Item Name	Item No.	Description	Price
HLA-A*01:01:01:01 Protein Expression Plasmid Vector	PHLAP9251	Plasmid vector containing HLA-A*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:01 protein. This plasmid can be used for constructing HLA-A*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:02N Protein Expression Plasmid Vector	PHLAP9252	Plasmid vector containing HLA-A*01:01:01:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:02N protein. This plasmid can be used for constructing HLA-A*01:01:01:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:03 Protein Expression Plasmid Vector	PHLAP9253	Plasmid vector containing HLA-A*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:03 protein. This plasmid can be used for constructing HLA-A*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:04 Protein Expression Plasmid Vector	PHLAP9254	Plasmid vector containing HLA-A*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:04 protein. This plasmid can be used for constructing HLA-A*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:05 Protein Expression Plasmid Vector	PHLAP9255	Plasmid vector containing HLA-A*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:05 protein. This plasmid can be used for constructing HLA-A*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:06 Protein Expression Plasmid Vector	PHLAP9256	Plasmid vector containing HLA-A*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:06 protein. This plasmid can be used for constructing HLA-A*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:07 Protein Expression Plasmid Vector	PHLAP9257	Plasmid vector containing HLA-A*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:07 protein. This plasmid can be used for constructing HLA-A*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:08 Protein Expression Plasmid Vector	PHLAP9258	Plasmid vector containing HLA-A*01:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:08 protein. This plasmid can be used for constructing HLA-A*01:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:09 Protein Expression Plasmid Vector	PHLAP9259	Plasmid vector containing HLA-A*01:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:09 protein. This plasmid can be used for constructing HLA-A*01:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:10 Protein Expression Plasmid Vector	PHLAP92510	Plasmid vector containing HLA-A*01:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:10 protein. This plasmid can be used for constructing HLA-A*01:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:100 Protein Expression Plasmid Vector	PHLAP92511	Plasmid vector containing HLA-A*01:01:01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:100 protein. This plasmid can be used for constructing HLA-A*01:01:01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:101 Protein Expression Plasmid Vector	PHLAP92512	Plasmid vector containing HLA-A*01:01:01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:101 protein. This plasmid can be used for constructing HLA-A*01:01:01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:102 Protein Expression Plasmid Vector	PHLAP92513	Plasmid vector containing HLA-A*01:01:01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:102 protein. This plasmid can be used for constructing HLA-A*01:01:01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:103 Protein Expression Plasmid Vector	PHLAP92514	Plasmid vector containing HLA-A*01:01:01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:103 protein. This plasmid can be used for constructing HLA-A*01:01:01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:104 Protein Expression Plasmid Vector	PHLAP92515	Plasmid vector containing HLA-A*01:01:01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:104 protein. This plasmid can be used for constructing HLA-A*01:01:01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:105 Protein Expression Plasmid Vector	PHLAP92516	Plasmid vector containing HLA-A*01:01:01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:105 protein. This plasmid can be used for constructing HLA-A*01:01:01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:106 Protein Expression Plasmid Vector	PHLAP92517	Plasmid vector containing HLA-A*01:01:01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:106 protein. This plasmid can be used for constructing HLA-A*01:01:01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:107 Protein Expression Plasmid Vector	PHLAP92518	Plasmid vector containing HLA-A*01:01:01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:107 protein. This plasmid can be used for constructing HLA-A*01:01:01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:108 Protein Expression Plasmid Vector	PHLAP92519	Plasmid vector containing HLA-A*01:01:01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:108 protein. This plasmid can be used for constructing HLA-A*01:01:01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:109 Protein Expression Plasmid Vector	PHLAP92520	Plasmid vector containing HLA-A*01:01:01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:109 protein. This plasmid can be used for constructing HLA-A*01:01:01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:11 Protein Expression Plasmid Vector	PHLAP92521	Plasmid vector containing HLA-A*01:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:11 protein. This plasmid can be used for constructing HLA-A*01:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:110 Protein Expression Plasmid Vector	PHLAP92522	Plasmid vector containing HLA-A*01:01:01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:110 protein. This plasmid can be used for constructing HLA-A*01:01:01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:111 Protein Expression Plasmid Vector	PHLAP92523	Plasmid vector containing HLA-A*01:01:01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:111 protein. This plasmid can be used for constructing HLA-A*01:01:01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:112 Protein Expression Plasmid Vector	PHLAP92524	Plasmid vector containing HLA-A*01:01:01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:112 protein. This plasmid can be used for constructing HLA-A*01:01:01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:113 Protein Expression Plasmid Vector	PHLAP92525	Plasmid vector containing HLA-A*01:01:01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:113 protein. This plasmid can be used for constructing HLA-A*01:01:01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:114 Protein Expression Plasmid Vector	PHLAP92526	Plasmid vector containing HLA-A*01:01:01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:114 protein. This plasmid can be used for constructing HLA-A*01:01:01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:115 Protein Expression Plasmid Vector	PHLAP92527	Plasmid vector containing HLA-A*01:01:01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:115 protein. This plasmid can be used for constructing HLA-A*01:01:01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:116 Protein Expression Plasmid Vector	PHLAP92528	Plasmid vector containing HLA-A*01:01:01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:116 protein. This plasmid can be used for constructing HLA-A*01:01:01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:117 Protein Expression Plasmid Vector	PHLAP92529	Plasmid vector containing HLA-A*01:01:01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:117 protein. This plasmid can be used for constructing HLA-A*01:01:01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:118 Protein Expression Plasmid Vector	PHLAP92530	Plasmid vector containing HLA-A*01:01:01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:118 protein. This plasmid can be used for constructing HLA-A*01:01:01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:119 Protein Expression Plasmid Vector	PHLAP92531	Plasmid vector containing HLA-A*01:01:01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:119 protein. This plasmid can be used for constructing HLA-A*01:01:01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:12 Protein Expression Plasmid Vector	PHLAP92532	Plasmid vector containing HLA-A*01:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:12 protein. This plasmid can be used for constructing HLA-A*01:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:120 Protein Expression Plasmid Vector	PHLAP92533	Plasmid vector containing HLA-A*01:01:01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:120 protein. This plasmid can be used for constructing HLA-A*01:01:01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:121 Protein Expression Plasmid Vector	PHLAP92534	Plasmid vector containing HLA-A*01:01:01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:121 protein. This plasmid can be used for constructing HLA-A*01:01:01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:13 Protein Expression Plasmid Vector	PHLAP92535	Plasmid vector containing HLA-A*01:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:13 protein. This plasmid can be used for constructing HLA-A*01:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:14 Protein Expression Plasmid Vector	PHLAP92536	Plasmid vector containing HLA-A*01:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:14 protein. This plasmid can be used for constructing HLA-A*01:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:15 Protein Expression Plasmid Vector	PHLAP92537	Plasmid vector containing HLA-A*01:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:15 protein. This plasmid can be used for constructing HLA-A*01:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:16 Protein Expression Plasmid Vector	PHLAP92538	Plasmid vector containing HLA-A*01:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:16 protein. This plasmid can be used for constructing HLA-A*01:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:17 Protein Expression Plasmid Vector	PHLAP92539	Plasmid vector containing HLA-A*01:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:17 protein. This plasmid can be used for constructing HLA-A*01:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:18 Protein Expression Plasmid Vector	PHLAP92540	Plasmid vector containing HLA-A*01:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:18 protein. This plasmid can be used for constructing HLA-A*01:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:19 Protein Expression Plasmid Vector	PHLAP92541	Plasmid vector containing HLA-A*01:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:19 protein. This plasmid can be used for constructing HLA-A*01:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:20 Protein Expression Plasmid Vector	PHLAP92542	Plasmid vector containing HLA-A*01:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:20 protein. This plasmid can be used for constructing HLA-A*01:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:21 Protein Expression Plasmid Vector	PHLAP92543	Plasmid vector containing HLA-A*01:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:21 protein. This plasmid can be used for constructing HLA-A*01:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:22 Protein Expression Plasmid Vector	PHLAP92544	Plasmid vector containing HLA-A*01:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:22 protein. This plasmid can be used for constructing HLA-A*01:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:23 Protein Expression Plasmid Vector	PHLAP92545	Plasmid vector containing HLA-A*01:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:23 protein. This plasmid can be used for constructing HLA-A*01:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:24 Protein Expression Plasmid Vector	PHLAP92546	Plasmid vector containing HLA-A*01:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:24 protein. This plasmid can be used for constructing HLA-A*01:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:25 Protein Expression Plasmid Vector	PHLAP92547	Plasmid vector containing HLA-A*01:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:25 protein. This plasmid can be used for constructing HLA-A*01:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:26 Protein Expression Plasmid Vector	PHLAP92548	Plasmid vector containing HLA-A*01:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:26 protein. This plasmid can be used for constructing HLA-A*01:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:27 Protein Expression Plasmid Vector	PHLAP92549	Plasmid vector containing HLA-A*01:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:27 protein. This plasmid can be used for constructing HLA-A*01:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:28 Protein Expression Plasmid Vector	PHLAP92550	Plasmid vector containing HLA-A*01:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:28 protein. This plasmid can be used for constructing HLA-A*01:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:29 Protein Expression Plasmid Vector	PHLAP92551	Plasmid vector containing HLA-A*01:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:29 protein. This plasmid can be used for constructing HLA-A*01:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:30 Protein Expression Plasmid Vector	PHLAP92552	Plasmid vector containing HLA-A*01:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:30 protein. This plasmid can be used for constructing HLA-A*01:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:31 Protein Expression Plasmid Vector	PHLAP92553	Plasmid vector containing HLA-A*01:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:31 protein. This plasmid can be used for constructing HLA-A*01:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:32 Protein Expression Plasmid Vector	PHLAP92554	Plasmid vector containing HLA-A*01:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:32 protein. This plasmid can be used for constructing HLA-A*01:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:33 Protein Expression Plasmid Vector	PHLAP92555	Plasmid vector containing HLA-A*01:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:33 protein. This plasmid can be used for constructing HLA-A*01:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:34 Protein Expression Plasmid Vector	PHLAP92556	Plasmid vector containing HLA-A*01:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:34 protein. This plasmid can be used for constructing HLA-A*01:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:35 Protein Expression Plasmid Vector	PHLAP92557	Plasmid vector containing HLA-A*01:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:35 protein. This plasmid can be used for constructing HLA-A*01:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:36 Protein Expression Plasmid Vector	PHLAP92558	Plasmid vector containing HLA-A*01:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:36 protein. This plasmid can be used for constructing HLA-A*01:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:37 Protein Expression Plasmid Vector	PHLAP92559	Plasmid vector containing HLA-A*01:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:37 protein. This plasmid can be used for constructing HLA-A*01:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:38 Protein Expression Plasmid Vector	PHLAP92560	Plasmid vector containing HLA-A*01:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:38 protein. This plasmid can be used for constructing HLA-A*01:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:39 Protein Expression Plasmid Vector	PHLAP92561	Plasmid vector containing HLA-A*01:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:39 protein. This plasmid can be used for constructing HLA-A*01:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:40 Protein Expression Plasmid Vector	PHLAP92562	Plasmid vector containing HLA-A*01:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:40 protein. This plasmid can be used for constructing HLA-A*01:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:41 Protein Expression Plasmid Vector	PHLAP92563	Plasmid vector containing HLA-A*01:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:41 protein. This plasmid can be used for constructing HLA-A*01:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:42 Protein Expression Plasmid Vector	PHLAP92564	Plasmid vector containing HLA-A*01:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:42 protein. This plasmid can be used for constructing HLA-A*01:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:43 Protein Expression Plasmid Vector	PHLAP92565	Plasmid vector containing HLA-A*01:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:43 protein. This plasmid can be used for constructing HLA-A*01:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:44 Protein Expression Plasmid Vector	PHLAP92566	Plasmid vector containing HLA-A*01:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:44 protein. This plasmid can be used for constructing HLA-A*01:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:45 Protein Expression Plasmid Vector	PHLAP92567	Plasmid vector containing HLA-A*01:01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:45 protein. This plasmid can be used for constructing HLA-A*01:01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:46 Protein Expression Plasmid Vector	PHLAP92568	Plasmid vector containing HLA-A*01:01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:46 protein. This plasmid can be used for constructing HLA-A*01:01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:47 Protein Expression Plasmid Vector	PHLAP92569	Plasmid vector containing HLA-A*01:01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:47 protein. This plasmid can be used for constructing HLA-A*01:01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:48 Protein Expression Plasmid Vector	PHLAP92570	Plasmid vector containing HLA-A*01:01:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:48 protein. This plasmid can be used for constructing HLA-A*01:01:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:49 Protein Expression Plasmid Vector	PHLAP92571	Plasmid vector containing HLA-A*01:01:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:49 protein. This plasmid can be used for constructing HLA-A*01:01:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:50 Protein Expression Plasmid Vector	PHLAP92572	Plasmid vector containing HLA-A*01:01:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:50 protein. This plasmid can be used for constructing HLA-A*01:01:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:51 Protein Expression Plasmid Vector	PHLAP92573	Plasmid vector containing HLA-A*01:01:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:51 protein. This plasmid can be used for constructing HLA-A*01:01:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:52 Protein Expression Plasmid Vector	PHLAP92574	Plasmid vector containing HLA-A*01:01:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:52 protein. This plasmid can be used for constructing HLA-A*01:01:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:53 Protein Expression Plasmid Vector	PHLAP92575	Plasmid vector containing HLA-A*01:01:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:53 protein. This plasmid can be used for constructing HLA-A*01:01:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:54 Protein Expression Plasmid Vector	PHLAP92576	Plasmid vector containing HLA-A*01:01:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:54 protein. This plasmid can be used for constructing HLA-A*01:01:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:55 Protein Expression Plasmid Vector	PHLAP92577	Plasmid vector containing HLA-A*01:01:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:55 protein. This plasmid can be used for constructing HLA-A*01:01:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:56 Protein Expression Plasmid Vector	PHLAP92578	Plasmid vector containing HLA-A*01:01:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:56 protein. This plasmid can be used for constructing HLA-A*01:01:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:57 Protein Expression Plasmid Vector	PHLAP92579	Plasmid vector containing HLA-A*01:01:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:57 protein. This plasmid can be used for constructing HLA-A*01:01:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:58 Protein Expression Plasmid Vector	PHLAP92580	Plasmid vector containing HLA-A*01:01:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:58 protein. This plasmid can be used for constructing HLA-A*01:01:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:59 Protein Expression Plasmid Vector	PHLAP92581	Plasmid vector containing HLA-A*01:01:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:59 protein. This plasmid can be used for constructing HLA-A*01:01:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:60 Protein Expression Plasmid Vector	PHLAP92582	Plasmid vector containing HLA-A*01:01:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:60 protein. This plasmid can be used for constructing HLA-A*01:01:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:61 Protein Expression Plasmid Vector	PHLAP92583	Plasmid vector containing HLA-A*01:01:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:61 protein. This plasmid can be used for constructing HLA-A*01:01:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:62 Protein Expression Plasmid Vector	PHLAP92584	Plasmid vector containing HLA-A*01:01:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:62 protein. This plasmid can be used for constructing HLA-A*01:01:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:63 Protein Expression Plasmid Vector	PHLAP92585	Plasmid vector containing HLA-A*01:01:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:63 protein. This plasmid can be used for constructing HLA-A*01:01:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:64 Protein Expression Plasmid Vector	PHLAP92586	Plasmid vector containing HLA-A*01:01:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:64 protein. This plasmid can be used for constructing HLA-A*01:01:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:65 Protein Expression Plasmid Vector	PHLAP92587	Plasmid vector containing HLA-A*01:01:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:65 protein. This plasmid can be used for constructing HLA-A*01:01:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:66 Protein Expression Plasmid Vector	PHLAP92588	Plasmid vector containing HLA-A*01:01:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:66 protein. This plasmid can be used for constructing HLA-A*01:01:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:67 Protein Expression Plasmid Vector	PHLAP92589	Plasmid vector containing HLA-A*01:01:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:67 protein. This plasmid can be used for constructing HLA-A*01:01:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:68 Protein Expression Plasmid Vector	PHLAP92590	Plasmid vector containing HLA-A*01:01:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:68 protein. This plasmid can be used for constructing HLA-A*01:01:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:69 Protein Expression Plasmid Vector	PHLAP92591	Plasmid vector containing HLA-A*01:01:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:69 protein. This plasmid can be used for constructing HLA-A*01:01:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:70 Protein Expression Plasmid Vector	PHLAP92592	Plasmid vector containing HLA-A*01:01:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:70 protein. This plasmid can be used for constructing HLA-A*01:01:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:71 Protein Expression Plasmid Vector	PHLAP92593	Plasmid vector containing HLA-A*01:01:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:71 protein. This plasmid can be used for constructing HLA-A*01:01:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:72 Protein Expression Plasmid Vector	PHLAP92594	Plasmid vector containing HLA-A*01:01:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:72 protein. This plasmid can be used for constructing HLA-A*01:01:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:73 Protein Expression Plasmid Vector	PHLAP92595	Plasmid vector containing HLA-A*01:01:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:73 protein. This plasmid can be used for constructing HLA-A*01:01:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:74 Protein Expression Plasmid Vector	PHLAP92596	Plasmid vector containing HLA-A*01:01:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:74 protein. This plasmid can be used for constructing HLA-A*01:01:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:75 Protein Expression Plasmid Vector	PHLAP92597	Plasmid vector containing HLA-A*01:01:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:75 protein. This plasmid can be used for constructing HLA-A*01:01:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:76 Protein Expression Plasmid Vector	PHLAP92598	Plasmid vector containing HLA-A*01:01:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:76 protein. This plasmid can be used for constructing HLA-A*01:01:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:77 Protein Expression Plasmid Vector	PHLAP92599	Plasmid vector containing HLA-A*01:01:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:77 protein. This plasmid can be used for constructing HLA-A*01:01:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:78 Protein Expression Plasmid Vector	PHLAP925100	Plasmid vector containing HLA-A*01:01:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:78 protein. This plasmid can be used for constructing HLA-A*01:01:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:79 Protein Expression Plasmid Vector	PHLAP925101	Plasmid vector containing HLA-A*01:01:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:79 protein. This plasmid can be used for constructing HLA-A*01:01:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:80 Protein Expression Plasmid Vector	PHLAP925102	Plasmid vector containing HLA-A*01:01:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:80 protein. This plasmid can be used for constructing HLA-A*01:01:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:81 Protein Expression Plasmid Vector	PHLAP925103	Plasmid vector containing HLA-A*01:01:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:81 protein. This plasmid can be used for constructing HLA-A*01:01:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:82 Protein Expression Plasmid Vector	PHLAP925104	Plasmid vector containing HLA-A*01:01:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:82 protein. This plasmid can be used for constructing HLA-A*01:01:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:83 Protein Expression Plasmid Vector	PHLAP925105	Plasmid vector containing HLA-A*01:01:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:83 protein. This plasmid can be used for constructing HLA-A*01:01:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:84 Protein Expression Plasmid Vector	PHLAP925106	Plasmid vector containing HLA-A*01:01:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:84 protein. This plasmid can be used for constructing HLA-A*01:01:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:85 Protein Expression Plasmid Vector	PHLAP925107	Plasmid vector containing HLA-A*01:01:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:85 protein. This plasmid can be used for constructing HLA-A*01:01:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:86 Protein Expression Plasmid Vector	PHLAP925108	Plasmid vector containing HLA-A*01:01:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:86 protein. This plasmid can be used for constructing HLA-A*01:01:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:87 Protein Expression Plasmid Vector	PHLAP925109	Plasmid vector containing HLA-A*01:01:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:87 protein. This plasmid can be used for constructing HLA-A*01:01:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:88 Protein Expression Plasmid Vector	PHLAP925110	Plasmid vector containing HLA-A*01:01:01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:88 protein. This plasmid can be used for constructing HLA-A*01:01:01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:89 Protein Expression Plasmid Vector	PHLAP925111	Plasmid vector containing HLA-A*01:01:01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:89 protein. This plasmid can be used for constructing HLA-A*01:01:01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:90 Protein Expression Plasmid Vector	PHLAP925112	Plasmid vector containing HLA-A*01:01:01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:90 protein. This plasmid can be used for constructing HLA-A*01:01:01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:91 Protein Expression Plasmid Vector	PHLAP925113	Plasmid vector containing HLA-A*01:01:01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:91 protein. This plasmid can be used for constructing HLA-A*01:01:01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:92 Protein Expression Plasmid Vector	PHLAP925114	Plasmid vector containing HLA-A*01:01:01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:92 protein. This plasmid can be used for constructing HLA-A*01:01:01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:93 Protein Expression Plasmid Vector	PHLAP925115	Plasmid vector containing HLA-A*01:01:01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:93 protein. This plasmid can be used for constructing HLA-A*01:01:01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:94 Protein Expression Plasmid Vector	PHLAP925116	Plasmid vector containing HLA-A*01:01:01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:94 protein. This plasmid can be used for constructing HLA-A*01:01:01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:95 Protein Expression Plasmid Vector	PHLAP925117	Plasmid vector containing HLA-A*01:01:01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:95 protein. This plasmid can be used for constructing HLA-A*01:01:01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:96 Protein Expression Plasmid Vector	PHLAP925118	Plasmid vector containing HLA-A*01:01:01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:96 protein. This plasmid can be used for constructing HLA-A*01:01:01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:97 Protein Expression Plasmid Vector	PHLAP925119	Plasmid vector containing HLA-A*01:01:01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:97 protein. This plasmid can be used for constructing HLA-A*01:01:01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:01:98 Protein Expression Plasmid Vector	PHLAP925120	Plasmid vector containing HLA-A*01:01:01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:98 protein. This plasmid can be used for constructing HLA-A*01:01:01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:01:99 Protein Expression Plasmid Vector	PHLAP925121	Plasmid vector containing HLA-A*01:01:01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:01:99 protein. This plasmid can be used for constructing HLA-A*01:01:01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:02 Protein Expression Plasmid Vector	PHLAP925122	Plasmid vector containing HLA-A*01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:02 protein. This plasmid can be used for constructing HLA-A*01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:03 Protein Expression Plasmid Vector	PHLAP925123	Plasmid vector containing HLA-A*01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:03 protein. This plasmid can be used for constructing HLA-A*01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:04 Protein Expression Plasmid Vector	PHLAP925124	Plasmid vector containing HLA-A*01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:04 protein. This plasmid can be used for constructing HLA-A*01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:05 Protein Expression Plasmid Vector	PHLAP925125	Plasmid vector containing HLA-A*01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:05 protein. This plasmid can be used for constructing HLA-A*01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:06 Protein Expression Plasmid Vector	PHLAP925126	Plasmid vector containing HLA-A*01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:06 protein. This plasmid can be used for constructing HLA-A*01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:07 Protein Expression Plasmid Vector	PHLAP925127	Plasmid vector containing HLA-A*01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:07 protein. This plasmid can be used for constructing HLA-A*01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:08 Protein Expression Plasmid Vector	PHLAP925128	Plasmid vector containing HLA-A*01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:08 protein. This plasmid can be used for constructing HLA-A*01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:09 Protein Expression Plasmid Vector	PHLAP925129	Plasmid vector containing HLA-A*01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:09 protein. This plasmid can be used for constructing HLA-A*01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:10 Protein Expression Plasmid Vector	PHLAP925130	Plasmid vector containing HLA-A*01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:10 protein. This plasmid can be used for constructing HLA-A*01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:100 Protein Expression Plasmid Vector	PHLAP925131	Plasmid vector containing HLA-A*01:01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:100 protein. This plasmid can be used for constructing HLA-A*01:01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:101 Protein Expression Plasmid Vector	PHLAP925132	Plasmid vector containing HLA-A*01:01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:101 protein. This plasmid can be used for constructing HLA-A*01:01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:102 Protein Expression Plasmid Vector	PHLAP925133	Plasmid vector containing HLA-A*01:01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:102 protein. This plasmid can be used for constructing HLA-A*01:01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:103 Protein Expression Plasmid Vector	PHLAP925134	Plasmid vector containing HLA-A*01:01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:103 protein. This plasmid can be used for constructing HLA-A*01:01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:104 Protein Expression Plasmid Vector	PHLAP925135	Plasmid vector containing HLA-A*01:01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:104 protein. This plasmid can be used for constructing HLA-A*01:01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:105 Protein Expression Plasmid Vector	PHLAP925136	Plasmid vector containing HLA-A*01:01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:105 protein. This plasmid can be used for constructing HLA-A*01:01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:106 Protein Expression Plasmid Vector	PHLAP925137	Plasmid vector containing HLA-A*01:01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:106 protein. This plasmid can be used for constructing HLA-A*01:01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:107 Protein Expression Plasmid Vector	PHLAP925138	Plasmid vector containing HLA-A*01:01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:107 protein. This plasmid can be used for constructing HLA-A*01:01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:108 Protein Expression Plasmid Vector	PHLAP925139	Plasmid vector containing HLA-A*01:01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:108 protein. This plasmid can be used for constructing HLA-A*01:01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:109 Protein Expression Plasmid Vector	PHLAP925140	Plasmid vector containing HLA-A*01:01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:109 protein. This plasmid can be used for constructing HLA-A*01:01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:11 Protein Expression Plasmid Vector	PHLAP925141	Plasmid vector containing HLA-A*01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:11 protein. This plasmid can be used for constructing HLA-A*01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:110 Protein Expression Plasmid Vector	PHLAP925142	Plasmid vector containing HLA-A*01:01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:110 protein. This plasmid can be used for constructing HLA-A*01:01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:111 Protein Expression Plasmid Vector	PHLAP925143	Plasmid vector containing HLA-A*01:01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:111 protein. This plasmid can be used for constructing HLA-A*01:01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:112 Protein Expression Plasmid Vector	PHLAP925144	Plasmid vector containing HLA-A*01:01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:112 protein. This plasmid can be used for constructing HLA-A*01:01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:113 Protein Expression Plasmid Vector	PHLAP925145	Plasmid vector containing HLA-A*01:01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:113 protein. This plasmid can be used for constructing HLA-A*01:01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:114 Protein Expression Plasmid Vector	PHLAP925146	Plasmid vector containing HLA-A*01:01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:114 protein. This plasmid can be used for constructing HLA-A*01:01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:115 Protein Expression Plasmid Vector	PHLAP925147	Plasmid vector containing HLA-A*01:01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:115 protein. This plasmid can be used for constructing HLA-A*01:01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:116 Protein Expression Plasmid Vector	PHLAP925148	Plasmid vector containing HLA-A*01:01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:116 protein. This plasmid can be used for constructing HLA-A*01:01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:117 Protein Expression Plasmid Vector	PHLAP925149	Plasmid vector containing HLA-A*01:01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:117 protein. This plasmid can be used for constructing HLA-A*01:01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:118 Protein Expression Plasmid Vector	PHLAP925150	Plasmid vector containing HLA-A*01:01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:118 protein. This plasmid can be used for constructing HLA-A*01:01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:119 Protein Expression Plasmid Vector	PHLAP925151	Plasmid vector containing HLA-A*01:01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:119 protein. This plasmid can be used for constructing HLA-A*01:01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:12 Protein Expression Plasmid Vector	PHLAP925152	Plasmid vector containing HLA-A*01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:12 protein. This plasmid can be used for constructing HLA-A*01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:120 Protein Expression Plasmid Vector	PHLAP925153	Plasmid vector containing HLA-A*01:01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:120 protein. This plasmid can be used for constructing HLA-A*01:01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:121 Protein Expression Plasmid Vector	PHLAP925154	Plasmid vector containing HLA-A*01:01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:121 protein. This plasmid can be used for constructing HLA-A*01:01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:122 Protein Expression Plasmid Vector	PHLAP925155	Plasmid vector containing HLA-A*01:01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:122 protein. This plasmid can be used for constructing HLA-A*01:01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:123 Protein Expression Plasmid Vector	PHLAP925156	Plasmid vector containing HLA-A*01:01:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:123 protein. This plasmid can be used for constructing HLA-A*01:01:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:124 Protein Expression Plasmid Vector	PHLAP925157	Plasmid vector containing HLA-A*01:01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:124 protein. This plasmid can be used for constructing HLA-A*01:01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:125 Protein Expression Plasmid Vector	PHLAP925158	Plasmid vector containing HLA-A*01:01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:125 protein. This plasmid can be used for constructing HLA-A*01:01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:126 Protein Expression Plasmid Vector	PHLAP925159	Plasmid vector containing HLA-A*01:01:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:126 protein. This plasmid can be used for constructing HLA-A*01:01:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:127 Protein Expression Plasmid Vector	PHLAP925160	Plasmid vector containing HLA-A*01:01:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:127 protein. This plasmid can be used for constructing HLA-A*01:01:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:128 Protein Expression Plasmid Vector	PHLAP925161	Plasmid vector containing HLA-A*01:01:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:128 protein. This plasmid can be used for constructing HLA-A*01:01:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:129 Protein Expression Plasmid Vector	PHLAP925162	Plasmid vector containing HLA-A*01:01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:129 protein. This plasmid can be used for constructing HLA-A*01:01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:13 Protein Expression Plasmid Vector	PHLAP925163	Plasmid vector containing HLA-A*01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:13 protein. This plasmid can be used for constructing HLA-A*01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:130 Protein Expression Plasmid Vector	PHLAP925164	Plasmid vector containing HLA-A*01:01:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:130 protein. This plasmid can be used for constructing HLA-A*01:01:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:131 Protein Expression Plasmid Vector	PHLAP925165	Plasmid vector containing HLA-A*01:01:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:131 protein. This plasmid can be used for constructing HLA-A*01:01:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:132 Protein Expression Plasmid Vector	PHLAP925166	Plasmid vector containing HLA-A*01:01:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:132 protein. This plasmid can be used for constructing HLA-A*01:01:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:133 Protein Expression Plasmid Vector	PHLAP925167	Plasmid vector containing HLA-A*01:01:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:133 protein. This plasmid can be used for constructing HLA-A*01:01:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:134 Protein Expression Plasmid Vector	PHLAP925168	Plasmid vector containing HLA-A*01:01:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:134 protein. This plasmid can be used for constructing HLA-A*01:01:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:135 Protein Expression Plasmid Vector	PHLAP925169	Plasmid vector containing HLA-A*01:01:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:135 protein. This plasmid can be used for constructing HLA-A*01:01:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:136 Protein Expression Plasmid Vector	PHLAP925170	Plasmid vector containing HLA-A*01:01:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:136 protein. This plasmid can be used for constructing HLA-A*01:01:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:137 Protein Expression Plasmid Vector	PHLAP925171	Plasmid vector containing HLA-A*01:01:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:137 protein. This plasmid can be used for constructing HLA-A*01:01:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:138 Protein Expression Plasmid Vector	PHLAP925172	Plasmid vector containing HLA-A*01:01:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:138 protein. This plasmid can be used for constructing HLA-A*01:01:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:139 Protein Expression Plasmid Vector	PHLAP925173	Plasmid vector containing HLA-A*01:01:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:139 protein. This plasmid can be used for constructing HLA-A*01:01:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:14 Protein Expression Plasmid Vector	PHLAP925174	Plasmid vector containing HLA-A*01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:14 protein. This plasmid can be used for constructing HLA-A*01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:140 Protein Expression Plasmid Vector	PHLAP925175	Plasmid vector containing HLA-A*01:01:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:140 protein. This plasmid can be used for constructing HLA-A*01:01:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:141 Protein Expression Plasmid Vector	PHLAP925176	Plasmid vector containing HLA-A*01:01:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:141 protein. This plasmid can be used for constructing HLA-A*01:01:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:142 Protein Expression Plasmid Vector	PHLAP925177	Plasmid vector containing HLA-A*01:01:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:142 protein. This plasmid can be used for constructing HLA-A*01:01:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:143 Protein Expression Plasmid Vector	PHLAP925178	Plasmid vector containing HLA-A*01:01:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:143 protein. This plasmid can be used for constructing HLA-A*01:01:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:144 Protein Expression Plasmid Vector	PHLAP925179	Plasmid vector containing HLA-A*01:01:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:144 protein. This plasmid can be used for constructing HLA-A*01:01:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:145 Protein Expression Plasmid Vector	PHLAP925180	Plasmid vector containing HLA-A*01:01:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:145 protein. This plasmid can be used for constructing HLA-A*01:01:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:146 Protein Expression Plasmid Vector	PHLAP925181	Plasmid vector containing HLA-A*01:01:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:146 protein. This plasmid can be used for constructing HLA-A*01:01:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:147 Protein Expression Plasmid Vector	PHLAP925182	Plasmid vector containing HLA-A*01:01:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:147 protein. This plasmid can be used for constructing HLA-A*01:01:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:148 Protein Expression Plasmid Vector	PHLAP925183	Plasmid vector containing HLA-A*01:01:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:148 protein. This plasmid can be used for constructing HLA-A*01:01:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:149 Protein Expression Plasmid Vector	PHLAP925184	Plasmid vector containing HLA-A*01:01:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:149 protein. This plasmid can be used for constructing HLA-A*01:01:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:15 Protein Expression Plasmid Vector	PHLAP925185	Plasmid vector containing HLA-A*01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:15 protein. This plasmid can be used for constructing HLA-A*01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:150 Protein Expression Plasmid Vector	PHLAP925186	Plasmid vector containing HLA-A*01:01:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:150 protein. This plasmid can be used for constructing HLA-A*01:01:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:151 Protein Expression Plasmid Vector	PHLAP925187	Plasmid vector containing HLA-A*01:01:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:151 protein. This plasmid can be used for constructing HLA-A*01:01:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:152 Protein Expression Plasmid Vector	PHLAP925188	Plasmid vector containing HLA-A*01:01:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:152 protein. This plasmid can be used for constructing HLA-A*01:01:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:153 Protein Expression Plasmid Vector	PHLAP925189	Plasmid vector containing HLA-A*01:01:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:153 protein. This plasmid can be used for constructing HLA-A*01:01:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:154 Protein Expression Plasmid Vector	PHLAP925190	Plasmid vector containing HLA-A*01:01:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:154 protein. This plasmid can be used for constructing HLA-A*01:01:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:155 Protein Expression Plasmid Vector	PHLAP925191	Plasmid vector containing HLA-A*01:01:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:155 protein. This plasmid can be used for constructing HLA-A*01:01:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:156 Protein Expression Plasmid Vector	PHLAP925192	Plasmid vector containing HLA-A*01:01:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:156 protein. This plasmid can be used for constructing HLA-A*01:01:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:157 Protein Expression Plasmid Vector	PHLAP925193	Plasmid vector containing HLA-A*01:01:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:157 protein. This plasmid can be used for constructing HLA-A*01:01:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:158 Protein Expression Plasmid Vector	PHLAP925194	Plasmid vector containing HLA-A*01:01:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:158 protein. This plasmid can be used for constructing HLA-A*01:01:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:159 Protein Expression Plasmid Vector	PHLAP925195	Plasmid vector containing HLA-A*01:01:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:159 protein. This plasmid can be used for constructing HLA-A*01:01:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:16 Protein Expression Plasmid Vector	PHLAP925196	Plasmid vector containing HLA-A*01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:16 protein. This plasmid can be used for constructing HLA-A*01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:160 Protein Expression Plasmid Vector	PHLAP925197	Plasmid vector containing HLA-A*01:01:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:160 protein. This plasmid can be used for constructing HLA-A*01:01:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:161 Protein Expression Plasmid Vector	PHLAP925198	Plasmid vector containing HLA-A*01:01:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:161 protein. This plasmid can be used for constructing HLA-A*01:01:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:162 Protein Expression Plasmid Vector	PHLAP925199	Plasmid vector containing HLA-A*01:01:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:162 protein. This plasmid can be used for constructing HLA-A*01:01:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:17 Protein Expression Plasmid Vector	PHLAP925200	Plasmid vector containing HLA-A*01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:17 protein. This plasmid can be used for constructing HLA-A*01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:18 Protein Expression Plasmid Vector	PHLAP925201	Plasmid vector containing HLA-A*01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:18 protein. This plasmid can be used for constructing HLA-A*01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:19 Protein Expression Plasmid Vector	PHLAP925202	Plasmid vector containing HLA-A*01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:19 protein. This plasmid can be used for constructing HLA-A*01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:20 Protein Expression Plasmid Vector	PHLAP925203	Plasmid vector containing HLA-A*01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:20 protein. This plasmid can be used for constructing HLA-A*01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:21 Protein Expression Plasmid Vector	PHLAP925204	Plasmid vector containing HLA-A*01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:21 protein. This plasmid can be used for constructing HLA-A*01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:22 Protein Expression Plasmid Vector	PHLAP925205	Plasmid vector containing HLA-A*01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:22 protein. This plasmid can be used for constructing HLA-A*01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:23 Protein Expression Plasmid Vector	PHLAP925206	Plasmid vector containing HLA-A*01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:23 protein. This plasmid can be used for constructing HLA-A*01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:24 Protein Expression Plasmid Vector	PHLAP925207	Plasmid vector containing HLA-A*01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:24 protein. This plasmid can be used for constructing HLA-A*01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:25 Protein Expression Plasmid Vector	PHLAP925208	Plasmid vector containing HLA-A*01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:25 protein. This plasmid can be used for constructing HLA-A*01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:26 Protein Expression Plasmid Vector	PHLAP925209	Plasmid vector containing HLA-A*01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:26 protein. This plasmid can be used for constructing HLA-A*01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:27 Protein Expression Plasmid Vector	PHLAP925210	Plasmid vector containing HLA-A*01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:27 protein. This plasmid can be used for constructing HLA-A*01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:28 Protein Expression Plasmid Vector	PHLAP925211	Plasmid vector containing HLA-A*01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:28 protein. This plasmid can be used for constructing HLA-A*01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:29 Protein Expression Plasmid Vector	PHLAP925212	Plasmid vector containing HLA-A*01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:29 protein. This plasmid can be used for constructing HLA-A*01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:30 Protein Expression Plasmid Vector	PHLAP925213	Plasmid vector containing HLA-A*01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:30 protein. This plasmid can be used for constructing HLA-A*01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:31 Protein Expression Plasmid Vector	PHLAP925214	Plasmid vector containing HLA-A*01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:31 protein. This plasmid can be used for constructing HLA-A*01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:32 Protein Expression Plasmid Vector	PHLAP925215	Plasmid vector containing HLA-A*01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:32 protein. This plasmid can be used for constructing HLA-A*01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:33 Protein Expression Plasmid Vector	PHLAP925216	Plasmid vector containing HLA-A*01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:33 protein. This plasmid can be used for constructing HLA-A*01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:34 Protein Expression Plasmid Vector	PHLAP925217	Plasmid vector containing HLA-A*01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:34 protein. This plasmid can be used for constructing HLA-A*01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:35 Protein Expression Plasmid Vector	PHLAP925218	Plasmid vector containing HLA-A*01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:35 protein. This plasmid can be used for constructing HLA-A*01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:36 Protein Expression Plasmid Vector	PHLAP925219	Plasmid vector containing HLA-A*01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:36 protein. This plasmid can be used for constructing HLA-A*01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:37 Protein Expression Plasmid Vector	PHLAP925220	Plasmid vector containing HLA-A*01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:37 protein. This plasmid can be used for constructing HLA-A*01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:38L Protein Expression Plasmid Vector	PHLAP925221	Plasmid vector containing HLA-A*01:01:38L protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:38L protein. This plasmid can be used for constructing HLA-A*01:01:38L overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:38L protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:39 Protein Expression Plasmid Vector	PHLAP925222	Plasmid vector containing HLA-A*01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:39 protein. This plasmid can be used for constructing HLA-A*01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:40 Protein Expression Plasmid Vector	PHLAP925223	Plasmid vector containing HLA-A*01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:40 protein. This plasmid can be used for constructing HLA-A*01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:41 Protein Expression Plasmid Vector	PHLAP925224	Plasmid vector containing HLA-A*01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:41 protein. This plasmid can be used for constructing HLA-A*01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:42 Protein Expression Plasmid Vector	PHLAP925225	Plasmid vector containing HLA-A*01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:42 protein. This plasmid can be used for constructing HLA-A*01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:43 Protein Expression Plasmid Vector	PHLAP925226	Plasmid vector containing HLA-A*01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:43 protein. This plasmid can be used for constructing HLA-A*01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:44 Protein Expression Plasmid Vector	PHLAP925227	Plasmid vector containing HLA-A*01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:44 protein. This plasmid can be used for constructing HLA-A*01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:45 Protein Expression Plasmid Vector	PHLAP925228	Plasmid vector containing HLA-A*01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:45 protein. This plasmid can be used for constructing HLA-A*01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:46 Protein Expression Plasmid Vector	PHLAP925229	Plasmid vector containing HLA-A*01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:46 protein. This plasmid can be used for constructing HLA-A*01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:47 Protein Expression Plasmid Vector	PHLAP925230	Plasmid vector containing HLA-A*01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:47 protein. This plasmid can be used for constructing HLA-A*01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:48 Protein Expression Plasmid Vector	PHLAP925231	Plasmid vector containing HLA-A*01:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:48 protein. This plasmid can be used for constructing HLA-A*01:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:49 Protein Expression Plasmid Vector	PHLAP925232	Plasmid vector containing HLA-A*01:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:49 protein. This plasmid can be used for constructing HLA-A*01:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:50 Protein Expression Plasmid Vector	PHLAP925233	Plasmid vector containing HLA-A*01:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:50 protein. This plasmid can be used for constructing HLA-A*01:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:51 Protein Expression Plasmid Vector	PHLAP925234	Plasmid vector containing HLA-A*01:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:51 protein. This plasmid can be used for constructing HLA-A*01:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:52 Protein Expression Plasmid Vector	PHLAP925235	Plasmid vector containing HLA-A*01:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:52 protein. This plasmid can be used for constructing HLA-A*01:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:53 Protein Expression Plasmid Vector	PHLAP925236	Plasmid vector containing HLA-A*01:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:53 protein. This plasmid can be used for constructing HLA-A*01:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:54 Protein Expression Plasmid Vector	PHLAP925237	Plasmid vector containing HLA-A*01:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:54 protein. This plasmid can be used for constructing HLA-A*01:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:55 Protein Expression Plasmid Vector	PHLAP925238	Plasmid vector containing HLA-A*01:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:55 protein. This plasmid can be used for constructing HLA-A*01:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:56 Protein Expression Plasmid Vector	PHLAP925239	Plasmid vector containing HLA-A*01:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:56 protein. This plasmid can be used for constructing HLA-A*01:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:57 Protein Expression Plasmid Vector	PHLAP925240	Plasmid vector containing HLA-A*01:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:57 protein. This plasmid can be used for constructing HLA-A*01:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:58 Protein Expression Plasmid Vector	PHLAP925241	Plasmid vector containing HLA-A*01:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:58 protein. This plasmid can be used for constructing HLA-A*01:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:59 Protein Expression Plasmid Vector	PHLAP925242	Plasmid vector containing HLA-A*01:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:59 protein. This plasmid can be used for constructing HLA-A*01:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:60 Protein Expression Plasmid Vector	PHLAP925243	Plasmid vector containing HLA-A*01:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:60 protein. This plasmid can be used for constructing HLA-A*01:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:61 Protein Expression Plasmid Vector	PHLAP925244	Plasmid vector containing HLA-A*01:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:61 protein. This plasmid can be used for constructing HLA-A*01:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:62 Protein Expression Plasmid Vector	PHLAP925245	Plasmid vector containing HLA-A*01:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:62 protein. This plasmid can be used for constructing HLA-A*01:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:63 Protein Expression Plasmid Vector	PHLAP925246	Plasmid vector containing HLA-A*01:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:63 protein. This plasmid can be used for constructing HLA-A*01:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:64 Protein Expression Plasmid Vector	PHLAP925247	Plasmid vector containing HLA-A*01:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:64 protein. This plasmid can be used for constructing HLA-A*01:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:65 Protein Expression Plasmid Vector	PHLAP925248	Plasmid vector containing HLA-A*01:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:65 protein. This plasmid can be used for constructing HLA-A*01:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:66 Protein Expression Plasmid Vector	PHLAP925249	Plasmid vector containing HLA-A*01:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:66 protein. This plasmid can be used for constructing HLA-A*01:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:67 Protein Expression Plasmid Vector	PHLAP925250	Plasmid vector containing HLA-A*01:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:67 protein. This plasmid can be used for constructing HLA-A*01:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:68 Protein Expression Plasmid Vector	PHLAP925251	Plasmid vector containing HLA-A*01:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:68 protein. This plasmid can be used for constructing HLA-A*01:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:69 Protein Expression Plasmid Vector	PHLAP925252	Plasmid vector containing HLA-A*01:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:69 protein. This plasmid can be used for constructing HLA-A*01:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:70 Protein Expression Plasmid Vector	PHLAP925253	Plasmid vector containing HLA-A*01:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:70 protein. This plasmid can be used for constructing HLA-A*01:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:71 Protein Expression Plasmid Vector	PHLAP925254	Plasmid vector containing HLA-A*01:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:71 protein. This plasmid can be used for constructing HLA-A*01:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:72 Protein Expression Plasmid Vector	PHLAP925255	Plasmid vector containing HLA-A*01:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:72 protein. This plasmid can be used for constructing HLA-A*01:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:73 Protein Expression Plasmid Vector	PHLAP925256	Plasmid vector containing HLA-A*01:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:73 protein. This plasmid can be used for constructing HLA-A*01:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:74 Protein Expression Plasmid Vector	PHLAP925257	Plasmid vector containing HLA-A*01:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:74 protein. This plasmid can be used for constructing HLA-A*01:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:75 Protein Expression Plasmid Vector	PHLAP925258	Plasmid vector containing HLA-A*01:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:75 protein. This plasmid can be used for constructing HLA-A*01:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:76 Protein Expression Plasmid Vector	PHLAP925259	Plasmid vector containing HLA-A*01:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:76 protein. This plasmid can be used for constructing HLA-A*01:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:77 Protein Expression Plasmid Vector	PHLAP925260	Plasmid vector containing HLA-A*01:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:77 protein. This plasmid can be used for constructing HLA-A*01:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:78 Protein Expression Plasmid Vector	PHLAP925261	Plasmid vector containing HLA-A*01:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:78 protein. This plasmid can be used for constructing HLA-A*01:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:79 Protein Expression Plasmid Vector	PHLAP925262	Plasmid vector containing HLA-A*01:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:79 protein. This plasmid can be used for constructing HLA-A*01:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:80 Protein Expression Plasmid Vector	PHLAP925263	Plasmid vector containing HLA-A*01:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:80 protein. This plasmid can be used for constructing HLA-A*01:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:81 Protein Expression Plasmid Vector	PHLAP925264	Plasmid vector containing HLA-A*01:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:81 protein. This plasmid can be used for constructing HLA-A*01:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:82 Protein Expression Plasmid Vector	PHLAP925265	Plasmid vector containing HLA-A*01:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:82 protein. This plasmid can be used for constructing HLA-A*01:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:83 Protein Expression Plasmid Vector	PHLAP925266	Plasmid vector containing HLA-A*01:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:83 protein. This plasmid can be used for constructing HLA-A*01:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:84 Protein Expression Plasmid Vector	PHLAP925267	Plasmid vector containing HLA-A*01:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:84 protein. This plasmid can be used for constructing HLA-A*01:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:85 Protein Expression Plasmid Vector	PHLAP925268	Plasmid vector containing HLA-A*01:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:85 protein. This plasmid can be used for constructing HLA-A*01:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:86 Protein Expression Plasmid Vector	PHLAP925269	Plasmid vector containing HLA-A*01:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:86 protein. This plasmid can be used for constructing HLA-A*01:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:87 Protein Expression Plasmid Vector	PHLAP925270	Plasmid vector containing HLA-A*01:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:87 protein. This plasmid can be used for constructing HLA-A*01:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:88 Protein Expression Plasmid Vector	PHLAP925271	Plasmid vector containing HLA-A*01:01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:88 protein. This plasmid can be used for constructing HLA-A*01:01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:89 Protein Expression Plasmid Vector	PHLAP925272	Plasmid vector containing HLA-A*01:01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:89 protein. This plasmid can be used for constructing HLA-A*01:01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:90 Protein Expression Plasmid Vector	PHLAP925273	Plasmid vector containing HLA-A*01:01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:90 protein. This plasmid can be used for constructing HLA-A*01:01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:91 Protein Expression Plasmid Vector	PHLAP925274	Plasmid vector containing HLA-A*01:01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:91 protein. This plasmid can be used for constructing HLA-A*01:01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:92 Protein Expression Plasmid Vector	PHLAP925275	Plasmid vector containing HLA-A*01:01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:92 protein. This plasmid can be used for constructing HLA-A*01:01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:93 Protein Expression Plasmid Vector	PHLAP925276	Plasmid vector containing HLA-A*01:01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:93 protein. This plasmid can be used for constructing HLA-A*01:01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:94 Protein Expression Plasmid Vector	PHLAP925277	Plasmid vector containing HLA-A*01:01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:94 protein. This plasmid can be used for constructing HLA-A*01:01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:01:95 Protein Expression Plasmid Vector	PHLAP925278	Plasmid vector containing HLA-A*01:01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:95 protein. This plasmid can be used for constructing HLA-A*01:01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:96 Protein Expression Plasmid Vector	PHLAP925279	Plasmid vector containing HLA-A*01:01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:96 protein. This plasmid can be used for constructing HLA-A*01:01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:97 Protein Expression Plasmid Vector	PHLAP925280	Plasmid vector containing HLA-A*01:01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:97 protein. This plasmid can be used for constructing HLA-A*01:01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:98 Protein Expression Plasmid Vector	PHLAP925281	Plasmid vector containing HLA-A*01:01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:98 protein. This plasmid can be used for constructing HLA-A*01:01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:01:99 Protein Expression Plasmid Vector	PHLAP925282	Plasmid vector containing HLA-A*01:01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:01:99 protein. This plasmid can be used for constructing HLA-A*01:01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:02:01:01 Protein Expression Plasmid Vector	PHLAP925283	Plasmid vector containing HLA-A*01:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:02:01:01 protein. This plasmid can be used for constructing HLA-A*01:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:02:01:02 Protein Expression Plasmid Vector	PHLAP925284	Plasmid vector containing HLA-A*01:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:02:01:02 protein. This plasmid can be used for constructing HLA-A*01:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:02:01:03 Protein Expression Plasmid Vector	PHLAP925285	Plasmid vector containing HLA-A*01:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:02:01:03 protein. This plasmid can be used for constructing HLA-A*01:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:02:02 Protein Expression Plasmid Vector	PHLAP925286	Plasmid vector containing HLA-A*01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:02:02 protein. This plasmid can be used for constructing HLA-A*01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:03:01:01 Protein Expression Plasmid Vector	PHLAP925287	Plasmid vector containing HLA-A*01:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:03:01:01 protein. This plasmid can be used for constructing HLA-A*01:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:03:01:02 Protein Expression Plasmid Vector	PHLAP925288	Plasmid vector containing HLA-A*01:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:03:01:02 protein. This plasmid can be used for constructing HLA-A*01:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:03:02 Protein Expression Plasmid Vector	PHLAP925289	Plasmid vector containing HLA-A*01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:03:02 protein. This plasmid can be used for constructing HLA-A*01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:03:03 Protein Expression Plasmid Vector	PHLAP925290	Plasmid vector containing HLA-A*01:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:03:03 protein. This plasmid can be used for constructing HLA-A*01:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:04:01:01N Protein Expression Plasmid Vector	PHLAP925291	Plasmid vector containing HLA-A*01:04:01:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:04:01:01N protein. This plasmid can be used for constructing HLA-A*01:04:01:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:04:01:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:04:01:02N Protein Expression Plasmid Vector	PHLAP925292	Plasmid vector containing HLA-A*01:04:01:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:04:01:02N protein. This plasmid can be used for constructing HLA-A*01:04:01:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:04:01:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:06 Protein Expression Plasmid Vector	PHLAP925293	Plasmid vector containing HLA-A*01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:06 protein. This plasmid can be used for constructing HLA-A*01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:07 Protein Expression Plasmid Vector	PHLAP925294	Plasmid vector containing HLA-A*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:07 protein. This plasmid can be used for constructing HLA-A*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:08 Protein Expression Plasmid Vector	PHLAP925295	Plasmid vector containing HLA-A*01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:08 protein. This plasmid can be used for constructing HLA-A*01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:09:01:01 Protein Expression Plasmid Vector	PHLAP925296	Plasmid vector containing HLA-A*01:09:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:09:01:01 protein. This plasmid can be used for constructing HLA-A*01:09:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:09:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:09:01:02 Protein Expression Plasmid Vector	PHLAP925297	Plasmid vector containing HLA-A*01:09:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:09:01:02 protein. This plasmid can be used for constructing HLA-A*01:09:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:09:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:09:02 Protein Expression Plasmid Vector	PHLAP925298	Plasmid vector containing HLA-A*01:09:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:09:02 protein. This plasmid can be used for constructing HLA-A*01:09:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:09:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:10 Protein Expression Plasmid Vector	PHLAP925299	Plasmid vector containing HLA-A*01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:10 protein. This plasmid can be used for constructing HLA-A*01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:100 Protein Expression Plasmid Vector	PHLAP925300	Plasmid vector containing HLA-A*01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:100 protein. This plasmid can be used for constructing HLA-A*01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:101 Protein Expression Plasmid Vector	PHLAP925301	Plasmid vector containing HLA-A*01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:101 protein. This plasmid can be used for constructing HLA-A*01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:102 Protein Expression Plasmid Vector	PHLAP925302	Plasmid vector containing HLA-A*01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:102 protein. This plasmid can be used for constructing HLA-A*01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:103 Protein Expression Plasmid Vector	PHLAP925303	Plasmid vector containing HLA-A*01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:103 protein. This plasmid can be used for constructing HLA-A*01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:104 Protein Expression Plasmid Vector	PHLAP925304	Plasmid vector containing HLA-A*01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:104 protein. This plasmid can be used for constructing HLA-A*01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:105 Protein Expression Plasmid Vector	PHLAP925305	Plasmid vector containing HLA-A*01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:105 protein. This plasmid can be used for constructing HLA-A*01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:106 Protein Expression Plasmid Vector	PHLAP925306	Plasmid vector containing HLA-A*01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:106 protein. This plasmid can be used for constructing HLA-A*01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:107 Protein Expression Plasmid Vector	PHLAP925307	Plasmid vector containing HLA-A*01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:107 protein. This plasmid can be used for constructing HLA-A*01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:108 Protein Expression Plasmid Vector	PHLAP925308	Plasmid vector containing HLA-A*01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:108 protein. This plasmid can be used for constructing HLA-A*01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:109 Protein Expression Plasmid Vector	PHLAP925309	Plasmid vector containing HLA-A*01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:109 protein. This plasmid can be used for constructing HLA-A*01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:110 Protein Expression Plasmid Vector	PHLAP925310	Plasmid vector containing HLA-A*01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:110 protein. This plasmid can be used for constructing HLA-A*01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:111 Protein Expression Plasmid Vector	PHLAP925311	Plasmid vector containing HLA-A*01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:111 protein. This plasmid can be used for constructing HLA-A*01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:112 Protein Expression Plasmid Vector	PHLAP925312	Plasmid vector containing HLA-A*01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:112 protein. This plasmid can be used for constructing HLA-A*01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:113 Protein Expression Plasmid Vector	PHLAP925313	Plasmid vector containing HLA-A*01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:113 protein. This plasmid can be used for constructing HLA-A*01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:114 Protein Expression Plasmid Vector	PHLAP925314	Plasmid vector containing HLA-A*01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:114 protein. This plasmid can be used for constructing HLA-A*01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:115 Protein Expression Plasmid Vector	PHLAP925315	Plasmid vector containing HLA-A*01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:115 protein. This plasmid can be used for constructing HLA-A*01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:116 Protein Expression Plasmid Vector	PHLAP925316	Plasmid vector containing HLA-A*01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:116 protein. This plasmid can be used for constructing HLA-A*01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:117 Protein Expression Plasmid Vector	PHLAP925317	Plasmid vector containing HLA-A*01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:117 protein. This plasmid can be used for constructing HLA-A*01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:118 Protein Expression Plasmid Vector	PHLAP925318	Plasmid vector containing HLA-A*01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:118 protein. This plasmid can be used for constructing HLA-A*01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:119 Protein Expression Plasmid Vector	PHLAP925319	Plasmid vector containing HLA-A*01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:119 protein. This plasmid can be used for constructing HLA-A*01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:11N Protein Expression Plasmid Vector	PHLAP925320	Plasmid vector containing HLA-A*01:11N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:11N protein. This plasmid can be used for constructing HLA-A*01:11N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:11N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:12 Protein Expression Plasmid Vector	PHLAP925321	Plasmid vector containing HLA-A*01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:12 protein. This plasmid can be used for constructing HLA-A*01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:120 Protein Expression Plasmid Vector	PHLAP925322	Plasmid vector containing HLA-A*01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:120 protein. This plasmid can be used for constructing HLA-A*01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:121 Protein Expression Plasmid Vector	PHLAP925323	Plasmid vector containing HLA-A*01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:121 protein. This plasmid can be used for constructing HLA-A*01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:122 Protein Expression Plasmid Vector	PHLAP925324	Plasmid vector containing HLA-A*01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:122 protein. This plasmid can be used for constructing HLA-A*01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:123N Protein Expression Plasmid Vector	PHLAP925325	Plasmid vector containing HLA-A*01:123N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:123N protein. This plasmid can be used for constructing HLA-A*01:123N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:123N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:124 Protein Expression Plasmid Vector	PHLAP925326	Plasmid vector containing HLA-A*01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:124 protein. This plasmid can be used for constructing HLA-A*01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:125 Protein Expression Plasmid Vector	PHLAP925327	Plasmid vector containing HLA-A*01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:125 protein. This plasmid can be used for constructing HLA-A*01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:126 Protein Expression Plasmid Vector	PHLAP925328	Plasmid vector containing HLA-A*01:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:126 protein. This plasmid can be used for constructing HLA-A*01:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:127 Protein Expression Plasmid Vector	PHLAP925329	Plasmid vector containing HLA-A*01:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:127 protein. This plasmid can be used for constructing HLA-A*01:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:128 Protein Expression Plasmid Vector	PHLAP925330	Plasmid vector containing HLA-A*01:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:128 protein. This plasmid can be used for constructing HLA-A*01:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:129 Protein Expression Plasmid Vector	PHLAP925331	Plasmid vector containing HLA-A*01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:129 protein. This plasmid can be used for constructing HLA-A*01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:13 Protein Expression Plasmid Vector	PHLAP925332	Plasmid vector containing HLA-A*01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:13 protein. This plasmid can be used for constructing HLA-A*01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:130 Protein Expression Plasmid Vector	PHLAP925333	Plasmid vector containing HLA-A*01:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:130 protein. This plasmid can be used for constructing HLA-A*01:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:131 Protein Expression Plasmid Vector	PHLAP925334	Plasmid vector containing HLA-A*01:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:131 protein. This plasmid can be used for constructing HLA-A*01:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:132 Protein Expression Plasmid Vector	PHLAP925335	Plasmid vector containing HLA-A*01:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:132 protein. This plasmid can be used for constructing HLA-A*01:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:133 Protein Expression Plasmid Vector	PHLAP925336	Plasmid vector containing HLA-A*01:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:133 protein. This plasmid can be used for constructing HLA-A*01:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:134 Protein Expression Plasmid Vector	PHLAP925337	Plasmid vector containing HLA-A*01:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:134 protein. This plasmid can be used for constructing HLA-A*01:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:135 Protein Expression Plasmid Vector	PHLAP925338	Plasmid vector containing HLA-A*01:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:135 protein. This plasmid can be used for constructing HLA-A*01:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:136 Protein Expression Plasmid Vector	PHLAP925339	Plasmid vector containing HLA-A*01:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:136 protein. This plasmid can be used for constructing HLA-A*01:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:137 Protein Expression Plasmid Vector	PHLAP925340	Plasmid vector containing HLA-A*01:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:137 protein. This plasmid can be used for constructing HLA-A*01:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:138 Protein Expression Plasmid Vector	PHLAP925341	Plasmid vector containing HLA-A*01:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:138 protein. This plasmid can be used for constructing HLA-A*01:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:139 Protein Expression Plasmid Vector	PHLAP925342	Plasmid vector containing HLA-A*01:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:139 protein. This plasmid can be used for constructing HLA-A*01:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:14 Protein Expression Plasmid Vector	PHLAP925343	Plasmid vector containing HLA-A*01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:14 protein. This plasmid can be used for constructing HLA-A*01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:140:01 Protein Expression Plasmid Vector	PHLAP925344	Plasmid vector containing HLA-A*01:140:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:140:01 protein. This plasmid can be used for constructing HLA-A*01:140:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:140:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:140:02 Protein Expression Plasmid Vector	PHLAP925345	Plasmid vector containing HLA-A*01:140:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:140:02 protein. This plasmid can be used for constructing HLA-A*01:140:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:140:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:141 Protein Expression Plasmid Vector	PHLAP925346	Plasmid vector containing HLA-A*01:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:141 protein. This plasmid can be used for constructing HLA-A*01:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:142 Protein Expression Plasmid Vector	PHLAP925347	Plasmid vector containing HLA-A*01:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:142 protein. This plasmid can be used for constructing HLA-A*01:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:143 Protein Expression Plasmid Vector	PHLAP925348	Plasmid vector containing HLA-A*01:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:143 protein. This plasmid can be used for constructing HLA-A*01:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:144 Protein Expression Plasmid Vector	PHLAP925349	Plasmid vector containing HLA-A*01:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:144 protein. This plasmid can be used for constructing HLA-A*01:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:145 Protein Expression Plasmid Vector	PHLAP925350	Plasmid vector containing HLA-A*01:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:145 protein. This plasmid can be used for constructing HLA-A*01:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:146 Protein Expression Plasmid Vector	PHLAP925351	Plasmid vector containing HLA-A*01:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:146 protein. This plasmid can be used for constructing HLA-A*01:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:147Q Protein Expression Plasmid Vector	PHLAP925352	Plasmid vector containing HLA-A*01:147Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:147Q protein. This plasmid can be used for constructing HLA-A*01:147Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:147Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:148 Protein Expression Plasmid Vector	PHLAP925353	Plasmid vector containing HLA-A*01:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:148 protein. This plasmid can be used for constructing HLA-A*01:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:149 Protein Expression Plasmid Vector	PHLAP925354	Plasmid vector containing HLA-A*01:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:149 protein. This plasmid can be used for constructing HLA-A*01:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:150 Protein Expression Plasmid Vector	PHLAP925355	Plasmid vector containing HLA-A*01:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:150 protein. This plasmid can be used for constructing HLA-A*01:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:151 Protein Expression Plasmid Vector	PHLAP925356	Plasmid vector containing HLA-A*01:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:151 protein. This plasmid can be used for constructing HLA-A*01:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:152 Protein Expression Plasmid Vector	PHLAP925357	Plasmid vector containing HLA-A*01:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:152 protein. This plasmid can be used for constructing HLA-A*01:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:153 Protein Expression Plasmid Vector	PHLAP925358	Plasmid vector containing HLA-A*01:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:153 protein. This plasmid can be used for constructing HLA-A*01:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:154 Protein Expression Plasmid Vector	PHLAP925359	Plasmid vector containing HLA-A*01:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:154 protein. This plasmid can be used for constructing HLA-A*01:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:155 Protein Expression Plasmid Vector	PHLAP925360	Plasmid vector containing HLA-A*01:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:155 protein. This plasmid can be used for constructing HLA-A*01:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:156 Protein Expression Plasmid Vector	PHLAP925361	Plasmid vector containing HLA-A*01:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:156 protein. This plasmid can be used for constructing HLA-A*01:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:157 Protein Expression Plasmid Vector	PHLAP925362	Plasmid vector containing HLA-A*01:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:157 protein. This plasmid can be used for constructing HLA-A*01:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:158 Protein Expression Plasmid Vector	PHLAP925363	Plasmid vector containing HLA-A*01:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:158 protein. This plasmid can be used for constructing HLA-A*01:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:159Q Protein Expression Plasmid Vector	PHLAP925364	Plasmid vector containing HLA-A*01:159Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:159Q protein. This plasmid can be used for constructing HLA-A*01:159Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:159Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:15N Protein Expression Plasmid Vector	PHLAP925365	Plasmid vector containing HLA-A*01:15N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:15N protein. This plasmid can be used for constructing HLA-A*01:15N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:15N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:160N Protein Expression Plasmid Vector	PHLAP925366	Plasmid vector containing HLA-A*01:160N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:160N protein. This plasmid can be used for constructing HLA-A*01:160N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:160N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:161 Protein Expression Plasmid Vector	PHLAP925367	Plasmid vector containing HLA-A*01:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:161 protein. This plasmid can be used for constructing HLA-A*01:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:162N Protein Expression Plasmid Vector	PHLAP925368	Plasmid vector containing HLA-A*01:162N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:162N protein. This plasmid can be used for constructing HLA-A*01:162N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:162N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:163 Protein Expression Plasmid Vector	PHLAP925369	Plasmid vector containing HLA-A*01:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:163 protein. This plasmid can be used for constructing HLA-A*01:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:164 Protein Expression Plasmid Vector	PHLAP925370	Plasmid vector containing HLA-A*01:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:164 protein. This plasmid can be used for constructing HLA-A*01:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:165 Protein Expression Plasmid Vector	PHLAP925371	Plasmid vector containing HLA-A*01:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:165 protein. This plasmid can be used for constructing HLA-A*01:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:166 Protein Expression Plasmid Vector	PHLAP925372	Plasmid vector containing HLA-A*01:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:166 protein. This plasmid can be used for constructing HLA-A*01:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:167 Protein Expression Plasmid Vector	PHLAP925373	Plasmid vector containing HLA-A*01:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:167 protein. This plasmid can be used for constructing HLA-A*01:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:168 Protein Expression Plasmid Vector	PHLAP925374	Plasmid vector containing HLA-A*01:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:168 protein. This plasmid can be used for constructing HLA-A*01:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:169 Protein Expression Plasmid Vector	PHLAP925375	Plasmid vector containing HLA-A*01:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:169 protein. This plasmid can be used for constructing HLA-A*01:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:16N Protein Expression Plasmid Vector	PHLAP925376	Plasmid vector containing HLA-A*01:16N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:16N protein. This plasmid can be used for constructing HLA-A*01:16N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:16N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:17 Protein Expression Plasmid Vector	PHLAP925377	Plasmid vector containing HLA-A*01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:17 protein. This plasmid can be used for constructing HLA-A*01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:170 Protein Expression Plasmid Vector	PHLAP925378	Plasmid vector containing HLA-A*01:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:170 protein. This plasmid can be used for constructing HLA-A*01:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:171 Protein Expression Plasmid Vector	PHLAP925379	Plasmid vector containing HLA-A*01:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:171 protein. This plasmid can be used for constructing HLA-A*01:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:172 Protein Expression Plasmid Vector	PHLAP925380	Plasmid vector containing HLA-A*01:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:172 protein. This plasmid can be used for constructing HLA-A*01:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:173 Protein Expression Plasmid Vector	PHLAP925381	Plasmid vector containing HLA-A*01:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:173 protein. This plasmid can be used for constructing HLA-A*01:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:174 Protein Expression Plasmid Vector	PHLAP925382	Plasmid vector containing HLA-A*01:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:174 protein. This plasmid can be used for constructing HLA-A*01:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:175 Protein Expression Plasmid Vector	PHLAP925383	Plasmid vector containing HLA-A*01:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:175 protein. This plasmid can be used for constructing HLA-A*01:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:176 Protein Expression Plasmid Vector	PHLAP925384	Plasmid vector containing HLA-A*01:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:176 protein. This plasmid can be used for constructing HLA-A*01:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:177 Protein Expression Plasmid Vector	PHLAP925385	Plasmid vector containing HLA-A*01:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:177 protein. This plasmid can be used for constructing HLA-A*01:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:178N Protein Expression Plasmid Vector	PHLAP925386	Plasmid vector containing HLA-A*01:178N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:178N protein. This plasmid can be used for constructing HLA-A*01:178N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:178N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:179N Protein Expression Plasmid Vector	PHLAP925387	Plasmid vector containing HLA-A*01:179N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:179N protein. This plasmid can be used for constructing HLA-A*01:179N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:179N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:180 Protein Expression Plasmid Vector	PHLAP925388	Plasmid vector containing HLA-A*01:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:180 protein. This plasmid can be used for constructing HLA-A*01:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:181 Protein Expression Plasmid Vector	PHLAP925389	Plasmid vector containing HLA-A*01:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:181 protein. This plasmid can be used for constructing HLA-A*01:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:182 Protein Expression Plasmid Vector	PHLAP925390	Plasmid vector containing HLA-A*01:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:182 protein. This plasmid can be used for constructing HLA-A*01:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:183 Protein Expression Plasmid Vector	PHLAP925391	Plasmid vector containing HLA-A*01:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:183 protein. This plasmid can be used for constructing HLA-A*01:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:184 Protein Expression Plasmid Vector	PHLAP925392	Plasmid vector containing HLA-A*01:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:184 protein. This plasmid can be used for constructing HLA-A*01:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:185 Protein Expression Plasmid Vector	PHLAP925393	Plasmid vector containing HLA-A*01:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:185 protein. This plasmid can be used for constructing HLA-A*01:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:186N Protein Expression Plasmid Vector	PHLAP925394	Plasmid vector containing HLA-A*01:186N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:186N protein. This plasmid can be used for constructing HLA-A*01:186N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:186N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:187 Protein Expression Plasmid Vector	PHLAP925395	Plasmid vector containing HLA-A*01:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:187 protein. This plasmid can be used for constructing HLA-A*01:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:188 Protein Expression Plasmid Vector	PHLAP925396	Plasmid vector containing HLA-A*01:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:188 protein. This plasmid can be used for constructing HLA-A*01:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:189 Protein Expression Plasmid Vector	PHLAP925397	Plasmid vector containing HLA-A*01:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:189 protein. This plasmid can be used for constructing HLA-A*01:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:18N Protein Expression Plasmid Vector	PHLAP925398	Plasmid vector containing HLA-A*01:18N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:18N protein. This plasmid can be used for constructing HLA-A*01:18N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:18N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:19 Protein Expression Plasmid Vector	PHLAP925399	Plasmid vector containing HLA-A*01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:19 protein. This plasmid can be used for constructing HLA-A*01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:190 Protein Expression Plasmid Vector	PHLAP925400	Plasmid vector containing HLA-A*01:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:190 protein. This plasmid can be used for constructing HLA-A*01:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:191 Protein Expression Plasmid Vector	PHLAP925401	Plasmid vector containing HLA-A*01:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:191 protein. This plasmid can be used for constructing HLA-A*01:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:192 Protein Expression Plasmid Vector	PHLAP925402	Plasmid vector containing HLA-A*01:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:192 protein. This plasmid can be used for constructing HLA-A*01:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:193 Protein Expression Plasmid Vector	PHLAP925403	Plasmid vector containing HLA-A*01:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:193 protein. This plasmid can be used for constructing HLA-A*01:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:194 Protein Expression Plasmid Vector	PHLAP925404	Plasmid vector containing HLA-A*01:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:194 protein. This plasmid can be used for constructing HLA-A*01:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:195 Protein Expression Plasmid Vector	PHLAP925405	Plasmid vector containing HLA-A*01:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:195 protein. This plasmid can be used for constructing HLA-A*01:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:196 Protein Expression Plasmid Vector	PHLAP925406	Plasmid vector containing HLA-A*01:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:196 protein. This plasmid can be used for constructing HLA-A*01:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:197 Protein Expression Plasmid Vector	PHLAP925407	Plasmid vector containing HLA-A*01:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:197 protein. This plasmid can be used for constructing HLA-A*01:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:198 Protein Expression Plasmid Vector	PHLAP925408	Plasmid vector containing HLA-A*01:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:198 protein. This plasmid can be used for constructing HLA-A*01:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:199 Protein Expression Plasmid Vector	PHLAP925409	Plasmid vector containing HLA-A*01:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:199 protein. This plasmid can be used for constructing HLA-A*01:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:20 Protein Expression Plasmid Vector	PHLAP925410	Plasmid vector containing HLA-A*01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:20 protein. This plasmid can be used for constructing HLA-A*01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:200 Protein Expression Plasmid Vector	PHLAP925411	Plasmid vector containing HLA-A*01:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:200 protein. This plasmid can be used for constructing HLA-A*01:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:201 Protein Expression Plasmid Vector	PHLAP925412	Plasmid vector containing HLA-A*01:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:201 protein. This plasmid can be used for constructing HLA-A*01:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:202 Protein Expression Plasmid Vector	PHLAP925413	Plasmid vector containing HLA-A*01:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:202 protein. This plasmid can be used for constructing HLA-A*01:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:203 Protein Expression Plasmid Vector	PHLAP925414	Plasmid vector containing HLA-A*01:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:203 protein. This plasmid can be used for constructing HLA-A*01:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:204 Protein Expression Plasmid Vector	PHLAP925415	Plasmid vector containing HLA-A*01:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:204 protein. This plasmid can be used for constructing HLA-A*01:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:205 Protein Expression Plasmid Vector	PHLAP925416	Plasmid vector containing HLA-A*01:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:205 protein. This plasmid can be used for constructing HLA-A*01:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:206 Protein Expression Plasmid Vector	PHLAP925417	Plasmid vector containing HLA-A*01:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:206 protein. This plasmid can be used for constructing HLA-A*01:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:207 Protein Expression Plasmid Vector	PHLAP925418	Plasmid vector containing HLA-A*01:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:207 protein. This plasmid can be used for constructing HLA-A*01:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:208Q Protein Expression Plasmid Vector	PHLAP925419	Plasmid vector containing HLA-A*01:208Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:208Q protein. This plasmid can be used for constructing HLA-A*01:208Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:208Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:209 Protein Expression Plasmid Vector	PHLAP925420	Plasmid vector containing HLA-A*01:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:209 protein. This plasmid can be used for constructing HLA-A*01:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:21 Protein Expression Plasmid Vector	PHLAP925421	Plasmid vector containing HLA-A*01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:21 protein. This plasmid can be used for constructing HLA-A*01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:210:01 Protein Expression Plasmid Vector	PHLAP925422	Plasmid vector containing HLA-A*01:210:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:210:01 protein. This plasmid can be used for constructing HLA-A*01:210:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:210:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:210:02 Protein Expression Plasmid Vector	PHLAP925423	Plasmid vector containing HLA-A*01:210:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:210:02 protein. This plasmid can be used for constructing HLA-A*01:210:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:210:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:211 Protein Expression Plasmid Vector	PHLAP925424	Plasmid vector containing HLA-A*01:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:211 protein. This plasmid can be used for constructing HLA-A*01:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:212 Protein Expression Plasmid Vector	PHLAP925425	Plasmid vector containing HLA-A*01:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:212 protein. This plasmid can be used for constructing HLA-A*01:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:213 Protein Expression Plasmid Vector	PHLAP925426	Plasmid vector containing HLA-A*01:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:213 protein. This plasmid can be used for constructing HLA-A*01:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:214 Protein Expression Plasmid Vector	PHLAP925427	Plasmid vector containing HLA-A*01:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:214 protein. This plasmid can be used for constructing HLA-A*01:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:215 Protein Expression Plasmid Vector	PHLAP925428	Plasmid vector containing HLA-A*01:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:215 protein. This plasmid can be used for constructing HLA-A*01:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:216 Protein Expression Plasmid Vector	PHLAP925429	Plasmid vector containing HLA-A*01:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:216 protein. This plasmid can be used for constructing HLA-A*01:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:217 Protein Expression Plasmid Vector	PHLAP925430	Plasmid vector containing HLA-A*01:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:217 protein. This plasmid can be used for constructing HLA-A*01:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:218 Protein Expression Plasmid Vector	PHLAP925431	Plasmid vector containing HLA-A*01:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:218 protein. This plasmid can be used for constructing HLA-A*01:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:219 Protein Expression Plasmid Vector	PHLAP925432	Plasmid vector containing HLA-A*01:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:219 protein. This plasmid can be used for constructing HLA-A*01:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:220 Protein Expression Plasmid Vector	PHLAP925433	Plasmid vector containing HLA-A*01:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:220 protein. This plasmid can be used for constructing HLA-A*01:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:221 Protein Expression Plasmid Vector	PHLAP925434	Plasmid vector containing HLA-A*01:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:221 protein. This plasmid can be used for constructing HLA-A*01:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:222 Protein Expression Plasmid Vector	PHLAP925435	Plasmid vector containing HLA-A*01:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:222 protein. This plasmid can be used for constructing HLA-A*01:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:223 Protein Expression Plasmid Vector	PHLAP925436	Plasmid vector containing HLA-A*01:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:223 protein. This plasmid can be used for constructing HLA-A*01:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:224 Protein Expression Plasmid Vector	PHLAP925437	Plasmid vector containing HLA-A*01:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:224 protein. This plasmid can be used for constructing HLA-A*01:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:225 Protein Expression Plasmid Vector	PHLAP925438	Plasmid vector containing HLA-A*01:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:225 protein. This plasmid can be used for constructing HLA-A*01:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:226 Protein Expression Plasmid Vector	PHLAP925439	Plasmid vector containing HLA-A*01:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:226 protein. This plasmid can be used for constructing HLA-A*01:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:227 Protein Expression Plasmid Vector	PHLAP925440	Plasmid vector containing HLA-A*01:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:227 protein. This plasmid can be used for constructing HLA-A*01:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:228Q Protein Expression Plasmid Vector	PHLAP925441	Plasmid vector containing HLA-A*01:228Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:228Q protein. This plasmid can be used for constructing HLA-A*01:228Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:228Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:229 Protein Expression Plasmid Vector	PHLAP925442	Plasmid vector containing HLA-A*01:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:229 protein. This plasmid can be used for constructing HLA-A*01:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:22N Protein Expression Plasmid Vector	PHLAP925443	Plasmid vector containing HLA-A*01:22N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:22N protein. This plasmid can be used for constructing HLA-A*01:22N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:22N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:23:01 Protein Expression Plasmid Vector	PHLAP925444	Plasmid vector containing HLA-A*01:23:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:23:01 protein. This plasmid can be used for constructing HLA-A*01:23:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:23:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:23:02 Protein Expression Plasmid Vector	PHLAP925445	Plasmid vector containing HLA-A*01:23:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:23:02 protein. This plasmid can be used for constructing HLA-A*01:23:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:23:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:230 Protein Expression Plasmid Vector	PHLAP925446	Plasmid vector containing HLA-A*01:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:230 protein. This plasmid can be used for constructing HLA-A*01:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:231 Protein Expression Plasmid Vector	PHLAP925447	Plasmid vector containing HLA-A*01:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:231 protein. This plasmid can be used for constructing HLA-A*01:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:232:01 Protein Expression Plasmid Vector	PHLAP925448	Plasmid vector containing HLA-A*01:232:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:232:01 protein. This plasmid can be used for constructing HLA-A*01:232:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:232:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:232:02 Protein Expression Plasmid Vector	PHLAP925449	Plasmid vector containing HLA-A*01:232:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:232:02 protein. This plasmid can be used for constructing HLA-A*01:232:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:232:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:233 Protein Expression Plasmid Vector	PHLAP925450	Plasmid vector containing HLA-A*01:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:233 protein. This plasmid can be used for constructing HLA-A*01:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:234 Protein Expression Plasmid Vector	PHLAP925451	Plasmid vector containing HLA-A*01:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:234 protein. This plasmid can be used for constructing HLA-A*01:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:235 Protein Expression Plasmid Vector	PHLAP925452	Plasmid vector containing HLA-A*01:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:235 protein. This plasmid can be used for constructing HLA-A*01:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:236 Protein Expression Plasmid Vector	PHLAP925453	Plasmid vector containing HLA-A*01:236 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:236 protein. This plasmid can be used for constructing HLA-A*01:236 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:236 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:237 Protein Expression Plasmid Vector	PHLAP925454	Plasmid vector containing HLA-A*01:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:237 protein. This plasmid can be used for constructing HLA-A*01:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:238 Protein Expression Plasmid Vector	PHLAP925455	Plasmid vector containing HLA-A*01:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:238 protein. This plasmid can be used for constructing HLA-A*01:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:239 Protein Expression Plasmid Vector	PHLAP925456	Plasmid vector containing HLA-A*01:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:239 protein. This plasmid can be used for constructing HLA-A*01:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:24 Protein Expression Plasmid Vector	PHLAP925457	Plasmid vector containing HLA-A*01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:24 protein. This plasmid can be used for constructing HLA-A*01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:240N Protein Expression Plasmid Vector	PHLAP925458	Plasmid vector containing HLA-A*01:240N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:240N protein. This plasmid can be used for constructing HLA-A*01:240N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:240N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:241 Protein Expression Plasmid Vector	PHLAP925459	Plasmid vector containing HLA-A*01:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:241 protein. This plasmid can be used for constructing HLA-A*01:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:242 Protein Expression Plasmid Vector	PHLAP925460	Plasmid vector containing HLA-A*01:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:242 protein. This plasmid can be used for constructing HLA-A*01:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:243 Protein Expression Plasmid Vector	PHLAP925461	Plasmid vector containing HLA-A*01:243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:243 protein. This plasmid can be used for constructing HLA-A*01:243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:244 Protein Expression Plasmid Vector	PHLAP925462	Plasmid vector containing HLA-A*01:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:244 protein. This plasmid can be used for constructing HLA-A*01:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:245 Protein Expression Plasmid Vector	PHLAP925463	Plasmid vector containing HLA-A*01:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:245 protein. This plasmid can be used for constructing HLA-A*01:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:246 Protein Expression Plasmid Vector	PHLAP925464	Plasmid vector containing HLA-A*01:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:246 protein. This plasmid can be used for constructing HLA-A*01:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:247N Protein Expression Plasmid Vector	PHLAP925465	Plasmid vector containing HLA-A*01:247N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:247N protein. This plasmid can be used for constructing HLA-A*01:247N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:247N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:248Q Protein Expression Plasmid Vector	PHLAP925466	Plasmid vector containing HLA-A*01:248Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:248Q protein. This plasmid can be used for constructing HLA-A*01:248Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:248Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:249 Protein Expression Plasmid Vector	PHLAP925467	Plasmid vector containing HLA-A*01:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:249 protein. This plasmid can be used for constructing HLA-A*01:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:25 Protein Expression Plasmid Vector	PHLAP925468	Plasmid vector containing HLA-A*01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:25 protein. This plasmid can be used for constructing HLA-A*01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:250N Protein Expression Plasmid Vector	PHLAP925469	Plasmid vector containing HLA-A*01:250N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:250N protein. This plasmid can be used for constructing HLA-A*01:250N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:250N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:251 Protein Expression Plasmid Vector	PHLAP925470	Plasmid vector containing HLA-A*01:251 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:251 protein. This plasmid can be used for constructing HLA-A*01:251 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:251 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:252 Protein Expression Plasmid Vector	PHLAP925471	Plasmid vector containing HLA-A*01:252 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:252 protein. This plasmid can be used for constructing HLA-A*01:252 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:252 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:253 Protein Expression Plasmid Vector	PHLAP925472	Plasmid vector containing HLA-A*01:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:253 protein. This plasmid can be used for constructing HLA-A*01:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:254 Protein Expression Plasmid Vector	PHLAP925473	Plasmid vector containing HLA-A*01:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:254 protein. This plasmid can be used for constructing HLA-A*01:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:255 Protein Expression Plasmid Vector	PHLAP925474	Plasmid vector containing HLA-A*01:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:255 protein. This plasmid can be used for constructing HLA-A*01:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:256 Protein Expression Plasmid Vector	PHLAP925475	Plasmid vector containing HLA-A*01:256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:256 protein. This plasmid can be used for constructing HLA-A*01:256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:257 Protein Expression Plasmid Vector	PHLAP925476	Plasmid vector containing HLA-A*01:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:257 protein. This plasmid can be used for constructing HLA-A*01:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:258N Protein Expression Plasmid Vector	PHLAP925477	Plasmid vector containing HLA-A*01:258N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:258N protein. This plasmid can be used for constructing HLA-A*01:258N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:258N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:259 Protein Expression Plasmid Vector	PHLAP925478	Plasmid vector containing HLA-A*01:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:259 protein. This plasmid can be used for constructing HLA-A*01:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:26 Protein Expression Plasmid Vector	PHLAP925479	Plasmid vector containing HLA-A*01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:26 protein. This plasmid can be used for constructing HLA-A*01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:260 Protein Expression Plasmid Vector	PHLAP925480	Plasmid vector containing HLA-A*01:260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:260 protein. This plasmid can be used for constructing HLA-A*01:260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:261 Protein Expression Plasmid Vector	PHLAP925481	Plasmid vector containing HLA-A*01:261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:261 protein. This plasmid can be used for constructing HLA-A*01:261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:262 Protein Expression Plasmid Vector	PHLAP925482	Plasmid vector containing HLA-A*01:262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:262 protein. This plasmid can be used for constructing HLA-A*01:262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:263 Protein Expression Plasmid Vector	PHLAP925483	Plasmid vector containing HLA-A*01:263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:263 protein. This plasmid can be used for constructing HLA-A*01:263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:264 Protein Expression Plasmid Vector	PHLAP925484	Plasmid vector containing HLA-A*01:264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:264 protein. This plasmid can be used for constructing HLA-A*01:264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:265 Protein Expression Plasmid Vector	PHLAP925485	Plasmid vector containing HLA-A*01:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:265 protein. This plasmid can be used for constructing HLA-A*01:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:266:01 Protein Expression Plasmid Vector	PHLAP925486	Plasmid vector containing HLA-A*01:266:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:266:01 protein. This plasmid can be used for constructing HLA-A*01:266:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:266:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:266:02 Protein Expression Plasmid Vector	PHLAP925487	Plasmid vector containing HLA-A*01:266:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:266:02 protein. This plasmid can be used for constructing HLA-A*01:266:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:266:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:267 Protein Expression Plasmid Vector	PHLAP925488	Plasmid vector containing HLA-A*01:267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:267 protein. This plasmid can be used for constructing HLA-A*01:267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:268 Protein Expression Plasmid Vector	PHLAP925489	Plasmid vector containing HLA-A*01:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:268 protein. This plasmid can be used for constructing HLA-A*01:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:269N Protein Expression Plasmid Vector	PHLAP925490	Plasmid vector containing HLA-A*01:269N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:269N protein. This plasmid can be used for constructing HLA-A*01:269N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:269N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:270 Protein Expression Plasmid Vector	PHLAP925491	Plasmid vector containing HLA-A*01:270 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:270 protein. This plasmid can be used for constructing HLA-A*01:270 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:270 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:271 Protein Expression Plasmid Vector	PHLAP925492	Plasmid vector containing HLA-A*01:271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:271 protein. This plasmid can be used for constructing HLA-A*01:271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:272 Protein Expression Plasmid Vector	PHLAP925493	Plasmid vector containing HLA-A*01:272 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:272 protein. This plasmid can be used for constructing HLA-A*01:272 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:272 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:273 Protein Expression Plasmid Vector	PHLAP925494	Plasmid vector containing HLA-A*01:273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:273 protein. This plasmid can be used for constructing HLA-A*01:273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:274 Protein Expression Plasmid Vector	PHLAP925495	Plasmid vector containing HLA-A*01:274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:274 protein. This plasmid can be used for constructing HLA-A*01:274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:275 Protein Expression Plasmid Vector	PHLAP925496	Plasmid vector containing HLA-A*01:275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:275 protein. This plasmid can be used for constructing HLA-A*01:275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:276 Protein Expression Plasmid Vector	PHLAP925497	Plasmid vector containing HLA-A*01:276 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:276 protein. This plasmid can be used for constructing HLA-A*01:276 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:276 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:277 Protein Expression Plasmid Vector	PHLAP925498	Plasmid vector containing HLA-A*01:277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:277 protein. This plasmid can be used for constructing HLA-A*01:277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:278 Protein Expression Plasmid Vector	PHLAP925499	Plasmid vector containing HLA-A*01:278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:278 protein. This plasmid can be used for constructing HLA-A*01:278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:279 Protein Expression Plasmid Vector	PHLAP925500	Plasmid vector containing HLA-A*01:279 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:279 protein. This plasmid can be used for constructing HLA-A*01:279 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:279 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:27N Protein Expression Plasmid Vector	PHLAP925501	Plasmid vector containing HLA-A*01:27N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:27N protein. This plasmid can be used for constructing HLA-A*01:27N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:27N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:28 Protein Expression Plasmid Vector	PHLAP925502	Plasmid vector containing HLA-A*01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:28 protein. This plasmid can be used for constructing HLA-A*01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:280 Protein Expression Plasmid Vector	PHLAP925503	Plasmid vector containing HLA-A*01:280 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:280 protein. This plasmid can be used for constructing HLA-A*01:280 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:280 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:281Q Protein Expression Plasmid Vector	PHLAP925504	Plasmid vector containing HLA-A*01:281Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:281Q protein. This plasmid can be used for constructing HLA-A*01:281Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:281Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:282 Protein Expression Plasmid Vector	PHLAP925505	Plasmid vector containing HLA-A*01:282 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:282 protein. This plasmid can be used for constructing HLA-A*01:282 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:282 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:283 Protein Expression Plasmid Vector	PHLAP925506	Plasmid vector containing HLA-A*01:283 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:283 protein. This plasmid can be used for constructing HLA-A*01:283 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:283 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:284 Protein Expression Plasmid Vector	PHLAP925507	Plasmid vector containing HLA-A*01:284 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:284 protein. This plasmid can be used for constructing HLA-A*01:284 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:284 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:285N Protein Expression Plasmid Vector	PHLAP925508	Plasmid vector containing HLA-A*01:285N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:285N protein. This plasmid can be used for constructing HLA-A*01:285N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:285N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:286 Protein Expression Plasmid Vector	PHLAP925509	Plasmid vector containing HLA-A*01:286 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:286 protein. This plasmid can be used for constructing HLA-A*01:286 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:286 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:287N Protein Expression Plasmid Vector	PHLAP925510	Plasmid vector containing HLA-A*01:287N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:287N protein. This plasmid can be used for constructing HLA-A*01:287N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:287N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:288 Protein Expression Plasmid Vector	PHLAP925511	Plasmid vector containing HLA-A*01:288 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:288 protein. This plasmid can be used for constructing HLA-A*01:288 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:288 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:289 Protein Expression Plasmid Vector	PHLAP925512	Plasmid vector containing HLA-A*01:289 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:289 protein. This plasmid can be used for constructing HLA-A*01:289 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:289 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:29 Protein Expression Plasmid Vector	PHLAP925513	Plasmid vector containing HLA-A*01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:29 protein. This plasmid can be used for constructing HLA-A*01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:290N Protein Expression Plasmid Vector	PHLAP925514	Plasmid vector containing HLA-A*01:290N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:290N protein. This plasmid can be used for constructing HLA-A*01:290N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:290N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:291 Protein Expression Plasmid Vector	PHLAP925515	Plasmid vector containing HLA-A*01:291 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:291 protein. This plasmid can be used for constructing HLA-A*01:291 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:291 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:292 Protein Expression Plasmid Vector	PHLAP925516	Plasmid vector containing HLA-A*01:292 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:292 protein. This plasmid can be used for constructing HLA-A*01:292 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:292 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:293N Protein Expression Plasmid Vector	PHLAP925517	Plasmid vector containing HLA-A*01:293N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:293N protein. This plasmid can be used for constructing HLA-A*01:293N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:293N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:294 Protein Expression Plasmid Vector	PHLAP925518	Plasmid vector containing HLA-A*01:294 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:294 protein. This plasmid can be used for constructing HLA-A*01:294 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:294 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:295 Protein Expression Plasmid Vector	PHLAP925519	Plasmid vector containing HLA-A*01:295 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:295 protein. This plasmid can be used for constructing HLA-A*01:295 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:295 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:296 Protein Expression Plasmid Vector	PHLAP925520	Plasmid vector containing HLA-A*01:296 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:296 protein. This plasmid can be used for constructing HLA-A*01:296 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:296 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:297 Protein Expression Plasmid Vector	PHLAP925521	Plasmid vector containing HLA-A*01:297 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:297 protein. This plasmid can be used for constructing HLA-A*01:297 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:297 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:298 Protein Expression Plasmid Vector	PHLAP925522	Plasmid vector containing HLA-A*01:298 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:298 protein. This plasmid can be used for constructing HLA-A*01:298 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:298 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:299 Protein Expression Plasmid Vector	PHLAP925523	Plasmid vector containing HLA-A*01:299 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:299 protein. This plasmid can be used for constructing HLA-A*01:299 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:299 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:30 Protein Expression Plasmid Vector	PHLAP925524	Plasmid vector containing HLA-A*01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:30 protein. This plasmid can be used for constructing HLA-A*01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:300 Protein Expression Plasmid Vector	PHLAP925525	Plasmid vector containing HLA-A*01:300 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:300 protein. This plasmid can be used for constructing HLA-A*01:300 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:300 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:301Q Protein Expression Plasmid Vector	PHLAP925526	Plasmid vector containing HLA-A*01:301Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:301Q protein. This plasmid can be used for constructing HLA-A*01:301Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:301Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:302 Protein Expression Plasmid Vector	PHLAP925527	Plasmid vector containing HLA-A*01:302 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:302 protein. This plasmid can be used for constructing HLA-A*01:302 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:302 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:303:01 Protein Expression Plasmid Vector	PHLAP925528	Plasmid vector containing HLA-A*01:303:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:303:01 protein. This plasmid can be used for constructing HLA-A*01:303:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:303:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:303:02 Protein Expression Plasmid Vector	PHLAP925529	Plasmid vector containing HLA-A*01:303:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:303:02 protein. This plasmid can be used for constructing HLA-A*01:303:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:303:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:304 Protein Expression Plasmid Vector	PHLAP925530	Plasmid vector containing HLA-A*01:304 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:304 protein. This plasmid can be used for constructing HLA-A*01:304 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:304 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:305 Protein Expression Plasmid Vector	PHLAP925531	Plasmid vector containing HLA-A*01:305 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:305 protein. This plasmid can be used for constructing HLA-A*01:305 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:305 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:306 Protein Expression Plasmid Vector	PHLAP925532	Plasmid vector containing HLA-A*01:306 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:306 protein. This plasmid can be used for constructing HLA-A*01:306 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:306 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:307 Protein Expression Plasmid Vector	PHLAP925533	Plasmid vector containing HLA-A*01:307 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:307 protein. This plasmid can be used for constructing HLA-A*01:307 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:307 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:308N Protein Expression Plasmid Vector	PHLAP925534	Plasmid vector containing HLA-A*01:308N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:308N protein. This plasmid can be used for constructing HLA-A*01:308N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:308N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:309 Protein Expression Plasmid Vector	PHLAP925535	Plasmid vector containing HLA-A*01:309 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:309 protein. This plasmid can be used for constructing HLA-A*01:309 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:309 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:310 Protein Expression Plasmid Vector	PHLAP925536	Plasmid vector containing HLA-A*01:310 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:310 protein. This plasmid can be used for constructing HLA-A*01:310 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:310 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:311 Protein Expression Plasmid Vector	PHLAP925537	Plasmid vector containing HLA-A*01:311 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:311 protein. This plasmid can be used for constructing HLA-A*01:311 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:311 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:312 Protein Expression Plasmid Vector	PHLAP925538	Plasmid vector containing HLA-A*01:312 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:312 protein. This plasmid can be used for constructing HLA-A*01:312 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:312 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:313 Protein Expression Plasmid Vector	PHLAP925539	Plasmid vector containing HLA-A*01:313 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:313 protein. This plasmid can be used for constructing HLA-A*01:313 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:313 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:314 Protein Expression Plasmid Vector	PHLAP925540	Plasmid vector containing HLA-A*01:314 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:314 protein. This plasmid can be used for constructing HLA-A*01:314 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:314 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:315 Protein Expression Plasmid Vector	PHLAP925541	Plasmid vector containing HLA-A*01:315 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:315 protein. This plasmid can be used for constructing HLA-A*01:315 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:315 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:316 Protein Expression Plasmid Vector	PHLAP925542	Plasmid vector containing HLA-A*01:316 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:316 protein. This plasmid can be used for constructing HLA-A*01:316 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:316 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:317 Protein Expression Plasmid Vector	PHLAP925543	Plasmid vector containing HLA-A*01:317 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:317 protein. This plasmid can be used for constructing HLA-A*01:317 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:317 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:318 Protein Expression Plasmid Vector	PHLAP925544	Plasmid vector containing HLA-A*01:318 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:318 protein. This plasmid can be used for constructing HLA-A*01:318 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:318 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:319 Protein Expression Plasmid Vector	PHLAP925545	Plasmid vector containing HLA-A*01:319 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:319 protein. This plasmid can be used for constructing HLA-A*01:319 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:319 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:31N Protein Expression Plasmid Vector	PHLAP925546	Plasmid vector containing HLA-A*01:31N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:31N protein. This plasmid can be used for constructing HLA-A*01:31N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:31N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:32 Protein Expression Plasmid Vector	PHLAP925547	Plasmid vector containing HLA-A*01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:32 protein. This plasmid can be used for constructing HLA-A*01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:320N Protein Expression Plasmid Vector	PHLAP925548	Plasmid vector containing HLA-A*01:320N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:320N protein. This plasmid can be used for constructing HLA-A*01:320N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:320N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:321 Protein Expression Plasmid Vector	PHLAP925549	Plasmid vector containing HLA-A*01:321 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:321 protein. This plasmid can be used for constructing HLA-A*01:321 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:321 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:322 Protein Expression Plasmid Vector	PHLAP925550	Plasmid vector containing HLA-A*01:322 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:322 protein. This plasmid can be used for constructing HLA-A*01:322 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:322 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:323 Protein Expression Plasmid Vector	PHLAP925551	Plasmid vector containing HLA-A*01:323 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:323 protein. This plasmid can be used for constructing HLA-A*01:323 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:323 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:324:01 Protein Expression Plasmid Vector	PHLAP925552	Plasmid vector containing HLA-A*01:324:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:324:01 protein. This plasmid can be used for constructing HLA-A*01:324:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:324:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:324:02 Protein Expression Plasmid Vector	PHLAP925553	Plasmid vector containing HLA-A*01:324:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:324:02 protein. This plasmid can be used for constructing HLA-A*01:324:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:324:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:325 Protein Expression Plasmid Vector	PHLAP925554	Plasmid vector containing HLA-A*01:325 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:325 protein. This plasmid can be used for constructing HLA-A*01:325 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:325 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:326N Protein Expression Plasmid Vector	PHLAP925555	Plasmid vector containing HLA-A*01:326N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:326N protein. This plasmid can be used for constructing HLA-A*01:326N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:326N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:327 Protein Expression Plasmid Vector	PHLAP925556	Plasmid vector containing HLA-A*01:327 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:327 protein. This plasmid can be used for constructing HLA-A*01:327 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:327 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:328N Protein Expression Plasmid Vector	PHLAP925557	Plasmid vector containing HLA-A*01:328N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:328N protein. This plasmid can be used for constructing HLA-A*01:328N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:328N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:329 Protein Expression Plasmid Vector	PHLAP925558	Plasmid vector containing HLA-A*01:329 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:329 protein. This plasmid can be used for constructing HLA-A*01:329 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:329 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:33 Protein Expression Plasmid Vector	PHLAP925559	Plasmid vector containing HLA-A*01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:33 protein. This plasmid can be used for constructing HLA-A*01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:330 Protein Expression Plasmid Vector	PHLAP925560	Plasmid vector containing HLA-A*01:330 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:330 protein. This plasmid can be used for constructing HLA-A*01:330 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:330 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:331 Protein Expression Plasmid Vector	PHLAP925561	Plasmid vector containing HLA-A*01:331 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:331 protein. This plasmid can be used for constructing HLA-A*01:331 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:331 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:332 Protein Expression Plasmid Vector	PHLAP925562	Plasmid vector containing HLA-A*01:332 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:332 protein. This plasmid can be used for constructing HLA-A*01:332 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:332 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:333 Protein Expression Plasmid Vector	PHLAP925563	Plasmid vector containing HLA-A*01:333 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:333 protein. This plasmid can be used for constructing HLA-A*01:333 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:333 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:334 Protein Expression Plasmid Vector	PHLAP925564	Plasmid vector containing HLA-A*01:334 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:334 protein. This plasmid can be used for constructing HLA-A*01:334 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:334 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:335 Protein Expression Plasmid Vector	PHLAP925565	Plasmid vector containing HLA-A*01:335 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:335 protein. This plasmid can be used for constructing HLA-A*01:335 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:335 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:336N Protein Expression Plasmid Vector	PHLAP925566	Plasmid vector containing HLA-A*01:336N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:336N protein. This plasmid can be used for constructing HLA-A*01:336N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:336N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:337 Protein Expression Plasmid Vector	PHLAP925567	Plasmid vector containing HLA-A*01:337 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:337 protein. This plasmid can be used for constructing HLA-A*01:337 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:337 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:338 Protein Expression Plasmid Vector	PHLAP925568	Plasmid vector containing HLA-A*01:338 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:338 protein. This plasmid can be used for constructing HLA-A*01:338 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:338 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:339 Protein Expression Plasmid Vector	PHLAP925569	Plasmid vector containing HLA-A*01:339 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:339 protein. This plasmid can be used for constructing HLA-A*01:339 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:339 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:340 Protein Expression Plasmid Vector	PHLAP925570	Plasmid vector containing HLA-A*01:340 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:340 protein. This plasmid can be used for constructing HLA-A*01:340 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:340 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:341 Protein Expression Plasmid Vector	PHLAP925571	Plasmid vector containing HLA-A*01:341 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:341 protein. This plasmid can be used for constructing HLA-A*01:341 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:341 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:342 Protein Expression Plasmid Vector	PHLAP925572	Plasmid vector containing HLA-A*01:342 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:342 protein. This plasmid can be used for constructing HLA-A*01:342 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:342 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:343 Protein Expression Plasmid Vector	PHLAP925573	Plasmid vector containing HLA-A*01:343 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:343 protein. This plasmid can be used for constructing HLA-A*01:343 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:343 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:344 Protein Expression Plasmid Vector	PHLAP925574	Plasmid vector containing HLA-A*01:344 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:344 protein. This plasmid can be used for constructing HLA-A*01:344 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:344 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:345 Protein Expression Plasmid Vector	PHLAP925575	Plasmid vector containing HLA-A*01:345 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:345 protein. This plasmid can be used for constructing HLA-A*01:345 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:345 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:346 Protein Expression Plasmid Vector	PHLAP925576	Plasmid vector containing HLA-A*01:346 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:346 protein. This plasmid can be used for constructing HLA-A*01:346 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:346 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:347 Protein Expression Plasmid Vector	PHLAP925577	Plasmid vector containing HLA-A*01:347 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:347 protein. This plasmid can be used for constructing HLA-A*01:347 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:347 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:348 Protein Expression Plasmid Vector	PHLAP925578	Plasmid vector containing HLA-A*01:348 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:348 protein. This plasmid can be used for constructing HLA-A*01:348 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:348 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:349 Protein Expression Plasmid Vector	PHLAP925579	Plasmid vector containing HLA-A*01:349 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:349 protein. This plasmid can be used for constructing HLA-A*01:349 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:349 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:34N Protein Expression Plasmid Vector	PHLAP925580	Plasmid vector containing HLA-A*01:34N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:34N protein. This plasmid can be used for constructing HLA-A*01:34N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:34N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:35 Protein Expression Plasmid Vector	PHLAP925581	Plasmid vector containing HLA-A*01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:35 protein. This plasmid can be used for constructing HLA-A*01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:350 Protein Expression Plasmid Vector	PHLAP925582	Plasmid vector containing HLA-A*01:350 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:350 protein. This plasmid can be used for constructing HLA-A*01:350 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:350 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:351 Protein Expression Plasmid Vector	PHLAP925583	Plasmid vector containing HLA-A*01:351 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:351 protein. This plasmid can be used for constructing HLA-A*01:351 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:351 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:352 Protein Expression Plasmid Vector	PHLAP925584	Plasmid vector containing HLA-A*01:352 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:352 protein. This plasmid can be used for constructing HLA-A*01:352 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:352 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:353 Protein Expression Plasmid Vector	PHLAP925585	Plasmid vector containing HLA-A*01:353 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:353 protein. This plasmid can be used for constructing HLA-A*01:353 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:353 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:354 Protein Expression Plasmid Vector	PHLAP925586	Plasmid vector containing HLA-A*01:354 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:354 protein. This plasmid can be used for constructing HLA-A*01:354 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:354 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:355N Protein Expression Plasmid Vector	PHLAP925587	Plasmid vector containing HLA-A*01:355N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:355N protein. This plasmid can be used for constructing HLA-A*01:355N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:355N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:356 Protein Expression Plasmid Vector	PHLAP925588	Plasmid vector containing HLA-A*01:356 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:356 protein. This plasmid can be used for constructing HLA-A*01:356 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:356 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:357 Protein Expression Plasmid Vector	PHLAP925589	Plasmid vector containing HLA-A*01:357 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:357 protein. This plasmid can be used for constructing HLA-A*01:357 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:357 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:358 Protein Expression Plasmid Vector	PHLAP925590	Plasmid vector containing HLA-A*01:358 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:358 protein. This plasmid can be used for constructing HLA-A*01:358 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:358 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:359 Protein Expression Plasmid Vector	PHLAP925591	Plasmid vector containing HLA-A*01:359 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:359 protein. This plasmid can be used for constructing HLA-A*01:359 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:359 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:36 Protein Expression Plasmid Vector	PHLAP925592	Plasmid vector containing HLA-A*01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:36 protein. This plasmid can be used for constructing HLA-A*01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:360 Protein Expression Plasmid Vector	PHLAP925593	Plasmid vector containing HLA-A*01:360 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:360 protein. This plasmid can be used for constructing HLA-A*01:360 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:360 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:361N Protein Expression Plasmid Vector	PHLAP925594	Plasmid vector containing HLA-A*01:361N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:361N protein. This plasmid can be used for constructing HLA-A*01:361N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:361N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:362 Protein Expression Plasmid Vector	PHLAP925595	Plasmid vector containing HLA-A*01:362 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:362 protein. This plasmid can be used for constructing HLA-A*01:362 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:362 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:363 Protein Expression Plasmid Vector	PHLAP925596	Plasmid vector containing HLA-A*01:363 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:363 protein. This plasmid can be used for constructing HLA-A*01:363 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:363 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:364 Protein Expression Plasmid Vector	PHLAP925597	Plasmid vector containing HLA-A*01:364 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:364 protein. This plasmid can be used for constructing HLA-A*01:364 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:364 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:365 Protein Expression Plasmid Vector	PHLAP925598	Plasmid vector containing HLA-A*01:365 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:365 protein. This plasmid can be used for constructing HLA-A*01:365 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:365 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:366 Protein Expression Plasmid Vector	PHLAP925599	Plasmid vector containing HLA-A*01:366 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:366 protein. This plasmid can be used for constructing HLA-A*01:366 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:366 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:367 Protein Expression Plasmid Vector	PHLAP925600	Plasmid vector containing HLA-A*01:367 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:367 protein. This plasmid can be used for constructing HLA-A*01:367 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:367 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:368 Protein Expression Plasmid Vector	PHLAP925601	Plasmid vector containing HLA-A*01:368 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:368 protein. This plasmid can be used for constructing HLA-A*01:368 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:368 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:369 Protein Expression Plasmid Vector	PHLAP925602	Plasmid vector containing HLA-A*01:369 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:369 protein. This plasmid can be used for constructing HLA-A*01:369 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:369 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:37:01:01 Protein Expression Plasmid Vector	PHLAP925603	Plasmid vector containing HLA-A*01:37:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:37:01:01 protein. This plasmid can be used for constructing HLA-A*01:37:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:37:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:37:01:02 Protein Expression Plasmid Vector	PHLAP925604	Plasmid vector containing HLA-A*01:37:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:37:01:02 protein. This plasmid can be used for constructing HLA-A*01:37:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:37:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:370 Protein Expression Plasmid Vector	PHLAP925605	Plasmid vector containing HLA-A*01:370 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:370 protein. This plasmid can be used for constructing HLA-A*01:370 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:370 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:371 Protein Expression Plasmid Vector	PHLAP925606	Plasmid vector containing HLA-A*01:371 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:371 protein. This plasmid can be used for constructing HLA-A*01:371 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:371 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:372 Protein Expression Plasmid Vector	PHLAP925607	Plasmid vector containing HLA-A*01:372 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:372 protein. This plasmid can be used for constructing HLA-A*01:372 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:372 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:373 Protein Expression Plasmid Vector	PHLAP925608	Plasmid vector containing HLA-A*01:373 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:373 protein. This plasmid can be used for constructing HLA-A*01:373 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:373 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:374 Protein Expression Plasmid Vector	PHLAP925609	Plasmid vector containing HLA-A*01:374 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:374 protein. This plasmid can be used for constructing HLA-A*01:374 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:374 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:375 Protein Expression Plasmid Vector	PHLAP925610	Plasmid vector containing HLA-A*01:375 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:375 protein. This plasmid can be used for constructing HLA-A*01:375 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:375 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:376 Protein Expression Plasmid Vector	PHLAP925611	Plasmid vector containing HLA-A*01:376 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:376 protein. This plasmid can be used for constructing HLA-A*01:376 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:376 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:377 Protein Expression Plasmid Vector	PHLAP925612	Plasmid vector containing HLA-A*01:377 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:377 protein. This plasmid can be used for constructing HLA-A*01:377 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:377 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:378 Protein Expression Plasmid Vector	PHLAP925613	Plasmid vector containing HLA-A*01:378 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:378 protein. This plasmid can be used for constructing HLA-A*01:378 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:378 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:379N Protein Expression Plasmid Vector	PHLAP925614	Plasmid vector containing HLA-A*01:379N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:379N protein. This plasmid can be used for constructing HLA-A*01:379N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:379N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:38:01 Protein Expression Plasmid Vector	PHLAP925615	Plasmid vector containing HLA-A*01:38:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:38:01 protein. This plasmid can be used for constructing HLA-A*01:38:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:38:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:38:02 Protein Expression Plasmid Vector	PHLAP925616	Plasmid vector containing HLA-A*01:38:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:38:02 protein. This plasmid can be used for constructing HLA-A*01:38:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:38:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:380:01:01 Protein Expression Plasmid Vector	PHLAP925617	Plasmid vector containing HLA-A*01:380:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:380:01:01 protein. This plasmid can be used for constructing HLA-A*01:380:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:380:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:380:01:02 Protein Expression Plasmid Vector	PHLAP925618	Plasmid vector containing HLA-A*01:380:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:380:01:02 protein. This plasmid can be used for constructing HLA-A*01:380:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:380:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:381 Protein Expression Plasmid Vector	PHLAP925619	Plasmid vector containing HLA-A*01:381 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:381 protein. This plasmid can be used for constructing HLA-A*01:381 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:381 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:382 Protein Expression Plasmid Vector	PHLAP925620	Plasmid vector containing HLA-A*01:382 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:382 protein. This plasmid can be used for constructing HLA-A*01:382 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:382 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:383 Protein Expression Plasmid Vector	PHLAP925621	Plasmid vector containing HLA-A*01:383 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:383 protein. This plasmid can be used for constructing HLA-A*01:383 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:383 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:384N Protein Expression Plasmid Vector	PHLAP925622	Plasmid vector containing HLA-A*01:384N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:384N protein. This plasmid can be used for constructing HLA-A*01:384N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:384N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:385 Protein Expression Plasmid Vector	PHLAP925623	Plasmid vector containing HLA-A*01:385 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:385 protein. This plasmid can be used for constructing HLA-A*01:385 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:385 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:386 Protein Expression Plasmid Vector	PHLAP925624	Plasmid vector containing HLA-A*01:386 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:386 protein. This plasmid can be used for constructing HLA-A*01:386 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:386 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:387 Protein Expression Plasmid Vector	PHLAP925625	Plasmid vector containing HLA-A*01:387 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:387 protein. This plasmid can be used for constructing HLA-A*01:387 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:387 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:388 Protein Expression Plasmid Vector	PHLAP925626	Plasmid vector containing HLA-A*01:388 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:388 protein. This plasmid can be used for constructing HLA-A*01:388 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:388 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:389 Protein Expression Plasmid Vector	PHLAP925627	Plasmid vector containing HLA-A*01:389 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:389 protein. This plasmid can be used for constructing HLA-A*01:389 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:389 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:39 Protein Expression Plasmid Vector	PHLAP925628	Plasmid vector containing HLA-A*01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:39 protein. This plasmid can be used for constructing HLA-A*01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:390 Protein Expression Plasmid Vector	PHLAP925629	Plasmid vector containing HLA-A*01:390 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:390 protein. This plasmid can be used for constructing HLA-A*01:390 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:390 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:391 Protein Expression Plasmid Vector	PHLAP925630	Plasmid vector containing HLA-A*01:391 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:391 protein. This plasmid can be used for constructing HLA-A*01:391 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:391 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:392 Protein Expression Plasmid Vector	PHLAP925631	Plasmid vector containing HLA-A*01:392 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:392 protein. This plasmid can be used for constructing HLA-A*01:392 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:392 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:393 Protein Expression Plasmid Vector	PHLAP925632	Plasmid vector containing HLA-A*01:393 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:393 protein. This plasmid can be used for constructing HLA-A*01:393 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:393 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:394N Protein Expression Plasmid Vector	PHLAP925633	Plasmid vector containing HLA-A*01:394N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:394N protein. This plasmid can be used for constructing HLA-A*01:394N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:394N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:395 Protein Expression Plasmid Vector	PHLAP925634	Plasmid vector containing HLA-A*01:395 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:395 protein. This plasmid can be used for constructing HLA-A*01:395 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:395 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:396Q Protein Expression Plasmid Vector	PHLAP925635	Plasmid vector containing HLA-A*01:396Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:396Q protein. This plasmid can be used for constructing HLA-A*01:396Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:396Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:397 Protein Expression Plasmid Vector	PHLAP925636	Plasmid vector containing HLA-A*01:397 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:397 protein. This plasmid can be used for constructing HLA-A*01:397 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:397 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:398 Protein Expression Plasmid Vector	PHLAP925637	Plasmid vector containing HLA-A*01:398 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:398 protein. This plasmid can be used for constructing HLA-A*01:398 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:398 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:399 Protein Expression Plasmid Vector	PHLAP925638	Plasmid vector containing HLA-A*01:399 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:399 protein. This plasmid can be used for constructing HLA-A*01:399 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:399 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:40 Protein Expression Plasmid Vector	PHLAP925639	Plasmid vector containing HLA-A*01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:40 protein. This plasmid can be used for constructing HLA-A*01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:400N Protein Expression Plasmid Vector	PHLAP925640	Plasmid vector containing HLA-A*01:400N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:400N protein. This plasmid can be used for constructing HLA-A*01:400N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:400N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:401 Protein Expression Plasmid Vector	PHLAP925641	Plasmid vector containing HLA-A*01:401 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:401 protein. This plasmid can be used for constructing HLA-A*01:401 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:401 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:402 Protein Expression Plasmid Vector	PHLAP925642	Plasmid vector containing HLA-A*01:402 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:402 protein. This plasmid can be used for constructing HLA-A*01:402 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:402 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:403 Protein Expression Plasmid Vector	PHLAP925643	Plasmid vector containing HLA-A*01:403 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:403 protein. This plasmid can be used for constructing HLA-A*01:403 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:403 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:404 Protein Expression Plasmid Vector	PHLAP925644	Plasmid vector containing HLA-A*01:404 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:404 protein. This plasmid can be used for constructing HLA-A*01:404 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:404 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:405 Protein Expression Plasmid Vector	PHLAP925645	Plasmid vector containing HLA-A*01:405 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:405 protein. This plasmid can be used for constructing HLA-A*01:405 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:405 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:406 Protein Expression Plasmid Vector	PHLAP925646	Plasmid vector containing HLA-A*01:406 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:406 protein. This plasmid can be used for constructing HLA-A*01:406 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:406 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:407 Protein Expression Plasmid Vector	PHLAP925647	Plasmid vector containing HLA-A*01:407 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:407 protein. This plasmid can be used for constructing HLA-A*01:407 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:407 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:408 Protein Expression Plasmid Vector	PHLAP925648	Plasmid vector containing HLA-A*01:408 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:408 protein. This plasmid can be used for constructing HLA-A*01:408 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:408 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:409 Protein Expression Plasmid Vector	PHLAP925649	Plasmid vector containing HLA-A*01:409 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:409 protein. This plasmid can be used for constructing HLA-A*01:409 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:409 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:41 Protein Expression Plasmid Vector	PHLAP925650	Plasmid vector containing HLA-A*01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:41 protein. This plasmid can be used for constructing HLA-A*01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:410 Protein Expression Plasmid Vector	PHLAP925651	Plasmid vector containing HLA-A*01:410 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:410 protein. This plasmid can be used for constructing HLA-A*01:410 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:410 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:411N Protein Expression Plasmid Vector	PHLAP925652	Plasmid vector containing HLA-A*01:411N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:411N protein. This plasmid can be used for constructing HLA-A*01:411N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:411N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:412 Protein Expression Plasmid Vector	PHLAP925653	Plasmid vector containing HLA-A*01:412 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:412 protein. This plasmid can be used for constructing HLA-A*01:412 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:412 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:413 Protein Expression Plasmid Vector	PHLAP925654	Plasmid vector containing HLA-A*01:413 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:413 protein. This plasmid can be used for constructing HLA-A*01:413 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:413 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:414 Protein Expression Plasmid Vector	PHLAP925655	Plasmid vector containing HLA-A*01:414 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:414 protein. This plasmid can be used for constructing HLA-A*01:414 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:414 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:415 Protein Expression Plasmid Vector	PHLAP925656	Plasmid vector containing HLA-A*01:415 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:415 protein. This plasmid can be used for constructing HLA-A*01:415 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:415 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:416 Protein Expression Plasmid Vector	PHLAP925657	Plasmid vector containing HLA-A*01:416 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:416 protein. This plasmid can be used for constructing HLA-A*01:416 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:416 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:417N Protein Expression Plasmid Vector	PHLAP925658	Plasmid vector containing HLA-A*01:417N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:417N protein. This plasmid can be used for constructing HLA-A*01:417N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:417N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:418N Protein Expression Plasmid Vector	PHLAP925659	Plasmid vector containing HLA-A*01:418N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:418N protein. This plasmid can be used for constructing HLA-A*01:418N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:418N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:419 Protein Expression Plasmid Vector	PHLAP925660	Plasmid vector containing HLA-A*01:419 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:419 protein. This plasmid can be used for constructing HLA-A*01:419 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:419 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:42 Protein Expression Plasmid Vector	PHLAP925661	Plasmid vector containing HLA-A*01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:42 protein. This plasmid can be used for constructing HLA-A*01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:420N Protein Expression Plasmid Vector	PHLAP925662	Plasmid vector containing HLA-A*01:420N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:420N protein. This plasmid can be used for constructing HLA-A*01:420N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:420N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:421N Protein Expression Plasmid Vector	PHLAP925663	Plasmid vector containing HLA-A*01:421N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:421N protein. This plasmid can be used for constructing HLA-A*01:421N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:421N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:422 Protein Expression Plasmid Vector	PHLAP925664	Plasmid vector containing HLA-A*01:422 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:422 protein. This plasmid can be used for constructing HLA-A*01:422 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:422 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:423 Protein Expression Plasmid Vector	PHLAP925665	Plasmid vector containing HLA-A*01:423 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:423 protein. This plasmid can be used for constructing HLA-A*01:423 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:423 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:424 Protein Expression Plasmid Vector	PHLAP925666	Plasmid vector containing HLA-A*01:424 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:424 protein. This plasmid can be used for constructing HLA-A*01:424 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:424 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:425 Protein Expression Plasmid Vector	PHLAP925667	Plasmid vector containing HLA-A*01:425 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:425 protein. This plasmid can be used for constructing HLA-A*01:425 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:425 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:426 Protein Expression Plasmid Vector	PHLAP925668	Plasmid vector containing HLA-A*01:426 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:426 protein. This plasmid can be used for constructing HLA-A*01:426 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:426 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:427 Protein Expression Plasmid Vector	PHLAP925669	Plasmid vector containing HLA-A*01:427 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:427 protein. This plasmid can be used for constructing HLA-A*01:427 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:427 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:428 Protein Expression Plasmid Vector	PHLAP925670	Plasmid vector containing HLA-A*01:428 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:428 protein. This plasmid can be used for constructing HLA-A*01:428 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:428 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:429 Protein Expression Plasmid Vector	PHLAP925671	Plasmid vector containing HLA-A*01:429 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:429 protein. This plasmid can be used for constructing HLA-A*01:429 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:429 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:43 Protein Expression Plasmid Vector	PHLAP925672	Plasmid vector containing HLA-A*01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:43 protein. This plasmid can be used for constructing HLA-A*01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:430 Protein Expression Plasmid Vector	PHLAP925673	Plasmid vector containing HLA-A*01:430 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:430 protein. This plasmid can be used for constructing HLA-A*01:430 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:430 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:431 Protein Expression Plasmid Vector	PHLAP925674	Plasmid vector containing HLA-A*01:431 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:431 protein. This plasmid can be used for constructing HLA-A*01:431 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:431 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:432 Protein Expression Plasmid Vector	PHLAP925675	Plasmid vector containing HLA-A*01:432 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:432 protein. This plasmid can be used for constructing HLA-A*01:432 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:432 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:433N Protein Expression Plasmid Vector	PHLAP925676	Plasmid vector containing HLA-A*01:433N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:433N protein. This plasmid can be used for constructing HLA-A*01:433N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:433N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:434 Protein Expression Plasmid Vector	PHLAP925677	Plasmid vector containing HLA-A*01:434 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:434 protein. This plasmid can be used for constructing HLA-A*01:434 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:434 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:435 Protein Expression Plasmid Vector	PHLAP925678	Plasmid vector containing HLA-A*01:435 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:435 protein. This plasmid can be used for constructing HLA-A*01:435 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:435 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:436Q Protein Expression Plasmid Vector	PHLAP925679	Plasmid vector containing HLA-A*01:436Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:436Q protein. This plasmid can be used for constructing HLA-A*01:436Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:436Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:437 Protein Expression Plasmid Vector	PHLAP925680	Plasmid vector containing HLA-A*01:437 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:437 protein. This plasmid can be used for constructing HLA-A*01:437 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:437 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:438 Protein Expression Plasmid Vector	PHLAP925681	Plasmid vector containing HLA-A*01:438 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:438 protein. This plasmid can be used for constructing HLA-A*01:438 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:438 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:439 Protein Expression Plasmid Vector	PHLAP925682	Plasmid vector containing HLA-A*01:439 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:439 protein. This plasmid can be used for constructing HLA-A*01:439 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:439 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:44 Protein Expression Plasmid Vector	PHLAP925683	Plasmid vector containing HLA-A*01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:44 protein. This plasmid can be used for constructing HLA-A*01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:440 Protein Expression Plasmid Vector	PHLAP925684	Plasmid vector containing HLA-A*01:440 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:440 protein. This plasmid can be used for constructing HLA-A*01:440 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:440 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:441 Protein Expression Plasmid Vector	PHLAP925685	Plasmid vector containing HLA-A*01:441 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:441 protein. This plasmid can be used for constructing HLA-A*01:441 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:441 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:442 Protein Expression Plasmid Vector	PHLAP925686	Plasmid vector containing HLA-A*01:442 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:442 protein. This plasmid can be used for constructing HLA-A*01:442 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:442 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:443 Protein Expression Plasmid Vector	PHLAP925687	Plasmid vector containing HLA-A*01:443 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:443 protein. This plasmid can be used for constructing HLA-A*01:443 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:443 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:444 Protein Expression Plasmid Vector	PHLAP925688	Plasmid vector containing HLA-A*01:444 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:444 protein. This plasmid can be used for constructing HLA-A*01:444 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:444 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:445 Protein Expression Plasmid Vector	PHLAP925689	Plasmid vector containing HLA-A*01:445 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:445 protein. This plasmid can be used for constructing HLA-A*01:445 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:445 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:446 Protein Expression Plasmid Vector	PHLAP925690	Plasmid vector containing HLA-A*01:446 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:446 protein. This plasmid can be used for constructing HLA-A*01:446 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:446 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:447 Protein Expression Plasmid Vector	PHLAP925691	Plasmid vector containing HLA-A*01:447 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:447 protein. This plasmid can be used for constructing HLA-A*01:447 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:447 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:448 Protein Expression Plasmid Vector	PHLAP925692	Plasmid vector containing HLA-A*01:448 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:448 protein. This plasmid can be used for constructing HLA-A*01:448 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:448 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:449 Protein Expression Plasmid Vector	PHLAP925693	Plasmid vector containing HLA-A*01:449 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:449 protein. This plasmid can be used for constructing HLA-A*01:449 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:449 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:45 Protein Expression Plasmid Vector	PHLAP925694	Plasmid vector containing HLA-A*01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:45 protein. This plasmid can be used for constructing HLA-A*01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:450N Protein Expression Plasmid Vector	PHLAP925695	Plasmid vector containing HLA-A*01:450N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:450N protein. This plasmid can be used for constructing HLA-A*01:450N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:450N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:451N Protein Expression Plasmid Vector	PHLAP925696	Plasmid vector containing HLA-A*01:451N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:451N protein. This plasmid can be used for constructing HLA-A*01:451N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:451N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:452N Protein Expression Plasmid Vector	PHLAP925697	Plasmid vector containing HLA-A*01:452N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:452N protein. This plasmid can be used for constructing HLA-A*01:452N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:452N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:453 Protein Expression Plasmid Vector	PHLAP925698	Plasmid vector containing HLA-A*01:453 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:453 protein. This plasmid can be used for constructing HLA-A*01:453 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:453 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:454:01 Protein Expression Plasmid Vector	PHLAP925699	Plasmid vector containing HLA-A*01:454:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:454:01 protein. This plasmid can be used for constructing HLA-A*01:454:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:454:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:454:02 Protein Expression Plasmid Vector	PHLAP925700	Plasmid vector containing HLA-A*01:454:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:454:02 protein. This plasmid can be used for constructing HLA-A*01:454:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:454:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:455 Protein Expression Plasmid Vector	PHLAP925701	Plasmid vector containing HLA-A*01:455 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:455 protein. This plasmid can be used for constructing HLA-A*01:455 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:455 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:456 Protein Expression Plasmid Vector	PHLAP925702	Plasmid vector containing HLA-A*01:456 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:456 protein. This plasmid can be used for constructing HLA-A*01:456 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:456 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:457 Protein Expression Plasmid Vector	PHLAP925703	Plasmid vector containing HLA-A*01:457 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:457 protein. This plasmid can be used for constructing HLA-A*01:457 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:457 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:458 Protein Expression Plasmid Vector	PHLAP925704	Plasmid vector containing HLA-A*01:458 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:458 protein. This plasmid can be used for constructing HLA-A*01:458 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:458 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:459 Protein Expression Plasmid Vector	PHLAP925705	Plasmid vector containing HLA-A*01:459 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:459 protein. This plasmid can be used for constructing HLA-A*01:459 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:459 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:46 Protein Expression Plasmid Vector	PHLAP925706	Plasmid vector containing HLA-A*01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:46 protein. This plasmid can be used for constructing HLA-A*01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:460 Protein Expression Plasmid Vector	PHLAP925707	Plasmid vector containing HLA-A*01:460 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:460 protein. This plasmid can be used for constructing HLA-A*01:460 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:460 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:461 Protein Expression Plasmid Vector	PHLAP925708	Plasmid vector containing HLA-A*01:461 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:461 protein. This plasmid can be used for constructing HLA-A*01:461 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:461 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:462 Protein Expression Plasmid Vector	PHLAP925709	Plasmid vector containing HLA-A*01:462 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:462 protein. This plasmid can be used for constructing HLA-A*01:462 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:462 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:463 Protein Expression Plasmid Vector	PHLAP925710	Plasmid vector containing HLA-A*01:463 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:463 protein. This plasmid can be used for constructing HLA-A*01:463 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:463 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:464 Protein Expression Plasmid Vector	PHLAP925711	Plasmid vector containing HLA-A*01:464 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:464 protein. This plasmid can be used for constructing HLA-A*01:464 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:464 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:465 Protein Expression Plasmid Vector	PHLAP925712	Plasmid vector containing HLA-A*01:465 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:465 protein. This plasmid can be used for constructing HLA-A*01:465 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:465 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:466 Protein Expression Plasmid Vector	PHLAP925713	Plasmid vector containing HLA-A*01:466 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:466 protein. This plasmid can be used for constructing HLA-A*01:466 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:466 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:467 Protein Expression Plasmid Vector	PHLAP925714	Plasmid vector containing HLA-A*01:467 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:467 protein. This plasmid can be used for constructing HLA-A*01:467 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:467 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:468 Protein Expression Plasmid Vector	PHLAP925715	Plasmid vector containing HLA-A*01:468 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:468 protein. This plasmid can be used for constructing HLA-A*01:468 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:468 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:469 Protein Expression Plasmid Vector	PHLAP925716	Plasmid vector containing HLA-A*01:469 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:469 protein. This plasmid can be used for constructing HLA-A*01:469 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:469 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:47 Protein Expression Plasmid Vector	PHLAP925717	Plasmid vector containing HLA-A*01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:47 protein. This plasmid can be used for constructing HLA-A*01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:470 Protein Expression Plasmid Vector	PHLAP925718	Plasmid vector containing HLA-A*01:470 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:470 protein. This plasmid can be used for constructing HLA-A*01:470 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:470 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:471 Protein Expression Plasmid Vector	PHLAP925719	Plasmid vector containing HLA-A*01:471 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:471 protein. This plasmid can be used for constructing HLA-A*01:471 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:471 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:472 Protein Expression Plasmid Vector	PHLAP925720	Plasmid vector containing HLA-A*01:472 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:472 protein. This plasmid can be used for constructing HLA-A*01:472 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:472 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:473Q Protein Expression Plasmid Vector	PHLAP925721	Plasmid vector containing HLA-A*01:473Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:473Q protein. This plasmid can be used for constructing HLA-A*01:473Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:473Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:474 Protein Expression Plasmid Vector	PHLAP925722	Plasmid vector containing HLA-A*01:474 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:474 protein. This plasmid can be used for constructing HLA-A*01:474 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:474 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:475 Protein Expression Plasmid Vector	PHLAP925723	Plasmid vector containing HLA-A*01:475 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:475 protein. This plasmid can be used for constructing HLA-A*01:475 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:475 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:476Q Protein Expression Plasmid Vector	PHLAP925724	Plasmid vector containing HLA-A*01:476Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:476Q protein. This plasmid can be used for constructing HLA-A*01:476Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:476Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:477 Protein Expression Plasmid Vector	PHLAP925725	Plasmid vector containing HLA-A*01:477 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:477 protein. This plasmid can be used for constructing HLA-A*01:477 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:477 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:478 Protein Expression Plasmid Vector	PHLAP925726	Plasmid vector containing HLA-A*01:478 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:478 protein. This plasmid can be used for constructing HLA-A*01:478 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:478 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:479 Protein Expression Plasmid Vector	PHLAP925727	Plasmid vector containing HLA-A*01:479 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:479 protein. This plasmid can be used for constructing HLA-A*01:479 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:479 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:48 Protein Expression Plasmid Vector	PHLAP925728	Plasmid vector containing HLA-A*01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:48 protein. This plasmid can be used for constructing HLA-A*01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:480 Protein Expression Plasmid Vector	PHLAP925729	Plasmid vector containing HLA-A*01:480 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:480 protein. This plasmid can be used for constructing HLA-A*01:480 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:480 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:481 Protein Expression Plasmid Vector	PHLAP925730	Plasmid vector containing HLA-A*01:481 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:481 protein. This plasmid can be used for constructing HLA-A*01:481 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:481 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:482 Protein Expression Plasmid Vector	PHLAP925731	Plasmid vector containing HLA-A*01:482 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:482 protein. This plasmid can be used for constructing HLA-A*01:482 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:482 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:483 Protein Expression Plasmid Vector	PHLAP925732	Plasmid vector containing HLA-A*01:483 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:483 protein. This plasmid can be used for constructing HLA-A*01:483 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:483 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:49 Protein Expression Plasmid Vector	PHLAP925733	Plasmid vector containing HLA-A*01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:49 protein. This plasmid can be used for constructing HLA-A*01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:50 Protein Expression Plasmid Vector	PHLAP925734	Plasmid vector containing HLA-A*01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:50 protein. This plasmid can be used for constructing HLA-A*01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:51 Protein Expression Plasmid Vector	PHLAP925735	Plasmid vector containing HLA-A*01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:51 protein. This plasmid can be used for constructing HLA-A*01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:52:01N Protein Expression Plasmid Vector	PHLAP925736	Plasmid vector containing HLA-A*01:52:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:52:01N protein. This plasmid can be used for constructing HLA-A*01:52:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:52:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:52:02N Protein Expression Plasmid Vector	PHLAP925737	Plasmid vector containing HLA-A*01:52:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:52:02N protein. This plasmid can be used for constructing HLA-A*01:52:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:52:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:53N Protein Expression Plasmid Vector	PHLAP925738	Plasmid vector containing HLA-A*01:53N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:53N protein. This plasmid can be used for constructing HLA-A*01:53N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:53N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:54 Protein Expression Plasmid Vector	PHLAP925739	Plasmid vector containing HLA-A*01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:54 protein. This plasmid can be used for constructing HLA-A*01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:55 Protein Expression Plasmid Vector	PHLAP925740	Plasmid vector containing HLA-A*01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:55 protein. This plasmid can be used for constructing HLA-A*01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:56N Protein Expression Plasmid Vector	PHLAP925741	Plasmid vector containing HLA-A*01:56N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:56N protein. This plasmid can be used for constructing HLA-A*01:56N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:56N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:57N Protein Expression Plasmid Vector	PHLAP925742	Plasmid vector containing HLA-A*01:57N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:57N protein. This plasmid can be used for constructing HLA-A*01:57N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:57N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:58 Protein Expression Plasmid Vector	PHLAP925743	Plasmid vector containing HLA-A*01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:58 protein. This plasmid can be used for constructing HLA-A*01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:59 Protein Expression Plasmid Vector	PHLAP925744	Plasmid vector containing HLA-A*01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:59 protein. This plasmid can be used for constructing HLA-A*01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:60 Protein Expression Plasmid Vector	PHLAP925745	Plasmid vector containing HLA-A*01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:60 protein. This plasmid can be used for constructing HLA-A*01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:61 Protein Expression Plasmid Vector	PHLAP925746	Plasmid vector containing HLA-A*01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:61 protein. This plasmid can be used for constructing HLA-A*01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:62 Protein Expression Plasmid Vector	PHLAP925747	Plasmid vector containing HLA-A*01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:62 protein. This plasmid can be used for constructing HLA-A*01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:63 Protein Expression Plasmid Vector	PHLAP925748	Plasmid vector containing HLA-A*01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:63 protein. This plasmid can be used for constructing HLA-A*01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:64 Protein Expression Plasmid Vector	PHLAP925749	Plasmid vector containing HLA-A*01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:64 protein. This plasmid can be used for constructing HLA-A*01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:65 Protein Expression Plasmid Vector	PHLAP925750	Plasmid vector containing HLA-A*01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:65 protein. This plasmid can be used for constructing HLA-A*01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:66 Protein Expression Plasmid Vector	PHLAP925751	Plasmid vector containing HLA-A*01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:66 protein. This plasmid can be used for constructing HLA-A*01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:67:01 Protein Expression Plasmid Vector	PHLAP925752	Plasmid vector containing HLA-A*01:67:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:67:01 protein. This plasmid can be used for constructing HLA-A*01:67:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:67:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:67:02 Protein Expression Plasmid Vector	PHLAP925753	Plasmid vector containing HLA-A*01:67:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:67:02 protein. This plasmid can be used for constructing HLA-A*01:67:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:67:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:68 Protein Expression Plasmid Vector	PHLAP925754	Plasmid vector containing HLA-A*01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:68 protein. This plasmid can be used for constructing HLA-A*01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:69:01 Protein Expression Plasmid Vector	PHLAP925755	Plasmid vector containing HLA-A*01:69:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:69:01 protein. This plasmid can be used for constructing HLA-A*01:69:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:69:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:69:02 Protein Expression Plasmid Vector	PHLAP925756	Plasmid vector containing HLA-A*01:69:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:69:02 protein. This plasmid can be used for constructing HLA-A*01:69:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:69:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:69:03 Protein Expression Plasmid Vector	PHLAP925757	Plasmid vector containing HLA-A*01:69:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:69:03 protein. This plasmid can be used for constructing HLA-A*01:69:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:69:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:70 Protein Expression Plasmid Vector	PHLAP925758	Plasmid vector containing HLA-A*01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:70 protein. This plasmid can be used for constructing HLA-A*01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:71 Protein Expression Plasmid Vector	PHLAP925759	Plasmid vector containing HLA-A*01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:71 protein. This plasmid can be used for constructing HLA-A*01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:72 Protein Expression Plasmid Vector	PHLAP925760	Plasmid vector containing HLA-A*01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:72 protein. This plasmid can be used for constructing HLA-A*01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:73 Protein Expression Plasmid Vector	PHLAP925761	Plasmid vector containing HLA-A*01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:73 protein. This plasmid can be used for constructing HLA-A*01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:74 Protein Expression Plasmid Vector	PHLAP925762	Plasmid vector containing HLA-A*01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:74 protein. This plasmid can be used for constructing HLA-A*01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:75 Protein Expression Plasmid Vector	PHLAP925763	Plasmid vector containing HLA-A*01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:75 protein. This plasmid can be used for constructing HLA-A*01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:76 Protein Expression Plasmid Vector	PHLAP925764	Plasmid vector containing HLA-A*01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:76 protein. This plasmid can be used for constructing HLA-A*01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:77 Protein Expression Plasmid Vector	PHLAP925765	Plasmid vector containing HLA-A*01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:77 protein. This plasmid can be used for constructing HLA-A*01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:78 Protein Expression Plasmid Vector	PHLAP925766	Plasmid vector containing HLA-A*01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:78 protein. This plasmid can be used for constructing HLA-A*01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:79 Protein Expression Plasmid Vector	PHLAP925767	Plasmid vector containing HLA-A*01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:79 protein. This plasmid can be used for constructing HLA-A*01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:80 Protein Expression Plasmid Vector	PHLAP925768	Plasmid vector containing HLA-A*01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:80 protein. This plasmid can be used for constructing HLA-A*01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:81 Protein Expression Plasmid Vector	PHLAP925769	Plasmid vector containing HLA-A*01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:81 protein. This plasmid can be used for constructing HLA-A*01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:82 Protein Expression Plasmid Vector	PHLAP925770	Plasmid vector containing HLA-A*01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:82 protein. This plasmid can be used for constructing HLA-A*01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:83:01 Protein Expression Plasmid Vector	PHLAP925771	Plasmid vector containing HLA-A*01:83:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:83:01 protein. This plasmid can be used for constructing HLA-A*01:83:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:83:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:83:02 Protein Expression Plasmid Vector	PHLAP925772	Plasmid vector containing HLA-A*01:83:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:83:02 protein. This plasmid can be used for constructing HLA-A*01:83:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:83:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:84 Protein Expression Plasmid Vector	PHLAP925773	Plasmid vector containing HLA-A*01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:84 protein. This plasmid can be used for constructing HLA-A*01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:85 Protein Expression Plasmid Vector	PHLAP925774	Plasmid vector containing HLA-A*01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:85 protein. This plasmid can be used for constructing HLA-A*01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:86 Protein Expression Plasmid Vector	PHLAP925775	Plasmid vector containing HLA-A*01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:86 protein. This plasmid can be used for constructing HLA-A*01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:87N Protein Expression Plasmid Vector	PHLAP925776	Plasmid vector containing HLA-A*01:87N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:87N protein. This plasmid can be used for constructing HLA-A*01:87N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:87N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:88:01 Protein Expression Plasmid Vector	PHLAP925777	Plasmid vector containing HLA-A*01:88:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:88:01 protein. This plasmid can be used for constructing HLA-A*01:88:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:88:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:88:02 Protein Expression Plasmid Vector	PHLAP925778	Plasmid vector containing HLA-A*01:88:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:88:02 protein. This plasmid can be used for constructing HLA-A*01:88:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:88:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:88:03 Protein Expression Plasmid Vector	PHLAP925779	Plasmid vector containing HLA-A*01:88:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:88:03 protein. This plasmid can be used for constructing HLA-A*01:88:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:88:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:89 Protein Expression Plasmid Vector	PHLAP925780	Plasmid vector containing HLA-A*01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:89 protein. This plasmid can be used for constructing HLA-A*01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:90 Protein Expression Plasmid Vector	PHLAP925781	Plasmid vector containing HLA-A*01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:90 protein. This plasmid can be used for constructing HLA-A*01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:91 Protein Expression Plasmid Vector	PHLAP925782	Plasmid vector containing HLA-A*01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:91 protein. This plasmid can be used for constructing HLA-A*01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:92 Protein Expression Plasmid Vector	PHLAP925783	Plasmid vector containing HLA-A*01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:92 protein. This plasmid can be used for constructing HLA-A*01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:93 Protein Expression Plasmid Vector	PHLAP925784	Plasmid vector containing HLA-A*01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:93 protein. This plasmid can be used for constructing HLA-A*01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:94 Protein Expression Plasmid Vector	PHLAP925785	Plasmid vector containing HLA-A*01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:94 protein. This plasmid can be used for constructing HLA-A*01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:95 Protein Expression Plasmid Vector	PHLAP925786	Plasmid vector containing HLA-A*01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:95 protein. This plasmid can be used for constructing HLA-A*01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*01:96 Protein Expression Plasmid Vector	PHLAP925787	Plasmid vector containing HLA-A*01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:96 protein. This plasmid can be used for constructing HLA-A*01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:97 Protein Expression Plasmid Vector	PHLAP925788	Plasmid vector containing HLA-A*01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:97 protein. This plasmid can be used for constructing HLA-A*01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:98 Protein Expression Plasmid Vector	PHLAP925789	Plasmid vector containing HLA-A*01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:98 protein. This plasmid can be used for constructing HLA-A*01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*01:99 Protein Expression Plasmid Vector	PHLAP925790	Plasmid vector containing HLA-A*01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*01:99 protein. This plasmid can be used for constructing HLA-A*01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*0105N Protein Expression Plasmid Vector	PHLAP925791	Plasmid vector containing HLA-A*0105N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*0105N protein. This plasmid can be used for constructing HLA-A*0105N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*0105N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:01 Protein Expression Plasmid Vector	PHLAP925792	Plasmid vector containing HLA-A*02:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:01 protein. This plasmid can be used for constructing HLA-A*02:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:02L Protein Expression Plasmid Vector	PHLAP925793	Plasmid vector containing HLA-A*02:01:01:02L protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:02L protein. This plasmid can be used for constructing HLA-A*02:01:01:02L overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:02L protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:03 Protein Expression Plasmid Vector	PHLAP925794	Plasmid vector containing HLA-A*02:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:03 protein. This plasmid can be used for constructing HLA-A*02:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:04 Protein Expression Plasmid Vector	PHLAP925795	Plasmid vector containing HLA-A*02:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:04 protein. This plasmid can be used for constructing HLA-A*02:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:05 Protein Expression Plasmid Vector	PHLAP925796	Plasmid vector containing HLA-A*02:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:05 protein. This plasmid can be used for constructing HLA-A*02:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:06 Protein Expression Plasmid Vector	PHLAP925797	Plasmid vector containing HLA-A*02:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:06 protein. This plasmid can be used for constructing HLA-A*02:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:07 Protein Expression Plasmid Vector	PHLAP925798	Plasmid vector containing HLA-A*02:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:07 protein. This plasmid can be used for constructing HLA-A*02:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:08 Protein Expression Plasmid Vector	PHLAP925799	Plasmid vector containing HLA-A*02:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:08 protein. This plasmid can be used for constructing HLA-A*02:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:09 Protein Expression Plasmid Vector	PHLAP925800	Plasmid vector containing HLA-A*02:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:09 protein. This plasmid can be used for constructing HLA-A*02:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:10 Protein Expression Plasmid Vector	PHLAP925801	Plasmid vector containing HLA-A*02:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:10 protein. This plasmid can be used for constructing HLA-A*02:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:100 Protein Expression Plasmid Vector	PHLAP925802	Plasmid vector containing HLA-A*02:01:01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:100 protein. This plasmid can be used for constructing HLA-A*02:01:01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:101 Protein Expression Plasmid Vector	PHLAP925803	Plasmid vector containing HLA-A*02:01:01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:101 protein. This plasmid can be used for constructing HLA-A*02:01:01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:102 Protein Expression Plasmid Vector	PHLAP925804	Plasmid vector containing HLA-A*02:01:01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:102 protein. This plasmid can be used for constructing HLA-A*02:01:01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:103 Protein Expression Plasmid Vector	PHLAP925805	Plasmid vector containing HLA-A*02:01:01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:103 protein. This plasmid can be used for constructing HLA-A*02:01:01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:104 Protein Expression Plasmid Vector	PHLAP925806	Plasmid vector containing HLA-A*02:01:01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:104 protein. This plasmid can be used for constructing HLA-A*02:01:01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:105 Protein Expression Plasmid Vector	PHLAP925807	Plasmid vector containing HLA-A*02:01:01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:105 protein. This plasmid can be used for constructing HLA-A*02:01:01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:106 Protein Expression Plasmid Vector	PHLAP925808	Plasmid vector containing HLA-A*02:01:01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:106 protein. This plasmid can be used for constructing HLA-A*02:01:01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:107 Protein Expression Plasmid Vector	PHLAP925809	Plasmid vector containing HLA-A*02:01:01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:107 protein. This plasmid can be used for constructing HLA-A*02:01:01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:108 Protein Expression Plasmid Vector	PHLAP925810	Plasmid vector containing HLA-A*02:01:01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:108 protein. This plasmid can be used for constructing HLA-A*02:01:01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:109 Protein Expression Plasmid Vector	PHLAP925811	Plasmid vector containing HLA-A*02:01:01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:109 protein. This plasmid can be used for constructing HLA-A*02:01:01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:11 Protein Expression Plasmid Vector	PHLAP925812	Plasmid vector containing HLA-A*02:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:11 protein. This plasmid can be used for constructing HLA-A*02:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:110 Protein Expression Plasmid Vector	PHLAP925813	Plasmid vector containing HLA-A*02:01:01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:110 protein. This plasmid can be used for constructing HLA-A*02:01:01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:111 Protein Expression Plasmid Vector	PHLAP925814	Plasmid vector containing HLA-A*02:01:01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:111 protein. This plasmid can be used for constructing HLA-A*02:01:01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:112 Protein Expression Plasmid Vector	PHLAP925815	Plasmid vector containing HLA-A*02:01:01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:112 protein. This plasmid can be used for constructing HLA-A*02:01:01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:113 Protein Expression Plasmid Vector	PHLAP925816	Plasmid vector containing HLA-A*02:01:01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:113 protein. This plasmid can be used for constructing HLA-A*02:01:01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:114 Protein Expression Plasmid Vector	PHLAP925817	Plasmid vector containing HLA-A*02:01:01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:114 protein. This plasmid can be used for constructing HLA-A*02:01:01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:115 Protein Expression Plasmid Vector	PHLAP925818	Plasmid vector containing HLA-A*02:01:01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:115 protein. This plasmid can be used for constructing HLA-A*02:01:01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:116 Protein Expression Plasmid Vector	PHLAP925819	Plasmid vector containing HLA-A*02:01:01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:116 protein. This plasmid can be used for constructing HLA-A*02:01:01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:117 Protein Expression Plasmid Vector	PHLAP925820	Plasmid vector containing HLA-A*02:01:01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:117 protein. This plasmid can be used for constructing HLA-A*02:01:01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:118 Protein Expression Plasmid Vector	PHLAP925821	Plasmid vector containing HLA-A*02:01:01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:118 protein. This plasmid can be used for constructing HLA-A*02:01:01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:119 Protein Expression Plasmid Vector	PHLAP925822	Plasmid vector containing HLA-A*02:01:01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:119 protein. This plasmid can be used for constructing HLA-A*02:01:01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:12 Protein Expression Plasmid Vector	PHLAP925823	Plasmid vector containing HLA-A*02:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:12 protein. This plasmid can be used for constructing HLA-A*02:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:120 Protein Expression Plasmid Vector	PHLAP925824	Plasmid vector containing HLA-A*02:01:01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:120 protein. This plasmid can be used for constructing HLA-A*02:01:01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:121 Protein Expression Plasmid Vector	PHLAP925825	Plasmid vector containing HLA-A*02:01:01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:121 protein. This plasmid can be used for constructing HLA-A*02:01:01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:122 Protein Expression Plasmid Vector	PHLAP925826	Plasmid vector containing HLA-A*02:01:01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:122 protein. This plasmid can be used for constructing HLA-A*02:01:01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:123 Protein Expression Plasmid Vector	PHLAP925827	Plasmid vector containing HLA-A*02:01:01:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:123 protein. This plasmid can be used for constructing HLA-A*02:01:01:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:124 Protein Expression Plasmid Vector	PHLAP925828	Plasmid vector containing HLA-A*02:01:01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:124 protein. This plasmid can be used for constructing HLA-A*02:01:01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:125 Protein Expression Plasmid Vector	PHLAP925829	Plasmid vector containing HLA-A*02:01:01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:125 protein. This plasmid can be used for constructing HLA-A*02:01:01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:126 Protein Expression Plasmid Vector	PHLAP925830	Plasmid vector containing HLA-A*02:01:01:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:126 protein. This plasmid can be used for constructing HLA-A*02:01:01:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:127 Protein Expression Plasmid Vector	PHLAP925831	Plasmid vector containing HLA-A*02:01:01:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:127 protein. This plasmid can be used for constructing HLA-A*02:01:01:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:128 Protein Expression Plasmid Vector	PHLAP925832	Plasmid vector containing HLA-A*02:01:01:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:128 protein. This plasmid can be used for constructing HLA-A*02:01:01:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:129 Protein Expression Plasmid Vector	PHLAP925833	Plasmid vector containing HLA-A*02:01:01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:129 protein. This plasmid can be used for constructing HLA-A*02:01:01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:13 Protein Expression Plasmid Vector	PHLAP925834	Plasmid vector containing HLA-A*02:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:13 protein. This plasmid can be used for constructing HLA-A*02:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:130 Protein Expression Plasmid Vector	PHLAP925835	Plasmid vector containing HLA-A*02:01:01:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:130 protein. This plasmid can be used for constructing HLA-A*02:01:01:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:131 Protein Expression Plasmid Vector	PHLAP925836	Plasmid vector containing HLA-A*02:01:01:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:131 protein. This plasmid can be used for constructing HLA-A*02:01:01:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:132 Protein Expression Plasmid Vector	PHLAP925837	Plasmid vector containing HLA-A*02:01:01:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:132 protein. This plasmid can be used for constructing HLA-A*02:01:01:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:133 Protein Expression Plasmid Vector	PHLAP925838	Plasmid vector containing HLA-A*02:01:01:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:133 protein. This plasmid can be used for constructing HLA-A*02:01:01:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:134Q Protein Expression Plasmid Vector	PHLAP925839	Plasmid vector containing HLA-A*02:01:01:134Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:134Q protein. This plasmid can be used for constructing HLA-A*02:01:01:134Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:134Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:135 Protein Expression Plasmid Vector	PHLAP925840	Plasmid vector containing HLA-A*02:01:01:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:135 protein. This plasmid can be used for constructing HLA-A*02:01:01:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:136 Protein Expression Plasmid Vector	PHLAP925841	Plasmid vector containing HLA-A*02:01:01:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:136 protein. This plasmid can be used for constructing HLA-A*02:01:01:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:137 Protein Expression Plasmid Vector	PHLAP925842	Plasmid vector containing HLA-A*02:01:01:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:137 protein. This plasmid can be used for constructing HLA-A*02:01:01:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:138 Protein Expression Plasmid Vector	PHLAP925843	Plasmid vector containing HLA-A*02:01:01:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:138 protein. This plasmid can be used for constructing HLA-A*02:01:01:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:139 Protein Expression Plasmid Vector	PHLAP925844	Plasmid vector containing HLA-A*02:01:01:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:139 protein. This plasmid can be used for constructing HLA-A*02:01:01:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:14 Protein Expression Plasmid Vector	PHLAP925845	Plasmid vector containing HLA-A*02:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:14 protein. This plasmid can be used for constructing HLA-A*02:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:140 Protein Expression Plasmid Vector	PHLAP925846	Plasmid vector containing HLA-A*02:01:01:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:140 protein. This plasmid can be used for constructing HLA-A*02:01:01:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:141 Protein Expression Plasmid Vector	PHLAP925847	Plasmid vector containing HLA-A*02:01:01:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:141 protein. This plasmid can be used for constructing HLA-A*02:01:01:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:142 Protein Expression Plasmid Vector	PHLAP925848	Plasmid vector containing HLA-A*02:01:01:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:142 protein. This plasmid can be used for constructing HLA-A*02:01:01:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:143 Protein Expression Plasmid Vector	PHLAP925849	Plasmid vector containing HLA-A*02:01:01:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:143 protein. This plasmid can be used for constructing HLA-A*02:01:01:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:144 Protein Expression Plasmid Vector	PHLAP925850	Plasmid vector containing HLA-A*02:01:01:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:144 protein. This plasmid can be used for constructing HLA-A*02:01:01:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:145 Protein Expression Plasmid Vector	PHLAP925851	Plasmid vector containing HLA-A*02:01:01:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:145 protein. This plasmid can be used for constructing HLA-A*02:01:01:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:146 Protein Expression Plasmid Vector	PHLAP925852	Plasmid vector containing HLA-A*02:01:01:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:146 protein. This plasmid can be used for constructing HLA-A*02:01:01:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:147 Protein Expression Plasmid Vector	PHLAP925853	Plasmid vector containing HLA-A*02:01:01:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:147 protein. This plasmid can be used for constructing HLA-A*02:01:01:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:148 Protein Expression Plasmid Vector	PHLAP925854	Plasmid vector containing HLA-A*02:01:01:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:148 protein. This plasmid can be used for constructing HLA-A*02:01:01:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:149 Protein Expression Plasmid Vector	PHLAP925855	Plasmid vector containing HLA-A*02:01:01:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:149 protein. This plasmid can be used for constructing HLA-A*02:01:01:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:15 Protein Expression Plasmid Vector	PHLAP925856	Plasmid vector containing HLA-A*02:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:15 protein. This plasmid can be used for constructing HLA-A*02:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:150 Protein Expression Plasmid Vector	PHLAP925857	Plasmid vector containing HLA-A*02:01:01:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:150 protein. This plasmid can be used for constructing HLA-A*02:01:01:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:151 Protein Expression Plasmid Vector	PHLAP925858	Plasmid vector containing HLA-A*02:01:01:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:151 protein. This plasmid can be used for constructing HLA-A*02:01:01:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:152 Protein Expression Plasmid Vector	PHLAP925859	Plasmid vector containing HLA-A*02:01:01:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:152 protein. This plasmid can be used for constructing HLA-A*02:01:01:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:153 Protein Expression Plasmid Vector	PHLAP925860	Plasmid vector containing HLA-A*02:01:01:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:153 protein. This plasmid can be used for constructing HLA-A*02:01:01:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:154 Protein Expression Plasmid Vector	PHLAP925861	Plasmid vector containing HLA-A*02:01:01:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:154 protein. This plasmid can be used for constructing HLA-A*02:01:01:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:155 Protein Expression Plasmid Vector	PHLAP925862	Plasmid vector containing HLA-A*02:01:01:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:155 protein. This plasmid can be used for constructing HLA-A*02:01:01:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:156 Protein Expression Plasmid Vector	PHLAP925863	Plasmid vector containing HLA-A*02:01:01:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:156 protein. This plasmid can be used for constructing HLA-A*02:01:01:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:157 Protein Expression Plasmid Vector	PHLAP925864	Plasmid vector containing HLA-A*02:01:01:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:157 protein. This plasmid can be used for constructing HLA-A*02:01:01:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:158 Protein Expression Plasmid Vector	PHLAP925865	Plasmid vector containing HLA-A*02:01:01:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:158 protein. This plasmid can be used for constructing HLA-A*02:01:01:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:159 Protein Expression Plasmid Vector	PHLAP925866	Plasmid vector containing HLA-A*02:01:01:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:159 protein. This plasmid can be used for constructing HLA-A*02:01:01:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:16 Protein Expression Plasmid Vector	PHLAP925867	Plasmid vector containing HLA-A*02:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:16 protein. This plasmid can be used for constructing HLA-A*02:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:160 Protein Expression Plasmid Vector	PHLAP925868	Plasmid vector containing HLA-A*02:01:01:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:160 protein. This plasmid can be used for constructing HLA-A*02:01:01:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:161 Protein Expression Plasmid Vector	PHLAP925869	Plasmid vector containing HLA-A*02:01:01:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:161 protein. This plasmid can be used for constructing HLA-A*02:01:01:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:162 Protein Expression Plasmid Vector	PHLAP925870	Plasmid vector containing HLA-A*02:01:01:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:162 protein. This plasmid can be used for constructing HLA-A*02:01:01:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:163 Protein Expression Plasmid Vector	PHLAP925871	Plasmid vector containing HLA-A*02:01:01:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:163 protein. This plasmid can be used for constructing HLA-A*02:01:01:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:164 Protein Expression Plasmid Vector	PHLAP925872	Plasmid vector containing HLA-A*02:01:01:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:164 protein. This plasmid can be used for constructing HLA-A*02:01:01:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:165 Protein Expression Plasmid Vector	PHLAP925873	Plasmid vector containing HLA-A*02:01:01:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:165 protein. This plasmid can be used for constructing HLA-A*02:01:01:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:166 Protein Expression Plasmid Vector	PHLAP925874	Plasmid vector containing HLA-A*02:01:01:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:166 protein. This plasmid can be used for constructing HLA-A*02:01:01:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:167 Protein Expression Plasmid Vector	PHLAP925875	Plasmid vector containing HLA-A*02:01:01:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:167 protein. This plasmid can be used for constructing HLA-A*02:01:01:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:168 Protein Expression Plasmid Vector	PHLAP925876	Plasmid vector containing HLA-A*02:01:01:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:168 protein. This plasmid can be used for constructing HLA-A*02:01:01:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:169 Protein Expression Plasmid Vector	PHLAP925877	Plasmid vector containing HLA-A*02:01:01:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:169 protein. This plasmid can be used for constructing HLA-A*02:01:01:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:17 Protein Expression Plasmid Vector	PHLAP925878	Plasmid vector containing HLA-A*02:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:17 protein. This plasmid can be used for constructing HLA-A*02:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:170 Protein Expression Plasmid Vector	PHLAP925879	Plasmid vector containing HLA-A*02:01:01:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:170 protein. This plasmid can be used for constructing HLA-A*02:01:01:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:171 Protein Expression Plasmid Vector	PHLAP925880	Plasmid vector containing HLA-A*02:01:01:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:171 protein. This plasmid can be used for constructing HLA-A*02:01:01:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:172 Protein Expression Plasmid Vector	PHLAP925881	Plasmid vector containing HLA-A*02:01:01:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:172 protein. This plasmid can be used for constructing HLA-A*02:01:01:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:173 Protein Expression Plasmid Vector	PHLAP925882	Plasmid vector containing HLA-A*02:01:01:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:173 protein. This plasmid can be used for constructing HLA-A*02:01:01:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:174 Protein Expression Plasmid Vector	PHLAP925883	Plasmid vector containing HLA-A*02:01:01:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:174 protein. This plasmid can be used for constructing HLA-A*02:01:01:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:175 Protein Expression Plasmid Vector	PHLAP925884	Plasmid vector containing HLA-A*02:01:01:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:175 protein. This plasmid can be used for constructing HLA-A*02:01:01:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:176 Protein Expression Plasmid Vector	PHLAP925885	Plasmid vector containing HLA-A*02:01:01:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:176 protein. This plasmid can be used for constructing HLA-A*02:01:01:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:177 Protein Expression Plasmid Vector	PHLAP925886	Plasmid vector containing HLA-A*02:01:01:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:177 protein. This plasmid can be used for constructing HLA-A*02:01:01:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:178 Protein Expression Plasmid Vector	PHLAP925887	Plasmid vector containing HLA-A*02:01:01:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:178 protein. This plasmid can be used for constructing HLA-A*02:01:01:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:179 Protein Expression Plasmid Vector	PHLAP925888	Plasmid vector containing HLA-A*02:01:01:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:179 protein. This plasmid can be used for constructing HLA-A*02:01:01:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:18 Protein Expression Plasmid Vector	PHLAP925889	Plasmid vector containing HLA-A*02:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:18 protein. This plasmid can be used for constructing HLA-A*02:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:180 Protein Expression Plasmid Vector	PHLAP925890	Plasmid vector containing HLA-A*02:01:01:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:180 protein. This plasmid can be used for constructing HLA-A*02:01:01:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:181 Protein Expression Plasmid Vector	PHLAP925891	Plasmid vector containing HLA-A*02:01:01:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:181 protein. This plasmid can be used for constructing HLA-A*02:01:01:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:182 Protein Expression Plasmid Vector	PHLAP925892	Plasmid vector containing HLA-A*02:01:01:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:182 protein. This plasmid can be used for constructing HLA-A*02:01:01:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:183 Protein Expression Plasmid Vector	PHLAP925893	Plasmid vector containing HLA-A*02:01:01:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:183 protein. This plasmid can be used for constructing HLA-A*02:01:01:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:184 Protein Expression Plasmid Vector	PHLAP925894	Plasmid vector containing HLA-A*02:01:01:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:184 protein. This plasmid can be used for constructing HLA-A*02:01:01:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:185 Protein Expression Plasmid Vector	PHLAP925895	Plasmid vector containing HLA-A*02:01:01:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:185 protein. This plasmid can be used for constructing HLA-A*02:01:01:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:186 Protein Expression Plasmid Vector	PHLAP925896	Plasmid vector containing HLA-A*02:01:01:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:186 protein. This plasmid can be used for constructing HLA-A*02:01:01:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:187 Protein Expression Plasmid Vector	PHLAP925897	Plasmid vector containing HLA-A*02:01:01:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:187 protein. This plasmid can be used for constructing HLA-A*02:01:01:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:188 Protein Expression Plasmid Vector	PHLAP925898	Plasmid vector containing HLA-A*02:01:01:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:188 protein. This plasmid can be used for constructing HLA-A*02:01:01:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:189 Protein Expression Plasmid Vector	PHLAP925899	Plasmid vector containing HLA-A*02:01:01:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:189 protein. This plasmid can be used for constructing HLA-A*02:01:01:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:19 Protein Expression Plasmid Vector	PHLAP925900	Plasmid vector containing HLA-A*02:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:19 protein. This plasmid can be used for constructing HLA-A*02:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:190 Protein Expression Plasmid Vector	PHLAP925901	Plasmid vector containing HLA-A*02:01:01:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:190 protein. This plasmid can be used for constructing HLA-A*02:01:01:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:191 Protein Expression Plasmid Vector	PHLAP925902	Plasmid vector containing HLA-A*02:01:01:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:191 protein. This plasmid can be used for constructing HLA-A*02:01:01:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:192 Protein Expression Plasmid Vector	PHLAP925903	Plasmid vector containing HLA-A*02:01:01:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:192 protein. This plasmid can be used for constructing HLA-A*02:01:01:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:193 Protein Expression Plasmid Vector	PHLAP925904	Plasmid vector containing HLA-A*02:01:01:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:193 protein. This plasmid can be used for constructing HLA-A*02:01:01:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:194 Protein Expression Plasmid Vector	PHLAP925905	Plasmid vector containing HLA-A*02:01:01:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:194 protein. This plasmid can be used for constructing HLA-A*02:01:01:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:195 Protein Expression Plasmid Vector	PHLAP925906	Plasmid vector containing HLA-A*02:01:01:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:195 protein. This plasmid can be used for constructing HLA-A*02:01:01:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:196 Protein Expression Plasmid Vector	PHLAP925907	Plasmid vector containing HLA-A*02:01:01:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:196 protein. This plasmid can be used for constructing HLA-A*02:01:01:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:197 Protein Expression Plasmid Vector	PHLAP925908	Plasmid vector containing HLA-A*02:01:01:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:197 protein. This plasmid can be used for constructing HLA-A*02:01:01:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:198 Protein Expression Plasmid Vector	PHLAP925909	Plasmid vector containing HLA-A*02:01:01:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:198 protein. This plasmid can be used for constructing HLA-A*02:01:01:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:199 Protein Expression Plasmid Vector	PHLAP925910	Plasmid vector containing HLA-A*02:01:01:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:199 protein. This plasmid can be used for constructing HLA-A*02:01:01:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:20 Protein Expression Plasmid Vector	PHLAP925911	Plasmid vector containing HLA-A*02:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:20 protein. This plasmid can be used for constructing HLA-A*02:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:200 Protein Expression Plasmid Vector	PHLAP925912	Plasmid vector containing HLA-A*02:01:01:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:200 protein. This plasmid can be used for constructing HLA-A*02:01:01:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:201 Protein Expression Plasmid Vector	PHLAP925913	Plasmid vector containing HLA-A*02:01:01:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:201 protein. This plasmid can be used for constructing HLA-A*02:01:01:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:202 Protein Expression Plasmid Vector	PHLAP925914	Plasmid vector containing HLA-A*02:01:01:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:202 protein. This plasmid can be used for constructing HLA-A*02:01:01:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:203 Protein Expression Plasmid Vector	PHLAP925915	Plasmid vector containing HLA-A*02:01:01:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:203 protein. This plasmid can be used for constructing HLA-A*02:01:01:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:204 Protein Expression Plasmid Vector	PHLAP925916	Plasmid vector containing HLA-A*02:01:01:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:204 protein. This plasmid can be used for constructing HLA-A*02:01:01:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:205 Protein Expression Plasmid Vector	PHLAP925917	Plasmid vector containing HLA-A*02:01:01:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:205 protein. This plasmid can be used for constructing HLA-A*02:01:01:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:206 Protein Expression Plasmid Vector	PHLAP925918	Plasmid vector containing HLA-A*02:01:01:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:206 protein. This plasmid can be used for constructing HLA-A*02:01:01:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:207 Protein Expression Plasmid Vector	PHLAP925919	Plasmid vector containing HLA-A*02:01:01:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:207 protein. This plasmid can be used for constructing HLA-A*02:01:01:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:208 Protein Expression Plasmid Vector	PHLAP925920	Plasmid vector containing HLA-A*02:01:01:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:208 protein. This plasmid can be used for constructing HLA-A*02:01:01:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:209 Protein Expression Plasmid Vector	PHLAP925921	Plasmid vector containing HLA-A*02:01:01:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:209 protein. This plasmid can be used for constructing HLA-A*02:01:01:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:21 Protein Expression Plasmid Vector	PHLAP925922	Plasmid vector containing HLA-A*02:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:21 protein. This plasmid can be used for constructing HLA-A*02:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:210 Protein Expression Plasmid Vector	PHLAP925923	Plasmid vector containing HLA-A*02:01:01:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:210 protein. This plasmid can be used for constructing HLA-A*02:01:01:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:211 Protein Expression Plasmid Vector	PHLAP925924	Plasmid vector containing HLA-A*02:01:01:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:211 protein. This plasmid can be used for constructing HLA-A*02:01:01:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:212 Protein Expression Plasmid Vector	PHLAP925925	Plasmid vector containing HLA-A*02:01:01:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:212 protein. This plasmid can be used for constructing HLA-A*02:01:01:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:213 Protein Expression Plasmid Vector	PHLAP925926	Plasmid vector containing HLA-A*02:01:01:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:213 protein. This plasmid can be used for constructing HLA-A*02:01:01:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:214 Protein Expression Plasmid Vector	PHLAP925927	Plasmid vector containing HLA-A*02:01:01:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:214 protein. This plasmid can be used for constructing HLA-A*02:01:01:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:215 Protein Expression Plasmid Vector	PHLAP925928	Plasmid vector containing HLA-A*02:01:01:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:215 protein. This plasmid can be used for constructing HLA-A*02:01:01:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:216 Protein Expression Plasmid Vector	PHLAP925929	Plasmid vector containing HLA-A*02:01:01:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:216 protein. This plasmid can be used for constructing HLA-A*02:01:01:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:217 Protein Expression Plasmid Vector	PHLAP925930	Plasmid vector containing HLA-A*02:01:01:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:217 protein. This plasmid can be used for constructing HLA-A*02:01:01:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:218 Protein Expression Plasmid Vector	PHLAP925931	Plasmid vector containing HLA-A*02:01:01:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:218 protein. This plasmid can be used for constructing HLA-A*02:01:01:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:219 Protein Expression Plasmid Vector	PHLAP925932	Plasmid vector containing HLA-A*02:01:01:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:219 protein. This plasmid can be used for constructing HLA-A*02:01:01:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:22 Protein Expression Plasmid Vector	PHLAP925933	Plasmid vector containing HLA-A*02:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:22 protein. This plasmid can be used for constructing HLA-A*02:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:220 Protein Expression Plasmid Vector	PHLAP925934	Plasmid vector containing HLA-A*02:01:01:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:220 protein. This plasmid can be used for constructing HLA-A*02:01:01:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:221 Protein Expression Plasmid Vector	PHLAP925935	Plasmid vector containing HLA-A*02:01:01:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:221 protein. This plasmid can be used for constructing HLA-A*02:01:01:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:222 Protein Expression Plasmid Vector	PHLAP925936	Plasmid vector containing HLA-A*02:01:01:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:222 protein. This plasmid can be used for constructing HLA-A*02:01:01:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:223 Protein Expression Plasmid Vector	PHLAP925937	Plasmid vector containing HLA-A*02:01:01:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:223 protein. This plasmid can be used for constructing HLA-A*02:01:01:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:224 Protein Expression Plasmid Vector	PHLAP925938	Plasmid vector containing HLA-A*02:01:01:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:224 protein. This plasmid can be used for constructing HLA-A*02:01:01:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:225 Protein Expression Plasmid Vector	PHLAP925939	Plasmid vector containing HLA-A*02:01:01:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:225 protein. This plasmid can be used for constructing HLA-A*02:01:01:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:226 Protein Expression Plasmid Vector	PHLAP925940	Plasmid vector containing HLA-A*02:01:01:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:226 protein. This plasmid can be used for constructing HLA-A*02:01:01:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:227 Protein Expression Plasmid Vector	PHLAP925941	Plasmid vector containing HLA-A*02:01:01:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:227 protein. This plasmid can be used for constructing HLA-A*02:01:01:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:228 Protein Expression Plasmid Vector	PHLAP925942	Plasmid vector containing HLA-A*02:01:01:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:228 protein. This plasmid can be used for constructing HLA-A*02:01:01:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:229 Protein Expression Plasmid Vector	PHLAP925943	Plasmid vector containing HLA-A*02:01:01:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:229 protein. This plasmid can be used for constructing HLA-A*02:01:01:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:23 Protein Expression Plasmid Vector	PHLAP925944	Plasmid vector containing HLA-A*02:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:23 protein. This plasmid can be used for constructing HLA-A*02:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:230 Protein Expression Plasmid Vector	PHLAP925945	Plasmid vector containing HLA-A*02:01:01:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:230 protein. This plasmid can be used for constructing HLA-A*02:01:01:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:231 Protein Expression Plasmid Vector	PHLAP925946	Plasmid vector containing HLA-A*02:01:01:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:231 protein. This plasmid can be used for constructing HLA-A*02:01:01:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:232 Protein Expression Plasmid Vector	PHLAP925947	Plasmid vector containing HLA-A*02:01:01:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:232 protein. This plasmid can be used for constructing HLA-A*02:01:01:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:233 Protein Expression Plasmid Vector	PHLAP925948	Plasmid vector containing HLA-A*02:01:01:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:233 protein. This plasmid can be used for constructing HLA-A*02:01:01:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:234 Protein Expression Plasmid Vector	PHLAP925949	Plasmid vector containing HLA-A*02:01:01:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:234 protein. This plasmid can be used for constructing HLA-A*02:01:01:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:235 Protein Expression Plasmid Vector	PHLAP925950	Plasmid vector containing HLA-A*02:01:01:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:235 protein. This plasmid can be used for constructing HLA-A*02:01:01:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:236 Protein Expression Plasmid Vector	PHLAP925951	Plasmid vector containing HLA-A*02:01:01:236 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:236 protein. This plasmid can be used for constructing HLA-A*02:01:01:236 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:236 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:237 Protein Expression Plasmid Vector	PHLAP925952	Plasmid vector containing HLA-A*02:01:01:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:237 protein. This plasmid can be used for constructing HLA-A*02:01:01:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:238 Protein Expression Plasmid Vector	PHLAP925953	Plasmid vector containing HLA-A*02:01:01:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:238 protein. This plasmid can be used for constructing HLA-A*02:01:01:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:239 Protein Expression Plasmid Vector	PHLAP925954	Plasmid vector containing HLA-A*02:01:01:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:239 protein. This plasmid can be used for constructing HLA-A*02:01:01:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:24 Protein Expression Plasmid Vector	PHLAP925955	Plasmid vector containing HLA-A*02:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:24 protein. This plasmid can be used for constructing HLA-A*02:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:240 Protein Expression Plasmid Vector	PHLAP925956	Plasmid vector containing HLA-A*02:01:01:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:240 protein. This plasmid can be used for constructing HLA-A*02:01:01:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:241 Protein Expression Plasmid Vector	PHLAP925957	Plasmid vector containing HLA-A*02:01:01:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:241 protein. This plasmid can be used for constructing HLA-A*02:01:01:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:242 Protein Expression Plasmid Vector	PHLAP925958	Plasmid vector containing HLA-A*02:01:01:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:242 protein. This plasmid can be used for constructing HLA-A*02:01:01:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:243 Protein Expression Plasmid Vector	PHLAP925959	Plasmid vector containing HLA-A*02:01:01:243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:243 protein. This plasmid can be used for constructing HLA-A*02:01:01:243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:244 Protein Expression Plasmid Vector	PHLAP925960	Plasmid vector containing HLA-A*02:01:01:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:244 protein. This plasmid can be used for constructing HLA-A*02:01:01:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:245 Protein Expression Plasmid Vector	PHLAP925961	Plasmid vector containing HLA-A*02:01:01:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:245 protein. This plasmid can be used for constructing HLA-A*02:01:01:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:246 Protein Expression Plasmid Vector	PHLAP925962	Plasmid vector containing HLA-A*02:01:01:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:246 protein. This plasmid can be used for constructing HLA-A*02:01:01:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:247 Protein Expression Plasmid Vector	PHLAP925963	Plasmid vector containing HLA-A*02:01:01:247 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:247 protein. This plasmid can be used for constructing HLA-A*02:01:01:247 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:247 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:248 Protein Expression Plasmid Vector	PHLAP925964	Plasmid vector containing HLA-A*02:01:01:248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:248 protein. This plasmid can be used for constructing HLA-A*02:01:01:248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:249 Protein Expression Plasmid Vector	PHLAP925965	Plasmid vector containing HLA-A*02:01:01:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:249 protein. This plasmid can be used for constructing HLA-A*02:01:01:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:25 Protein Expression Plasmid Vector	PHLAP925966	Plasmid vector containing HLA-A*02:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:25 protein. This plasmid can be used for constructing HLA-A*02:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:250 Protein Expression Plasmid Vector	PHLAP925967	Plasmid vector containing HLA-A*02:01:01:250 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:250 protein. This plasmid can be used for constructing HLA-A*02:01:01:250 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:250 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:251 Protein Expression Plasmid Vector	PHLAP925968	Plasmid vector containing HLA-A*02:01:01:251 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:251 protein. This plasmid can be used for constructing HLA-A*02:01:01:251 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:251 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:252Q Protein Expression Plasmid Vector	PHLAP925969	Plasmid vector containing HLA-A*02:01:01:252Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:252Q protein. This plasmid can be used for constructing HLA-A*02:01:01:252Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:252Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:253 Protein Expression Plasmid Vector	PHLAP925970	Plasmid vector containing HLA-A*02:01:01:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:253 protein. This plasmid can be used for constructing HLA-A*02:01:01:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:254 Protein Expression Plasmid Vector	PHLAP925971	Plasmid vector containing HLA-A*02:01:01:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:254 protein. This plasmid can be used for constructing HLA-A*02:01:01:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:255 Protein Expression Plasmid Vector	PHLAP925972	Plasmid vector containing HLA-A*02:01:01:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:255 protein. This plasmid can be used for constructing HLA-A*02:01:01:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:256 Protein Expression Plasmid Vector	PHLAP925973	Plasmid vector containing HLA-A*02:01:01:256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:256 protein. This plasmid can be used for constructing HLA-A*02:01:01:256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:257 Protein Expression Plasmid Vector	PHLAP925974	Plasmid vector containing HLA-A*02:01:01:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:257 protein. This plasmid can be used for constructing HLA-A*02:01:01:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:258 Protein Expression Plasmid Vector	PHLAP925975	Plasmid vector containing HLA-A*02:01:01:258 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:258 protein. This plasmid can be used for constructing HLA-A*02:01:01:258 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:258 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:259 Protein Expression Plasmid Vector	PHLAP925976	Plasmid vector containing HLA-A*02:01:01:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:259 protein. This plasmid can be used for constructing HLA-A*02:01:01:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:26 Protein Expression Plasmid Vector	PHLAP925977	Plasmid vector containing HLA-A*02:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:26 protein. This plasmid can be used for constructing HLA-A*02:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:260 Protein Expression Plasmid Vector	PHLAP925978	Plasmid vector containing HLA-A*02:01:01:260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:260 protein. This plasmid can be used for constructing HLA-A*02:01:01:260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:261 Protein Expression Plasmid Vector	PHLAP925979	Plasmid vector containing HLA-A*02:01:01:261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:261 protein. This plasmid can be used for constructing HLA-A*02:01:01:261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:262 Protein Expression Plasmid Vector	PHLAP925980	Plasmid vector containing HLA-A*02:01:01:262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:262 protein. This plasmid can be used for constructing HLA-A*02:01:01:262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:27 Protein Expression Plasmid Vector	PHLAP925981	Plasmid vector containing HLA-A*02:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:27 protein. This plasmid can be used for constructing HLA-A*02:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:28 Protein Expression Plasmid Vector	PHLAP925982	Plasmid vector containing HLA-A*02:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:28 protein. This plasmid can be used for constructing HLA-A*02:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:29 Protein Expression Plasmid Vector	PHLAP925983	Plasmid vector containing HLA-A*02:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:29 protein. This plasmid can be used for constructing HLA-A*02:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:30 Protein Expression Plasmid Vector	PHLAP925984	Plasmid vector containing HLA-A*02:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:30 protein. This plasmid can be used for constructing HLA-A*02:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:31 Protein Expression Plasmid Vector	PHLAP925985	Plasmid vector containing HLA-A*02:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:31 protein. This plasmid can be used for constructing HLA-A*02:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:32 Protein Expression Plasmid Vector	PHLAP925986	Plasmid vector containing HLA-A*02:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:32 protein. This plasmid can be used for constructing HLA-A*02:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:33 Protein Expression Plasmid Vector	PHLAP925987	Plasmid vector containing HLA-A*02:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:33 protein. This plasmid can be used for constructing HLA-A*02:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:34 Protein Expression Plasmid Vector	PHLAP925988	Plasmid vector containing HLA-A*02:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:34 protein. This plasmid can be used for constructing HLA-A*02:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:35 Protein Expression Plasmid Vector	PHLAP925989	Plasmid vector containing HLA-A*02:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:35 protein. This plasmid can be used for constructing HLA-A*02:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:36 Protein Expression Plasmid Vector	PHLAP925990	Plasmid vector containing HLA-A*02:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:36 protein. This plasmid can be used for constructing HLA-A*02:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:37 Protein Expression Plasmid Vector	PHLAP925991	Plasmid vector containing HLA-A*02:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:37 protein. This plasmid can be used for constructing HLA-A*02:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:38 Protein Expression Plasmid Vector	PHLAP925992	Plasmid vector containing HLA-A*02:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:38 protein. This plasmid can be used for constructing HLA-A*02:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:39 Protein Expression Plasmid Vector	PHLAP925993	Plasmid vector containing HLA-A*02:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:39 protein. This plasmid can be used for constructing HLA-A*02:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:40 Protein Expression Plasmid Vector	PHLAP925994	Plasmid vector containing HLA-A*02:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:40 protein. This plasmid can be used for constructing HLA-A*02:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:41 Protein Expression Plasmid Vector	PHLAP925995	Plasmid vector containing HLA-A*02:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:41 protein. This plasmid can be used for constructing HLA-A*02:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:42 Protein Expression Plasmid Vector	PHLAP925996	Plasmid vector containing HLA-A*02:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:42 protein. This plasmid can be used for constructing HLA-A*02:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:43 Protein Expression Plasmid Vector	PHLAP925997	Plasmid vector containing HLA-A*02:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:43 protein. This plasmid can be used for constructing HLA-A*02:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:44 Protein Expression Plasmid Vector	PHLAP925998	Plasmid vector containing HLA-A*02:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:44 protein. This plasmid can be used for constructing HLA-A*02:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:45 Protein Expression Plasmid Vector	PHLAP925999	Plasmid vector containing HLA-A*02:01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:45 protein. This plasmid can be used for constructing HLA-A*02:01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:46 Protein Expression Plasmid Vector	PHLAP9251000	Plasmid vector containing HLA-A*02:01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:46 protein. This plasmid can be used for constructing HLA-A*02:01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:47 Protein Expression Plasmid Vector	PHLAP9251001	Plasmid vector containing HLA-A*02:01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:47 protein. This plasmid can be used for constructing HLA-A*02:01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:48 Protein Expression Plasmid Vector	PHLAP9251002	Plasmid vector containing HLA-A*02:01:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:48 protein. This plasmid can be used for constructing HLA-A*02:01:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:49 Protein Expression Plasmid Vector	PHLAP9251003	Plasmid vector containing HLA-A*02:01:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:49 protein. This plasmid can be used for constructing HLA-A*02:01:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:50 Protein Expression Plasmid Vector	PHLAP9251004	Plasmid vector containing HLA-A*02:01:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:50 protein. This plasmid can be used for constructing HLA-A*02:01:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:51 Protein Expression Plasmid Vector	PHLAP9251005	Plasmid vector containing HLA-A*02:01:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:51 protein. This plasmid can be used for constructing HLA-A*02:01:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:52 Protein Expression Plasmid Vector	PHLAP9251006	Plasmid vector containing HLA-A*02:01:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:52 protein. This plasmid can be used for constructing HLA-A*02:01:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:53 Protein Expression Plasmid Vector	PHLAP9251007	Plasmid vector containing HLA-A*02:01:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:53 protein. This plasmid can be used for constructing HLA-A*02:01:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:54 Protein Expression Plasmid Vector	PHLAP9251008	Plasmid vector containing HLA-A*02:01:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:54 protein. This plasmid can be used for constructing HLA-A*02:01:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:55 Protein Expression Plasmid Vector	PHLAP9251009	Plasmid vector containing HLA-A*02:01:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:55 protein. This plasmid can be used for constructing HLA-A*02:01:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:56 Protein Expression Plasmid Vector	PHLAP9251010	Plasmid vector containing HLA-A*02:01:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:56 protein. This plasmid can be used for constructing HLA-A*02:01:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:57 Protein Expression Plasmid Vector	PHLAP9251011	Plasmid vector containing HLA-A*02:01:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:57 protein. This plasmid can be used for constructing HLA-A*02:01:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:58 Protein Expression Plasmid Vector	PHLAP9251012	Plasmid vector containing HLA-A*02:01:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:58 protein. This plasmid can be used for constructing HLA-A*02:01:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:59 Protein Expression Plasmid Vector	PHLAP9251013	Plasmid vector containing HLA-A*02:01:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:59 protein. This plasmid can be used for constructing HLA-A*02:01:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:60 Protein Expression Plasmid Vector	PHLAP9251014	Plasmid vector containing HLA-A*02:01:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:60 protein. This plasmid can be used for constructing HLA-A*02:01:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:61 Protein Expression Plasmid Vector	PHLAP9251015	Plasmid vector containing HLA-A*02:01:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:61 protein. This plasmid can be used for constructing HLA-A*02:01:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:62 Protein Expression Plasmid Vector	PHLAP9251016	Plasmid vector containing HLA-A*02:01:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:62 protein. This plasmid can be used for constructing HLA-A*02:01:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:63 Protein Expression Plasmid Vector	PHLAP9251017	Plasmid vector containing HLA-A*02:01:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:63 protein. This plasmid can be used for constructing HLA-A*02:01:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:64 Protein Expression Plasmid Vector	PHLAP9251018	Plasmid vector containing HLA-A*02:01:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:64 protein. This plasmid can be used for constructing HLA-A*02:01:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:65 Protein Expression Plasmid Vector	PHLAP9251019	Plasmid vector containing HLA-A*02:01:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:65 protein. This plasmid can be used for constructing HLA-A*02:01:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:66 Protein Expression Plasmid Vector	PHLAP9251020	Plasmid vector containing HLA-A*02:01:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:66 protein. This plasmid can be used for constructing HLA-A*02:01:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:67 Protein Expression Plasmid Vector	PHLAP9251021	Plasmid vector containing HLA-A*02:01:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:67 protein. This plasmid can be used for constructing HLA-A*02:01:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:68 Protein Expression Plasmid Vector	PHLAP9251022	Plasmid vector containing HLA-A*02:01:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:68 protein. This plasmid can be used for constructing HLA-A*02:01:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:69 Protein Expression Plasmid Vector	PHLAP9251023	Plasmid vector containing HLA-A*02:01:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:69 protein. This plasmid can be used for constructing HLA-A*02:01:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:70 Protein Expression Plasmid Vector	PHLAP9251024	Plasmid vector containing HLA-A*02:01:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:70 protein. This plasmid can be used for constructing HLA-A*02:01:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:71 Protein Expression Plasmid Vector	PHLAP9251025	Plasmid vector containing HLA-A*02:01:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:71 protein. This plasmid can be used for constructing HLA-A*02:01:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:72 Protein Expression Plasmid Vector	PHLAP9251026	Plasmid vector containing HLA-A*02:01:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:72 protein. This plasmid can be used for constructing HLA-A*02:01:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:73 Protein Expression Plasmid Vector	PHLAP9251027	Plasmid vector containing HLA-A*02:01:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:73 protein. This plasmid can be used for constructing HLA-A*02:01:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:74 Protein Expression Plasmid Vector	PHLAP9251028	Plasmid vector containing HLA-A*02:01:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:74 protein. This plasmid can be used for constructing HLA-A*02:01:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:75 Protein Expression Plasmid Vector	PHLAP9251029	Plasmid vector containing HLA-A*02:01:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:75 protein. This plasmid can be used for constructing HLA-A*02:01:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:76 Protein Expression Plasmid Vector	PHLAP9251030	Plasmid vector containing HLA-A*02:01:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:76 protein. This plasmid can be used for constructing HLA-A*02:01:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:77 Protein Expression Plasmid Vector	PHLAP9251031	Plasmid vector containing HLA-A*02:01:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:77 protein. This plasmid can be used for constructing HLA-A*02:01:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:78 Protein Expression Plasmid Vector	PHLAP9251032	Plasmid vector containing HLA-A*02:01:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:78 protein. This plasmid can be used for constructing HLA-A*02:01:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:79 Protein Expression Plasmid Vector	PHLAP9251033	Plasmid vector containing HLA-A*02:01:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:79 protein. This plasmid can be used for constructing HLA-A*02:01:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:80 Protein Expression Plasmid Vector	PHLAP9251034	Plasmid vector containing HLA-A*02:01:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:80 protein. This plasmid can be used for constructing HLA-A*02:01:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:81 Protein Expression Plasmid Vector	PHLAP9251035	Plasmid vector containing HLA-A*02:01:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:81 protein. This plasmid can be used for constructing HLA-A*02:01:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:82 Protein Expression Plasmid Vector	PHLAP9251036	Plasmid vector containing HLA-A*02:01:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:82 protein. This plasmid can be used for constructing HLA-A*02:01:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:83 Protein Expression Plasmid Vector	PHLAP9251037	Plasmid vector containing HLA-A*02:01:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:83 protein. This plasmid can be used for constructing HLA-A*02:01:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:84 Protein Expression Plasmid Vector	PHLAP9251038	Plasmid vector containing HLA-A*02:01:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:84 protein. This plasmid can be used for constructing HLA-A*02:01:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:85 Protein Expression Plasmid Vector	PHLAP9251039	Plasmid vector containing HLA-A*02:01:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:85 protein. This plasmid can be used for constructing HLA-A*02:01:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:86 Protein Expression Plasmid Vector	PHLAP9251040	Plasmid vector containing HLA-A*02:01:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:86 protein. This plasmid can be used for constructing HLA-A*02:01:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:87 Protein Expression Plasmid Vector	PHLAP9251041	Plasmid vector containing HLA-A*02:01:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:87 protein. This plasmid can be used for constructing HLA-A*02:01:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:88 Protein Expression Plasmid Vector	PHLAP9251042	Plasmid vector containing HLA-A*02:01:01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:88 protein. This plasmid can be used for constructing HLA-A*02:01:01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:89 Protein Expression Plasmid Vector	PHLAP9251043	Plasmid vector containing HLA-A*02:01:01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:89 protein. This plasmid can be used for constructing HLA-A*02:01:01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:90 Protein Expression Plasmid Vector	PHLAP9251044	Plasmid vector containing HLA-A*02:01:01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:90 protein. This plasmid can be used for constructing HLA-A*02:01:01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:91 Protein Expression Plasmid Vector	PHLAP9251045	Plasmid vector containing HLA-A*02:01:01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:91 protein. This plasmid can be used for constructing HLA-A*02:01:01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:92 Protein Expression Plasmid Vector	PHLAP9251046	Plasmid vector containing HLA-A*02:01:01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:92 protein. This plasmid can be used for constructing HLA-A*02:01:01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:93 Protein Expression Plasmid Vector	PHLAP9251047	Plasmid vector containing HLA-A*02:01:01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:93 protein. This plasmid can be used for constructing HLA-A*02:01:01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:94 Protein Expression Plasmid Vector	PHLAP9251048	Plasmid vector containing HLA-A*02:01:01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:94 protein. This plasmid can be used for constructing HLA-A*02:01:01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:95 Protein Expression Plasmid Vector	PHLAP9251049	Plasmid vector containing HLA-A*02:01:01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:95 protein. This plasmid can be used for constructing HLA-A*02:01:01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:96 Protein Expression Plasmid Vector	PHLAP9251050	Plasmid vector containing HLA-A*02:01:01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:96 protein. This plasmid can be used for constructing HLA-A*02:01:01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:97 Protein Expression Plasmid Vector	PHLAP9251051	Plasmid vector containing HLA-A*02:01:01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:97 protein. This plasmid can be used for constructing HLA-A*02:01:01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:01:98 Protein Expression Plasmid Vector	PHLAP9251052	Plasmid vector containing HLA-A*02:01:01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:98 protein. This plasmid can be used for constructing HLA-A*02:01:01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:01:99 Protein Expression Plasmid Vector	PHLAP9251053	Plasmid vector containing HLA-A*02:01:01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:01:99 protein. This plasmid can be used for constructing HLA-A*02:01:01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:02:01 Protein Expression Plasmid Vector	PHLAP9251054	Plasmid vector containing HLA-A*02:01:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:02:01 protein. This plasmid can be used for constructing HLA-A*02:01:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:02:02 Protein Expression Plasmid Vector	PHLAP9251055	Plasmid vector containing HLA-A*02:01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:02:02 protein. This plasmid can be used for constructing HLA-A*02:01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:03 Protein Expression Plasmid Vector	PHLAP9251056	Plasmid vector containing HLA-A*02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:03 protein. This plasmid can be used for constructing HLA-A*02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:04 Protein Expression Plasmid Vector	PHLAP9251057	Plasmid vector containing HLA-A*02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:04 protein. This plasmid can be used for constructing HLA-A*02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:05 Protein Expression Plasmid Vector	PHLAP9251058	Plasmid vector containing HLA-A*02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:05 protein. This plasmid can be used for constructing HLA-A*02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:06 Protein Expression Plasmid Vector	PHLAP9251059	Plasmid vector containing HLA-A*02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:06 protein. This plasmid can be used for constructing HLA-A*02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:07 Protein Expression Plasmid Vector	PHLAP9251060	Plasmid vector containing HLA-A*02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:07 protein. This plasmid can be used for constructing HLA-A*02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:08 Protein Expression Plasmid Vector	PHLAP9251061	Plasmid vector containing HLA-A*02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:08 protein. This plasmid can be used for constructing HLA-A*02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:09 Protein Expression Plasmid Vector	PHLAP9251062	Plasmid vector containing HLA-A*02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:09 protein. This plasmid can be used for constructing HLA-A*02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:10 Protein Expression Plasmid Vector	PHLAP9251063	Plasmid vector containing HLA-A*02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:10 protein. This plasmid can be used for constructing HLA-A*02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:100 Protein Expression Plasmid Vector	PHLAP9251064	Plasmid vector containing HLA-A*02:01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:100 protein. This plasmid can be used for constructing HLA-A*02:01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:101 Protein Expression Plasmid Vector	PHLAP9251065	Plasmid vector containing HLA-A*02:01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:101 protein. This plasmid can be used for constructing HLA-A*02:01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:102 Protein Expression Plasmid Vector	PHLAP9251066	Plasmid vector containing HLA-A*02:01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:102 protein. This plasmid can be used for constructing HLA-A*02:01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:103 Protein Expression Plasmid Vector	PHLAP9251067	Plasmid vector containing HLA-A*02:01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:103 protein. This plasmid can be used for constructing HLA-A*02:01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:104 Protein Expression Plasmid Vector	PHLAP9251068	Plasmid vector containing HLA-A*02:01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:104 protein. This plasmid can be used for constructing HLA-A*02:01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:105 Protein Expression Plasmid Vector	PHLAP9251069	Plasmid vector containing HLA-A*02:01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:105 protein. This plasmid can be used for constructing HLA-A*02:01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:106 Protein Expression Plasmid Vector	PHLAP9251070	Plasmid vector containing HLA-A*02:01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:106 protein. This plasmid can be used for constructing HLA-A*02:01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:107 Protein Expression Plasmid Vector	PHLAP9251071	Plasmid vector containing HLA-A*02:01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:107 protein. This plasmid can be used for constructing HLA-A*02:01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:108 Protein Expression Plasmid Vector	PHLAP9251072	Plasmid vector containing HLA-A*02:01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:108 protein. This plasmid can be used for constructing HLA-A*02:01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:109 Protein Expression Plasmid Vector	PHLAP9251073	Plasmid vector containing HLA-A*02:01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:109 protein. This plasmid can be used for constructing HLA-A*02:01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:11 Protein Expression Plasmid Vector	PHLAP9251074	Plasmid vector containing HLA-A*02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:11 protein. This plasmid can be used for constructing HLA-A*02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:110 Protein Expression Plasmid Vector	PHLAP9251075	Plasmid vector containing HLA-A*02:01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:110 protein. This plasmid can be used for constructing HLA-A*02:01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:111 Protein Expression Plasmid Vector	PHLAP9251076	Plasmid vector containing HLA-A*02:01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:111 protein. This plasmid can be used for constructing HLA-A*02:01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:112 Protein Expression Plasmid Vector	PHLAP9251077	Plasmid vector containing HLA-A*02:01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:112 protein. This plasmid can be used for constructing HLA-A*02:01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:113 Protein Expression Plasmid Vector	PHLAP9251078	Plasmid vector containing HLA-A*02:01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:113 protein. This plasmid can be used for constructing HLA-A*02:01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:114 Protein Expression Plasmid Vector	PHLAP9251079	Plasmid vector containing HLA-A*02:01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:114 protein. This plasmid can be used for constructing HLA-A*02:01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:115 Protein Expression Plasmid Vector	PHLAP9251080	Plasmid vector containing HLA-A*02:01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:115 protein. This plasmid can be used for constructing HLA-A*02:01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:116 Protein Expression Plasmid Vector	PHLAP9251081	Plasmid vector containing HLA-A*02:01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:116 protein. This plasmid can be used for constructing HLA-A*02:01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:117 Protein Expression Plasmid Vector	PHLAP9251082	Plasmid vector containing HLA-A*02:01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:117 protein. This plasmid can be used for constructing HLA-A*02:01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:118 Protein Expression Plasmid Vector	PHLAP9251083	Plasmid vector containing HLA-A*02:01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:118 protein. This plasmid can be used for constructing HLA-A*02:01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:119 Protein Expression Plasmid Vector	PHLAP9251084	Plasmid vector containing HLA-A*02:01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:119 protein. This plasmid can be used for constructing HLA-A*02:01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:12 Protein Expression Plasmid Vector	PHLAP9251085	Plasmid vector containing HLA-A*02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:12 protein. This plasmid can be used for constructing HLA-A*02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:120 Protein Expression Plasmid Vector	PHLAP9251086	Plasmid vector containing HLA-A*02:01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:120 protein. This plasmid can be used for constructing HLA-A*02:01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:121 Protein Expression Plasmid Vector	PHLAP9251087	Plasmid vector containing HLA-A*02:01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:121 protein. This plasmid can be used for constructing HLA-A*02:01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:122 Protein Expression Plasmid Vector	PHLAP9251088	Plasmid vector containing HLA-A*02:01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:122 protein. This plasmid can be used for constructing HLA-A*02:01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:123 Protein Expression Plasmid Vector	PHLAP9251089	Plasmid vector containing HLA-A*02:01:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:123 protein. This plasmid can be used for constructing HLA-A*02:01:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:124 Protein Expression Plasmid Vector	PHLAP9251090	Plasmid vector containing HLA-A*02:01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:124 protein. This plasmid can be used for constructing HLA-A*02:01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:125 Protein Expression Plasmid Vector	PHLAP9251091	Plasmid vector containing HLA-A*02:01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:125 protein. This plasmid can be used for constructing HLA-A*02:01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:126 Protein Expression Plasmid Vector	PHLAP9251092	Plasmid vector containing HLA-A*02:01:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:126 protein. This plasmid can be used for constructing HLA-A*02:01:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:127 Protein Expression Plasmid Vector	PHLAP9251093	Plasmid vector containing HLA-A*02:01:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:127 protein. This plasmid can be used for constructing HLA-A*02:01:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:128 Protein Expression Plasmid Vector	PHLAP9251094	Plasmid vector containing HLA-A*02:01:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:128 protein. This plasmid can be used for constructing HLA-A*02:01:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:129 Protein Expression Plasmid Vector	PHLAP9251095	Plasmid vector containing HLA-A*02:01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:129 protein. This plasmid can be used for constructing HLA-A*02:01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:13 Protein Expression Plasmid Vector	PHLAP9251096	Plasmid vector containing HLA-A*02:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:13 protein. This plasmid can be used for constructing HLA-A*02:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:130 Protein Expression Plasmid Vector	PHLAP9251097	Plasmid vector containing HLA-A*02:01:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:130 protein. This plasmid can be used for constructing HLA-A*02:01:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:131 Protein Expression Plasmid Vector	PHLAP9251098	Plasmid vector containing HLA-A*02:01:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:131 protein. This plasmid can be used for constructing HLA-A*02:01:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:132 Protein Expression Plasmid Vector	PHLAP9251099	Plasmid vector containing HLA-A*02:01:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:132 protein. This plasmid can be used for constructing HLA-A*02:01:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:133 Protein Expression Plasmid Vector	PHLAP9251100	Plasmid vector containing HLA-A*02:01:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:133 protein. This plasmid can be used for constructing HLA-A*02:01:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:134 Protein Expression Plasmid Vector	PHLAP9251101	Plasmid vector containing HLA-A*02:01:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:134 protein. This plasmid can be used for constructing HLA-A*02:01:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:135 Protein Expression Plasmid Vector	PHLAP9251102	Plasmid vector containing HLA-A*02:01:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:135 protein. This plasmid can be used for constructing HLA-A*02:01:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:136 Protein Expression Plasmid Vector	PHLAP9251103	Plasmid vector containing HLA-A*02:01:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:136 protein. This plasmid can be used for constructing HLA-A*02:01:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:137 Protein Expression Plasmid Vector	PHLAP9251104	Plasmid vector containing HLA-A*02:01:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:137 protein. This plasmid can be used for constructing HLA-A*02:01:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:138 Protein Expression Plasmid Vector	PHLAP9251105	Plasmid vector containing HLA-A*02:01:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:138 protein. This plasmid can be used for constructing HLA-A*02:01:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:139 Protein Expression Plasmid Vector	PHLAP9251106	Plasmid vector containing HLA-A*02:01:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:139 protein. This plasmid can be used for constructing HLA-A*02:01:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:140 Protein Expression Plasmid Vector	PHLAP9251107	Plasmid vector containing HLA-A*02:01:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:140 protein. This plasmid can be used for constructing HLA-A*02:01:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:141 Protein Expression Plasmid Vector	PHLAP9251108	Plasmid vector containing HLA-A*02:01:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:141 protein. This plasmid can be used for constructing HLA-A*02:01:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:142 Protein Expression Plasmid Vector	PHLAP9251109	Plasmid vector containing HLA-A*02:01:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:142 protein. This plasmid can be used for constructing HLA-A*02:01:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:143 Protein Expression Plasmid Vector	PHLAP9251110	Plasmid vector containing HLA-A*02:01:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:143 protein. This plasmid can be used for constructing HLA-A*02:01:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:144 Protein Expression Plasmid Vector	PHLAP9251111	Plasmid vector containing HLA-A*02:01:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:144 protein. This plasmid can be used for constructing HLA-A*02:01:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:145 Protein Expression Plasmid Vector	PHLAP9251112	Plasmid vector containing HLA-A*02:01:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:145 protein. This plasmid can be used for constructing HLA-A*02:01:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:146 Protein Expression Plasmid Vector	PHLAP9251113	Plasmid vector containing HLA-A*02:01:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:146 protein. This plasmid can be used for constructing HLA-A*02:01:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:147 Protein Expression Plasmid Vector	PHLAP9251114	Plasmid vector containing HLA-A*02:01:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:147 protein. This plasmid can be used for constructing HLA-A*02:01:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:148 Protein Expression Plasmid Vector	PHLAP9251115	Plasmid vector containing HLA-A*02:01:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:148 protein. This plasmid can be used for constructing HLA-A*02:01:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:149 Protein Expression Plasmid Vector	PHLAP9251116	Plasmid vector containing HLA-A*02:01:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:149 protein. This plasmid can be used for constructing HLA-A*02:01:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:14Q Protein Expression Plasmid Vector	PHLAP9251117	Plasmid vector containing HLA-A*02:01:14Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:14Q protein. This plasmid can be used for constructing HLA-A*02:01:14Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:14Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:15 Protein Expression Plasmid Vector	PHLAP9251118	Plasmid vector containing HLA-A*02:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:15 protein. This plasmid can be used for constructing HLA-A*02:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:150 Protein Expression Plasmid Vector	PHLAP9251119	Plasmid vector containing HLA-A*02:01:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:150 protein. This plasmid can be used for constructing HLA-A*02:01:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:151 Protein Expression Plasmid Vector	PHLAP9251120	Plasmid vector containing HLA-A*02:01:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:151 protein. This plasmid can be used for constructing HLA-A*02:01:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:152 Protein Expression Plasmid Vector	PHLAP9251121	Plasmid vector containing HLA-A*02:01:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:152 protein. This plasmid can be used for constructing HLA-A*02:01:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:153 Protein Expression Plasmid Vector	PHLAP9251122	Plasmid vector containing HLA-A*02:01:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:153 protein. This plasmid can be used for constructing HLA-A*02:01:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:154 Protein Expression Plasmid Vector	PHLAP9251123	Plasmid vector containing HLA-A*02:01:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:154 protein. This plasmid can be used for constructing HLA-A*02:01:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:155 Protein Expression Plasmid Vector	PHLAP9251124	Plasmid vector containing HLA-A*02:01:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:155 protein. This plasmid can be used for constructing HLA-A*02:01:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:156 Protein Expression Plasmid Vector	PHLAP9251125	Plasmid vector containing HLA-A*02:01:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:156 protein. This plasmid can be used for constructing HLA-A*02:01:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:157 Protein Expression Plasmid Vector	PHLAP9251126	Plasmid vector containing HLA-A*02:01:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:157 protein. This plasmid can be used for constructing HLA-A*02:01:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:158 Protein Expression Plasmid Vector	PHLAP9251127	Plasmid vector containing HLA-A*02:01:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:158 protein. This plasmid can be used for constructing HLA-A*02:01:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:159 Protein Expression Plasmid Vector	PHLAP9251128	Plasmid vector containing HLA-A*02:01:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:159 protein. This plasmid can be used for constructing HLA-A*02:01:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:160 Protein Expression Plasmid Vector	PHLAP9251129	Plasmid vector containing HLA-A*02:01:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:160 protein. This plasmid can be used for constructing HLA-A*02:01:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:161 Protein Expression Plasmid Vector	PHLAP9251130	Plasmid vector containing HLA-A*02:01:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:161 protein. This plasmid can be used for constructing HLA-A*02:01:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:162 Protein Expression Plasmid Vector	PHLAP9251131	Plasmid vector containing HLA-A*02:01:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:162 protein. This plasmid can be used for constructing HLA-A*02:01:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:163 Protein Expression Plasmid Vector	PHLAP9251132	Plasmid vector containing HLA-A*02:01:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:163 protein. This plasmid can be used for constructing HLA-A*02:01:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:164 Protein Expression Plasmid Vector	PHLAP9251133	Plasmid vector containing HLA-A*02:01:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:164 protein. This plasmid can be used for constructing HLA-A*02:01:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:165 Protein Expression Plasmid Vector	PHLAP9251134	Plasmid vector containing HLA-A*02:01:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:165 protein. This plasmid can be used for constructing HLA-A*02:01:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:166 Protein Expression Plasmid Vector	PHLAP9251135	Plasmid vector containing HLA-A*02:01:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:166 protein. This plasmid can be used for constructing HLA-A*02:01:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:167 Protein Expression Plasmid Vector	PHLAP9251136	Plasmid vector containing HLA-A*02:01:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:167 protein. This plasmid can be used for constructing HLA-A*02:01:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:168 Protein Expression Plasmid Vector	PHLAP9251137	Plasmid vector containing HLA-A*02:01:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:168 protein. This plasmid can be used for constructing HLA-A*02:01:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:169 Protein Expression Plasmid Vector	PHLAP9251138	Plasmid vector containing HLA-A*02:01:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:169 protein. This plasmid can be used for constructing HLA-A*02:01:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:17 Protein Expression Plasmid Vector	PHLAP9251139	Plasmid vector containing HLA-A*02:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:17 protein. This plasmid can be used for constructing HLA-A*02:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:170 Protein Expression Plasmid Vector	PHLAP9251140	Plasmid vector containing HLA-A*02:01:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:170 protein. This plasmid can be used for constructing HLA-A*02:01:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:171 Protein Expression Plasmid Vector	PHLAP9251141	Plasmid vector containing HLA-A*02:01:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:171 protein. This plasmid can be used for constructing HLA-A*02:01:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:172 Protein Expression Plasmid Vector	PHLAP9251142	Plasmid vector containing HLA-A*02:01:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:172 protein. This plasmid can be used for constructing HLA-A*02:01:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:173 Protein Expression Plasmid Vector	PHLAP9251143	Plasmid vector containing HLA-A*02:01:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:173 protein. This plasmid can be used for constructing HLA-A*02:01:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:174 Protein Expression Plasmid Vector	PHLAP9251144	Plasmid vector containing HLA-A*02:01:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:174 protein. This plasmid can be used for constructing HLA-A*02:01:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:175 Protein Expression Plasmid Vector	PHLAP9251145	Plasmid vector containing HLA-A*02:01:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:175 protein. This plasmid can be used for constructing HLA-A*02:01:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:176 Protein Expression Plasmid Vector	PHLAP9251146	Plasmid vector containing HLA-A*02:01:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:176 protein. This plasmid can be used for constructing HLA-A*02:01:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:177 Protein Expression Plasmid Vector	PHLAP9251147	Plasmid vector containing HLA-A*02:01:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:177 protein. This plasmid can be used for constructing HLA-A*02:01:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:178 Protein Expression Plasmid Vector	PHLAP9251148	Plasmid vector containing HLA-A*02:01:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:178 protein. This plasmid can be used for constructing HLA-A*02:01:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:179 Protein Expression Plasmid Vector	PHLAP9251149	Plasmid vector containing HLA-A*02:01:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:179 protein. This plasmid can be used for constructing HLA-A*02:01:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:18 Protein Expression Plasmid Vector	PHLAP9251150	Plasmid vector containing HLA-A*02:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:18 protein. This plasmid can be used for constructing HLA-A*02:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:180 Protein Expression Plasmid Vector	PHLAP9251151	Plasmid vector containing HLA-A*02:01:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:180 protein. This plasmid can be used for constructing HLA-A*02:01:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:181 Protein Expression Plasmid Vector	PHLAP9251152	Plasmid vector containing HLA-A*02:01:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:181 protein. This plasmid can be used for constructing HLA-A*02:01:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:182 Protein Expression Plasmid Vector	PHLAP9251153	Plasmid vector containing HLA-A*02:01:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:182 protein. This plasmid can be used for constructing HLA-A*02:01:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:183 Protein Expression Plasmid Vector	PHLAP9251154	Plasmid vector containing HLA-A*02:01:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:183 protein. This plasmid can be used for constructing HLA-A*02:01:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:184 Protein Expression Plasmid Vector	PHLAP9251155	Plasmid vector containing HLA-A*02:01:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:184 protein. This plasmid can be used for constructing HLA-A*02:01:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:185 Protein Expression Plasmid Vector	PHLAP9251156	Plasmid vector containing HLA-A*02:01:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:185 protein. This plasmid can be used for constructing HLA-A*02:01:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:186 Protein Expression Plasmid Vector	PHLAP9251157	Plasmid vector containing HLA-A*02:01:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:186 protein. This plasmid can be used for constructing HLA-A*02:01:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:187 Protein Expression Plasmid Vector	PHLAP9251158	Plasmid vector containing HLA-A*02:01:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:187 protein. This plasmid can be used for constructing HLA-A*02:01:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:188 Protein Expression Plasmid Vector	PHLAP9251159	Plasmid vector containing HLA-A*02:01:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:188 protein. This plasmid can be used for constructing HLA-A*02:01:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:189 Protein Expression Plasmid Vector	PHLAP9251160	Plasmid vector containing HLA-A*02:01:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:189 protein. This plasmid can be used for constructing HLA-A*02:01:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:19 Protein Expression Plasmid Vector	PHLAP9251161	Plasmid vector containing HLA-A*02:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:19 protein. This plasmid can be used for constructing HLA-A*02:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:190 Protein Expression Plasmid Vector	PHLAP9251162	Plasmid vector containing HLA-A*02:01:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:190 protein. This plasmid can be used for constructing HLA-A*02:01:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:191 Protein Expression Plasmid Vector	PHLAP9251163	Plasmid vector containing HLA-A*02:01:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:191 protein. This plasmid can be used for constructing HLA-A*02:01:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:192 Protein Expression Plasmid Vector	PHLAP9251164	Plasmid vector containing HLA-A*02:01:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:192 protein. This plasmid can be used for constructing HLA-A*02:01:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:193 Protein Expression Plasmid Vector	PHLAP9251165	Plasmid vector containing HLA-A*02:01:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:193 protein. This plasmid can be used for constructing HLA-A*02:01:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:194 Protein Expression Plasmid Vector	PHLAP9251166	Plasmid vector containing HLA-A*02:01:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:194 protein. This plasmid can be used for constructing HLA-A*02:01:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:195 Protein Expression Plasmid Vector	PHLAP9251167	Plasmid vector containing HLA-A*02:01:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:195 protein. This plasmid can be used for constructing HLA-A*02:01:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:196 Protein Expression Plasmid Vector	PHLAP9251168	Plasmid vector containing HLA-A*02:01:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:196 protein. This plasmid can be used for constructing HLA-A*02:01:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:197 Protein Expression Plasmid Vector	PHLAP9251169	Plasmid vector containing HLA-A*02:01:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:197 protein. This plasmid can be used for constructing HLA-A*02:01:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:198 Protein Expression Plasmid Vector	PHLAP9251170	Plasmid vector containing HLA-A*02:01:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:198 protein. This plasmid can be used for constructing HLA-A*02:01:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:199 Protein Expression Plasmid Vector	PHLAP9251171	Plasmid vector containing HLA-A*02:01:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:199 protein. This plasmid can be used for constructing HLA-A*02:01:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:200 Protein Expression Plasmid Vector	PHLAP9251172	Plasmid vector containing HLA-A*02:01:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:200 protein. This plasmid can be used for constructing HLA-A*02:01:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:201 Protein Expression Plasmid Vector	PHLAP9251173	Plasmid vector containing HLA-A*02:01:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:201 protein. This plasmid can be used for constructing HLA-A*02:01:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:202 Protein Expression Plasmid Vector	PHLAP9251174	Plasmid vector containing HLA-A*02:01:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:202 protein. This plasmid can be used for constructing HLA-A*02:01:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:203 Protein Expression Plasmid Vector	PHLAP9251175	Plasmid vector containing HLA-A*02:01:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:203 protein. This plasmid can be used for constructing HLA-A*02:01:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:204 Protein Expression Plasmid Vector	PHLAP9251176	Plasmid vector containing HLA-A*02:01:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:204 protein. This plasmid can be used for constructing HLA-A*02:01:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:205 Protein Expression Plasmid Vector	PHLAP9251177	Plasmid vector containing HLA-A*02:01:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:205 protein. This plasmid can be used for constructing HLA-A*02:01:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:206 Protein Expression Plasmid Vector	PHLAP9251178	Plasmid vector containing HLA-A*02:01:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:206 protein. This plasmid can be used for constructing HLA-A*02:01:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:207 Protein Expression Plasmid Vector	PHLAP9251179	Plasmid vector containing HLA-A*02:01:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:207 protein. This plasmid can be used for constructing HLA-A*02:01:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:208 Protein Expression Plasmid Vector	PHLAP9251180	Plasmid vector containing HLA-A*02:01:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:208 protein. This plasmid can be used for constructing HLA-A*02:01:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:209 Protein Expression Plasmid Vector	PHLAP9251181	Plasmid vector containing HLA-A*02:01:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:209 protein. This plasmid can be used for constructing HLA-A*02:01:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:21 Protein Expression Plasmid Vector	PHLAP9251182	Plasmid vector containing HLA-A*02:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:21 protein. This plasmid can be used for constructing HLA-A*02:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:210 Protein Expression Plasmid Vector	PHLAP9251183	Plasmid vector containing HLA-A*02:01:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:210 protein. This plasmid can be used for constructing HLA-A*02:01:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:211 Protein Expression Plasmid Vector	PHLAP9251184	Plasmid vector containing HLA-A*02:01:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:211 protein. This plasmid can be used for constructing HLA-A*02:01:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:212 Protein Expression Plasmid Vector	PHLAP9251185	Plasmid vector containing HLA-A*02:01:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:212 protein. This plasmid can be used for constructing HLA-A*02:01:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:213 Protein Expression Plasmid Vector	PHLAP9251186	Plasmid vector containing HLA-A*02:01:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:213 protein. This plasmid can be used for constructing HLA-A*02:01:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:214 Protein Expression Plasmid Vector	PHLAP9251187	Plasmid vector containing HLA-A*02:01:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:214 protein. This plasmid can be used for constructing HLA-A*02:01:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:215 Protein Expression Plasmid Vector	PHLAP9251188	Plasmid vector containing HLA-A*02:01:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:215 protein. This plasmid can be used for constructing HLA-A*02:01:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:216 Protein Expression Plasmid Vector	PHLAP9251189	Plasmid vector containing HLA-A*02:01:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:216 protein. This plasmid can be used for constructing HLA-A*02:01:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:217 Protein Expression Plasmid Vector	PHLAP9251190	Plasmid vector containing HLA-A*02:01:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:217 protein. This plasmid can be used for constructing HLA-A*02:01:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:218 Protein Expression Plasmid Vector	PHLAP9251191	Plasmid vector containing HLA-A*02:01:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:218 protein. This plasmid can be used for constructing HLA-A*02:01:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:219 Protein Expression Plasmid Vector	PHLAP9251192	Plasmid vector containing HLA-A*02:01:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:219 protein. This plasmid can be used for constructing HLA-A*02:01:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:22 Protein Expression Plasmid Vector	PHLAP9251193	Plasmid vector containing HLA-A*02:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:22 protein. This plasmid can be used for constructing HLA-A*02:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:220 Protein Expression Plasmid Vector	PHLAP9251194	Plasmid vector containing HLA-A*02:01:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:220 protein. This plasmid can be used for constructing HLA-A*02:01:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:221 Protein Expression Plasmid Vector	PHLAP9251195	Plasmid vector containing HLA-A*02:01:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:221 protein. This plasmid can be used for constructing HLA-A*02:01:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:222 Protein Expression Plasmid Vector	PHLAP9251196	Plasmid vector containing HLA-A*02:01:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:222 protein. This plasmid can be used for constructing HLA-A*02:01:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:223 Protein Expression Plasmid Vector	PHLAP9251197	Plasmid vector containing HLA-A*02:01:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:223 protein. This plasmid can be used for constructing HLA-A*02:01:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:224 Protein Expression Plasmid Vector	PHLAP9251198	Plasmid vector containing HLA-A*02:01:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:224 protein. This plasmid can be used for constructing HLA-A*02:01:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:225 Protein Expression Plasmid Vector	PHLAP9251199	Plasmid vector containing HLA-A*02:01:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:225 protein. This plasmid can be used for constructing HLA-A*02:01:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:226 Protein Expression Plasmid Vector	PHLAP9251200	Plasmid vector containing HLA-A*02:01:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:226 protein. This plasmid can be used for constructing HLA-A*02:01:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:23 Protein Expression Plasmid Vector	PHLAP9251201	Plasmid vector containing HLA-A*02:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:23 protein. This plasmid can be used for constructing HLA-A*02:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:24 Protein Expression Plasmid Vector	PHLAP9251202	Plasmid vector containing HLA-A*02:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:24 protein. This plasmid can be used for constructing HLA-A*02:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:25 Protein Expression Plasmid Vector	PHLAP9251203	Plasmid vector containing HLA-A*02:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:25 protein. This plasmid can be used for constructing HLA-A*02:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:26 Protein Expression Plasmid Vector	PHLAP9251204	Plasmid vector containing HLA-A*02:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:26 protein. This plasmid can be used for constructing HLA-A*02:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:27 Protein Expression Plasmid Vector	PHLAP9251205	Plasmid vector containing HLA-A*02:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:27 protein. This plasmid can be used for constructing HLA-A*02:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:28 Protein Expression Plasmid Vector	PHLAP9251206	Plasmid vector containing HLA-A*02:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:28 protein. This plasmid can be used for constructing HLA-A*02:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:29 Protein Expression Plasmid Vector	PHLAP9251207	Plasmid vector containing HLA-A*02:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:29 protein. This plasmid can be used for constructing HLA-A*02:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:30 Protein Expression Plasmid Vector	PHLAP9251208	Plasmid vector containing HLA-A*02:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:30 protein. This plasmid can be used for constructing HLA-A*02:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:31 Protein Expression Plasmid Vector	PHLAP9251209	Plasmid vector containing HLA-A*02:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:31 protein. This plasmid can be used for constructing HLA-A*02:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:32 Protein Expression Plasmid Vector	PHLAP9251210	Plasmid vector containing HLA-A*02:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:32 protein. This plasmid can be used for constructing HLA-A*02:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:33 Protein Expression Plasmid Vector	PHLAP9251211	Plasmid vector containing HLA-A*02:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:33 protein. This plasmid can be used for constructing HLA-A*02:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:34 Protein Expression Plasmid Vector	PHLAP9251212	Plasmid vector containing HLA-A*02:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:34 protein. This plasmid can be used for constructing HLA-A*02:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:35 Protein Expression Plasmid Vector	PHLAP9251213	Plasmid vector containing HLA-A*02:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:35 protein. This plasmid can be used for constructing HLA-A*02:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:36 Protein Expression Plasmid Vector	PHLAP9251214	Plasmid vector containing HLA-A*02:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:36 protein. This plasmid can be used for constructing HLA-A*02:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:37 Protein Expression Plasmid Vector	PHLAP9251215	Plasmid vector containing HLA-A*02:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:37 protein. This plasmid can be used for constructing HLA-A*02:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:38 Protein Expression Plasmid Vector	PHLAP9251216	Plasmid vector containing HLA-A*02:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:38 protein. This plasmid can be used for constructing HLA-A*02:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:39 Protein Expression Plasmid Vector	PHLAP9251217	Plasmid vector containing HLA-A*02:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:39 protein. This plasmid can be used for constructing HLA-A*02:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:40 Protein Expression Plasmid Vector	PHLAP9251218	Plasmid vector containing HLA-A*02:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:40 protein. This plasmid can be used for constructing HLA-A*02:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:41 Protein Expression Plasmid Vector	PHLAP9251219	Plasmid vector containing HLA-A*02:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:41 protein. This plasmid can be used for constructing HLA-A*02:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:42 Protein Expression Plasmid Vector	PHLAP9251220	Plasmid vector containing HLA-A*02:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:42 protein. This plasmid can be used for constructing HLA-A*02:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:43 Protein Expression Plasmid Vector	PHLAP9251221	Plasmid vector containing HLA-A*02:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:43 protein. This plasmid can be used for constructing HLA-A*02:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:44 Protein Expression Plasmid Vector	PHLAP9251222	Plasmid vector containing HLA-A*02:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:44 protein. This plasmid can be used for constructing HLA-A*02:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:45 Protein Expression Plasmid Vector	PHLAP9251223	Plasmid vector containing HLA-A*02:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:45 protein. This plasmid can be used for constructing HLA-A*02:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:46 Protein Expression Plasmid Vector	PHLAP9251224	Plasmid vector containing HLA-A*02:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:46 protein. This plasmid can be used for constructing HLA-A*02:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:47 Protein Expression Plasmid Vector	PHLAP9251225	Plasmid vector containing HLA-A*02:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:47 protein. This plasmid can be used for constructing HLA-A*02:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:48 Protein Expression Plasmid Vector	PHLAP9251226	Plasmid vector containing HLA-A*02:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:48 protein. This plasmid can be used for constructing HLA-A*02:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:49 Protein Expression Plasmid Vector	PHLAP9251227	Plasmid vector containing HLA-A*02:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:49 protein. This plasmid can be used for constructing HLA-A*02:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:50 Protein Expression Plasmid Vector	PHLAP9251228	Plasmid vector containing HLA-A*02:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:50 protein. This plasmid can be used for constructing HLA-A*02:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:51 Protein Expression Plasmid Vector	PHLAP9251229	Plasmid vector containing HLA-A*02:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:51 protein. This plasmid can be used for constructing HLA-A*02:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:52 Protein Expression Plasmid Vector	PHLAP9251230	Plasmid vector containing HLA-A*02:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:52 protein. This plasmid can be used for constructing HLA-A*02:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:53 Protein Expression Plasmid Vector	PHLAP9251231	Plasmid vector containing HLA-A*02:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:53 protein. This plasmid can be used for constructing HLA-A*02:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:54 Protein Expression Plasmid Vector	PHLAP9251232	Plasmid vector containing HLA-A*02:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:54 protein. This plasmid can be used for constructing HLA-A*02:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:55 Protein Expression Plasmid Vector	PHLAP9251233	Plasmid vector containing HLA-A*02:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:55 protein. This plasmid can be used for constructing HLA-A*02:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:56 Protein Expression Plasmid Vector	PHLAP9251234	Plasmid vector containing HLA-A*02:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:56 protein. This plasmid can be used for constructing HLA-A*02:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:57 Protein Expression Plasmid Vector	PHLAP9251235	Plasmid vector containing HLA-A*02:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:57 protein. This plasmid can be used for constructing HLA-A*02:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:58 Protein Expression Plasmid Vector	PHLAP9251236	Plasmid vector containing HLA-A*02:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:58 protein. This plasmid can be used for constructing HLA-A*02:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:59 Protein Expression Plasmid Vector	PHLAP9251237	Plasmid vector containing HLA-A*02:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:59 protein. This plasmid can be used for constructing HLA-A*02:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:60 Protein Expression Plasmid Vector	PHLAP9251238	Plasmid vector containing HLA-A*02:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:60 protein. This plasmid can be used for constructing HLA-A*02:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:61 Protein Expression Plasmid Vector	PHLAP9251239	Plasmid vector containing HLA-A*02:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:61 protein. This plasmid can be used for constructing HLA-A*02:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:62 Protein Expression Plasmid Vector	PHLAP9251240	Plasmid vector containing HLA-A*02:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:62 protein. This plasmid can be used for constructing HLA-A*02:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:63 Protein Expression Plasmid Vector	PHLAP9251241	Plasmid vector containing HLA-A*02:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:63 protein. This plasmid can be used for constructing HLA-A*02:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:64 Protein Expression Plasmid Vector	PHLAP9251242	Plasmid vector containing HLA-A*02:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:64 protein. This plasmid can be used for constructing HLA-A*02:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:65 Protein Expression Plasmid Vector	PHLAP9251243	Plasmid vector containing HLA-A*02:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:65 protein. This plasmid can be used for constructing HLA-A*02:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:66 Protein Expression Plasmid Vector	PHLAP9251244	Plasmid vector containing HLA-A*02:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:66 protein. This plasmid can be used for constructing HLA-A*02:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:67 Protein Expression Plasmid Vector	PHLAP9251245	Plasmid vector containing HLA-A*02:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:67 protein. This plasmid can be used for constructing HLA-A*02:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:68 Protein Expression Plasmid Vector	PHLAP9251246	Plasmid vector containing HLA-A*02:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:68 protein. This plasmid can be used for constructing HLA-A*02:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:69 Protein Expression Plasmid Vector	PHLAP9251247	Plasmid vector containing HLA-A*02:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:69 protein. This plasmid can be used for constructing HLA-A*02:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:70 Protein Expression Plasmid Vector	PHLAP9251248	Plasmid vector containing HLA-A*02:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:70 protein. This plasmid can be used for constructing HLA-A*02:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:71 Protein Expression Plasmid Vector	PHLAP9251249	Plasmid vector containing HLA-A*02:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:71 protein. This plasmid can be used for constructing HLA-A*02:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:72 Protein Expression Plasmid Vector	PHLAP9251250	Plasmid vector containing HLA-A*02:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:72 protein. This plasmid can be used for constructing HLA-A*02:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:73 Protein Expression Plasmid Vector	PHLAP9251251	Plasmid vector containing HLA-A*02:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:73 protein. This plasmid can be used for constructing HLA-A*02:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:74 Protein Expression Plasmid Vector	PHLAP9251252	Plasmid vector containing HLA-A*02:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:74 protein. This plasmid can be used for constructing HLA-A*02:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:75 Protein Expression Plasmid Vector	PHLAP9251253	Plasmid vector containing HLA-A*02:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:75 protein. This plasmid can be used for constructing HLA-A*02:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:76 Protein Expression Plasmid Vector	PHLAP9251254	Plasmid vector containing HLA-A*02:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:76 protein. This plasmid can be used for constructing HLA-A*02:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:77 Protein Expression Plasmid Vector	PHLAP9251255	Plasmid vector containing HLA-A*02:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:77 protein. This plasmid can be used for constructing HLA-A*02:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:78 Protein Expression Plasmid Vector	PHLAP9251256	Plasmid vector containing HLA-A*02:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:78 protein. This plasmid can be used for constructing HLA-A*02:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:79 Protein Expression Plasmid Vector	PHLAP9251257	Plasmid vector containing HLA-A*02:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:79 protein. This plasmid can be used for constructing HLA-A*02:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:80 Protein Expression Plasmid Vector	PHLAP9251258	Plasmid vector containing HLA-A*02:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:80 protein. This plasmid can be used for constructing HLA-A*02:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:81 Protein Expression Plasmid Vector	PHLAP9251259	Plasmid vector containing HLA-A*02:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:81 protein. This plasmid can be used for constructing HLA-A*02:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:82 Protein Expression Plasmid Vector	PHLAP9251260	Plasmid vector containing HLA-A*02:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:82 protein. This plasmid can be used for constructing HLA-A*02:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:83 Protein Expression Plasmid Vector	PHLAP9251261	Plasmid vector containing HLA-A*02:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:83 protein. This plasmid can be used for constructing HLA-A*02:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:84 Protein Expression Plasmid Vector	PHLAP9251262	Plasmid vector containing HLA-A*02:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:84 protein. This plasmid can be used for constructing HLA-A*02:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:85 Protein Expression Plasmid Vector	PHLAP9251263	Plasmid vector containing HLA-A*02:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:85 protein. This plasmid can be used for constructing HLA-A*02:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:86 Protein Expression Plasmid Vector	PHLAP9251264	Plasmid vector containing HLA-A*02:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:86 protein. This plasmid can be used for constructing HLA-A*02:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:87 Protein Expression Plasmid Vector	PHLAP9251265	Plasmid vector containing HLA-A*02:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:87 protein. This plasmid can be used for constructing HLA-A*02:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:88 Protein Expression Plasmid Vector	PHLAP9251266	Plasmid vector containing HLA-A*02:01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:88 protein. This plasmid can be used for constructing HLA-A*02:01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:89 Protein Expression Plasmid Vector	PHLAP9251267	Plasmid vector containing HLA-A*02:01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:89 protein. This plasmid can be used for constructing HLA-A*02:01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:90 Protein Expression Plasmid Vector	PHLAP9251268	Plasmid vector containing HLA-A*02:01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:90 protein. This plasmid can be used for constructing HLA-A*02:01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:91 Protein Expression Plasmid Vector	PHLAP9251269	Plasmid vector containing HLA-A*02:01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:91 protein. This plasmid can be used for constructing HLA-A*02:01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:92 Protein Expression Plasmid Vector	PHLAP9251270	Plasmid vector containing HLA-A*02:01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:92 protein. This plasmid can be used for constructing HLA-A*02:01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:93 Protein Expression Plasmid Vector	PHLAP9251271	Plasmid vector containing HLA-A*02:01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:93 protein. This plasmid can be used for constructing HLA-A*02:01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:01:94 Protein Expression Plasmid Vector	PHLAP9251272	Plasmid vector containing HLA-A*02:01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:94 protein. This plasmid can be used for constructing HLA-A*02:01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:95 Protein Expression Plasmid Vector	PHLAP9251273	Plasmid vector containing HLA-A*02:01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:95 protein. This plasmid can be used for constructing HLA-A*02:01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:96 Protein Expression Plasmid Vector	PHLAP9251274	Plasmid vector containing HLA-A*02:01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:96 protein. This plasmid can be used for constructing HLA-A*02:01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:97 Protein Expression Plasmid Vector	PHLAP9251275	Plasmid vector containing HLA-A*02:01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:97 protein. This plasmid can be used for constructing HLA-A*02:01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:98 Protein Expression Plasmid Vector	PHLAP9251276	Plasmid vector containing HLA-A*02:01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:98 protein. This plasmid can be used for constructing HLA-A*02:01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:01:99 Protein Expression Plasmid Vector	PHLAP9251277	Plasmid vector containing HLA-A*02:01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:01:99 protein. This plasmid can be used for constructing HLA-A*02:01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:01:01 Protein Expression Plasmid Vector	PHLAP9251278	Plasmid vector containing HLA-A*02:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:01:01 protein. This plasmid can be used for constructing HLA-A*02:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:01:02 Protein Expression Plasmid Vector	PHLAP9251279	Plasmid vector containing HLA-A*02:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:01:02 protein. This plasmid can be used for constructing HLA-A*02:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:02:01:03 Protein Expression Plasmid Vector	PHLAP9251280	Plasmid vector containing HLA-A*02:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:01:03 protein. This plasmid can be used for constructing HLA-A*02:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:01:04 Protein Expression Plasmid Vector	PHLAP9251281	Plasmid vector containing HLA-A*02:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:01:04 protein. This plasmid can be used for constructing HLA-A*02:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:01:05 Protein Expression Plasmid Vector	PHLAP9251282	Plasmid vector containing HLA-A*02:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:01:05 protein. This plasmid can be used for constructing HLA-A*02:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:01:06 Protein Expression Plasmid Vector	PHLAP9251283	Plasmid vector containing HLA-A*02:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:01:06 protein. This plasmid can be used for constructing HLA-A*02:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:01:07 Protein Expression Plasmid Vector	PHLAP9251284	Plasmid vector containing HLA-A*02:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:01:07 protein. This plasmid can be used for constructing HLA-A*02:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:01:08 Protein Expression Plasmid Vector	PHLAP9251285	Plasmid vector containing HLA-A*02:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:01:08 protein. This plasmid can be used for constructing HLA-A*02:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:01:09 Protein Expression Plasmid Vector	PHLAP9251286	Plasmid vector containing HLA-A*02:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:01:09 protein. This plasmid can be used for constructing HLA-A*02:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:02:02 Protein Expression Plasmid Vector	PHLAP9251287	Plasmid vector containing HLA-A*02:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:02 protein. This plasmid can be used for constructing HLA-A*02:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:03 Protein Expression Plasmid Vector	PHLAP9251288	Plasmid vector containing HLA-A*02:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:03 protein. This plasmid can be used for constructing HLA-A*02:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:04 Protein Expression Plasmid Vector	PHLAP9251289	Plasmid vector containing HLA-A*02:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:04 protein. This plasmid can be used for constructing HLA-A*02:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:05 Protein Expression Plasmid Vector	PHLAP9251290	Plasmid vector containing HLA-A*02:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:05 protein. This plasmid can be used for constructing HLA-A*02:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:06 Protein Expression Plasmid Vector	PHLAP9251291	Plasmid vector containing HLA-A*02:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:06 protein. This plasmid can be used for constructing HLA-A*02:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:07 Protein Expression Plasmid Vector	PHLAP9251292	Plasmid vector containing HLA-A*02:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:07 protein. This plasmid can be used for constructing HLA-A*02:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:08 Protein Expression Plasmid Vector	PHLAP9251293	Plasmid vector containing HLA-A*02:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:08 protein. This plasmid can be used for constructing HLA-A*02:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:02:09 Protein Expression Plasmid Vector	PHLAP9251294	Plasmid vector containing HLA-A*02:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:02:09 protein. This plasmid can be used for constructing HLA-A*02:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:03:01:01 Protein Expression Plasmid Vector	PHLAP9251295	Plasmid vector containing HLA-A*02:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:01:01 protein. This plasmid can be used for constructing HLA-A*02:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:01:02 Protein Expression Plasmid Vector	PHLAP9251296	Plasmid vector containing HLA-A*02:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:01:02 protein. This plasmid can be used for constructing HLA-A*02:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:01:03 Protein Expression Plasmid Vector	PHLAP9251297	Plasmid vector containing HLA-A*02:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:01:03 protein. This plasmid can be used for constructing HLA-A*02:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:01:04 Protein Expression Plasmid Vector	PHLAP9251298	Plasmid vector containing HLA-A*02:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:01:04 protein. This plasmid can be used for constructing HLA-A*02:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:01:05 Protein Expression Plasmid Vector	PHLAP9251299	Plasmid vector containing HLA-A*02:03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:01:05 protein. This plasmid can be used for constructing HLA-A*02:03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:01:06Q Protein Expression Plasmid Vector	PHLAP9251300	Plasmid vector containing HLA-A*02:03:01:06Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:01:06Q protein. This plasmid can be used for constructing HLA-A*02:03:01:06Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:01:06Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:02 Protein Expression Plasmid Vector	PHLAP9251301	Plasmid vector containing HLA-A*02:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:02 protein. This plasmid can be used for constructing HLA-A*02:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:03:03 Protein Expression Plasmid Vector	PHLAP9251302	Plasmid vector containing HLA-A*02:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:03 protein. This plasmid can be used for constructing HLA-A*02:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:04 Protein Expression Plasmid Vector	PHLAP9251303	Plasmid vector containing HLA-A*02:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:04 protein. This plasmid can be used for constructing HLA-A*02:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:05 Protein Expression Plasmid Vector	PHLAP9251304	Plasmid vector containing HLA-A*02:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:05 protein. This plasmid can be used for constructing HLA-A*02:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:06 Protein Expression Plasmid Vector	PHLAP9251305	Plasmid vector containing HLA-A*02:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:06 protein. This plasmid can be used for constructing HLA-A*02:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:07 Protein Expression Plasmid Vector	PHLAP9251306	Plasmid vector containing HLA-A*02:03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:07 protein. This plasmid can be used for constructing HLA-A*02:03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:08 Protein Expression Plasmid Vector	PHLAP9251307	Plasmid vector containing HLA-A*02:03:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:08 protein. This plasmid can be used for constructing HLA-A*02:03:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:09 Protein Expression Plasmid Vector	PHLAP9251308	Plasmid vector containing HLA-A*02:03:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:09 protein. This plasmid can be used for constructing HLA-A*02:03:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:10 Protein Expression Plasmid Vector	PHLAP9251309	Plasmid vector containing HLA-A*02:03:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:10 protein. This plasmid can be used for constructing HLA-A*02:03:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:03:11 Protein Expression Plasmid Vector	PHLAP9251310	Plasmid vector containing HLA-A*02:03:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:11 protein. This plasmid can be used for constructing HLA-A*02:03:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:12Q Protein Expression Plasmid Vector	PHLAP9251311	Plasmid vector containing HLA-A*02:03:12Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:12Q protein. This plasmid can be used for constructing HLA-A*02:03:12Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:12Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:13 Protein Expression Plasmid Vector	PHLAP9251312	Plasmid vector containing HLA-A*02:03:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:13 protein. This plasmid can be used for constructing HLA-A*02:03:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:14 Protein Expression Plasmid Vector	PHLAP9251313	Plasmid vector containing HLA-A*02:03:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:14 protein. This plasmid can be used for constructing HLA-A*02:03:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:03:15 Protein Expression Plasmid Vector	PHLAP9251314	Plasmid vector containing HLA-A*02:03:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:03:15 protein. This plasmid can be used for constructing HLA-A*02:03:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:03:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:04:01 Protein Expression Plasmid Vector	PHLAP9251315	Plasmid vector containing HLA-A*02:04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:04:01 protein. This plasmid can be used for constructing HLA-A*02:04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:04:02 Protein Expression Plasmid Vector	PHLAP9251316	Plasmid vector containing HLA-A*02:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:04:02 protein. This plasmid can be used for constructing HLA-A*02:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:01 Protein Expression Plasmid Vector	PHLAP9251317	Plasmid vector containing HLA-A*02:05:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:01 protein. This plasmid can be used for constructing HLA-A*02:05:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:05:01:02 Protein Expression Plasmid Vector	PHLAP9251318	Plasmid vector containing HLA-A*02:05:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:02 protein. This plasmid can be used for constructing HLA-A*02:05:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:03 Protein Expression Plasmid Vector	PHLAP9251319	Plasmid vector containing HLA-A*02:05:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:03 protein. This plasmid can be used for constructing HLA-A*02:05:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:04 Protein Expression Plasmid Vector	PHLAP9251320	Plasmid vector containing HLA-A*02:05:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:04 protein. This plasmid can be used for constructing HLA-A*02:05:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:05 Protein Expression Plasmid Vector	PHLAP9251321	Plasmid vector containing HLA-A*02:05:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:05 protein. This plasmid can be used for constructing HLA-A*02:05:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:06 Protein Expression Plasmid Vector	PHLAP9251322	Plasmid vector containing HLA-A*02:05:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:06 protein. This plasmid can be used for constructing HLA-A*02:05:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:07 Protein Expression Plasmid Vector	PHLAP9251323	Plasmid vector containing HLA-A*02:05:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:07 protein. This plasmid can be used for constructing HLA-A*02:05:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:08 Protein Expression Plasmid Vector	PHLAP9251324	Plasmid vector containing HLA-A*02:05:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:08 protein. This plasmid can be used for constructing HLA-A*02:05:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:05:01:09 Protein Expression Plasmid Vector	PHLAP9251325	Plasmid vector containing HLA-A*02:05:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:09 protein. This plasmid can be used for constructing HLA-A*02:05:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:10 Protein Expression Plasmid Vector	PHLAP9251326	Plasmid vector containing HLA-A*02:05:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:10 protein. This plasmid can be used for constructing HLA-A*02:05:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:11 Protein Expression Plasmid Vector	PHLAP9251327	Plasmid vector containing HLA-A*02:05:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:11 protein. This plasmid can be used for constructing HLA-A*02:05:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:12 Protein Expression Plasmid Vector	PHLAP9251328	Plasmid vector containing HLA-A*02:05:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:12 protein. This plasmid can be used for constructing HLA-A*02:05:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:13 Protein Expression Plasmid Vector	PHLAP9251329	Plasmid vector containing HLA-A*02:05:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:13 protein. This plasmid can be used for constructing HLA-A*02:05:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:14 Protein Expression Plasmid Vector	PHLAP9251330	Plasmid vector containing HLA-A*02:05:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:14 protein. This plasmid can be used for constructing HLA-A*02:05:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:15 Protein Expression Plasmid Vector	PHLAP9251331	Plasmid vector containing HLA-A*02:05:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:15 protein. This plasmid can be used for constructing HLA-A*02:05:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:05:01:16 Protein Expression Plasmid Vector	PHLAP9251332	Plasmid vector containing HLA-A*02:05:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:16 protein. This plasmid can be used for constructing HLA-A*02:05:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:17 Protein Expression Plasmid Vector	PHLAP9251333	Plasmid vector containing HLA-A*02:05:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:17 protein. This plasmid can be used for constructing HLA-A*02:05:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:18 Protein Expression Plasmid Vector	PHLAP9251334	Plasmid vector containing HLA-A*02:05:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:18 protein. This plasmid can be used for constructing HLA-A*02:05:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:19 Protein Expression Plasmid Vector	PHLAP9251335	Plasmid vector containing HLA-A*02:05:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:19 protein. This plasmid can be used for constructing HLA-A*02:05:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:20 Protein Expression Plasmid Vector	PHLAP9251336	Plasmid vector containing HLA-A*02:05:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:20 protein. This plasmid can be used for constructing HLA-A*02:05:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:21 Protein Expression Plasmid Vector	PHLAP9251337	Plasmid vector containing HLA-A*02:05:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:21 protein. This plasmid can be used for constructing HLA-A*02:05:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:22 Protein Expression Plasmid Vector	PHLAP9251338	Plasmid vector containing HLA-A*02:05:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:22 protein. This plasmid can be used for constructing HLA-A*02:05:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:05:01:23 Protein Expression Plasmid Vector	PHLAP9251339	Plasmid vector containing HLA-A*02:05:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:23 protein. This plasmid can be used for constructing HLA-A*02:05:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:01:24 Protein Expression Plasmid Vector	PHLAP9251340	Plasmid vector containing HLA-A*02:05:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:01:24 protein. This plasmid can be used for constructing HLA-A*02:05:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:02 Protein Expression Plasmid Vector	PHLAP9251341	Plasmid vector containing HLA-A*02:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:02 protein. This plasmid can be used for constructing HLA-A*02:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:03 Protein Expression Plasmid Vector	PHLAP9251342	Plasmid vector containing HLA-A*02:05:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:03 protein. This plasmid can be used for constructing HLA-A*02:05:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:04 Protein Expression Plasmid Vector	PHLAP9251343	Plasmid vector containing HLA-A*02:05:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:04 protein. This plasmid can be used for constructing HLA-A*02:05:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:05 Protein Expression Plasmid Vector	PHLAP9251344	Plasmid vector containing HLA-A*02:05:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:05 protein. This plasmid can be used for constructing HLA-A*02:05:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:06 Protein Expression Plasmid Vector	PHLAP9251345	Plasmid vector containing HLA-A*02:05:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:06 protein. This plasmid can be used for constructing HLA-A*02:05:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:07 Protein Expression Plasmid Vector	PHLAP9251346	Plasmid vector containing HLA-A*02:05:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:07 protein. This plasmid can be used for constructing HLA-A*02:05:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:05:08 Protein Expression Plasmid Vector	PHLAP9251347	Plasmid vector containing HLA-A*02:05:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:08 protein. This plasmid can be used for constructing HLA-A*02:05:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:09 Protein Expression Plasmid Vector	PHLAP9251348	Plasmid vector containing HLA-A*02:05:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:09 protein. This plasmid can be used for constructing HLA-A*02:05:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:10 Protein Expression Plasmid Vector	PHLAP9251349	Plasmid vector containing HLA-A*02:05:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:10 protein. This plasmid can be used for constructing HLA-A*02:05:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:11 Protein Expression Plasmid Vector	PHLAP9251350	Plasmid vector containing HLA-A*02:05:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:11 protein. This plasmid can be used for constructing HLA-A*02:05:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:12 Protein Expression Plasmid Vector	PHLAP9251351	Plasmid vector containing HLA-A*02:05:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:12 protein. This plasmid can be used for constructing HLA-A*02:05:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:13 Protein Expression Plasmid Vector	PHLAP9251352	Plasmid vector containing HLA-A*02:05:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:13 protein. This plasmid can be used for constructing HLA-A*02:05:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:14 Protein Expression Plasmid Vector	PHLAP9251353	Plasmid vector containing HLA-A*02:05:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:14 protein. This plasmid can be used for constructing HLA-A*02:05:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:05:15 Protein Expression Plasmid Vector	PHLAP9251354	Plasmid vector containing HLA-A*02:05:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:05:15 protein. This plasmid can be used for constructing HLA-A*02:05:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:05:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:06:01:01 Protein Expression Plasmid Vector	PHLAP9251355	Plasmid vector containing HLA-A*02:06:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:01 protein. This plasmid can be used for constructing HLA-A*02:06:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:02 Protein Expression Plasmid Vector	PHLAP9251356	Plasmid vector containing HLA-A*02:06:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:02 protein. This plasmid can be used for constructing HLA-A*02:06:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:03 Protein Expression Plasmid Vector	PHLAP9251357	Plasmid vector containing HLA-A*02:06:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:03 protein. This plasmid can be used for constructing HLA-A*02:06:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:04 Protein Expression Plasmid Vector	PHLAP9251358	Plasmid vector containing HLA-A*02:06:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:04 protein. This plasmid can be used for constructing HLA-A*02:06:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:05 Protein Expression Plasmid Vector	PHLAP9251359	Plasmid vector containing HLA-A*02:06:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:05 protein. This plasmid can be used for constructing HLA-A*02:06:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:06 Protein Expression Plasmid Vector	PHLAP9251360	Plasmid vector containing HLA-A*02:06:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:06 protein. This plasmid can be used for constructing HLA-A*02:06:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:07 Protein Expression Plasmid Vector	PHLAP9251361	Plasmid vector containing HLA-A*02:06:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:07 protein. This plasmid can be used for constructing HLA-A*02:06:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:06:01:08 Protein Expression Plasmid Vector	PHLAP9251362	Plasmid vector containing HLA-A*02:06:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:08 protein. This plasmid can be used for constructing HLA-A*02:06:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:09 Protein Expression Plasmid Vector	PHLAP9251363	Plasmid vector containing HLA-A*02:06:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:09 protein. This plasmid can be used for constructing HLA-A*02:06:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:10 Protein Expression Plasmid Vector	PHLAP9251364	Plasmid vector containing HLA-A*02:06:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:10 protein. This plasmid can be used for constructing HLA-A*02:06:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:11 Protein Expression Plasmid Vector	PHLAP9251365	Plasmid vector containing HLA-A*02:06:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:11 protein. This plasmid can be used for constructing HLA-A*02:06:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:12 Protein Expression Plasmid Vector	PHLAP9251366	Plasmid vector containing HLA-A*02:06:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:12 protein. This plasmid can be used for constructing HLA-A*02:06:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:13 Protein Expression Plasmid Vector	PHLAP9251367	Plasmid vector containing HLA-A*02:06:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:13 protein. This plasmid can be used for constructing HLA-A*02:06:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:14 Protein Expression Plasmid Vector	PHLAP9251368	Plasmid vector containing HLA-A*02:06:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:14 protein. This plasmid can be used for constructing HLA-A*02:06:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:06:01:15 Protein Expression Plasmid Vector	PHLAP9251369	Plasmid vector containing HLA-A*02:06:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:15 protein. This plasmid can be used for constructing HLA-A*02:06:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:16 Protein Expression Plasmid Vector	PHLAP9251370	Plasmid vector containing HLA-A*02:06:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:16 protein. This plasmid can be used for constructing HLA-A*02:06:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:01:17 Protein Expression Plasmid Vector	PHLAP9251371	Plasmid vector containing HLA-A*02:06:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:01:17 protein. This plasmid can be used for constructing HLA-A*02:06:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:02 Protein Expression Plasmid Vector	PHLAP9251372	Plasmid vector containing HLA-A*02:06:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:02 protein. This plasmid can be used for constructing HLA-A*02:06:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:03 Protein Expression Plasmid Vector	PHLAP9251373	Plasmid vector containing HLA-A*02:06:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:03 protein. This plasmid can be used for constructing HLA-A*02:06:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:04 Protein Expression Plasmid Vector	PHLAP9251374	Plasmid vector containing HLA-A*02:06:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:04 protein. This plasmid can be used for constructing HLA-A*02:06:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:05 Protein Expression Plasmid Vector	PHLAP9251375	Plasmid vector containing HLA-A*02:06:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:05 protein. This plasmid can be used for constructing HLA-A*02:06:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:06:06 Protein Expression Plasmid Vector	PHLAP9251376	Plasmid vector containing HLA-A*02:06:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:06 protein. This plasmid can be used for constructing HLA-A*02:06:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:07 Protein Expression Plasmid Vector	PHLAP9251377	Plasmid vector containing HLA-A*02:06:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:07 protein. This plasmid can be used for constructing HLA-A*02:06:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:08 Protein Expression Plasmid Vector	PHLAP9251378	Plasmid vector containing HLA-A*02:06:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:08 protein. This plasmid can be used for constructing HLA-A*02:06:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:09 Protein Expression Plasmid Vector	PHLAP9251379	Plasmid vector containing HLA-A*02:06:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:09 protein. This plasmid can be used for constructing HLA-A*02:06:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:10 Protein Expression Plasmid Vector	PHLAP9251380	Plasmid vector containing HLA-A*02:06:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:10 protein. This plasmid can be used for constructing HLA-A*02:06:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:11 Protein Expression Plasmid Vector	PHLAP9251381	Plasmid vector containing HLA-A*02:06:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:11 protein. This plasmid can be used for constructing HLA-A*02:06:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:12 Protein Expression Plasmid Vector	PHLAP9251382	Plasmid vector containing HLA-A*02:06:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:12 protein. This plasmid can be used for constructing HLA-A*02:06:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:13 Protein Expression Plasmid Vector	PHLAP9251383	Plasmid vector containing HLA-A*02:06:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:13 protein. This plasmid can be used for constructing HLA-A*02:06:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:06:14 Protein Expression Plasmid Vector	PHLAP9251384	Plasmid vector containing HLA-A*02:06:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:14 protein. This plasmid can be used for constructing HLA-A*02:06:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:15 Protein Expression Plasmid Vector	PHLAP9251385	Plasmid vector containing HLA-A*02:06:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:15 protein. This plasmid can be used for constructing HLA-A*02:06:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:16 Protein Expression Plasmid Vector	PHLAP9251386	Plasmid vector containing HLA-A*02:06:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:16 protein. This plasmid can be used for constructing HLA-A*02:06:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:17 Protein Expression Plasmid Vector	PHLAP9251387	Plasmid vector containing HLA-A*02:06:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:17 protein. This plasmid can be used for constructing HLA-A*02:06:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:18 Protein Expression Plasmid Vector	PHLAP9251388	Plasmid vector containing HLA-A*02:06:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:18 protein. This plasmid can be used for constructing HLA-A*02:06:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:19 Protein Expression Plasmid Vector	PHLAP9251389	Plasmid vector containing HLA-A*02:06:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:19 protein. This plasmid can be used for constructing HLA-A*02:06:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:20 Protein Expression Plasmid Vector	PHLAP9251390	Plasmid vector containing HLA-A*02:06:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:20 protein. This plasmid can be used for constructing HLA-A*02:06:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:21 Protein Expression Plasmid Vector	PHLAP9251391	Plasmid vector containing HLA-A*02:06:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:21 protein. This plasmid can be used for constructing HLA-A*02:06:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:06:22 Protein Expression Plasmid Vector	PHLAP9251392	Plasmid vector containing HLA-A*02:06:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:22 protein. This plasmid can be used for constructing HLA-A*02:06:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:23 Protein Expression Plasmid Vector	PHLAP9251393	Plasmid vector containing HLA-A*02:06:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:23 protein. This plasmid can be used for constructing HLA-A*02:06:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:24 Protein Expression Plasmid Vector	PHLAP9251394	Plasmid vector containing HLA-A*02:06:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:24 protein. This plasmid can be used for constructing HLA-A*02:06:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:25 Protein Expression Plasmid Vector	PHLAP9251395	Plasmid vector containing HLA-A*02:06:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:25 protein. This plasmid can be used for constructing HLA-A*02:06:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:26 Protein Expression Plasmid Vector	PHLAP9251396	Plasmid vector containing HLA-A*02:06:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:26 protein. This plasmid can be used for constructing HLA-A*02:06:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:27 Protein Expression Plasmid Vector	PHLAP9251397	Plasmid vector containing HLA-A*02:06:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:27 protein. This plasmid can be used for constructing HLA-A*02:06:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:28 Protein Expression Plasmid Vector	PHLAP9251398	Plasmid vector containing HLA-A*02:06:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:28 protein. This plasmid can be used for constructing HLA-A*02:06:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:29 Protein Expression Plasmid Vector	PHLAP9251399	Plasmid vector containing HLA-A*02:06:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:29 protein. This plasmid can be used for constructing HLA-A*02:06:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:06:30 Protein Expression Plasmid Vector	PHLAP9251400	Plasmid vector containing HLA-A*02:06:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:30 protein. This plasmid can be used for constructing HLA-A*02:06:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:31 Protein Expression Plasmid Vector	PHLAP9251401	Plasmid vector containing HLA-A*02:06:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:31 protein. This plasmid can be used for constructing HLA-A*02:06:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:32 Protein Expression Plasmid Vector	PHLAP9251402	Plasmid vector containing HLA-A*02:06:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:32 protein. This plasmid can be used for constructing HLA-A*02:06:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:33 Protein Expression Plasmid Vector	PHLAP9251403	Plasmid vector containing HLA-A*02:06:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:33 protein. This plasmid can be used for constructing HLA-A*02:06:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:06:34 Protein Expression Plasmid Vector	PHLAP9251404	Plasmid vector containing HLA-A*02:06:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:06:34 protein. This plasmid can be used for constructing HLA-A*02:06:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:06:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:01:01 Protein Expression Plasmid Vector	PHLAP9251405	Plasmid vector containing HLA-A*02:07:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:01:01 protein. This plasmid can be used for constructing HLA-A*02:07:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:01:02 Protein Expression Plasmid Vector	PHLAP9251406	Plasmid vector containing HLA-A*02:07:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:01:02 protein. This plasmid can be used for constructing HLA-A*02:07:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:07:01:03 Protein Expression Plasmid Vector	PHLAP9251407	Plasmid vector containing HLA-A*02:07:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:01:03 protein. This plasmid can be used for constructing HLA-A*02:07:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:01:04 Protein Expression Plasmid Vector	PHLAP9251408	Plasmid vector containing HLA-A*02:07:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:01:04 protein. This plasmid can be used for constructing HLA-A*02:07:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:01:05 Protein Expression Plasmid Vector	PHLAP9251409	Plasmid vector containing HLA-A*02:07:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:01:05 protein. This plasmid can be used for constructing HLA-A*02:07:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:01:06 Protein Expression Plasmid Vector	PHLAP9251410	Plasmid vector containing HLA-A*02:07:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:01:06 protein. This plasmid can be used for constructing HLA-A*02:07:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:01:07 Protein Expression Plasmid Vector	PHLAP9251411	Plasmid vector containing HLA-A*02:07:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:01:07 protein. This plasmid can be used for constructing HLA-A*02:07:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:02 Protein Expression Plasmid Vector	PHLAP9251412	Plasmid vector containing HLA-A*02:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:02 protein. This plasmid can be used for constructing HLA-A*02:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:03 Protein Expression Plasmid Vector	PHLAP9251413	Plasmid vector containing HLA-A*02:07:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:03 protein. This plasmid can be used for constructing HLA-A*02:07:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:07:04 Protein Expression Plasmid Vector	PHLAP9251414	Plasmid vector containing HLA-A*02:07:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:04 protein. This plasmid can be used for constructing HLA-A*02:07:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:05 Protein Expression Plasmid Vector	PHLAP9251415	Plasmid vector containing HLA-A*02:07:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:05 protein. This plasmid can be used for constructing HLA-A*02:07:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:06 Protein Expression Plasmid Vector	PHLAP9251416	Plasmid vector containing HLA-A*02:07:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:06 protein. This plasmid can be used for constructing HLA-A*02:07:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:07 Protein Expression Plasmid Vector	PHLAP9251417	Plasmid vector containing HLA-A*02:07:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:07 protein. This plasmid can be used for constructing HLA-A*02:07:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:08 Protein Expression Plasmid Vector	PHLAP9251418	Plasmid vector containing HLA-A*02:07:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:08 protein. This plasmid can be used for constructing HLA-A*02:07:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:09 Protein Expression Plasmid Vector	PHLAP9251419	Plasmid vector containing HLA-A*02:07:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:09 protein. This plasmid can be used for constructing HLA-A*02:07:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:10 Protein Expression Plasmid Vector	PHLAP9251420	Plasmid vector containing HLA-A*02:07:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:10 protein. This plasmid can be used for constructing HLA-A*02:07:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:11 Protein Expression Plasmid Vector	PHLAP9251421	Plasmid vector containing HLA-A*02:07:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:11 protein. This plasmid can be used for constructing HLA-A*02:07:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:07:12 Protein Expression Plasmid Vector	PHLAP9251422	Plasmid vector containing HLA-A*02:07:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:12 protein. This plasmid can be used for constructing HLA-A*02:07:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:13 Protein Expression Plasmid Vector	PHLAP9251423	Plasmid vector containing HLA-A*02:07:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:13 protein. This plasmid can be used for constructing HLA-A*02:07:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:14 Protein Expression Plasmid Vector	PHLAP9251424	Plasmid vector containing HLA-A*02:07:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:14 protein. This plasmid can be used for constructing HLA-A*02:07:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:15 Protein Expression Plasmid Vector	PHLAP9251425	Plasmid vector containing HLA-A*02:07:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:15 protein. This plasmid can be used for constructing HLA-A*02:07:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:16 Protein Expression Plasmid Vector	PHLAP9251426	Plasmid vector containing HLA-A*02:07:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:16 protein. This plasmid can be used for constructing HLA-A*02:07:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:17 Protein Expression Plasmid Vector	PHLAP9251427	Plasmid vector containing HLA-A*02:07:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:17 protein. This plasmid can be used for constructing HLA-A*02:07:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:18 Protein Expression Plasmid Vector	PHLAP9251428	Plasmid vector containing HLA-A*02:07:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:18 protein. This plasmid can be used for constructing HLA-A*02:07:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:19 Protein Expression Plasmid Vector	PHLAP9251429	Plasmid vector containing HLA-A*02:07:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:19 protein. This plasmid can be used for constructing HLA-A*02:07:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:07:20 Protein Expression Plasmid Vector	PHLAP9251430	Plasmid vector containing HLA-A*02:07:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:20 protein. This plasmid can be used for constructing HLA-A*02:07:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:21 Protein Expression Plasmid Vector	PHLAP9251431	Plasmid vector containing HLA-A*02:07:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:21 protein. This plasmid can be used for constructing HLA-A*02:07:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:22 Protein Expression Plasmid Vector	PHLAP9251432	Plasmid vector containing HLA-A*02:07:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:22 protein. This plasmid can be used for constructing HLA-A*02:07:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:23 Protein Expression Plasmid Vector	PHLAP9251433	Plasmid vector containing HLA-A*02:07:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:23 protein. This plasmid can be used for constructing HLA-A*02:07:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:07:24 Protein Expression Plasmid Vector	PHLAP9251434	Plasmid vector containing HLA-A*02:07:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:07:24 protein. This plasmid can be used for constructing HLA-A*02:07:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:07:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:08:01 Protein Expression Plasmid Vector	PHLAP9251435	Plasmid vector containing HLA-A*02:08:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:08:01 protein. This plasmid can be used for constructing HLA-A*02:08:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:08:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:08:02 Protein Expression Plasmid Vector	PHLAP9251436	Plasmid vector containing HLA-A*02:08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:08:02 protein. This plasmid can be used for constructing HLA-A*02:08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:09:01:01 Protein Expression Plasmid Vector	PHLAP9251437	Plasmid vector containing HLA-A*02:09:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:09:01:01 protein. This plasmid can be used for constructing HLA-A*02:09:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:09:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:09:01:02 Protein Expression Plasmid Vector	PHLAP9251438	Plasmid vector containing HLA-A*02:09:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:09:01:02 protein. This plasmid can be used for constructing HLA-A*02:09:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:09:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:09:01:03 Protein Expression Plasmid Vector	PHLAP9251439	Plasmid vector containing HLA-A*02:09:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:09:01:03 protein. This plasmid can be used for constructing HLA-A*02:09:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:09:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:09:01:04 Protein Expression Plasmid Vector	PHLAP9251440	Plasmid vector containing HLA-A*02:09:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:09:01:04 protein. This plasmid can be used for constructing HLA-A*02:09:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:09:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:10 Protein Expression Plasmid Vector	PHLAP9251441	Plasmid vector containing HLA-A*02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:10 protein. This plasmid can be used for constructing HLA-A*02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:100 Protein Expression Plasmid Vector	PHLAP9251442	Plasmid vector containing HLA-A*02:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:100 protein. This plasmid can be used for constructing HLA-A*02:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1000 Protein Expression Plasmid Vector	PHLAP9251443	Plasmid vector containing HLA-A*02:1000 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1000 protein. This plasmid can be used for constructing HLA-A*02:1000 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1000 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1001 Protein Expression Plasmid Vector	PHLAP9251444	Plasmid vector containing HLA-A*02:1001 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1001 protein. This plasmid can be used for constructing HLA-A*02:1001 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1001 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1002 Protein Expression Plasmid Vector	PHLAP9251445	Plasmid vector containing HLA-A*02:1002 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1002 protein. This plasmid can be used for constructing HLA-A*02:1002 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1002 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1003 Protein Expression Plasmid Vector	PHLAP9251446	Plasmid vector containing HLA-A*02:1003 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1003 protein. This plasmid can be used for constructing HLA-A*02:1003 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1003 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1004 Protein Expression Plasmid Vector	PHLAP9251447	Plasmid vector containing HLA-A*02:1004 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1004 protein. This plasmid can be used for constructing HLA-A*02:1004 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1004 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1005 Protein Expression Plasmid Vector	PHLAP9251448	Plasmid vector containing HLA-A*02:1005 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1005 protein. This plasmid can be used for constructing HLA-A*02:1005 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1005 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1006N Protein Expression Plasmid Vector	PHLAP9251449	Plasmid vector containing HLA-A*02:1006N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1006N protein. This plasmid can be used for constructing HLA-A*02:1006N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1006N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1007Q Protein Expression Plasmid Vector	PHLAP9251450	Plasmid vector containing HLA-A*02:1007Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1007Q protein. This plasmid can be used for constructing HLA-A*02:1007Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1007Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1008 Protein Expression Plasmid Vector	PHLAP9251451	Plasmid vector containing HLA-A*02:1008 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1008 protein. This plasmid can be used for constructing HLA-A*02:1008 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1008 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1009 Protein Expression Plasmid Vector	PHLAP9251452	Plasmid vector containing HLA-A*02:1009 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1009 protein. This plasmid can be used for constructing HLA-A*02:1009 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1009 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:101:01 Protein Expression Plasmid Vector	PHLAP9251453	Plasmid vector containing HLA-A*02:101:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:101:01 protein. This plasmid can be used for constructing HLA-A*02:101:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:101:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:101:02 Protein Expression Plasmid Vector	PHLAP9251454	Plasmid vector containing HLA-A*02:101:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:101:02 protein. This plasmid can be used for constructing HLA-A*02:101:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:101:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1010 Protein Expression Plasmid Vector	PHLAP9251455	Plasmid vector containing HLA-A*02:1010 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1010 protein. This plasmid can be used for constructing HLA-A*02:1010 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1010 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1011Q Protein Expression Plasmid Vector	PHLAP9251456	Plasmid vector containing HLA-A*02:1011Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1011Q protein. This plasmid can be used for constructing HLA-A*02:1011Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1011Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1012 Protein Expression Plasmid Vector	PHLAP9251457	Plasmid vector containing HLA-A*02:1012 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1012 protein. This plasmid can be used for constructing HLA-A*02:1012 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1012 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1013 Protein Expression Plasmid Vector	PHLAP9251458	Plasmid vector containing HLA-A*02:1013 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1013 protein. This plasmid can be used for constructing HLA-A*02:1013 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1013 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1014 Protein Expression Plasmid Vector	PHLAP9251459	Plasmid vector containing HLA-A*02:1014 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1014 protein. This plasmid can be used for constructing HLA-A*02:1014 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1014 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1015 Protein Expression Plasmid Vector	PHLAP9251460	Plasmid vector containing HLA-A*02:1015 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1015 protein. This plasmid can be used for constructing HLA-A*02:1015 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1015 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1016N Protein Expression Plasmid Vector	PHLAP9251461	Plasmid vector containing HLA-A*02:1016N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1016N protein. This plasmid can be used for constructing HLA-A*02:1016N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1016N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1017 Protein Expression Plasmid Vector	PHLAP9251462	Plasmid vector containing HLA-A*02:1017 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1017 protein. This plasmid can be used for constructing HLA-A*02:1017 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1017 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1018 Protein Expression Plasmid Vector	PHLAP9251463	Plasmid vector containing HLA-A*02:1018 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1018 protein. This plasmid can be used for constructing HLA-A*02:1018 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1018 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1019 Protein Expression Plasmid Vector	PHLAP9251464	Plasmid vector containing HLA-A*02:1019 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1019 protein. This plasmid can be used for constructing HLA-A*02:1019 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1019 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:102 Protein Expression Plasmid Vector	PHLAP9251465	Plasmid vector containing HLA-A*02:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:102 protein. This plasmid can be used for constructing HLA-A*02:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1020 Protein Expression Plasmid Vector	PHLAP9251466	Plasmid vector containing HLA-A*02:1020 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1020 protein. This plasmid can be used for constructing HLA-A*02:1020 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1020 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1021 Protein Expression Plasmid Vector	PHLAP9251467	Plasmid vector containing HLA-A*02:1021 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1021 protein. This plasmid can be used for constructing HLA-A*02:1021 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1021 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1022 Protein Expression Plasmid Vector	PHLAP9251468	Plasmid vector containing HLA-A*02:1022 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1022 protein. This plasmid can be used for constructing HLA-A*02:1022 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1022 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1023 Protein Expression Plasmid Vector	PHLAP9251469	Plasmid vector containing HLA-A*02:1023 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1023 protein. This plasmid can be used for constructing HLA-A*02:1023 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1023 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1024 Protein Expression Plasmid Vector	PHLAP9251470	Plasmid vector containing HLA-A*02:1024 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1024 protein. This plasmid can be used for constructing HLA-A*02:1024 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1024 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1025 Protein Expression Plasmid Vector	PHLAP9251471	Plasmid vector containing HLA-A*02:1025 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1025 protein. This plasmid can be used for constructing HLA-A*02:1025 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1025 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1026:01 Protein Expression Plasmid Vector	PHLAP9251472	Plasmid vector containing HLA-A*02:1026:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1026:01 protein. This plasmid can be used for constructing HLA-A*02:1026:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1026:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1026:02 Protein Expression Plasmid Vector	PHLAP9251473	Plasmid vector containing HLA-A*02:1026:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1026:02 protein. This plasmid can be used for constructing HLA-A*02:1026:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1026:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1027 Protein Expression Plasmid Vector	PHLAP9251474	Plasmid vector containing HLA-A*02:1027 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1027 protein. This plasmid can be used for constructing HLA-A*02:1027 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1027 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1028 Protein Expression Plasmid Vector	PHLAP9251475	Plasmid vector containing HLA-A*02:1028 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1028 protein. This plasmid can be used for constructing HLA-A*02:1028 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1028 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1029 Protein Expression Plasmid Vector	PHLAP9251476	Plasmid vector containing HLA-A*02:1029 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1029 protein. This plasmid can be used for constructing HLA-A*02:1029 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1029 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:103 Protein Expression Plasmid Vector	PHLAP9251477	Plasmid vector containing HLA-A*02:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:103 protein. This plasmid can be used for constructing HLA-A*02:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1030 Protein Expression Plasmid Vector	PHLAP9251478	Plasmid vector containing HLA-A*02:1030 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1030 protein. This plasmid can be used for constructing HLA-A*02:1030 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1030 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1031N Protein Expression Plasmid Vector	PHLAP9251479	Plasmid vector containing HLA-A*02:1031N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1031N protein. This plasmid can be used for constructing HLA-A*02:1031N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1031N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1032 Protein Expression Plasmid Vector	PHLAP9251480	Plasmid vector containing HLA-A*02:1032 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1032 protein. This plasmid can be used for constructing HLA-A*02:1032 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1032 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1033 Protein Expression Plasmid Vector	PHLAP9251481	Plasmid vector containing HLA-A*02:1033 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1033 protein. This plasmid can be used for constructing HLA-A*02:1033 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1033 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1034 Protein Expression Plasmid Vector	PHLAP9251482	Plasmid vector containing HLA-A*02:1034 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1034 protein. This plasmid can be used for constructing HLA-A*02:1034 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1034 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1035 Protein Expression Plasmid Vector	PHLAP9251483	Plasmid vector containing HLA-A*02:1035 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1035 protein. This plasmid can be used for constructing HLA-A*02:1035 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1035 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1036 Protein Expression Plasmid Vector	PHLAP9251484	Plasmid vector containing HLA-A*02:1036 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1036 protein. This plasmid can be used for constructing HLA-A*02:1036 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1036 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1037 Protein Expression Plasmid Vector	PHLAP9251485	Plasmid vector containing HLA-A*02:1037 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1037 protein. This plasmid can be used for constructing HLA-A*02:1037 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1037 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1038 Protein Expression Plasmid Vector	PHLAP9251486	Plasmid vector containing HLA-A*02:1038 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1038 protein. This plasmid can be used for constructing HLA-A*02:1038 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1038 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1039 Protein Expression Plasmid Vector	PHLAP9251487	Plasmid vector containing HLA-A*02:1039 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1039 protein. This plasmid can be used for constructing HLA-A*02:1039 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1039 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:104 Protein Expression Plasmid Vector	PHLAP9251488	Plasmid vector containing HLA-A*02:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:104 protein. This plasmid can be used for constructing HLA-A*02:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1040:01 Protein Expression Plasmid Vector	PHLAP9251489	Plasmid vector containing HLA-A*02:1040:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1040:01 protein. This plasmid can be used for constructing HLA-A*02:1040:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1040:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1040:02 Protein Expression Plasmid Vector	PHLAP9251490	Plasmid vector containing HLA-A*02:1040:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1040:02 protein. This plasmid can be used for constructing HLA-A*02:1040:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1040:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1041Q Protein Expression Plasmid Vector	PHLAP9251491	Plasmid vector containing HLA-A*02:1041Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1041Q protein. This plasmid can be used for constructing HLA-A*02:1041Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1041Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1042 Protein Expression Plasmid Vector	PHLAP9251492	Plasmid vector containing HLA-A*02:1042 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1042 protein. This plasmid can be used for constructing HLA-A*02:1042 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1042 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1043 Protein Expression Plasmid Vector	PHLAP9251493	Plasmid vector containing HLA-A*02:1043 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1043 protein. This plasmid can be used for constructing HLA-A*02:1043 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1043 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1044 Protein Expression Plasmid Vector	PHLAP9251494	Plasmid vector containing HLA-A*02:1044 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1044 protein. This plasmid can be used for constructing HLA-A*02:1044 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1044 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1045Q Protein Expression Plasmid Vector	PHLAP9251495	Plasmid vector containing HLA-A*02:1045Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1045Q protein. This plasmid can be used for constructing HLA-A*02:1045Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1045Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1046 Protein Expression Plasmid Vector	PHLAP9251496	Plasmid vector containing HLA-A*02:1046 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1046 protein. This plasmid can be used for constructing HLA-A*02:1046 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1046 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1047 Protein Expression Plasmid Vector	PHLAP9251497	Plasmid vector containing HLA-A*02:1047 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1047 protein. This plasmid can be used for constructing HLA-A*02:1047 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1047 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1048 Protein Expression Plasmid Vector	PHLAP9251498	Plasmid vector containing HLA-A*02:1048 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1048 protein. This plasmid can be used for constructing HLA-A*02:1048 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1048 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1049 Protein Expression Plasmid Vector	PHLAP9251499	Plasmid vector containing HLA-A*02:1049 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1049 protein. This plasmid can be used for constructing HLA-A*02:1049 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1049 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:105 Protein Expression Plasmid Vector	PHLAP9251500	Plasmid vector containing HLA-A*02:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:105 protein. This plasmid can be used for constructing HLA-A*02:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1050 Protein Expression Plasmid Vector	PHLAP9251501	Plasmid vector containing HLA-A*02:1050 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1050 protein. This plasmid can be used for constructing HLA-A*02:1050 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1050 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1051 Protein Expression Plasmid Vector	PHLAP9251502	Plasmid vector containing HLA-A*02:1051 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1051 protein. This plasmid can be used for constructing HLA-A*02:1051 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1051 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1052Q Protein Expression Plasmid Vector	PHLAP9251503	Plasmid vector containing HLA-A*02:1052Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1052Q protein. This plasmid can be used for constructing HLA-A*02:1052Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1052Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1053N Protein Expression Plasmid Vector	PHLAP9251504	Plasmid vector containing HLA-A*02:1053N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1053N protein. This plasmid can be used for constructing HLA-A*02:1053N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1053N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1054 Protein Expression Plasmid Vector	PHLAP9251505	Plasmid vector containing HLA-A*02:1054 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1054 protein. This plasmid can be used for constructing HLA-A*02:1054 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1054 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1055N Protein Expression Plasmid Vector	PHLAP9251506	Plasmid vector containing HLA-A*02:1055N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1055N protein. This plasmid can be used for constructing HLA-A*02:1055N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1055N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1056 Protein Expression Plasmid Vector	PHLAP9251507	Plasmid vector containing HLA-A*02:1056 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1056 protein. This plasmid can be used for constructing HLA-A*02:1056 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1056 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1057 Protein Expression Plasmid Vector	PHLAP9251508	Plasmid vector containing HLA-A*02:1057 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1057 protein. This plasmid can be used for constructing HLA-A*02:1057 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1057 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1058 Protein Expression Plasmid Vector	PHLAP9251509	Plasmid vector containing HLA-A*02:1058 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1058 protein. This plasmid can be used for constructing HLA-A*02:1058 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1058 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1059N Protein Expression Plasmid Vector	PHLAP9251510	Plasmid vector containing HLA-A*02:1059N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1059N protein. This plasmid can be used for constructing HLA-A*02:1059N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1059N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:106 Protein Expression Plasmid Vector	PHLAP9251511	Plasmid vector containing HLA-A*02:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:106 protein. This plasmid can be used for constructing HLA-A*02:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1060 Protein Expression Plasmid Vector	PHLAP9251512	Plasmid vector containing HLA-A*02:1060 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1060 protein. This plasmid can be used for constructing HLA-A*02:1060 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1060 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1061N Protein Expression Plasmid Vector	PHLAP9251513	Plasmid vector containing HLA-A*02:1061N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1061N protein. This plasmid can be used for constructing HLA-A*02:1061N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1061N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1062N Protein Expression Plasmid Vector	PHLAP9251514	Plasmid vector containing HLA-A*02:1062N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1062N protein. This plasmid can be used for constructing HLA-A*02:1062N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1062N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1063N Protein Expression Plasmid Vector	PHLAP9251515	Plasmid vector containing HLA-A*02:1063N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1063N protein. This plasmid can be used for constructing HLA-A*02:1063N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1063N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1064Q Protein Expression Plasmid Vector	PHLAP9251516	Plasmid vector containing HLA-A*02:1064Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1064Q protein. This plasmid can be used for constructing HLA-A*02:1064Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1064Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1065 Protein Expression Plasmid Vector	PHLAP9251517	Plasmid vector containing HLA-A*02:1065 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1065 protein. This plasmid can be used for constructing HLA-A*02:1065 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1065 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1066 Protein Expression Plasmid Vector	PHLAP9251518	Plasmid vector containing HLA-A*02:1066 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1066 protein. This plasmid can be used for constructing HLA-A*02:1066 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1066 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1067 Protein Expression Plasmid Vector	PHLAP9251519	Plasmid vector containing HLA-A*02:1067 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1067 protein. This plasmid can be used for constructing HLA-A*02:1067 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1067 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1068Q Protein Expression Plasmid Vector	PHLAP9251520	Plasmid vector containing HLA-A*02:1068Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1068Q protein. This plasmid can be used for constructing HLA-A*02:1068Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1068Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1069 Protein Expression Plasmid Vector	PHLAP9251521	Plasmid vector containing HLA-A*02:1069 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1069 protein. This plasmid can be used for constructing HLA-A*02:1069 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1069 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:107 Protein Expression Plasmid Vector	PHLAP9251522	Plasmid vector containing HLA-A*02:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:107 protein. This plasmid can be used for constructing HLA-A*02:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1070 Protein Expression Plasmid Vector	PHLAP9251523	Plasmid vector containing HLA-A*02:1070 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1070 protein. This plasmid can be used for constructing HLA-A*02:1070 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1070 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1071 Protein Expression Plasmid Vector	PHLAP9251524	Plasmid vector containing HLA-A*02:1071 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1071 protein. This plasmid can be used for constructing HLA-A*02:1071 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1071 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1072 Protein Expression Plasmid Vector	PHLAP9251525	Plasmid vector containing HLA-A*02:1072 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1072 protein. This plasmid can be used for constructing HLA-A*02:1072 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1072 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1073 Protein Expression Plasmid Vector	PHLAP9251526	Plasmid vector containing HLA-A*02:1073 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1073 protein. This plasmid can be used for constructing HLA-A*02:1073 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1073 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1074 Protein Expression Plasmid Vector	PHLAP9251527	Plasmid vector containing HLA-A*02:1074 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1074 protein. This plasmid can be used for constructing HLA-A*02:1074 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1074 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1075 Protein Expression Plasmid Vector	PHLAP9251528	Plasmid vector containing HLA-A*02:1075 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1075 protein. This plasmid can be used for constructing HLA-A*02:1075 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1075 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1076 Protein Expression Plasmid Vector	PHLAP9251529	Plasmid vector containing HLA-A*02:1076 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1076 protein. This plasmid can be used for constructing HLA-A*02:1076 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1076 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1077 Protein Expression Plasmid Vector	PHLAP9251530	Plasmid vector containing HLA-A*02:1077 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1077 protein. This plasmid can be used for constructing HLA-A*02:1077 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1077 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1078N Protein Expression Plasmid Vector	PHLAP9251531	Plasmid vector containing HLA-A*02:1078N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1078N protein. This plasmid can be used for constructing HLA-A*02:1078N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1078N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1079 Protein Expression Plasmid Vector	PHLAP9251532	Plasmid vector containing HLA-A*02:1079 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1079 protein. This plasmid can be used for constructing HLA-A*02:1079 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1079 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:108 Protein Expression Plasmid Vector	PHLAP9251533	Plasmid vector containing HLA-A*02:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:108 protein. This plasmid can be used for constructing HLA-A*02:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1080 Protein Expression Plasmid Vector	PHLAP9251534	Plasmid vector containing HLA-A*02:1080 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1080 protein. This plasmid can be used for constructing HLA-A*02:1080 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1080 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1081 Protein Expression Plasmid Vector	PHLAP9251535	Plasmid vector containing HLA-A*02:1081 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1081 protein. This plasmid can be used for constructing HLA-A*02:1081 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1081 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1082 Protein Expression Plasmid Vector	PHLAP9251536	Plasmid vector containing HLA-A*02:1082 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1082 protein. This plasmid can be used for constructing HLA-A*02:1082 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1082 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1083 Protein Expression Plasmid Vector	PHLAP9251537	Plasmid vector containing HLA-A*02:1083 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1083 protein. This plasmid can be used for constructing HLA-A*02:1083 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1083 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1084 Protein Expression Plasmid Vector	PHLAP9251538	Plasmid vector containing HLA-A*02:1084 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1084 protein. This plasmid can be used for constructing HLA-A*02:1084 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1084 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1085N Protein Expression Plasmid Vector	PHLAP9251539	Plasmid vector containing HLA-A*02:1085N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1085N protein. This plasmid can be used for constructing HLA-A*02:1085N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1085N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1086 Protein Expression Plasmid Vector	PHLAP9251540	Plasmid vector containing HLA-A*02:1086 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1086 protein. This plasmid can be used for constructing HLA-A*02:1086 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1086 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1087 Protein Expression Plasmid Vector	PHLAP9251541	Plasmid vector containing HLA-A*02:1087 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1087 protein. This plasmid can be used for constructing HLA-A*02:1087 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1087 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1088 Protein Expression Plasmid Vector	PHLAP9251542	Plasmid vector containing HLA-A*02:1088 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1088 protein. This plasmid can be used for constructing HLA-A*02:1088 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1088 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1089 Protein Expression Plasmid Vector	PHLAP9251543	Plasmid vector containing HLA-A*02:1089 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1089 protein. This plasmid can be used for constructing HLA-A*02:1089 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1089 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:109 Protein Expression Plasmid Vector	PHLAP9251544	Plasmid vector containing HLA-A*02:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:109 protein. This plasmid can be used for constructing HLA-A*02:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1090 Protein Expression Plasmid Vector	PHLAP9251545	Plasmid vector containing HLA-A*02:1090 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1090 protein. This plasmid can be used for constructing HLA-A*02:1090 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1090 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1091 Protein Expression Plasmid Vector	PHLAP9251546	Plasmid vector containing HLA-A*02:1091 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1091 protein. This plasmid can be used for constructing HLA-A*02:1091 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1091 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1092 Protein Expression Plasmid Vector	PHLAP9251547	Plasmid vector containing HLA-A*02:1092 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1092 protein. This plasmid can be used for constructing HLA-A*02:1092 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1092 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1093 Protein Expression Plasmid Vector	PHLAP9251548	Plasmid vector containing HLA-A*02:1093 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1093 protein. This plasmid can be used for constructing HLA-A*02:1093 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1093 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1094 Protein Expression Plasmid Vector	PHLAP9251549	Plasmid vector containing HLA-A*02:1094 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1094 protein. This plasmid can be used for constructing HLA-A*02:1094 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1094 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1095 Protein Expression Plasmid Vector	PHLAP9251550	Plasmid vector containing HLA-A*02:1095 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1095 protein. This plasmid can be used for constructing HLA-A*02:1095 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1095 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1096 Protein Expression Plasmid Vector	PHLAP9251551	Plasmid vector containing HLA-A*02:1096 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1096 protein. This plasmid can be used for constructing HLA-A*02:1096 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1096 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1097 Protein Expression Plasmid Vector	PHLAP9251552	Plasmid vector containing HLA-A*02:1097 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1097 protein. This plasmid can be used for constructing HLA-A*02:1097 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1097 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1098 Protein Expression Plasmid Vector	PHLAP9251553	Plasmid vector containing HLA-A*02:1098 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1098 protein. This plasmid can be used for constructing HLA-A*02:1098 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1098 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1099 Protein Expression Plasmid Vector	PHLAP9251554	Plasmid vector containing HLA-A*02:1099 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1099 protein. This plasmid can be used for constructing HLA-A*02:1099 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1099 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:01:01 Protein Expression Plasmid Vector	PHLAP9251555	Plasmid vector containing HLA-A*02:11:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:01:01 protein. This plasmid can be used for constructing HLA-A*02:11:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:01:02 Protein Expression Plasmid Vector	PHLAP9251556	Plasmid vector containing HLA-A*02:11:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:01:02 protein. This plasmid can be used for constructing HLA-A*02:11:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:01:03 Protein Expression Plasmid Vector	PHLAP9251557	Plasmid vector containing HLA-A*02:11:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:01:03 protein. This plasmid can be used for constructing HLA-A*02:11:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:01:04 Protein Expression Plasmid Vector	PHLAP9251558	Plasmid vector containing HLA-A*02:11:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:01:04 protein. This plasmid can be used for constructing HLA-A*02:11:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:11:01:05 Protein Expression Plasmid Vector	PHLAP9251559	Plasmid vector containing HLA-A*02:11:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:01:05 protein. This plasmid can be used for constructing HLA-A*02:11:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:01:06 Protein Expression Plasmid Vector	PHLAP9251560	Plasmid vector containing HLA-A*02:11:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:01:06 protein. This plasmid can be used for constructing HLA-A*02:11:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:01:07 Protein Expression Plasmid Vector	PHLAP9251561	Plasmid vector containing HLA-A*02:11:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:01:07 protein. This plasmid can be used for constructing HLA-A*02:11:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:01:08 Protein Expression Plasmid Vector	PHLAP9251562	Plasmid vector containing HLA-A*02:11:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:01:08 protein. This plasmid can be used for constructing HLA-A*02:11:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:02 Protein Expression Plasmid Vector	PHLAP9251563	Plasmid vector containing HLA-A*02:11:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:02 protein. This plasmid can be used for constructing HLA-A*02:11:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:03 Protein Expression Plasmid Vector	PHLAP9251564	Plasmid vector containing HLA-A*02:11:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:03 protein. This plasmid can be used for constructing HLA-A*02:11:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:04 Protein Expression Plasmid Vector	PHLAP9251565	Plasmid vector containing HLA-A*02:11:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:04 protein. This plasmid can be used for constructing HLA-A*02:11:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:11:05 Protein Expression Plasmid Vector	PHLAP9251566	Plasmid vector containing HLA-A*02:11:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:05 protein. This plasmid can be used for constructing HLA-A*02:11:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:06 Protein Expression Plasmid Vector	PHLAP9251567	Plasmid vector containing HLA-A*02:11:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:06 protein. This plasmid can be used for constructing HLA-A*02:11:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:07 Protein Expression Plasmid Vector	PHLAP9251568	Plasmid vector containing HLA-A*02:11:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:07 protein. This plasmid can be used for constructing HLA-A*02:11:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:08 Protein Expression Plasmid Vector	PHLAP9251569	Plasmid vector containing HLA-A*02:11:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:08 protein. This plasmid can be used for constructing HLA-A*02:11:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:09 Protein Expression Plasmid Vector	PHLAP9251570	Plasmid vector containing HLA-A*02:11:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:09 protein. This plasmid can be used for constructing HLA-A*02:11:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:10 Protein Expression Plasmid Vector	PHLAP9251571	Plasmid vector containing HLA-A*02:11:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:10 protein. This plasmid can be used for constructing HLA-A*02:11:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:11 Protein Expression Plasmid Vector	PHLAP9251572	Plasmid vector containing HLA-A*02:11:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:11 protein. This plasmid can be used for constructing HLA-A*02:11:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:12 Protein Expression Plasmid Vector	PHLAP9251573	Plasmid vector containing HLA-A*02:11:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:12 protein. This plasmid can be used for constructing HLA-A*02:11:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:11:13 Protein Expression Plasmid Vector	PHLAP9251574	Plasmid vector containing HLA-A*02:11:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:13 protein. This plasmid can be used for constructing HLA-A*02:11:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:11:14 Protein Expression Plasmid Vector	PHLAP9251575	Plasmid vector containing HLA-A*02:11:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:11:14 protein. This plasmid can be used for constructing HLA-A*02:11:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:11:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:110 Protein Expression Plasmid Vector	PHLAP9251576	Plasmid vector containing HLA-A*02:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:110 protein. This plasmid can be used for constructing HLA-A*02:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1100 Protein Expression Plasmid Vector	PHLAP9251577	Plasmid vector containing HLA-A*02:1100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1100 protein. This plasmid can be used for constructing HLA-A*02:1100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1101 Protein Expression Plasmid Vector	PHLAP9251578	Plasmid vector containing HLA-A*02:1101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1101 protein. This plasmid can be used for constructing HLA-A*02:1101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1102 Protein Expression Plasmid Vector	PHLAP9251579	Plasmid vector containing HLA-A*02:1102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1102 protein. This plasmid can be used for constructing HLA-A*02:1102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1103 Protein Expression Plasmid Vector	PHLAP9251580	Plasmid vector containing HLA-A*02:1103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1103 protein. This plasmid can be used for constructing HLA-A*02:1103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1104N Protein Expression Plasmid Vector	PHLAP9251581	Plasmid vector containing HLA-A*02:1104N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1104N protein. This plasmid can be used for constructing HLA-A*02:1104N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1104N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1105 Protein Expression Plasmid Vector	PHLAP9251582	Plasmid vector containing HLA-A*02:1105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1105 protein. This plasmid can be used for constructing HLA-A*02:1105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1106 Protein Expression Plasmid Vector	PHLAP9251583	Plasmid vector containing HLA-A*02:1106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1106 protein. This plasmid can be used for constructing HLA-A*02:1106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1107N Protein Expression Plasmid Vector	PHLAP9251584	Plasmid vector containing HLA-A*02:1107N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1107N protein. This plasmid can be used for constructing HLA-A*02:1107N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1107N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1108 Protein Expression Plasmid Vector	PHLAP9251585	Plasmid vector containing HLA-A*02:1108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1108 protein. This plasmid can be used for constructing HLA-A*02:1108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1109 Protein Expression Plasmid Vector	PHLAP9251586	Plasmid vector containing HLA-A*02:1109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1109 protein. This plasmid can be used for constructing HLA-A*02:1109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:111 Protein Expression Plasmid Vector	PHLAP9251587	Plasmid vector containing HLA-A*02:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:111 protein. This plasmid can be used for constructing HLA-A*02:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1110 Protein Expression Plasmid Vector	PHLAP9251588	Plasmid vector containing HLA-A*02:1110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1110 protein. This plasmid can be used for constructing HLA-A*02:1110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1111 Protein Expression Plasmid Vector	PHLAP9251589	Plasmid vector containing HLA-A*02:1111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1111 protein. This plasmid can be used for constructing HLA-A*02:1111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1112 Protein Expression Plasmid Vector	PHLAP9251590	Plasmid vector containing HLA-A*02:1112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1112 protein. This plasmid can be used for constructing HLA-A*02:1112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1113 Protein Expression Plasmid Vector	PHLAP9251591	Plasmid vector containing HLA-A*02:1113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1113 protein. This plasmid can be used for constructing HLA-A*02:1113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1114 Protein Expression Plasmid Vector	PHLAP9251592	Plasmid vector containing HLA-A*02:1114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1114 protein. This plasmid can be used for constructing HLA-A*02:1114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1115 Protein Expression Plasmid Vector	PHLAP9251593	Plasmid vector containing HLA-A*02:1115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1115 protein. This plasmid can be used for constructing HLA-A*02:1115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1116 Protein Expression Plasmid Vector	PHLAP9251594	Plasmid vector containing HLA-A*02:1116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1116 protein. This plasmid can be used for constructing HLA-A*02:1116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1117 Protein Expression Plasmid Vector	PHLAP9251595	Plasmid vector containing HLA-A*02:1117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1117 protein. This plasmid can be used for constructing HLA-A*02:1117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1118 Protein Expression Plasmid Vector	PHLAP9251596	Plasmid vector containing HLA-A*02:1118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1118 protein. This plasmid can be used for constructing HLA-A*02:1118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1119N Protein Expression Plasmid Vector	PHLAP9251597	Plasmid vector containing HLA-A*02:1119N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1119N protein. This plasmid can be used for constructing HLA-A*02:1119N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1119N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:112 Protein Expression Plasmid Vector	PHLAP9251598	Plasmid vector containing HLA-A*02:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:112 protein. This plasmid can be used for constructing HLA-A*02:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1120 Protein Expression Plasmid Vector	PHLAP9251599	Plasmid vector containing HLA-A*02:1120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1120 protein. This plasmid can be used for constructing HLA-A*02:1120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1121 Protein Expression Plasmid Vector	PHLAP9251600	Plasmid vector containing HLA-A*02:1121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1121 protein. This plasmid can be used for constructing HLA-A*02:1121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1122 Protein Expression Plasmid Vector	PHLAP9251601	Plasmid vector containing HLA-A*02:1122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1122 protein. This plasmid can be used for constructing HLA-A*02:1122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1123 Protein Expression Plasmid Vector	PHLAP9251602	Plasmid vector containing HLA-A*02:1123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1123 protein. This plasmid can be used for constructing HLA-A*02:1123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1124 Protein Expression Plasmid Vector	PHLAP9251603	Plasmid vector containing HLA-A*02:1124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1124 protein. This plasmid can be used for constructing HLA-A*02:1124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1125 Protein Expression Plasmid Vector	PHLAP9251604	Plasmid vector containing HLA-A*02:1125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1125 protein. This plasmid can be used for constructing HLA-A*02:1125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1126 Protein Expression Plasmid Vector	PHLAP9251605	Plasmid vector containing HLA-A*02:1126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1126 protein. This plasmid can be used for constructing HLA-A*02:1126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1127 Protein Expression Plasmid Vector	PHLAP9251606	Plasmid vector containing HLA-A*02:1127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1127 protein. This plasmid can be used for constructing HLA-A*02:1127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1128 Protein Expression Plasmid Vector	PHLAP9251607	Plasmid vector containing HLA-A*02:1128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1128 protein. This plasmid can be used for constructing HLA-A*02:1128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1129 Protein Expression Plasmid Vector	PHLAP9251608	Plasmid vector containing HLA-A*02:1129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1129 protein. This plasmid can be used for constructing HLA-A*02:1129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:113:01N Protein Expression Plasmid Vector	PHLAP9251609	Plasmid vector containing HLA-A*02:113:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:113:01N protein. This plasmid can be used for constructing HLA-A*02:113:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:113:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:113:02N Protein Expression Plasmid Vector	PHLAP9251610	Plasmid vector containing HLA-A*02:113:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:113:02N protein. This plasmid can be used for constructing HLA-A*02:113:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:113:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1130 Protein Expression Plasmid Vector	PHLAP9251611	Plasmid vector containing HLA-A*02:1130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1130 protein. This plasmid can be used for constructing HLA-A*02:1130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1131 Protein Expression Plasmid Vector	PHLAP9251612	Plasmid vector containing HLA-A*02:1131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1131 protein. This plasmid can be used for constructing HLA-A*02:1131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1132 Protein Expression Plasmid Vector	PHLAP9251613	Plasmid vector containing HLA-A*02:1132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1132 protein. This plasmid can be used for constructing HLA-A*02:1132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1133 Protein Expression Plasmid Vector	PHLAP9251614	Plasmid vector containing HLA-A*02:1133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1133 protein. This plasmid can be used for constructing HLA-A*02:1133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1134 Protein Expression Plasmid Vector	PHLAP9251615	Plasmid vector containing HLA-A*02:1134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1134 protein. This plasmid can be used for constructing HLA-A*02:1134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1135 Protein Expression Plasmid Vector	PHLAP9251616	Plasmid vector containing HLA-A*02:1135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1135 protein. This plasmid can be used for constructing HLA-A*02:1135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1136 Protein Expression Plasmid Vector	PHLAP9251617	Plasmid vector containing HLA-A*02:1136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1136 protein. This plasmid can be used for constructing HLA-A*02:1136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1137 Protein Expression Plasmid Vector	PHLAP9251618	Plasmid vector containing HLA-A*02:1137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1137 protein. This plasmid can be used for constructing HLA-A*02:1137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1138 Protein Expression Plasmid Vector	PHLAP9251619	Plasmid vector containing HLA-A*02:1138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1138 protein. This plasmid can be used for constructing HLA-A*02:1138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1139 Protein Expression Plasmid Vector	PHLAP9251620	Plasmid vector containing HLA-A*02:1139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1139 protein. This plasmid can be used for constructing HLA-A*02:1139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:114 Protein Expression Plasmid Vector	PHLAP9251621	Plasmid vector containing HLA-A*02:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:114 protein. This plasmid can be used for constructing HLA-A*02:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1140 Protein Expression Plasmid Vector	PHLAP9251622	Plasmid vector containing HLA-A*02:1140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1140 protein. This plasmid can be used for constructing HLA-A*02:1140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1141 Protein Expression Plasmid Vector	PHLAP9251623	Plasmid vector containing HLA-A*02:1141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1141 protein. This plasmid can be used for constructing HLA-A*02:1141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1142 Protein Expression Plasmid Vector	PHLAP9251624	Plasmid vector containing HLA-A*02:1142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1142 protein. This plasmid can be used for constructing HLA-A*02:1142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1143N Protein Expression Plasmid Vector	PHLAP9251625	Plasmid vector containing HLA-A*02:1143N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1143N protein. This plasmid can be used for constructing HLA-A*02:1143N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1143N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1144 Protein Expression Plasmid Vector	PHLAP9251626	Plasmid vector containing HLA-A*02:1144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1144 protein. This plasmid can be used for constructing HLA-A*02:1144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1145 Protein Expression Plasmid Vector	PHLAP9251627	Plasmid vector containing HLA-A*02:1145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1145 protein. This plasmid can be used for constructing HLA-A*02:1145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1146 Protein Expression Plasmid Vector	PHLAP9251628	Plasmid vector containing HLA-A*02:1146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1146 protein. This plasmid can be used for constructing HLA-A*02:1146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1147 Protein Expression Plasmid Vector	PHLAP9251629	Plasmid vector containing HLA-A*02:1147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1147 protein. This plasmid can be used for constructing HLA-A*02:1147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1148 Protein Expression Plasmid Vector	PHLAP9251630	Plasmid vector containing HLA-A*02:1148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1148 protein. This plasmid can be used for constructing HLA-A*02:1148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1149 Protein Expression Plasmid Vector	PHLAP9251631	Plasmid vector containing HLA-A*02:1149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1149 protein. This plasmid can be used for constructing HLA-A*02:1149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:115 Protein Expression Plasmid Vector	PHLAP9251632	Plasmid vector containing HLA-A*02:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:115 protein. This plasmid can be used for constructing HLA-A*02:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1150N Protein Expression Plasmid Vector	PHLAP9251633	Plasmid vector containing HLA-A*02:1150N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1150N protein. This plasmid can be used for constructing HLA-A*02:1150N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1150N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1151 Protein Expression Plasmid Vector	PHLAP9251634	Plasmid vector containing HLA-A*02:1151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1151 protein. This plasmid can be used for constructing HLA-A*02:1151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1152 Protein Expression Plasmid Vector	PHLAP9251635	Plasmid vector containing HLA-A*02:1152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1152 protein. This plasmid can be used for constructing HLA-A*02:1152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1153N Protein Expression Plasmid Vector	PHLAP9251636	Plasmid vector containing HLA-A*02:1153N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1153N protein. This plasmid can be used for constructing HLA-A*02:1153N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1153N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1154 Protein Expression Plasmid Vector	PHLAP9251637	Plasmid vector containing HLA-A*02:1154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1154 protein. This plasmid can be used for constructing HLA-A*02:1154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1155 Protein Expression Plasmid Vector	PHLAP9251638	Plasmid vector containing HLA-A*02:1155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1155 protein. This plasmid can be used for constructing HLA-A*02:1155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1156 Protein Expression Plasmid Vector	PHLAP9251639	Plasmid vector containing HLA-A*02:1156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1156 protein. This plasmid can be used for constructing HLA-A*02:1156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1157 Protein Expression Plasmid Vector	PHLAP9251640	Plasmid vector containing HLA-A*02:1157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1157 protein. This plasmid can be used for constructing HLA-A*02:1157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1158 Protein Expression Plasmid Vector	PHLAP9251641	Plasmid vector containing HLA-A*02:1158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1158 protein. This plasmid can be used for constructing HLA-A*02:1158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1159 Protein Expression Plasmid Vector	PHLAP9251642	Plasmid vector containing HLA-A*02:1159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1159 protein. This plasmid can be used for constructing HLA-A*02:1159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:116 Protein Expression Plasmid Vector	PHLAP9251643	Plasmid vector containing HLA-A*02:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:116 protein. This plasmid can be used for constructing HLA-A*02:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1160 Protein Expression Plasmid Vector	PHLAP9251644	Plasmid vector containing HLA-A*02:1160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1160 protein. This plasmid can be used for constructing HLA-A*02:1160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1161 Protein Expression Plasmid Vector	PHLAP9251645	Plasmid vector containing HLA-A*02:1161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1161 protein. This plasmid can be used for constructing HLA-A*02:1161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1162 Protein Expression Plasmid Vector	PHLAP9251646	Plasmid vector containing HLA-A*02:1162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1162 protein. This plasmid can be used for constructing HLA-A*02:1162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1163:01 Protein Expression Plasmid Vector	PHLAP9251647	Plasmid vector containing HLA-A*02:1163:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1163:01 protein. This plasmid can be used for constructing HLA-A*02:1163:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1163:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1163:02 Protein Expression Plasmid Vector	PHLAP9251648	Plasmid vector containing HLA-A*02:1163:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1163:02 protein. This plasmid can be used for constructing HLA-A*02:1163:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1163:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1164 Protein Expression Plasmid Vector	PHLAP9251649	Plasmid vector containing HLA-A*02:1164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1164 protein. This plasmid can be used for constructing HLA-A*02:1164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1165 Protein Expression Plasmid Vector	PHLAP9251650	Plasmid vector containing HLA-A*02:1165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1165 protein. This plasmid can be used for constructing HLA-A*02:1165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1166 Protein Expression Plasmid Vector	PHLAP9251651	Plasmid vector containing HLA-A*02:1166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1166 protein. This plasmid can be used for constructing HLA-A*02:1166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1167 Protein Expression Plasmid Vector	PHLAP9251652	Plasmid vector containing HLA-A*02:1167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1167 protein. This plasmid can be used for constructing HLA-A*02:1167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1168 Protein Expression Plasmid Vector	PHLAP9251653	Plasmid vector containing HLA-A*02:1168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1168 protein. This plasmid can be used for constructing HLA-A*02:1168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1169 Protein Expression Plasmid Vector	PHLAP9251654	Plasmid vector containing HLA-A*02:1169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1169 protein. This plasmid can be used for constructing HLA-A*02:1169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:117 Protein Expression Plasmid Vector	PHLAP9251655	Plasmid vector containing HLA-A*02:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:117 protein. This plasmid can be used for constructing HLA-A*02:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1170 Protein Expression Plasmid Vector	PHLAP9251656	Plasmid vector containing HLA-A*02:1170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1170 protein. This plasmid can be used for constructing HLA-A*02:1170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1171 Protein Expression Plasmid Vector	PHLAP9251657	Plasmid vector containing HLA-A*02:1171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1171 protein. This plasmid can be used for constructing HLA-A*02:1171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1172 Protein Expression Plasmid Vector	PHLAP9251658	Plasmid vector containing HLA-A*02:1172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1172 protein. This plasmid can be used for constructing HLA-A*02:1172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1173 Protein Expression Plasmid Vector	PHLAP9251659	Plasmid vector containing HLA-A*02:1173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1173 protein. This plasmid can be used for constructing HLA-A*02:1173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1174 Protein Expression Plasmid Vector	PHLAP9251660	Plasmid vector containing HLA-A*02:1174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1174 protein. This plasmid can be used for constructing HLA-A*02:1174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1175 Protein Expression Plasmid Vector	PHLAP9251661	Plasmid vector containing HLA-A*02:1175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1175 protein. This plasmid can be used for constructing HLA-A*02:1175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1176N Protein Expression Plasmid Vector	PHLAP9251662	Plasmid vector containing HLA-A*02:1176N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1176N protein. This plasmid can be used for constructing HLA-A*02:1176N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1176N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1177N Protein Expression Plasmid Vector	PHLAP9251663	Plasmid vector containing HLA-A*02:1177N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1177N protein. This plasmid can be used for constructing HLA-A*02:1177N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1177N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1178 Protein Expression Plasmid Vector	PHLAP9251664	Plasmid vector containing HLA-A*02:1178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1178 protein. This plasmid can be used for constructing HLA-A*02:1178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1179 Protein Expression Plasmid Vector	PHLAP9251665	Plasmid vector containing HLA-A*02:1179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1179 protein. This plasmid can be used for constructing HLA-A*02:1179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:118 Protein Expression Plasmid Vector	PHLAP9251666	Plasmid vector containing HLA-A*02:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:118 protein. This plasmid can be used for constructing HLA-A*02:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1180 Protein Expression Plasmid Vector	PHLAP9251667	Plasmid vector containing HLA-A*02:1180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1180 protein. This plasmid can be used for constructing HLA-A*02:1180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1181 Protein Expression Plasmid Vector	PHLAP9251668	Plasmid vector containing HLA-A*02:1181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1181 protein. This plasmid can be used for constructing HLA-A*02:1181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1182 Protein Expression Plasmid Vector	PHLAP9251669	Plasmid vector containing HLA-A*02:1182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1182 protein. This plasmid can be used for constructing HLA-A*02:1182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1183 Protein Expression Plasmid Vector	PHLAP9251670	Plasmid vector containing HLA-A*02:1183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1183 protein. This plasmid can be used for constructing HLA-A*02:1183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1184N Protein Expression Plasmid Vector	PHLAP9251671	Plasmid vector containing HLA-A*02:1184N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1184N protein. This plasmid can be used for constructing HLA-A*02:1184N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1184N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1185N Protein Expression Plasmid Vector	PHLAP9251672	Plasmid vector containing HLA-A*02:1185N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1185N protein. This plasmid can be used for constructing HLA-A*02:1185N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1185N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1186 Protein Expression Plasmid Vector	PHLAP9251673	Plasmid vector containing HLA-A*02:1186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1186 protein. This plasmid can be used for constructing HLA-A*02:1186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1187N Protein Expression Plasmid Vector	PHLAP9251674	Plasmid vector containing HLA-A*02:1187N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1187N protein. This plasmid can be used for constructing HLA-A*02:1187N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1187N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1188 Protein Expression Plasmid Vector	PHLAP9251675	Plasmid vector containing HLA-A*02:1188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1188 protein. This plasmid can be used for constructing HLA-A*02:1188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1189 Protein Expression Plasmid Vector	PHLAP9251676	Plasmid vector containing HLA-A*02:1189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1189 protein. This plasmid can be used for constructing HLA-A*02:1189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:119 Protein Expression Plasmid Vector	PHLAP9251677	Plasmid vector containing HLA-A*02:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:119 protein. This plasmid can be used for constructing HLA-A*02:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1190 Protein Expression Plasmid Vector	PHLAP9251678	Plasmid vector containing HLA-A*02:1190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1190 protein. This plasmid can be used for constructing HLA-A*02:1190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1191N Protein Expression Plasmid Vector	PHLAP9251679	Plasmid vector containing HLA-A*02:1191N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1191N protein. This plasmid can be used for constructing HLA-A*02:1191N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1191N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1192 Protein Expression Plasmid Vector	PHLAP9251680	Plasmid vector containing HLA-A*02:1192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1192 protein. This plasmid can be used for constructing HLA-A*02:1192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1193 Protein Expression Plasmid Vector	PHLAP9251681	Plasmid vector containing HLA-A*02:1193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1193 protein. This plasmid can be used for constructing HLA-A*02:1193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1194 Protein Expression Plasmid Vector	PHLAP9251682	Plasmid vector containing HLA-A*02:1194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1194 protein. This plasmid can be used for constructing HLA-A*02:1194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1195N Protein Expression Plasmid Vector	PHLAP9251683	Plasmid vector containing HLA-A*02:1195N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1195N protein. This plasmid can be used for constructing HLA-A*02:1195N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1195N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1196 Protein Expression Plasmid Vector	PHLAP9251684	Plasmid vector containing HLA-A*02:1196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1196 protein. This plasmid can be used for constructing HLA-A*02:1196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1197 Protein Expression Plasmid Vector	PHLAP9251685	Plasmid vector containing HLA-A*02:1197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1197 protein. This plasmid can be used for constructing HLA-A*02:1197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1198 Protein Expression Plasmid Vector	PHLAP9251686	Plasmid vector containing HLA-A*02:1198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1198 protein. This plasmid can be used for constructing HLA-A*02:1198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1199 Protein Expression Plasmid Vector	PHLAP9251687	Plasmid vector containing HLA-A*02:1199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1199 protein. This plasmid can be used for constructing HLA-A*02:1199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:12 Protein Expression Plasmid Vector	PHLAP9251688	Plasmid vector containing HLA-A*02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:12 protein. This plasmid can be used for constructing HLA-A*02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:120 Protein Expression Plasmid Vector	PHLAP9251689	Plasmid vector containing HLA-A*02:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:120 protein. This plasmid can be used for constructing HLA-A*02:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1200 Protein Expression Plasmid Vector	PHLAP9251690	Plasmid vector containing HLA-A*02:1200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1200 protein. This plasmid can be used for constructing HLA-A*02:1200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1201 Protein Expression Plasmid Vector	PHLAP9251691	Plasmid vector containing HLA-A*02:1201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1201 protein. This plasmid can be used for constructing HLA-A*02:1201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1202 Protein Expression Plasmid Vector	PHLAP9251692	Plasmid vector containing HLA-A*02:1202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1202 protein. This plasmid can be used for constructing HLA-A*02:1202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1203 Protein Expression Plasmid Vector	PHLAP9251693	Plasmid vector containing HLA-A*02:1203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1203 protein. This plasmid can be used for constructing HLA-A*02:1203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1204 Protein Expression Plasmid Vector	PHLAP9251694	Plasmid vector containing HLA-A*02:1204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1204 protein. This plasmid can be used for constructing HLA-A*02:1204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1205 Protein Expression Plasmid Vector	PHLAP9251695	Plasmid vector containing HLA-A*02:1205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1205 protein. This plasmid can be used for constructing HLA-A*02:1205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1206 Protein Expression Plasmid Vector	PHLAP9251696	Plasmid vector containing HLA-A*02:1206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1206 protein. This plasmid can be used for constructing HLA-A*02:1206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1207 Protein Expression Plasmid Vector	PHLAP9251697	Plasmid vector containing HLA-A*02:1207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1207 protein. This plasmid can be used for constructing HLA-A*02:1207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1208N Protein Expression Plasmid Vector	PHLAP9251698	Plasmid vector containing HLA-A*02:1208N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1208N protein. This plasmid can be used for constructing HLA-A*02:1208N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1208N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1209N Protein Expression Plasmid Vector	PHLAP9251699	Plasmid vector containing HLA-A*02:1209N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1209N protein. This plasmid can be used for constructing HLA-A*02:1209N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1209N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:121 Protein Expression Plasmid Vector	PHLAP9251700	Plasmid vector containing HLA-A*02:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:121 protein. This plasmid can be used for constructing HLA-A*02:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1210 Protein Expression Plasmid Vector	PHLAP9251701	Plasmid vector containing HLA-A*02:1210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1210 protein. This plasmid can be used for constructing HLA-A*02:1210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1211 Protein Expression Plasmid Vector	PHLAP9251702	Plasmid vector containing HLA-A*02:1211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1211 protein. This plasmid can be used for constructing HLA-A*02:1211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1212 Protein Expression Plasmid Vector	PHLAP9251703	Plasmid vector containing HLA-A*02:1212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1212 protein. This plasmid can be used for constructing HLA-A*02:1212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1213 Protein Expression Plasmid Vector	PHLAP9251704	Plasmid vector containing HLA-A*02:1213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1213 protein. This plasmid can be used for constructing HLA-A*02:1213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1214N Protein Expression Plasmid Vector	PHLAP9251705	Plasmid vector containing HLA-A*02:1214N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1214N protein. This plasmid can be used for constructing HLA-A*02:1214N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1214N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1215 Protein Expression Plasmid Vector	PHLAP9251706	Plasmid vector containing HLA-A*02:1215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1215 protein. This plasmid can be used for constructing HLA-A*02:1215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1216 Protein Expression Plasmid Vector	PHLAP9251707	Plasmid vector containing HLA-A*02:1216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1216 protein. This plasmid can be used for constructing HLA-A*02:1216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1217 Protein Expression Plasmid Vector	PHLAP9251708	Plasmid vector containing HLA-A*02:1217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1217 protein. This plasmid can be used for constructing HLA-A*02:1217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1218 Protein Expression Plasmid Vector	PHLAP9251709	Plasmid vector containing HLA-A*02:1218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1218 protein. This plasmid can be used for constructing HLA-A*02:1218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1219N Protein Expression Plasmid Vector	PHLAP9251710	Plasmid vector containing HLA-A*02:1219N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1219N protein. This plasmid can be used for constructing HLA-A*02:1219N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1219N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:122 Protein Expression Plasmid Vector	PHLAP9251711	Plasmid vector containing HLA-A*02:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:122 protein. This plasmid can be used for constructing HLA-A*02:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1220 Protein Expression Plasmid Vector	PHLAP9251712	Plasmid vector containing HLA-A*02:1220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1220 protein. This plasmid can be used for constructing HLA-A*02:1220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1221Q Protein Expression Plasmid Vector	PHLAP9251713	Plasmid vector containing HLA-A*02:1221Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1221Q protein. This plasmid can be used for constructing HLA-A*02:1221Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1221Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1222N Protein Expression Plasmid Vector	PHLAP9251714	Plasmid vector containing HLA-A*02:1222N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1222N protein. This plasmid can be used for constructing HLA-A*02:1222N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1222N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1223 Protein Expression Plasmid Vector	PHLAP9251715	Plasmid vector containing HLA-A*02:1223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1223 protein. This plasmid can be used for constructing HLA-A*02:1223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1224 Protein Expression Plasmid Vector	PHLAP9251716	Plasmid vector containing HLA-A*02:1224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1224 protein. This plasmid can be used for constructing HLA-A*02:1224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1225 Protein Expression Plasmid Vector	PHLAP9251717	Plasmid vector containing HLA-A*02:1225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1225 protein. This plasmid can be used for constructing HLA-A*02:1225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1226 Protein Expression Plasmid Vector	PHLAP9251718	Plasmid vector containing HLA-A*02:1226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1226 protein. This plasmid can be used for constructing HLA-A*02:1226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1227 Protein Expression Plasmid Vector	PHLAP9251719	Plasmid vector containing HLA-A*02:1227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1227 protein. This plasmid can be used for constructing HLA-A*02:1227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1228 Protein Expression Plasmid Vector	PHLAP9251720	Plasmid vector containing HLA-A*02:1228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1228 protein. This plasmid can be used for constructing HLA-A*02:1228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1229 Protein Expression Plasmid Vector	PHLAP9251721	Plasmid vector containing HLA-A*02:1229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1229 protein. This plasmid can be used for constructing HLA-A*02:1229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:123 Protein Expression Plasmid Vector	PHLAP9251722	Plasmid vector containing HLA-A*02:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:123 protein. This plasmid can be used for constructing HLA-A*02:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1230 Protein Expression Plasmid Vector	PHLAP9251723	Plasmid vector containing HLA-A*02:1230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1230 protein. This plasmid can be used for constructing HLA-A*02:1230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:1231 Protein Expression Plasmid Vector	PHLAP9251724	Plasmid vector containing HLA-A*02:1231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1231 protein. This plasmid can be used for constructing HLA-A*02:1231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:1232 Protein Expression Plasmid Vector	PHLAP9251725	Plasmid vector containing HLA-A*02:1232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:1232 protein. This plasmid can be used for constructing HLA-A*02:1232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:1232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:124 Protein Expression Plasmid Vector	PHLAP9251726	Plasmid vector containing HLA-A*02:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:124 protein. This plasmid can be used for constructing HLA-A*02:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:125N Protein Expression Plasmid Vector	PHLAP9251727	Plasmid vector containing HLA-A*02:125N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:125N protein. This plasmid can be used for constructing HLA-A*02:125N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:125N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:126 Protein Expression Plasmid Vector	PHLAP9251728	Plasmid vector containing HLA-A*02:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:126 protein. This plasmid can be used for constructing HLA-A*02:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:127 Protein Expression Plasmid Vector	PHLAP9251729	Plasmid vector containing HLA-A*02:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:127 protein. This plasmid can be used for constructing HLA-A*02:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:128 Protein Expression Plasmid Vector	PHLAP9251730	Plasmid vector containing HLA-A*02:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:128 protein. This plasmid can be used for constructing HLA-A*02:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:129 Protein Expression Plasmid Vector	PHLAP9251731	Plasmid vector containing HLA-A*02:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:129 protein. This plasmid can be used for constructing HLA-A*02:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:13 Protein Expression Plasmid Vector	PHLAP9251732	Plasmid vector containing HLA-A*02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:13 protein. This plasmid can be used for constructing HLA-A*02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:130 Protein Expression Plasmid Vector	PHLAP9251733	Plasmid vector containing HLA-A*02:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:130 protein. This plasmid can be used for constructing HLA-A*02:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:131:01:01 Protein Expression Plasmid Vector	PHLAP9251734	Plasmid vector containing HLA-A*02:131:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:131:01:01 protein. This plasmid can be used for constructing HLA-A*02:131:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:131:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:131:01:02 Protein Expression Plasmid Vector	PHLAP9251735	Plasmid vector containing HLA-A*02:131:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:131:01:02 protein. This plasmid can be used for constructing HLA-A*02:131:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:131:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:131:01:03 Protein Expression Plasmid Vector	PHLAP9251736	Plasmid vector containing HLA-A*02:131:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:131:01:03 protein. This plasmid can be used for constructing HLA-A*02:131:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:131:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:131:02 Protein Expression Plasmid Vector	PHLAP9251737	Plasmid vector containing HLA-A*02:131:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:131:02 protein. This plasmid can be used for constructing HLA-A*02:131:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:131:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:131:03 Protein Expression Plasmid Vector	PHLAP9251738	Plasmid vector containing HLA-A*02:131:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:131:03 protein. This plasmid can be used for constructing HLA-A*02:131:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:131:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:132 Protein Expression Plasmid Vector	PHLAP9251739	Plasmid vector containing HLA-A*02:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:132 protein. This plasmid can be used for constructing HLA-A*02:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:133 Protein Expression Plasmid Vector	PHLAP9251740	Plasmid vector containing HLA-A*02:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:133 protein. This plasmid can be used for constructing HLA-A*02:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:134 Protein Expression Plasmid Vector	PHLAP9251741	Plasmid vector containing HLA-A*02:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:134 protein. This plasmid can be used for constructing HLA-A*02:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:135 Protein Expression Plasmid Vector	PHLAP9251742	Plasmid vector containing HLA-A*02:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:135 protein. This plasmid can be used for constructing HLA-A*02:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:136 Protein Expression Plasmid Vector	PHLAP9251743	Plasmid vector containing HLA-A*02:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:136 protein. This plasmid can be used for constructing HLA-A*02:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:137 Protein Expression Plasmid Vector	PHLAP9251744	Plasmid vector containing HLA-A*02:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:137 protein. This plasmid can be used for constructing HLA-A*02:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:138 Protein Expression Plasmid Vector	PHLAP9251745	Plasmid vector containing HLA-A*02:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:138 protein. This plasmid can be used for constructing HLA-A*02:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:139 Protein Expression Plasmid Vector	PHLAP9251746	Plasmid vector containing HLA-A*02:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:139 protein. This plasmid can be used for constructing HLA-A*02:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:14 Protein Expression Plasmid Vector	PHLAP9251747	Plasmid vector containing HLA-A*02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:14 protein. This plasmid can be used for constructing HLA-A*02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:140:01 Protein Expression Plasmid Vector	PHLAP9251748	Plasmid vector containing HLA-A*02:140:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:140:01 protein. This plasmid can be used for constructing HLA-A*02:140:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:140:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:140:02 Protein Expression Plasmid Vector	PHLAP9251749	Plasmid vector containing HLA-A*02:140:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:140:02 protein. This plasmid can be used for constructing HLA-A*02:140:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:140:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:141 Protein Expression Plasmid Vector	PHLAP9251750	Plasmid vector containing HLA-A*02:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:141 protein. This plasmid can be used for constructing HLA-A*02:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:142 Protein Expression Plasmid Vector	PHLAP9251751	Plasmid vector containing HLA-A*02:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:142 protein. This plasmid can be used for constructing HLA-A*02:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:143 Protein Expression Plasmid Vector	PHLAP9251752	Plasmid vector containing HLA-A*02:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:143 protein. This plasmid can be used for constructing HLA-A*02:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:144 Protein Expression Plasmid Vector	PHLAP9251753	Plasmid vector containing HLA-A*02:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:144 protein. This plasmid can be used for constructing HLA-A*02:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:145 Protein Expression Plasmid Vector	PHLAP9251754	Plasmid vector containing HLA-A*02:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:145 protein. This plasmid can be used for constructing HLA-A*02:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:146 Protein Expression Plasmid Vector	PHLAP9251755	Plasmid vector containing HLA-A*02:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:146 protein. This plasmid can be used for constructing HLA-A*02:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:147 Protein Expression Plasmid Vector	PHLAP9251756	Plasmid vector containing HLA-A*02:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:147 protein. This plasmid can be used for constructing HLA-A*02:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:148 Protein Expression Plasmid Vector	PHLAP9251757	Plasmid vector containing HLA-A*02:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:148 protein. This plasmid can be used for constructing HLA-A*02:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:149:01 Protein Expression Plasmid Vector	PHLAP9251758	Plasmid vector containing HLA-A*02:149:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:149:01 protein. This plasmid can be used for constructing HLA-A*02:149:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:149:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:149:02 Protein Expression Plasmid Vector	PHLAP9251759	Plasmid vector containing HLA-A*02:149:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:149:02 protein. This plasmid can be used for constructing HLA-A*02:149:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:149:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:150:01 Protein Expression Plasmid Vector	PHLAP9251760	Plasmid vector containing HLA-A*02:150:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:150:01 protein. This plasmid can be used for constructing HLA-A*02:150:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:150:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:150:02 Protein Expression Plasmid Vector	PHLAP9251761	Plasmid vector containing HLA-A*02:150:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:150:02 protein. This plasmid can be used for constructing HLA-A*02:150:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:150:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:151 Protein Expression Plasmid Vector	PHLAP9251762	Plasmid vector containing HLA-A*02:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:151 protein. This plasmid can be used for constructing HLA-A*02:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:152 Protein Expression Plasmid Vector	PHLAP9251763	Plasmid vector containing HLA-A*02:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:152 protein. This plasmid can be used for constructing HLA-A*02:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:153:01 Protein Expression Plasmid Vector	PHLAP9251764	Plasmid vector containing HLA-A*02:153:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:153:01 protein. This plasmid can be used for constructing HLA-A*02:153:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:153:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:153:02 Protein Expression Plasmid Vector	PHLAP9251765	Plasmid vector containing HLA-A*02:153:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:153:02 protein. This plasmid can be used for constructing HLA-A*02:153:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:153:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:154 Protein Expression Plasmid Vector	PHLAP9251766	Plasmid vector containing HLA-A*02:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:154 protein. This plasmid can be used for constructing HLA-A*02:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:155 Protein Expression Plasmid Vector	PHLAP9251767	Plasmid vector containing HLA-A*02:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:155 protein. This plasmid can be used for constructing HLA-A*02:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:156 Protein Expression Plasmid Vector	PHLAP9251768	Plasmid vector containing HLA-A*02:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:156 protein. This plasmid can be used for constructing HLA-A*02:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:157:01 Protein Expression Plasmid Vector	PHLAP9251769	Plasmid vector containing HLA-A*02:157:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:157:01 protein. This plasmid can be used for constructing HLA-A*02:157:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:157:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:157:02 Protein Expression Plasmid Vector	PHLAP9251770	Plasmid vector containing HLA-A*02:157:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:157:02 protein. This plasmid can be used for constructing HLA-A*02:157:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:157:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:158 Protein Expression Plasmid Vector	PHLAP9251771	Plasmid vector containing HLA-A*02:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:158 protein. This plasmid can be used for constructing HLA-A*02:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:159 Protein Expression Plasmid Vector	PHLAP9251772	Plasmid vector containing HLA-A*02:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:159 protein. This plasmid can be used for constructing HLA-A*02:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:15N Protein Expression Plasmid Vector	PHLAP9251773	Plasmid vector containing HLA-A*02:15N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:15N protein. This plasmid can be used for constructing HLA-A*02:15N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:15N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:16 Protein Expression Plasmid Vector	PHLAP9251774	Plasmid vector containing HLA-A*02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:16 protein. This plasmid can be used for constructing HLA-A*02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:160 Protein Expression Plasmid Vector	PHLAP9251775	Plasmid vector containing HLA-A*02:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:160 protein. This plasmid can be used for constructing HLA-A*02:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:161 Protein Expression Plasmid Vector	PHLAP9251776	Plasmid vector containing HLA-A*02:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:161 protein. This plasmid can be used for constructing HLA-A*02:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:162 Protein Expression Plasmid Vector	PHLAP9251777	Plasmid vector containing HLA-A*02:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:162 protein. This plasmid can be used for constructing HLA-A*02:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:163 Protein Expression Plasmid Vector	PHLAP9251778	Plasmid vector containing HLA-A*02:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:163 protein. This plasmid can be used for constructing HLA-A*02:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:164:01 Protein Expression Plasmid Vector	PHLAP9251779	Plasmid vector containing HLA-A*02:164:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:164:01 protein. This plasmid can be used for constructing HLA-A*02:164:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:164:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:164:02 Protein Expression Plasmid Vector	PHLAP9251780	Plasmid vector containing HLA-A*02:164:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:164:02 protein. This plasmid can be used for constructing HLA-A*02:164:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:164:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:165 Protein Expression Plasmid Vector	PHLAP9251781	Plasmid vector containing HLA-A*02:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:165 protein. This plasmid can be used for constructing HLA-A*02:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:166 Protein Expression Plasmid Vector	PHLAP9251782	Plasmid vector containing HLA-A*02:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:166 protein. This plasmid can be used for constructing HLA-A*02:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:167 Protein Expression Plasmid Vector	PHLAP9251783	Plasmid vector containing HLA-A*02:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:167 protein. This plasmid can be used for constructing HLA-A*02:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:168 Protein Expression Plasmid Vector	PHLAP9251784	Plasmid vector containing HLA-A*02:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:168 protein. This plasmid can be used for constructing HLA-A*02:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:169 Protein Expression Plasmid Vector	PHLAP9251785	Plasmid vector containing HLA-A*02:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:169 protein. This plasmid can be used for constructing HLA-A*02:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:17:01 Protein Expression Plasmid Vector	PHLAP9251786	Plasmid vector containing HLA-A*02:17:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:17:01 protein. This plasmid can be used for constructing HLA-A*02:17:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:17:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:17:02:01 Protein Expression Plasmid Vector	PHLAP9251787	Plasmid vector containing HLA-A*02:17:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:17:02:01 protein. This plasmid can be used for constructing HLA-A*02:17:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:17:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:17:02:02 Protein Expression Plasmid Vector	PHLAP9251788	Plasmid vector containing HLA-A*02:17:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:17:02:02 protein. This plasmid can be used for constructing HLA-A*02:17:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:17:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:17:03 Protein Expression Plasmid Vector	PHLAP9251789	Plasmid vector containing HLA-A*02:17:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:17:03 protein. This plasmid can be used for constructing HLA-A*02:17:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:17:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:17:04 Protein Expression Plasmid Vector	PHLAP9251790	Plasmid vector containing HLA-A*02:17:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:17:04 protein. This plasmid can be used for constructing HLA-A*02:17:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:17:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:170 Protein Expression Plasmid Vector	PHLAP9251791	Plasmid vector containing HLA-A*02:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:170 protein. This plasmid can be used for constructing HLA-A*02:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:171:01 Protein Expression Plasmid Vector	PHLAP9251792	Plasmid vector containing HLA-A*02:171:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:171:01 protein. This plasmid can be used for constructing HLA-A*02:171:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:171:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:171:02 Protein Expression Plasmid Vector	PHLAP9251793	Plasmid vector containing HLA-A*02:171:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:171:02 protein. This plasmid can be used for constructing HLA-A*02:171:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:171:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:172 Protein Expression Plasmid Vector	PHLAP9251794	Plasmid vector containing HLA-A*02:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:172 protein. This plasmid can be used for constructing HLA-A*02:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:173 Protein Expression Plasmid Vector	PHLAP9251795	Plasmid vector containing HLA-A*02:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:173 protein. This plasmid can be used for constructing HLA-A*02:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:174 Protein Expression Plasmid Vector	PHLAP9251796	Plasmid vector containing HLA-A*02:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:174 protein. This plasmid can be used for constructing HLA-A*02:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:175 Protein Expression Plasmid Vector	PHLAP9251797	Plasmid vector containing HLA-A*02:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:175 protein. This plasmid can be used for constructing HLA-A*02:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:176 Protein Expression Plasmid Vector	PHLAP9251798	Plasmid vector containing HLA-A*02:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:176 protein. This plasmid can be used for constructing HLA-A*02:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:177 Protein Expression Plasmid Vector	PHLAP9251799	Plasmid vector containing HLA-A*02:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:177 protein. This plasmid can be used for constructing HLA-A*02:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:178 Protein Expression Plasmid Vector	PHLAP9251800	Plasmid vector containing HLA-A*02:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:178 protein. This plasmid can be used for constructing HLA-A*02:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:179 Protein Expression Plasmid Vector	PHLAP9251801	Plasmid vector containing HLA-A*02:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:179 protein. This plasmid can be used for constructing HLA-A*02:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:18 Protein Expression Plasmid Vector	PHLAP9251802	Plasmid vector containing HLA-A*02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:18 protein. This plasmid can be used for constructing HLA-A*02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:180 Protein Expression Plasmid Vector	PHLAP9251803	Plasmid vector containing HLA-A*02:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:180 protein. This plasmid can be used for constructing HLA-A*02:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:181 Protein Expression Plasmid Vector	PHLAP9251804	Plasmid vector containing HLA-A*02:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:181 protein. This plasmid can be used for constructing HLA-A*02:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:182 Protein Expression Plasmid Vector	PHLAP9251805	Plasmid vector containing HLA-A*02:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:182 protein. This plasmid can be used for constructing HLA-A*02:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:183 Protein Expression Plasmid Vector	PHLAP9251806	Plasmid vector containing HLA-A*02:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:183 protein. This plasmid can be used for constructing HLA-A*02:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:184 Protein Expression Plasmid Vector	PHLAP9251807	Plasmid vector containing HLA-A*02:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:184 protein. This plasmid can be used for constructing HLA-A*02:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:185 Protein Expression Plasmid Vector	PHLAP9251808	Plasmid vector containing HLA-A*02:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:185 protein. This plasmid can be used for constructing HLA-A*02:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:186 Protein Expression Plasmid Vector	PHLAP9251809	Plasmid vector containing HLA-A*02:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:186 protein. This plasmid can be used for constructing HLA-A*02:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:187 Protein Expression Plasmid Vector	PHLAP9251810	Plasmid vector containing HLA-A*02:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:187 protein. This plasmid can be used for constructing HLA-A*02:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:188 Protein Expression Plasmid Vector	PHLAP9251811	Plasmid vector containing HLA-A*02:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:188 protein. This plasmid can be used for constructing HLA-A*02:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:189 Protein Expression Plasmid Vector	PHLAP9251812	Plasmid vector containing HLA-A*02:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:189 protein. This plasmid can be used for constructing HLA-A*02:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:19 Protein Expression Plasmid Vector	PHLAP9251813	Plasmid vector containing HLA-A*02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:19 protein. This plasmid can be used for constructing HLA-A*02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:190 Protein Expression Plasmid Vector	PHLAP9251814	Plasmid vector containing HLA-A*02:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:190 protein. This plasmid can be used for constructing HLA-A*02:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:191 Protein Expression Plasmid Vector	PHLAP9251815	Plasmid vector containing HLA-A*02:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:191 protein. This plasmid can be used for constructing HLA-A*02:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:192 Protein Expression Plasmid Vector	PHLAP9251816	Plasmid vector containing HLA-A*02:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:192 protein. This plasmid can be used for constructing HLA-A*02:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:193 Protein Expression Plasmid Vector	PHLAP9251817	Plasmid vector containing HLA-A*02:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:193 protein. This plasmid can be used for constructing HLA-A*02:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:194 Protein Expression Plasmid Vector	PHLAP9251818	Plasmid vector containing HLA-A*02:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:194 protein. This plasmid can be used for constructing HLA-A*02:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:195:01 Protein Expression Plasmid Vector	PHLAP9251819	Plasmid vector containing HLA-A*02:195:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:195:01 protein. This plasmid can be used for constructing HLA-A*02:195:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:195:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:195:02 Protein Expression Plasmid Vector	PHLAP9251820	Plasmid vector containing HLA-A*02:195:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:195:02 protein. This plasmid can be used for constructing HLA-A*02:195:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:195:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:196 Protein Expression Plasmid Vector	PHLAP9251821	Plasmid vector containing HLA-A*02:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:196 protein. This plasmid can be used for constructing HLA-A*02:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:197:01 Protein Expression Plasmid Vector	PHLAP9251822	Plasmid vector containing HLA-A*02:197:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:197:01 protein. This plasmid can be used for constructing HLA-A*02:197:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:197:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:197:02 Protein Expression Plasmid Vector	PHLAP9251823	Plasmid vector containing HLA-A*02:197:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:197:02 protein. This plasmid can be used for constructing HLA-A*02:197:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:197:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:198 Protein Expression Plasmid Vector	PHLAP9251824	Plasmid vector containing HLA-A*02:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:198 protein. This plasmid can be used for constructing HLA-A*02:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:199 Protein Expression Plasmid Vector	PHLAP9251825	Plasmid vector containing HLA-A*02:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:199 protein. This plasmid can be used for constructing HLA-A*02:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:20:01 Protein Expression Plasmid Vector	PHLAP9251826	Plasmid vector containing HLA-A*02:20:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:20:01 protein. This plasmid can be used for constructing HLA-A*02:20:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:20:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:20:02 Protein Expression Plasmid Vector	PHLAP9251827	Plasmid vector containing HLA-A*02:20:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:20:02 protein. This plasmid can be used for constructing HLA-A*02:20:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:20:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:200 Protein Expression Plasmid Vector	PHLAP9251828	Plasmid vector containing HLA-A*02:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:200 protein. This plasmid can be used for constructing HLA-A*02:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:201 Protein Expression Plasmid Vector	PHLAP9251829	Plasmid vector containing HLA-A*02:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:201 protein. This plasmid can be used for constructing HLA-A*02:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:202:01 Protein Expression Plasmid Vector	PHLAP9251830	Plasmid vector containing HLA-A*02:202:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:202:01 protein. This plasmid can be used for constructing HLA-A*02:202:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:202:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:202:02 Protein Expression Plasmid Vector	PHLAP9251831	Plasmid vector containing HLA-A*02:202:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:202:02 protein. This plasmid can be used for constructing HLA-A*02:202:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:202:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:203 Protein Expression Plasmid Vector	PHLAP9251832	Plasmid vector containing HLA-A*02:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:203 protein. This plasmid can be used for constructing HLA-A*02:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:204 Protein Expression Plasmid Vector	PHLAP9251833	Plasmid vector containing HLA-A*02:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:204 protein. This plasmid can be used for constructing HLA-A*02:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:205 Protein Expression Plasmid Vector	PHLAP9251834	Plasmid vector containing HLA-A*02:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:205 protein. This plasmid can be used for constructing HLA-A*02:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:206 Protein Expression Plasmid Vector	PHLAP9251835	Plasmid vector containing HLA-A*02:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:206 protein. This plasmid can be used for constructing HLA-A*02:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:207 Protein Expression Plasmid Vector	PHLAP9251836	Plasmid vector containing HLA-A*02:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:207 protein. This plasmid can be used for constructing HLA-A*02:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:208 Protein Expression Plasmid Vector	PHLAP9251837	Plasmid vector containing HLA-A*02:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:208 protein. This plasmid can be used for constructing HLA-A*02:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:209 Protein Expression Plasmid Vector	PHLAP9251838	Plasmid vector containing HLA-A*02:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:209 protein. This plasmid can be used for constructing HLA-A*02:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:21 Protein Expression Plasmid Vector	PHLAP9251839	Plasmid vector containing HLA-A*02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:21 protein. This plasmid can be used for constructing HLA-A*02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:210 Protein Expression Plasmid Vector	PHLAP9251840	Plasmid vector containing HLA-A*02:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:210 protein. This plasmid can be used for constructing HLA-A*02:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:211:01 Protein Expression Plasmid Vector	PHLAP9251841	Plasmid vector containing HLA-A*02:211:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:211:01 protein. This plasmid can be used for constructing HLA-A*02:211:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:211:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:211:02 Protein Expression Plasmid Vector	PHLAP9251842	Plasmid vector containing HLA-A*02:211:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:211:02 protein. This plasmid can be used for constructing HLA-A*02:211:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:211:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:212 Protein Expression Plasmid Vector	PHLAP9251843	Plasmid vector containing HLA-A*02:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:212 protein. This plasmid can be used for constructing HLA-A*02:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:213 Protein Expression Plasmid Vector	PHLAP9251844	Plasmid vector containing HLA-A*02:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:213 protein. This plasmid can be used for constructing HLA-A*02:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:214 Protein Expression Plasmid Vector	PHLAP9251845	Plasmid vector containing HLA-A*02:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:214 protein. This plasmid can be used for constructing HLA-A*02:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:215 Protein Expression Plasmid Vector	PHLAP9251846	Plasmid vector containing HLA-A*02:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:215 protein. This plasmid can be used for constructing HLA-A*02:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:216 Protein Expression Plasmid Vector	PHLAP9251847	Plasmid vector containing HLA-A*02:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:216 protein. This plasmid can be used for constructing HLA-A*02:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:217:01 Protein Expression Plasmid Vector	PHLAP9251848	Plasmid vector containing HLA-A*02:217:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:217:01 protein. This plasmid can be used for constructing HLA-A*02:217:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:217:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:217:02 Protein Expression Plasmid Vector	PHLAP9251849	Plasmid vector containing HLA-A*02:217:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:217:02 protein. This plasmid can be used for constructing HLA-A*02:217:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:217:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:218 Protein Expression Plasmid Vector	PHLAP9251850	Plasmid vector containing HLA-A*02:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:218 protein. This plasmid can be used for constructing HLA-A*02:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:219 Protein Expression Plasmid Vector	PHLAP9251851	Plasmid vector containing HLA-A*02:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:219 protein. This plasmid can be used for constructing HLA-A*02:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:22:01:01 Protein Expression Plasmid Vector	PHLAP9251852	Plasmid vector containing HLA-A*02:22:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:22:01:01 protein. This plasmid can be used for constructing HLA-A*02:22:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:22:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:22:01:02 Protein Expression Plasmid Vector	PHLAP9251853	Plasmid vector containing HLA-A*02:22:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:22:01:02 protein. This plasmid can be used for constructing HLA-A*02:22:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:22:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:22:02 Protein Expression Plasmid Vector	PHLAP9251854	Plasmid vector containing HLA-A*02:22:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:22:02 protein. This plasmid can be used for constructing HLA-A*02:22:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:22:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:220 Protein Expression Plasmid Vector	PHLAP9251855	Plasmid vector containing HLA-A*02:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:220 protein. This plasmid can be used for constructing HLA-A*02:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:221 Protein Expression Plasmid Vector	PHLAP9251856	Plasmid vector containing HLA-A*02:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:221 protein. This plasmid can be used for constructing HLA-A*02:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:222N Protein Expression Plasmid Vector	PHLAP9251857	Plasmid vector containing HLA-A*02:222N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:222N protein. This plasmid can be used for constructing HLA-A*02:222N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:222N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:223N Protein Expression Plasmid Vector	PHLAP9251858	Plasmid vector containing HLA-A*02:223N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:223N protein. This plasmid can be used for constructing HLA-A*02:223N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:223N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:224 Protein Expression Plasmid Vector	PHLAP9251859	Plasmid vector containing HLA-A*02:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:224 protein. This plasmid can be used for constructing HLA-A*02:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:225N Protein Expression Plasmid Vector	PHLAP9251860	Plasmid vector containing HLA-A*02:225N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:225N protein. This plasmid can be used for constructing HLA-A*02:225N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:225N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:226N Protein Expression Plasmid Vector	PHLAP9251861	Plasmid vector containing HLA-A*02:226N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:226N protein. This plasmid can be used for constructing HLA-A*02:226N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:226N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:227N Protein Expression Plasmid Vector	PHLAP9251862	Plasmid vector containing HLA-A*02:227N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:227N protein. This plasmid can be used for constructing HLA-A*02:227N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:227N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:228 Protein Expression Plasmid Vector	PHLAP9251863	Plasmid vector containing HLA-A*02:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:228 protein. This plasmid can be used for constructing HLA-A*02:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:229 Protein Expression Plasmid Vector	PHLAP9251864	Plasmid vector containing HLA-A*02:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:229 protein. This plasmid can be used for constructing HLA-A*02:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:230 Protein Expression Plasmid Vector	PHLAP9251865	Plasmid vector containing HLA-A*02:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:230 protein. This plasmid can be used for constructing HLA-A*02:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:231 Protein Expression Plasmid Vector	PHLAP9251866	Plasmid vector containing HLA-A*02:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:231 protein. This plasmid can be used for constructing HLA-A*02:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:232 Protein Expression Plasmid Vector	PHLAP9251867	Plasmid vector containing HLA-A*02:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:232 protein. This plasmid can be used for constructing HLA-A*02:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:233:01 Protein Expression Plasmid Vector	PHLAP9251868	Plasmid vector containing HLA-A*02:233:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:233:01 protein. This plasmid can be used for constructing HLA-A*02:233:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:233:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:233:02 Protein Expression Plasmid Vector	PHLAP9251869	Plasmid vector containing HLA-A*02:233:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:233:02 protein. This plasmid can be used for constructing HLA-A*02:233:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:233:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:234 Protein Expression Plasmid Vector	PHLAP9251870	Plasmid vector containing HLA-A*02:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:234 protein. This plasmid can be used for constructing HLA-A*02:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:235 Protein Expression Plasmid Vector	PHLAP9251871	Plasmid vector containing HLA-A*02:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:235 protein. This plasmid can be used for constructing HLA-A*02:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:236 Protein Expression Plasmid Vector	PHLAP9251872	Plasmid vector containing HLA-A*02:236 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:236 protein. This plasmid can be used for constructing HLA-A*02:236 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:236 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:237 Protein Expression Plasmid Vector	PHLAP9251873	Plasmid vector containing HLA-A*02:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:237 protein. This plasmid can be used for constructing HLA-A*02:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:238 Protein Expression Plasmid Vector	PHLAP9251874	Plasmid vector containing HLA-A*02:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:238 protein. This plasmid can be used for constructing HLA-A*02:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:239 Protein Expression Plasmid Vector	PHLAP9251875	Plasmid vector containing HLA-A*02:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:239 protein. This plasmid can be used for constructing HLA-A*02:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:24:01 Protein Expression Plasmid Vector	PHLAP9251876	Plasmid vector containing HLA-A*02:24:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:24:01 protein. This plasmid can be used for constructing HLA-A*02:24:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:24:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:24:02 Protein Expression Plasmid Vector	PHLAP9251877	Plasmid vector containing HLA-A*02:24:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:24:02 protein. This plasmid can be used for constructing HLA-A*02:24:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:24:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:240 Protein Expression Plasmid Vector	PHLAP9251878	Plasmid vector containing HLA-A*02:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:240 protein. This plasmid can be used for constructing HLA-A*02:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:241 Protein Expression Plasmid Vector	PHLAP9251879	Plasmid vector containing HLA-A*02:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:241 protein. This plasmid can be used for constructing HLA-A*02:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:242 Protein Expression Plasmid Vector	PHLAP9251880	Plasmid vector containing HLA-A*02:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:242 protein. This plasmid can be used for constructing HLA-A*02:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:243:01 Protein Expression Plasmid Vector	PHLAP9251881	Plasmid vector containing HLA-A*02:243:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:243:01 protein. This plasmid can be used for constructing HLA-A*02:243:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:243:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:243:02 Protein Expression Plasmid Vector	PHLAP9251882	Plasmid vector containing HLA-A*02:243:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:243:02 protein. This plasmid can be used for constructing HLA-A*02:243:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:243:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:243:03 Protein Expression Plasmid Vector	PHLAP9251883	Plasmid vector containing HLA-A*02:243:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:243:03 protein. This plasmid can be used for constructing HLA-A*02:243:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:243:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:244 Protein Expression Plasmid Vector	PHLAP9251884	Plasmid vector containing HLA-A*02:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:244 protein. This plasmid can be used for constructing HLA-A*02:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:245 Protein Expression Plasmid Vector	PHLAP9251885	Plasmid vector containing HLA-A*02:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:245 protein. This plasmid can be used for constructing HLA-A*02:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:246 Protein Expression Plasmid Vector	PHLAP9251886	Plasmid vector containing HLA-A*02:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:246 protein. This plasmid can be used for constructing HLA-A*02:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:247 Protein Expression Plasmid Vector	PHLAP9251887	Plasmid vector containing HLA-A*02:247 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:247 protein. This plasmid can be used for constructing HLA-A*02:247 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:247 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:248 Protein Expression Plasmid Vector	PHLAP9251888	Plasmid vector containing HLA-A*02:248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:248 protein. This plasmid can be used for constructing HLA-A*02:248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:249 Protein Expression Plasmid Vector	PHLAP9251889	Plasmid vector containing HLA-A*02:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:249 protein. This plasmid can be used for constructing HLA-A*02:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:25 Protein Expression Plasmid Vector	PHLAP9251890	Plasmid vector containing HLA-A*02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:25 protein. This plasmid can be used for constructing HLA-A*02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:250N Protein Expression Plasmid Vector	PHLAP9251891	Plasmid vector containing HLA-A*02:250N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:250N protein. This plasmid can be used for constructing HLA-A*02:250N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:250N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:251 Protein Expression Plasmid Vector	PHLAP9251892	Plasmid vector containing HLA-A*02:251 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:251 protein. This plasmid can be used for constructing HLA-A*02:251 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:251 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:252 Protein Expression Plasmid Vector	PHLAP9251893	Plasmid vector containing HLA-A*02:252 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:252 protein. This plasmid can be used for constructing HLA-A*02:252 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:252 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:253 Protein Expression Plasmid Vector	PHLAP9251894	Plasmid vector containing HLA-A*02:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:253 protein. This plasmid can be used for constructing HLA-A*02:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:254 Protein Expression Plasmid Vector	PHLAP9251895	Plasmid vector containing HLA-A*02:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:254 protein. This plasmid can be used for constructing HLA-A*02:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:255 Protein Expression Plasmid Vector	PHLAP9251896	Plasmid vector containing HLA-A*02:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:255 protein. This plasmid can be used for constructing HLA-A*02:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:256 Protein Expression Plasmid Vector	PHLAP9251897	Plasmid vector containing HLA-A*02:256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:256 protein. This plasmid can be used for constructing HLA-A*02:256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:257 Protein Expression Plasmid Vector	PHLAP9251898	Plasmid vector containing HLA-A*02:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:257 protein. This plasmid can be used for constructing HLA-A*02:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:258 Protein Expression Plasmid Vector	PHLAP9251899	Plasmid vector containing HLA-A*02:258 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:258 protein. This plasmid can be used for constructing HLA-A*02:258 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:258 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:259 Protein Expression Plasmid Vector	PHLAP9251900	Plasmid vector containing HLA-A*02:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:259 protein. This plasmid can be used for constructing HLA-A*02:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:26 Protein Expression Plasmid Vector	PHLAP9251901	Plasmid vector containing HLA-A*02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:26 protein. This plasmid can be used for constructing HLA-A*02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:260 Protein Expression Plasmid Vector	PHLAP9251902	Plasmid vector containing HLA-A*02:260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:260 protein. This plasmid can be used for constructing HLA-A*02:260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:261 Protein Expression Plasmid Vector	PHLAP9251903	Plasmid vector containing HLA-A*02:261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:261 protein. This plasmid can be used for constructing HLA-A*02:261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:262 Protein Expression Plasmid Vector	PHLAP9251904	Plasmid vector containing HLA-A*02:262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:262 protein. This plasmid can be used for constructing HLA-A*02:262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:263 Protein Expression Plasmid Vector	PHLAP9251905	Plasmid vector containing HLA-A*02:263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:263 protein. This plasmid can be used for constructing HLA-A*02:263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:264:01:01 Protein Expression Plasmid Vector	PHLAP9251906	Plasmid vector containing HLA-A*02:264:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:264:01:01 protein. This plasmid can be used for constructing HLA-A*02:264:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:264:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:264:01:02 Protein Expression Plasmid Vector	PHLAP9251907	Plasmid vector containing HLA-A*02:264:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:264:01:02 protein. This plasmid can be used for constructing HLA-A*02:264:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:264:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:265 Protein Expression Plasmid Vector	PHLAP9251908	Plasmid vector containing HLA-A*02:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:265 protein. This plasmid can be used for constructing HLA-A*02:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:266 Protein Expression Plasmid Vector	PHLAP9251909	Plasmid vector containing HLA-A*02:266 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:266 protein. This plasmid can be used for constructing HLA-A*02:266 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:266 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:267 Protein Expression Plasmid Vector	PHLAP9251910	Plasmid vector containing HLA-A*02:267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:267 protein. This plasmid can be used for constructing HLA-A*02:267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:268 Protein Expression Plasmid Vector	PHLAP9251911	Plasmid vector containing HLA-A*02:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:268 protein. This plasmid can be used for constructing HLA-A*02:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:269 Protein Expression Plasmid Vector	PHLAP9251912	Plasmid vector containing HLA-A*02:269 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:269 protein. This plasmid can be used for constructing HLA-A*02:269 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:269 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:27 Protein Expression Plasmid Vector	PHLAP9251913	Plasmid vector containing HLA-A*02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:27 protein. This plasmid can be used for constructing HLA-A*02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:270 Protein Expression Plasmid Vector	PHLAP9251914	Plasmid vector containing HLA-A*02:270 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:270 protein. This plasmid can be used for constructing HLA-A*02:270 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:270 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:271 Protein Expression Plasmid Vector	PHLAP9251915	Plasmid vector containing HLA-A*02:271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:271 protein. This plasmid can be used for constructing HLA-A*02:271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:272 Protein Expression Plasmid Vector	PHLAP9251916	Plasmid vector containing HLA-A*02:272 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:272 protein. This plasmid can be used for constructing HLA-A*02:272 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:272 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:273 Protein Expression Plasmid Vector	PHLAP9251917	Plasmid vector containing HLA-A*02:273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:273 protein. This plasmid can be used for constructing HLA-A*02:273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:274 Protein Expression Plasmid Vector	PHLAP9251918	Plasmid vector containing HLA-A*02:274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:274 protein. This plasmid can be used for constructing HLA-A*02:274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:275 Protein Expression Plasmid Vector	PHLAP9251919	Plasmid vector containing HLA-A*02:275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:275 protein. This plasmid can be used for constructing HLA-A*02:275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:276 Protein Expression Plasmid Vector	PHLAP9251920	Plasmid vector containing HLA-A*02:276 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:276 protein. This plasmid can be used for constructing HLA-A*02:276 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:276 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:277 Protein Expression Plasmid Vector	PHLAP9251921	Plasmid vector containing HLA-A*02:277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:277 protein. This plasmid can be used for constructing HLA-A*02:277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:278 Protein Expression Plasmid Vector	PHLAP9251922	Plasmid vector containing HLA-A*02:278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:278 protein. This plasmid can be used for constructing HLA-A*02:278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:279 Protein Expression Plasmid Vector	PHLAP9251923	Plasmid vector containing HLA-A*02:279 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:279 protein. This plasmid can be used for constructing HLA-A*02:279 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:279 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:28 Protein Expression Plasmid Vector	PHLAP9251924	Plasmid vector containing HLA-A*02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:28 protein. This plasmid can be used for constructing HLA-A*02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:280 Protein Expression Plasmid Vector	PHLAP9251925	Plasmid vector containing HLA-A*02:280 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:280 protein. This plasmid can be used for constructing HLA-A*02:280 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:280 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:281 Protein Expression Plasmid Vector	PHLAP9251926	Plasmid vector containing HLA-A*02:281 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:281 protein. This plasmid can be used for constructing HLA-A*02:281 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:281 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:282 Protein Expression Plasmid Vector	PHLAP9251927	Plasmid vector containing HLA-A*02:282 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:282 protein. This plasmid can be used for constructing HLA-A*02:282 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:282 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:283 Protein Expression Plasmid Vector	PHLAP9251928	Plasmid vector containing HLA-A*02:283 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:283 protein. This plasmid can be used for constructing HLA-A*02:283 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:283 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:284N Protein Expression Plasmid Vector	PHLAP9251929	Plasmid vector containing HLA-A*02:284N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:284N protein. This plasmid can be used for constructing HLA-A*02:284N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:284N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:285 Protein Expression Plasmid Vector	PHLAP9251930	Plasmid vector containing HLA-A*02:285 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:285 protein. This plasmid can be used for constructing HLA-A*02:285 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:285 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:286 Protein Expression Plasmid Vector	PHLAP9251931	Plasmid vector containing HLA-A*02:286 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:286 protein. This plasmid can be used for constructing HLA-A*02:286 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:286 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:287 Protein Expression Plasmid Vector	PHLAP9251932	Plasmid vector containing HLA-A*02:287 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:287 protein. This plasmid can be used for constructing HLA-A*02:287 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:287 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:288 Protein Expression Plasmid Vector	PHLAP9251933	Plasmid vector containing HLA-A*02:288 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:288 protein. This plasmid can be used for constructing HLA-A*02:288 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:288 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:289:01 Protein Expression Plasmid Vector	PHLAP9251934	Plasmid vector containing HLA-A*02:289:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:289:01 protein. This plasmid can be used for constructing HLA-A*02:289:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:289:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:289:02 Protein Expression Plasmid Vector	PHLAP9251935	Plasmid vector containing HLA-A*02:289:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:289:02 protein. This plasmid can be used for constructing HLA-A*02:289:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:289:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:29 Protein Expression Plasmid Vector	PHLAP9251936	Plasmid vector containing HLA-A*02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:29 protein. This plasmid can be used for constructing HLA-A*02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:290 Protein Expression Plasmid Vector	PHLAP9251937	Plasmid vector containing HLA-A*02:290 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:290 protein. This plasmid can be used for constructing HLA-A*02:290 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:290 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:291 Protein Expression Plasmid Vector	PHLAP9251938	Plasmid vector containing HLA-A*02:291 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:291 protein. This plasmid can be used for constructing HLA-A*02:291 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:291 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:292 Protein Expression Plasmid Vector	PHLAP9251939	Plasmid vector containing HLA-A*02:292 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:292 protein. This plasmid can be used for constructing HLA-A*02:292 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:292 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:293Q Protein Expression Plasmid Vector	PHLAP9251940	Plasmid vector containing HLA-A*02:293Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:293Q protein. This plasmid can be used for constructing HLA-A*02:293Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:293Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:294 Protein Expression Plasmid Vector	PHLAP9251941	Plasmid vector containing HLA-A*02:294 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:294 protein. This plasmid can be used for constructing HLA-A*02:294 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:294 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:295 Protein Expression Plasmid Vector	PHLAP9251942	Plasmid vector containing HLA-A*02:295 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:295 protein. This plasmid can be used for constructing HLA-A*02:295 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:295 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:296:01 Protein Expression Plasmid Vector	PHLAP9251943	Plasmid vector containing HLA-A*02:296:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:296:01 protein. This plasmid can be used for constructing HLA-A*02:296:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:296:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:296:02 Protein Expression Plasmid Vector	PHLAP9251944	Plasmid vector containing HLA-A*02:296:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:296:02 protein. This plasmid can be used for constructing HLA-A*02:296:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:296:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:297 Protein Expression Plasmid Vector	PHLAP9251945	Plasmid vector containing HLA-A*02:297 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:297 protein. This plasmid can be used for constructing HLA-A*02:297 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:297 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:298 Protein Expression Plasmid Vector	PHLAP9251946	Plasmid vector containing HLA-A*02:298 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:298 protein. This plasmid can be used for constructing HLA-A*02:298 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:298 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:299 Protein Expression Plasmid Vector	PHLAP9251947	Plasmid vector containing HLA-A*02:299 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:299 protein. This plasmid can be used for constructing HLA-A*02:299 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:299 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:30:01 Protein Expression Plasmid Vector	PHLAP9251948	Plasmid vector containing HLA-A*02:30:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:30:01 protein. This plasmid can be used for constructing HLA-A*02:30:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:30:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:30:02 Protein Expression Plasmid Vector	PHLAP9251949	Plasmid vector containing HLA-A*02:30:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:30:02 protein. This plasmid can be used for constructing HLA-A*02:30:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:30:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:300 Protein Expression Plasmid Vector	PHLAP9251950	Plasmid vector containing HLA-A*02:300 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:300 protein. This plasmid can be used for constructing HLA-A*02:300 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:300 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:301N Protein Expression Plasmid Vector	PHLAP9251951	Plasmid vector containing HLA-A*02:301N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:301N protein. This plasmid can be used for constructing HLA-A*02:301N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:301N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:302 Protein Expression Plasmid Vector	PHLAP9251952	Plasmid vector containing HLA-A*02:302 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:302 protein. This plasmid can be used for constructing HLA-A*02:302 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:302 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:303 Protein Expression Plasmid Vector	PHLAP9251953	Plasmid vector containing HLA-A*02:303 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:303 protein. This plasmid can be used for constructing HLA-A*02:303 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:303 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:304 Protein Expression Plasmid Vector	PHLAP9251954	Plasmid vector containing HLA-A*02:304 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:304 protein. This plasmid can be used for constructing HLA-A*02:304 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:304 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:305N Protein Expression Plasmid Vector	PHLAP9251955	Plasmid vector containing HLA-A*02:305N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:305N protein. This plasmid can be used for constructing HLA-A*02:305N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:305N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:306 Protein Expression Plasmid Vector	PHLAP9251956	Plasmid vector containing HLA-A*02:306 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:306 protein. This plasmid can be used for constructing HLA-A*02:306 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:306 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:307 Protein Expression Plasmid Vector	PHLAP9251957	Plasmid vector containing HLA-A*02:307 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:307 protein. This plasmid can be used for constructing HLA-A*02:307 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:307 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:308 Protein Expression Plasmid Vector	PHLAP9251958	Plasmid vector containing HLA-A*02:308 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:308 protein. This plasmid can be used for constructing HLA-A*02:308 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:308 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:309 Protein Expression Plasmid Vector	PHLAP9251959	Plasmid vector containing HLA-A*02:309 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:309 protein. This plasmid can be used for constructing HLA-A*02:309 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:309 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:31 Protein Expression Plasmid Vector	PHLAP9251960	Plasmid vector containing HLA-A*02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:31 protein. This plasmid can be used for constructing HLA-A*02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:310 Protein Expression Plasmid Vector	PHLAP9251961	Plasmid vector containing HLA-A*02:310 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:310 protein. This plasmid can be used for constructing HLA-A*02:310 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:310 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:311 Protein Expression Plasmid Vector	PHLAP9251962	Plasmid vector containing HLA-A*02:311 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:311 protein. This plasmid can be used for constructing HLA-A*02:311 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:311 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:312 Protein Expression Plasmid Vector	PHLAP9251963	Plasmid vector containing HLA-A*02:312 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:312 protein. This plasmid can be used for constructing HLA-A*02:312 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:312 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:313 Protein Expression Plasmid Vector	PHLAP9251964	Plasmid vector containing HLA-A*02:313 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:313 protein. This plasmid can be used for constructing HLA-A*02:313 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:313 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:314:01N Protein Expression Plasmid Vector	PHLAP9251965	Plasmid vector containing HLA-A*02:314:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:314:01N protein. This plasmid can be used for constructing HLA-A*02:314:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:314:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:314:02N Protein Expression Plasmid Vector	PHLAP9251966	Plasmid vector containing HLA-A*02:314:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:314:02N protein. This plasmid can be used for constructing HLA-A*02:314:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:314:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:315 Protein Expression Plasmid Vector	PHLAP9251967	Plasmid vector containing HLA-A*02:315 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:315 protein. This plasmid can be used for constructing HLA-A*02:315 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:315 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:316 Protein Expression Plasmid Vector	PHLAP9251968	Plasmid vector containing HLA-A*02:316 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:316 protein. This plasmid can be used for constructing HLA-A*02:316 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:316 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:317 Protein Expression Plasmid Vector	PHLAP9251969	Plasmid vector containing HLA-A*02:317 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:317 protein. This plasmid can be used for constructing HLA-A*02:317 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:317 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:318 Protein Expression Plasmid Vector	PHLAP9251970	Plasmid vector containing HLA-A*02:318 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:318 protein. This plasmid can be used for constructing HLA-A*02:318 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:318 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:319 Protein Expression Plasmid Vector	PHLAP9251971	Plasmid vector containing HLA-A*02:319 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:319 protein. This plasmid can be used for constructing HLA-A*02:319 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:319 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:320 Protein Expression Plasmid Vector	PHLAP9251972	Plasmid vector containing HLA-A*02:320 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:320 protein. This plasmid can be used for constructing HLA-A*02:320 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:320 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:321N Protein Expression Plasmid Vector	PHLAP9251973	Plasmid vector containing HLA-A*02:321N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:321N protein. This plasmid can be used for constructing HLA-A*02:321N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:321N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:321N Protein Expression Plasmid Vector	PHLAP9251974	Plasmid vector containing HLA-A*02:321N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:321N protein. This plasmid can be used for constructing HLA-A*02:321N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:321N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:322 Protein Expression Plasmid Vector	PHLAP9251975	Plasmid vector containing HLA-A*02:322 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:322 protein. This plasmid can be used for constructing HLA-A*02:322 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:322 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:323 Protein Expression Plasmid Vector	PHLAP9251976	Plasmid vector containing HLA-A*02:323 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:323 protein. This plasmid can be used for constructing HLA-A*02:323 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:323 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:324 Protein Expression Plasmid Vector	PHLAP9251977	Plasmid vector containing HLA-A*02:324 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:324 protein. This plasmid can be used for constructing HLA-A*02:324 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:324 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:325 Protein Expression Plasmid Vector	PHLAP9251978	Plasmid vector containing HLA-A*02:325 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:325 protein. This plasmid can be used for constructing HLA-A*02:325 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:325 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:326 Protein Expression Plasmid Vector	PHLAP9251979	Plasmid vector containing HLA-A*02:326 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:326 protein. This plasmid can be used for constructing HLA-A*02:326 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:326 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:327 Protein Expression Plasmid Vector	PHLAP9251980	Plasmid vector containing HLA-A*02:327 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:327 protein. This plasmid can be used for constructing HLA-A*02:327 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:327 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:328 Protein Expression Plasmid Vector	PHLAP9251981	Plasmid vector containing HLA-A*02:328 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:328 protein. This plasmid can be used for constructing HLA-A*02:328 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:328 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:329 Protein Expression Plasmid Vector	PHLAP9251982	Plasmid vector containing HLA-A*02:329 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:329 protein. This plasmid can be used for constructing HLA-A*02:329 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:329 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:32N Protein Expression Plasmid Vector	PHLAP9251983	Plasmid vector containing HLA-A*02:32N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:32N protein. This plasmid can be used for constructing HLA-A*02:32N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:32N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:33 Protein Expression Plasmid Vector	PHLAP9251984	Plasmid vector containing HLA-A*02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:33 protein. This plasmid can be used for constructing HLA-A*02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:330 Protein Expression Plasmid Vector	PHLAP9251985	Plasmid vector containing HLA-A*02:330 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:330 protein. This plasmid can be used for constructing HLA-A*02:330 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:330 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:331 Protein Expression Plasmid Vector	PHLAP9251986	Plasmid vector containing HLA-A*02:331 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:331 protein. This plasmid can be used for constructing HLA-A*02:331 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:331 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:332 Protein Expression Plasmid Vector	PHLAP9251987	Plasmid vector containing HLA-A*02:332 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:332 protein. This plasmid can be used for constructing HLA-A*02:332 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:332 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:333 Protein Expression Plasmid Vector	PHLAP9251988	Plasmid vector containing HLA-A*02:333 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:333 protein. This plasmid can be used for constructing HLA-A*02:333 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:333 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:334 Protein Expression Plasmid Vector	PHLAP9251989	Plasmid vector containing HLA-A*02:334 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:334 protein. This plasmid can be used for constructing HLA-A*02:334 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:334 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:335 Protein Expression Plasmid Vector	PHLAP9251990	Plasmid vector containing HLA-A*02:335 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:335 protein. This plasmid can be used for constructing HLA-A*02:335 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:335 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:336 Protein Expression Plasmid Vector	PHLAP9251991	Plasmid vector containing HLA-A*02:336 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:336 protein. This plasmid can be used for constructing HLA-A*02:336 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:336 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:337 Protein Expression Plasmid Vector	PHLAP9251992	Plasmid vector containing HLA-A*02:337 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:337 protein. This plasmid can be used for constructing HLA-A*02:337 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:337 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:338 Protein Expression Plasmid Vector	PHLAP9251993	Plasmid vector containing HLA-A*02:338 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:338 protein. This plasmid can be used for constructing HLA-A*02:338 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:338 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:339 Protein Expression Plasmid Vector	PHLAP9251994	Plasmid vector containing HLA-A*02:339 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:339 protein. This plasmid can be used for constructing HLA-A*02:339 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:339 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:34 Protein Expression Plasmid Vector	PHLAP9251995	Plasmid vector containing HLA-A*02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:34 protein. This plasmid can be used for constructing HLA-A*02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:340 Protein Expression Plasmid Vector	PHLAP9251996	Plasmid vector containing HLA-A*02:340 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:340 protein. This plasmid can be used for constructing HLA-A*02:340 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:340 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:341 Protein Expression Plasmid Vector	PHLAP9251997	Plasmid vector containing HLA-A*02:341 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:341 protein. This plasmid can be used for constructing HLA-A*02:341 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:341 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:342 Protein Expression Plasmid Vector	PHLAP9251998	Plasmid vector containing HLA-A*02:342 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:342 protein. This plasmid can be used for constructing HLA-A*02:342 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:342 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:343 Protein Expression Plasmid Vector	PHLAP9251999	Plasmid vector containing HLA-A*02:343 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:343 protein. This plasmid can be used for constructing HLA-A*02:343 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:343 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:344 Protein Expression Plasmid Vector	PHLAP9252000	Plasmid vector containing HLA-A*02:344 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:344 protein. This plasmid can be used for constructing HLA-A*02:344 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:344 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:345 Protein Expression Plasmid Vector	PHLAP9252001	Plasmid vector containing HLA-A*02:345 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:345 protein. This plasmid can be used for constructing HLA-A*02:345 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:345 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:346 Protein Expression Plasmid Vector	PHLAP9252002	Plasmid vector containing HLA-A*02:346 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:346 protein. This plasmid can be used for constructing HLA-A*02:346 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:346 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:347 Protein Expression Plasmid Vector	PHLAP9252003	Plasmid vector containing HLA-A*02:347 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:347 protein. This plasmid can be used for constructing HLA-A*02:347 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:347 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:348 Protein Expression Plasmid Vector	PHLAP9252004	Plasmid vector containing HLA-A*02:348 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:348 protein. This plasmid can be used for constructing HLA-A*02:348 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:348 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:349 Protein Expression Plasmid Vector	PHLAP9252005	Plasmid vector containing HLA-A*02:349 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:349 protein. This plasmid can be used for constructing HLA-A*02:349 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:349 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:35:01 Protein Expression Plasmid Vector	PHLAP9252006	Plasmid vector containing HLA-A*02:35:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:35:01 protein. This plasmid can be used for constructing HLA-A*02:35:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:35:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:35:02 Protein Expression Plasmid Vector	PHLAP9252007	Plasmid vector containing HLA-A*02:35:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:35:02 protein. This plasmid can be used for constructing HLA-A*02:35:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:35:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:35:03 Protein Expression Plasmid Vector	PHLAP9252008	Plasmid vector containing HLA-A*02:35:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:35:03 protein. This plasmid can be used for constructing HLA-A*02:35:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:35:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:350N Protein Expression Plasmid Vector	PHLAP9252009	Plasmid vector containing HLA-A*02:350N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:350N protein. This plasmid can be used for constructing HLA-A*02:350N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:350N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:351 Protein Expression Plasmid Vector	PHLAP9252010	Plasmid vector containing HLA-A*02:351 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:351 protein. This plasmid can be used for constructing HLA-A*02:351 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:351 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:352 Protein Expression Plasmid Vector	PHLAP9252011	Plasmid vector containing HLA-A*02:352 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:352 protein. This plasmid can be used for constructing HLA-A*02:352 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:352 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:353 Protein Expression Plasmid Vector	PHLAP9252012	Plasmid vector containing HLA-A*02:353 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:353 protein. This plasmid can be used for constructing HLA-A*02:353 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:353 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:354 Protein Expression Plasmid Vector	PHLAP9252013	Plasmid vector containing HLA-A*02:354 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:354 protein. This plasmid can be used for constructing HLA-A*02:354 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:354 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:355 Protein Expression Plasmid Vector	PHLAP9252014	Plasmid vector containing HLA-A*02:355 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:355 protein. This plasmid can be used for constructing HLA-A*02:355 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:355 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:356N Protein Expression Plasmid Vector	PHLAP9252015	Plasmid vector containing HLA-A*02:356N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:356N protein. This plasmid can be used for constructing HLA-A*02:356N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:356N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:357 Protein Expression Plasmid Vector	PHLAP9252016	Plasmid vector containing HLA-A*02:357 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:357 protein. This plasmid can be used for constructing HLA-A*02:357 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:357 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:358 Protein Expression Plasmid Vector	PHLAP9252017	Plasmid vector containing HLA-A*02:358 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:358 protein. This plasmid can be used for constructing HLA-A*02:358 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:358 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:359 Protein Expression Plasmid Vector	PHLAP9252018	Plasmid vector containing HLA-A*02:359 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:359 protein. This plasmid can be used for constructing HLA-A*02:359 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:359 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:36 Protein Expression Plasmid Vector	PHLAP9252019	Plasmid vector containing HLA-A*02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:36 protein. This plasmid can be used for constructing HLA-A*02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:360 Protein Expression Plasmid Vector	PHLAP9252020	Plasmid vector containing HLA-A*02:360 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:360 protein. This plasmid can be used for constructing HLA-A*02:360 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:360 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:361 Protein Expression Plasmid Vector	PHLAP9252021	Plasmid vector containing HLA-A*02:361 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:361 protein. This plasmid can be used for constructing HLA-A*02:361 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:361 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:362 Protein Expression Plasmid Vector	PHLAP9252022	Plasmid vector containing HLA-A*02:362 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:362 protein. This plasmid can be used for constructing HLA-A*02:362 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:362 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:363 Protein Expression Plasmid Vector	PHLAP9252023	Plasmid vector containing HLA-A*02:363 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:363 protein. This plasmid can be used for constructing HLA-A*02:363 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:363 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:364 Protein Expression Plasmid Vector	PHLAP9252024	Plasmid vector containing HLA-A*02:364 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:364 protein. This plasmid can be used for constructing HLA-A*02:364 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:364 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:365 Protein Expression Plasmid Vector	PHLAP9252025	Plasmid vector containing HLA-A*02:365 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:365 protein. This plasmid can be used for constructing HLA-A*02:365 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:365 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:366N Protein Expression Plasmid Vector	PHLAP9252026	Plasmid vector containing HLA-A*02:366N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:366N protein. This plasmid can be used for constructing HLA-A*02:366N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:366N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:367 Protein Expression Plasmid Vector	PHLAP9252027	Plasmid vector containing HLA-A*02:367 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:367 protein. This plasmid can be used for constructing HLA-A*02:367 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:367 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:368 Protein Expression Plasmid Vector	PHLAP9252028	Plasmid vector containing HLA-A*02:368 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:368 protein. This plasmid can be used for constructing HLA-A*02:368 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:368 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:369 Protein Expression Plasmid Vector	PHLAP9252029	Plasmid vector containing HLA-A*02:369 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:369 protein. This plasmid can be used for constructing HLA-A*02:369 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:369 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:37 Protein Expression Plasmid Vector	PHLAP9252030	Plasmid vector containing HLA-A*02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:37 protein. This plasmid can be used for constructing HLA-A*02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:370 Protein Expression Plasmid Vector	PHLAP9252031	Plasmid vector containing HLA-A*02:370 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:370 protein. This plasmid can be used for constructing HLA-A*02:370 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:370 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:371 Protein Expression Plasmid Vector	PHLAP9252032	Plasmid vector containing HLA-A*02:371 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:371 protein. This plasmid can be used for constructing HLA-A*02:371 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:371 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:372 Protein Expression Plasmid Vector	PHLAP9252033	Plasmid vector containing HLA-A*02:372 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:372 protein. This plasmid can be used for constructing HLA-A*02:372 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:372 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:373N Protein Expression Plasmid Vector	PHLAP9252034	Plasmid vector containing HLA-A*02:373N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:373N protein. This plasmid can be used for constructing HLA-A*02:373N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:373N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:374 Protein Expression Plasmid Vector	PHLAP9252035	Plasmid vector containing HLA-A*02:374 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:374 protein. This plasmid can be used for constructing HLA-A*02:374 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:374 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:375 Protein Expression Plasmid Vector	PHLAP9252036	Plasmid vector containing HLA-A*02:375 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:375 protein. This plasmid can be used for constructing HLA-A*02:375 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:375 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:376 Protein Expression Plasmid Vector	PHLAP9252037	Plasmid vector containing HLA-A*02:376 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:376 protein. This plasmid can be used for constructing HLA-A*02:376 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:376 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:377 Protein Expression Plasmid Vector	PHLAP9252038	Plasmid vector containing HLA-A*02:377 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:377 protein. This plasmid can be used for constructing HLA-A*02:377 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:377 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:378 Protein Expression Plasmid Vector	PHLAP9252039	Plasmid vector containing HLA-A*02:378 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:378 protein. This plasmid can be used for constructing HLA-A*02:378 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:378 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:379 Protein Expression Plasmid Vector	PHLAP9252040	Plasmid vector containing HLA-A*02:379 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:379 protein. This plasmid can be used for constructing HLA-A*02:379 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:379 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:38 Protein Expression Plasmid Vector	PHLAP9252041	Plasmid vector containing HLA-A*02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:38 protein. This plasmid can be used for constructing HLA-A*02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:380 Protein Expression Plasmid Vector	PHLAP9252042	Plasmid vector containing HLA-A*02:380 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:380 protein. This plasmid can be used for constructing HLA-A*02:380 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:380 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:381 Protein Expression Plasmid Vector	PHLAP9252043	Plasmid vector containing HLA-A*02:381 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:381 protein. This plasmid can be used for constructing HLA-A*02:381 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:381 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:382 Protein Expression Plasmid Vector	PHLAP9252044	Plasmid vector containing HLA-A*02:382 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:382 protein. This plasmid can be used for constructing HLA-A*02:382 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:382 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:383 Protein Expression Plasmid Vector	PHLAP9252045	Plasmid vector containing HLA-A*02:383 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:383 protein. This plasmid can be used for constructing HLA-A*02:383 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:383 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:384 Protein Expression Plasmid Vector	PHLAP9252046	Plasmid vector containing HLA-A*02:384 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:384 protein. This plasmid can be used for constructing HLA-A*02:384 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:384 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:385 Protein Expression Plasmid Vector	PHLAP9252047	Plasmid vector containing HLA-A*02:385 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:385 protein. This plasmid can be used for constructing HLA-A*02:385 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:385 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:386 Protein Expression Plasmid Vector	PHLAP9252048	Plasmid vector containing HLA-A*02:386 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:386 protein. This plasmid can be used for constructing HLA-A*02:386 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:386 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:387 Protein Expression Plasmid Vector	PHLAP9252049	Plasmid vector containing HLA-A*02:387 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:387 protein. This plasmid can be used for constructing HLA-A*02:387 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:387 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:388 Protein Expression Plasmid Vector	PHLAP9252050	Plasmid vector containing HLA-A*02:388 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:388 protein. This plasmid can be used for constructing HLA-A*02:388 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:388 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:389 Protein Expression Plasmid Vector	PHLAP9252051	Plasmid vector containing HLA-A*02:389 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:389 protein. This plasmid can be used for constructing HLA-A*02:389 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:389 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:39 Protein Expression Plasmid Vector	PHLAP9252052	Plasmid vector containing HLA-A*02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:39 protein. This plasmid can be used for constructing HLA-A*02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:390 Protein Expression Plasmid Vector	PHLAP9252053	Plasmid vector containing HLA-A*02:390 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:390 protein. This plasmid can be used for constructing HLA-A*02:390 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:390 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:391 Protein Expression Plasmid Vector	PHLAP9252054	Plasmid vector containing HLA-A*02:391 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:391 protein. This plasmid can be used for constructing HLA-A*02:391 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:391 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:392 Protein Expression Plasmid Vector	PHLAP9252055	Plasmid vector containing HLA-A*02:392 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:392 protein. This plasmid can be used for constructing HLA-A*02:392 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:392 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:393 Protein Expression Plasmid Vector	PHLAP9252056	Plasmid vector containing HLA-A*02:393 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:393 protein. This plasmid can be used for constructing HLA-A*02:393 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:393 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:394 Protein Expression Plasmid Vector	PHLAP9252057	Plasmid vector containing HLA-A*02:394 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:394 protein. This plasmid can be used for constructing HLA-A*02:394 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:394 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:395N Protein Expression Plasmid Vector	PHLAP9252058	Plasmid vector containing HLA-A*02:395N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:395N protein. This plasmid can be used for constructing HLA-A*02:395N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:395N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:396 Protein Expression Plasmid Vector	PHLAP9252059	Plasmid vector containing HLA-A*02:396 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:396 protein. This plasmid can be used for constructing HLA-A*02:396 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:396 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:397 Protein Expression Plasmid Vector	PHLAP9252060	Plasmid vector containing HLA-A*02:397 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:397 protein. This plasmid can be used for constructing HLA-A*02:397 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:397 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:398 Protein Expression Plasmid Vector	PHLAP9252061	Plasmid vector containing HLA-A*02:398 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:398 protein. This plasmid can be used for constructing HLA-A*02:398 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:398 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:399 Protein Expression Plasmid Vector	PHLAP9252062	Plasmid vector containing HLA-A*02:399 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:399 protein. This plasmid can be used for constructing HLA-A*02:399 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:399 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:40:01 Protein Expression Plasmid Vector	PHLAP9252063	Plasmid vector containing HLA-A*02:40:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:40:01 protein. This plasmid can be used for constructing HLA-A*02:40:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:40:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:40:02 Protein Expression Plasmid Vector	PHLAP9252064	Plasmid vector containing HLA-A*02:40:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:40:02 protein. This plasmid can be used for constructing HLA-A*02:40:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:40:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:400 Protein Expression Plasmid Vector	PHLAP9252065	Plasmid vector containing HLA-A*02:400 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:400 protein. This plasmid can be used for constructing HLA-A*02:400 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:400 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:401 Protein Expression Plasmid Vector	PHLAP9252066	Plasmid vector containing HLA-A*02:401 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:401 protein. This plasmid can be used for constructing HLA-A*02:401 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:401 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:402 Protein Expression Plasmid Vector	PHLAP9252067	Plasmid vector containing HLA-A*02:402 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:402 protein. This plasmid can be used for constructing HLA-A*02:402 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:402 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:403 Protein Expression Plasmid Vector	PHLAP9252068	Plasmid vector containing HLA-A*02:403 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:403 protein. This plasmid can be used for constructing HLA-A*02:403 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:403 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:404 Protein Expression Plasmid Vector	PHLAP9252069	Plasmid vector containing HLA-A*02:404 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:404 protein. This plasmid can be used for constructing HLA-A*02:404 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:404 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:405 Protein Expression Plasmid Vector	PHLAP9252070	Plasmid vector containing HLA-A*02:405 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:405 protein. This plasmid can be used for constructing HLA-A*02:405 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:405 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:406 Protein Expression Plasmid Vector	PHLAP9252071	Plasmid vector containing HLA-A*02:406 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:406 protein. This plasmid can be used for constructing HLA-A*02:406 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:406 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:407 Protein Expression Plasmid Vector	PHLAP9252072	Plasmid vector containing HLA-A*02:407 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:407 protein. This plasmid can be used for constructing HLA-A*02:407 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:407 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:408 Protein Expression Plasmid Vector	PHLAP9252073	Plasmid vector containing HLA-A*02:408 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:408 protein. This plasmid can be used for constructing HLA-A*02:408 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:408 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:409 Protein Expression Plasmid Vector	PHLAP9252074	Plasmid vector containing HLA-A*02:409 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:409 protein. This plasmid can be used for constructing HLA-A*02:409 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:409 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:41 Protein Expression Plasmid Vector	PHLAP9252075	Plasmid vector containing HLA-A*02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:41 protein. This plasmid can be used for constructing HLA-A*02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:410 Protein Expression Plasmid Vector	PHLAP9252076	Plasmid vector containing HLA-A*02:410 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:410 protein. This plasmid can be used for constructing HLA-A*02:410 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:410 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:411 Protein Expression Plasmid Vector	PHLAP9252077	Plasmid vector containing HLA-A*02:411 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:411 protein. This plasmid can be used for constructing HLA-A*02:411 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:411 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:412 Protein Expression Plasmid Vector	PHLAP9252078	Plasmid vector containing HLA-A*02:412 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:412 protein. This plasmid can be used for constructing HLA-A*02:412 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:412 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:413 Protein Expression Plasmid Vector	PHLAP9252079	Plasmid vector containing HLA-A*02:413 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:413 protein. This plasmid can be used for constructing HLA-A*02:413 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:413 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:414 Protein Expression Plasmid Vector	PHLAP9252080	Plasmid vector containing HLA-A*02:414 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:414 protein. This plasmid can be used for constructing HLA-A*02:414 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:414 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:415 Protein Expression Plasmid Vector	PHLAP9252081	Plasmid vector containing HLA-A*02:415 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:415 protein. This plasmid can be used for constructing HLA-A*02:415 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:415 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:416 Protein Expression Plasmid Vector	PHLAP9252082	Plasmid vector containing HLA-A*02:416 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:416 protein. This plasmid can be used for constructing HLA-A*02:416 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:416 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:417 Protein Expression Plasmid Vector	PHLAP9252083	Plasmid vector containing HLA-A*02:417 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:417 protein. This plasmid can be used for constructing HLA-A*02:417 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:417 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:418 Protein Expression Plasmid Vector	PHLAP9252084	Plasmid vector containing HLA-A*02:418 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:418 protein. This plasmid can be used for constructing HLA-A*02:418 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:418 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:419:01 Protein Expression Plasmid Vector	PHLAP9252085	Plasmid vector containing HLA-A*02:419:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:419:01 protein. This plasmid can be used for constructing HLA-A*02:419:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:419:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:419:02 Protein Expression Plasmid Vector	PHLAP9252086	Plasmid vector containing HLA-A*02:419:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:419:02 protein. This plasmid can be used for constructing HLA-A*02:419:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:419:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:42:01 Protein Expression Plasmid Vector	PHLAP9252087	Plasmid vector containing HLA-A*02:42:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:42:01 protein. This plasmid can be used for constructing HLA-A*02:42:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:42:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:42:02 Protein Expression Plasmid Vector	PHLAP9252088	Plasmid vector containing HLA-A*02:42:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:42:02 protein. This plasmid can be used for constructing HLA-A*02:42:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:42:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:420 Protein Expression Plasmid Vector	PHLAP9252089	Plasmid vector containing HLA-A*02:420 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:420 protein. This plasmid can be used for constructing HLA-A*02:420 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:420 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:421 Protein Expression Plasmid Vector	PHLAP9252090	Plasmid vector containing HLA-A*02:421 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:421 protein. This plasmid can be used for constructing HLA-A*02:421 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:421 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:422 Protein Expression Plasmid Vector	PHLAP9252091	Plasmid vector containing HLA-A*02:422 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:422 protein. This plasmid can be used for constructing HLA-A*02:422 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:422 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:423 Protein Expression Plasmid Vector	PHLAP9252092	Plasmid vector containing HLA-A*02:423 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:423 protein. This plasmid can be used for constructing HLA-A*02:423 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:423 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:424 Protein Expression Plasmid Vector	PHLAP9252093	Plasmid vector containing HLA-A*02:424 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:424 protein. This plasmid can be used for constructing HLA-A*02:424 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:424 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:425 Protein Expression Plasmid Vector	PHLAP9252094	Plasmid vector containing HLA-A*02:425 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:425 protein. This plasmid can be used for constructing HLA-A*02:425 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:425 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:426 Protein Expression Plasmid Vector	PHLAP9252095	Plasmid vector containing HLA-A*02:426 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:426 protein. This plasmid can be used for constructing HLA-A*02:426 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:426 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:427 Protein Expression Plasmid Vector	PHLAP9252096	Plasmid vector containing HLA-A*02:427 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:427 protein. This plasmid can be used for constructing HLA-A*02:427 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:427 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:428 Protein Expression Plasmid Vector	PHLAP9252097	Plasmid vector containing HLA-A*02:428 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:428 protein. This plasmid can be used for constructing HLA-A*02:428 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:428 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:429 Protein Expression Plasmid Vector	PHLAP9252098	Plasmid vector containing HLA-A*02:429 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:429 protein. This plasmid can be used for constructing HLA-A*02:429 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:429 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:430 Protein Expression Plasmid Vector	PHLAP9252099	Plasmid vector containing HLA-A*02:430 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:430 protein. This plasmid can be used for constructing HLA-A*02:430 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:430 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:431 Protein Expression Plasmid Vector	PHLAP9252100	Plasmid vector containing HLA-A*02:431 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:431 protein. This plasmid can be used for constructing HLA-A*02:431 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:431 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:432 Protein Expression Plasmid Vector	PHLAP9252101	Plasmid vector containing HLA-A*02:432 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:432 protein. This plasmid can be used for constructing HLA-A*02:432 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:432 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:433 Protein Expression Plasmid Vector	PHLAP9252102	Plasmid vector containing HLA-A*02:433 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:433 protein. This plasmid can be used for constructing HLA-A*02:433 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:433 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:434 Protein Expression Plasmid Vector	PHLAP9252103	Plasmid vector containing HLA-A*02:434 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:434 protein. This plasmid can be used for constructing HLA-A*02:434 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:434 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:435 Protein Expression Plasmid Vector	PHLAP9252104	Plasmid vector containing HLA-A*02:435 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:435 protein. This plasmid can be used for constructing HLA-A*02:435 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:435 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:436 Protein Expression Plasmid Vector	PHLAP9252105	Plasmid vector containing HLA-A*02:436 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:436 protein. This plasmid can be used for constructing HLA-A*02:436 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:436 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:437Q Protein Expression Plasmid Vector	PHLAP9252106	Plasmid vector containing HLA-A*02:437Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:437Q protein. This plasmid can be used for constructing HLA-A*02:437Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:437Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:438 Protein Expression Plasmid Vector	PHLAP9252107	Plasmid vector containing HLA-A*02:438 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:438 protein. This plasmid can be used for constructing HLA-A*02:438 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:438 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:439N Protein Expression Plasmid Vector	PHLAP9252108	Plasmid vector containing HLA-A*02:439N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:439N protein. This plasmid can be used for constructing HLA-A*02:439N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:439N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:43N Protein Expression Plasmid Vector	PHLAP9252109	Plasmid vector containing HLA-A*02:43N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:43N protein. This plasmid can be used for constructing HLA-A*02:43N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:43N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:44 Protein Expression Plasmid Vector	PHLAP9252110	Plasmid vector containing HLA-A*02:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:44 protein. This plasmid can be used for constructing HLA-A*02:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:440Q Protein Expression Plasmid Vector	PHLAP9252111	Plasmid vector containing HLA-A*02:440Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:440Q protein. This plasmid can be used for constructing HLA-A*02:440Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:440Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:441 Protein Expression Plasmid Vector	PHLAP9252112	Plasmid vector containing HLA-A*02:441 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:441 protein. This plasmid can be used for constructing HLA-A*02:441 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:441 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:442 Protein Expression Plasmid Vector	PHLAP9252113	Plasmid vector containing HLA-A*02:442 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:442 protein. This plasmid can be used for constructing HLA-A*02:442 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:442 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:443 Protein Expression Plasmid Vector	PHLAP9252114	Plasmid vector containing HLA-A*02:443 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:443 protein. This plasmid can be used for constructing HLA-A*02:443 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:443 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:444 Protein Expression Plasmid Vector	PHLAP9252115	Plasmid vector containing HLA-A*02:444 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:444 protein. This plasmid can be used for constructing HLA-A*02:444 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:444 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:445 Protein Expression Plasmid Vector	PHLAP9252116	Plasmid vector containing HLA-A*02:445 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:445 protein. This plasmid can be used for constructing HLA-A*02:445 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:445 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:446 Protein Expression Plasmid Vector	PHLAP9252117	Plasmid vector containing HLA-A*02:446 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:446 protein. This plasmid can be used for constructing HLA-A*02:446 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:446 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:447 Protein Expression Plasmid Vector	PHLAP9252118	Plasmid vector containing HLA-A*02:447 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:447 protein. This plasmid can be used for constructing HLA-A*02:447 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:447 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:448 Protein Expression Plasmid Vector	PHLAP9252119	Plasmid vector containing HLA-A*02:448 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:448 protein. This plasmid can be used for constructing HLA-A*02:448 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:448 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:449 Protein Expression Plasmid Vector	PHLAP9252120	Plasmid vector containing HLA-A*02:449 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:449 protein. This plasmid can be used for constructing HLA-A*02:449 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:449 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:45 Protein Expression Plasmid Vector	PHLAP9252121	Plasmid vector containing HLA-A*02:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:45 protein. This plasmid can be used for constructing HLA-A*02:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:450 Protein Expression Plasmid Vector	PHLAP9252122	Plasmid vector containing HLA-A*02:450 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:450 protein. This plasmid can be used for constructing HLA-A*02:450 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:450 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:451 Protein Expression Plasmid Vector	PHLAP9252123	Plasmid vector containing HLA-A*02:451 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:451 protein. This plasmid can be used for constructing HLA-A*02:451 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:451 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:452 Protein Expression Plasmid Vector	PHLAP9252124	Plasmid vector containing HLA-A*02:452 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:452 protein. This plasmid can be used for constructing HLA-A*02:452 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:452 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:453 Protein Expression Plasmid Vector	PHLAP9252125	Plasmid vector containing HLA-A*02:453 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:453 protein. This plasmid can be used for constructing HLA-A*02:453 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:453 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:454 Protein Expression Plasmid Vector	PHLAP9252126	Plasmid vector containing HLA-A*02:454 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:454 protein. This plasmid can be used for constructing HLA-A*02:454 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:454 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:455 Protein Expression Plasmid Vector	PHLAP9252127	Plasmid vector containing HLA-A*02:455 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:455 protein. This plasmid can be used for constructing HLA-A*02:455 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:455 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:456 Protein Expression Plasmid Vector	PHLAP9252128	Plasmid vector containing HLA-A*02:456 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:456 protein. This plasmid can be used for constructing HLA-A*02:456 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:456 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:457 Protein Expression Plasmid Vector	PHLAP9252129	Plasmid vector containing HLA-A*02:457 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:457 protein. This plasmid can be used for constructing HLA-A*02:457 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:457 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:458 Protein Expression Plasmid Vector	PHLAP9252130	Plasmid vector containing HLA-A*02:458 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:458 protein. This plasmid can be used for constructing HLA-A*02:458 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:458 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:459 Protein Expression Plasmid Vector	PHLAP9252131	Plasmid vector containing HLA-A*02:459 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:459 protein. This plasmid can be used for constructing HLA-A*02:459 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:459 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:46 Protein Expression Plasmid Vector	PHLAP9252132	Plasmid vector containing HLA-A*02:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:46 protein. This plasmid can be used for constructing HLA-A*02:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:460 Protein Expression Plasmid Vector	PHLAP9252133	Plasmid vector containing HLA-A*02:460 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:460 protein. This plasmid can be used for constructing HLA-A*02:460 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:460 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:461 Protein Expression Plasmid Vector	PHLAP9252134	Plasmid vector containing HLA-A*02:461 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:461 protein. This plasmid can be used for constructing HLA-A*02:461 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:461 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:462 Protein Expression Plasmid Vector	PHLAP9252135	Plasmid vector containing HLA-A*02:462 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:462 protein. This plasmid can be used for constructing HLA-A*02:462 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:462 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:463 Protein Expression Plasmid Vector	PHLAP9252136	Plasmid vector containing HLA-A*02:463 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:463 protein. This plasmid can be used for constructing HLA-A*02:463 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:463 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:464 Protein Expression Plasmid Vector	PHLAP9252137	Plasmid vector containing HLA-A*02:464 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:464 protein. This plasmid can be used for constructing HLA-A*02:464 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:464 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:465 Protein Expression Plasmid Vector	PHLAP9252138	Plasmid vector containing HLA-A*02:465 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:465 protein. This plasmid can be used for constructing HLA-A*02:465 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:465 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:466 Protein Expression Plasmid Vector	PHLAP9252139	Plasmid vector containing HLA-A*02:466 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:466 protein. This plasmid can be used for constructing HLA-A*02:466 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:466 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:467 Protein Expression Plasmid Vector	PHLAP9252140	Plasmid vector containing HLA-A*02:467 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:467 protein. This plasmid can be used for constructing HLA-A*02:467 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:467 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:468:01N Protein Expression Plasmid Vector	PHLAP9252141	Plasmid vector containing HLA-A*02:468:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:468:01N protein. This plasmid can be used for constructing HLA-A*02:468:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:468:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:468:02N Protein Expression Plasmid Vector	PHLAP9252142	Plasmid vector containing HLA-A*02:468:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:468:02N protein. This plasmid can be used for constructing HLA-A*02:468:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:468:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:469 Protein Expression Plasmid Vector	PHLAP9252143	Plasmid vector containing HLA-A*02:469 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:469 protein. This plasmid can be used for constructing HLA-A*02:469 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:469 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:47 Protein Expression Plasmid Vector	PHLAP9252144	Plasmid vector containing HLA-A*02:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:47 protein. This plasmid can be used for constructing HLA-A*02:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:470 Protein Expression Plasmid Vector	PHLAP9252145	Plasmid vector containing HLA-A*02:470 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:470 protein. This plasmid can be used for constructing HLA-A*02:470 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:470 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:471 Protein Expression Plasmid Vector	PHLAP9252146	Plasmid vector containing HLA-A*02:471 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:471 protein. This plasmid can be used for constructing HLA-A*02:471 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:471 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:472 Protein Expression Plasmid Vector	PHLAP9252147	Plasmid vector containing HLA-A*02:472 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:472 protein. This plasmid can be used for constructing HLA-A*02:472 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:472 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:473 Protein Expression Plasmid Vector	PHLAP9252148	Plasmid vector containing HLA-A*02:473 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:473 protein. This plasmid can be used for constructing HLA-A*02:473 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:473 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:474 Protein Expression Plasmid Vector	PHLAP9252149	Plasmid vector containing HLA-A*02:474 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:474 protein. This plasmid can be used for constructing HLA-A*02:474 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:474 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:475 Protein Expression Plasmid Vector	PHLAP9252150	Plasmid vector containing HLA-A*02:475 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:475 protein. This plasmid can be used for constructing HLA-A*02:475 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:475 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:476N Protein Expression Plasmid Vector	PHLAP9252151	Plasmid vector containing HLA-A*02:476N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:476N protein. This plasmid can be used for constructing HLA-A*02:476N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:476N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:477 Protein Expression Plasmid Vector	PHLAP9252152	Plasmid vector containing HLA-A*02:477 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:477 protein. This plasmid can be used for constructing HLA-A*02:477 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:477 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:478 Protein Expression Plasmid Vector	PHLAP9252153	Plasmid vector containing HLA-A*02:478 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:478 protein. This plasmid can be used for constructing HLA-A*02:478 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:478 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:479 Protein Expression Plasmid Vector	PHLAP9252154	Plasmid vector containing HLA-A*02:479 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:479 protein. This plasmid can be used for constructing HLA-A*02:479 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:479 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:48 Protein Expression Plasmid Vector	PHLAP9252155	Plasmid vector containing HLA-A*02:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:48 protein. This plasmid can be used for constructing HLA-A*02:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:480 Protein Expression Plasmid Vector	PHLAP9252156	Plasmid vector containing HLA-A*02:480 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:480 protein. This plasmid can be used for constructing HLA-A*02:480 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:480 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:481 Protein Expression Plasmid Vector	PHLAP9252157	Plasmid vector containing HLA-A*02:481 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:481 protein. This plasmid can be used for constructing HLA-A*02:481 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:481 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:482 Protein Expression Plasmid Vector	PHLAP9252158	Plasmid vector containing HLA-A*02:482 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:482 protein. This plasmid can be used for constructing HLA-A*02:482 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:482 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:483 Protein Expression Plasmid Vector	PHLAP9252159	Plasmid vector containing HLA-A*02:483 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:483 protein. This plasmid can be used for constructing HLA-A*02:483 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:483 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:484 Protein Expression Plasmid Vector	PHLAP9252160	Plasmid vector containing HLA-A*02:484 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:484 protein. This plasmid can be used for constructing HLA-A*02:484 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:484 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:485 Protein Expression Plasmid Vector	PHLAP9252161	Plasmid vector containing HLA-A*02:485 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:485 protein. This plasmid can be used for constructing HLA-A*02:485 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:485 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:486 Protein Expression Plasmid Vector	PHLAP9252162	Plasmid vector containing HLA-A*02:486 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:486 protein. This plasmid can be used for constructing HLA-A*02:486 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:486 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:487 Protein Expression Plasmid Vector	PHLAP9252163	Plasmid vector containing HLA-A*02:487 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:487 protein. This plasmid can be used for constructing HLA-A*02:487 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:487 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:488 Protein Expression Plasmid Vector	PHLAP9252164	Plasmid vector containing HLA-A*02:488 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:488 protein. This plasmid can be used for constructing HLA-A*02:488 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:488 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:489 Protein Expression Plasmid Vector	PHLAP9252165	Plasmid vector containing HLA-A*02:489 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:489 protein. This plasmid can be used for constructing HLA-A*02:489 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:489 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:49:01 Protein Expression Plasmid Vector	PHLAP9252166	Plasmid vector containing HLA-A*02:49:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:49:01 protein. This plasmid can be used for constructing HLA-A*02:49:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:49:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:49:02 Protein Expression Plasmid Vector	PHLAP9252167	Plasmid vector containing HLA-A*02:49:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:49:02 protein. This plasmid can be used for constructing HLA-A*02:49:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:49:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:490N Protein Expression Plasmid Vector	PHLAP9252168	Plasmid vector containing HLA-A*02:490N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:490N protein. This plasmid can be used for constructing HLA-A*02:490N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:490N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:491 Protein Expression Plasmid Vector	PHLAP9252169	Plasmid vector containing HLA-A*02:491 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:491 protein. This plasmid can be used for constructing HLA-A*02:491 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:491 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:492 Protein Expression Plasmid Vector	PHLAP9252170	Plasmid vector containing HLA-A*02:492 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:492 protein. This plasmid can be used for constructing HLA-A*02:492 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:492 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:493 Protein Expression Plasmid Vector	PHLAP9252171	Plasmid vector containing HLA-A*02:493 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:493 protein. This plasmid can be used for constructing HLA-A*02:493 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:493 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:494 Protein Expression Plasmid Vector	PHLAP9252172	Plasmid vector containing HLA-A*02:494 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:494 protein. This plasmid can be used for constructing HLA-A*02:494 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:494 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:495 Protein Expression Plasmid Vector	PHLAP9252173	Plasmid vector containing HLA-A*02:495 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:495 protein. This plasmid can be used for constructing HLA-A*02:495 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:495 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:496 Protein Expression Plasmid Vector	PHLAP9252174	Plasmid vector containing HLA-A*02:496 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:496 protein. This plasmid can be used for constructing HLA-A*02:496 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:496 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:497 Protein Expression Plasmid Vector	PHLAP9252175	Plasmid vector containing HLA-A*02:497 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:497 protein. This plasmid can be used for constructing HLA-A*02:497 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:497 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:498 Protein Expression Plasmid Vector	PHLAP9252176	Plasmid vector containing HLA-A*02:498 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:498 protein. This plasmid can be used for constructing HLA-A*02:498 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:498 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:499 Protein Expression Plasmid Vector	PHLAP9252177	Plasmid vector containing HLA-A*02:499 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:499 protein. This plasmid can be used for constructing HLA-A*02:499 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:499 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:50 Protein Expression Plasmid Vector	PHLAP9252178	Plasmid vector containing HLA-A*02:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:50 protein. This plasmid can be used for constructing HLA-A*02:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:500Q Protein Expression Plasmid Vector	PHLAP9252179	Plasmid vector containing HLA-A*02:500Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:500Q protein. This plasmid can be used for constructing HLA-A*02:500Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:500Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:501:01N Protein Expression Plasmid Vector	PHLAP9252180	Plasmid vector containing HLA-A*02:501:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:501:01N protein. This plasmid can be used for constructing HLA-A*02:501:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:501:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:501:02N Protein Expression Plasmid Vector	PHLAP9252181	Plasmid vector containing HLA-A*02:501:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:501:02N protein. This plasmid can be used for constructing HLA-A*02:501:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:501:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:502 Protein Expression Plasmid Vector	PHLAP9252182	Plasmid vector containing HLA-A*02:502 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:502 protein. This plasmid can be used for constructing HLA-A*02:502 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:502 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:503 Protein Expression Plasmid Vector	PHLAP9252183	Plasmid vector containing HLA-A*02:503 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:503 protein. This plasmid can be used for constructing HLA-A*02:503 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:503 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:504 Protein Expression Plasmid Vector	PHLAP9252184	Plasmid vector containing HLA-A*02:504 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:504 protein. This plasmid can be used for constructing HLA-A*02:504 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:504 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:505 Protein Expression Plasmid Vector	PHLAP9252185	Plasmid vector containing HLA-A*02:505 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:505 protein. This plasmid can be used for constructing HLA-A*02:505 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:505 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:506N Protein Expression Plasmid Vector	PHLAP9252186	Plasmid vector containing HLA-A*02:506N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:506N protein. This plasmid can be used for constructing HLA-A*02:506N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:506N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:507 Protein Expression Plasmid Vector	PHLAP9252187	Plasmid vector containing HLA-A*02:507 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:507 protein. This plasmid can be used for constructing HLA-A*02:507 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:507 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:508 Protein Expression Plasmid Vector	PHLAP9252188	Plasmid vector containing HLA-A*02:508 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:508 protein. This plasmid can be used for constructing HLA-A*02:508 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:508 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:509 Protein Expression Plasmid Vector	PHLAP9252189	Plasmid vector containing HLA-A*02:509 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:509 protein. This plasmid can be used for constructing HLA-A*02:509 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:509 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:51 Protein Expression Plasmid Vector	PHLAP9252190	Plasmid vector containing HLA-A*02:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:51 protein. This plasmid can be used for constructing HLA-A*02:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:510 Protein Expression Plasmid Vector	PHLAP9252191	Plasmid vector containing HLA-A*02:510 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:510 protein. This plasmid can be used for constructing HLA-A*02:510 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:510 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:511 Protein Expression Plasmid Vector	PHLAP9252192	Plasmid vector containing HLA-A*02:511 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:511 protein. This plasmid can be used for constructing HLA-A*02:511 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:511 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:512 Protein Expression Plasmid Vector	PHLAP9252193	Plasmid vector containing HLA-A*02:512 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:512 protein. This plasmid can be used for constructing HLA-A*02:512 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:512 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:513 Protein Expression Plasmid Vector	PHLAP9252194	Plasmid vector containing HLA-A*02:513 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:513 protein. This plasmid can be used for constructing HLA-A*02:513 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:513 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:514N Protein Expression Plasmid Vector	PHLAP9252195	Plasmid vector containing HLA-A*02:514N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:514N protein. This plasmid can be used for constructing HLA-A*02:514N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:514N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:515 Protein Expression Plasmid Vector	PHLAP9252196	Plasmid vector containing HLA-A*02:515 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:515 protein. This plasmid can be used for constructing HLA-A*02:515 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:515 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:516N Protein Expression Plasmid Vector	PHLAP9252197	Plasmid vector containing HLA-A*02:516N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:516N protein. This plasmid can be used for constructing HLA-A*02:516N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:516N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:517 Protein Expression Plasmid Vector	PHLAP9252198	Plasmid vector containing HLA-A*02:517 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:517 protein. This plasmid can be used for constructing HLA-A*02:517 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:517 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:518 Protein Expression Plasmid Vector	PHLAP9252199	Plasmid vector containing HLA-A*02:518 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:518 protein. This plasmid can be used for constructing HLA-A*02:518 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:518 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:519 Protein Expression Plasmid Vector	PHLAP9252200	Plasmid vector containing HLA-A*02:519 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:519 protein. This plasmid can be used for constructing HLA-A*02:519 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:519 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:52 Protein Expression Plasmid Vector	PHLAP9252201	Plasmid vector containing HLA-A*02:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:52 protein. This plasmid can be used for constructing HLA-A*02:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:520 Protein Expression Plasmid Vector	PHLAP9252202	Plasmid vector containing HLA-A*02:520 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:520 protein. This plasmid can be used for constructing HLA-A*02:520 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:520 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:521 Protein Expression Plasmid Vector	PHLAP9252203	Plasmid vector containing HLA-A*02:521 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:521 protein. This plasmid can be used for constructing HLA-A*02:521 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:521 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:522 Protein Expression Plasmid Vector	PHLAP9252204	Plasmid vector containing HLA-A*02:522 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:522 protein. This plasmid can be used for constructing HLA-A*02:522 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:522 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:523 Protein Expression Plasmid Vector	PHLAP9252205	Plasmid vector containing HLA-A*02:523 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:523 protein. This plasmid can be used for constructing HLA-A*02:523 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:523 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:524:01 Protein Expression Plasmid Vector	PHLAP9252206	Plasmid vector containing HLA-A*02:524:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:524:01 protein. This plasmid can be used for constructing HLA-A*02:524:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:524:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:524:02 Protein Expression Plasmid Vector	PHLAP9252207	Plasmid vector containing HLA-A*02:524:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:524:02 protein. This plasmid can be used for constructing HLA-A*02:524:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:524:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:525N Protein Expression Plasmid Vector	PHLAP9252208	Plasmid vector containing HLA-A*02:525N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:525N protein. This plasmid can be used for constructing HLA-A*02:525N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:525N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:526 Protein Expression Plasmid Vector	PHLAP9252209	Plasmid vector containing HLA-A*02:526 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:526 protein. This plasmid can be used for constructing HLA-A*02:526 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:526 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:527 Protein Expression Plasmid Vector	PHLAP9252210	Plasmid vector containing HLA-A*02:527 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:527 protein. This plasmid can be used for constructing HLA-A*02:527 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:527 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:528:01 Protein Expression Plasmid Vector	PHLAP9252211	Plasmid vector containing HLA-A*02:528:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:528:01 protein. This plasmid can be used for constructing HLA-A*02:528:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:528:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:528:02 Protein Expression Plasmid Vector	PHLAP9252212	Plasmid vector containing HLA-A*02:528:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:528:02 protein. This plasmid can be used for constructing HLA-A*02:528:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:528:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:529 Protein Expression Plasmid Vector	PHLAP9252213	Plasmid vector containing HLA-A*02:529 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:529 protein. This plasmid can be used for constructing HLA-A*02:529 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:529 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:53:01N Protein Expression Plasmid Vector	PHLAP9252214	Plasmid vector containing HLA-A*02:53:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:53:01N protein. This plasmid can be used for constructing HLA-A*02:53:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:53:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:53:02N Protein Expression Plasmid Vector	PHLAP9252215	Plasmid vector containing HLA-A*02:53:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:53:02N protein. This plasmid can be used for constructing HLA-A*02:53:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:53:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:530 Protein Expression Plasmid Vector	PHLAP9252216	Plasmid vector containing HLA-A*02:530 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:530 protein. This plasmid can be used for constructing HLA-A*02:530 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:530 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:531 Protein Expression Plasmid Vector	PHLAP9252217	Plasmid vector containing HLA-A*02:531 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:531 protein. This plasmid can be used for constructing HLA-A*02:531 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:531 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:532 Protein Expression Plasmid Vector	PHLAP9252218	Plasmid vector containing HLA-A*02:532 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:532 protein. This plasmid can be used for constructing HLA-A*02:532 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:532 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:533 Protein Expression Plasmid Vector	PHLAP9252219	Plasmid vector containing HLA-A*02:533 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:533 protein. This plasmid can be used for constructing HLA-A*02:533 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:533 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:534 Protein Expression Plasmid Vector	PHLAP9252220	Plasmid vector containing HLA-A*02:534 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:534 protein. This plasmid can be used for constructing HLA-A*02:534 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:534 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:535 Protein Expression Plasmid Vector	PHLAP9252221	Plasmid vector containing HLA-A*02:535 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:535 protein. This plasmid can be used for constructing HLA-A*02:535 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:535 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:536 Protein Expression Plasmid Vector	PHLAP9252222	Plasmid vector containing HLA-A*02:536 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:536 protein. This plasmid can be used for constructing HLA-A*02:536 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:536 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:537 Protein Expression Plasmid Vector	PHLAP9252223	Plasmid vector containing HLA-A*02:537 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:537 protein. This plasmid can be used for constructing HLA-A*02:537 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:537 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:538 Protein Expression Plasmid Vector	PHLAP9252224	Plasmid vector containing HLA-A*02:538 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:538 protein. This plasmid can be used for constructing HLA-A*02:538 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:538 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:539 Protein Expression Plasmid Vector	PHLAP9252225	Plasmid vector containing HLA-A*02:539 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:539 protein. This plasmid can be used for constructing HLA-A*02:539 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:539 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:54 Protein Expression Plasmid Vector	PHLAP9252226	Plasmid vector containing HLA-A*02:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:54 protein. This plasmid can be used for constructing HLA-A*02:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:540N Protein Expression Plasmid Vector	PHLAP9252227	Plasmid vector containing HLA-A*02:540N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:540N protein. This plasmid can be used for constructing HLA-A*02:540N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:540N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:541 Protein Expression Plasmid Vector	PHLAP9252228	Plasmid vector containing HLA-A*02:541 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:541 protein. This plasmid can be used for constructing HLA-A*02:541 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:541 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:542 Protein Expression Plasmid Vector	PHLAP9252229	Plasmid vector containing HLA-A*02:542 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:542 protein. This plasmid can be used for constructing HLA-A*02:542 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:542 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:543 Protein Expression Plasmid Vector	PHLAP9252230	Plasmid vector containing HLA-A*02:543 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:543 protein. This plasmid can be used for constructing HLA-A*02:543 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:543 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:544 Protein Expression Plasmid Vector	PHLAP9252231	Plasmid vector containing HLA-A*02:544 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:544 protein. This plasmid can be used for constructing HLA-A*02:544 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:544 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:545 Protein Expression Plasmid Vector	PHLAP9252232	Plasmid vector containing HLA-A*02:545 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:545 protein. This plasmid can be used for constructing HLA-A*02:545 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:545 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:546 Protein Expression Plasmid Vector	PHLAP9252233	Plasmid vector containing HLA-A*02:546 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:546 protein. This plasmid can be used for constructing HLA-A*02:546 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:546 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:547 Protein Expression Plasmid Vector	PHLAP9252234	Plasmid vector containing HLA-A*02:547 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:547 protein. This plasmid can be used for constructing HLA-A*02:547 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:547 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:548 Protein Expression Plasmid Vector	PHLAP9252235	Plasmid vector containing HLA-A*02:548 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:548 protein. This plasmid can be used for constructing HLA-A*02:548 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:548 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:549 Protein Expression Plasmid Vector	PHLAP9252236	Plasmid vector containing HLA-A*02:549 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:549 protein. This plasmid can be used for constructing HLA-A*02:549 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:549 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:55:01 Protein Expression Plasmid Vector	PHLAP9252237	Plasmid vector containing HLA-A*02:55:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:55:01 protein. This plasmid can be used for constructing HLA-A*02:55:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:55:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:55:02 Protein Expression Plasmid Vector	PHLAP9252238	Plasmid vector containing HLA-A*02:55:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:55:02 protein. This plasmid can be used for constructing HLA-A*02:55:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:55:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:550 Protein Expression Plasmid Vector	PHLAP9252239	Plasmid vector containing HLA-A*02:550 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:550 protein. This plasmid can be used for constructing HLA-A*02:550 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:550 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:551 Protein Expression Plasmid Vector	PHLAP9252240	Plasmid vector containing HLA-A*02:551 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:551 protein. This plasmid can be used for constructing HLA-A*02:551 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:551 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:552 Protein Expression Plasmid Vector	PHLAP9252241	Plasmid vector containing HLA-A*02:552 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:552 protein. This plasmid can be used for constructing HLA-A*02:552 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:552 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:553 Protein Expression Plasmid Vector	PHLAP9252242	Plasmid vector containing HLA-A*02:553 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:553 protein. This plasmid can be used for constructing HLA-A*02:553 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:553 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:554 Protein Expression Plasmid Vector	PHLAP9252243	Plasmid vector containing HLA-A*02:554 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:554 protein. This plasmid can be used for constructing HLA-A*02:554 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:554 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:555 Protein Expression Plasmid Vector	PHLAP9252244	Plasmid vector containing HLA-A*02:555 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:555 protein. This plasmid can be used for constructing HLA-A*02:555 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:555 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:556 Protein Expression Plasmid Vector	PHLAP9252245	Plasmid vector containing HLA-A*02:556 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:556 protein. This plasmid can be used for constructing HLA-A*02:556 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:556 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:557 Protein Expression Plasmid Vector	PHLAP9252246	Plasmid vector containing HLA-A*02:557 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:557 protein. This plasmid can be used for constructing HLA-A*02:557 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:557 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:558 Protein Expression Plasmid Vector	PHLAP9252247	Plasmid vector containing HLA-A*02:558 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:558 protein. This plasmid can be used for constructing HLA-A*02:558 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:558 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:559 Protein Expression Plasmid Vector	PHLAP9252248	Plasmid vector containing HLA-A*02:559 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:559 protein. This plasmid can be used for constructing HLA-A*02:559 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:559 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:56:01 Protein Expression Plasmid Vector	PHLAP9252249	Plasmid vector containing HLA-A*02:56:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:56:01 protein. This plasmid can be used for constructing HLA-A*02:56:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:56:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:56:02 Protein Expression Plasmid Vector	PHLAP9252250	Plasmid vector containing HLA-A*02:56:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:56:02 protein. This plasmid can be used for constructing HLA-A*02:56:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:56:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:560 Protein Expression Plasmid Vector	PHLAP9252251	Plasmid vector containing HLA-A*02:560 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:560 protein. This plasmid can be used for constructing HLA-A*02:560 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:560 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:561 Protein Expression Plasmid Vector	PHLAP9252252	Plasmid vector containing HLA-A*02:561 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:561 protein. This plasmid can be used for constructing HLA-A*02:561 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:561 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:562 Protein Expression Plasmid Vector	PHLAP9252253	Plasmid vector containing HLA-A*02:562 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:562 protein. This plasmid can be used for constructing HLA-A*02:562 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:562 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:563 Protein Expression Plasmid Vector	PHLAP9252254	Plasmid vector containing HLA-A*02:563 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:563 protein. This plasmid can be used for constructing HLA-A*02:563 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:563 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:564 Protein Expression Plasmid Vector	PHLAP9252255	Plasmid vector containing HLA-A*02:564 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:564 protein. This plasmid can be used for constructing HLA-A*02:564 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:564 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:565 Protein Expression Plasmid Vector	PHLAP9252256	Plasmid vector containing HLA-A*02:565 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:565 protein. This plasmid can be used for constructing HLA-A*02:565 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:565 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:566 Protein Expression Plasmid Vector	PHLAP9252257	Plasmid vector containing HLA-A*02:566 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:566 protein. This plasmid can be used for constructing HLA-A*02:566 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:566 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:567 Protein Expression Plasmid Vector	PHLAP9252258	Plasmid vector containing HLA-A*02:567 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:567 protein. This plasmid can be used for constructing HLA-A*02:567 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:567 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:568 Protein Expression Plasmid Vector	PHLAP9252259	Plasmid vector containing HLA-A*02:568 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:568 protein. This plasmid can be used for constructing HLA-A*02:568 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:568 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:569 Protein Expression Plasmid Vector	PHLAP9252260	Plasmid vector containing HLA-A*02:569 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:569 protein. This plasmid can be used for constructing HLA-A*02:569 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:569 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:57 Protein Expression Plasmid Vector	PHLAP9252261	Plasmid vector containing HLA-A*02:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:57 protein. This plasmid can be used for constructing HLA-A*02:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:570:01 Protein Expression Plasmid Vector	PHLAP9252262	Plasmid vector containing HLA-A*02:570:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:570:01 protein. This plasmid can be used for constructing HLA-A*02:570:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:570:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:570:02 Protein Expression Plasmid Vector	PHLAP9252263	Plasmid vector containing HLA-A*02:570:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:570:02 protein. This plasmid can be used for constructing HLA-A*02:570:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:570:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:571 Protein Expression Plasmid Vector	PHLAP9252264	Plasmid vector containing HLA-A*02:571 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:571 protein. This plasmid can be used for constructing HLA-A*02:571 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:571 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:572 Protein Expression Plasmid Vector	PHLAP9252265	Plasmid vector containing HLA-A*02:572 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:572 protein. This plasmid can be used for constructing HLA-A*02:572 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:572 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:573 Protein Expression Plasmid Vector	PHLAP9252266	Plasmid vector containing HLA-A*02:573 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:573 protein. This plasmid can be used for constructing HLA-A*02:573 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:573 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:574 Protein Expression Plasmid Vector	PHLAP9252267	Plasmid vector containing HLA-A*02:574 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:574 protein. This plasmid can be used for constructing HLA-A*02:574 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:574 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:575 Protein Expression Plasmid Vector	PHLAP9252268	Plasmid vector containing HLA-A*02:575 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:575 protein. This plasmid can be used for constructing HLA-A*02:575 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:575 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:576 Protein Expression Plasmid Vector	PHLAP9252269	Plasmid vector containing HLA-A*02:576 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:576 protein. This plasmid can be used for constructing HLA-A*02:576 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:576 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:577 Protein Expression Plasmid Vector	PHLAP9252270	Plasmid vector containing HLA-A*02:577 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:577 protein. This plasmid can be used for constructing HLA-A*02:577 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:577 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:578 Protein Expression Plasmid Vector	PHLAP9252271	Plasmid vector containing HLA-A*02:578 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:578 protein. This plasmid can be used for constructing HLA-A*02:578 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:578 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:579 Protein Expression Plasmid Vector	PHLAP9252272	Plasmid vector containing HLA-A*02:579 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:579 protein. This plasmid can be used for constructing HLA-A*02:579 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:579 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:58 Protein Expression Plasmid Vector	PHLAP9252273	Plasmid vector containing HLA-A*02:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:58 protein. This plasmid can be used for constructing HLA-A*02:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:580 Protein Expression Plasmid Vector	PHLAP9252274	Plasmid vector containing HLA-A*02:580 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:580 protein. This plasmid can be used for constructing HLA-A*02:580 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:580 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:581Q Protein Expression Plasmid Vector	PHLAP9252275	Plasmid vector containing HLA-A*02:581Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:581Q protein. This plasmid can be used for constructing HLA-A*02:581Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:581Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:582 Protein Expression Plasmid Vector	PHLAP9252276	Plasmid vector containing HLA-A*02:582 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:582 protein. This plasmid can be used for constructing HLA-A*02:582 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:582 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:583 Protein Expression Plasmid Vector	PHLAP9252277	Plasmid vector containing HLA-A*02:583 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:583 protein. This plasmid can be used for constructing HLA-A*02:583 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:583 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:584 Protein Expression Plasmid Vector	PHLAP9252278	Plasmid vector containing HLA-A*02:584 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:584 protein. This plasmid can be used for constructing HLA-A*02:584 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:584 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:585 Protein Expression Plasmid Vector	PHLAP9252279	Plasmid vector containing HLA-A*02:585 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:585 protein. This plasmid can be used for constructing HLA-A*02:585 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:585 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:586 Protein Expression Plasmid Vector	PHLAP9252280	Plasmid vector containing HLA-A*02:586 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:586 protein. This plasmid can be used for constructing HLA-A*02:586 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:586 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:587 Protein Expression Plasmid Vector	PHLAP9252281	Plasmid vector containing HLA-A*02:587 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:587 protein. This plasmid can be used for constructing HLA-A*02:587 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:587 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:588 Protein Expression Plasmid Vector	PHLAP9252282	Plasmid vector containing HLA-A*02:588 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:588 protein. This plasmid can be used for constructing HLA-A*02:588 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:588 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:589 Protein Expression Plasmid Vector	PHLAP9252283	Plasmid vector containing HLA-A*02:589 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:589 protein. This plasmid can be used for constructing HLA-A*02:589 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:589 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:59 Protein Expression Plasmid Vector	PHLAP9252284	Plasmid vector containing HLA-A*02:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:59 protein. This plasmid can be used for constructing HLA-A*02:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:590 Protein Expression Plasmid Vector	PHLAP9252285	Plasmid vector containing HLA-A*02:590 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:590 protein. This plasmid can be used for constructing HLA-A*02:590 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:590 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:591:01 Protein Expression Plasmid Vector	PHLAP9252286	Plasmid vector containing HLA-A*02:591:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:591:01 protein. This plasmid can be used for constructing HLA-A*02:591:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:591:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:591:02 Protein Expression Plasmid Vector	PHLAP9252287	Plasmid vector containing HLA-A*02:591:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:591:02 protein. This plasmid can be used for constructing HLA-A*02:591:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:591:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:592 Protein Expression Plasmid Vector	PHLAP9252288	Plasmid vector containing HLA-A*02:592 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:592 protein. This plasmid can be used for constructing HLA-A*02:592 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:592 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:593 Protein Expression Plasmid Vector	PHLAP9252289	Plasmid vector containing HLA-A*02:593 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:593 protein. This plasmid can be used for constructing HLA-A*02:593 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:593 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:594 Protein Expression Plasmid Vector	PHLAP9252290	Plasmid vector containing HLA-A*02:594 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:594 protein. This plasmid can be used for constructing HLA-A*02:594 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:594 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:595 Protein Expression Plasmid Vector	PHLAP9252291	Plasmid vector containing HLA-A*02:595 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:595 protein. This plasmid can be used for constructing HLA-A*02:595 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:595 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:596 Protein Expression Plasmid Vector	PHLAP9252292	Plasmid vector containing HLA-A*02:596 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:596 protein. This plasmid can be used for constructing HLA-A*02:596 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:596 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:597 Protein Expression Plasmid Vector	PHLAP9252293	Plasmid vector containing HLA-A*02:597 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:597 protein. This plasmid can be used for constructing HLA-A*02:597 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:597 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:598 Protein Expression Plasmid Vector	PHLAP9252294	Plasmid vector containing HLA-A*02:598 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:598 protein. This plasmid can be used for constructing HLA-A*02:598 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:598 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:599 Protein Expression Plasmid Vector	PHLAP9252295	Plasmid vector containing HLA-A*02:599 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:599 protein. This plasmid can be used for constructing HLA-A*02:599 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:599 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:60:01:01 Protein Expression Plasmid Vector	PHLAP9252296	Plasmid vector containing HLA-A*02:60:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:60:01:01 protein. This plasmid can be used for constructing HLA-A*02:60:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:60:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:60:01:02 Protein Expression Plasmid Vector	PHLAP9252297	Plasmid vector containing HLA-A*02:60:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:60:01:02 protein. This plasmid can be used for constructing HLA-A*02:60:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:60:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:60:02 Protein Expression Plasmid Vector	PHLAP9252298	Plasmid vector containing HLA-A*02:60:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:60:02 protein. This plasmid can be used for constructing HLA-A*02:60:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:60:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:600 Protein Expression Plasmid Vector	PHLAP9252299	Plasmid vector containing HLA-A*02:600 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:600 protein. This plasmid can be used for constructing HLA-A*02:600 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:600 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:601 Protein Expression Plasmid Vector	PHLAP9252300	Plasmid vector containing HLA-A*02:601 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:601 protein. This plasmid can be used for constructing HLA-A*02:601 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:601 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:602 Protein Expression Plasmid Vector	PHLAP9252301	Plasmid vector containing HLA-A*02:602 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:602 protein. This plasmid can be used for constructing HLA-A*02:602 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:602 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:603 Protein Expression Plasmid Vector	PHLAP9252302	Plasmid vector containing HLA-A*02:603 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:603 protein. This plasmid can be used for constructing HLA-A*02:603 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:603 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:604 Protein Expression Plasmid Vector	PHLAP9252303	Plasmid vector containing HLA-A*02:604 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:604 protein. This plasmid can be used for constructing HLA-A*02:604 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:604 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:605Q Protein Expression Plasmid Vector	PHLAP9252304	Plasmid vector containing HLA-A*02:605Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:605Q protein. This plasmid can be used for constructing HLA-A*02:605Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:605Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:606 Protein Expression Plasmid Vector	PHLAP9252305	Plasmid vector containing HLA-A*02:606 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:606 protein. This plasmid can be used for constructing HLA-A*02:606 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:606 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:607 Protein Expression Plasmid Vector	PHLAP9252306	Plasmid vector containing HLA-A*02:607 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:607 protein. This plasmid can be used for constructing HLA-A*02:607 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:607 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:608N Protein Expression Plasmid Vector	PHLAP9252307	Plasmid vector containing HLA-A*02:608N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:608N protein. This plasmid can be used for constructing HLA-A*02:608N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:608N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:609 Protein Expression Plasmid Vector	PHLAP9252308	Plasmid vector containing HLA-A*02:609 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:609 protein. This plasmid can be used for constructing HLA-A*02:609 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:609 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:61 Protein Expression Plasmid Vector	PHLAP9252309	Plasmid vector containing HLA-A*02:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:61 protein. This plasmid can be used for constructing HLA-A*02:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:610:01 Protein Expression Plasmid Vector	PHLAP9252310	Plasmid vector containing HLA-A*02:610:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:610:01 protein. This plasmid can be used for constructing HLA-A*02:610:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:610:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:610:02 Protein Expression Plasmid Vector	PHLAP9252311	Plasmid vector containing HLA-A*02:610:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:610:02 protein. This plasmid can be used for constructing HLA-A*02:610:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:610:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:611 Protein Expression Plasmid Vector	PHLAP9252312	Plasmid vector containing HLA-A*02:611 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:611 protein. This plasmid can be used for constructing HLA-A*02:611 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:611 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:612 Protein Expression Plasmid Vector	PHLAP9252313	Plasmid vector containing HLA-A*02:612 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:612 protein. This plasmid can be used for constructing HLA-A*02:612 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:612 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:613 Protein Expression Plasmid Vector	PHLAP9252314	Plasmid vector containing HLA-A*02:613 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:613 protein. This plasmid can be used for constructing HLA-A*02:613 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:613 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:614 Protein Expression Plasmid Vector	PHLAP9252315	Plasmid vector containing HLA-A*02:614 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:614 protein. This plasmid can be used for constructing HLA-A*02:614 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:614 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:615 Protein Expression Plasmid Vector	PHLAP9252316	Plasmid vector containing HLA-A*02:615 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:615 protein. This plasmid can be used for constructing HLA-A*02:615 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:615 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:616 Protein Expression Plasmid Vector	PHLAP9252317	Plasmid vector containing HLA-A*02:616 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:616 protein. This plasmid can be used for constructing HLA-A*02:616 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:616 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:617 Protein Expression Plasmid Vector	PHLAP9252318	Plasmid vector containing HLA-A*02:617 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:617 protein. This plasmid can be used for constructing HLA-A*02:617 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:617 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:618Q Protein Expression Plasmid Vector	PHLAP9252319	Plasmid vector containing HLA-A*02:618Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:618Q protein. This plasmid can be used for constructing HLA-A*02:618Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:618Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:619:01 Protein Expression Plasmid Vector	PHLAP9252320	Plasmid vector containing HLA-A*02:619:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:619:01 protein. This plasmid can be used for constructing HLA-A*02:619:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:619:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:619:02 Protein Expression Plasmid Vector	PHLAP9252321	Plasmid vector containing HLA-A*02:619:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:619:02 protein. This plasmid can be used for constructing HLA-A*02:619:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:619:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:62 Protein Expression Plasmid Vector	PHLAP9252322	Plasmid vector containing HLA-A*02:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:62 protein. This plasmid can be used for constructing HLA-A*02:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:620 Protein Expression Plasmid Vector	PHLAP9252323	Plasmid vector containing HLA-A*02:620 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:620 protein. This plasmid can be used for constructing HLA-A*02:620 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:620 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:621 Protein Expression Plasmid Vector	PHLAP9252324	Plasmid vector containing HLA-A*02:621 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:621 protein. This plasmid can be used for constructing HLA-A*02:621 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:621 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:622N Protein Expression Plasmid Vector	PHLAP9252325	Plasmid vector containing HLA-A*02:622N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:622N protein. This plasmid can be used for constructing HLA-A*02:622N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:622N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:623 Protein Expression Plasmid Vector	PHLAP9252326	Plasmid vector containing HLA-A*02:623 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:623 protein. This plasmid can be used for constructing HLA-A*02:623 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:623 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:624 Protein Expression Plasmid Vector	PHLAP9252327	Plasmid vector containing HLA-A*02:624 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:624 protein. This plasmid can be used for constructing HLA-A*02:624 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:624 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:625 Protein Expression Plasmid Vector	PHLAP9252328	Plasmid vector containing HLA-A*02:625 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:625 protein. This plasmid can be used for constructing HLA-A*02:625 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:625 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:626 Protein Expression Plasmid Vector	PHLAP9252329	Plasmid vector containing HLA-A*02:626 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:626 protein. This plasmid can be used for constructing HLA-A*02:626 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:626 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:627 Protein Expression Plasmid Vector	PHLAP9252330	Plasmid vector containing HLA-A*02:627 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:627 protein. This plasmid can be used for constructing HLA-A*02:627 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:627 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:628 Protein Expression Plasmid Vector	PHLAP9252331	Plasmid vector containing HLA-A*02:628 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:628 protein. This plasmid can be used for constructing HLA-A*02:628 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:628 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:629 Protein Expression Plasmid Vector	PHLAP9252332	Plasmid vector containing HLA-A*02:629 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:629 protein. This plasmid can be used for constructing HLA-A*02:629 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:629 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:63 Protein Expression Plasmid Vector	PHLAP9252333	Plasmid vector containing HLA-A*02:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:63 protein. This plasmid can be used for constructing HLA-A*02:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:630 Protein Expression Plasmid Vector	PHLAP9252334	Plasmid vector containing HLA-A*02:630 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:630 protein. This plasmid can be used for constructing HLA-A*02:630 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:630 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:631 Protein Expression Plasmid Vector	PHLAP9252335	Plasmid vector containing HLA-A*02:631 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:631 protein. This plasmid can be used for constructing HLA-A*02:631 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:631 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:632 Protein Expression Plasmid Vector	PHLAP9252336	Plasmid vector containing HLA-A*02:632 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:632 protein. This plasmid can be used for constructing HLA-A*02:632 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:632 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:633 Protein Expression Plasmid Vector	PHLAP9252337	Plasmid vector containing HLA-A*02:633 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:633 protein. This plasmid can be used for constructing HLA-A*02:633 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:633 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:634 Protein Expression Plasmid Vector	PHLAP9252338	Plasmid vector containing HLA-A*02:634 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:634 protein. This plasmid can be used for constructing HLA-A*02:634 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:634 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:635 Protein Expression Plasmid Vector	PHLAP9252339	Plasmid vector containing HLA-A*02:635 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:635 protein. This plasmid can be used for constructing HLA-A*02:635 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:635 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:636 Protein Expression Plasmid Vector	PHLAP9252340	Plasmid vector containing HLA-A*02:636 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:636 protein. This plasmid can be used for constructing HLA-A*02:636 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:636 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:637 Protein Expression Plasmid Vector	PHLAP9252341	Plasmid vector containing HLA-A*02:637 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:637 protein. This plasmid can be used for constructing HLA-A*02:637 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:637 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:638 Protein Expression Plasmid Vector	PHLAP9252342	Plasmid vector containing HLA-A*02:638 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:638 protein. This plasmid can be used for constructing HLA-A*02:638 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:638 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:639 Protein Expression Plasmid Vector	PHLAP9252343	Plasmid vector containing HLA-A*02:639 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:639 protein. This plasmid can be used for constructing HLA-A*02:639 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:639 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:64:01 Protein Expression Plasmid Vector	PHLAP9252344	Plasmid vector containing HLA-A*02:64:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:64:01 protein. This plasmid can be used for constructing HLA-A*02:64:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:64:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:64:02 Protein Expression Plasmid Vector	PHLAP9252345	Plasmid vector containing HLA-A*02:64:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:64:02 protein. This plasmid can be used for constructing HLA-A*02:64:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:64:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:640 Protein Expression Plasmid Vector	PHLAP9252346	Plasmid vector containing HLA-A*02:640 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:640 protein. This plasmid can be used for constructing HLA-A*02:640 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:640 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:641 Protein Expression Plasmid Vector	PHLAP9252347	Plasmid vector containing HLA-A*02:641 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:641 protein. This plasmid can be used for constructing HLA-A*02:641 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:641 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:642 Protein Expression Plasmid Vector	PHLAP9252348	Plasmid vector containing HLA-A*02:642 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:642 protein. This plasmid can be used for constructing HLA-A*02:642 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:642 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:643N Protein Expression Plasmid Vector	PHLAP9252349	Plasmid vector containing HLA-A*02:643N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:643N protein. This plasmid can be used for constructing HLA-A*02:643N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:643N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:644 Protein Expression Plasmid Vector	PHLAP9252350	Plasmid vector containing HLA-A*02:644 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:644 protein. This plasmid can be used for constructing HLA-A*02:644 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:644 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:645 Protein Expression Plasmid Vector	PHLAP9252351	Plasmid vector containing HLA-A*02:645 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:645 protein. This plasmid can be used for constructing HLA-A*02:645 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:645 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:646 Protein Expression Plasmid Vector	PHLAP9252352	Plasmid vector containing HLA-A*02:646 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:646 protein. This plasmid can be used for constructing HLA-A*02:646 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:646 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:647 Protein Expression Plasmid Vector	PHLAP9252353	Plasmid vector containing HLA-A*02:647 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:647 protein. This plasmid can be used for constructing HLA-A*02:647 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:647 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:648:01 Protein Expression Plasmid Vector	PHLAP9252354	Plasmid vector containing HLA-A*02:648:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:648:01 protein. This plasmid can be used for constructing HLA-A*02:648:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:648:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:648:02 Protein Expression Plasmid Vector	PHLAP9252355	Plasmid vector containing HLA-A*02:648:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:648:02 protein. This plasmid can be used for constructing HLA-A*02:648:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:648:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:649 Protein Expression Plasmid Vector	PHLAP9252356	Plasmid vector containing HLA-A*02:649 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:649 protein. This plasmid can be used for constructing HLA-A*02:649 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:649 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:65 Protein Expression Plasmid Vector	PHLAP9252357	Plasmid vector containing HLA-A*02:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:65 protein. This plasmid can be used for constructing HLA-A*02:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:650 Protein Expression Plasmid Vector	PHLAP9252358	Plasmid vector containing HLA-A*02:650 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:650 protein. This plasmid can be used for constructing HLA-A*02:650 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:650 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:651 Protein Expression Plasmid Vector	PHLAP9252359	Plasmid vector containing HLA-A*02:651 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:651 protein. This plasmid can be used for constructing HLA-A*02:651 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:651 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:652 Protein Expression Plasmid Vector	PHLAP9252360	Plasmid vector containing HLA-A*02:652 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:652 protein. This plasmid can be used for constructing HLA-A*02:652 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:652 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:653 Protein Expression Plasmid Vector	PHLAP9252361	Plasmid vector containing HLA-A*02:653 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:653 protein. This plasmid can be used for constructing HLA-A*02:653 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:653 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:654 Protein Expression Plasmid Vector	PHLAP9252362	Plasmid vector containing HLA-A*02:654 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:654 protein. This plasmid can be used for constructing HLA-A*02:654 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:654 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:655 Protein Expression Plasmid Vector	PHLAP9252363	Plasmid vector containing HLA-A*02:655 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:655 protein. This plasmid can be used for constructing HLA-A*02:655 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:655 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:656 Protein Expression Plasmid Vector	PHLAP9252364	Plasmid vector containing HLA-A*02:656 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:656 protein. This plasmid can be used for constructing HLA-A*02:656 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:656 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:657 Protein Expression Plasmid Vector	PHLAP9252365	Plasmid vector containing HLA-A*02:657 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:657 protein. This plasmid can be used for constructing HLA-A*02:657 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:657 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:658 Protein Expression Plasmid Vector	PHLAP9252366	Plasmid vector containing HLA-A*02:658 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:658 protein. This plasmid can be used for constructing HLA-A*02:658 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:658 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:659 Protein Expression Plasmid Vector	PHLAP9252367	Plasmid vector containing HLA-A*02:659 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:659 protein. This plasmid can be used for constructing HLA-A*02:659 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:659 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:66 Protein Expression Plasmid Vector	PHLAP9252368	Plasmid vector containing HLA-A*02:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:66 protein. This plasmid can be used for constructing HLA-A*02:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:660 Protein Expression Plasmid Vector	PHLAP9252369	Plasmid vector containing HLA-A*02:660 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:660 protein. This plasmid can be used for constructing HLA-A*02:660 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:660 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:661 Protein Expression Plasmid Vector	PHLAP9252370	Plasmid vector containing HLA-A*02:661 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:661 protein. This plasmid can be used for constructing HLA-A*02:661 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:661 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:662 Protein Expression Plasmid Vector	PHLAP9252371	Plasmid vector containing HLA-A*02:662 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:662 protein. This plasmid can be used for constructing HLA-A*02:662 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:662 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:663 Protein Expression Plasmid Vector	PHLAP9252372	Plasmid vector containing HLA-A*02:663 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:663 protein. This plasmid can be used for constructing HLA-A*02:663 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:663 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:664 Protein Expression Plasmid Vector	PHLAP9252373	Plasmid vector containing HLA-A*02:664 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:664 protein. This plasmid can be used for constructing HLA-A*02:664 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:664 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:665 Protein Expression Plasmid Vector	PHLAP9252374	Plasmid vector containing HLA-A*02:665 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:665 protein. This plasmid can be used for constructing HLA-A*02:665 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:665 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:666 Protein Expression Plasmid Vector	PHLAP9252375	Plasmid vector containing HLA-A*02:666 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:666 protein. This plasmid can be used for constructing HLA-A*02:666 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:666 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:667 Protein Expression Plasmid Vector	PHLAP9252376	Plasmid vector containing HLA-A*02:667 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:667 protein. This plasmid can be used for constructing HLA-A*02:667 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:667 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:668 Protein Expression Plasmid Vector	PHLAP9252377	Plasmid vector containing HLA-A*02:668 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:668 protein. This plasmid can be used for constructing HLA-A*02:668 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:668 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:669 Protein Expression Plasmid Vector	PHLAP9252378	Plasmid vector containing HLA-A*02:669 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:669 protein. This plasmid can be used for constructing HLA-A*02:669 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:669 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:67 Protein Expression Plasmid Vector	PHLAP9252379	Plasmid vector containing HLA-A*02:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:67 protein. This plasmid can be used for constructing HLA-A*02:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:670 Protein Expression Plasmid Vector	PHLAP9252380	Plasmid vector containing HLA-A*02:670 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:670 protein. This plasmid can be used for constructing HLA-A*02:670 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:670 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:671 Protein Expression Plasmid Vector	PHLAP9252381	Plasmid vector containing HLA-A*02:671 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:671 protein. This plasmid can be used for constructing HLA-A*02:671 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:671 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:672Q Protein Expression Plasmid Vector	PHLAP9252382	Plasmid vector containing HLA-A*02:672Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:672Q protein. This plasmid can be used for constructing HLA-A*02:672Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:672Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:673 Protein Expression Plasmid Vector	PHLAP9252383	Plasmid vector containing HLA-A*02:673 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:673 protein. This plasmid can be used for constructing HLA-A*02:673 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:673 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:674 Protein Expression Plasmid Vector	PHLAP9252384	Plasmid vector containing HLA-A*02:674 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:674 protein. This plasmid can be used for constructing HLA-A*02:674 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:674 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:675N Protein Expression Plasmid Vector	PHLAP9252385	Plasmid vector containing HLA-A*02:675N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:675N protein. This plasmid can be used for constructing HLA-A*02:675N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:675N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:676 Protein Expression Plasmid Vector	PHLAP9252386	Plasmid vector containing HLA-A*02:676 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:676 protein. This plasmid can be used for constructing HLA-A*02:676 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:676 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:677 Protein Expression Plasmid Vector	PHLAP9252387	Plasmid vector containing HLA-A*02:677 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:677 protein. This plasmid can be used for constructing HLA-A*02:677 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:677 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:678 Protein Expression Plasmid Vector	PHLAP9252388	Plasmid vector containing HLA-A*02:678 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:678 protein. This plasmid can be used for constructing HLA-A*02:678 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:678 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:679 Protein Expression Plasmid Vector	PHLAP9252389	Plasmid vector containing HLA-A*02:679 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:679 protein. This plasmid can be used for constructing HLA-A*02:679 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:679 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:68 Protein Expression Plasmid Vector	PHLAP9252390	Plasmid vector containing HLA-A*02:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:68 protein. This plasmid can be used for constructing HLA-A*02:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:680 Protein Expression Plasmid Vector	PHLAP9252391	Plasmid vector containing HLA-A*02:680 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:680 protein. This plasmid can be used for constructing HLA-A*02:680 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:680 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:681 Protein Expression Plasmid Vector	PHLAP9252392	Plasmid vector containing HLA-A*02:681 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:681 protein. This plasmid can be used for constructing HLA-A*02:681 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:681 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:682 Protein Expression Plasmid Vector	PHLAP9252393	Plasmid vector containing HLA-A*02:682 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:682 protein. This plasmid can be used for constructing HLA-A*02:682 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:682 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:683 Protein Expression Plasmid Vector	PHLAP9252394	Plasmid vector containing HLA-A*02:683 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:683 protein. This plasmid can be used for constructing HLA-A*02:683 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:683 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:684 Protein Expression Plasmid Vector	PHLAP9252395	Plasmid vector containing HLA-A*02:684 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:684 protein. This plasmid can be used for constructing HLA-A*02:684 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:684 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:685 Protein Expression Plasmid Vector	PHLAP9252396	Plasmid vector containing HLA-A*02:685 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:685 protein. This plasmid can be used for constructing HLA-A*02:685 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:685 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:686 Protein Expression Plasmid Vector	PHLAP9252397	Plasmid vector containing HLA-A*02:686 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:686 protein. This plasmid can be used for constructing HLA-A*02:686 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:686 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:687 Protein Expression Plasmid Vector	PHLAP9252398	Plasmid vector containing HLA-A*02:687 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:687 protein. This plasmid can be used for constructing HLA-A*02:687 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:687 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:688:01 Protein Expression Plasmid Vector	PHLAP9252399	Plasmid vector containing HLA-A*02:688:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:688:01 protein. This plasmid can be used for constructing HLA-A*02:688:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:688:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:688:02 Protein Expression Plasmid Vector	PHLAP9252400	Plasmid vector containing HLA-A*02:688:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:688:02 protein. This plasmid can be used for constructing HLA-A*02:688:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:688:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:689 Protein Expression Plasmid Vector	PHLAP9252401	Plasmid vector containing HLA-A*02:689 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:689 protein. This plasmid can be used for constructing HLA-A*02:689 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:689 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:69 Protein Expression Plasmid Vector	PHLAP9252402	Plasmid vector containing HLA-A*02:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:69 protein. This plasmid can be used for constructing HLA-A*02:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:690 Protein Expression Plasmid Vector	PHLAP9252403	Plasmid vector containing HLA-A*02:690 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:690 protein. This plasmid can be used for constructing HLA-A*02:690 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:690 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:691N Protein Expression Plasmid Vector	PHLAP9252404	Plasmid vector containing HLA-A*02:691N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:691N protein. This plasmid can be used for constructing HLA-A*02:691N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:691N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:692 Protein Expression Plasmid Vector	PHLAP9252405	Plasmid vector containing HLA-A*02:692 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:692 protein. This plasmid can be used for constructing HLA-A*02:692 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:692 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:693 Protein Expression Plasmid Vector	PHLAP9252406	Plasmid vector containing HLA-A*02:693 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:693 protein. This plasmid can be used for constructing HLA-A*02:693 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:693 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:694 Protein Expression Plasmid Vector	PHLAP9252407	Plasmid vector containing HLA-A*02:694 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:694 protein. This plasmid can be used for constructing HLA-A*02:694 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:694 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:695 Protein Expression Plasmid Vector	PHLAP9252408	Plasmid vector containing HLA-A*02:695 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:695 protein. This plasmid can be used for constructing HLA-A*02:695 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:695 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:696:01N Protein Expression Plasmid Vector	PHLAP9252409	Plasmid vector containing HLA-A*02:696:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:696:01N protein. This plasmid can be used for constructing HLA-A*02:696:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:696:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:696:02N Protein Expression Plasmid Vector	PHLAP9252410	Plasmid vector containing HLA-A*02:696:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:696:02N protein. This plasmid can be used for constructing HLA-A*02:696:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:696:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:697 Protein Expression Plasmid Vector	PHLAP9252411	Plasmid vector containing HLA-A*02:697 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:697 protein. This plasmid can be used for constructing HLA-A*02:697 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:697 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:698 Protein Expression Plasmid Vector	PHLAP9252412	Plasmid vector containing HLA-A*02:698 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:698 protein. This plasmid can be used for constructing HLA-A*02:698 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:698 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:699 Protein Expression Plasmid Vector	PHLAP9252413	Plasmid vector containing HLA-A*02:699 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:699 protein. This plasmid can be used for constructing HLA-A*02:699 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:699 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:70 Protein Expression Plasmid Vector	PHLAP9252414	Plasmid vector containing HLA-A*02:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:70 protein. This plasmid can be used for constructing HLA-A*02:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:700 Protein Expression Plasmid Vector	PHLAP9252415	Plasmid vector containing HLA-A*02:700 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:700 protein. This plasmid can be used for constructing HLA-A*02:700 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:700 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:701 Protein Expression Plasmid Vector	PHLAP9252416	Plasmid vector containing HLA-A*02:701 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:701 protein. This plasmid can be used for constructing HLA-A*02:701 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:701 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:702 Protein Expression Plasmid Vector	PHLAP9252417	Plasmid vector containing HLA-A*02:702 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:702 protein. This plasmid can be used for constructing HLA-A*02:702 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:702 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:703 Protein Expression Plasmid Vector	PHLAP9252418	Plasmid vector containing HLA-A*02:703 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:703 protein. This plasmid can be used for constructing HLA-A*02:703 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:703 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:704 Protein Expression Plasmid Vector	PHLAP9252419	Plasmid vector containing HLA-A*02:704 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:704 protein. This plasmid can be used for constructing HLA-A*02:704 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:704 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:705 Protein Expression Plasmid Vector	PHLAP9252420	Plasmid vector containing HLA-A*02:705 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:705 protein. This plasmid can be used for constructing HLA-A*02:705 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:705 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:706 Protein Expression Plasmid Vector	PHLAP9252421	Plasmid vector containing HLA-A*02:706 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:706 protein. This plasmid can be used for constructing HLA-A*02:706 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:706 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:707 Protein Expression Plasmid Vector	PHLAP9252422	Plasmid vector containing HLA-A*02:707 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:707 protein. This plasmid can be used for constructing HLA-A*02:707 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:707 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:708 Protein Expression Plasmid Vector	PHLAP9252423	Plasmid vector containing HLA-A*02:708 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:708 protein. This plasmid can be used for constructing HLA-A*02:708 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:708 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:709 Protein Expression Plasmid Vector	PHLAP9252424	Plasmid vector containing HLA-A*02:709 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:709 protein. This plasmid can be used for constructing HLA-A*02:709 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:709 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:71 Protein Expression Plasmid Vector	PHLAP9252425	Plasmid vector containing HLA-A*02:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:71 protein. This plasmid can be used for constructing HLA-A*02:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:710N Protein Expression Plasmid Vector	PHLAP9252426	Plasmid vector containing HLA-A*02:710N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:710N protein. This plasmid can be used for constructing HLA-A*02:710N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:710N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:711 Protein Expression Plasmid Vector	PHLAP9252427	Plasmid vector containing HLA-A*02:711 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:711 protein. This plasmid can be used for constructing HLA-A*02:711 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:711 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:712 Protein Expression Plasmid Vector	PHLAP9252428	Plasmid vector containing HLA-A*02:712 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:712 protein. This plasmid can be used for constructing HLA-A*02:712 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:712 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:713 Protein Expression Plasmid Vector	PHLAP9252429	Plasmid vector containing HLA-A*02:713 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:713 protein. This plasmid can be used for constructing HLA-A*02:713 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:713 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:714 Protein Expression Plasmid Vector	PHLAP9252430	Plasmid vector containing HLA-A*02:714 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:714 protein. This plasmid can be used for constructing HLA-A*02:714 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:714 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:715N Protein Expression Plasmid Vector	PHLAP9252431	Plasmid vector containing HLA-A*02:715N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:715N protein. This plasmid can be used for constructing HLA-A*02:715N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:715N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:716 Protein Expression Plasmid Vector	PHLAP9252432	Plasmid vector containing HLA-A*02:716 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:716 protein. This plasmid can be used for constructing HLA-A*02:716 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:716 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:717 Protein Expression Plasmid Vector	PHLAP9252433	Plasmid vector containing HLA-A*02:717 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:717 protein. This plasmid can be used for constructing HLA-A*02:717 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:717 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:718 Protein Expression Plasmid Vector	PHLAP9252434	Plasmid vector containing HLA-A*02:718 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:718 protein. This plasmid can be used for constructing HLA-A*02:718 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:718 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:719 Protein Expression Plasmid Vector	PHLAP9252435	Plasmid vector containing HLA-A*02:719 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:719 protein. This plasmid can be used for constructing HLA-A*02:719 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:719 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:72 Protein Expression Plasmid Vector	PHLAP9252436	Plasmid vector containing HLA-A*02:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:72 protein. This plasmid can be used for constructing HLA-A*02:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:720 Protein Expression Plasmid Vector	PHLAP9252437	Plasmid vector containing HLA-A*02:720 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:720 protein. This plasmid can be used for constructing HLA-A*02:720 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:720 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:721 Protein Expression Plasmid Vector	PHLAP9252438	Plasmid vector containing HLA-A*02:721 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:721 protein. This plasmid can be used for constructing HLA-A*02:721 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:721 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:722 Protein Expression Plasmid Vector	PHLAP9252439	Plasmid vector containing HLA-A*02:722 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:722 protein. This plasmid can be used for constructing HLA-A*02:722 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:722 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:723 Protein Expression Plasmid Vector	PHLAP9252440	Plasmid vector containing HLA-A*02:723 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:723 protein. This plasmid can be used for constructing HLA-A*02:723 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:723 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:724 Protein Expression Plasmid Vector	PHLAP9252441	Plasmid vector containing HLA-A*02:724 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:724 protein. This plasmid can be used for constructing HLA-A*02:724 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:724 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:725 Protein Expression Plasmid Vector	PHLAP9252442	Plasmid vector containing HLA-A*02:725 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:725 protein. This plasmid can be used for constructing HLA-A*02:725 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:725 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:726 Protein Expression Plasmid Vector	PHLAP9252443	Plasmid vector containing HLA-A*02:726 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:726 protein. This plasmid can be used for constructing HLA-A*02:726 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:726 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:727 Protein Expression Plasmid Vector	PHLAP9252444	Plasmid vector containing HLA-A*02:727 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:727 protein. This plasmid can be used for constructing HLA-A*02:727 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:727 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:728Q Protein Expression Plasmid Vector	PHLAP9252445	Plasmid vector containing HLA-A*02:728Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:728Q protein. This plasmid can be used for constructing HLA-A*02:728Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:728Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:729 Protein Expression Plasmid Vector	PHLAP9252446	Plasmid vector containing HLA-A*02:729 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:729 protein. This plasmid can be used for constructing HLA-A*02:729 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:729 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:73 Protein Expression Plasmid Vector	PHLAP9252447	Plasmid vector containing HLA-A*02:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:73 protein. This plasmid can be used for constructing HLA-A*02:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:730 Protein Expression Plasmid Vector	PHLAP9252448	Plasmid vector containing HLA-A*02:730 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:730 protein. This plasmid can be used for constructing HLA-A*02:730 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:730 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:731 Protein Expression Plasmid Vector	PHLAP9252449	Plasmid vector containing HLA-A*02:731 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:731 protein. This plasmid can be used for constructing HLA-A*02:731 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:731 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:732 Protein Expression Plasmid Vector	PHLAP9252450	Plasmid vector containing HLA-A*02:732 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:732 protein. This plasmid can be used for constructing HLA-A*02:732 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:732 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:733 Protein Expression Plasmid Vector	PHLAP9252451	Plasmid vector containing HLA-A*02:733 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:733 protein. This plasmid can be used for constructing HLA-A*02:733 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:733 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:734 Protein Expression Plasmid Vector	PHLAP9252452	Plasmid vector containing HLA-A*02:734 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:734 protein. This plasmid can be used for constructing HLA-A*02:734 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:734 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:735 Protein Expression Plasmid Vector	PHLAP9252453	Plasmid vector containing HLA-A*02:735 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:735 protein. This plasmid can be used for constructing HLA-A*02:735 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:735 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:736 Protein Expression Plasmid Vector	PHLAP9252454	Plasmid vector containing HLA-A*02:736 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:736 protein. This plasmid can be used for constructing HLA-A*02:736 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:736 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:737 Protein Expression Plasmid Vector	PHLAP9252455	Plasmid vector containing HLA-A*02:737 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:737 protein. This plasmid can be used for constructing HLA-A*02:737 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:737 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:738 Protein Expression Plasmid Vector	PHLAP9252456	Plasmid vector containing HLA-A*02:738 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:738 protein. This plasmid can be used for constructing HLA-A*02:738 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:738 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:739 Protein Expression Plasmid Vector	PHLAP9252457	Plasmid vector containing HLA-A*02:739 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:739 protein. This plasmid can be used for constructing HLA-A*02:739 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:739 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:74:01 Protein Expression Plasmid Vector	PHLAP9252458	Plasmid vector containing HLA-A*02:74:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:74:01 protein. This plasmid can be used for constructing HLA-A*02:74:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:74:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:74:02 Protein Expression Plasmid Vector	PHLAP9252459	Plasmid vector containing HLA-A*02:74:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:74:02 protein. This plasmid can be used for constructing HLA-A*02:74:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:74:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:740 Protein Expression Plasmid Vector	PHLAP9252460	Plasmid vector containing HLA-A*02:740 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:740 protein. This plasmid can be used for constructing HLA-A*02:740 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:740 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:741 Protein Expression Plasmid Vector	PHLAP9252461	Plasmid vector containing HLA-A*02:741 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:741 protein. This plasmid can be used for constructing HLA-A*02:741 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:741 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:742 Protein Expression Plasmid Vector	PHLAP9252462	Plasmid vector containing HLA-A*02:742 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:742 protein. This plasmid can be used for constructing HLA-A*02:742 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:742 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:743 Protein Expression Plasmid Vector	PHLAP9252463	Plasmid vector containing HLA-A*02:743 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:743 protein. This plasmid can be used for constructing HLA-A*02:743 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:743 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:744 Protein Expression Plasmid Vector	PHLAP9252464	Plasmid vector containing HLA-A*02:744 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:744 protein. This plasmid can be used for constructing HLA-A*02:744 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:744 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:745 Protein Expression Plasmid Vector	PHLAP9252465	Plasmid vector containing HLA-A*02:745 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:745 protein. This plasmid can be used for constructing HLA-A*02:745 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:745 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:746 Protein Expression Plasmid Vector	PHLAP9252466	Plasmid vector containing HLA-A*02:746 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:746 protein. This plasmid can be used for constructing HLA-A*02:746 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:746 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:747 Protein Expression Plasmid Vector	PHLAP9252467	Plasmid vector containing HLA-A*02:747 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:747 protein. This plasmid can be used for constructing HLA-A*02:747 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:747 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:748N Protein Expression Plasmid Vector	PHLAP9252468	Plasmid vector containing HLA-A*02:748N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:748N protein. This plasmid can be used for constructing HLA-A*02:748N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:748N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:749 Protein Expression Plasmid Vector	PHLAP9252469	Plasmid vector containing HLA-A*02:749 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:749 protein. This plasmid can be used for constructing HLA-A*02:749 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:749 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:75 Protein Expression Plasmid Vector	PHLAP9252470	Plasmid vector containing HLA-A*02:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:75 protein. This plasmid can be used for constructing HLA-A*02:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:750 Protein Expression Plasmid Vector	PHLAP9252471	Plasmid vector containing HLA-A*02:750 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:750 protein. This plasmid can be used for constructing HLA-A*02:750 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:750 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:751 Protein Expression Plasmid Vector	PHLAP9252472	Plasmid vector containing HLA-A*02:751 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:751 protein. This plasmid can be used for constructing HLA-A*02:751 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:751 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:752 Protein Expression Plasmid Vector	PHLAP9252473	Plasmid vector containing HLA-A*02:752 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:752 protein. This plasmid can be used for constructing HLA-A*02:752 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:752 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:753 Protein Expression Plasmid Vector	PHLAP9252474	Plasmid vector containing HLA-A*02:753 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:753 protein. This plasmid can be used for constructing HLA-A*02:753 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:753 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:754 Protein Expression Plasmid Vector	PHLAP9252475	Plasmid vector containing HLA-A*02:754 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:754 protein. This plasmid can be used for constructing HLA-A*02:754 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:754 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:755 Protein Expression Plasmid Vector	PHLAP9252476	Plasmid vector containing HLA-A*02:755 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:755 protein. This plasmid can be used for constructing HLA-A*02:755 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:755 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:756 Protein Expression Plasmid Vector	PHLAP9252477	Plasmid vector containing HLA-A*02:756 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:756 protein. This plasmid can be used for constructing HLA-A*02:756 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:756 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:757 Protein Expression Plasmid Vector	PHLAP9252478	Plasmid vector containing HLA-A*02:757 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:757 protein. This plasmid can be used for constructing HLA-A*02:757 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:757 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:758 Protein Expression Plasmid Vector	PHLAP9252479	Plasmid vector containing HLA-A*02:758 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:758 protein. This plasmid can be used for constructing HLA-A*02:758 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:758 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:759 Protein Expression Plasmid Vector	PHLAP9252480	Plasmid vector containing HLA-A*02:759 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:759 protein. This plasmid can be used for constructing HLA-A*02:759 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:759 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:76:01 Protein Expression Plasmid Vector	PHLAP9252481	Plasmid vector containing HLA-A*02:76:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:76:01 protein. This plasmid can be used for constructing HLA-A*02:76:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:76:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:76:02 Protein Expression Plasmid Vector	PHLAP9252482	Plasmid vector containing HLA-A*02:76:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:76:02 protein. This plasmid can be used for constructing HLA-A*02:76:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:76:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:76:03 Protein Expression Plasmid Vector	PHLAP9252483	Plasmid vector containing HLA-A*02:76:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:76:03 protein. This plasmid can be used for constructing HLA-A*02:76:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:76:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:76:04 Protein Expression Plasmid Vector	PHLAP9252484	Plasmid vector containing HLA-A*02:76:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:76:04 protein. This plasmid can be used for constructing HLA-A*02:76:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:76:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:760N Protein Expression Plasmid Vector	PHLAP9252485	Plasmid vector containing HLA-A*02:760N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:760N protein. This plasmid can be used for constructing HLA-A*02:760N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:760N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:761 Protein Expression Plasmid Vector	PHLAP9252486	Plasmid vector containing HLA-A*02:761 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:761 protein. This plasmid can be used for constructing HLA-A*02:761 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:761 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:762 Protein Expression Plasmid Vector	PHLAP9252487	Plasmid vector containing HLA-A*02:762 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:762 protein. This plasmid can be used for constructing HLA-A*02:762 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:762 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:763 Protein Expression Plasmid Vector	PHLAP9252488	Plasmid vector containing HLA-A*02:763 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:763 protein. This plasmid can be used for constructing HLA-A*02:763 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:763 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:764 Protein Expression Plasmid Vector	PHLAP9252489	Plasmid vector containing HLA-A*02:764 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:764 protein. This plasmid can be used for constructing HLA-A*02:764 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:764 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:765 Protein Expression Plasmid Vector	PHLAP9252490	Plasmid vector containing HLA-A*02:765 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:765 protein. This plasmid can be used for constructing HLA-A*02:765 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:765 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:766 Protein Expression Plasmid Vector	PHLAP9252491	Plasmid vector containing HLA-A*02:766 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:766 protein. This plasmid can be used for constructing HLA-A*02:766 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:766 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:767 Protein Expression Plasmid Vector	PHLAP9252492	Plasmid vector containing HLA-A*02:767 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:767 protein. This plasmid can be used for constructing HLA-A*02:767 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:767 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:768 Protein Expression Plasmid Vector	PHLAP9252493	Plasmid vector containing HLA-A*02:768 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:768 protein. This plasmid can be used for constructing HLA-A*02:768 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:768 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:769 Protein Expression Plasmid Vector	PHLAP9252494	Plasmid vector containing HLA-A*02:769 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:769 protein. This plasmid can be used for constructing HLA-A*02:769 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:769 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:77 Protein Expression Plasmid Vector	PHLAP9252495	Plasmid vector containing HLA-A*02:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:77 protein. This plasmid can be used for constructing HLA-A*02:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:770 Protein Expression Plasmid Vector	PHLAP9252496	Plasmid vector containing HLA-A*02:770 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:770 protein. This plasmid can be used for constructing HLA-A*02:770 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:770 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:771 Protein Expression Plasmid Vector	PHLAP9252497	Plasmid vector containing HLA-A*02:771 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:771 protein. This plasmid can be used for constructing HLA-A*02:771 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:771 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:772 Protein Expression Plasmid Vector	PHLAP9252498	Plasmid vector containing HLA-A*02:772 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:772 protein. This plasmid can be used for constructing HLA-A*02:772 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:772 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:773N Protein Expression Plasmid Vector	PHLAP9252499	Plasmid vector containing HLA-A*02:773N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:773N protein. This plasmid can be used for constructing HLA-A*02:773N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:773N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:774 Protein Expression Plasmid Vector	PHLAP9252500	Plasmid vector containing HLA-A*02:774 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:774 protein. This plasmid can be used for constructing HLA-A*02:774 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:774 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:775N Protein Expression Plasmid Vector	PHLAP9252501	Plasmid vector containing HLA-A*02:775N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:775N protein. This plasmid can be used for constructing HLA-A*02:775N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:775N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:776 Protein Expression Plasmid Vector	PHLAP9252502	Plasmid vector containing HLA-A*02:776 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:776 protein. This plasmid can be used for constructing HLA-A*02:776 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:776 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:777 Protein Expression Plasmid Vector	PHLAP9252503	Plasmid vector containing HLA-A*02:777 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:777 protein. This plasmid can be used for constructing HLA-A*02:777 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:777 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:778 Protein Expression Plasmid Vector	PHLAP9252504	Plasmid vector containing HLA-A*02:778 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:778 protein. This plasmid can be used for constructing HLA-A*02:778 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:778 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:779 Protein Expression Plasmid Vector	PHLAP9252505	Plasmid vector containing HLA-A*02:779 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:779 protein. This plasmid can be used for constructing HLA-A*02:779 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:779 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:78 Protein Expression Plasmid Vector	PHLAP9252506	Plasmid vector containing HLA-A*02:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:78 protein. This plasmid can be used for constructing HLA-A*02:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:780 Protein Expression Plasmid Vector	PHLAP9252507	Plasmid vector containing HLA-A*02:780 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:780 protein. This plasmid can be used for constructing HLA-A*02:780 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:780 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:781 Protein Expression Plasmid Vector	PHLAP9252508	Plasmid vector containing HLA-A*02:781 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:781 protein. This plasmid can be used for constructing HLA-A*02:781 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:781 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:782 Protein Expression Plasmid Vector	PHLAP9252509	Plasmid vector containing HLA-A*02:782 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:782 protein. This plasmid can be used for constructing HLA-A*02:782 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:782 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:783 Protein Expression Plasmid Vector	PHLAP9252510	Plasmid vector containing HLA-A*02:783 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:783 protein. This plasmid can be used for constructing HLA-A*02:783 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:783 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:784 Protein Expression Plasmid Vector	PHLAP9252511	Plasmid vector containing HLA-A*02:784 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:784 protein. This plasmid can be used for constructing HLA-A*02:784 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:784 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:785 Protein Expression Plasmid Vector	PHLAP9252512	Plasmid vector containing HLA-A*02:785 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:785 protein. This plasmid can be used for constructing HLA-A*02:785 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:785 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:786 Protein Expression Plasmid Vector	PHLAP9252513	Plasmid vector containing HLA-A*02:786 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:786 protein. This plasmid can be used for constructing HLA-A*02:786 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:786 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:787 Protein Expression Plasmid Vector	PHLAP9252514	Plasmid vector containing HLA-A*02:787 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:787 protein. This plasmid can be used for constructing HLA-A*02:787 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:787 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:788N Protein Expression Plasmid Vector	PHLAP9252515	Plasmid vector containing HLA-A*02:788N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:788N protein. This plasmid can be used for constructing HLA-A*02:788N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:788N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:789N Protein Expression Plasmid Vector	PHLAP9252516	Plasmid vector containing HLA-A*02:789N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:789N protein. This plasmid can be used for constructing HLA-A*02:789N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:789N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:79:01 Protein Expression Plasmid Vector	PHLAP9252517	Plasmid vector containing HLA-A*02:79:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:79:01 protein. This plasmid can be used for constructing HLA-A*02:79:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:79:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:79:02 Protein Expression Plasmid Vector	PHLAP9252518	Plasmid vector containing HLA-A*02:79:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:79:02 protein. This plasmid can be used for constructing HLA-A*02:79:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:79:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:790 Protein Expression Plasmid Vector	PHLAP9252519	Plasmid vector containing HLA-A*02:790 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:790 protein. This plasmid can be used for constructing HLA-A*02:790 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:790 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:791N Protein Expression Plasmid Vector	PHLAP9252520	Plasmid vector containing HLA-A*02:791N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:791N protein. This plasmid can be used for constructing HLA-A*02:791N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:791N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:792N Protein Expression Plasmid Vector	PHLAP9252521	Plasmid vector containing HLA-A*02:792N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:792N protein. This plasmid can be used for constructing HLA-A*02:792N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:792N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:793N Protein Expression Plasmid Vector	PHLAP9252522	Plasmid vector containing HLA-A*02:793N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:793N protein. This plasmid can be used for constructing HLA-A*02:793N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:793N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:794 Protein Expression Plasmid Vector	PHLAP9252523	Plasmid vector containing HLA-A*02:794 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:794 protein. This plasmid can be used for constructing HLA-A*02:794 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:794 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:795Q Protein Expression Plasmid Vector	PHLAP9252524	Plasmid vector containing HLA-A*02:795Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:795Q protein. This plasmid can be used for constructing HLA-A*02:795Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:795Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:796N Protein Expression Plasmid Vector	PHLAP9252525	Plasmid vector containing HLA-A*02:796N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:796N protein. This plasmid can be used for constructing HLA-A*02:796N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:796N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:797N Protein Expression Plasmid Vector	PHLAP9252526	Plasmid vector containing HLA-A*02:797N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:797N protein. This plasmid can be used for constructing HLA-A*02:797N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:797N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:798 Protein Expression Plasmid Vector	PHLAP9252527	Plasmid vector containing HLA-A*02:798 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:798 protein. This plasmid can be used for constructing HLA-A*02:798 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:798 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:799 Protein Expression Plasmid Vector	PHLAP9252528	Plasmid vector containing HLA-A*02:799 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:799 protein. This plasmid can be used for constructing HLA-A*02:799 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:799 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:80 Protein Expression Plasmid Vector	PHLAP9252529	Plasmid vector containing HLA-A*02:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:80 protein. This plasmid can be used for constructing HLA-A*02:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:800 Protein Expression Plasmid Vector	PHLAP9252530	Plasmid vector containing HLA-A*02:800 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:800 protein. This plasmid can be used for constructing HLA-A*02:800 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:800 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:801 Protein Expression Plasmid Vector	PHLAP9252531	Plasmid vector containing HLA-A*02:801 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:801 protein. This plasmid can be used for constructing HLA-A*02:801 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:801 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:802 Protein Expression Plasmid Vector	PHLAP9252532	Plasmid vector containing HLA-A*02:802 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:802 protein. This plasmid can be used for constructing HLA-A*02:802 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:802 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:803N Protein Expression Plasmid Vector	PHLAP9252533	Plasmid vector containing HLA-A*02:803N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:803N protein. This plasmid can be used for constructing HLA-A*02:803N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:803N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:804 Protein Expression Plasmid Vector	PHLAP9252534	Plasmid vector containing HLA-A*02:804 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:804 protein. This plasmid can be used for constructing HLA-A*02:804 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:804 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:805Q Protein Expression Plasmid Vector	PHLAP9252535	Plasmid vector containing HLA-A*02:805Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:805Q protein. This plasmid can be used for constructing HLA-A*02:805Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:805Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:806N Protein Expression Plasmid Vector	PHLAP9252536	Plasmid vector containing HLA-A*02:806N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:806N protein. This plasmid can be used for constructing HLA-A*02:806N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:806N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:807N Protein Expression Plasmid Vector	PHLAP9252537	Plasmid vector containing HLA-A*02:807N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:807N protein. This plasmid can be used for constructing HLA-A*02:807N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:807N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:808 Protein Expression Plasmid Vector	PHLAP9252538	Plasmid vector containing HLA-A*02:808 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:808 protein. This plasmid can be used for constructing HLA-A*02:808 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:808 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:809 Protein Expression Plasmid Vector	PHLAP9252539	Plasmid vector containing HLA-A*02:809 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:809 protein. This plasmid can be used for constructing HLA-A*02:809 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:809 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:81 Protein Expression Plasmid Vector	PHLAP9252540	Plasmid vector containing HLA-A*02:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:81 protein. This plasmid can be used for constructing HLA-A*02:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:810 Protein Expression Plasmid Vector	PHLAP9252541	Plasmid vector containing HLA-A*02:810 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:810 protein. This plasmid can be used for constructing HLA-A*02:810 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:810 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:811:01 Protein Expression Plasmid Vector	PHLAP9252542	Plasmid vector containing HLA-A*02:811:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:811:01 protein. This plasmid can be used for constructing HLA-A*02:811:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:811:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:811:02 Protein Expression Plasmid Vector	PHLAP9252543	Plasmid vector containing HLA-A*02:811:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:811:02 protein. This plasmid can be used for constructing HLA-A*02:811:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:811:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:812 Protein Expression Plasmid Vector	PHLAP9252544	Plasmid vector containing HLA-A*02:812 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:812 protein. This plasmid can be used for constructing HLA-A*02:812 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:812 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:813 Protein Expression Plasmid Vector	PHLAP9252545	Plasmid vector containing HLA-A*02:813 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:813 protein. This plasmid can be used for constructing HLA-A*02:813 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:813 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:814 Protein Expression Plasmid Vector	PHLAP9252546	Plasmid vector containing HLA-A*02:814 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:814 protein. This plasmid can be used for constructing HLA-A*02:814 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:814 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:815 Protein Expression Plasmid Vector	PHLAP9252547	Plasmid vector containing HLA-A*02:815 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:815 protein. This plasmid can be used for constructing HLA-A*02:815 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:815 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:816 Protein Expression Plasmid Vector	PHLAP9252548	Plasmid vector containing HLA-A*02:816 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:816 protein. This plasmid can be used for constructing HLA-A*02:816 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:816 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:817 Protein Expression Plasmid Vector	PHLAP9252549	Plasmid vector containing HLA-A*02:817 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:817 protein. This plasmid can be used for constructing HLA-A*02:817 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:817 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:818 Protein Expression Plasmid Vector	PHLAP9252550	Plasmid vector containing HLA-A*02:818 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:818 protein. This plasmid can be used for constructing HLA-A*02:818 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:818 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:819 Protein Expression Plasmid Vector	PHLAP9252551	Plasmid vector containing HLA-A*02:819 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:819 protein. This plasmid can be used for constructing HLA-A*02:819 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:819 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:820 Protein Expression Plasmid Vector	PHLAP9252552	Plasmid vector containing HLA-A*02:820 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:820 protein. This plasmid can be used for constructing HLA-A*02:820 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:820 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:821 Protein Expression Plasmid Vector	PHLAP9252553	Plasmid vector containing HLA-A*02:821 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:821 protein. This plasmid can be used for constructing HLA-A*02:821 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:821 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:822 Protein Expression Plasmid Vector	PHLAP9252554	Plasmid vector containing HLA-A*02:822 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:822 protein. This plasmid can be used for constructing HLA-A*02:822 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:822 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:823 Protein Expression Plasmid Vector	PHLAP9252555	Plasmid vector containing HLA-A*02:823 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:823 protein. This plasmid can be used for constructing HLA-A*02:823 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:823 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:824 Protein Expression Plasmid Vector	PHLAP9252556	Plasmid vector containing HLA-A*02:824 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:824 protein. This plasmid can be used for constructing HLA-A*02:824 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:824 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:825 Protein Expression Plasmid Vector	PHLAP9252557	Plasmid vector containing HLA-A*02:825 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:825 protein. This plasmid can be used for constructing HLA-A*02:825 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:825 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:826Q Protein Expression Plasmid Vector	PHLAP9252558	Plasmid vector containing HLA-A*02:826Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:826Q protein. This plasmid can be used for constructing HLA-A*02:826Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:826Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:827Q Protein Expression Plasmid Vector	PHLAP9252559	Plasmid vector containing HLA-A*02:827Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:827Q protein. This plasmid can be used for constructing HLA-A*02:827Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:827Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:828 Protein Expression Plasmid Vector	PHLAP9252560	Plasmid vector containing HLA-A*02:828 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:828 protein. This plasmid can be used for constructing HLA-A*02:828 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:828 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:829 Protein Expression Plasmid Vector	PHLAP9252561	Plasmid vector containing HLA-A*02:829 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:829 protein. This plasmid can be used for constructing HLA-A*02:829 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:829 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:82N Protein Expression Plasmid Vector	PHLAP9252562	Plasmid vector containing HLA-A*02:82N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:82N protein. This plasmid can be used for constructing HLA-A*02:82N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:82N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:830:01 Protein Expression Plasmid Vector	PHLAP9252563	Plasmid vector containing HLA-A*02:830:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:830:01 protein. This plasmid can be used for constructing HLA-A*02:830:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:830:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:830:02 Protein Expression Plasmid Vector	PHLAP9252564	Plasmid vector containing HLA-A*02:830:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:830:02 protein. This plasmid can be used for constructing HLA-A*02:830:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:830:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:831N Protein Expression Plasmid Vector	PHLAP9252565	Plasmid vector containing HLA-A*02:831N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:831N protein. This plasmid can be used for constructing HLA-A*02:831N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:831N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:832N Protein Expression Plasmid Vector	PHLAP9252566	Plasmid vector containing HLA-A*02:832N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:832N protein. This plasmid can be used for constructing HLA-A*02:832N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:832N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:833N Protein Expression Plasmid Vector	PHLAP9252567	Plasmid vector containing HLA-A*02:833N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:833N protein. This plasmid can be used for constructing HLA-A*02:833N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:833N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:834 Protein Expression Plasmid Vector	PHLAP9252568	Plasmid vector containing HLA-A*02:834 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:834 protein. This plasmid can be used for constructing HLA-A*02:834 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:834 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:835 Protein Expression Plasmid Vector	PHLAP9252569	Plasmid vector containing HLA-A*02:835 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:835 protein. This plasmid can be used for constructing HLA-A*02:835 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:835 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:836 Protein Expression Plasmid Vector	PHLAP9252570	Plasmid vector containing HLA-A*02:836 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:836 protein. This plasmid can be used for constructing HLA-A*02:836 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:836 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:837 Protein Expression Plasmid Vector	PHLAP9252571	Plasmid vector containing HLA-A*02:837 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:837 protein. This plasmid can be used for constructing HLA-A*02:837 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:837 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:838 Protein Expression Plasmid Vector	PHLAP9252572	Plasmid vector containing HLA-A*02:838 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:838 protein. This plasmid can be used for constructing HLA-A*02:838 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:838 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:839 Protein Expression Plasmid Vector	PHLAP9252573	Plasmid vector containing HLA-A*02:839 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:839 protein. This plasmid can be used for constructing HLA-A*02:839 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:839 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:83N Protein Expression Plasmid Vector	PHLAP9252574	Plasmid vector containing HLA-A*02:83N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:83N protein. This plasmid can be used for constructing HLA-A*02:83N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:83N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:84 Protein Expression Plasmid Vector	PHLAP9252575	Plasmid vector containing HLA-A*02:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:84 protein. This plasmid can be used for constructing HLA-A*02:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:840 Protein Expression Plasmid Vector	PHLAP9252576	Plasmid vector containing HLA-A*02:840 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:840 protein. This plasmid can be used for constructing HLA-A*02:840 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:840 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:841 Protein Expression Plasmid Vector	PHLAP9252577	Plasmid vector containing HLA-A*02:841 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:841 protein. This plasmid can be used for constructing HLA-A*02:841 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:841 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:842 Protein Expression Plasmid Vector	PHLAP9252578	Plasmid vector containing HLA-A*02:842 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:842 protein. This plasmid can be used for constructing HLA-A*02:842 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:842 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:843 Protein Expression Plasmid Vector	PHLAP9252579	Plasmid vector containing HLA-A*02:843 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:843 protein. This plasmid can be used for constructing HLA-A*02:843 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:843 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:844 Protein Expression Plasmid Vector	PHLAP9252580	Plasmid vector containing HLA-A*02:844 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:844 protein. This plasmid can be used for constructing HLA-A*02:844 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:844 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:845 Protein Expression Plasmid Vector	PHLAP9252581	Plasmid vector containing HLA-A*02:845 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:845 protein. This plasmid can be used for constructing HLA-A*02:845 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:845 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:846 Protein Expression Plasmid Vector	PHLAP9252582	Plasmid vector containing HLA-A*02:846 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:846 protein. This plasmid can be used for constructing HLA-A*02:846 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:846 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:847 Protein Expression Plasmid Vector	PHLAP9252583	Plasmid vector containing HLA-A*02:847 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:847 protein. This plasmid can be used for constructing HLA-A*02:847 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:847 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:848 Protein Expression Plasmid Vector	PHLAP9252584	Plasmid vector containing HLA-A*02:848 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:848 protein. This plasmid can be used for constructing HLA-A*02:848 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:848 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:849 Protein Expression Plasmid Vector	PHLAP9252585	Plasmid vector containing HLA-A*02:849 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:849 protein. This plasmid can be used for constructing HLA-A*02:849 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:849 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:85 Protein Expression Plasmid Vector	PHLAP9252586	Plasmid vector containing HLA-A*02:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:85 protein. This plasmid can be used for constructing HLA-A*02:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:850 Protein Expression Plasmid Vector	PHLAP9252587	Plasmid vector containing HLA-A*02:850 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:850 protein. This plasmid can be used for constructing HLA-A*02:850 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:850 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:851 Protein Expression Plasmid Vector	PHLAP9252588	Plasmid vector containing HLA-A*02:851 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:851 protein. This plasmid can be used for constructing HLA-A*02:851 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:851 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:852 Protein Expression Plasmid Vector	PHLAP9252589	Plasmid vector containing HLA-A*02:852 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:852 protein. This plasmid can be used for constructing HLA-A*02:852 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:852 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:853 Protein Expression Plasmid Vector	PHLAP9252590	Plasmid vector containing HLA-A*02:853 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:853 protein. This plasmid can be used for constructing HLA-A*02:853 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:853 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:854 Protein Expression Plasmid Vector	PHLAP9252591	Plasmid vector containing HLA-A*02:854 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:854 protein. This plasmid can be used for constructing HLA-A*02:854 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:854 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:855 Protein Expression Plasmid Vector	PHLAP9252592	Plasmid vector containing HLA-A*02:855 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:855 protein. This plasmid can be used for constructing HLA-A*02:855 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:855 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:856 Protein Expression Plasmid Vector	PHLAP9252593	Plasmid vector containing HLA-A*02:856 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:856 protein. This plasmid can be used for constructing HLA-A*02:856 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:856 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:857 Protein Expression Plasmid Vector	PHLAP9252594	Plasmid vector containing HLA-A*02:857 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:857 protein. This plasmid can be used for constructing HLA-A*02:857 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:857 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:858N Protein Expression Plasmid Vector	PHLAP9252595	Plasmid vector containing HLA-A*02:858N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:858N protein. This plasmid can be used for constructing HLA-A*02:858N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:858N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:859 Protein Expression Plasmid Vector	PHLAP9252596	Plasmid vector containing HLA-A*02:859 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:859 protein. This plasmid can be used for constructing HLA-A*02:859 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:859 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:86:01 Protein Expression Plasmid Vector	PHLAP9252597	Plasmid vector containing HLA-A*02:86:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:86:01 protein. This plasmid can be used for constructing HLA-A*02:86:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:86:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:86:02 Protein Expression Plasmid Vector	PHLAP9252598	Plasmid vector containing HLA-A*02:86:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:86:02 protein. This plasmid can be used for constructing HLA-A*02:86:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:86:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:860 Protein Expression Plasmid Vector	PHLAP9252599	Plasmid vector containing HLA-A*02:860 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:860 protein. This plasmid can be used for constructing HLA-A*02:860 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:860 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:861 Protein Expression Plasmid Vector	PHLAP9252600	Plasmid vector containing HLA-A*02:861 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:861 protein. This plasmid can be used for constructing HLA-A*02:861 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:861 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:862 Protein Expression Plasmid Vector	PHLAP9252601	Plasmid vector containing HLA-A*02:862 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:862 protein. This plasmid can be used for constructing HLA-A*02:862 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:862 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:863 Protein Expression Plasmid Vector	PHLAP9252602	Plasmid vector containing HLA-A*02:863 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:863 protein. This plasmid can be used for constructing HLA-A*02:863 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:863 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:864:01:01 Protein Expression Plasmid Vector	PHLAP9252603	Plasmid vector containing HLA-A*02:864:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:864:01:01 protein. This plasmid can be used for constructing HLA-A*02:864:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:864:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:864:01:02 Protein Expression Plasmid Vector	PHLAP9252604	Plasmid vector containing HLA-A*02:864:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:864:01:02 protein. This plasmid can be used for constructing HLA-A*02:864:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:864:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:865 Protein Expression Plasmid Vector	PHLAP9252605	Plasmid vector containing HLA-A*02:865 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:865 protein. This plasmid can be used for constructing HLA-A*02:865 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:865 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:866 Protein Expression Plasmid Vector	PHLAP9252606	Plasmid vector containing HLA-A*02:866 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:866 protein. This plasmid can be used for constructing HLA-A*02:866 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:866 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:867 Protein Expression Plasmid Vector	PHLAP9252607	Plasmid vector containing HLA-A*02:867 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:867 protein. This plasmid can be used for constructing HLA-A*02:867 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:867 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:868 Protein Expression Plasmid Vector	PHLAP9252608	Plasmid vector containing HLA-A*02:868 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:868 protein. This plasmid can be used for constructing HLA-A*02:868 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:868 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:869 Protein Expression Plasmid Vector	PHLAP9252609	Plasmid vector containing HLA-A*02:869 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:869 protein. This plasmid can be used for constructing HLA-A*02:869 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:869 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:87 Protein Expression Plasmid Vector	PHLAP9252610	Plasmid vector containing HLA-A*02:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:87 protein. This plasmid can be used for constructing HLA-A*02:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:870 Protein Expression Plasmid Vector	PHLAP9252611	Plasmid vector containing HLA-A*02:870 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:870 protein. This plasmid can be used for constructing HLA-A*02:870 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:870 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:871N Protein Expression Plasmid Vector	PHLAP9252612	Plasmid vector containing HLA-A*02:871N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:871N protein. This plasmid can be used for constructing HLA-A*02:871N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:871N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:872 Protein Expression Plasmid Vector	PHLAP9252613	Plasmid vector containing HLA-A*02:872 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:872 protein. This plasmid can be used for constructing HLA-A*02:872 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:872 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:873 Protein Expression Plasmid Vector	PHLAP9252614	Plasmid vector containing HLA-A*02:873 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:873 protein. This plasmid can be used for constructing HLA-A*02:873 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:873 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:874 Protein Expression Plasmid Vector	PHLAP9252615	Plasmid vector containing HLA-A*02:874 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:874 protein. This plasmid can be used for constructing HLA-A*02:874 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:874 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:875 Protein Expression Plasmid Vector	PHLAP9252616	Plasmid vector containing HLA-A*02:875 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:875 protein. This plasmid can be used for constructing HLA-A*02:875 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:875 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:876 Protein Expression Plasmid Vector	PHLAP9252617	Plasmid vector containing HLA-A*02:876 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:876 protein. This plasmid can be used for constructing HLA-A*02:876 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:876 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:877 Protein Expression Plasmid Vector	PHLAP9252618	Plasmid vector containing HLA-A*02:877 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:877 protein. This plasmid can be used for constructing HLA-A*02:877 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:877 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:878 Protein Expression Plasmid Vector	PHLAP9252619	Plasmid vector containing HLA-A*02:878 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:878 protein. This plasmid can be used for constructing HLA-A*02:878 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:878 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:879N Protein Expression Plasmid Vector	PHLAP9252620	Plasmid vector containing HLA-A*02:879N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:879N protein. This plasmid can be used for constructing HLA-A*02:879N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:879N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:880N Protein Expression Plasmid Vector	PHLAP9252621	Plasmid vector containing HLA-A*02:880N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:880N protein. This plasmid can be used for constructing HLA-A*02:880N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:880N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:881 Protein Expression Plasmid Vector	PHLAP9252622	Plasmid vector containing HLA-A*02:881 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:881 protein. This plasmid can be used for constructing HLA-A*02:881 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:881 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:882 Protein Expression Plasmid Vector	PHLAP9252623	Plasmid vector containing HLA-A*02:882 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:882 protein. This plasmid can be used for constructing HLA-A*02:882 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:882 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:883 Protein Expression Plasmid Vector	PHLAP9252624	Plasmid vector containing HLA-A*02:883 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:883 protein. This plasmid can be used for constructing HLA-A*02:883 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:883 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:884:01 Protein Expression Plasmid Vector	PHLAP9252625	Plasmid vector containing HLA-A*02:884:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:884:01 protein. This plasmid can be used for constructing HLA-A*02:884:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:884:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:884:02 Protein Expression Plasmid Vector	PHLAP9252626	Plasmid vector containing HLA-A*02:884:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:884:02 protein. This plasmid can be used for constructing HLA-A*02:884:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:884:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:885 Protein Expression Plasmid Vector	PHLAP9252627	Plasmid vector containing HLA-A*02:885 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:885 protein. This plasmid can be used for constructing HLA-A*02:885 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:885 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:886 Protein Expression Plasmid Vector	PHLAP9252628	Plasmid vector containing HLA-A*02:886 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:886 protein. This plasmid can be used for constructing HLA-A*02:886 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:886 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:887N Protein Expression Plasmid Vector	PHLAP9252629	Plasmid vector containing HLA-A*02:887N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:887N protein. This plasmid can be used for constructing HLA-A*02:887N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:887N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:888 Protein Expression Plasmid Vector	PHLAP9252630	Plasmid vector containing HLA-A*02:888 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:888 protein. This plasmid can be used for constructing HLA-A*02:888 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:888 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:889 Protein Expression Plasmid Vector	PHLAP9252631	Plasmid vector containing HLA-A*02:889 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:889 protein. This plasmid can be used for constructing HLA-A*02:889 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:889 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:88N Protein Expression Plasmid Vector	PHLAP9252632	Plasmid vector containing HLA-A*02:88N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:88N protein. This plasmid can be used for constructing HLA-A*02:88N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:88N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:89:01 Protein Expression Plasmid Vector	PHLAP9252633	Plasmid vector containing HLA-A*02:89:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:89:01 protein. This plasmid can be used for constructing HLA-A*02:89:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:89:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:89:02 Protein Expression Plasmid Vector	PHLAP9252634	Plasmid vector containing HLA-A*02:89:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:89:02 protein. This plasmid can be used for constructing HLA-A*02:89:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:89:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:890 Protein Expression Plasmid Vector	PHLAP9252635	Plasmid vector containing HLA-A*02:890 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:890 protein. This plasmid can be used for constructing HLA-A*02:890 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:890 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:891 Protein Expression Plasmid Vector	PHLAP9252636	Plasmid vector containing HLA-A*02:891 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:891 protein. This plasmid can be used for constructing HLA-A*02:891 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:891 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:892 Protein Expression Plasmid Vector	PHLAP9252637	Plasmid vector containing HLA-A*02:892 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:892 protein. This plasmid can be used for constructing HLA-A*02:892 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:892 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:893 Protein Expression Plasmid Vector	PHLAP9252638	Plasmid vector containing HLA-A*02:893 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:893 protein. This plasmid can be used for constructing HLA-A*02:893 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:893 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:894 Protein Expression Plasmid Vector	PHLAP9252639	Plasmid vector containing HLA-A*02:894 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:894 protein. This plasmid can be used for constructing HLA-A*02:894 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:894 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:895N Protein Expression Plasmid Vector	PHLAP9252640	Plasmid vector containing HLA-A*02:895N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:895N protein. This plasmid can be used for constructing HLA-A*02:895N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:895N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:896N Protein Expression Plasmid Vector	PHLAP9252641	Plasmid vector containing HLA-A*02:896N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:896N protein. This plasmid can be used for constructing HLA-A*02:896N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:896N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:897 Protein Expression Plasmid Vector	PHLAP9252642	Plasmid vector containing HLA-A*02:897 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:897 protein. This plasmid can be used for constructing HLA-A*02:897 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:897 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:898 Protein Expression Plasmid Vector	PHLAP9252643	Plasmid vector containing HLA-A*02:898 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:898 protein. This plasmid can be used for constructing HLA-A*02:898 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:898 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:899 Protein Expression Plasmid Vector	PHLAP9252644	Plasmid vector containing HLA-A*02:899 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:899 protein. This plasmid can be used for constructing HLA-A*02:899 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:899 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:90 Protein Expression Plasmid Vector	PHLAP9252645	Plasmid vector containing HLA-A*02:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:90 protein. This plasmid can be used for constructing HLA-A*02:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:900 Protein Expression Plasmid Vector	PHLAP9252646	Plasmid vector containing HLA-A*02:900 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:900 protein. This plasmid can be used for constructing HLA-A*02:900 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:900 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:901 Protein Expression Plasmid Vector	PHLAP9252647	Plasmid vector containing HLA-A*02:901 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:901 protein. This plasmid can be used for constructing HLA-A*02:901 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:901 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:902 Protein Expression Plasmid Vector	PHLAP9252648	Plasmid vector containing HLA-A*02:902 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:902 protein. This plasmid can be used for constructing HLA-A*02:902 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:902 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:903 Protein Expression Plasmid Vector	PHLAP9252649	Plasmid vector containing HLA-A*02:903 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:903 protein. This plasmid can be used for constructing HLA-A*02:903 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:903 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:904 Protein Expression Plasmid Vector	PHLAP9252650	Plasmid vector containing HLA-A*02:904 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:904 protein. This plasmid can be used for constructing HLA-A*02:904 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:904 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:905 Protein Expression Plasmid Vector	PHLAP9252651	Plasmid vector containing HLA-A*02:905 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:905 protein. This plasmid can be used for constructing HLA-A*02:905 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:905 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:906 Protein Expression Plasmid Vector	PHLAP9252652	Plasmid vector containing HLA-A*02:906 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:906 protein. This plasmid can be used for constructing HLA-A*02:906 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:906 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:907 Protein Expression Plasmid Vector	PHLAP9252653	Plasmid vector containing HLA-A*02:907 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:907 protein. This plasmid can be used for constructing HLA-A*02:907 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:907 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:908 Protein Expression Plasmid Vector	PHLAP9252654	Plasmid vector containing HLA-A*02:908 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:908 protein. This plasmid can be used for constructing HLA-A*02:908 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:908 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:909 Protein Expression Plasmid Vector	PHLAP9252655	Plasmid vector containing HLA-A*02:909 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:909 protein. This plasmid can be used for constructing HLA-A*02:909 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:909 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:91 Protein Expression Plasmid Vector	PHLAP9252656	Plasmid vector containing HLA-A*02:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:91 protein. This plasmid can be used for constructing HLA-A*02:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:910 Protein Expression Plasmid Vector	PHLAP9252657	Plasmid vector containing HLA-A*02:910 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:910 protein. This plasmid can be used for constructing HLA-A*02:910 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:910 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:911 Protein Expression Plasmid Vector	PHLAP9252658	Plasmid vector containing HLA-A*02:911 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:911 protein. This plasmid can be used for constructing HLA-A*02:911 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:911 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:912 Protein Expression Plasmid Vector	PHLAP9252659	Plasmid vector containing HLA-A*02:912 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:912 protein. This plasmid can be used for constructing HLA-A*02:912 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:912 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:913 Protein Expression Plasmid Vector	PHLAP9252660	Plasmid vector containing HLA-A*02:913 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:913 protein. This plasmid can be used for constructing HLA-A*02:913 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:913 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:914 Protein Expression Plasmid Vector	PHLAP9252661	Plasmid vector containing HLA-A*02:914 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:914 protein. This plasmid can be used for constructing HLA-A*02:914 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:914 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:915N Protein Expression Plasmid Vector	PHLAP9252662	Plasmid vector containing HLA-A*02:915N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:915N protein. This plasmid can be used for constructing HLA-A*02:915N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:915N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:916 Protein Expression Plasmid Vector	PHLAP9252663	Plasmid vector containing HLA-A*02:916 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:916 protein. This plasmid can be used for constructing HLA-A*02:916 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:916 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:917 Protein Expression Plasmid Vector	PHLAP9252664	Plasmid vector containing HLA-A*02:917 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:917 protein. This plasmid can be used for constructing HLA-A*02:917 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:917 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:918 Protein Expression Plasmid Vector	PHLAP9252665	Plasmid vector containing HLA-A*02:918 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:918 protein. This plasmid can be used for constructing HLA-A*02:918 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:918 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:919 Protein Expression Plasmid Vector	PHLAP9252666	Plasmid vector containing HLA-A*02:919 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:919 protein. This plasmid can be used for constructing HLA-A*02:919 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:919 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:92 Protein Expression Plasmid Vector	PHLAP9252667	Plasmid vector containing HLA-A*02:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:92 protein. This plasmid can be used for constructing HLA-A*02:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:920 Protein Expression Plasmid Vector	PHLAP9252668	Plasmid vector containing HLA-A*02:920 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:920 protein. This plasmid can be used for constructing HLA-A*02:920 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:920 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:921:01 Protein Expression Plasmid Vector	PHLAP9252669	Plasmid vector containing HLA-A*02:921:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:921:01 protein. This plasmid can be used for constructing HLA-A*02:921:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:921:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:921:02 Protein Expression Plasmid Vector	PHLAP9252670	Plasmid vector containing HLA-A*02:921:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:921:02 protein. This plasmid can be used for constructing HLA-A*02:921:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:921:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:922 Protein Expression Plasmid Vector	PHLAP9252671	Plasmid vector containing HLA-A*02:922 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:922 protein. This plasmid can be used for constructing HLA-A*02:922 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:922 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:923 Protein Expression Plasmid Vector	PHLAP9252672	Plasmid vector containing HLA-A*02:923 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:923 protein. This plasmid can be used for constructing HLA-A*02:923 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:923 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:924 Protein Expression Plasmid Vector	PHLAP9252673	Plasmid vector containing HLA-A*02:924 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:924 protein. This plasmid can be used for constructing HLA-A*02:924 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:924 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:925 Protein Expression Plasmid Vector	PHLAP9252674	Plasmid vector containing HLA-A*02:925 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:925 protein. This plasmid can be used for constructing HLA-A*02:925 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:925 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:926 Protein Expression Plasmid Vector	PHLAP9252675	Plasmid vector containing HLA-A*02:926 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:926 protein. This plasmid can be used for constructing HLA-A*02:926 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:926 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:927 Protein Expression Plasmid Vector	PHLAP9252676	Plasmid vector containing HLA-A*02:927 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:927 protein. This plasmid can be used for constructing HLA-A*02:927 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:927 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:928 Protein Expression Plasmid Vector	PHLAP9252677	Plasmid vector containing HLA-A*02:928 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:928 protein. This plasmid can be used for constructing HLA-A*02:928 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:928 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:929 Protein Expression Plasmid Vector	PHLAP9252678	Plasmid vector containing HLA-A*02:929 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:929 protein. This plasmid can be used for constructing HLA-A*02:929 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:929 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:93:01 Protein Expression Plasmid Vector	PHLAP9252679	Plasmid vector containing HLA-A*02:93:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:93:01 protein. This plasmid can be used for constructing HLA-A*02:93:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:93:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:93:02 Protein Expression Plasmid Vector	PHLAP9252680	Plasmid vector containing HLA-A*02:93:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:93:02 protein. This plasmid can be used for constructing HLA-A*02:93:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:93:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:930 Protein Expression Plasmid Vector	PHLAP9252681	Plasmid vector containing HLA-A*02:930 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:930 protein. This plasmid can be used for constructing HLA-A*02:930 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:930 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:931 Protein Expression Plasmid Vector	PHLAP9252682	Plasmid vector containing HLA-A*02:931 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:931 protein. This plasmid can be used for constructing HLA-A*02:931 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:931 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:932 Protein Expression Plasmid Vector	PHLAP9252683	Plasmid vector containing HLA-A*02:932 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:932 protein. This plasmid can be used for constructing HLA-A*02:932 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:932 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:933 Protein Expression Plasmid Vector	PHLAP9252684	Plasmid vector containing HLA-A*02:933 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:933 protein. This plasmid can be used for constructing HLA-A*02:933 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:933 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:934 Protein Expression Plasmid Vector	PHLAP9252685	Plasmid vector containing HLA-A*02:934 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:934 protein. This plasmid can be used for constructing HLA-A*02:934 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:934 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:935 Protein Expression Plasmid Vector	PHLAP9252686	Plasmid vector containing HLA-A*02:935 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:935 protein. This plasmid can be used for constructing HLA-A*02:935 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:935 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:936N Protein Expression Plasmid Vector	PHLAP9252687	Plasmid vector containing HLA-A*02:936N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:936N protein. This plasmid can be used for constructing HLA-A*02:936N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:936N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:937 Protein Expression Plasmid Vector	PHLAP9252688	Plasmid vector containing HLA-A*02:937 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:937 protein. This plasmid can be used for constructing HLA-A*02:937 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:937 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:938 Protein Expression Plasmid Vector	PHLAP9252689	Plasmid vector containing HLA-A*02:938 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:938 protein. This plasmid can be used for constructing HLA-A*02:938 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:938 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:939 Protein Expression Plasmid Vector	PHLAP9252690	Plasmid vector containing HLA-A*02:939 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:939 protein. This plasmid can be used for constructing HLA-A*02:939 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:939 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:940 Protein Expression Plasmid Vector	PHLAP9252691	Plasmid vector containing HLA-A*02:940 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:940 protein. This plasmid can be used for constructing HLA-A*02:940 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:940 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:941 Protein Expression Plasmid Vector	PHLAP9252692	Plasmid vector containing HLA-A*02:941 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:941 protein. This plasmid can be used for constructing HLA-A*02:941 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:941 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:942 Protein Expression Plasmid Vector	PHLAP9252693	Plasmid vector containing HLA-A*02:942 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:942 protein. This plasmid can be used for constructing HLA-A*02:942 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:942 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:943 Protein Expression Plasmid Vector	PHLAP9252694	Plasmid vector containing HLA-A*02:943 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:943 protein. This plasmid can be used for constructing HLA-A*02:943 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:943 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:944 Protein Expression Plasmid Vector	PHLAP9252695	Plasmid vector containing HLA-A*02:944 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:944 protein. This plasmid can be used for constructing HLA-A*02:944 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:944 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:945N Protein Expression Plasmid Vector	PHLAP9252696	Plasmid vector containing HLA-A*02:945N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:945N protein. This plasmid can be used for constructing HLA-A*02:945N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:945N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:946N Protein Expression Plasmid Vector	PHLAP9252697	Plasmid vector containing HLA-A*02:946N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:946N protein. This plasmid can be used for constructing HLA-A*02:946N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:946N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:947:01 Protein Expression Plasmid Vector	PHLAP9252698	Plasmid vector containing HLA-A*02:947:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:947:01 protein. This plasmid can be used for constructing HLA-A*02:947:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:947:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:947:02 Protein Expression Plasmid Vector	PHLAP9252699	Plasmid vector containing HLA-A*02:947:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:947:02 protein. This plasmid can be used for constructing HLA-A*02:947:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:947:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:948 Protein Expression Plasmid Vector	PHLAP9252700	Plasmid vector containing HLA-A*02:948 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:948 protein. This plasmid can be used for constructing HLA-A*02:948 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:948 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:949 Protein Expression Plasmid Vector	PHLAP9252701	Plasmid vector containing HLA-A*02:949 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:949 protein. This plasmid can be used for constructing HLA-A*02:949 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:949 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:94N Protein Expression Plasmid Vector	PHLAP9252702	Plasmid vector containing HLA-A*02:94N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:94N protein. This plasmid can be used for constructing HLA-A*02:94N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:94N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:95 Protein Expression Plasmid Vector	PHLAP9252703	Plasmid vector containing HLA-A*02:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:95 protein. This plasmid can be used for constructing HLA-A*02:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:950 Protein Expression Plasmid Vector	PHLAP9252704	Plasmid vector containing HLA-A*02:950 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:950 protein. This plasmid can be used for constructing HLA-A*02:950 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:950 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:951 Protein Expression Plasmid Vector	PHLAP9252705	Plasmid vector containing HLA-A*02:951 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:951 protein. This plasmid can be used for constructing HLA-A*02:951 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:951 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:952 Protein Expression Plasmid Vector	PHLAP9252706	Plasmid vector containing HLA-A*02:952 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:952 protein. This plasmid can be used for constructing HLA-A*02:952 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:952 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:953 Protein Expression Plasmid Vector	PHLAP9252707	Plasmid vector containing HLA-A*02:953 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:953 protein. This plasmid can be used for constructing HLA-A*02:953 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:953 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:954 Protein Expression Plasmid Vector	PHLAP9252708	Plasmid vector containing HLA-A*02:954 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:954 protein. This plasmid can be used for constructing HLA-A*02:954 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:954 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:955 Protein Expression Plasmid Vector	PHLAP9252709	Plasmid vector containing HLA-A*02:955 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:955 protein. This plasmid can be used for constructing HLA-A*02:955 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:955 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:956 Protein Expression Plasmid Vector	PHLAP9252710	Plasmid vector containing HLA-A*02:956 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:956 protein. This plasmid can be used for constructing HLA-A*02:956 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:956 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:957 Protein Expression Plasmid Vector	PHLAP9252711	Plasmid vector containing HLA-A*02:957 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:957 protein. This plasmid can be used for constructing HLA-A*02:957 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:957 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:958 Protein Expression Plasmid Vector	PHLAP9252712	Plasmid vector containing HLA-A*02:958 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:958 protein. This plasmid can be used for constructing HLA-A*02:958 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:958 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:959 Protein Expression Plasmid Vector	PHLAP9252713	Plasmid vector containing HLA-A*02:959 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:959 protein. This plasmid can be used for constructing HLA-A*02:959 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:959 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:96 Protein Expression Plasmid Vector	PHLAP9252714	Plasmid vector containing HLA-A*02:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:96 protein. This plasmid can be used for constructing HLA-A*02:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:960 Protein Expression Plasmid Vector	PHLAP9252715	Plasmid vector containing HLA-A*02:960 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:960 protein. This plasmid can be used for constructing HLA-A*02:960 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:960 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:961 Protein Expression Plasmid Vector	PHLAP9252716	Plasmid vector containing HLA-A*02:961 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:961 protein. This plasmid can be used for constructing HLA-A*02:961 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:961 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:962 Protein Expression Plasmid Vector	PHLAP9252717	Plasmid vector containing HLA-A*02:962 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:962 protein. This plasmid can be used for constructing HLA-A*02:962 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:962 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:963 Protein Expression Plasmid Vector	PHLAP9252718	Plasmid vector containing HLA-A*02:963 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:963 protein. This plasmid can be used for constructing HLA-A*02:963 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:963 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:964 Protein Expression Plasmid Vector	PHLAP9252719	Plasmid vector containing HLA-A*02:964 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:964 protein. This plasmid can be used for constructing HLA-A*02:964 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:964 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:965 Protein Expression Plasmid Vector	PHLAP9252720	Plasmid vector containing HLA-A*02:965 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:965 protein. This plasmid can be used for constructing HLA-A*02:965 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:965 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:966 Protein Expression Plasmid Vector	PHLAP9252721	Plasmid vector containing HLA-A*02:966 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:966 protein. This plasmid can be used for constructing HLA-A*02:966 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:966 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:967 Protein Expression Plasmid Vector	PHLAP9252722	Plasmid vector containing HLA-A*02:967 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:967 protein. This plasmid can be used for constructing HLA-A*02:967 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:967 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:968 Protein Expression Plasmid Vector	PHLAP9252723	Plasmid vector containing HLA-A*02:968 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:968 protein. This plasmid can be used for constructing HLA-A*02:968 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:968 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:969 Protein Expression Plasmid Vector	PHLAP9252724	Plasmid vector containing HLA-A*02:969 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:969 protein. This plasmid can be used for constructing HLA-A*02:969 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:969 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:97:01 Protein Expression Plasmid Vector	PHLAP9252725	Plasmid vector containing HLA-A*02:97:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:97:01 protein. This plasmid can be used for constructing HLA-A*02:97:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:97:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:97:02 Protein Expression Plasmid Vector	PHLAP9252726	Plasmid vector containing HLA-A*02:97:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:97:02 protein. This plasmid can be used for constructing HLA-A*02:97:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:97:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:970 Protein Expression Plasmid Vector	PHLAP9252727	Plasmid vector containing HLA-A*02:970 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:970 protein. This plasmid can be used for constructing HLA-A*02:970 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:970 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:971 Protein Expression Plasmid Vector	PHLAP9252728	Plasmid vector containing HLA-A*02:971 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:971 protein. This plasmid can be used for constructing HLA-A*02:971 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:971 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:972 Protein Expression Plasmid Vector	PHLAP9252729	Plasmid vector containing HLA-A*02:972 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:972 protein. This plasmid can be used for constructing HLA-A*02:972 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:972 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:973 Protein Expression Plasmid Vector	PHLAP9252730	Plasmid vector containing HLA-A*02:973 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:973 protein. This plasmid can be used for constructing HLA-A*02:973 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:973 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:974 Protein Expression Plasmid Vector	PHLAP9252731	Plasmid vector containing HLA-A*02:974 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:974 protein. This plasmid can be used for constructing HLA-A*02:974 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:974 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:975 Protein Expression Plasmid Vector	PHLAP9252732	Plasmid vector containing HLA-A*02:975 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:975 protein. This plasmid can be used for constructing HLA-A*02:975 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:975 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:976 Protein Expression Plasmid Vector	PHLAP9252733	Plasmid vector containing HLA-A*02:976 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:976 protein. This plasmid can be used for constructing HLA-A*02:976 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:976 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:977 Protein Expression Plasmid Vector	PHLAP9252734	Plasmid vector containing HLA-A*02:977 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:977 protein. This plasmid can be used for constructing HLA-A*02:977 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:977 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:978 Protein Expression Plasmid Vector	PHLAP9252735	Plasmid vector containing HLA-A*02:978 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:978 protein. This plasmid can be used for constructing HLA-A*02:978 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:978 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:979 Protein Expression Plasmid Vector	PHLAP9252736	Plasmid vector containing HLA-A*02:979 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:979 protein. This plasmid can be used for constructing HLA-A*02:979 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:979 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:980 Protein Expression Plasmid Vector	PHLAP9252737	Plasmid vector containing HLA-A*02:980 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:980 protein. This plasmid can be used for constructing HLA-A*02:980 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:980 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:981 Protein Expression Plasmid Vector	PHLAP9252738	Plasmid vector containing HLA-A*02:981 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:981 protein. This plasmid can be used for constructing HLA-A*02:981 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:981 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:982 Protein Expression Plasmid Vector	PHLAP9252739	Plasmid vector containing HLA-A*02:982 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:982 protein. This plasmid can be used for constructing HLA-A*02:982 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:982 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:983 Protein Expression Plasmid Vector	PHLAP9252740	Plasmid vector containing HLA-A*02:983 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:983 protein. This plasmid can be used for constructing HLA-A*02:983 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:983 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:984 Protein Expression Plasmid Vector	PHLAP9252741	Plasmid vector containing HLA-A*02:984 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:984 protein. This plasmid can be used for constructing HLA-A*02:984 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:984 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:985 Protein Expression Plasmid Vector	PHLAP9252742	Plasmid vector containing HLA-A*02:985 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:985 protein. This plasmid can be used for constructing HLA-A*02:985 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:985 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:986 Protein Expression Plasmid Vector	PHLAP9252743	Plasmid vector containing HLA-A*02:986 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:986 protein. This plasmid can be used for constructing HLA-A*02:986 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:986 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:987 Protein Expression Plasmid Vector	PHLAP9252744	Plasmid vector containing HLA-A*02:987 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:987 protein. This plasmid can be used for constructing HLA-A*02:987 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:987 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:988 Protein Expression Plasmid Vector	PHLAP9252745	Plasmid vector containing HLA-A*02:988 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:988 protein. This plasmid can be used for constructing HLA-A*02:988 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:988 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:989N Protein Expression Plasmid Vector	PHLAP9252746	Plasmid vector containing HLA-A*02:989N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:989N protein. This plasmid can be used for constructing HLA-A*02:989N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:989N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:99:01 Protein Expression Plasmid Vector	PHLAP9252747	Plasmid vector containing HLA-A*02:99:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:99:01 protein. This plasmid can be used for constructing HLA-A*02:99:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:99:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:99:02 Protein Expression Plasmid Vector	PHLAP9252748	Plasmid vector containing HLA-A*02:99:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:99:02 protein. This plasmid can be used for constructing HLA-A*02:99:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:99:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:990 Protein Expression Plasmid Vector	PHLAP9252749	Plasmid vector containing HLA-A*02:990 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:990 protein. This plasmid can be used for constructing HLA-A*02:990 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:990 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:991 Protein Expression Plasmid Vector	PHLAP9252750	Plasmid vector containing HLA-A*02:991 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:991 protein. This plasmid can be used for constructing HLA-A*02:991 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:991 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:992 Protein Expression Plasmid Vector	PHLAP9252751	Plasmid vector containing HLA-A*02:992 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:992 protein. This plasmid can be used for constructing HLA-A*02:992 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:992 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:993:01 Protein Expression Plasmid Vector	PHLAP9252752	Plasmid vector containing HLA-A*02:993:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:993:01 protein. This plasmid can be used for constructing HLA-A*02:993:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:993:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:993:02 Protein Expression Plasmid Vector	PHLAP9252753	Plasmid vector containing HLA-A*02:993:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:993:02 protein. This plasmid can be used for constructing HLA-A*02:993:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:993:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:994 Protein Expression Plasmid Vector	PHLAP9252754	Plasmid vector containing HLA-A*02:994 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:994 protein. This plasmid can be used for constructing HLA-A*02:994 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:994 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*02:995 Protein Expression Plasmid Vector	PHLAP9252755	Plasmid vector containing HLA-A*02:995 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:995 protein. This plasmid can be used for constructing HLA-A*02:995 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:995 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:996 Protein Expression Plasmid Vector	PHLAP9252756	Plasmid vector containing HLA-A*02:996 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:996 protein. This plasmid can be used for constructing HLA-A*02:996 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:996 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:997Q Protein Expression Plasmid Vector	PHLAP9252757	Plasmid vector containing HLA-A*02:997Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:997Q protein. This plasmid can be used for constructing HLA-A*02:997Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:997Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:998 Protein Expression Plasmid Vector	PHLAP9252758	Plasmid vector containing HLA-A*02:998 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:998 protein. This plasmid can be used for constructing HLA-A*02:998 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:998 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*02:999N Protein Expression Plasmid Vector	PHLAP9252759	Plasmid vector containing HLA-A*02:999N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*02:999N protein. This plasmid can be used for constructing HLA-A*02:999N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*02:999N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*020116 Protein Expression Plasmid Vector	PHLAP9252760	Plasmid vector containing HLA-A*020116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*020116 protein. This plasmid can be used for constructing HLA-A*020116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*020116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*020120 Protein Expression Plasmid Vector	PHLAP9252761	Plasmid vector containing HLA-A*020120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*020120 protein. This plasmid can be used for constructing HLA-A*020120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*020120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*0223 Protein Expression Plasmid Vector	PHLAP9252762	Plasmid vector containing HLA-A*0223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*0223 protein. This plasmid can be used for constructing HLA-A*0223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*0223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*0298 Protein Expression Plasmid Vector	PHLAP9252763	Plasmid vector containing HLA-A*0298 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*0298 protein. This plasmid can be used for constructing HLA-A*0298 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*0298 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:01 Protein Expression Plasmid Vector	PHLAP9252764	Plasmid vector containing HLA-A*03:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:01 protein. This plasmid can be used for constructing HLA-A*03:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:02N Protein Expression Plasmid Vector	PHLAP9252765	Plasmid vector containing HLA-A*03:01:01:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:02N protein. This plasmid can be used for constructing HLA-A*03:01:01:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:03 Protein Expression Plasmid Vector	PHLAP9252766	Plasmid vector containing HLA-A*03:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:03 protein. This plasmid can be used for constructing HLA-A*03:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:04 Protein Expression Plasmid Vector	PHLAP9252767	Plasmid vector containing HLA-A*03:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:04 protein. This plasmid can be used for constructing HLA-A*03:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:05 Protein Expression Plasmid Vector	PHLAP9252768	Plasmid vector containing HLA-A*03:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:05 protein. This plasmid can be used for constructing HLA-A*03:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:06 Protein Expression Plasmid Vector	PHLAP9252769	Plasmid vector containing HLA-A*03:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:06 protein. This plasmid can be used for constructing HLA-A*03:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:07 Protein Expression Plasmid Vector	PHLAP9252770	Plasmid vector containing HLA-A*03:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:07 protein. This plasmid can be used for constructing HLA-A*03:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:08 Protein Expression Plasmid Vector	PHLAP9252771	Plasmid vector containing HLA-A*03:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:08 protein. This plasmid can be used for constructing HLA-A*03:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:09 Protein Expression Plasmid Vector	PHLAP9252772	Plasmid vector containing HLA-A*03:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:09 protein. This plasmid can be used for constructing HLA-A*03:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:10 Protein Expression Plasmid Vector	PHLAP9252773	Plasmid vector containing HLA-A*03:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:10 protein. This plasmid can be used for constructing HLA-A*03:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:100 Protein Expression Plasmid Vector	PHLAP9252774	Plasmid vector containing HLA-A*03:01:01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:100 protein. This plasmid can be used for constructing HLA-A*03:01:01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:101 Protein Expression Plasmid Vector	PHLAP9252775	Plasmid vector containing HLA-A*03:01:01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:101 protein. This plasmid can be used for constructing HLA-A*03:01:01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:102 Protein Expression Plasmid Vector	PHLAP9252776	Plasmid vector containing HLA-A*03:01:01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:102 protein. This plasmid can be used for constructing HLA-A*03:01:01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:103 Protein Expression Plasmid Vector	PHLAP9252777	Plasmid vector containing HLA-A*03:01:01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:103 protein. This plasmid can be used for constructing HLA-A*03:01:01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:104 Protein Expression Plasmid Vector	PHLAP9252778	Plasmid vector containing HLA-A*03:01:01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:104 protein. This plasmid can be used for constructing HLA-A*03:01:01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:105 Protein Expression Plasmid Vector	PHLAP9252779	Plasmid vector containing HLA-A*03:01:01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:105 protein. This plasmid can be used for constructing HLA-A*03:01:01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:106 Protein Expression Plasmid Vector	PHLAP9252780	Plasmid vector containing HLA-A*03:01:01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:106 protein. This plasmid can be used for constructing HLA-A*03:01:01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:107 Protein Expression Plasmid Vector	PHLAP9252781	Plasmid vector containing HLA-A*03:01:01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:107 protein. This plasmid can be used for constructing HLA-A*03:01:01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:108 Protein Expression Plasmid Vector	PHLAP9252782	Plasmid vector containing HLA-A*03:01:01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:108 protein. This plasmid can be used for constructing HLA-A*03:01:01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:109 Protein Expression Plasmid Vector	PHLAP9252783	Plasmid vector containing HLA-A*03:01:01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:109 protein. This plasmid can be used for constructing HLA-A*03:01:01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:11 Protein Expression Plasmid Vector	PHLAP9252784	Plasmid vector containing HLA-A*03:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:11 protein. This plasmid can be used for constructing HLA-A*03:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:110 Protein Expression Plasmid Vector	PHLAP9252785	Plasmid vector containing HLA-A*03:01:01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:110 protein. This plasmid can be used for constructing HLA-A*03:01:01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:111 Protein Expression Plasmid Vector	PHLAP9252786	Plasmid vector containing HLA-A*03:01:01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:111 protein. This plasmid can be used for constructing HLA-A*03:01:01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:112 Protein Expression Plasmid Vector	PHLAP9252787	Plasmid vector containing HLA-A*03:01:01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:112 protein. This plasmid can be used for constructing HLA-A*03:01:01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:113 Protein Expression Plasmid Vector	PHLAP9252788	Plasmid vector containing HLA-A*03:01:01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:113 protein. This plasmid can be used for constructing HLA-A*03:01:01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:114 Protein Expression Plasmid Vector	PHLAP9252789	Plasmid vector containing HLA-A*03:01:01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:114 protein. This plasmid can be used for constructing HLA-A*03:01:01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:115 Protein Expression Plasmid Vector	PHLAP9252790	Plasmid vector containing HLA-A*03:01:01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:115 protein. This plasmid can be used for constructing HLA-A*03:01:01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:116 Protein Expression Plasmid Vector	PHLAP9252791	Plasmid vector containing HLA-A*03:01:01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:116 protein. This plasmid can be used for constructing HLA-A*03:01:01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:117 Protein Expression Plasmid Vector	PHLAP9252792	Plasmid vector containing HLA-A*03:01:01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:117 protein. This plasmid can be used for constructing HLA-A*03:01:01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:118 Protein Expression Plasmid Vector	PHLAP9252793	Plasmid vector containing HLA-A*03:01:01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:118 protein. This plasmid can be used for constructing HLA-A*03:01:01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:119 Protein Expression Plasmid Vector	PHLAP9252794	Plasmid vector containing HLA-A*03:01:01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:119 protein. This plasmid can be used for constructing HLA-A*03:01:01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:12 Protein Expression Plasmid Vector	PHLAP9252795	Plasmid vector containing HLA-A*03:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:12 protein. This plasmid can be used for constructing HLA-A*03:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:120 Protein Expression Plasmid Vector	PHLAP9252796	Plasmid vector containing HLA-A*03:01:01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:120 protein. This plasmid can be used for constructing HLA-A*03:01:01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:121 Protein Expression Plasmid Vector	PHLAP9252797	Plasmid vector containing HLA-A*03:01:01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:121 protein. This plasmid can be used for constructing HLA-A*03:01:01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:122 Protein Expression Plasmid Vector	PHLAP9252798	Plasmid vector containing HLA-A*03:01:01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:122 protein. This plasmid can be used for constructing HLA-A*03:01:01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:123 Protein Expression Plasmid Vector	PHLAP9252799	Plasmid vector containing HLA-A*03:01:01:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:123 protein. This plasmid can be used for constructing HLA-A*03:01:01:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:124 Protein Expression Plasmid Vector	PHLAP9252800	Plasmid vector containing HLA-A*03:01:01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:124 protein. This plasmid can be used for constructing HLA-A*03:01:01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:125 Protein Expression Plasmid Vector	PHLAP9252801	Plasmid vector containing HLA-A*03:01:01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:125 protein. This plasmid can be used for constructing HLA-A*03:01:01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:13 Protein Expression Plasmid Vector	PHLAP9252802	Plasmid vector containing HLA-A*03:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:13 protein. This plasmid can be used for constructing HLA-A*03:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:14 Protein Expression Plasmid Vector	PHLAP9252803	Plasmid vector containing HLA-A*03:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:14 protein. This plasmid can be used for constructing HLA-A*03:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:15 Protein Expression Plasmid Vector	PHLAP9252804	Plasmid vector containing HLA-A*03:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:15 protein. This plasmid can be used for constructing HLA-A*03:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:16 Protein Expression Plasmid Vector	PHLAP9252805	Plasmid vector containing HLA-A*03:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:16 protein. This plasmid can be used for constructing HLA-A*03:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:17 Protein Expression Plasmid Vector	PHLAP9252806	Plasmid vector containing HLA-A*03:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:17 protein. This plasmid can be used for constructing HLA-A*03:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:18 Protein Expression Plasmid Vector	PHLAP9252807	Plasmid vector containing HLA-A*03:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:18 protein. This plasmid can be used for constructing HLA-A*03:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:19 Protein Expression Plasmid Vector	PHLAP9252808	Plasmid vector containing HLA-A*03:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:19 protein. This plasmid can be used for constructing HLA-A*03:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:20 Protein Expression Plasmid Vector	PHLAP9252809	Plasmid vector containing HLA-A*03:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:20 protein. This plasmid can be used for constructing HLA-A*03:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:21 Protein Expression Plasmid Vector	PHLAP9252810	Plasmid vector containing HLA-A*03:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:21 protein. This plasmid can be used for constructing HLA-A*03:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:22 Protein Expression Plasmid Vector	PHLAP9252811	Plasmid vector containing HLA-A*03:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:22 protein. This plasmid can be used for constructing HLA-A*03:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:23 Protein Expression Plasmid Vector	PHLAP9252812	Plasmid vector containing HLA-A*03:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:23 protein. This plasmid can be used for constructing HLA-A*03:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:24 Protein Expression Plasmid Vector	PHLAP9252813	Plasmid vector containing HLA-A*03:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:24 protein. This plasmid can be used for constructing HLA-A*03:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:25 Protein Expression Plasmid Vector	PHLAP9252814	Plasmid vector containing HLA-A*03:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:25 protein. This plasmid can be used for constructing HLA-A*03:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:26 Protein Expression Plasmid Vector	PHLAP9252815	Plasmid vector containing HLA-A*03:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:26 protein. This plasmid can be used for constructing HLA-A*03:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:27 Protein Expression Plasmid Vector	PHLAP9252816	Plasmid vector containing HLA-A*03:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:27 protein. This plasmid can be used for constructing HLA-A*03:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:28 Protein Expression Plasmid Vector	PHLAP9252817	Plasmid vector containing HLA-A*03:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:28 protein. This plasmid can be used for constructing HLA-A*03:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:29 Protein Expression Plasmid Vector	PHLAP9252818	Plasmid vector containing HLA-A*03:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:29 protein. This plasmid can be used for constructing HLA-A*03:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:30 Protein Expression Plasmid Vector	PHLAP9252819	Plasmid vector containing HLA-A*03:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:30 protein. This plasmid can be used for constructing HLA-A*03:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:31 Protein Expression Plasmid Vector	PHLAP9252820	Plasmid vector containing HLA-A*03:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:31 protein. This plasmid can be used for constructing HLA-A*03:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:32 Protein Expression Plasmid Vector	PHLAP9252821	Plasmid vector containing HLA-A*03:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:32 protein. This plasmid can be used for constructing HLA-A*03:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:33 Protein Expression Plasmid Vector	PHLAP9252822	Plasmid vector containing HLA-A*03:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:33 protein. This plasmid can be used for constructing HLA-A*03:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:34 Protein Expression Plasmid Vector	PHLAP9252823	Plasmid vector containing HLA-A*03:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:34 protein. This plasmid can be used for constructing HLA-A*03:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:35 Protein Expression Plasmid Vector	PHLAP9252824	Plasmid vector containing HLA-A*03:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:35 protein. This plasmid can be used for constructing HLA-A*03:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:36 Protein Expression Plasmid Vector	PHLAP9252825	Plasmid vector containing HLA-A*03:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:36 protein. This plasmid can be used for constructing HLA-A*03:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:37 Protein Expression Plasmid Vector	PHLAP9252826	Plasmid vector containing HLA-A*03:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:37 protein. This plasmid can be used for constructing HLA-A*03:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:38 Protein Expression Plasmid Vector	PHLAP9252827	Plasmid vector containing HLA-A*03:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:38 protein. This plasmid can be used for constructing HLA-A*03:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:39 Protein Expression Plasmid Vector	PHLAP9252828	Plasmid vector containing HLA-A*03:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:39 protein. This plasmid can be used for constructing HLA-A*03:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:40 Protein Expression Plasmid Vector	PHLAP9252829	Plasmid vector containing HLA-A*03:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:40 protein. This plasmid can be used for constructing HLA-A*03:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:41 Protein Expression Plasmid Vector	PHLAP9252830	Plasmid vector containing HLA-A*03:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:41 protein. This plasmid can be used for constructing HLA-A*03:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:42 Protein Expression Plasmid Vector	PHLAP9252831	Plasmid vector containing HLA-A*03:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:42 protein. This plasmid can be used for constructing HLA-A*03:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:43 Protein Expression Plasmid Vector	PHLAP9252832	Plasmid vector containing HLA-A*03:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:43 protein. This plasmid can be used for constructing HLA-A*03:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:44 Protein Expression Plasmid Vector	PHLAP9252833	Plasmid vector containing HLA-A*03:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:44 protein. This plasmid can be used for constructing HLA-A*03:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:45 Protein Expression Plasmid Vector	PHLAP9252834	Plasmid vector containing HLA-A*03:01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:45 protein. This plasmid can be used for constructing HLA-A*03:01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:46 Protein Expression Plasmid Vector	PHLAP9252835	Plasmid vector containing HLA-A*03:01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:46 protein. This plasmid can be used for constructing HLA-A*03:01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:47 Protein Expression Plasmid Vector	PHLAP9252836	Plasmid vector containing HLA-A*03:01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:47 protein. This plasmid can be used for constructing HLA-A*03:01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:48 Protein Expression Plasmid Vector	PHLAP9252837	Plasmid vector containing HLA-A*03:01:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:48 protein. This plasmid can be used for constructing HLA-A*03:01:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:49 Protein Expression Plasmid Vector	PHLAP9252838	Plasmid vector containing HLA-A*03:01:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:49 protein. This plasmid can be used for constructing HLA-A*03:01:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:50 Protein Expression Plasmid Vector	PHLAP9252839	Plasmid vector containing HLA-A*03:01:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:50 protein. This plasmid can be used for constructing HLA-A*03:01:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:51 Protein Expression Plasmid Vector	PHLAP9252840	Plasmid vector containing HLA-A*03:01:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:51 protein. This plasmid can be used for constructing HLA-A*03:01:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:52 Protein Expression Plasmid Vector	PHLAP9252841	Plasmid vector containing HLA-A*03:01:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:52 protein. This plasmid can be used for constructing HLA-A*03:01:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:53 Protein Expression Plasmid Vector	PHLAP9252842	Plasmid vector containing HLA-A*03:01:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:53 protein. This plasmid can be used for constructing HLA-A*03:01:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:54 Protein Expression Plasmid Vector	PHLAP9252843	Plasmid vector containing HLA-A*03:01:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:54 protein. This plasmid can be used for constructing HLA-A*03:01:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:55 Protein Expression Plasmid Vector	PHLAP9252844	Plasmid vector containing HLA-A*03:01:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:55 protein. This plasmid can be used for constructing HLA-A*03:01:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:56 Protein Expression Plasmid Vector	PHLAP9252845	Plasmid vector containing HLA-A*03:01:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:56 protein. This plasmid can be used for constructing HLA-A*03:01:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:57 Protein Expression Plasmid Vector	PHLAP9252846	Plasmid vector containing HLA-A*03:01:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:57 protein. This plasmid can be used for constructing HLA-A*03:01:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:58 Protein Expression Plasmid Vector	PHLAP9252847	Plasmid vector containing HLA-A*03:01:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:58 protein. This plasmid can be used for constructing HLA-A*03:01:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:59 Protein Expression Plasmid Vector	PHLAP9252848	Plasmid vector containing HLA-A*03:01:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:59 protein. This plasmid can be used for constructing HLA-A*03:01:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:60 Protein Expression Plasmid Vector	PHLAP9252849	Plasmid vector containing HLA-A*03:01:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:60 protein. This plasmid can be used for constructing HLA-A*03:01:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:61 Protein Expression Plasmid Vector	PHLAP9252850	Plasmid vector containing HLA-A*03:01:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:61 protein. This plasmid can be used for constructing HLA-A*03:01:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:62 Protein Expression Plasmid Vector	PHLAP9252851	Plasmid vector containing HLA-A*03:01:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:62 protein. This plasmid can be used for constructing HLA-A*03:01:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:63 Protein Expression Plasmid Vector	PHLAP9252852	Plasmid vector containing HLA-A*03:01:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:63 protein. This plasmid can be used for constructing HLA-A*03:01:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:64 Protein Expression Plasmid Vector	PHLAP9252853	Plasmid vector containing HLA-A*03:01:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:64 protein. This plasmid can be used for constructing HLA-A*03:01:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:65 Protein Expression Plasmid Vector	PHLAP9252854	Plasmid vector containing HLA-A*03:01:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:65 protein. This plasmid can be used for constructing HLA-A*03:01:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:66 Protein Expression Plasmid Vector	PHLAP9252855	Plasmid vector containing HLA-A*03:01:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:66 protein. This plasmid can be used for constructing HLA-A*03:01:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:67 Protein Expression Plasmid Vector	PHLAP9252856	Plasmid vector containing HLA-A*03:01:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:67 protein. This plasmid can be used for constructing HLA-A*03:01:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:68 Protein Expression Plasmid Vector	PHLAP9252857	Plasmid vector containing HLA-A*03:01:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:68 protein. This plasmid can be used for constructing HLA-A*03:01:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:69 Protein Expression Plasmid Vector	PHLAP9252858	Plasmid vector containing HLA-A*03:01:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:69 protein. This plasmid can be used for constructing HLA-A*03:01:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:70 Protein Expression Plasmid Vector	PHLAP9252859	Plasmid vector containing HLA-A*03:01:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:70 protein. This plasmid can be used for constructing HLA-A*03:01:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:71 Protein Expression Plasmid Vector	PHLAP9252860	Plasmid vector containing HLA-A*03:01:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:71 protein. This plasmid can be used for constructing HLA-A*03:01:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:72 Protein Expression Plasmid Vector	PHLAP9252861	Plasmid vector containing HLA-A*03:01:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:72 protein. This plasmid can be used for constructing HLA-A*03:01:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:73 Protein Expression Plasmid Vector	PHLAP9252862	Plasmid vector containing HLA-A*03:01:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:73 protein. This plasmid can be used for constructing HLA-A*03:01:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:74 Protein Expression Plasmid Vector	PHLAP9252863	Plasmid vector containing HLA-A*03:01:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:74 protein. This plasmid can be used for constructing HLA-A*03:01:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:75 Protein Expression Plasmid Vector	PHLAP9252864	Plasmid vector containing HLA-A*03:01:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:75 protein. This plasmid can be used for constructing HLA-A*03:01:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:76 Protein Expression Plasmid Vector	PHLAP9252865	Plasmid vector containing HLA-A*03:01:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:76 protein. This plasmid can be used for constructing HLA-A*03:01:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:77 Protein Expression Plasmid Vector	PHLAP9252866	Plasmid vector containing HLA-A*03:01:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:77 protein. This plasmid can be used for constructing HLA-A*03:01:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:78 Protein Expression Plasmid Vector	PHLAP9252867	Plasmid vector containing HLA-A*03:01:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:78 protein. This plasmid can be used for constructing HLA-A*03:01:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:79 Protein Expression Plasmid Vector	PHLAP9252868	Plasmid vector containing HLA-A*03:01:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:79 protein. This plasmid can be used for constructing HLA-A*03:01:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:80 Protein Expression Plasmid Vector	PHLAP9252869	Plasmid vector containing HLA-A*03:01:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:80 protein. This plasmid can be used for constructing HLA-A*03:01:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:81 Protein Expression Plasmid Vector	PHLAP9252870	Plasmid vector containing HLA-A*03:01:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:81 protein. This plasmid can be used for constructing HLA-A*03:01:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:82 Protein Expression Plasmid Vector	PHLAP9252871	Plasmid vector containing HLA-A*03:01:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:82 protein. This plasmid can be used for constructing HLA-A*03:01:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:83 Protein Expression Plasmid Vector	PHLAP9252872	Plasmid vector containing HLA-A*03:01:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:83 protein. This plasmid can be used for constructing HLA-A*03:01:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:84 Protein Expression Plasmid Vector	PHLAP9252873	Plasmid vector containing HLA-A*03:01:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:84 protein. This plasmid can be used for constructing HLA-A*03:01:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:85 Protein Expression Plasmid Vector	PHLAP9252874	Plasmid vector containing HLA-A*03:01:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:85 protein. This plasmid can be used for constructing HLA-A*03:01:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:86 Protein Expression Plasmid Vector	PHLAP9252875	Plasmid vector containing HLA-A*03:01:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:86 protein. This plasmid can be used for constructing HLA-A*03:01:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:87 Protein Expression Plasmid Vector	PHLAP9252876	Plasmid vector containing HLA-A*03:01:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:87 protein. This plasmid can be used for constructing HLA-A*03:01:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:88 Protein Expression Plasmid Vector	PHLAP9252877	Plasmid vector containing HLA-A*03:01:01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:88 protein. This plasmid can be used for constructing HLA-A*03:01:01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:89 Protein Expression Plasmid Vector	PHLAP9252878	Plasmid vector containing HLA-A*03:01:01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:89 protein. This plasmid can be used for constructing HLA-A*03:01:01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:90 Protein Expression Plasmid Vector	PHLAP9252879	Plasmid vector containing HLA-A*03:01:01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:90 protein. This plasmid can be used for constructing HLA-A*03:01:01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:91 Protein Expression Plasmid Vector	PHLAP9252880	Plasmid vector containing HLA-A*03:01:01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:91 protein. This plasmid can be used for constructing HLA-A*03:01:01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:92 Protein Expression Plasmid Vector	PHLAP9252881	Plasmid vector containing HLA-A*03:01:01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:92 protein. This plasmid can be used for constructing HLA-A*03:01:01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:01:93 Protein Expression Plasmid Vector	PHLAP9252882	Plasmid vector containing HLA-A*03:01:01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:93 protein. This plasmid can be used for constructing HLA-A*03:01:01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:94 Protein Expression Plasmid Vector	PHLAP9252883	Plasmid vector containing HLA-A*03:01:01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:94 protein. This plasmid can be used for constructing HLA-A*03:01:01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:95 Protein Expression Plasmid Vector	PHLAP9252884	Plasmid vector containing HLA-A*03:01:01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:95 protein. This plasmid can be used for constructing HLA-A*03:01:01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:96 Protein Expression Plasmid Vector	PHLAP9252885	Plasmid vector containing HLA-A*03:01:01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:96 protein. This plasmid can be used for constructing HLA-A*03:01:01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:97 Protein Expression Plasmid Vector	PHLAP9252886	Plasmid vector containing HLA-A*03:01:01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:97 protein. This plasmid can be used for constructing HLA-A*03:01:01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:98 Protein Expression Plasmid Vector	PHLAP9252887	Plasmid vector containing HLA-A*03:01:01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:98 protein. This plasmid can be used for constructing HLA-A*03:01:01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:01:99 Protein Expression Plasmid Vector	PHLAP9252888	Plasmid vector containing HLA-A*03:01:01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:01:99 protein. This plasmid can be used for constructing HLA-A*03:01:01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:02 Protein Expression Plasmid Vector	PHLAP9252889	Plasmid vector containing HLA-A*03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:02 protein. This plasmid can be used for constructing HLA-A*03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:03:01 Protein Expression Plasmid Vector	PHLAP9252890	Plasmid vector containing HLA-A*03:01:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:03:01 protein. This plasmid can be used for constructing HLA-A*03:01:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:03:02 Protein Expression Plasmid Vector	PHLAP9252891	Plasmid vector containing HLA-A*03:01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:03:02 protein. This plasmid can be used for constructing HLA-A*03:01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:04 Protein Expression Plasmid Vector	PHLAP9252892	Plasmid vector containing HLA-A*03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:04 protein. This plasmid can be used for constructing HLA-A*03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:05 Protein Expression Plasmid Vector	PHLAP9252893	Plasmid vector containing HLA-A*03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:05 protein. This plasmid can be used for constructing HLA-A*03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:06 Protein Expression Plasmid Vector	PHLAP9252894	Plasmid vector containing HLA-A*03:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:06 protein. This plasmid can be used for constructing HLA-A*03:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:07 Protein Expression Plasmid Vector	PHLAP9252895	Plasmid vector containing HLA-A*03:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:07 protein. This plasmid can be used for constructing HLA-A*03:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:08 Protein Expression Plasmid Vector	PHLAP9252896	Plasmid vector containing HLA-A*03:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:08 protein. This plasmid can be used for constructing HLA-A*03:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:09 Protein Expression Plasmid Vector	PHLAP9252897	Plasmid vector containing HLA-A*03:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:09 protein. This plasmid can be used for constructing HLA-A*03:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:10 Protein Expression Plasmid Vector	PHLAP9252898	Plasmid vector containing HLA-A*03:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:10 protein. This plasmid can be used for constructing HLA-A*03:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:100 Protein Expression Plasmid Vector	PHLAP9252899	Plasmid vector containing HLA-A*03:01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:100 protein. This plasmid can be used for constructing HLA-A*03:01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:101 Protein Expression Plasmid Vector	PHLAP9252900	Plasmid vector containing HLA-A*03:01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:101 protein. This plasmid can be used for constructing HLA-A*03:01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:102 Protein Expression Plasmid Vector	PHLAP9252901	Plasmid vector containing HLA-A*03:01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:102 protein. This plasmid can be used for constructing HLA-A*03:01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:103 Protein Expression Plasmid Vector	PHLAP9252902	Plasmid vector containing HLA-A*03:01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:103 protein. This plasmid can be used for constructing HLA-A*03:01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:104 Protein Expression Plasmid Vector	PHLAP9252903	Plasmid vector containing HLA-A*03:01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:104 protein. This plasmid can be used for constructing HLA-A*03:01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:105 Protein Expression Plasmid Vector	PHLAP9252904	Plasmid vector containing HLA-A*03:01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:105 protein. This plasmid can be used for constructing HLA-A*03:01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:106 Protein Expression Plasmid Vector	PHLAP9252905	Plasmid vector containing HLA-A*03:01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:106 protein. This plasmid can be used for constructing HLA-A*03:01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:107 Protein Expression Plasmid Vector	PHLAP9252906	Plasmid vector containing HLA-A*03:01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:107 protein. This plasmid can be used for constructing HLA-A*03:01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:108 Protein Expression Plasmid Vector	PHLAP9252907	Plasmid vector containing HLA-A*03:01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:108 protein. This plasmid can be used for constructing HLA-A*03:01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:109 Protein Expression Plasmid Vector	PHLAP9252908	Plasmid vector containing HLA-A*03:01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:109 protein. This plasmid can be used for constructing HLA-A*03:01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:11 Protein Expression Plasmid Vector	PHLAP9252909	Plasmid vector containing HLA-A*03:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:11 protein. This plasmid can be used for constructing HLA-A*03:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:110 Protein Expression Plasmid Vector	PHLAP9252910	Plasmid vector containing HLA-A*03:01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:110 protein. This plasmid can be used for constructing HLA-A*03:01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:111 Protein Expression Plasmid Vector	PHLAP9252911	Plasmid vector containing HLA-A*03:01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:111 protein. This plasmid can be used for constructing HLA-A*03:01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:112 Protein Expression Plasmid Vector	PHLAP9252912	Plasmid vector containing HLA-A*03:01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:112 protein. This plasmid can be used for constructing HLA-A*03:01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:113 Protein Expression Plasmid Vector	PHLAP9252913	Plasmid vector containing HLA-A*03:01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:113 protein. This plasmid can be used for constructing HLA-A*03:01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:114 Protein Expression Plasmid Vector	PHLAP9252914	Plasmid vector containing HLA-A*03:01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:114 protein. This plasmid can be used for constructing HLA-A*03:01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:115 Protein Expression Plasmid Vector	PHLAP9252915	Plasmid vector containing HLA-A*03:01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:115 protein. This plasmid can be used for constructing HLA-A*03:01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:116 Protein Expression Plasmid Vector	PHLAP9252916	Plasmid vector containing HLA-A*03:01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:116 protein. This plasmid can be used for constructing HLA-A*03:01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:117 Protein Expression Plasmid Vector	PHLAP9252917	Plasmid vector containing HLA-A*03:01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:117 protein. This plasmid can be used for constructing HLA-A*03:01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:118 Protein Expression Plasmid Vector	PHLAP9252918	Plasmid vector containing HLA-A*03:01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:118 protein. This plasmid can be used for constructing HLA-A*03:01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:119 Protein Expression Plasmid Vector	PHLAP9252919	Plasmid vector containing HLA-A*03:01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:119 protein. This plasmid can be used for constructing HLA-A*03:01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:12 Protein Expression Plasmid Vector	PHLAP9252920	Plasmid vector containing HLA-A*03:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:12 protein. This plasmid can be used for constructing HLA-A*03:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:120 Protein Expression Plasmid Vector	PHLAP9252921	Plasmid vector containing HLA-A*03:01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:120 protein. This plasmid can be used for constructing HLA-A*03:01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:121 Protein Expression Plasmid Vector	PHLAP9252922	Plasmid vector containing HLA-A*03:01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:121 protein. This plasmid can be used for constructing HLA-A*03:01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:122 Protein Expression Plasmid Vector	PHLAP9252923	Plasmid vector containing HLA-A*03:01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:122 protein. This plasmid can be used for constructing HLA-A*03:01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:123 Protein Expression Plasmid Vector	PHLAP9252924	Plasmid vector containing HLA-A*03:01:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:123 protein. This plasmid can be used for constructing HLA-A*03:01:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:124 Protein Expression Plasmid Vector	PHLAP9252925	Plasmid vector containing HLA-A*03:01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:124 protein. This plasmid can be used for constructing HLA-A*03:01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:125 Protein Expression Plasmid Vector	PHLAP9252926	Plasmid vector containing HLA-A*03:01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:125 protein. This plasmid can be used for constructing HLA-A*03:01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:126 Protein Expression Plasmid Vector	PHLAP9252927	Plasmid vector containing HLA-A*03:01:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:126 protein. This plasmid can be used for constructing HLA-A*03:01:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:127 Protein Expression Plasmid Vector	PHLAP9252928	Plasmid vector containing HLA-A*03:01:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:127 protein. This plasmid can be used for constructing HLA-A*03:01:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:128 Protein Expression Plasmid Vector	PHLAP9252929	Plasmid vector containing HLA-A*03:01:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:128 protein. This plasmid can be used for constructing HLA-A*03:01:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:129 Protein Expression Plasmid Vector	PHLAP9252930	Plasmid vector containing HLA-A*03:01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:129 protein. This plasmid can be used for constructing HLA-A*03:01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:13 Protein Expression Plasmid Vector	PHLAP9252931	Plasmid vector containing HLA-A*03:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:13 protein. This plasmid can be used for constructing HLA-A*03:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:130 Protein Expression Plasmid Vector	PHLAP9252932	Plasmid vector containing HLA-A*03:01:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:130 protein. This plasmid can be used for constructing HLA-A*03:01:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:131 Protein Expression Plasmid Vector	PHLAP9252933	Plasmid vector containing HLA-A*03:01:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:131 protein. This plasmid can be used for constructing HLA-A*03:01:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:132 Protein Expression Plasmid Vector	PHLAP9252934	Plasmid vector containing HLA-A*03:01:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:132 protein. This plasmid can be used for constructing HLA-A*03:01:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:133 Protein Expression Plasmid Vector	PHLAP9252935	Plasmid vector containing HLA-A*03:01:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:133 protein. This plasmid can be used for constructing HLA-A*03:01:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:134 Protein Expression Plasmid Vector	PHLAP9252936	Plasmid vector containing HLA-A*03:01:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:134 protein. This plasmid can be used for constructing HLA-A*03:01:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:135 Protein Expression Plasmid Vector	PHLAP9252937	Plasmid vector containing HLA-A*03:01:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:135 protein. This plasmid can be used for constructing HLA-A*03:01:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:14 Protein Expression Plasmid Vector	PHLAP9252938	Plasmid vector containing HLA-A*03:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:14 protein. This plasmid can be used for constructing HLA-A*03:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:15 Protein Expression Plasmid Vector	PHLAP9252939	Plasmid vector containing HLA-A*03:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:15 protein. This plasmid can be used for constructing HLA-A*03:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:16 Protein Expression Plasmid Vector	PHLAP9252940	Plasmid vector containing HLA-A*03:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:16 protein. This plasmid can be used for constructing HLA-A*03:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:17 Protein Expression Plasmid Vector	PHLAP9252941	Plasmid vector containing HLA-A*03:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:17 protein. This plasmid can be used for constructing HLA-A*03:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:18 Protein Expression Plasmid Vector	PHLAP9252942	Plasmid vector containing HLA-A*03:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:18 protein. This plasmid can be used for constructing HLA-A*03:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:19 Protein Expression Plasmid Vector	PHLAP9252943	Plasmid vector containing HLA-A*03:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:19 protein. This plasmid can be used for constructing HLA-A*03:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:20 Protein Expression Plasmid Vector	PHLAP9252944	Plasmid vector containing HLA-A*03:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:20 protein. This plasmid can be used for constructing HLA-A*03:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:21 Protein Expression Plasmid Vector	PHLAP9252945	Plasmid vector containing HLA-A*03:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:21 protein. This plasmid can be used for constructing HLA-A*03:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:22 Protein Expression Plasmid Vector	PHLAP9252946	Plasmid vector containing HLA-A*03:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:22 protein. This plasmid can be used for constructing HLA-A*03:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:23 Protein Expression Plasmid Vector	PHLAP9252947	Plasmid vector containing HLA-A*03:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:23 protein. This plasmid can be used for constructing HLA-A*03:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:24 Protein Expression Plasmid Vector	PHLAP9252948	Plasmid vector containing HLA-A*03:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:24 protein. This plasmid can be used for constructing HLA-A*03:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:25 Protein Expression Plasmid Vector	PHLAP9252949	Plasmid vector containing HLA-A*03:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:25 protein. This plasmid can be used for constructing HLA-A*03:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:26 Protein Expression Plasmid Vector	PHLAP9252950	Plasmid vector containing HLA-A*03:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:26 protein. This plasmid can be used for constructing HLA-A*03:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:27 Protein Expression Plasmid Vector	PHLAP9252951	Plasmid vector containing HLA-A*03:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:27 protein. This plasmid can be used for constructing HLA-A*03:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:28 Protein Expression Plasmid Vector	PHLAP9252952	Plasmid vector containing HLA-A*03:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:28 protein. This plasmid can be used for constructing HLA-A*03:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:29 Protein Expression Plasmid Vector	PHLAP9252953	Plasmid vector containing HLA-A*03:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:29 protein. This plasmid can be used for constructing HLA-A*03:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:30 Protein Expression Plasmid Vector	PHLAP9252954	Plasmid vector containing HLA-A*03:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:30 protein. This plasmid can be used for constructing HLA-A*03:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:31 Protein Expression Plasmid Vector	PHLAP9252955	Plasmid vector containing HLA-A*03:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:31 protein. This plasmid can be used for constructing HLA-A*03:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:32 Protein Expression Plasmid Vector	PHLAP9252956	Plasmid vector containing HLA-A*03:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:32 protein. This plasmid can be used for constructing HLA-A*03:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:33 Protein Expression Plasmid Vector	PHLAP9252957	Plasmid vector containing HLA-A*03:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:33 protein. This plasmid can be used for constructing HLA-A*03:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:34 Protein Expression Plasmid Vector	PHLAP9252958	Plasmid vector containing HLA-A*03:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:34 protein. This plasmid can be used for constructing HLA-A*03:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:35 Protein Expression Plasmid Vector	PHLAP9252959	Plasmid vector containing HLA-A*03:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:35 protein. This plasmid can be used for constructing HLA-A*03:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:36 Protein Expression Plasmid Vector	PHLAP9252960	Plasmid vector containing HLA-A*03:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:36 protein. This plasmid can be used for constructing HLA-A*03:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:37 Protein Expression Plasmid Vector	PHLAP9252961	Plasmid vector containing HLA-A*03:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:37 protein. This plasmid can be used for constructing HLA-A*03:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:38 Protein Expression Plasmid Vector	PHLAP9252962	Plasmid vector containing HLA-A*03:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:38 protein. This plasmid can be used for constructing HLA-A*03:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:39 Protein Expression Plasmid Vector	PHLAP9252963	Plasmid vector containing HLA-A*03:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:39 protein. This plasmid can be used for constructing HLA-A*03:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:40 Protein Expression Plasmid Vector	PHLAP9252964	Plasmid vector containing HLA-A*03:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:40 protein. This plasmid can be used for constructing HLA-A*03:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:41 Protein Expression Plasmid Vector	PHLAP9252965	Plasmid vector containing HLA-A*03:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:41 protein. This plasmid can be used for constructing HLA-A*03:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:42 Protein Expression Plasmid Vector	PHLAP9252966	Plasmid vector containing HLA-A*03:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:42 protein. This plasmid can be used for constructing HLA-A*03:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:43 Protein Expression Plasmid Vector	PHLAP9252967	Plasmid vector containing HLA-A*03:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:43 protein. This plasmid can be used for constructing HLA-A*03:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:44 Protein Expression Plasmid Vector	PHLAP9252968	Plasmid vector containing HLA-A*03:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:44 protein. This plasmid can be used for constructing HLA-A*03:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:45 Protein Expression Plasmid Vector	PHLAP9252969	Plasmid vector containing HLA-A*03:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:45 protein. This plasmid can be used for constructing HLA-A*03:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:46 Protein Expression Plasmid Vector	PHLAP9252970	Plasmid vector containing HLA-A*03:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:46 protein. This plasmid can be used for constructing HLA-A*03:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:47 Protein Expression Plasmid Vector	PHLAP9252971	Plasmid vector containing HLA-A*03:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:47 protein. This plasmid can be used for constructing HLA-A*03:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:48 Protein Expression Plasmid Vector	PHLAP9252972	Plasmid vector containing HLA-A*03:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:48 protein. This plasmid can be used for constructing HLA-A*03:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:49 Protein Expression Plasmid Vector	PHLAP9252973	Plasmid vector containing HLA-A*03:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:49 protein. This plasmid can be used for constructing HLA-A*03:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:50 Protein Expression Plasmid Vector	PHLAP9252974	Plasmid vector containing HLA-A*03:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:50 protein. This plasmid can be used for constructing HLA-A*03:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:51 Protein Expression Plasmid Vector	PHLAP9252975	Plasmid vector containing HLA-A*03:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:51 protein. This plasmid can be used for constructing HLA-A*03:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:52 Protein Expression Plasmid Vector	PHLAP9252976	Plasmid vector containing HLA-A*03:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:52 protein. This plasmid can be used for constructing HLA-A*03:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:53 Protein Expression Plasmid Vector	PHLAP9252977	Plasmid vector containing HLA-A*03:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:53 protein. This plasmid can be used for constructing HLA-A*03:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:54 Protein Expression Plasmid Vector	PHLAP9252978	Plasmid vector containing HLA-A*03:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:54 protein. This plasmid can be used for constructing HLA-A*03:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:55 Protein Expression Plasmid Vector	PHLAP9252979	Plasmid vector containing HLA-A*03:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:55 protein. This plasmid can be used for constructing HLA-A*03:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:56 Protein Expression Plasmid Vector	PHLAP9252980	Plasmid vector containing HLA-A*03:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:56 protein. This plasmid can be used for constructing HLA-A*03:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:57 Protein Expression Plasmid Vector	PHLAP9252981	Plasmid vector containing HLA-A*03:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:57 protein. This plasmid can be used for constructing HLA-A*03:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:58 Protein Expression Plasmid Vector	PHLAP9252982	Plasmid vector containing HLA-A*03:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:58 protein. This plasmid can be used for constructing HLA-A*03:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:59 Protein Expression Plasmid Vector	PHLAP9252983	Plasmid vector containing HLA-A*03:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:59 protein. This plasmid can be used for constructing HLA-A*03:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:60 Protein Expression Plasmid Vector	PHLAP9252984	Plasmid vector containing HLA-A*03:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:60 protein. This plasmid can be used for constructing HLA-A*03:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:61 Protein Expression Plasmid Vector	PHLAP9252985	Plasmid vector containing HLA-A*03:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:61 protein. This plasmid can be used for constructing HLA-A*03:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:62 Protein Expression Plasmid Vector	PHLAP9252986	Plasmid vector containing HLA-A*03:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:62 protein. This plasmid can be used for constructing HLA-A*03:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:63 Protein Expression Plasmid Vector	PHLAP9252987	Plasmid vector containing HLA-A*03:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:63 protein. This plasmid can be used for constructing HLA-A*03:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:64 Protein Expression Plasmid Vector	PHLAP9252988	Plasmid vector containing HLA-A*03:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:64 protein. This plasmid can be used for constructing HLA-A*03:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:65 Protein Expression Plasmid Vector	PHLAP9252989	Plasmid vector containing HLA-A*03:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:65 protein. This plasmid can be used for constructing HLA-A*03:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:66 Protein Expression Plasmid Vector	PHLAP9252990	Plasmid vector containing HLA-A*03:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:66 protein. This plasmid can be used for constructing HLA-A*03:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:67 Protein Expression Plasmid Vector	PHLAP9252991	Plasmid vector containing HLA-A*03:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:67 protein. This plasmid can be used for constructing HLA-A*03:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:68 Protein Expression Plasmid Vector	PHLAP9252992	Plasmid vector containing HLA-A*03:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:68 protein. This plasmid can be used for constructing HLA-A*03:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:69 Protein Expression Plasmid Vector	PHLAP9252993	Plasmid vector containing HLA-A*03:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:69 protein. This plasmid can be used for constructing HLA-A*03:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:70 Protein Expression Plasmid Vector	PHLAP9252994	Plasmid vector containing HLA-A*03:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:70 protein. This plasmid can be used for constructing HLA-A*03:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:71 Protein Expression Plasmid Vector	PHLAP9252995	Plasmid vector containing HLA-A*03:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:71 protein. This plasmid can be used for constructing HLA-A*03:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:72 Protein Expression Plasmid Vector	PHLAP9252996	Plasmid vector containing HLA-A*03:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:72 protein. This plasmid can be used for constructing HLA-A*03:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:73 Protein Expression Plasmid Vector	PHLAP9252997	Plasmid vector containing HLA-A*03:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:73 protein. This plasmid can be used for constructing HLA-A*03:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:74 Protein Expression Plasmid Vector	PHLAP9252998	Plasmid vector containing HLA-A*03:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:74 protein. This plasmid can be used for constructing HLA-A*03:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:75 Protein Expression Plasmid Vector	PHLAP9252999	Plasmid vector containing HLA-A*03:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:75 protein. This plasmid can be used for constructing HLA-A*03:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:76 Protein Expression Plasmid Vector	PHLAP9253000	Plasmid vector containing HLA-A*03:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:76 protein. This plasmid can be used for constructing HLA-A*03:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:77 Protein Expression Plasmid Vector	PHLAP9253001	Plasmid vector containing HLA-A*03:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:77 protein. This plasmid can be used for constructing HLA-A*03:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:78 Protein Expression Plasmid Vector	PHLAP9253002	Plasmid vector containing HLA-A*03:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:78 protein. This plasmid can be used for constructing HLA-A*03:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:79:01 Protein Expression Plasmid Vector	PHLAP9253003	Plasmid vector containing HLA-A*03:01:79:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:79:01 protein. This plasmid can be used for constructing HLA-A*03:01:79:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:79:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:79:02 Protein Expression Plasmid Vector	PHLAP9253004	Plasmid vector containing HLA-A*03:01:79:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:79:02 protein. This plasmid can be used for constructing HLA-A*03:01:79:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:79:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:80 Protein Expression Plasmid Vector	PHLAP9253005	Plasmid vector containing HLA-A*03:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:80 protein. This plasmid can be used for constructing HLA-A*03:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:81 Protein Expression Plasmid Vector	PHLAP9253006	Plasmid vector containing HLA-A*03:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:81 protein. This plasmid can be used for constructing HLA-A*03:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:82 Protein Expression Plasmid Vector	PHLAP9253007	Plasmid vector containing HLA-A*03:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:82 protein. This plasmid can be used for constructing HLA-A*03:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:83 Protein Expression Plasmid Vector	PHLAP9253008	Plasmid vector containing HLA-A*03:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:83 protein. This plasmid can be used for constructing HLA-A*03:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:84 Protein Expression Plasmid Vector	PHLAP9253009	Plasmid vector containing HLA-A*03:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:84 protein. This plasmid can be used for constructing HLA-A*03:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:85 Protein Expression Plasmid Vector	PHLAP9253010	Plasmid vector containing HLA-A*03:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:85 protein. This plasmid can be used for constructing HLA-A*03:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:86 Protein Expression Plasmid Vector	PHLAP9253011	Plasmid vector containing HLA-A*03:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:86 protein. This plasmid can be used for constructing HLA-A*03:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:87 Protein Expression Plasmid Vector	PHLAP9253012	Plasmid vector containing HLA-A*03:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:87 protein. This plasmid can be used for constructing HLA-A*03:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:88 Protein Expression Plasmid Vector	PHLAP9253013	Plasmid vector containing HLA-A*03:01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:88 protein. This plasmid can be used for constructing HLA-A*03:01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:89 Protein Expression Plasmid Vector	PHLAP9253014	Plasmid vector containing HLA-A*03:01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:89 protein. This plasmid can be used for constructing HLA-A*03:01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:90 Protein Expression Plasmid Vector	PHLAP9253015	Plasmid vector containing HLA-A*03:01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:90 protein. This plasmid can be used for constructing HLA-A*03:01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:91 Protein Expression Plasmid Vector	PHLAP9253016	Plasmid vector containing HLA-A*03:01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:91 protein. This plasmid can be used for constructing HLA-A*03:01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:92:01 Protein Expression Plasmid Vector	PHLAP9253017	Plasmid vector containing HLA-A*03:01:92:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:92:01 protein. This plasmid can be used for constructing HLA-A*03:01:92:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:92:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:92:02 Protein Expression Plasmid Vector	PHLAP9253018	Plasmid vector containing HLA-A*03:01:92:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:92:02 protein. This plasmid can be used for constructing HLA-A*03:01:92:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:92:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:01:93 Protein Expression Plasmid Vector	PHLAP9253019	Plasmid vector containing HLA-A*03:01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:93 protein. This plasmid can be used for constructing HLA-A*03:01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:94 Protein Expression Plasmid Vector	PHLAP9253020	Plasmid vector containing HLA-A*03:01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:94 protein. This plasmid can be used for constructing HLA-A*03:01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:95 Protein Expression Plasmid Vector	PHLAP9253021	Plasmid vector containing HLA-A*03:01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:95 protein. This plasmid can be used for constructing HLA-A*03:01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:96Q Protein Expression Plasmid Vector	PHLAP9253022	Plasmid vector containing HLA-A*03:01:96Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:96Q protein. This plasmid can be used for constructing HLA-A*03:01:96Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:96Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:97 Protein Expression Plasmid Vector	PHLAP9253023	Plasmid vector containing HLA-A*03:01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:97 protein. This plasmid can be used for constructing HLA-A*03:01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:98 Protein Expression Plasmid Vector	PHLAP9253024	Plasmid vector containing HLA-A*03:01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:98 protein. This plasmid can be used for constructing HLA-A*03:01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:01:99 Protein Expression Plasmid Vector	PHLAP9253025	Plasmid vector containing HLA-A*03:01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:01:99 protein. This plasmid can be used for constructing HLA-A*03:01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:02:01:01 Protein Expression Plasmid Vector	PHLAP9253026	Plasmid vector containing HLA-A*03:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:02:01:01 protein. This plasmid can be used for constructing HLA-A*03:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:02:01:02 Protein Expression Plasmid Vector	PHLAP9253027	Plasmid vector containing HLA-A*03:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:02:01:02 protein. This plasmid can be used for constructing HLA-A*03:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:02:01:03 Protein Expression Plasmid Vector	PHLAP9253028	Plasmid vector containing HLA-A*03:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:02:01:03 protein. This plasmid can be used for constructing HLA-A*03:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:02:01:04 Protein Expression Plasmid Vector	PHLAP9253029	Plasmid vector containing HLA-A*03:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:02:01:04 protein. This plasmid can be used for constructing HLA-A*03:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:02:01:05 Protein Expression Plasmid Vector	PHLAP9253030	Plasmid vector containing HLA-A*03:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:02:01:05 protein. This plasmid can be used for constructing HLA-A*03:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:02:02 Protein Expression Plasmid Vector	PHLAP9253031	Plasmid vector containing HLA-A*03:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:02:02 protein. This plasmid can be used for constructing HLA-A*03:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:02:03 Protein Expression Plasmid Vector	PHLAP9253032	Plasmid vector containing HLA-A*03:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:02:03 protein. This plasmid can be used for constructing HLA-A*03:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:02:04 Protein Expression Plasmid Vector	PHLAP9253033	Plasmid vector containing HLA-A*03:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:02:04 protein. This plasmid can be used for constructing HLA-A*03:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:02:05 Protein Expression Plasmid Vector	PHLAP9253034	Plasmid vector containing HLA-A*03:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:02:05 protein. This plasmid can be used for constructing HLA-A*03:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:02:06 Protein Expression Plasmid Vector	PHLAP9253035	Plasmid vector containing HLA-A*03:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:02:06 protein. This plasmid can be used for constructing HLA-A*03:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:02:07 Protein Expression Plasmid Vector	PHLAP9253036	Plasmid vector containing HLA-A*03:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:02:07 protein. This plasmid can be used for constructing HLA-A*03:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:02:08 Protein Expression Plasmid Vector	PHLAP9253037	Plasmid vector containing HLA-A*03:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:02:08 protein. This plasmid can be used for constructing HLA-A*03:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:03N Protein Expression Plasmid Vector	PHLAP9253038	Plasmid vector containing HLA-A*03:03N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:03N protein. This plasmid can be used for constructing HLA-A*03:03N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:03N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:04:01 Protein Expression Plasmid Vector	PHLAP9253039	Plasmid vector containing HLA-A*03:04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:04:01 protein. This plasmid can be used for constructing HLA-A*03:04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:04:02 Protein Expression Plasmid Vector	PHLAP9253040	Plasmid vector containing HLA-A*03:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:04:02 protein. This plasmid can be used for constructing HLA-A*03:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:04:03 Protein Expression Plasmid Vector	PHLAP9253041	Plasmid vector containing HLA-A*03:04:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:04:03 protein. This plasmid can be used for constructing HLA-A*03:04:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:04:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:05:01 Protein Expression Plasmid Vector	PHLAP9253042	Plasmid vector containing HLA-A*03:05:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:05:01 protein. This plasmid can be used for constructing HLA-A*03:05:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:05:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:05:02 Protein Expression Plasmid Vector	PHLAP9253043	Plasmid vector containing HLA-A*03:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:05:02 protein. This plasmid can be used for constructing HLA-A*03:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:06 Protein Expression Plasmid Vector	PHLAP9253044	Plasmid vector containing HLA-A*03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:06 protein. This plasmid can be used for constructing HLA-A*03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:07:01:01 Protein Expression Plasmid Vector	PHLAP9253045	Plasmid vector containing HLA-A*03:07:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:07:01:01 protein. This plasmid can be used for constructing HLA-A*03:07:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:07:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:07:01:02 Protein Expression Plasmid Vector	PHLAP9253046	Plasmid vector containing HLA-A*03:07:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:07:01:02 protein. This plasmid can be used for constructing HLA-A*03:07:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:07:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:07:02 Protein Expression Plasmid Vector	PHLAP9253047	Plasmid vector containing HLA-A*03:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:07:02 protein. This plasmid can be used for constructing HLA-A*03:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:08:01:01 Protein Expression Plasmid Vector	PHLAP9253048	Plasmid vector containing HLA-A*03:08:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:08:01:01 protein. This plasmid can be used for constructing HLA-A*03:08:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:08:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:08:01:02 Protein Expression Plasmid Vector	PHLAP9253049	Plasmid vector containing HLA-A*03:08:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:08:01:02 protein. This plasmid can be used for constructing HLA-A*03:08:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:08:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:09 Protein Expression Plasmid Vector	PHLAP9253050	Plasmid vector containing HLA-A*03:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:09 protein. This plasmid can be used for constructing HLA-A*03:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:10 Protein Expression Plasmid Vector	PHLAP9253051	Plasmid vector containing HLA-A*03:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:10 protein. This plasmid can be used for constructing HLA-A*03:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:100 Protein Expression Plasmid Vector	PHLAP9253052	Plasmid vector containing HLA-A*03:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:100 protein. This plasmid can be used for constructing HLA-A*03:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:101 Protein Expression Plasmid Vector	PHLAP9253053	Plasmid vector containing HLA-A*03:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:101 protein. This plasmid can be used for constructing HLA-A*03:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:102 Protein Expression Plasmid Vector	PHLAP9253054	Plasmid vector containing HLA-A*03:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:102 protein. This plasmid can be used for constructing HLA-A*03:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:103:01 Protein Expression Plasmid Vector	PHLAP9253055	Plasmid vector containing HLA-A*03:103:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:103:01 protein. This plasmid can be used for constructing HLA-A*03:103:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:103:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:103:02 Protein Expression Plasmid Vector	PHLAP9253056	Plasmid vector containing HLA-A*03:103:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:103:02 protein. This plasmid can be used for constructing HLA-A*03:103:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:103:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:104 Protein Expression Plasmid Vector	PHLAP9253057	Plasmid vector containing HLA-A*03:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:104 protein. This plasmid can be used for constructing HLA-A*03:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:105 Protein Expression Plasmid Vector	PHLAP9253058	Plasmid vector containing HLA-A*03:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:105 protein. This plasmid can be used for constructing HLA-A*03:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:106 Protein Expression Plasmid Vector	PHLAP9253059	Plasmid vector containing HLA-A*03:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:106 protein. This plasmid can be used for constructing HLA-A*03:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:107 Protein Expression Plasmid Vector	PHLAP9253060	Plasmid vector containing HLA-A*03:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:107 protein. This plasmid can be used for constructing HLA-A*03:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:108 Protein Expression Plasmid Vector	PHLAP9253061	Plasmid vector containing HLA-A*03:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:108 protein. This plasmid can be used for constructing HLA-A*03:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:109 Protein Expression Plasmid Vector	PHLAP9253062	Plasmid vector containing HLA-A*03:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:109 protein. This plasmid can be used for constructing HLA-A*03:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:11:01N Protein Expression Plasmid Vector	PHLAP9253063	Plasmid vector containing HLA-A*03:11:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:11:01N protein. This plasmid can be used for constructing HLA-A*03:11:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:11:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:11:02N Protein Expression Plasmid Vector	PHLAP9253064	Plasmid vector containing HLA-A*03:11:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:11:02N protein. This plasmid can be used for constructing HLA-A*03:11:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:11:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:110 Protein Expression Plasmid Vector	PHLAP9253065	Plasmid vector containing HLA-A*03:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:110 protein. This plasmid can be used for constructing HLA-A*03:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:111 Protein Expression Plasmid Vector	PHLAP9253066	Plasmid vector containing HLA-A*03:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:111 protein. This plasmid can be used for constructing HLA-A*03:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:112 Protein Expression Plasmid Vector	PHLAP9253067	Plasmid vector containing HLA-A*03:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:112 protein. This plasmid can be used for constructing HLA-A*03:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:113 Protein Expression Plasmid Vector	PHLAP9253068	Plasmid vector containing HLA-A*03:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:113 protein. This plasmid can be used for constructing HLA-A*03:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:114 Protein Expression Plasmid Vector	PHLAP9253069	Plasmid vector containing HLA-A*03:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:114 protein. This plasmid can be used for constructing HLA-A*03:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:115 Protein Expression Plasmid Vector	PHLAP9253070	Plasmid vector containing HLA-A*03:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:115 protein. This plasmid can be used for constructing HLA-A*03:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:116 Protein Expression Plasmid Vector	PHLAP9253071	Plasmid vector containing HLA-A*03:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:116 protein. This plasmid can be used for constructing HLA-A*03:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:117 Protein Expression Plasmid Vector	PHLAP9253072	Plasmid vector containing HLA-A*03:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:117 protein. This plasmid can be used for constructing HLA-A*03:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:118 Protein Expression Plasmid Vector	PHLAP9253073	Plasmid vector containing HLA-A*03:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:118 protein. This plasmid can be used for constructing HLA-A*03:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:119 Protein Expression Plasmid Vector	PHLAP9253074	Plasmid vector containing HLA-A*03:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:119 protein. This plasmid can be used for constructing HLA-A*03:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:12 Protein Expression Plasmid Vector	PHLAP9253075	Plasmid vector containing HLA-A*03:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:12 protein. This plasmid can be used for constructing HLA-A*03:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:120 Protein Expression Plasmid Vector	PHLAP9253076	Plasmid vector containing HLA-A*03:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:120 protein. This plasmid can be used for constructing HLA-A*03:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:121 Protein Expression Plasmid Vector	PHLAP9253077	Plasmid vector containing HLA-A*03:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:121 protein. This plasmid can be used for constructing HLA-A*03:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:122 Protein Expression Plasmid Vector	PHLAP9253078	Plasmid vector containing HLA-A*03:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:122 protein. This plasmid can be used for constructing HLA-A*03:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:123:01 Protein Expression Plasmid Vector	PHLAP9253079	Plasmid vector containing HLA-A*03:123:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:123:01 protein. This plasmid can be used for constructing HLA-A*03:123:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:123:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:123:02 Protein Expression Plasmid Vector	PHLAP9253080	Plasmid vector containing HLA-A*03:123:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:123:02 protein. This plasmid can be used for constructing HLA-A*03:123:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:123:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:124 Protein Expression Plasmid Vector	PHLAP9253081	Plasmid vector containing HLA-A*03:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:124 protein. This plasmid can be used for constructing HLA-A*03:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:125 Protein Expression Plasmid Vector	PHLAP9253082	Plasmid vector containing HLA-A*03:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:125 protein. This plasmid can be used for constructing HLA-A*03:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:126 Protein Expression Plasmid Vector	PHLAP9253083	Plasmid vector containing HLA-A*03:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:126 protein. This plasmid can be used for constructing HLA-A*03:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:127 Protein Expression Plasmid Vector	PHLAP9253084	Plasmid vector containing HLA-A*03:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:127 protein. This plasmid can be used for constructing HLA-A*03:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:128 Protein Expression Plasmid Vector	PHLAP9253085	Plasmid vector containing HLA-A*03:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:128 protein. This plasmid can be used for constructing HLA-A*03:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:129N Protein Expression Plasmid Vector	PHLAP9253086	Plasmid vector containing HLA-A*03:129N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:129N protein. This plasmid can be used for constructing HLA-A*03:129N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:129N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:13 Protein Expression Plasmid Vector	PHLAP9253087	Plasmid vector containing HLA-A*03:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:13 protein. This plasmid can be used for constructing HLA-A*03:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:130 Protein Expression Plasmid Vector	PHLAP9253088	Plasmid vector containing HLA-A*03:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:130 protein. This plasmid can be used for constructing HLA-A*03:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:131 Protein Expression Plasmid Vector	PHLAP9253089	Plasmid vector containing HLA-A*03:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:131 protein. This plasmid can be used for constructing HLA-A*03:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:132 Protein Expression Plasmid Vector	PHLAP9253090	Plasmid vector containing HLA-A*03:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:132 protein. This plasmid can be used for constructing HLA-A*03:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:133 Protein Expression Plasmid Vector	PHLAP9253091	Plasmid vector containing HLA-A*03:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:133 protein. This plasmid can be used for constructing HLA-A*03:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:134 Protein Expression Plasmid Vector	PHLAP9253092	Plasmid vector containing HLA-A*03:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:134 protein. This plasmid can be used for constructing HLA-A*03:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:135 Protein Expression Plasmid Vector	PHLAP9253093	Plasmid vector containing HLA-A*03:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:135 protein. This plasmid can be used for constructing HLA-A*03:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:136 Protein Expression Plasmid Vector	PHLAP9253094	Plasmid vector containing HLA-A*03:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:136 protein. This plasmid can be used for constructing HLA-A*03:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:137 Protein Expression Plasmid Vector	PHLAP9253095	Plasmid vector containing HLA-A*03:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:137 protein. This plasmid can be used for constructing HLA-A*03:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:138 Protein Expression Plasmid Vector	PHLAP9253096	Plasmid vector containing HLA-A*03:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:138 protein. This plasmid can be used for constructing HLA-A*03:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:139 Protein Expression Plasmid Vector	PHLAP9253097	Plasmid vector containing HLA-A*03:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:139 protein. This plasmid can be used for constructing HLA-A*03:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:14 Protein Expression Plasmid Vector	PHLAP9253098	Plasmid vector containing HLA-A*03:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:14 protein. This plasmid can be used for constructing HLA-A*03:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:140 Protein Expression Plasmid Vector	PHLAP9253099	Plasmid vector containing HLA-A*03:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:140 protein. This plasmid can be used for constructing HLA-A*03:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:141 Protein Expression Plasmid Vector	PHLAP9253100	Plasmid vector containing HLA-A*03:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:141 protein. This plasmid can be used for constructing HLA-A*03:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:142 Protein Expression Plasmid Vector	PHLAP9253101	Plasmid vector containing HLA-A*03:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:142 protein. This plasmid can be used for constructing HLA-A*03:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:143 Protein Expression Plasmid Vector	PHLAP9253102	Plasmid vector containing HLA-A*03:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:143 protein. This plasmid can be used for constructing HLA-A*03:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:144 Protein Expression Plasmid Vector	PHLAP9253103	Plasmid vector containing HLA-A*03:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:144 protein. This plasmid can be used for constructing HLA-A*03:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:145:01 Protein Expression Plasmid Vector	PHLAP9253104	Plasmid vector containing HLA-A*03:145:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:145:01 protein. This plasmid can be used for constructing HLA-A*03:145:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:145:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:145:02 Protein Expression Plasmid Vector	PHLAP9253105	Plasmid vector containing HLA-A*03:145:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:145:02 protein. This plasmid can be used for constructing HLA-A*03:145:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:145:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:146 Protein Expression Plasmid Vector	PHLAP9253106	Plasmid vector containing HLA-A*03:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:146 protein. This plasmid can be used for constructing HLA-A*03:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:147 Protein Expression Plasmid Vector	PHLAP9253107	Plasmid vector containing HLA-A*03:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:147 protein. This plasmid can be used for constructing HLA-A*03:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:148 Protein Expression Plasmid Vector	PHLAP9253108	Plasmid vector containing HLA-A*03:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:148 protein. This plasmid can be used for constructing HLA-A*03:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:149 Protein Expression Plasmid Vector	PHLAP9253109	Plasmid vector containing HLA-A*03:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:149 protein. This plasmid can be used for constructing HLA-A*03:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:15 Protein Expression Plasmid Vector	PHLAP9253110	Plasmid vector containing HLA-A*03:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:15 protein. This plasmid can be used for constructing HLA-A*03:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:150 Protein Expression Plasmid Vector	PHLAP9253111	Plasmid vector containing HLA-A*03:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:150 protein. This plasmid can be used for constructing HLA-A*03:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:151 Protein Expression Plasmid Vector	PHLAP9253112	Plasmid vector containing HLA-A*03:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:151 protein. This plasmid can be used for constructing HLA-A*03:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:152 Protein Expression Plasmid Vector	PHLAP9253113	Plasmid vector containing HLA-A*03:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:152 protein. This plasmid can be used for constructing HLA-A*03:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:153 Protein Expression Plasmid Vector	PHLAP9253114	Plasmid vector containing HLA-A*03:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:153 protein. This plasmid can be used for constructing HLA-A*03:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:154:01 Protein Expression Plasmid Vector	PHLAP9253115	Plasmid vector containing HLA-A*03:154:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:154:01 protein. This plasmid can be used for constructing HLA-A*03:154:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:154:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:154:02 Protein Expression Plasmid Vector	PHLAP9253116	Plasmid vector containing HLA-A*03:154:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:154:02 protein. This plasmid can be used for constructing HLA-A*03:154:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:154:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:155 Protein Expression Plasmid Vector	PHLAP9253117	Plasmid vector containing HLA-A*03:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:155 protein. This plasmid can be used for constructing HLA-A*03:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:156 Protein Expression Plasmid Vector	PHLAP9253118	Plasmid vector containing HLA-A*03:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:156 protein. This plasmid can be used for constructing HLA-A*03:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:157:01 Protein Expression Plasmid Vector	PHLAP9253119	Plasmid vector containing HLA-A*03:157:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:157:01 protein. This plasmid can be used for constructing HLA-A*03:157:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:157:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:157:02 Protein Expression Plasmid Vector	PHLAP9253120	Plasmid vector containing HLA-A*03:157:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:157:02 protein. This plasmid can be used for constructing HLA-A*03:157:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:157:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:158 Protein Expression Plasmid Vector	PHLAP9253121	Plasmid vector containing HLA-A*03:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:158 protein. This plasmid can be used for constructing HLA-A*03:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:159 Protein Expression Plasmid Vector	PHLAP9253122	Plasmid vector containing HLA-A*03:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:159 protein. This plasmid can be used for constructing HLA-A*03:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:16 Protein Expression Plasmid Vector	PHLAP9253123	Plasmid vector containing HLA-A*03:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:16 protein. This plasmid can be used for constructing HLA-A*03:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:160 Protein Expression Plasmid Vector	PHLAP9253124	Plasmid vector containing HLA-A*03:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:160 protein. This plasmid can be used for constructing HLA-A*03:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:161N Protein Expression Plasmid Vector	PHLAP9253125	Plasmid vector containing HLA-A*03:161N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:161N protein. This plasmid can be used for constructing HLA-A*03:161N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:161N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:162N Protein Expression Plasmid Vector	PHLAP9253126	Plasmid vector containing HLA-A*03:162N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:162N protein. This plasmid can be used for constructing HLA-A*03:162N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:162N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:163 Protein Expression Plasmid Vector	PHLAP9253127	Plasmid vector containing HLA-A*03:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:163 protein. This plasmid can be used for constructing HLA-A*03:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:164 Protein Expression Plasmid Vector	PHLAP9253128	Plasmid vector containing HLA-A*03:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:164 protein. This plasmid can be used for constructing HLA-A*03:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:165 Protein Expression Plasmid Vector	PHLAP9253129	Plasmid vector containing HLA-A*03:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:165 protein. This plasmid can be used for constructing HLA-A*03:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:166 Protein Expression Plasmid Vector	PHLAP9253130	Plasmid vector containing HLA-A*03:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:166 protein. This plasmid can be used for constructing HLA-A*03:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:167 Protein Expression Plasmid Vector	PHLAP9253131	Plasmid vector containing HLA-A*03:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:167 protein. This plasmid can be used for constructing HLA-A*03:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:168N Protein Expression Plasmid Vector	PHLAP9253132	Plasmid vector containing HLA-A*03:168N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:168N protein. This plasmid can be used for constructing HLA-A*03:168N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:168N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:169 Protein Expression Plasmid Vector	PHLAP9253133	Plasmid vector containing HLA-A*03:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:169 protein. This plasmid can be used for constructing HLA-A*03:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:17:01 Protein Expression Plasmid Vector	PHLAP9253134	Plasmid vector containing HLA-A*03:17:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:17:01 protein. This plasmid can be used for constructing HLA-A*03:17:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:17:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:17:02 Protein Expression Plasmid Vector	PHLAP9253135	Plasmid vector containing HLA-A*03:17:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:17:02 protein. This plasmid can be used for constructing HLA-A*03:17:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:17:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:170 Protein Expression Plasmid Vector	PHLAP9253136	Plasmid vector containing HLA-A*03:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:170 protein. This plasmid can be used for constructing HLA-A*03:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:171 Protein Expression Plasmid Vector	PHLAP9253137	Plasmid vector containing HLA-A*03:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:171 protein. This plasmid can be used for constructing HLA-A*03:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:172 Protein Expression Plasmid Vector	PHLAP9253138	Plasmid vector containing HLA-A*03:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:172 protein. This plasmid can be used for constructing HLA-A*03:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:173 Protein Expression Plasmid Vector	PHLAP9253139	Plasmid vector containing HLA-A*03:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:173 protein. This plasmid can be used for constructing HLA-A*03:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:174 Protein Expression Plasmid Vector	PHLAP9253140	Plasmid vector containing HLA-A*03:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:174 protein. This plasmid can be used for constructing HLA-A*03:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:175 Protein Expression Plasmid Vector	PHLAP9253141	Plasmid vector containing HLA-A*03:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:175 protein. This plasmid can be used for constructing HLA-A*03:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:176 Protein Expression Plasmid Vector	PHLAP9253142	Plasmid vector containing HLA-A*03:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:176 protein. This plasmid can be used for constructing HLA-A*03:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:177 Protein Expression Plasmid Vector	PHLAP9253143	Plasmid vector containing HLA-A*03:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:177 protein. This plasmid can be used for constructing HLA-A*03:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:178N Protein Expression Plasmid Vector	PHLAP9253144	Plasmid vector containing HLA-A*03:178N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:178N protein. This plasmid can be used for constructing HLA-A*03:178N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:178N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:179 Protein Expression Plasmid Vector	PHLAP9253145	Plasmid vector containing HLA-A*03:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:179 protein. This plasmid can be used for constructing HLA-A*03:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:18 Protein Expression Plasmid Vector	PHLAP9253146	Plasmid vector containing HLA-A*03:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:18 protein. This plasmid can be used for constructing HLA-A*03:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:180 Protein Expression Plasmid Vector	PHLAP9253147	Plasmid vector containing HLA-A*03:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:180 protein. This plasmid can be used for constructing HLA-A*03:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:181 Protein Expression Plasmid Vector	PHLAP9253148	Plasmid vector containing HLA-A*03:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:181 protein. This plasmid can be used for constructing HLA-A*03:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:182:01:01 Protein Expression Plasmid Vector	PHLAP9253149	Plasmid vector containing HLA-A*03:182:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:182:01:01 protein. This plasmid can be used for constructing HLA-A*03:182:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:182:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:182:01:02 Protein Expression Plasmid Vector	PHLAP9253150	Plasmid vector containing HLA-A*03:182:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:182:01:02 protein. This plasmid can be used for constructing HLA-A*03:182:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:182:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:183 Protein Expression Plasmid Vector	PHLAP9253151	Plasmid vector containing HLA-A*03:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:183 protein. This plasmid can be used for constructing HLA-A*03:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:184 Protein Expression Plasmid Vector	PHLAP9253152	Plasmid vector containing HLA-A*03:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:184 protein. This plasmid can be used for constructing HLA-A*03:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:185 Protein Expression Plasmid Vector	PHLAP9253153	Plasmid vector containing HLA-A*03:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:185 protein. This plasmid can be used for constructing HLA-A*03:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:186 Protein Expression Plasmid Vector	PHLAP9253154	Plasmid vector containing HLA-A*03:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:186 protein. This plasmid can be used for constructing HLA-A*03:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:187 Protein Expression Plasmid Vector	PHLAP9253155	Plasmid vector containing HLA-A*03:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:187 protein. This plasmid can be used for constructing HLA-A*03:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:188 Protein Expression Plasmid Vector	PHLAP9253156	Plasmid vector containing HLA-A*03:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:188 protein. This plasmid can be used for constructing HLA-A*03:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:189 Protein Expression Plasmid Vector	PHLAP9253157	Plasmid vector containing HLA-A*03:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:189 protein. This plasmid can be used for constructing HLA-A*03:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:19 Protein Expression Plasmid Vector	PHLAP9253158	Plasmid vector containing HLA-A*03:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:19 protein. This plasmid can be used for constructing HLA-A*03:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:190 Protein Expression Plasmid Vector	PHLAP9253159	Plasmid vector containing HLA-A*03:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:190 protein. This plasmid can be used for constructing HLA-A*03:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:191 Protein Expression Plasmid Vector	PHLAP9253160	Plasmid vector containing HLA-A*03:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:191 protein. This plasmid can be used for constructing HLA-A*03:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:192N Protein Expression Plasmid Vector	PHLAP9253161	Plasmid vector containing HLA-A*03:192N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:192N protein. This plasmid can be used for constructing HLA-A*03:192N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:192N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:193 Protein Expression Plasmid Vector	PHLAP9253162	Plasmid vector containing HLA-A*03:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:193 protein. This plasmid can be used for constructing HLA-A*03:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:194 Protein Expression Plasmid Vector	PHLAP9253163	Plasmid vector containing HLA-A*03:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:194 protein. This plasmid can be used for constructing HLA-A*03:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:195 Protein Expression Plasmid Vector	PHLAP9253164	Plasmid vector containing HLA-A*03:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:195 protein. This plasmid can be used for constructing HLA-A*03:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:196 Protein Expression Plasmid Vector	PHLAP9253165	Plasmid vector containing HLA-A*03:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:196 protein. This plasmid can be used for constructing HLA-A*03:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:197:01N Protein Expression Plasmid Vector	PHLAP9253166	Plasmid vector containing HLA-A*03:197:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:197:01N protein. This plasmid can be used for constructing HLA-A*03:197:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:197:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:197:02N Protein Expression Plasmid Vector	PHLAP9253167	Plasmid vector containing HLA-A*03:197:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:197:02N protein. This plasmid can be used for constructing HLA-A*03:197:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:197:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:198 Protein Expression Plasmid Vector	PHLAP9253168	Plasmid vector containing HLA-A*03:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:198 protein. This plasmid can be used for constructing HLA-A*03:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:199 Protein Expression Plasmid Vector	PHLAP9253169	Plasmid vector containing HLA-A*03:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:199 protein. This plasmid can be used for constructing HLA-A*03:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:20 Protein Expression Plasmid Vector	PHLAP9253170	Plasmid vector containing HLA-A*03:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:20 protein. This plasmid can be used for constructing HLA-A*03:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:200Q Protein Expression Plasmid Vector	PHLAP9253171	Plasmid vector containing HLA-A*03:200Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:200Q protein. This plasmid can be used for constructing HLA-A*03:200Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:200Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:201 Protein Expression Plasmid Vector	PHLAP9253172	Plasmid vector containing HLA-A*03:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:201 protein. This plasmid can be used for constructing HLA-A*03:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:202 Protein Expression Plasmid Vector	PHLAP9253173	Plasmid vector containing HLA-A*03:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:202 protein. This plasmid can be used for constructing HLA-A*03:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:203 Protein Expression Plasmid Vector	PHLAP9253174	Plasmid vector containing HLA-A*03:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:203 protein. This plasmid can be used for constructing HLA-A*03:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:204 Protein Expression Plasmid Vector	PHLAP9253175	Plasmid vector containing HLA-A*03:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:204 protein. This plasmid can be used for constructing HLA-A*03:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:205 Protein Expression Plasmid Vector	PHLAP9253176	Plasmid vector containing HLA-A*03:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:205 protein. This plasmid can be used for constructing HLA-A*03:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:206 Protein Expression Plasmid Vector	PHLAP9253177	Plasmid vector containing HLA-A*03:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:206 protein. This plasmid can be used for constructing HLA-A*03:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:207 Protein Expression Plasmid Vector	PHLAP9253178	Plasmid vector containing HLA-A*03:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:207 protein. This plasmid can be used for constructing HLA-A*03:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:208 Protein Expression Plasmid Vector	PHLAP9253179	Plasmid vector containing HLA-A*03:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:208 protein. This plasmid can be used for constructing HLA-A*03:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:209 Protein Expression Plasmid Vector	PHLAP9253180	Plasmid vector containing HLA-A*03:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:209 protein. This plasmid can be used for constructing HLA-A*03:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:210 Protein Expression Plasmid Vector	PHLAP9253181	Plasmid vector containing HLA-A*03:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:210 protein. This plasmid can be used for constructing HLA-A*03:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:211 Protein Expression Plasmid Vector	PHLAP9253182	Plasmid vector containing HLA-A*03:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:211 protein. This plasmid can be used for constructing HLA-A*03:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:212 Protein Expression Plasmid Vector	PHLAP9253183	Plasmid vector containing HLA-A*03:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:212 protein. This plasmid can be used for constructing HLA-A*03:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:213 Protein Expression Plasmid Vector	PHLAP9253184	Plasmid vector containing HLA-A*03:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:213 protein. This plasmid can be used for constructing HLA-A*03:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:214 Protein Expression Plasmid Vector	PHLAP9253185	Plasmid vector containing HLA-A*03:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:214 protein. This plasmid can be used for constructing HLA-A*03:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:215 Protein Expression Plasmid Vector	PHLAP9253186	Plasmid vector containing HLA-A*03:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:215 protein. This plasmid can be used for constructing HLA-A*03:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:216 Protein Expression Plasmid Vector	PHLAP9253187	Plasmid vector containing HLA-A*03:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:216 protein. This plasmid can be used for constructing HLA-A*03:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:217 Protein Expression Plasmid Vector	PHLAP9253188	Plasmid vector containing HLA-A*03:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:217 protein. This plasmid can be used for constructing HLA-A*03:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:218 Protein Expression Plasmid Vector	PHLAP9253189	Plasmid vector containing HLA-A*03:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:218 protein. This plasmid can be used for constructing HLA-A*03:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:219 Protein Expression Plasmid Vector	PHLAP9253190	Plasmid vector containing HLA-A*03:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:219 protein. This plasmid can be used for constructing HLA-A*03:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:21N Protein Expression Plasmid Vector	PHLAP9253191	Plasmid vector containing HLA-A*03:21N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:21N protein. This plasmid can be used for constructing HLA-A*03:21N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:21N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:22:01 Protein Expression Plasmid Vector	PHLAP9253192	Plasmid vector containing HLA-A*03:22:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:22:01 protein. This plasmid can be used for constructing HLA-A*03:22:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:22:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:22:02 Protein Expression Plasmid Vector	PHLAP9253193	Plasmid vector containing HLA-A*03:22:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:22:02 protein. This plasmid can be used for constructing HLA-A*03:22:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:22:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:220 Protein Expression Plasmid Vector	PHLAP9253194	Plasmid vector containing HLA-A*03:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:220 protein. This plasmid can be used for constructing HLA-A*03:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:221 Protein Expression Plasmid Vector	PHLAP9253195	Plasmid vector containing HLA-A*03:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:221 protein. This plasmid can be used for constructing HLA-A*03:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:222 Protein Expression Plasmid Vector	PHLAP9253196	Plasmid vector containing HLA-A*03:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:222 protein. This plasmid can be used for constructing HLA-A*03:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:223 Protein Expression Plasmid Vector	PHLAP9253197	Plasmid vector containing HLA-A*03:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:223 protein. This plasmid can be used for constructing HLA-A*03:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:224 Protein Expression Plasmid Vector	PHLAP9253198	Plasmid vector containing HLA-A*03:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:224 protein. This plasmid can be used for constructing HLA-A*03:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:225 Protein Expression Plasmid Vector	PHLAP9253199	Plasmid vector containing HLA-A*03:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:225 protein. This plasmid can be used for constructing HLA-A*03:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:226 Protein Expression Plasmid Vector	PHLAP9253200	Plasmid vector containing HLA-A*03:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:226 protein. This plasmid can be used for constructing HLA-A*03:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:227 Protein Expression Plasmid Vector	PHLAP9253201	Plasmid vector containing HLA-A*03:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:227 protein. This plasmid can be used for constructing HLA-A*03:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:228 Protein Expression Plasmid Vector	PHLAP9253202	Plasmid vector containing HLA-A*03:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:228 protein. This plasmid can be used for constructing HLA-A*03:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:229 Protein Expression Plasmid Vector	PHLAP9253203	Plasmid vector containing HLA-A*03:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:229 protein. This plasmid can be used for constructing HLA-A*03:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:23:01 Protein Expression Plasmid Vector	PHLAP9253204	Plasmid vector containing HLA-A*03:23:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:23:01 protein. This plasmid can be used for constructing HLA-A*03:23:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:23:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:23:02 Protein Expression Plasmid Vector	PHLAP9253205	Plasmid vector containing HLA-A*03:23:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:23:02 protein. This plasmid can be used for constructing HLA-A*03:23:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:23:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:230 Protein Expression Plasmid Vector	PHLAP9253206	Plasmid vector containing HLA-A*03:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:230 protein. This plasmid can be used for constructing HLA-A*03:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:231:01 Protein Expression Plasmid Vector	PHLAP9253207	Plasmid vector containing HLA-A*03:231:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:231:01 protein. This plasmid can be used for constructing HLA-A*03:231:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:231:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:231:02 Protein Expression Plasmid Vector	PHLAP9253208	Plasmid vector containing HLA-A*03:231:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:231:02 protein. This plasmid can be used for constructing HLA-A*03:231:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:231:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:232 Protein Expression Plasmid Vector	PHLAP9253209	Plasmid vector containing HLA-A*03:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:232 protein. This plasmid can be used for constructing HLA-A*03:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:233 Protein Expression Plasmid Vector	PHLAP9253210	Plasmid vector containing HLA-A*03:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:233 protein. This plasmid can be used for constructing HLA-A*03:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:234Q Protein Expression Plasmid Vector	PHLAP9253211	Plasmid vector containing HLA-A*03:234Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:234Q protein. This plasmid can be used for constructing HLA-A*03:234Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:234Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:235 Protein Expression Plasmid Vector	PHLAP9253212	Plasmid vector containing HLA-A*03:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:235 protein. This plasmid can be used for constructing HLA-A*03:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:236 Protein Expression Plasmid Vector	PHLAP9253213	Plasmid vector containing HLA-A*03:236 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:236 protein. This plasmid can be used for constructing HLA-A*03:236 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:236 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:237 Protein Expression Plasmid Vector	PHLAP9253214	Plasmid vector containing HLA-A*03:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:237 protein. This plasmid can be used for constructing HLA-A*03:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:238 Protein Expression Plasmid Vector	PHLAP9253215	Plasmid vector containing HLA-A*03:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:238 protein. This plasmid can be used for constructing HLA-A*03:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:239 Protein Expression Plasmid Vector	PHLAP9253216	Plasmid vector containing HLA-A*03:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:239 protein. This plasmid can be used for constructing HLA-A*03:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:24 Protein Expression Plasmid Vector	PHLAP9253217	Plasmid vector containing HLA-A*03:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:24 protein. This plasmid can be used for constructing HLA-A*03:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:240 Protein Expression Plasmid Vector	PHLAP9253218	Plasmid vector containing HLA-A*03:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:240 protein. This plasmid can be used for constructing HLA-A*03:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:241 Protein Expression Plasmid Vector	PHLAP9253219	Plasmid vector containing HLA-A*03:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:241 protein. This plasmid can be used for constructing HLA-A*03:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:242 Protein Expression Plasmid Vector	PHLAP9253220	Plasmid vector containing HLA-A*03:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:242 protein. This plasmid can be used for constructing HLA-A*03:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:243 Protein Expression Plasmid Vector	PHLAP9253221	Plasmid vector containing HLA-A*03:243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:243 protein. This plasmid can be used for constructing HLA-A*03:243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:244 Protein Expression Plasmid Vector	PHLAP9253222	Plasmid vector containing HLA-A*03:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:244 protein. This plasmid can be used for constructing HLA-A*03:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:245 Protein Expression Plasmid Vector	PHLAP9253223	Plasmid vector containing HLA-A*03:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:245 protein. This plasmid can be used for constructing HLA-A*03:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:246 Protein Expression Plasmid Vector	PHLAP9253224	Plasmid vector containing HLA-A*03:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:246 protein. This plasmid can be used for constructing HLA-A*03:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:247:01 Protein Expression Plasmid Vector	PHLAP9253225	Plasmid vector containing HLA-A*03:247:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:247:01 protein. This plasmid can be used for constructing HLA-A*03:247:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:247:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:247:02 Protein Expression Plasmid Vector	PHLAP9253226	Plasmid vector containing HLA-A*03:247:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:247:02 protein. This plasmid can be used for constructing HLA-A*03:247:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:247:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:248 Protein Expression Plasmid Vector	PHLAP9253227	Plasmid vector containing HLA-A*03:248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:248 protein. This plasmid can be used for constructing HLA-A*03:248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:249 Protein Expression Plasmid Vector	PHLAP9253228	Plasmid vector containing HLA-A*03:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:249 protein. This plasmid can be used for constructing HLA-A*03:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:25 Protein Expression Plasmid Vector	PHLAP9253229	Plasmid vector containing HLA-A*03:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:25 protein. This plasmid can be used for constructing HLA-A*03:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:250 Protein Expression Plasmid Vector	PHLAP9253230	Plasmid vector containing HLA-A*03:250 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:250 protein. This plasmid can be used for constructing HLA-A*03:250 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:250 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:251 Protein Expression Plasmid Vector	PHLAP9253231	Plasmid vector containing HLA-A*03:251 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:251 protein. This plasmid can be used for constructing HLA-A*03:251 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:251 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:252 Protein Expression Plasmid Vector	PHLAP9253232	Plasmid vector containing HLA-A*03:252 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:252 protein. This plasmid can be used for constructing HLA-A*03:252 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:252 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:253 Protein Expression Plasmid Vector	PHLAP9253233	Plasmid vector containing HLA-A*03:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:253 protein. This plasmid can be used for constructing HLA-A*03:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:254 Protein Expression Plasmid Vector	PHLAP9253234	Plasmid vector containing HLA-A*03:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:254 protein. This plasmid can be used for constructing HLA-A*03:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:255 Protein Expression Plasmid Vector	PHLAP9253235	Plasmid vector containing HLA-A*03:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:255 protein. This plasmid can be used for constructing HLA-A*03:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:256 Protein Expression Plasmid Vector	PHLAP9253236	Plasmid vector containing HLA-A*03:256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:256 protein. This plasmid can be used for constructing HLA-A*03:256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:257 Protein Expression Plasmid Vector	PHLAP9253237	Plasmid vector containing HLA-A*03:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:257 protein. This plasmid can be used for constructing HLA-A*03:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:258 Protein Expression Plasmid Vector	PHLAP9253238	Plasmid vector containing HLA-A*03:258 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:258 protein. This plasmid can be used for constructing HLA-A*03:258 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:258 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:259 Protein Expression Plasmid Vector	PHLAP9253239	Plasmid vector containing HLA-A*03:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:259 protein. This plasmid can be used for constructing HLA-A*03:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:26 Protein Expression Plasmid Vector	PHLAP9253240	Plasmid vector containing HLA-A*03:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:26 protein. This plasmid can be used for constructing HLA-A*03:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:260 Protein Expression Plasmid Vector	PHLAP9253241	Plasmid vector containing HLA-A*03:260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:260 protein. This plasmid can be used for constructing HLA-A*03:260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:261 Protein Expression Plasmid Vector	PHLAP9253242	Plasmid vector containing HLA-A*03:261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:261 protein. This plasmid can be used for constructing HLA-A*03:261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:262N Protein Expression Plasmid Vector	PHLAP9253243	Plasmid vector containing HLA-A*03:262N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:262N protein. This plasmid can be used for constructing HLA-A*03:262N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:262N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:263 Protein Expression Plasmid Vector	PHLAP9253244	Plasmid vector containing HLA-A*03:263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:263 protein. This plasmid can be used for constructing HLA-A*03:263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:264 Protein Expression Plasmid Vector	PHLAP9253245	Plasmid vector containing HLA-A*03:264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:264 protein. This plasmid can be used for constructing HLA-A*03:264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:265 Protein Expression Plasmid Vector	PHLAP9253246	Plasmid vector containing HLA-A*03:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:265 protein. This plasmid can be used for constructing HLA-A*03:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:266N Protein Expression Plasmid Vector	PHLAP9253247	Plasmid vector containing HLA-A*03:266N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:266N protein. This plasmid can be used for constructing HLA-A*03:266N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:266N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:267 Protein Expression Plasmid Vector	PHLAP9253248	Plasmid vector containing HLA-A*03:267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:267 protein. This plasmid can be used for constructing HLA-A*03:267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:268 Protein Expression Plasmid Vector	PHLAP9253249	Plasmid vector containing HLA-A*03:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:268 protein. This plasmid can be used for constructing HLA-A*03:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:269N Protein Expression Plasmid Vector	PHLAP9253250	Plasmid vector containing HLA-A*03:269N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:269N protein. This plasmid can be used for constructing HLA-A*03:269N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:269N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:27 Protein Expression Plasmid Vector	PHLAP9253251	Plasmid vector containing HLA-A*03:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:27 protein. This plasmid can be used for constructing HLA-A*03:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:270 Protein Expression Plasmid Vector	PHLAP9253252	Plasmid vector containing HLA-A*03:270 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:270 protein. This plasmid can be used for constructing HLA-A*03:270 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:270 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:271 Protein Expression Plasmid Vector	PHLAP9253253	Plasmid vector containing HLA-A*03:271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:271 protein. This plasmid can be used for constructing HLA-A*03:271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:272 Protein Expression Plasmid Vector	PHLAP9253254	Plasmid vector containing HLA-A*03:272 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:272 protein. This plasmid can be used for constructing HLA-A*03:272 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:272 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:273 Protein Expression Plasmid Vector	PHLAP9253255	Plasmid vector containing HLA-A*03:273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:273 protein. This plasmid can be used for constructing HLA-A*03:273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:274 Protein Expression Plasmid Vector	PHLAP9253256	Plasmid vector containing HLA-A*03:274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:274 protein. This plasmid can be used for constructing HLA-A*03:274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:275N Protein Expression Plasmid Vector	PHLAP9253257	Plasmid vector containing HLA-A*03:275N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:275N protein. This plasmid can be used for constructing HLA-A*03:275N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:275N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:276 Protein Expression Plasmid Vector	PHLAP9253258	Plasmid vector containing HLA-A*03:276 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:276 protein. This plasmid can be used for constructing HLA-A*03:276 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:276 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:277 Protein Expression Plasmid Vector	PHLAP9253259	Plasmid vector containing HLA-A*03:277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:277 protein. This plasmid can be used for constructing HLA-A*03:277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:278 Protein Expression Plasmid Vector	PHLAP9253260	Plasmid vector containing HLA-A*03:278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:278 protein. This plasmid can be used for constructing HLA-A*03:278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:279N Protein Expression Plasmid Vector	PHLAP9253261	Plasmid vector containing HLA-A*03:279N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:279N protein. This plasmid can be used for constructing HLA-A*03:279N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:279N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:28 Protein Expression Plasmid Vector	PHLAP9253262	Plasmid vector containing HLA-A*03:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:28 protein. This plasmid can be used for constructing HLA-A*03:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:280:01 Protein Expression Plasmid Vector	PHLAP9253263	Plasmid vector containing HLA-A*03:280:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:280:01 protein. This plasmid can be used for constructing HLA-A*03:280:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:280:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:280:02 Protein Expression Plasmid Vector	PHLAP9253264	Plasmid vector containing HLA-A*03:280:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:280:02 protein. This plasmid can be used for constructing HLA-A*03:280:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:280:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:281 Protein Expression Plasmid Vector	PHLAP9253265	Plasmid vector containing HLA-A*03:281 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:281 protein. This plasmid can be used for constructing HLA-A*03:281 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:281 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:282 Protein Expression Plasmid Vector	PHLAP9253266	Plasmid vector containing HLA-A*03:282 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:282 protein. This plasmid can be used for constructing HLA-A*03:282 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:282 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:283N Protein Expression Plasmid Vector	PHLAP9253267	Plasmid vector containing HLA-A*03:283N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:283N protein. This plasmid can be used for constructing HLA-A*03:283N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:283N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:284N Protein Expression Plasmid Vector	PHLAP9253268	Plasmid vector containing HLA-A*03:284N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:284N protein. This plasmid can be used for constructing HLA-A*03:284N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:284N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:285 Protein Expression Plasmid Vector	PHLAP9253269	Plasmid vector containing HLA-A*03:285 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:285 protein. This plasmid can be used for constructing HLA-A*03:285 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:285 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:286N Protein Expression Plasmid Vector	PHLAP9253270	Plasmid vector containing HLA-A*03:286N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:286N protein. This plasmid can be used for constructing HLA-A*03:286N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:286N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:287 Protein Expression Plasmid Vector	PHLAP9253271	Plasmid vector containing HLA-A*03:287 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:287 protein. This plasmid can be used for constructing HLA-A*03:287 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:287 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:288 Protein Expression Plasmid Vector	PHLAP9253272	Plasmid vector containing HLA-A*03:288 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:288 protein. This plasmid can be used for constructing HLA-A*03:288 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:288 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:289:01 Protein Expression Plasmid Vector	PHLAP9253273	Plasmid vector containing HLA-A*03:289:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:289:01 protein. This plasmid can be used for constructing HLA-A*03:289:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:289:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:289:02 Protein Expression Plasmid Vector	PHLAP9253274	Plasmid vector containing HLA-A*03:289:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:289:02 protein. This plasmid can be used for constructing HLA-A*03:289:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:289:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:29 Protein Expression Plasmid Vector	PHLAP9253275	Plasmid vector containing HLA-A*03:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:29 protein. This plasmid can be used for constructing HLA-A*03:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:290 Protein Expression Plasmid Vector	PHLAP9253276	Plasmid vector containing HLA-A*03:290 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:290 protein. This plasmid can be used for constructing HLA-A*03:290 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:290 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:291 Protein Expression Plasmid Vector	PHLAP9253277	Plasmid vector containing HLA-A*03:291 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:291 protein. This plasmid can be used for constructing HLA-A*03:291 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:291 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:292 Protein Expression Plasmid Vector	PHLAP9253278	Plasmid vector containing HLA-A*03:292 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:292 protein. This plasmid can be used for constructing HLA-A*03:292 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:292 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:293 Protein Expression Plasmid Vector	PHLAP9253279	Plasmid vector containing HLA-A*03:293 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:293 protein. This plasmid can be used for constructing HLA-A*03:293 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:293 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:294 Protein Expression Plasmid Vector	PHLAP9253280	Plasmid vector containing HLA-A*03:294 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:294 protein. This plasmid can be used for constructing HLA-A*03:294 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:294 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:295 Protein Expression Plasmid Vector	PHLAP9253281	Plasmid vector containing HLA-A*03:295 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:295 protein. This plasmid can be used for constructing HLA-A*03:295 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:295 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:296 Protein Expression Plasmid Vector	PHLAP9253282	Plasmid vector containing HLA-A*03:296 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:296 protein. This plasmid can be used for constructing HLA-A*03:296 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:296 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:297N Protein Expression Plasmid Vector	PHLAP9253283	Plasmid vector containing HLA-A*03:297N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:297N protein. This plasmid can be used for constructing HLA-A*03:297N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:297N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:298 Protein Expression Plasmid Vector	PHLAP9253284	Plasmid vector containing HLA-A*03:298 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:298 protein. This plasmid can be used for constructing HLA-A*03:298 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:298 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:299 Protein Expression Plasmid Vector	PHLAP9253285	Plasmid vector containing HLA-A*03:299 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:299 protein. This plasmid can be used for constructing HLA-A*03:299 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:299 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:30 Protein Expression Plasmid Vector	PHLAP9253286	Plasmid vector containing HLA-A*03:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:30 protein. This plasmid can be used for constructing HLA-A*03:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:300 Protein Expression Plasmid Vector	PHLAP9253287	Plasmid vector containing HLA-A*03:300 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:300 protein. This plasmid can be used for constructing HLA-A*03:300 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:300 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:301 Protein Expression Plasmid Vector	PHLAP9253288	Plasmid vector containing HLA-A*03:301 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:301 protein. This plasmid can be used for constructing HLA-A*03:301 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:301 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:302 Protein Expression Plasmid Vector	PHLAP9253289	Plasmid vector containing HLA-A*03:302 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:302 protein. This plasmid can be used for constructing HLA-A*03:302 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:302 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:303 Protein Expression Plasmid Vector	PHLAP9253290	Plasmid vector containing HLA-A*03:303 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:303 protein. This plasmid can be used for constructing HLA-A*03:303 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:303 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:304 Protein Expression Plasmid Vector	PHLAP9253291	Plasmid vector containing HLA-A*03:304 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:304 protein. This plasmid can be used for constructing HLA-A*03:304 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:304 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:305 Protein Expression Plasmid Vector	PHLAP9253292	Plasmid vector containing HLA-A*03:305 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:305 protein. This plasmid can be used for constructing HLA-A*03:305 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:305 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:306 Protein Expression Plasmid Vector	PHLAP9253293	Plasmid vector containing HLA-A*03:306 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:306 protein. This plasmid can be used for constructing HLA-A*03:306 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:306 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:307 Protein Expression Plasmid Vector	PHLAP9253294	Plasmid vector containing HLA-A*03:307 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:307 protein. This plasmid can be used for constructing HLA-A*03:307 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:307 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:308 Protein Expression Plasmid Vector	PHLAP9253295	Plasmid vector containing HLA-A*03:308 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:308 protein. This plasmid can be used for constructing HLA-A*03:308 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:308 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:309 Protein Expression Plasmid Vector	PHLAP9253296	Plasmid vector containing HLA-A*03:309 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:309 protein. This plasmid can be used for constructing HLA-A*03:309 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:309 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:31 Protein Expression Plasmid Vector	PHLAP9253297	Plasmid vector containing HLA-A*03:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:31 protein. This plasmid can be used for constructing HLA-A*03:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:310 Protein Expression Plasmid Vector	PHLAP9253298	Plasmid vector containing HLA-A*03:310 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:310 protein. This plasmid can be used for constructing HLA-A*03:310 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:310 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:311 Protein Expression Plasmid Vector	PHLAP9253299	Plasmid vector containing HLA-A*03:311 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:311 protein. This plasmid can be used for constructing HLA-A*03:311 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:311 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:312 Protein Expression Plasmid Vector	PHLAP9253300	Plasmid vector containing HLA-A*03:312 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:312 protein. This plasmid can be used for constructing HLA-A*03:312 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:312 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:313 Protein Expression Plasmid Vector	PHLAP9253301	Plasmid vector containing HLA-A*03:313 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:313 protein. This plasmid can be used for constructing HLA-A*03:313 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:313 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:314 Protein Expression Plasmid Vector	PHLAP9253302	Plasmid vector containing HLA-A*03:314 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:314 protein. This plasmid can be used for constructing HLA-A*03:314 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:314 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:315 Protein Expression Plasmid Vector	PHLAP9253303	Plasmid vector containing HLA-A*03:315 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:315 protein. This plasmid can be used for constructing HLA-A*03:315 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:315 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:316 Protein Expression Plasmid Vector	PHLAP9253304	Plasmid vector containing HLA-A*03:316 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:316 protein. This plasmid can be used for constructing HLA-A*03:316 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:316 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:317 Protein Expression Plasmid Vector	PHLAP9253305	Plasmid vector containing HLA-A*03:317 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:317 protein. This plasmid can be used for constructing HLA-A*03:317 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:317 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:318 Protein Expression Plasmid Vector	PHLAP9253306	Plasmid vector containing HLA-A*03:318 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:318 protein. This plasmid can be used for constructing HLA-A*03:318 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:318 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:319 Protein Expression Plasmid Vector	PHLAP9253307	Plasmid vector containing HLA-A*03:319 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:319 protein. This plasmid can be used for constructing HLA-A*03:319 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:319 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:32 Protein Expression Plasmid Vector	PHLAP9253308	Plasmid vector containing HLA-A*03:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:32 protein. This plasmid can be used for constructing HLA-A*03:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:320 Protein Expression Plasmid Vector	PHLAP9253309	Plasmid vector containing HLA-A*03:320 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:320 protein. This plasmid can be used for constructing HLA-A*03:320 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:320 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:321 Protein Expression Plasmid Vector	PHLAP9253310	Plasmid vector containing HLA-A*03:321 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:321 protein. This plasmid can be used for constructing HLA-A*03:321 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:321 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:322 Protein Expression Plasmid Vector	PHLAP9253311	Plasmid vector containing HLA-A*03:322 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:322 protein. This plasmid can be used for constructing HLA-A*03:322 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:322 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:323N Protein Expression Plasmid Vector	PHLAP9253312	Plasmid vector containing HLA-A*03:323N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:323N protein. This plasmid can be used for constructing HLA-A*03:323N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:323N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:324 Protein Expression Plasmid Vector	PHLAP9253313	Plasmid vector containing HLA-A*03:324 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:324 protein. This plasmid can be used for constructing HLA-A*03:324 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:324 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:325 Protein Expression Plasmid Vector	PHLAP9253314	Plasmid vector containing HLA-A*03:325 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:325 protein. This plasmid can be used for constructing HLA-A*03:325 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:325 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:326 Protein Expression Plasmid Vector	PHLAP9253315	Plasmid vector containing HLA-A*03:326 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:326 protein. This plasmid can be used for constructing HLA-A*03:326 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:326 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:327 Protein Expression Plasmid Vector	PHLAP9253316	Plasmid vector containing HLA-A*03:327 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:327 protein. This plasmid can be used for constructing HLA-A*03:327 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:327 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:328 Protein Expression Plasmid Vector	PHLAP9253317	Plasmid vector containing HLA-A*03:328 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:328 protein. This plasmid can be used for constructing HLA-A*03:328 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:328 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:329N Protein Expression Plasmid Vector	PHLAP9253318	Plasmid vector containing HLA-A*03:329N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:329N protein. This plasmid can be used for constructing HLA-A*03:329N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:329N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:33 Protein Expression Plasmid Vector	PHLAP9253319	Plasmid vector containing HLA-A*03:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:33 protein. This plasmid can be used for constructing HLA-A*03:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:330N Protein Expression Plasmid Vector	PHLAP9253320	Plasmid vector containing HLA-A*03:330N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:330N protein. This plasmid can be used for constructing HLA-A*03:330N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:330N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:331 Protein Expression Plasmid Vector	PHLAP9253321	Plasmid vector containing HLA-A*03:331 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:331 protein. This plasmid can be used for constructing HLA-A*03:331 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:331 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:332 Protein Expression Plasmid Vector	PHLAP9253322	Plasmid vector containing HLA-A*03:332 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:332 protein. This plasmid can be used for constructing HLA-A*03:332 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:332 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:333 Protein Expression Plasmid Vector	PHLAP9253323	Plasmid vector containing HLA-A*03:333 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:333 protein. This plasmid can be used for constructing HLA-A*03:333 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:333 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:334N Protein Expression Plasmid Vector	PHLAP9253324	Plasmid vector containing HLA-A*03:334N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:334N protein. This plasmid can be used for constructing HLA-A*03:334N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:334N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:335N Protein Expression Plasmid Vector	PHLAP9253325	Plasmid vector containing HLA-A*03:335N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:335N protein. This plasmid can be used for constructing HLA-A*03:335N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:335N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:336N Protein Expression Plasmid Vector	PHLAP9253326	Plasmid vector containing HLA-A*03:336N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:336N protein. This plasmid can be used for constructing HLA-A*03:336N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:336N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:337N Protein Expression Plasmid Vector	PHLAP9253327	Plasmid vector containing HLA-A*03:337N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:337N protein. This plasmid can be used for constructing HLA-A*03:337N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:337N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:338 Protein Expression Plasmid Vector	PHLAP9253328	Plasmid vector containing HLA-A*03:338 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:338 protein. This plasmid can be used for constructing HLA-A*03:338 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:338 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:339 Protein Expression Plasmid Vector	PHLAP9253329	Plasmid vector containing HLA-A*03:339 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:339 protein. This plasmid can be used for constructing HLA-A*03:339 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:339 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:34 Protein Expression Plasmid Vector	PHLAP9253330	Plasmid vector containing HLA-A*03:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:34 protein. This plasmid can be used for constructing HLA-A*03:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:340 Protein Expression Plasmid Vector	PHLAP9253331	Plasmid vector containing HLA-A*03:340 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:340 protein. This plasmid can be used for constructing HLA-A*03:340 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:340 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:341 Protein Expression Plasmid Vector	PHLAP9253332	Plasmid vector containing HLA-A*03:341 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:341 protein. This plasmid can be used for constructing HLA-A*03:341 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:341 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:342N Protein Expression Plasmid Vector	PHLAP9253333	Plasmid vector containing HLA-A*03:342N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:342N protein. This plasmid can be used for constructing HLA-A*03:342N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:342N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:343 Protein Expression Plasmid Vector	PHLAP9253334	Plasmid vector containing HLA-A*03:343 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:343 protein. This plasmid can be used for constructing HLA-A*03:343 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:343 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:344:01 Protein Expression Plasmid Vector	PHLAP9253335	Plasmid vector containing HLA-A*03:344:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:344:01 protein. This plasmid can be used for constructing HLA-A*03:344:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:344:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:344:02 Protein Expression Plasmid Vector	PHLAP9253336	Plasmid vector containing HLA-A*03:344:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:344:02 protein. This plasmid can be used for constructing HLA-A*03:344:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:344:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:345:01:01 Protein Expression Plasmid Vector	PHLAP9253337	Plasmid vector containing HLA-A*03:345:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:345:01:01 protein. This plasmid can be used for constructing HLA-A*03:345:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:345:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:345:01:02 Protein Expression Plasmid Vector	PHLAP9253338	Plasmid vector containing HLA-A*03:345:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:345:01:02 protein. This plasmid can be used for constructing HLA-A*03:345:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:345:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:346 Protein Expression Plasmid Vector	PHLAP9253339	Plasmid vector containing HLA-A*03:346 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:346 protein. This plasmid can be used for constructing HLA-A*03:346 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:346 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:347 Protein Expression Plasmid Vector	PHLAP9253340	Plasmid vector containing HLA-A*03:347 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:347 protein. This plasmid can be used for constructing HLA-A*03:347 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:347 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:348 Protein Expression Plasmid Vector	PHLAP9253341	Plasmid vector containing HLA-A*03:348 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:348 protein. This plasmid can be used for constructing HLA-A*03:348 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:348 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:349 Protein Expression Plasmid Vector	PHLAP9253342	Plasmid vector containing HLA-A*03:349 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:349 protein. This plasmid can be used for constructing HLA-A*03:349 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:349 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:35 Protein Expression Plasmid Vector	PHLAP9253343	Plasmid vector containing HLA-A*03:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:35 protein. This plasmid can be used for constructing HLA-A*03:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:350:01 Protein Expression Plasmid Vector	PHLAP9253344	Plasmid vector containing HLA-A*03:350:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:350:01 protein. This plasmid can be used for constructing HLA-A*03:350:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:350:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:350:02 Protein Expression Plasmid Vector	PHLAP9253345	Plasmid vector containing HLA-A*03:350:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:350:02 protein. This plasmid can be used for constructing HLA-A*03:350:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:350:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:351 Protein Expression Plasmid Vector	PHLAP9253346	Plasmid vector containing HLA-A*03:351 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:351 protein. This plasmid can be used for constructing HLA-A*03:351 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:351 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:352 Protein Expression Plasmid Vector	PHLAP9253347	Plasmid vector containing HLA-A*03:352 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:352 protein. This plasmid can be used for constructing HLA-A*03:352 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:352 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:353 Protein Expression Plasmid Vector	PHLAP9253348	Plasmid vector containing HLA-A*03:353 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:353 protein. This plasmid can be used for constructing HLA-A*03:353 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:353 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:354 Protein Expression Plasmid Vector	PHLAP9253349	Plasmid vector containing HLA-A*03:354 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:354 protein. This plasmid can be used for constructing HLA-A*03:354 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:354 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:355 Protein Expression Plasmid Vector	PHLAP9253350	Plasmid vector containing HLA-A*03:355 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:355 protein. This plasmid can be used for constructing HLA-A*03:355 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:355 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:356 Protein Expression Plasmid Vector	PHLAP9253351	Plasmid vector containing HLA-A*03:356 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:356 protein. This plasmid can be used for constructing HLA-A*03:356 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:356 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:357N Protein Expression Plasmid Vector	PHLAP9253352	Plasmid vector containing HLA-A*03:357N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:357N protein. This plasmid can be used for constructing HLA-A*03:357N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:357N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:358 Protein Expression Plasmid Vector	PHLAP9253353	Plasmid vector containing HLA-A*03:358 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:358 protein. This plasmid can be used for constructing HLA-A*03:358 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:358 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:359 Protein Expression Plasmid Vector	PHLAP9253354	Plasmid vector containing HLA-A*03:359 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:359 protein. This plasmid can be used for constructing HLA-A*03:359 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:359 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:360 Protein Expression Plasmid Vector	PHLAP9253355	Plasmid vector containing HLA-A*03:360 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:360 protein. This plasmid can be used for constructing HLA-A*03:360 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:360 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:361 Protein Expression Plasmid Vector	PHLAP9253356	Plasmid vector containing HLA-A*03:361 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:361 protein. This plasmid can be used for constructing HLA-A*03:361 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:361 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:362 Protein Expression Plasmid Vector	PHLAP9253357	Plasmid vector containing HLA-A*03:362 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:362 protein. This plasmid can be used for constructing HLA-A*03:362 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:362 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:363 Protein Expression Plasmid Vector	PHLAP9253358	Plasmid vector containing HLA-A*03:363 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:363 protein. This plasmid can be used for constructing HLA-A*03:363 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:363 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:364N Protein Expression Plasmid Vector	PHLAP9253359	Plasmid vector containing HLA-A*03:364N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:364N protein. This plasmid can be used for constructing HLA-A*03:364N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:364N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:365 Protein Expression Plasmid Vector	PHLAP9253360	Plasmid vector containing HLA-A*03:365 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:365 protein. This plasmid can be used for constructing HLA-A*03:365 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:365 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:366 Protein Expression Plasmid Vector	PHLAP9253361	Plasmid vector containing HLA-A*03:366 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:366 protein. This plasmid can be used for constructing HLA-A*03:366 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:366 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:367 Protein Expression Plasmid Vector	PHLAP9253362	Plasmid vector containing HLA-A*03:367 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:367 protein. This plasmid can be used for constructing HLA-A*03:367 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:367 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:368 Protein Expression Plasmid Vector	PHLAP9253363	Plasmid vector containing HLA-A*03:368 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:368 protein. This plasmid can be used for constructing HLA-A*03:368 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:368 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:369 Protein Expression Plasmid Vector	PHLAP9253364	Plasmid vector containing HLA-A*03:369 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:369 protein. This plasmid can be used for constructing HLA-A*03:369 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:369 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:36N Protein Expression Plasmid Vector	PHLAP9253365	Plasmid vector containing HLA-A*03:36N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:36N protein. This plasmid can be used for constructing HLA-A*03:36N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:36N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:37 Protein Expression Plasmid Vector	PHLAP9253366	Plasmid vector containing HLA-A*03:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:37 protein. This plasmid can be used for constructing HLA-A*03:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:370 Protein Expression Plasmid Vector	PHLAP9253367	Plasmid vector containing HLA-A*03:370 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:370 protein. This plasmid can be used for constructing HLA-A*03:370 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:370 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:371 Protein Expression Plasmid Vector	PHLAP9253368	Plasmid vector containing HLA-A*03:371 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:371 protein. This plasmid can be used for constructing HLA-A*03:371 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:371 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:372 Protein Expression Plasmid Vector	PHLAP9253369	Plasmid vector containing HLA-A*03:372 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:372 protein. This plasmid can be used for constructing HLA-A*03:372 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:372 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:373 Protein Expression Plasmid Vector	PHLAP9253370	Plasmid vector containing HLA-A*03:373 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:373 protein. This plasmid can be used for constructing HLA-A*03:373 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:373 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:374N Protein Expression Plasmid Vector	PHLAP9253371	Plasmid vector containing HLA-A*03:374N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:374N protein. This plasmid can be used for constructing HLA-A*03:374N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:374N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:375 Protein Expression Plasmid Vector	PHLAP9253372	Plasmid vector containing HLA-A*03:375 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:375 protein. This plasmid can be used for constructing HLA-A*03:375 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:375 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:376 Protein Expression Plasmid Vector	PHLAP9253373	Plasmid vector containing HLA-A*03:376 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:376 protein. This plasmid can be used for constructing HLA-A*03:376 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:376 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:377 Protein Expression Plasmid Vector	PHLAP9253374	Plasmid vector containing HLA-A*03:377 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:377 protein. This plasmid can be used for constructing HLA-A*03:377 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:377 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:378 Protein Expression Plasmid Vector	PHLAP9253375	Plasmid vector containing HLA-A*03:378 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:378 protein. This plasmid can be used for constructing HLA-A*03:378 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:378 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:379 Protein Expression Plasmid Vector	PHLAP9253376	Plasmid vector containing HLA-A*03:379 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:379 protein. This plasmid can be used for constructing HLA-A*03:379 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:379 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:38 Protein Expression Plasmid Vector	PHLAP9253377	Plasmid vector containing HLA-A*03:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:38 protein. This plasmid can be used for constructing HLA-A*03:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:380 Protein Expression Plasmid Vector	PHLAP9253378	Plasmid vector containing HLA-A*03:380 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:380 protein. This plasmid can be used for constructing HLA-A*03:380 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:380 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:381N Protein Expression Plasmid Vector	PHLAP9253379	Plasmid vector containing HLA-A*03:381N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:381N protein. This plasmid can be used for constructing HLA-A*03:381N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:381N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:382 Protein Expression Plasmid Vector	PHLAP9253380	Plasmid vector containing HLA-A*03:382 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:382 protein. This plasmid can be used for constructing HLA-A*03:382 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:382 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:383 Protein Expression Plasmid Vector	PHLAP9253381	Plasmid vector containing HLA-A*03:383 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:383 protein. This plasmid can be used for constructing HLA-A*03:383 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:383 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:384 Protein Expression Plasmid Vector	PHLAP9253382	Plasmid vector containing HLA-A*03:384 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:384 protein. This plasmid can be used for constructing HLA-A*03:384 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:384 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:385 Protein Expression Plasmid Vector	PHLAP9253383	Plasmid vector containing HLA-A*03:385 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:385 protein. This plasmid can be used for constructing HLA-A*03:385 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:385 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:386 Protein Expression Plasmid Vector	PHLAP9253384	Plasmid vector containing HLA-A*03:386 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:386 protein. This plasmid can be used for constructing HLA-A*03:386 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:386 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:387 Protein Expression Plasmid Vector	PHLAP9253385	Plasmid vector containing HLA-A*03:387 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:387 protein. This plasmid can be used for constructing HLA-A*03:387 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:387 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:388Q Protein Expression Plasmid Vector	PHLAP9253386	Plasmid vector containing HLA-A*03:388Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:388Q protein. This plasmid can be used for constructing HLA-A*03:388Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:388Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:389 Protein Expression Plasmid Vector	PHLAP9253387	Plasmid vector containing HLA-A*03:389 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:389 protein. This plasmid can be used for constructing HLA-A*03:389 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:389 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:39 Protein Expression Plasmid Vector	PHLAP9253388	Plasmid vector containing HLA-A*03:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:39 protein. This plasmid can be used for constructing HLA-A*03:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:390:01 Protein Expression Plasmid Vector	PHLAP9253389	Plasmid vector containing HLA-A*03:390:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:390:01 protein. This plasmid can be used for constructing HLA-A*03:390:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:390:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:390:02 Protein Expression Plasmid Vector	PHLAP9253390	Plasmid vector containing HLA-A*03:390:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:390:02 protein. This plasmid can be used for constructing HLA-A*03:390:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:390:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:391 Protein Expression Plasmid Vector	PHLAP9253391	Plasmid vector containing HLA-A*03:391 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:391 protein. This plasmid can be used for constructing HLA-A*03:391 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:391 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:392 Protein Expression Plasmid Vector	PHLAP9253392	Plasmid vector containing HLA-A*03:392 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:392 protein. This plasmid can be used for constructing HLA-A*03:392 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:392 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:393 Protein Expression Plasmid Vector	PHLAP9253393	Plasmid vector containing HLA-A*03:393 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:393 protein. This plasmid can be used for constructing HLA-A*03:393 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:393 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:394 Protein Expression Plasmid Vector	PHLAP9253394	Plasmid vector containing HLA-A*03:394 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:394 protein. This plasmid can be used for constructing HLA-A*03:394 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:394 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:395 Protein Expression Plasmid Vector	PHLAP9253395	Plasmid vector containing HLA-A*03:395 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:395 protein. This plasmid can be used for constructing HLA-A*03:395 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:395 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:396 Protein Expression Plasmid Vector	PHLAP9253396	Plasmid vector containing HLA-A*03:396 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:396 protein. This plasmid can be used for constructing HLA-A*03:396 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:396 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:397 Protein Expression Plasmid Vector	PHLAP9253397	Plasmid vector containing HLA-A*03:397 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:397 protein. This plasmid can be used for constructing HLA-A*03:397 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:397 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:398 Protein Expression Plasmid Vector	PHLAP9253398	Plasmid vector containing HLA-A*03:398 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:398 protein. This plasmid can be used for constructing HLA-A*03:398 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:398 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:399 Protein Expression Plasmid Vector	PHLAP9253399	Plasmid vector containing HLA-A*03:399 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:399 protein. This plasmid can be used for constructing HLA-A*03:399 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:399 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:40 Protein Expression Plasmid Vector	PHLAP9253400	Plasmid vector containing HLA-A*03:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:40 protein. This plasmid can be used for constructing HLA-A*03:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:400N Protein Expression Plasmid Vector	PHLAP9253401	Plasmid vector containing HLA-A*03:400N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:400N protein. This plasmid can be used for constructing HLA-A*03:400N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:400N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:401 Protein Expression Plasmid Vector	PHLAP9253402	Plasmid vector containing HLA-A*03:401 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:401 protein. This plasmid can be used for constructing HLA-A*03:401 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:401 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:402N Protein Expression Plasmid Vector	PHLAP9253403	Plasmid vector containing HLA-A*03:402N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:402N protein. This plasmid can be used for constructing HLA-A*03:402N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:402N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:403 Protein Expression Plasmid Vector	PHLAP9253404	Plasmid vector containing HLA-A*03:403 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:403 protein. This plasmid can be used for constructing HLA-A*03:403 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:403 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:404N Protein Expression Plasmid Vector	PHLAP9253405	Plasmid vector containing HLA-A*03:404N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:404N protein. This plasmid can be used for constructing HLA-A*03:404N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:404N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:405 Protein Expression Plasmid Vector	PHLAP9253406	Plasmid vector containing HLA-A*03:405 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:405 protein. This plasmid can be used for constructing HLA-A*03:405 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:405 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:406 Protein Expression Plasmid Vector	PHLAP9253407	Plasmid vector containing HLA-A*03:406 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:406 protein. This plasmid can be used for constructing HLA-A*03:406 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:406 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:407 Protein Expression Plasmid Vector	PHLAP9253408	Plasmid vector containing HLA-A*03:407 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:407 protein. This plasmid can be used for constructing HLA-A*03:407 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:407 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:408N Protein Expression Plasmid Vector	PHLAP9253409	Plasmid vector containing HLA-A*03:408N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:408N protein. This plasmid can be used for constructing HLA-A*03:408N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:408N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:409 Protein Expression Plasmid Vector	PHLAP9253410	Plasmid vector containing HLA-A*03:409 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:409 protein. This plasmid can be used for constructing HLA-A*03:409 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:409 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:41 Protein Expression Plasmid Vector	PHLAP9253411	Plasmid vector containing HLA-A*03:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:41 protein. This plasmid can be used for constructing HLA-A*03:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:410 Protein Expression Plasmid Vector	PHLAP9253412	Plasmid vector containing HLA-A*03:410 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:410 protein. This plasmid can be used for constructing HLA-A*03:410 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:410 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:411 Protein Expression Plasmid Vector	PHLAP9253413	Plasmid vector containing HLA-A*03:411 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:411 protein. This plasmid can be used for constructing HLA-A*03:411 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:411 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:412 Protein Expression Plasmid Vector	PHLAP9253414	Plasmid vector containing HLA-A*03:412 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:412 protein. This plasmid can be used for constructing HLA-A*03:412 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:412 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:413 Protein Expression Plasmid Vector	PHLAP9253415	Plasmid vector containing HLA-A*03:413 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:413 protein. This plasmid can be used for constructing HLA-A*03:413 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:413 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:414 Protein Expression Plasmid Vector	PHLAP9253416	Plasmid vector containing HLA-A*03:414 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:414 protein. This plasmid can be used for constructing HLA-A*03:414 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:414 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:415 Protein Expression Plasmid Vector	PHLAP9253417	Plasmid vector containing HLA-A*03:415 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:415 protein. This plasmid can be used for constructing HLA-A*03:415 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:415 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:416 Protein Expression Plasmid Vector	PHLAP9253418	Plasmid vector containing HLA-A*03:416 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:416 protein. This plasmid can be used for constructing HLA-A*03:416 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:416 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:417 Protein Expression Plasmid Vector	PHLAP9253419	Plasmid vector containing HLA-A*03:417 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:417 protein. This plasmid can be used for constructing HLA-A*03:417 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:417 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:418 Protein Expression Plasmid Vector	PHLAP9253420	Plasmid vector containing HLA-A*03:418 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:418 protein. This plasmid can be used for constructing HLA-A*03:418 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:418 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:419 Protein Expression Plasmid Vector	PHLAP9253421	Plasmid vector containing HLA-A*03:419 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:419 protein. This plasmid can be used for constructing HLA-A*03:419 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:419 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:42 Protein Expression Plasmid Vector	PHLAP9253422	Plasmid vector containing HLA-A*03:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:42 protein. This plasmid can be used for constructing HLA-A*03:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:420 Protein Expression Plasmid Vector	PHLAP9253423	Plasmid vector containing HLA-A*03:420 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:420 protein. This plasmid can be used for constructing HLA-A*03:420 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:420 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:421 Protein Expression Plasmid Vector	PHLAP9253424	Plasmid vector containing HLA-A*03:421 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:421 protein. This plasmid can be used for constructing HLA-A*03:421 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:421 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:422 Protein Expression Plasmid Vector	PHLAP9253425	Plasmid vector containing HLA-A*03:422 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:422 protein. This plasmid can be used for constructing HLA-A*03:422 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:422 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:423 Protein Expression Plasmid Vector	PHLAP9253426	Plasmid vector containing HLA-A*03:423 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:423 protein. This plasmid can be used for constructing HLA-A*03:423 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:423 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:424 Protein Expression Plasmid Vector	PHLAP9253427	Plasmid vector containing HLA-A*03:424 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:424 protein. This plasmid can be used for constructing HLA-A*03:424 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:424 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:425 Protein Expression Plasmid Vector	PHLAP9253428	Plasmid vector containing HLA-A*03:425 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:425 protein. This plasmid can be used for constructing HLA-A*03:425 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:425 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:426 Protein Expression Plasmid Vector	PHLAP9253429	Plasmid vector containing HLA-A*03:426 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:426 protein. This plasmid can be used for constructing HLA-A*03:426 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:426 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:427 Protein Expression Plasmid Vector	PHLAP9253430	Plasmid vector containing HLA-A*03:427 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:427 protein. This plasmid can be used for constructing HLA-A*03:427 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:427 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:428 Protein Expression Plasmid Vector	PHLAP9253431	Plasmid vector containing HLA-A*03:428 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:428 protein. This plasmid can be used for constructing HLA-A*03:428 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:428 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:429 Protein Expression Plasmid Vector	PHLAP9253432	Plasmid vector containing HLA-A*03:429 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:429 protein. This plasmid can be used for constructing HLA-A*03:429 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:429 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:43 Protein Expression Plasmid Vector	PHLAP9253433	Plasmid vector containing HLA-A*03:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:43 protein. This plasmid can be used for constructing HLA-A*03:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:430 Protein Expression Plasmid Vector	PHLAP9253434	Plasmid vector containing HLA-A*03:430 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:430 protein. This plasmid can be used for constructing HLA-A*03:430 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:430 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:431 Protein Expression Plasmid Vector	PHLAP9253435	Plasmid vector containing HLA-A*03:431 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:431 protein. This plasmid can be used for constructing HLA-A*03:431 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:431 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:432 Protein Expression Plasmid Vector	PHLAP9253436	Plasmid vector containing HLA-A*03:432 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:432 protein. This plasmid can be used for constructing HLA-A*03:432 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:432 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:433 Protein Expression Plasmid Vector	PHLAP9253437	Plasmid vector containing HLA-A*03:433 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:433 protein. This plasmid can be used for constructing HLA-A*03:433 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:433 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:434 Protein Expression Plasmid Vector	PHLAP9253438	Plasmid vector containing HLA-A*03:434 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:434 protein. This plasmid can be used for constructing HLA-A*03:434 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:434 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:435 Protein Expression Plasmid Vector	PHLAP9253439	Plasmid vector containing HLA-A*03:435 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:435 protein. This plasmid can be used for constructing HLA-A*03:435 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:435 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:436 Protein Expression Plasmid Vector	PHLAP9253440	Plasmid vector containing HLA-A*03:436 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:436 protein. This plasmid can be used for constructing HLA-A*03:436 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:436 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:437Q Protein Expression Plasmid Vector	PHLAP9253441	Plasmid vector containing HLA-A*03:437Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:437Q protein. This plasmid can be used for constructing HLA-A*03:437Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:437Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:438 Protein Expression Plasmid Vector	PHLAP9253442	Plasmid vector containing HLA-A*03:438 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:438 protein. This plasmid can be used for constructing HLA-A*03:438 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:438 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:439 Protein Expression Plasmid Vector	PHLAP9253443	Plasmid vector containing HLA-A*03:439 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:439 protein. This plasmid can be used for constructing HLA-A*03:439 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:439 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:44:01 Protein Expression Plasmid Vector	PHLAP9253444	Plasmid vector containing HLA-A*03:44:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:44:01 protein. This plasmid can be used for constructing HLA-A*03:44:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:44:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:44:02 Protein Expression Plasmid Vector	PHLAP9253445	Plasmid vector containing HLA-A*03:44:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:44:02 protein. This plasmid can be used for constructing HLA-A*03:44:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:44:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:440 Protein Expression Plasmid Vector	PHLAP9253446	Plasmid vector containing HLA-A*03:440 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:440 protein. This plasmid can be used for constructing HLA-A*03:440 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:440 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:441 Protein Expression Plasmid Vector	PHLAP9253447	Plasmid vector containing HLA-A*03:441 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:441 protein. This plasmid can be used for constructing HLA-A*03:441 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:441 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:442 Protein Expression Plasmid Vector	PHLAP9253448	Plasmid vector containing HLA-A*03:442 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:442 protein. This plasmid can be used for constructing HLA-A*03:442 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:442 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:443 Protein Expression Plasmid Vector	PHLAP9253449	Plasmid vector containing HLA-A*03:443 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:443 protein. This plasmid can be used for constructing HLA-A*03:443 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:443 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:444 Protein Expression Plasmid Vector	PHLAP9253450	Plasmid vector containing HLA-A*03:444 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:444 protein. This plasmid can be used for constructing HLA-A*03:444 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:444 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:445 Protein Expression Plasmid Vector	PHLAP9253451	Plasmid vector containing HLA-A*03:445 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:445 protein. This plasmid can be used for constructing HLA-A*03:445 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:445 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:446 Protein Expression Plasmid Vector	PHLAP9253452	Plasmid vector containing HLA-A*03:446 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:446 protein. This plasmid can be used for constructing HLA-A*03:446 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:446 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:447 Protein Expression Plasmid Vector	PHLAP9253453	Plasmid vector containing HLA-A*03:447 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:447 protein. This plasmid can be used for constructing HLA-A*03:447 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:447 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:448N Protein Expression Plasmid Vector	PHLAP9253454	Plasmid vector containing HLA-A*03:448N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:448N protein. This plasmid can be used for constructing HLA-A*03:448N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:448N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:449 Protein Expression Plasmid Vector	PHLAP9253455	Plasmid vector containing HLA-A*03:449 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:449 protein. This plasmid can be used for constructing HLA-A*03:449 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:449 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:45 Protein Expression Plasmid Vector	PHLAP9253456	Plasmid vector containing HLA-A*03:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:45 protein. This plasmid can be used for constructing HLA-A*03:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:450 Protein Expression Plasmid Vector	PHLAP9253457	Plasmid vector containing HLA-A*03:450 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:450 protein. This plasmid can be used for constructing HLA-A*03:450 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:450 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:451 Protein Expression Plasmid Vector	PHLAP9253458	Plasmid vector containing HLA-A*03:451 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:451 protein. This plasmid can be used for constructing HLA-A*03:451 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:451 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:452 Protein Expression Plasmid Vector	PHLAP9253459	Plasmid vector containing HLA-A*03:452 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:452 protein. This plasmid can be used for constructing HLA-A*03:452 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:452 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:453 Protein Expression Plasmid Vector	PHLAP9253460	Plasmid vector containing HLA-A*03:453 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:453 protein. This plasmid can be used for constructing HLA-A*03:453 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:453 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:454 Protein Expression Plasmid Vector	PHLAP9253461	Plasmid vector containing HLA-A*03:454 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:454 protein. This plasmid can be used for constructing HLA-A*03:454 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:454 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:455 Protein Expression Plasmid Vector	PHLAP9253462	Plasmid vector containing HLA-A*03:455 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:455 protein. This plasmid can be used for constructing HLA-A*03:455 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:455 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:456 Protein Expression Plasmid Vector	PHLAP9253463	Plasmid vector containing HLA-A*03:456 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:456 protein. This plasmid can be used for constructing HLA-A*03:456 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:456 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:457 Protein Expression Plasmid Vector	PHLAP9253464	Plasmid vector containing HLA-A*03:457 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:457 protein. This plasmid can be used for constructing HLA-A*03:457 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:457 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:458Q Protein Expression Plasmid Vector	PHLAP9253465	Plasmid vector containing HLA-A*03:458Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:458Q protein. This plasmid can be used for constructing HLA-A*03:458Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:458Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:459 Protein Expression Plasmid Vector	PHLAP9253466	Plasmid vector containing HLA-A*03:459 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:459 protein. This plasmid can be used for constructing HLA-A*03:459 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:459 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:46 Protein Expression Plasmid Vector	PHLAP9253467	Plasmid vector containing HLA-A*03:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:46 protein. This plasmid can be used for constructing HLA-A*03:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:460 Protein Expression Plasmid Vector	PHLAP9253468	Plasmid vector containing HLA-A*03:460 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:460 protein. This plasmid can be used for constructing HLA-A*03:460 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:460 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:461Q Protein Expression Plasmid Vector	PHLAP9253469	Plasmid vector containing HLA-A*03:461Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:461Q protein. This plasmid can be used for constructing HLA-A*03:461Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:461Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:462 Protein Expression Plasmid Vector	PHLAP9253470	Plasmid vector containing HLA-A*03:462 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:462 protein. This plasmid can be used for constructing HLA-A*03:462 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:462 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:463N Protein Expression Plasmid Vector	PHLAP9253471	Plasmid vector containing HLA-A*03:463N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:463N protein. This plasmid can be used for constructing HLA-A*03:463N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:463N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:464Q Protein Expression Plasmid Vector	PHLAP9253472	Plasmid vector containing HLA-A*03:464Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:464Q protein. This plasmid can be used for constructing HLA-A*03:464Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:464Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:465 Protein Expression Plasmid Vector	PHLAP9253473	Plasmid vector containing HLA-A*03:465 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:465 protein. This plasmid can be used for constructing HLA-A*03:465 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:465 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:466 Protein Expression Plasmid Vector	PHLAP9253474	Plasmid vector containing HLA-A*03:466 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:466 protein. This plasmid can be used for constructing HLA-A*03:466 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:466 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:467 Protein Expression Plasmid Vector	PHLAP9253475	Plasmid vector containing HLA-A*03:467 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:467 protein. This plasmid can be used for constructing HLA-A*03:467 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:467 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:468 Protein Expression Plasmid Vector	PHLAP9253476	Plasmid vector containing HLA-A*03:468 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:468 protein. This plasmid can be used for constructing HLA-A*03:468 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:468 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:469 Protein Expression Plasmid Vector	PHLAP9253477	Plasmid vector containing HLA-A*03:469 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:469 protein. This plasmid can be used for constructing HLA-A*03:469 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:469 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:47 Protein Expression Plasmid Vector	PHLAP9253478	Plasmid vector containing HLA-A*03:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:47 protein. This plasmid can be used for constructing HLA-A*03:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:470 Protein Expression Plasmid Vector	PHLAP9253479	Plasmid vector containing HLA-A*03:470 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:470 protein. This plasmid can be used for constructing HLA-A*03:470 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:470 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:471 Protein Expression Plasmid Vector	PHLAP9253480	Plasmid vector containing HLA-A*03:471 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:471 protein. This plasmid can be used for constructing HLA-A*03:471 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:471 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:472 Protein Expression Plasmid Vector	PHLAP9253481	Plasmid vector containing HLA-A*03:472 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:472 protein. This plasmid can be used for constructing HLA-A*03:472 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:472 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:473 Protein Expression Plasmid Vector	PHLAP9253482	Plasmid vector containing HLA-A*03:473 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:473 protein. This plasmid can be used for constructing HLA-A*03:473 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:473 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:474 Protein Expression Plasmid Vector	PHLAP9253483	Plasmid vector containing HLA-A*03:474 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:474 protein. This plasmid can be used for constructing HLA-A*03:474 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:474 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:475 Protein Expression Plasmid Vector	PHLAP9253484	Plasmid vector containing HLA-A*03:475 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:475 protein. This plasmid can be used for constructing HLA-A*03:475 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:475 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:476 Protein Expression Plasmid Vector	PHLAP9253485	Plasmid vector containing HLA-A*03:476 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:476 protein. This plasmid can be used for constructing HLA-A*03:476 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:476 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:477 Protein Expression Plasmid Vector	PHLAP9253486	Plasmid vector containing HLA-A*03:477 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:477 protein. This plasmid can be used for constructing HLA-A*03:477 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:477 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:478 Protein Expression Plasmid Vector	PHLAP9253487	Plasmid vector containing HLA-A*03:478 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:478 protein. This plasmid can be used for constructing HLA-A*03:478 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:478 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:479 Protein Expression Plasmid Vector	PHLAP9253488	Plasmid vector containing HLA-A*03:479 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:479 protein. This plasmid can be used for constructing HLA-A*03:479 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:479 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:48 Protein Expression Plasmid Vector	PHLAP9253489	Plasmid vector containing HLA-A*03:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:48 protein. This plasmid can be used for constructing HLA-A*03:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:480 Protein Expression Plasmid Vector	PHLAP9253490	Plasmid vector containing HLA-A*03:480 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:480 protein. This plasmid can be used for constructing HLA-A*03:480 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:480 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:481 Protein Expression Plasmid Vector	PHLAP9253491	Plasmid vector containing HLA-A*03:481 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:481 protein. This plasmid can be used for constructing HLA-A*03:481 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:481 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:482 Protein Expression Plasmid Vector	PHLAP9253492	Plasmid vector containing HLA-A*03:482 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:482 protein. This plasmid can be used for constructing HLA-A*03:482 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:482 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:483N Protein Expression Plasmid Vector	PHLAP9253493	Plasmid vector containing HLA-A*03:483N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:483N protein. This plasmid can be used for constructing HLA-A*03:483N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:483N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:484 Protein Expression Plasmid Vector	PHLAP9253494	Plasmid vector containing HLA-A*03:484 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:484 protein. This plasmid can be used for constructing HLA-A*03:484 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:484 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:485 Protein Expression Plasmid Vector	PHLAP9253495	Plasmid vector containing HLA-A*03:485 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:485 protein. This plasmid can be used for constructing HLA-A*03:485 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:485 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:486 Protein Expression Plasmid Vector	PHLAP9253496	Plasmid vector containing HLA-A*03:486 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:486 protein. This plasmid can be used for constructing HLA-A*03:486 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:486 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:487 Protein Expression Plasmid Vector	PHLAP9253497	Plasmid vector containing HLA-A*03:487 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:487 protein. This plasmid can be used for constructing HLA-A*03:487 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:487 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:488 Protein Expression Plasmid Vector	PHLAP9253498	Plasmid vector containing HLA-A*03:488 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:488 protein. This plasmid can be used for constructing HLA-A*03:488 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:488 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:489 Protein Expression Plasmid Vector	PHLAP9253499	Plasmid vector containing HLA-A*03:489 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:489 protein. This plasmid can be used for constructing HLA-A*03:489 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:489 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:49 Protein Expression Plasmid Vector	PHLAP9253500	Plasmid vector containing HLA-A*03:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:49 protein. This plasmid can be used for constructing HLA-A*03:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:490 Protein Expression Plasmid Vector	PHLAP9253501	Plasmid vector containing HLA-A*03:490 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:490 protein. This plasmid can be used for constructing HLA-A*03:490 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:490 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:491 Protein Expression Plasmid Vector	PHLAP9253502	Plasmid vector containing HLA-A*03:491 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:491 protein. This plasmid can be used for constructing HLA-A*03:491 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:491 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:492Q Protein Expression Plasmid Vector	PHLAP9253503	Plasmid vector containing HLA-A*03:492Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:492Q protein. This plasmid can be used for constructing HLA-A*03:492Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:492Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:493 Protein Expression Plasmid Vector	PHLAP9253504	Plasmid vector containing HLA-A*03:493 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:493 protein. This plasmid can be used for constructing HLA-A*03:493 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:493 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:494N Protein Expression Plasmid Vector	PHLAP9253505	Plasmid vector containing HLA-A*03:494N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:494N protein. This plasmid can be used for constructing HLA-A*03:494N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:494N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:495 Protein Expression Plasmid Vector	PHLAP9253506	Plasmid vector containing HLA-A*03:495 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:495 protein. This plasmid can be used for constructing HLA-A*03:495 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:495 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:496 Protein Expression Plasmid Vector	PHLAP9253507	Plasmid vector containing HLA-A*03:496 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:496 protein. This plasmid can be used for constructing HLA-A*03:496 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:496 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:497 Protein Expression Plasmid Vector	PHLAP9253508	Plasmid vector containing HLA-A*03:497 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:497 protein. This plasmid can be used for constructing HLA-A*03:497 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:497 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:498 Protein Expression Plasmid Vector	PHLAP9253509	Plasmid vector containing HLA-A*03:498 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:498 protein. This plasmid can be used for constructing HLA-A*03:498 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:498 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:499 Protein Expression Plasmid Vector	PHLAP9253510	Plasmid vector containing HLA-A*03:499 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:499 protein. This plasmid can be used for constructing HLA-A*03:499 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:499 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:50 Protein Expression Plasmid Vector	PHLAP9253511	Plasmid vector containing HLA-A*03:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:50 protein. This plasmid can be used for constructing HLA-A*03:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:500 Protein Expression Plasmid Vector	PHLAP9253512	Plasmid vector containing HLA-A*03:500 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:500 protein. This plasmid can be used for constructing HLA-A*03:500 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:500 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:501Q Protein Expression Plasmid Vector	PHLAP9253513	Plasmid vector containing HLA-A*03:501Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:501Q protein. This plasmid can be used for constructing HLA-A*03:501Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:501Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:502 Protein Expression Plasmid Vector	PHLAP9253514	Plasmid vector containing HLA-A*03:502 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:502 protein. This plasmid can be used for constructing HLA-A*03:502 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:502 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:503 Protein Expression Plasmid Vector	PHLAP9253515	Plasmid vector containing HLA-A*03:503 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:503 protein. This plasmid can be used for constructing HLA-A*03:503 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:503 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:504N Protein Expression Plasmid Vector	PHLAP9253516	Plasmid vector containing HLA-A*03:504N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:504N protein. This plasmid can be used for constructing HLA-A*03:504N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:504N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:505 Protein Expression Plasmid Vector	PHLAP9253517	Plasmid vector containing HLA-A*03:505 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:505 protein. This plasmid can be used for constructing HLA-A*03:505 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:505 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:506 Protein Expression Plasmid Vector	PHLAP9253518	Plasmid vector containing HLA-A*03:506 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:506 protein. This plasmid can be used for constructing HLA-A*03:506 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:506 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:507 Protein Expression Plasmid Vector	PHLAP9253519	Plasmid vector containing HLA-A*03:507 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:507 protein. This plasmid can be used for constructing HLA-A*03:507 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:507 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:508 Protein Expression Plasmid Vector	PHLAP9253520	Plasmid vector containing HLA-A*03:508 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:508 protein. This plasmid can be used for constructing HLA-A*03:508 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:508 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:509 Protein Expression Plasmid Vector	PHLAP9253521	Plasmid vector containing HLA-A*03:509 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:509 protein. This plasmid can be used for constructing HLA-A*03:509 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:509 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:51:01 Protein Expression Plasmid Vector	PHLAP9253522	Plasmid vector containing HLA-A*03:51:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:51:01 protein. This plasmid can be used for constructing HLA-A*03:51:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:51:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:51:02 Protein Expression Plasmid Vector	PHLAP9253523	Plasmid vector containing HLA-A*03:51:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:51:02 protein. This plasmid can be used for constructing HLA-A*03:51:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:51:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:510 Protein Expression Plasmid Vector	PHLAP9253524	Plasmid vector containing HLA-A*03:510 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:510 protein. This plasmid can be used for constructing HLA-A*03:510 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:510 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:511 Protein Expression Plasmid Vector	PHLAP9253525	Plasmid vector containing HLA-A*03:511 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:511 protein. This plasmid can be used for constructing HLA-A*03:511 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:511 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:512 Protein Expression Plasmid Vector	PHLAP9253526	Plasmid vector containing HLA-A*03:512 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:512 protein. This plasmid can be used for constructing HLA-A*03:512 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:512 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:513 Protein Expression Plasmid Vector	PHLAP9253527	Plasmid vector containing HLA-A*03:513 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:513 protein. This plasmid can be used for constructing HLA-A*03:513 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:513 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:514N Protein Expression Plasmid Vector	PHLAP9253528	Plasmid vector containing HLA-A*03:514N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:514N protein. This plasmid can be used for constructing HLA-A*03:514N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:514N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:52 Protein Expression Plasmid Vector	PHLAP9253529	Plasmid vector containing HLA-A*03:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:52 protein. This plasmid can be used for constructing HLA-A*03:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:53 Protein Expression Plasmid Vector	PHLAP9253530	Plasmid vector containing HLA-A*03:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:53 protein. This plasmid can be used for constructing HLA-A*03:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:54 Protein Expression Plasmid Vector	PHLAP9253531	Plasmid vector containing HLA-A*03:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:54 protein. This plasmid can be used for constructing HLA-A*03:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:55 Protein Expression Plasmid Vector	PHLAP9253532	Plasmid vector containing HLA-A*03:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:55 protein. This plasmid can be used for constructing HLA-A*03:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:56:01:01 Protein Expression Plasmid Vector	PHLAP9253533	Plasmid vector containing HLA-A*03:56:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:56:01:01 protein. This plasmid can be used for constructing HLA-A*03:56:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:56:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:56:01:02 Protein Expression Plasmid Vector	PHLAP9253534	Plasmid vector containing HLA-A*03:56:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:56:01:02 protein. This plasmid can be used for constructing HLA-A*03:56:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:56:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:57 Protein Expression Plasmid Vector	PHLAP9253535	Plasmid vector containing HLA-A*03:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:57 protein. This plasmid can be used for constructing HLA-A*03:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:58 Protein Expression Plasmid Vector	PHLAP9253536	Plasmid vector containing HLA-A*03:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:58 protein. This plasmid can be used for constructing HLA-A*03:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:59 Protein Expression Plasmid Vector	PHLAP9253537	Plasmid vector containing HLA-A*03:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:59 protein. This plasmid can be used for constructing HLA-A*03:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:60 Protein Expression Plasmid Vector	PHLAP9253538	Plasmid vector containing HLA-A*03:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:60 protein. This plasmid can be used for constructing HLA-A*03:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:61 Protein Expression Plasmid Vector	PHLAP9253539	Plasmid vector containing HLA-A*03:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:61 protein. This plasmid can be used for constructing HLA-A*03:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:62:01:01 Protein Expression Plasmid Vector	PHLAP9253540	Plasmid vector containing HLA-A*03:62:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:62:01:01 protein. This plasmid can be used for constructing HLA-A*03:62:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:62:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:62:01:02 Protein Expression Plasmid Vector	PHLAP9253541	Plasmid vector containing HLA-A*03:62:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:62:01:02 protein. This plasmid can be used for constructing HLA-A*03:62:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:62:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:63 Protein Expression Plasmid Vector	PHLAP9253542	Plasmid vector containing HLA-A*03:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:63 protein. This plasmid can be used for constructing HLA-A*03:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:64 Protein Expression Plasmid Vector	PHLAP9253543	Plasmid vector containing HLA-A*03:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:64 protein. This plasmid can be used for constructing HLA-A*03:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:65 Protein Expression Plasmid Vector	PHLAP9253544	Plasmid vector containing HLA-A*03:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:65 protein. This plasmid can be used for constructing HLA-A*03:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:66 Protein Expression Plasmid Vector	PHLAP9253545	Plasmid vector containing HLA-A*03:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:66 protein. This plasmid can be used for constructing HLA-A*03:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:67 Protein Expression Plasmid Vector	PHLAP9253546	Plasmid vector containing HLA-A*03:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:67 protein. This plasmid can be used for constructing HLA-A*03:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:68N Protein Expression Plasmid Vector	PHLAP9253547	Plasmid vector containing HLA-A*03:68N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:68N protein. This plasmid can be used for constructing HLA-A*03:68N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:68N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:69N Protein Expression Plasmid Vector	PHLAP9253548	Plasmid vector containing HLA-A*03:69N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:69N protein. This plasmid can be used for constructing HLA-A*03:69N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:69N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:70 Protein Expression Plasmid Vector	PHLAP9253549	Plasmid vector containing HLA-A*03:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:70 protein. This plasmid can be used for constructing HLA-A*03:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:71 Protein Expression Plasmid Vector	PHLAP9253550	Plasmid vector containing HLA-A*03:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:71 protein. This plasmid can be used for constructing HLA-A*03:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:72 Protein Expression Plasmid Vector	PHLAP9253551	Plasmid vector containing HLA-A*03:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:72 protein. This plasmid can be used for constructing HLA-A*03:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:73 Protein Expression Plasmid Vector	PHLAP9253552	Plasmid vector containing HLA-A*03:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:73 protein. This plasmid can be used for constructing HLA-A*03:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:74 Protein Expression Plasmid Vector	PHLAP9253553	Plasmid vector containing HLA-A*03:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:74 protein. This plasmid can be used for constructing HLA-A*03:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:75 Protein Expression Plasmid Vector	PHLAP9253554	Plasmid vector containing HLA-A*03:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:75 protein. This plasmid can be used for constructing HLA-A*03:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:76 Protein Expression Plasmid Vector	PHLAP9253555	Plasmid vector containing HLA-A*03:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:76 protein. This plasmid can be used for constructing HLA-A*03:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:77 Protein Expression Plasmid Vector	PHLAP9253556	Plasmid vector containing HLA-A*03:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:77 protein. This plasmid can be used for constructing HLA-A*03:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:78 Protein Expression Plasmid Vector	PHLAP9253557	Plasmid vector containing HLA-A*03:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:78 protein. This plasmid can be used for constructing HLA-A*03:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:79 Protein Expression Plasmid Vector	PHLAP9253558	Plasmid vector containing HLA-A*03:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:79 protein. This plasmid can be used for constructing HLA-A*03:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:80 Protein Expression Plasmid Vector	PHLAP9253559	Plasmid vector containing HLA-A*03:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:80 protein. This plasmid can be used for constructing HLA-A*03:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:81 Protein Expression Plasmid Vector	PHLAP9253560	Plasmid vector containing HLA-A*03:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:81 protein. This plasmid can be used for constructing HLA-A*03:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:82 Protein Expression Plasmid Vector	PHLAP9253561	Plasmid vector containing HLA-A*03:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:82 protein. This plasmid can be used for constructing HLA-A*03:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:83 Protein Expression Plasmid Vector	PHLAP9253562	Plasmid vector containing HLA-A*03:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:83 protein. This plasmid can be used for constructing HLA-A*03:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:84 Protein Expression Plasmid Vector	PHLAP9253563	Plasmid vector containing HLA-A*03:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:84 protein. This plasmid can be used for constructing HLA-A*03:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:85 Protein Expression Plasmid Vector	PHLAP9253564	Plasmid vector containing HLA-A*03:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:85 protein. This plasmid can be used for constructing HLA-A*03:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:86 Protein Expression Plasmid Vector	PHLAP9253565	Plasmid vector containing HLA-A*03:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:86 protein. This plasmid can be used for constructing HLA-A*03:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:87 Protein Expression Plasmid Vector	PHLAP9253566	Plasmid vector containing HLA-A*03:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:87 protein. This plasmid can be used for constructing HLA-A*03:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:88 Protein Expression Plasmid Vector	PHLAP9253567	Plasmid vector containing HLA-A*03:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:88 protein. This plasmid can be used for constructing HLA-A*03:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:89:01 Protein Expression Plasmid Vector	PHLAP9253568	Plasmid vector containing HLA-A*03:89:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:89:01 protein. This plasmid can be used for constructing HLA-A*03:89:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:89:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:89:02 Protein Expression Plasmid Vector	PHLAP9253569	Plasmid vector containing HLA-A*03:89:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:89:02 protein. This plasmid can be used for constructing HLA-A*03:89:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:89:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:90 Protein Expression Plasmid Vector	PHLAP9253570	Plasmid vector containing HLA-A*03:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:90 protein. This plasmid can be used for constructing HLA-A*03:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:91N Protein Expression Plasmid Vector	PHLAP9253571	Plasmid vector containing HLA-A*03:91N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:91N protein. This plasmid can be used for constructing HLA-A*03:91N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:91N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:92 Protein Expression Plasmid Vector	PHLAP9253572	Plasmid vector containing HLA-A*03:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:92 protein. This plasmid can be used for constructing HLA-A*03:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*03:93 Protein Expression Plasmid Vector	PHLAP9253573	Plasmid vector containing HLA-A*03:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:93 protein. This plasmid can be used for constructing HLA-A*03:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:94 Protein Expression Plasmid Vector	PHLAP9253574	Plasmid vector containing HLA-A*03:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:94 protein. This plasmid can be used for constructing HLA-A*03:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:95 Protein Expression Plasmid Vector	PHLAP9253575	Plasmid vector containing HLA-A*03:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:95 protein. This plasmid can be used for constructing HLA-A*03:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:96 Protein Expression Plasmid Vector	PHLAP9253576	Plasmid vector containing HLA-A*03:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:96 protein. This plasmid can be used for constructing HLA-A*03:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:97 Protein Expression Plasmid Vector	PHLAP9253577	Plasmid vector containing HLA-A*03:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:97 protein. This plasmid can be used for constructing HLA-A*03:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:98 Protein Expression Plasmid Vector	PHLAP9253578	Plasmid vector containing HLA-A*03:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:98 protein. This plasmid can be used for constructing HLA-A*03:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*03:99 Protein Expression Plasmid Vector	PHLAP9253579	Plasmid vector containing HLA-A*03:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*03:99 protein. This plasmid can be used for constructing HLA-A*03:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*03:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:01 Protein Expression Plasmid Vector	PHLAP9253580	Plasmid vector containing HLA-A*11:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:01 protein. This plasmid can be used for constructing HLA-A*11:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:02 Protein Expression Plasmid Vector	PHLAP9253581	Plasmid vector containing HLA-A*11:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:02 protein. This plasmid can be used for constructing HLA-A*11:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:03 Protein Expression Plasmid Vector	PHLAP9253582	Plasmid vector containing HLA-A*11:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:03 protein. This plasmid can be used for constructing HLA-A*11:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:04 Protein Expression Plasmid Vector	PHLAP9253583	Plasmid vector containing HLA-A*11:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:04 protein. This plasmid can be used for constructing HLA-A*11:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:05 Protein Expression Plasmid Vector	PHLAP9253584	Plasmid vector containing HLA-A*11:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:05 protein. This plasmid can be used for constructing HLA-A*11:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:06 Protein Expression Plasmid Vector	PHLAP9253585	Plasmid vector containing HLA-A*11:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:06 protein. This plasmid can be used for constructing HLA-A*11:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:07 Protein Expression Plasmid Vector	PHLAP9253586	Plasmid vector containing HLA-A*11:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:07 protein. This plasmid can be used for constructing HLA-A*11:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:08 Protein Expression Plasmid Vector	PHLAP9253587	Plasmid vector containing HLA-A*11:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:08 protein. This plasmid can be used for constructing HLA-A*11:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:09 Protein Expression Plasmid Vector	PHLAP9253588	Plasmid vector containing HLA-A*11:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:09 protein. This plasmid can be used for constructing HLA-A*11:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:10 Protein Expression Plasmid Vector	PHLAP9253589	Plasmid vector containing HLA-A*11:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:10 protein. This plasmid can be used for constructing HLA-A*11:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:11 Protein Expression Plasmid Vector	PHLAP9253590	Plasmid vector containing HLA-A*11:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:11 protein. This plasmid can be used for constructing HLA-A*11:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:12 Protein Expression Plasmid Vector	PHLAP9253591	Plasmid vector containing HLA-A*11:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:12 protein. This plasmid can be used for constructing HLA-A*11:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:13 Protein Expression Plasmid Vector	PHLAP9253592	Plasmid vector containing HLA-A*11:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:13 protein. This plasmid can be used for constructing HLA-A*11:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:14 Protein Expression Plasmid Vector	PHLAP9253593	Plasmid vector containing HLA-A*11:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:14 protein. This plasmid can be used for constructing HLA-A*11:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:15 Protein Expression Plasmid Vector	PHLAP9253594	Plasmid vector containing HLA-A*11:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:15 protein. This plasmid can be used for constructing HLA-A*11:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:16 Protein Expression Plasmid Vector	PHLAP9253595	Plasmid vector containing HLA-A*11:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:16 protein. This plasmid can be used for constructing HLA-A*11:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:17 Protein Expression Plasmid Vector	PHLAP9253596	Plasmid vector containing HLA-A*11:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:17 protein. This plasmid can be used for constructing HLA-A*11:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:18 Protein Expression Plasmid Vector	PHLAP9253597	Plasmid vector containing HLA-A*11:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:18 protein. This plasmid can be used for constructing HLA-A*11:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:19 Protein Expression Plasmid Vector	PHLAP9253598	Plasmid vector containing HLA-A*11:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:19 protein. This plasmid can be used for constructing HLA-A*11:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:20 Protein Expression Plasmid Vector	PHLAP9253599	Plasmid vector containing HLA-A*11:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:20 protein. This plasmid can be used for constructing HLA-A*11:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:21 Protein Expression Plasmid Vector	PHLAP9253600	Plasmid vector containing HLA-A*11:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:21 protein. This plasmid can be used for constructing HLA-A*11:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:22 Protein Expression Plasmid Vector	PHLAP9253601	Plasmid vector containing HLA-A*11:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:22 protein. This plasmid can be used for constructing HLA-A*11:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:23 Protein Expression Plasmid Vector	PHLAP9253602	Plasmid vector containing HLA-A*11:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:23 protein. This plasmid can be used for constructing HLA-A*11:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:24 Protein Expression Plasmid Vector	PHLAP9253603	Plasmid vector containing HLA-A*11:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:24 protein. This plasmid can be used for constructing HLA-A*11:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:25 Protein Expression Plasmid Vector	PHLAP9253604	Plasmid vector containing HLA-A*11:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:25 protein. This plasmid can be used for constructing HLA-A*11:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:26 Protein Expression Plasmid Vector	PHLAP9253605	Plasmid vector containing HLA-A*11:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:26 protein. This plasmid can be used for constructing HLA-A*11:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:27 Protein Expression Plasmid Vector	PHLAP9253606	Plasmid vector containing HLA-A*11:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:27 protein. This plasmid can be used for constructing HLA-A*11:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:28 Protein Expression Plasmid Vector	PHLAP9253607	Plasmid vector containing HLA-A*11:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:28 protein. This plasmid can be used for constructing HLA-A*11:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:29 Protein Expression Plasmid Vector	PHLAP9253608	Plasmid vector containing HLA-A*11:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:29 protein. This plasmid can be used for constructing HLA-A*11:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:30 Protein Expression Plasmid Vector	PHLAP9253609	Plasmid vector containing HLA-A*11:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:30 protein. This plasmid can be used for constructing HLA-A*11:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:31 Protein Expression Plasmid Vector	PHLAP9253610	Plasmid vector containing HLA-A*11:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:31 protein. This plasmid can be used for constructing HLA-A*11:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:32 Protein Expression Plasmid Vector	PHLAP9253611	Plasmid vector containing HLA-A*11:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:32 protein. This plasmid can be used for constructing HLA-A*11:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:33 Protein Expression Plasmid Vector	PHLAP9253612	Plasmid vector containing HLA-A*11:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:33 protein. This plasmid can be used for constructing HLA-A*11:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:34 Protein Expression Plasmid Vector	PHLAP9253613	Plasmid vector containing HLA-A*11:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:34 protein. This plasmid can be used for constructing HLA-A*11:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:35 Protein Expression Plasmid Vector	PHLAP9253614	Plasmid vector containing HLA-A*11:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:35 protein. This plasmid can be used for constructing HLA-A*11:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:36 Protein Expression Plasmid Vector	PHLAP9253615	Plasmid vector containing HLA-A*11:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:36 protein. This plasmid can be used for constructing HLA-A*11:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:37 Protein Expression Plasmid Vector	PHLAP9253616	Plasmid vector containing HLA-A*11:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:37 protein. This plasmid can be used for constructing HLA-A*11:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:38 Protein Expression Plasmid Vector	PHLAP9253617	Plasmid vector containing HLA-A*11:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:38 protein. This plasmid can be used for constructing HLA-A*11:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:39 Protein Expression Plasmid Vector	PHLAP9253618	Plasmid vector containing HLA-A*11:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:39 protein. This plasmid can be used for constructing HLA-A*11:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:40 Protein Expression Plasmid Vector	PHLAP9253619	Plasmid vector containing HLA-A*11:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:40 protein. This plasmid can be used for constructing HLA-A*11:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:41 Protein Expression Plasmid Vector	PHLAP9253620	Plasmid vector containing HLA-A*11:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:41 protein. This plasmid can be used for constructing HLA-A*11:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:42 Protein Expression Plasmid Vector	PHLAP9253621	Plasmid vector containing HLA-A*11:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:42 protein. This plasmid can be used for constructing HLA-A*11:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:43 Protein Expression Plasmid Vector	PHLAP9253622	Plasmid vector containing HLA-A*11:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:43 protein. This plasmid can be used for constructing HLA-A*11:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:44 Protein Expression Plasmid Vector	PHLAP9253623	Plasmid vector containing HLA-A*11:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:44 protein. This plasmid can be used for constructing HLA-A*11:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:45 Protein Expression Plasmid Vector	PHLAP9253624	Plasmid vector containing HLA-A*11:01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:45 protein. This plasmid can be used for constructing HLA-A*11:01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:46 Protein Expression Plasmid Vector	PHLAP9253625	Plasmid vector containing HLA-A*11:01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:46 protein. This plasmid can be used for constructing HLA-A*11:01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:47 Protein Expression Plasmid Vector	PHLAP9253626	Plasmid vector containing HLA-A*11:01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:47 protein. This plasmid can be used for constructing HLA-A*11:01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:48 Protein Expression Plasmid Vector	PHLAP9253627	Plasmid vector containing HLA-A*11:01:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:48 protein. This plasmid can be used for constructing HLA-A*11:01:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:49 Protein Expression Plasmid Vector	PHLAP9253628	Plasmid vector containing HLA-A*11:01:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:49 protein. This plasmid can be used for constructing HLA-A*11:01:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:50 Protein Expression Plasmid Vector	PHLAP9253629	Plasmid vector containing HLA-A*11:01:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:50 protein. This plasmid can be used for constructing HLA-A*11:01:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
