containing HLA-B*15:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:09 protein. This plasmid can be used for constructing HLA-B*15:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:10 Protein Expression Plasmid Vector	PHLAP92510670	Plasmid vector containing HLA-B*15:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:10 protein. This plasmid can be used for constructing HLA-B*15:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:11 Protein Expression Plasmid Vector	PHLAP92510671	Plasmid vector containing HLA-B*15:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:11 protein. This plasmid can be used for constructing HLA-B*15:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:12 Protein Expression Plasmid Vector	PHLAP92510672	Plasmid vector containing HLA-B*15:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:12 protein. This plasmid can be used for constructing HLA-B*15:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:13 Protein Expression Plasmid Vector	PHLAP92510673	Plasmid vector containing HLA-B*15:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:13 protein. This plasmid can be used for constructing HLA-B*15:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:14 Protein Expression Plasmid Vector	PHLAP92510674	Plasmid vector containing HLA-B*15:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:14 protein. This plasmid can be used for constructing HLA-B*15:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:15 Protein Expression Plasmid Vector	PHLAP92510675	Plasmid vector containing HLA-B*15:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:15 protein. This plasmid can be used for constructing HLA-B*15:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:01:16 Protein Expression Plasmid Vector	PHLAP92510676	Plasmid vector containing HLA-B*15:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:16 protein. This plasmid can be used for constructing HLA-B*15:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:17 Protein Expression Plasmid Vector	PHLAP92510677	Plasmid vector containing HLA-B*15:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:17 protein. This plasmid can be used for constructing HLA-B*15:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:18 Protein Expression Plasmid Vector	PHLAP92510678	Plasmid vector containing HLA-B*15:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:18 protein. This plasmid can be used for constructing HLA-B*15:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:19 Protein Expression Plasmid Vector	PHLAP92510679	Plasmid vector containing HLA-B*15:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:19 protein. This plasmid can be used for constructing HLA-B*15:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:20 Protein Expression Plasmid Vector	PHLAP92510680	Plasmid vector containing HLA-B*15:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:20 protein. This plasmid can be used for constructing HLA-B*15:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:21 Protein Expression Plasmid Vector	PHLAP92510681	Plasmid vector containing HLA-B*15:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:21 protein. This plasmid can be used for constructing HLA-B*15:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:22 Protein Expression Plasmid Vector	PHLAP92510682	Plasmid vector containing HLA-B*15:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:22 protein. This plasmid can be used for constructing HLA-B*15:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:01:23 Protein Expression Plasmid Vector	PHLAP92510683	Plasmid vector containing HLA-B*15:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:23 protein. This plasmid can be used for constructing HLA-B*15:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:24 Protein Expression Plasmid Vector	PHLAP92510684	Plasmid vector containing HLA-B*15:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:24 protein. This plasmid can be used for constructing HLA-B*15:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:25 Protein Expression Plasmid Vector	PHLAP92510685	Plasmid vector containing HLA-B*15:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:25 protein. This plasmid can be used for constructing HLA-B*15:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:26 Protein Expression Plasmid Vector	PHLAP92510686	Plasmid vector containing HLA-B*15:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:26 protein. This plasmid can be used for constructing HLA-B*15:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:27 Protein Expression Plasmid Vector	PHLAP92510687	Plasmid vector containing HLA-B*15:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:27 protein. This plasmid can be used for constructing HLA-B*15:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:28 Protein Expression Plasmid Vector	PHLAP92510688	Plasmid vector containing HLA-B*15:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:28 protein. This plasmid can be used for constructing HLA-B*15:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:29 Protein Expression Plasmid Vector	PHLAP92510689	Plasmid vector containing HLA-B*15:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:29 protein. This plasmid can be used for constructing HLA-B*15:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:01:30 Protein Expression Plasmid Vector	PHLAP92510690	Plasmid vector containing HLA-B*15:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:30 protein. This plasmid can be used for constructing HLA-B*15:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:31 Protein Expression Plasmid Vector	PHLAP92510691	Plasmid vector containing HLA-B*15:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:31 protein. This plasmid can be used for constructing HLA-B*15:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:32 Protein Expression Plasmid Vector	PHLAP92510692	Plasmid vector containing HLA-B*15:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:32 protein. This plasmid can be used for constructing HLA-B*15:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:33 Protein Expression Plasmid Vector	PHLAP92510693	Plasmid vector containing HLA-B*15:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:33 protein. This plasmid can be used for constructing HLA-B*15:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:34 Protein Expression Plasmid Vector	PHLAP92510694	Plasmid vector containing HLA-B*15:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:34 protein. This plasmid can be used for constructing HLA-B*15:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:35 Protein Expression Plasmid Vector	PHLAP92510695	Plasmid vector containing HLA-B*15:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:35 protein. This plasmid can be used for constructing HLA-B*15:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:36 Protein Expression Plasmid Vector	PHLAP92510696	Plasmid vector containing HLA-B*15:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:36 protein. This plasmid can be used for constructing HLA-B*15:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:01:37 Protein Expression Plasmid Vector	PHLAP92510697	Plasmid vector containing HLA-B*15:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:37 protein. This plasmid can be used for constructing HLA-B*15:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:38 Protein Expression Plasmid Vector	PHLAP92510698	Plasmid vector containing HLA-B*15:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:38 protein. This plasmid can be used for constructing HLA-B*15:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:39Q Protein Expression Plasmid Vector	PHLAP92510699	Plasmid vector containing HLA-B*15:01:01:39Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:39Q protein. This plasmid can be used for constructing HLA-B*15:01:01:39Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:39Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:40 Protein Expression Plasmid Vector	PHLAP925107000	Plasmid vector containing HLA-B*15:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:40 protein. This plasmid can be used for constructing HLA-B*15:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:41 Protein Expression Plasmid Vector	PHLAP925107001	Plasmid vector containing HLA-B*15:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:41 protein. This plasmid can be used for constructing HLA-B*15:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:42 Protein Expression Plasmid Vector	PHLAP925107002	Plasmid vector containing HLA-B*15:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:42 protein. This plasmid can be used for constructing HLA-B*15:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:43 Protein Expression Plasmid Vector	PHLAP925107003	Plasmid vector containing HLA-B*15:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:43 protein. This plasmid can be used for constructing HLA-B*15:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:01:44 Protein Expression Plasmid Vector	PHLAP92510704	Plasmid vector containing HLA-B*15:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:44 protein. This plasmid can be used for constructing HLA-B*15:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:45 Protein Expression Plasmid Vector	PHLAP92510705	Plasmid vector containing HLA-B*15:01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:45 protein. This plasmid can be used for constructing HLA-B*15:01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:46 Protein Expression Plasmid Vector	PHLAP92510706	Plasmid vector containing HLA-B*15:01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:46 protein. This plasmid can be used for constructing HLA-B*15:01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:47 Protein Expression Plasmid Vector	PHLAP92510707	Plasmid vector containing HLA-B*15:01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:47 protein. This plasmid can be used for constructing HLA-B*15:01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:48 Protein Expression Plasmid Vector	PHLAP92510708	Plasmid vector containing HLA-B*15:01:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:48 protein. This plasmid can be used for constructing HLA-B*15:01:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:49 Protein Expression Plasmid Vector	PHLAP92510709	Plasmid vector containing HLA-B*15:01:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:49 protein. This plasmid can be used for constructing HLA-B*15:01:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:50 Protein Expression Plasmid Vector	PHLAP92510710	Plasmid vector containing HLA-B*15:01:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:50 protein. This plasmid can be used for constructing HLA-B*15:01:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:01:51 Protein Expression Plasmid Vector	PHLAP92510711	Plasmid vector containing HLA-B*15:01:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:51 protein. This plasmid can be used for constructing HLA-B*15:01:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:52 Protein Expression Plasmid Vector	PHLAP92510712	Plasmid vector containing HLA-B*15:01:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:52 protein. This plasmid can be used for constructing HLA-B*15:01:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:53 Protein Expression Plasmid Vector	PHLAP92510713	Plasmid vector containing HLA-B*15:01:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:53 protein. This plasmid can be used for constructing HLA-B*15:01:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:54 Protein Expression Plasmid Vector	PHLAP92510714	Plasmid vector containing HLA-B*15:01:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:54 protein. This plasmid can be used for constructing HLA-B*15:01:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:55 Protein Expression Plasmid Vector	PHLAP92510715	Plasmid vector containing HLA-B*15:01:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:55 protein. This plasmid can be used for constructing HLA-B*15:01:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:56 Protein Expression Plasmid Vector	PHLAP92510716	Plasmid vector containing HLA-B*15:01:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:56 protein. This plasmid can be used for constructing HLA-B*15:01:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:57 Protein Expression Plasmid Vector	PHLAP92510717	Plasmid vector containing HLA-B*15:01:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:57 protein. This plasmid can be used for constructing HLA-B*15:01:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:01:58 Protein Expression Plasmid Vector	PHLAP92510718	Plasmid vector containing HLA-B*15:01:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:58 protein. This plasmid can be used for constructing HLA-B*15:01:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:59 Protein Expression Plasmid Vector	PHLAP92510719	Plasmid vector containing HLA-B*15:01:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:59 protein. This plasmid can be used for constructing HLA-B*15:01:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:60 Protein Expression Plasmid Vector	PHLAP92510720	Plasmid vector containing HLA-B*15:01:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:60 protein. This plasmid can be used for constructing HLA-B*15:01:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:61 Protein Expression Plasmid Vector	PHLAP92510721	Plasmid vector containing HLA-B*15:01:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:61 protein. This plasmid can be used for constructing HLA-B*15:01:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:62 Protein Expression Plasmid Vector	PHLAP92510722	Plasmid vector containing HLA-B*15:01:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:62 protein. This plasmid can be used for constructing HLA-B*15:01:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:63 Protein Expression Plasmid Vector	PHLAP92510723	Plasmid vector containing HLA-B*15:01:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:63 protein. This plasmid can be used for constructing HLA-B*15:01:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:64 Protein Expression Plasmid Vector	PHLAP92510724	Plasmid vector containing HLA-B*15:01:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:64 protein. This plasmid can be used for constructing HLA-B*15:01:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:01:65Q Protein Expression Plasmid Vector	PHLAP92510725	Plasmid vector containing HLA-B*15:01:01:65Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:65Q protein. This plasmid can be used for constructing HLA-B*15:01:01:65Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:65Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:66 Protein Expression Plasmid Vector	PHLAP92510726	Plasmid vector containing HLA-B*15:01:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:66 protein. This plasmid can be used for constructing HLA-B*15:01:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:67 Protein Expression Plasmid Vector	PHLAP92510727	Plasmid vector containing HLA-B*15:01:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:67 protein. This plasmid can be used for constructing HLA-B*15:01:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:68 Protein Expression Plasmid Vector	PHLAP92510728	Plasmid vector containing HLA-B*15:01:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:68 protein. This plasmid can be used for constructing HLA-B*15:01:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:69 Protein Expression Plasmid Vector	PHLAP92510729	Plasmid vector containing HLA-B*15:01:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:69 protein. This plasmid can be used for constructing HLA-B*15:01:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:70 Protein Expression Plasmid Vector	PHLAP92510730	Plasmid vector containing HLA-B*15:01:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:70 protein. This plasmid can be used for constructing HLA-B*15:01:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:01:71Q Protein Expression Plasmid Vector	PHLAP92510731	Plasmid vector containing HLA-B*15:01:01:71Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:01:71Q protein. This plasmid can be used for constructing HLA-B*15:01:01:71Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:01:71Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:02 Protein Expression Plasmid Vector	PHLAP92510732	Plasmid vector containing HLA-B*15:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:02 protein. This plasmid can be used for constructing HLA-B*15:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:03 Protein Expression Plasmid Vector	PHLAP92510733	Plasmid vector containing HLA-B*15:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:03 protein. This plasmid can be used for constructing HLA-B*15:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:04 Protein Expression Plasmid Vector	PHLAP92510734	Plasmid vector containing HLA-B*15:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:04 protein. This plasmid can be used for constructing HLA-B*15:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:06 Protein Expression Plasmid Vector	PHLAP92510735	Plasmid vector containing HLA-B*15:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:06 protein. This plasmid can be used for constructing HLA-B*15:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:07 Protein Expression Plasmid Vector	PHLAP92510736	Plasmid vector containing HLA-B*15:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:07 protein. This plasmid can be used for constructing HLA-B*15:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:08 Protein Expression Plasmid Vector	PHLAP92510737	Plasmid vector containing HLA-B*15:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:08 protein. This plasmid can be used for constructing HLA-B*15:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:09 Protein Expression Plasmid Vector	PHLAP92510738	Plasmid vector containing HLA-B*15:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:09 protein. This plasmid can be used for constructing HLA-B*15:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:10 Protein Expression Plasmid Vector	PHLAP92510739	Plasmid vector containing HLA-B*15:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:10 protein. This plasmid can be used for constructing HLA-B*15:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:11 Protein Expression Plasmid Vector	PHLAP92510740	Plasmid vector containing HLA-B*15:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:11 protein. This plasmid can be used for constructing HLA-B*15:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:12 Protein Expression Plasmid Vector	PHLAP92510741	Plasmid vector containing HLA-B*15:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:12 protein. This plasmid can be used for constructing HLA-B*15:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:13 Protein Expression Plasmid Vector	PHLAP92510742	Plasmid vector containing HLA-B*15:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:13 protein. This plasmid can be used for constructing HLA-B*15:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:14 Protein Expression Plasmid Vector	PHLAP92510743	Plasmid vector containing HLA-B*15:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:14 protein. This plasmid can be used for constructing HLA-B*15:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:15 Protein Expression Plasmid Vector	PHLAP92510744	Plasmid vector containing HLA-B*15:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:15 protein. This plasmid can be used for constructing HLA-B*15:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:16 Protein Expression Plasmid Vector	PHLAP92510745	Plasmid vector containing HLA-B*15:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:16 protein. This plasmid can be used for constructing HLA-B*15:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:17 Protein Expression Plasmid Vector	PHLAP92510746	Plasmid vector containing HLA-B*15:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:17 protein. This plasmid can be used for constructing HLA-B*15:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:18 Protein Expression Plasmid Vector	PHLAP92510747	Plasmid vector containing HLA-B*15:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:18 protein. This plasmid can be used for constructing HLA-B*15:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:19 Protein Expression Plasmid Vector	PHLAP92510748	Plasmid vector containing HLA-B*15:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:19 protein. This plasmid can be used for constructing HLA-B*15:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:20 Protein Expression Plasmid Vector	PHLAP92510749	Plasmid vector containing HLA-B*15:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:20 protein. This plasmid can be used for constructing HLA-B*15:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:21 Protein Expression Plasmid Vector	PHLAP92510750	Plasmid vector containing HLA-B*15:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:21 protein. This plasmid can be used for constructing HLA-B*15:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:22 Protein Expression Plasmid Vector	PHLAP92510751	Plasmid vector containing HLA-B*15:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:22 protein. This plasmid can be used for constructing HLA-B*15:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:23 Protein Expression Plasmid Vector	PHLAP92510752	Plasmid vector containing HLA-B*15:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:23 protein. This plasmid can be used for constructing HLA-B*15:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:24 Protein Expression Plasmid Vector	PHLAP92510753	Plasmid vector containing HLA-B*15:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:24 protein. This plasmid can be used for constructing HLA-B*15:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:25 Protein Expression Plasmid Vector	PHLAP92510754	Plasmid vector containing HLA-B*15:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:25 protein. This plasmid can be used for constructing HLA-B*15:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:26 Protein Expression Plasmid Vector	PHLAP92510755	Plasmid vector containing HLA-B*15:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:26 protein. This plasmid can be used for constructing HLA-B*15:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:27 Protein Expression Plasmid Vector	PHLAP92510756	Plasmid vector containing HLA-B*15:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:27 protein. This plasmid can be used for constructing HLA-B*15:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:28 Protein Expression Plasmid Vector	PHLAP92510757	Plasmid vector containing HLA-B*15:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:28 protein. This plasmid can be used for constructing HLA-B*15:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:29 Protein Expression Plasmid Vector	PHLAP92510758	Plasmid vector containing HLA-B*15:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:29 protein. This plasmid can be used for constructing HLA-B*15:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:30 Protein Expression Plasmid Vector	PHLAP92510759	Plasmid vector containing HLA-B*15:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:30 protein. This plasmid can be used for constructing HLA-B*15:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:31 Protein Expression Plasmid Vector	PHLAP92510760	Plasmid vector containing HLA-B*15:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:31 protein. This plasmid can be used for constructing HLA-B*15:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:32 Protein Expression Plasmid Vector	PHLAP92510761	Plasmid vector containing HLA-B*15:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:32 protein. This plasmid can be used for constructing HLA-B*15:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:33 Protein Expression Plasmid Vector	PHLAP92510762	Plasmid vector containing HLA-B*15:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:33 protein. This plasmid can be used for constructing HLA-B*15:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:34 Protein Expression Plasmid Vector	PHLAP92510763	Plasmid vector containing HLA-B*15:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:34 protein. This plasmid can be used for constructing HLA-B*15:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:35 Protein Expression Plasmid Vector	PHLAP92510764	Plasmid vector containing HLA-B*15:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:35 protein. This plasmid can be used for constructing HLA-B*15:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:36 Protein Expression Plasmid Vector	PHLAP92510765	Plasmid vector containing HLA-B*15:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:36 protein. This plasmid can be used for constructing HLA-B*15:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:37 Protein Expression Plasmid Vector	PHLAP92510766	Plasmid vector containing HLA-B*15:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:37 protein. This plasmid can be used for constructing HLA-B*15:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:38 Protein Expression Plasmid Vector	PHLAP92510767	Plasmid vector containing HLA-B*15:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:38 protein. This plasmid can be used for constructing HLA-B*15:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:39 Protein Expression Plasmid Vector	PHLAP92510768	Plasmid vector containing HLA-B*15:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:39 protein. This plasmid can be used for constructing HLA-B*15:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:40 Protein Expression Plasmid Vector	PHLAP92510769	Plasmid vector containing HLA-B*15:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:40 protein. This plasmid can be used for constructing HLA-B*15:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:41 Protein Expression Plasmid Vector	PHLAP92510770	Plasmid vector containing HLA-B*15:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:41 protein. This plasmid can be used for constructing HLA-B*15:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:42 Protein Expression Plasmid Vector	PHLAP92510771	Plasmid vector containing HLA-B*15:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:42 protein. This plasmid can be used for constructing HLA-B*15:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:43 Protein Expression Plasmid Vector	PHLAP92510772	Plasmid vector containing HLA-B*15:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:43 protein. This plasmid can be used for constructing HLA-B*15:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:44 Protein Expression Plasmid Vector	PHLAP92510773	Plasmid vector containing HLA-B*15:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:44 protein. This plasmid can be used for constructing HLA-B*15:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:45 Protein Expression Plasmid Vector	PHLAP92510774	Plasmid vector containing HLA-B*15:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:45 protein. This plasmid can be used for constructing HLA-B*15:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:46 Protein Expression Plasmid Vector	PHLAP92510775	Plasmid vector containing HLA-B*15:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:46 protein. This plasmid can be used for constructing HLA-B*15:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:47 Protein Expression Plasmid Vector	PHLAP92510776	Plasmid vector containing HLA-B*15:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:47 protein. This plasmid can be used for constructing HLA-B*15:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:48 Protein Expression Plasmid Vector	PHLAP92510777	Plasmid vector containing HLA-B*15:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:48 protein. This plasmid can be used for constructing HLA-B*15:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:49 Protein Expression Plasmid Vector	PHLAP92510778	Plasmid vector containing HLA-B*15:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:49 protein. This plasmid can be used for constructing HLA-B*15:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:50 Protein Expression Plasmid Vector	PHLAP92510779	Plasmid vector containing HLA-B*15:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:50 protein. This plasmid can be used for constructing HLA-B*15:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:51 Protein Expression Plasmid Vector	PHLAP92510780	Plasmid vector containing HLA-B*15:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:51 protein. This plasmid can be used for constructing HLA-B*15:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:52 Protein Expression Plasmid Vector	PHLAP92510781	Plasmid vector containing HLA-B*15:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:52 protein. This plasmid can be used for constructing HLA-B*15:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:53 Protein Expression Plasmid Vector	PHLAP92510782	Plasmid vector containing HLA-B*15:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:53 protein. This plasmid can be used for constructing HLA-B*15:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:54 Protein Expression Plasmid Vector	PHLAP92510783	Plasmid vector containing HLA-B*15:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:54 protein. This plasmid can be used for constructing HLA-B*15:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:55 Protein Expression Plasmid Vector	PHLAP92510784	Plasmid vector containing HLA-B*15:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:55 protein. This plasmid can be used for constructing HLA-B*15:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:56 Protein Expression Plasmid Vector	PHLAP92510785	Plasmid vector containing HLA-B*15:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:56 protein. This plasmid can be used for constructing HLA-B*15:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:57 Protein Expression Plasmid Vector	PHLAP92510786	Plasmid vector containing HLA-B*15:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:57 protein. This plasmid can be used for constructing HLA-B*15:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:58 Protein Expression Plasmid Vector	PHLAP92510787	Plasmid vector containing HLA-B*15:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:58 protein. This plasmid can be used for constructing HLA-B*15:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:59 Protein Expression Plasmid Vector	PHLAP92510788	Plasmid vector containing HLA-B*15:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:59 protein. This plasmid can be used for constructing HLA-B*15:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:60 Protein Expression Plasmid Vector	PHLAP92510789	Plasmid vector containing HLA-B*15:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:60 protein. This plasmid can be used for constructing HLA-B*15:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:61 Protein Expression Plasmid Vector	PHLAP92510790	Plasmid vector containing HLA-B*15:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:61 protein. This plasmid can be used for constructing HLA-B*15:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:62 Protein Expression Plasmid Vector	PHLAP92510791	Plasmid vector containing HLA-B*15:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:62 protein. This plasmid can be used for constructing HLA-B*15:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:63 Protein Expression Plasmid Vector	PHLAP92510792	Plasmid vector containing HLA-B*15:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:63 protein. This plasmid can be used for constructing HLA-B*15:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:64 Protein Expression Plasmid Vector	PHLAP92510793	Plasmid vector containing HLA-B*15:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:64 protein. This plasmid can be used for constructing HLA-B*15:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:65 Protein Expression Plasmid Vector	PHLAP92510794	Plasmid vector containing HLA-B*15:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:65 protein. This plasmid can be used for constructing HLA-B*15:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:66 Protein Expression Plasmid Vector	PHLAP92510795	Plasmid vector containing HLA-B*15:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:66 protein. This plasmid can be used for constructing HLA-B*15:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:67 Protein Expression Plasmid Vector	PHLAP92510796	Plasmid vector containing HLA-B*15:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:67 protein. This plasmid can be used for constructing HLA-B*15:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:68 Protein Expression Plasmid Vector	PHLAP92510797	Plasmid vector containing HLA-B*15:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:68 protein. This plasmid can be used for constructing HLA-B*15:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:69 Protein Expression Plasmid Vector	PHLAP92510798	Plasmid vector containing HLA-B*15:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:69 protein. This plasmid can be used for constructing HLA-B*15:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:70 Protein Expression Plasmid Vector	PHLAP92510799	Plasmid vector containing HLA-B*15:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:70 protein. This plasmid can be used for constructing HLA-B*15:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:71 Protein Expression Plasmid Vector	PHLAP925108000	Plasmid vector containing HLA-B*15:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:71 protein. This plasmid can be used for constructing HLA-B*15:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:72 Protein Expression Plasmid Vector	PHLAP925108001	Plasmid vector containing HLA-B*15:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:72 protein. This plasmid can be used for constructing HLA-B*15:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:73 Protein Expression Plasmid Vector	PHLAP925108002	Plasmid vector containing HLA-B*15:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:73 protein. This plasmid can be used for constructing HLA-B*15:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:74 Protein Expression Plasmid Vector	PHLAP925108003	Plasmid vector containing HLA-B*15:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:74 protein. This plasmid can be used for constructing HLA-B*15:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:75 Protein Expression Plasmid Vector	PHLAP92510804	Plasmid vector containing HLA-B*15:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:75 protein. This plasmid can be used for constructing HLA-B*15:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:76 Protein Expression Plasmid Vector	PHLAP92510805	Plasmid vector containing HLA-B*15:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:76 protein. This plasmid can be used for constructing HLA-B*15:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:77 Protein Expression Plasmid Vector	PHLAP92510806	Plasmid vector containing HLA-B*15:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:77 protein. This plasmid can be used for constructing HLA-B*15:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:78 Protein Expression Plasmid Vector	PHLAP92510807	Plasmid vector containing HLA-B*15:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:78 protein. This plasmid can be used for constructing HLA-B*15:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:79 Protein Expression Plasmid Vector	PHLAP92510808	Plasmid vector containing HLA-B*15:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:79 protein. This plasmid can be used for constructing HLA-B*15:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:80 Protein Expression Plasmid Vector	PHLAP92510809	Plasmid vector containing HLA-B*15:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:80 protein. This plasmid can be used for constructing HLA-B*15:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:81 Protein Expression Plasmid Vector	PHLAP925108110	Plasmid vector containing HLA-B*15:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:81 protein. This plasmid can be used for constructing HLA-B*15:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:82 Protein Expression Plasmid Vector	PHLAP925108111	Plasmid vector containing HLA-B*15:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:82 protein. This plasmid can be used for constructing HLA-B*15:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:83 Protein Expression Plasmid Vector	PHLAP92510812	Plasmid vector containing HLA-B*15:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:83 protein. This plasmid can be used for constructing HLA-B*15:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:84 Protein Expression Plasmid Vector	PHLAP92510813	Plasmid vector containing HLA-B*15:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:84 protein. This plasmid can be used for constructing HLA-B*15:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:85 Protein Expression Plasmid Vector	PHLAP92510814	Plasmid vector containing HLA-B*15:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:85 protein. This plasmid can be used for constructing HLA-B*15:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:86 Protein Expression Plasmid Vector	PHLAP92510815	Plasmid vector containing HLA-B*15:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:86 protein. This plasmid can be used for constructing HLA-B*15:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:87 Protein Expression Plasmid Vector	PHLAP92510816	Plasmid vector containing HLA-B*15:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:87 protein. This plasmid can be used for constructing HLA-B*15:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:88 Protein Expression Plasmid Vector	PHLAP92510817	Plasmid vector containing HLA-B*15:01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:88 protein. This plasmid can be used for constructing HLA-B*15:01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:89 Protein Expression Plasmid Vector	PHLAP92510818	Plasmid vector containing HLA-B*15:01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:89 protein. This plasmid can be used for constructing HLA-B*15:01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:90 Protein Expression Plasmid Vector	PHLAP92510819	Plasmid vector containing HLA-B*15:01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:90 protein. This plasmid can be used for constructing HLA-B*15:01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:01:91 Protein Expression Plasmid Vector	PHLAP92510820	Plasmid vector containing HLA-B*15:01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:91 protein. This plasmid can be used for constructing HLA-B*15:01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:92 Protein Expression Plasmid Vector	PHLAP92510821	Plasmid vector containing HLA-B*15:01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:92 protein. This plasmid can be used for constructing HLA-B*15:01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:01:93 Protein Expression Plasmid Vector	PHLAP92510822	Plasmid vector containing HLA-B*15:01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:01:93 protein. This plasmid can be used for constructing HLA-B*15:01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:01:01 Protein Expression Plasmid Vector	PHLAP92510823	Plasmid vector containing HLA-B*15:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:01:01 protein. This plasmid can be used for constructing HLA-B*15:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:01:02 Protein Expression Plasmid Vector	PHLAP92510824	Plasmid vector containing HLA-B*15:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:01:02 protein. This plasmid can be used for constructing HLA-B*15:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:01:03 Protein Expression Plasmid Vector	PHLAP92510825	Plasmid vector containing HLA-B*15:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:01:03 protein. This plasmid can be used for constructing HLA-B*15:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:01:04 Protein Expression Plasmid Vector	PHLAP92510826	Plasmid vector containing HLA-B*15:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:01:04 protein. This plasmid can be used for constructing HLA-B*15:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:02:01:05 Protein Expression Plasmid Vector	PHLAP92510827	Plasmid vector containing HLA-B*15:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:01:05 protein. This plasmid can be used for constructing HLA-B*15:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:01:06 Protein Expression Plasmid Vector	PHLAP92510828	Plasmid vector containing HLA-B*15:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:01:06 protein. This plasmid can be used for constructing HLA-B*15:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:01:07 Protein Expression Plasmid Vector	PHLAP92510829	Plasmid vector containing HLA-B*15:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:01:07 protein. This plasmid can be used for constructing HLA-B*15:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:02 Protein Expression Plasmid Vector	PHLAP925108330	Plasmid vector containing HLA-B*15:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:02 protein. This plasmid can be used for constructing HLA-B*15:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:03 Protein Expression Plasmid Vector	PHLAP925108331	Plasmid vector containing HLA-B*15:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:03 protein. This plasmid can be used for constructing HLA-B*15:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:04 Protein Expression Plasmid Vector	PHLAP925108332	Plasmid vector containing HLA-B*15:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:04 protein. This plasmid can be used for constructing HLA-B*15:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:05 Protein Expression Plasmid Vector	PHLAP925108333	Plasmid vector containing HLA-B*15:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:05 protein. This plasmid can be used for constructing HLA-B*15:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:02:06 Protein Expression Plasmid Vector	PHLAP92510834	Plasmid vector containing HLA-B*15:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:06 protein. This plasmid can be used for constructing HLA-B*15:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:07 Protein Expression Plasmid Vector	PHLAP92510835	Plasmid vector containing HLA-B*15:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:07 protein. This plasmid can be used for constructing HLA-B*15:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:08 Protein Expression Plasmid Vector	PHLAP92510836	Plasmid vector containing HLA-B*15:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:08 protein. This plasmid can be used for constructing HLA-B*15:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:09 Protein Expression Plasmid Vector	PHLAP92510837	Plasmid vector containing HLA-B*15:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:09 protein. This plasmid can be used for constructing HLA-B*15:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:10 Protein Expression Plasmid Vector	PHLAP92510838	Plasmid vector containing HLA-B*15:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:10 protein. This plasmid can be used for constructing HLA-B*15:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:11 Protein Expression Plasmid Vector	PHLAP92510839	Plasmid vector containing HLA-B*15:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:11 protein. This plasmid can be used for constructing HLA-B*15:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:12 Protein Expression Plasmid Vector	PHLAP92510840	Plasmid vector containing HLA-B*15:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:12 protein. This plasmid can be used for constructing HLA-B*15:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:13 Protein Expression Plasmid Vector	PHLAP92510841	Plasmid vector containing HLA-B*15:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:13 protein. This plasmid can be used for constructing HLA-B*15:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:02:14 Protein Expression Plasmid Vector	PHLAP92510842	Plasmid vector containing HLA-B*15:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:14 protein. This plasmid can be used for constructing HLA-B*15:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:15 Protein Expression Plasmid Vector	PHLAP92510843	Plasmid vector containing HLA-B*15:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:15 protein. This plasmid can be used for constructing HLA-B*15:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:02:16 Protein Expression Plasmid Vector	PHLAP92510844	Plasmid vector containing HLA-B*15:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:02:16 protein. This plasmid can be used for constructing HLA-B*15:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:01:01 Protein Expression Plasmid Vector	PHLAP92510845	Plasmid vector containing HLA-B*15:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:01 protein. This plasmid can be used for constructing HLA-B*15:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:01:02 Protein Expression Plasmid Vector	PHLAP92510846	Plasmid vector containing HLA-B*15:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:02 protein. This plasmid can be used for constructing HLA-B*15:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:01:03 Protein Expression Plasmid Vector	PHLAP92510847	Plasmid vector containing HLA-B*15:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:03 protein. This plasmid can be used for constructing HLA-B*15:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:01:04 Protein Expression Plasmid Vector	PHLAP92510848	Plasmid vector containing HLA-B*15:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:04 protein. This plasmid can be used for constructing HLA-B*15:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:03:01:05 Protein Expression Plasmid Vector	PHLAP92510849	Plasmid vector containing HLA-B*15:03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:05 protein. This plasmid can be used for constructing HLA-B*15:03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:01:06 Protein Expression Plasmid Vector	PHLAP92510850	Plasmid vector containing HLA-B*15:03:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:06 protein. This plasmid can be used for constructing HLA-B*15:03:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:01:07 Protein Expression Plasmid Vector	PHLAP92510851	Plasmid vector containing HLA-B*15:03:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:07 protein. This plasmid can be used for constructing HLA-B*15:03:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:01:08 Protein Expression Plasmid Vector	PHLAP92510852	Plasmid vector containing HLA-B*15:03:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:08 protein. This plasmid can be used for constructing HLA-B*15:03:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:01:09 Protein Expression Plasmid Vector	PHLAP92510853	Plasmid vector containing HLA-B*15:03:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:09 protein. This plasmid can be used for constructing HLA-B*15:03:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:01:10 Protein Expression Plasmid Vector	PHLAP92510854	Plasmid vector containing HLA-B*15:03:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:10 protein. This plasmid can be used for constructing HLA-B*15:03:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:01:11 Protein Expression Plasmid Vector	PHLAP92510855	Plasmid vector containing HLA-B*15:03:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:11 protein. This plasmid can be used for constructing HLA-B*15:03:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:03:01:12 Protein Expression Plasmid Vector	PHLAP92510856	Plasmid vector containing HLA-B*15:03:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:12 protein. This plasmid can be used for constructing HLA-B*15:03:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:01:13 Protein Expression Plasmid Vector	PHLAP92510857	Plasmid vector containing HLA-B*15:03:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:13 protein. This plasmid can be used for constructing HLA-B*15:03:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:01:14 Protein Expression Plasmid Vector	PHLAP92510858	Plasmid vector containing HLA-B*15:03:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:01:14 protein. This plasmid can be used for constructing HLA-B*15:03:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:02 Protein Expression Plasmid Vector	PHLAP92510859	Plasmid vector containing HLA-B*15:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:02 protein. This plasmid can be used for constructing HLA-B*15:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:03 Protein Expression Plasmid Vector	PHLAP92510860	Plasmid vector containing HLA-B*15:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:03 protein. This plasmid can be used for constructing HLA-B*15:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:04 Protein Expression Plasmid Vector	PHLAP92510861	Plasmid vector containing HLA-B*15:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:04 protein. This plasmid can be used for constructing HLA-B*15:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:05 Protein Expression Plasmid Vector	PHLAP92510862	Plasmid vector containing HLA-B*15:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:05 protein. This plasmid can be used for constructing HLA-B*15:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:03:06 Protein Expression Plasmid Vector	PHLAP92510863	Plasmid vector containing HLA-B*15:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:06 protein. This plasmid can be used for constructing HLA-B*15:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:07 Protein Expression Plasmid Vector	PHLAP92510864	Plasmid vector containing HLA-B*15:03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:07 protein. This plasmid can be used for constructing HLA-B*15:03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:08 Protein Expression Plasmid Vector	PHLAP92510865	Plasmid vector containing HLA-B*15:03:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:08 protein. This plasmid can be used for constructing HLA-B*15:03:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:09 Protein Expression Plasmid Vector	PHLAP92510866	Plasmid vector containing HLA-B*15:03:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:09 protein. This plasmid can be used for constructing HLA-B*15:03:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:10 Protein Expression Plasmid Vector	PHLAP92510867	Plasmid vector containing HLA-B*15:03:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:10 protein. This plasmid can be used for constructing HLA-B*15:03:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:11 Protein Expression Plasmid Vector	PHLAP92510868	Plasmid vector containing HLA-B*15:03:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:11 protein. This plasmid can be used for constructing HLA-B*15:03:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:12 Protein Expression Plasmid Vector	PHLAP92510869	Plasmid vector containing HLA-B*15:03:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:12 protein. This plasmid can be used for constructing HLA-B*15:03:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:03:13 Protein Expression Plasmid Vector	PHLAP92510870	Plasmid vector containing HLA-B*15:03:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:13 protein. This plasmid can be used for constructing HLA-B*15:03:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:03:14 Protein Expression Plasmid Vector	PHLAP92510871	Plasmid vector containing HLA-B*15:03:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:03:14 protein. This plasmid can be used for constructing HLA-B*15:03:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:03:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:04:01:01 Protein Expression Plasmid Vector	PHLAP92510872	Plasmid vector containing HLA-B*15:04:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:04:01:01 protein. This plasmid can be used for constructing HLA-B*15:04:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:04:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:04:01:02 Protein Expression Plasmid Vector	PHLAP92510873	Plasmid vector containing HLA-B*15:04:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:04:01:02 protein. This plasmid can be used for constructing HLA-B*15:04:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:04:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:04:01:03 Protein Expression Plasmid Vector	PHLAP92510874	Plasmid vector containing HLA-B*15:04:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:04:01:03 protein. This plasmid can be used for constructing HLA-B*15:04:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:04:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:04:02 Protein Expression Plasmid Vector	PHLAP92510875	Plasmid vector containing HLA-B*15:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:04:02 protein. This plasmid can be used for constructing HLA-B*15:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:04:03 Protein Expression Plasmid Vector	PHLAP92510876	Plasmid vector containing HLA-B*15:04:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:04:03 protein. This plasmid can be used for constructing HLA-B*15:04:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:04:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:04:04 Protein Expression Plasmid Vector	PHLAP92510877	Plasmid vector containing HLA-B*15:04:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:04:04 protein. This plasmid can be used for constructing HLA-B*15:04:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:04:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:04:05 Protein Expression Plasmid Vector	PHLAP92510878	Plasmid vector containing HLA-B*15:04:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:04:05 protein. This plasmid can be used for constructing HLA-B*15:04:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:04:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:05:01:01 Protein Expression Plasmid Vector	PHLAP92510879	Plasmid vector containing HLA-B*15:05:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:05:01:01 protein. This plasmid can be used for constructing HLA-B*15:05:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:05:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:05:01:02 Protein Expression Plasmid Vector	PHLAP92510880	Plasmid vector containing HLA-B*15:05:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:05:01:02 protein. This plasmid can be used for constructing HLA-B*15:05:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:05:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:05:02 Protein Expression Plasmid Vector	PHLAP92510881	Plasmid vector containing HLA-B*15:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:05:02 protein. This plasmid can be used for constructing HLA-B*15:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:05:03 Protein Expression Plasmid Vector	PHLAP92510882	Plasmid vector containing HLA-B*15:05:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:05:03 protein. This plasmid can be used for constructing HLA-B*15:05:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:05:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:05:04 Protein Expression Plasmid Vector	PHLAP92510883	Plasmid vector containing HLA-B*15:05:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:05:04 protein. This plasmid can be used for constructing HLA-B*15:05:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:05:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:06 Protein Expression Plasmid Vector	PHLAP92510884	Plasmid vector containing HLA-B*15:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:06 protein. This plasmid can be used for constructing HLA-B*15:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:07:01:01 Protein Expression Plasmid Vector	PHLAP92510885	Plasmid vector containing HLA-B*15:07:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:07:01:01 protein. This plasmid can be used for constructing HLA-B*15:07:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:07:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:07:01:02 Protein Expression Plasmid Vector	PHLAP92510886	Plasmid vector containing HLA-B*15:07:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:07:01:02 protein. This plasmid can be used for constructing HLA-B*15:07:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:07:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:07:01:03 Protein Expression Plasmid Vector	PHLAP92510887	Plasmid vector containing HLA-B*15:07:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:07:01:03 protein. This plasmid can be used for constructing HLA-B*15:07:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:07:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:07:01:04 Protein Expression Plasmid Vector	PHLAP92510888	Plasmid vector containing HLA-B*15:07:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:07:01:04 protein. This plasmid can be used for constructing HLA-B*15:07:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:07:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:07:01:05 Protein Expression Plasmid Vector	PHLAP92510889	Plasmid vector containing HLA-B*15:07:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:07:01:05 protein. This plasmid can be used for constructing HLA-B*15:07:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:07:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:07:01:06 Protein Expression Plasmid Vector	PHLAP92510890	Plasmid vector containing HLA-B*15:07:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:07:01:06 protein. This plasmid can be used for constructing HLA-B*15:07:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:07:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:07:02 Protein Expression Plasmid Vector	PHLAP92510891	Plasmid vector containing HLA-B*15:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:07:02 protein. This plasmid can be used for constructing HLA-B*15:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:07:03 Protein Expression Plasmid Vector	PHLAP92510892	Plasmid vector containing HLA-B*15:07:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:07:03 protein. This plasmid can be used for constructing HLA-B*15:07:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:07:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:08:01:01 Protein Expression Plasmid Vector	PHLAP92510893	Plasmid vector containing HLA-B*15:08:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:08:01:01 protein. This plasmid can be used for constructing HLA-B*15:08:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:08:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:08:01:02 Protein Expression Plasmid Vector	PHLAP92510894	Plasmid vector containing HLA-B*15:08:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:08:01:02 protein. This plasmid can be used for constructing HLA-B*15:08:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:08:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:08:02 Protein Expression Plasmid Vector	PHLAP92510895	Plasmid vector containing HLA-B*15:08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:08:02 protein. This plasmid can be used for constructing HLA-B*15:08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:09:01 Protein Expression Plasmid Vector	PHLAP92510896	Plasmid vector containing HLA-B*15:09:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:09:01 protein. This plasmid can be used for constructing HLA-B*15:09:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:09:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:09:02 Protein Expression Plasmid Vector	PHLAP92510897	Plasmid vector containing HLA-B*15:09:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:09:02 protein. This plasmid can be used for constructing HLA-B*15:09:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:09:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:10:01:01 Protein Expression Plasmid Vector	PHLAP92510898	Plasmid vector containing HLA-B*15:10:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:01:01 protein. This plasmid can be used for constructing HLA-B*15:10:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:10:01:02 Protein Expression Plasmid Vector	PHLAP92510899	Plasmid vector containing HLA-B*15:10:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:01:02 protein. This plasmid can be used for constructing HLA-B*15:10:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:10:01:03 Protein Expression Plasmid Vector	PHLAP92510900	Plasmid vector containing HLA-B*15:10:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:01:03 protein. This plasmid can be used for constructing HLA-B*15:10:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:10:01:04 Protein Expression Plasmid Vector	PHLAP92510901	Plasmid vector containing HLA-B*15:10:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:01:04 protein. This plasmid can be used for constructing HLA-B*15:10:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:10:01:05 Protein Expression Plasmid Vector	PHLAP92510902	Plasmid vector containing HLA-B*15:10:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:01:05 protein. This plasmid can be used for constructing HLA-B*15:10:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:10:01:06 Protein Expression Plasmid Vector	PHLAP92510903	Plasmid vector containing HLA-B*15:10:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:01:06 protein. This plasmid can be used for constructing HLA-B*15:10:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:10:01:07 Protein Expression Plasmid Vector	PHLAP92510904	Plasmid vector containing HLA-B*15:10:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:01:07 protein. This plasmid can be used for constructing HLA-B*15:10:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:10:01:08 Protein Expression Plasmid Vector	PHLAP92510905	Plasmid vector containing HLA-B*15:10:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:01:08 protein. This plasmid can be used for constructing HLA-B*15:10:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-B*15:10:01:09 Protein Expression Plasmid Vector	PHLAP92510906	Plasmid vector containing HLA-B*15:10:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:01:09 protein. This plasmid can be used for constructing HLA-B*15:10:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:10:01:10 Protein Expression Plasmid Vector	PHLAP92510907	Plasmid vector containing HLA-B*15:10:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:01:10 protein. This plasmid can be used for constructing HLA-B*15:10:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:10:02 Protein Expression Plasmid Vector	PHLAP92510908	Plasmid vector containing HLA-B*15:10:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:02 protein. This plasmid can be used for constructing HLA-B*15:10:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:10:03 Protein Expression Plasmid Vector	PHLAP92510909	Plasmid vector containing HLA-B*15:10:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:03 protein. This plasmid can be used for constructing HLA-B*15:10:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-B*15:10:04 Protein Expression Plasmid Vector	PHLAP92510910	Plasmid vector containing HLA-B*15:10:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-B*15:10:04 protein. This plasmid can be used for constructing HLA-B*15:10:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-B*15:10:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
